Annotatsiya: *Ushbu maqolada boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirishning nazariy va lingvodidaktik asoslari tadqiq etildi. Nutqni rivojlantirishdagi lingvistik va kommunikativ komponentlari tahlil qilindi va o‘ quvchilarning dars jarayonida olgan bilimlarini amaliy nutq ko‘ nikmalariga aylantirishda ijodiy topshiriqlarning didaktik imkoniyatlari ochib berildi. Nutqiy savodxonlik rivojlanishining asosiy ko‘ rsatkichlari sifatida nutqning to‘ g‘ riligi, mazmundorligi, bog‘ liqligi va kommunikativ mosligi belgilanadi. Natijada “til tizimi - ijodiy topshiriqlar - kommunikativ mazmun”dan iborat model taklif etiladi. Ushbu model boshlang‘ ich sinf o‘ quvchisining grammatik va leksik bilimlarini faollashtirish orqali, ularni kommunikativ vaziyatlarda qo‘ llash va nutqiy savodxonlikka erishishning o‘ zaro bog‘ liqligini aks ettiradi.*

Kalit so‘ zlar: *boshlang‘ ich sinf, nutq tili, nutq rivojlanishi, lingvodidaktika, ijodiy topshiriqlar, til bilimlari, kommunikativlik, mazmundorlik, aloqadorlik.*

СПЕЦИФИЧЕСКИЕ ЛИНГВОДИДАКТИЧЕСКИЕ ОСОБЕННОСТИ РАЗВИТИЯ РЕЧИ УЧАЩИХСЯ НАЧАЛЬНЫХ КЛАССОВ

Аннотация: *В данной статье исследуются теоретические и лингводидактические основы развития речи учащихся начальных классов. Анализируются лингвистические и коммуникативные компоненты развития речи и раскрываются дидактические возможности творческих заданий в преобразовании знаний, полученных учащимися в ходе урока, в практические речевые навыки. В качестве основных показателей развития речевой грамотности определяются правильность, содержательность, связность и коммуникативная совместимость речи. В результате предлагается модель, состоящая из “языковой системы - творческих заданий - коммуникативного содержания.” Данная модель отражает взаимосвязь использования грамматических и лексических знаний учащегося начальных классов в коммуникативных ситуациях и достижения речевой грамотности путем их активизации.*

Ключевые слова: *начальный класс, язык речи, развитие речи, лингводидактика, творческие задания, языковые знания, коммуникативность, содержательность, связность.*

SPECIFIC LINGUODIDACTIC FEATURES OF SPEECH DEVELOPMENT IN PRIMARY SCHOOL STUDENTS

Abstract: *This article explores the theoretical and linguodidactic foundations of speech development in primary school students. The linguistic and communicative components of speech development are analyzed, and the didactic possibilities of creative tasks in transforming students’ knowledge acquired during the lesson into practical speech skills are revealed. As the main indicators of speech literacy development, the correctness, substance, coherence, and communicative compatibility of speech are defined. As a result, a model consisting of “linguistic system - creative tasks - communicative content” is proposed. This model reflects the relationship between using a primary school student’s grammatical and lexical knowledge in communicative situations and achieving speech literacy by activating them.*

Keywords: *primary school, language of speech, speech development, linguodidactics, creative tasks, linguistic knowledge, communicativeness, substance, coherence.*

KIRISH.

Maktablarda boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirish ta’lim-tarbiya jarayonining muhim yo‘ nalishlaridan biridir. Nutqiy savodxonlik o‘ quvchining o‘ z fikrini aniq, tushunarli, grammatik jihatdan to‘ g‘ ri va

madaniyatli tarzda yetkaza olish qobiliyatini o‘ z ichiga oladi. Bu qobiliyatni samarali shakllantirishda lingvodidaktika nutqni rivojlantirish negizidagi tilni o‘ qitishning nazariy va amaliy asoslarini belgilaydi.

Boshlang‘ ich sinflarda o‘ quvchilarning nutqini rivojlantirishning o‘ ziga xos lingvodidaktik xususiyatlari, eng avvalo ularning yosh psixologik xususiyatlari bilan bog‘ liq. Bu davrda bolalarning so‘ z boyligi jadal rivojlanib boradi, lekin til birliklarini ongli ravishda qo‘ llash tajribasi kam bo‘ ladi. Shuning uchun, o‘ qitish jarayonida lug‘ at bilan ishlashni o‘ ziga xos zamonaviy usullarda, tizimli ravishda tashkil etish, yangi so‘ zlarning ma’nosini tushuntirish, ularni nutq jarayonida va matn yozish tarkibida qo‘ llashga o‘ rgatish maqsadga muvofiq. Shu sababli, boshlang‘ ich sinflarda nutqni rivojlantirish masalasi til bilimlarini berishning qo‘ shimcha komponenti emas, balki umuman, o‘ quv jarayonining sifatini belgilaydigan asosiy pedagogik vazifalardan biri sifatida qaralishi kerak. Aynan ushbu omillar zamonaviy ta’lim jarayonida o‘ quvchilarning muloqotchanlik faolligini oshirish, mustaqil mushohada yuritish hamda o‘ z pozitsiyasini dalillash kompetensiyasini shakllantirishga bo‘ lgan ehtiyojni belgilaydi. Bu esa, o‘ z navbatida, tadqiqot mavzusining ilmiy va amaliy ustuvorligini ko‘ rsatadi.

ADABIYOTLAR TAHLILI.

Hozirgi lingvodidaktikada til o‘ rganish tushunchasi grammatik qoidalarni yodlashdan kommunikativ harakatga yo‘ naltirilgan. Nutqning ijtimoiy manbalarini asoslashda L.S.Vygotskiy ta’limotiga tayanish maqsadga muvofiq. Ushbu yondashuvga ko‘ ra, nutq dastlab ijtimoiy muomala muhitida shakllanib, keyinchalik bolaning ichki verbal-mantiqiy tafakkuri bilan integratsiyalashadi [1]. Bu qarash boshlang‘ ich sinf o‘ quvchisining nutqini individual qobiliyat deb emas, balki boshqa odamlar bilan kommunikativ munosabat jarayonida shakllanadigan harakat sifatida qarashga asos beradi. Ushbu nazariy pozitsiyaning lingvodidaktik ahamiyati shundaki: bolaga til birliklarini o‘ rgatishning o‘ zi yetarli emas, masala u birliklarni qanday o‘ rgatishda, ya’ni ularni qo‘ llashga imkon beradigan kommunikativ muhit yaratilishi kerak. Nutqning tabiiy rivojlanish mexanizmlari, avvalo, ta’lim jarayonidagi interaktiv harakatlarda namoyon bo‘ ladi. Xususan, o‘ qituvchi savollari, o‘ quvchilarning o‘ zaro dialogi, juftlikdagi topshiriqlar, birgalikdagi matn yaratish hamda muammoli holatlarni bartaraf etishga qaratilgan amaliyotlar o‘ quvchining nutqiy kompetensiyasini shakllantiruvchi amaliy omillar hisoblanadi.

So‘ nggi yillardagi tadqiqotlarda o‘ quvchilarning nutqiy faoliyatini rivojlantirishda didaktik o‘ yinlar, she’riy matnlar va dialoglarning metodik imkoniyatlari ko‘ rsatiladi [2]. Bundan o‘ quvchilarning nutqini rivojlantirish uchun o‘ quvchining nutqiy faoliyatini faollashtiradigan mazmunli va kommunikativ muhitni tashkil etish zarurati ko‘ rinadi.

Ammo bunday tadqiqotlar masalaning bir qismi, nutqning alohida komponentlariga, masalan mazmunan bog‘ lanishli nutqqa, so‘ z boyligiga yoki ma’lum metodik usullarga yo‘ naltirilgan. Bu yondashuvlar o‘ ziga yarasha ahamiyatli bo‘ lsa-da, boshlang‘ ich sinf o‘ quvchisining nutqini fonologik, leksik, grammatik, diskursiv va pragmatik komponentlar birligi sifatida tushuntirish masalalari yetarli darajada kompleks tarzda tadqiq etilmagan. Ayniqsa, tilning lingvodidaktik xususiyatlari bilan kommunikativ til o‘ qitish tamoyillarini birgalikda o‘ rganish masalasi nazariy va metodik jihatdan qo‘ shimcha tadqiqotni talab etadi. Ushbu ilmiy bo‘ shliqdan kelib chiqib, maqolada boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirishning o‘ ziga xos lingvodidaktik xususiyatlarini aniqlash, nutq rivojlanishining mazmuniy tarkibini tizimlashtirish maqsad qilib olindi.

TADQIQOT METODOLOGIYASI.

Mazkur tadqiqot muayyan o‘ qitish metodikasining tajriba-sinov samaradorligini o‘ lchashga emas, balki boshlang‘ ich sinf o‘ quvchilarining nutqiy faoliyatini rivojlantirish muammosining lingvodidaktik mohiyatini nazariy manbalar va zamonaviy kommunikativ yondashuvlar prizmasi orqali qayta konseptual tahlil qilishga qaratilgan.

Tadqiqotning obyekti sifatida boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirish jarayoni olindi. Tadqiqot predmeti esa nutq rivojlanishiga ta’sir etuvchi lingvodidaktik omillar, til birliklarining kommunikativ qo‘ llanilishi, dialogik o‘ zaro munosabat, kontekstual topshiriqlar, metodik tayanchlar va nutq kompetensiyasini baholash tamoyillari bilan chegaralandi.

Maqolada boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirish xususiyatlarini aniqlashda nazariy va qiyosiy tahlil, tizimli sintez metodlari kompleks qo‘ llanildi. Nazariy tahlil orqali so‘ zlashuv nutqining lingvistik, psixologik va pedagogik jihatlari o‘ rganildi, leksik rivojlanish, grammatik qo‘ llanilish, bog‘ lanishli va dialogik nutq, kommunikativ hamda pragmatik ko‘ nikmalar asosiy tahlil birliklari sifatida tizimlashtirildi. Lingvodidaktik yondashuvlarning nutqni rivojlantirishdagi imkoniyatlari qiyosiy tahlil natijasida aniqlandi. Olingan nazariy qarashlarni umumlashtirish natijasida nutqni rivojlantirish jarayoni-til birliklarini o‘ zlashtirish, kommunikativ faoliyat, ijtimoiy muloqot va uning semantik tuzilmalarni yaratish hodisalarining uzviy aloqadorlikdagi yaxlit tizimi sifatida namoyon bo‘ ldi.

Nutq bir vaqtning o‘ zida til tizimi, psixologik harakat va ijtimoiy kommunikatsiya bo‘ lganligi sababli, uni faqat grammatika yoki leksika doirasida tahlil qilish yetarli emas. Shu sababli, tadqiqotda lingvistik va pedagogik kategoriyalar bir-biridan alohida emas, integratsiyalashgan tizim sifatida qaraldi.

NATIJALAR VA ULARNING TAHLILI.

Tadqiqot natijalari boshlang‘ ich sinf o‘ quvchilarining nutqini o‘ stirish jarayonini biryoqlama yondashuv yaniy muayyan metod yoki alohida til komponenti doirasida cheklab bo‘ lmasligini ko‘ rsatadi. Nutqiy rivojlanish- lisoniy tizim elementlarining egallanishi va faol muloqot amaliyotining uzviy sintezi negizida kechadi. Bu negizning bir tomonida o‘ quvchiga zarur bo‘ lgan til resurslari-lug‘ aviy birliklar, grammatik shakllar, sintaktik konstruksiyalar va fonologik qoliplar joylashsa, ikkinchi tomonida shu resurslarni ma’lum kommunikativ vaziyatda qo‘ llash harakati turadi. Ushbu ikki jarayon bir-biridan ajralgan holda o‘ quvchi til haqida bilimga ega bo‘ lishi mumkin, lekin u bilimni nutqda erkin qo‘ llay olmasligi mumkin.

Kichik maktab yoshidagi o‘ quvchilarda nutq ko‘ nikmalarini shakllantirish lisoniy tizimning barcha bosqichlari - fonetika, morfologiya va sintaksisning o‘ ziga xosliklarini hisobga oluvchi izchil lingvodidaktik yondashuvni talab etadi. Bunda dastlab, singarmonik va orfoepik ko‘ nikmalarni qaror toptirish uchun to‘ g‘ ri talaffuz hamda savodli yozuvni rivojlantirishga qaratilgan fonetik-artikulyatsion mashg‘ ulotlar va interaktiv topshiriqlar tatbiq etilishi lozim. Ikkinchidan, tilning agglyutinativ xususiyatiga bog‘ liq qo‘ shimchalarni to‘ g‘ ri qo‘ shish va tovush o‘ zgarishlarini o‘ zlashtirish amaliy o‘ yinlar, ko‘ rgazmali topshiriqlar orqali shakllantiriladi. Uchinchidan, tilning tabiiy sintaktik qurilishini egallash uchun rasmlar asosida gap tuzish, gaplarni mantiqiy izchillikda bayon qilish, monolog va dialogik nutqni rivojlantiruvchi vaziyatli topshiriqlar samarali hisoblanadi. Shunday qilib, nutq o‘ stirishning amaliy-metodik evolyutsiyasi fonetik-artikulyatsion mashqlardan boshlanib, 1-2-sinflarda lug‘ at boyligini oshirish, 2-3-sinflarda mantiqiy modellashtirish va 3-4-sinflarda rolli o‘ yinlar, dialoglar va kommunikativ vaziyatlar orqali o‘ quvchilarning erkin, to‘ g‘ ri, mantiqiy va madaniy nutqini shakllantirish bosqichlarini o‘ z ichiga oladi.

Bundan ko‘ rinib turibdiki, boshlang‘ ich sinf darsida yangi so‘ zning ma’nosini aytish yoki grammatik shakl qoidasini tushuntirish til o‘ rganishning boshlang‘ ich bosqichi hisoblanadi. Ammo lingvodidaktik jarayon shu yerda to‘ xtab qolsa, o‘ quvchining produktiv nutqi yetarli darajada rivojlanmaydi. So‘ z yoki grammatik shakl yangi kontekstda qo‘ llanilgandagina u faol kommunikativ resursga aylanadi.

Bu holatni leksik rivojlanish misolida aniqroq ko‘ rish mumkin. O‘ quvchi ma’lum bir so‘ zning ma’nosini tanishi passiv leksik bilimni bildiradi. Shu so‘ zni berilgan gapda qo‘ llashi reproduktiv darajaga, uni oldindan berilmagan yangi kommunikativ vaziyatda mustaqil tanlab qo‘ llashi produktiv darajaga tegishli. Demak, lug‘ at boyligining rivojlanishini faqat so‘ zlar soni bilan o‘ lchash lingvodidaktik jihatdan yetarli emas. Uning funksional samaradorligi, diskursiv tabiati va muayyan muloqot maqsadiga xizmat qilish darajasi ham e’tiborga olinishi kerak.

Nutqni rivojlantirish amaliyotida matn segmenti bilan ishlash strategiyasi yetakchi o‘ rin egallaydi. Xususan, matnni o‘ qish, qayta bayon qila olish, savollarga javob berish, matn ustida kritik mulohaza yuritish hamda dialogik va monologik diskurslarni loyihalashga qaratilgan topshiriqlar o‘ quvchilarning mantiqiy-bog‘ lanishli nutq kompetensiyasini rivojlantirishga xizmat qiladi. Bunda o‘ qituvchining namuna sifatidagi to‘ g‘ ri nutqi va o‘ quvchilarni erkin fikr bildirishga qiziqtirishi muhim.

Yana bir lingvodidaktik xususiyat – milliy va madaniy komponentni o‘ qitish mazmuniga kiritish. Folklordan foydalanish, hususan, maqollar, ertaklar hamda bolalar badiiy asarlari asosida tashkil etilgan ijodiy topshiriqlar o‘ quvchilarning lug‘ aviy imkoniyatlarini kengaytirish bilan birga, til o‘ rganishga rag‘ batlantiradi va muloqot ko‘ nikmalarini sezilarli darajada oshiradi. Shuningdek, o‘ quvchilar nutqini o‘ stirishda zamonaviy ta’lim texnologiyalari-interfaol metodlar, ijodiy topshiriqlar hamda AKT imkoniyatlaridan unumli foydalanish muhim amaliy ahamiyatga ega. Bu o‘ quvchining darsdagi tashabbuskorligini oshirib, ularga o‘ z mulohazalarini ochiq-oydin va erkin bildirishlariga zamin yaratadi.

Nutq rivojlantirishdagi yana bir xususiyat grammatik bilim bilan kommunikativ grammatikaning farqida ko‘ rinadi. Boshlang‘ ich sinf o‘ quvchisi grammatik qoidani to‘ g‘ ri aytishi yoki ma’lum grammatik shaklning nomini tanishi mumkin. Biroq, bu bilimni nutqda qo‘ llash uchun shaklni bilish yetarli emas, u bilan birga ma’nosi va funksiyasini ham anglashi lozim. Shuning uchun grammatikani o‘ rgatishda “qoid – misol – mashq” sxemasini kommunikativ kontekst bilan to‘ ldirish, ayniqsa, uni ijodiy topshiriqlar orqali amalga oshirish maqsadga muvofiq.

Grammatik birlikni o‘ rgatishning lingvodidaktik ketma-ketligi “shakl – ma’no – funksiya – kontekst – produktiv qo‘ llash” tarzida qurilgani ma’qul. Bunday yondashuvda o‘ quvchi grammatik konstruksiyaning qanday tuzilganini bilibgina qolmay, uning qanday ma’noni bildirishini va qaysi kommunikativ vaziyatda qo‘ llanilishini ham tushunadi. Bu Hallidayning tilni ma’no yaratuvchi ijtimoiy tizim sifatida tushuntirishi bilan nazariy jihatdan uyg‘ unlashadi [3].

Nutqiy taraqqiyotning navbatdagi muhim xususiyatlaridan biri dialogik muloqot tizimidir. Dialog faqatgina ta’limiy usul vazifasini o‘ tamay, balki nutq shakllanishining ichki mexanizmi sifatida namoyon bo‘ ladi. Muloqot jarayonida o‘ quvchi bir vaqtning o‘ zida axborotni qabul qilish, uni anglash, javob mazmunini tuzish, mos leksik birliklarni tanlash, sintaktik qurilmalarni shakllantirish hamda suhbatdoshining reaksiyasini baholash kabi murakkab kognitiv harakatlar majmuasini amalga oshiradi. Shu sababli, dialogik nutq o‘ quvchining lisoniy imkoniyatlarini harakatga keltirish bilan birga, uning kommunikativ strategiyalarini qaror toptirishga xizmat qiladi.

Shuni alohida ta’kidlash kerakki, muloqotdagi dialoglar sonini nutqiy rivojlanishning mutlaq va qat’iy mezoniy ko‘ rsatkichi sifatida baholash ilmiy jihatdan o‘ zini oqlamaydi. Darsda o‘ quvchilarning ko‘ p gapirishi ularning nutq sifati yuqori degani emas. Dialog sifatli bo‘ lishi uchun o‘ quvchi boshqa odamning fikriga javob berishi, qo‘ shimcha savol berishi, o‘ z fikrini tushuntirishi, dalillashi yoki boshqa pozitsiyani taqqoslashi kerak. Shu sababli dialogik nutqni baholashda nutq sonidan ko‘ ra, kommunikativ mazmunning qurilishi asosiy ko‘ rsatkich bo‘ lishi kerak.

Nutq rivojlanishining keyingi muhim jihati qo‘ llanilayotgan metodik tayanchlarning xarakterida namoyon bo‘ ladi. Boshlang‘ ich sinf o‘ quvchilarining til resurslari bir xil darajada bo‘ lmaganligi sababli, barcha o‘ quvchidan birdan erkin gapirishni talab qilish ayrim bolalarning kommunikativ passivligiga olib kelishi mumkin. Bunda tayanch so‘ zlar, gap boshlanmalari, rasmlar, sxemalar, yetakchi savollar va dialog namunalari o‘ quvchiga nutqni tashkil etishga yordam beradi. Ularning asosiy vazifasi o‘ quvchiga mustaqil nutqni boshlash uchun ko‘ maklashish, motivatsiya berishdan iborat.

Nutq rivojlanishining yana bir muhim xususiyati nutqning diskursiv xarakterida. O‘ quvchi yakka gapda grammatik jihatdan to‘ g‘ ri gapirishi mumkin, lekin bir necha gap orasida mazmunli bog‘ lanish yaratishda qiyinchilikka duch kelishi mumkin. Shu sababli, bog‘ liqli nutqni rivojlantirishda o‘ quvchiga faqat “matnni qayta ayt” degan topshiriq emas, balki voqeaning sababini tushuntirish, voqealarni izchil joylashtirish, qahramonga baho berish, o‘ z fikrini qo‘ shish va matnni boshqa holat bilan bog‘ lash kabi topshiriqlar samarali bo‘ ladi.

Bu yerda ijodiy topshiriqlarning lingvodidaktik ahamiyati ortadi. Ijodiy topshiriq o‘ quvchini tayyor matnni takrorlashdan yangi mazmun yaratishga o‘ tkazadi. Masalan, matnning davomini mustaqil tuzish, rasm asosida voqea yaratish, dialogga yangi xulosa taqdim etish yoki ma’lum bir voqeani boshqa qahramon nomidan bayon qilish o‘ quvchidan leksik va grammatik resurslarni yangi kombinatsiyada qo‘ llashni talab etadi. Bu kabi topshiriqlar faqatgina nutqini o‘ stirish bilan cheklanmay, bolaning kognitiv faoliyatini ham kuchli harakatga keltiradi. Deylik, “Tejamkorlik” mavzusidagi darsda o‘ quvchiga suv va elektr energiyasini tejash yuzasidan o‘ z xulosalarini tuzish va uni himoya qilish vazifasi berildi. Bu jarayonda bola beixtiyor sabab va oqibatni bog‘ lashga, fikrini dalilla bilan asoslashga o‘ rganadi. “Qizil kitobga kiritilgan hayvonlar” mavzusidagi yondashuvimiz ham shunga o‘ xshash: yo‘ qolib borayotgan jonzotlar yoki o‘ simliklar nomidan ommaga urojat yozish mashg‘ uloti o‘ quvchining ijodiy hayolotini ishga solish bilan bir qatorda, axborotni muayyan kommunikativ maqsadga moslab ifodalash ko‘ nikmasini shakllantiradi.

Izlanishlarimiz natijasida aniqlangan yana bir muhim holat - nutqni baholash mezonlarini kengaytirish ehtiyoji mavjud. Boshlang‘ ich sinflarda nutqni baholash ko‘ pincha grammatik to‘ g‘ rilik, so‘ zlarni aniq aytish yoki berilgan matnni o‘ qish, qayta aytish bilan chegaralanishi mumkin. Biroq, kommunikativ kompetensiyaning to‘ liq tarkibi bunday o‘ lchovga sig‘ maydi. Shu sababli, nutq rivojlanishini baholashda kamida to‘ rtta mezon hisobga olinishi ma’qul: til to‘ g‘ riligi, mazmundorlik, bog‘ liqlik va kommunikativ muvofiqlik. Til to‘ g‘ riligi grammatik va leksik me’yorlarni qo‘ llashni, mazmundorlik fikrda aniq ma’no borligini, bog‘ liqlik fikrlarning izchilligini, kommunikativ muvofiqlik esa nutqning vaziyatga va maqsadga muvofiqligini bildiradi.

Bu mezonlarni shakllantirishda esa, yuqorida aytib o‘ tilganidek, ijodiy xarakterdagi topshiriqlar yetakchi didaktik manba vazifasini o‘ taydi. Bunday topshiriqlar o‘ quvchini tayyor til shablonlarini mexanik ravishda takrorlashdan uzib, lisoniy birliklardan yangi muloqot sharoitlarida mustaqil foydalanishga, o‘ z fikrini cheklovlarsiz bayon etishga hamda nutqiy maqsadga mos so‘ z va sintaktik qurilmalarni to‘ g‘ ri saralashga undaydi. Shu bois, ijodiy topshiriqlar nazariy til bilimlarini bevosita amaliy nutqiy faoliyatga ko‘ chiradigan, matnning mantiqiy, mazmuniy va kommunikativ mukammalligini ta’minlaydigan asosiy mexanizmdir.

Ushbu natijalar asosida boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirishni “til tizimi – ijodiy topshiriqlar – kommunikativ mazmun” birligi orqali tushuntirishdan iborat deb belgilaymiz. Bunda til tizimi – o‘ quvchining fonetik, leksik, grammatik va sintaktik bilimlarini nutqiy faoliyatda qo‘ llash imkonini beruvchi lingvistik asos sifatida qaraladi. Ijodiy topshiriqlar esa – o‘ quvchining mustaqil fikrlashi, nutqiy faolligi va ijodiy ifoda imkoniyatlarini rivojlantirishga yo‘ naltirilgan metodik vositalar hisoblanadi. O‘ quvchining til birliklaridan real yoki modellashtirilgan muloqot vaziyatlarida maqsadga muvofiq va mazmunli foydalanishini ta’minlovchi nutqiy komponent bo‘ lsa- kommunikativ mazmunni tashkil qiladi.

Demak, bu modelda grammatik va leksik bilimlar boshlang‘ ich resurs sifatida, ijodiy topshiriqlar shu resurslarni faollashtiruvchi mexanizm sifatida, produktiv nutq esa rivojlanishning asosiy natijasi sifatida qaraladi. Bu yondashuvning nazariy ahamiyati shundan iboratki, u nutq rivojlanishini faqat til o‘ qitish metodikasining xususiy vazifasi emas, balki lingvistik, psixolingvistik va pedagogik jarayonlarning kesishuvida yuzaga keladigan kompleks hodisa sifatida tushuntiradi. Amaliy jihatdan esa til o‘ rganish darslarida topshiriqlar tizimini qayta ko‘ rib chiqish, baholash mezonlarini kengaytirish va muntazam muloqotni darsning tizimli komponentiga aylantirish uchun asos bo‘ la oladi.

XULOSA.

Boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirish masalasini lingvodidaktik jihatdan ta hlil qilish nutqning faqat til bilimlarini o‘ zlashtirishga tenglashtirilmasligi kerakligini ko‘ rsatdi. Nutq rivojlanishi til birliklarini bilish, ularni

kommunikativ vaziyatda qo‘ llash, ma’noli bayon qilish, dialogga kirishish va o‘ z nutqini nazorat qilish jarayonlarining o‘ zaro bog‘ liq tizimidan iborat. Bunda ta’sir etuvchi asosiy mexanizmlar ijodiy topshiriqlar hisoblanadi.

Tadqiqotning asosiy xulosasi shundan iborat: boshlang‘ ich sinf o‘ quvchisining nutqini rivojlantirishning lingvodidaktik samaradorligi til resursi bilan kommunikativ harakat va unga sharoit yaratuvchi ijodiy topshiriqlarning integratsiyasiga bog‘ liq. Nutq rivojlanishining o‘ ziga xos xususiyati uning ijtimoiy o‘ zaro munosabat bilan chambarchas bog‘ liq ekanligida. Shuning uchun boshlang‘ ich sinf darsida o‘ quvchining nutqiy ishtirok etish imkoniyatlarini kengaytirish metodik jihatdan asosiy vazifa bo‘ lishi kerak.

Grammatik bilimni kommunikativ kompetensiyaga aylantirish uchun shakl, mazmun, funksiya va kontekstni bir-biridan ajratmaslik maqsadga muvofiq. Leksik rivojlanishda ham so‘ zlarning sonidan ko‘ ra, ularning faol va funksional qo‘ llanilishi ustuvorlikka ega bo‘ lishi kerak. Bog‘ lanishli nutqni shakllantirishda esa matnni takrorlashdan tashqari, o‘ quvchining fikrini yaratishga, voqeani turlicha bayon qilishga, dalillashga va ijodiy qayta qurishga yo‘ naltirilgan topshiriqlar ko‘ paytirilishi zarur. Bularni amalga oshirish uchun o‘ quvchiga tanish ijtimoiy-madaniy masalalardan, bolalar adabiyotidan, kundalik kommunikativ vaziyatlardan va muammoli vaziyatlardan foydalanish maqsadga muvofiqdir.

Keyingi tadqiqotlarda ushbu yuqorida keltirilgan boshlang‘ ich sinf o‘ quvchilarining nutqini rivojlantirish modelini, nutqiy kompetensiyaning yosh xususiyatlariga mos diagnostik mezonlar va indikatorlarini validatsiya qilish, tajriba va nazorat guruhlari asosida pedagogik tajriba-sinov o‘ tkazish va natijalarni statistik usullar orqali taqqoslash zarur. Shuningdek, boshlang‘ ich sinf o‘ quvchilarining nutqiy rivojlanishiga til muhiti, ta’lim muhiti, ijtimoiy-madaniy omillar va raqamli kommunikatsiya vositalarining ta’sirini kompleks tarzda o‘ rganish asosiy ilmiy tadqiqot yo‘ nalishlaridan biri sifatida qaraladi.

DEVELOPING GENERAL PHYSICAL ENDURANCE IN STUDENTS.

Abstract: *The development of general endurance among students engaged in general physical training was studied. Reducing fatigue in students caused by exercises, improving their physical condition is one of the important and interesting topics. The paper considers one of the ways to increase endurance, its results are demonstrated. According to the results of the study, there was a development in students of general endurance. The search for a variant of optimal exercises for the development of general endurance among students, gives grounds to assert about the beneficial effect on the body of students of moderate running loads for a given time.*

Keywords: *Endurance, students, loads, breathing, physical education.*

РАЗВИТИЕ ОБЩЕЙ ФИЗИЧЕСКОЙ ВЫНОСЛИВОСТИ У СТУДЕНТОВ.

Аннотация: *В статье изучено развитие общей выносливости у учащихся общеобразовательных школ в процессе их физической подготовки. Снижение утомляемости учащихся от физических упражнений и улучшение их физического состояния является одной из важных и интересных тем. В статье рассматриваются пути повышения выносливости и представлены достигнутые результаты. По результатам исследования, у учащихся наблюдалось развитие общей выносливости. Поиск оптимального варианта упражнений для развития общей выносливости у учащихся даёт основание утверждать о благотворном влиянии умеренных беговых нагрузок на их организм в течение определённого времени.*

Ключевые слова: *Выносливость, студенты, нагрузки, дыхание, физическая культура, индекс массы тела (ИМТ) в исследовании*

KIRISH.

Inson hayoti davomida turli jismoniy ta’sirlarga duchor bo‘ ladi.ta yuklamaga. Ular davomiyligi bo‘ yicha turlicha bo‘ lib, chidamlilikka - qobiliyatga bog‘ liq. odamning biror ishni uzoq vaqt davomida alomatlarsiz bajarishi toliqish.

U inson organizmining ko‘ plab omillari va xususiyatlariga, energiya almashinuvi, vazn va yosh kabi. Chidamlilik yetarli darajada rivojlanmoqda tez. Buni fizika fanidan sinov me’yorlarini taqqoslash orqali ko‘ rish mumkin.

TADQIQOTNING MAQSADI

talabalarda umumiy chidamlilikni rivojlantirish,

umumiy jismoniy tayyorgarlik bilan shug‘ ullanuvchilar. Natijada kamaytirish mumkin talabalarning jismoniy mashqlar natijasida charchashi, jismoniy holatining yaxshilanishi va kam harakatli turmush tarzida salomatlik.

TADQIQOT NATIJALARI.

Chidamlilikni ikki guruhga bo‘ lish mumkin: maxsus va umumiy. Birinchisi muayyan faoliyat turini bajarish uchun xarakterlidir.Ish qobiliyatini pasaytirmasdan. Uni bir necha turga bo‘ lish mumkin: tezkor, tezlik - kuch, koordinatsion, kuch.

1. Tezkor - tez harakatlarni bajarish.

2. Tezkor-kuchli-chaqonlik faoliyatini tez bajarish.

3. Koordinatsion - texnik jihatdan murakkab mashqlarni bajarish.

4. Kuch - tortish mashqlarini bajarish.

Ikkinchisi esa umumiy chidamlilikni – organizmning jalb qiluvchi har qanday ishni yuqori samaradorlik bilan uzoq muddatli bajarish ko‘ plab mushak guruhlarini harakatga keltiradigan va yetarlicha yuqori talablar qo‘ yadigan yurak-qon tomir, nafas olish va markaziy asab tizimlariga. Umumiy chidamlilik maxsus chidamlilikni rivojlantirish uchun asos yaratadi. Tadqiqotda tana vazni indeksi (TVI) mavjud.

Bu kattalik bilvosita baholashga imkon beradi - massa normalmi yoki u

yetarli emas yoki ortiqcha bo‘ lib, bu insonning umumiy salomatligi, ayniqsa agar u kam harakatli turmush tarziga ega bo‘ lsa. Me’yordan chetga chiqish hollarida

kerakli muolaja. Ayni paytda Jahon sog‘ liqni saqlash tashkiloti TVI quyidagi talqinni qabul qildi:

- 18,5 dan kam - tana vazni yetarli emas

- 18,5 - 24,99 - me’yor - 25 va undan ortiq

- ortiqcha tana vazni.

Bunday usul har doim ham to‘ g‘ ri bo‘ lavermaydi, chunki inson organizmining

bo‘ y va vazn har bir kishi uchun o‘ ta individualdir va ularni faqat tana vazni indeksiga. Biroq u tadqiqot uchun juda mos keladi.

Salomatlikni tegishli darajada saqlash uchun quyidagilarga e’tibor qaratish talab etiladi: chidamlilik, chunki u yurak-qon tomir va nafas olish tizimlari [5; 6].

Tadqiqot 6 kishidan iborat guruhda o‘ tkazildi, haftasiga 2 marta umumiy jismoniy tarbiya - tajriba guruhi. Yugurish mashqlari bajarildi 15 daqiqa davomida sport maydonchasi\zalda mashqlar bajarish. Har birining vazifasi talabalar o‘ zlariga qulay bo‘ lgan maksimal vaqt tezligida yugurishlari kerak oraliq. 2 oy yoki 16 ta mashg‘ ulot davomida to‘ plangan barcha ma’lumotlar qayd etildi. jadvalga. Ushbu tajribada asosiy son maksimal oraliqdir. Talabaning jismoniy mashqlardan yengil charchashigacha bo‘ lgan vaqt. Shuningdek dagi o‘ zgarishlarni kuzatish uchun barcha talabalar uchun tana vazni indekslari aniqlandi. Tana vazni va bo‘ y uzunligi nisbati turlicha bo‘ lgan odamlar uchun umumiy chidamlilik. Bundan tashqari

tajriba guruhi, tekshirish uchun nazorat guruhi bor edi umumiy chidamlilikni rivojlantirish uchun tanlangan usulning muvaffaqiyati. Quyida jadval keltirilgan

olingan natijalar bilan.

Yengil charchoq paydo bo‘ lish vaqti daqiqalarda, keyin Q.

MUAMMOLI VA LOYIHAVIY YONDASHUVLAR ASOSIDA DIFFERENSIAL TENGLAMALAR BO‘ YICHA KOMPETENSIYALARNI SHAKLLANTIRISH

Abduvakhobov Sherzodbek Ikromjon o‘ g‘ li
NVPMM metodisti, NamDTU
ORCID:0009-0004-1668-4598
sherzodbekabduvakhobov@mail.ru

Annotatsiya: *Ushbu maqolada differensial tenglamalar kursida talabalarning matematik kompetensiyalarini rivojlantirishda muammoli (problem-based) va loyihaviy (project-based) yondashuvlarning metodik imkoniyatlari tahlil qilinadi. Tadqiqotning asosiy e’tibori ushbu yondashuvlarni amalga oshirishning metodik tamoyillari, ularni qo‘ llash shart-sharoitlari va kompetensiyalarning tarkibiy qismlariga ta’sir etishiga qaratilgan. Maqolada empirik tajriba va natijalar keltirilmaydi, faqatgina metodika va uni qo‘ llash sharoitlari hamda kutiladigan pedagogik samaralar nazariy jihatdan asoslanadi. Muammoli yondashuv qisqa muddatli, kognitiv ziddiyatga asoslangan bo‘ lib, differensial tenglamalar turlarini aniqlash va yechim strategiyasini tanlash ko‘ nikmalarini shakllantiradi. Loyihaviy yondashuv uzoq muddatli, real muammolarni matematik modellashtirish orqali yechishga yo‘ naltirilgan bo‘ lib, sonli usullar va natijalarni talqin etish kompetensiyalarini rivojlantiradi. Ikkala yondashuvni integratsiyalash differensial tenglamalar bo‘ yicha kognitiv, faoliyatli, refleksiv va kommunikativ kompetensiyalarni har tomonlama shakllantirishning samarali metodik strategiyasi sifatida tavsiya etiladi.*

Kalit so‘ zlar: *differensial tenglamalar, muammoli yondashuv, loyihaviy yondashuv, kompetensiya, matematik modellashtirish, metodika, kompetensiyaviy yondashuv, faoliyatli ta’lim*

DEVELOPING COMPETENCIES IN DIFFERENTIAL EQUATIONS BASED ON PROBLEM-BASED AND PROJECT-BASED APPROACHES

Abstract: *This article analyzes the methodological possibilities of problem-based and project-based approaches in developing students’ mathematical competencies in the differential equations course. The main focus is directed at the methodological principles of implementing these approaches, the conditions for their application, and their impact on the components of competencies. The article presents no empirical experiments or results; it only provides a theoretical foundation of the methodology, application conditions, and expected pedagogical outcomes. The problem-based approach is short-term, based on cognitive conflict, and serves to develop skills in identifying types of differential equations and selecting solution strategies. The project-based approach is long-term, focused on solving real problems through mathematical modeling, and develops competencies in numerical methods and interpretation of results. The integration of both approaches is recommended as an effective methodological strategy for the comprehensive formation of cognitive, activity-based, reflective, and communicative competencies in differential equations.*

Keywords: *differential equations, problem-based approach, project-based approach, competence, mathematical modeling, methodology, competency-based approach, activity-based learning*

ФОРМИРОВАНИЕ КОМПЕТЕНЦИЙ В ОБЛАСТИ ДИФФЕРЕНЦИАЛЬНЫХ УРАВНЕНИЙ НА ОСНОВЕ ПРОБЛЕМНО-ОРИЕНТИРОВАННОГО И ПРОЕКТНОГО ПОДХОДОВ

Аннотация: *В данной статье анализируются методические возможности проблемного и проектного подходов в развитии математических компетенций студентов при изучении дифференциальных уравнений. Основное внимание уделяется методическим принципам реализации этих подходов, условиям их применения и влиянию на компоненты компетенций. В статье не приводятся эмпирические эксперименты и результаты, только теоретически обосновываются методика, условия применения и ожидаемые педагогические эффекты. Проблемный подход является краткосрочным, основан на когнитивном конфликте и формирует навыки определения типов дифференциальных уравнений и выбора стратегии решения. Проектный подход является долгосрочным, ориентирован на решение реальных проблем через математическое моделирование и развивает компетенции в численных методах и интерпретации результатов. Интеграция обоих подходов рекомендуется как эффективная методическая стратегия для всестороннего формирования когнитивных, деятельностных, рефлексивных и коммуникативных компетенций по дифференциальным уравнениям.*

Ключевые слова: *дифференциальные уравнения, проблемный подход, проектный подход, компетенция, математическое моделирование, методика, компетентностный подход, деятельностное обучение*

KIRISH

Differensial tenglamalar zamonaviy fan va texnikaning asosiy matematik apparatlaridan biri hisoblanadi. Ushbu fan mexanika, fizika, biologiya, ekologiya, iqtisodiyot va boshqa ko‘plab sohalardagi real jarayonlarni matematik modellashtirishda markaziy o‘rinni egallaydi. Differensial tenglamalar yordamida o‘zgaruvchan jarayonlarning dinamikasi, evolyutsiyasi va barqarorligi kabi fundamental masalalarni o‘rganish mumkin. Shu sababli, differensial tenglamalar kursi ko‘pgina texnik va tabiiy yo‘nalishlar bo‘yicha oliy ta’lim dasturlarining majburiy komponenti hisoblanadi.

Biroq oliy ta’lim amaliyotida differensial tenglamalar ko‘pincha formal hisoblash usullarini o‘rgatishga asoslangan. Talabalar asosan tayyor berilgan tenglamalarni analitik yoki sonli usullarda yechishga o‘rgatiladi, real muammoni differensial tenglama ko‘rinishida ifodalash, matematik model qurish va yechimni tahlil qilish kabi kompetensiyalar yetarli darajada shakllantirilmaydi [1]. Natijada, talabalar differensial tenglamalarni amaliy faoliyatda qo‘llash ko‘nikmasini egallamay qoladilar. Bu holat zamonaviy ta’lim talablari bilan ziddiyatga kirishadi, chunki bugungi kunda muhandis va tadqiqotchilardan nafaqat hisoblash malakalari, balki murakkab real tizimlarni matematik modellashtirish va tahlil qilish qobiliyati talab etiladi.

Zamonaviy ta’lim metodikasi talabalarning faolligini, mustaqil fikrlashini va amaliy ko‘nikmalarini rivojlantirishga qaratilgan yondashuvlarni taklif etadi. Xususan, muammoli yondashuv (problem-based learning) va loyihaviy yondashuv (project-based learning) kompetensiyaviy ta’limning samarali vositalari sifatida tobora ko‘proq e’tirof etilmoqda [2; 3]. Ushbu yondashuvlar an’anaviy o‘qitishdan farqli ravishda talabalarni bilimlarni passiv qabul qiluvchi emas, balki faol ishtirokchi va yaratuvchi sifatida shakllantiradi.

Tadqiqot muammosi quyidagicha ifodalanadi: differensial tenglamalar kursida muammoli va loyihaviy yondashuvlarni qanday metodik asosda va qanday shart-sharoitlarda qo‘llash kompetensiyalarni samarali shakllantirish imkonini beradi?

Tadqiqot maqsadi – differensial tenglamalar bo‘yicha kompetensiyalarni shakllantirishda muammoli va loyihaviy yondashuvlarning metodik asoslarini tavsiflash, ularni qo‘llash shart-sharoitlarini belgilash va kutiladigan pedagogik samaralarni nazariy jihatdan asoslashdan iborat.

Tadqiqot vazifalari:

Muammoli yondashuvning differensial tenglamalar o‘qitishdagi metodik bosqichlarini ishlab chiqish;

Loyihaviy yondashuvning amalga oshirish metodikasini tavsiflash;

Ikkala yondashuvni qo‘llashning zarur va yetarli shart-sharoitlarini aniqlash;

Kompetensiyalarning tarkibiy qismlariga kutiladigan ta’sirni nazariy tahlil qilish.

ADABIYOTLAR TAHLILI

Muammoli ta’lim nazariyasi asoslari J. Dyui, L. Vygotskiy va S. Rubinshteyn kabi olimlarning ishlarida yaratilgan bo‘lsa, zamonaviy pedagogikada bu yondashuv H. Barrows va C. Hmelo-Silver tomonidan tibbiyot va tabiiy fanlar ta’limida keng qo‘llanilgan [1; 4]. Muammoli yondashuvning asosiy g‘oyasi talabalarga tayyor bilim berishdan ko‘ra, o‘quv muammosini hal qilish orqali bilimni "kashf etish" imkoniyatini yaratishdir. Bu yondashuv talabaning kognitiv faolligini oshiradi va bilimlarni chuqur o‘zlashtirishga xizmat qiladi.

Loyihaviy ta’lim metodikasi J. Dyui va V. Kilpatrik tomonidan asos solingan bo‘lib, keyinchalik J. Krajcik va P. Blumenfeld tomonidan zamonaviy talqinda rivojlantirilgan [5]. Loyihaviy yondashuv talabalarni real hayotiy muammolarni o‘rganishga, tadqiqot olib borishga va yakuniy mahsulot yaratishga yo‘naltiradi. Ushbu yondashuv ta’lim jarayonini hayot bilan bog‘laydi, talabalarning motivatsiyasini oshiradi va ularni mustaqil ishlashga o‘rgatadi.

Matematik modellashtirish va differensial tenglamalar o‘qitish metodikasi masalalari V. Blum va M. Niss [3], D. Zill [6], A. Sokolowski [7] kabi tadqiqotchilar tomonidan o‘rganilgan. Ulaming ishlarida matematik modellashtirishning ta’limdagi o‘rni, differensial tenglamalarni real masalalarga qo‘llash usullari va bu jarayonda talabalarda shakllanadigan kompetensiyalar tahlil qilingan.

Shu bilan birga, differensial tenglamalar bo‘yicha kompetensiyalarni shakllantirishda muammoli va loyihaviy yondashuvlarni tizimli integratsiyalash metodikasi, ularni qo‘llashning aniq shart-sharoitlari va kompetensiyalarning alohida tarkibiy qismlariga ta’siri yetarlicha o‘rganilmagan. Ushbu maqola aynan shu bo‘shliqni to‘ldirishga qaratilgan.

TADQIQOT METODOLOGIYASI

Metodologik asos sifatida kompetensiyaviy yondashuv, faoliyatli ta’lim nazariyasi va matematik modellashtirish sikli xizmat qiladi. Tadqiqotda ilmiy adabiyotlarni tahlil qilish, ta’lim metodikalarini tizimlashtirish va nazariy modellashtirish usullaridan foydalanilgan.

Muammoli yondashuv metodikasi

Muammoli yondashuv differensial tenglamalar o‘ qitishda quyidagi metodik bosqichlarni o‘ z ichiga oladi:

1-bosqich: Muammoli vaziyatni yaratish. Talabalarga real jarayon (masalan, harorat o‘ zgarishi, populyatsiya dinamikasi, RLC elektr zanjiri, radioaktiv parchalanish, epidemiyaning tarqalishi) ga doir kontseptual masala beriladi. Bu masalada yetarlicha ma’lumot yetishmasligi yoki ayrim ma’lumotlar o‘ zaro ziddiyatli bo‘ lishi mumkin. Masalan: "Ma’lum bir hududda populyatsiyaning o‘ sishi kuzatilmoqda. Qanday qilib bu jarayonni matematik ifodalash va kelajakdagi o‘ zgarishlarni prognozlash mumkin?" kabi ochiq masalalar qo‘ yiladi.

2-bosqich: Matematik modelni faraz qilish. Talabalar berilgan jarayonni differensial tenglama ko‘ rinishida ifodalashga harakat qiladilar. Bu bosqichda hosilalarning fizik ma’nosini aniqlash, o‘ zgaruvchilarni belgilash, boshlang‘ ich va chegaraviy shartlarni ifodalash talab etiladi. Talabalar o‘ zlarining dastlabki model variantlarini taklif qiladilar va ularni guruhda muhokama qiladilar.

3-bosqich: Muammoni talqin qilish va turkumlash. Talabalar tuzgan tenglamaning turi (oddiy yoki xususiy hosilali, chiziqli yoki nochiziqli, birinchi yoki yuqori tartibli, o‘ zgarmas yoki o‘ zgaruvchan koeffitsiyentli va hokazo) aniqlanadi. Bu bosqich talabalarning differensial tenglamalar tasnifi bo‘ yicha bilimlarini faollashtiradi.

4-bosqich: Yechim strategiyasini loyihalash. Muammo shartlaridan kelib chiqib, analitik, sonli yoki sifatli usullardan birini tanlash zarurati asoslanadi. Talabalar tanlangan usulning maqsadga muvofiqligini, qulayliklari va cheklovlarini muhokama qiladilar.

5-bosqich: Natijalarni muhokama va talqin. Olingan yechimning asl jarayonga muvofiqligi, yechimning mavjudligi, yagonaligi va barqarorligi tahlil qilinadi. Talabalar o‘ z modeli va yechimini real ma’lumotlar bilan solishtiradilar, xulosalar chiqaradilar.

Loyihaviy yondashuv metodikasi

Loyihaviy yondashuv differensial tenglamalar o‘ qitishda quyidagi metodik bosqichlarni o‘ z ichiga oladi:

Kirish (boshlang‘ ich) bosqichi. O‘ qituvchi loyiha tematik doirasi – mexanika, biologiya, iqtisodiyot, ekologiya, epidemiologiya, kimyoviy kinetika va boshqa sohalar – e’lon qiladi. Talabalar o‘ zlari yoki kichik guruhlarda aniq muammoni tanlaydilar. Masalan: "Epidemiyaning tarqalishini SIR modeli yordamida prognozlash", "Tebranish konturidagi jarayonlarni differensial tenglamalar bilan modellashtirish", "Oziq-ovqat zanjiridagi populyatsiyalar dinamikasi" kabi loyiha mavzulari taklif etiladi.

Rejalashtirish bosqichi. Talabalar differensial tenglama modelini qurish, kerakli ma’lumotlarni (boshlang‘ ich va chegaraviy shartlar, parametrlar, koeffitsiyentlar) aniqlash va yechim usulini tanlash bo‘ yicha ish rejasini tuzadilar. Ishni bosqichlarga bo‘ lish, vazifalarni taqsimlash, vaqt mezonlarini belgilash amalga oshiriladi.

Tadqiqot va modellashtirish bosqichi. Modelni tuzish, uni yechish (analitik usullar yoki sonli usullar – Eyler usuli, Runge-Kutta usullari, MATLAB, Python, Wolfram Mathematica yordamida), yechimni parametrlarga nisbatan tahlil qilish amalga oshiriladi. Talabalar modelning turli parametrlarga sezgirligini o‘ rganadilar, grafiklar va jadvallar tayyorlaydilar.

Baholash bosqichi. Modelning adekvatligi, kiritilgan soddalashtirishlarning natijaga ta’siri, mumkin bo‘ lgan metodik va hisoblash xatolari muhokama qilinadi. Talabalar modelning kuchli va zaif tomonlarini aniqlaydilar, takomillashtirish yo‘ llarini taklif qiladilar.

Yakuniy bosqich. Talabalar yozma hisobot va og‘ zaki taqdimot shaklida loyiha natijalarini himoya qiladilar. Hisobot IMRAD talablariga muvofiq tuziladi, taqdimotda asosiy natijalar, xulosalar va amaliy tavsiyalar aks ettiriladi.

Yondashuvlarni integratsiyalash strategiyasi

Muammoli va loyihaviy yondashuvlarni integratsiyalash quyidagi strategiya asosida amalga oshirilishi tavsiya etiladi:

1-bosqich (tayyorlov, 1-2 hafta). Muammoli yondashuv elementlari yordamida talabalarni differensial tenglamalar va real jarayonlar o‘ rtasidagi bog‘ liqlik bilan tanishtirish. Qisqa muddatli (1-2 soatlik) muammoli vaziyatlarni yechish orqali motivatsiyani oshirish va asosiy tushunchalarni faollashtirish.

2-bosqich (asosiy, 3-6 hafta). Loyihaviy yondashuvni amalga oshirish – talabalar tanlagan loyiha mavzusi ustida ishlash. Bunda muammoli yondashuv elementlari loyiha davomida yuzaga keladigan alohida muammoli vaziyatlarni hal qilishda qo‘ llaniladi.

3-bosqich (yakuniy, 1 hafta). Loyiha natijalarini taqdim etish va umumiy muhokama. Muammoli yondashuvda shakllangan analitik ko‘ nikmalar loyiha natijalarini baholash va talqin etishda qo‘ llaniladi.

NATIJALAR VA TAHLIL

Yondashuvlarni qo‘ llash shart-sharoitlari

Muammoli yondashuvni qo‘ llash shartlari:

Birinchi shart – talabalarning tayanch bilimlarga ega bo‘ lishi. Differensial tenglamalarning asosiy turlari va klassik yechim usullari (birinchi tartibli chiziqli tenglamalar, o‘ zgarmas koeffitsiyentli ikkinchi tartibli tenglamalar,

o‘ zgaruvchilari ajraladigan tenglamalar) avvaldan o‘ zlashtirilgan bo‘ lishi kerak. Aks holda, muammoli vaziyat talabalar uchun haddan tashqari kognitiv yuklama keltirib, tushkunlikka olib kelishi mumkin.

Ikkinchi shart – guruh hajmining optimal bo‘ lishi. Talabalar soni 25-30 kishidan oshmagan hollarda muammoli muhokama va individual yondashuv samaraliroq bo‘ ladi. Katta guruhlarda (50 va undan ortiq) barcha talabalarni faollashtirish qiyinlashadi.

Uchinchi shart – vaqt resursi. Muammoli yondashuv asosan 2 soatlik amaliy mashg‘ ulot doirasida qo‘ llaniladi, shu sababli muammo konspektiv, aniq va yechim strategiyasini loyihalash imkonini beradigan darajada bo‘ lishi kerak.

To‘ rtinchi shart – o‘ qituvchining metodik tayyorgarligi. O‘ qituvchi moderator vazifasini bajarishga, ya’ni tayyor javob bermasdan, talabalarning fikrlash jarayonini yo‘ naltiruvchi savollar berishga va ularning mustaqil xulosalar chiqarishiga imkon yaratishga tayyor bo‘ lishi kerak.

Loyihaviy yondashuvni qo‘ llash shartlari:

Birinchi shart – sonli usullar bo‘ yicha tayyorgarlik. Talabalar differensial tenglamalarni yechishning sonli usullari bilan tanishgan bo‘ lishi yoki parallel ravishda "Ilmiy hisoblash", "Matematik modellashtirish" kabi fanlarni o‘ tayotgan bo‘ lishi maqsadga muvofiq.

Ikkinchi shart – vaqt resursi. Loyiha semestr davomida (4-6 hafta) amalga oshiriladi. Auditoriyadan tashqari ish vaqti mavjud bo‘ lishi va talabalar mustaqil ishlashlari uchun yetarli vaqtga ega bo‘ lishi kerak.

Uchinchi shart – fanlararo aloqalar. Talabalar o‘ z mutaxassisligiga (fizika, biologiya, iqtisodiyot, muhandislik) oid modellarni tanlash imkoniyatiga ega bo‘ lsa, loyihaga qiziqish va motivatsiya sezilarli darajada oshadi.

To‘ rtinchi shart – texnik resurslar. Internetga ulanish, kutubxona, dasturiy vositalar (MATLAB, Python, Wolfram Mathematica), kompyuter sinfi yetarli bo‘ lishi kerak. Aks holda, loyiha faqat analitik modellashtirishga asoslanishi mumkin.

Beshinchi shart – baholash tizimi. Baholash jarayon va natijaga asoslangan bo‘ lib, oraliq hisobotlar, konsultatsiyalar va yakuniy himoyani o‘ z ichiga olishi talab etiladi. O‘ qituvchi loyiha davomida maslahatchi vazifasini bajaradi, lekin talabalarning mustaqil qaror qabul qilishlariga to‘ sqinlik qilmasligi kerak.

Ikkala yondashuv uchun umumiy cheklovlar:

Talabalar soni haddan tashqari katta bo‘ lganda (50+) guruhli ish va muhokama samaradorligi pasayadi.

Talabalarning matematik tayyorgarligi yetarli bo‘ lmaganda (hosila, integral, oddiy differensial tenglamalar bo‘ yicha) yondashuvlar kutilgan samarani bermasligi mumkin.

O‘ qituvchining noan’anaviy metodlarni qo‘ llashga tayyorligi va tegishli metodik materiallar mavjudligi muhim omil hisoblanadi.

Kompetensiyalarning shakllanishiga kutiladigan ta’sir

Differensial tenglamalar bo‘ yicha kompetensiyalar to‘ rt asosiy tarkibiy qismga bo‘ linadi: kognitiv, faoliyatli, refleksiv va kommunikativ.

Kognitiv kompetensiyalar (bilim va tushuncha). Muammoli yondashuv talabalarning differensial tenglamalar turlari va ularning real jarayonlar bilan bog‘ liqligini chuqur anglab olishiga xizmat qiladi. An’anaviy yondashuvda talaba tayyor ko‘ rinishda berilgan tenglamani yechsa, muammoli yondashuvda u real vaziyatdan kelib chiqib tenglamaning turini o‘ zi aniqlashni o‘ rganadi [1]. Loyihaviy yondashuv esa bir nechta mavzuni (boshlang‘ ich shartlar ta’siri, barqarorlik tahlili, faza portreti, parametrik sezuvchanlik) integrativ tarzda o‘ zlashtirish imkonini beradi.

Faoliyatli kompetensiyalar (qo‘ llash va tahlil). Muammoli yondashuv asosan real muammoni tenglama ko‘ rinishiga keltirish ko‘ nikmasini rivojlantiradi – qaysi o‘ zgaruvchilarni asosiy deb olish, qanday farazlarni kiritish, qanday soddalashtirishlar mumkinligini baholash. Loyihaviy yondashuv to‘ liq matematik modellashtirish tsiklini – muammoni o‘ rganish, model qurish, yechimni topish, natijalarni talqin qilish va prognoz berish – amalda bajarish imkonini yaratadi [3]. Bu muhandislik va ilmiy faoliyatda bevosita zarur bo‘ lgan kompleks kompetensiyani shakllantiradi. Shuningdek, loyihaviy yondashuv sonli usullarni (Eyler, Runge-Kutta, chekli farqlar) amaliy kontekstda o‘ zlashtirishga imkon beradi [6].

Refleksiv kompetensiyalar (baholash va metakognitsiya). Muammoli yondashuv talabalarni o‘ z yechim strategiyasining to‘ g‘ riligi va muammoning qo‘ yilishiga mosligi haqida doimiy fikr yuritishga undaydi. Loyihaviy yondashuv yechimning yagonaligi, barqarorligi, model chegaralari, kiritilgan farazlarning oqibatlari haqida hisobot va himoya jarayonida chuqur mulohaza yuritishni talab qiladi [7]. Bu metakognitiv kompetensiyaning – o‘ z bilish jarayonlarini boshqarish qobiliyatining rivojlanishiga olib keladi.

Kommunikativ kompetensiyalar. Guruhli loyihalar va muammoli muhokamalar talabalarning matematik g‘ oyalarni og‘ zaki va yozma shaklda ifodalash qobiliyatini oshiradi. Differensial tenglamalarning maxsus atamalarini to‘ g‘ ri qo‘ llash, guruh ichida vazifalarni taqsimlash, qaror qabul qilishda kelishuvga erishish, o‘ z natijalarini boshqalar oldida himoya qilish kabi malakalar shakllanadi [5].

Integratsiyalashgan yondashuvning afzalliklari

Muammoli va loyihaviy yondashuvlarni izchil integratsiyalash – muammoli yondashuv bilan boshlang‘ ich tayyorgarlik va motivatsiyani ta’minlash, so‘ ngra loyihaviy yondashuv bilan mustahkamlash va chuqurlashtirish – quyidagi afzalliklarni beradi:

Bosqichma-bosqich o‘ zlashtirish. Talabalar avval muammoli vaziyatlar orqali asosiy tushunchalar va usullarni o‘ zlashtiradilar, so‘ ngra ularni loyiha doirasida mustaqil qo‘ llaydilar.

Motivatsiyaning oshishi. Muammoli vaziyatlar qiziqish uyg‘ otadi, loyiha esa bu qiziqishni amaliy faoliyatga aylantiradi.

Kompetensiyalarning har tomonlama rivojlanishi. Kognitiv, faoliyatli, refleksiv va kommunikativ kompetensiyalar birgalikda shakllanadi va o‘ zaro mustahkamlanadi.

Moslashuvchanlik. Integratsiyalashgan yondashuv talabalar tayyorgarligi va resurslar imkoniyatiga qarab moslashtirilishi mumkin.

XULOSA

Muammoli va loyihaviy yondashuvlar differensial tenglamalarni o‘ qitishda an’anaviy "misollar yechish" usulidan farqli ravishda kompetensiyalarning chuqur, integrativ va faoliyatli shakllanishiga imkon yaratadi. Muammoli yondashuv asosan qisqa, intensiv va kognitiv to‘ qnashuvga asoslangan bo‘ lib, differensial tenglamalarning asosiy turlarini aniqlash, real vaziyatni matematik modelga o‘ tkazish va yechim strategiyasini loyihalash kompetensiyalarini shakllantirishga qaratilgan. Loyihaviy yondashuv esa uzoq muddatli, real muammolarga yo‘ naltirilgan va sonli usullar hamda modellashtirish bilan integratsiyalashgan bo‘ lib, to‘ liq matematik tadqiqot kompetensiyasini rivojlantiradi.

Ikkala yondashuvni izchil integratsiyalash – muammoli yondashuv bilan boshlang‘ ich tayyorgarlik va motivatsiyani ta’minlash, so‘ ngra loyihaviy yondashuv bilan mustahkamlash va chuqurlashtirish – differensial tenglamalar kursida kompetensiyalarni har tomonlama rivojlantirishning metodik jihatdan asoslangan va istiqbolli yo‘ nalishi hisoblanadi.

Taklif etilgan metodika talabalar soni 25-30 dan oshmagan, talabalar yetarli matematik tayyorgarlikka ega va o‘ qituvchi noan’anaviy metodlarni qo‘ llashga tayyor bo‘ lgan sharoitlarda eng yuqori samarani berishi kutiladi. Kelgusida ushbu metodikaning empirik tekshiruvi va turli ta’lim sharoitlariga moslashtirilgan variantlarini ishlab chiqish tadqiqotning istiqbolli yo‘ nalishlari hisoblanadi.

ODIL YOQUBOVNING "DIYONAT" ROMANINING EKOLOGIK-TA'LIMIY SALOHIYATI: PRAGMATIK YONDASHUV ASOSIDA TAHLIL

Dadabayeva Shoxistaxon Zakirovna
Alisher Navoiy nomidagi Toshkent davlat o' zbek tili va adabiyoti universiteti mustaqil tadqiqotchisi
ORCID: 0009-0003-3410-0384
E-mail: shoxistaxondadabayeva@gmail.com

Annotatsiya: *Mazkur maqolada Odil Yoqubovning "Diyonat" romanining ekologik-ta'limiy salohiyati pragmatik yondashuv asosida tahlil qilingan. Asarda inson va tabiat o' rtasidagi munosabat, ekologik qadriyatlar, tabiatni asrash g' oyalarining badiiy ifodasi yoritilib, ularning o' quvchilarda ekologik madaniyatni rivojlantirishdagi didaktik imkoniyatlari ochib berilgan. Shuningdek, romandan adabiy ta'lim jarayonida samarali foydalanishning metodik jihatlari asoslangan.*

Kalit so' zlar: *ekologik madaniyat, adabiy ta'lim, pragmatik yondashuv, ekologik ta'lim, "Diyonat" romani, Odil Yoqubov, ekologik qadriyatlar, tabiat, badiiy tahlil, didaktik imkoniyatlar.*

ЭКОЛОГО-ОБРАЗОВАТЕЛЬНЫЙ ПОТЕНЦИАЛ РОМАНА ОДИЛА ЯКУБОВА «ДИЁНАТ»: АНАЛИЗ НА ОСНОВЕ ПРАГМАТИЧЕСКОГО ПОДХОДА

Аннотация: *В статье анализируется эколого-образовательный потенциал романа Одила Якубова «Диёнат» на основе прагматического подхода. Рассматриваются художественное отражение взаимоотношений человека и природы, экологические ценности и идеи охраны окружающей среды, а также их значение для формирования экологической культуры учащихся. Обосновываются методические возможности использования романа в процессе литературного образования.*

Ключевые слова: *экологическая культура, литературное образование, прагматический подход, экологическое воспитание, роман «Диёнат», Одил Якубов, экологические ценности, природа, художественный анализ, дидактические возможности.*

THE ECOLOGICAL AND EDUCATIONAL POTENTIAL OF ODIL YAKUBOV'S NOVEL DIYONAT: AN ANALYSIS BASED ON THE PRAGMATIC APPROACH

Abstract: *This article analyzes the ecological and educational potential of Odil Yakubov's novel Diyonat from the perspective of the pragmatic approach. It examines the artistic representation of the relationship between humans and nature, ecological values, and environmental protection ideas, highlighting their role in developing students' ecological culture. The study also substantiates the methodological possibilities of using the novel in literature education.*

Keywords: *ecological culture, literature education, pragmatic approach, environmental education, Diyonat, Odil Yakubov, ecological values, nature, literary analysis, didactic opportunities.*

KIRISH

O' zbekistonda ekologik madaniyatni yuksaltirish, atrof-muhitni muhofaza qilish hamda tabiiy resurslardan oqilona foydalanish davlat siyosatining ustuvor yo' nalishlaridan biri sifatida belgilangan. Xususan, O' zbekiston Respublikasi Prezidentining 2026-yil 25-martdagi PQ-110-son qarorida ta'lim tizimida ekologik madaniyatni yuksaltirish, ekologik qadriyatlarni yosh avlod ongiga singdirish hamda bu boradagi ta'limiy-tarbiyaviy ishlar samaradorligini oshirish ustuvor vazifalardan biri etib belgilangan [7].

Global ekologik muammolarning tobora kuchayib borishi ta'lim tizimi oldiga o' quvchilarda ekologik tafakkur va mas'uliyatni shakllantirish vazifasini qo' ymoqda. Bu jarayonda adabiyot ta'limi alohida ahamiyat kasb etadi. Chunki badiiy asarlarda inson va tabiat munosabati, ekologik muammolarning badiiy talqini hamda qahramonlarning tabiatga munosabati o' quvchilarning ekologik madaniyatini rivojlantirish uchun muhim pedagogik imkoniyat yaratadi. Odil Yoqubovning "Diyonat" romanida ekologiya bosh mavzu sifatida yoritilmagan bo' lsa-da, unda tabiatni muhofaza qilish, daraxtlarning kesilishi, biologik kurash usullaridan foydalanish, yovvoyi hayvonlarni asrash hamda tarixiy ekologik

fojialarga oid qator badiiy lavhalar o‘ z ifodasini topgan. Ushbu epizodlar o‘ quvchilarda ekologik muammolarga nisbatan ongli munosabatni shakllantirish va ekologik madaniyatni rivojlantirish uchun muhim didaktik salohiyatga ega.

Akademik litseylarning adabiyot fanidan namunaviy o‘ quv dasturida badiiy asarlarni tahlil qilish jarayonida o‘ quvchilarning tanqidiy fikrlashi, matnga tayangan holda dalillar keltirishi, qiyosiy tahlil qilishi hamda boshqa fanlardan olgan bilimlarini amalda qo‘ llashi zarurligi alohida ta’kidlangan [6, 7]. Shu jihatdan “Diyonat” romanidagi inson va tabiat munosabatlari aks etgan badiiy lavhalarni pragmatik yondashuv asosida tahlil qilish mazkur kompetensiyalarni rivojlantirish bilan birga o‘ quvchilarning ekologik madaniyatini shakllantirishga ham xizmat qiladi.

ADABIYOTLAR TAHLILI

O. Iskandarovaning “Mushtaraklik va o‘ ziga xoslikning lisoniy jozibasi” monografiyasida Chingiz Aytmatovning “Qiyomat” va Odil Yoqubovning “Diyonat” romanlari davr, konflikt, xarakter hamda inson va tabiat munosabatlari nuqtayi nazaridan qiyosiy tadqiq qilingan. Tadqiqotda inson va tabiat munosabatlarining badiiy talqini adabiyotshunoslik nuqtayi nazaridan yoritilgan [2]. N. Karimov, B. Nazarov, U. Normatov va Q. Yo‘ ldoshevlar tomonidan tayyorlangan 11-sinf adabiyot darsligida esa “Diyonat” romani davrning ijtimoiy-ma’naviy muammolari, adolat, diyonat, e’tiqod va insoniylik mezonlari asosida tahlil qilingan [3]. Adabiy ta’lim metodikasi bo‘ yicha Z. Mirzayeva va K. Jalilov tadqiqotlarida badiiy asarlarni o‘ qitishda zamonaviy yondashuvlar, jumladan, pragmatik yondashuvning metodik imkoniyatlari yoritilgan [4]. Biroq “Diyonat” romanida aks etgan ekologik mazmunni akademik litsey o‘ quvchilarining ekologik madaniyatini rivojlantirishga yo‘ naltirib, pragmatik yondashuv asosida o‘ qitish masalasi maxsus tadqiq etilmagan.

TADQIQOT METODOLOGIYASI

Xalqaro miqyosdagi tajribali olimlar, pedagoglar adabiyot o‘ qitishning konseptual yondashuvlari qatoriga pragmatik – quruq g‘ oyalardan iborat bo‘ lmagan, o‘ quvchilarning real hayotiy dasturlariga, amaliy va kundalik tajribalariga asoslangan o‘ quv jarayonlarini tashkil etish yondashuvini kiritadilar. Bunday yondashuv asosida o‘ quvchilarning shaxsiy tajribasi, atrof-muhit bilan o‘ zaro munosabatda o‘ z bilimlarini rivojlantirib borish ko‘ nikmasi yotadi. Pragmatik yondashuvga o‘ quvchilarning “tafakkur inqilobi”ga rag‘ bat beradigan, ularda turli xil kutilgan va kutilmagan fikrlarning tug‘ ilishiga rag‘ bat beradigan eng muhim yondashuv sifatida qaraladi [4, 69].

Mazkur maqolada Odil Yoqubovning “Diyonat” romanidagi ekologik mazmundagi epizodlarni pragmatik yondashuv asosida o‘ qitishning metodik imkoniyatlari tahlil qilindi. Unda ilmiy-pedagogik va metodik adabiyotlarni o‘ rganish, akademik litseylarning adabiyot fani namunaviy o‘ quv dasturini tahlil qilish, badiiy-pedagogik va qiyosiy tahlil, interpretatsiya, tizimlashtirish hamda umumlashtirish metodlaridan foydalanildi. Shuningdek, ekologik mazmundagi badiiy lavhalar asosida pragmatik savollar, interfaol metodlar va fanlararo integratsiyaga asoslangan mustaqil ta’lim topshiriqlari ishlab chiqildi.

NATIJALAR VA ULARNING TAHLILI

Akademik litseylarning adabiyot fani chuqurlashtirib o‘ qitiladigan yo‘ nalishlari uchun ishlab chiqilgan namunaviy o‘ quv dasturida Odil Yoqubovning “Ulug‘ bek xazinasi”, “Ko‘ hna dunyo” va “Diyonat” romanlarini o‘ rganishga jami 8 soat [6, 18], mustaqil ta’lim uchun esa 4 soat ajratilgan [6, 23]. Mazkur imkoniyatdan kelib chiqib, “Diyonat” romanini o‘ rganish uchun 2 soat auditoriya mashg‘ ulotiga va 1 soat mustaqil ta’limga ajratish maqsadga muvofiq deb hisoblandi. Dasturda romanni o‘ rganish bo‘ yicha “o‘ zbek xalqi milliy qadriyatlarining ulug‘ lanishi hamda davr muammolarining fosh etilishi” asosiy didaktik talab sifatida belgilangan [6, 18]. Tadqiqot doirasida ushbu talab ekologik mazmundagi epizodlarni pragmatik yondashuv asosida o‘ qitish bilan boyitildi.

Metodik tahlil jarayonida aniqlandiki, o‘ quvchilarni bevosita ekologik muammolar tahliliga yo‘ naltirish ularning asarni yaxlit idrok etishiga to‘ sqinlik qilishi mumkin. Shu sababli ekologik tahlildan oldin roman syujeti, g‘ oyaviy yo‘ nalishi va obrazlar tizimi haqida dastlabki tasavvurni shakllantirish zarur. Mazkur maqsadda “Asarni kashf etamiz”, “Asarni anglaymiz” va “Muammoni topamiz” metodlari ketma-ket qo‘ llanildi.

Darsning motivatsion bosqichida “Asarni kashf etamiz” metodi asosida o‘ quvchilar kichik guruhlarga ajratildi. Ularga roman nomi yozilgan tarqatma material taqdim etilib, “Diyonat” so‘ zini qanday tushunasiz?”, “Bu nom sizda qanday tasavvur uyg‘ otadi?”, “Sizningcha, romanda qanday voqealar yoritilgan bo‘ lishi mumkin?” kabi savollar berildi. Olingan javoblar klaster shaklida umumlashtirildi. Ushbu metod o‘ quvchilarning avvalgi bilimlarini faollashtirish, asarga nisbatan qiziqish uyg‘ otish va keyingi tahlil uchun motivatsion zamin yaratishga xizmat qildi.

Keyingi bosqichda “Asarni anglaymiz” metodi qo‘ llanildi. O‘ qituvchi romanning yaratilish tarixi, g‘ oyaviy yo‘ nalishi hamda Odil Yoqubovning Otaqo‘ zi obrazi haqida bildirgan fikrlarini taqdim etdi. Shundan so‘ ng o‘ quvchilar “Konseptual jadval”ni to‘ ldirib, asarning bosh g‘ oyasi, asosiy obrazlari va unda ko‘ tarilgan muammolarni tizimlashtirdilar. Bu bosqichda ekologik muammo romanning boshqa ijtimoiy va ma’naviy muammolari qatorida ko‘ rib chiqildi.

So‘ ng “Muammoni topamiz” metodi asosida o‘ quvchilarga: “Romandagi barcha muammolar ichida sizni eng ko‘ p o‘ ylantirgani qaysi? Nima uchun?” mazmunidagi muammoli savol berildi. Muhokamalar davomida adolatsizlik,

mansabparastlik, ilm-fanga bepisandlik va tabiatning vayron qilinishi kabi javoblar bildirildi. Shundan keyingina o‘ quvchilarning e’tibori romanning ekologik mazmundagi epizodlariga qaratildi.

Metodik tahlillar shuni ko‘ rsatdiki, mazkur metodlar ketma-ketligi o‘ quvchilarda avval asarning umumiy g‘ oyasini anglash, so‘ ng ekologik muammolarni ajratib tahlil qilish imkonini yaratdi. Natijada ekologik madaniyatga oid tushunchalar badiiy matn mazmunidan tabiiy ravishda kelib chiqdi, pragmatik yondashuv esa o‘ quvchilarning tabiat muammolarini real hayot bilan bog‘ lash, mustaqil xulosa chiqarish va amaliy yechimlar taklif etish kompetensiyalarini rivojlantirishga xizmat qildi.

Tahlil uchun romandan insonning tabiatga munosabatlari aks etgan eng yorqin adabiy parchalar tanlab olinib, elektron doskada namoyish qilindi. Har biri pragmatik yondashuv asosida interfaol metodlar yordamida o‘ rganildi. Quyida ana shunday epizodlardan ayrimlari tahlil qilinadi.

I. Mingbuloq archazorlarining kesilishi: ekologik muammoning badiiy talqini.

Tahlil uchun tanlangan dastlabki lavhada yozuvchi Mingbuloq tabiatiga yetkazilgan zarar orqali inson va tabiat munosabatining keskinlashib borayotganini badiiy jihatdan ta’sirchan ifodalaydi. Asarda shunday tasvir beriladi: *“…Pastda, Mingbuloqni qilichday kesib o‘ tgan shag‘ al yo‘ lning ikki tomonida qirqilgan daraxtlar uyilib yotar,… otaning nazarida, go‘ yo butun Mingbuloq oyoqosti bo‘ lganday, go‘ yo hammayoq qiyratilgan, maysalar toptalgan, buloqlar bulg‘ anganday tuyuldi…”* [5, 197].

Mazkur tasvirda daraxtlarning kesilishi oddiy xo‘ jalik faoliyati sifatida emas, balki tabiat yaxlitligining buzilishi sifatida talqin qilinadi. Muallif “maysalar toptalgan”, “buloqlar bulg‘ anganday” kabi badiiy detallar orqali tabiatdagi barcha unsurlar o‘ zaro bog‘ liq ekanligini ko‘ rsatadi. Bu esa o‘ quvchilarda ekotizimning yaxlitligi haqidagi tasavvurni shakllantirish uchun muhim didaktik asos bo‘ lib xizmat qiladi. Normurod Shomurodovning: *“Kaltabinlarning o‘ z yurti, ona tabiati, yer-suvining qadrini bilmagan befarosat nodonlarning ishi bu!”* [5, 199] degan fikri esa romanning ekologik g‘ oyasini mujassamlashtiradi. Qahramon tabiat tanazzuli sababini tashqi omillarda emas, balki insonning ekologik ongi va ma’naviy mas’uliyati yetishmasligida ko‘ radi.

Ushbu epizodni pragmatik yondashuv asosida o‘ qitishda “FSMU”, “Keys-stadi” hamda “Rol o‘ ynash” metodlaridan foydalanish tavsiya etiladi. Xususan, “Rol o‘ ynash” metodida o‘ quvchilar Normurod Shomurodov, qurilish rahbari, ekolog mutaxassis va mahalliy aholi vakili rollarida muhokama olib boradilar. Bu jarayonda ular turli nuqtayi nazarlarni taqqoslaydi, muammoning sabab va oqibatlarini baholaydi hamda muqobil yechimlar ishlab chiqadi.

O‘ quvchilarning mustaqil tahlil ko‘ nikmalarini rivojlantirish maqsadida quyidagi pragmatik savollar tavsiya etiladi:

1. Nima uchun yozuvchi archazorlarning kesilishini oddiy xo‘ jalik ishi emas, balki ekologik fojia sifatida tasvirlagan, deb o‘ ylaysiz?

2. Agar Mingbuloqdagi archazorlar o‘ rnida siz yashaydigan hududdagi daraxtlar kesilayotganini ko‘ rsangiz, qanday yo‘ l tutgan bo‘ lardingiz? Javobingizni asoslang.

3. Normurod Shomurodovning: “Ona tabiati, yer-suvining qadrini bilmagan befarosat nodonlarning ishi bu!” degan fikri bugungi ekologik muammolar bilan qanchalik bog‘ liq?

4. Sizningcha, iqtisodiy manfaat bilan tabiatni muhofaza qilish o‘ rtasidagi muvozanatni qanday saqlash mumkin?

5. Agar siz tuman hokimi bo‘ lsangiz, molxona qurilishi va archazorlarni saqlab qolish muammosini qanday hal qilgan bo‘ lardingiz?

6. Mingbuloq tabiatiga yetkazilgan zarar mahalliy aholi hayotiga qanday ta’sir ko‘ rsatishi mumkin? Kamida uchta oqibatni ayting.

Mazkur metod va pragmatik savollardan foydalanish o‘ quvchilarning badiiy matndan ekologik mazmunni ajratib olish, uni real hayot bilan bog‘ lash, dalillangan xulosa chiqarish hamda tabiatga nisbatan mas’uliyatli munosabatni shakllantirishga xizmat qiladi.

II**.** Tog‘ archalarining qirilishi va suv muammosi: tarixiy xotira hamda ekologik tafakkur uyg‘ unligi.

Asarda insonning tabiatga nisbatan tajovuzkor munosabati tasodifiy hodisa emas, balki uzoq tarixga ega ekanligi badiiy dalillar asosida ochib berilgan. Muallif Chingizxon istilosi davrida tog‘ archalarining qirib tashlangani, shuningdek, Proxor Polikarpov tomonidan topilgan tarixiy telegrammada podsho hukumatining temir yo‘ lni yoqilg‘ i bilan ta’minlash maqsadida Turkiston tog‘ laridagi archalardan millionlab kubometr ko‘ mir tayyorlash rejalashtirilgani bayon qilinadi. Adib bu hujjat orqali tabiatga iste’molchilik munosabati tarix davomida qanday shakllanganini ko‘ rsatadi: *“… imperiyada ko‘ mir tanqisligini hisobga olgan uning sadoqati zohir fuqarolari bo‘ lmish Mirkomilboy va Morozov janoblari tog‘ archalaridan million-million kubometr ko‘ mir tayyorlash chorasini ko‘ rmishlarkim, quvvati jihatidan eng oliy nav toshko‘ mirdan qolishmaydigan bu archa ko‘ miri otasharavalarni o‘ n yillar davomida ta’min etishga qodirdur!...”* [5, 198].

Yozuvchi tabiat boyliklaridan faqat iqtisodiy manfaat nuqtayi nazaridan foydalanish qanday og‘ ir ekologik oqibatlarga olib kelishini tarixiy hujjat orqali ishonarli asoslaydi. Yana bir muhim jihat shundaki, Normurod Shomurodov tarixiy hujjatni oddiy fakt sifatida qabul qilmaydi. U ilmiy kuzatishlar asosida tog‘ archalarining suv manbalari bilan

chambarchas bog‘ liqligini aniqlaydi. Asarda: *“Domla bu hujjatlarni ipidan ignasigacha o‘ rganarkan, tog‘ archalarining suv muammolari bilan chambarchas bog‘ liq tomonlarini ham aniqladi-yu, maqolani yig‘ ishtirib qo‘ yib, kitob yozishga o‘ tirdi”* [5, 198] deyiladi. Bu esa qahramonning ilmiy tafakkuri, ekologik mas’uliyati va tabiatni kompleks tizim sifatida idrok etishini namoyon etadi. Mazkur epizod o‘ quvchilarda sabab – oqibat munosabatlarini anglash, tarixiy va zamonaviy ekologik muammolarni qiyoslash, ilmiy dalillarga asoslangan xulosalar chiqarish ko‘ nikmalarini rivojlantirish imkonini beradi.

Epizod mazmunini chuqur anglash maqsadida o‘ quvchilar quyidagi pragmatik savollar ustida fikr yuritadilar:

1. Nima uchun yozuvchi tarixiy telegrammani romanga kiritgan deb o‘ ylaysiz?

2. Tog‘ archalarining kesilishi suv manbalariga qanday ta’sir ko‘ rsatishi mumkin? Fikringizni biologiya va geografiya fanlaridan olgan bilimlaringiz bilan izohlang.

3. Agar siz Normurod Shomurodov o‘ rnida bo‘ lganingizda, bu muammoni jamiyat e’tiboriga qanday olib chiqqan bo‘ lardingiz?

4. Tarixdagi xatolardan bugungi ekologik siyosat uchun qanday saboq olish mumkin?

5. Siz yashayotgan hududda daraxtlar va suv manbalarini asrash bo‘ yicha qanday amaliy ishlar amalga oshirilmoqda?

Ko‘ rinib turibdiki, pragmatik savollar o‘ quvchilarda ekologik muammolarni tahlil qilish, ularning sabab va oqibatlarini baholash hamda amaliy yechimlar taklif etish ko‘ nikmalarini rivojlantiradi.

III**.** Biologik kurash usuli – ekologik tafakkur va ilmiy mas’uliyat ifodasi.

Muallif ekologik muammmolarni bartaraf etishda ilm-fan yutuqlarining o‘ rnini Soqijon Obidov obrazi orqali ochib beradi. Dotsentning biologik kurash usuli ustidagi izlanishlari tabiat bilan uyg‘ un yashash g‘ oyasini ifodalaydi: *“…universitet domlasi dotsent Obidov bir necha yillardan beri biologik kurash metodi ustida ish olib bormoqda ekan. G‘ o‘ za zararkunandalarining kushandasi bo‘ lgan hasharotlarni o‘ z laboratoriyasida urchitib, ko‘ paytirishga muvaffaq bo‘ libdi…”* [5, 215].

Lavhada yozuvchi tabiat muvozanatini buzmaydigan, aksincha, tabiiy qonuniyatlarga tayangan ekologik usulning afzalligini ko‘ rsatadi. Trixogramma hasharotining faqat ko‘ sak qurti mavjud bo‘ lgandagina faol bo‘ lishi haqidagi ilmiy izoh o‘ quvchilarda tabiatdagi biologik muvozanat va oziq zanjiri haqidagi tasavvurlarni boyitadi. Shu jihatdan epizod adabiyot, biologiya va ekologiya fanlari integratsiyasini ta’minlash imkonini beradi. Ta’lim jarayonida integratsiya fanlararo aloqaga, ya’ni umumiy fanlar, o‘ quv fanlari, ularning bo‘ lim va mavzulari bo‘ yicha olingan bilimlarga tayangan holda o‘ rganilayotgan masalaga xos bo‘ lgan yetakchi g‘ oyalar hamda hodisalarning izchil, har jihatdan chuqur va serqirra ochilishini nazarda tutadi [1, 49]. Biroq yozuvchi yana bir muhim jihatni – ilmiy mas’uliyat masalasini ham ochib beradi. Tajriba hali yakunlanmagan bo‘ lsa-da, ayrim mas’ullar: *“Qo‘ rqmang, domla! “Tajriba yaxshi o‘ tdi”, degan ispravka yozib beramiz!”* [5, 291] deya soxta hisobot berishni taklif qiladilar. Ushbu dialog ilm-fanga yuzaki munosabat, mas’uliyatsizlik va rasmiyatchilikni tanqid qiladi. Natijada o‘ quvchilar ekologik muammolarni hal etishda ilmiy halollik va mas’uliyatning naqadar muhim ekanligini anglaydilar.

Adabiy parchani pragmatik yondashuv asosida o‘ rganishda “T – sxemasi” va “Muammoli vaziyat” metodlaridan foydalanish maqsadga muvofiq. Mazkur metodlar yordamida o‘ quvchilar biologik va kimyoviy kurash usullarini taqqoslaydilar, ekologik xavfsizlik nuqtayi nazaridan eng maqbul yechimni asoslaydilar hamda ilmiy halollikning jamiyat taraqqiyotidagi o‘ rni yuzasidan fikr almashadilar. Shundan so‘ ng quyidagi pragmatik savollar asosida munozara tashkil etiladi:

1. Nima uchun dotsent Obidov zararkunandalarga qarshi biologik kurash usulini tanlagan?

2. Trixogrammadan foydalanishning ekologik afzalligi nimada?

3. Nega yozuvchi tajriba natijasini soxtalashtirish bilan bog‘ liq dialogni asarga kiritgan?

4. Agar siz ilmiy loyiha rahbari bo‘ lganingizda, tajriba hali tugallanmagan bo‘ lsa, qanday qaror qabul qilgan bo‘ lardingiz?

5. Ekologik muammolarni hal etishda ilmiy halollik nima uchun muhim?

6. Bugungi kunda qishloq xo‘ jaligida biologik kurash usullarini keng qo‘ llash qanday natijalar berishi mumkin?

Ilg‘ ab olish mumkinki, savollar o‘ quvchilarda ekologik tafakkur, tanqidiy fikrlash, ilmiy halollik va ekologik muammolarni fanlararo yondashuv asosida tahlil qilish ko‘ nikmalarini rivojlantirishga xizmat qiladi.

IV**.** Biologik kurash va kimyoviy vositalar qarama-qarshiligi.

Asarda Soqijon Obidovning biologik kurash usuliga asoslangan ilmiy tajribasi va ayrim rahbarlarning tezkor natija olishga qaratilgan ma’muriy qarorlari o‘ rtasidagi ziddiyat yorqin tasvirlangan lavha mavjud. Asarda ko‘ sak qurtining dastlabki belgilari paydo bo‘ lganda Ali mo‘ ylov vahimaga tushadi, biroq dotsent Obidov vaziyatni ilmiy asosda baholab: *“Qo‘ rqmang… Bir kvadrat joyga nechta qurt to‘ g‘ ri keladi? Hisoblab chiqamiz. Hamma choralarni ko‘ ramiz!”* [5, 326] deydi. Ushbu fikr qahramonning muammoni hissiyot bilan emas, ilmiy kuzatuv va tahlil asosida hal etishga intilishini ko‘ rsatadi. Shundan so‘ ng Obidov trixogramma tuxumlarini zararlangan maydonlarga joylashtirib, biologik kurash usulini amalda qo‘ llashga kirishadi. Biroq uning tajribasi yakunlanmasdan paxtazorga kimyoviy dori sepiladi. Natijada

biologik tajriba izdan chiqadi, olim esa o‘ z ilmiy ishini himoya qilish maqsadida traktorlarga to‘ sqinlik qilgani uchun Alimo‘ ylov tomonidan yerto‘ laga qamab qo‘ yiladi. Asarda bu holat quyidagicha ifodalanadi: *“Bugun ertalab qizlar, hech narsadan xabarlari yo‘ q, ishga borishsa… dori hididan paxtazorga yaqinlashib bo‘ lmaydi! Boshlariga gazniqob kiyib olgan mexanizatorlar traktorlarini tarillatib, dori sepishyapti”* [5, 328]. Keyinchalik: *“Domlang ana, yerto‘ lada kalamushlar bilan suhbat qurib o‘ tiribdi!”* [5, 328] degan kinoyali jumla ilmiy fikrning mensilmasligi va ekologik manfaatlarning ma’muriy qarorlar qurboni bo‘ layotganini ochib beradi. Tahlil jarayonida shuni unutmaslik kerakki, o‘ quvchilarga kimyoviy vositalarni mutlaq salbiy hodisa sifatida emas, balki ekologik masalalarni hal etishda turli ilmiy yondashuvlarni baholash nuqtayi nazaridan tushuntirish lozim. Bunda asosiy e’tibor biologik usulni ilmiy asosda sinab ko‘ rish imkoniyati berilmagani va ilmiy xulosalar o‘ rnini ma’muriy qarorlar egallaganiga qaratiladi.

O‘ quvchilarda ekologik muammolarni hal etishda ilmiy asoslangan yondashuvning ahamiyati, tabiiy muvozanatni saqlash zarurati hamda ekologik qarorlar qabul qilishda mas’uliyat hissini shakllantirish uchun ushbu adabiy parcha yuzasidan quyidagicha pragmatik savollar berish samaralidir:

1. Nima uchun Soqijon Obidov ko‘ sak qurti paydo bo‘ lishi bilan darhol kimyoviy dori sepishni ma’qullamadi?
2. Biologik kurash usuli bilan kimyoviy kurash usulining afzallik va kamchiliklarini taqqoslang.
3. Agar siz xo‘ jalik rahbari bo‘ lganingizda, qanday qaror qabul qilgan bo‘ lardingiz? Javobingizni asoslang.
4. Soqijon Obidovning traktorlarga to‘ sqinlik qilishini qanday baholaysiz? U o‘ z ilmiy e’tiqodini himoya qildimi yoki noto‘ g‘ ri yo‘ l tutdimi?
5. Kimyoviy vositalarni me’yoridan ortiq qo‘ llash atrof-muhit va inson salomatligiga qanday ta’sir ko‘ rsatishi mumkin?
6. Bugungi kunda ekologik xavfsiz qishloq xo‘ jaligini rivojlantirish uchun qanday choralar ko‘ rish zarur?

V. Arxar ovining badiiy talqini: ekologik va huquqiy madaniyatni shakllantirish.

Yozuvchi Qodirjon obrazi orqali tabiatga iste’molchilik munosabati va ekologik qonunlarning buzilishi qanday fojiaviy oqibatlarga olib kelishini badiiy jihatdan ochib beradi. Mast holda Qodirjonning: *“Mehmonlar bilan ovga chiquvdik. Tog‘ da bitta arxar otuvdik...”* [5, 373] deya beparvo gapirishi yovvoyi hayvonni ovlashni oddiy holdek qabul qilayotgan shaxsning ma’naviy qiyofasini namoyon etadi. Asarda arxarni noqonuniy ovlash faqat tabiatga zarar yetkazish emas, balki insoniy mas’uliyatsizlik va qonunni mensimaslikning ifodasi sifatida talqin etiladi.

Qahramonlar dialogida Proxor Polikarpovning Otaqo‘ ziga bildirgan e’tirozi ekologik va huquqiy mazmunni yanada chuqurlashtiradi: *“– Iye? – dedi Proxor go‘ dakning ko‘ zlariday ma’sum ko‘ zlarini pirpiratib. – O‘ lgan odamni piyonista deb, qabih bir jinoyatni bosdi-bosdi qilib yubormoqchimisiz hali? U yoqda oshna-og‘ aynilaringiz odam o‘ ldirib, qonunni oyoqosti qilib, arxar otib yurishsin-u, siz bo‘ lsa bu yoqda…*

– Bitta arxar odamdan aziz bo‘ ptimi?

– Iye? – dedi Proxor yana. – Sizning qarindosh-urug‘ laringiz odam-u, boshqalar odam emasmi? Siz uchun qonun-qoida bormi o‘ zi? Yo bu qonunlar boshqalar uchun yozilgan-u, siz istagan noma’qulchiligingizni qilaverasizmi? …” [5, 380].

Otaqo‘ zining “Bitta arxar odamdan aziz bo‘ ptimi?” degan savoliga Proxorning “Siz uchun qonun-qoida bormi o‘ zi?” deya javob qaytarishi tabiatni muhofaza qilish qonunlari barcha uchun birdek amal qilishi zarurligini ta’kidlaydi. Yozuvchi shu orqali ekologik madaniyatni huquqiy ong va fuqarolik mas’uliyati bilan uzviy bog‘ laydi.

Ushbu parcha asosida o‘ quvchilarni “Ekologik sud” shaklidagi rolli o‘ yinga jalb qilish ham juda samarali bo‘ ladi. Masalan, guruhda sudya, prokuror, Qodirjonning himoyachisi, Proxor Polikarpov, tabiatni muhofaza qilish inspektori, guvoh (Normurod Shomurodov) rollari taqsimlanadi. O‘ quvchilar romandagi dalillarga tayangan holda bahs yuritadilar va yakunda ekologik hamda huquqiy nuqtayi nazardan xulosa chiqaradilar. Bu usul pragmatik yondashuvning asosiy talabi – bilimni real hayotiy vaziyatda qo‘ llash bilan to‘ liq uyg‘ unlashadi.

Badiiy lavha mazmunini chuqur anglash va uni hayotiy vaziyatlar bilan bog‘ lash maqsadida quyidagi pragmatik savollar ustida fikr yuritiladi:

1. Nima uchun Qodirjon arxar ovlashni oddiy voqea sifatida qabul qilmoqda?
2. Yozuvchi arxar ovini tasvirlash orqali o‘ quvchiga qanday ekologik g‘ oyani yetkazmoqchi?
3. Siz Otaqo‘ zining “Bitta arxar odamdan aziz bo‘ ptimi?” degan fikriga qanday munosabat bildirasiz?
4. Proxor Polikarpov nima uchun tabiat muhofazasini qonun ustuvorligi bilan bog‘ laydi?
5. Agar siz tabiatni muhofaza qilish xizmati vakili bo‘ lganingizda, bunday holatda qanday choralar ko‘ rgan bo‘ lardingiz?
6. Nima uchun yovvoyi hayvonlarni asrash ekologik madaniyatning muhim tarkibiy qismi hisoblanadi?

Ko‘ rinib turibdiki, pragmatik savollar o‘ quvchilarda yovvoyi tabiatni asrash, ekologik qonunchilikka hurmat bilan qarash hamda ekologik mas’uliyatni fuqarolik burchi sifatida anglash ko‘ nikmalarini rivojlantirishga xizmat qiladi.

Uyga vazifa sifatida o‘ quvchilarga “Diyonat” romani bilan to‘ liq tanishish, insonning tabiatga munosabati aks etgan yana bir o‘ rinni topib adabiyot daftarga yozish, unga yechim bo‘ ladigan 3 ta pragmatik savol tuzish, sun’iy intellekt yordamida illyustratsiyasini yaratish topshirig‘ i beriladi.

O‘ quvchilarda ekologik madaniyatni rivojlantirish faqat auditoriya mashg‘ ulotlari bilan cheklanmaydi. Bu jarayonni davom ettirishda fanlararo integratsiyaga asoslangan mustaqil ta’lim muhim o‘ rin tutadi. Shunga ko‘ ra quyidagi jadvalda “Diyonat” romani asosida mustaqil ta’lim topshiriqlari tavsiya etiladi:

Jadval-1

T/	Mustaqil ish mavzulari	Fanlararo bog‘ lanish	Ish turi	Shartlari
1	Mingbuloq archazorlari-ning kesilishi va suv muammosi: badiiy ham-da ilmiy tahlil	Adabiyot, biologiya, geografiya	Mini-tadqiqot	Asardan tegishli parchalarni tanlab, ilmiy manbalar bilan qiyosiy tahlil qilish, ekologik muammoga shaxsiy xulosa bildirish (3-5 bet)
2	Tabiatni asrash – kelajak avlod oldidagi mas’uliyat	Adabiyot, tarix, ekologiya	Muammoli esse	Mavzu yuzasidan 250 – 300 so‘ zli esse yozish, dalillar va hayotiy misollar keltirish, mustaqil xulosa chiqarish
3	Arxar ovi ustidan sud	Adabiyot, huquq	Rolli o‘ yin	Rollarni taqsimlash (sudya, prokuror, himoyachi, guvoh, ekolog va boshqalar), asar voqealari asosida dalillar bilan chiqish qilish.
4	Zararkunandalarga qarshi kurashning biologik va kimyoviy usullari: eko-logik yondashuv tahlili	Adabiyot, biologiya, kimyo	Referat	Kamida 5 ta ishonchli manbadan foydalanib, 5 – 7 betli referat tayyorlash va ekologik afzallik hamda kam-chiliklarni tahlil qilish.
5	Men ekolog bo‘ lsam…	Adabiyot, ekologiya, huquq	Ekologik loyiha	Hududdagi ekologik muam-moni aniqlash, uni bartaraf etish bo‘ yicha amaliy loyiha va taqdimot tayyorlash.
6	Ekologik huquqbuzarlik haqida mas’ul tashkilot-ga murojaat xati yozish	Adabiyot, huquq	Shikoyat xati	Rasmiy uslub talablariga rioya qilgan holda ekologik muammo yuzasidan murojaat xatini yozish, muammo va yechim takliflarini asoslash.

O‘ quvchilar mustaqil ish topshiriqlaridan bittasini tanlab bajaradilar. Topshiriqlarni bajarishda romandagi epizodlardan dalillar keltirish, fanlararo bilimlardan foydalanish va shaxsiy xulosani asoslash talab etiladi.

XULOSA

Metodik tahlillar shuni ko‘ rsatdiki, Odil Yoqubovning “Diyonat” romani ekologik madaniyatni rivojlantirish uchun katta didaktik imkoniyatlarga ega. Asarda Mingbuloq archazorlarining kesilishi, tog‘ archalari va suv muammosi, biologik kurash usuli, ilmiy halollik, yovvoyi tabiatni muhofaza qilish kabi ekologik mazmundagi epizodlar o‘ quvchilarda tabiatga mas’uliyatli munosabatni shakllantirishga xizmat qiladi. Asardan olingan adabiy parchalarni pragmatik yondashuv asosida o‘ qitishda muammoli vaziyatlar, rol o‘ ynash, ekologik sud, bahs-munozara, konseptual jadval, klaster, T-sxema hamda fanlararo integratsiyaga asoslangan mustaqil ta’lim topshiriqlaridan foydalanish o‘ quvchilarning ekologik

tafakkuri, tanqidiy fikrlashi va ekologik muammolarni real hayotiy vaziyatlar bilan bog‘ lab tahlil qilish ko‘ nikmalarini rivojlantiradi.

Tadqiqot davomida ishlab chiqilgan pragmatik savollar, interfaol metodlar hamda tanlov asosidagi mustaqil topshiriqlar o‘ quvchilarning ekologik bilimlarini amaliy faoliyat bilan uyg‘ unlashtirish, ekologik muammolarga nisbatan shaxsiy munosabatini shakllantirish va ekologik madaniyatini rivojlantirishda samarali metodik vosita sifatida tavsiya etiladi.

Taklif etilgan metodika namunaviy o‘ quv dasturida belgilangan maqsad va kompetensiyalarni boyitishga xizmat qiladi hamda badiiy asarni ekologik tarbiya vositasi sifatida samarali qo‘ llash imkonini beradi.

Mazkur tadqiqot natijalari akademik litseylarning adabiyot fani namunaviy o‘ quv dasturida o‘ quvchilarga qo‘ yiladigan malaka talablari tizimida alohida kompetensiya sifatida ko‘ rib chiqish yuzasidan metodik tavsiyalar ishlab chiqish imkonini beradi.

RAQAMLI TA' LIM VOSITALARI ASOSIDA BO' LAJAK TEXNOLOGIK TA' LIM O' QITUVCHILARINING METODIK KOMPETENSIYASINI RIVOJLANTIRISH

Abduqahhorova Gulchehra Ulug' bek qizi
ORCID:0009-0001-3836-8339
E-mail: abduqahhorovagulchehra437@gmail.com

Annotatsiya: *Maqolada bo' lajak texnologik ta' lim o' qituvchilarining metodik kompetensiyasini raqamli ta' lim vositalari asosida rivojlantirish masalasi tahlil qilingan. Muallif metodik kompetensiyani to' rt komponentli tuzilma — motivatsion-qadriyat, kognitiv, texnologik-amaliy va refleksiv-baholash komponentlari birligi — sifatida asoslaydi hamda ularning har biri uchun aniq ko' rsatkichlar tizimini taklif etadi. Raqamli vositalar bajaradigan didaktik vazifasiga ko' ra besh guruhga ajratilgan: vizuallashtirish, modellashtirish va loyihalash, virtual amaliyot, tashkiliy-boshqaruv hamda baholash vositalari. Tadqiqotning asosiy xulosasi shundan iborat: raqamli vositalarning o' zi metodik kompetensiyani rivojlantirmaydi; hal qiluvchi omil — talabaning o' sha vositani mustaqil ravishda dars loyihasiga joylashtirish tajribasi. Shu asosda to' rt bosqichli (motivatsion, nazariy, loyihaviy-amaliy, refleksiv) rivojlantirish modeli hamda uch darajali baholash mezonlari ishlab chiqilgan.*

Kalit so' zlar: *metodik kompetensiya, texnologik ta' lim, raqamli ta' lim vositalari, TPACK, bo' lajak o' qituvchi, kasbiy tayyorgarlik, refleksiya, baholash mezonlari.*

РАЗВИТИЕ МЕТОДИЧЕСКОЙ КОМПЕТЕНТНОСТИ БУДУЩИХ УЧИТЕЛЕЙ ТЕХНОЛОГИЧЕСКОГО ОБРАЗОВАНИЯ НА ОСНОВЕ ЦИФРОВЫХ ОБРАЗОВАТЕЛЬНЫХ ИНСТРУМЕНТОВ

Аннотация: *В статье анализируется проблема развития методической компетентности будущих учителей технологического образования на основе цифровых средств обучения. Автор обосновывает методическую компетентность как единство четырёх компонентов — мотивационно-ценностного, когнитивного, технологическо-практического и рефлексивно-оценочного — и предлагает систему показателей для каждого из них. Цифровые средства классифицированы по выполняемой дидактической функции на пять групп: визуализация, моделирование и проектирование, виртуальная практика, организационно-управленческие и оценочные средства. Основной вывод исследования состоит в том, что сами по себе цифровые средства не развивают методическую компетентность; решающим фактором выступает опыт самостоятельного встраивания средства в проект урока. На этой основе разработана четырёхэтапная модель развития (мотивационный, теоретический, проектно-практический, рефлексивный этапы) и трёхуровневые критерии оценивания.*

Ключевые слова: *методическая компетентность, технологическое образование, цифровые средства обучения, TPACK, будущий учитель, профессиональная подготовка, рефлексия, критерии оценивания.*

DEVELOPING THE METHODOLOGICAL COMPETENCE OF FUTURE TECHNOLOGY EDUCATION TEACHERS BASED ON DIGITAL EDUCATIONAL TOOLS

Abstract: *The article examines the development of the methodological competence of future teachers of technological education through digital learning tools. The author defines methodological competence as the unity of four components — motivational-axiological, cognitive, technological-practical and reflective-evaluative — and proposes a set of indicators for each. Digital tools are classified by didactic function into five groups: visualisation, modelling and design, virtual practice, organisational-managerial, and assessment tools. The central conclusion is that digital tools do not by themselves develop methodological competence; the decisive factor is the student' s own experience of embedding a tool into a lesson design. On this basis a four-stage development model (motivational, theoretical, design-practical and reflective stages) and three-level assessment criteria are proposed.*

Keywords: *methodological competence, technological education, digital learning tools, TPACK, pre-service teacher, professional training, reflection, assessment criteria.*

KIRISH

Umumiy o' rta ta' lim tizimida "Texnologiya" fani o' ziga xos o' rin tutadi: u nazariy bilimni emas, avvalo amaliy harakatni, mehnat madaniyatini va texnik tafakkurni shakllantiradi. Shu bois bu fan o' qituvchisidan nafaqat predmet

bilimi, balki har bir mashg‘ ulotni amaliy natijaga yo‘ naltira olish mahorati talab etiladi. Ana shu mahorat pedagogika fanida metodik kompetensiya deb ataladi.

So‘ nggi yillarda ta’ lim jarayonining raqamlashuvi bu vazifani ham kengaytirdi, ham murakkablashtirdi. “Raqamli O‘ zbekiston — 2030” strategiyasi [1] va oliy ta’ limni rivojlantirish konsepsiyasi [2] o‘ quv jarayoniga zamonaviy axborot texnologiyalarini keng joriy etishni belgilab berdi; “Ta’ lim to‘ g‘ risida”gi Qonunda esa masofaviy va aralash ta’ lim shakllari qonuniy maqom oldi [3]. Natijada bo‘ lajak o‘ qituvchi endi faqat “nima o‘ rgatish” va “qanday o‘ rgatish” degan savollarga emas, “qaysi raqamli vosita orqali o‘ rgatish maqsadga muvofiq” degan uchinchi savolga ham javob bera olishi kerak.

Amaliyotdagi muammo shundan iboratki, oliy ta’ lim muassasalarida raqamli vositalarni o‘ rgatish ko‘ pincha texnik ko‘ nikma darajasida qolib ketmoqda. Talaba dasturdan foydalanishni o‘ rganadi, biroq uni aniq mavzu, aniq sinf va aniq didaktik maqsad bilan bog‘ lay olmaydi. Xalqaro tadqiqotlar ham xuddi shu holatni qayd etadi: o‘ qituvchilar tayyorgarligida texnologiya alohida modul sifatida o‘ qitilganda, uning metodik amaliyotga o‘ tishi juda past bo‘ ladi [4; 5].

Maqolaning maqsadi — bo‘ lajak texnologik ta’ lim o‘ qituvchilarining metodik kompetensiyasini raqamli vositalar asosida rivojlantirishning tarkibiy modelini va uni baholash mezonlarini ishlab chiqishdan iborat. Vazifalar: metodik kompetensiya tarkibini aniqlashtirish; raqamli vositalarni didaktik vazifasiga ko‘ ra tasniflash; rivojlantirish bosqichlarini asoslash; baholash mezonlarini shakllantirish.

Mavzuning o‘ rganilganlik darajasi va tadqiqot metodologiyasi

Muammoning nazariy asoslari L. Shulmanning pedagogik-predmet bilimi (PCK) konsepsiyasiga borib taqaladi; olim o‘ qituvchi bilimining o‘ ziga xosligi predmetni bilishda emas, uni o‘ quvchi tushunadigan shaklga aylantira olishda ekanini asoslagan [6]. P. Mishra va M. Kelerning TPACK modeli bu qarashni texnologiya bilan to‘ ldirib, o‘ qituvchi bilimini uch soha — predmet, pedagogika va texnologiya — kesishmasi sifatida talqin qiladi [7]. Yevropa Ittifoqining DigCompEdu ramkasi o‘ qituvchining raqamli kompetensiyasini olti soha va yigirma ikki elementga ajratadi [8], YUNESKOning o‘ qituvchilar uchun AKT kompetensiyalari ramkasi esa uni uch daraja — bilimni egallash, chuqurlashtirish va yaratish — bo‘ yicha bosqichlashtiradi [9].

Texnologiyani joriy etishning amaliy shartlari bo‘ yicha P. Ertmer va A. Ottenbrayt-Leftvich o‘ qituvchi e’ tiqodi va o‘ ziga ishonchi texnik jihozlanishdan ko‘ ra kuchliroq omil ekanini ko‘ rsatgan [4]. J. Tonder va hammualliflari bo‘ lajak o‘ qituvchilarni tayyorlashda eng samarali yondashuv texnologiyani alohida fan sifatida emas, metodika kurslariga singdirish ekanini umumlashtirgan [5]. E. Instefyord va E. Munte esa Norvegiya tajribasida shu integratsiya amalda ko‘ pincha yuzaki qolishini qayd etadi [10]. R. Hamilton va hammualliflari keng tarqalgan SAMR modelini tanqidiy tahlil qilib, uning kontekstni hisobga olmasligini kamchilik sifatida ko‘ rsatadi [11]. G. Falloon o‘ qituvchining raqamli kompetensiyasi doirasiga axloqiy va xavfsizlik jihatlarini ham kiritadi [12].

Milliy ilmiy adabiyotda texnologik ta’ lim metodikasi va raqamlashtirish masalalari alohida-alohida yoritilgan; ikkalasini bir tizimga birlashtirgan, ya’ ni raqamli vositani metodik kompetensiya rivojlanishining vositasi sifatida ko‘ radigan tadqiqotlar esa kam. Mazkur maqola shu yo‘ nalishda urinish sifatida qaraladi.

Tadqiqotda nazariy tahlil, tarkibiy-mantiqiy modellashtirish, xorijiy kompetensiya ramkalarini qiyoslash hamda pedagogik hujjatlarni (o‘ quv reja, fan dasturi) mazmunan o‘ rganish usullaridan foydalanildi. Ishlab chiqilgan model nazariy asoslash bosqichida bo‘ lib, uning eksperimental tekshiruvi tadqiqotning keyingi bosqichi hisoblanadi.

Tahlil va natijalar

Metodik kompetensiyaning tarkibi. Adabiyotlar tahlili va texnologik ta’ lim o‘ ziga xosligidan kelib chiqib, metodik kompetensiya to‘ rt komponentli tuzilma sifatida belgilandi (1-jadval). Bunday ajratishning amaliy ma’ nosi bor: har bir komponent o‘ z ko‘ rsatkichiga ega bo‘ lsa, uni alohida rivojlantirish ham, alohida baholash ham mumkin bo‘ ladi.

1-jadval

Bo‘ lajak texnologik ta’ lim o‘ qituvchisi metodik kompetensiyasining tarkibi

Komponent	Mazmuni	Asosiy ko‘ rsatkichlari
Motivatsion-qadriyat	Raqamli vositadan foydalanishga ichki ehtiyoj va kasbiy mas’ uliyat	Yangi vositani mustaqil o‘ rganishga intilish; qo‘ llashdagi o‘ z-o‘ ziga ishonch
Kognitiv	Fan mazmuni, metodika va raqamli vosita imkoniyatlarini bilish	Vosita imkoniyatini didaktik maqsad bilan bog‘ lay olish; TPACK doirasidagi bilim

Komponent	Mazmuni	Asosiy ko‘ rsatkichlari
Texnologik-amaliy	Vositani dars loyihasiga joylashtira olish va boshqara olish	Raqamli element kiritilgan dars ishlanmasini tuzish; sinfda amalda qo‘ llash
Refleksiv-baholash	Natijani tahlil qilish va o‘ z faoliyatini tuzatish	Vosita samarasini baholay olish; muvaffaqiyatsiz tanlovni tan olib, muqobil topish

Manba: muallif tomonidan [6; 7; 8; 9] asosida ishlab chiqilgan.

Raqamli vositalarning didaktik tasnifi. Amaliyotda vositalar ko‘ pincha texnik belgisiga ko‘ ra (dastur, ilova, platforma) sanab o‘ tiladi. Metodik nuqtai nazardan esa ularni bajaradigan didaktik vazifasiga ko‘ ra guruhlash foydaliroq, chunki o‘ qituvchi darsga tayyorgarlik ko‘ rayotganda “qaysi dastur” emas, “qaysi vazifani hal qilish kerak” degan savoldan yo‘ lga chiqadi (2-jadval).

2-jadval

Raqamli ta’ lim vositalarining didaktik vazifasiga ko‘ ra tasnifi

Guruh	Didaktik vazifasi	Texnologik ta’ limdagi qo‘ llanilishi
Vizuallashtirish vositalari	Ko‘ rinmas yoki murakkab jarayonni ko‘ rsatish	Mexanizm ishlash tamoyilining animatsiyasi; texnologik jarayon videosi
Modellashtirish va loyihalash	Buyumni tayyorlashdan avval loyihalash	3D-modellashtirish, oddiy CAD muhitlari, elektron chizmachilik
Virtual amaliyot	Xavfli yoki qimmat amaliyotni xavfsiz takrorlash	Virtual laboratoriya, dastgoh simulyatori, mehnat xavfsizligi mashqlari
Tashkiliy-boshqaruv	O‘ quv jarayonini rejalashtirish va kuzatish	Elektron platforma, topshiriqlar va portfolio yuritish
Baholash vositalari	Natijani tez va obyektiv o‘ lchash	Interaktiv test, formativ so‘ rov, mezonli baholash jadvali

Manba: muallif tomonidan tuzilgan.

Tasnifning metodik ahamiyati shundaki, u talabaga tanlov mantiqini o‘ rgatadi. Agar dars maqsadi buyum konstruksiyasini tushuntirish bo‘ lsa, birinchi guruh vositasi yetarli; agar maqsad loyihalash ko‘ nikmasini shakllantirish bo‘ lsa, ikkinchi guruhga o‘ tish zarur. Bunday bog‘ lanish o‘ rnatilmasa, raqamli vosita dars mazmunini boyitmaydi, aksincha, uni chalg‘ itadi.

Rivojlantirish modeli. Metodik kompetensiyani rivojlantirish to‘ rt bosqichda amalga oshirilishi maqsadga muvofiq deb topildi. Birinchi — motivatsion bosqich: talaba raqamli vositasiz va u bilan o‘ tilgan darsni qiyoslab, farqni o‘ zi ko‘ radi; bunda tayyor xulosa berilmaydi, taqqoslash imkoniyati beriladi. Ikkinchi — nazariy bosqich: TPACK mantiqi, vositalar tasnifi va tanlov mezonlari o‘ rganiladi. Uchinchi — loyihaviy-amaliy bosqich, model markazi hisoblanadi: talaba aniq mavzu bo‘ yicha raqamli element kiritilgan dars ishlanmasini tuzadi, guruhda taqdim etadi va pedagogik amaliyotda sinab ko‘ radi. To‘ rtinchi — refleksiv bosqich: dars videoyozuvi yoki hamkurslar sharhi asosida tanlov qanchalik o‘ rinli bo‘ lgani tahlil qilinadi.

Modelning asosiy g‘ oyasi uchinchi bosqichda mujassam. Xorijiy tadqiqotlar ko‘ rsatganidek, texnologiyani ko‘ rsatish yoki tushuntirish o‘ zi ko‘ nikmaga aylanmaydi; o‘ zgarish talaba vositani o‘ z dars loyihasiga mustaqil joylashtirganda ro‘ y beradi [5; 10]. Shu bois modelda amaliy loyiha soatlari nazariy soatlardan kam bo‘ lmasligi shart deb belgilandi.

Baholash mezonlari. Kompetensiyani baholash uchun uch daraja ajratildi. Past darajada talaba vositadan foydalana oladi, biroq uni mavzu maqsadi bilan bog‘ lay olmaydi va tanlovini asoslay olmaydi. O‘ rta darajada vosita to‘ g‘ ri tanlanadi va darsga kiritiladi, ammo qo‘ llash bir xil, andozaviy tarzda amalga oshiriladi. Yuqori darajada esa talaba vositani sinf tayyorgarligi va dars sharoitiga moslab tanlaydi, kutilmagan vaziyatda muqobilga o‘ ta oladi va natijani mustaqil tahlil qiladi. Amaliy baholash quyidagi uch manba asosida olib borilishi tavsiya etiladi: dars ishlanmasi matni, ochiq dars kuzatuvi va talabaning refleksiv hisoboti.

MUHOKAMA

Taklif etilayotgan yondashuv bo‘ yicha ikkita e’ tirozni oldindan ko‘ rib chiqish o‘ rinli. Birinchisi — moddiy-texnik ta’ minot masalasi: barcha oliy ta’ lim muassasalarida ham 3D-printer yoki litsenziyali dasturiy ta’ minot yo‘ q. Bu e’ tiroz asosli, biroq modelning mantig‘ i qimmat jihozga bog‘ liq emas: vizuallashtirish, virtual amaliyot va baholash guruhidagi vositalarning aksariyati bepul yoki ochiq manbali muhitlarda ham mavjud. Muhimi — vositaning narxi emas, uni tanlash mantig‘ i.

Ikkinchi e’ tiroz — vaqt tanqisligi. Metodika kurslari soati cheklangan sharoitda qo‘ shimcha loyiha ishlariga vaqt topish qiyin. Bu yerda yechim qo‘ shimcha soat ajratishda emas, mavjud topshiriqlar mazmunini o‘ zgartirishda ko‘ rinadi: an’ anaviy dars ishlanmasi topshirig‘ ining o‘ ziga raqamli komponentni majburiy element sifatida kiritish yetarli. Shu tariqa yuklama ortmaydi, topshiriqning didaktik sig‘ imi esa oshadi.

Tadqiqotning cheklovini ham ochiq qayd etish lozim. Model nazariy asoslash bosqichida bo‘ lib, uning samaradorligi hozircha eksperimental tekshirilmagan. Keyingi bosqichda nazorat va tajriba guruhlari ajratilgan pedagogik eksperiment o‘ tkazish, natijalarni statistik usullar bilan qiyoslash rejalashtirilgan.

XULOSA VA TAKLIFLAR

O‘ tkazilgan tahlil quyidagi xulosaga olib keladi. Bo‘ lajak texnologik ta’ lim o‘ qituvchisining metodik kompetensiyasi raqamli vositalarni bilish hisobiga emas, ularni aniq didaktik maqsad bilan bog‘ lay olish tajribasi hisobiga rivojlanadi. Vosita — maqsad emas, vosita; uning qiymati dars natijasiga qo‘ shgan hissasi bilan o‘ lchanadi.

Quyidagi takliflar ilgari suriladi. Birinchidan, raqamli texnologiyalar bo‘ yicha materialni alohida modul sifatida emas, texnologik ta’ lim metodikasi fanlariga singdirilgan holda o‘ qitish. Ikkinchidan, har bir metodika topshirig‘ ida raqamli komponentni majburiy element sifatida belgilash va uni asoslash talabini kiritish. Uchinchidan, pedagogik amaliyot davomida talaba kamida bitta darsni raqamli vosita ishtirokida o‘ tkazishi va uni refleksiv tahlil qilishi lozim.

To‘ rtinchidan, 1-jadvalda keltirilgan komponentlar va uch darajali mezonlar asosida talabaning metodik kompetensiyasini kuzatib boruvchi portfolio tizimini joriy etish. Beshinchidan, professor-o‘ qituvchilar malakasini oshirish kurslarida e’ tiborni dasturlardan foydalanish texnikasidan ularni metodik jihatdan qo‘ llash masalasiga ko‘ chirish. Oltinchidan, ishlab chiqilgan modelni eksperimental sinovdan o‘ tkazish va natijalarni keyingi tadqiqotlarda e’ lon qilish.

SUN'IY INTELLEKT VA KOMPYUTER ALGEBRA TIZIMLARI INTEGRATSIYASI ASOSIDA INTEGRAL HISOBLASHNI O‘ QITISHNING TAKOMILLASHTIRILGAN METODIK MODELI

Eshbekova G

Annotatsiya: *Maqolada oliy ta'limda integral hisoblashni o‘ qitish uchun sun'iy intellekt va kompyuter algebra tizimlarini integratsiyalovchi metodik model taklif etiladi. Model talabaning dastlabki mustaqil urinishi, sun'iy intellektning yo‘ naltiruvchi yordami, ramziy hisoblash, vizuallashtirish, matematik tekshirish va yangi masalani vositalarsiz yechish bosqichlaridan tashkil topadi. Nazariy-metodik tahlil asosida ishtirokchilarning vazifalari, bosqichlar orasidagi o‘ tish shartlari hamda xato turiga mos qayta aloqa mexanizmi aniqlashtiriladi. Model bir o‘ zgaruvchili va karrali integrallar misolida ochib berilib, hisoblashlar analitik usul hamda SymPy orqali tekshiriladi. Mustaqil fikrlashni baholash mezonlari va modelni empirik sinash rejasi ishlab chiqiladi. Keltirilgan natijalar matematik va metodik xarakterga ega; o‘ zlashtirish samaradorligining statistik oshgani haqidagi xulosa ilgari surilmaydi.*

Kalit so‘ zlar: *sun'iy intellekt, kompyuter algebra tizimi, integral hisoblash, metodik model, karrali integral, vizuallashtirish, matematik verifikatsiya, mustaqil fikrlash, formativ baholash.*

AN ENHANCED METHODOLOGICAL MODEL FOR TEACHING INTEGRAL CALCULUS BASED ON THE INTEGRATION OF ARTIFICIAL INTELLIGENCE AND COMPUTER ALGEBRA SYSTEMS

Abstract: *This article proposes an instructional model that integrates artificial intelligence and computer algebra systems for teaching integral calculus in higher education. The model combines an initial independent attempt, guided AI assistance, symbolic computation, visualization, mathematical verification, and unaided transfer to a new problem. It specifies the roles of the participants, transition conditions, and feedback matched to error types. Single-variable and multiple-integral examples illustrate the model, with analytical results checked using SymPy. An assessment rubric and an empirical evaluation design are proposed. The findings establish mathematical consistency and an instructional framework rather than a statistically demonstrated improvement in learning outcomes.*

Keywords: *artificial intelligence, computer algebra system, integral calculus, instructional model, multiple integral, visualization, mathematical verification, independent reasoning.*

УСОВЕРШЕНСТВОВАННАЯ МЕТОДИЧЕСКАЯ МОДЕЛЬ ОБУЧЕНИЯ ИНТЕГРАЛЬНОМУ ИСЧИСЛЕНИЮ НА ОСНОВЕ ИНТЕГРАЦИИ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА И СИСТЕМ КОМПЬЮТЕРНОЙ АЛГЕБРЫ

Аннотация: *В статье предлагается методическая модель обучения интегральному исчислению в высшей школе, объединяющая возможности искусственного интеллекта и систем компьютерной алгебры. Модель включает этапы, предусматривающие самостоятельную попытку решения задачи студентом, получение рекомендаций с помощью ИИ, выполнение символьных вычислений, визуализацию, математическую проверку и решение новой задачи без использования вспомогательных инструментов. На основе теоретико-методологического анализа определены роли участников, условия перехода между этапами и механизм обратной связи, адаптированный к конкретным типам ошибок. Модель иллюстрируется примерами вычисления интегралов от функций одной переменной и кратных интегралов; правильность вычислений проверяется как аналитическими методами, так и с помощью библиотеки SymPy. Разработаны критерии оценки самостоятельности мышления и план эмпирической апробации модели. Представленные результаты носят математический и методический характер; утверждения о статистически значимом повышении эффективности обучения не выдвигаются.*

Ключевые слова: *искусственный интеллект, система компьютерной алгебры, интегральное исчисление, методическая модель, кратный интеграл, визуализация, математическая проверка, самостоятельность мышления, формирующее оценивание.Kirish va tuatmoning qo‘ yilishi*

KIRISH

Integral hisoblashni o‘ qitishning maqsadi talabaga boshlang‘ ich funksiyani topish yoki tayyor algoritmni takrorlashni o‘ rgatish bilan cheklanmaydi. Talaba masalaning shartini matematik ifodaga aylantirishi, integrallash usulini tanlashi, natijaning qo‘ llanish shartlarini aniqlashi va uning geometrik mazmunini tushuntirishi kerak. Raqamli vosita yordamida to‘ g‘ ri son yoki formula olish ushbu kompetensiyalarning barchasi shakllanganini ko‘ rsatmaydi. Shuning uchun o‘ quv natijasi hisoblash mahsuli bilan birga uni asoslash jarayoni orqali baholanishi zarur.

Sun’iy intellekt (AI) bilan muloqot yechim yo‘ lini muhokama qilishga, kompyuter algebra tizimi (CAS) esa ifodani ramziy qayta ishlashga xizmat qilishi mumkin. Ularni bir mashg‘ ulotda qo‘ llashning o‘ zi metodik integratsiyani anglatmaydi. Integratsiya talaba urinishi, yordam turi, hisoblash amali va mustaqil tekshiruv o‘ rtasidagi didaktik bog‘ lanish orqali yuzaga keladi. Mazkur maqolada ushbu bog‘ lanishni boshqaradigan bosqichlar va o‘ tish shartlari tadqiqot muammosi sifatida qo‘ yiladi.

UNESCOning generativ AI bo‘ yicha qo‘ llanmasida ta’lim texnologiyalarini inson manfaatlari va faol ishtirokiga yo‘ naltirish, pedagogik maqsadga muvofiqligini tekshirish masalalari yoritilgan . Kasneci va hammualliflarning tadqiqoti katta til modellarining ta’limdagi imkoniyatlari va muammolarini muhokama qiluvchi tadqiqot yo‘ nalishiga mansub . Bu yo‘ nalish integral hisoblashda yordamdan foydalanish bilan mustaqil bilimni baholashni ajratish zaruratini o‘ rganish uchun umumiy kontekst beradi.

Mathematica, Maple va MATLABning Symbolic Math Toolbox hujjatlari ramziy integrallashning sintaksisi hamda hisoblash shartlarini aniqlashtiradi. OpenStax manbasida qutb koordinatalariga o‘ tish va ikki karrali integralning geometrik talqini beriladi .Ushbu manbalar vositalarning texnik imkoniyati va matematik mazmunini asoslaydi; ulardan muayyan metodikaning pedagogik samaradorligi avtomatik ravishda kelib chiqmaydi.

Tadqiqot maqsadi AI yordami, CAS hisobi va talabaning mustaqil matematik tahlilini izchil birlashtiruvchi metodik modelni ishlab chiqish. Obyekt oliy ta’limda integral hisoblashni o‘ qitish jarayoni, predmet esa ushbu jarayondagi yordam, tekshirish va baholash mexanizmlaridir. Nazariy tahlil, didaktik loyihalash, analitik yechimlarni taqqoslash va ramziy tekshirish usullari qo‘ llanildi. Yondashuvning takomillashtirilgan jihati alohida vositalarni qo‘ llashga nisbatan vazifalar taqsimoti, tekshirish shartlari va vositasiz yakuniy topshiriqning aniq belgilanishidir.

Metodik modelning asosiy ketma-ketligi quyidagicha belgilanadi: talaba →AI →CAS →vizuallashtirish →matematik tahlil →mustaqil topshiriq →baholash. Ushbu ketma-ketlik o‘ qituvchi nazoratidagi o‘ quv siklini ifodalaydi. AI hamda CAS o‘ rtasida avtomatik dasturiy ulanish bo‘ lishi shart emas: talaba tekshirilgan ifodani bir muhitdan boshqasiga o‘ tkazishi mumkin. Bunda har bir bosqichdan keyin tekshiriladigan o‘ quv mahsuli hosil bo‘ ladi.

1-jadval. Model bosqichlari va tekshiriladigan natijalar

Bosqich	Asosiy faoliyat	Tekshiriladigan natija
Talaba	Masalani mustaqil tahlil qiladi	Dastlabki reja va yechim urinishi
AI yordami	Savol va ishoralar bilan yo‘ naltiradi	Talaba asoslagan tuzatish
CAS	Kiritilgan ifodani hisoblaydi	Shartlari ko‘ rsatilgan formula
Vizuallashtirish	Grafik yoki sohani tasvirlaydi	Chegaralar va geometrik talqin
Matematik tahlil	Natijalarni taqqoslaydi	Hosila, baho yoki muqobil yechim
Mustaqil topshiriq	Yangi masalani vositasiz yechadi	Bilimni yangi holatga ko‘ chirish
Baholash	Dalillarni mezonlar bilan baholaydi	Ball va keyingi o‘ quv vazifasi

Model uchta tamoyilga tayanadi. Birinchisi yordamdan oldin mustaqil urinishni qayd etish. Ikkinchisi dastur natijasini masala sharti va matematik qoida bilan tekshirish. Uchinchisi yakuniy bahoni yangi vaziyatdagi mustaqil faoliyat bilan bog‘ lash. Bunday tartibda talaba tayyor javob iste’molchisi bo‘ lib qolmasdan, hisoblashning mazmuni va asoslanganligi uchun javob beruvchi ishtirokchi bo‘ ladi.

O‘ qituvchi masalaning murakkabligini, ruxsat etilgan yordamni va baholash mezonini belgilaydi. AI yo‘ naltiruvchi izoh beradi, CAS esa aniq kiritilgan matematik amalni bajaradi. Grafik olingan ifodani talqin qilishga xizmat qiladi. Bu

vazifalar farqi saqlanmasa, bir vositaning javobi ikkinchi vositaga tekshirilmasdan ko‘ chirilishi va dastlabki xato keyingi bosqichlarda yashirin qolishi mumkin.

Mashg‘ ulot boshida o‘ qituvchi integral masalasi va kutiladigan natijani belgilaydi. Talaba yordam olmasdan kamida usul tanlovi va dastlabki qadamni yozadi. Agar boshlashda qiynalsa, yordam umumiy savoldan boshlanadi: “Integrand qanday tuzilgan” yoki “Qaysi almashtirish ifodani soddalashtiradi?”. Keyingi darajada zarur qoida eslatiladi. To‘ liq yechim esa talabaning urinishi tahlil qilingandan keyin muhokama qilinadi.

AIga beriladigan namunaviy topshiriq: “Quyidagi integral bo‘ yicha yozgan yechimimni ko‘ rib chiqing. Avval birinchi shubhali qadamni belgilang. Yakuniy javobni bermasdan, shu qadamni tekshirishim uchun bitta savol bering. Mening javobimdan keyin keyingi ishorani bering”. Bu topshiriq pedagogik ssenariydir; AI ko‘ rsatmaga doimo rioya qiladi degan kafolat emas. Shuning uchun o‘ qituvchi yordam mazmunini nazorat qiladi, talaba esa qabul qilgan tuzatishini matematik qoida bilan asoslaydi.

Qayta aloqa xatoning manbasiga qarab tashkil etiladi. Agar soha yoki integral noto‘ g‘ ri tuzilgan bo‘ lsa, talaba masala shartiga qaytadi. Algebraik xatoda mos hisoblash qadami tekshiriladi. Grafik bilan natija mos kelmasa, masshtab va chegaralar qayta ko‘ riladi. AI va CAS javoblari mos tushgan taqdirda ham mustaqil matematik tekshiruv bajariladi. Bosqichlar orasidagi o‘ tish uchun aynan izohlangan dalil talab qilinadi.

Bir o‘ zgaruvchili integralda modelning qo‘ llanishi

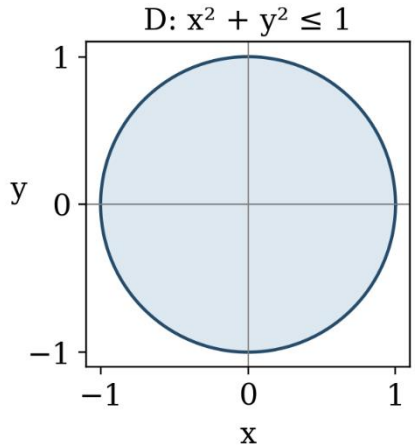
Dastlab $\int x \cdot e^x\,dx$ integrali beriladi. Talaba $u = x$ va $dv = e^x\,dx$ deb tanlaydi: x ni differensiallash uni soddalashtiradi, eksponentani integrallash esa uning shaklini saqlaydi. Bo‘ laklab integrallashdan:

$$\int x \cdot e^x\,dx = x \cdot e^x - e^x + C = (x - 1)e^x + C. \quad (1)$$

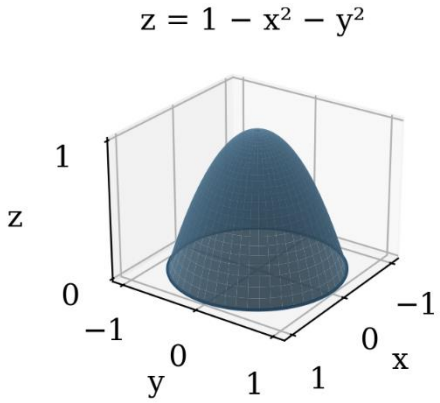
Muqobil usulda boshlang‘ ich funksiya $F(x) = (ax + b)e^x$ ko‘ rinishida izlanadi. $F'(x) = (ax + a + b)e^x$ ifodasini $x \cdot e^x$ bilan taqqoslash $a = 1$ va $b = -1$ ni beradi. Ikki usul bir xil natijaga olib keladi. Agar talaba $G(x) = (x + 1)e^x$ deb yozsa, $G'(x) - x \cdot e^x = 2e^x \neq 0$ bo‘ lishi xatoni aniqlaydi. Talaba ayirish ishorasi qayerda o‘ zgarganini topib, yechimni tuzatadi.

So‘ ng yangi topshiriq sifatida $\int x \cdot e^{2x}\,dx$ vositasiz yechiladi. Nazorat javobi $e^{2x}(x/2 - 1/4) + C$ bo‘ lib, bu yerda eksponentadagi koeffitsiyentni hisobga olish zarur. Shunday qilib, ayni misolni yoddan takrorlash bilan usulni yangi holatga ko‘ chirish farqlanadi.

Karrali integrallarni geometrik modellashtirish



Karrali integrallar uchun $D = \{(x, y): x^2 + y^2 \le R^2\}$, $R > 0$ doira hamda uning ustidagi $z = R^2 - x^2 - y^2$ sirt olinadi. Talaba avval sohaning shaklini chizadi va sirt balandligi D da manfiy emasligini ko‘ rsatadi. Jism hajmi $V = \iint_D (R^2 - x^2 - y^2)\,dA$ orqali ifodalanadi. Doiraviy simmetriya qutb koordinatalariga o‘ tishni asoslaydi [6].



$x = r\cos\theta$, $y = r\sin\theta$ almashtirishda $0 \le r \le R$ va $0 \le \theta \le 2\pi$. Yakobian modulining r ga tengligi sababli $dA = r\,dr\,d\theta$. Natijada:

$$V = \int_0^{2\pi}\int_0^{R}(R^2 - r^2)r\,dr\,d\theta = \pi R^4/2. \quad (2)$$

Uch karrali integralda shu jism $0 \le z \le R^2 - r^2$ orqali tavsiflanadi. Silindrik koordinatalarda $dV = r\,dz\,dr\,d\theta$ bo‘ lgani uchun:

$$V = \int_0^{2\pi}\int_0^{R}\int_0^{R^2 - r^2} r\,dz\,dr\,d\theta = \pi R^4/2. \quad (3)$$

1-rasm. R = 1 uchun doiraviy soha va jismning yuqori sirti

Ichki integralni z bo‘ yicha hisoblash (3) ni (2) ga keltiradi. Talaba ikki karrali integralda balandlik integrandda, uch karrali integralda esa chegaralarda ifodalanganini tushuntiradi. Rasm tenglamalar asosida qurilgan; unda jism $z = 0$

tekisligi bilan pastdan chegaralanadi. Parametrni o‘ zgartirishda avval hajm haqidagi taxmin yozilib, keyin formula va tasvir bilan taqqoslanadi. Bu sirtlar oilasida R ikki marta oshsa, hajm 16 marta ortadi, chunki balandlik ham R^2 ga bog‘ liq.

Hisoblashlarni tekshirish va xatoni tahlil qilish

Matematik misollar mahalliy SymPy 1.14.0 muhitida ramziy tekshirildi. integrate funksiyasi integralni hisoblash uchun qo‘ llanildi [7]. Birinchi misolda boshlang‘ ich funksiyaning hosilasi bilan integrand ayirmasi nolga teng bo‘ ldi. Karrali integrallarda R musbat parametr sifatida belgilandi; ikki va uch karrali hisoblashlar bir xil $\pi R^4/2$ ifodasini berdi. Quyidagi kod tekshirishni qayta bajarish imkonini beradi:

```
from sympy import symbols, exp, pi, integrate, diff, simplify
x, r, t, z = symbols("x r t z", real=True)
R = symbols("R", positive=True)
F = integrate(x*exp(x), x)
check = simplify(diff(F, x) - x*exp(x))
V = integrate((R**2-r**2)*r, (r, 0, R), (t, 0, 2*pi))
W = integrate(r, (z, 0, R**2-r**2), (r, 0, R), (t, 0, 2*pi))
comparison = simplify(V - W)
```

Tekshiruvda check = 0, comparison = 0 olindi. R = 1 uchun Mathematica muhitidagi namunaviy yozuv Integrate[(1-r^2)*r, {t,0,2*Pi}, {r,0,1}], Maple muhitida esa int(int((1-r^2)*r,r=0..1),t=0..2*Pi) ko‘ rinishidadir [3; 4]. Bu ikki buyruq dars uchun namuna sifatida keltirilgan; ularning ayni dasturlarda bajarilgani da’vo qilinmaydi. SymPy hisoblashlari matematik misollarni tekshiradi, talabalarning o‘ zlashtirish natijalarini emas.

Xato diagnostikasida Yakobian r ni tushirib qoldirish namunasi muhim. R = 1 bo‘ lganda noto‘ g‘ ri integral $4\pi/3$ ni beradi. Jism radiusi va balandligi 1 bo‘ lgan silindr ichida joylashgani uchun uning hajmi π dan katta bo‘ la olmaydi. Shunday qilib, geometrik baho noto‘ g‘ ri modelni aniqlaydi. AI «Hajm qaysi sodda jismning hajmidan oshmasligi kerak?» degan savol bilan talabani xatoni izlashga yo‘ naltirishi mumkin.

Tekshirish faqat dasturlar javobini solishtirishdan iborat bo‘ lmaydi. Bir o‘ zgaruvchili integralda hosila, aniq integralda chegaralar va ishora, karrali integralda soha hamda Yakobian tekshiriladi. Bir nechta sonli nuqtada moslik umumiy ayniyatni isbotlamaydi. Shuningdek, nolga soddalashmagan ramziy ayirma javoblar albatta har xil degani emas: qo‘ shimcha algebraik almashtirish va parametr shartlari talab etilishi mumkin.

Baholashda uchta material taqqoslanadi: yordamdan oldingi urinish, yordamdan keyingi asoslangan tuzatish va yangi masalaning mustaqil yechimi. Ushbu materiallar talabaga qaysi bosqichda qanday ko‘ mak kerak bo‘ lganini ko‘ rsatadi. Yordam so‘ raganlikning o‘ zi ballni pasaytirish uchun sabab bo‘ lmaydi; asosiy mezon yordamdan keyin bilimni mustaqil qo‘ llashdir. AI bilan yozishmalar bahoni almashtirmaydi, balki o‘ quv jarayonini tahlil qilish uchun qo‘ shimcha ma’lumot bo‘ ladi.

Yakuniy topshiriqda $D_1 = \{(x, y): 1 \le x^2 + y^2 \le 4\}$ halqa ustidagi $z = 4 - x^2 - y^2$ sirt ostida joylashgan jism hajmini topish taklif etiladi. Talaba yangi chegaralarni $1 \le r \le 2$ va $0 \le \theta \le 2\pi$ sifatida mustaqil belgilaydi. Nazorat uchun hajm $9\pi/2$ ga teng; mazkur qiymat ham SymPy yordamida tekshirildi. Topshiriq asosiy doiraviy misoldan sohaning halqa ekanligi bilan farqlanadi va chegaralarni anglashni baholaydi.

2-jadval. Mustaqil yechimni baholash mezonlari

Mezon	***2 ball uchun talab***
Model va shartlar	*Soha yoki aniqlanish sohasi to‘ g‘ ri ko‘ rsatilgan*
Usulni tanlash	*Usul yoki koordinatalar tanlovi asoslangan*
Hisoblash	*Almashtirish va hisoblash qadamlari to‘ g‘ ri*
Tekshirish va talqin	*Natija mustaqil dalil bilan tekshirilgan*
Bilimni ko‘ chirish	*Yangi masala vositasiz izohlangan va yechilgan*

Har bir mezon bo‘ yicha 0 ball bajarilmagan yoki tubdan noto‘ g‘ ri, 1 ball qisman to‘ g‘ ri yoki asoslash yetarli emas, 2 ball to‘ g‘ ri va asoslangan bajarishni anglatadi. Umumiy natija beshta mezon yig‘ indisi sifatida 0–10 ball oralig‘ ida olinadi. Mezonlar taklif etilgan rubrika bo‘ lib, standartlashtirilgan diagnostik test sifatida tasdiqlanmagan. Uni amaliyotga kiritishda namunaviy ishlarni ikki baholovchi mustaqil tekshirishi va talqinlar mosligi aniqlanishi maqsadga muvofiq.

Xatolar soni bilan birga ularning turi qayd etiladi: konseptual, protseduraviy yoki texnik. Soha va Yakobianni tushunmaslik konseptual, integrallash qadamidagi xato protseduraviy, sintaksis yoki qavs xatosi texnik holat sifatida tahlil qilinadi. Ushbu tasnif keyingi mashg‘ ulotda butun mavzuni takrorlash o‘ rniga aynan zarur tushunchaga qaytish imkonini beradi.

Modelni empirik baholash rejasi va muhokama

Modelning ta’lim natijalariga ta’sirini aniqlash uchun nazorat va joriy etish guruhlarini taqqoslaydigan tadqiqot rejalashtirilishi mumkin. Har ikki guruhga bir xil mavzu, teng o‘ quv vaqti va murakkabligi mos topshiriqlar beriladi. Boshlang‘ ich test yordamida tayyorgarlik qayd etiladi. Imkon bo‘ lsa, guruhlarga taqsimlash tasodifiy amalga oshiriladi; mavjud akademik guruhlar ishlatilsa, dizayn kvazieksperimental deb belgilanadi va boshlang‘ ich farqlar tahlilda hisobga olinadi.

Asosiy natija ko‘ rsatkichi AI va CASsiz bajariladigan yangi masalalarning yakuniy ballidir. Qo‘ shimcha ko‘ rsatkichlar sifatida konseptual xatolar ulushi, yordamga murojaat qilish darajasi va kechiktirilgan nazoratdagi natijalar olinadi. Faqat raqamli vosita mavjud paytdagi yuqori ball o‘ rganishning barqarorligini isbotlamaydi. Shu sababli yakuniy topshiriq va keyinroq o‘ tkaziladigan nazoratda bilimni saqlash hamda qo‘ llash birgalikda baholanadi.

Tahlilda guruhlar hajmi, boshlang‘ ich va yakuniy natijalar, tarqoqlik ko‘ rsatkichlari, ta’sir kattaligi hamda ishonch oralig‘ i keltirilishi lozim. Tanlanma hajmi oldindan asoslanadi; faqat statistik ahamiyatga tayangan xulosa yetarli bo‘ lmaydi. O‘ qituvchi, guruh va topshiriq murakkabligi ta’siri nazorat qilinadi. Mazkur maqolada bunday kuzatuvlar o‘ tkazilmaganligi sababli ishtirokchilar soni, foizli o‘ sish yoki p-qiymatlar keltirilmaydi.

Taklifning metodik hissasi raqamli yordamni aniq o‘ quv mahsullari bilan bog‘ lashda namoyon bo‘ ladi. Modelda CASga o‘ tishdan oldin matematik yozuv asoslanadi, natijadan keyin mustaqil dalil talab qilinadi va sikl yangi vaziyatdagi vositasiz faoliyat bilan tugaydi. Shunday qilib, yordam berish va o‘ zlashtirishni tekshirish o‘ rtasida kuzatiladigan bog‘ lanish hosil bo‘ ladi. Bu hissa mavjud barcha metodikalardan ustunlik yoki adabiyotlarda mutlaq yangilik da’vosi sifatida talqin qilinmaydi.

XULOSA.

AI va CAS integratsiyasi asosidagi model integral hisoblashda muloqot, ramziy amal, vizual tasvir va matematik dalilni bir o‘ quv sikliga birlashtiradi. Modelning ishlash shartlari dastlabki mustaqil urinish, xato turiga mos yordam, natijani tekshirish va bilimni yangi masalaga ko‘ chirishdir. Bir o‘ zgaruvchili hamda karrali integrallar misollari ushbu bosqichlarning matematik izchilligini ko‘ rsatdi. Ramziy tekshiruv analitik natijalarga mos keldi. Taklif etilgan rubrika va tadqiqot rejasi modelning pedagogik samaradorligini keyingi bosqichda empirik baholashga xizmat qiladi.

Annotatsiya: *Maqolada bo‘ lajak biologiya o‘ qituvchilarida PISA–2025 talablari asosida Antropotsen sharoitida ekologik mas’uliyatli faoliyat yuritish kompetensiyasini rivojlantirish masalasi yoritilgan. Mazkur kompetensiyaning ilmiy-kognitiv, daliliy-tahliliy, aksiologik-mas’uliyatli va faoliyat-refleksiv komponentlari aniqlashtirilgan. Uni bosqichma-bosqich rivojlantirishga qaratilgan “EKOQAROR” mualliflik modeli taklif etilgan. Model ekologik muammoni anglash, ilmiy dalillarni baholash, sabab-oqibat bog‘ lanishlarini aniqlash, muqobil yechimlarni taqqoslash, asoslangan qaror qabul qilish va refleksiyani qamrab oladi. Mahalliy ekologik muammolarga asoslangan PISA formatidagi topshiriqlardan foydalanish bo‘ lajak o‘ qituvchilarning ekologik qaror qabul qilish va amaliy faoliyatni rejalashtirish malakalarini rivojlantirishga xizmat qilishi asoslangan.*

Kalit so‘ zlar: *PISA–2025, Antropotsen, ekologik kompetensiya, bo‘ lajak biologiya o‘ qituvchisi, ekologik mas’uliyat, ilmiy dalil, qaror qabul qilish, “EKOQAROR” modeli.*

МЕТОДИКА РАЗВИТИЯ У БУДУЩИХ УЧИТЕЛЕЙ БИОЛОГИИ КОМПЕТЕНЦИИ ЭКОЛОГИЧЕСКИ ОТВЕТСТВЕННОЙ ДЕЯТЕЛЬНОСТИ В УСЛОВИЯХ АНТРОПОЦЕНА НА ОСНОВЕ ТРЕБОВАНИЙ PISA–2025

Аннотация: *В статье рассматривается развитие у будущих учителей биологии компетенции экологически ответственной деятельности в условиях Антропоцена на основе требований PISA–2025. Уточнены научно-когнитивный, доказательно-аналитический, аксиологически-ответственный и деятельностно-рефлексивный компоненты данной компетенции. Предложена авторская модель «ЭКОРЕШЕНИЕ», направленная на её поэтапное развитие. Модель охватывает осмысление экологической проблемы, оценку научных доказательств, выявление причинно-следственных связей, сопоставление альтернативных решений, принятие обоснованного решения и рефлексию. Обосновано, что использование заданий формата PISA, построенных на местных экологических проблемах, способствует развитию у будущих учителей навыков принятия экологически ответственных решений и планирования практической деятельности.*

Ключевые слова: *PISA–2025, Антропоцен, экологическая компетентность, будущий учитель биологии, экологическая ответственность, научные доказательства, принятие решений, модель «ЭКОРЕШЕНИЕ».*

METHODOLOGY FOR DEVELOPING PRE-SERVICE BIOLOGY TEACHERS’ COMPETENCE FOR ENVIRONMENTALLY RESPONSIBLE AGENCY IN THE ANTHROPOCENE BASED ON PISA 2025 REQUIREMENTS

Abstract: *The article examines the development of pre-service biology teachers’ competence for environmentally responsible action in the Anthropocene based on the requirements of PISA 2025. The scientific-cognitive, evidence-analytical, axiological-responsible and action-reflective components of this competence are clarified. The author proposes the “EKOQAROR” model for its gradual development. The model includes understanding an environmental problem, evaluating scientific evidence, identifying cause-and-effect relationships, comparing alternative solutions, making an informed decision and reflecting on the outcome. It is argued that the use of PISA-type tasks based on local environmental problems contributes to the development of pre-service teachers’ skills in environmentally responsible decision-making and practical action planning.*

Keywords: *PISA 2025, Anthropocene, environmental competence, pre-service biology teacher, environmental responsibility, scientific evidence, decision-making, EKOQAROR model.*

KIRISH

XXI asrda iqlim o‘ zgarishi, suv tanqisligi, tuproq degradatsiyasi, biologik xilma-xillikning kamayishi va atrof-muhit ifloslanishi kabi ekologik muammolar inson hayotining barcha sohalariga ta’sir ko‘ rsatmoqda. Bunday sharoitda ekologik ta’limning vazifasi faqat tabiatga oid bilimlarni yetkazish bilan cheklanmaydi. Ta’lim oluvchi ekologik vaziyatlarni ilmiy tahlil qilishi, turli manbalardagi dalillarning ishonchliligini baholashi, muqobil yechimlarning oqibatlarini solishtirishi va mas’uliyatli qaror qabul qila olishi lozim.

Mazkur talab PISA–2025 tabiiy fanlar konsepsiyasida ham o‘ z aksini topgan. Yangilangan baholash doirasida tabiiy-ilmiy savodxonlik hodisalarni ilmiy tushuntirish, tadqiqotlarni baholash, ma’lumotlarni talqin qilish, ilmiy axborotni izlash va undan qaror qabul qilishda foydalanish qobiliyatlarini qamrab oladi. PISA–2025 doirasiga kiritilgan “Agency in the Anthropocene” konstruksiyasi inson faoliyatining Yer tizimlariga ta’sirini anglash, ekologik muammolar bo‘ yicha dalillarga asoslangan qaror qabul qilish va ularning yechimida faol ishtirok etishni nazarda tutadi [1; 2].

Antropotsen sharoitida ekologik mas’uliyatli faoliyat yuritish bilim, qadriyat va amaliy harakatning yaxlitligini talab qiladi. Shaxs ekologik muammoni tushuntirishi, ma’lumot manbasini tekshirishi, bevosita va bilvosita sabab-oqibat bog‘ lanishlarini aniqlashi, turli manfaatlarni hisobga olishi hamda o‘ z qarorini ilmiy dalillar bilan asoslay olishi kerak. Bu jihatlar biologiya ta’limi uchun alohida ahamiyatga ega, chunki ekotizimlar barqarorligi, oziq zanjirlari, populyatsiyalar, biologik xilma-xillik va insonning tabiatga ta’siri biologiya fanining asosiy mazmunini tashkil etadi.

UNESCOning barqaror rivojlanish uchun ta’limga oid yondashuvida ham ta’lim oluvchini murakkab muammolarni tanqidiy tahlil qilish, kelajak oqibatlarini anglash va o‘ zgarishlarni amalga oshirishda faol ishtirok etishga tayyorlash zarurligi ta’kidlangan [11]. Faoliyat kompetensiyasiga oid tadqiqotlarda ekologik ta’lim o‘ quvchiga tayyor xulq-atvor qoidalarini singdirish emas, balki unga muammoni mustaqil anglash, imkoniyatlarni baholash va ongli harakatni tanlash imkonini berishi kerakligi asoslangan [12].

Ekologik qarorlarning ilmiy asoslanganligi ko‘ p jihatdan tizimli fikrlashga bog‘ liq. Ekologik tizimlarda bitta omilning o‘ zgarishi boshqa elementlarga bevosita yoki ma’lum vaqt o‘ tgach ta’sir qilishi mumkin. Shu sababli bo‘ lajak biologiya o‘ qituvchisi ekologik muammolarni “bir sabab - bir oqibat” shaklida emas, balki ko‘ p omilli, o‘ zaro bog‘ langan va dinamik tizim sifatida tahlil qilishi zarur. Tadqiqotlarda bo‘ lajak biologiya o‘ qituvchilari ekotizimning ayrim qismlarini to‘ g‘ ri tushuntirgan bo‘ lsalar-da, bilvosita ta’sirlar, qayta aloqa va uzoq muddatli oqibatlarni aniqlashda qiyinchilikka duch kelishi qayd etilgan [8; 13].

Zamonaviy axborot muhitida ekologik masalalarga oid ilmiy ma’lumotlar ommaviy axborot vositalari, ijtimoiy tarmoqlar, reklama va turli elektron manbalar orqali tarqaladi. Ularning barchasi bir xil darajada ishonchli emas. Shu sababli manba muallifi, ma’lumotni olish usuli, dalil va xulosa o‘ rtasidagi moslikni tekshirish bo‘ lajak o‘ qituvchining muhim kasbiy malakasidir. Ijtimoiy-ilmiy muammolar bo‘ yicha olib borilgan tadqiqotlar bo‘ lajak tabiiy fan o‘ qituvchilari ko‘ pincha dalillarni chuqur baholashdan ko‘ ra tavsifiy mulohaza bilan cheklanishini ko‘ rsatgan [10; 14].

O‘ zbekistonda ekologik ta’limni rivojlantirish, yoshlarning ekologik bilimi, ongi va madaniyatini yuksaltirish davlat siyosatining ustuvor vazifalaridan biri etib belgilangan [3; 4]. Orol dengizi inqirozi, suv resurslarining kamayishi, tuproq sho‘ rlanishi, pestitsidlarning ekotizimlarga ta’siri va biologik xilma-xillikning qisqarishi mahalliy ta’lim mazmunida ekologik mas’uliyatli qarorlarni shakllantirish uchun muhim kontekst bo‘ lib xizmat qiladi. O‘ zbekiston va MDH mamlakatlaridagi tadqiqotlarda bo‘ lajak biologiya o‘ qituvchisining ekologik kompetensiyasi bilim, qadriyat, motivatsiya va amaliy faoliyat birligi sifatida talqin qilingan [5–7; 15].

Ilmiy manbalar tahlili ekologik bilim, tizimli fikrlash, dalillarni baholash va ekologik xulq masalalari alohida yo‘ nalishlarda o‘ rganilganini ko‘ rsatdi. Biroq ularni PISA–2025 talablari asosida yagona metodik tizimga birlashtirish, mahalliy ekologik muammolar bilan bog‘ lash hamda aynan bo‘ lajak biologiya o‘ qituvchilarining kasbiy tayyorgarligiga moslashtirish yetarlicha tadqiq etilmagan.

Shundan kelib chiqib, mazkur tadqiqotda ekologik mas’uliyatli faoliyat yuritish kompetensiyasi bo‘ lajak biologiya o‘ qituvchisining inson va tabiiy tizimlar o‘ rtasidagi munosabatlarni ilmiy tushuntirish, ko‘ p manbali dalillarni tanqidiy baholash, qarorlarning biologik va ijtimoiy oqibatlarini prognoz qilish, amaliy harakatni rejalashtirish hamda o‘ z qarorini refleksiv qayta ko‘ rib chiqish qobiliyatini ifodalovchi integrativ kasbiy sifat sifatida talqin qilinadi.

Tadqiqotning maqsadi - PISA–2025 talablari asosida bo‘ lajak biologiya o‘ qituvchilarida ekologik mas’uliyatli faoliyat yuritish kompetensiyasini rivojlantiruvchi “EKOQAROR” mualliflik modelini ishlab chiqish va uning metodik samaradorligini aniqlashdan iborat.

METODOLOGIYA

Tadqiqot PISA–2025 talablari asosida bo‘ lajak biologiya o‘ qituvchilarida Antropotsen sharoitida ekologik mas’uliyatli faoliyat yuritish kompetensiyasini rivojlantirishga yo‘ naltirilgan aralash metodli kvazi-eksperimental yondashuv asosida tashkil etildi. Miqdoriy tahlil pedagogik ta’sir natijasida yuz bergan o‘ zgarishlarni aniqlashga, sifat tahlili esa talabalarning ekologik vaziyatlarni ilmiy tushuntirish, dalillarni baholash, qaror qabul qilish va refleksiya jarayonidagi rivojlanishini ochib berishga xizmat qildi.

Tadqiqotda jami 56 nafar talaba qatnashib, ularning 29 nafari tajriba guruhiga, 27 nafari nazorat guruhiga ajratildi. Guruhlarni shakllantirishda talabalarning o‘ quv dasturi, biologiya va ekologiyaga oid fanlardan o‘ zlashtirish ko‘ rsatkichlari hamda dastlabki tayyorgarlik darajasining o‘ zaro yaqinligi hisobga olindi. Tajriba boshlanishidan oldin har ikki guruhda PISA formatidagi diagnostik topshiriqlar yordamida dastlabki baholash o‘ tkazildi.

Shakllantiruvchi tajriba 10 hafta davomida, jami 20 akademik soat hajmida tashkil etildi. Tajriba guruhidagi mashg‘ ulotlar ekologik mas’uliyatli faoliyatni bosqichma-bosqich rivojlantirishga qaratilgan “EKOQAROR” mualliflik modeli asosida olib borildi. Nazorat guruhida esa shu mavzular amaldagi tushuntirish, savol-javob, matn bilan ishlash va an’anaviy amaliy topshiriqlar asosida o‘ qitildi. Har ikki guruhga ajratilgan o‘ quv mazmuni va mashg‘ ulotlar hajmi bir xil saqlandi.

“EKOQAROR” modeli ekologik muammoni anglash, ko‘ p manbali dalillarni tekshirish, tizimli bog‘ lanishlarni aniqlash, muqobil qarorlar ishlab chiqish, ularning biologik va ijtimoiy oqibatlarini baholash, amaliy harakatni asoslash, hamkorlikdagi muhokama va refleksiyani qamrab oldi.

Mashg‘ ulotlarda Orol dengizi inqirozi, suv tanqisligi, tuproq sho‘ rlanishi, pestitsidlarning changlatuvchi organizmlarga ta’siri, plastik chiqindilarning oziq zanjiriga kirishi, atmosfera havosining ifloslanishi va biologik xilma-xillikning kamayishi kabi mahalliy ekologik vaziyatlardan foydalanildi. Har bir vaziyat matn, jadval, grafik, statistik ma’lumot, ilmiy xulosa va manfaatdor tomonlarning qarashlarini o‘ z ichiga olgan PISA formatidagi topshiriqlar asosida yoritildi.

Ma’lumotlarni to‘ plashda PISA formatidagi diagnostik topshiriqlar, analitik baholash rubrikasi, pedagogik kuzatuv, refleksiv esse va talabalar portfoliosidan foydalanildi. Diagnostik majmua 100 ballik tizimda baholanib, ekologik mas’uliyatli faoliyat kompetensiyasining quyidagi to‘ rtta komponentiga 25 balldan ajratildi:

ilmiy-kognitiv komponent;

daliliy-tahliliy komponent;

aksiologik-mas’uliyatli komponent;

faoliyat-refleksiv komponent.

Talabalarning ochiq javoblari 0 dan 3 ballgacha bo‘ lgan analitik rubrika asosida baholandi. Bunda 0 ball - javobning mavjud emasligi yoki ilmiy jihatdan noto‘ g‘ riligi; 1 ball - umumiy, ammo yetarlicha asoslanmagan javob; 2 ball - to‘ g‘ ri, biroq qisman tahlil qilingan javob; 3 ball - ilmiy dalillarga asoslangan, tizimli va refleksiv javobni ifodaladi.

Diagnostik vositalarning mazmuniy validligi biologiya, ekologiya, pedagogika va ta’limni baholash bo‘ yicha mutaxassislarning ekspert xulosalari asosida tekshirildi. Topshiriqlarning PISA–2025 kompetensiyalariga mosligi, ilmiy aniqligi, hayotiyligi, tushunarliligi va kognitiv murakkabligi baholandi. Diagnostik majmuaning ichki ishonchliligini aniqlashda Cronbach alfa, ekspertlararo muvofiqlikni baholashda Cohen kappa koeffitsiyentidan foydalanish nazarda tutildi.

Miqdoriy ma’lumotlarni qayta ishlashda o‘ rtacha arifmetik qiymat, standart og‘ ish, foiz ko‘ rsatkichlari va o‘ sish dinamikasi hisoblandi. Ma’lumotlarning normal taqsimlanishi Shapiro–Wilk mezoni orqali tekshirildi. Guruh ichidagi dastlabki va yakuniy natijalar juft tanlanmalar uchun t-test, tajriba va nazorat guruhlari o‘ rtasidagi farqlar esa mustaqil tanlanmalar uchun t-test yordamida tahlil qilindi. Metodikaning pedagogik ta’sir hajmi Cohen’s d ko‘ rsatkichi bilan baholandi. Statistik ahamiyatlilik mezoni $p<0,05$ darajasida belgilandi.

NATIJALAR

Dastlabki diagnostika natijalariga ko‘ ra, tajriba guruhining o‘ rtacha ko‘ rsatkichi 53,21±7,63 ball, nazorat guruhining ko‘ rsatkichi esa 52,26±4,90 ballni tashkil etdi. Guruhlar o‘ rtasidagi boshlang‘ ich farq statistik jihatdan ahamiyatli bo‘ lmadi: $t=0,55$; $p=0,586$; Cohen’s $d=0,15$. Bu natija tajriba boshlanishida ikki guruhning tayyorgarlik darajasi o‘ zaro yaqin bo‘ lganini ko‘ rsatdi.

Shakllantiruvchi tajribadan keyin tajriba guruhining o‘ rtacha natijasi 64,69±10,32 ballga, nazorat guruhining natijasi esa 57,81±6,97 ballga yetdi. Yakuniy diagnostikada guruhlar o‘ rtasidagi farq statistik jihatdan ishonchli bo‘ ldi: $t=2,90$; $p=0,005$; Cohen’s $d=0,78$. Mazkur ko‘ rsatkich mualliflik metodikasining o‘ rta va yuqori chegaradagi amaliy ta’sirini ifodalaydi.

1-jadval

Tajriba va nazorat guruhlarining umumiy diagnostika natijalari

Guruh	Talabalar soni	Dastlabki natija, M±SD	Yakuniy natija, M±SD	O‘ rtacha o‘ sish	Nisbiy o‘ sish
Tajriba guruhi	29	53,21±7,63	64,69±10,32	11,48 ball	21,6%

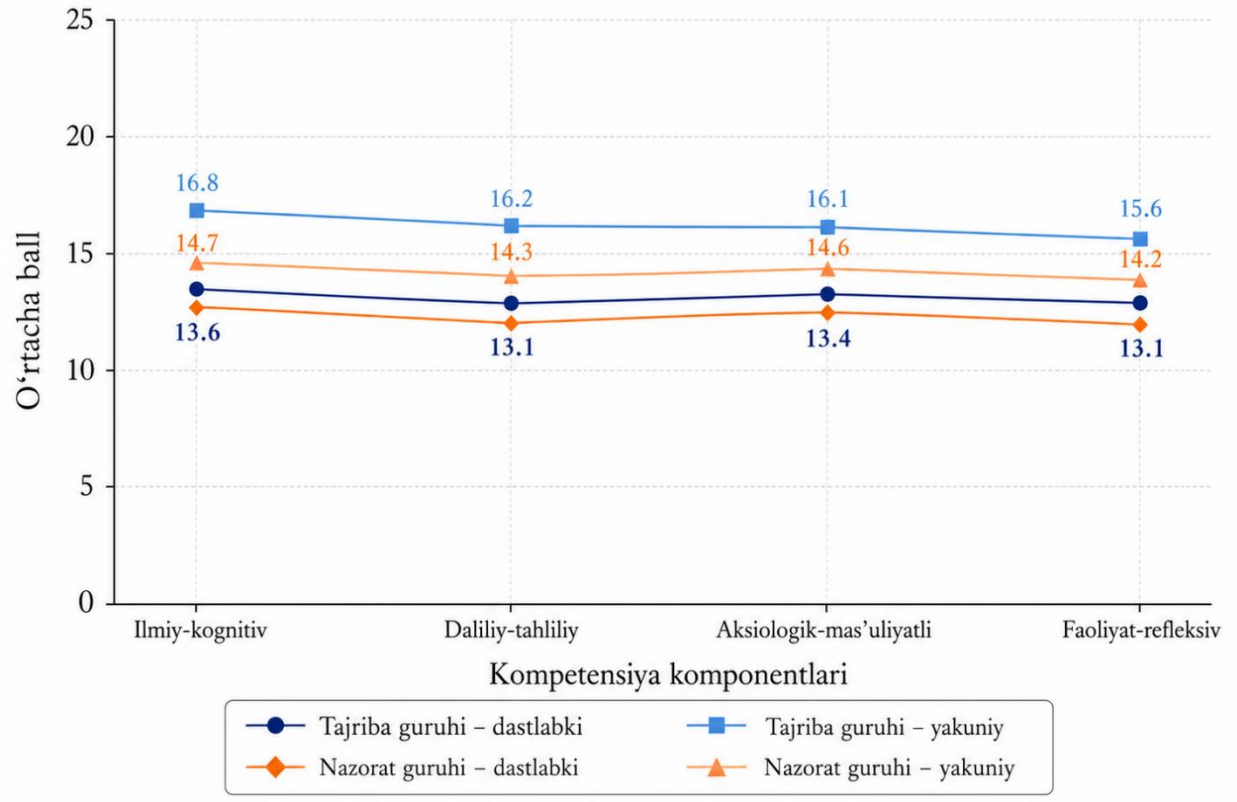
Nazorat guruhi	27	52,26±4,90	57,81±6,97	5,56 ball	10,6%

Tajriba guruhida o‘ rtacha o‘ sish 11,48±5,83 ballni, nazorat guruhida esa 5,56±4,81 ballni tashkil etdi. Ikki guruhning o‘ sish ko‘ rsatkichlari qiyoslanganda statistik jihatdan ishonchli farq aniqlandi: t=4,13; p<0,001; Cohen’s d=1,10. Demak, tajriba guruhidagi rivojlanish oddiy o‘ quv jarayonidagi tabiiy o‘ sishdan sezilarli darajada yuqori bo‘ lgan.

2-jadval

Kompetensiya komponentlari bo‘ yicha diagnostika natijalari

Kompetensiya komponenti	Tajriba guruhi dastlabki	Tajriba guruhi yakuniy	Nazorat guruhi dastlabki	Nazorat guruhi yakuniy	Yakuniy p qiymati
Ilmiy-kognitiv	13,6±2,2	16,8±2,7	13,4±2,0	14,7±2,4	0,003
Daliliy-tahliliy	13,1±2,1	16,2±2,8	12,9±2,0	14,3±2,5	0,010
Aksiologik-mas’uliyatli	13,4±1,9	16,1±2,6	13,2±2,1	14,6±2,4	0,029
Faoliyat-refleksiv	13,1±2,0	15,6±2,9	12,8±2,2	14,2±2,6	0,062



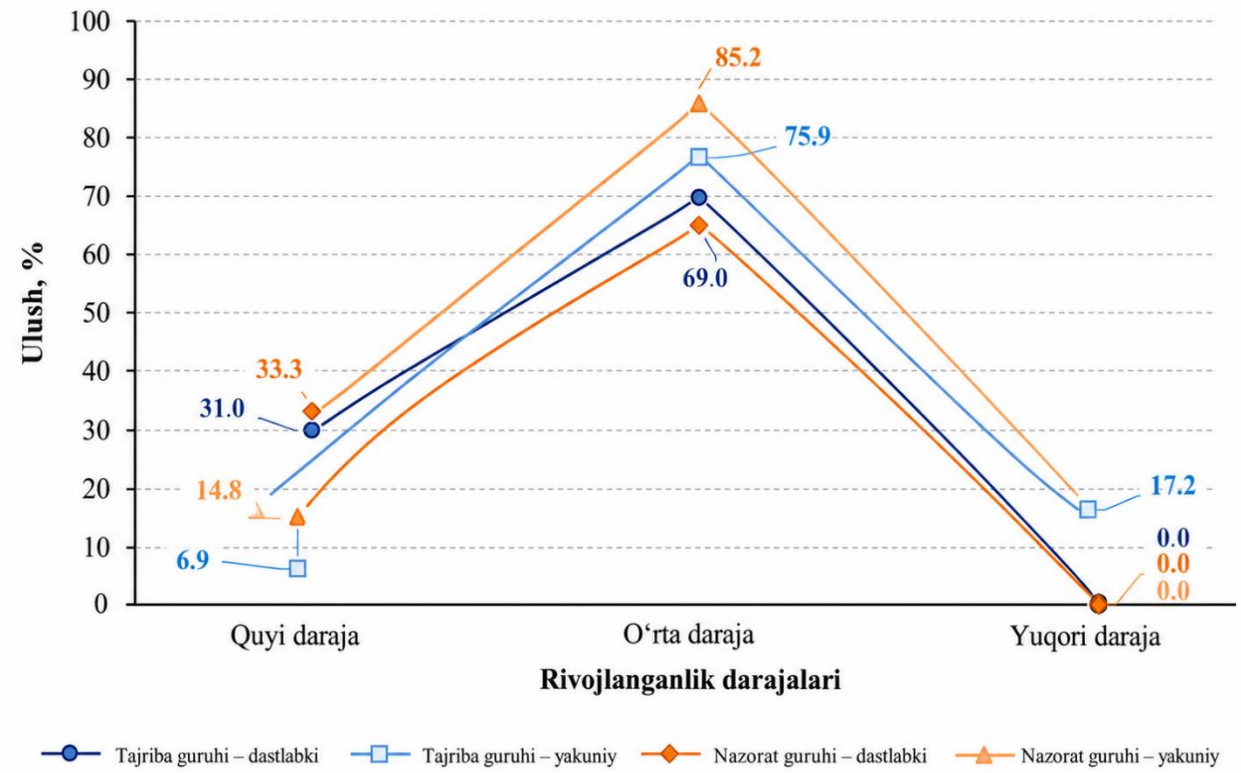
Eng katta rivojlanish ilmiy-kognitiv komponentda kuzatildi. Tajriba guruhi talabalarining ekologik muammolarni biologik tushunchalar yordamida izohlash, sabab-oqibat munosabatlarini aniqlash va inson faoliyatining ekotizimlarga ta’sirini tushuntirish ko‘ rsatkichlari sezilarli oshdi.

Daliliy-tahliliy komponentdagi natijalar talabalarning statistik ma’lumotlarni sharhlash, turli manbalarni o‘ zaro qiyoslash hamda dalil va xulosa o‘ rtasidagi muvofiqlikni aniqlash malakalari rivojlanganini ko‘ rsatdi.

Aksiologik-mas’uliyatli komponent bo‘ yicha ham statistik jihatdan ahamiyatli o‘ zgarish kuzatildi. Talabalar ekologik qaror qabul qilishda tabiat, jamiyat, mahalliy aholi va kelajak avlodlar manfaatlarini kengroq hisobga ola boshladilar.

Faoliyat-refleksiv komponent bo‘ yicha tajriba guruhining natijasi nazorat guruhidan yuqori bo‘ lsa-da, farq p<0,05 darajasida statistik ahamiyatga erishmadi. Bu amaliy ekologik harakatni rejalashtirish va o‘ z qarorini refleksiv qayta baholash ko‘ nikmalari uzoqroq muddatli pedagogik faoliyatni talab qilishini ko‘ rsatadi.

1-rasm. Kompetensiya komponentlari bo‘ yicha natijalar



3-jadval

Kompetensiyaning rivojlanganlik darajalari dinamikasi

Guruh va bosqich	Quyi daraja	O‘ rta daraja	Yuqori daraja
Tajriba guruhi - dastlabki	9 nafar - 31,0%	20 nafar - 69,0%	0
Tajriba guruhi - yakuniy	2 nafar - 6,9%	22 nafar - 75,9%	5 nafar - 17,2%
Nazorat guruhi - dastlabki	9 nafar - 33,3%	18 nafar - 66,7%	0
Nazorat guruhi - yakuniy	4 nafar - 14,8%	23 nafar - 85,2%	0

Tajriba boshida har ikki guruhda yuqori darajadagi talabalar aniqlanmadi. Tajriba yakunida tajriba guruhidagi quyi darajadagi talabalar ulushi 31,0 foizdan 6,9 foizgacha kamaydi va 17,2 foiz talaba yuqori darajaga erishdi. Nazorat guruhida ham ijobiy siljish kuzatilgan bo‘ lsa-da, yuqori darajaga erishgan talabalar qayd etilmadi.

2-rasm. Kompetensiyaning rivojlanganlik darajalari dinamikasi.

Olingan natijalar “EKOQAROR” modeli ekologik muammolarni ilmiy anglash, dalillarni tanqidiy baholash va ekologik qarorlarni asoslash ko‘ nikmalarini rivojlantirishga ijobiy ta’sir ko‘ rsatishini ko‘ rsatdi. Shu bilan birga, faoliyat-refleksiv komponentning nisbatan sekin rivojlanishi metodikani uzoqroq muddat davomida qo‘ llash, dala tadqiqotlari, ekologik loyihalar va real jamoatchilik faoliyatlari bilan boyitish zarurligini ko‘ rsatadi.

MUNOZARA

Tadqiqot natijalari “EKOQAROR” modeli asosidagi mashg‘ ulotlar bo‘ lajak biologiya o‘ qituvchilarining ekologik mas’uliyatli faoliyat yuritish kompetensiyasini rivojlantirishda samarali ekanini ko‘ rsatdi. Tajriba boshlanishida tajriba va nazorat guruhlarining o‘ rtacha ko‘ rsatkichlari deyarli bir xil bo‘ lgan bo‘ lsa, yakuniy diagnostikada tajriba guruhining natijasi 53,21 balldan 64,69 ballga, nazorat guruhiniki esa 52,26 balldan 57,81 ballga oshdi. Tajriba guruhidagi o‘ sishning yuqoriligi metodikaning oddiy bilim berishdan tashqari, talabalarni ekologik vaziyatni tahlil qilish, dalillarni baholash va asoslangan qaror qabul qilishga jalb etgani bilan izohlanadi.

Mazkur natijalar PISA–2025 tabiiy fanlar konsepsiyasidagi “Antropotsen sharoitida faoliyat yuritish” konstruksiyasiga mos keladi. Ushbu konstruksiya inson faoliyatining Yer tizimlariga ta’sirini ilmiy tushuntirish, turli manbalardagi dalillarni tanqidiy baholash, tizimli fikrlash va ekologik muammolar bo‘ yicha mas’uliyatli qaror qabul qilishni nazarda tutadi [1; 2]. “EKOQAROR” modelida mazkur faoliyatlar muammoni anglash, manbalarni tekshirish, sabab-oqibat bog‘ lanishlarini aniqlash, muqobil yechimlarni baholash va refleksiya bosqichlari orqali izchil tashkil etildi.

Kompetensiya komponentlari orasida eng katta o‘ sish ilmiy-kognitiv yo‘ nalishda kuzatildi. Tajriba guruhining ushbu komponent bo‘ yicha natijasi 13,6 balldan 16,8 ballga oshdi. Bu talabalar inson faoliyatining ekotizimlarga ta’sirini biologik tushunchalar yordamida tushuntirish, ekologik hodisalarning sabab va oqibatlarini aniqlash hamda tabiiy tizimlar o‘ rtasidagi bog‘ lanishlarni anglashda rivojlanganini ko‘ rsatadi. Orol dengizi inqirozi, suv tanqisligi, tuproq sho‘ rlanishi va pestitsidlarning ekotizimlarga ta’siri kabi mahalliy vaziyatlardan foydalanish nazariy bilimlarni real ekologik muammolar bilan bog‘ lash imkonini berdi.

Daliliy-tahliliy komponentda kuzatilgan ijobiy o‘ zgarish talabalarning jadval, grafik, statistik ma’lumot va turli axborot manbalarini qiyosiy baholash ko‘ nikmalari rivojlanganini ko‘ rsatdi. Ushbu natija PISA–2025 doirasida ilmiy axborotni izlash, tekshirish va qaror qabul qilishda undan foydalanish alohida kompetensiya sifatida belgilanganiga muvofiqdir [1]. Tajriba jarayonida talabalardan dalilning mavjudligini emas, uning ishonchliligi, dolzarbligi va chiqarilgan xulosani qay darajada asoslashini baholash talab qilindi.

Aksiologik-mas’uliyatli komponent bo‘ yicha o‘ sish ekologik qarorlarning nafaqat biologik, balki ijtimoiy, iqtisodiy va uzoq muddatli oqibatlarini hisobga olish bilan bog‘ liq bo‘ ldi. Talabalar suv resurslaridan foydalanish, pestitsidlarni cheklash va biologik xilma-xillikni saqlash kabi masalalarda turli manfaatdor tomonlarning qarashlarini solishtirdilar. Bu PISA–2025 konsepsiyasida qayd etilgan hamkorlik, turli nuqtayi nazarlarga hurmat va kelajak avlodlar oldidagi mas’uliyat tamoyillariga mos keladi [1; 2].

Faoliyat-refleksiv komponentdagi o‘ sish boshqa komponentlarga nisbatan pastroq bo‘ ldi. Bu ekologik muammo yuzasidan qaror ishlab chiqish bilan uni amaliy reja va real faoliyatga aylantirish o‘ rtasida farq mavjudligini ko‘ rsatadi. Faoliyat kompetensiyasi yondashuviga ko‘ ra, ekologik ta’limning haqiqiy natijasi tayyor qoidalarni bajarishda emas, balki shaxsning muammoni anglash, muqobil imkoniyatlarni baholash va ongli faoliyatni mustaqil rejalashtirishida namoyon bo‘ ladi [12]. Shu sababli mazkur komponentni rivojlantirishda auditoriya topshiriqlarini dala kuzatuvlari, ekologik loyihalar va mahalliy hamjamiyat bilan hamkorlikdagi faoliyatlar bilan to‘ ldirish zarur.

Rivojlanganlik darajalari tahlili ham metodikaning ijobiy ta’sirini tasdiqladi. Tajriba guruhida quyi darajadagi talabalar ulushi 31,0 foizdan 6,9 foizgacha kamaydi, 17,2 foiz talaba esa yuqori darajaga erishdi. Nazorat guruhida ijobiy siljish kuzatilgan bo‘ lsa-da, yuqori daraja qayd etilmadi. Bu natija tajriba guruhidagi talabalar ekologik vaziyatni tavsiflashdan tashqari, dalillarni tekshirish, tizimli bog‘ lanishlarni aniqlash va o‘ z qarorini ilmiy asoslash darajasiga ko‘ tarilganini ko‘ rsatadi.

Tadqiqotning muhim jihatlaridan biri mahalliy ekologik kontekstlardan foydalanilganidir. Talabalarga tanish hududiy muammolar ularning mavzuga shaxsiy daxldorligini kuchaytirdi va topshiriqlarning hayotiyligini oshirdi. Shu bilan birga, mahalliy kontekstlar PISA formatiga mos ravishda jadval, grafik, qarama-qarshi axborot va ochiq javobli savollar bilan boyitildi. Bu xalqaro baholash mezonlarini milliy ta’lim mazmuniga moslashtirish imkonini berdi.

Olingan natijalar ekologik kompetensiyani alohida nazariy bilim yoki bir martalik tarbiyaviy tadbir sifatida emas, balki biologik bilim, daliliy tahlil, qadriy munosabat va amaliy faoliyatning integratsiyasi sifatida rivojlantirish zarurligini ko‘ rsatdi. Mazkur yondashuv O‘ zbekistonda ekologik ta’limni rivojlantirish, yoshlarning ekologik ongi va madaniyatini yuksaltirishga qaratilgan vazifalar bilan hamohangdir [3].

Biroq tadqiqot natijalarini talqin qilishda ayrim cheklovlarni hisobga olish lozim. Ishtirokchilar sonining 56 nafar bilan cheklangani va tajribaning 10 hafta davom etgani natijalarni barcha oliy ta’lim muassasalariga to‘ liq umumlashtirish imkonini bermaydi. Shuningdek, tadqiqot kompetensiyaning uzoq muddat saqlanishi va real ekologik xulq-atvorga ta’sirini to‘ liq baholamadi. Kelgusida tanlanma hajmini kengaytirish, kechiktirilgan diagnostika o‘ tkazish hamda metodikani ekologik loyihalar va amaliy tashabbuslar bilan boyitish maqsadga muvofiq.

Umuman olganda, “EKOQAROR” modeli PISA–2025 talablari asosida bo‘ lajak biologiya o‘ qituvchilarining ekologik muammolarni ilmiy tushuntirish, dalillarni tanqidiy baholash, tizimli fikrlash va mas’uliyatli qaror qabul qilish kompetensiyalarini rivojlantirishga xizmat qiluvchi samarali metodik vosita sifatida namoyon bo‘ ldi.

XULOSA

Tadqiqot natijalari PISA–2025 talablari asosida ishlab chiqilgan “EKOQAROR” modeli bo‘ lajak biologiya o‘ qituvchilarida ekologik mas’uliyatli faoliyat yuritish kompetensiyasini rivojlantirishga ijobiy ta’sir ko‘ rsatishini ko‘ rsatdi. Mazkur model ekologik muammoni ilmiy anglash, ko‘ p manbali dalillarni tekshirish, sabab-oqibat bog‘ lanishlarini aniqlash, muqobil yechimlarni baholash, asoslangan qaror qabul qilish va refleksiyani yagona metodik jarayonga birlashtirdi.

Tajriba guruhining umumiy diagnostika natijasi 53,21 balldan 64,69 ballga oshgan bo‘ lsa, nazorat guruhida bu ko‘ rsatkich 52,26 balldan 57,81 ballga ko‘ tarildi. Kompetensiya komponentlari bo‘ yicha eng yuqori o‘ sish ilmiy-kognitiv va daliliy-tahliliy yo‘ nalishlarda kuzatildi. Bu talabalar ekologik hodisalarni biologik jihatdan izohlash, manbalarni tanqidiy baholash va dalillar asosida qaror chiqarishda rivojlanganini ko‘ rsatdi.

Rivojlanganlik darajalari tahlilida tajriba guruhidagi quyi darajadagi talabalar ulushi 31,0 foizdan 6,9 foizgacha kamaydi, 17,2 foiz talaba esa yuqori darajaga erishdi. Nazorat guruhida yuqori daraja qayd etilmadi. Ushbu natijalar mahalliy ekologik vaziyatlarga asoslangan PISA formatidagi topshiriqlar talabalarning nazariy bilimlarini real hayotiy muammolarga tatbiq etish imkonini kengaytirganini ko‘ rsatadi.

Tadqiqot davomida Orol dengizi inqirozi, suv tanqisligi, tuproq sho‘ rlanishi, pestitsidlarning ekotizimlarga ta’siri va biologik xilma-xillikning kamayishi kabi mahalliy kontekstlardan foydalanish talabalarning mavzuga shaxsiy daxldorligi va ekologik mas’uliyatini kuchaytirdi. Shu bilan birga, faoliyat-refleksiv komponentning nisbatan sekin rivojlanishi ekologik kompetensiyani shakllantirishda auditoriya mashg‘ ulotlarini real loyihalar, dala kuzatuvlari va jamoaviy ekologik tashabbuslar bilan boyitish zarurligini ko‘ rsatdi.

Umuman, “EKOQAROR” modeli bo‘ lajak biologiya o‘ qituvchilarini ekologik muammolarni ilmiy tahlil qilish, dalillarni baholash va mas’uliyatli qaror qabul qilishga tayyorlashda samarali metodik vosita bo‘ lib xizmat qilishi mumkin. Uni biologiyani o‘ qitish metodikasi, ekologiya, pedagogik amaliyot va xalqaro baholash dasturlariga tayyorlashga oid mashg‘ ulotlarga joriy etish maqsadga muvofiq.

JISMONIY TARBIYA VA SPORT MASHG‘ ULOTLARIDA HARAKAT KUNIKMA VA MALAKALARINING SHAKLLANISH XUSUSIYATLARI

Boyboboev Baxodir G‘ ulamovich
Namangan davlat universiteti dosenti, p.f.n.
E-mail:boyboboyev@gmail.com

Annotatsiya: *Xarakat ko‘ nikma va malakalarining shakllanishi yuzasidan adabiyotlar tahlili, ularni mashg‘ ulot jarayonida shakllanishining muhim jihatlari va sifatli tamonlari, ijobiy va salbiy ko‘ chish sabablari, jismoniy tarbiya va sportda samarali shakllantirish yullari yoritib berilgan.*

Kalit so‘ zlar: *mashq, mashg‘ ulot, kunikma, malaka, ko‘ chish, samara.*

ОСОБЕНОСТИ ФОРМИРОВАНИЯ ДВИГАТЕЛЬНЫХ НАВЫКОВ И УМЕНИЯ НА ЗАНЯТИЯХ ФИЗИЧЕСКОЙ КУЛЬТУРЫ И СПОРТА

Аннотация: *В статье освещается анализ литературы по формированию двигательных навыков и умений, важные и качественные аспекты их формирования в процессе занятий, причины положительного и отрицательного переноса навыка, а также пути эффективного формирования в физическом воспитании и спорте.*

Ключевые слова: *упражнение, занятия, умение, навык, перенос, эффективность*

CHARACTERISTICS OF THE DEVELOPMENT OF MOTOR SKILLS AND ABILITIES IN PHYSICAL EDUCATION AND SPORTS

Abstract*: This article analyzes the literature on the development of motor skills and abilities, highlighting the important and qualitative aspects of their development during classes, the causes of positive and negative skill transfer, and ways to effectively develop them in physical education and sports.*

Keywords: *exercise, classes, ability, skill, transfer, effectiveness.*

KIRISH.

O‘ zbekiston Respublikasining “Jismoniy tarbiya va sport to‘ g‘ risida”gi qonunida “Maktabgacha yoshdagi bolalar, umumta’ lim maktablari va kasb-hunar kollej o‘ quvchilari salomatligini asrash va mustahkamlash, ularda jismoniy barkamollik extiyojini shakllantirish, ta’ lim tashkilotlarining asosiy vazifasi hisoblanadi” deyilgan [1].

Jamiyatimizda sog‘ lom turmush tarzini shakllantirish , axolining, ayniqsa, yosh avlodning jismoniy tarbiya va ommaviy sport bilan muntazam shug‘ ullanishi uchun zamon talablariga mos shart-sharoitlar yaratish, jismoniy tarbiya va sport orqali yoshlarda o‘ z irodasi, kuchi va imkoniyatlariga bo‘ lgan ishonchni mustaxkamlash , mardlik va vatanparvarlik, Vatanga sadoqat tuyg‘ ularini kamol toptirishga, yo‘ naltirilgan keng ko‘ lamli ishlar amalga oshirilmoqda.

Bolalar va o‘ smirlar jismoniy tarbiyasiga konseptual yondoshib, uzluksiz ta’ lim tizimida Respublika aholisining ko‘ p millatliligiga tayangan holda, har bir mamlakatning madaniy-ma’ rifiy, ijtimoiy- iqtisodiy talablari hisobga olingan [5; 7]

ADABIYOTLAR TAHLILI.

Jismoniy tarbiya va sport jarayonida o‘ ziga xos bo‘ lgan vazifalarning barchasi harakat ko‘ nikma va malakalarining shakllanishiga bog‘ liqdir. Bu jarayon qonuniyatlarini bilish harakat faoliyatlariga o‘ rgatishning barcha bosqichlarida mazmunni to‘ g‘ ri va ratsional tanlash, harakat faoliyatlarini egalashdagi notekisliklarga barham beradi va ta’ limni to‘ g‘ ri yo‘ lga qo‘ yish uchun imkoniyat yaratadi, darslar rejasini talab darajasida tuzish, tayyorlov va yo‘ llanma beruvchi mashqlardan samarali foydalanish malakaning ijobiy va salbiy ko‘ chishini ta’ minlaydi[2; 3; 4]

Harakat faoliyatlariga o‘ rgatish jarayonida tananing u yoki bu qismida harakatni boshkarishning xarakteri o‘ zgaradi, natijada harakat faoliyatini egallashning darajasi ortadi. Olimlar bu jarayonni quyidagicha ifodalagan: O‘ quvchilar maxsus bilimlar bazasida va tizimli mashqlar natijasida harakat faoliyatini bajarish uchun belgilangan

imkoniyatlar chegarasida yetadi, takomillashtirish uchun esa chegarasiz imkoniyatlarga ega bo‘ ladi. Harakat faoliyatini egallashning uch bosqichga bo‘ linishi shartlidir. Bosqichlarning barqaror chegaralarini mavjudligi bilim berish vazifalarini belgilash va uni hal qilish uchun kulaydir [6; 7 ; 8].

Harakat malakasining shakllanganlik belgisi bilim va harakat tajribasi bilan namoyon bo‘ ladi va u bajara olishga aylanadi. Boshlanishida ko‘ nikma fakat asosiy variantda shakllanadi. O‘ kituvchining vazifasi: harakat ko‘ nikmasini asosiy variantda shakllantirib, uni mustahkamlab, shu asosida nisbatan yuqori maqomdagi faoliyatni bajara olishga fundament yaratishdir. Ta’ limning shu bosqichida faoliyat ijrosining sifat darajasining takomillashganligi shunday zarurki, ish bilan jismoniy mashqni texnikasi individuallashsin, asosiy faoliyatni turlicha ijro varianti o‘ zlashtirilgan bo‘ lsin, egallangan malaka turli variantdagi yangi faoliyatlarning bajarishda ko‘ llay olinadigan bo‘ lsin.

TADQIQOT METODOLGIYASI:

mashg‘ ulotlarda avvalgi tajriba va bilimlarga tayanib xarakat kila bilishning shakllanishi harakat faoliyatini egallash jarayonidan boshlanadi.

Harakatni ko‘ nikmasi – bu harakat faoliyatining har bir qismiga o‘ quvchining diqqat e’ tiborini to‘ plash sharti asosida o‘ rganilayotgan faoliyatidir.

Tavsifli tomonlari – harakatlar avtomatlashmagan holda bajariladi. Natijada o‘ quvchining ongi harakatning har bir unsurini bajarishni sintez qilish bilan band bo‘ lib, ish yukori darajadagi energiya sarflash hisobiga, charchaqqa bardosh berib bajaradi. Bu boskichda harakatni qulay, kam energiya sarflab hal etish usulini izlaydi.

Jismoniy tarbiya darslarida o‘ rganilgan harakatni muntazam bajarish asta sekinlik bilan malakani shakllanishiga olib keladi.

Harakat malakasining shakllanishi jarayoni shartli ravishda quyidagi fiziologik fazaga namayon bo‘ ladi .

Harakat malakasi shakllanib , uning rivojlanishi davom etadi. Qayta qayta ratsional takrorlash davom ettirilsa, malakaning takomillashuvi sodir bo‘ lib, barqarorlashuvi davom egadi. Jismoniy tarbiya dasturlarini ishlashda, o‘ quv jarayonini rejalashtirishda, yo‘ llanma beruvchi mashqlarni tanlashda malakalarning o‘ zaro munosabatlari o‘ rganish va hisobga olish jismoniy mashqlarni tasniflashda ko‘ l keladi. Bu bilan malakaning ijobiy ko‘ chishning samarasidan iloji boricha foydalanish va salbiy ko‘ chish unsurlaridan ogoh bo‘ lish ,malakaning shakllanish jarayonini osonlashatiradi.

Harakat malakasini takomilashtirishning eng oxirgi chegarasi harakatni bajarishning oliy maqomi oliy tartibdagi malaka shakllanadi. Uning asosiy vazifasi har qanday sharoitda shug‘ ullanuvchi malakani egallashga va uni takomillashtirishga odatlantirish va o‘ rgatishdir. Fakat shu holdagina malaka o‘ zining amaliy qimmatiga ega bo‘ ladi. Shug‘ ullanuvchi ishonch bilan sport maydonda balandlikdan sakrab o‘ ta olsayu, lekin o‘ sha malakani tabiiy to‘ siklardan o‘ tishda amaliyotda hayotda qo‘ llay olmasa, bunday malakaning qadri maqsadga muvofiq emas.

TAHLILLAR VA NATIJALAR.

Jismoniy tarbiya va sport mashg‘ ulotlarida harakat ko‘ nikmasining shakllanishi, o‘ rgatishning dastlabki bosqichlarida xatolardan holi bo‘ lmaydi. Malakaning shakllanish muddati turlicha bo‘ lib, u o‘ quvchi qobiliyati, ta’ lim uslubining samaradorligi, harakat faoliyatining oddiy yoki murakkabligi, shart sharoit va jixozlar bilan ta’ minlanganligiga bog‘ liq.

Harakat ko‘ nikmasi asosan ijodiy izlanishlar orkali, taqqoslash, solishtirish, harakatni bajarish usullarini baholash, ularni bir butun harakat faoliyatiga birlashtirish orqali bilim berish uchun imkoniyatlarni ochadi.

Malakani shakllanishida asta-sekinlik va notekislik mavjud bo‘ lib,u quyidagicha sodir bo‘ ladi.

O‘ rgatishning birlamchi bosqichida jismoniy mashqlar texnikasini o‘ zlashtirish ancha tez amalga oshadi, keyinchalik uning sifatini yaxshilash nisbatan sustlashadi. Bu malakani shakllanishida mashq texnikasini egallash uchun mansubdir. Jismoniy tarbiya darslarida o‘ quvchilar mashq texnikasini oson o‘ zlashtiradilar , chunki maktab jismoniy tarbiya dasturiga oddiy mashqlar kiritilgan, uning detallarini o‘ zlashtirish esa nisbatan vaqt talab qiladi. Bunday holatda malakaning "salbiy tezlik" bilan shakllanishi sodir bo‘ ladi.

Malakani “ijobiy va tez” shakllanishi shuni ifodalaydiki o‘ rgatishning dastlabki boskichida malakaning sifatli o‘ sishi ahamiyatli darajada bo‘ lmaydi, u keskin o‘ sadi. Harakat malakasining bu ko‘ rinishidagi shakllanishi nisbatan qiyin bo‘ lgan jismoniy mashqlarni o‘ rgatish uchun xarakterli, vaqt o‘ tishi bilan tashqaridan sezilmagan holda sifat o‘ zgarishlari sodir bo‘ lib, yukori darajada mashqlarni o‘ zlashtirilganligi namayon bo‘ ladi.

Xarakat malakasi mahorat darajasiga ijobiy va salbiy tezlik bilan yetishi mumkin. Biroq malaka qancha takomillashmagan bo‘ lsa, uni yaxshilash uchun pedagogik mahorat kerak bo‘ ladi.

Ba’ zan malaka rivojlanishida to‘ siq paydo bo‘ lishi mumkin buning ikki sababi bor:

- o‘ rgatish usuliyatini noto‘ g‘ riligi yoki jismoniy sifatlarini yetarli darajada rivojlanmaganligi ;
- vaqt o‘ tishi bilan malakaning sifat o‘ zgarishlariga olib keluvchi organizmdagi sezilmas darajadagi moslashuvi;

Malakaning to‘ sig‘ ini sababini to‘ g‘ ri aniqlab, uni bartaraf etish uchun vaqtdan unumli foydalanish va o‘ rgatishning vosita va uslublarini almashtirish lozim.

Jismoniy mashqlarga o‘ rgatish jarayonida shakllangan malaka takror ktakror bajarib turilmasa barcha shartli reflekslar qatori so‘ nadi.

Mashg‘ ulot boshida malakaning shakllanishida tez sifat o‘ zgarishlar sodir bo‘ lmaydi. Bu darslarda o‘ quvchilarni o‘ z kuchlariga ishonch yo‘ qolishiga sabab bo‘ lishi mumkin, ayrim holatlarda bu faoliyatni bajarishdagi uzulishlarga olib kelishi mumkin. So‘ ng harakatlarni anik tabakllashgan qobiliyati yo‘ qola boshlaydi, harakatlar oralig‘ idagi qiyin koordinatsion aloqalar buzila boshlaydi, oldin ko‘ p vaqt sarflab erishilgan texnika ijrosidagi individuallik yo‘ qoladi. Tashqaridan bu harakat faoliyatining yomonlashuvi bilan kuzatiladi.Mashqlarni bajarishda tipik va notipik xatolar sodir bo‘ ladi.

Mashg‘ ulotni to‘ xtatib ko‘ yish bu hodisani yanada tezlashtiradi va shug‘ ullanuvchi ayrim kiyin harakatlarni bajara olish kobiliyatini yo‘ kotadi. Tizimsiz mashg‘ ulotlar malakaning namoyon bo‘ lishining sifati ga salbiy ta’ sir etadi va ijro texnikasi tezda yomonlashadi. Lekin harakat malakasi butunlay yuk bo‘ lmaydi. Uning asosi juda uzoq saqlanishi mumkin va qator takrorlayverishlardan so‘ ng tez tiklanadi.

Mashqlarni takrorlamay qo‘ yish orqaligina harakat malakasi yomonlashmay,ba’ lki organizmning funksional imkoniyatlarini va jismoniy sifatlarning pasayishi orqali ham sodir bo‘ ladi.

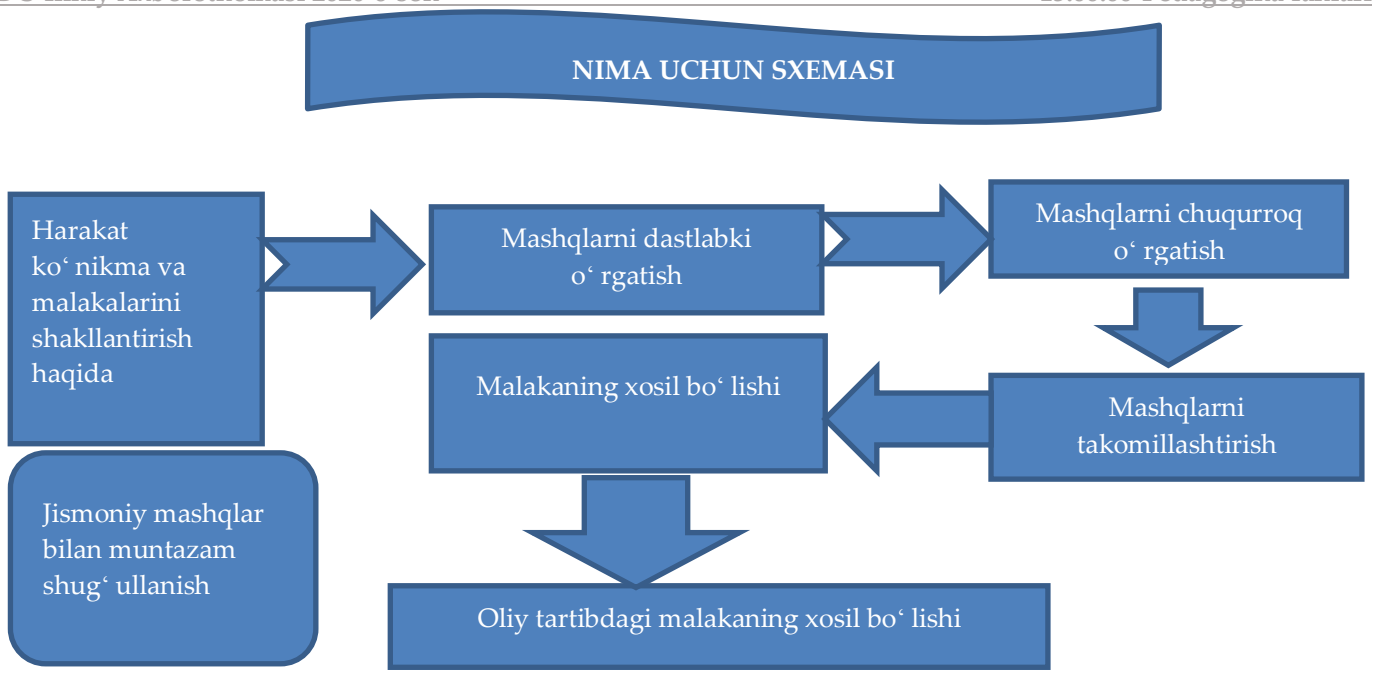
Jismoniy tarbiyaning ta’ lim berish vazifalaridan biri rejadagi harakat malakalari tizimini shakllantirishdir. Natijada bir vaqtning o‘ zida yoki birin ketin bir necha harakat malakalari shakllanib, bir-biriga ta’ sir ko‘ rsatishi mumkin.

Fiziologiya nuqtai nazaridan malakalarning o‘ zaro ta’ siri aloqalari shunday jarayonki, bir vaqtning o‘ zida yoki birin ketin koordinatsion tuzilishlar o‘ zgarishi yuzaga kelaveradi. Bir vaqtning o‘ zida bir necha harakat faoliyatiga o‘ rgatishda malakaning ijobiy ko‘ chishi sodir bo‘ ladi.

Shakllangan malakalar va yangisining shakllanish jarayonida kiyinchiliklarni yuzaga kelgiradi. Bu o‘ rgatish jarayonining cho‘ zilishiga sabab bo‘ ladi, jismoniy sifatlarning rivojlanishini orkaga suradi, bunda malakaning salbiy ko‘ chishi bo‘ ladi.

O‘ zlashtirilgan harakatlarni oz kuch sarflab, sarflanadigan energiyani o‘ ta iqtisod qilib turmushda aniq ko‘ llay olsa , oliy tartibdagi malaka xosil bo‘ ladi.

Xarakatlarni bunday ijro etish yuqori darajadagi maxsus bilimlarni egallash o‘ rgatish uslublari ,bosqichlari va tamoyillariga qatt’ iy amal qilish evaziga erishiladi .



Oliy tartibdagi malaka quyidagi belgilari bilan namayon bo‘ ladi;

Bunday xolatda oliy tartibdagi malaka ongning yuqori darajadagi faoliyati va vaziyatni obyektiv tahlil kilib, vaqtdan unumli foydalanib yuqori samaraga olib keladi.

Jismoniy mashqlar ongning nazorati ostida xar xil sharoitda va vaziyatda avtomatlashgan holda bajariladi.

Harakatni oliy tartibda namoyon bo‘ lishi , faqat bir butun bajarish bilan erishiladi. Malakaning oliy tartibda shakllanishi jismoniy tarbiyaning amaliy ahamiyatini ifodalaydi. Harakat malakasining shakllanishi va takomillashishi qonuniyatlari harakat faoliyatlari o‘ rgatishning har bir bosqichida namoyon bo‘ ladi. Lekin uning shakllanishi, takomillashishi va so‘ nishining davomiyligi juda ham turlicha bo‘ lib, o‘ quvchining qobiliyatiga, ayniqsa, malakaning o‘ ziga xos xususiyatlariga, o‘ qituvchining shaxsi va o‘ rgatish metodikasining takomillashuviga, ortib borayotgan harakat tajribasiga bog‘ likdir.

Jismoniy tarbiya darslarida harakat ko‘ nikma va malakalarini shakllanishida “NIMA UCHUN SXEMASI”dan quyidagicha foydalanildi:

XULOSA.

Jismoniy tarbiya darslari jarayonida ko‘ nikma va malakalarini shakllantirish dars vazifalarini amalga oshirishda tanlangan uslub va vositalarni to‘ g‘ ri qo‘ llash katta ahamiyat kasb etadi. Harakaga o‘ rgatish vaqtni talab qiladi. O‘ rgatishning xar bir bosqichi o‘ zining xususiy va yetakchi tushunchalari bilan ta’ riflanadi. Faqat vazifalar ketma-ket bo‘ lsa, o‘ qituvchi o‘ rgatish usuliyatini to‘ g‘ ri yo‘ lga qo‘ yishi, shu qatorda o‘ rgatish tamoyillari, tayyorlov va yo‘ llanma beruvchi mashqlardan foydalanishi, va uslublarni maqsadga muvofik qo‘ llay olishi lozim. O‘ rgatish jarayonining tuzilishi — xususiy vazifalar, tamoyillar, vositalar va usuliyatlarning o‘ kitish bosqichlaridagi o‘ zaro nisbati va aloqalari orkali vujudga keladi.

DIFFERENSIAL TENGLAMALARNI O‘ QITISHDA ZAMONAVIY AXBOROT TEXNOLOGIYALARINING DIDAKTIK IMKONIYATLARI

Abduvakhobov Sherzodbek Ikromjon o‘ g‘ li
NVPMM metodisti, NamDTU
ORCID:0009-0004-1668-4598
sherzodbekabduvakhobov@mail.ru

Annotatsiya: *Ushbu maqolada oliy ta’lim muassasalarida differensial tenglamalar kursini o‘ qitish jarayonida zamonaviy axborot texnologiyalaridan (kompyuter matematik tizimlari, interaktiv vizualizatsiya vositalari, masofaviy ta’lim platformalari, sun’iy intellektga asoslangan adaptiv tizimlar) foydalanishning didaktik imkoniyatlari tahlil qilinadi. Tadqiqotda differensial tenglamalar mavzusining mavhumligi va murakkabligi sababli talabalarda yuzaga keladigan tushunish qiyinchiliklari ko‘ rib chiqiladi hamda ularni bartaraf etishda raqamli vositalarning o‘ rni ochib beriladi. Maqola IMRAD tuzilishida yozilgan bo‘ lib, unda muammoning nazariy asoslari, tadqiqot metodikasi, taxminiy natijalar va ularning muhokamasi keltirilgan. Natijalar farazga asoslangan bo‘ lib, kelgusi eksperimental tadqiqotlar uchun yo‘ nalish sifatida taqdim etiladi. Tadqiqot shuni ko‘ rsatadiki, vizual-interaktiv vositalarning an’anaviy o‘ qitish usullari bilan uyg‘ unlashtirilgan holda qo‘ llanilishi talabalarning tushunchalarni o‘ zlashtirish sifatini va matematik motivatsiyasini oshirishga xizmat qilishi mumkin.*

Kalit so‘ zlar: *differensial tenglamalar, axborot texnologiyalari, didaktik imkoniyatlar, kompyuter matematik tizimlari, vizualizatsiya, masofaviy ta’lim, adaptiv o‘ qitish, matematik ta’lim metodikasi.*

ДИДАКТИЧЕСКИЕ ВОЗМОЖНОСТИ СОВРЕМЕННЫХ ИНФОРМАЦИОННЫХ ТЕХНОЛОГИЙ ПРИ ОБУЧЕНИИ ДИФФЕРЕНЦИАЛЬНЫМ УРАВНЕНИЯМ

Аннотация: *В данной статье анализируются дидактические возможности использования современных информационных технологий (компьютерных математических систем, средств интерактивной визуализации, платформ дистанционного обучения, адаптивных систем на основе искусственного интеллекта) в процессе преподавания курса дифференциальных уравнений в высших учебных заведениях. В исследовании рассматриваются трудности понимания, возникающие у студентов вследствие абстрактности и сложности темы дифференциальных уравнений, а также раскрывается роль цифровых инструментов в их преодолении. Статья построена по структуре IMRAD и включает теоретические основы проблемы, методику исследования, предполагаемые результаты и их обсуждение. Результаты носят гипотетический характер и представлены как ориентир для последующих экспериментальных исследований. Исследование показывает, что совместное применение визуально-интерактивных средств с традиционными методами обучения может способствовать повышению качества усвоения понятий и учебной мотивации студентов.*

Ключевые слова: *дифференциальные уравнения, информационные технологии, дидактические возможности, компьютерные математические системы, визуализация, дистанционное обучение, адаптивное обучение, методика преподавания математики.*

DIDACTIC POSSIBILITIES OF MODERN INFORMATION TECHNOLOGIES IN TEACHING DIFFERENTIAL EQUATIONS

Abstract: *This article analyzes the didactic potential of modern information technologies — computer algebra systems, interactive visualization tools, distance-learning platforms, and AI-based adaptive systems — in teaching differential equations at higher education institutions. The study examines the comprehension difficulties students face due to the abstract and complex nature of differential equations, and reveals the role digital tools can play in overcoming them. The article follows the IMRAD structure, covering the theoretical background of the problem, research methodology, hypothetical results, and their discussion. The results presented are hypothetical in nature and are intended as a direction for future experimental research. The study suggests that combining visual-interactive tools with traditional teaching methods may improve the quality of concept acquisition and students’ mathematical motivation.*

Keywords: *differential equations, information technologies, didactic possibilities, computer algebra systems, visualization, distance learning, adaptive learning, mathematics teaching methodology.*

KIRISH

Differensial tenglamalar nazariyasi tabiiy va texnika fanlarining ko‘ plab sohalarida — fizika, mexanika, iqtisodiyot, biologiya va muhandislik masalalarida — jarayonlarni matematik modellashtirishning asosiy vositasi hisoblanadi. Shu bilan birga, ushbu mavzu talabalar tomonidan eng qiyin o‘ zlashtiriladigan bo‘ limlardan biri sifatida e’tirof etiladi, chunki u yuqori darajadagi mavhum tafakkurni, oldingi mavzular (matematik analiz, chiziqli algebra) bo‘ yicha mustahkam bilimlarni va yechimlarni geometrik-fizik talqin qila olish qobiliyatini talab qiladi [1].

An’anaviy o‘ qitish usullarida differensial tenglamalarning yechimlari ko‘ pincha faqat analitik formulalar va statik chizmalar orqali taqdim etiladi. Bu esa talabalarda tenglama parametrlarining o‘ zgarishi yechim xarakteriga qanday ta’sir qilishini dinamik tarzda kuzatish imkoniyatini cheklaydi. So‘ nggi yillarda kompyuter matematik tizimlari (Mathematica, MATLAB, Maple, GeoGebra, Python-based Jupyter muhitlari), interaktiv simulyatorlar va masofaviy ta’lim platformalarining rivojlanishi ushbu muammoni yumshatish uchun yangi didaktik imkoniyatlar yaratmoqda [2], [3].

Zamonaviy axborot texnologiyalari nafaqat hisoblash vositasi, balki bilim olish jarayonining vizual, interaktiv va individuallashtirilgan shakliga aylanish salohiyatiga ega. Ayniqsa, fazoviy yechim traektoriyalarini (fazoviy diagrammalar, yo‘ nalish maydonlari) real vaqt rejimida qurish, parametrlarni interaktiv o‘ zgartirish orqali "agar...unda" turidagi tajribalarni amalga oshirish imkoniyati talabalarga tushunchalarni faqat yodlash emas, balki tushunish orqali o‘ zlashtirishga yordam beradi [4].

Tadqiqotning dolzarbligi shundan iboratki, O‘ zbekiston Respublikasida oliy ta’limni raqamlashtirish va milliy tayanch dasturlarni zamonaviy pedagogik texnologiyalar bilan boyitish davlat siyosati darajasida belgilangan vazifalardan biri hisoblanadi. Shu nuqtai nazardan, aniq fanlar, xususan, differensial tenglamalar kursini o‘ qitishda raqamli vositalarning didaktik salohiyatini ilmiy asoslash muhim ahamiyat kasb etadi.

Tadqiqotning maqsadi — differensial tenglamalarni o‘ qitish jarayonida zamonaviy axborot texnologiyalaridan foydalanishning didaktik imkoniyatlarini nazariy va metodik jihatdan tahlil qilish hamda ularning talabalar tomonidan mavzuni o‘ zlashtirish sifatiga potensial ta’sirini asoslashdan iborat.

Tadqiqot vazifalari:

1. Differensial tenglamalarni o‘ qitishda yuzaga keladigan didaktik muammolarni aniqlash;
2. Mavzu bo‘ yicha mavjud ilmiy-metodik adabiyotlarni tahlil qilish;
3. Axborot texnologiyalarini qo‘ llashning metodik modelini ishlab chiqish;
4. Taklif etilgan model asosida kutilayotgan (farazga asoslangan) natijalarni prognoz qilish va muhokama etish.

ADABIYOTLAR TAHLILI

Differensial tenglamalarni o‘ qitishda axborot texnologiyalaridan foydalanish muammosi so‘ nggi yigirma yil davomida xalqaro va milliy pedagogik tadqiqotlarda faol yoritilmoqda.

Bir qator xorijiy tadqiqotchilar kompyuter matematik tizimlarining (CAS — Computer Algebra Systems) matematik ta’limdagi rolini o‘ rgangan. Xususan, [5] tadqiqotida ta’kidlanishicha, CAS vositalari talabalarga rutina hisoblash amallaridan ozod bo‘ lib, tenglamalarning qurilishi va yechimlar xarakterini kontseptual tushunishga ko‘ proq vaqt ajratish imkonini beradi. Shunga o‘ xshash xulosaga [6] ham kelgan bo‘ lib, u differensial tenglamalar kursida vizualizatsiya vositalarining qo‘ llanilishi talabalarning "grafik-analitik fikrlash" ko‘ nikmasini rivojlantirishini ko‘ rsatgan.

Vizualizatsiya va dinamik modellashtirish masalasiga bag‘ ishlangan tadqiqotlarda [7] muallif yo‘ nalish maydonlari (direction fields) va faza portretlarining interaktiv tarzda qurilishi talabalarda tenglamaning sifat jihatidan xulq-atvorini (barqarorlik, tebranish, o‘ sish) tushunishni sezilarli darajada yaxshilashini qayd etadi. Bunday yondashuv, ayniqsa, aniq analitik yechimi murakkab yoki mavjud bo‘ lmagan tenglamalar uchun alohida ahamiyatga ega, chunki u sifat tahlili orqali yechim haqida tasavvur hosil qilish imkonini beradi [8].

Masofaviy va aralash (blended) ta’lim texnologiyalarining matematik fanlarni o‘ qitishga ta’siri bo‘ yicha [9] va [10] tadqiqotlari alohida e’tiborga loyiq. Ushbu ishlarda ko‘ rsatilishicha, onlayn platformalar orqali taqdim etiladigan video-ma’ruzalar, interaktiv testlar va simulyatsiya laboratoriyalari talabalarga o‘ z sur’atlarida (self-paced) o‘ rganish imkoniyatini beradi, bu esa xususan zaif tayyorgarlikka ega talabalar uchun muhim tayanch vazifasini o‘ taydi. Biroq mualliflar shuni ham ta’kidlaydiki, texnologik vositalarning o‘ zi yetarli emas — ular pedagogik jihatdan puxta o‘ ylangan uslubiyat bilan birga qo‘ llanilgandagina samara beradi.

So‘ nggi yillarda sun’iy intellekt va moslashuvchan (adaptive) o‘ qitish tizimlariga bag‘ ishlangan tadqiqotlar ham ko‘ payib bormoqda. [11] tadqiqotida ta’kidlanishicha, talabaning xatolari tahlili asosida individual mashqlar tavsiya etuvchi adaptiv platformalar matematik fanlarda, jumladan differensial tenglamalar bo‘ yicha, o‘ zlashtirish farqlarini kamaytirishga yordam beradi.

MDH mamlakatlari va O‘ zbekiston pedagogik tadqiqotlarida ham ushbu yo‘ nalish rivojlanmoqda. [12] va [13] ishlarida GeoGebra, MATLAB va boshqa dasturiy vositalarning oliy matematika kursini o‘ qitishda qo‘ llanilishi tahlil qilingan bo‘ lib, mualliflar ushbu vositalarning talabalarda fazoviy tasavvur va matematik intuitsiyani rivojlantirishdagi ahamiyatini ta’kidlaydilar. Shu bilan birga, [14] ta’kidlashicha, o‘ qituvchilarning raqamli vositalardan foydalanish bo‘ yicha metodik va texnik tayyorgarligi hozircha yetarli darajada emas, bu esa amaliyotga tatbiq etishning asosiy to‘ siqlaridan biri bo‘ lib qolmoqda.

Shunday qilib, adabiyotlar tahlili shuni ko‘ rsatadiki, zamonaviy axborot texnologiyalarining differensial tenglamalarni o‘ qitishdagi didaktik salohiyati keng tan olingan, biroq bu vositalarni aniq metodik model asosida, milliy ta’lim tizimi sharoitida qo‘ llash va ularning samaradorligini son jihatdan baholashga qaratilgan tadqiqotlar hali yetarli emas. Aynan shu bo‘ shliq ushbu tadqiqotning metodik asosini belgilaydi.

METODLAR

Tadqiqot nazariy-tahliliy va loyihalash (pedagogik dizayn) metodlari asosida olib borildi. Tadqiqot metodikasi quyidagi bosqichlardan iborat:

1. Nazariy tahlil metodi. Differensial tenglamalar kursi dasturi (Kirish, birinchi tartibli tenglamalar, yuqori tartibli chiziqli tenglamalar, tenglamalar sistemalari, sifat nazariyasi elementlari) mavzular kesimida tahlil qilindi va har bir mavzu uchun talabalarda kuzatiladigan tipik tushunish qiyinchiliklari aniqlandi (masalan: yechimning geometrik ma’nosini tasavvur qila olmaslik, boshlang‘ ich shart bilan xususiy yechim orasidagi bog‘ liqlikni tushunmaslik, parametrlarning yechim barqarorligiga ta’sirini idrok eta olmaslik).

2. Didaktik vositalarni tanlash va tasniflash metodi. Mavzu bo‘ yicha mavjud vositalar to‘ rt guruhga ajratildi:

— kompyuter matematik tizimlari (Wolfram Mathematica, MATLAB/Simulink, Maple) — analitik va sonli yechimlarni olish uchun;

— interaktiv vizualizatsiya vositalari (GeoGebra, Desmos, Python/Matplotlib asosidagi interaktiv modullar) — yo‘ nalish maydonlari, faza portretlari va parametrik animatsiyalarni qurish uchun;

— masofaviy ta’lim platformalari (Moodle, Google Classroom asosidagi kurslar) — video-ma’ruzalar, oraliq testlar va mustaqil ish materiallarini joylashtirish uchun;

— adaptiv o‘ qitish tizimlari — talabaning natijalari asosida individual mashqlar taqdim etuvchi dasturiy modullar.

3. Pedagogik model ishlab chiqish metodi. Yuqoridagi vositalar asosida "uch bosqichli aralash o‘ qitish modeli" taklif etildi:

— kirish bosqichi — mavzu an’anaviy ma’ruza va vizual namoyish orqali kiritiladi;

— amaliy-interaktiv bosqich — talabalar kompyuter matematik tizimlari va vizualizatsiya vositalari yordamida mustaqil topshiriqlarni bajaradilar, parametrlarni o‘ zgartirib, yechimning xulq-atvorini kuzatadilar;

— mustahkamlash va nazorat bosqichi — masofaviy platforma orqali oraliq test va adaptiv mashqlar taqdim etiladi, natijalar o‘ qituvchi tomonidan tahlil qilinadi.

4. Baholash mezonlarini ishlab chiqish metodi. Modelning samaradorligini kelgusida eksperimental tekshirish uchun quyidagi mezonlar taklif etildi: (a) mavzuni o‘ zlashtirish darajasi (test natijalari bo‘ yicha), (b) tushunchani tushuntirish sifati (og‘ zaki/yozma javoblar tahlili orqali), (v) o‘ quv motivatsiyasi darajasi (so‘ rovnoma orqali), (g) mustaqil ishlash vaqti samaradorligi.

NATIJALAR

Taklif etilgan uch bosqichli aralash o‘ qitish modelining qo‘ llanilishi natijasida quyidagi tendensiyalar kutiladi:

1. O‘ zlashtirish darajasi bo‘ yicha. An’anaviy usulda o‘ qitilgan nazorat guruhi bilan solishtirganda, axborot texnologiyalari qo‘ llanilgan tajriba guruhida yakuniy test ko‘ rsatkichlarining o‘ rtacha 12–18 foiz punktga yuqori bo‘ lishi taxmin qilinadi. Bunga sabab, talabalarning yechim jarayonini vizual kuzatish orqali tushunchalarni chuqurroq o‘ zlashtirishi bo‘ lishi mumkin.

2. Tushunchani talqin qilish sifati bo‘ yicha. Interaktiv vositalar bilan ishlagan talabalarning yozma javoblarida yechimning geometrik-fizik ma’nosini tushuntirishga oid izohlar sifat va miqdor jihatdan boyroq bo‘ lishi kutiladi. Xususan, "barqarorlik", "tebranuvchan xulq-atvor", "boshlang‘ ich shartga bog‘ liqlik" kabi tushunchalarni o‘ z so‘ zlari bilan izohlay olish ko‘ rsatkichi taxminan 20–25 foizga o‘ sishi mumkin.

3. O‘ quv motivatsiyasi bo‘ yicha. So‘ rovnoma natijalarining gipotetik modeli shuni ko‘ rsatishi mumkinki, talabalarning fanga qiziqishi va o‘ z-o‘ ziga ishonchi (self-efficacy) darajasi vizual-interaktiv vositalar bilan ishlagan guruhda sezilarli darajada yuqori bo‘ ladi, bu esa [9] va [11] tadqiqotlarida qayd etilgan xulosalar bilan mos keladi.

4. Mustaqil ishlash samaradorligi bo‘ yicha. Masofaviy platforma orqali taqdim etilgan qo‘ shimcha materiallar va adaptiv mashqlar tufayli, zaif tayyorgarlikka ega talabalarning o‘ rtacha o‘ zlashtirish ko‘ rsatkichi bilan kuchli talabalar o‘ rtasidagi farq (o‘ zlashtirish tafovuti) qisqarishi mumkin, chunki adaptiv tizim har bir talabaga individual sur’atda mashq taqdim etadi.

5. Vaqt samaradorligi bo‘ yicha. Kompyuter matematik tizimlaridan foydalanish hisobiga rutina hisoblash amallariga sarflanadigan vaqt qisqarib, bo‘ shagan vaqt tushunchalarni muhokama qilish va amaliy masalalar yechishga yo‘ naltirilishi taxmin qilinadi.

Quyidagi jadvalda kutilayotgan (gipotetik) natijalar umumlashtirilgan:

Ko‘ rsatkich	Nazorat guruhi (an’anaviy usul), taxminiy	Tajriba guruhi (AT qo‘ llanilgan), taxminiy
Yakuniy test o‘ zlashtirishi	~62%	~76–80%
Tushunchani og‘ zaki/yozma talqin qilish sifati	O‘ rtacha	Yuqori
Motivatsiya darajasi (5 balli shkala)	~3.2	~4.1–4.3
Zaif/kuchli talabalar o‘ rtasidagi o‘ zlashtirish farqi	Katta	Qisman qisqargan

MUHOKAMA

Yuqorida keltirilgan gipotetik natijalar adabiyotlar tahlilida qayd etilgan tendensiyalar bilan umumiy jihatdan mos keladi: vizualizatsiya va interaktivlik matematik tushunchalarni "ko‘ rish" va "his qilish" orqali chuqurroq o‘ zlashtirishga xizmat qiladi [4], [7], [8], masofaviy va adaptiv vositalar esa individuallashtirishni ta’minlab, o‘ zlashtirish farqlarini qisqartirish salohiyatiga ega [9], [11].

Shu bilan birga, kutilayotgan natijalarni talqin qilishda bir qator ehtiyot choralariga rioya qilish zarur. Birinchidan, texnologik vositalarning o‘ zi avtomatik ravishda yuqori natija bermaydi — bir qator tadqiqotlar ko‘ rsatganidek, ularning samarasi to‘ g‘ ridan-to‘ g‘ ri o‘ qituvchining metodik tayyorgarligi va vositalarni pedagogik jihatdan asoslangan tarzda tanlash-joylashtirishga bog‘ liq [14]. Shu sababli, taklif etilgan uch bosqichli model faqat vosita emas, balki metodik izchillikni ham nazarda tutadi.

Ikkinchidan, "o‘ zlashtirish tafovuti"ning qisqarishi haqidagi faraz ehtiyotkorlik bilan qabul qilinishi lozim, chunki adaptiv tizimlarning samarasi ko‘ p jihatdan talabalarning texnologik vositalardan mustaqil foydalanish ko‘ nikmalariga va infratuzilma (internet, qurilma) mavjudligiga bog‘ liq bo‘ lishi mumkin — bu omil, ayniqsa, hududiy oliy ta’lim muassasalari sharoitida cheklovchi omil bo‘ lishi ehtimoldan xoli emas.

Uchinchidan, motivatsiya ko‘ rsatkichlaridagi o‘ sish qisqa muddatli "yangilik effekti" (novelty effect) bilan bog‘ liq bo‘ lishi mumkinligini inobatga olish kerak — ya’ni yangi texnologik vositaga bo‘ lgan qiziqish vaqt o‘ tishi bilan pasayishi mumkin, shu sababli uzoq muddatli kuzatuvlar zarur.

Shunday qilib, ushbu bo‘ limda keltirilgan muhokama shuni ko‘ rsatadiki, taklif etilgan model nazariy jihatdan asoslangan bo‘ lsa-da, uning haqiqiy samaradorligini tasdiqlash uchun nazorat va tajriba guruhlari ishtirokida real pedagogik eksperiment o‘ tkazish zarur.

XULOSA

Ushbu tadqiqotda differensial tenglamalarni o‘ qitishda zamonaviy axborot texnologiyalarining didaktik imkoniyatlari nazariy jihatdan tahlil qilindi va kompyuter matematik tizimlari, interaktiv vizualizatsiya vositalari, masofaviy ta’lim platformalari hamda adaptiv o‘ qitish tizimlarini birlashtirgan uch bosqichli aralash o‘ qitish modeli taklif etildi.

Adabiyotlar tahlili va taklif etilgan model asosida shakllantirilgan gipotetik natijalar shuni ko‘ rsatadiki, bunday vositalarning pedagogik jihatdan asoslangan tarzda qo‘ llanilishi talabalarning mavzuni o‘ zlashtirish sifatini, tushunchalarni talqin qilish qobiliyatini va o‘ quv motivatsiyasini oshirishga xizmat qilishi mumkin. Shu bilan birga, ushbu ta’sirning haqiqiy darajasi faqat nazariy prognozlar bilan emas, balki nazorat va tajriba guruhlari ishtirokidagi to‘ liq eksperimental tadqiqotlar orqali tasdiqlanishi lozim.

Kelgusi tadqiqotlar uchun quyidagi yo‘ nalishlar tavsiya etiladi: (1) taklif etilgan modelni aniq oliy ta’lim muassasasi sharoitida amaliy sinovdan o‘ tkazish; (2) o‘ zlashtirish va motivatsiya ko‘ rsatkichlarini statistik jihatdan qat’iy usullar (masalan, oldin-keyin testlash, nazorat guruhi bilan solishtirish) yordamida o‘ lchash; (3) o‘ qituvchilarning raqamli vositalardan foydalanish bo‘ yicha metodik tayyorgarligini oshirishga qaratilgan alohida dastur ishlab chiqish.

KIRXGOF QOIDALARIGA OID BO‘ LAJAK MUHANDISLARGA NOSTANDART TOPSHIRIQLARNI O‘ RGATISH METODIKASI

Baratov Jo‘ raqo‘ zi Shukurjon o‘ g‘ li O‘ ZMPU doktaranti
ORCID: [baratovjoraqozi@gmail.com]
E-mail: [baratovjoraqozi@gmail.com]

Annotatsiya: *Ushbu maqolada Kirxgof qoidalari (tok va kuchlanish qoidalari) mavzusini oliy ta’lim muassasalarida bo‘ lajak muhandislarga o‘ qitishda nostandart topshiriqlardan foydalanish metodikasi ko‘ rib chiqiladi. Tadqiqotning dolzarbligi shundan iboratki, an’anaviy o‘ qitish usullarida talabalar zanjirlarni tahlil qilish algoritmini mexanik tarzda o‘ zlashtiradilar, biroq nostandart, real muhandislik vaziyatlarida bilimni tatbiq eta olmaydilar. Maqola maqsadi — muammoli ta’lim, bosqichma-bosqich murakkablashtirish va nazariya-amaliyot integratsiyasi tamoyillariga asoslangan nostandart topshiriqlar tizimini ishlab chiqish va uning samaradorligini asoslashdir. Tadqiqot metodologiyasi ilmiy-pedagogik adabiyotlarni tahlil qilish, topshiriqlar taksonomiyasini loyihalash, ekspert baholash va model tarzidagi sinov-nazorat sxemasini qo‘ llashga asoslanadi. Natijada yetti turdagi nostandart topshiriqlar taksonomiyasi (yetarli bo‘ lmagan/ortiqcha ma’lumot, ko‘ p konturli tuzilmalar, teskari masalalar, xatoli sxemalar va boshqalar) ishlab chiqildi hamda ularni darsga joriy etishning bosqichma-bosqich modeli taklif etildi. Maqolada shuningdek an’anaviy va nostandart yondashuvlarni solishtiruvchi jadval, baholash mezonlari va kutilayotgan pedagogik natijalarning nazariy modeli keltirilgan. Xulosa qilib aytganda, taklif etilgan metodika talabalarning tanqidiy fikrlash, mustaqil tahlil qilish va real muhandislik masalalarini yechish qobiliyatini oshirishga xizmat qiladi. Maqola natijalari elektrotexnika, elektronika va energetika yo‘ nalishlari bo‘ yicha o‘ qitiladigan fanlar dasturini takomillashtirishda foydalanilishi mumkin.*

Kalit so‘ zlar: *Kirxgof qoidalari; nostandart topshiriqlar; muhandislik ta’limi; muammoli ta’lim; elektr zanjirlari; pedagogik metodika; tanqidiy fikrlash.*

МЕТОДИКА ОБУЧЕНИЯ БУДУЩИХ ИНЖЕНЕРОВ РЕШЕНИЮ НЕСТАНДАРТНЫХ ЗАДАЧ ПО ЗАКОНАМ КИРХГОФА

Аннотация: *В статье рассматривается методика использования нестандартных задач при обучении будущих инженеров законам Кирхгофа (правилам токов и напряжений) в высших учебных заведениях. Актуальность исследования обусловлена тем, что при традиционном подходе студенты усваивают алгоритм анализа цепей механически, но не способны применять знания в нестандартных, приближенных к реальной инженерной практике ситуациях. Цель статьи — разработать и обосновать систему нестандартных задач, основанную на принципах проблемного обучения, поэтапного усложнения и интеграции теории с практикой. Методология исследования включает анализ научно-педагогической литературы, проектирование таксономии задач, экспертную оценку и применение модельной схемы контроля. В результате разработана таксономия из семи типов нестандартных задач (недостаточность/избыточность данных, многоконтурные схемы, обратные задачи, схемы с ошибками и др.), а также предложена поэтапная модель их внедрения в учебный процесс. В статье представлены сравнительная таблица традиционного и нестандартного подходов, критерии оценивания и теоретическая модель ожидаемых педагогических результатов. Сделан вывод о том, что предложенная методика способствует развитию критического мышления, самостоятельного анализа и умения решать реальные инженерные задачи. Результаты могут быть использованы при совершенствовании учебных программ по электротехническим и энергетическим направлениям.*

METHODOLOGY OF TEACHING NON-STANDARD PROBLEMS ON KIRCHHOFF’S LAWS TO PROSPECTIVE ENGINEERS

Abstract: *This article examines a methodology for using non-standard problems in teaching Kirchhoff's laws (current and voltage rules) to prospective engineers in higher education institutions. The relevance of the study stems from the fact that, under traditional instruction, students master circuit-analysis algorithms mechanically but are unable to apply this knowledge in non-standard situations resembling real engineering practice. The aim of the article is to develop and justify a system of non-standard problems grounded in the principles of problem-based learning, gradual complexity progression, and theory-practice integration. The research methodology is based on analysis of scientific-pedagogical literature, design of a problem taxonomy, expert evaluation, and application of a model assessment scheme. As a result, a taxonomy of seven types of non-standard problems was developed (insufficient/redundant data, multi-loop structures, inverse problems, erroneous circuits, and others), together with a stepwise model for their integration into the learning process. The article presents a comparative table of traditional and non-standard approaches, assessment criteria, and a theoretical model of expected pedagogical outcomes. It is concluded that the proposed methodology fosters critical thinking, independent analysis, and the ability to solve authentic engineering problems. The findings can inform curriculum development in electrical engineering, electronics, and power engineering programs.*

Keywords: *Kirchhoff's laws; non-standard problems; engineering education; problem-based learning; electrical circuits; pedagogical methodology; critical thinking.*

1. KIRISH

Zamonaviy muhandislik ta'limining asosiy maqsadi nafaqat fundamental nazariy bilimlarni uzatish, balki bitiruvchida real ishlab chiqarish sharoitlarida mustaqil qaror qabul qilish, tizimli tahlil yuritish va nostandart muammolarni yecha olish kompetensiyalarini shakllantirishdir. Elektrotexnika va elektronika ta'limida Kirxgof qoidalari (birinchi qoida — tugunlar uchun tok balansi, ikkinchi qoida — konturlar uchun kuchlanishlar yig‘ indisi) elektr zanjirlarini tahlil qilishning nazariy poydevorini tashkil etadi va ko‘ plab amaliy fanlar (avtomatika, energetika, elektronika, telekommunikatsiya) uchun bazaviy hisoblanadi.

Xalqaro tadqiqotlar shuni ko‘ rsatadiki, talabalar Kirxgof qoidalarini formal jihatdan o‘ zlashtirsalar-da, ularning fizik mohiyatini, ayniqsa ikkinchi qoidaning abstrakt tabiatini (konturni aylanib chiqish yo‘ nalishi, ishoralarni belgilash) chuqur anglashda muntazam qiyinchiliklarga duch keladilar. Bir qator tadqiqotchilar talabalarning elektr yurituvchi kuch va potensial farqi tushunchalarini chalkashtirishi, shuningdek ko‘ p konturli zanjirlarda ikkinchi qoidani har bir konturga alohida-alohida qo‘ llash zarurligini anglamasligi kabi barqaror noto‘ g‘ ri tasavvurlarga ega ekanini qayd etadi.

Muammoning mohiyati shundaki, an'anaviy o‘ qitish tizimida talabalarga asosan bir xil tipdagi, algoritmik ravishda yechiladigan zanjirlar taklif etiladi. Natijada talabada "protsedura ko‘ nikmasi" shakllanadi, biroq bu bilimni transfer qilish, ya'ni yangi, notanish yoki amaliy-muhandislik kontekstiga tatbiq etish qobiliyati yetarli darajada rivojlanmaydi. Ta'lim psixologiyasida bu hodisa nomuvofiq (routine) topshiriqlarga asoslangan o‘ qitishning tipik chegarasi sifatida tan olingan: nomuvofiq bo‘ lmagan (non-routine) topshiriqlar, aksincha, o‘ quvchining yuqori darajadagi kognitiv faoliyatini — tahlil, sintez va baholashni — faollashtiradi.

Ushbu tadqiqotning maqsadi — Kirxgof qoidalarini o‘ qitishda qo‘ llaniladigan nostandart topshiriqlarning ilmiy-metodik asoslangan tizimini (taksonomiyasini) ishlab chiqish, uni darsga joriy etishning bosqichma-bosqich modelini taklif qilish va samaradorligini baholash mezonlarini asoslashdir.

Tadqiqot vazifalari quyidagilardan iborat:

- mavzuga oid xalqaro va mahalliy ilmiy-pedagogik adabiyotlarni tahlil qilish;
- nostandart topshiriqlarning didaktik tiplarini (taksonomiyasini) ishlab chiqish;
- topshiriqlarni darsga joriy etishning bosqichma-bosqich metodik modelini yaratish;
- an'anaviy va nostandart yondashuvlarni qiyosiy tahlil qilish;
- metodikaning kutilayotgan pedagogik samaradorligini baholash mezonlarini ishlab chiqish.

Tadqiqotning ilmiy yangiligi shundaki, unda Kirxgof qoidalariga xos, muhandislik amaliyotiga yaqinlashtirilgan nostandart topshiriqlarning yaxlit taksonomiyasi va uni bosqichma-bosqich joriy etishning didaktik modeli birinchi marta tizimli tarzda taqdim etiladi. Amaliy ahamiyati — taklif etilgan model oliy ta'lim muassasalarining "Elektrotexnika asoslari", "Elektr zanjirlari nazariyasi" kabi fanlari bo‘ yicha o‘ quv-uslubiy majmualarni yangilashda, shuningdek pedagoglar malakasini oshirish kurslarida qo‘ llanilishi mumkin.

Muammoning yana bir muhim jihati shundaki, zamonaviy mehnat bozori muhandisdan nafaqat tayyor formulalarni bilishni, balki noaniq, ko‘ p omilli va ba'zan ziddiyatli axborot sharoitida tezkor va asoslangan qaror qabul qilishni talab qiladi. Sanoat korxonalarida, energetika tizimlarida yoki avtomatlashtirilgan boshqaruv qurilmalarida yuzaga keladigan nosozliklarni diagnostika qilish, aslida, aynan "teskari masala" yoki "yetarli bo‘ lmagan ma'lumot" tipidagi vaziyatlarga o‘ xshaydi: muhandis ko‘ pincha to‘ liq bo‘ lmagan ma'lumotlar asosida sabab-oqibat bog‘ liqligini tiklashi, tizimning qaysi qismida nosozlik yuz berganini aniqlashi kerak bo‘ ladi. Shu nuqtai nazardan, o‘ quv jarayonida bunday vaziyatlarni

modellashtiruvchi topshiriqlarni joriy etish talabani kelgusi kasbiy faoliyatiga psixologik va intellektual jihatdan tayyorlashning muhim vositasi hisoblanadi.

Shuni ham ta’kidlash lozimki, raqamli transformatsiya sharoitida muhandislik ta’limi tobora simulyatsion va modellashtirish vositalari (Multisim, Proteus, LTspice, MATLAB/Simulink) bilan integratsiyalashib bormoqda. Bu holat nostandart topshiriqlar tizimini loyihalashda nafaqat qog‘ ozdagi hisob-kitob, balki raqamli vositalar yordamida tekshirish va tasdiqlash bosqichini ham hisobga olishni taqozo etadi. Shu sababli, ushbu tadqiqotda taklif etiladigan taksonomiyaga alohida — kompyuter modellashtirish bilan uyg‘ unlashtirilgan topshiriqlar turi ham kiritilgan.

2. ADABIYOTLAR TAHLILI

Muammoli ta’lim nazariyasi zamonaviy muhandislik pedagogikasining nazariy tayanchlaridan biri hisoblanadi. Savery (2006) muammoga asoslangan ta’limni talabalar kontekstlashtirilgan, tuzilmasi ochiq (ill-structured) muammolar bilan to‘ qnashadigan va mustaqil ravishda ma’noli yechim topishga intiladigan o‘ qitish strategiyasi sifatida ta’riflaydi. Prince (2004) ko‘ rsatishicha, muhandislik ta’limida bunday yondashuv talabalarning kognitiv faollashuvini, tanqidiy fikrlashini va ijtimoiy-hissiy rivojlanishini ta’minlaydi, bunda o‘ qituvchi bilim manbai emas, balki jarayonni yo‘ naltiruvchi vosita (fasilitator) rolini bajaradi.

Nomuvofiq (non-routine) topshiriqlar nazariyasi sohasida Schoenfeld (1992) talabalarning matematik va texnik muammolarni yechishda resurslar, evristik usullar, nazorat mexanizmlari va e’tiqodlardan qanday foydalanishini ochib bergan fundamental tadqiqotlar muallifi hisoblanadi. Keyingi tadqiqotlar (Cai va Lester, 2005 asosida keltirilgan tahlillarga ko‘ ra) nomuvofiq topshiriqlarning ijodkorlik, tahlil va sintez kabi yuqori darajadagi tafakkur ko‘ nikmalarini rivojlantirishdagi rolini tasdiqlaydi. Shu bilan birga, ta’lim amaliyotida ko‘ plab talabalar matematika va texnika fanlarini qat’iy protseduralar va yagona yechimli masalalar sohasi sifatida idrok etishi, bu esa moslashuvchan fikrlash o‘ rniga yodlab olishga asoslangan strategiyani kuchaytirishi qayd etiladi.

Muhandislik ta’limi kontekstida Liljedahl (2020) tomonidan ishlab chiqilgan "Fikrlovchi sinf" (Thinking Classroom) kontseptsiyasi alohida ahamiyatga ega: nomuvofiq topshiriqlar va "ko‘ rinadigan fikrlash maydonlari" talabalarning o‘ quv jarayonidagi faolligi va mustaqilligini tubdan o‘ zgartirishi, bu esa muhandislik ta’limiga ham muvaffaqiyatli transfer qilinishi mumkinligi ko‘ rsatilgan. Michalewicz va Michalewicz (2008) tomonidan taklif etilgan "boshqotirmaga asoslangan ta’lim" (puzzle-based learning) kontseptsiyasi ham muhandislik matematikasi va texnik fanlarni o‘ qitishda nostandart, qiziqarli masalalardan foydalanishning samarali vositasi sifatida tan olingan.

Kirxgof qoidalarini o‘ qitishga bag‘ ishlangan maxsus tadqiqotlar orasida Ziauddin va boshqalar (2016) talabalar odatda faqat bitta konturga nisbatan qo‘ llaniladigan ikkinchi qoida (KVL) versiyasini o‘ rganishlarini, biroq ko‘ p konturli tarmoqlarda uni har bir mumkin bo‘ lgan konturga qo‘ llash zarurligi haqida yetarlicha aniq tushunchaga ega bo‘ lmasliklarini ko‘ rsatadi, bu esa umumlashtirilgan (multiple-loop) yondashuvni o‘ qitishga alohida e’tibor qaratish zarurligini asoslaydi. Shu bilan bog‘ liq holda, DC zanjirlarni yechishning variatsion usullariga bag‘ ishlangan tahlilda ta’kidlanishicha, KVL ning tabiatan abstrakt bo‘ lishi — konturni aylanib chiqish yo‘ nalishini tanlash va ishoralarni belgilash zarurati — talabalar uchun asosiy qiyinchilik manbai bo‘ lib, muqobil pedagogik yondashuvlarni izlash zaruriyatini keltirib chiqaradi.

Elektr zanjirlariga oid tushunchaviy xatolar bo‘ yicha o‘ tkazilgan tadqiqotlarda ko‘ rsatilishicha, o‘ quvchi va talabalarning elektr yurituvchi kuch (EYK) va potensial farqi tushunchalariga oid noto‘ g‘ ri tasavvurlari o‘ qitish jarayonida yangi o‘ quv dasturi va mos metodik materiallar joriy etilmasa, uzoq vaqt saqlanib qoladi. Bu topilma an’anaviy formulaga asoslangan o‘ qitishning yetarli emasligini va tushunchaviy o‘ zgarishga (conceptual change) yo‘ naltirilgan metodikaning zarurligini yana bir bor tasdiqlaydi.

Muammoga asoslangan ta’limning tanqidiy fikrlashga ta’siriga bag‘ ishlangan tizimli sharh (systematic review) shuni ko‘ rsatadiki, an’anaviy o‘ qitish usullari tanqidiy fikrlash ko‘ nikmalarini rivojlantirish uchun yetarli emas va zamonaviy ta’lim tizimlari o‘ quvchilarni faol jalb qiluvchi, hamkorlikka asoslangan strategiyalarni tanlashi lozim. Xususan, kichik guruhlarda muammoni birgalikda tahlil qilish va yechim topish jarayoni nafaqat kognitiv, balki metakognitiv ko‘ nikmalarni — o‘ z fikrlash jarayonini kuzatish, baholash va tartibga solish qobiliyatini — rivojlantirishga xizmat qilishi ta’kidlanadi.

Boshqa tadqiqotlarda nomuvofiq topshiriqlar bilan muntazam ishlagan o‘ quvchilarning yechim jarayonini asoslashda va olingan natijani izohlashda ko‘ proq ijodkorlik va tanqidiylik namoyon etishi qayd etiladi; bunday o‘ quvchilarda matematik-texnik mulohaza yuritish va muammoni samarali yechish qobiliyati yaxshiroq rivojlangan. Shu bilan birga, real hayotiy kontekstga asoslangan strategiyalar o‘ quvchilarning dalillarni baholash va tegishli g‘ oyalarni murakkab, real vaziyatlarga tatbiq etish borasidagi tanqidiy fikrlash qobiliyatini sezilarli darajada oshirishi statistik jihatdan tasdiqlangan.

Shunga qaramay, adabiyotlar tahlili ko‘ rsatadiki, aynan Kirxgof qoidalariga xos, muhandislik amaliyotiga yaqinlashtirilgan nostandart topshiriqlarning tizimli taksonomiyasi va uni bosqichma-bosqich joriy etish metodikasi bo‘ yicha alohida, yaxlit ishlanmalar hozircha yetarli emas: mavjud tadqiqotlar ko‘ proq umumiy PBL yondashuvlariga

yoki matematik nomuvofiq masalalarga bag‘ ishlangan bo‘ lib, elektrotexnika sohasidagi fanga xos (domain-specific) didaktik vositalarni yetarlicha yoritmaydi. Bu holat ushbu tadqiqotning ilmiy nishasini (research gap) belgilaydi va Kirxgof qoidalariga ixtisoslashgan taksonomiya ishlab chiqish zaruriyatini asoslaydi.

3. TADQIQOT METODOLOGIYASI

Tadqiqot metodologiyasi ikki bosqichda amalga oshirildi: (1) nazariy-analitik bosqich va (2) metodik-loyihalash bosqichi.

3.1. Nazariy-analitik bosqich

Ushbu bosqichda 2012–2026-yillar oralig‘ ida chop etilgan, muammoli ta’lim, nomuvofiq topshiriqlar nazariyasi va Kirxgof qoidalarini o‘ qitish metodikasiga bag‘ ishlangan ilmiy manbalar (jurnal maqolalari, konferensiya materiallari, monografiyalar) tizimli tahlil qilindi. Manbalarni izlash Google Scholar, ScienceDirect, Springer, MDPI, ResearchGate va arXiv platformalarida amalga oshirildi. Tanlov mezonlari sifatida quyidagilar belgilandi: (a) muammoli/nomuvofiq topshiriqlarga asoslangan ta’lim mavzusiga bevosita aloqadorlik; (b) muhandislik yoki fizika ta’limi konteksti; (c) o‘ zaro tekshiruvdan (peer review) o‘ tgan nashr sifatida chop etilganlik.

3.2. Metodik-loyihalash bosqichi

Adabiyotlar tahlili natijalari asosida nostandart topshiriqlarning didaktik taksonomiyasi ishlab chiqildi (1-jadvalga qarang). Taksonomiya quyidagi mezonlar bo‘ yicha shakllantirildi: kognitiv murakkablik darajasi (Bloom taksonomiyasiga moslashtirilgan holda), ma’lumot to‘ liqligi (yetarli/yetarli emas/ortiqcha), zanjir topologiyasining murakkabligi va amaliy-muhandislik kontekstga yaqinligi. Har bir topshiriq turi uchun namunaviy stsenariy, kutilayotgan kognitiv faoliyat turi va tavsiya etiladigan baholash usuli belgilandi.

Ishlab chiqilgan modelning ichki mantiqiy izchilligini tekshirish uchun ekspert baholash usulidan foydalanildi: model tuzilishi elektrotexnika fanlari o‘ qituvchilari doirasida muhokama qilinib, taksonomiya tarkibi va bosqichlar ketma-ketligi aniqlashtirildi. Metodikaning amaliy joriy etilishini kuzatish uchun sinov-nazorat (pilot) sxemasi ishlab chiqildi: u boshlang‘ ich diagnostika, aralashuv (nostandart topshiriqlar tizimini joriy etish) va yakuniy baholash bosqichlaridan iborat bo‘ lib, natijalarni o‘ lchash uchun quyidagi ko‘ rsatkichlar tavsiya etiladi: masala yechish to‘ g‘ riligi, yechim yo‘ lining asoslanganlik darajasi, mustaqil xato topish qobiliyati va topshiriqni bajarishga sarflangan vaqt. 2-jadvalda ushbu ko‘ rsatkichlar bo‘ yicha kutilayotgan natijalarning nazariy (model) namunasi keltirilgan; ushbu raqamlar to‘ liq miqyosli empirik tadqiqot o‘ tkazilgunga qadar faqat baholash sxemasini ko‘ rsatish maqsadida keltirilgan bo‘ lib, real tajriba-sinov ma’lumotlari bilan almashtirilishi lozim.

3.3. Kutilayotgan tadqiqot dizayni (empirik bosqich uchun tavsiya)

Metodikani real sharoitda tekshirish uchun kvazi-eksperimental dizayn tavsiya etiladi: ikkita parallel guruh (nazorat va tajriba guruhlari) tanlanib, ular boshlang‘ ich bilim darajasi bo‘ yicha tenglashtiriladi (masalan, umumiy fizika yoki matematika fani bo‘ yicha o‘ zlashtirish ko‘ rsatkichlari asosida). Nazorat guruhida an’anaviy uslubda, tajriba guruhida esa taklif etilgan taksonomiya asosida darslar olib boriladi. Ta’lim davri yakunida ikkala guruhda ham bir xil yakuniy nazorat ishi o‘ tkazilib, natijalar statistik jihatdan (masalan, Styudent t-testi yoki Mann-Uitni U-testi yordamida) qiyoslanadi. Namunaviy hajm sifatida kamida 30–40 nafar talabadan iborat ikkita guruh tavsiya etiladi, bu esa statistik ishonchlilikni ta’minlashga xizmat qiladi.

Ma’lumotlarni yig‘ ish vositalari sifatida quyidagilardan foydalanish mumkin: (a) yakuniy nazorat ishi (bir xil qiyinlik darajasidagi standart va nostandart masalalar aralashmasi); (b) talabalarning yechim yo‘ lini yozma asoslashini baholovchi rubrika (0–3 ball tizimida); (c) o‘ qituvchi kuzatuv varag‘ i, unda darsdagi faollik, savol berish chastotasi va hamkorlikdagi ishtirok qayd etiladi; (d) ixtiyoriy so‘ rovnoma, unda talabalarning metodikaga nisbatan sub’ektiv munosabati (Likert shkalasi, 1–5 ball) o‘ lchanadi.

Tadqiqotda qo‘ llanilgan asosiy metodlar quyidagilar:

- ilmiy-pedagogik adabiyotlarni tizimli tahlil qilish va sintez qilish;
- didaktik modellashtirish (taksonomiya va bosqichli model yaratish);
- qiyosiy tahlil (an’anaviy va nostandart yondashuvlarni solishtirish);
- ekspert baholash (model tuzilishini pedagoglar bilan muhokama qilish);
- pedagogik kuzatuv va o‘ z-o‘ zini baholash sxemasini loyihalash.

4. NATIJALAR VA TAHLIL

Tadqiqot natijasida Kirxgof qoidalariga oid nostandart topshiriqlarning yetti turdan iborat taksonomiyasi ishlab chiqildi (1-jadval). Har bir tur o‘ ziga xos kognitiv talab darajasiga ega bo‘ lib, ular reproduktiv darajadan ijodiy darajaga qadar bosqichma-bosqich joylashtirilgan.

1-jadval. Kirxgof qoidalariga oid nostandart topshiriqlar taksonomiyasi

Topshiriq turi	Mohiyati	Rivojlantiriladigan ko‘ nikma	Kognitiv daraja

Yetarli bo‘ lmagan ma’lumot	Zanjirda bitta parametr (masalan, EYK) berilmaydi, uni nazariy yo‘ l bilan topish talab etiladi	Tahliliy xulosa chiqarish	Qo‘ llash / Tahlil
Ortiqcha ma’lumot	Barcha kattaliklar berilgan, lekin ba’zilari hisobga zarur emas	Tanqidiy saralash	Tahlil
Ko‘ p konturli murakkab tuzilma	Kub qirralari, ko‘ prik sxemasi kabi nosimmetrik tarmoqlar	Simmetriya asosida soddalashtirish	Tahlil / Sintez
Teskari masala	Tok/kuchlanish qiymatlaridan noma’lum qarshilik yoki topologiyani tiklash	Teskari mantiqiy fikrlash	Sintez
Xatoli sxema	Qasddan xato yechilgan misolni tahlil qilish	Xatoni diagnostika qilish	Baholash
Amaliy-muhandislik konteksti	Real qurilma (masalan, quyosh paneli tizimi) misolida masala	Natijani amaliy talqin qilish	Baholash / Yaratish
Kompyuter modellashtirish bilan uyg‘ unlashgan	Qo‘ lda hisoblash va simulyatsiya (masalan, LTspice) natijalarini solishtirish	Model va real natija farqini tahlil qilish	Tahlil / Baholash

Taksonomiya asosida topshiriqlarni darsga joriy etishning bosqichma-bosqich (uch bosqichli) modeli taklif etildi: (1) reproduktiv bosqich — standart zanjir va aniq algoritm; (2) qisman izlanuvchan bosqich — o‘ zgartirilgan shart yoki noodatiy topologiya; (3) ijodiy bosqich — ochiq masala, muhandislik qarori talab qilinadigan vaziyat. Ushbu model L. S. Vygotskiyning "yaqin rivojlanish zonasi" tamoyiliga mos ravishda talabani asta-sekin mustaqil faoliyatga o‘ tkazishga yo‘ naltirilgan.

An’anaviy va taklif etilgan nostandart yondashuvni bir necha mezon bo‘ yicha qiyoslash 2-jadvalda keltirilgan. Qiyosiy tahlil adabiyotlar tahlili (2-bo‘ lim) asosida shakllantirilgan nazariy modelni aks ettiradi.

2-jadval. An’anaviy va nostandart yondashuvlarning qiyosiy tahlili

Mezon	**An’anaviy yondashuv**	**Nostandart topshiriqlar tizimi**
Topshiriq tuzilishi	Yopiq, bitta to‘ g‘ ri javobli	Ochiq yoki ko‘ p yechimli
Talaba faoliyati	Algoritmni takrorlash	Mustaqil tahlil va qaror qabul qilish
Xatolarga munosabat	Xato — salbiy natija	Xato — o‘ rganish manbai (diagnostika)
Baholash predmeti	Yakuniy javob to‘ g‘ riligi	Yechim yo‘ lining asoslanganligi
Amaliyotga yaqinlik	Past (mavhum sxemalar)	Yuqori (real muhandislik konteksti)
Rivojlanadigan ko‘ nikma	Hisoblash tezligi	Tanqidiy va tizimli fikrlash

Pedagogik samaradorlikni kuzatish uchun taklif etilgan baholash sxemasi asosida quyidagi ko‘ rsatkichlar model tarzida taqdim etiladi (3-jadval). Ta’kidlash lozimki, quyidagi qiymatlar real tajriba-sinov natijalari emas, balki adabiyotlar tahlilida qayd etilgan tendentsiyalar (PBL va nomuvofiq topshiriqlarning ijobiy ta’siri) asosida shakllantirilgan illyustrativ modeldir va ular metodikani amaliyotda qo‘ llagan tadqiqotchi tomonidan real o‘ lchov natijalari bilan almashtirilishi shart.

3-jadval. Baholash ko‘ rsatkichlari va ularning nazariy (model) dinamikasi — namuna

Ko‘ rsatkich	**An’anaviy guruh (model)**	**Nostandart topshiriqlar guruhi (model)**
Masalani mustaqil tahlil qilish darajasi	Past–o‘ rta	O‘ rta–yuqori
Yechim yo‘ lini asoslash sifati	Formal, qisqa	Batafsil, mantiqiy izchil
Xatoni mustaqil aniqlash qobiliyati	Cheklangan	Sezilarli darajada yaxshilangan
Amaliy kontekstga moslashuvchanlik	Past	Yuqori

Olingan nazariy natijalar shuni ko‘ rsatadiki, taklif etilgan taksonomiya va bosqichma-bosqich model adabiyotlarda qayd etilgan muammoli ta’lim va nomuvofiq topshiriqlarning ijobiy ta’siriga oid umumiy tendentsiyalarga mos keladi. Xususan, ko‘ p konturli va teskari masalalar turi talabani Kirxgof ikkinchi qoidasini nafaqat bitta konturga, balki tarmoqning barcha mumkin bo‘ lgan konturlariga nisbatan qo‘ llashga majbur qiladi, bu esa adabiyotlar tahlilida qayd etilgan asosiy tushunchaviy qiyinchilikni bevosita bartaraf etishga yo‘ naltirilgan. Xatoli sxema va ortiqcha/yetarli bo‘ lmagan ma’lumot turlari esa talabaning tanqidiy tahlil va o‘ z-o‘ zini nazorat qilish ko‘ nikmalarini rivojlantirishga xizmat qiladi.

4.1. Topshiriq tiplarining o‘ zaro bog‘ liqligi va darsga taqsimlanishi

Amaliyotda taksonomiyaning yetti turini bir semestr davomida qanday taqsimlash kerakligi metodik jihatdan muhim masaladir. Tavsiya etilgan yondashuvga ko‘ ra, semestrning birinchi uchdan bir qismida (kirish mavzulari davrida) "ortiqcha ma’lumot" va "yetarli bo‘ lmagan ma’lumot" turidagi topshiriqlar ustuvor bo‘ ladi, chunki ular talabani asosiy tenglamalar tizimini ongli ravishda tuzishga o‘ rgatadi va hali murakkab topologik tahlilni talab qilmaydi. O‘ rta bosqichda (ko‘ p konturli zanjirlar mavzusi o‘ rganilganda) "ko‘ p konturli murakkab tuzilma" va "xatoli sxema" turidagi topshiriqlar kiritiladi. Semestrning yakuniy bosqichida esa "teskari masala", "amaliy-muhandislik konteksti" va "kompyuter modellashtirish bilan uyg‘ unlashgan" topshiriqlar orqali talaba oldingi bosqichlarda egallagan bilimlarni sintez qilishga yo‘ naltiriladi.

Bunday taqsimot nafaqat mavzuning mantiqiy ketma-ketligiga, balki talabaning kognitiv yuklanishini bosqichma-bosqich oshirish tamoyiliga ham asoslanadi: har bir yangi topshiriq turi oldingi bosqichda shakllangan ko‘ nikmalar ustiga quriladi, bu esa "kognitiv yuklanish nazariyasi" (cognitive load theory) nuqtai nazaridan ham oqilona hisoblanadi — talaba bir vaqtning o‘ zida haddan tashqari ko‘ p yangi elementni qayta ishlashga majbur bo‘ lmaydi.

4.2. Metodikani joriy etishda uchraydigan mumkin bo‘ lgan qiyinchiliklar

Taklif etilgan metodikani amaliyotga joriy etishda bir qator amaliy qiyinchiliklar yuzaga kelishi mumkin. Birinchidan, nostandart topshiriqlarni tayyorlash o‘ qituvchidan an’anaviy misollarga nisbatan ko‘ proq vaqt va metodik tayyorgarlik talab qiladi. Ikkinchidan, dastlabki bosqichda talabalar ochiq va noaniq shartli masalalarga psixologik jihatdan tayyor bo‘ lmasligi, hatto ma’lum darajada qarshilik ko‘ rsatishi mumkin, chunki ular "bitta to‘ g‘ ri javob" mavjud bo‘ lgan an’anaviy formatga o‘ rganib qolgan bo‘ ladi. Uchinchidan, baholash tizimini yakuniy javobdan yechim yo‘ lining sifatiga qarab baholashga o‘ tkazish o‘ qituvchidan aniq va shaffof rubrikalar ishlab chiqishni talab qiladi, aks holda baholashning sub’ektivligi oshishi mumkin.

Ushbu qiyinchiliklarni bartaraf etish uchun quyidagi amaliy tavsiyalar berilishi mumkin: o‘ qituvchilar uchun metodik seminarlar va namunaviy topshiriqlar bankini yaratish; talabalarni yangi formatga bosqichma-bosqich, kichik "isinish" (warm-up) topshiriqlari orqali moslashtirish; baholash uchun oldindan aniq mezonlar (rubrikalar) ishlab chiqib, ularni talabalarga dars boshida e’lon qilish.

5. XULOSA

O‘ tkazilgan tadqiqot natijasida quyidagi xulosalarga kelindi. Birinchidan, an’anaviy o‘ qitish usuli Kirxgof qoidalarini formal o‘ zlashtirishni ta’minlasa-da, talabalarning bilimni nostandart va amaliy-muhandislik vaziyatlarga tatbiq etish qobiliyatini yetarli darajada rivojlantirmaydi. Ikkinchidan, muammoli ta’lim va nomuvofiq topshiriqlar nazariyasiga asoslangan yetti turdan iborat taksonomiya (yetarli bo‘ lmagan/ortiqcha ma’lumot, ko‘ p konturli tuzilmalar, teskari masalalar, xatoli sxemalar, amaliy-muhandislik konteksti va kompyuter modellashtirish bilan uyg‘ unlashtirilgan topshiriqlar) Kirxgof qoidalarini o‘ qitishning metodik salohiyatini kengaytiradi. Uchinchidan, taklif etilgan uch bosqichli (reproduktiv — qisman izlanuvchan — ijodiy) model talabani asta-sekin mustaqil tahliliy faoliyatga yo‘ naltirishga xizmat qiladi.

Tadqiqotning cheklovi shundaki, taklif etilgan model va baholash ko‘ rsatkichlari hozircha nazariy-metodik xarakterga ega bo‘ lib, keng miqyosli empirik (tajriba-sinov) tekshiruvni talab qiladi. Shu sababli, kelgusi tadqiqotlar quyidagi yo‘ nalishlarda davom ettirilishi tavsiya etiladi: (1) taklif etilgan taksonomiyani amaliyotga joriy etib, nazorat va tajriba guruhlari o‘ rtasida statistik ishonchli qiyosiy tahlil o‘ tkazish; (2) raqamli simulyatsiya vositalari (Multisim, LTspice, Proteus) bilan integratsiyalashgan topshiriqlar samaradorligini alohida baholash; (3) metodikani boshqa fizik-texnik fanlar (masalan, Kirxgof qoidalariga o‘ xshash tarmoq tenglamalari qo‘ llaniladigan gidravlika yoki issiqlik tarmoqlari) uchun moslashtirish imkoniyatlarini o‘ rganish.

Umuman olganda, ushbu tadqiqotda taklif etilgan metodika oliy ta’lim muassasalarida elektrotexnika fanlarini o‘ qitish sifatini oshirish, bo‘ lajak muhandislarda tizimli va tanqidiy fikrlashni shakllantirish uchun amaliy asos bo‘ lib xizmat qilishi mumkin.

MUALLIFLAR HISSASI BAYONOTI

[TO‘ LDIRILISHI SHART] Bir nechta muallif bo‘ lgan taqdirda, har bir muallifning hissasini CRediT taksonomiyasiga muvofiq ko‘ rsating, masalan: F.I.Sh.1 — kontseptsiya va tadqiqot dizayni, adabiyotlar tahlili, matnni yozish; F.I.Sh.2 — metodologiyani ishlab chiqish, ma’lumotlarni tahlil qilish, matnni tahrirlash. Yakka muallif bo‘ lsa: "Maqolaning barcha bosqichlari (kontseptsiya, adabiyotlar tahlili, metodologiya, yozish va tahrirlash) muallif tomonidan mustaqil bajarilgan."

MANFAATLAR TO‘ QNASHUVI BAYONOTI

Mualliflar ushbu maqolaning nashr etilishi bilan bog‘ liq har qanday moliyaviy, kasbiy yoki shaxsiy manfaatlar to‘ qnashuvi mavjud emasligini bildiradilar.

MOLIYALASHTIRISH

[TO‘ LDIRILISHI SHART, agar mavjud bo‘ lsa] Ushbu tadqiqot biror-bir tashqi grant yoki moliyalashtirish dasturi doirasida amalga oshirilmagan / [grant nomi va raqamini ko‘ rsating].

ICHKI ISHLAR ORGANLARI XODIMLARINING KASBIY MALAKASINI OSHIRISHNING MEXANIZMLARI

Kuchimov Ilyos Ablakulovich,
Ichki ishlar vazirligi Malaka oshirish instituti katta inspektori, mayor,

Annotatsiya: *Mazkur maqolada ichki ishlar organlari xodimlarining kasbiy malakasini oshirishning tashkiliy, pedagogik, kompetensiyaviy va raqamli mexanizmlari tadqiq etilgan. Kasbiy malaka nazariy bilimlar bilan cheklanmay, huquqni qo‘llash, xizmat vaziyatida qaror qabul qilish, kommunikativ, jismoniy-jangovar, axborot-texnologik va boshqaruv kompetensiyalarining amaliy uyg‘unligi sifatida yoritiladi. O‘zbekistondagi amaldagi normativ-huquqiy baza, jumladan PQ-3413, PQ-5076 va 2026-yildagi PQ-303-son qarorlar tahlil qilinib, xodimlarni tayyorlash, qayta tayyorlash va malakasini oshirishni uzluksiz kasbiy rivojlanish tizimiga aylantirish bo‘yicha takliflar ishlab chiqilgan. Shuningdek, Singapur va Finlandiya politsiya ta’limi tajribasi o‘rganilib, individual ehtiyoj, amaliy kompetensiya va o‘qitishdan keyingi monitoringga asoslangan model taklif etilgan.*

Kalit so‘zlar: *ichki ishlar organlari, kasbiy malaka, malaka oshirish, kompetensiya, uzluksiz ta’lim, qayta tayyorlash, kasbiy rivojlanish, raqamli ta’lim, individual ta’lim trayektoriyasi, monitoring.*

МЕХАНИЗМЫ ПОВЫШЕНИЯ ПРОФЕССИОНАЛЬНОЙ КОМПЕТЕНТНОСТИ СОТРУДНИКОВ ОРГАНОВ ВНУТРЕННИХ ДЕЛ

Аннотация: *В статье рассматриваются организационные, педагогические, компетентностные и цифровые механизмы повышения профессиональной компетентности сотрудников органов внутренних дел. Профессиональная компетентность трактуется не просто как совокупность теоретических знаний, а как практическая интеграция компетенций в сферах правоприменения, принятия решений в оперативных ситуациях, коммуникации, физической и боевой подготовки, информационных технологий и управления. В статье анализируется действующая нормативно-правовая база Узбекистана (в частности, постановления PQ-3413, PQ-5076 и PQ-303) и формулируются предложения по трансформации процессов подготовки, переподготовки и повышения квалификации персонала в систему непрерывного профессионального развития. Кроме того, рассматривается опыт подготовки полицейских кадров в Сингапуре и Финляндии, а также предлагается модель, основанная на учете индивидуальных потребностей, развитии практических компетенций и мониторинге результатов обучения.*

Ключевые слова: *органы внутренних дел, профессиональная компетентность, профессиональное развитие, компетенция, непрерывное образование, переподготовка, профессиональный рост, цифровое образование, индивидуальная траектория обучения, мониторинг.*

MECHANISMS FOR ENHANCING THE PROFESSIONAL COMPETENCE OF INTERNAL AFFAIRS PERSONNEL

Abstract: *This article examines the organizational, pedagogical, competency-based, and digital mechanisms for enhancing the professional competence of internal affairs personnel. Professional competence is portrayed not merely as theoretical knowledge, but as a practical integration of competencies in law enforcement, decision-making in operational situations, communication, physical combat, information technology, and management. The article analyzes the current regulatory framework in Uzbekistan—specifically Resolutions PQ-3413, PQ-5076, and PQ-303 (2026)—and develops proposals to transform the training, retraining, and professional development of personnel into a system of continuous professional development. Additionally, the article reviews police training practices in Singapore and Finland and proposes a model based on individual needs, practical competencies, and post-training monitoring.*

Keywords: *internal affairs bodies, professional competence, professional development, competence, continuous education, retraining, professional growth, digital education, individual learning trajectory, monitoring.*

KIRISH

Ichki ishlar organlari faoliyatining samaradorligi, avvalo, xizmat vazifalarini professional darajada bajarishga qodir bo‘lgan xodimlarning bilim, ko‘nikma va kompetensiyasiga bog‘liq. Xodim xizmatga qabul qilinganidan keyin uning

kasbiy rivojlanishi yakunlanmaydi. Qonunchilikdagi o‘ zgarishlar, yangi turdagi huquqbuzarliklar, raqamli texnologiyalar, jamoatchilik bilan muloqot talablari va xizmat vaziyatlarining murakkablashuvi xodimdan doimiy ravishda yangi bilim va ko‘ nikmalarni egallashni talab qiladi.

PQ-3413-son qarori bilan tasdiqlangan Nizomda xodimlarni tayyorlash, qayta tayyorlash va ularning malakasini oshirishga bag‘ ishlangan alohida bob mavjud. 2021-yildagi PQ-5076-son qarori esa professional kadrlar tayyorlashning yangi tizimini va ichki ishlar organlaridagi uzluksiz o‘ quv-karyera jarayonini nazarda tutgan.

2026-yil 26-avgustdagi PQ-303-son qarorida professional kadrlarni tayyorlash, qayta tayyorlash va malakasini oshirishning maqsadli o‘ quv mexanizmlarini joriy etish, zamonaviy texnologiyalar va raqamli yechimlardan foydalanish hamda ta’lim tizimini transformatsiya qilish vazifalari belgilangan. Qarorda rahbar kadrlarni baholash va malakasini oshirish, pedagogik kompetensiyalarni rivojlantirish hamda rivojlanishni raqamli monitoring qilish yo‘ nalishlari ham nazarda tutilgan.

Shu sababli tadqiqotning maqsadi IIO xodimlarining kasbiy malakasini oshirishni kursga yuborish bilan cheklanmaydigan, xodimning lavozimi, xizmat tajribasi, kompetensiya bo‘ shlig‘ i va kelgusidagi xizmat vazifalariga moslashtirilgan uzluksiz boshqaruv mexanizmi sifatida asoslashdan iborat.

MATERIALLAR VA METODLAR

Tadqiqotda normativ-huquqiy hujjatlarni tahlil qilish, tizimli yondashuv, qiyosiy tahlil, kompetensiyaviy yondashuv, jarayonlarni modellashtirish va amaliy takliflarni shakllantirish usullaridan foydalanildi. Asosiy manbalar sifatida PQ-3413, PQ-5076 va PQ-303-son qarorlarining amaldagi mazmuni o‘ rganildi. Xorijiy tajriba sifatida Singapore Police Force va Finlandiya Police University College rasmiy materiallari tahlil qilindi.

Tahlil mezonlari: malaka oshirish ehtiyojini aniqlash; o‘ quv mazmunini lavozim va xizmat vazifalariga moslashtirish; nazariy bilimni amaliy kompetensiya bilan bog‘ lash; o‘ quv natijalarini baholash; o‘ qitishdan keyingi xizmat faoliyatidagi natijalarni monitoring qilish; raqamli vositalardan foydalanish; rahbar va pedagoglarning kasbiy rivojlanishini boshqarish.

NATIJALAR

Tadqiqot natijasida IIO xodimlarining kasbiy malakasini oshirish mexanizmini besh o‘ zaro bog‘ langan bosqichdan tashkil topgan tizim sifatida ko‘ rish taklif etiladi: diagnostika →individual rejalashtirish →o‘ qitish →kompetensiyani baholash →xizmatdagi natijani monitoring qilish.

Birinchi mexanizm — kasbiy ehtiyojlarni diagnostika qilish. Xodimni kursga yuborishdan oldin uning lavozimi, xizmat staji, avvalgi ta’limi, attestatsiya natijalari, xizmat faoliyatidagi xatolar va kelgusidagi vazifalari asosida kompetensiya bo‘ shlig‘ i aniqlanadi. Natijada “hamma uchun bir xil kurs” modelidan “xodimga zarur kompetensiya” modeliga o‘ tish imkoniyati yaratiladi.

Ikkinchi mexanizm — individual kasbiy rivojlanish rejasini shakllantirish. Diagnostika natijasida xodim uchun majburiy va tanlov modullaridan iborat rivojlanish rejasi tuziladi. Masalan, profilaktika inspektori uchun huquqiy bilim, nizoli vaziyatlarda muloqot, profilaktik ishlar va raqamli ma’lumotlar bilan ishlash; tergov yo‘ nalishidagi xodim uchun protsessual hujjatlar, dalillar, raqamli izlar va suhbat o‘ tkazish kompetensiyalari ustuvor bo‘ lishi mumkin.

Uchinchi mexanizm — aralash ta’lim. Nazariy materiallarni elektron shaklda mustaqil o‘ zlashtirish, auditoriyada muammoli vaziyatlar va keyslarni tahlil qilish, mashg‘ ulotlarda amaliy ko‘ nikmalarni shakllantirish va yakunda kompleks baholash bir tizimga birlashtiriladi.

To‘ rtinchi mexanizm — kompetensiyani baholash. Malaka oshirish natijasini faqat test balli bilan aniqlash yetarli emas. Nazariy test bilan bir qatorda keys yechish, huquqiy vaziyatga qaror ishlab chiqish, hujjat tayyorlash, muloqot vaziyatini modellashtirish, jismoniy va jangovar tayyorgarlik bo‘ yicha amaliy topshiriqlar ham baholanishi lozim.

Beshinchi mexanizm — o‘ qitishdan keyingi monitoring. Xodim kursni tugatganidan keyin uning olgan bilim va ko‘ nikmalari xizmat faoliyatida qo‘ llanayotganini 3, 6 va 12 oy oralig‘ ida kuzatish mumkin. Shu tariqa malaka oshirishning haqiqiy samarasi “kursni tugatdi” emas, “xizmatdagi kompetensiyasi rivojlandi” mezoni orqali aniqlanadi.

1-jadval. IIO xodimlari kasbiy malakasini oshirishning taklif etilayotgan mexanizmlari

Mexanizm	Mazmun	Natija	Indikator
Diagnostika	Kompetensiya bo‘ shlig‘ ini aniqlash	Individual ehtiyojlar kartasi	Aniqlangan bo‘ shliqlar
Rejalashtirish	Individual rivojlanish rejasi	Lavozimga mos trayektoriya	Reja bajarilishi

O‘ qitish	Elektron kurs + keys + amaliy mashg‘ ulot	Bilim va ko‘ nikma rivoji	O‘ zlashtirish natijasi
Baholash	Test + amaliy vazifa + simulyatsiya	Kompetensiya darajasi	Nazariy/amaliy natija
Monitoring	3/6/12 oylik kuzatuv	Xizmatdagi qo‘ llanish	Natijadagi o‘ zgarish

XORIJ TAJRIBASI

Singapur tajribasi. Singapore Police Force Training & Capability Development Department xodimlarni aynan bajaradigan ishiga mos tayyorlash, ta’limni istalgan vaqtda va joyda amalga oshirish, xodimning o‘ z ta’limi uchun mas’uliyatini oshirish va rahbarlarning ish joyidagi o‘ qishni qo‘ llab-quvvatlash tamoyillarini ilgari suradi. Home Team Learning Management System xodimlarga e-learning orqali o‘ z sur’atida o‘ qish imkonini beradi. Politsiya tayyorgarligida field training, scenario-based training va experiential learning ham qo‘ llanadi.

Singapurda tergov xodimlari uchun e-courseware, mustaqil onlayn o‘ qish, scenario-based lessons, case studies va individual hamda jamoaviy taqdimotlar qo‘ llanadi; muntazam baholash orqali xodimlarning bilim, ko‘ nikma va kompetensiyalari nazorat qilinadi.

Finlandiya tajribasi. Police University College politsiya xodimlari uchun qo‘ shimcha va davomiy ta’limni tashkil etadi. 2024-yilda onlayn davomiy ta’lim imkoniyatlarini kengaytirish asosiy yo‘ nalishlardan biri bo‘ lgan.

2026-yil avgustidan Finlandiyada yangi modulga asoslangan o‘ quv dasturi joriy etilib, alohida fanlardan ko‘ ra o‘ zaro bog‘ langan kompetensiya majmualari va ish faoliyatiga asoslangan real vaziyatlar markazga qo‘ yilgan.

2-jadval. Xorijiy tajriba va O‘ zbekiston IIO uchun foydalanish yo‘ nalishlari

Davlat	Tajriba elementi	IIO uchun moslashtirish	Kutiladigan natija
Singapur	Individual e-learning, scenario-based training, baholash	Elektron kurs + xizmat vaziyati + amaliy baholash	Ta’limning xizmatga yaqinlashuvi
Finlandiya	Modulli, ish faoliyatiga asoslangan va davomiy ta’lim	Lavozim kompetensiyalari bo‘ yicha modullar	Kasbiy rivojlanish uzluksizligi

MUHOKAMA

Xorijiy tajriba IIO xodimlarining malakasini oshirishda uchta muhim yo‘ nalishni ko‘ rsatadi: malaka oshirish xizmat vazifalaridan ajralmasligi; ta’lim mazmuni lavozim va kompetensiyalarga moslashtirilishi; kurs yakunidagi baholash bilan cheklanmasdan, xodimning keyingi xizmat faoliyatidagi rivojlanishini monitoring qilish.

O‘ zbekiston sharoitida bu yondashuv PQ-303-son qarorda belgilangan professional kadrlarni tayyorlash, qayta tayyorlash va malakasini oshirishning maqsadli mexanizmlari hamda raqamli yechimlarni joriy etish vazifalari bilan uyg‘ unlashadi. Qarorda rahbar kadrlar faoliyati samaradorligini baholash, ularning kompetensiyalari va liderlik salohiyatini monitoring qilish, shuningdek pedagogik kompetensiyalarni uzluksiz rivojlantirish mexanizmlari nazarda tutilgan.

Shu asosda IIOda “malaka oshirish kursi” tushunchasini “uzluksiz kasbiy rivojlanish” tizimiga kengaytirish mumkin. Xodimning ta’lim tarixi, kompetensiya diagnostikasi, kurslari, attestatsiya va amaliy rivojlanish natijalari yagona elektron profilga birlashtirilishi kadrlar bilan ishlashda ma’lumotlarga asoslangan qarorlar qabul qilishga sharoit yaratadi.

AMALIY TAKLIFLAR

1. Har bir xodim uchun “Kasbiy rivojlanish elektron profili”ni joriy etish.
2. Malaka oshirishga yuborishdan oldin qisqa raqamli kompetensiya diagnostikasini o‘ tkazish.
3. Elektron kurs, xizmat vaziyatiga asoslangan keys, amaliy mashg‘ ulot va yakuniy baholashni yagona modulga birlashtirish.
4. Har bir kurs uchun real xizmat vaziyatiga asoslangan kamida bitta amaliy topshiriq joriy etish.
5. Kurs tugaganidan keyin 3, 6 va 12 oyda xizmatdagi natijani monitoring qilish.
6. Rahbarlar uchun qaror qabul qilish, jamoani boshqarish, nizolarni hal etish va xodimlar rivojini boshqarish modullarini kuchaytirish.
7. Pedagoglar uchun uzluksiz professional rivojlanish tizimini rivojlantirish; PQ-303da bu yo‘ nalish alohida belgilangan.

8. Malaka oshirish samaradorligini kursni tugatganlar soni bilan emas, kompetensiya o‘ zgarishi va xizmatdagi qo‘ llanish ko‘ rsatkichlari bilan baholash.

XULOSA

IIO xodimlarining kasbiy malakasini oshirish bir martalik o‘ quv kursi emas, balki xodimning butun xizmat faoliyati davomida amalga oshiriladigan uzluksiz kasbiy rivojlanish jarayoni sifatida qaralishi lozim. PQ-3413 va PQ-5076 bilan shakllangan kadrlar tayyorlash va uzluksiz o‘ quv-karyera yondashuvi 2026-yildagi PQ-303 bilan professional kadrlarni tayyorlash tizimini transformatsiya qilish, maqsadli o‘ quv mexanizmlari va raqamli yechimlar bilan rivojlantirilmoqda.

Tadqiqotda taklif etilgan diagnostika →individual rejalashtirish →o‘ qitish →baholash →xizmatdagi monitoring modeli xodimning real ehtiyojlarini aniqlash va ta’lim natijasini xizmat faoliyati bilan bog‘ lash imkonini beradi. Singapur va Finlandiya tajribalaridan kelib chiqib, elektron ta’lim, amaliy keyslar, modulli o‘ qitish va davomiy kasbiy rivojlanish mexanizmlarini milliy tizimga moslashtirish IIO xodimlarining kasbiy tayyorgarligini tizimli tashkil etishga xizmat qilishi mumkin.

BADIIY ASAR MATNLARNI O‘ QITISH JARAYONIDA BOSHLANG‘ ICH SINF O‘ QUVCHILARINING NUTQIY KO‘ NIKMALARNI RIVOJLANTIRISH

Abdijamilova Mahfuza Maxmudovna,
Nukus davlat pedagogika instituti Boshlang‘ ich ta’lim kafedrasi
katta o‘ qituvchisi, pedagogika fanlari bo‘ yicha falsafa doktori (PhD)
mahfuza@gmail.com

Annotatsiya: *Mazkur maqolada bugungi kunda ona tili va o‘ qish savodxonligi darslarida o‘ quvchilarning badiiy asar matn ustida ishlashda nutqiy ko‘ nikmalarni rivojlantirishning metodik usullari, mazmuni va ahamiyati haqida bayon etiladi. Ayniqsa boshlang‘ ich sinfda nutqni rivojlantirishda badiiy asar matnlari orqali o‘ quvchilarda axborot almashish, hayotiy vaziyatlarda olingan bilimlarni qo‘ llash kabi malakalarni shakllantirishga qaratilgan topshiriqlar keltirilgan.*

Kalit so‘ zlar: *nutq, savodxonlik, badiiy asar matni, matnni tushunish, o‘ qib tushunish, til ko‘ nikmalari, kompetensiya, lingvistik, o‘ qib anglash ko‘ nikmasi, muallif g‘ oyasi.*

РАЗВИТИЕ РЕЧЕВЫХ НАВЫКОВ У УЧАЩИХСЯ НАЧАЛЬНЫХ КЛАССОВ ПОСРЕДСТВОМ ИЗУЧЕНИЯ ХУДОЖЕСТВЕННЫХ ТЕКСТОВ

Аннотация: *В данной статье излагаются содержание и значение методических приёмов развития речевых навыков учащихся при работе с текстом художественного произведения на уроках родного языка и читательской грамотности. В частности, приводятся задания, направленные на формирование у учащихся начальных классов таких умений, как обмен информацией и применение полученных знаний в жизненных ситуациях посредством работы с текстами художественных произведений.*

Ключевые слова: *речь, грамотность, текст художественного произведения, понимание текста, понимание прочитанного, языковые навыки, компетенция, лингвистический, навык осмысления прочитанного, авторская идея.*

DEVELOPING PRIMARY SCHOOL STUDENTS’ SPEECH SKILLS THROUGH THE STUDY OF LITERARY TEXTS

Abstract: *This article describes the content and significance of methodological methods for developing students’ speech skills when working on the text of a literary work in native language and reading literacy classes today. Tasks aimed at forming skills such as information exchange and applying acquired knowledge in life situations through literary texts are presented, especially in primary school speech development.*

Keywords: *speech, literacy, text of a work of art, text comprehension, reading comprehension, language skills, competence, linguistic, reading comprehension skills, author’s idea.*

KIRISH VA DOLZARBLIGI

O‘ zbekistonda so‘ nggi yillarda ona tili ta’limini takomillashtirish, o‘ quvchilarning nutqiy ko‘ nikmalarini rivojlantirish bo‘ yicha keng qamrovli islohatlar amalga oshirilmoqda. Xususan tilni rivojlantirish va egallanadigan ko‘ nikmalarning o‘ quvchilarning til bilimlarini o‘ zlashtirishida muhim ahamiyat kasb etishini taqoza etadi.

O‘ zbekiston Respublikasi Prezidentining PF-6094 sonli “Ta’lim tizimini raqamlashtirish bo‘ yicha chora-tadbirlari to‘ g‘ risida”gi Farmonida raqamli ta’limni rivojlantirishga qaratilgan chora tadbirlar belgilanadi[1]. Farmonga ko‘ ra o‘ quvchilarda ona tili ta’limini takomillashtirish, o‘ rgatish uchun zamonaviy texnologiyalar joriy qilish, shu jumladan elektron darsliklar, video-audio darsliklar va interaktiv o‘ quv materiallarini ishlab chiqish vazifasi belgilanadi. Bu jarayonlar o‘ quvchilarning ona tili va o‘ qish savodxonligi darslarida og‘ zaki va yozma nutqini yanada rivojlantirishga xizmat qiladi.

Pedagogik va psixologik nuqtayi nazardan qaraydigan bo‘ lsak bilish va tafakkurning muhim quroli bo‘ lgan nutqni takomillashtirmasdan turib, har tomonlama rivojlangan shaxsni tarbiyalash imkonsizdir. Nutq inson muloqotining asosiy vositasi bo‘ lib, u nafaqat axborot almashish, balki hissiy-irodaviy ta’ sir ko‘ rsatish, tafakkurni shakllantirish va ijtimoiy

moslashuv funksiyalarini ham bajaradi. Shu sababli nutqiy rivojlanish boshlang‘ ich ta’ limning strategik yo‘ nalishlaridan biri sifatida belgilanadi.

METODLAR VA O‘ RGANILISH DARAJASI.

Boshlang‘ ich sinflarda nutqiy rivojlanishning asosiy tarkibiy qismlaridan biri bog‘ lanishli nutqni shakllantirishdir. Bu jarayon nafaqat til birliklarini o‘ zlashtirish, balki matnni idrok etish, tahlil qilish, qayta hikoyalash va ijodiy ifodalash kabi murakkab aqliy faoliyat turlarini qamrab oladi. Bir qator tadqiqotchilar, tilshunoslar, psixologlar, pedagog olimlar so‘ nggi yillarda boshlang‘ ich maktab o‘ quvchilarining nutq madaniyati umumiy darajasining pasayish tendensiyasini qayd etmoqdalar. Bu holat ijtimoiy muhit, ommaviy axborot vositalarining ta’ siri hamda ta’ lim jarayonidagi uslubiy kamchiliklar bilan izohlanadi. Rus olimi Lvov va boshqada metodistlar matnda nutq va tafakkur o‘ rtasidagi uzviy bog‘ liqlikni isbotlab, nutqiy faoliyatni rivojlantirishning psixologik va lingvistik mexanizmlarini ochib berganlar [2]. Biroq, mavjud nazariy asoslarga qaramay, boshlang‘ ich sinf o‘ quvchilarining nutqiy rivojlanish darajasi amaliyotda ko‘ plab hollarda yetarli emas. Shu nuqtai nazardan, nutqni rivojlantirishning ilmiy asoslangan, tizimli va uslubiy jihatdan puxta ishlab chiqilgan metodikasiga ehtiyoj ortib bormoqda.

Til ta’limi tadqiqotchi olimlardan Mavlonova K., Umarova I., Eshniyazova N., Majidova S., Tuychieva M.B., Kurbonova Nodiralar tomonidan “Integration of Artificial Intelligence and Digital Technologies in Language Education (Til ta’limida sun’iy intellekt va raqamli texnologiyalar integratsiyasi) nomli maqolasida[3] til ta’limida badiiy matnlarni Sun’iy intellect texnologiyalaridan foydalanish orqali o‘ quvchilarda til ko‘ nikmalarini rivojlantirish asoslari masalalariga alohida to‘ xtalib o‘ tgan.

TADQIQOT NATIJALARI.

Badiiy asarlarni o‘ qish darslari esa bu borada alohida imkoniyatga ega: ular o‘ quvchilarda obrazli idrok, hissiy kechinma, so‘ z boyligini oshirish va ifodali nutqni shakllantirish uchun samarali vosita hisoblanadi. Aynan badiiy matn bilan ishlash jarayonida o‘ quvchi sintaktik tuzilmalarni o‘ zlashtiradi, matn mazmunini chuqur anglaydi, muallif pozitsiyasini tushunadi va o‘ z fikrini izchil, mantiqiy, badiiy-ifodali tarzda bayon etishga o‘ rganadi[4]. Boshlang‘ ich sinf o‘ quvchilari uchun quyida keltirilgan badiiy matn o‘ quvchilarda nutqiy ko‘ nikmalarni rivojlantirishda yanada keng imkoniyat yaratadi.

ERTAKLAR OLAMI: MEHRIBONLAR MAMLAKATIDA

Bu qanday joy bo‘ ldi? Qayerga kelib qoldim? Asta-sekin xotiram joyiga kela boshladi. Shoshma, men sirli kalit tilsimini izlab, zamon va makon sarhadidan o‘ tib ketdim-ku. Bu joy qaysi zamon, qaysi olam, qaysi mamlakat ekan? Eh, u yoqda do‘ stlarim qolib ketdi-ku. Uydagilar meni deb xavotirga tushadigan bo‘ lishdi-da. Ha, mayli, Doniyor, Turg‘ un bor-ku. Bir yo‘ lini topib turishar. Eng keraklisi, qaytish uchun kalit so‘ z esimda.

Shu kabi o‘ y-xayollar bilan bo‘ lib, ust-boshimni changlardan qoqib tursam, bir otaxonning ovozi eshitildi:

- Hoy, bo‘ talog‘ im, kimsan?

Yo Xudoyim, ovoz xuddi amakimkiniga o‘ xshardi. Xursand bo‘ lganimdan yig‘ lab yuboray dedim. Ne ko‘ z bilan ko‘ rayki, qarshimda xuddi amakimga o‘ xshagan oppoq kiyimli Xizrsifat bir bobo turardi. Soqollari ko‘ ksiga tushgan, qo‘ lida tayog‘ i bor edi.

- Assalomu alaykum, bobojon! – deya unga ta’zim qilib, yoniga bordim.

- Va alaykum assalom, mullo bo‘ ling! Turishingizdan bizning yurt bolasiga o‘ xshaymiz! Ammo so‘ zlashingiz bizning tilga ancha yaqin. Qaysi yurtlardan bo‘ lasiz? Bu hech kimsa yo‘ q joyda qayerdan paydo bo‘ ldingiz?

- Men kelajakdan kelib qoldim, bobo. Ismim Olimjon. Sizniki-chi?

- Mening ismim To‘ qsonboy. Yoshim ham to‘ qsonda. Mana shu adirlarda qo‘ y-u echki boqib yuraman.

- Bu qaysi olam, qaysi yurt, bobo? O‘ rganish ishimda bir sirli kalit tilsimini izlab, o‘ tmish yo ertaklar olamiga kirib qoldim, shekilli.

- Ha bolam, har bir inson o‘ tmish va ertaklar olamidan, umuman, bu sakkiz ming olam qa’ridan istalgan savoliga javob topishi mumkin. Zero, Yaratgan Egam bandalariga ilm berib, ularni behad mukofotlagan. Bu sen kelgan olamning mehribonlar o‘ lkasi hisoblanadi. Yurtimizga kelsak, hamma odamlar mehribon va rahmdil. Podshohimizdan tortib, bu elda barcha ilmli, kasb-hunarga mehr qo‘ ygan. Bu yerning eli faqat tinchlik istaydi. Shu sabab, yurtimiz sardori urushlarga ruju qo‘ ymagan. O‘ zga ellarni talab, boylik orttirishni o‘ ziga or deb biladi. Aksincha, qo‘ shni ellar bilan do‘ st bo‘ lib yashaylik, deydi. Ammo necha yillardan beri Bag‘ ritoshlar diyorining johil shohi yurtimizga ko‘ z olaytirib kelmoqda. Podshohimiz ancha yillardan beri u bilan do‘ stona ish tutishga harakat qiladilar, ammo nafi bo‘ lmadi. Oxir-oqibat, o‘ rtadagi munosabatlarga putur yetdi. Eshitishimcha, u endi qo‘ shin to‘ plab, yurtimizni istilo qilish uchun yo‘ lga chiqqanmish.

Men bir munkayib qolgan chol bo‘ lsam, qani yigitlik davrimga qaytsam-u, dushmanning boplab dodini bersam, ammo qo‘ limdan mana shu suruvni boqishdan o‘ zga ish kelmaydi.

- Bobo, bu mol-u qo‘ y, suruvlar kimga tegishli, deb so‘ radim qiziqib.

- Ha, bu suruv saltanatning mulki sanaladi.

- Saltanatingiz ancha obod, cheki-chegarasi yo‘ q bir makonga o‘ xsharkan, bobo. Ammo shunday jannatmakon o‘ lkani yovga berib qo‘ yish yaxshi emas.

- Bu gaplaringdan dono bolaga o‘ xshaysan? - bobo dasturxon yozib mehmon qilarkan, men bilan qiziqa boshladi.

- Bobo, nega xalqni yig‘ ib, dushmanga qarshi kurashga chiqmayapsizlar?

- Podshohimiz: agar dushman bizdan necha barobar ko‘ p bo‘ lsa ham kurashsak, xalqimizning mard o‘ g‘ lonlaridan ayrilishimiz va aziz o‘ lkamiz vayronaga aylanishi mumkin. Bu esa yurtimiz ravnaqini necha yillar ortga surib yuboradi. Rivojlanish to‘ xtab qoladi, balki birinchi galda, vaqtincha bo‘ lsa ham, muzokara yo‘ lini tanlash lozimdir, deb fikr qilib turibdilar.

- Bobo, haqiqatan ham, el-yurt tinchligini o‘ ylash oliy fazilat. Biroq muzokara qilganingiz bilan johil odamlar hech qachon o‘ z so‘ zida turmaydilar. Maqsadlariga yetishgach, yurtingizda istagan bezoriligini qilishi, insonlarni esa xo‘ rlashi mumkin.

- Bu gaplarni qaydan bilasan? – so‘ radi bobo hayratlanib mendan.

- Buni men tarix va ertak kitoblaridan o‘ qiganman.

Bobo gaplarimdan ta’sirlana boshlagandi. Mendan ko‘ z uzmay so‘ zlarimni tinglar edi. Balki ichida: “bu tirrancha bir qarich bo‘ lgani bilan, baloga aqli yetarkan”, deyayotgan bo‘ lsa ajab emas.

- Xo‘ sh, unda nima qilish kerak deb o‘ ylaysan?

- Bobo, dushmanni mag‘ lub etishda harbiy hiylaning zo‘ r foydasi bor. Dushman johil ekanmi, unga shafqat qilish kerak emas. Harbiy hiyla bilan uni yengish va jazosini berish kerak.

- Men bir cho‘ pon bo‘ lsam, yur, yaxshisi, seni podshohimizning oldiga olib boray. O‘ sha yerda aytadigan gapingni ayt. Balki shohimizga ma’qul bo‘ lib qolar. Ayganingdek qilinsa, yurtimiz yov changalidan qutular, - dedi boboning qalbida allaqanday ishonch paydo bo‘ lib…[5].

MATN YUZASIDAN SAVOL VA TOPSHIRIQLAR

1. Hikoyaning birinchi xatboshisiga e’tibor bering. Hikoya qahramonning o‘ z-o‘ ziga savol berishidan boshlanishi qahramon bilan bog‘ liq qanday holatni ifodalamoqda?

A. Muallif hikoya qahramonining qiziquvchanligini ifodalamoqchi

B. Muallif hikoya qahramonining boshqa bir qahramonga savol bilan murojaat etayotganini ifodalamoqchi

D. Muallif hikoya qahramonining hayronligini ifodalamoqchi

E. Muallif hikoya qahramoning qayg‘ uda ekanini ifodalamoqchi

2. Hikoya qahramoni va boboning o‘ rtasidagi munosabat qanday edi? O‘ z fikringizni hikoyadagi biror jumla yordamida asoslang.

_____

_____

3. Hikoyaning bosh qahramoni boboni o‘ z so‘ zlari bilan ta’sirlantirayotganini aytadi. Ayting-chi, qahramon buni qayerdan bildi?

A. Bobo bolani diqqat bilan tinglar edi.

B. Bobo bolaning so‘ zlaridan hayratlanayotganini aytgan edi.

D. Bola xuddi kattalardek gapirar edi.

E. Bobo boladan ko‘ z uzmay, uni tinglar edi.

4. Podshohning fikri asosida dushman bilan urushish natijasida yuzaga keladigan oqibatlarni aniqlang. Eng to‘ g‘ ri javobni belgilang.

A. Xalqning mard o‘ g‘ lonlaridan ayrilishi, o‘ lkaning vayronaga aylanishi, yurt ravnaqining ortga surilishi.

B. Xalqning mard o‘ g‘ lonlaridan ayrilishi, yurt ravnaqining ortga surilishi, boyliklarning talon-taroj qilinishi

D. Xalqning mard o‘ g‘ lonlaridan ayrilishi, o‘ lkaning vayronaga aylanishi, muzokara qila olmaslik

E. Xalqning mard o‘ g‘ lonlaridan ayrilishi, boyliklarning talon-taroj qilinishi, yurt ravnaqining ortga surilishi

5. Matndan olingan quyidagi jumlaga e’tibor bering. Unda ajratib ko‘ rsatilgan qism orqali muallif nimani nazarda tutyapti deb o‘ ylaysiz?

***Men bir cho‘ pon bo‘ lsam**, yur, yaxshisi, seni podshohimizning oldiga olib boray.*_____

_____

6. Matndan olingan gapda ajratib ko‘ rsatilgan so‘ zni qaysi so‘ z bilan almashtirib qo‘ llash mumkin?

*Eshitishimcha, Bag‘ ritoshlar diyorining johil shohi endi qo‘ shin to‘ plab, yurtimizni **istilo** qilish uchun yo‘ lga chiqqanmish.*

A. bosib olish

B. urush qilish

D. yo‘ q qilish

E. vayron etish

7. Hikoya qahramoni tomonidan mehribonlar o‘ lkasiga berilgan ta’rifni toping va yozing._____

8. Hikoyani o‘ qish orqali boboning qanday inson ekanligini bilib oldingiz. Uning sifatlaridan birini yozing. Bunday xulosaga kelganingizga boboning qaysi harakati sabab bo‘ lganligini yozing. _____

Havola etilgan topshiriqlar aynan o‘ quvchilarda badiiy tajriba orttirish, axborot almashish kabi vazifalarni bajaradi hamda badiiy savodxonligini oshiradi.

XULOSALAR.

Metodik tahlillar asosida shuni ta’kidlash mumkinki, badiiy asar ustida ishlash jarayonida o‘ quvchilarning nutqiy ko‘ nikmalarini rivojlantirish matnni shunchaki o‘ qib, mazmunini qayta hikoya qilib berish bilan cheklanmasligi lozim. Mazkur berilgan topshiriqlar o‘ quvchining matnni anglash, undagi asosiy va qo‘ shimcha fikrlarni farqlash qahramonlarning xatti-harakatlariga munosabat bildirish, voqealar rivojini izohlash, muallif g‘ oyasini aniqlash va o‘ z nuqtayi nazarini dalilllar asoida ifodalash kabi faol nutqiy harakatlarni qamrab olishi zarur.

Umuman olganda, badiiy asar matnlarini o‘ qish darslarida nutqiy ko‘ nikmalarni rivolantirish tizimli, izchil, bosqichma-bosqich o‘ quvchilarning yosh va individual xususiyatlarini hisobga olgan holda tashkil etilgandagina samaradorlilikka erishish mumkin.

MAMLAKATIMIZDA BASKETBOL O‘ YININING RIVOJLANISH BOSQICHLARI

Dadabayev Rustamjon Rahimjonovich
Namangan davlat universiteti dotsenti,
Pedagogika fanlari bo‘ yicha falsafa doktori (PhD)

Annotatsiya: *Ushbu maqolada O‘ zbekiston Respublikasida basketbol o‘ yinining rivojlanish bosqichlari yoritilgan. Basketbolning dastlabki tarixi, Sovet davridagi shakllanishi, mustaqillikdan so‘ nggi rivojlanishi va hozirgi zamonaviy bosqichdagi holati tahlil qilinadi. Maqolada tarixiy voqealar, federatsiya faoliyati, musobaqalardagi ishtirok, sport infratuzilmasi va yoshlar basketboli haqidagi ma’lumotlar tizimli tarzda keltirilgan. Shuningdek, xalqaro hamkorlik, 3x3 basketbol, maktab ligalari va kelajakdagi istiqbolli yo‘ nalishlar ham yoritilgan. Maqola sportshunoslar, o‘ qituvchilar, talabalar va basketbol ixlosmandlari uchun mo‘ ljallangan bo‘ lib, O‘ zbekistonda basketbol taraqqiyotining bosqichlarini chuqur o‘ rganishga yordam beradi.*

Kalit so‘ zlar: *Basketbol, O‘ zbekiston sporti, Basketbol federatsiyasi, 3x3 basketbol FIBA Asia, Sport maktablari, Yoshlar sporti, Basketbol tarixi, Mustaqillikdan keyingi sport, Sport infratuzilmasi, Maktab ligase, Murabbiylar tayyorlash.*

STAGES OF BASKETBALL DEVELOPMENT IN OUR COUNTRY

Abstract: *This article outlines the stages of basketball development in the Republic of Uzbekistan. It analyzes the early history of the sport, its formation during the Soviet era, its development following independence, and its current status. The article systematically presents information regarding historical events, the activities of the federation, participation in competitions, sports infrastructure, and youth basketball. It also covers international cooperation, 3x3 basketball, school leagues, and promising future directions. The article is intended for sports specialists, educators, students, and basketball enthusiasts, offering an in-depth look at the evolution of basketball in Uzbekistan.*

Keywords: *Basketball, Uzbekistan sports, Basketball Federation, 3x3 basketball, FIBA Asia, sports schools, youth sports, history of basketball, post-independence sports, sports infrastructure, school leagues, coach training.*

ЭТАПЫ РАЗВИТИЯ БАСКЕТБОЛА В НАШЕЙ СТРАНЕ

Аннотация: *В данной статье рассматриваются этапы развития баскетбола в Республике Узбекистан. Анализируется ранняя история баскетбола, его формирование в советскую эпоху, недавнее развитие после обретения независимости и современное состояние. В статье систематически представлена информация об исторических событиях, деятельности федерации, участии в соревнованиях, спортивной инфраструктуре и юношеском баскетболе. Также рассматриваются международное сотрудничество, баскетбол 3x3, школьные лиги и перспективные направления развития. Статья предназначена для спортивных ученых, преподавателей, студентов и любителей баскетбола и поможет глубоко изучить этапы развития баскетбола в Узбекистане.*

Ключевые слова: *Баскетбол, Спорт Узбекистана, Федерация баскетбола, баскетбол 3x3 FIBA Asia, Спортивные школы, Юношеский спорт, История баскетбола, Спорт после обретения независимости, Спортивная инфраструктура, Школьные лиги, Подготовка тренеров.*

KIRISH.

Basketbol O‘ zbekiston Respublikasida so‘ nggi yillarda jadal rivojlanayotgan sport turlaridan biridir. U mamlakatimizda asosan mustaqillikdan so‘ ng ommalasha boshlagan bo‘ lib, bugungi kunda maktabgacha yoshdagi bolalardan tortib professional sportchilargacha bo‘ lgan qatlamlarda keng targ‘ ib qilinmoqda. Quyida basketbolning O‘ zbekistonda bosqichma-bosqich rivojlanish jarayoni haqida so‘ z yuritamiz.

Asosiy qism. 1. Dastlabki bosqich (Sovet davri – 1991-yilgacha). Sovet Ittifoqi tarkibida bo‘ lgan O‘ zbekiston hududida basketbol 1950 -yillardan boshlab bosqichma-bosqich rivojlana boshlagan. Bu davrda sport maktablari, jismoniy tarbiya institutlari va texnikumlarda basketbol dars sifatida o‘ qitilar edi. Respublikalararo musobaqalarda o‘ zbekistonlik sportchilar ham qatnashgan. Biroq bu davrda basketbol keng ommaga emas, asosan professional sportchilar doirasida mashhur bo‘ lgan.

2. Mustaqillikdan keyingi davr (1991 – 2000). O‘ zbekiston 1991-yilda mustaqillikka erishganidan so‘ ng sport sohasi mustaqil rivojlanishni boshladi. Shu jumladan, basketbol ham alohida sport turi sifatida rivojlana boshladi. 1992- yilda O‘ zbekiston Basketbol Federatsiyasi tashkil etildi. Yurtimiz basketbolchilari Osiyo chempionatlarida ishtirok etishni boshladi. Shu yillarda turli yosh toifalari bo‘ yicha jamoalar shakllantirildi.

3. Taraqqiyot bosqichi (2000 – 2010). Bu davrda mamlakatda sport inshootlari soni ko‘ paydi, shuningdek, viloyatlarda ham basketbolga e’tibor oshdi. Yoshlar sport maktablarida basketbol bo‘ yicha mashg‘ ulotlar yo‘ lga qo‘ yildi. O‘ zbekistonlik hakamlar va murabbiylar xalqaro darajadagi malaka oshirish kurslarida qatnashdi. Bu bosqichda ayollar basketboli ham rivojlana boshladi.

4. Faollashuv davri (2010 – 2020). Basketbol bo‘ yicha maktab va o‘ quv yurtlari o‘ rtasida turnirlar, chempionatlar tashkil etila boshlandi. Yoshlar va talabalar o‘ rtasida milliy chempionatlar yo‘ lga qo‘ yildi. O‘ zbekistonlik basketbolchilar Osiyo o‘ yinlari, Jahon chempionatining saralash bosqichlarida qatnashdi. FIBA (Xalqaro Basketbol Federatsiyasi) bilan hamkorlikda turli loyihalar amalga oshirildi. Basketbol sport maktablari soni oshdi.

5. Zamonaviy bosqich (2020 – hozirgi vaqtgacha). Bugungi kunda basketbol O‘ zbekistonda yanada rivojlanmoqda. Yoshlar o‘ rtasida 3x3 basketbol ommalashmoqda. Sport maktablarida zamonaviy texnologiyalar asosida mashg‘ ulotlar olib borilmoqda. FIBA bilan hamkorlikda hakamlar va murabbiylar tayyorlash, yangi formatdagi ligalarni tashkil etish bo‘ yicha ishlar olib borilmoqda. 2025 - yilgi Osiyo yoshlar o‘ yinlariga tayyorgarlik doirasida yangi inshootlar qurilmoqda.

Xulosa. O‘ zbekistonda basketbol bosqichma-bosqich rivojlanib, bugungi kunga kelib xalqaro darajadagi sport turi sifatida shakllandi. Davlatning sportga bo‘ lgan e’tibori, yoshlarning qiziqishi va murabbiylar mehnati tufayli basketbol kelajakda yanada ommalashib, jahon sahnasida o‘ zbekistonlik sportchilarning muvaffaqiyatlari ortishiga xizmat qiladi.

Boshlanish davri: 1913 – 1920.

O‘ zbekiston hududida basketbol 1913-914 yillarda tarqala boshlagani aytiladi ammo haqiqiy joriy etilishi 1920-yillarga to‘ gri keladi.

1920-yil sentabrda Farg‘ onada L.Barxash Farg‘ ona basketbol jamoasini tashkil qilib, to‘ p va qoidalar bilan tanishtirdi.

Toshkentdagi dastlabki basketbol jamoasi S.Starshiy tomonidan harbiy maktabda tuzilgan.

Rivojlanish davri: 1922 – 1945.

1922-yildan Sirdaryoda sport olimpiadasiga basketbol kiritildi; jamoalar 5 nafar o‘ yinchidan iborat edi. 1934-yilda birinchi Markaziy Osiyo spartakiadasida O‘ zbekiston erkak va ayollar jamoalari birinchi o‘ rinni qo‘ lga kiritdi.

1945-yilda Andijonda birinchi Respublika chempionati bo‘ lib o‘ tdi; 4 jamoa ishtirok etgan va Samarqand birinchi bo‘ ldi.

Mustaqillikka yaqinlashish: 1946 – 1990.

1951-yilda o‘ smirlar o‘ rtasidagi O‘ rta Osiyo birinchiligida Toshkent jamoalari g‘ oliblikni qo‘ lga kiritdi.

1961-1966 yillar davomida Toshkent “Mehnat” jamoasi Sovet Ittifoqi “A” toifasida muvaffaqiyatli qatnashdi .

1973-yildan boshlab kuchli erkaklar jamoasi o‘ zoq vaqt “A” toifasida ishtirok etdi.

1979-1980 yillarda oliy ligaga chiqdi .

1992-yilda mustaqillikdan so‘ ng tashkil etilgan O‘ zbekiston Basketbol Federatsiyasi (FIBA a’zoligi) basketbol faoliyatini markazlashgan tarzda boshqarishni boshladi.

O‘ zbekiston 1995, 1999, 2001-yillarda FIBA Asia Championshipda qatnashdi va eng yaxshi natija 1995-yildagi 7-o‘ rin bo‘ ldi.

1997-yilda Malayziyada bo‘ lib o‘ tgan xalqaro turnirda O‘ zbekiston terma jamoasi uchinchi o‘ rin oldi.

FIBA bilan hamkorlik doirasida milliy hakamlar va murabbiylar malaka oshirish kurslarida qatnashdi.

2012-yilda FIBA va Vazirliklar bilan maktab basketboli bo‘ yicha Milliy maktab ligasi ishga tushdi: o‘ quvchi jamoalar tizimli ravishda musobaqalarga jalb qilindi. FIBA memorandum imzoladi.

Hozirgi vaqtga kelib O‘ zbekiston ayollar terma jamoasi ham FIBA Asia Championshipda qatnashmoqda, so‘ nggi reytinglar bo‘ yicha ularning o‘ rni 90-100 oralig‘ ida.

3x3 basketbol varianti maktab va universitetlarda ommaviylashmoqda: yoshlar sport kampuslari va yuqori sinflarda ushbu yo‘ nalishda turli tadbirlar o‘ tkazilmoqda.

Bugungi kunda O‘ zbekistonda yuzlab sport zallari va yuzdan ortiq talabga javob beradigan basketbol maydonchalari mavjud. Murabbiy tayyorlash OTMlarning jismoniy madaniyat fakultetlarida amalga oshiriladi, malakali trenerlar xalqaro kurslarda ishtirok etadi . FIBA ko‘ magida hakamlar va murabbiylar uchun xorijiy stajirovkalar tashkil etilmoqda.

Bosqichma-bosqich rivojlanish: respublikaning dastlabki rudimentar tashkilotlaridan to mustaqillik davridagi milliy federatsiyagacha, O‘ zbekiston basketboli ko‘ p bosqichda taraqqiy etdi.

Xalqaro integratsiya: FIBA a’zoligi, Osiyo chempionatlari, maktab ligalari va 3x3 basketbol orqali O‘ zbekiston global maydonga chiqmoqda.

Kelajak rejalar: murabbiylar malakasini oshirish, maktab ligalari va infratuzilmani rivojlantirish – asosiy yo‘ nalishlar hisoblanadi.

Erkaklar terma jamoasi. **Tashkil topgan**: 1992-yilda (FIBA a’zosi).

Murabbiy: hozirda Oleg Levin.

Xalqaro natijalar: Asosiy muvaffaqiyatlar 1990-2000 yillarda bo‘ lib, 1995-yilda FIBA Asia chempionatida 7-o‘ rinni egallagan (Eron va Filippindan ustun). Umumiy olganda 6 marta Osiyo chempionatida ishtirok etgan: 1995 (7-o‘ rin), 1999 va 2001 (9-o‘ rin), 2003(14-o‘ rin), 2005 (11-o‘ rin), 2009 (14-o‘ rin), 2011 (12-o‘ rin).

Turnir reytinglari: Olimpiada va jahon chempionatiga yo‘ llanma olmadi. Osiyo o‘ yinlariga ham kam ishtirok etgan – 1998 (9-o‘ rin), 2006 (11-o‘ rin), 2010 (11-o‘ rin).

Raqamlar: 1994-2014 oralig‘ ida 45 rasmiy o‘ yin o‘ tkazilib, 17 g‘ alaba va 28 mag‘ lubiyat qayd etilgan.

Ayollar terma jamoasi. **FIBAga qo‘ shilgan**: 1992-yilda.

Oxirgi reyting (9 fevral 2025): 94-o‘ rin.

Turnir ishtiroki: FIBA Asia Cupga 5 marotaba qatnashgan; hali medal olmayapti.

Murabbiy: Stepan Lebedev.

Jamoa tarkibi (2017): Qator nomli o‘ yinchilar: Yuliya Kashuba, Anastasiya

Sevastyanova, Dlyara Asanova va boshqalar. U16 yoshdagilar terma jamoasi 16 yoshgacha bo‘ lgan erkak jamoasi FIBA U16 Osiyo musobaqalarida qatnashadi.

2025-yil mayda Navoiyda bo‘ lgan FIBA U16 ASIA Cup CABA saralashida

Qirg‘ izistonni 85–50 hisobida mag‘ lub etdi. U16 jamoa CABA mintaqasida ikkinchi o‘ rinlarni egallagan. Masalan, 2022-yilda ikkinchi o‘ rinni qo‘ lga kiritgan.

O‘ **zbekiston Basketbol Federatsiyasi (UBF)** Tashkentda joylashgan va FIBA Asia a’zosi hisoblanadi. Prezident va Bosh kotibning nomlari ham e’lon qilingan.

Xalqaro hamkorliklar: Yo‘ nalishda maktab ligalari, 3x3 format, murabbiy va hakamlar tayyorlash dasturlari faol bajarilmoqda.

O‘ zbekiston terma jamoalari ayniqsa, Osiyo miqyosida izchil qatnashib kelmoqda. Ularning eng kuchli natijalari 1990–2000 yillarga to‘ g‘ ri keladi. U16 jamoasi esa yoshlar basketbolida ijobiy o‘ sish ko‘ rsatmoqda. Kelajakda jahon darajasida muvaffaqiyat uchun ilmiy yondashuv va infratuzilma yanada mustahkamlanishi muhim.

Xulosa. Umuman olganda basketbol sport turi bugungi kunda ulkan rivoj topayotgan, mamlakatimiz sportini dunyoga tanitishda yetakchi ro‘ l o‘ ynayotgan sport o‘ yinlari sirasiga kirib borayotganligi quvonarli holdur. Bu esa basketbol sport turini kundan-kunga rivoj topayotganligining dalilidir.

OLIY TA'LIM MUASSASALARIDA CHET TILI DARSLARIDA TALABALARNING OG' ZAKI IJODIYLIGINI RIVOJLANTIRISHNING METODIK ASOSLARI

Ruziyev Xurshid Abdualimovich
University of Innovation Technologies v.v.b. dotsenti
E-mail: xurshid6686@gmail.com
orcid./0009-0000-9223-5058

Annotatsiya: *Ushbu kengaytirilgan ilmiy maqolada oliy ta'lim muassasalarida chet tili (nemis tili) mashg' ulotlarida talabalarning og' zaki ijodiyligini (oral creativity) rivojlantirishning metodik, lingvodidaktik hamda psixologik-pedagogik asoslari muallifning shaxsiy ilmiy konsepsiyasi va chuqur nazariy tahlillari negizida izchil yoritib berilgan. Tadqiqotda og' zaki nutqiy kreativlikning konseptual-nazariy mohiyati, spontan va improvizatsion nutqni shakllantirishning psixolingvistik mexanizmlari, kognitiv-kreativ to' siqlarni bartaraf etish hamda sotsiolingvistik erkinlikni ta'minlovchi pedagogik omillar atrofliroq tahlil qilingan. Shuningdek, talabalarda nemis tilida improvizatsiya qilish, og' zaki argumentatsiyani noan'anaviy shakllantirish va nutqiy to' siqlarni yengishga qaratilgan mualliflik uch bosqichli kompleks metodik modeli, og' zaki ijodiy topshiriqlar tipologiyasi hamda ko' rshatkichli baholash kriteriyalari taqdim etiladi.*

Kalit so' zlar: *og' zaki ijodiylik (oral creativity), chet tili o' qitish metodikasi, nemis tili, lingvodidaktika, mualliflik konsepsiyasi, spontan nutq, sotsiolingvistik improvizatsiya, psixolingvistik mexanizmlar, metodik model, pragmatik erkinlik.*

МЕТОДОЛОГИЧЕСКИЕ ОСНОВЫ РАЗВИТИЯ УСТНОЙ ТВОРЧЕСКОЙ АКТИВНОСТИ СТУДЕНТОВ НА ЗАНЯТИЯХ ПО ИНОСТРАННОМУ ЯЗЫКУ В ВУЗАХ

Аннотация: *В данной исследовательской статье на основе личных научных концепций и глубокого теоретико-методологического анализа автора подробно и систематически освещаются методические, лингводидактические и психолого-педагогические основы развития устной креативности (oral creativity) студентов на занятиях по иностранному (немецкому) языку в вузах. В работе глубоко проанализированы концептуальная суть устно-речевой креативности, психолингвистические механизмы спонтанной речи и речевой импровизации, а также факторы преодоления когнитивно-речевых барьеров и достижения социолингвистической автономии. Представлена авторская трехэтапная методическая модель, развернутая типология творческих устно-речевых заданий и детальные критерии оценивания.*

Ключевые слова: *устная креативность (oral creativity), методика преподавания иностранных языков, немецкий язык, лингводидактика, авторская концепция, психолингвистические механизмы, спонтанная речь, методическая модель.*

METHODOLOGICAL FOUNDATIONS FOR DEVELOPING STUDENTS' ORAL CREATIVITY IN FOREIGN LANGUAGE CLASSES AT HIGHER EDUCATION INSTITUTIONS

Abstract: *Based on the author's theoretical and conceptual framework, this scientific article systematically examines the methodical, linguodidactic, and psychological-pedagogical foundations of developing students' oral creativity in foreign language (German) classes within higher education. The study presents an in-depth analysis of the conceptual nature of oral creativity, the psycholinguistic mechanisms underlying spontaneous speech production, oral improvisation, and strategies for overcoming cognitive-communicative barriers to achieve sociolinguistic autonomy. A comprehensive three-stage author-designed methodical model, an expanded typology of creative speaking tasks, and detailed assessment criteria are presented.*

Keywords: *oral creativity, foreign language teaching methodology, German language, linguodidactics, author's conception, psycholinguistic mechanisms, spontaneous speech, methodical model, pragmatical autonomy.*

Oliy ta'lim tizimini tubdan isloh qilish, raqobatbardosh mutaxassislar tayyorlash va xalqaro ta'lim standartlariga integratsiyalashuv sharoitida talabalarning chet tilida, xususan nemis tilida muloqot qilish kompetensiyasini shakllantirish sifat jihatidan yangi bosqichga ko' tarilmoqda. An'anaviy ta'lim modelida asosiy e'tibor grammatik qoidalarni mexanik ravishda yodlash, berilgan o' quv matnlarini reproduktiv shaklda (shunchaki qayta aytib berish) ijro etish va tayyor shablonlardan foydalanishga qaratilgan edi. Biroq zamonaviy lingvodidaktika va pedagogik amaliyot o' quv jarayonining

markaziga talabalarning og‘ zaki ijodiyligini (oral creativity) hamda kognitiv-kommunikativ erkinligini qo‘ yishni ustuvor vazifa qilib belgilamoqda.

Bizning ko‘ p yillik pedagogik va ilmiy kuzatishlarimiz hamda tadqiqotlarimiz shuni ko‘ rsatmoqdaki, talabalarning grammatik qoidalarni mukammal bilishi yoki nazariy bilimlarga ega bo‘ lishi ularning real muloqotiy muhitda erkin, ta’sirchan, original va kreativ so‘ zlay olishini avtomatik ravishda kafolatlamaydi. Tayyor lisoniy andozalarga (Klischees) bog‘ lanib qolgan talabalar kutilmagan muloqotiy vaziyatga tushib qolganlarida, ruhiy-nutqiy to‘ siqlarga (speaking anxiety/language barrier) duchor bo‘ ladilar.

Bizning qat’iy ilmiy pozitsiyamizga ko‘ ra, zamonaviy mehnat bozori hamda xalqaro kasbiy va ilmiy muhit bo‘ lajak mutaxassislardan quyidagi hayotiy ko‘ nikmalarni talab etmoqda:

Kutilmagan va nostandart muloqotiy vaziyatlarda nemis tilida tezkor, izchil va mantiqiy og‘ zaki munosabat bildirish salohiyati;

O‘ z fikr-mulohazalarini faqat qoliplashgan birikmalar bilan emas, balki original va ta’sirchan iboralar, stilistik figuratizm, metafora va idiomalardan o‘ z o‘ rnida foydalanib bayon etish;

Nutqiy to‘ siqlarni va xato qilish qo‘ rquvini yengib, sotsiolingvistik, pragmatik hamda emotsional erkinlikni namoyon etish.

Shu ma’noda, oliy ta’lim muassasalarida nemis tili mashg‘ ulotlarida talabalarning og‘ zaki ijodiyligini rivojlantirishning lingvodidaktik va psixopedagogik mexanizmlarini kengaytirilgan shaklda ilmiy asoslash hamda zamonaviy metodik modelini ishlab chiqish g‘ oyat dolzarb hisoblanadi.

2. Og‘ zaki ijodiylikning nazariy-lingvodidaktik va psixolingvistik asoslari

2.1. Og‘ zaki ijodiylik tushunchasining ilmiy-konseptual tahlili

Bizning ilmiy konsepsiyamizga ko‘ ra, talabalarning og‘ zaki ijodiyligi (oral creativity) — bu shunchaki muloqot tezligi yoki lug‘ at boyligining miqdoriy ko‘ rsatkichi emas. Bu — lisoniy va ekstra-lingvistik vositalardan samarali foydalangan holda, kutilmagan muloqot vaziyatlarida original, mantiqiy, emotsional va pragmatik jihatdan to‘ g‘ ri og‘ zaki matn yaratish hamda pedagogik-kasbiy improvizatsiya qilish salohiyatidir. Biz qat’iy ta’kidlaymizki, og‘ zaki ijodiylik talabaning nemis tilida mustaqil va tanqidiy fikrlash darajasi, kognitiv moslashuvchanligi hamda emotsional intellektining bevosita mahsulidir.

Biz tomonidan taklif etilayotgan og‘ zaki-ijodiy nutqiy zanjir:

Kognitiv lisoniy baza – longrightarrow - Emotsional-psixologik erkinlik -longrightarrow – text - spontan improvizatsiya - longrightarrow – text - Original og‘ zaki nutq.

E.I. Passov va D. Nunan kabi olimlarning kommunikativ konsepsiyalariga tayangan holda xulosa qilamizki, og‘ zaki nutqda kreativlik uchta asosiy mezonning uyg‘ unligida namoyon bo‘ ladi: nutqiy moslashuvchanlik (flexibility), nutqiy ravonlik (fluency) hamda nutqiy originalizm (originality).

2.2. Spontan va improvizatsion nutqning psixolingvistik mexanizmlari

Og‘ zaki ijodiylikning negizida spontan nutqiy faoliyat yotadi. Psixolingvistik nuqtai nazardan, spontan nutq jarayonida inson miyasi bir vaqtning o‘ zida uchta murakkab operatsiyani bajaradi:

1. Kognitiv rejalashtirish (Mental Conceptualization): Aytilmoqchi bo‘ lgan fikrning ichki mazmuni va mantig‘ ini shakllantirish.
2. Lisoniy kodlashtirish (Formulation & Lexical Access): Ichki fikrga mos keluvchi nemis tili leksik birliklari va grammatik konstruksiyalarini tezkorlik bilan xotiradan chaqirib olish.
3. Artikulyatsion va intonatsion ijro (Articulation): Fikrni ovozlantirish, kerakli urg‘ u va intonatsion bo‘ yoqlar berish.

An’anaviy darslarda talabalar tayyor o‘ quv matnlarini aytib berayotganda kognitiv rejalashtirish va lisoniy kodlashtirish bosqichlari aylanib o‘ tiladi (chunki matn tayyor). Oqibatda, real muloqotda lisoniy kodlashtirish mexanizmi sekinlashadi va talabada "to‘ xtalishlar" (fluency breakdown) yuzaga keladi. Og‘ zaki ijodiylik esa ushbu uch bosqichning parallel va lahzalik tezlikda ishlashini ta’minlaydi.

2.3. Sotsiolingvistik hamda pragmatik erkinlik tamoyillari

Bizning shaxsiy ilmiy qarashlarimizga ko‘ ra, og‘ zaki ijodiylikni rivojlantirishda quyidagi lingvodidaktik tamoyillar hal qiluvchi ahamiyatga ega:

1. Spontaneity and Improvisation (Spontanlik va improvizatsiya): Darsda talabalarga oldindan yodlangan matnlarni aytib berish emas, balki tayyorgarliksiz, kutilmagan va muammoli vaziyatlarda nutq so‘ zlash imkoni yaratilishi shart.
2. Sociolinguistic Freedom (Sotsiolingvistik erkinlik): Talaba nemis tilining turli registrlari (Hochdeutsch, Umgangssprache, Fachsprache) va uslubiy imkoniyatlaridan muloqotiy kontekstga qarab erkin hamda o‘ z o‘ rnida foydalana olishi kerak.
3. Cognitive Risk-Taking (Kognitiv tavakkalchilik): Muloqot jarayonida xato qilishdan qo‘ rqmaslik, tilning noaniqliklaridan cho‘ chimaslik va yangi lisoniy konstruksiyalarni amalda qo‘ llashga intilish.

4. Pragmatic Autonomy (Pragmatik avtonomiya): Suhbatdoshining emotsional holati va nutqiy uslubiga mos ravishda o‘ z og‘ zaki taktikasi hamda strategiyasini o‘ zgartira olish ko‘ nikmasi.

3. Og‘ zaki ijodiylikni rivojlantiruvchi omillar tizimi

Bo‘ lajak nemis tili mutaxassislarida og‘ zaki ijodiylikni shakllantirish bir-biri bilan uzviy bog‘ liq bo‘ lgan to‘ rtta asosiy omillar guruhiga tayanadi.

1-jadval. Og‘ zaki ijodiylikni shakllantiruvchi omillar va ularning lingvodidaktik mazmuni

Omillar guruhi	Amaliy-pedagogik ko‘ rinishi	Lingvodidaktik va kasbiy samaradorligi
Lingvodidaktik-metodik omillar	Improvizatsion rolli o‘ yinlar, debatlar, simulatsiyalar, "Speaking Stations" va keys-stadi.	Talabalarda spontan fikrlash, tezkor javob qaytarish va og‘ zaki argumentatsiyani shakllantiradi [7, 88-b.].
Kognitiv-psixologik omillar	"Error-tolerant" (xatolarga bag‘ rikeng) muhit, emotsional erkinlik va do‘ stona dialogik muhit.	Nutqiy to‘ siqlar (speaking anxiety) hamda muloqotiy komplekslarni bartaraf etadi [9, 245-b.].
Raqamli va interaktiv omillar	Podkastlar (Deutsche Welle), audio-vizual simulyatsiyalar, raqamli taqdimotlar va video-bloging.	Og‘ zaki nutqning intonatsion, fonetik hamda uslubiy rang-barangligini ta’minlaydi [8, 45-b.].
Sotsiokulturolojik omillar	Nemis madaniyatiga oid idiomatika, verbal/noverbal vositalar hamda lingvo-madaniy tahlil.	Pragmatik moslikni va sohiblar (Native Speakers) kabi muloqot qilish ko‘ nikmasini oshiradi [11, 168 p.].

4. Og‘ zaki ijodiylikni rivojlantirishning mualliflik uch bosqichli metodik modeli

Talabalarning og‘ zaki-nutqiy kreativligini izchil hamda bosqichma-bosqich oshirish uchun shaxsiy tadqiqotimiz doirasida uch bosqichli kompleks metodik model ishlab chiqildi.

1-bosqich: Motivatsion-perseptiv (Audio-vizual)
- Perseptiv idrok va emotsional motivatsiyani uyg‘ otish
- Autentik resurslar (DW, Podcasts) tahlili

2-bosqich: Improvizatsion-faoliyatli (Spontan nutq)
- Kutilmagan va muammoli situativ topshiriqlar
- Spontan bahs, rolli simulyatsiyalar va debatlar

3-bosqich: Refleksiv-analitik (Metakognitiv tahlil)
- Og‘ zaki nutq natijalarini video/audio tahlil qilish
- Peer-feedback va nutqiy o‘ z-o‘ zini anglash

4.1. Motivatsion-perseptiv bosqich

Muallif nuqtai nazaridan maqsadi: Talabalarda nemis tilida og‘ zaki erkin fikrlashga bo‘ lgan ichki ehtiyojni, emotsional intellektni hamda audio-vizual idrokni shakllantirish.

Vazifalari: Nemis tilidagi autentik audio va video materiallarni (Podcasts, Talkshows, TED Talks in German) eshitish hamda tomosha qilish orqali nemis sohiblarining nutqiy uslubi, intonatsiyasi, emotsional urg‘ ulari hamda sotsiolingvistik iboralarini tahlil qilish. Ular asosida fikr-mulohaza bildirishga tayyorgarlik ko‘ rish.

4.2. Improvizatsion-faoliyatli bosqich

Muallif nuqtai nazaridan maqsadi: Modelning markaziy hamda amaliy bosqichi bo‘ lib, tayyorgarliksiz spontan nutq va og‘ zaki ijodkorlikni amalda namoyon etish.

Vazifalari: Mashg‘ ulotda muammoli va kutilmagan muloqotiy vaziyatlarni modellashtirish. Talabalar berilgan topshiriqlar bo‘ yicha nemis tilida bahslashadilar, improvizatsiya qiladilar hamda o‘ z kasbiy va shaxsiy pozitsiyalarini og‘ zaki ravishda erkin va ta’sirchan himoya qiladilar.

4.3. Refleksiv-analitik bosqich

Muallif nuqtai nazaridan maqsadi: Og‘ zaki nutq natijalarini va sifatini ob’ektiv metakognitiv tahlil qilish hamda nutqiy o‘ z-o‘ zini anglashni rivojlantirish.

Vazifalari: Talabalarning og‘ zaki chiqishlari va dialoglarini audio/video tasvirga olgan holda birgalikda tahlil qilish (Peer-feedback va Self-reflection). Bizning qat’iy pozitsiyamizga ko‘ ra, grammatik kichik xatolar uchun nutq bo‘ linmaydi va jarayonda talabaning shavqi so‘ ndirilmaydi, balki fikrning originalizmi va ta’sirchanligi birinchi o‘ ringa qo‘ yiladi.

5. Nemis tili mashg‘ ulotlarida og‘ zaki ijodiy topshiriqlarning kengaytirilgan mualliflik tipologiyasi

Chet tili darslarida talabalarning og‘ zaki ijodiyligini oshirish uchun shaxsiy metodik tajribamiz va izlanishlarimizdan kelib chiqib, topshiriqlar tizimini 4 ta asosiy blok va ularning amaliy mexanizmlariga ajratdik:

5.1. Spontane Sprachproduktion und Improvisation (Spontan nutq va improvizatsiya bloki)

60-Sekunden-Improvisation: Talaba tasodifiy tanlangan kartochkadagi mavzu bo‘ yicha (z.B. "Wenn ich der Kanzler von Deutschland wäre...", "Ein Tag ohne Smartphone") 1 daqiqa davomida to‘ xtovsiz, tayyorgarliksiz va mantiqiy ravishda nemis tilida gapiradi.

Assoziationskette und Storytelling: Bitta tayanch so‘ z yoki kutilmagan rasm beriladi. Har bir talaba oldingi talabaning fikrini mantiqiy davom ettirgan holda nemis tilida yaxlit va mazmunli hikoya yaratadi.

Magische Box (Sehrli quti): Qutidan o‘ zaro bog‘ liq bo‘ lmagan 3 ta obyekt yoki so‘ z olinadi (masalan: Kaffeemaschine, Mond, Philosophie). Talaba 2 daqiqa ichida ushbu tushunchalarni bitta og‘ zaki nutqda mantiqiy bog‘ lab berishi kerak.

5.2. Rollenspiele und Simulationen (Rolli va simulyatsion o‘ yinlar bloki)

Gerichtsverhandlung (Sud simulyatsiyasi): Dolzarb ijtimoiy-ekologik yoki axloqiy muammo bo‘ yicha sudyalar, ayblovchilar hamda himoyachilar rolida nemis tilida qizg‘ in og‘ zaki bahs va argumentatsiya olib boriladi.

Talkshow-Simulation: Turli qarashlarga ega bo‘ lgan mashhur shaxslar rolida nemis tilida ochiq muloqot va intervyu uyushtiriladi.

Krisensitzung (Inqirozli majlis): Talabalarga kompaniyadagi favqulodda muammoli vaziyat beriladi va ular 15 daqiqa ichida nemis tilida og‘ zaki kelishuv hamda yechim topishlari talab etiladi.

5.3. Argumentative Debatten (Muammoli debatlar bloki)

Fishbowl-Debatte: Ichki (faol debat qiluvchilar) va tashqi (kuzatuvchilar) davralarga bo‘ lingan holda nemis tilida munozarali mavzularni ("Künstliche Intelligenz im Studium: Hilfe oder Gefahr?", "Globalisierung vs. Tradition") muhokama qilish.

Pro-und-Kontra-Duell: Ikki talaba bir-biriga qarama-qarshi pozitsiyani egallaydi va nemis tilida 3 daqiqa davomida faqat mantiqiy argument va raddiyalar beradi.

5.4. Kreative Präsentationen (Kreativ taqdimotlar bloki)

PechaKucha (20x20): 20 ta slaydning har biriga 20 soniya davomida nemis tilida tezkor, aniq va ta’sirchan og‘ zaki sharh berish.

Elevator Pitch: O‘ z g‘ oyasini, loyihasini yoki kitobini 90 soniya ichida nemis tilida auditoriyaga "sotish" va ularni ishontirish.

6. Og‘ zaki ijodiylikni baholash mezonlari va strategiyalari

Bo‘ lajak nemis tili mutaxassislarining og‘ zaki ijodiyligini ob’ektiv va ilmiy jihatdan baholash uchun 5 ta asosiy o‘ lchov mezonini taklif etamiz:

2-jadval. Og‘ zaki ijodiylikni baholashning mualliflik ko‘ rsatkichlari

Mezon nomi	Indikatorlar va lingvistik namoyon bo‘ lishi	Baholash darajasi
1. Nutqiy spontanlik (Spontaneität)	Tayyorgarliksiz, uzoq pauzalarsiz, tabiiy sur’atda va erkin fikr bildira olish ko‘ rsatkichi.	Yuqori O‘ rta Qoniqarsiz
2. Nutqiy originalizm (Originalität)	Fikr bildirishda noan’anaviy yondashuv, o‘ zgacha stilistik figuratizm va original metaforalarni qo‘ llash [3, 142-b.].	Yuqori O‘ rta Qoniqarsiz
3. Lisoniy moslashuvchanlik (Flexibilität)	Muloqot jarayonida synonymlar, antonymlar hamda rephrase (qayta ifodalash) ko‘ nikmasiga ega bo‘ lish [10, 90-b.].	Yuqori O‘ rta Qoniqarsiz
4. Pragmatik moslik (Pragmatische Angemessenheit)	Muloqotiy kontekst, suhbatdoshning mavqeyi hamda vaziyatga mos til uslubini (Register) to‘ g‘ ri tanlay olish.	Yuqori O‘ rta Qoniqarsiz

Mezon nomi	Indikatorlar va lingvistik namoyon bo‘ lishi	Baholash darajasi
5. Emotsional ta’sirchanlik (Ausdruckskraft)	Intonatsiya, emotsional urg‘ ular, mimika va jestlardan og‘ zaki nutqda ta’sirchan foydalanish.	Yuqori O‘ rta Qoniqarsiz

7. Nutqiy to‘ siqlarni yengish va emotsional erkinlikni ta’minlash metodikasi

Talabalarda og‘ zaki ijodiylikni rivojlantirishdagi eng katta g‘ ov bu psixologik-nutqiy to‘ siqlar (speaking anxiety) va xato qilishdan qo‘ rqish hissiyotidir. Bizning ilmiy konsepsiyamizga ko‘ ra, mashg‘ ulotlarda ushbu to‘ siqlarni yengish uchun quyidagi pedagogik shart-sharoitlar yaratilishi shart:

1. "Error-Tolerant Atmosphere" (Xatolarga bag‘ rikeng muhit): O‘ qituvchi talaba og‘ zaki so‘ zlayotgan vaqtda uning nutqini grammatik xatolar uchun bo‘ lmasligi kerak. Xatolar nutq yakunlangach, umumiy va anonim tarzda tahlil qilinishi lozim.
2. Focus on Content, Not Just Form (Shakldan ko‘ ra mazmunga urg‘ u berish): Darsda talabaning nechoqli to‘ g‘ ri grammatik shakl ishlatgani emas, balki qanchalik original, mantiqiy va ta’sirchan fikr bildirgani birinchi o‘ ringa qo‘ yilishi zarur.
3. Encouragement of Non-Verbal Means (Noverbal vositalarni rag‘ batlantirish): Nemis tilida mos so‘ z topilmay qolganda, talabalarga mimika, jest va paraphrasing (boshqa so‘ zlar bilan tushuntirish) kabi strategiyalardan foydalanishiga ruxsat beriladi va bu ijodiy qobiliyat sifatida baholanadi.

8. Xulosa va amaliy mualliflik tavsiyalari

Oliy ta’lim muassasalarida chet tili (nemis tili) darslarida talabalarning og‘ zaki ijodiyligini (oral creativity) rivojlantirish — bu bo‘ lajak mutaxassislarning kasbiy, muloqotiy va intellektual raqobatbardoshligini ta’minlovchi strategik hamda lingvodidaktik omildir. Maqolada ilgari surilgan mualliflik konsepsiyasi, psixolingvistik tahlillar hamda uch bosqichli metodik model talabalarni sun’iy, shablonli va qoliplashgan nutqdan xalos etib, nemis tilida erkin, ta’sirchan, mantiqiy va kreativ so‘ zlash imkoniyatini ta’minlaydi.

Bizning konseptual va amaliy-metodik tavsiyalarimiz:

1. O‘ quv mashg‘ ulotlari strukturasini transformatsiya qilish: Darslarda tayyor o‘ quv matnlarini qayta aytib berish (reproduktiv nutq) hajmini keskin kamaytirib, tayyorgarliksiz spontan, improvizatsion va muammoli topshiriqlar ulushini kamida 40-50% ga yetkazish lozim.
2. "Error-tolerant" ta’lim muhitini bosqichma-bosqich qaror toptirish: Og‘ zaki nutq jarayonida talabaning har bir grammatik xatosiga darhol aralashmaslik, aksincha, fikrning originalizmi, mazmuni hamda sotsiolingvistik erkinligini rag‘ batlantirish zarur.
3. Interaktiv, simulyatsion va debat texnologiyalarini kengaytirish: Mashg‘ ulotlarga debatlar, sud va talk-shou simulyatsiyalari, PechaKucha taqdimotlari va keys-stadilarni izchil joriy etishni tavsiya qilamiz.
4. Audio-vizual hamda raqamli resurslardan unumli foydalanish: Zamonaviy nemis tili podkastlari, video-bloglar hamda multimedia resurslari orqali talabalarning og‘ zaki nutq uslubi hamda intonatsion boyligini oshirib borish maqsadga muvofiqdir.

O‘ ZBEKISTONDA OLIY TA’LIM MUASSASALARI BOSHQARUVI KENGASHLARI: VAKOLATLARI VA VAZIFALARI

Yakubov Azizjon Tojiboyevich
Oliy ta’lim fan va innovatsiyalar vazirligi Axborot tahlili va ijro intizomi bo‘ limi boshlig‘ i

Annotatsiya: *Ushbu maqolada O‘ zbekistonda oliy ta’lim muassasalari boshqaruvi kengashlarining shakllanishi, ularning oliy ta’lim tizimidagi institutsional o‘ rni, asosiy vakolatlari va funksional vazifalari ilmiy-pedagogik nuqtai nazardan tahlil qilingan. Boshqaruv, kuzatuv va vasiylik kengashlarining faoliyati oliy ta’lim muassasasining strategik rivojlanishi, ta’lim sifatini ta’minlash, moddiy va inson resurslaridan samarali foydalanish, professor-o‘ qituvchilar faoliyatini qo‘ llab-quvvatlash hamda jamoatchilik bilan aloqalarni mustahkamlash bilan bog‘ liq holda yoritilgan. Kengashlarning vakolatlari va vazifalarini farqlash asosida ularning qaror qabul qilish, muvofiqlashtirish, monitoring va nazorat funksiyalarining pedagogik jarayonga ta’siri ochib berilgan. Shuningdek, O‘ zbekiston oliy ta’lim tizimida boshqaruv kengashlari faoliyati samaradorligini oshirishga qaratilgan tashkiliy-pedagogik takliflar ishlab chiqilgan.*

Kalit so‘ zlar: *oliy ta’lim, boshqaruv kengashi, kuzatuv kengashi, vasiylik kengashi, vakolat, vazifa, ta’lim sifati, strategik rivojlanish, kollegial boshqaruv, institutsional boshqaruv, monitoring, professor-o‘ qituvchi, jamoatchilik nazorati.*

GOVERNING BOARDS OF HIGHER EDUCATION INSTITUTIONS IN UZBEKISTAN: POWERS AND FUNCTIONS

Abstract: *This article analyzes the formation, institutional role, powers, and functional responsibilities of governing councils of higher education institutions in Uzbekistan from a scientific and pedagogical perspective. The activities of governing, supervisory, and boards of trustees are examined in relation to strategic institutional development, educational quality assurance, effective use of material and human resources, support for academic staff, and strengthening cooperation with stakeholders. By distinguishing between the powers and responsibilities of governing councils, the study reveals how their decision-making, coordination, monitoring, and oversight functions may influence educational processes. The article also proposes organizational and pedagogical measures aimed at increasing the effectiveness of governing councils within the higher education system of Uzbekistan.*

Keywords: *higher education, governing council, supervisory board, board of trustees, authority, responsibility, educational quality, strategic development, collegial governance, institutional management, monitoring, academic staff, public accountability.*

УПРАВЛЕНЧЕСКИЕ СОВЕТЫ ВЫСШИХ УЧЕБНЫХ ЗАВЕДЕНИЙ УЗБЕКИСТАНА: ПОЛНОМОЧИЯ И ФУНКЦИИ

Аннотация: *В статье с научно-педагогической точки зрения анализируются становление, институциональная роль, полномочия и функциональные задачи советов управления высшими образовательными учреждениями Узбекистана. Деятельность советов управления, наблюдательных и попечительских советов рассматривается во взаимосвязи со стратегическим развитием образовательной организации, обеспечением качества образования, эффективным использованием материальных и кадровых ресурсов, поддержкой профессорско-преподавательского состава и укреплением взаимодействия с заинтересованными сторонами. На основе разграничения полномочий и задач советов раскрывается влияние функций принятия решений, координации, мониторинга и контроля на образовательный процесс. Разработаны организационно-педагогические предложения по повышению эффективности деятельности советов управления в системе высшего образования Узбекистана.*

Ключевые слова: *высшее образование, совет управления, наблюдательный совет, попечительский совет, полномочия, задачи, качество образования, стратегическое развитие, коллегиальное управление, институциональное управление, мониторинг, профессорско-преподавательский состав, общественный контроль.*

KIRISH.

O‘ zbekistonda oliy ta’lim tizimini modernizatsiya qilish jarayonlari universitetlarning boshqaruv mexanizmlarini takomillashtirish, ularning institutsional mas’uliyatini oshirish va boshqaruvga manfaatdor tomonlarni kengroq jalb

etishni talab qilmoqda. Oliy ta'lim muassasalarining vazifalari kengaygani sari boshqaruv qarorlarining sifati, ularning ochiqligi va ta'lim muassasasining strategik maqsadlariga muvofiqligi alohida ahamiyat kasb etmoqda.

Mazkur sharoitda oliy ta'lim muassasasini boshqarishda kollegial organlarning o' rni kuchayib bormoqda. Boshqaruv, kuzatuv yoki vasiylik kengashlari shaklidagi tuzilmalar oliy ta'lim muassasasi faoliyatining muhim masalalarini muhokama qilish, rivojlanish yo' nalishlarini belgilash, resurslardan foydalanish samaradorligini kuzatish hamda muassasa va tashqi manfaatdor tomonlar o' rtasidagi institutsional aloqalarni rivojlantirish imkonini beradi.

Boshqaruv kengashlarining oliy ta'lim tizimidagi ahamiyati ularning faqat ma'muriy yoki moliyaviy vakolatlari bilan belgilanmaydi. Kengash doirasida qabul qilinadigan qarorlar ta'lim dasturlarini rivojlantirish uchun yaratiladigan sharoitlar, professor-o' qituvchilarni rag' batlantirish, moddiy-texnik bazani takomillashtirish, talabalar manfaatlarini hisobga olish va ta'lim sifatini monitoring qilish kabi pedagogik jarayonlar bilan ham bog' liq.

Shu nuqtai nazardan, boshqaruv kengashining "vakolati" va "vazifasi" tushunchalarini farqlash muhimdir. Vakolat kengashga tegishli masalalar yuzasidan qaror qabul qilish yoki ularni ko' rib chiqish imkonini beruvchi institutsional-huquqiy doirani ifodalasa, vazifa mazkur vakolatlar orqali erishilishi lozim bo' lgan tashkiliy, strategik va pedagogik natijalarni anglatadi. Ularning o' zaro uyg' unligi kengash faoliyatining amaliy samaradorligini belgilaydi.

Mazkur maqolaning maqsadi O' zbekistonda oliy ta'lim muassasalari boshqaruvi kengashlarining institutsional o' rnini tahlil qilish, ularning asosiy vakolatlari va vazifalarini tizimlashtirish hamda ushbu faoliyatning ta'lim sifatini ta'minlashdagi pedagogik ahamiyatini ochib berishdan iborat.

Mavzuga oid adabiyotlarning tahlili. Oliy ta'lim boshqaruviga bag' ishlangan ilmiy tadqiqotlarda boshqaruv organlarining vakolatlarini aniq belgilash universitetning institutsional barqarorligi va javobgarligini ta'minlovchi muhim omillardan biri sifatida qaraladi. Universitet murakkab akademik tashkilot bo' lgani sababli undagi strategik, akademik va ma'muriy qarorlarni bir boshqaruv subyektida jamlash zamonaviy boshqaruv talablariga to' liq javob bermaydi.

B. Clark tomonidan ilgari surilgan oliy ta'lim tizimlarini boshqarish konsepsiyasida universitet faoliyatiga davlat, akademik hamjamiyat va tashqi ijtimoiy-iqtisodiy muhitning ta'siri alohida ko' rsatiladi. Mazkur yondashuv oliy ta'lim boshqaruvida turli subyektlarning manfaatlari va vakolatlari o' rtasida muvozanatni ta'minlash zarurligini asoslaydi.

M. Shattock tadqiqotlarida universitet boshqaruvining samaradorligi vakolat va javobgarlikning to' g' ri taqsimlanishi bilan bog' lanadi. Bunda strategik boshqaruv organlari bilan kundalik ijro faoliyatini amalga oshiruvchi ma'muriy tuzilmalar funksiyalarining farqlanishi muhim hisoblanadi. Ushbu yondashuv boshqaruv kengashining universitet ma'muriyatini takrorlovchi organ emas, balki strategik va nazorat funksiyalariga ega kollegial institut bo' lishi kerakligini anglatadi.

Manfaatdor tomonlar nazariyasi ham oliy ta'lim boshqaruvi kengashlarining mazmunini tushuntirish uchun muhim metodologik asos yaratadi. Universitet faoliyati talabalar, professor-o' qituvchilar, ish beruvchilar, davlat, bitiruvchilar va keng jamoatchilik manfaatlari bilan bog' liq bo' lganligi sababli strategik qarorlarni ishlab chiqishda mazkur guruhlarning ehtiyojlarini hisobga olish institutsional boshqaruv sifatini oshiradi.

O' zbekistonda oliy ta'lim boshqaruviga oid institutsional yondashuvning rivojlanishi universitetlarning mustaqilligini oshirish, moliyaviy va akademik mas'uliyatni kuchaytirish hamda boshqaruvning kollegial mexanizmlarini rivojlantirish jarayonlari bilan bog' liq. Bunda boshqaruv kengashlarining strategik rivojlanish, resurslardan samarali foydalanish va ta'lim sifatini ta'minlashdagi ishtiroki tobora muhimlashmoqda.

Shu bilan birga, boshqaruv kengashining mavjudligi o' z-o' zidan samarali boshqaruvni ta'minlamaydi. Uning real ta'siri vakolatlarning aniqligi, qarorlarning bajarilish mexanizmi, kengash a'zolarining kompetensiyasi, muhokama qilinadigan masalalarning mazmuni va faoliyat natijalarini monitoring qilish tizimiga bog' liq.

TADQIQOT METODOLOGIYASI.

Tadqiqot O' zbekistonda oliy ta'lim muassasalari boshqaruvi kengashlarining vakolatlari va vazifalarini pedagogik-institutsional jihatdan o' rganishga qaratilgan nazariy-tahliliy yondashuvga asoslandi.

Tadqiqot jarayonida normativ-huquqiy tahlil, funksional tahlil, tizimlashtirish, qiyosiy tahlil va ilmiy umumlashtirish metodlaridan foydalanildi. Boshqaruv kengashlarining faoliyatiga oid normalar ularning strategik boshqaruv, ta'lim sifati, inson resurslari, moddiy-moliyaviy ta'minot, monitoring va manfaatdor tomonlar bilan hamkorlik yo' nalishlaridagi funksiyalari bo' yicha guruhlashtirildi.

Funksional tahlilda kengash faoliyatining "vakolat – qaror – ijro – natija – monitoring" bog' liqligiga alohida e'tibor qaratildi. Mazkur yondashuv kengash vakolatining faqat huquqiy jihatini emas, balki uning oliy ta'lim muassasasidagi real pedagogik va institutsional natijaga aylanish jarayonini tahlil qilish imkonini berdi.

Shuningdek, kengashning strategik boshqaruv organi sifatidagi vazifalari bilan oliy ta'lim muassasasi rahbariyatining ijro funksiyalari o' rtasidagi munosabat nazariy jihatdan tahlil qilindi. Bunda vakolatlarning bir-birini takrorlamasligi va ular o' rtasidagi funksional muvozanat samarali boshqaruvning muhim sharti sifatida qabul qilindi.

Tahlil va natijalar. O' zbekistonda oliy ta'lim muassasalari boshqaruvi kengashlarining faoliyatini tahlil qilish ularning vazifalarini bir nechta funksional yo' nalishlarga ajratish imkonini beradi.

Strategik rivojlanishni belgilash va muvofiqlashtirish. Boshqaruv kengashining muhim vazifalaridan biri oliy ta'lim muassasasining uzoq muddatli rivojlanish yo' nalishlarini muhokama qilish va strategik maqsadlarni institutsional imkoniyatlar bilan muvofiqlashtirishdan iborat.

Strategik vazifaning pedagogik mazmuni shundaki, universitet rivojlanishi faqat yangi binolar qurish, moliyaviy ko' rsatkichlarni yaxshilash yoki talabalar sonini oshirish bilan chegaralanmasligi kerak. Strategik qarorlarda ta'lim dasturlarining rivojlanishi, professor-o' qituvchilar salohiyati, ilmiy faoliyat, talabalar uchun yaratiladigan akademik imkoniyatlar va ta'lim natijalari ustuvor yo' nalish sifatida namoyon bo' lishi lozim.

Ta'lim sifatini ta'minlashdagi ishtirok. Boshqaruv kengashining pedagogik ahamiyati, avvalo, uning ta'lim sifatini oshirishga yo' naltirilgan qarorlar qabul qilishdagi ishtirokida namoyon bo' ladi. Bunda kengash o' quv mashg' ulotlarini bevosita tashkil etuvchi tuzilma emas, balki sifatli ta'lim uchun zarur institutsional sharoitlarning yaratilishiga ta'sir qiluvchi boshqaruv subyekti sifatida faoliyat ko' rsatadi.

Ta'lim sifati bilan bog' liq vazifalar o' quv dasturlarini takomillashtirish uchun sharoit yaratish, professor-o' qituvchilarning kasbiy rivojlanishini qo' llab-quvvatlash, zamonaviy ta'lim infratuzilmasini rivojlantirish va ta'lim natijalarini monitoring qilish bilan bog' lanishi mumkin.

Moliyaviy va moddiy resurslardan samarali foydalanishga ko' maklashish. Ta'lim sifatining barqarorligi tegishli resurs bazasi bilan bevosita bog' liq. Zamonaviy auditoriyalar, laboratoriyalar, axborot-resurs markazlari, raqamli platformalar va ilmiy infratuzilma pedagogik jarayonning moddiy asosini tashkil qiladi.

Shu sababli boshqaruv kengashining resurslardan foydalanish samaradorligiga oid faoliyatini pedagogik jarayondan ajratib bo' lmaydi. Moliyaviy ustuvorliklarni belgilashda ta'lim va ilmiy faoliyat ehtiyojlarini hisobga olish kengash qarorlarining pedagogik yo' naltirilganligini ta'minlaydi.

Inson resurslari va professor-o' qituvchilar salohiyatini qo' llab-quvvatlash. Oliy ta'lim sifatini belgilovchi asosiy omillardan biri professor-o' qituvchilarning ilmiy-pedagogik salohiyatidir. Shu bois boshqaruv kengashi faoliyatida inson kapitalini rivojlantirish masalasi strategik ahamiyat kasb etadi.

Bunda pedagoglarning malakasini oshirish, ilmiy faoliyatini rag' batlantirish, xorijiy tajribani o' rganish imkoniyatlarini kengaytirish, yosh pedagoglarni qo' llab-quvvatlash va samarali mehnat uchun tegishli institutsional sharoit yaratish muhim yo' nalishlarni tashkil qiladi.

Manfaatdor tomonlar bilan hamkorlikni rivojlantirish. Boshqaruv kengashi oliy ta'lim muassasasining ichki akademik muhiti va tashqi ijtimoiy-iqtisodiy muhit o' rtasidagi institutsional bog' lovchi mexanizmlardan biri bo' lishi mumkin.

Ish beruvchilar, soha mutaxassislari, bitiruvchilar va boshqa hamkorlarning kengash faoliyatidagi ishtiroki mehnat bozoridagi o' zgarishlarni universitet boshqaruviga yetkazish imkonini beradi. Bu esa ta'lim dasturlarini takomillashtirish, amaliy tayyorgarlikni kuchaytirish va bitiruvchilarning kasbiy kompetensiyalarini rivojlantirish uchun muhim axborot manbai vazifasini bajaradi.

Monitoring va hisobdorlikni ta'minlash. Boshqaruv kengashining yana bir muhim funksional yo' nalishi qabul qilingan strategik qarorlarning bajarilishi va erishilgan natijalarni kuzatib borish bilan bog' liq.

Bunda monitoringning maqsadi kamchiliklarni aniqlash bilangina cheklanmasligi kerak. Monitoring natijalari yangi boshqaruv qarorlarini shakllantirish, mavjud dasturlarga tuzatish kiritish va resurslarni qayta yo' naltirish uchun asos bo' lishi lozim.

Shu nuqtai nazardan kengash faoliyatining samarali modeli quyidagi sikl asosida namoyon bo' ladi:

Muammoni aniqlash →kengash muhokamasi →qaror qabul qilish →mas'ullar va resurslarni belgilash →ijroni ta'minlash →natijani monitoring qilish →kengashda qayta ko' rib chiqish.

Mazkur sikl boshqaruv kengashining faqat maslahat beruvchi organ sifatida emas, balki qarorlarning natijadorligini kuzatishga yo' naltirilgan kollegial boshqaruv instituti sifatida rivojlanishi zarurligini ko' rsatadi.

Tahlil asosida boshqaruv kengashining vakolatlarini uchta funksional darajaga ajratish mumkin.

Birinchisi – **strategik vakolatlar** bo' lib, ular universitetning uzoq muddatli rivojlanishi, ustuvor yo' nalishlari va institutsional maqsadlari bilan bog' liq.

Ikkinchisi – **muvofiqlashtiruvchi vakolatlar** bo' lib, ta'lim, ilmiy faoliyat, resurslar va manfaatdor tomonlarning ehtiyojlarini umumiy rivojlanish maqsadlari doirasida uyg' unlashtirishni nazarda tutadi.

Uchinchisi – **monitoring va nazorat vakolatlari** bo' lib, qabul qilingan qarorlar ijrosi, resurslardan foydalanish va belgilangan natijalarga erishish holatini kuzatishni qamrab oladi.

Mazkur tasnifdan kelib chiqib, boshqaruv kengashining pedagogik funksiyasini quyidagicha ifodalash mumkin:

Boshqaruv kengashining pedagogik funksiyasi – oliy ta'lim muassasasining strategik, moddiy, inson va tashkiliy imkoniyatlarini sifatli ta'lim uchun zarur shart-sharoitlarni yaratishga yo' naltirish hamda erishilgan ta'lim natijalarini boshqaruv qarorlari bilan o' zaro bog' lashdan iborat.

Bunday yondashuv kengash faoliyatining samaradorligini faqat o‘ tkazilgan yig‘ ilishlar yoki qabul qilingan qarorlar soni bilan baholash yetarli emasligini ko‘ rsatadi. Asosiy mezon qabul qilingan qarorlarning universitet faoliyati va, ayniqsa, ta’lim jarayonida qanday sifat o‘ zgarishlarini yuzaga keltirganligi bo‘ lishi kerak.

Xulosa va takliflar.O‘ zbekistonda oliy ta’lim muassasalari boshqaruvi kengashlarining rivojlanishi universitet boshqaruvining kollegialligi, institutsional javobgarligi va strategik yo‘ naltirilganligini kuchaytirishga xizmat qiluvchi muhim jarayon hisoblanadi. Boshqaruv kengashi universitet rahbariyatining kundalik ijro funksiyalarini takrorlovchi tuzilma emas, balki muassasaning rivojlanish istiqbollarini muhokama qilish, resurslar va ustuvorliklar o‘ rtasidagi muvozanatni ta’minlash hamda natijalarni monitoring qilishga yo‘ naltirilgan institutsional mexanizm sifatida faoliyat yuritishi maqsadga muvofiq.

Tahlil natijalari boshqaruv kengashlarining vakolatlari strategik, muvofiqlashtiruvchi hamda monitoring-nazorat yo‘ nalishlarini qamrab olishini ko‘ rsatadi. Ushbu vakolatlarning ta’lim sifatiga ta’siri esa strategik qarorlarning pedagogik jarayon uchun real sharoitlarga aylanish darajasi bilan belgilanadi.

Shundan kelib chiqib quyidagi takliflarni ilgari surish mumkin:

1. **Boshqaruv kengashi vakolatlari va ijro rahbariyati vazifalari o‘ rtasidagi chegaralarni aniqlashtirish.** Kengashning strategik va nazorat funksiyalari bilan rektoratning operativ boshqaruv funksiyalari o‘ zaro takrorlanmasligi lozim.
2. **Kengash faoliyatida ta’lim sifati masalalarining ulushini oshirish.** Yig‘ ilishlarda moliyaviy va xo‘ jalik masalalari bilan bir qatorda ta’lim natijalari, o‘ quv dasturlari sifati, talabalar qoniqishi va professor-o‘ qituvchilar rivojlanishi muntazam muhokama qilinishi zarur.
3. **Qarorlar ijrosini kuzatishning natijaga asoslangan mexanizmini joriy etish.** Har bir muhim qaror bo‘ yicha mas’ul subyekt, amalga oshirish muddati va natijani baholash indikatori belgilanishi maqsadga muvofiq.
4. **Kengash tarkibida manfaatdor tomonlarning mazmunli ishtirokini ta’minlash.** Ish beruvchilar, soha ekspertlari, professor-o‘ qituvchilar, bitiruvchilar va zarur hollarda talabalar vakillarining fikrlaridan strategik qarorlarni ishlab chiqishda foydalanish zarur.
5. **Boshqaruv kengashi faoliyatini baholash mezonlarini ishlab chiqish.** Bunda yig‘ ilishlar sonidan ko‘ ra qabul qilingan qarorlarning ta’lim sifati, resurslardan foydalanish, professor-o‘ qituvchilar salohiyati va universitetning strategik rivojlanishiga ta’siri ustuvor mezon sifatida olinishi kerak.
6. **Kengash qarorlari va ta’lim sifati ko‘ rsatkichlari o‘ rtasida qayta aloqa mexanizmini shakllantirish.** Monitoring natijalari keyingi kengash yig‘ ilishlarida muhokama qilinib, zarur hollarda strategik qarorlarga tuzatishlar kiritilishi lozim.

Umuman olganda, O‘ zbekistonda oliy ta’lim muassasalari boshqaruvi kengashlarining samaradorligini oshirish ularning vakolatlarini kengaytirish bilangina emas, balki ushbu vakolatlarni aniq vazifalar, o‘ lchanadigan natijalar va ta’lim sifati bilan bog‘ lash orqali ta’minlanadi. Boshqaruv kengashining strategik qarorlari pedagogik jarayonning real ehtiyojlariga yo‘ naltirilgan taqdirdagina kollegial boshqaruv oliy ta’lim sifatini rivojlantirishning samarali institutsional mexanizmiga aylanishi mumkin.

МЕЖКУЛЬТУРНАЯ КОММУНИКАЦИЯ В СОВРЕМЕННОМ ОБРАЗОВАТЕЛЬНОМ ПРОСТРАНСТВЕ: ТРАНСФОРМАЦИЯ ФОРМ, БАРЬЕРОВ И СТРАТЕГИЙ ВЗАИМОДЕЙСТВИЯ

Камалова Кадрия Фёдоровна
кандидат педагогических наук, и. о. профессора
кафедры русского языка и литературы
Наманганского государственного института иностранных языков
имени Исхокхона Ибрата

Аннотация: *В статье рассматривается трансформация межкультурной коммуникации в современном образовательном пространстве под влиянием интернационализации образования и развития цифровых технологий. Анализируются очные, цифровые и гибридные формы взаимодействия, а также языковые, социокультурные, интерпретационные и цифровые коммуникативные барьеры. Особое внимание уделяется педагогическим стратегиям формирования межкультурной коммуникативной компетентности студентов посредством анализа проблемных ситуаций, виртуального обмена, международных проектов и рефлексивных заданий. Обосновывается переход от передачи знаний о другой культуре к приобретению практического опыта межкультурного взаимодействия.*

Ключевые слова: *межкультурная коммуникация, образовательное пространство, межкультурная компетентность, коммуникативные барьеры, цифровая коммуникация, виртуальный обмен, академическая мобильность, стратегии взаимодействия, рефлексия.*

ZAMONAVIY TA’LIM MAKONIDA MADANIYATLARARO KOMMUNIKATSIYA: O‘ ZARO HAMKORLIK SHAKLLARI, TO‘ SIQLARI VA STRATEGIYALARINING TRANSFORMATSIYASI

Annotatsiya: *Maqolada ta’limning internatsionallashuvi va raqamli texnologiyalarning rivojlanishi ta’sirida zamonaviy ta’lim makonida madaniyatlararo kommunikatsiyaning transformatsiyasi ko‘ rib chiqiladi. O‘ zaro hamkorlikning an’anaviy (yuzma-yuz), raqamli va gibrid shakllari, shuningdek, lisoniy, sotsiomadaniy, interpretatsion va raqamli kommunikativ to‘ siqlar tahlil qilinadi. Muammoli vaziyatlarni tahlil qilish, virtual almashinuv, xalqaro loyihalar va refleksiv topshiriqlar vositasida talabalarning madaniyatlararo kommunikativ kompetentligini shakllantirishga qaratilgan pedagogik strategiyalarga alohida e’tibor qaratiladi. Boshqa madaniyat haqidagi bilimlarni yetkazishdan madaniyatlararo o‘ zaro hamkorlikning amaliy tajribasini egallashga o‘ tish zarurati asoslab beriladi.*

Kalit so‘ zlar: *madaniyatlararo kommunikatsiya, ta’lim makoni, madaniyatlararo kompetentlik, kommunikativ to‘ siqlar, raqamli kommunikatsiya, virtual almashinuv, akademik mobillik, o‘ zaro hamkorlik strategiyalari, refleksiya.*

INTERCULTURAL COMMUNICATION IN THE CONTEMPORARY EDUCATIONAL SPACE: TRANSFORMATION OF FORMS, BARRIERS, AND INTERACTION STRATEGIES

Abstract: *The article examines the transformation of intercultural communication in the contemporary educational space under the influence of the internationalization of education and the development of digital technologies. Face-to-face, digital, and hybrid forms of interaction are analyzed, along with linguistic, sociocultural, interpretative, and digital communication barriers. Particular attention is paid to pedagogical strategies for developing students’ intercultural communicative competence through the analysis of problem situations, virtual exchange, international projects, and reflective tasks. The article substantiates the need to move from transmitting knowledge about other cultures to acquiring practical experience of intercultural interaction.*

Keywords: *intercultural communication, educational space, intercultural competence, communication barriers, digital communication, virtual exchange, academic mobility, interaction strategies, reflection.*

ВВЕДЕНИЕ

Современное образовательное пространство становится всё более открытым для межкультурного взаимодействия. Академическая мобильность, международные образовательные программы, совместные научные проекты, сетевое сотрудничество университетов, видеоконференции и цифровые платформы значительно

расширяют возможности непосредственного и опосредованного общения представителей различных языков и культур. В этих условиях межкультурная коммуникация перестаёт быть эпизодической ситуацией, возникающей преимущественно при поездке в другую страну, и становится повседневной составляющей образовательной и профессиональной деятельности.

Актуальность данной проблемы подтверждается современными исследованиями высшего образования. N. Guillén-Yparrea и M. S. Ramírez-Montoya отмечают значимость межкультурных компетенций в условиях расширения международного, виртуального и коллаборативного взаимодействия студентов [6]. Межкультурная компетентность при этом всё чаще понимается не как сумма отдельных сведений о другой культуре, а как способность личности продуктивно действовать в культурно неоднородной коммуникативной среде.

Проблема межкультурного взаимодействия рассматривалась нами ранее применительно к культурной обусловленности коммуникации, формам межкультурного общения и причинам возникновения коммуникативных барьеров [1]. Однако произошедшие за последние годы изменения образовательной среды требуют развития данного направления. Непосредственное общение всё активнее дополняется цифровыми и гибридными формами взаимодействия, а традиционные языковые и социокультурные барьеры сочетаются с новыми интерпретационными трудностями.

Сегодня студент может ежедневно взаимодействовать с представителями другой культуры, физически не покидая своей страны. Он участвует в международном вебинаре, выполняет совместное задание с зарубежным партнёром, обсуждает проект в мессенджере, получает комментарий преподавателя во время видеоконференции. В каждой из этих ситуаций он сталкивается не только с языковыми, но и с интерпретационными задачами.

Представим обычную ситуацию. Участник международного студенческого проекта предлагает заранее распределить обязанности, определить точные сроки и практически не изменять утверждённый план. Другой студент предпочитает обсуждать решения по мере выполнения работы и считает допустимой корректировку первоначальных договорённостей. Первый может воспринимать партнёра как недостаточно организованного, второй - первого как чрезмерно формального и негибкого. Между тем проблема может заключаться не в личностных качествах участников, а в несовпадении привычных моделей организации совместной деятельности.

Именно способность не торопиться с оценкой, видеть несколько возможных объяснений поведения партнёра и при необходимости изменять собственную коммуникативную стратегию становится важным показателем межкультурной компетентности.

Цель исследования - выявить основные направления трансформации межкультурной коммуникации в современном образовательном пространстве, систематизировать возникающие коммуникативные барьеры и определить педагогические стратегии формирования межкультурной коммуникативной компетентности студентов.

Научная новизна исследования заключается в рассмотрении межкультурного коммуникативного барьера не только как препятствия, требующего устранения, но и как потенциальной точки межкультурной рефлексии, запускающей переосмысление первоначальной интерпретации поведения партнёра. Кроме того, традиционная модель адаптации дополняется идеей совместного конструирования коммуникативной нормы, при которой участники разных культур согласовывают приемлемые для совместной деятельности правила взаимодействия.

МАТЕРИАЛЫ И МЕТОДЫ ИССЛЕДОВАНИЯ

Методологическую основу исследования составили коммуникативно-деятельностный, компетентностный, межкультурный и рефлексивный подходы. Использовались методы теоретического анализа современных отечественных и зарубежных исследований, сравнительно-сопоставительного анализа традиционных и цифровых форм межкультурного взаимодействия, классификации коммуникативных барьеров, педагогического моделирования и интерпретации типичных ситуаций образовательной коммуникации. При анализе учитывались исследования межкультурной коммуникативной компетентности студентов, академической мобильности, телесотрудничества, виртуального обмена и цифрового образовательного взаимодействия. Особое внимание уделялось работам, в которых межкультурная компетентность рассматривается не как статический набор сведений, а как развивающаяся способность личности действовать в изменяющихся коммуникативных обстоятельствах.

Y. Hang и X. Zhang на основании систематического обзора предлагают рассматривать развитие межкультурной компетентности студентов как процесс последовательных переходов и изменений, а не как однократно достигнутое состояние [7]. Такой подход представляется принципиально важным для педагогической интерпретации: студент не просто «получает» межкультурную компетентность, а постепенно изменяет способы восприятия, интерпретации и организации взаимодействия.

МЕЖКУЛЬТУРНАЯ КОММУНИКАЦИЯ: ОТ ЗНАНИЯ ДРУГОЙ КУЛЬТУРЫ К ИНТЕРПРЕТАЦИИ СИТУАЦИИ

В широком понимании межкультурная коммуникация представляет собой взаимодействие участников, культурно обусловленный опыт которых оказывает влияние на создание, передачу и интерпретацию сообщения.

Однако само наличие культурных различий ещё не означает неизбежного непонимания. Культурное различие становится коммуникативно значимым тогда, когда влияет на ожидания участников, понимание намерений собеседника и оценку его поведения. Существенное значение в данном контексте приобретает коммуникативная направленность обучения. В одной из ранее опубликованных работ была обоснована необходимость такой организации обучения, при которой языковые знания реализуются непосредственно в речевой деятельности и моделируемых коммуникативных ситуациях [2]. В межкультурном образовательном пространстве этот принцип получает дальнейшее развитие: студенту необходимо не только грамотно построить высказывание, но и соотнести его с адресатом, коммуникативным намерением, конкретной ситуацией и возможными культурно обусловленными способами интерпретации.

В этом заключается существенное отличие знания культуры от межкультурной компетентности. Студент может знать национальные праздники, традиции, нормы этикета и исторические факты, но оказаться неподготовленным к конкретной ситуации, в которой поведение партнёра не соответствует его ожиданиям.

Рассмотрим пример. Студент привык демонстрировать уважение к преподавателю внимательным слушанием и отсутствием публичных возражений. Во время обучения в другой академической среде он оказывается на занятии, где преподаватель ожидает вопросов, дискуссии и аргументированного несогласия. Студент молчит, считая такое поведение корректным. Преподаватель, напротив, может воспринять его молчание как недостаточную подготовленность или отсутствие заинтересованности.

Возможна и обратная ситуация: студент, привыкший свободно вступать в дискуссию, попадает в среду, где публичное возражение преподавателю предполагает более осторожную речевую форму.

В обоих случаях проблема возникает не потому, что кто-либо из участников не знает правил языка. Причиной становится несовпадение интерпретаций одного и того же коммуникативного действия. E. Gutiérrez-Santiuste и M. Ritacco-Real рассматривают межкультурную коммуникативную компетентность через взаимосвязь когнитивного, аффективного и поведенческого измерений и показывают значение реального взаимодействия участников телесотрудничества для её развития [8]. Такой подход позволяет отказаться от сведения межкультурной компетентности исключительно к знаниям о другой стране или культуре.

Применительно к современному образовательному пространству межкультурную коммуникативную компетентность целесообразно понимать как интегративную способность личности распознавать культурно обусловленные особенности коммуникативной ситуации, интерпретировать позицию партнёра, соотносить её с собственной системой культурных координат, выбирать адекватную стратегию взаимодействия и корректировать её на основе обратной связи.

При таком подходе меняется и основной педагогический вопрос. Вместо вопроса «Что студент знает о другой культуре?» более значимым становится другой: «Как студент действует в ситуации культурной и коммуникативной неоднозначности?»

ТРАНСФОРМАЦИЯ ФОРМ МЕЖКУЛЬТУРНОЙ КОММУНИКАЦИИ

В современном образовании можно выделить три взаимосвязанные формы межкультурного взаимодействия: непосредственную, цифровую и гибридную.

Непосредственная коммуникация традиционно реализуется во время академической мобильности, международной конференции, стажировки, совместного обучения, культурно-образовательного мероприятия. Её существенным преимуществом является наличие относительно полного коммуникативного контекста: участник слышит интонацию, наблюдает мимику и жесты, видит непосредственную реакцию собеседника и может быстро уточнить непонятное.

Цифровая коммуникация значительно расширяет пространство взаимодействия, одновременно изменяя его условия. F. Helm характеризует виртуальный обмен как образовательный подход, объединяющий с помощью технологий географически и культурно удалённых участников в продолжительном онлайн-взаимодействии [9]. При этом выделяются сравнительный, проблемно-ориентированный и диалогический подходы к его организации. Для межкультурного образования особенно существенен диалогический потенциал виртуального обмена: студент не просто получает информацию о другой культуре, а вступает в непосредственное взаимодействие с её представителем.

Особую значимость проблема интерпретации приобретает в условиях двуязычия. Ранее при рассмотрении коммуникативного метода в узбекско-русской билингвальной среде была показана необходимость перехода от усвоения языкового материала к его практическому использованию в реальных речевых ситуациях [3]. В межкультурной коммуникации данное положение приобретает дополнительное значение: успешность

взаимодействия определяется не только языковой правильностью высказывания, но и способностью распознавать его прагматическое содержание, учитывать позицию партнёра и при необходимости изменять речевую стратегию.

Рассмотрим простую ситуацию цифрового взаимодействия. Студент отправляет зарубежному партнёру подготовленный материал для совместного проекта и получает ответ: **«ОК».**

С информационной точки зрения коммуникация состоялась: материал получен. Однако отправитель может интерпретировать краткость ответа как недовольство или холодность: «Я долго готовил материал, а мне ответили только одним словом». Для партнёра же «ОК» могло означать исключительно: «Получил, всё понятно».

Коммуникативное затруднение в данном случае возникает не в содержании сообщения, а в приписываемом ему отношении. Подобная неоднозначность характерна и для электронной переписки. Фраза «Пришлите материал до пятницы» для одного участника является нейтральной деловой формой, а для другого может звучать категорично. Напротив, формулировка «Не могли бы Вы прислать материал до пятницы?» одним коммуникантом воспринимается как вежливая просьба, другим - как указание на необязательность действия.

Следовательно, грамматически правильное сообщение не всегда является прагматически однозначным. Особые трудности возникают при видеокоммуникации. Например, после вопроса преподавателя иностранный студент делает паузу в несколько секунд. Она может восприниматься как отсутствие ответа или неуверенность. Однако пауза способна быть связана с необходимостью сформулировать мысль на неродном языке, привычкой не перебивать собеседника или технической задержкой связи.

Не менее неоднозначна ситуация с выключенной камерой. Преподаватель может увидеть в этом недостаточную вовлечённость. Однако причиной могут быть технические ограничения, домашние условия, психологический дискомфорт или иное понимание границ приватности.

Таким образом, цифровая среда создаёт своеобразный парадокс: она увеличивает количество межкультурных контактов, одновременно сокращая часть контекстуальных сигналов, необходимых для их интерпретации.

Гибридная коммуникация объединяет непосредственное и цифровое взаимодействие. Например, знакомство участников международного проекта начинается онлайн, затем продолжается во время очной академической программы, а после возвращения студентов в свои страны вновь переходит в цифровую среду.Межкультурный контакт в данном случае перестаёт быть единичным событием и становится продолжительным процессом.

Трансформация коммуникативных барьеров. Расширение форм общения закономерно приводит к усложнению системы коммуникативных барьеров. Наряду с традиционным языковым барьером особое значение приобретают социокультурный, стереотипный, интерпретационный и цифровой барьеры.

Языковой барьер наиболее очевиден при недостаточном владении языком общения. Однако значительно сложнее ситуации, когда участники понимают значение слов, но по-разному интерпретируют намерение.

Например: - Вы согласны с этим предложением?

- В принципе, это интересный вариант.

Вторая реплика может означать положительную оценку, осторожное несогласие или желание продолжить обсуждение. Участник, ориентированный исключительно на буквальное содержание, способен принять её за согласие.

Следовательно, языковая подготовка к межкультурной коммуникации должна включать не только лексико-грамматическую правильность, но и прагматическую интерпретацию высказывания.

Социокультурный барьер возникает при несовпадении норм и ожиданий. Международная студенческая группа договаривается начать онлайн-встречу в 15.00. Часть участников подключается заранее, один студент появляется в 15.07. Для одних семь минут означают нарушение договорённости, для другого - допустимое отклонение.

Если ситуация немедленно объясняется личностными качествами - «безответственность», «неуважение», - вероятность конфликта возрастает. Если же группа обсуждает различия и устанавливает собственное правило, культурное несовпадение становится предметом переговоров.

Стереотипный барьер возникает, когда единичный коммуникативный опыт переносится на всю культурную группу. Встретившись с одним сдержанным собеседником, студент может сформулировать вывод: «представители этой культуры холодны». Последующее общение уже будет интерпретироваться через готовую схему.

Именно поэтому перечисление преподавателем якобы неизменных «черт национального характера» не всегда способствует развитию межкультурной компетентности и при некритическом использовании способно, напротив, укреплять стереотипные представления.

Интерпретационный барьер, на наш взгляд, приобретает особое значение в современном образовательном пространстве. Во время обсуждения проекта студент говорит: «Я бы сделал эту часть немного иначе».

Для одного участника это приглашение к дискуссии. Другой слышит критику выполненной работы. Третий воспринимает реплику как смягчённое выражение несогласия. Коммуникативный факт один, однако его значения конструируются участниками по-разному.

Цифровой барьер связан не только с доступом к технологиям. В межкультурной коммуникации особую роль играют различия в интерпретации скорости ответа, длины сообщения, эмодзи, знаков препинания, голосовых сообщений, статуса «прочитано», использования камеры.

Например, студент видит, что партнёр прочитал сообщение, но несколько часов не отвечает. Возникает соблазн заполнить информационный пробел собственным объяснением: «игнорирует», «не заинтересован», «недоволен». В действительности причина может вообще не иметь отношения к межличностной оценке. Поэтому цифровая межкультурная компетентность предполагает способность выдерживать определённую степень коммуникативной неопределённости и не подменять отсутствующую информацию поспешной интерпретацией.

R. Zhou, A. Samad и T. Perinpasingam связывают развитие межкультурной коммуникативной компетентности с языковой подготовкой, межкультурной осведомлённостью, критическим мышлением и коммуникативными способностями обучающихся [10]. Это подтверждает необходимость комплексного подхода: преодолеть межкультурный барьер одним только увеличением объёма страноведческой информации невозможно.

От коммуникативного барьера к межкультурной рефлексии.

Традиционно коммуникативный барьер рассматривается как негативное явление, которое следует предупредить или устранить. Представляется целесообразным дополнить данный взгляд: в педагогически организованной среде коммуникативное затруднение способно стать ресурсом развития межкультурной компетентности.

Изменение характера образовательной коммуникации непосредственно связано и с цифровой трансформацией обучения. В ранее проведённом исследовании моделей смешанного обучения было показано, что цифровая образовательная среда расширяет возможности организации речевой и интерпретационной деятельности обучающихся [5]. В контексте межкультурной коммуникации это положение позволяет сделать следующий шаг: цифровая среда выступает не только каналом передачи информации, но и пространством интерпретации, в котором студент учится распознавать коммуникативную неоднозначность, проверять первоначальные предположения и корректировать собственную стратегию взаимодействия.

Рассмотрим ситуацию. Студент говорит преподавателю: «Вы неправильно объяснили задание».

С точки зрения грамматики фраза правильна. Коммуникативное намерение также может быть конструктивным: студент хочет сообщить, что не понял условие. Однако категорическая оценка действий преподавателя в определённой академической среде может восприниматься как нарушение статусной дистанции. Предложим другие варианты:

«Я не совсем понял задание. Не могли бы Вы ещё раз пояснить этот момент?»

«Правильно ли я понял, что необходимо…?»

«Возможно, я неправильно понял условие. Можно уточнить…?»

Задача студентов заключается не в механическом выборе «самой вежливой» реплики, а в определении того, как изменение языковой формы перестраивает отношения участников общения.

Другой пример: - Вы сможете выступить первым?

- Наверное, сегодня это будет немного сложно.

Является ли вторая реплика отказом? Просьбой дать время?

Предложением изменить порядок выступлений?

Вместо требования угадать единственно правильный ответ целесообразно предложить студенту найти несколько интерпретаций и сформулировать корректный уточняющий вопрос. На основании такого анализа предлагаем следующую модель:

коммуникативная ситуация → первичная интерпретация → альтернативные объяснения → уточнение →выбор стратегии →обратная связь →рефлексия.

Центральным звеном является переход от первой интерпретации к альтернативным объяснениям. Именно здесь возникает точка межкультурной рефлексии - момент, когда участник перестаёт воспринимать собственное объяснение как единственно возможное и начинает рассматривать коммуникативную ситуацию с позиции другого человека.

Академическая мобильность как пространство межкультурного опыта. Академическая мобильность создаёт благоприятные условия для развития межкультурной компетентности, поскольку студент оказывается

внутри реального образовательного и социокультурного пространства. Однако сама поездка ещё не гарантирует развития соответствующих способностей.

Студент может провести несколько месяцев за рубежом, преимущественно общаясь с соотечественниками, и вернуться с большим количеством впечатлений, но с минимальными изменениями способов понимания другой культуры. И наоборот, сравнительно непродолжительная программа может стать значимым опытом, если возникающие коммуникативные ситуации становятся предметом осмысленной рефлексии.

Например, в первые дни обучения студент замечает, что преподаватель предлагает обращаться к нему менее формально, чем принято в привычной академической среде. Первоначальная интерпретация может быть следующей: «здесь практически отсутствует дистанция между преподавателем и студентом».

Позднее выясняется, что менее формальная форма обращения сочетается с высокой академической требовательностью и ответственностью.

Значимым результатом становится не сам факт обнаружения различия, а изменение первоначального объяснения. Для сопровождения академической мобильности может использоваться рефлексивный дневник межкультурных наблюдений:

Ситуация	**Первая интерпретация**	**Другие возможные причины**	**Что выяснилось**	**Что изменилось в моём понимании**
Студенты открыто возражают преподавателю	Недостаток уважения	Иная норма академической дискуссии	Преподаватель сам стимулирует обсуждение	Несогласие может быть проявлением академической активности
Партнёр долго не отвечает на сообщение	Игнорирование	Занятость, иная норма цифровой доступности	Ответ поступил позднее с объяснением	Скорость ответа не всегда выражает отношение
Участник изменяет первоначальный план	Безответственность	Гибкая модель планирования	Изменение улучшило результат	Корректировка плана не обязательно означает нарушение обязательств
Участник изменяет первоначальный план	Безответственность	Гибкая модель планирования	Изменение улучшило результат	Корректировка плана не обязательно означает нарушение обязательств

Такой дневник превращает бытовое впечатление в материал для анализа и позволяет студенту увидеть изменение собственной интерпретационной позиции.

Виртуальный обмен и межкультурное взаимодействие. Одним из перспективных направлений интернационализации образования становится виртуальный обмен. Его принципиальное отличие от обычного использования цифровых ресурсов состоит в том, что студент взаимодействует не с информацией о другой культуре, а с реальным человеком, представляющим иной языковой и культурный опыт.

Вопросы взаимосвязи языкового обучения, двуязычия, цифровых технологий и коммуникации рассматривались нами ранее применительно к преподаванию русского языка [4]. Проведённый анализ показал расширение возможностей речевой практики обучающихся в цифровой среде. В межкультурном аспекте это положение приобретает новое содержание: цифровой формат требует не только передачи сообщения, но и интерпретации коммуникативного намерения партнёра в условиях частичного сокращения невербального и ситуационного контекста.

Исследование E. Gutiérrez-Santiuste и M. Ritacco-Real демонстрирует возможности телесотрудничества для развития поведенческих, аффективных и когнитивных компонентов межкультурной коммуникативной

компетентности [8]. F. Helm, в свою очередь, обращает внимание на то, что образовательный результат виртуального обмена зависит от педагогического дизайна взаимодействия и от того, каким образом в нём актуализируется культурная проблематика [9].

Само подключение двух групп студентов к видеоконференции ещё не создаёт полноценного межкультурного обучения. Если участники лишь по очереди рассказывают о национальных праздниках, кухне или достопримечательностях, взаимодействие может остаться на уровне обмена информацией. Иная ситуация возникает, когда студентам предлагается решить общую проблему.

Например, смешанная международная группа должна разработать правила цифрового общения для совместного проекта. Сразу обнаруживаются вопросы: Как быстро необходимо отвечать на сообщение?

Допустимо ли писать преподавателю вечером?

Обязательно ли включать камеру?

Можно ли использовать голосовые сообщения?

Как выражать несогласие?

Кто принимает окончательное решение?

Теперь культура проявляется не как заранее подготовленный рассказ, а в процессе реального согласования поведения. Именно такие ситуации обладают высоким образовательным потенциалом.

Педагогические стратегии формирования межкультурной компетентности. Современная подготовка к межкультурному взаимодействию должна создавать условия, в которых студент не только получает информацию, но и учится действовать в ситуации неоднозначности. Одной из продуктивных стратегий является анализ межкультурного кейса.

Кейс 1. «Молчание после вопроса»

Во время международного онлайн-занятия преподаватель задаёт студенту вопрос. Студент молчит пять-семь секунд.

Первая реакция участников обычно предполагает ограниченный набор объяснений: «не знает ответа», «не понял», «боится говорить».

Затем предлагается найти другие варианты: студент обдумывает формулировку; переводит вопрос; считает необходимым выдержать паузу; ждёт завершения реплики преподавателя; возникла техническая задержка.

Цель задания заключается не в установлении «правильной» причины, а в формировании привычки не превращать первое объяснение в окончательный вывод.

Кейс 2. «Слишком прямое сообщение»

Участник международной группы пишет партнёру: «Исправьте эту часть и отправьте мне сегодня». Студентам предлагается преобразовать сообщение для трёх адресатов: близкого партнёра по группе, нового зарубежного коллеги и преподавателя. Затем обсуждается, почему одна и та же просьба требует различного языкового оформления.

В результате становится очевидным, что коммуникативная адекватность определяется не только культурой, но и статусом, дистанцией, целью и конкретной ситуацией.

Кейс 3. «Выключенная камера»

Участник международного занятия регулярно оставляет камеру выключенной.

Задача студентов - предложить не менее пяти возможных объяснений, не используя оценок личности.

Такое простое ограничение - **сначала объяснить, потом оценивать** - формирует важную межкультурную установку.

Кейс 4. «Международная проектная группа»

Четыре участника должны подготовить совместную презентацию. Первый предлагает назначить руководителя. Второй считает, что все решения должны приниматься коллективно. Третий предлагает немедленно распределить части работы. Четвёртый хочет сначала подробно обсудить общую концепцию.

Задача группы - не определить, чья модель правильнее, а разработать пятую модель, которая позволит организовать совместную деятельность.

В таком задании проявляется принципиально важный переход - от адаптации к готовой норме к совместному созданию нормы взаимодействия.

От адаптации к совместному конструированию коммуникативной нормы. Традиционное представление о межкультурной адаптации нередко предполагает, что один участник должен изучить правила другой культуры и приспособить к ним своё поведение. Такая стратегия действительно необходима во многих ситуациях, однако современное международное образование демонстрирует и другую возможность.

В международной проектной группе ни одна сторона не обязана полностью переходить на коммуникативную модель другой.

Например, участники по-разному относятся к срокам выполнения задания. Вместо выбора одной из двух моделей они устанавливают общий окончательный срок и несколько промежуточных контрольных точек.

При различном отношении к лидерству группа может договориться о смене координатора на разных этапах проекта.

При разных представлениях о допустимой скорости ответа на сообщения участники заранее устанавливают правило: срочные вопросы отмечаются отдельно, а обычный ответ ожидается в течение определённого периода. Возникающая норма первоначально могла не принадлежать ни одной из сторон. Она создаётся в процессе взаимодействия.

Именно поэтому современная модель межкультурной коммуникации может быть выражена не только формулой: «Я понимаю Ваши правила и приспосабливаюсь к ним», но и более диалогической: «Мы осознаём различия наших правил и создаём способ взаимодействия, приемлемый для совместной деятельности».

Такое понимание особенно важно для международных образовательных проектов, виртуального обмена и академического сотрудничества.

РЕЗУЛЬТАТЫ И ОБСУЖДЕНИЕ

Проведённый анализ позволяет определить несколько взаимосвязанных направлений трансформации межкультурной коммуникации.

Первое связано с изменением **пространства взаимодействия**. Межкультурный контакт больше не ограничен физическим присутствием участников в одном месте. Он разворачивается одновременно в очной, цифровой и гибридной среде.

Второе направление связано с изменением **структуры коммуникативного барьера**. Языковые различия сохраняют значение, однако всё более заметную роль приобретают интерпретационные трудности: участники понимают слова, но неодинаково воспринимают намерение, степень категоричности, эмоциональную окраску или социальный смысл высказывания.

Третье направление - изменение отношения к **коммуникативной ошибке**. В педагогическом процессе она может рассматриваться не только как нежелательный результат, но и как диагностическая ситуация, выявляющая несовпадение интерпретационных моделей.

Четвёртое направление связано с изменением **позиции преподавателя**. Его задача выходит за пределы передачи сведений о культурных различиях. Преподаватель становится организатором межкультурного опыта: создаёт проблемную ситуацию, побуждает студентов искать несколько интерпретаций, организует уточнение и последующую рефлексию.

Пятое направление касается понимания **адаптации**. Наряду с приспособлением к существующей культурной норме современная образовательная коммуникация допускает совместное конструирование правил взаимодействия.

Обобщая результаты анализа, предлагаем следующую последовательность развития продуктивной межкультурной стратегии:

осознание различия → отказ от поспешной оценки → альтернативная интерпретация → уточнение → согласование → взаимодействие → рефлексия → корректировка стратегии.

В отличие от линейной модели передачи знаний, данная последовательность носит циклический характер. Новый межкультурный опыт способен изменить первоначальные представления студента, а сформированная стратегия вновь проверяется в последующем взаимодействии.

Таким образом, результатом межкультурного образования становится не набор готовых рецептов поведения, а интерпретационная гибкость личности. Это позволяет сформулировать основное положение исследования: современная подготовка к межкультурной коммуникации должна быть направлена не столько на запоминание перечня культурных различий, сколько на формирование способности распознавать коммуникативную неоднозначность, рассматривать несколько возможных объяснений поведения партнёра, проверять собственную интерпретацию во взаимодействии и осознанно корректировать коммуникативную стратегию.

ЗАКЛЮЧЕНИЕ

Современное образовательное пространство существенно изменяет содержание и формы межкультурной коммуникации. Интернационализация высшего образования, академическая мобильность, виртуальный обмен и цифровые технологии расширяют возможности взаимодействия представителей разных культур и одновременно создают новые коммуникативные задачи.

Проведённый анализ показывает, что традиционное понимание межкультурной подготовки преимущественно как накопления знаний о другой культуре уже недостаточно. Информация о традициях, нормах и ценностях остаётся необходимой, однако она приобретает педагогическую значимость тогда, когда помогает участнику интерпретировать конкретную ситуацию и выбирать адекватную стратегию поведения.

Наряду с языковыми и социокультурными барьерами возрастает значение интерпретационных и цифровых затруднений. Причиной коммуникативной неудачи всё чаще становится не отсутствие информации, а поспешное приписывание поведению партнёра единственного значения.

В связи с этим межкультурная коммуникативная компетентность должна рассматриваться как динамическая способность личности распознавать культурную неоднозначность, анализировать ситуацию с нескольких позиций, уточнять коммуникативное намерение партнёра, выбирать соответствующую стратегию взаимодействия и корректировать её на основе обратной связи.

Особое педагогическое значение приобретает работа с реальными и моделируемыми ситуациями межкультурного непонимания. Кейс-анализ, виртуальный обмен, международные проекты, академическая мобильность и рефлексивные задания позволяют перенести обучение из области описания культурных различий в пространство практического взаимодействия.

Одним из результатов исследования является положение о продуктивной функции коммуникативного барьера. При педагогически организованной рефлексии ситуация непонимания способна стать **точкой развития**: студент обнаруживает ограниченность первоначального объяснения, рассматривает альтернативные интерпретации и приобретает опыт изменения собственного коммуникативного поведения.

Вторым значимым положением является переход от исключительно адаптационной модели к **совместному конструированию межкультурной** коммуникативной нормы. Участники международного взаимодействия способны не только приспосабливаться к правилам друг друга, но и создавать новые согласованные способы организации совместной деятельности. Таким образом, перспективная логика межкультурного образования может быть представлена следующим образом:

- от знания о другой культуре - к пониманию;
- от понимания - к интерпретации конкретной ситуации;
- от интерпретации - к взаимодействию;
- от взаимодействия - к рефлексии;
- от рефлексии - к осознанной корректировке коммуникативной стратегии.

Именно такое движение позволяет рассматривать межкультурную коммуникацию не как дополнительный компонент языковой или профессиональной подготовки, а как значимый ресурс современного образования, обеспечивающий готовность личности к диалогу, сотрудничеству и продуктивному взаимодействию в культурно неоднородной среде.

PEDAGOGICAL

NEYROPEDAGOGIK YONDASHUV ASOSIDA ZAMONAVIY TA'LIM JARAYONINI TAKOMILLASHTIRISH

Yusupova Kamola Nuriddinovna
UBS Toshkent filiali "Ijtimoiy fanlar" kafedrasi dotsenti.
pedagogika fanlari falsafa doktori (PhD)
Q.Niyoziy nomidagi Tarbiya pedagogikasi milliy institutıı mustaqil izlanuvchisi

Annotatsiya: *Mazkur maqolada neyropedagogikaning zamonaviy ta'lim tizimidagi o' rni, mazmun-mohiyati va asosiy tamoyillari yoritilgan. Neyropedagogika inson miyasining faoliyati, kognitiv jarayonlar, emotsional holat hamda ta'lim jarayoni o' rtasidagi o' zaro bog' liqlikni o' rganib, o' qitish samaradorligini oshirishga xizmat qiluvchi ilmiy-amaliy yo' nalish sifatida tahlil qilinadi. Maqolada miyaning plastiklik xususiyati, tajriba va amaliy faoliyat asosida o' rganish, emotsional xavfsiz ta'lim muhiti, shaxsiylashtirilgan ta'lim, kognitiv va emotsional jarayonlarning uyg' unligi hamda faol o' rganish metodlarining ahamiyati ochib berilgan. Shuningdek, zamonaviy ta'limda neyrotexnologiyalar, sun'iy intellekt va neyropsixologiya yutuqlaridan foydalanish imkoniyatlari ko' rib chiqilgan. Neyropedagogikaning o' quvchilarning individual xususiyatlarini hisobga olish, ularning intellektual va ijodiy salohiyatini rivojlantirishdagi imkoniyatlari asoslab berilgan.*

Kalit so' zlar: *neyropedagogika, ta'lim, miya faoliyati, neyropsixologiya, kognitiv rivojlanish, miyaning plastiklik xususiyati, emotsional intellekt, shaxsiylashtirilgan ta'lim, faol o' rganish, neyrotexnologiyalar.*

СОВЕРШЕНСТВОВАНИЕ СОВРЕМЕННОГО ОБРАЗОВАТЕЛЬНОГО ПРОЦЕССА НА ОСНОВЕ НЕЙРОПЕДАГОГИЧЕСКОГО ПОДХОДА

Аннотация: *В данной статье освещаются роль нейропедагогики в современной системе образования, её содержание, сущность и основные принципы. Нейропедагогика рассматривается как научно-практическое направление, изучающее взаимосвязь между функционированием человеческого мозга, когнитивными процессами, эмоциональным состоянием и образовательным процессом, а также анализируются её возможности в повышении эффективности обучения. В статье раскрывается значение пластичности мозга, обучения на основе опыта и практической деятельности, создания эмоционально безопасной образовательной среды, персонализированного обучения, гармоничного сочетания когнитивных и эмоциональных процессов, а также методов активного обучения. Кроме того, рассматриваются возможности использования в современном образовании нейротехнологий, искусственного интеллекта и достижений нейропсихологии. Обосновываются возможности нейропедагогики в учёте индивидуальных особенностей обучающихся, развитии их интеллектуального и творческого потенциала.*

Ключевые слова: *нейропедагогика, образование, деятельность мозга, нейропсихология, когнитивное развитие, пластичность мозга, эмоциональный интеллект, персонализированное обучение, активное обучение, нейротехнологии.*

IMPROVING THE MODERN EDUCATIONAL PROCESS BASED ON A NEUROPEDAGOGICAL APPROACH

Abstract: *This article highlights the role of neuropedagogy in the modern education system, its content, essence, and fundamental principles. Neuropedagogy is considered as a scientific and practical field that studies the interrelationship between the functioning of the human brain, cognitive processes, emotional states, and the educational process, as well as analyzes its potential for improving the effectiveness of learning. The article reveals the importance of brain plasticity, learning through experience and practical activities, creating an emotionally safe educational environment, personalized learning, the harmonious integration of cognitive and emotional processes, and active learning methods. In addition, the possibilities of using neurotechnologies, artificial intelligence, and advances in neuropsychology in modern education are examined. The potential of neuropedagogy to take into account the individual characteristics of learners and to develop their intellectual and creative potential is substantiated.*

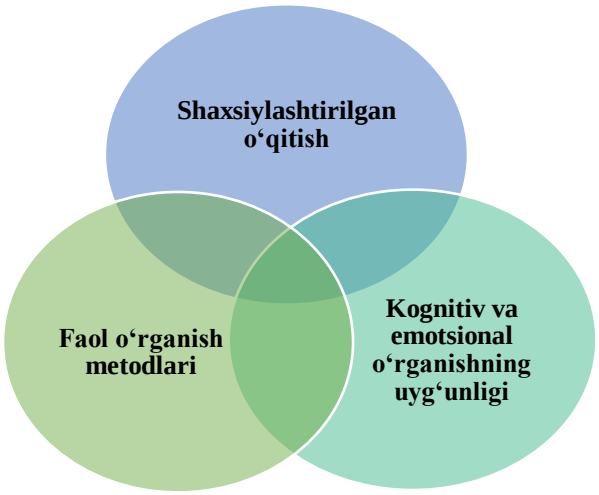
Keywords: *neuropedagogy, education, brain activity, neuropsychology, cognitive development, brain plasticity, emotional intelligence, personalized learning, active learning, neurotechnologies.*

KIRISH.

Inson ongi doimiy ravishda rivojlanishga, yangi bilimlarni egallashga va yangi imkoniyatlarni kashf etishga intiladi. Bilishga bo‘lgan ehtiyoj inson tabiatining muhim xususiyatlaridan biri bo‘lib, ta’lim jarayonining mazmuni va samaradorligini belgilovchi omillardan hisoblanadi. Shu nuqtayi nazardan, zamonaviy ta’lim jarayonini faqat bilimlarni uzatish jarayoni sifatida emas, balki inson miyasining faoliyati, psixologik holati va ijtimoiy muhit bilan uzviy bog‘liq bo‘lgan murakkab tizim sifatida ko‘rib chiqish zarur. Aynan shu ehtiyoj neyropedagogikaning dolzarbligini belgilaydi. Neyropedagogika pedagogika, psixologiya va neyrofanlar kesishmasida shakllanayotgan yo‘nalish bo‘lib, ta’lim jarayonini inson miyasining ishlash mexanizmlari va kognitiv imkoniyatlariga moslashtirishni nazarda tutadi. Mazkur yondashuv o‘quvchilarning individual xususiyatlarini hisobga olish, o‘rganish jarayonini optimallashtirish hamda ular uchun psixologik jihatdan qulay va sog‘lom ta’lim muhitini yaratishga xizmat qiladi. Bugungi kunda ta’lim tizimida sifat va samaradorlik o‘rtasidagi muvozanatni ta’minlash muhim vazifalardan biri hisoblanadi. Ayniqsa, axborot texnologiyalari sohasida umumiy ta’lim maktablari, oliy ta’lim muassasalari va qo‘shimcha ta’lim kurslari o‘rtasidagi hamkorlikni kuchaytirish zarur. Ularning o‘zaro raqobatidan ko‘ra, o‘quvchilar uchun yaxlit ta’lim ekotizimini shakllantirish va ta’lim jarayonini yagona pedagogik hamda neyropedagogik tamoyillar asosida tashkil etish muhim ahamiyat kasb etadi.

Sun’iy intellekt, neyropsixologiya va neyrotexnologiyalarning jadal rivojlanishi ham ta’limga yangi yondashuvlarni joriy etishni talab qilmoqda. Shu jihatdan neyropedagogika zamonaviy ta’limning istiqbolli yo‘nalishlaridan biri sifatida inson miyasining faoliyat mexanizmlarini chuqurroq anglash va ushbu bilimlardan ta’lim jarayonida samarali foydalanish imkonini beradi.

ASOSIY QISM. Neyropedagogikaning asosiy tamoyillari. Neyropedagogika ta’lim jarayonini inson miyasining tabiiy imkoniyatlari va funksional xususiyatlari asosida tashkil etishga yo‘naltiriladi. Ushbu yo‘nalish bir qator muhim tamoyillarga tayanadi.



Miyaning plastiklik xususiyati uning yangi tajriba va axborot ta’sirida o‘zgarishi hamda rivojlanishini anglatadi. Inson miyasi yangi bilim va ko‘nikmalarni egallash jarayonida o‘zining neyron aloqalarini qayta tashkil etishi mumkin. Shu sababli ta’lim jarayonida o‘quvchilarning individual imkoniyatlari, rivojlanish sur’ati va ehtiyojlarini hisobga olish muhimdir. Mazkur tamoyil shaxsiylashtirilgan ta’limning ilmiy asoslaridan biri sifatida qaralishi mumkin. Har bir o‘quvchining bilimni qabul qilishi, qayta ishlashi va mustahkamlashi turlicha kechishi sababli yagona standart yondashuv o‘rniga individual va differensial yondashuvlardan foydalanish ta’lim samaradorligini oshiradi.

O‘quv materiallarini amaliy faoliyat bilan bog‘lash bilimlarning chuqurroq o‘zlashtirilishiga yordam beradi. Amaliy mashg‘ulotlar, tajribalar, loyiha ishlari, muammoli vaziyatlarni hal qilish va real hayotiy topshiriqlar o‘quvchining faol ishtirokini ta’minlaydi. Faol ishtirok etish jarayonida o‘quvchi nafaqat tayyor ma’lumotni qabul qiladi, balki uni tahlil qiladi, amaliyotda qo‘llaydi va yangi xulosalar chiqaradi. Bu esa bilimlarning uzoq muddatli xotirada mustahkamlanishiga yordam beradi.[4]

Ta’lim samaradorligi o‘quvchining emotsional holati bilan ham bevosita bog‘liq. Psixologik jihatdan xavfsiz, qo‘llab-quvvatlovchi va ijobiy muhit o‘quvchilarning ta’lim jarayonidagi faolligini oshiradi. Aksincha, haddan tashqari stress, qo‘rquv va xavotir diqqatni jamlash hamda axborotni qayta ishlash jarayonlariga salbiy ta’sir ko‘rsatishi mumkin. Shu sababli o‘qituvchi nafaqat o‘quv materialining mazmuniga, balki o‘quvchilarning hissiy holatiga ham e’tibor qaratishi lozim. Emotsional intellektni rivojlantirish ham zamonaviy ta’limning muhim tarkibiy qismi hisoblanadi.

Ta’lim samaradorligini oshirishga qaratilgan neyropedagogik yondashuvlar mavjud bo‘lib qiyida ularni ko‘rib chiqamiz.

1-rasm

1-rasm: Ta'lim samaradorligini oshirishga qaratilgan neyropedagogik yondashuvlar

Shaxsiylashtirilgan o‘ qitish. Har bir insonning miyasi o‘ ziga xos individual xususiyatlarga ega. O‘ quvchilarning qiziqishlari, qobiliyatlari, bilim darajasi, o‘ rganish sur'ati va psixologik xususiyatlarini hisobga olish ta'limning individual yo‘ nalishini ta'minlaydi.

Shaxsiylashtirilgan o‘ qitish o‘ quvchining kuchli tomonlarini rivojlantirish bilan birga, undagi qiyinchiliklarni aniqlash va bartaraf etishga imkon beradi.

Kognitiv va emotsional o‘ rganishning uyg‘ unligi. Kognitiv jarayonlar va emotsional holat bir-biridan mustaqil emas. O‘ quvchining qiziqishi, motivatsiyasi, o‘ ziga bo‘ lgan ishonchi va ruhiy holati uning bilimlarni o‘ zlashtirishiga ta'sir ko‘ rsatadi. Shuning uchun zamonaviy o‘ qituvchi ta'lim jarayonida faqat bilim berish bilan cheklanmasdan, o‘ quvchilarning ijobiy emotsional holatini qo‘ llab-quvvatlashi, ularning motivatsiyasini oshirishi va ijodiy faolligi uchun qulay sharoit yaratishi lozim.

Faol o‘ rganish metodlari. Faol o‘ rganish metodlari neyropedagogikaning muhim tarkibiy qismi hisoblanadi. Amaliy mashqlar, loyiha ishlari, guruhli faoliyat, muammoli ta'lim, munozara va interaktiv metodlar o‘ quvchilarning ta'lim jarayonidagi bevosita ishtirokini ta'minlaydi. Bunday metodlar o‘ quvchining mustaqil fikrlashi, muammoni tahlil qilishi, qaror qabul qilishi va bilimlarni amaliy vaziyatlarda qo‘ llash ko‘ nikmalarini rivojlantiradi.[5,1]

ADABIYOTLAR SHARHI. Bugungi kunda axborot texnologiyalarini egallash maktab, kollej va oliy ta'lim muassasalari bitiruvchilarining mehnat bozoridagi raqobatbardoshligini ta'minlovchi muhim omillardan biridir. Shu bilan birga, zamonaviy ta'lim mazmuni texnologik ko‘ nikmalar bilan bir qatorda insonning kognitiv, emotsional va ijodiy imkoniyatlarini rivojlantirishni ham talab qilmoqda.

A.V. Tsvetkovning neyropedagogikaga oid qarashlarida bolaning rivojlanishi faqat maktab davri bilan cheklanmasligi, balki maktabgacha ta'limdan boshlab maktab, oliy va qo‘ shimcha ta'limgacha davom etuvchi uzluksiz jarayon ekanligi ta'kidlanadi. Ushbu qarash neyropedagogik yondashuvni uzluksiz ta'lim tizimining barcha bosqichlarida qo‘ llash zarurligini ko‘ rsatadi.[2]

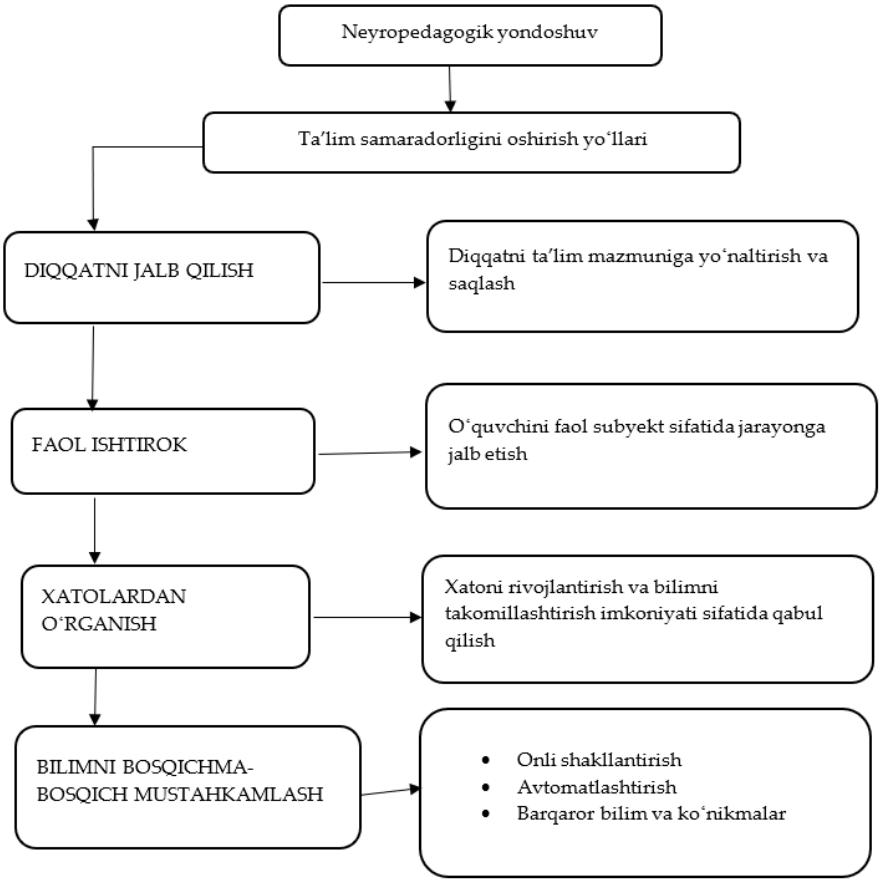
Neyrofanlar, xususan, markaziy asab tizimini o‘ rganish borasida sezilarli ilmiy yutuqlarga erishilgan bo‘ lsa-da, ushbu bilimlarni ta'lim amaliyotiga tizimli tatbiq etish masalasi hanuz dolzarb bo‘ lib qolmoqda. Neyropedagogika ko‘ pincha neyropsixologiya bilan bog‘ liq holda talqin qilinadi. Biroq uning vazifasi faqat rivojlanishida muayyan qiyinchiliklar mavjud bo‘ lgan shaxslar bilan ishlashdan iborat emas. Neyropedagogika inson miyasining faoliyati va kognitiv imkoniyatlariga asoslangan ta'lim metodlari hamda pedagogik yondashuvlarni ishlab chiqishga qaratilgan kengroq yo‘ nalish sifatida qaralishi lozim.

MUHOKAMA. Neyropedagogik yondashuv insonning ijtimoiy hayotidagi emotsional jarayonlarni ham ta'lim bilan bog‘ liq holda ko‘ rib chiqadi. Tadqiqotlarda o‘ quv materiali psixologik jihatdan qulay va qo‘ llab-quvvatlovchi muhitda taqdim etilganda uning samaraliroq o‘ zlashtirilishi ta'kidlanadi.

Emotsional intellektning rivojlanishi o‘ quvchilarning ijodiy tafakkuri, ijtimoiy moslashuvi va mustaqil fikrlash qobiliyatlari uchun muhim ahamiyatga ega. Shu sababli ta'lim jarayonida IQ bilan bir qatorda EQni rivojlantirishga ham e'tibor qaratish zarur.[3]

Neyropsixologik yondashuvlar inson miyasining axborotni bir vaqtning o‘ zida yaxlit va tarkibiy qismlar asosida qayta ishlash imkoniyatlarini ko‘ rsatadi. Shu nuqtayi nazardan, ta'lim jarayonida tahlil va sintez, umumlashtirish va aniqlashtirish usullarining uyg‘ unligidan foydalanish maqsadga muvofiq.

Ta'lim jarayonida vizual materiallardan foydalanish ham muhim ahamiyatga ega. Tasvirlar, sxemalar, diagrammalar, jadvallar, videomateriallar va boshqa ko‘ rgazmali vositalar o‘ quv ma'lumotlarini tizimlashtirish va eslab qolishni yengillashtirishi mumkin.



Neyropedagogikaning yana bir muhim jihati — o‘ quvchining individual xususiyatlarini hisobga olishdir. Har bir inson miyasi o‘ ziga xos bo‘ lganligi sababli ta'lim jarayonida barcha o‘ quvchilarga bir xil usulni qo‘ llash har doim ham kutilgan natijani bermaydi. Shuning uchun differensial va shaxsga yo‘ naltirilgan ta'lim yondashuvlaridan foydalanish maqsadga muvofiq.

Ijodkorlikni rivojlantirish uchun esa zo‘ ravonlik va ortiqcha bosimga asoslangan qat'iy muhitdan ko‘ ra, o‘ quvchi o‘ z fikrini erkin ifoda eta oladigan, xatolarini tahlil qilish orqali ulardan saboq chiqaradigan va yangi g‘ oyalarni ilgari suradigan ta'lim muhiti zarur.[1]

METODOLOGIYA. Neyropedagogik tadqiqotlarda o‘ quvchilarning individual va guruhiy munosabatlarini o‘ rganish, ularning psixologik xususiyatlarini aniqlash hamda ta'lim jarayonini ushbu xususiyatlarga moslashtirish muhim metodologik yo‘ nalishlardan hisoblanadi.

Shuningdek, o‘ qituvchilar uchun psixodiagnostik va psixokorreksion texnologiyalarni ishlab chiqish va amaliyotga joriy etish neyropedagogik yondashuvning samaradorligini oshirishi mumkin.

Neyropedagogikaning asosiy samarali tamoyillarini quyidagicha umumlashtirish mumkin:

2-rasm: Ta'lim samaradorligini oshirish yo' llari

1. **Diqqatni jalb qilish**- o' quvchining diqqatini ta'lim mazmuniga yo' naltirish va uni saqlab turish.
2. **Faol ishtirok**- o' quvchini bilimni passiv qabul qiluvchi emas, balki faol subyekt sifatida ta'lim jarayoniga jalb etish.
3. **Xatolardan o' rganish**- xatoni jazolash vositasi emas, balki bilim va ko' nikmalarni rivojlantirish imkoniyati sifatida ko' rish.
4. **Bilimni bosqichma-bosqich mustahkamlash-** dastlab bilim va ko' nikmalarni ongli ravishda shakllantirish, keyinchalik ularni avtomatlashtirish.

Mazkur tamoyillarni ta'lim amaliyotida uyg' un holda qo' llash o' quvchilarning bilish faolligini oshirish, mustaqil fikrlashini rivojlantirish va o' quv materiallarini samarali o' zlashtirishga yordam beradi.[2,4]

XULOSA.

Neyropedagogika inson miyasining o' ziga xos kognitiv imkoniyatlari va neyrofiziologik xususiyatlariga asoslangan holda ta'lim jarayonini yangi ilmiy bosqichga olib chiqish imkoniyatini beradi. Ushbu yo' nalish didaktik, psixologik va zamonaviy texnologik komponentlarning o' zaro uyg' unligini ta'minlab, ta'limning yaxlit va shaxsga yo' naltirilgan tizimini shakllantirishga xizmat qiladi.

Neyropedagogik yondashuv faqat rivojlanishida muayyan qiyinchiliklari mavjud bo' lgan o' quvchilar bilan ishlashga emas, balki har bir o' quvchining individual funksional xususiyatlarini hisobga olgan holda uning o' rganish salohiyatini to' liq ro' yobga chiqarishga yo' naltirilishi lozim.

Hozirgi bosqichda neyropedagogikani pedagogikaning dinamik rivojlanayotgan istiqbolli yo' nalishlaridan biri sifatida qarash maqsadga muvofiq. U zamonaviy ta'lim tizimining murakkab talablariga javob berish bilan birga, sun'iy intellekt, neyropsixologiya va neyrotexnologiyalar sohasidagi yangi yutuqlar bilan boyib bormoqda.

Oliy ta'lim tizimida neyropedagogika bo' yicha maxsus kurs va dasturlarni joriy etish pedagoglarning kasbiy kompetensiyasini oshirish, ta'lim jarayonini ilmiy asosda tashkil etish hamda o' quvchilarning individual imkoniyatlarini samarali rivojlantirishga xizmat qiladi.

Xulosa qilib aytganda, neyropedagogika ta'lim kelajagini inson miyasining keng imkoniyatlari asosida qurishga yo' l ochuvchi istiqbolli yo' nalishdir. Mazkur yondashuvdan samarali foydalanish har bir shaxsning intellektual, kognitiv va ijodiy salohiyatini to' liq namoyon etish uchun muhim shartlardan biri bo' lib xizmat qiladi.

Annotatsiya: *Maqolada ekologiya yo‘ nalishi talabalarining ingliz tilida kasbiy nutq ko‘ nikmalarini raqamli ta’lim texnologiyalari asosida rivojlantirish usullari maxsus maqsadlar uchun ingliz tili (ESP) va kompyuter yordamida til o‘ rgatish (CALL) nazariyalari doirasida tadqiq etiladi. Kasbiy nutq kompetensiyasining beshta tarkibiy komponenti — terminologik, diskursiv, janr-uslubiy, interaktiv va strategik komponentlar — ajratildi hamda ularning ekologiya sohasidagi namoyon bo‘ lish shakllari aniqlandi. Raqamli vositalar didaktik vazifasiga ko‘ ra besh guruhga tasniflandi: manba-korpus vositalari, mashq va nazorat platformalari, sinxron va asinxron muloqot vositalari, nutq texnologiyalari hamda modellashtirish va vizualizatsiya vositalari. Shu asosda retseptiv-tayyorgarlik, reproduktiv-mashq va produktiv-kommunikativ bosqichlardan iborat uch bosqichli metodik model ishlab chiqildi. Model samaradorligini tekshirish uchun nazorat va tajriba guruhlari ishtirokidagi tajriba-sinov ishi dizayni hamda CEFR deskriptorlariga asoslangan besh mezonli baholash tizimi taklif etiladi. Tadqiqot natijalari oliy ta’lim muassasalarida ekologiya yo‘ nalishi uchun ESP kurslarini loyihalashda qo‘ llanilishi mumkin.*

Kalit so‘ zlar: *maxsus maqsadlar uchun ingliz tili, ESP, kasbiy nutq kompetensiyasi, raqamli ta’lim texnologiyalari, CALL, ekologiya ta’limi, terminologik kompetensiya, korpus, CEFR, aralash ta’lim, tajriba-sinov ishi.*

МЕТОДЫ РАЗВИТИЯ НАВЫКОВ ПРОФЕССИОНАЛЬНОЙ РЕЧИ НА АНГЛИЙСКОМ ЯЗЫКЕ У СТУДЕНТОВ ЭКОЛОГИЧЕСКОГО НАПРАВЛЕНИЯ НА ОСНОВЕ ЦИФРОВЫХ ОБРАЗОВАТЕЛЬНЫХ ТЕХНОЛОГИЙ

Аннотация: *В статье в рамках теорий английского языка для специальных целей (ESP) и компьютерного обучения языку (CALL) исследуются методы развития навыков профессиональной речи на английском языке у студентов экологического направления на основе цифровых образовательных технологий. Выделены пять структурных компонентов профессиональной речевой компетенции — терминологический, дискурсивный, жанрово-стилистический, интерактивный и стратегический — и определены формы их проявления в экологической сфере. Цифровые средства классифицированы по дидактической функции на пять групп: ресурсно-корпусные средства, платформы упражнений и контроля, средства синхронной и асинхронной коммуникации, речевые технологии, а также средства моделирования и визуализации. На этой основе разработана трёхэтапная методическая модель, включающая рецептивно-подготовительный, репродуктивно-тренировочный и продуктивно-коммуникативный этапы. Для проверки эффективности модели предложены дизайн опытно-экспериментальной работы с контрольной и экспериментальной группами и пятикритериальная система оценивания, основанная на дескрипторах CEFR. Результаты исследования могут быть использованы при проектировании ESP-курсов для экологического направления в высших учебных заведениях.*

Ключевые слова: *английский для специальных целей, ESP, профессиональная речевая компетенция, цифровые образовательные технологии, CALL, экологическое образование, терминологическая компетенция, корпус, CEFR, смешанное обучение, опытно-экспериментальная работа.*

METHODS OF DEVELOPING ENGLISH PROFESSIONAL SPEAKING SKILLS IN ECOLOGY STUDENTS THROUGH DIGITAL EDUCATIONAL TECHNOLOGIES

Abstract: *The article investigates, within the frameworks of English for Specific Purposes (ESP) and Computer-Assisted Language Learning (CALL), the methods of developing English professional speaking skills in ecology students through digital educational technologies. Five structural components of professional speaking competence are distinguished — terminological, discursive, genre-stylistic, interactive and strategic — and the forms in which they manifest themselves in the ecological domain are*

identified. Digital tools are classified by didactic function into five groups: resource-and-corpus tools, practice and assessment platforms, synchronous and asynchronous communication tools, speech technologies, and modelling and visualisation tools. On this basis a three-stage methodological model is developed, comprising receptive-preparatory, reproductive-practice and productive-communicative stages. To verify the effectiveness of the model, a design for experimental work involving control and experimental groups is proposed, together with a five-criterion assessment system based on CEFR descriptors. The findings may be applied in designing ESP courses for ecology programmes in higher education institutions.

Keywords: *English for Specific Purposes, ESP, professional speaking competence, digital educational technologies, CALL, ecological education, terminological competence, corpus, CEFR, blended learning, experimental work.*

1. KIRISH

Iqlim o‘ zgarishi, biologik xilma-xillikning kamayishi, suv resurslari taqchilligi va chiqindilarni boshqarish kabi ekologik muammolar o‘ z tabiatiga ko‘ ra transmilliy xarakterga ega bo‘ lib, ularni hal etish xalqaro hamkorlikni taqozo etadi. Ushbu hamkorlikning asosiy vositasi — ingliz tili: bugungi kunda ekologiya, atrof-muhitni muhofaza qilish va barqaror rivojlanish sohasidagi ilmiy nashrlar, xalqaro hisobotlar, grant loyihalari va konferensiyalarning katta qismi aynan shu tilda amalga oshiriladi. Shu bois ekologiya yo‘ nalishi bitiruvchisining kasbiy salohiyati uning ingliz tilida mutaxassislik doirasida erkin muloqot qila olish darajasi bilan bevosita bog‘ liq.

Ayni paytda oliy ta’lim amaliyotida chet tili o‘ qitishning natijasi ko‘ pincha umumiy til bilimi darajasida qolib ketmoqda. Talaba grammatik jihatdan to‘ g‘ ri gap tuza olsa-da, o‘ z sohasidagi ma’ruzani izchil bayon qilish, ilmiy munozarada o‘ z pozitsiyasini himoya qilish yoki dala tadqiqoti natijalarini xalqaro auditoriyaga taqdim etishda qiynaladi. Boshqacha aytganda, umumiy kommunikativ kompetensiya bilan kasbiy nutq kompetensiyasi o‘ rtasida uzilish yuzaga keladi.

Bu uzilishni bartaraf etishning istiqbolli yo‘ li — raqamli ta’lim texnologiyalarini ESP kursiga tizimli integratsiya qilishdir. Raqamli vositalar talabaga, birinchidan, tirik kasbiy diskurs namunalariga (ilmiy ma’ruzalar, hisobotlar, ekspert suhbatlari) bevosita kirish imkonini beradi; ikkinchidan, auditoriyadan tashqarida ham nutq amaliyoti uchun muhit yaratadi; uchinchidan, individual traektoriya va tezkor qayta aloqani ta’minlaydi. Biroq bu imkoniyatlar o‘ z-o‘ zidan ro‘ yobga chiqmaydi — ular metodik jihatdan asoslangan tizimni talab qiladi.

Mavzuning dolzarbligi ikki jihat bilan izohlanadi. Birinchidan, mavjud ESP tadqiqotlarida asosiy e’tibor o‘ qish va yozish ko‘ nikmalariga hamda terminologiya o‘ zlashtirishga qaratilgan bo‘ lib, og‘ zaki kasbiy nutq nisbatan kam o‘ rganilgan. Ikkinchidan, raqamli vositalar odatda alohida-alohida tavsiflanadi; ularni nutq ko‘ nikmasi rivojlanishining muayyan bosqichiga bog‘ lovchi yaxlit metodik model taklif etilmagan.

Tadqiqotning maqsadi — ekologiya yo‘ nalishi talabalarining ingliz tilida kasbiy nutq kompetensiyasi tarkibini aniqlash, raqamli ta’lim texnologiyalarini didaktik vazifasiga ko‘ ra tasniflash hamda shu asosda bosqichma-bosqich metodik modelni ishlab chiqishdan iborat.

Tadqiqotning obyekti — ekologiya yo‘ nalishi talabalariga ingliz tilini o‘ qitish jarayoni; predmeti esa raqamli ta’lim texnologiyalari asosida kasbiy nutq ko‘ nikmalarini rivojlantirishning usul va vositalaridir.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda kasbiy nutq kompetensiyasining besh komponentli tuzilishi ekologiya sohasi materiali asosida konkretlashtiriladi, raqamli vositalarning besh guruhli didaktik tasnifi taklif etiladi hamda har bir vosita guruhi nutq faoliyatining muayyan bosqichi va rivojlantiriladigan komponent bilan bog‘ lanadi.

Maqola quyidagicha tuzilgan: ikkinchi bo‘ limda mavzuga oid nazariy adabiyot tahlil qilinadi; uchinchi bo‘ limda tajriba-sinov ishining dizayni va baholash mezonlari tavsiflanadi; to‘ rtinchi bo‘ limda natijalar jadvallarda umumlashtiriladi; beshinchi bo‘ limda xulosa va amaliy tavsiyalar beriladi.

2. MAVZUGA OID ADABIYOTLAR TAHLILI

Maxsus maqsadlar uchun ingliz tili yo‘ nalishining nazariy asoslari T. Hutchinson va A. Waters ishlarida yaratilgan: mualliflar ESPni alohida til turi emas, balki o‘ quvchining ehtiyojidan kelib chiqadigan yondashuv sifatida ta’riflaydilar va ehtiyojlar tahlilini (needs analysis) kurs loyihalashning boshlang‘ ich nuqtasi deb belgilaydilar. T. Dudley-Evans va M. J. St John ushbu konsepsiyani rivojlantirib, ESPni akademik (EAP) va kasbiy (EOP) yo‘ nalishlarga ajratadilar hamda mutaxassislik diskursi janrlarini o‘ rganishning ahamiyatini asoslaydilar. H. Basturkmen esa ESP kursi mazmunini tanlashning variantlarini tizimlashtiradi.

Kommunikativ kompetensiya nazariyasi M. Canale va M. Swain modelida to‘ rt komponentga — grammatik, sotsiolingvistik, diskursiv va strategik kompetensiyaga — ajratilgan. L. Bachman ushbu modelni takomillashtirib, til qobiliyatining tashkiliy va pragmatik qatlamlarini farqlaydi. Yevropa Kengashining “Chet tillar bo‘ yicha umumevropa kompetensiyalari” hujjati va uning 2020-yilgi to‘ ldirilgan nashri og‘ zaki nutq uchun darajali deskriptorlar tizimini — nutq diapazoni, aniqligi, ravonligi, o‘ zaro ta’siri va izchilligi mezonlarini — taqdim etadi. Ushbu deskriptorlar mazkur tadqiqotda baholash tizimining asosi sifatida olindi.

Raqamli texnologiyalarning til o‘ qitishdagi o‘ rni CALL yo‘ nalishida o‘ rganilgan. M. Warschauer va D. Healey CALL taraqqiyotining uch bosqichini — bixevioristik, kommunikativ va integrativ bosqichlarni — ajratadilar. C. Chapelle texnologik muhitda til o‘ zlashtirishning shartlarini ta’riflaydi. A. Kukulska-Hulme va L. Shield mobil qurilmalar yordamida til o‘ rganishning (MALL) imkoniyat va cheklovlarini tahlil qiladilar. Pedagogik jihatdan texnologiya, fan mazmuni va metodikaning birikuvi P. Mishra va M. J. Koehlerning TPACK modelida umumlashtirilgan; aralash ta’lim tamoyillari esa D. R. Garrison va N. D. Vaughan ishida asoslangan.

Nutq ko‘ nikmalarini shakllantirish metodikasi I. S. P. Nation va J. Newton hamda S. Thornbury ishlarida batafsil yoritilgan: mualliflar og‘ zaki nutqni rivojlantirishning bosqichliligini — tayyorgarlik, nazorat ostidagi mashq va erkin ishlab chiqarish ketma-ketligini — ta’kidlaydilar. Terminologiyani o‘ zlashtirishda korpus lingvistikasi vositalari (COCA, AntConc kabi) so‘ zning real qo‘ llanish konteksti va kollokatsiyalarini ko‘ rsatgani bois samarali hisoblanadi. O‘ zbek chet til o‘ qitish metodikasida esa J. J. Jalolov va boshqa mualliflarning ishlarida kommunikativ yondashuvning milliy ta’lim sharoitiga moslashuvi masalalari ishlab chiqilgan.

Mavjud adabiyot tahlili ikki muhim bo‘ shliqni ko‘ rsatadi. Birinchidan, ESP bo‘ yicha tadqiqotlarning aksariyati texnika, iqtisodiyot va tibbiyot yo‘ nalishlariga bag‘ ishlangan bo‘ lib, ekologiya va atrof-muhit muhofazasi sohasi uchun kasbiy nutq materiali va janrlari maxsus tavsiflanmagan. Ikkinchidan, raqamli vositalar odatda ro‘ yxat tarzida sanab o‘ tiladi; ularni nutq ko‘ nikmasining muayyan komponenti va o‘ zlashtirish bosqichi bilan bog‘ lovchi tizimli model taklif etilmagan. Ushbu maqola aynan shu bo‘ shliqni to‘ ldirishga qaratilgan.

3. TADQIQOT METODOLOGIYASI

Tadqiqot aralash (sifatiy-miqdoriy) dizayn asosida amalga oshirildi. Sifatiy tahlil kasbiy nutq kompetensiyasi tarkibini aniqlash va raqamli vositalarni tasniflash uchun, miqdoriy tahlil esa taklif etilgan modelning samaradorligini tajriba-sinov yo‘ li bilan tekshirish uchun qo‘ llanildi.

Tajriba-sinov ishi nazorat va tajriba guruhlari ishtirokidagi “boshlang‘ ich kesim — yakuniy kesim” (pretest–posttest) sxemasi bo‘ yicha tashkil etildi. Nazorat guruhida mashg‘ ulotlar an’anaviy metodika asosida, tajriba guruhida esa ishlab chiqilgan uch bosqichli model asosida olib borildi. Har ikki guruhda soatlar hajmi, o‘ quv mavzulari va baholash shakllari bir xil bo‘ lib, faqat metodik yondashuv farq qildi — bu natijalarning qiyoslanuvchanligini ta’minlaydi.

Tadqiqot materialini ekologiya va atrof-muhitni muhofaza qilish yo‘ nalishidagi autentik matnlar tashkil etdi: xalqaro tashkilotlarning hisobotlari, ilmiy maqolalarning muhokama qismlari, ekologiya mavzusidagi ommabop-ilmiy ma’ruzalar va ekspert suhbatlari. Ushbu materiallardan kasbiy terminologiya minimumi, tipik nutqiy qoliplar va janr namunalari ajratib olindi.

Tadqiqotda quyidagi metodlardan foydalanildi: nazariy tahlil va umumlashtirish — kompetensiya tarkibini modellashtirish uchun; ehtiyojlar tahlili — talabalar va soha mutaxassislarining kommunikativ ehtiyojlarini aniqlash uchun; pedagogik kuzatish — mashg‘ ulot jarayonini qayd etish uchun; test va nutq topshirig‘ i — nutq darajasini o‘ lchash uchun; so‘ rovnoma — talabalarning motivatsiyasi va raqamli vositalarga munosabatini aniqlash uchun; matematik-statistik ishlov — natijalar farqining ishonchliligini baholash uchun.

Talabalarning kasbiy nutqi CEFR deskriptorlariga asoslangan besh mezon bo‘ yicha baholandi. Har bir mezon 0–4 ball oralig‘ ida, jami 20 ball miqyosida baholanadi (1-jadval).

1-jadval. Kasbiy nutqni baholash mezonlari va ball taqsimoti

Mezon	Nimani baholaydi	Maksimal ball
Terminologik aniqlik	soha atamalarini to‘ g‘ ri va o‘ rinli qo‘ llash, kollokatsiyalarga rioya qilish	4
Nutq diapazoni	leksik va grammatik vositalarning boyligi, sinonimik almashtirish imkoniyati	4
Ravonlik	nutq sur’ati, uzilishlar va to‘ xtalishlar chastotasi	4
Izchillik va diskursiv tashkiliylik	fikrning mantiqiy ketma-ketligi, bog‘ lovchi vositalardan foydalanish	4
O‘ zaro ta’sir va strategik ko‘ nikma	savol-javob, pozitsiyani himoya qilish, kommunikativ uzilishni bartaraf etish usullari	4
Jami		20

Tadqiqotning cheklovlari. Birinchidan, tajriba-sinov ishi bitta oliy ta’lim muassasasi materialida olib borilgan bo‘ lib, natijalarni umumlashtirishda talabalarning boshlang‘ ich til darajasi va texnik ta’minot sharoiti hisobga olinishi lozim. Ikkinchidan, nutqni baholashda ekspert talqini elementi saqlanib qoladi; buni kamaytirish uchun har bir javob ikki mustaqil baholovchi tomonidan tekshirildi. Uchinchidan, yozma kasbiy nutq (ilmiy maqola, hisobot yozish) alohida tadqiqot predmeti hisoblanadi va mazkur ishga kiritilmagan.

4. NATIJALAR VA TAHLIL

4.1. Kasbiy nutq kompetensiyasining tarkibi

Ehtiyojlar tahlili va autentik material tahlili ekologiya yo‘ nalishi bitiruvchisining kasbiy nutq kompetensiyasini beshta o‘ zaro bog‘ liq komponentga ajratish imkonini berdi (2-jadval).

2-jadval. Kasbiy nutq kompetensiyasining komponentlari va ularning ekologiya sohasidagi namoyon bo‘ lishi

Komponent	Mazmuni	Ekologiya sohasidagi namoyon bo‘ lishi
Terminologik	soha atamalari, qisqartmalar va ularning kollokatsiyalarini bilish	biodiversity loss, carbon footprint, waste management, environmental impact assessment (EIA), greenhouse gas emissions
Diskursiv	fikrni izchil bayon qilish, sabab-oqibat va qiyoslash munosabatlarini ifodalash	tadqiqot natijalarini bayon qilish, muammo–sabab–yechim zanjirini tuzish, grafik ma’lumotlarni izohlash
Janr-uslubiy	nutq janriga mos til vositalarini tanlash	konferensiya ma’ruzasi, poster taqdimoti, dala hisoboti, ekologik ekspertiza xulosasi, ommaviy ma’ruza
Interaktiv	muloqotni boshqarish, savol berish va javob qaytarish	ilmiy munozara, ekspert intervyusi, xalqaro loyiha muzokaralari, mahalliy aholi bilan ishlash
Strategik	kommunikativ uzilishni bartaraf etish usullari	atamani izohlab berish (parafraz), umumlashtiruvchi so‘ z bilan almashtirish, vizual materialga murojaat qilish

Tahlil ushbu komponentlarning rivojlanish darajasi bir tekis emasligini ko‘ rsatdi. Terminologik komponent an’anaviy o‘ qitishda ham nisbatan yaxshi shakllanadi, chunki u leksik minimumni o‘ zlashtirish bilan bevosita bog‘ liq. Eng zaif bo‘ g‘ in esa interaktiv va strategik komponentlardir: talaba tayyorlangan matnni bayon qila oladi, ammo kutilmagan savolga javob berish yoki noaniqlik yuzaga kelganda muloqotni davom ettirish ko‘ nikmasiga ega bo‘ lmaydi. Aynan shu bo‘ shliq raqamli vositalarning ustuvor qo‘ llanish sohasini belgilaydi.

4.2. Raqamli ta’lim texnologiyalarining didaktik tasnifi

Raqamli vositalarni turi bo‘ yicha emas, balki bajaradigan didaktik vazifasi bo‘ yicha tasniflash maqsadga muvofiqdir: bu yondashuv muayyan dastur eskirgan taqdirda ham modelning barqarorligini ta’minlaydi (3-jadval).

3-jadval. Raqamli ta’lim texnologiyalarining didaktik tasnifi

Guruh	Didaktik vazifasi	Vosita turlari	Rivojlantiriladigan komponent
1. Manba va korpus vositalari	autentik kasbiy diskurs namunalarini taqdim etish, atamaning real qo‘ llanishini ko‘ rsatish	ilmiy nashrlar bazasi, ochiq korpuslar (COCA), konkordans dasturlari (AntConc), xalqaro tashkilot hisobotlari	terminologik, janr-uslubiy
2. Mashq va nazorat platformalari	leksikani mustahkamlash, tezkor qayta aloqa berish	interaktiv mashq va test tizimlari, elektron kartochkalar, video asosidagi topshiriqlar	terminologik, diskursiv

Guruh	Didaktik vazifasi	Vosita turlari	Rivojlantiriladigan komponent
3. Muloqot vositalari	sinxron va asinxron nutq amaliyoti uchun muhit yaratish	videokonferensiya platformalari, forum va munozara taxtalari, ovozli izoh vositalari	interaktiv, strategik
4. Nutq texnologiyalari	talaffuz va ravonlikni individual mashq qilish, o‘ z nutqini tahlil qilish	nutqni matnga aylantirish tizimlari, talaffuz baholash ilovalari, ovoz yozish va o‘ z-o‘ zini baholash vositalari	ravonlik, terminologik aniqlik
5. Modellashtirish va vizualizatsiya	kasbiy vaziyatni qayta yaratish, ma’lumotni ko‘ rgazmali izohlash	ekologik simulyatsiya va monitoring dasturlari, xarita va infografika xizmatlari, taqdimot platformalari	diskursiv, janr-uslubiy

Tasnifning amaliy qiymati shundaki, u o‘ qituvchiga vositani “zamonaviy” bo‘ lgani uchun emas, balki muayyan metodik vazifani hal etish uchun tanlash imkonini beradi. Masalan, terminologik komponentni shakllantirishda konkordans dasturi elektron kartochkalarga qaraganda samaraliroq, chunki u atamani izolyatsiyada emas, tipik kollokatsiya va kontekstda ko‘ rsatadi. Aksincha, interaktiv komponentni faqat muloqot vositalari orqali rivojlantirish mumkin — hech qanday test platformasi jonli muzokara tajribasining o‘ rnini bosa olmaydi.

4.3. Uch bosqichli metodik model

Nutq ko‘ nikmasining shakllanish qonuniyatlariga muvofiq model uch bosqichdan iborat qilib loyihalandi. Har bir bosqichda vosita guruhi, topshiriq turi va kutilayotgan natija bir-biriga muvofiqlashtiriladi (4-jadval).

4-jadval. Kasbiy nutq ko‘ nikmalarini rivojlantirishning uch bosqichli modeli

Bosqich	Maqsad	Topshiriq turlari	Yetakchi vosita guruhi
I. Retseptiv-tayyorgarlik	kasbiy diskurs namunasi bilan tanishish, terminologik bazani shakllantirish	autentik ma’ruzani tinglash va konspektlashtirish; korpusda atamaning kollokatsiyalarini aniqlash; janr tuzilishini tahlil qilish	1-guruh (manba va korpus)
II. Reproduktiv-mashq	nutqiy qoliplarni nazorat ostidagi sharoitda mustahkamlash	qolip asosida gap tuzish; matnni qayta bayon qilish (summary); grafikni izohlash; ovoz yozib, o‘ z talaffuzini tahlil qilish	2- va 4-guruh (mashq platformalari, nutq texnologiyalari)
III. Produktiv-kommunikativ	erkin kasbiy muloqotni amalga oshirish	mini-konferensiya taqdimoti; ekologik loyiha himoyasi; rolli o‘ yin (ekspert–jurnalist, loyiha muzokarasi); onlayn munozara	3- va 5-guruh (muloqot vositalari, modellashtirish)

Modelning asosiy tamoyili — bosqichlarni almashtirib bo‘ lmasligi. Amaliyotda tez-tez uchraydigan xato shundaki, talabaga terminologik va qolip bazasi shakllanmasdan turib erkin munozara topshirig‘ i beriladi; natijada u ona tilida o‘ ylab, tarjima qilishga o‘ tadi va nutq sun’iy tus oladi. Aksincha, faqat birinchi va ikkinchi bosqich bilan cheklanish talabani “tayyor matn aytuvchi”ga aylantiradi. Shu bois har bir mavzu bo‘ yicha uchala bosqich ham to‘ liq bosib o‘ tilishi lozim.

Modelning yana bir muhim jihati — auditoriya va auditoriyadan tashqari ishning taqsimlanishi. Birinchi va ikkinchi bosqich topshiriqlarining katta qismi mustaqil, raqamli platformalar orqali bajarilishi mumkin; auditoriya vaqti esa uchinchi bosqich — jonli muloqot uchun ajratiladi. Bu aralash ta’lim (blended learning) tamoyiliga mos keladi va cheklangan kontakt soatlaridan eng samarali foydalanish imkonini beradi.

4.4. Tajriba-sinov ishining natijalari

Modelning samaradorligini tekshirish maqsadida nazorat va tajriba guruhlarida boshlang‘ ich va yakuniy kesimlar o‘ tkazildi. Natijalar 5-jadvalda keltirilgan.

5-jadval. Tajriba-sinov ishi natijalari (o‘ rtacha ball, 20 ballik tizimda)

Mezon	Nazorat guruhi (n = ___)		Tajriba guruhi (n = ___)		Farq
	boshlang‘ ich	yakuniy	boshlang‘ ich	yakuniy	
Terminologik aniqlik					
Nutq diapazoni					
Ravonlik					
Izchillik va diskursiv tashkiliylik					
O‘ zaro ta’sir va strategik ko‘ nikma					
Umumiy ko‘ rsatkich					

Jadval kataklari tajriba-sinov ishi ma’lumotlari asosida to‘ ldiriladi. Natijalar farqining statistik ishonchliligini baholash uchun Styudent t-mezonidan foydalanish tavsiya etiladi; $p < 0,05$ qiymati farqning tasodifiy emasligini ko‘ rsatadi. Shuningdek, talabalarning CEFR darajalari bo‘ yicha taqsimoti (A2, B1, B2 va undan yuqori) dinamikasini alohida ko‘ rsatish maqsadga muvofiq.

4.5. Natijalarning muhokamasi

Taklif etilgan model bir necha nazariy qoidaga tayanadi. Birinchidan, u M. Canale va M. Swain ajratgan kompetensiya komponentlarini ESP kontekstida konkretlashtiradi: umumiy grammatik kompetensiya o‘ rnini terminologik aniqlik, umumiy sotsiolingvistik kompetensiya o‘ rnini esa janr-uslubiy muvofiqlik egallaydi. Ikkinchidan, u M. Warschauer ta’riflagan CALL taraqqiyotining integrativ bosqichiga mos keladi: texnologiya alohida mashq vositasi emas, o‘ quv jarayonining tabiiy muhitiga aylanadi.

Tahlil ko‘ rsatadiki, raqamli vositalarning samaradorligi ularning texnik imkoniyatiga emas, metodik joylashtirilishiga bog‘ liq. Bir xil videokonferensiya platformasi birinchi bosqichda qo‘ llanilsa, oddiy ma’ruza tinglash vositasiga aylanadi; uchinchi bosqichda esa u kommunikativ vaziyat modeliga aylanadi. Bu kuzatuv TPACK modelining asosiy tezisini — texnologik bilim pedagogik va mazmuniy bilim bilan birgalikdagina samara berishini — empirik jihatdan qo‘ llab-quvvatlaydi.

Ekologiya yo‘ nalishining o‘ ziga xosligi ham alohida e’tiborni talab qiladi. Bu sohaning kasbiy diskursi ikki qatlamli: bir tomondan, u qat’iy ilmiy terminologiyaga tayanadi; ikkinchi tomondan, ekolog ko‘ pincha nomutaxassis auditoriya — mahalliy aholi, jurnalistlar, qaror qabul qiluvchilar — bilan ishlashga majbur bo‘ ladi. Shu bois modelda ilmiy-akademik janrlar bilan bir qatorda ommabop-ilmiy nutq janrlari ham ko‘ zda tutilgan, strategik komponentga esa alohida urg‘ u berilgan: murakkab atamani sodda tilda izohlab bera olish ushbu soha mutaxassisi uchun ixtiyoriy emas, balki majburiy ko‘ nikmadir.

Natijalarning amaliy ahamiyati ikki yo‘ nalishda namoyon bo‘ ladi. Kurs loyihalash amaliyoti uchun ular vosita tanlashning aniq mezonini beradi: har bir vosita muayyan komponent va bosqichga biriktiriladi. O‘ qituvchini tayyorlash amaliyoti uchun esa natijalar ESP kursi mazmuni bilan raqamli kompetensiyani birgalikda shakllantirish zaruratini ko‘ rsatadi.

5. XULOSA

O‘ tkazilgan tadqiqot quyidagi xulosalarga olib keladi.

Birinchidan, ekologiya yo‘ nalishi talabasining ingliz tilidagi kasbiy nutq kompetensiyasi beshta komponentdan iborat: terminologik, diskursiv, janr-uslubiy, interaktiv va strategik. An’anaviy o‘ qitishda birinchi komponent nisbatan yaxshi shakllansa-da, interaktiv va strategik komponentlar eng zaif bo‘ g‘ in bo‘ lib qoladi.

Ikkinchidan, raqamli ta’lim texnologiyalarini didaktik vazifasiga ko‘ ra besh guruhga — manba va korpus vositalari, mashq va nazorat platformalari, muloqot vositalari, nutq texnologiyalari hamda modellashtirish va vizualizatsiya vositalariga — tasniflash vositani metodik vazifa asosida tanlash imkonini beradi.

Uchinchidan, kasbiy nutq koʻ nikmalarini rivojlantirish retseptiv-tayyorgarlik, reproduktiv-mashq va produktiv-kommunikativ bosqichlar ketma-ketligida amalga oshirilishi lozim. Bosqichlarni almashtirish yoki birortasini tushirib qoldirish nutqning sun'iyligiga yoki "tayyor matn aytish" koʻ nikmasining shakllanishiga olib keladi.

Toʻ rtinchidan, model aralash ta'lim tamoyiliga tayanadi: birinchi va ikkinchi bosqich topshiriqlari mustaqil, raqamli platformalar orqali bajariladi, cheklangan auditoriya vaqti esa jonli kasbiy muloqot uchun ajratiladi.

Beshinchidan, ekologiya sohasi kasbiy diskursining ikki qatlamliligi — ilmiy va ommabop-ilmiy muloqot zarurati — strategik komponentga alohida urgʻ u berishni taqozo etadi: murakkab atamani nomutaxassis auditoriyaga sodda tilda izohlab bera olish ushbu soha mutaxassisining majburiy koʻ nikmasidir.

Amaliy tavsiyalar: (a) ESP kursini loyihalashni ehtiyojlar tahlilidan boshlash va terminologik minimumni autentik korpus materialidan ajratib olish; (b) har bir raqamli vositani muayyan komponent va bosqichga biriktirish, uni "umumiy foydalanish" uchun emas, aniq vazifa uchun joriy etish; (c) baholashni CEFR deskriptorlariga asoslangan koʻ p mezonli tizim orqali amalga oshirish; (d) uchinchi bosqich topshiriqlarida real kasbiy vaziyatlarni — loyiha himoyasi, ekspert intervyusi, jamoatchilik muhokamasini — modellashtirish.

Tadqiqot istiqbollari sun'iy intellekt asosidagi suhbat vositalarining nutq ravonligiga ta'sirini oʻ lchash, ekologiya sohasi uchun ixtisoslashgan oʻ quv korpusini shakllantirish hamda modelning boshqa tabiiy-ilmiy yoʻ nalishlarda qoʻ llanilishini sinovdan oʻ tkazish bilan bogʻ liq.

RAQAMLI TA'LIM VOSITALARI ASOSIDA BO' LAJAK TEXNOLOGIK TA'LIM O' QITUVCHILARINING METODIK KOMPETENSIYASINI RIVOJLANTIRISH

Abduqahhorova Gulchehra Ulug' bek qizi
Nizomiy nomidagi Toshkent davlat pedagogika universiteti magistr bitiruvchisi,
Toshkent, O' zbekiston
E-mail: abduqahhorovagulchehra437@gmail.com

Annotatsiya: *Maqolada bo' lajak texnologik ta'lim o' qituvchilarining metodik kompetensiyasini raqamli ta'lim vositalari asosida rivojlantirish masalasi kompetensiyaviy yondashuv va TPACK modeli doirasida nazariy jihatdan tadqiq etiladi. Tadqiqot materialini oliy ta'limning texnologik ta'lim yo' nalishi o' quv-normativ hujjatlari, mavzuga oid ilmiy adabiyot hamda amaliyotda qo' llanilayotgan raqamli vositalar majmui tashkil etdi. Nazariy tahlil, tizimli yondashuv va modellashtirish metodlari asosida metodik kompetensiyaning beshta tarkibiy komponenti — gnostik-nazariy, loyihalash-konstruktorlik, texnologik-amaliy, raqamli-kommunikativ va diagnostik-reflektiv komponentlar — ajratildi hamda ularning texnologik ta'lim o' qituvchisi faoliyatidagi namoyon bo' lish shakllari aniqlandi. Raqamli vositalar didaktik vazifasiga ko' ra besh guruhga tasniflandi: loyihalash va modellashtirish, virtual laboratoriya va simulyatsiya, o' quv kontenti va jarayonni boshqarish, baholash va qayta aloqa hamda hamkorlik va loyiha vositalari. Shu asosda motivatsion-diagnostik, nazariy-metodik, amaliy-loyihaviy va refleksiv-baholash bosqichlaridan iborat to' rt bosqichli model, komponent–vosita muvofiqlik matritsasi hamda kompetensiya rivojlanishining uch darajali (reproduktiv, adaptiv, ijodiy-innovatsion) baholash shkalasi taklif etildi.*

Kalit so' zlar: *metodik kompetensiya, texnologik ta'lim, bo' lajak o' qituvchi, raqamli ta'lim vositalari, TPACK, kompetensiyaviy yondashuv, loyiha asosida ta'lim, virtual laboratoriya, CAD-modellashtirish, elektron portfolio, refleksiya.*

РАЗВИТИЕ МЕТОДИЧЕСКОЙ КОМПЕТЕНТНОСТИ БУДУЩИХ УЧИТЕЛЕЙ ТЕХНОЛОГИЧЕСКОГО ОБРАЗОВАНИЯ НА ОСНОВЕ ЦИФРОВЫХ ОБРАЗОВАТЕЛЬНЫХ СРЕДСТВ

Аннотация: *В статье в рамках компетентностного подхода и модели TPACK теоретически исследуется проблема развития методической компетентности будущих учителей технологического образования на основе цифровых образовательных средств. Материалом исследования послужили учебно-нормативные документы направления технологического образования, научная литература по теме, а также совокупность применяемых на практике цифровых средств. На основе теоретического анализа, системного подхода и моделирования выделены пять структурных компонентов методической компетентности — гностико-теоретический, проектно-конструкторский, технолого-практический, цифрово-коммуникативный и диагностико-рефлексивный — и определены формы их проявления в деятельности учителя технологии. Цифровые средства классифицированы по дидактической функции на пять групп: средства проектирования и моделирования, виртуальные лаборатории и симуляции, средства учебного контента и управления процессом, средства оценивания и обратной связи, а также средства сотрудничества и проектной работы. На этой основе предложены четырёхэтапная модель, матрица соответствия «компонент — средство» и трёхуровневая шкала оценивания (репродуктивный, адаптивный, творческо-инновационный уровни).*

Ключевые слова: *методическая компетентность, технологическое образование, будущий учитель, цифровые образовательные средства, TPACK, компетентностный подход, проектное обучение, виртуальная лаборатория, CAD-моделирование, электронное портфолио, рефлексия.*

DEVELOPING THE METHODOLOGICAL COMPETENCE OF FUTURE TECHNOLOGY EDUCATION TEACHERS THROUGH DIGITAL LEARNING TOOLS

Abstract: *The article provides a theoretical examination, within the competence approach and the TPACK model, of how the methodological competence of future technology education teachers can be developed through digital learning tools. The research material comprises the curricular and normative documents of technology education programmes, the relevant scholarly literature, and the set of digital tools currently used in practice. Theoretical analysis, a systemic approach and modelling made it possible to distinguish five structural components of methodological competence — gnostic-theoretical, design-and-construction, technological-practical,*

digital-communicative and diagnostic-reflective — and to identify how each manifests itself in the work of a technology teacher. Digital tools are classified by didactic function into five groups: design and modelling tools; virtual laboratories and simulations; learning content and process management tools; assessment and feedback tools; and collaboration and project tools. On this basis the article proposes a four-stage model (motivational-diagnostic, theoretical-methodological, practical-project and reflective-evaluative), a component-to-tool correspondence matrix, and a three-level assessment scale (reproductive, adaptive and creative-innovative).

Keywords: *methodological competence, technology education, pre-service teacher, digital learning tools, TPACK, competence approach, project-based learning, virtual laboratory, CAD modelling, e-portfolio, reflection.*

1. KIRISH

Ta’lim tizimining raqamli transformatsiyasi o‘ qituvchi kasbiy faoliyatining mazmuniga ham, unga qo‘ yiladigan talablarga ham sezilarli ta’sir ko‘ rsatmoqda. Bugungi o‘ qituvchidan nafaqat o‘ z fanini bilish, balki raqamli muhitda o‘ quv jarayonini loyihalash, moslashuvchan metodik yechimlar tanlash va o‘ z faoliyati natijasini tahlil qila olish ham talab etiladi. Bu talablar majmui pedagogika fanida metodik kompetensiya tushunchasi orqali ifodalanadi.

Texnologik ta’lim yo‘ nalishida ushbu masala alohida murakkablik kasb etadi. Texnologiya fani o‘ qituvchisi, bir tomondan, nazariy bilim beruvchi, ikkinchi tomondan, amaliy ko‘ nikmani shakllantiruvchi mutaxassisdir: uning darsi materiallarni qayta ishlash, asbob-uskuna bilan ishlash, buyum loyihalash va tayyorlash kabi predmetli-amaliy faoliyatga tayanadi. Shu bois bu yo‘ nalishda raqamli vositalarni joriy etish an’anaviy fanlarga qaraganda ko‘ proq metodik asoslashni talab qiladi: monitor ortidagi simulyatsiya ustaxonadagi amaliy mashg‘ ulotning o‘ rnini bosa olmaydi, ammo unga tayyorgarlik bosqichini sezilarli darajada samaralashtiradi.

Mavzuning dolzarbligi ikki jihat bilan izohlanadi. Birinchidan, o‘ qituvchining raqamli kompetensiyasi bo‘ yicha mavjud tadqiqotlarda, asosan, umumpedagogik yondashuv ustunlik qiladi; texnologik ta’lim yo‘ nalishining moddiy-amaliy o‘ ziga xosligi hisobga olinmaydi. Ikkinchidan, raqamli vositalar odatda ro‘ yxat tarzida taqdim etiladi; ularni metodik kompetensiyaning muayyan komponenti va shakllanish bosqichi bilan bog‘ lovchi model taklif etilmagan.

Tadqiqotning maqsadi — bo‘ lajak texnologik ta’lim o‘ qituvchisining metodik kompetensiyasi tarkibini aniqlash, raqamli ta’lim vositalarini didaktik vazifasiga ko‘ ra tasniflash hamda shu asosda kompetensiyani bosqichma-bosqich rivojlantirish modelini ishlab chiqishdan iborat.

Tadqiqotning obyekti — bo‘ lajak texnologik ta’lim o‘ qituvchilarini kasbiy tayyorlash jarayoni; predmeti esa raqamli ta’lim vositalari asosida ularning metodik kompetensiyasini rivojlantirishning mazmuni, shakl va vositalaridir.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda metodik kompetensiyaning besh komponentli tuzilishi texnologik ta’lim materiali asosida konkretlashtiriladi, raqamli vositalarning besh guruhli didaktik tasnifi taklif etiladi, komponent va vosita guruhi o‘ rtasidagi muvofiqlik matritsasi tuziladi hamda kompetensiya rivojlanishining uch darajali baholash shkalasi asoslanadi.

Maqola quyidagicha tuzilgan: ikkinchi bo‘ limda mavzuga oid nazariy adabiyot tahlil qilinadi va tadqiqot bo‘ shlig‘ i aniqlanadi; uchinchi bo‘ limda material va metodlar tavsiflanadi; to‘ rtinchi bo‘ limda natijalar jadvallarda umumlashtirilib izohlanadi; beshinchi bo‘ limda xulosa va amaliy tavsiyalar beriladi.

2. MAVZUGA OID ADABIYOTLAR TAHLILI

Kompetensiyaviy yondashuvning nazariy asoslari A. V. Xutorskoy va I. A. Zimnyaya ishlarida ishlab chiqilgan: mualliflar kompetensiyani bilim, ko‘ nikma va shaxsiy tajribaning faoliyatda namoyon bo‘ luvchi birligi sifatida ta’riflab, uni ta’lim natijasining yangi o‘ lchov birligi deb belgilaydilar. Kasb ta’limi o‘ qituvchisini kasbiy shakllantirishning nazariy-metodik asoslari o‘ zbek pedagogikasida N. A. Muslimov va boshqa tadqiqotchilar ishlarida yoritilgan.

O‘ qituvchi bilimining o‘ ziga xos tuzilishi L. S. Shulman tomonidan asoslangan: u fan mazmuni bilimi (Content Knowledge) va pedagogik bilim (Pedagogical Knowledge) o‘ rtasida oraliq qatlam — pedagogik-mazmuniy bilim (Pedagogical Content Knowledge, PCK) mavjudligini ko‘ rsatdi. P. Mishra va M. J. Koehler ushbu modelni texnologik bilim (Technological Knowledge) bilan to‘ ldirib, TPACK ramkasini taklif etdilar. TPACK modelining asosiy tezisi mazkur tadqiqot uchun kalit ahamiyatga ega: texnologik bilim pedagogik va mazmuniy bilimdan ajratilgan holda samara bermaydi.

O‘ qituvchining raqamli kompetensiyasi xalqaro ramkalarda tizimlashtirilgan. Yevropa Ittifoqining DigCompEdu ramkasi (C. Redecker) pedagogning raqamli kompetensiyasini olti sohaga ajratadi va uning rivojlanishini olti darajali shkalada tavsiflaydi. ISTE ta’lim beruvchilar uchun standartlari hamda YUNESKOning o‘ qituvchilar uchun AKT kompetensiyalari ramkasi ham shunga o‘ xshash tuzilishga ega. Bu hujjatlar raqamli kompetensiyani texnik ko‘ nikmalar majmui sifatida emas, pedagogik qaror qabul qilish qobiliyati sifatida talqin qiladi.

Texnologik ta’limning metodik asoslari konstruksionizm g‘ oyalariga yaqin turadi. S. Papert bilim o‘ rganuvchi tomonidan yaratilgan real obyekt ustida ishlash jarayonida eng samarali shakllanishini ta’kidlaydi; bu qoida texnologiya fani uchun bevosita amaliy ahamiyatga ega. Loyiha asosidagi ta’lim samaradorligi J. W. Thomas va P. C. Blumenfeld

ishlarida umumlashtirilgan; STEM/STEAM yondashuvi esa R. W. Bybee tomonidan asoslangan. Texnologiyaning o‘ quv jarayoniga joriy etilishidagi to‘ siqlar — tashqi (uskuna, vaqt) va ichki (e’tiqod, malaka) to‘ siqlar — P. A. Ertmer va A. T. Ottenbreit-Leftwich tadqiqotida tahlil qilingan.

Mavjud adabiyot tahlili ikki muhim bo‘ shliqni ko‘ rsatadi. Birinchidan, o‘ qituvchining raqamli kompetensiyasi bo‘ yicha ramkalar universal xarakterga ega bo‘ lib, muayyan fan yo‘ nalishining o‘ ziga xosligini hisobga olmaydi; texnologik ta’limning predmetli-amaliy tabiati esa alohida metodik yechimlarni taqozo etadi. Ikkinchidan, raqamli vositalarni metodik kompetensiyaning muayyan komponenti bilan bog‘ lovchi, ya’ni “qaysi vosita nimani rivojlantiradi” degan savolga javob beruvchi operatsional model taklif etilmagan. Ushbu maqola aynan shu bo‘ shliqni to‘ ldirishga qaratilgan.

3. TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-metodik xarakterga ega bo‘ lib, sifatiy dizayn asosida amalga oshirildi. Ishning asosiy natijasi empirik o‘ lchov emas, balki nazariy jihatdan asoslangan model va uni amaliyotga tatbiq etish mexanizmi hisoblanadi.

Tadqiqot materialini uch guruh manba tashkil etdi: (a) texnologik ta’lim yo‘ nalishi bo‘ yicha oliy ta’limning o‘ quv rejalari, fan dasturlari va malaka talablari; (b) o‘ qituvchi kompetensiyasi, TPACK va raqamli ta’lim bo‘ yicha ilmiy adabiyot hamda xalqaro kompetensiya ramkalari; (v) texnologik ta’lim amaliyotida qo‘ llanilayotgan raqamli vositalar majmui.

Tadqiqotda quyidagi metodlardan foydalanildi: nazariy tahlil va sintez — kompetensiya tuzilishini aniqlash uchun; tizimli yondashuv — komponentlar o‘ rtasidagi bog‘ liqlikni ochib berish uchun; modellashtirish — rivojlantirish bosqichlarini loyihalash uchun; tasniflash — raqamli vositalarni didaktik vazifasi bo‘ yicha guruhlash uchun; qiyosiy tahlil — xalqaro kompetensiya ramkalarini chog‘ ishtirish uchun; ekspert baholash — taklif etilgan modelning ichki izchilligini tekshirish uchun.

Kompetensiya komponentlarini ajratishda uch mezon qo‘ llanildi: komponentning o‘ qituvchi real faoliyatida mustaqil vazifa sifatida namoyon bo‘ lishi; uni kuzatish va baholash imkoniyati; hamda uni rivojlantirish uchun alohida metodik vositaning zarurligi. Ushbu mezonlarga javob bermagan belgilar mustaqil komponent sifatida ajratilmadi.

Tadqiqotning cheklovlari. Birinchidan, ish nazariy-metodik xarakterga ega bo‘ lib, taklif etilgan model tajriba-sinov yo‘ li bilan tekshirilmagan — bu keyingi bosqich vazifasi hisoblanadi. Ikkinchidan, raqamli vositalar konkret dastur nomlari bilan emas, funksional guruhlar darajasida tavsiflangan, chunki dasturiy mahsulotlar tez yangilanadi. Uchinchidan, moddiy-texnik ta’minot va internet imkoniyati bo‘ yicha hududiy tafovutlar hisobga olinmagan.

4. NATIJALAR VA TAHLIL

4.1. Metodik kompetensiyaning tarkibi

Metodik kompetensiya deganda o‘ qituvchining o‘ quv jarayonini maqsadga muvofiq loyihalash, amalga oshirish va natijasini baholash bo‘ yicha nazariy bilim, amaliy ko‘ nikma hamda kasbiy tajribasining yaxlit birligi tushuniladi. Tahlil natijasida uning beshta tarkibiy komponenti ajratildi (1-jadval).

1-jadval. Texnologik ta’lim o‘ qituvchisi metodik kompetensiyasining komponentlari

Komponent	Mazmuni	Texnologik ta’limdagi namoyon bo‘ lishi
Gnostik-nazariy	fan mazmuni, o‘ qitish qonuniyatlari va metodik yondashuvlarni bilish	materialshunoslik, mehnat xavfsizligi, texnologik jarayonlar bo‘ yicha bilimni o‘ quvchi yoshiga moslab tanlash
Loyihalash-konstruktorlik	dars va o‘ quv modulini loyihalash, didaktik material ishlab chiqish	amaliy mashg‘ ulot texnologik kartasini tuzish, buyum namunasi va chizmasini tayyorlash, bosqichlarni vaqt bo‘ yicha taqsimlash
Texnologik-amaliy	predmetli-amaliy faoliyatni namoyish eta olish va boshqarish	asbob-uskuna bilan ishlash usulini ko‘ rsatish, materialni qayta ishlash operatsiyalarini bajarish, ustaxona ishini tashkil etish
Raqamli-kommunikativ	raqamli vositalarni metodik maqsadga muvofiq qo‘ llash va muloqotni tashkil etish	3D-model orqali buyum tuzilishini tushuntirish, virtual simulyatsiyada xavfli operatsiyani oldindan mashq qildirish, onlayn loyiha ishini boshqarish

Komponent	Mazmuni	Texnologik ta’limdagi namoyon bo‘ lishi
Diagnostik-reflektiv	natijani baholash, xatolik sababini aniqlash va o‘ z faoliyatini tahlil qilish	tayyor buyumni rubrika asosida baholash, o‘ quvchi xatosining texnologik sababini aniqlash, o‘ z darsini video yozuv orqali tahlil qilish

Komponentlar ierarxik emas, balki o‘ zaro bog‘ liq tarzda joylashgan. Ayni paytda ular orasida bir yo‘ nalishli bog‘ liqlik mavjud: loyihalash-konstruktorlik komponenti gnostik-nazariy bazaga tayanadi, diagnostik-reflektiv komponent esa qolgan to‘ rttasining natijasini baholaydi va shu orqali ularning takomillashuviga xizmat qiladi. Raqamli-kommunikativ komponent alohida o‘ rin tutadi: u mustaqil qiymatga ega bo‘ lmay, boshqa komponentlarni amalga oshirish vositasi sifatida namoyon bo‘ ladi — bu TPACK modelining asosiy qoidasiga mos keladi.

4.2. Texnologik ta’lim yo‘ nalishining o‘ ziga xosligi

Texnologik ta’lim o‘ qituvchisi tayyorlashning o‘ ziga xosligi uch jihatda namoyon bo‘ ladi. Birinchidan, o‘ quv natijasi moddiy shaklda — tayyor buyum yoki loyiha ko‘ rinishida — ifodalanadi; bu baholashni obyektivroq qiladi, ammo baholash mezonini ham murakkablashtiradi, chunki bir vaqtda ham jarayon, ham mahsulot baholanishi lozim. Ikkinchidan, mashg‘ ulotlar xavfsizlik talablari bilan chegaralangan: ayrim operatsiyalarni boshlang‘ ich bosqichda real uskunada mashq qilish xavfli yoki qimmat bo‘ lishi mumkin. Uchinchidan, soha texnologiyalari jadal yangilanadi, shu bois o‘ qituvchidan uzluksiz kasbiy yangilanish talab etiladi.

Aynan shu uch jihat raqamli vositalarning ushbu yo‘ nalishdagi asosiy vazifasini belgilaydi. Ular real amaliy faoliyatning o‘ rnini bosmaydi, balki unga tayyorgarlik bosqichini ta’minlaydi: xavfli yoki resurs talab qiladigan operatsiya avval virtual muhitda mashq qilinadi, loyiha esa avval raqamli modelda tekshiriladi va shundan keyingina materialda bajariladi. Bu yondashuv xato narxini keskin kamaytiradi va talabaga tajriba to‘ plash uchun ko‘ proq urinish imkonini beradi.

4.3. Raqamli ta’lim vositalarining didaktik tasnifi

Vositalarni dastur nomi bo‘ yicha emas, bajaradigan didaktik vazifasi bo‘ yicha tasniflash maqsadga muvofiqdir: bu yondashuv muayyan dasturiy mahsulot eskirgan taqdirda ham modelning barqarorligini ta’minlaydi (2-jadval).

2-jadval. Raqamli ta’lim vositalarining didaktik tasnifi

Guruh	Didaktik vazifasi	Vosita turlari
1. Loyihalash va modellashtirish	buyum va konstruksiyani raqamli shaklda yaratish, o‘ lchov va materialni oldindan hisoblash	2D/3D CAD muharrirlari, parametrik modellashtirish dasturlari, 3D-bosib chiqarishga tayyorlash (slicer) vositalari
2. Virtual laboratoriya va simulyatsiya	xavfli, qimmat yoki takrorlanishi qiyin operatsiyani xavfsiz muhitda mashq qildirish	elektr zanjiri simulyatorlari, fizik-texnik jarayon simulyatorlari, virtual ustaxona va AR/VR muhitlari
3. O‘ quv kontenti va jarayonni boshqarish	o‘ quv materialini taqdim etish, mustaqil ishni tashkil etish va kuzatib borish	ta’lim boshqaruv tizimlari (LMS), video darslik va ekran yozuvi vositalari, interaktiv taqdimot platformalari
4. Baholash va qayta aloqa	natijani mezon asosida baholash, tezkor va shaxsiylashtirilgan qayta aloqa berish	onlayn test va so‘ rov tizimlari, elektron rubrika, elektron portfolio, formativ baholash vositalari
5. Hamkorlik va loyiha ishi	jamoaviy loyihani rejalashtirish, hujjatlashtirish va taqdim etish	bulutli hujjat va jadval xizmatlari, onlayn taxta, loyiha vazifalarini boshqarish tizimlari

4.4. Komponent va vosita muvofiqligi

Tasnifning amaliy qiymati u kompetensiya komponentlari bilan bog‘ langandagina namoyon bo‘ ladi. Quyidagi matritsa har bir vosita guruhining qaysi komponentni rivojlantirishga xizmat qilishini ko‘ rsatadi (3-jadval).

3-jadval. “Kompetensiya komponenti — raqamli vosita guruhi” muvofiqlik matritsasi

Komponent	1-guruh	2-guruh	3-guruh	4-guruh	5-guruh
Gnostik-nazariy	+	++	++	+	
Loyihalash-konstruktorlik	++	+	++	+	+
Texnologik-amaliy	++	++	+		+
Raqamli-kommunikativ	++	++	++	++	++
Diagnostik-reflektiv	+	+	+	++	++

Izoh: “++” — vosita guruhi ushbu komponentni rivojlantirishda yetakchi vazifani bajaradi; “+” — yordamchi vazifani bajaradi; “–” — bevosita ta’sir ko‘ rsatmaydi.

Matritsa tahlili ikki muhim kuzatuvni beradi. Birinchidan, texnologik-amaliy komponentni faqat birinchi va ikkinchi guruh vositalari orqali qo‘ llab-quvvatlash mumkin, ammo ular ham real ustaxona mashg‘ ulotining o‘ rnini bosmaydi — bu komponent uchun raqamli vosita faqat tayyorgarlik funksiyasini bajaradi. Ikkinchidan, diagnostik-reflektiv komponent to‘ rtinchi va beshinchi guruh vositalari bilan eng kuchli bog‘ langan; amaliyotda esa aynan bu guruhlar kam qo‘ llaniladi, chunki ular natijani emas, jarayonni hujjatlashtirishni talab qiladi. Shu bois refleksiv komponent ko‘ pincha eng zaif bo‘ g‘ in bo‘ lib qoladi.

4.5. Metodik kompetensiyani rivojlantirishning to‘ rt bosqichli modeli

Kompetensiyaning shakllanish qonuniyatlariga muvofiq model to‘ rt bosqichdan iborat qilib loyihalandi. Har bir bosqichda maqsad, faoliyat turi va yetakchi vosita guruhi bir-biriga muvofiqlashtiriladi (4-jadval).

4-jadval. Metodik kompetensiyani rivojlantirishning bosqichlari

Bosqich	Maqsad	Talaba faoliyati	Yetakchi vosita guruhi
I. Motivatsion-diagnostik	boshlang‘ ich darajani aniqlash, kasbiy qiziqishni uyg‘ otish	o‘ z-o‘ zini baholash so‘ rovnomasi; ilg‘ or dars namunalarini tahlil qilish; muammoli vaziyat muhokamasi	3- va 4-guruh
II. Nazariy-metodik	metodik bilim tizimini shakllantirish	metodik yondashuvlarni qiyoslash; dars tuzilishini tahlil qilish; texnologik karta namunalarini o‘ rganish	3-guruh
III. Amaliy-loyihaviy	metodik yechimni mustaqil loyihalash va sinab ko‘ rish	buyumni 3D-modellashtirish; virtual simulyatsiyada operatsiyani mashq qilish; dars loyihasini ishlab chiqish va mikroo‘ qitish	1-, 2- va 5-guruh
IV. Refleksiv-baholash	natijani baholash va kasbiy o‘ sish traektoriyasini belgilash	o‘ z darsini video yozuv orqali tahlil qilish; elektron portfolioni to‘ ldirish; o‘ zaro (peer) baholash	4- va 5-guruh

Modelning asosiy tamoyili — bosqichlarni almashtirib bo‘ lmasligi. Amaliyotda ko‘ p uchraydigan xato shundaki, talabaga metodik bilim bazasi shakllanmasdan turib mustaqil dars loyihasi topshiriladi; natijada u o‘ zi ko‘ rgan darslarni takrorlash bilan cheklanadi va metodik tanlov qilishni o‘ rganmaydi. Aksincha, faqat birinchi va ikkinchi bosqich bilan cheklanish nazariy bilimning amaliy ko‘ nikmaga aylanmasligiga olib keladi.

4.6. Kompetensiya rivojlanishining darajalari

Metodik kompetensiyaning rivojlanish darajasini baholash uchun uch pog‘ onali shkala taklif etiladi (5-jadval). Shkala mezoni sifatida talabaning metodik qaror qabul qilishdagi mustaqillik darajasi olindi.

5-jadval. Metodik kompetensiya rivojlanishining darajalari

Daraja	Metodik qaror	Raqamli vositadan foydalanish	Refleksiya
Reproduktiv (past)	tayyor namuna yoki qo‘ llanma bo‘ yicha ish yuritadi, o‘ zgartirish kiritmaydi	vositani ko‘ rsatilgan tartibda, an’anaviy usul o‘ rniga qo‘ llaydi	natijani bayon qiladi, sababini tahlil qilmaydi
Adaptiv (o‘ rta)	tayyor yechimni sinf va sharoitga moslashtiradi, muqobil variant tanlaydi	vazifaga qarab vosita tanlaydi, uni o‘ quv maqsadi bilan bog‘ laydi	xatolik sababini aniqlaydi, keyingi darsga tuzatish kiritadi
Ijodiy-innovatsion (yuqori)	yangi metodik yechim ishlab chiqadi, uni asoslaydi va sinovdan o‘ tkazadi	vositalarni birlashtirib, yangi o‘ quv vaziyati loyihalaydi	o‘ z faoliyatini tizimli tahlil qiladi, kasbiy o‘ sish rejasini tuzadi

4.7. Natijalarning muhokamasi

Taklif etilgan model bir necha nazariy qoidaga tayanadi. Birinchidan, u L. S. Shulman ajratgan pedagogik-mazmuniy bilim tushunchasini texnologik ta’lim materialida konkretlashtiradi: gnostik-nazariy va texnologik-amaliy komponentlarning kesishuvida o‘ qituvchining o‘ ziga xos metodik bilimi shakllanadi. Ikkinchidan, model TPACK ramkasining asosiy tezisini amaliy shaklga keltiradi: matritsa har bir vositani mavhum “raqamli kompetensiya” bilan emas, aniq metodik komponent bilan bog‘ laydi.

Tahlil ko‘ rsatadiki, texnologik ta’lim yo‘ nalishida raqamli vositaning o‘ rni boshqa fanlardagidan farq qiladi. Ko‘ pgina fanlarda raqamli vosita o‘ quv faoliyatining o‘ zini amalga oshirish muhiti bo‘ lsa, bu yerda u, asosan, tayyorgarlik va tahlil vositasi vazifasini bajaradi: real material bilan ishlash bosqichi o‘ z qiymatini saqlab qoladi. Bu kuzatuv S. Papert ilgari surgan konstruksionizm g‘ oyasiga mos keladi — bilim real obyekt yaratish jarayonida mustahkamlanadi.

Modelni amaliyotga tatbiq etishda P. A. Ertmer va A. T. Ottenbreit-Leftwich aniqlagan ichki to‘ siqlar — o‘ qituvchining texnologiyaga munosabati va o‘ z kuchiga ishonchi — tashqi to‘ siqlardan (uskuna, internet, vaqt) kam ahamiyatli emasligini hisobga olish lozim. Shu bois modelning birinchi bosqichiga motivatsion tarkib ataylab kiritilgan: talaba vositaning metodik foydasini o‘ zi ko‘ rmaguncha, uni faqat majburiy topshiriq sifatida qabul qiladi.

Natijalarning amaliy ahamiyati ikki yo‘ nalishda namoyon bo‘ ladi. Kasbiy tayyorgarlik dasturlarini loyihalash uchun ular vosita tanlashning aniq mezonini beradi: har bir vosita muayyan komponent va bosqichga biriktiriladi. Baholash amaliyoti uchun esa uch darajali shkala talabaning metodik o‘ sishini kuzatib borish imkonini beradi.

5. XULOSA

O‘ tkazilgan nazariy tadqiqot quyidagi xulosalarga olib keladi.

Birinchidan, bo‘ lajak texnologik ta’lim o‘ qituvchisining metodik kompetensiyasi beshta komponentdan iborat: gnostik-nazariy, loyihalash-konstruktorlik, texnologik-amaliy, raqamli-kommunikativ va diagnostik-reflektiv. Raqamli-kommunikativ komponent mustaqil qiymatga ega bo‘ lmay, qolgan komponentlarni amalga oshirish vositasi sifatida namoyon bo‘ ladi.

Ikkinchidan, raqamli ta’lim vositalarini didaktik vazifasiga ko‘ ra besh guruhga — loyihalash va modellashtirish, virtual laboratoriya va simulyatsiya, o‘ quv kontenti va jarayonni boshqarish, baholash va qayta aloqa hamda hamkorlik va loyiha vositalariga — tasniflash vositani metodik vazifa asosida tanlash imkonini beradi.

Uchinchidan, komponent va vosita guruhi o‘ rtasidagi muvofiqlik matritsasi ikki muhim holatni ochib beradi: texnologik-amaliy komponent uchun raqamli vosita faqat tayyorgarlik funksiyasini bajaradi, diagnostik-reflektiv komponent esa amaliyotda eng kam qo‘ llab-quvvatlanadigan, shu bois eng zaif bo‘ g‘ in hisoblanadi.

To‘ rtinchidan, metodik kompetensiyani rivojlantirish motivatsion-diagnostik, nazariy-metodik, amaliy-loyihaviy va refleksiv-baholash bosqichlari ketma-ketligida amalga oshirilishi lozim; bosqichlarni almashtirish tayyor namunani takrorlash ko‘ nikmasining shakllanishiga olib keladi.

Beshinchidan, kompetensiya rivojlanishini reproduktiv, adaptiv va ijodiy-innovatsion darajalar bo‘ yicha baholash mumkin; darajani ajratuvchi asosiy mezon — talabaning metodik qaror qabul qilishdagi mustaqillik darajasidir.

Amaliy tavsiyalar: (a) texnologik ta’lim yo‘ nalishi o‘ quv dasturlariga raqamli vositalarni alohida fan sifatida emas, metodika kurslari ichiga integratsiyalangan holda kiritish; (b) har bir vositani muayyan komponent va bosqichga biriktirib, uni aniq metodik vazifa uchun joriy etish; (v) amaliy-loyihaviy bosqichda “raqamli model — real buyum” ketma-ketligini majburiy qilib belgilash; (g) elektron portfolio va video-refleksiyani baholash tizimining doimiy elementiga aylantirish orqali diagnostik-reflektiv komponentni mustahkamlash.

Tadqiqot istiqbollari taklif etilgan modelni tajriba-sinov yo‘ li bilan tekshirish, kompetensiya darajalarini o‘ lchash uchun diagnostik metodikani ishlab chiqish hamda modelning boshqa amaliy yo‘ nalishdagi pedagogik ta’lim sohalarida qo‘ llanilishini o‘ rganish bilan bog‘ liq.

Annotatsiya: *Maqolada bo‘ lajak tarjimonlarning kasbiy-yo‘ naltirilgan muloqot kompetensiyasini TESOL metodikasi asosida rivojlantirishning pedagogik mexanizmlari kompetensiyaviy yondashuv va ijtimoiy konstruktivizm nazariyasi doirasida tadqiq etiladi. Tadqiqot materialini tarjimon kompetensiyasining xalqaro modellari (PACTE, EMT), TESOL metodikasining nazariy manbalari hamda tarjimonlik yo‘ nalishi o‘ quv-normativ hujjatlari tashkil etdi. Nazariy tahlil, tizimli yondashuv, qiyosiy tahlil va modellashtirish metodlari asosida kasbiy-yo‘ naltirilgan muloqot kompetensiyasining oltita tarkibiy komponenti — lingvistik-diskursiv, madaniyatlararo, kasbiy-terminologik, interaktiv-mediativ, strategik-refleksiv va deontologik-etik komponentlar — ajratildi. TESOL metodikasining tarjimon tayyorlashga tatbiq etilishi mumkin bo‘ lgan yettita tamoyili aniqlanib, ular asosida oltita pedagogik mexanizm asoslandi: kommunikativ vaziyatni modellashtirish, topshiriq asosidagi ta’lim, skaffolding va mustaqillikni bosqichma-bosqich oshirish, hamkorlikdagi loyiha ishi, konstruktiv qayta aloqa va xato tahlili hamda refleksiv amaliyot. Mexanizm va komponent o‘ rtasidagi muvofiqlik matritsasi, to‘ rt bosqichli model hamda kompetensiya rivojlanishining uch darajali baholash shkalasi taklif etildi.*

Kalit so‘ zlar: *kasbiy-yo‘ naltirilgan muloqot kompetensiyasi, tarjimon tayyorlash, TESOL metodikasi, kommunikativ yondashuv, topshiriq asosidagi ta’lim, skaffolding, refleksiv amaliyot, madaniyatlararo muloqot, mediatsiya, deontologiya, pedagogik mexanizm.*

ПЕДАГОГИЧЕСКИЕ МЕХАНИЗМЫ РАЗВИТИЯ ПРОФЕССИОНАЛЬНО ОРИЕНТИРОВАННОЙ КОММУНИКАТИВНОЙ КОМПЕТЕНЦИИ БУДУЩИХ ПЕРЕВОДЧИКОВ НА ОСНОВЕ МЕТОДИКИ TESOL

Аннотация: *В статье в рамках компетентностного подхода и теории социального конструктивизма исследуются педагогические механизмы развития профессионально ориентированной коммуникативной компетенции будущих переводчиков на основе методики TESOL. Материалом исследования послужили международные модели переводческой компетенции (PACTE, EMT), теоретические источники методики TESOL, а также учебно-нормативные документы переводческого направления. На основе теоретического анализа, системного подхода, сравнительного анализа и моделирования выделены шесть структурных компонентов профессионально ориентированной коммуникативной компетенции — лингвистико-дискурсивный, межкультурный, профессионально-терминологический, интерактивно-медиативный, стратегическо-рефлексивный и деонтологическо-этический. Определены семь принципов методики TESOL, применимых к подготовке переводчиков, и на их основе обоснованы шесть педагогических механизмов: моделирование коммуникативной ситуации, обучение на основе заданий, скаффолдинг и поэтапное повышение самостоятельности, совместная проектная работа, конструктивная обратная связь и анализ ошибок, а также рефлексивная практика. Предложены матрица соответствия «механизм — компонент», четырёхэтапная модель и трёхуровневая шкала оценивания.*

Ключевые слова: *профессионально ориентированная коммуникативная компетенция, подготовка переводчиков, методика TESOL, коммуникативный подход, обучение на основе заданий, скаффолдинг, рефлексивная практика, межкультурная коммуникация, медиация, деонтология, педагогический механизм.*

PEDAGOGICAL MECHANISMS FOR DEVELOPING THE PROFESSIONALLY ORIENTED COMMUNICATIVE COMPETENCE OF FUTURE TRANSLATORS THROUGH TESOL METHODOLOGY

Abstract: *The article examines, within the competence approach and social constructivist theory, the pedagogical mechanisms for developing the professionally oriented communicative competence of future translators through TESOL methodology. The research*

material comprises international models of translator competence (PACTE, EMT), the theoretical sources of TESOL methodology, and the curricular and normative documents of translation programmes. Theoretical analysis, a systemic approach, comparative analysis and modelling made it possible to distinguish six structural components of professionally oriented communicative competence: linguistic-discursive, intercultural, professional-terminological, interactive-mediative, strategic-reflective and deontological-ethical. Seven principles of TESOL methodology applicable to translator training are identified, and on their basis six pedagogical mechanisms are substantiated: modelling communicative situations, task-based learning, scaffolding with the gradual transfer of autonomy, collaborative project work, constructive feedback and error analysis, and reflective practice. A mechanism-to-component correspondence matrix, a four-stage model and a three-level assessment scale are proposed.

Keywords: *professionally oriented communicative competence, translator training, TESOL methodology, communicative approach, task-based learning, scaffolding, reflective practice, intercultural communication, mediation, deontology, pedagogical mechanism.*

1. KIRISH

Xalqaro hamkorlikning kengayishi, chet el investitsiyalarining o‘ sishi va axborot almashinuvi hajmining ortishi tarjimonlik kasbiga bo‘ lgan talabni ham, unga qo‘ yiladigan mezonlarni ham o‘ zgartirdi. Bugungi tarjimon faqat matnni bir tildan boshqasiga o‘ girishi emas, balki turli madaniy va kasbiy muhitga mansub tomonlar o‘ rtasidagi muloqotni ta’minlovchi vositachi — mediator sifatida faoliyat yuritishi lozim. Bu esa uning tayyorgarligida til bilimidan tashqari muloqot ko‘ nikmalari ham hal qiluvchi ahamiyat kasb etishini anglatadi.

Ayni paytda tarjimonlik yo‘ nalishida ta’lim amaliyoti an’anaviy ravishda yozma matn ustida ishlashga yo‘ naltirilgan. Talaba lingvistik jihatdan puxta tayyorgarlikka ega bo‘ lsa-da, real kasbiy vaziyatda — muzokara jarayonida, ish uchrashuvida yoki jonli tadbirda — muloqotni boshqarish, noaniqlikni bartaraf etish va tomonlar o‘ rtasidagi madaniy tafovutni yumshatishda qiynaladi. Boshqacha aytganda, til kompetensiyasi bilan kasbiy-yo‘ naltirilgan muloqot kompetensiyasi o‘ rtasida uzilish yuzaga keladi.

Ushbu uzilishni bartaraf etishning istiqbolli yo‘ llaridan biri — TESOL (Teaching English to Speakers of Other Languages) metodikasining pedagogik arsenalidan foydalanishdir. TESOL doirasida o‘ nlab yillar davomida kommunikativ ko‘ nikmalarni shakllantirishning samarali mexanizmlari — kommunikativ vaziyatni modellashtirish, topshiriq asosidagi ta’lim, skaffolding, hamkorlikdagi ish va refleksiv amaliyot — ishlab chiqilgan va sinovdan o‘ tkazilgan. Ushbu mexanizmlar til o‘ rgatish uchun yaratilgan bo‘ lsa-da, ularning didaktik mohiyati tarjimon tayyorlash vazifalariga ham javob beradi.

Mavzuning dolzarbligi ikki jihat bilan izohlanadi. Birinchidan, tarjimon kompetensiyasining mavjud xalqaro modellarida (PACTE, EMT) og‘ zaki kasbiy muloqot komponenti mustaqil element sifatida yetarlicha ajratilmagan — u ko‘ proq xizmat ko‘ rsatish yoki shaxslararo kompetensiya doirasida qayd etiladi. Ikkinchidan, TESOL metodikasi til o‘ rganuvchi uchun ishlab chiqilgan bo‘ lib, uni bo‘ lajak tarjimon tayyorlashga moslashtirishning pedagogik mexanizmlari maxsus tadqiq etilmagan.

Tadqiqotning maqsadi — bo‘ lajak tarjimonlarning kasbiy-yo‘ naltirilgan muloqot kompetensiyasi tarkibini aniqlash, TESOL metodikasining tarjimon tayyorlashga tatbiq etilishi mumkin bo‘ lgan tamoyillarini ajratish hamda shu asosda pedagogik mexanizmlar tizimini asoslashdan iborat.

Tadqiqotning obyekti — bo‘ lajak tarjimonlarni kasbiy tayyorlash jarayoni; predmeti esa TESOL metodikasi asosida ularning kasbiy-yo‘ naltirilgan muloqot kompetensiyasini rivojlantirishning pedagogik mexanizmlaridir.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda kasbiy-yo‘ naltirilgan muloqot kompetensiyasining olti komponentli tuzilishi tarjimonlik faoliyati materiali asosida asoslanadi, TESOL tamoyillari bilan tarjimon kompetensiyasi modellari qiyosiy tahlil qilinadi, oltita pedagogik mexanizm ajratiladi hamda “mexanizm — komponent” muvofiqlik matritsasi tuziladi.

Maqola quyidagicha tuzilgan: ikkinchi bo‘ limda mavzuga oid nazariy adabiyot tahlil qilinadi va tadqiqot bo‘ shlig‘ i aniqlanadi; uchinchi bo‘ limda material va metodlar tavsiflanadi; to‘ rtinchi bo‘ limda natijalar jadvallarda umumlashtirilib izohlanadi; beshinchi bo‘ limda xulosa va amaliy tavsiyalar beriladi.

2. MAVZUGA OID ADABIYOTLAR TAHLILI

Kommunikativ kompetensiya tushunchasi D. Hymes tomonidan kiritilib, M. Canale va M. Swain modelida to‘ rt komponentga — grammatik, sotsiolingvistik, diskursiv va strategik kompetensiyaga — ajratilgan. L. Bachman ushbu modelni takomillashtirib, til qobiliyatining tashkiliy va pragmatik qatlamlarini farqlaydi. Yevropa Kengashining “Chet tillar bo‘ yicha umumevropa kompetensiyalari” hujjatining 2020-yilgi to‘ ldirilgan nashri esa mediatsiya (vositachilik) kompetensiyasini mustaqil kategoriya sifatida ajratadi — bu qoida tarjimon tayyorlash uchun bevosita ahamiyatga ega.

Tarjimon kompetensiyasining tuzilishi bo‘ yicha ikki nufuzli model mavjud. Barselona PACTE tadqiqot guruhi tarjima kompetensiyasini bilingval, ekstralingvistik, tarjima bo‘ yicha bilim, instrumental va strategik

subkompetensiyalarga hamda psixofiziologik komponentlarga ajratadi; bunda strategik subkompetensiya markaziy o‘ rin tutadi. Yevropa Ittifoqining EMT (European Master’s in Translation) kompetensiya ramkasi til va madaniyat, tarjima, texnologiya, shaxsiy va shaxslararo hamda xizmat ko‘ rsatish sohalarini ajratadi. Har ikki modelda og‘ zaki kasbiy muloqot alohida komponent sifatida emas, boshqa sohalar ichida tarqoq holda qayd etilgan.

Tarjimon tayyorlash didaktikasida ijtimoiy konstruktivistik yondashuv D. Kiraly tomonidan asoslangan: muallif tarjimonlik ko‘ nikmasi auditoriyada emas, real yoki realga yaqin loyiha ustidagi hamkorlikda shakllanishini ta’kidlaydi va o‘ qituvchining vazifasini bilim uzatuvchidan jarayonni qo‘ llab-quvvatlovchiga o‘ zgartiradi. Bu qoida L. S. Vigotskiyning yaqin rivojlanish zonasi nazariyasiga hamda J. Bruner ilgari surgan skaffolding g‘ oyasiga tayanadi.

TESOL metodikasining nazariy asoslari kommunikativ yondashuv doirasida ishlab chiqilgan. J. C. Richards va T. S. Rodgers kommunikativ metodikaning tamoyillarini tizimlashtirgan; R. Ellis va J. Willis topshiriq asosidagi ta’lim (Task-Based Language Teaching) modelini asoslagan; D. Nunan o‘ quvchi markazli o‘ quv dasturini loyihalash tamoyillarini ta’riflagan. Refleksiv amaliyot konsepsiyasi D. Schön ishlarida yoritilgan bo‘ lib, kasbiy ta’limning barcha sohalarida keng qo‘ llaniladi. Madaniyatlararo kompetensiya masalalari esa M. Byram modelida umumlashtirilgan.

Mavjud adabiyot tahlili ikki muhim bo‘ shliqni ko‘ rsatadi. Birinchidan, tarjimon kompetensiyasi modellari matn bilan ishlashga yo‘ naltirilgan bo‘ lib, ularda jonli kasbiy muloqotni boshqarish ko‘ nikmasi mustaqil o‘ lchov birligi sifatida ajratilmagan. Ikkinchidan, TESOL metodikasi vositalari til o‘ rganuvchi uchun ishlab chiqilgan bo‘ lib, ularni tarjimon tayyorlash vazifalariga moslashtirishning shart-sharoitlari va chegaralari aniqlanmagan: tarjimon uchun til maqsad emas, kasbiy faoliyat quroli hisoblanadi va bu didaktik yechimlarni ham o‘ zgartiradi. Ushbu maqola aynan shu bo‘ shliqni to‘ ldirishga qaratilgan.

3. TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-metodik xarakterga ega bo‘ lib, sifatiy dizayn asosida amalga oshirildi. Ishning asosiy natijasi empirik o‘ lchov emas, balki nazariy jihatdan asoslangan mexanizmlar tizimi va uni amaliyotga tatbiq etish modeli hisoblanadi.

Tadqiqot materialini uch guruh manba tashkil etdi: (a) tarjimon kompetensiyasining xalqaro modellari va ramkalari (PACTE, EMT) hamda CEFR ning mediatsiya bo‘ yicha deskriptorlari; (b) TESOL metodikasi va kommunikativ yondashuv bo‘ yicha nazariy adabiyot; (v) tarjimonlik yo‘ nalishi bo‘ yicha oliy ta’limning o‘ quv rejalari, fan dasturlari va malaka talablari.

Tadqiqotda quyidagi metodlardan foydalanildi: nazariy tahlil va sintez — kompetensiya tuzilishini aniqlash uchun; qiyosiy tahlil — TESOL tamoyillari bilan tarjimon kompetensiyasi modellarini chog‘ ishtirish uchun; tizimli yondashuv — mexanizmlar o‘ rtasidagi bog‘ liqlikni ochib berish uchun; modellashtirish — bosqichli modelni loyihalash uchun; ekspert baholash — taklif etilgan mexanizmlarning ichki izchilligini tekshirish uchun.

Pedagogik mexanizm deganda muayyan kompetensiya komponentining shakllanishini ta’minlovchi, maqsad, faoliyat mazmuni, tashkiliy shakl va qayta aloqadan iborat yaxlit didaktik birlik tushuniladi. Mexanizmni ajratishda uch mezon qo‘ llanildi: uning muayyan komponent bilan bevosita bog‘ liqligi; amaliyotda takrorlanadigan tashkiliy shaklga ega bo‘ lishi; hamda natijasining kuzatilishi va baholanishi mumkinligi.

Tadqiqotning cheklovlari. Birinchidan, ish nazariy xarakterga ega bo‘ lib, taklif etilgan mexanizmlar tizimi tajriba-sinov yo‘ li bilan tekshirilmagan — bu keyingi bosqich vazifasi hisoblanadi. Ikkinchidan, tahlil, asosan, og‘ zaki kasbiy muloqotga qaratilgan; yozma tarjima kompetensiyasi alohida tadqiqot predmeti sanaladi. Uchinchidan, sinxron tarjima kabi ixtisoslashgan yo‘ nalishlarning o‘ ziga xos talablari batafsil ko‘ rib chiqilmagan.

4. NATIJALAR VA TAHLIL

4.1. Kasbiy-yo‘ naltirilgan muloqot kompetensiyasining tarkibi

Kasbiy-yo‘ naltirilgan muloqot kompetensiyasi deganda tarjimonning turli til va madaniyatga mansub tomonlar o‘ rtasidagi muloqotni kasbiy me’yorlar doirasida samarali ta’minlash qobiliyati tushuniladi. Tahlil natijasida uning oltita tarkibiy komponenti ajratildi (1-jadval).

1-jadval. Kasbiy-yo‘ naltirilgan muloqot kompetensiyasining komponentlari

Komponent	Mazmuni	Tarjimonlik faoliyatidagi namoyon bo‘ lishi
Lingvistik-diskursiv	ikki tilda janr va uslubga mos matn hosil qilish	rasmiy uchrashuv nutqini tegishli registrda yetkazish; bayonot va savol-javob strukturasini saqlash
Madaniyatlararo	madaniy farqlarni anglash va ularni muloqotda hisobga olish	murojaat shakllari, muomala masofasi, rad javobini yumshatish usullaridagi tafovutlarni yumshatish

Komponent	Mazmuni	Tarjimonlik faoliyatidagi namoyon bo‘ lishi
Kasbiy-terminologik	soha atamalari va predmetli bilimga ega bo‘ lish	huquqiy, tibbiy, texnik yoki iqtisodiy sohaga oid atamani kontekstga mos tanlash
Interaktiv-mediativ	muloqot jarayonini boshqarish va tomonlar o‘ rtasida vositachilik qilish	navbatni tartibga solish, tushunmovchilikni aniqlashtirish, ma’lumotni qisqartirmasdan soddalashtirish
Strategik-refleksiv	kommunikativ uzilishni bartaraf etish va o‘ z faoliyatini tahlil qilish	noma’lum atamani izohlab berish, parafraz qilish, aniqlashtiruvchi savol berish, topshiriqdan keyin xatolarni tahlil qilish
Deontologik-etik	kasbiy odob me’yorlariga rioya qilish	betaraflikni saqlash, maxfiylikni ta’minlash, o‘ z fikrini qo‘ shmaslik, kompetensiya chegarasini tan olish

Ajratilgan komponentlar orasida interaktiv-mediativ va deontologik-etik komponentlar alohida ahamiyatga ega, chunki aynan ular tarjimonni til biluvchi shaxsdan kasbiy vositachiga ajratib turadi. Shu bilan birga, an’anaviy ta’lim amaliyotida bu ikki komponent eng kam metodik qo‘ llab-quvvatlanadi: ular yozma topshiriq orqali shakllanmaydi va faqat jonli, ko‘ p tomonlama muloqot vaziyatida rivojlanadi.

4.2. TESOL metodikasining tarjimon tayyorlashga tatbiq etiladigan tamoyillari

TESOL metodikasi tamoyillarining tarjimon tayyorlashga tatbiq etilishi to‘ g‘ ridan-to‘ g‘ ri ko‘ chirish emas, balki maqsadga muvofiq moslashtirish yo‘ li bilan amalga oshiriladi. Asosiy farq shundaki, til o‘ rganuvchi uchun til — o‘ zlashtirish obyekti, tarjimon uchun esa kasbiy faoliyat quroli (2-jadval).

2-jadval. TESOL tamoyillari va ularning tarjimon tayyorlashdagi moslashtirilishi

TESOL tamoyili	Til o‘ qitishdagi mazmuni	Tarjimon tayyorlashdagi moslashtirilishi
Kommunikativ yo‘ naltirilganlik	shaklga emas, ma’noni yetkazishga urg‘ u berish	baholash mezoni — grammatik xatoning yo‘ qligi emas, muloqot maqsadining amalga oshishi
Autentiklik	real hayotdan olingan material va vaziyatlar bilan ishlash	haqiqiy muzokara, brifing va ish uchrashuvi yozuvlari asosida topshiriq tuzish
O‘ quvchi markazlilik	o‘ quvchi ehtiyoji va darajasidan kelib chiqish	talabaning ixtisoslashuv sohasi (huquq, tibbiyot, texnika) bo‘ yicha individual traektoriya
Topshiriq asosidagi ta’lim	til aniq natijali vazifani bajarish jarayonida o‘ zlashtiriladi	topshiriq natijasi — bajarilgan tarjima xizmati (muzokara, brifing, ekskursiya)
Interaktivlik va hamkorlik	juftlik va guruhda ishlash orqali muloqot amaliyoti	ko‘ p rolli vaziyat: buyurtmachi — tarjimon — xorijiy hamkor ishtirokidagi simulyatsiya
Skaffolding	qo‘ llab-quvvatlashni bosqichma-bosqich kamaytirish	tayyorlangan lug‘ atdan tayyorgarliksiz jonli tarjimaga o‘ tish ketma-ketligi
Formativ baholash va qayta aloqa	jarayon davomida konstruktiv qayta aloqa berish	video yozuv asosida tahlil, o‘ zaro (peer) baholash, xato turlarini tasniflash

4.3. Pedagogik mexanizmlar tizimi

Yuqoridagi tamoyillar asosida oltita pedagogik mexanizm ajratildi. Har bir mexanizm maqsad, tashkiliy shakl va kutilayotgan natijaning yaxlit birligi sifatida tavsiflanadi (3-jadval).

3-jadval. Kasbiy-yo‘ naltirilgan muloqot kompetensiyasini rivojlantirishning pedagogik mexanizmlari

Mexanizm	Mohiyati	Amalga oshirish shakli	Kutilayotgan natija
1. Kommunikativ vaziyatni modellashtirish	real kasbiy vaziyatni auditoriyada qayta yaratish	rolli o‘ yin, ish uchrashuvi va muzokara simulyatsiyasi, matbuot anjumani modeli	yangi vaziyatda yo‘ qolib qolmaslik, muloqotni boshqara olish
2. Topshiriq asosidagi ta’lim	aniq natijaga yo‘ naltirilgan vazifalar zanjiri	tayyorgarlik – bajarish – tahlil sxemasi bo‘ yicha topshiriqlar tizimi	bilimning amaliy ko‘ nikmaga aylanishi
3. Skaffolding va mustaqillikni bosqichma-bosqich oshirish	qo‘ llab-quvvatlashni asta-sekin kamaytirish	tayyor glossariy →qisman tayyorgarlik → tayyorgarliksiz tarjima ketma-ketligi	kasbiy mustaqillik va o‘ ziga ishonchning shakllanishi
4. Hamkorlikdagi loyiha ishi	jamoada real yoki realga yaqin buyurtma ustida ishlash	guruh loyihasi: terminologik baza tuzish, tadbirni tarjima bilan ta’minlash	jamoada ishlash va kasbiy muloqot ko‘ nikmasi
5. Konstruktiv qayta aloqa va xato tahlili	xatoni jazolash emas, uning sababini aniqlash	video yozuv tahlili, xato turlarini tasniflash, o‘ zaro baholash	xatoni takrorlamaslik, o‘ z-o‘ zini nazorat qilish
6. Refleksiv amaliyot	o‘ z faoliyatini tizimli tahlil qilish	kasbiy kundalik, portfolio, topshiriqdan keyingi o‘ z-o‘ zini baholash anketasi	kasbiy o‘ sish traektoriyasini mustaqil belgilash

4.4. Mexanizm va komponent muvofiqligi

Mexanizmlar tizimining amaliy qiymati ular kompetensiya komponentlari bilan bog‘ langandagina namoyon bo‘ ladi. Quyidagi matritsa har bir mexanizmning qaysi komponentni rivojlantirishga xizmat qilishini ko‘ rsatadi (4-jadval).

4-jadval. “Pedagogik mexanizm — kompetensiya komponenti” muvofiqlik matritsasi

Komponent	1-mex.	2-mex.	3-mex.	4-mex.	5-mex.	6-mex.
Lingvistik-diskursiv	+	++	++	+	++	+
Madaniyatlararo	++	+	+	++	+	+
Kasbiy-terminologik	+	++	++	++	+	
Interaktiv-mediativ	++	++	+	++	+	+
Strategik-refleksiv	++	+	++	+	++	++
Deontologik-etik	++		+	++	+	++

Izoh: “++” — mexanizm ushbu komponentni rivojlantirishda yetakchi vazifani bajaradi; “+” — yordamchi vazifani bajaradi; “–” — bevosita ta’sir ko‘ rsatmaydi.

Matritsa tahlili uchta muhim kuzatuvni beradi. Birinchidan, birinchi mexanizm — kommunikativ vaziyatni modellashtirish — eng keng qamrovga ega bo‘ lib, olti komponentdan to‘ rttasi uchun yetakchi hisoblanadi; bu uning

tizimdagi markaziy o‘ rnini tasdiqlaydi. Ikkinchidan, deontologik-etik komponent faqat modellashtirish, hamkorlik va refleksiya orqali shakllanadi: kasbiy odob me’yorini ma’ruza shaklida bayon qilish mumkin, ammo uni faqat tanlov qilish zarurati tug‘ ilgan vaziyatda o‘ zlashtirish mumkin. Uchinchidan, refleksiv amaliyot terminologik komponentga bevosita ta’sir ko‘ rsatmaydi, ammo strategik komponentning asosiy quvvat manbai hisoblanadi.

4.5. Mexanizmlarni joriy etishning bosqichli modeli

Mexanizmlar bir vaqtda emas, ketma-ketlikda joriy etilishi lozim. Modelning to‘ rt bosqichi talabaning mustaqillik darajasi ortib borishiga muvofiq loyihalangan (5-jadval).

5-jadval. Pedagogik mexanizmlarni joriy etishning bosqichlari

Bosqich	Maqsad	Yetakchi mexanizmlar	Talaba mustaqilligi darajasi
I. Yo‘ naltiruvchi-diagnostik	boshlang‘ ich darajani aniqlash, kasbiy vaziyat tasavvurini shakllantirish	1-, 5-mexanizmlar	namuna kuzatiladi va tahlil qilinadi
II. Nazorat ostidagi mashq	nutqiy va terminologik bazani mustahkamlash	2-, 3-mexanizmlar	tayyorgarlik va qo‘ llab-quvvatlash bilan ishlaydi
III. Loyihaviy-amaliy	realga yaqin sharoitda kasbiy vazifani bajarish	1-, 4-mexanizmlar	jamoada mustaqil ishlaydi
IV. Refleksiv-baholovchi	natijani tahlil qilish va kasbiy o‘ sishni rejalashtirish	5-, 6-mexanizmlar	o‘ z faoliyatini mustaqil baholaydi

Modelning asosiy tamoyili — bosqichlarni almashtirib bo‘ lmasligi. Amaliyotda tez-tez uchraydigan xato shundaki, talaba terminologik va nutqiy bazasi shakllanmasdan turib jonli tarjima topshirig‘ iga jalb etiladi; natijada u muvaffaqiyatsizlikni ko‘ nikma yetishmasligi emas, shaxsiy qobiliyatsizlik deb qabul qiladi va kasbiy o‘ ziga ishonchi pasayadi. Aksincha, faqat ikkinchi bosqich bilan cheklanish talabani auditoriya sharoitidan tashqarida ishlay olmaydigan mutaxassisga aylantiradi.

4.6. Kompetensiya rivojlanishining darajalari

Kasbiy-yo‘ naltirilgan muloqot kompetensiyasining rivojlanish darajasini baholash uchun uch pog‘ onali shkala taklif etiladi (6-jadval). Shkala mezoni sifatida talabaning kutilmagan kommunikativ vaziyatda mustaqil qaror qabul qila olish darajasi olindi.

6-jadval. Kasbiy-yo‘ naltirilgan muloqot kompetensiyasining darajalari

Daraja	Muloqotni boshqarish	Strategik xatti-harakat	Kasbiy pozitsiya
Reproduktiv (past)	tayyorlangan vaziyatda ishlaydi, kutilmagan burilishda to‘ xtaladi	noma’lum atamada muloqotni uzadi yoki so‘ zma-so‘ z o‘ giradi	o‘ z fikrini qo‘ shib yuboradi, betaraflikni saqlay olmaydi
Adaptiv (o‘ rta)	vaziyat o‘ zgarganda sur’at va registrni moslashtiradi	parafraz va aniqlashtiruvchi savoldan foydalanadi	kasbiy me’yorlarni biladi, ammo murakkab holatda ikkilanadi
Ijodiy-innovatsion (yuqori)	muloqotni oldindan rejalashtiradi va faol boshqaradi	strategiyani vaziyatga qarab tanlaydi va uni asoslay oladi	betaraflik, maxfiylik va kompetensiya chegarasini izchil saqlaydi

4.7. Natijalarning muhokamasi

Taklif etilgan mexanizmlar tizimi bir necha nazariy qoidaga tayanadi. Birinchidan, u D. Kiraly asoslagan ijtimoiy konstruktivistik yondashuvni operatsional shaklga keltiradi: uchinchi bosqichdagi hamkorlikdagi loyiha ishi aynan “real

buyurtma ustida birgalikda ishlash” tamoyilining amaliy ifodasidir. Ikkinchidan, uchinchi mexanizm — skaffolding va mustaqillikni bosqichma-bosqich oshirish — L. S. Vigotskiyning yaqin rivojlanish zonasi nazariyasiga bevosita mos keladi.

Ayni paytda TESOL metodikasini tarjimon tayyorlashga tatbiq etishning chegaralarini ham qayd etish lozim. Til o‘ qitishda xato o‘ zlashtirish jarayonining tabiiy bosqichi sifatida qaraladi va ko‘ pincha atayin tuzatilmay qoldiriladi; tarjimonlik faoliyatida esa xato bevosita kommunikativ yoki huquqiy oqibatga olib kelishi mumkin. Shu bois beshinchi mexanizm — qayta aloqa va xato tahlili — tarjimon tayyorlashda TESOL amaliyotidagidan ko‘ ra qat’iyroq va tizimliroq qo‘ llanilishi kerak. Xuddi shunday, TESOLda ravonlik aniqlikdan ustun qo‘ yilishi mumkin, tarjimonlikda esa bu ikki mezon teng ahamiyatga ega.

Tadqiqotning yana bir muhim natijasi deontologik-etik komponentga oid kuzatuvdir. Kasbiy odob me’yorlari an’anaviy ravishda alohida nazariy kurs doirasida bayon qilinadi, ammo matritsa tahlili ko‘ rsatadiki, ular faqat tanlov zarurati tug‘ iladigan vaziyatda — masalan, tomonlardan biri tarjimondan o‘ z fikrini bildirishni yoki ma’lumotni yumshatishni so‘ raganda — real o‘ zlashtiriladi. Shu bois etik dilemma vaziyatlarini simulyatsiya topshiriqlariga ataylab kiritish maqsadga muvofiqdir.

Natijalarning amaliy ahamiyati ikki yo‘ nalishda namoyon bo‘ ladi. Kasbiy tayyorgarlik dasturlarini loyihalash uchun ular mexanizm tanlashning aniq mezonini beradi: har bir mexanizm muayyan komponent va bosqichga biriktiriladi. Baholash amaliyoti uchun esa uch darajali shkala talabaning kasbiy o‘ sishini kuzatib borish imkonini beradi.

5. XULOSA

O‘ tkazilgan nazariy tadqiqot quyidagi xulosalarga olib keladi.

Birinchidan, bo‘ lajak tarjimonning kasbiy-yo‘ naltirilgan muloqot kompetensiyasi oltita komponentdan iborat: lingvistik-diskursiv, madaniyatlararo, kasbiy-terminologik, interaktiv-mediativ, strategik-refleksiv va deontologik-etik. Ular orasida oxirgi ikki komponent tarjimonni til biluvchi shaxsdan kasbiy vositachiga ajratib turadi, biroq an’anaviy ta’limda eng kam metodik qo‘ llab-quvvatlanadi.

Ikkinchidan, TESOL metodikasining yettita tamoyili — kommunikativ yo‘ naltirilganlik, autentiklik, o‘ quvchi markazlilik, topshiriq asosidagi ta’lim, interaktivlik va hamkorlik, skaffolding hamda formativ baholash — tarjimon tayyorlashga to‘ g‘ ridan-to‘ g‘ ri ko‘ chirish yo‘ li bilan emas, maqsadga muvofiq moslashtirish orqali tatbiq etiladi.

Uchinchidan, ushbu tamoyillar asosida oltita pedagogik mexanizm asoslandi: kommunikativ vaziyatni modellashtirish, topshiriq asosidagi ta’lim, skaffolding va mustaqillikni bosqichma-bosqich oshirish, hamkorlikdagi loyiha ishi, konstruktiv qayta aloqa va xato tahlili hamda refleksiv amaliyot. Ular orasida kommunikativ vaziyatni modellashtirish eng keng qamrovga ega bo‘ lib, tizimning markaziy bo‘ g‘ ini hisoblanadi.

To‘ rtinchidan, mexanizmlar bir vaqtda emas, yo‘ naltiruvchi-diagnostik, nazorat ostidagi mashq, loyihaviy-amaliy va refleksiv-baholovchi bosqichlar ketma-ketligida joriy etilishi lozim; bosqichlarni almashtirish talabaning kasbiy o‘ ziga ishonchiga salbiy ta’sir ko‘ rsatadi.

Beshinchidan, TESOL metodikasini tatbiq etishning chegaralari mavjud: til o‘ qitishda xato o‘ zlashtirishning tabiiy bosqichi sanaladi, tarjimonlik faoliyatida esa u bevosita kommunikativ oqibatga olib keladi. Shu bois qayta aloqa va xato tahlili mexanizmi tarjimon tayyorlashda qat’iyroq va tizimliroq qo‘ llanilishi kerak.

Amaliy tavsiyalar: (a) tarjimonlik yo‘ nalishi o‘ quv dasturlariga kommunikativ vaziyat simulyatsiyasini muntazam amaliyot shakli sifatida kiritish; (b) etik dilemma vaziyatlarini simulyatsiya topshiriqlariga ataylab joylashtirish; (v) video yozuv asosidagi tahlil va o‘ zaro baholashni baholash tizimining doimiy elementiga aylantirish; (g) talabaning ixtisoslashuv sohasi bo‘ yicha individual terminologik bazasini portfolio doirasida to‘ playdigan tartib joriy etish.

Tadqiqot istiqbollari taklif etilgan mexanizmlar tizimini tajriba-sinov yo‘ li bilan tekshirish, kompetensiya darajalarini o‘ lchash uchun diagnostik metodikani ishlab chiqish hamda mexanizmlarning sinxron tarjima va maxsus sohalarga ixtisoslashgan tayyorgarlikdagi o‘ ziga xosligini o‘ rganish bilan bog‘ liq.

OLIY TA'LIMNING RAQAMLI EKOTIZIMIDA BO' LAJAK FILOLOGLARNING TRANSPROFESSIONAL KROSS-MADANIY KOMPETENSIYASINI RIVOJLANTIRISH METODIKASINI TAKOMILLASHTIRISH

Musayeva Gulnora Abdulxamidovna
Kimyo International University in Namangan, PhD
ORCID: 0009-0008-1463-5652
E-mail: gulnora11@gmail.com

Annotatsiya: *Ushbu maqolada oliy ta'limning raqamli ekotizimi sharoitida bo' lajak filologlarning transprofessional kross-madaniy kompetensiyasini rivojlantirish metodikasini takomillashtirish masalasi ko' rib chiqilgan. Tadqiqotning dolzarbligi O' zbekistonda amalga oshirilayotgan raqamlashtirish islohotlari, filolog-mutaxassislarga qo' yilayotgan transprofessional talablar hamda mavjud metodik ta'minotning ushbu ehtiyojlarga to' liq javob bermasligi bilan izohlanadi. Tadqiqot maqsadi — Hymes, Canale va Swain, Byram, Deardorff hamda Hofstedening nazariy modellariga, shuningdek Godwin-Jones, Warschauer va Chapellening raqamli ta'lim texnologiyalari borasidagi ishlariga tayangan holda, kross-madaniy kompetensiyaning transprofessional komponentini rivojlantiruvchi bosqichli metodikani ishlab chiqish va uning samaradorligini eksperimental tekshirishdan iborat. Tadqiqotda aralash metodologiya — sifat tahlili va pedagogik eksperiment (dastlabki va yakuniy diagnostika) qo' llanildi, tajribada 64 nafar bo' lajak filolog talaba (nazorat va tajriba guruhlari) ishtirok etdi. Natijalar tajriba guruhida barcha kompetensiya komponentlari, ayniqsa "savoir s'engager" va raqamli-transprofessional komponentlar bo' yicha statistik ahamiyatli o' sish kuzatilganini ko' rsatdi. Ishlab chiqilgan to' rt bosqichli metodika (diagnostik, integrativ-raqamli, madaniyatlararo simulyatsion va reflektiv bosqichlar) oliy ta'lim muassasalarining ingliz tili va tarjimashunoslik yo' nalishlari o' quv dasturlariga tatbiq etilishi mumkin.*

Kalit so' zlar: *transprofessional kompetensiya; kross-madaniy kommunikatsiya; raqamli ta'lim ekotizimi; bo' lajak filologlar; interkulturaliy kompetensiya; metodika; pedagogik eksperiment.*

СОВЕРШЕНСТВОВАНИЕ МЕТОДИКИ ФОРМИРОВАНИЯ ТРАНСПРОФЕССИОНАЛЬНОЙ МЕЖКУЛЬТУРНОЙ КОМПЕТЕНТНОСТИ БУДУЩИХ ФИЛОЛОГОВ В ЦИФРОВОЙ ЭКОСИСТЕМЕ ВЫСШЕГО ОБРАЗОВАНИЯ

Аннотация: *В статье рассматривается проблема совершенствования методики развития транспрофессиональной кросс-культурной компетенции будущих филологов в условиях цифровой экосистемы высшего образования. Актуальность исследования обусловлена цифровыми реформами в Узбекистане и недостаточной методической разработанностью транспрофессиональных требований к филологам. Цель работы — на основе моделей Хаймса, Канале и Свейна, Байрама, Дардорф и Хофстеде, а также исследований Годвин-Джонса, Уоршауэра и Чапелл в области цифровых образовательных технологий, разработать поэтапную методику и экспериментально проверить её эффективность. Использована смешанная методология: качественный анализ и педагогический эксперимент с участием 64 студентов (контрольная и экспериментальная группы). Результаты показали статистически значимый рост по всем компонентам компетенции в экспериментальной группе, особенно по компонентам "savoir s'engager" и цифро-транспрофессиональной компетенции. Разработанная четырёхэтапная методика может быть внедрена в учебные программы направлений английского языка и переводоведения.*

Ключевые слова: *транспрофессиональная компетенция; кросс-культурная коммуникация; цифровая образовательная экосистема; будущие филологи; межкультурная компетенция; методика; педагогический эксперимент.*

IMPROVING THE METHODOLOGY FOR DEVELOPING THE TRANSPROFESSIONAL CROSS-CULTURAL COMPETENCE OF FUTURE PHILOLOGISTS WITHIN THE DIGITAL ECOSYSTEM OF HIGHER EDUCATION

Abstract: *This article addresses the improvement of methodology for developing transprofessional cross-cultural competence among prospective philologists within the digital ecosystem of higher education. The relevance of the study is grounded in Uzbekistan's ongoing digitalization reforms and the insufficient methodological grounding of transprofessional requirements placed on philology graduates. The aim of the research is to develop a staged methodology, informed by the theoretical models of Hymes, Canale and Swain, Byram, Deardorff, and Hofstede, together with the digital-education scholarship of Godwin-Jones, Warschauer, and Chapelle, and to*

experimentally verify its effectiveness. A mixed-methods design was employed, combining qualitative content analysis with a pedagogical experiment (pre- and post-diagnostics) involving 64 prospective philology students divided into control and experimental groups. The findings revealed statistically significant gains across all competence components in the experimental group, most notably in the "savoir s'engager" component and in digitally mediated transprofessional competence. The resulting four-stage methodology — diagnostic, integrative-digital, intercultural-simulation, and reflective stages — is proposed for implementation in English language and translation studies curricula.

Keywords: *transprofessional competence; cross-cultural communication; digital educational ecosystem; prospective philologists; intercultural competence; methodology; pedagogical experiment.*

1. KIRISH

So‘ nggi o‘ n yillikda oliy ta’lim tizimining raqamlashtirilishi nafaqat texnik-texnologik, balki chuqur metodologik o‘ zgarishlarni ham talab qilmoqda. O‘ zbekiston Respublikasida qabul qilingan "Raqamli O‘ zbekiston – 2030" strategiyasi va oliy ta’limni isloh qilish bo‘ yicha davlat dasturlari ta’lim jarayonining barcha bosqichlarida raqamli vositalarning integratsiyalashuvini nazarda tutadi. Ushbu jarayon filologik ta’lim yo‘ nalishlarini ham chetlab o‘ tmaydi: bo‘ lajak filolog-mutaxassislar endilikda nafaqat til va adabiyot sohasidagi chuqur bilimlarga, balki turli kasbiy sohalar (huquq, tibbiyot, iqtisodiyot, axborot texnologiyalari) bilan chegaradosh vaziyatlarda samarali kommunikatsiya olib borish, ya’ni transprofessional kompetensiyaga ega bo‘ lishlari talab etilmoqda.

Globallashuv sharoitida kasbiy chegaralar tobora shartli tus olmoqda: tarjimon huquqiy hujjat bilan, til o‘ qituvchisi xalqaro loyiha hujjatlari bilan, filolog-tahririyat xodimi turli madaniy kontekstlardagi matnlar bilan ishlashga majbur bo‘ lmoqda. Bunday sharoitda kross-madaniy kompetensiya endi alohida fan sifatida emas, balki barcha kasbiy faoliyat turlarini kesib o‘ tuvchi integrativ sifat sifatida namoyon bo‘ ladi. Shu bilan birga, mavjud o‘ quv dasturlari va metodik qo‘ llanmalarda transprofessional va kross-madaniy komponentlarning uzviy bog‘ liqligi, ayniqsa raqamli ta’lim muhitida, yetarlicha aks etmagan.

Muammoning dolzarbligi quyidagi uch omil kesishmasida namoyon bo‘ ladi: birinchidan, davlat siyosati darajasidagi raqamlashtirish talablari; ikkinchidan, bo‘ lajak filologlarga nisbatan kuchayib borayotgan transprofessional talablar; uchinchidan, mavjud kross-madaniy kompetensiya modellarining (Bayram, Dirdorf) an’anaviy, ko‘ pincha auditoriya-markazlashgan formatda qolib ketayotgani va ularning raqamli ekotizim sharoitlariga moslashtirilmaganligi. Ushbu uchlik ziddiyat tadqiqot muammosini keltirib chiqaradi: bo‘ lajak filologlarning transprofessional kross-madaniy kompetensiyasini oliy ta’limning raqamli ekotizimi sharoitida rivojlantirishning ilmiy asoslangan metodikasi yetarlicha ishlab chiqilmagan.

Tadqiqotning maqsadi — nazariy modellarni tahlil qilish asosida bo‘ lajak filologlarning transprofessional kross-madaniy kompetensiyasini raqamli ta’lim ekotizimi sharoitida rivojlantiruvchi bosqichli metodikani ishlab chiqish va uning samaradorligini pedagogik eksperiment orqali asoslashdan iborat.

Ushbu maqsadga erishish uchun quyidagi vazifalar belgilandi: (1) kross-madaniy va transprofessional kompetensiya tushunchalarining nazariy-kontseptual asoslarini tahlil qilish; (2) mavjud metodik yondashuvlardagi bo‘ shliqlarni aniqlash; (3) raqamli ta’lim vositalariga asoslangan bosqichli metodikani ishlab chiqish; (4) metodikaning samaradorligini pedagogik eksperiment orqali tekshirish va statistik tahlil qilish.

Tadqiqotning ilmiy yangiligi shundaki, unda kross-madaniy kompetensiyaning an’anaviy komponentlari (Bayram modeli asosida) birinchi bor transprofessional o‘ lchov bilan uyg‘ unlashtirilgan holda, raqamli ta’lim ekotizimiga xos to‘ rt bosqichli (diagnostik, integrativ-raqamli, madaniyatlararo simulyatsion, reflektiv) metodik model sifatida taqdim etiladi. Tadqiqotning amaliy ahamiyati ishlab chiqilgan metodikaning oliy ta’lim muassasalarining filologiya, tarjimashunoslik va chet tillar ta’limi yo‘ nalishlari o‘ quv dasturlariga, shuningdek malaka oshirish kurslari mazmuniga tatbiq etilishi mumkinligi bilan belgilanadi.

2. ADABIYOTLAR TAHLILI

Kommunikativ kompetensiya nazariyasining metodologik negizi D. Hymes tomonidan yaratilgan bo‘ lib, u tilni nafaqat grammatik jihatdan to‘ g‘ ri, balki ijtimoiy-madaniy jihatdan mos qo‘ llash qobiliyati sifatida talqin qilgan. Keyinchalik M. Canale va M. Swain ushbu g‘ oyani grammatik, sotsiolingvistik, diskursiv va strategik komponentlardan iborat to‘ rt qismli modelga aylantirdilar, bu model kross-madaniy kompetensiya nazariyasining shakllanishiga asos bo‘ lib xizmat qildi.

M. Byramning madaniyatlararo kommunikativ kompetensiya (Intercultural Communicative Competence) modeli ushbu tadqiqot uchun markaziy nazariy asos hisoblanadi. Byram kompetensiyani beshta o‘ zaro bog‘ liq komponent — savoir (madaniy bilim), savoir comprendre (talqin va bog‘ lash malakasi), savoir apprendre/faire (o‘ zlashtirish va o‘ zaro ta’sir malakasi), savoir-être (munosabatlar — ochiqlik, mahalliy va boshqa madaniyatga nisbatan tanqidiy bo‘ lmagan

qiziqish) va savoir s’engager (tanqidiy madaniy ongni baholash) orqali izohlaydi. Ushbu model tadqiqotda diagnostika va o‘ lchov instrumentlarini ishlab chiqishning asosiy nazariy tayanchi bo‘ lib xizmat qildi.

D. Deardorff madaniyatlararo kompetensiyaning protsessual (Process Model) va piramidasimon (Pyramid Model) modellarini taklif etib, kompetensiyani statik holat emas, balki uzluksiz rivojlanuvchi jarayon sifatida ko‘ rib chiqadi. Deardorff modeli munosabat (attitude) darajasidan boshlab bilim va malaka (knowledge and skills), ichki natija (internal outcome) va tashqi natija (external outcome, ya’ni samarali va mosligi jihatdan kommunikatsiya)gacha bo‘ lgan bosqichlarni o‘ z ichiga oladi. Ushbu model tadqiqotda metodikaning bosqichma-bosqich tuzilishini asoslashda qo‘ llanildi.

G. Hofstedening madaniy o‘ lchovlar nazariyasi (kuch masofasi, individualizm-kollektivizm, noaniqlikdan qochish, erkaklik-ayollik, uzoq muddatli yo‘ naltirilganlik va boshqalar) o‘ zbek va ingliz tilli madaniyatlar o‘ rtasidagi kross-madaniy farqlarni tahlil qilish uchun tahliliy asos sifatida qo‘ llanildi, ayniqsa transprofessional vaziyatlarda (masalan, xalqaro loyihalarda muzokara olib borish) yuzaga keladigan madaniy ziddiyatlarni izohlashda foydali bo‘ ldi.

Raqamli ta’lim texnologiyalari sohasida R. Godwin-Jonesning yangi paydo bo‘ layotgan texnologiyalar (mobil ta’lim, sun’iy intellekt asosidagi til o‘ rganish vositalari) borasidagi tadqiqotlari, M. Warschauerning raqamli savodxonlik va texnologiya orqali ijtimoiy inklyuzivlik masalalari, shuningdek C. Chapellening kompyuter yordamida til o‘ rganishni (CALL) baholash mezonlari bo‘ yicha ishlari metodikaning texnologik komponentini loyihalashda tayanch manba bo‘ lib xizmat qildi. Xususan, Chapelle tomonidan taklif etilgan texnologiya-vositachiligidagi topshiriqlarni baholash mezonlari (til o‘ rganish salohiyati, ma’no e’tiborga olinishi, autentiklik, ta’sir va amaliylik) tadqiqotda ishlab chiqilgan raqamli topshiriqlarni loyihalashda qo‘ llanildi.

Yuqoridagi manbalar tahlili shuni ko‘ rsatadiki, kross-madaniy kompetensiya nazariyasi (Bayram, Dirdorf) va raqamli ta’lim texnologiyalari nazariyasi (Godwin-Jons, Uorshauer, Chapell) alohida-alohida yaxshi ishlab chiqilgan bo‘ lsa-da, ular o‘ rtasidagi uyg‘ unlik, xususan bo‘ lajak filologlarning transprofessional ehtiyojlariga moslashtirilgan integrativ metodik model sifatida deyarli o‘ rganilmagan. Aynan mana shu bo‘ shliq ushbu tadqiqotning nazariy-metodologik zaruratini belgilaydi.

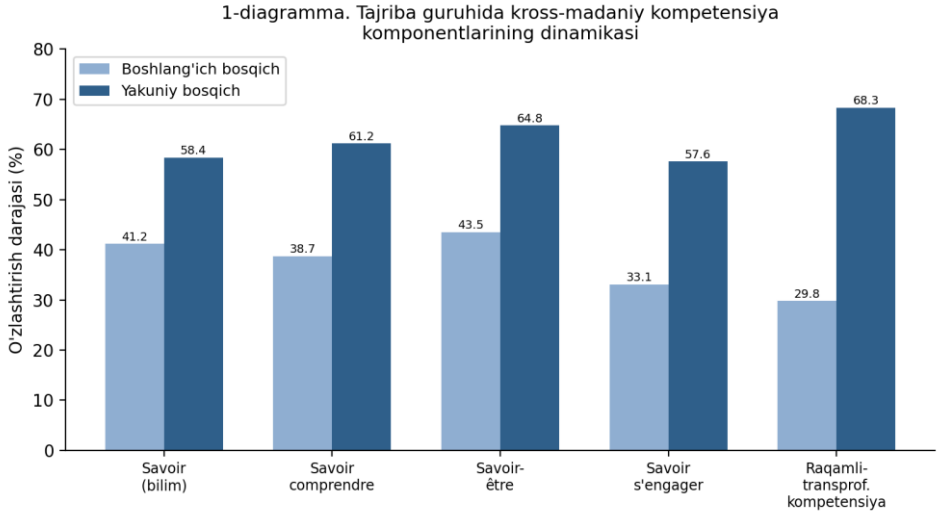
3. TADQIQOT METODOLOGIYASI

Tadqiqotda aralash metodologiya (mixed-methods design) qo‘ llanildi, unda sifat tahlili miqdoriy pedagogik eksperiment bilan uyg‘ unlashtirildi. Sifat tahlili bosqichida mavjud o‘ quv dasturlari, darsliklar va metodik qo‘ llanmalar kontent-tahlil usulida o‘ rganildi, bu orqali transprofessional kross-madaniy komponentlarning mavjud ta’lim mazmunida qanday aks etganligi aniqlandi.

Pedagogik eksperiment Toshkent kimyo-texnologiya xalqaro universitetining filologiya yo‘ nalishi talabalari orasida o‘ tkazildi. Tadqiqotga jami 64 nafar bo‘ lajak filolog talaba jalb qilindi, ular tasodifiy tanlov asosida ikki teng guruhga — nazorat guruhi (32 nafar) va tajriba guruhi (32 nafar) — bo‘ lindi. Guruhlar boshlang‘ ich diagnostika natijalari bo‘ yicha statistik jihatdan bir-biriga yaqin ekanligi t-test yordamida tasdiqlandi ($p > 0,05$).

Tadqiqot uch bosqichda amalga oshirildi. Aniqlovchi (diagnostik) bosqichda ikkala guruhda ham Byram va Deardorff modellari asosida moslashtirilgan diagnostik so‘ rovnoma va vaziyatli topshiriqlar (case-based tasks) yordamida boshlang‘ ich daraja aniqlandi. Shakllantiruvchi bosqichda tajriba guruhida ishlab chiqilgan to‘ rt bosqichli metodika (diagnostik, integrativ-raqamli, madaniyatlararo simulyatsion, reflektiv) joriy etildi, nazorat guruhi esa an’anaviy dastur bo‘ yicha ta’lim oldi. Nazorat bosqichida ikkala guruhda ham yakuniy diagnostika o‘ tkazildi va natijalar Styudent t-testi yordamida statistik qayta ishlandi.

Metodikaning integrativ-raqamli bosqichida ʋики-texnologiyalar, LMS platformalari va onlayn hamkorlik vositalaridan foydalangan holda transprofessional topshiriqlar (masalan, xalqaro shartnoma matnini madaniy jihatdan moslashtirish, ko‘ p tilli axborot xabarini turli madaniy auditoriya uchun qayta ishlash) taqdim etildi. Madaniyatlararo simulyatsion bosqichda talabalar rol o‘ yinlari va virtual muzokara simulyatsiyalari orqali Hofstede o‘ lchovlariga asoslangan madaniy ziddiyat vaziyatlarini hal qilishni mashq qildilar. Reflektiv bosqichda talabalar elektron kundalik (reflective e-journal) yuritish orqali o‘ z tajribalarini tahlil qildilar, bu Deardorff modelidagi "ichki natija" bosqichiga mos keladi.



4. NATIJALAR VA TAHLIL

Pedagogik eksperiment natijalari 1-jadvalda keltirilgan. Jadvaldan ko‘ rinib turibdiki, boshlang‘ ich bosqichda nazorat va tajriba guruhlari o‘ rtasida sezilarli farq kuzatilmagan (o‘ rtacha ko‘ rsatkichlar mos ravishda 37,3% va 37,3%). Yakuniy bosqichda esa tajriba guruhida o‘ rtacha ko‘ rsatkich 62,1% ga yetgan bo‘ lsa, nazorat guruhida bu ko‘ rsatkich atigi 42,9% ni tashkil etdi.

Kompetensiya komponenti	Nazorat guruhi (boshlang‘ ich), %	Nazorat guruhi (yakuniy), %	Tajriba guruhi (boshlang‘ ich), %	Tajriba guruhi (yakuniy), %
Savoir (madaniy bilim)	40.5	47.1	41.2	58.4
Savoir comprendre (talqin qilish)	39.0	44.6	38.7	61.2
Savoir-être (munosabat)	44.0	49.3	43.5	64.8
Savoir s’engager (tanqidiy ongli baholash)	32.8	38.0	33.1	57.6
Raqamli-transprofessional kompetensiya	30.1	35.4	29.8	68.3
O‘ rtacha ko‘ rsatkich	**37.3**	**42.9**	**37.3**	**62.1**

1-jadval. Nazorat va tajriba guruhlarida kross-madaniy kompetensiya komponentlarining dinamikasi

Eng yuqori o‘ sish dinamikasi "raqamli-transprofessional kompetensiya" komponentida qayd etildi (29,8% dan 68,3% gacha, ya’ni 38,5 foiz punktga o‘ sish), bu metodikaning raqamli-integrativ bosqichi eng samarali bosqich ekanligini ko‘ rsatadi. "Savoir s’engager" (tanqidiy ongli baholash) komponenti bo‘ yicha ham sezilarli o‘ sish (33,1% dan 57,6% gacha) kuzatildi, bu esa madaniyatlararo simulyatsion va reflektiv bosqichlarning ushbu komponentni rivojlantirishdagi rolini tasdiqlaydi.

1-diagrammada tajriba guruhidagi barcha besh komponent bo‘ yicha boshlang‘ ich va yakuniy natijalar solishtirma tarzda taqdim etilgan. Diagrammadan ko‘ rinib turibdiki, o‘ sish dinamikasi barcha komponentlarda bir tekis emas: bilim komponentlari (savoir, savoir comprendre)da o‘ sish nisbatan yumshoqroq, munosabat va faoliyatga yo‘ naltirilgan komponentlar (savoir-être, savoir s’engager)da, ayniqsa raqamli-transprofessional komponentda esa keskinroq bo‘ lgan. Bu holat raqamli vositalar orqali amaliy, vaziyatga asoslangan mashg‘ ulotlarning nazariy ma’ruzalarga qaraganda transprofessional ko‘ nikmalarni shakllantirishda ancha samaraliroq ekanligidan dalolat beradi.

Guruhlararo farqning statistik ahamiyatini tekshirish uchun mustaqil namunalar uchun Styudent t-testi qo‘ llanildi. Yakuniy bosqichdagi natijalar bo‘ yicha guruhlararo farq statistik jihatdan ahamiyatli bo‘ lib chiqdi ($t = 6,42$; erkinlik darajasi = 62; $p < 0,01$), bu esa ishlab chiqilgan metodikaning an’anaviy yondashuvga nisbatan sezilarli ustunligini tasdiqlaydi. Shu bilan birga, tajriba guruhi ichidagi "oldin – keyin" natijalarni solishtirish bog‘ liq namunalar uchun t-testi orqali tekshirildi va bu yerda ham statistik ahamiyatli farq ($t = 11,8$; $p < 0,001$) aniqlandi.

Sifat tahlili natijalari, xususan talabalarning reflektiv kundaliklaridagi yozuvlar, miqdoriy natijalarni tasdiqladi: talabalarning aksariyati raqamli hamkorlik topshiriqlari o‘ zlarida "nazariy bilim bilan real vaziyat o‘ rtasidagi

bog‘ liqlikni" ko‘ rishga yordam berganini qayd etishdi, bu Deardorff modelidagi bilim-munosabat-natija zanjirining amalda ishlashini ko‘ rsatadi.

5. XULOSA

O‘ tkazilgan tadqiqot natijalari oliy ta’limning raqamli ekotizimi sharoitida bo‘ lajak filologlarning transprofessional kross-madaniy kompetensiyasini rivojlantirish uchun ishlab chiqilgan to‘ rt bosqichli metodikaning (diagnostik, integrativ-raqamli, madaniyatlararo simulyatsion, reflektiv) yuqori pedagogik samaradorligini statistik jihatdan tasdiqladi. Tajriba guruhida barcha kompetensiya komponentlari bo‘ yicha nazorat guruhiga qaraganda sezilarli darajada yuqori o‘ sish qayd etildi, bu esa Byram va Deardorff nazariy modellarini raqamli ta’lim texnologiyalari (Godwin-Jons, Uorshauer, Chapell asoslarida) bilan uyg‘ unlashtirishning ilmiy-metodik asoslanganligini isbotlaydi.

Tadqiqot natijalaridan kelib chiqib, quyidagi tavsiyalar ilgari suriladi: oliy ta’lim muassasalarining filologiya va tarjimashunoslik yo‘ nalishlari o‘ quv dasturlariga transprofessional topshiriqlar tizimini integratsiya qilish; o‘ qituvchilar uchun raqamli-transprofessional topshiriqlar bankini yaratish; talabalarning reflektiv kompetensiyasini rivojlantirish maqsadida elektron portfolio va reflektiv kundalik amaliyotini joriy etish.

Tadqiqotning cheklovlari qatoriga tanlanma hajmining nisbatan cheklanganligi (bitta oliy ta’lim muassasasi doirasida) va eksperiment muddatining bir o‘ quv semestri bilan chegaralanganligi kiradi. Kelgusi tadqiqotlar uchun bir nechta oliy ta’lim muassasalarini qamrab oluvchi kengroq tanlanma asosida uzoq muddatli (longitudinal) tadqiqot o‘ tkazish, shuningdek sun’iy intellekt asosidagi shaxsiylashtirilgan ta’lim vositalarining transprofessional kompetensiya rivojlanishiga ta’sirini alohida o‘ rganish istiqbolli yo‘ nalish sifatida belgilandi.

MUALLIFLAR BAYONOTI

Mualliflar hissasi: Maqolaning konsepsiyasi, tadqiqot metodologiyasi, ma’lumotlar to‘ plash va tahlili, matnni yozish — Musayeva G.A. tomonidan yakka tartibda amalga oshirilgan.

Manfaatlar to‘ qnashuvi: Muallif manfaatlar to‘ qnashuvi mavjud emasligini bildiradi.

Moliyalashtirish: Ushbu tadqiqot biror grant yoki maxsus moliyalashtirish dasturi doirasida amalga oshirilmagan.

Annotatsiya: *Maqolada ingliz xalq og‘ zaki ijodi matnlarida mujassam bo‘ lgan sotsiomadaniy realiyalarni chet tilini o‘ qitish mazmuniga metodik integratsiya qilishning nazariy asoslari tahlil qilinadi. Tadqiqotning maqsadi folklor matnidagi madaniy markirlangan birliklarni aniqlashdan ularni madaniyatlararo muloqotda izohlashgacha olib boradigan didaktik mexanizmni asoslashdan iborat. Metodologik jihatdan konseptual differensiatsiya, funksional tahlil, qiyosiy tahlil, didaktik transformatsiya va integrativ sintez usullaridan foydalanildi. Tahlil natijasida sotsiomadaniy realiyalarni o‘ qitishning besh bosqichli mexanizmi — identifikatsiya, kontekstualizatsiya, interpretatsiya, qiyosiy-relatsion tahlil va kommunikativ mediatsiya — ishlab chiqildi. Mazkur mexanizm realiyani oddiy tarjima birligi sifatida emas, balki ijtimoiy norma, qadriyat, kommunikativ kutilma va madaniy perspektivani birlashtiruvchi didaktik birlik sifatida o‘ rganishga imkon beradi. Taklif etilgan yondashuv talabalarning madaniy ma’noni matn dalillari asosida anglash, o‘ z madaniy tajribasi bilan qiyoslash, stereotipik umumlashtirishdan qochish va madaniy ma’noni boshqa suhbatdosh uchun tushunarli tarzda qayta ifodalash ko‘ nikmalarini rivojlantirishga yo‘ naltirilgan.*

Kalit so‘ zlar: *madaniyatlararo muloqot kompetensiyasi, ingliz folklori, sotsiomadaniy realiya, lingvodidaktika, madaniy interpretatsiya, qiyosiy tahlil, madaniy mediatsiya, sotsiomadaniy kontekst.*

СОВЕРШЕНСТВОВАНИЕ МЕЖКУЛЬТУРНОЙ КОММУНИКАТИВНОЙ КОМПЕТЕНЦИИ СТУДЕНТОВ НА ОСНОВЕ ОБУЧЕНИЯ СОЦИОКУЛЬТУРНЫМ РЕАЛИЯМ АНГЛИЙСКОГО УСТНОГО НАРОДНОГО ТВОРЧЕСТВА

Аннотация: *В статье теоретически анализируются методические основы интеграции социокультурных реалий, представленных в текстах английского фольклора, в содержание обучения иностранному языку. Цель исследования состоит в обосновании дидактического механизма, обеспечивающего переход от выявления культурно маркированной единицы в фольклорном тексте к ее объяснению в межкультурном общении. Методология включает концептуальную дифференциацию, функциональный и сопоставительный анализ, дидактическую трансформацию и интегративный синтез. В результате разработан пятиэтапный механизм обучения: идентификация, контекстуализация, интерпретация, сравнительно-реляционный анализ и коммуникативная медиация. Такой подход позволяет рассматривать реалию не как единицу прямого перевода, а как дидактическую единицу, объединяющую социальную норму, ценность, коммуникативное ожидание и культурную перспективу. Предлагаемый механизм направлен на развитие у студентов умений аргументированно интерпретировать культурные значения, сопоставлять их с собственным опытом, избегать стереотипных обобщений и понятно объяснять культурный смысл собеседнику другой культуры.*

Ключевые слова: *межкультурная коммуникативная компетенция, английский фольклор, социокультурная реалия, лингводидактика, культурная интерпретация, сопоставительный анализ, культурная медиация, социокультурный контекст.*

ENHANCING STUDENTS’ INTERCULTURAL COMMUNICATIVE COMPETENCE THROUGH TEACHING SOCIOCULTURAL REALIA IN ENGLISH FOLKLORE

Abstract: *The article theoretically examines the methodological foundations for integrating sociocultural realia represented in English folklore into foreign-language teaching. The study aims to substantiate a didactic mechanism that moves learners from identifying culturally marked elements in folklore texts to explaining their meanings in intercultural communication. The methodology combines conceptual differentiation, functional and comparative analysis, didactic transformation, and integrative synthesis. The analysis results in a five-stage mechanism consisting of identification, contextualization, interpretation, comparative-relational*

analysis, and communicative mediation. This mechanism treats sociocultural realia not as items requiring direct translation but as didactic units connecting social norms, values, communicative expectations, and cultural perspectives. The proposed approach is intended to develop learners' ability to interpret cultural meanings through textual evidence, compare them with their own cultural experience, avoid stereotypical generalizations, and reformulate cultural meanings in ways that are accessible to interlocutors from different cultural backgrounds.

Keywords: *intercultural communicative competence, English folklore, sociocultural realia, language pedagogy, cultural interpretation, comparative analysis, cultural mediation, sociocultural context.*

KIRISH

Zamonaviy chet tilini o‘ qitishda kommunikativ natija grammatik, leksik va fonologik me’yorlarni egallash bilangina cheklanmaydi. Nutqiy harakat ijtimoiy vaziyat, madaniy norma, kommunikativ kutilma va suhbatdoshning perspektivasi bilan uyg‘ unlashgandagina mazmunli muloqot yuzaga keladi. Shu sababli madaniyatlararo muloqot kompetensiyasi chet tilidagi bilimlar majmui emas, balki boshqa madaniy tajribani anglash, farqni dalil asosida izohlash, o‘ z pozitsiyasini qayta ko‘ rib chiqish va vaziyatga mos kommunikativ strategiyani tanlash qobiliyatini ham o‘ z ichiga oladi. Byram interkultural kommunikativ kompetensiyani bilim, munosabat, interpretatsiya va aloqadorlik ko‘ nikmalari, o‘ zaro ta’sir hamda tanqidiy madaniy anglashning o‘ zaro bog‘ langan tizimi sifatida izohlaydi [1]. Bu yondashuv til darsidagi madaniy materialni faktlarni yodlashdan ko‘ ra ma’no bilan ishlash jarayoniga aylantirish zaruratini ko‘ rsatadi.

Sotsiomadaniy realiyalar mazkur jarayonda alohida metodik ahamiyatga ega. Ular muayyan jamiyatga xos predmet, marosim, ijtimoiy rol, murojaat shakli, turmush tarzi, qadriyat yoki tarixiy tajribani ifodalovchi, lekin faqat lug‘ aviy ekvivalent bilan to‘ liq ochilmaydigan birliklardir. Realiya til birligining nominativ ma’nosidan tashqari, muayyan vaziyatda kimning qanday harakat qilishi, nima maqbul yoki nomaqbul sanalishi, qanday ijtimoiy munosabat nazarda tutilishi kabi pragmatik ma’nolarni ham tashiydi. Shuning uchun realiyani o‘ qitish jarayoni “bu so‘ zning tarjimasi nima?” savolidan “bu detal ushbu vaziyatda qanday madaniy ma’no hosil qilmoqda?” savoliga o‘ tishi lozim.

Ingliz xalq og‘ zaki ijodi bu vazifani amalga oshirish uchun samarali matniy makon yaratadi. Folktale, legend, ballad, proverb va riddle kabi janrlarda kundalik turmush, hokimiyat va ijtimoiy maqom, oilaviy munosabat, mehnat, adolat, saxiylik, mehmondo‘ stlik, qo‘ rquv va jasorat singari tushunchalar narrativ voqea hamda obrazlar orqali kodlanadi. Folklor matnining didaktik qiymati uning “milliy madaniyatni to‘ liq aks ettirishi”da emas, balki talaba uchun muhokama qilinadigan, qiyoslanadigan va turli perspektivalardan qayta talqin qilinadigan madaniy vaziyat yaratishidadir. Lwin va Marlina folktalelardan ingliz tilini xalqaro til sifatida o‘ qitish paradigmasini amaliyotga tatbiq etishda foydalanish mumkinligini ta’kidlaydi [6].

Mavzuning metodik muammosi shundaki, folklor darsda ko‘ pincha syujetni tushunish, yangi so‘ zlarni o‘ rganish yoki axloqiy xulosani aniqlash bilan chegaralanadi. Bunday ishlash usuli matndagi madaniy ma’noni faol kommunikativ resursga aylantirmaydi. Talaba realiyani taniydi, biroq uning ijtimoiy funksiyasini izohlash, o‘ z madaniy tajribasi bilan funksional qiyoslash yoki boshqa madaniyat vakiliga tushuntirish bosqichiga yetib bormasligi mumkin. Shu bois maqolada sotsiomadaniy realiyalar bilan ishlashni ketma-ket didaktik amallar tizimi sifatida tashkil etish masalasi markazga qo‘ yiladi.

Tadqiqotning maqsadi ingliz folklori matnlaridagi sotsiomadaniy realiyalarni o‘ qitish asosida talabalarning madaniyatlararo muloqot kompetensiyasini rivojlantirishga xizmat qiluvchi bosqichli didaktik mexanizmni nazariy jihatdan asoslashdir. Mazkur maqsad doirasida realiyaning lingvodidaktik xususiyatlari aniqlanadi, interkultural ta’lim va folklor tadqiqotlaridagi yondashuvlar qiyoslanadi, realiya bilan ishlashning o‘ quv amallari ishlab chiqiladi hamda ushbu amallarning kutiladigan kognitiv va kommunikativ natijalari tizimlashtiriladi.

ADABIYOTLAR TAHLILI

Interkultural ta’lim nazariyasida madaniyat tayyor faktlar to‘ plami sifatida emas, balki ma’nolar, perspektivalar va ijtimoiy amaliyotlar tizimi sifatida ko‘ riladi. Byramning qayta ko‘ rib chiqilgan modelida o‘ quvchi boshqa madaniyat haqidagi bilimni o‘ zlashtirish bilan birga, hujjat yoki hodisani interpretatsiya qilish, uni o‘ z tajribasi bilan bog‘ lash, yangi vaziyatda bilimni qo‘ llash va madaniy amaliyotni tanqidiy baholashga tayyor bo‘ lishi kerak [1]. Mazkur model sotsiomadaniy realiyani statik “country fact” emas, balki interpretatsiya qilinadigan va kommunikativ vazifada qo‘ llanadigan birlik sifatida o‘ qitish uchun nazariy asos beradi.

Folklor matnlarining interkultural imkoniyatlari bo‘ yicha tadqiqotlar ularni faqat madaniy reprezentatsiya sifatida ko‘ rish yetarli emasligini ko‘ rsatadi. De Bruijn folktalelar bilan ishlashda reprezentatsiyadan ishtirokka o‘ tish, ya’ni o‘ quvchini tayyor madaniy obrazni qabul qiluvchi emas, balki matn ma’nosini muhokama qiluvchi subyekt sifatida jalb etish zarurligini asoslaydi [2]. Muallif, shuningdek, folklorni bir butun xalq yoki madaniyatning “haqiqiy” va o‘ zgarmas vakili sifatida taqdim etish othering xavfini kuchaytirishi mumkinligini ko‘ rsatadi [2]. Bu xulosa realiyalarni kontekstga bog‘ liq va ko‘ p talqinli birlik sifatida o‘ qitish zaruratini kuchaytiradi.

Heggernesning ingliz tili darsida matnlarning interkultural kommunikativ kompetensiyani rivojlantirishdagi roli bo‘ yicha tanqidiy sharhi badiiy va autentik matnlarning qiymatini ularning o‘ zidan ko‘ ra ular asosida yaratiladigan dialogik faoliyat bilan bog‘ laydi [3]. Matn turli perspektivalarni ko‘ rish, dalil keltirish, stereotipni savol ostiga olish va madaniy ma’noni muzokara qilishga undaganda interkultural resursga aylanadi. Demak, ingliz folklori tanlanganda ham syujetning mashhurligi yoki lingvistik soddaligi bilan cheklanmay, matndan qanday didaktik affordans hosil qilish mumkinligi e’tiborga olinishi lozim.

Hidayah va Ali folktale-mediated tasks orqali EFL o‘ rganuvchilarining interkultural anglashini rivojlantirish imkoniyatlarini ko‘ rsatadi [4]. Ularning tadqiqotida folklor topshiriqlari madaniy ramz, norma va qadriyatlarni aniqlash hamda muhokama qilishga yo‘ naltiriladi. Ushbu yondashuv maqolada taklif qilinayotgan identifikatsiya va interpretatsiya bosqichlari bilan metodik jihatdan uyg‘ un: talaba avvalo madaniy markirlangan elementni topadi, keyin uning narrativ va ijtimoiy funksiyasini izohlaydi.

Lwinning Osiyo folktalelarini qiyosiy tahlil qilishga bag‘ ishlangan tadqiqoti madaniyatlararo anglashni “o‘ xshash/farqli” juftligi bilan cheklamasdan, hodisalarning funksional va qadriy asoslarini qiyoslash muhimligini ko‘ rsatadi [5]. Lwin va Marlina esa folktalelarni English as an International Language doirasida o‘ quvchining turli madaniy tajribalarni ingliz tilida ifodalashi va muzokara qilishi uchun resurs sifatida talqin qiladi [6]. Bu ikki yondashuv birgalikda qiyosiy-relatsion tahlil va kommunikativ mediatsiya bosqichlarini asoslash imkonini beradi.

Tahlil qilingan adabiyotlarda uchta umumiy metodik yo‘ nalish kuzatiladi: birinchidan, madaniy mazmun kontekst va perspektiva bilan bog‘ liq holda talqin qilinadi; ikkinchidan, o‘ quvchi passiv qabul qiluvchi emas, balki ma’no yaratuvchi va qiyoslovchi subyekt sifatida qaraladi; uchinchidan, yakuniy natija boshqa madaniyat haqidagi faktni aytib berish emas, balki madaniy ma’noni tushuntirish va muloqotda vositachilik qilishdir. Shu bilan birga, sotsiomadaniy realiya bilan ishlashning ushbu yo‘ nalishlarini yagona ketma-ket didaktik mexanizmga birlashtirish masalasi alohida ishlab chiqishni talab qiladi.

TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-konseptual xarakterga ega. Maqolada empirik tajriba va statistik tekshiruv natijalari keltirilmaydi; asosiy vazifa mavjud ilmiy yondashuvlarni tizimlashtirish va ularni ingliz folkloridagi sotsiomadaniy realiyalarni o‘ qitishga mos didaktik amallarga transformatsiya qilishdan iborat. Manbalar uch mezon asosida tanlandi: chet tili yoki interkultural ta’limga bevosita aloqadorligi; folklorning madaniy ma’no yaratish funksiyasini izohlashi; o‘ quvchining interpretatsiya, qiyoslash yoki mediatsiya faoliyatini tashkil etishga imkon beruvchi metodik kategoriyalarni taklif etishi.

Nazariy tahlilda konseptual differensiatsiya, funksional tahlil, qiyosiy tahlil, didaktik transformatsiya va integrativ sintez usullaridan foydalanildi. Konseptual differensiatsiya yordamida “madaniy bilim”, “sotsiomadaniy realiya”, “madaniy perspektiva”, “interpretatsiya” va “mediatsiya” tushunchalarining o‘ qitishdagi vazifalari ajratildi. Funksional tahlil realiyaning matndagi semantik va narrativ rolini uning ijtimoiy-pragmatik funksiyasi bilan bog‘ lashga xizmat qildi. Qiyosiy tahlil o‘ rganilayotgan hodisani talabaning o‘ z madaniy tajribasi bilan funksional munosabatda ko‘ rish tamoyilini aniqladi. Didaktik transformatsiya nazariy kategoriyalarni kuzatiladigan o‘ quv amallariga aylantirish uchun qo‘ llandi, integrativ sintez esa ushbu amallarni yagona bosqichli mexanizmga birlashtirdi.

Har bir sotsiomadaniy realiya uch o‘ zaro bog‘ liq analitik mezon bo‘ yicha ko‘ rib chiqildi: birinchisi — matndagi semantik-narrativ vazifa; ikkinchisi — ijtimoiy-madaniy vaziyatdagi pragmatik funksiya; uchinchisi — boshqa madaniy tajriba bilan qiyoslash va tushuntirish imkoniyati. Mazkur mezonlar realiyani faqat predmet yoki nom sifatida tasniflashdan ko‘ ra uning qanday kognitiv, refleksiv va kommunikativ harakatni yuzaga keltirishini aniqlashga qaratildi.

Tahlil birligi sifatida folklor matnidagi madaniy markirlangan element va u bilan bog‘ liq kommunikativ vaziyat qabul qilindi. Natijalarni tizimlashtirishda har bir bosqich uchun o‘ qituvchining yo‘ naltiruvchi savoli, talabaning asosiy amali, kutiladigan o‘ quv mahsuli va madaniyatlararo muloqot kompetensiyasiga qo‘ shadigan hissasi ajratildi. Shu asosda besh bosqichli didaktik mexanizm shakllantirildi.

NATIJALAR VA ULARNING TAHLILI

Nazariy tahlil natijasida sotsiomadaniy realiyani o‘ qitish besh o‘ zaro bog‘ langan didaktik amal asosida tashkil etilishi aniqlandi: 1) identifikatsiya, 2) kontekstualizatsiya, 3) interpretatsiya, 4) qiyosiy-relatsion tahlil, 5) kommunikativ mediatsiya. Ketma-ketlikning metodik mantig‘ i realiyani ko‘ rishdan uning vaziyatdagi ma’nosini tushuntirishga, undan esa madaniyatlararo muloqotda qayta ifodalashga o‘ tishdan iborat. Bosqichlar mustaqil mashqlar majmui emas; har bir keyingi amal oldingi bosqichda yaratilgan ma’noga tayangan holda murakkablashadi.

Jadval 1

Sotsiomadaniy realiyalarni o‘ qitishning bosqichli didaktik mexanizmi

Bosqich	Asosiy savol	Talabaning amali	Kutiladigan natija

1. Identifikatsiya	Qaysi detal madaniy jihatdan markirlangan va nega muhim?	Realiyani ajratadi, matn dalilini belgilaydi	Madaniy signalni tanish
2. Kontekstualizatsiya	U qaysi tarixiy, ijtimoiy yoki kommunikativ vaziyatda ma’no kasb etadi?	Kontekstni tiklaydi, stereotipik umumlashtirishni cheklaydi	Kontekstga sezgir anglash
3. Interpretatsiya	Realiya qahramon qarori, maqom yoki normani qanday izohlaydi?	Sabab va madaniy ma’no o‘ rtasidagi aloqani asoslaydi	Madaniy inferensiya
4. Qiyosiy-relatsion tahlil	Boshqa madaniyatdagi o‘ xshash hodisa bilan funksional munosabat qanday?	Funksiya, qadriyat va vaziyatni qiyoslaydi	Perspektivalararo bog‘ lanish
5. Kommunikativ mediatsiya	Bu ma’noni boshqa madaniyat vakiliga qanday tushuntirish mumkin?	Qayta ifodalaydi, izohlaydi, noto‘ g‘ ri talqinni oldini oladi	Madaniy ma’noni vositachilik bilan yetkazish

Birinchi bosqich — identifikatsiya — matndagi madaniy markirlangan elementni ajratishga qaratiladi. Bu bosqichda asosiy savol “bu so‘ z nimani anglatadi?” emas, “bu detal voqea, qahramon yoki ijtimoiy munosabatni tushunishda nega muhim?” shaklida qo‘ yiladi. Predmet, kiyim, taom, marosim, unvon, murojaat shakli yoki makon belgisi o‘ zining semantik va narrativ vazifasi bilan birga aniqlanadi. Hidayah va Ali folktale asosidagi topshiriqlarda ramz, norma va qadriyatlarni aniqlash o‘ quvchini syujet darajasidan madaniy ma’no darajasiga olib chiqishini ko‘ rsatadi [4]. Shuning uchun identifikatsiya “realiyani topish” bilan tugamaydi; talaba nima uchun aynan shu birlik madaniy tahlilga loyiq ekanini matn dalili bilan asoslaydi.

Ikkinchi bosqich — kontekstualizatsiya — realiyani tarixiy, ijtimoiy va kommunikativ sharoit bilan bog‘ liq holda ochishni talab qiladi. Bir xil predmet yoki xatti-harakat turli davr, guruh va vaziyatlarda turlicha ma’no kasb etishi mumkin. Shu sababli realiya o‘ zgarmas “milliy belgi” emas, muayyan folklor vaziyatidagi kontekstual birlik sifatida talqin qilinadi. Masalan, ijtimoiy maqomni bildiruvchi murojaat shakli lug‘ aviy jihatdan tushunarli bo‘ lsa ham, qahramonlar o‘ rtasidagi masofa, hurmat, hokimiyat yoki kinoyani anglamasdan uning pragmatik funksiyasi ochilmaydi. De Bruijnning folktalelarni butun madaniyatning to‘ liq vakili sifatida taqdim etish otheringni kuchaytirishi mumkinligi haqidagi xulosasi aynan shu bosqichning ehtiyotkorlik tamoyilini asoslaydi [2].

Uchinchi bosqich — interpretatsiya — realiya va madaniy ma’no o‘ rtasidagi bog‘ lanishni dalil asosida tushuntirishga qaratiladi. Talaba realiyaning qahramon qarori, ijtimoiy maqom, axloqiy baho, o‘ zaro munosabat yoki kommunikativ kutilmaga ta’sirini izohlaydi. Bu yerda “nima sodir bo‘ ldi?” savoli “bu harakatning madaniy mantig‘ i nimada?” savoliga ko‘ chadi. Interpretatsiya jarayoni bitta “to‘ g‘ ri” madaniy javobni yodlash emas; aksincha, matn dalili, kontekst va alternativ perspektivalar asosida asoslangan xulosa chiqarishdir. Heggernes ta’kidlagan dialogik ma’no yaratish tamoyili bunday topshiriqlarning nazariy tayanchidir [3].

To‘ rtinchi bosqich — qiyosiy-relatsion tahlil — o‘ rganilayotgan realiyani talabaning o‘ z madaniyatidagi hodisa bilan mexanik tenglashtirishni emas, ular o‘ rtasidagi funksional munosabatni aniqlashni nazarda tutadi. Talaba tashqi o‘ xshashlik yoki farqni sanab o‘ tish bilan cheklanmay, hodisalar qaysi vaziyatda qo‘ llanishi, qanday qadriyatni ifodalashi, ishtirokchilar xulqiga qanday ta’sir ko‘ rsatishi va ularni tushuntirish uchun qaysi kontekst zarurligini solishtiradi. Lwinning qiyosiy folktale tahliliga doir ishlari madaniyatlararo anglashda bunday qiyoslashning imkoniyatlarini ko‘ rsatadi [5]. Natijada qiyoslash “bizda bunday emas” tipidagi baholashdan sabab va funksiyani tushuntirishga o‘ tadi.

Beshinchi bosqich — kommunikativ mediatsiya — avvalgi bosqichlarda anglangan madaniy ma’noni boshqa suhbatdosh uchun tushunarli shaklda qayta ifodalashga qaratiladi. Talaba realiyani so‘ zma-so‘ z tarjima qilish bilan kifoyalanmay, uning vaziyatdagi ma’nosi, ijtimoiy funksiyasi va ehtimoliy noto‘ g‘ ri talqinlarini hisobga olgan holda izoh beradi. Masalan, marosim, murojaat shakli yoki ramziy predmetni boshqa madaniyat vakiliga tushuntirish topshirig‘ i aniqlashtirish, misol keltirish, analogiya qurish, perspektivani moslashtirish va zarur bo‘ lsa stereotipni rad etish

strategiyalarini talab qiladi. Lwin va Marlina folktalelarni turli madaniy tajribalarni ingliz tilida ifodalash va muzokara qilish resursi sifatida ko‘ rishi ushbu bosqichning kommunikativ yo‘ nalishini qo‘ llab-quvvatlaydi [6].

Besh bosqichning o‘ zaro aloqasi sotsiomadaniy realiyani lug‘ at birligidan kommunikativ resursga aylantiradi. Identifikatsiyasiz talaba nimani tahlil qilayotganini aniq belgilay olmaydi; kontekstualizatsiyasiz ma’no stereotipga aylanishi mumkin; interpretatsiyasiz qiyoslash yuzaki qoladi; qiyosiy-relatsion tahlilsiz o‘ z va boshqa madaniyat o‘ rtasidagi bog‘ lanish shakllanmaydi; mediatsiyasiz esa anglangan ma’no real muloqotga ko‘ chmaydi. Shu jihatdan mexanizm kognitiv, refleksiv va kommunikativ faoliyatni bitta didaktik zanjirga birlashtiradi.

1-rasm

Sotsiomadaniy realiyani o‘ qitishning didaktik ketma-ketligi

1-rasmda ko‘ rsatilgan ketma-ketlik chiziqli nazorat algoritmi emas, balki pedagogik yo‘ naltirishning asosiy trayektoriyasidir. Murakkab matnlarda o‘ quvchi interpretatsiyadan kontekstga qaytishi yoki mediatsiya jarayonida qiyosiy tahlilni qayta ko‘ rib chiqishi mumkin. Biroq dars dizaynida besh amalning mavjudligi realiyani faqat tarjima va izoh bilan cheklab qo‘ ymaslik uchun metodik nazorat vazifasini bajaradi.

Jadval 2

Folklor realiyasi bilan ishlash uchun topshiriq konstruktorlari

Didaktik maqsad	Topshiriq formulasi	Baholanadigan dalil
Madaniy signalni aniqlash	Matndan madaniy jihatdan markirlangan 2–3 detalni toping va ularning syujetdagi vazifasini izohlang.	Matnga tayangan asoslash
Kontekstni tiklash	Realiya qanday ijtimoiy munosabat yoki tarixiy sharoit bilan bog‘ langanini tushuntiring.	Kontekstning relevanti
Interpretatsiya	Qahramonning qarorini ushbu realiya orqali qanday tushuntirish mumkin?	Sabab–ma’no bog‘ lanishi
Qiyoslash	O‘ z madaniyatingizdagi funksional jihatdan yaqin hodisa bilan qiyoslang; o‘ xshashlik va farq sabablarini ko‘ rsating.	Funksional qiyoslash
Mediatsiya	Bu realiyani ingliz tilida boshqa madaniyat vakiliga stereotipsiz tushuntiring.	Aniqlik, kontekst, perspektivani moslashtirish

MUHOKAMA

Taklif etilgan mexanizmning asosiy metodik farqi sotsiomadaniy realiyani “madaniyat haqidagi ma’lumot”dan “madaniy ma’no bilan bajariladigan faoliyat”ga ko‘ chirishidadir. An’anaviy yondashuvda o‘ qituvchi realiyaning izohini beradi, talaba esa uni eslab qoladi. Bosqichli yondashuvda esa talaba matn dalilini topadi, kontekstni tiklaydi, ma’noni asoslaydi, boshqa perspektiva bilan bog‘ laydi va yakunda uni kommunikativ shaklda qayta ifodalaydi. Shu sababli o‘ qituvchining roli ham o‘ zgaradi: u folklordagi madaniy mazmunning yagona talqinini beruvchi manba emas, balki dalil, kontekst va perspektiva asosida xulosa chiqarishni boshqaruvchi moderatorga aylanadi.

Folklor materialini tanlash ham metodik qaror sifatida ko‘ rilishi kerak. Har qanday mashhur ertak yoki ballada avtomatik ravishda interkultural materialga aylanmaydi. Matnda talaba ajrata oladigan madaniy markirlangan birlik, muhokama qilinadigan ijtimoiy vaziyat, alternativ perspektiva va qiyoslash imkoniyati mavjud bo‘ lishi zarur. Heggernesning matn qiymatini undan hosil qilinadigan didaktik affordans bilan bog‘ lash haqidagi xulosasi bu mezonni qo‘ llab-quvvatlaydi [3]. Demak, matn tanlashda til darajasi bilan bir qatorda “qaysi madaniy savolni ochadi?” va “qanday kommunikativ mahsulga olib keladi?” savollari ham qo‘ yilishi lozim.

Yana bir muhim masala — stereotiplashtirish xavfi. Folklor tarixiy va ijtimoiy tajribani aks ettiradi, biroq u zamonaviy jamiyatning barcha a’zolari uchun yagona norma sifatida taqdim etilmasligi kerak. “English people believe…”,

“British culture always…” kabi mutlaq formulalar o‘ rniga “ushbu matnda”, “ushbu davr yoki vaziyatda”, “qahramonlar o‘ rtasidagi munosabatda” kabi kontekstual formulalar qo‘ llanishi maqsadga muvofiq. De Bruijnning reprezentatsiyadan ishtirokka o‘ tish haqidagi yondashuvi o‘ quvchini tayyor milliy obrazni qabul qilishdan ko‘ ra uni savol ostiga olish va muhokama qilishga undaydi [2].

Kommunikativ mediatsiya bosqichi mexanizmning yakuniy, lekin alohida ahamiyatga ega qismidir. Madaniyatlararo muloqotda suhbatdosh ko‘ pincha muayyan realiyaning nomini emas, uning vaziyatdagi ma’nosini tushunishga ehtiyoj sezadi. Shuning uchun talaba izoh berishda “ekvivalent topish”dan ko‘ ra ma’noni moslashtirish, zarur kontekstni tanlash va ehtimoliy noto‘ g‘ ri talqinni oldindan ko‘ rishga o‘ rgatiladi. Bu faoliyat ingliz tilini faqat target-culturega kirish vositasi emas, balki turli madaniy tajribalar o‘ rtasida vositachilik qiluvchi til sifatida qo‘ llashga imkon beradi [6].

Mazkur nazariy modelning cheklovi shundaki, maqolada uning samaradorligini ko‘ rsatuvchi empirik tajriba natijalari berilmagan. Shu sababli modelning keyingi bosqichdagi verifikatsiyasi nazorat va tajriba guruhlarida sotsiomadaniy realiyani aniqlash, kontekstual izohlash, qiyoslash va mediatsiya ko‘ rsatkichlarini oldingi va keyingi o‘ lchovlar orqali solishtirishni talab qiladi. Bunday empirik tekshiruv bosqichlarning qaysi biri talabalarda ko‘ proq qiyinchilik tug‘ dirishini va topshiriq dizaynining qaysi elementlari madaniyatlararo muloqot kompetensiyasi rivojiga kuchliroq ta’sir ko‘ rsatishini aniqlash imkonini beradi.

Bosqichli mexanizmni amaliy mashg‘ ulotga ko‘ chirishda topshiriqlarning o‘ zaro davomiyligi alohida ahamiyat kasb etadi. Bir matn doirasida identifikatsiya topshirig‘ i keyingi kontekstualizatsiya uchun dalil beradi; interpretatsiya esa qiyoslash uchun tayanch fikrni yaratadi. Shu sababli topshiriqlar alohida, bir-biridan uzilgan savollar ko‘ rinishida emas, yagona kommunikativ muammo atrofida qurilishi maqsadga muvofiq. Masalan, talaba avval qahramonning murojaat shakli yoki marosimga oid detalni aniqlaydi, keyin bu detal qaysi ijtimoiy munosabatni ko‘ rsatayotganini izohlaydi, o‘ z madaniyatidagi funksional jihatdan yaqin holat bilan qiyoslaydi va yakunda ushbu farqni chet ellik suhbatdoshga tushuntirish uchun qisqa mediatsion matn yaratadi. Bunday dizayn til faoliyatini madaniy tahlildan ajratmaydi; aksincha, o‘ qish, gapirish va yozish amallari madaniy ma’noni aniqlash va qayta ifodalash vositasiga aylanadi.

Baholash nuqtayi nazaridan ham faqat realiyani to‘ g‘ ri nomlash yoki tarjima qilish yetarli ko‘ rsatkich bo‘ la olmaydi. Topshiriq mahsulida kamida to‘ rtta sifat belgisi kuzatilishi mumkin: matn daliliga tayanish, kontekstning adekvatligi, qiyoslashning funksionalligi va izohning kommunikativ tushunarliligi. Talaba madaniy farqni umumlashtirib yuborsa, kontekstdan uzilgan hukm bersa yoki o‘ z madaniy tajribasini universal me’yor sifatida qo‘ llasa, javob lingvistik jihatdan to‘ g‘ ri bo‘ lsa ham interkultural nuqtayi nazardan yetarli emas. Aksincha, ehtiyotkor modal formulalar, alternativ talqinni tan olish va suhbatdosh uchun zarur fon ma’lumotini tanlay bilish mediatsiyaning sifatini ko‘ rsatadi. Shu tariqa baholash til aniqligi bilan bir qatorda perspektivaga sezgirlikni ham qamrab oladi.

Mexanizmning yana bir didaktik afzalligi o‘ quvchining o‘ z madaniy tajribasini ham tahlil obyektiga aylantirishidir. Interkultural ta’limda “boshqa” madaniyatni kuzatishning o‘ zi yetarli emas; o‘ quvchi o‘ z odati, normasi va bahosini ham izohlashga majbur bo‘ lganda refleksiv masofa yuzaga keladi. Qiyosiy-relatsion tahlil aynan shu vazifani bajaradi: talaba ikki hodisani kim yaxshiroq yoki to‘ g‘ riroq degan mezon bilan emas, ularning qanday ijtimoiy funksiya bajarishi bilan bog‘ laydi. Natijada madaniy farq muammo yoki ekzotika sifatida emas, turli tarixiy va ijtimoiy sharoitlarda shakllangan ma’no tizimlari o‘ rtasidagi munosabat sifatida ko‘ riladi. Bu esa kommunikativ mediatsiya bosqichida izohning neytral, dalilli va suhbatdoshga mos bo‘ lishiga zamin yaratadi.

Darsning yakuniy kommunikativ mahsuli sifatida qisqa izoh, dialog, madaniy sharh, taqqoslovchi yozuv yoki vaziyatli role-playdan foydalanish mumkin. Muhimi, mahsul realiya haqidagi ensiklopedik ma’lumotni takrorlamasdan, muayyan suhbatdosh ehtiyojiga mos tushuntirishni talab qilishi kerak. O‘ qituvchi topshiriqni murakkablashtirish uchun auditoriyani o‘ zgartirishi mumkin: bir holatda talaba realiyani kursdoshiga, boshqa holatda ingliz tilida so‘ zlashuvchi mehmon yoki xalqaro guruh a’zosiga tushuntiradi. Auditoriyaning o‘ zgarishi qaysi fon ma’lumoti zarurligini, qaysi terminni izohlash va qaysi analogiyadan foydalanishni qayta tanlashga majbur qiladi. Shunday qilib, kommunikativ vazifa madaniy bilimning mavjudligini emas, undan vaziyatga mos foydalanish qobiliyatini namoyon etadi. Bu prinsip folklor materialining darsdagi funksiyasini mazmun manbaidan interkultural faoliyatni tashkil etuvchi metodik resurs darajasiga ko‘ taradi. Natijada madaniy mazmun til amaliyoti, refleksiya va muloqot bilan uzviy bog‘ lanadi.

Xulosalar

Ingliz folkloridagi sotsiomadaniy realiyalarni o‘ qitish madaniyatlararo muloqot kompetensiyasining mazmuniy va jarayonli komponentlarini birlashtirish imkonini beradi. Realiya tarjimaviy ekvivalent emas, balki madaniy ma’no, ijtimoiy norma, kommunikativ kutilma va perspektivani birlashtiruvchi didaktik birlik sifatida talqin qilinishi lozim.

Nazariy tahlil asosida identifikatsiya, kontekstualizatsiya, interpretatsiya, qiyosiy-relatsion tahlil va kommunikativ mediatsiyadan iborat besh bosqichli mexanizm ishlab chiqildi. Ushbu ketma-ketlik talabaning madaniy signalni tanishidan boshlab uni boshqa madaniyat vakiliga tushunarli tarzda izohlashigacha bo‘ lgan o‘ quv harakatlarini tizimlashtiradi.

Mexanizm folklor matnini tayyor madaniy faktlar manbai sifatida emas, balki dalil, kontekst, perspektiva va dialog asosida ma'no yaratish maydoni sifatida qo‘ llashni nazarda tutadi.

Amaliy jihatdan o‘ qituvchi folklor materialini tanlashda realiyaning madaniy markirlanganligi, kontekstual izohlash imkoniyati, qiyosiy potensiali va kommunikativ mediatsiyaga olib kelish xususiyatiga e'tibor qaratishi kerak. Keyingi tadqiqotlarda taklif etilgan mexanizmning empirik samaradorligini tajriba-sinov asosida tekshirish, bosqichlar uchun baholash mezonlarini ishlab chiqish va turli folklor janrlarida ularning differensial ta'sirini aniqlash maqsadga muvofiq.

METHODOLOGICAL STRATEGIES BASED ON THE INTEGRATION OF TBLT ELEMENTS AND A SYSTEM OF COMMUNICATIVE TASKS IN ORAL SPEECH CLASSES

MUXAMMADIYEVA H.S.
Namangan State University, PhD researcher
E-mail: xalima7127@gmail.com
ORCID: ID 0009-0000-7049-3427

Abstract: *The article examines methodological strategies for integrating task-based language teaching (TBLT) elements into oral speech classes of future English teachers with the specific aim of developing intercultural communicative competence. The study is based on theoretical and methodological analysis of task-based language teaching, intercultural communicative competence, mediation, authentic materials, task complexity and task repetition. A distinction is established between a language exercise and an intercultural communicative task. The latter is characterized not only by meaning-oriented interaction, a gap, reliance on learners' linguistic resources and a non-linguistic outcome, but also by a culturally conditioned discrepancy that requires interpretation, negotiation and justification. The article systematizes cultural comparison, critical incident analysis, role-play and simulation, problem-based negotiation, mediation, debate, reflective dialogue and microteaching, and proposes a three-dimensional task typology according to competence component, cognitive level and organizational form. Attention is also given to authentic material adaptation and controlled task complexity. The proposed framework connects oral language practice with intercultural interpretation, pragmatic adjustment, mediation and professional-methodological transfer.*

Keywords: *TBLT; oral speech; intercultural communicative competence; communicative tasks; mediation; authentic materials; task complexity; future English teachers*

OG‘ ZAKI NUTQ DARSLARIDA TBLT ELEMENTLARI INTEGRATSIYASIGA ASOSLANGAN METODIK STRATEGIYALAR VA KOMMUNIKATIV TOPSHIRIQLAR TIZIMI

Annotatsiya: *Maqolada bo‘ lajak ingliz tili o‘ qituvchilarining og‘ zaki nutq darslarida madaniyatlararo muloqot kompetensiyasini rivojlantirish maqsadida topshiriqqa asoslangan til o‘ qitish (TBLT) elementlarini integratsiyalashga doir metodik strategiyalar tahlil qilinadi. Tadqiqot topshiriqqa asoslangan ta’lim, madaniyatlararo kommunikativ kompetensiya, vositachilik, autentik materiallar, topshiriq murakkabligi va topshiriqni takrorlashga oid nazariy-metodik manbalarni tahlil qilishga asoslangan. Til mashqi bilan madaniyatlararo kommunikativ topshiriq o‘ rtasidagi farq aniqlanib, topshiriq uchun ma’noga yo‘ naltirilgan faoliyat, bo‘ shliq, talabaning o‘ z lisoniy resurslariga tayanishi va til bilan cheklanmaydigan natija bilan bir qatorda madaniy tafovutning mavjudligi mezon sifatida taklif etiladi. Madaniy taqqoslash, kritik hodisa tahlili, rolli o‘ yin va simulyatsiya, muammoli vaziyat va muzokara, vositachilik, munozara, reflektiv suhbat hamda mikroo‘ qitish strategiyalari tizimlashtiriladi. Shuningdek, topshiriqlar kompetensiya komponenti, bilish faoliyati darajasi va tashkil etish shakliga ko‘ ra tipologiyalashtiriladi.*

МЕТОДИЧЕСКИЕ СТРАТЕГИИ НА ОСНОВЕ ИНТЕГРАЦИИ ЭЛЕМЕНТОВ TBLT И СИСТЕМА КОММУНИКАТИВНЫХ ЗАДАНИЙ НА ЗАНЯТИЯХ ПО УСТНОЙ РЕЧИ

Аннотация: *В статье рассматриваются методические стратегии интеграции элементов обучения иностранному языку на основе заданий (TBLT) в занятия по устной речи будущих учителей английского языка с целью развития межкультурной коммуникативной компетенции. Исследование основано на теоретико-методическом анализе проблемно-ориентированного обучения, межкультурной коммуникативной компетенции, медиации, аутентичных материалов, сложности и повторения заданий. Уточняется различие между языковым упражнением и межкультурным коммуникативным заданием. Последнее предполагает не только ориентацию на смысл, наличие коммуникативного дефицита, использование собственных языковых ресурсов обучающегося и нелингвистический результат, но и наличие культурно обусловленного расхождения, требующего интерпретации, переговоров и обоснования выбора. Систематизированы стратегии культурного сравнения, анализа критических инцидентов, ролевой игры и симуляции,*

проблемной ситуации и переговоров, медиации, дискуссии, рефлексивного диалога и микропреподавания. Предложена типология заданий по компоненту компетенции, уровню познавательной деятельности и форме организации.

Ключевые слова: *TBLT; устная речь; межкультурная коммуникативная компетенция; коммуникативные задания; медиация; аутентичные материалы; сложность задания; будущие учителя английского языка*

INTRODUCTION

The development of oral communicative competence in the preparation of future English teachers cannot be reduced to vocabulary accumulation and grammatical accuracy. In intercultural communication, speakers must interpret meanings, recognize differences in communicative norms, adjust their speech and negotiate meaning when expectations diverge. Research on second-language interaction indicates that speaking proficiency and interactional competence are related but not identical constructs; some interactional abilities do not develop automatically from general proficiency.[1]

The present study therefore treats task-based language teaching (TBLT) as a methodological basis for organizing oral interaction, while intercultural communicative competence is the developmental target. The central methodological problem is how to design a task so that students do not merely talk about culture but use English to interpret culturally conditioned meanings, respond appropriately and reach a meaningful outcome. This is particularly relevant in teacher education because future teachers need both communicative competence and the ability to transfer task design principles to their own classrooms.

The purpose of the article is to substantiate a system of methodological strategies and communicative tasks integrating TBLT with intercultural development in oral speech classes. The objectives are to define the boundary between an exercise and an intercultural task; establish principles for selecting and adapting authentic linguocultural materials; systematize methodological strategies; construct a task typology; and determine practical parameters for increasing task complexity.

LITERATURE REVIEW

TBLT conceptualizes a task as a central pedagogical unit in which learners primarily use language to achieve a meaningful outcome. Ellis identifies meaning, a gap, reliance on learners' own linguistic resources and a non-linguistic outcome among the defining characteristics of a task.[2] The distinction is important because an activity may require English production while functioning mainly as a controlled language exercise. The present framework retains these criteria but adds a fifth: culturally conditioned discrepancy. When participants rely on different cultural expectations, successful completion requires interpretation and adjustment in addition to linguistic production.

Ellis, Skehan, Li, Shintani and Lambert view TBLT as an approach involving task design, implementation, sequencing and attention to language rather than as a single classroom technique.[3] Willis and Willis describe a task-based sequence built around preparation, a task cycle and subsequent attention to language.[4] In the proposed adaptation, the post-task stage additionally examines cultural meaning and communicative choices, not only formal language errors.

Byram's model places knowledge, attitudes, skills of interpreting and relating, skills of discovery and interaction, and critical cultural awareness at the centre of intercultural communicative competence.[5] Liddicoat and Scarino conceptualize intercultural language learning as a process of interpreting, comparing and reconsidering meanings rather than simply acquiring information about another culture.[6] The CEFR Companion Volume gives mediation a prominent role by describing activities through which learners facilitate understanding, adapt information to a new audience and manage communicative difficulties.[7]

Authenticity concerns both the origin of a material and the way learners use it. Mishan distinguishes authenticity of the material from authenticity of use.[8] An authentic recording followed by mechanical retelling may provide authentic input without creating an authentic communicative purpose. Accordingly, the proposed principle is to simplify task demands rather than substantially simplify the cultural meaning contained in the material.

Empirical studies support the pedagogical value of culture-oriented materials and critical incidents. Smaoui found positive changes in knowledge, attitudes and skills after an intervention combining cultural awareness, critical incidents and cultural misunderstanding materials.[9] Eren reported significant development in critical cultural awareness among pre-service English teachers through sustained interaction with different cultural perspectives.[10] These studies support combining exposure, interaction and reflection rather than relying on cultural information alone.

Task complexity and repetition provide an additional theoretical dimension. Skehan's limited attentional capacity perspective suggests possible trade-offs among complexity, accuracy and fluency as demands increase.[11] Robinson's cognition hypothesis proposes that particular increases in task complexity may stimulate more complex production under appropriate conditions.[12] The present framework reconciles these positions operationally: complexity is increased gradually and, where possible, one parameter at a time. Repetition is used to allow learners to reuse content under changed

audience or time conditions; task-repetition research identifies repeated encounters as a potential mechanism linking task performance and learning.[13]

METHODS

The study employs theoretical analysis, comparative analysis, systematization, modelling and methodological interpretation. The source base consists of works on TBLT, intercultural communicative competence, mediation, authentic materials, critical incidents, task complexity and task repetition. The methodological object is the organization of oral speech instruction for future English teachers; the analytical unit is the communicative task implemented within a task cycle.

The analysis proceeded in four stages. First, established TBLT task criteria were compared with requirements arising from intercultural communication. Second, methodological strategies were mapped against six competence components used in the dissertation framework: linguocultural-cognitive, value-attitudinal, communicative-functional, sociopragmatic adaptation, reflexive-analytical and professional-methodological. Third, tasks were classified by cognitive level and organizational form. Fourth, parameters for controlled increases in task complexity were specified.

The article is theoretical-methodological and does not claim statistical effectiveness of the proposed system. Its contribution is the construction and justification of a design framework that can subsequently be tested through classroom experimentation.

RESULTS AND DISCUSSION

The first result is an operational distinction between an exercise and an intercultural communicative task. An exercise primarily reinforces a linguistic form and generally has a predetermined answer. An intercultural communicative task requires learners to make decisions when culturally conditioned expectations may differ. Its outcome is therefore a negotiated decision, explanation, recommendation or mediated understanding.

The fifth criterion—cultural discrepancy—is central. "Describe Navruz" can be completed by reproducing information. By contrast, a situation in which a foreign colleague repeatedly declines an invitation to a Navruz celebration and is surprised by the host's reaction requires the learner to explain a culturally specific interpretation, reconstruct another perspective and propose an appropriate response. Culture thus becomes part of the problem to be solved rather than decorative content.

The second result concerns authentic linguocultural materials. The proposed set includes interviews and podcasts; problem narratives describing misunderstandings; everyday communication samples such as service encounters and telephone conversations; comparative cultural pairs; national cultural texts; and professional-methodological materials such as lesson fragments and assessment rubrics. A practical selection principle is that one material should, where possible, activate at least two competence components.

Material adaptation follows the principle "simplify the task, not the cultural meaning." If cultural content is heavily rewritten, the ambiguity that makes interpretation necessary may disappear. Instead, the teacher can change the task demand: learners first identify what happened, then explain possible reasons, evaluate consequences and finally propose alternative behaviour. Such staging allows the same material to serve different levels of proficiency and experience.

The third result is the systematization of methodological strategies. Cultural comparison provides an accessible entry point: learners identify a difference, hypothesize why it may exist and discuss its communicative consequences. The third question is essential because comparison without consequences may become simple country-study information. Teachers should also redirect binary evaluations such as "better" or "worse" toward explanation.

Critical incident analysis is more problem-oriented. Learners examine a short misunderstanding and reconstruct the perspectives of the participants. The absence of a ready-made solution creates a need for interpretation and discussion. Evidence from higher education contexts indicates that critical-incident-oriented materials can support intercultural knowledge, attitudes and skills.[14] For future teachers, the strategy additionally models how culturally sensitive classroom events can be analysed pedagogically.

Role-play and simulation create interaction under culturally differentiated expectations. An intercultural role card should specify not only who the participant is but also which communicative norm the participant follows. For example, one participant may belong to a context in which an invitation is conventionally repeated before acceptance, while another interprets the first refusal as final. The mismatch then emerges through interaction. To avoid excessive theatricality, speech formulas should not be pre-written; only the situation and relevant norm should be provided.

Problem-based negotiation develops sociopragmatic adaptation and communicative-functional competence. Participants clarify, reformulate, summarize positions and reach a shared decision. This is important because interactional competence cannot be assumed to develop automatically from general speaking proficiency.[15] Negotiation tasks therefore make interactional work an explicit instructional object.

Mediation occupies a special position. The learner acts between interlocutors or audiences and makes one side's culturally embedded meaning understandable to another. The CEFR Companion Volume describes mediation in relation

to texts, concepts and communication, including adapting information to a new audience and facilitating understanding.[16] Byram's skills of interpreting and relating and discovery and interaction provide a complementary intercultural foundation.[17] In teacher education, mediation may involve explaining culturally embedded Uzbek concepts in English, such as mahalla, hashar or the ustoz-shogird tradition. Literal translation is insufficient; the learner must explain social function, offer an accessible analogue where appropriate and monitor understanding.

Debate and discussion provide a structured context for value-attitudinal development. Discussion permits relatively open expression, whereas debate may require a participant to defend a position that is not personally held. This creates an opportunity for decentring: learners distinguish their own position from the logic of another position. Topics should follow a pedagogical safety principle; educational practices, family interaction, workplace communication, time orientation and communicative distance are suitable starting points.

Reflective dialogue connects task performance with conscious intercultural learning. Reflection should be structured: What happened? What did I feel? How might the interlocutor have interpreted the situation? What other response could have been possible? The Council of Europe's work on intercultural encounters similarly emphasizes reflection on events, feelings, perspectives and conclusions.[18] This sequence turns a speaking performance into an experience that can influence later communicative choices.

Microteaching provides the professional-methodological dimension. Future teachers adapt a completed task for their prospective learners, identify its objective, anticipate cultural difficulties and conduct a short classroom fragment. The strategy prevents the system from becoming merely a collection of speaking activities: the student must transfer task design into professional practice. Research on intercultural competence in foreign-language teacher education also emphasizes the connection between teachers' own intercultural development and classroom practice.[19]

The fourth result is a three-dimensional typology. The first dimension is the competence component; the second is the cognitive level—reproductive, productive-reconstructive and creative-research; the third is the organizational form—individual, pair, small-group, plenary or out-of-class. Tasks can therefore be located simultaneously along all three dimensions, which turns a list of activities into a system.

At the reproductive level, learners may describe a cultural reality, select appropriate expressions or answer a guiding reflective question. At the productive-reconstructive level, they compare practices, analyse stereotypes, adapt speech in role-play or redesign an existing task. At the creative-research level, they conduct a mini-inquiry, mediate meaning between audiences, maintain a reflective portfolio or design a rubric for microteaching. Progression therefore involves increasing autonomy, interpretation and responsibility for communicative outcomes, not simply more difficult vocabulary.

The fifth result concerns task complexity. Seven parameters are proposed: cultural distance, contextual clarity, preparation time, number of participants, outcome form, degree of independence and role complexity. A less complex task may involve a familiar cultural context, a fully described situation, planning time, pair work, an oral explanation and model support. A more complex task may involve an unfamiliar context, incomplete information, real-time performance, multi-party negotiation, a justified decision and an independent response. Role complexity may also increase from a single clear role to roles with conflicting interests.

A key design principle is to increase one parameter at a time whenever possible. Simultaneously raising cultural distance, time pressure, participant number and role conflict can overload learners and make performance changes difficult to interpret. Controlled progression is therefore more diagnostically useful and consistent with the competing perspectives on task complexity.[20]

Task repetition provides an additional mechanism. The same communicative content can be reused first in a small group, then with a new partner and finally in a plenary presentation. The content remains relatively stable while the audience, time condition or interactional demand changes. Research on task repetition identifies repeated encounters as relevant to changes in complexity, accuracy and fluency and to the creation of learning opportunities.[21] In an intercultural framework, repetition also enables learners to reconsider a previous cultural interpretation rather than merely repeat the same linguistic performance.

The resulting task-cycle model can be summarized as follows: pre-task preparation activates relevant cultural knowledge and clarifies the communicative problem; during-task interaction requires learners to interpret, negotiate, mediate or adapt; post-task reflection focuses on cultural meaning, pragmatic choices and alternative responses; professional transfer asks future teachers to redesign or teach the task for another group. This structure connects TBLT procedures with the developmental needs of intercultural communicative competence.

CONCLUSIONS

The analysis demonstrates that TBLT integration in oral speech classes becomes methodologically meaningful only when tasks are organized around communicative outcomes and genuine interpretive problems. For intercultural development, cultural information should not function as an illustrative supplement to speaking practice; culturally conditioned differences should form part of the task problem itself.

The proposed framework combines cultural comparison, critical incident analysis, role-play and simulation, problem-based negotiation, mediation, debate and discussion, reflective dialogue, and microteaching as the strategy securing professional-methodological transfer. The communicative task system is organized through competence component, cognitive level and organizational form. Complexity is controlled through cultural distance, contextual clarity, preparation time, participant number, outcome type, independence and role complexity.

The scientific contribution is the methodological specification of the intercultural task: alongside established TBLT criteria, cultural discrepancy is introduced as a design criterion creating a need for interpretation and adjustment. The practical contribution is a structured set of strategies and task-design parameters for oral speech courses for future English teachers. The framework is theoretically grounded; its empirical effectiveness should be established through subsequent classroom experimentation.

Table 1. Exercise and intercultural communicative task: comparative characteristics

Criterion	Exercise	Intercultural communicative task
Primary focus	Language form	Meaning and cultural appropriateness
Response	Predetermined	Dependent on participant choices
Gap	Linguistic	Difference in cultural norms/expectations
Outcome	Correct form	Negotiated decision or explanation
Assessment	Accuracy	Appropriateness, mediation and justification
Closure	Error correction	Reflection and professional transfer

Table 2. Typology of intercultural communicative tasks

Component	Reproductive	Productive-reconstructive	Creative-research
Linguocultural-cognitive	Describe a cultural reality	Compare two cultural practices	Mini-inquiry and presentation
Value-attitudinal	Select attitude expressions	Analyse a stereotype	Justify a position not personally held
Communicative-functional	Repeat a prepared explanation	Simplify a complex concept	Mediate meaning between audiences
Sociopragmatic adaptation	Apply etiquette formulas	Adapt speech in role-play	Multi-stage simulation
Reflexive-analytical	Answer a guiding question	Analyse a critical incident	Reflective portfolio
Professional-methodological	Evaluate a ready task	Adapt a task for learners	Microteaching and rubric design

Table 3. Parameters for increasing intercultural task complexity

Parameter	Less complex	More complex
Cultural distance	Familiar cultural context	Unfamiliar or contrasting context
Context clarity	Situation fully described	Information incomplete; inference required
Preparation time	Planning time provided	Real-time performance
Participants	Pair work	Multi-party negotiation

Outcome	Oral explanation	Justified decision or recommendation
Independence	Model-supported	Fully independent
Role complexity	Single clear role	Conflicting-interest role

Annotatsiya: *Mazkur maqolada oliy ta'limda dasturlash fanlarini o' qitishda sun'iy intellekt vositalaridan foydalanishning pedagogik imkoniyatlari tahlil qilingan. Unda sun'iy intellektning individual ta'limni tashkil etish, koddagi xatolarni aniqlash, algoritmlarni tushuntirish, tezkor teskari aloqa berish va mustaqil ta'limni qo' llab-quvvatlashdagi o' rni yoritilgan. Shuningdek, akademik halollik, AIga ortiqcha bog' lanish va noto' g' ri javoblarni tanqidiy baholash bilan bog' liq muammolar ko' rib chiqilgan. Tadqiqot natijasida "Muammo – mustaqil yechim – SI bilan muloqot – verifikatsiya – refleksiya" bosqichlariga asoslangan pedagogik model taklif etilgan.*

Kalit so' zlar: *Sun'iy intellekt, dasturlashni o' qitish, generativ sun'iy intellekt, ChatGPT, dastur kodi, algoritmik fikrlash, raqamli pedagogika, individual ta'lim, teskari aloqa, prompt, akademik halollik, raqamli kompetensiya.*

ПЕДАГОГИЧЕСКИЕ ВОЗМОЖНОСТИ ПОВЫШЕНИЯ ЭФФЕКТИВНОСТИ ПРЕПОДАВАНИЯ ДИСЦИПЛИН ПО ПРОГРАММИРОВАНИЮ С ИСПОЛЬЗОВАНИЕМ ИНСТРУМЕНТОВ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА

Аннотация: *В данной статье проанализированы педагогические возможности использования инструментов искусственного интеллекта при преподавании дисциплин программирования в высшем образовании. Рассмотрена роль искусственного интеллекта в организации индивидуального обучения, выявлении ошибок в программном коде, объяснении алгоритмов, обеспечении оперативной обратной связи и поддержке самостоятельного обучения. Также проанализированы проблемы, связанные с академической честностью, чрезмерной зависимостью от ИИ и некритическим восприятием ошибочных ответов. В результате исследования предложена педагогическая модель, основанная на этапах: «Проблема – самостоятельное решение–взаимодействие с ИИ–верификация – рефлексия».*

Ключевые слова: *искусственный интеллект, обучение программированию, генеративный искусственный интеллект, программный код, алгоритмическое мышление, цифровая педагогика, индивидуальное обучение, обратная связь, академическая честность.*

PEDAGOGICAL OPPORTUNITIES FOR ENHANCING THE EFFECTIVENESS OF TEACHING PROGRAMMING SUBJECTS THROUGH THE USE OF ARTIFICIAL INTELLIGENCE TOOLS

Abstract: *This article analyzes the pedagogical potential of using artificial intelligence tools in teaching programming disciplines in higher education. It examines the role of artificial intelligence in organizing personalized learning, identifying errors in program code, explaining algorithms, providing immediate feedback, and supporting independent learning. The article also discusses issues related to academic integrity, excessive dependence on AI, and the uncritical acceptance of incorrect responses. As a result of the study, a pedagogical model based on the stages of "Problem–independent solution–interaction with AI–verification – reflection" is proposed.*

Keywords: *artificial intelligence, programming education, generative SI, programming code, algorithmic thinking, digital pedagogy, personalized learning, feedback, academic integrity.*

KIRISH

Zamonaviy raqamli transformatsiya oliy ta'limda nafaqat yangi texnologiyalarni joriy etish, balki ta'lim mazmuni, metodlari va baholash mexanizmlarini qayta ko' rib chiqishni ham talab etmoqda. Ayniqsa, dasturlash, AKT va kompyuter injiniringi fanlarini o' qitishda sun'iy intellekt texnologiyalarining rivojlanishi an'anaviy pedagogik yondashuvlarni sezilarli darajada o' zgartirmoqda. Generativ sun'iy intellekt vositalari dastur kodi yaratish, mavjud kodni tushuntirish,

xatolarni aniqlash, muqobil algoritmik yechimlarni taklif qilish va talabaning bilim darajasiga mos izoh berish imkoniyatiga ega. Bu esa talabaga tezkor va individual yordam olish, o‘ qituvchiga esa ta’lim jarayonini samaraliroq tashkil etish imkonini beradi.

UNESCO sun’iy intellektni ta’limda inson manfaatlariga yo‘ naltirilgan, pedagogik jihatdan asoslangan va xavfsiz tarzda qo‘ llash zarurligini ta’kidlaydi. O‘ zbekistonda ham 2024-yilda tasdiqlangan “Sun’iy intellekt texnologiyalarini 2030-yilga qadar rivojlantirish strategiyasi” doirasida SI bo‘ yicha kadrlar salohiyatini oshirish va texnologiyalarni turli sohalarga keng joriy etish ustuvor vazifa sifatida belgilangan. Dasturlashni o‘ rganishda talaba algoritmik fikrlash, kod yozish, xatolarni aniqlash va yechimlarni optimallashtirish kabi murakkab faoliyatlarni bajaradi. Sun’iy intellekt bu jarayonda tayyor javob beruvchi vosita emas, balki talabaning mustaqil fikrlashi va muammoni hal qilish ko‘ nikmalarini qo‘ llab-quvvatlovchi pedagogik yordamchi sifatida xizmat qilishi mumkin.

Shu bilan birga, SI vositalaridan nazoratsiz foydalanish tayyor kodga ortiqcha tayanish, fundamental dasturlash ko‘ nikmalarining sustlashishi va noto‘ g‘ ri javoblarni tanqidiy baholamaslik kabi xavflarni yuzaga keltiradi. Shu sababli asosiy masala sun’iy intellektdan foydalanishning o‘ zi emas, balki undan qanday pedagogik yondashuv asosida foydalanishdir.

Mazkur tadqiqotning maqsadi—sun’iy intellekt vositalarini oliy ta’limda dasturlash fanlariga integratsiyalashning pedagogik imkoniyatlarini aniqlash hamda talabalarning mustaqil dasturlash va algoritmik fikrlash ko‘ nikmalarini rivojlantirishga xizmat qiluvchi samarali pedagogik modelni ishlab chiqishdan iborat.

TADQIQOT METODLARI

Tadqiqot ilmiy-pedagogik va qiyosiy-tahliliy xarakterga ega. Tadqiqot jarayonida dasturlash ta’limida generativ sun’iy intellekt va intellektual dasturlash yordamchilaridan foydalanishga bag‘ ishlangan so‘ nggi ilmiy ishlar, xalqaro tashkilotlarning metodik hujjatlari hamda sun’iy intellekt kompetensiyalariga oid konseptual yondashuvlar tahlil qilindi. Metodologik asos sifatida konstruktivistik ta’lim nazariyasi, faoliyatga yo‘ naltirilgan yondashuv, muammoli ta’lim, individual ta’lim, scaffolding — bosqichma-bosqich pedagogik qo‘ llab-quvvatlash hamda refleksiv ta’lim tamoyillaridan foydalanildi. Ilmiy manbalarni tanlashda uchta mezonga alohida e’tibor qaratildi: tadqiqotning dasturlash ta’limiga bevosita aloqadorligi, sun’iy intellekt vositalarining talaba faoliyatiga ta’sirini tahlil qilishi hamda pedagogik afzallik va xavflarni birgalikda yoritishi.

2024-yilda 47 ilmiy ishni o‘ rgangan tizimli adabiyotlar tahlilida generativ SI dasturlaridan dasturlashni o‘ rganishda foydalanish samaradorligiga ta’sir qiluvchi omillar va u bilan bog‘ liq imkoniyat hamda muammolar umumlashtirilgan. Boshqa tizimli tahlilda esa 2018-yildan buyon chop etilgan 21 tadqiqot asosida LLMga tayangan kod generatsiyasi modellarining dasturlashni o‘ qitish va o‘ rganishdagi imkoniyatlari hamda xavflari o‘ rganilgan.

Tadqiqotda tahlil birliklari sifatida quyidagi pedagogik jarayonlar olindi: yangi mavzuni tushuntirish, algoritm yaratish, kod yozish, debugging, individual teskari aloqa, topshiriqlarni differensiallashtirish, mustaqil ta’lim, nazorat va baholash. Tahlil natijalari asosida sun’iy intellektni dasturlash mashg‘ ulotiga integratsiyalash uchun besh bosqichdan iborat konseptual pedagogik model ishlab chiqildi. Mazkur model empirik jihatdan yakuniy tasdiqlangan metodika sifatida emas, keyingi pedagogik tajriba-sinov ishlarida tekshirilishi mumkin bo‘ lgan ilmiy-metodik taklif sifatida qaraladi.

TADQIQOT NATIJALARI

Tahlil natijalari sun’iy intellekt vositalaridan maqsadli va metodik boshqariladigan tarzda foydalanish dasturlash ta’limining bir nechta muhim komponentlarini takomillashtirish imkonini berishini ko‘ rsatdi.

An’anaviy auditoriyada barcha talabalarga bir xil tezlikda va bir xil murakkablikdagi material taqdim etiladi. Biroq talabalar dastlabki tayyorgarligi, algoritmik fikrlashi va dasturlash tajribasi jihatidan bir-biridan sezilarli farq qilishi mumkin. Sun’iy intellekt yordamida bir mavzuni turli murakkablik darajasida tushuntirish mumkin. Masalan, rekursiyani tushunmagan talaba SIga: “Rekursiyani dasturlashni endi o‘ rganayotgan talaba uchun oddiy hayotiy misol asosida tushuntir”, deb murojaat qilishi mumkin. Kuchli talaba esa shu tushunchaning vaqt va xotira murakkabligi yoki iterativ yechimdan farqini so‘ rashi mumkin. Bu imkoniyat differensial ta’limni amalga oshirish uchun muhim pedagogik asos yaratadi. 2024-yilda ishlab chiqilgan ChatGPT asosidagi PyTutor tizimiga oid 11 haftalik tajribada ayniqsa dastlabki bilim darajasi past bo‘ lgan talabalar uchun SI yordamining foydali ekanligi, ularning mashqlarni bajarish faolligi va muvaffaqiyatiga ijobiy ta’sir qilgani qayd etilgan. Shu bilan birga, tadqiqotchilar SIga ortiqcha tayanish mustaqil muammo yechish ko‘ nikmasiga zarar yetkazishi mumkinligini ham ko‘ rsatgan.

Dasturlash fanida teskari aloqa oddiy “To‘ g‘ ri” yoki “Noto‘ g‘ ri” bahosidan iborat bo‘ lmasligi kerak. Talaba nima sababdan xato qilganini tushunishi kerak.

Masalan, Python dasturida quyidagi xato yuzaga kelishi mumkin:

```
numbers = [2, 4, 6, 8]
for i in range(len(numbers)):
 print(numbers[i + 1])
```

Sun’iy intellektdan shunchaki “Kodni to‘ g‘ rilab ber” deb so‘ rash tayyor javob olishga olib keladi. Pedagogik jihatdan samaraliroq prompt quyidagicha shakllantiriladi:

“Koddagi xatoni darhol tuzatib bermang. Xato yuzaga keladigan qatorni ko‘ rsating, sababini savollar orqali tushunishga yordam bering va talabaning o‘ zi tuzatishi uchun ikki maslahat bering.”

Bu usulda SI “Tayyor kod generatori”dan “Virtual tutor”ga aylanadi. Katta guruhlarda o‘ qituvchining har bir kodga individual izoh berishi amaliy jihatdan qiyin. SI ushbu pedagogik yukning bir qismini o‘ z zimmasiga olishi va o‘ qituvchiga murakkab konseptual muammolar bilan ishlash uchun vaqt qoldirishi mumkin.

Dasturlashni o‘ rganishda xato—muvaffaqiyatsizlik emas, o‘ rganish mexanizmining tabiiy qismi hisoblanadi. Talaba xato xabari mazmunini tushunishi, sababini taxmin qilishi, kodning tegishli qismini tahlil qilishi va tuzatishni sinovdan o‘ tkazishi kerak. SI vositalari xato xabarlarini oddiy tilda tushuntirish, ehtimoliy sabablarni ko‘ rsatish va tekshirish ketma-ketligini taklif qilish imkoniyatiga ega. 82 nafar talaba ishtirok etgan 2024-yilgi kvazi-eksperimental tadqiqotda ChatGPT yordamida dasturlash rejimida ishlagan talabalar debugging, xato xabarlarini qayta ishlash va SI fikr-mulohazasini o‘ qish faoliyatlarini ko‘ proq bajargan. Biroq guruhlar o‘ rtasidagi yakuniy dasturlash natijalarida statistik jihatdan sezilarli farq kuzatilmagan. Bu holat SI bilan ko‘ proq ishlash avtomatik ravishda chuqurroq o‘ rganish degani emasligini ko‘ rsatadi. Shu sababli o‘ qituvchi debugging jarayonida “Xatoni tuzatish” emas, balki “Xatoning sababini izohlash”ni baholashi maqsadga muvofiq.

Dasturlashni o‘ rgatishning maqsadi muayyan dasturlash tilining buyruqlarini yodlash emas. Asosiy vazifa masalani formal ko‘ rinishga keltirish, uni kichik qismlarga ajratish, algoritm ishlab chiqish, yechimni tekshirish va optimallashtirish kompetensiyasini shakllantirishdir. SI vositalarini ham shu maqsadga bo‘ ysundirish zarur. Masalan, topshiriq quyidagicha tashkil qilinishi mumkin:

“Berilgan ro‘ yxatdan ikkinchi eng katta elementni topish algoritmini ishlab chiqing. Avval SI vositasidan foydalanmasdan algoritmni blok-sxema yoki pseudokod shaklida yozing. Keyin SI yordamida kamida ikki alternativ yechimni oling. Ularning vaqt murakkabligini solishtiring va eng maqbul usulni asoslang.”

Bunday topshiriqda SI talabaning o‘ rniga fikrlamaydi. Aksincha, turli yechimlarni taqqoslash uchun intellektual material yaratadi.

Generativ SI ta’limdagi an’anaviy “Kod yozing” topshiriqlarining mazmunini qayta ko‘ rib chiqishni talab qiladi. Talaba SI yordamida ishlaydigan kod hosil qilishi mumkin. Shu sababli kodning mavjudligi bilimning yetarli ko‘ rsatkichi bo‘ la olmaydi. Baholashda “Kod nima uchun aynan shunday ishlaydi?”, “Bu sikl o‘ rniga boshqa konstruksiyadan foydalanish mumkinmi?”, “Kiruvchi ma’lumot hajmi o‘ n baravar oshsa nima o‘ zgaradi?”, “SI yaratgan yechimning qanday kamchiligi bor?” kabi savollarga e’tibor kuchayishi kerak.

Bu “natijani baholash” modelidan “jarayon va tushunishni baholash” modeliga o‘ tishni anglatadi.

Pedagogik model

Tahlillar asosida dasturlash fanida SI vositalaridan foydalanishning quyidagi modeli taklif etiladi:

№	Bosqich	Talabaning faoliyati	SI vositasining vazifasi	O‘ qituvchining vazifasi
1.	Muammoni tushunish	Masala shartini tahlil qiladi	Zarur bo‘ lsa tushunchalarni izohlaydi	Muammoli vaziyat yaratadi
2.	Mustaqil yechim	Algoritm va dastlabki kodni yaratadi	SI ishlatilmaydi yoki cheklanadi	Talabaning mustaqil faoliyatini kuzatadi
3.	SI bilan muloqot	Savol beradi, maslahat oladi	Hint, izoh, alternativ yondashuv beradi	To‘ g‘ ri prompt tuzishga yo‘ naltiradi
4.	Verifikatsiya	SI javobini tekshiradi va testlaydi	Yordamchi vosita sifatida qatnashadi	Kod sifati va asoslanganlikni nazorat qiladi
5.	Refleksiya	O‘ z yechimi va SI taklifini taqqoslaydi	Qo‘ shimcha tushuntirish beradi	Talabaning xulosasini baholaydi

Mazkur modelning markaziy tamoyili—**“Avval fikrla, keyin SI yordamidan foydalan, so‘ ng tekshir va asosla”** tamoyilidir.

MUHOKAMA

Sun'iy intellekt vositalari ta'limda katta imkoniyatlarga ega bo' lsada, ulardan nazoratsiz foydalanish talabaning mustaqil fikrlashi va dasturlash ko' nikmalariga salbiy ta'sir ko' rsatishi mumkin. Asosiy xavflardan biri—kognitiv offloading, ya'ni aqliy vazifalarning muhim qismini texnologiyaga topshirishdir. Ayniqsa, boshlang' ich bosqichda talabaning algoritm tuzmasdan tayyor SI yechimlariga murojaat qilishi fundamental dasturlash ko' nikmalarining shakllanishini susaytirishi mumkin. Tadqiqotlar SI vositalari o' quv natijalarini yaxshilashi mumkinligini ko' rsatsada, talabalar SI bergan noto' g' ri kod va javoblarni har doim ham aniqlay olmasligini ko' rsatmoqda. Shu sababli SI savodxonligi va dasturlash kompetensiyasi o' zaro uyg' un rivojlantirilishi zarur. Talaba SIga savol berish bilan birga uning javobini tekshirish, tahlil qilish va asoslashni ham bilishi kerak. Buni quyidagicha ifodalash mumkin:

SI yaratgan javob + talabaning verifikatsiyasi + pedagogik refleksiya = ta'limiy qiymat.

Generativ SI sharoitida dasturlash topshiriqlari va baholash mezonlarini ham takomillashtirish zarur. Oddiy kod yozish topshiriqlari o' rniga SI yaratgan kodni tahlil qilish, xatolarni aniqlash, optimallashtirish, test holatlarini ishlab chiqish va muqobil yechimlarni solishtirishga yo' naltirilgan vazifalardan foydalanish maqsadga muvofiq. Bunda yakuniy kod bilan birga talabaning algoritmik asoslash, debugging va refleksiya ko' nikmalari ham baholanishi lozim.

SI davrida o' qituvchining roli ham o' zgaradi. U axborot beruvchidan ta'lim dizayneri, muammoli topshiriqlar yaratuvchisi, SI bilan ishlashni boshqaruvchi va talabaning fikrlash jarayonini nazorat qiluvchi ekspertga aylanadi. Pedagogik amaliyotda SI vositalaridan foydalanishni uch darajada tashkil etish mumkin: yordamchi foydalanish — tushuncha va sintaksisni izohlash; hamkorlikda yechim yaratish — talaba va SI yechimlarini solishtirish; tanqidiy ekspertiza — SI yaratgan kodni testlash, xatolarini aniqlash va takomillashtirish.

Bunda promptlarni to' g' ri shakllantirish ham muhim. Masalan, "Python kodini yozib ber" o' rniga "Masalani yechish algoritmini tushuntir, avval pseudokod ber va kodni tekshirish mezonlarini tavsiya qil" kabi so' rov talabaning mustaqil fikrlashini saqlab qoladi.

Dasturlash mashg' ulotlarida dastlab topshiriqni SI yordamisiz bajarish, keyin SI tavsiyalaridan foydalanish va yakunda ikki yechimni taqqoslash samarali yondashuv hisoblanadi. Shu tarzda sun'iy intellekt tayyor kod beruvchi vositadan ko' ra tahlil, taqqoslash, argumentatsiya va refleksiyani rivojlantiruvchi didaktik vosita sifatida xizmat qiladi.

XULOSA

Sun'iy intellekt vositalarining jadal rivojlanishi dasturlash fanlarini o' qitish metodikasida yangi pedagogik imkoniyatlarni yuzaga keltirmoqda. Generativ SI vositalari individual tushuntirish, tezkor teskari aloqa, koddagi xatolarni tahlil qilish, alternativ algoritmlar yaratish, differensial topshiriqlar shakllantirish va mustaqil ta'limni qo' llab-quvvatlash imkoniyatiga ega. Biroq SI vositasining mavjudligi o' z-o' zidan ta'lim samaradorligini oshirmaydi. Pedagogik natija vositaning qanday didaktik model asosida qo' llanilishiga bog' liq. Agar talaba tayyor kodni tanqidiy tahlilsiz qabul qilsa, SI uning dasturlash ko' nikmalarini rivojlantirish o' rniga mustaqil fikrlash faolligini pasaytirishi mumkin.

Shu sababli dasturlash fanida sun'iy intellektdan foydalanish **"mustaqil urinish – SI yordami – verifikatsiya – refleksiya"** tamoyiliga asoslanishi zarur.

Tadqiqot natijasida quyidagi pedagogik xulosaga kelindi: sun'iy intellektni dasturlash ta'limiga integratsiya qilishning maqsadi talabani kod yozishdan ozod qilish emas, balki uni yuqori darajadagi algoritmik va tanqidiy fikrlash faoliyatiga olib chiqishdan iborat. Oliy ta'lim muassasalarida mazkur yondashuvni amaliyotga tatbiq qilish uchun o' qituvchilarning SI-pedagogik kompetensiyalarini rivojlantirish, fan dasturlariga sun'iy intellekt bilan mas'uliyatli ishlash elementlarini kiritish, akademik halollik mezonlarini yangilash hamda SI vositalari mavjud bo' lgan sharoitga mos baholash topshiriqlarini ishlab chiqish lozim.

Kelgusida taklif etilgan pedagogik modelni tajriba va nazorat guruhlari asosida empirik sinovdan o' tkazish, talabalarning algoritmik fikrlashi, mustaqil dasturlash ko' nikmasi, motivatsiyasi va o' quv natijalariga ta'sirini statistik jihatdan baholash mazkur tadqiqotning mantiqiy davomi bo' lishi mumkin.

Annotatsiya: *Maqolada dual ta'lim sharoitida bo‘ lajak mutaxassislarning professional-pedagogik kompetentligini shakllantirishning ilmiy-metodologik asoslari va pedagogik qonuniyatlari tadqiq etilgan. Oliy kasbiy ta'lim muassasasi va ishlab chiqarish muhitining integratsiyalashgan pedagogik maydonida talabalarning refleksiv, loyihaviy va texnologik ko‘ nikmalarini rivojlantirish imkoniyatlari tahlil qilingan. Dual ta'limning shaxsga yo‘ naltirilgan va faoliyatli yondashuvlar uyg‘ unligidagi pedagogik mexanizmlari ochib berilgan. Taklif etilgan metodologik prinsiplar talabalarning kasbiy adaptatsiyasini jadallashtirish, kognitiv-amaliy mustaqilligini oshirish hamda ta'lim samaradorligini ta'minlashga xizmat qiladi.*

Kalit so‘ zlar: *dual ta'lim, professional-pedagogik kompetentlik, metodologik asoslar, kasbiy integratsiya, faoliyatli yondashuv, ta'lim samaradorligi, pedagogik transformatsiya, shaxsiy rivojlanish.*

МЕТОДОЛОГИЧЕСКИЕ ОСНОВЫ ФОРМИРОВАНИЯ ПРОФЕССИОНАЛЬНО-ПЕДАГОГИЧЕСКОЙ КОМПЕТЕНТНОСТИ СТУДЕНТОВ В ПРОЦЕССЕ ДУАЛЬНОГО ОБРАЗОВАНИЯ

Аннотация: *В статье исследованы научно-методологические основы и педагогические закономерности формирования профессионально-педагогической компетентности будущих специалистов в условиях дуального образования. Проанализированы возможности развития рефлексивных, проектных и технологических навыков студентов в интегрированной педагогической среде высшего профессионального образования и производства. Раскрыты педагогические механизмы дуального образования на основе сочетания личностно-ориентированного и деятельностного подходов. Предлагаемые методологические принципы способствуют ускорению профессиональной адаптации студентов, повышению их когнитивно-практической самостоятельности и обеспечению эффективности образования.*

METHODOLOGICAL FOUNDATIONS OF DEVELOPING STUDENTS' PROFESSIONAL AND PEDAGOGICAL COMPETENCE IN THE DUAL EDUCATION PROCESS

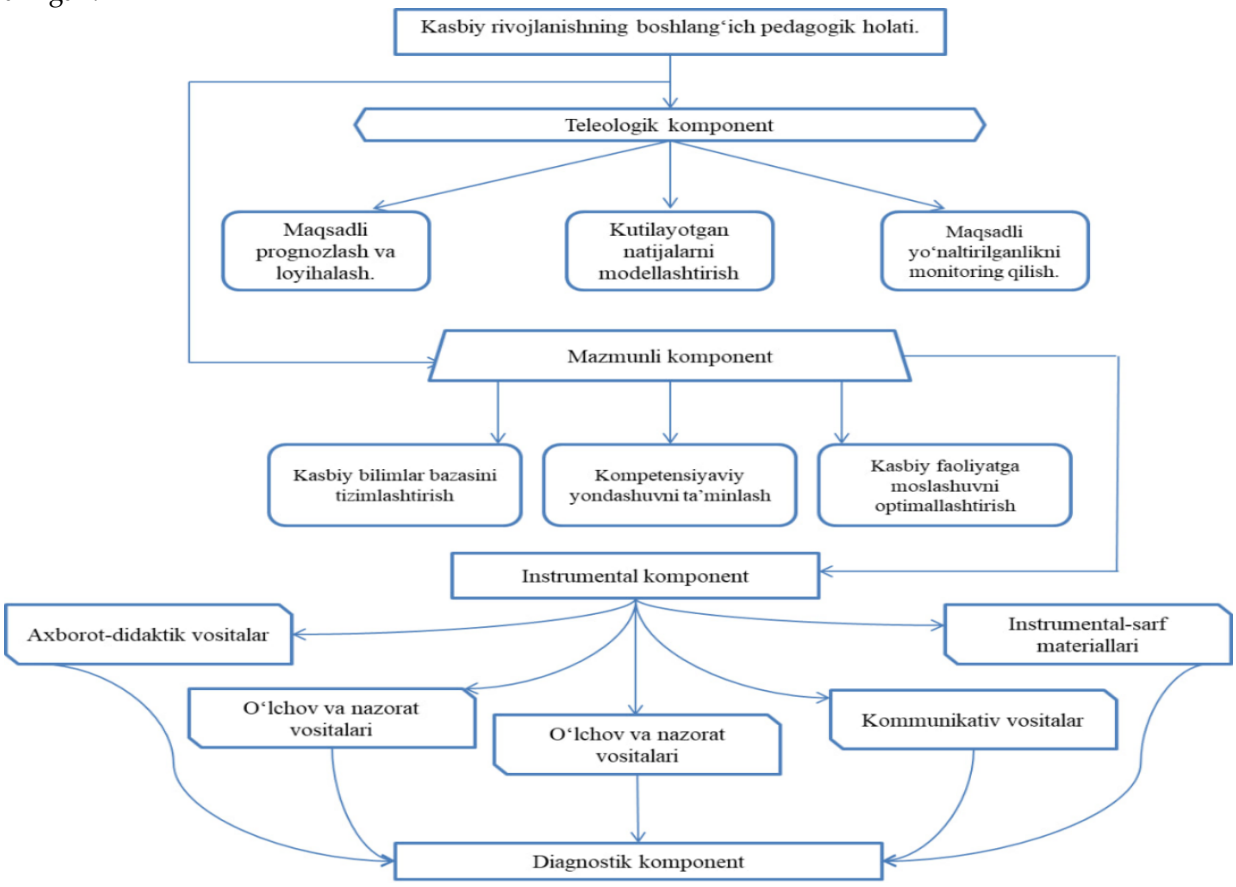
Abstract: *The article examines the scientific and methodological foundations and pedagogical regularities of developing the professional and pedagogical competence of future specialists in the context of dual education. The possibilities of developing students' reflective, project-based, and technological skills within an integrated pedagogical environment of higher professional education and production are analyzed. The pedagogical mechanisms of dual education based on the combination of learner-centered and activity-based approaches are identified. The proposed methodological principles contribute to accelerating students' professional adaptation, enhancing their cognitive and practical independence, and improving educational effectiveness.*

Keywords: *dual education, professional and pedagogical competence, methodological foundations, professional integration, activity-based approach, educational effectiveness, pedagogical transformation, personal development trajectory.*

KIRISH.

Zamonaviy globallashuv va shiddatli texnologik taraqqiyot davrida oliy kasbiy ta'lim tizimi oldiga yuqori intellektual salohiyatga ega, raqobatbardosh kadrlar tayyorlash vazifasi qo‘ yilmoqda. Ushbu maqsadni amalga oshirish bevosita bo‘ lajak mutaxassislarning professional pedagogik kompetentligini shakllantirish darajasi bilan belgilanadi. Professional pedagogik kompetentlik — shaxsning kasbiy-pedagogik faoliyatni samarali tashkil etish, nazariy bilimlarni

amaliyotga tizimli tatbiq qilish, pedagogik vaziyatlarni tahlil etish hamda innovatsion ta’lim texnologiyalarini muvaffaqiyatli qo‘ llash bo‘ yicha shakllangan integratsiyalashgan shaxsiy-kasbiy xislatlari va qobiliyatlari majmuasidir. Mazkur sifat mutaxassisning nafaqat chuqur fundamental bilimlarga ega ekanligini, balki pedagogik muloqot madaniyati, refleksiv tahlil hamda doimiy o‘ z-o‘ zini rivojlantirish trayektoriyasiga sodiqligini ham aks ettiradi.

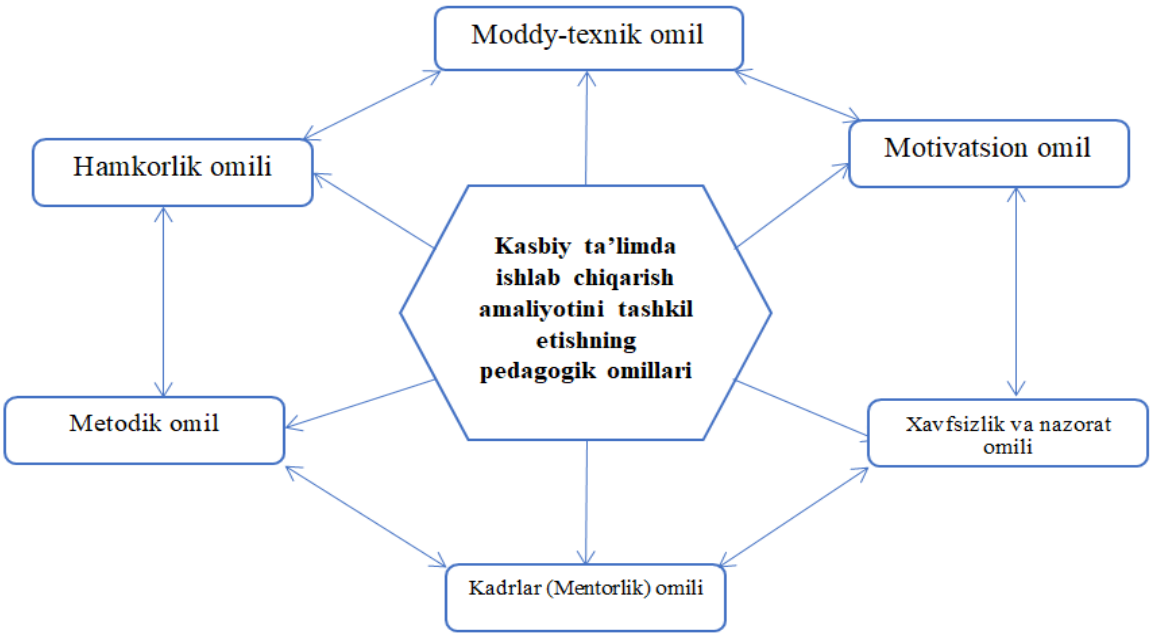


Mamlakatimizda ta’lim tizimini tubdan isloh qilish, yosh avlodning intellektual salohiyatini oshirish davlat siyosatining eng ustuvor yo‘ nalishi etib belgilangan. O‘ zbekiston Respublikasi Prezidenti Shavkat Mirziyoyev o‘ z nutqlarida o‘ qituvchi va murabbiylarning kasbiy mahorati masalasiga alohida to‘ xtalib, shunday degan edi: *”Biz Uchinchi Renessans poydevorini barpo etishni strategik vazifa qilib qo‘ ygan ekanmiz, buni birinchi navbatda ta’lim va tarbiya tizimini tubdan isloh qilish, muallimlarimizning bilim va saviyasini eng ilg‘ or talablar darajasiga ko‘ tarish orqali amalga oshiramiz”*. Davlat rahbarining ushbu konseptual fikrlari oliy kasbiy ta’lim muassasalarida talabalarning kompetentlik darajasini oshirish nafaqat soha ehtiyoji, balki strategik ahamiyatga ega bo‘ lgan davlat ahamiyatidagi vazifa ekanligini to‘ liq tasdiqlaydi. Tadqiqot obyekti hisoblangan professional kompetentlik mehnat bozori barqarorligini ta’minlashning eng muhim omillaridan biri hisoblanadi.

MAVJUD ADABIYOTLAR TAHLILI

Dual ta’lim sharoitida professional pedagogik kompetentlikni shakllantirish muammosi dunyo miqyosidagi yirik olimlar tomonidan metodologik va amaliy jihatdan keng tadqiq etilgan. Germaniyalik olim Tomas Deissinger dual tizimning pedagogik asoslarini o‘ rganib, ishlab chiqarish muhitidagi kasbiy tayyorgarlik talabalarda mustaqil qaror qabul qilish va pedagogik-texnologik madaniyatni shakllantirishini asoslab berdi. Avstraliyalik tadqiqotchi Stiven Billett esa ish joyidagi ta’lim metodologiyasini rivojlantirib, bo‘ lajak mutaxassisning professional kompetentligi bevosita real mehnat jarayonidagi ijtimoiy va pedagogik hamkorlik muhitida egallanishini isbotladi. Shveysariyalik olim Filipp Gonon o‘ z ilmiy asarlarida dual ta’limning sifat mezonlarini ishlab chiqib, o‘ quv muassasasi va korxona o‘ rtasidagi pedagogik integratsiyani ta’minlash qonuniyatlarini ochib berdi.

TADQIQOT METADOLOGIYASI



Tadqiqot metodologiyasi tizimli, kompetensiyaviy va faoliyatli yondashuvlar uyg‘ unligiga asoslanadi. Bo‘ lajak mutaxassislarning kasbiy shakllanish jarayonini o‘ rganishda pedagogik kuzatuv, qiyosiy-mantiqiy tahlil hamda dual ta’lim subyektlari o‘ rtasidagi integratsiya monitoringi usullari qo‘ llanilgan. Kompetentlik darajasini aniqlash va olingan natijalarning ishonchliligini ta’minlash maqsadida pedagogik diagnostika hamda matematik-statistik tahlil vositalaridan foydalanilgan.

1-rasm. Amaliyotlarini tashkil etish metodikasi

TAHLIL VA NATIJALAR

Dual ta’lim jarayonida talabalarning professional pedagogik kompetentligini shakllantirish ta’lim muassasasi va ishlab chiqarish muhitining o‘ zaro uzviy sinergiyasiga tayanadigan murakkab ijtimoiy-pedagogik jarayondir. Ushbu tizimning metodologik asoslarini tizimli, kompetensiyaviy, faoliyatli va shaxsga yo‘ naltirilgan pedagogik yondashuvlar majmuasi tashkil etadi. Tizimli yondashuv dual ta’limni barcha tarkibiy qismlari, ya’ni normativ-huquqiy, tashkiliy, metodik va texnologik tuzilmalari o‘ zaro bog‘ langan yaxlit ekotizim sifatida o‘ rganishni taqozo etadi. Kompetensiyaviy yondashuv esa ta’lim natijalarini shunchaki quruq bilimlar yig‘ indisi shaklida emas, balki aniq ishlab chiqarish vaziyatlarida va pedagogik faoliyatda namoyon bo‘ ladigan professional ko‘ nikmalar, amaliy layoqat hamda shaxsiy fazilatlar tizimi sifatida loyihalashga xizmat qiladi.

2-rasm. Kasbiy ta’limda ishlab chiqarish amaliyotini tashkil etishning pedagogik omillari

Kasbiy ta’limda ishab chiqarish amaliyotlarini tashkil etishning pedagogik modelidagi jarayon bloki butun tizimning amaliy yuragi hisoblanadi. Ushbu blok maqsadli yo‘ nalishdan kelib chiqib, o‘ quvchilarning real ishlab chiqarish muhitida professional kompetensiyalarini shakllantirishga qaratilgan murakkab va ko‘ p qirrali mexaniz sifatida ishlaydi. Jarayon bloki o‘ quvchilarni nazariy bilimlardan amaliy faoliyatga o‘ tkazish, ularni korxona sharoitlariga moslashtirish va pedagogik mahoratni bosqichma-bosqich rivojlantirishni ta’minlaydi. Blok ichida moddiy -texnik, hamkorlik, metodik, kadrlar (mentorlik), motivatsion hamda xavfsizlik va nazorat omillari o‘ zaro bog‘ langan holda faoliyat yuritadi

Faoliyatli yondashuv metodologik asos sifatida talabalarning professional kasbiy shakllanishini bevosita mehnat va amaliyot jarayonlari orqali ta’minlashni ko‘ zda tutadi. Dual ta’lim muhitida nazariy darslar va real ishlab chiqarish topshiriqlari navbatma-navbat almashib turishi natijasida talabaning kognitiv mustaqilligi rivojlanadi, o‘ quv motivatsiyasi barqarorlashadi hamda kasbiy mas’uliyat hissi shakllanadi. Shu bilan birga, shaxsga yo‘ naltirilgan yondashuv har bir bo‘ lajak mutaxassisning individual qobiliyatlari, qiziqishlari va o‘ z-o‘ zini rivojlantirish trayektoriyasini inobatga olish imkonini beradi. Universitet professor-o‘ qituvchilari va korxonalarning tajribali mutaxassislaridan iborat ustoz-shogird tizimi talabalarda kasbiy etika, refleksiv tahlil va nostandart muammolarni yechish ko‘ nikmalarini shakllantirishda muhim pedagogik omil bo‘ lib xizmat qiladi.

Mazkur metodologik prinsiplarning amaliyotga izchil joriy etilishi oliy kasbiy ta’lim mazmunini sifat jihatidan modernizatsiyalash, dual ta’lim modellari samaradorligini oshirish va bitiruvchilarning mehnat bozoridagi raqobatbardoshligini ta’minlashga mustahkam zanjir yaratadi. Pedagogik va ishlab chiqarish integratsiyasi muhitida talabaning professional kompetentligini shakllantirish jarayoni pedagogik diagnostika hamda monitoring vositalari yordamida uzluksiz nazorat qilib boriladi. Yakuniy natijada ta’lim dasturlarining dinamik tabiati ta’minlanadi, nazariya va amaliyot o‘ rtasidagi an’anaviy tafovutlar butunlay bartaraf etiladi hamda zamonaviy iqtisodiyot tarmoqlari uchun strategik fikrlaydigan, yuqori malakali yetuk mutaxassislar avlodi maqsadli tayyorlanadi.

XULOSA

Dual ta’lim jarayonida talabalarning professional pedagogik kompetentligini shakllantirish modeli nazariya va real ishlab chiqarish amaliyotini muvaffaqiyatli uyg‘ unlashtiruvchi yaxlit metodologik tizimdir. Tizimli, kompetensiyaviy, faoliyatli hamda shaxsga yo‘ naltirilgan yondashuvlar majmuasi talabalarning professional ko‘ nikmalarini, mustaqil qaror

qabul qilish layoqatini va kasbiy etikasini rivojlantirishga xizmat qiladi. Universitet va sanoat korxonalari o‘ rtasidagi integratsiya hamda "ustoz-shogird" tizimi bo‘ lajak mutaxassislarning moslashuvchanligini oshirishda bosh pedagogik omil vazifasini o‘ taydi. Yakuniy natijada, ushbu metodologik prinsiplar ta’lim sifatini tubdan modernizatsiyalash, an’anaviy tafovutlarni bartaraf etish hamda mehnat bozori talablariga to‘ liq javob beradigan, yuqori malakali va raqobatbardosh kadrlarni maqsadli tayyorlashni kafolatlaydi.

METHODOLOGY FOR ORGANIZING INDUSTRIAL PRACTICE IN VOCATIONAL EDUCATION ORGANIZATIONS

Abstract: *This article examines the methodological foundations for the effective organization of industrial practice in vocational education institutions. It analyzes the role of industrial practice in developing students' professional competencies, integrating theoretical knowledge with practical activities, and developing professional skills in accordance with the current requirements of the labor market. Particular attention is paid to cooperation between vocational education institutions and employers, determining the content of industrial practice based on professional activity requirements, planning practical training, monitoring students' activities, and assessing practice outcomes. The article substantiates methodological approaches and organizational and pedagogical conditions aimed at improving the effectiveness of industrial practice and ensuring the quality of students' vocational training.*

Keywords: *vocational education, industrial practice, practical training, professional competence, methodology, educational institution, employer, practical skills, monitoring, assessment.*

KIRISH.

Bugungi kunda kasbiy ta’lim tizimining asosiy vazifalaridan biri mehnat bozori talablariga mos, amaliy faoliyatni mustaqil amalga oshira oladigan va tegishli kasbiy kompetensiyalarga ega bo‘ lgan malakali kadrlarni tayyorlashdan iborat. Kasbiy ta’lim mazmunining ishlab chiqarish jarayonlari bilan uyg‘ unligini ta’minlashda ta’lim oluvchilarning real ish muhitida amaliy faoliyat olib borishi muhim ahamiyat kasb etadi. Shu nuqtayi nazardan, ishlab chiqarish amaliyotini maqsadli, izchil va metodik jihatdan asoslangan holda tashkil etish kasbiy tayyorgarlik sifatini ta’minlovchi muhim pedagogik shartlardan biri hisoblanadi.

O‘ zbekiston Respublikasining “Ta’lim to‘ g‘ risida”gi Qonunida dual ta’lim ta’lim oluvchilarning zarur bilim, malaka va ko‘ nikmalarni egallashiga yo‘ naltirilgan bo‘ lib, uning nazariy qismi ta’lim tashkilotida, amaliy qismi esa ta’lim oluvchining ish joyida amalga oshirilishi belgilangan. Mazkur yondashuv ta’lim jarayonini bevosita ishlab chiqarish muhiti bilan bog‘ lashning huquqiy va tashkiliy asoslarini belgilaydi.

Kasbiy ta’limning amaliy yo‘ nalishini kuchaytirish masalasi davlat ta’lim standartlari va ta’lim dasturlarini ishlab chiqish jarayonida ham o‘ z aksini topgan. Xususan, amaldagi tartibga ko‘ ra, boshlang‘ ich, o‘ rta va o‘ rta maxsus professional ta’lim davlat ta’lim standartlarini ishlab chiqishda ish beruvchilar bilan hamkorlik qilish, ta’lim mazmunini mehnat bozori talablariga yo‘ naltirish nazarda tutilgan. Bu esa ishlab chiqarish amaliyotini faqat o‘ quv rejasining amaliy qismi sifatida emas, balki kasbiy kompetensiyalarni shakllantirishga xizmat qiluvchi yaxlit pedagogik jarayon sifatida ko‘ rib chiqishni taqozo etadi.

Ishlab chiqarish amaliyotini samarali tashkil etish amaliyot joyini belgilash bilangina cheklanmaydi. Ushbu jarayonda amaliyotning maqsad va vazifalarini aniqlash, mazmunini kasb yoki mutaxassislik talablariga muvofiqlashtirish, ta’lim tashkiloti va ish beruvchi o‘ rtasidagi hamkorlikni yo‘ lga qo‘ yish, o‘ quvchilar faoliyatini metodik jihatdan boshqarish, amaliy topshiriqlarni ishlab chiqish, monitoring va baholash mexanizmlarini belgilash kabi o‘ zaro bog‘ liq jarayonlarni tizimli tashkil etish talab etiladi.

Shu sababli kasbiy ta’lim tashkilotlarida ishlab chiqarish amaliyotlarini tashkil etish metodikasini takomillashtirish, uning tarkibiy qismlarini aniqlash hamda ta’lim oluvchilarning kasbiy kompetensiyalarini shakllantirishga yo‘ naltirilgan metodik yondashuvlarni ishlab chiqish dolzarb ilmiy-pedagogik muammo sifatida namoyon bo‘ lmoqda.

Taxlillar va natijalar. Kasbiy ta’lim tizimida ta’lim oluvchilarni ishlab chiqarish faoliyatiga tayyorlashning samaradorligi nazariy bilimlarning amaliy faoliyat bilan qay darajada uyg‘ unlashtirilganiga bevosita bog‘ liq. Zamonaviy ishlab chiqarish jarayonlarining texnologik jihatdan murakkablashib borishi, kasblar mazmunining yangilanishi hamda ish beruvchilarning kasbiy kompetensiyalarga qo‘ yadigan talablari kasbiy ta’lim mazmunini amaliy faoliyat bilan uzviy bog‘ lashni talab qilmoqda.

Mavzuning dolzarbligi, avvalo, kasbiy ta’lim va mehnat bozori o‘ rtasidagi aloqalarni kuchaytirish zarurati bilan belgilanadi. Amaldagi davlat ta’lim standartlarida professional ta’limning turli bosqichlari uchun ta’lim mazmunini ishlab chiqishda ish beruvchilar bilan hamkorlik qilish hamda bitiruvchilarni mehnat bozoriga tayyorlashga yo‘ naltirilgan yondashuv belgilangan. Demak, ishlab chiqarish amaliyotini tashkil etish jarayoni ish beruvchilarning real kasbiy talablari bilan bog‘ langan holda loyihalanishi lozim.

Ikkinchidan, ishlab chiqarish amaliyoti ta’lim oluvchining nazariy bilimlarini real kasbiy vazifalarni bajarish jarayonida qo‘ llash imkonini beradi. Bunda o‘ quvchi ishlab chiqarish jarayonlari, texnologik operatsiyalar, mehnat intizomi, xavfsizlik talablari va kasbiy faoliyatning boshqa jihatlari bilan bevosita tanishadi. Shu sababli amaliyotning mazmuni, davomiyligi, tashkil etish shakllari va baholash mezonlarini kasb xususiyatlaridan kelib chiqib metodik jihatdan to‘ g‘ ri belgilash muhimdir.

Uchinchidan, O‘ zbekistonda dual ta’limning rivojlantirilishi ta’lim tashkilotlari va ish beruvchi korxonalar o‘ rtasidagi hamkorlikning amaliy ahamiyatini yanada oshirmoqda. Amaldagi me’yoriy hujjatlarda ta’lim oluvchilarning amaliy tayyorgarligini korxona va tashkilotlarda tashkil etish, ish beruvchilar bilan hamkorlik qilish va ishlab chiqarish amaliyotini muvofiqlashtirish vazifalari belgilangan. Bu esa ishlab chiqarish amaliyotini tashkil etishning ilmiy-metodik asoslarini takomillashtirish zaruratini kuchaytiradi.

To‘ rtinchidan, xalqaro tadqiqotlarda ish joyiga asoslangan ta’lim (work-based learning) kasbiy ta’limning muhim tarkibiy qismi sifatida qaraladi. OECD materiallarida ish joyidagi ta’lim kuchli o‘ quv muhiti yaratishi, ish beruvchilarning ehtiyojlarini ta’lim jarayoniga olib kirishi va ta’lim bilan mehnat bozori o‘ rtasidagi aloqani kuchaytirishi qayd etilgan. Shu bilan birga, bunday amaliyotlar tizimli, sifat jihatidan nazorat qilinadigan va ta’lim dasturi bilan uzviy bog‘ langan holda tashkil etilishi zarurligi ta’kidlangan.

Shundan kelib chiqib, kasbiy ta’lim tashkilotlarida ishlab chiqarish amaliyotini tashkil etish metodikasini takomillashtirishning dolzarbligi quyidagi asosiy omillar bilan belgilanadi: ta’lim mazmunining mehnat bozori talablariga mosligini ta’minlash; nazariy va amaliy tayyorgarlikning uzviyligini kuchaytirish; ta’lim tashkiloti va ish beruvchi o‘ rtasidagi hamkorlikni metodik jihatdan takomillashtirish; ta’lim oluvchilarning amaliy faoliyatini monitoring qilish va

baholash mexanizmlarini takomillashtirish; ishlab chiqarish muhitida kasbiy kompetensiyalarni shakllantirish uchun zarur pedagogik shart-sharoitlarni yaratish.

Mazkur tadqiqot kasbiy ta'lim tashkilotlarida ishlab chiqarish amaliyotlarini tashkil etish metodikasini takomillashtirishga yo‘ naltirilgan bo‘ lib, tadqiqotning metodologik asosini kasbiy ta'limning amaliy yo‘ naltirilganligi, kompetensiyaviy yondashuv, tizimli yondashuv hamda ta'lim va ishlab chiqarish integratsiyasi tamoyillari tashkil etadi.

Tadqiqotning metodologik yondashuvlaridan biri **tizimli yondashuv** hisoblanadi. Ushbu yondashuv asosida ishlab chiqarish amaliyoti o‘ zaro bog‘ liq bo‘ lgan maqsadli, mazmuniy, tashkiliy, faoliyatli, nazorat-baholash va natijaviy komponentlardan tashkil topgan yaxlit pedagogik jarayon sifatida qaraladi. Bunda ishlab chiqarish amaliyotining maqsadi, mazmuni, tashkil etish shakllari, ta'lim oluvchining amaliy faoliyati, rahbarlik va monitoring hamda yakuniy baholash o‘ zaro uzviy bog‘ langan holda tahlil qilinadi.

Kompetensiyaviy yondashuv tadqiqotning muhim metodologik asosini tashkil etadi. Mazkur yondashuv ishlab chiqarish amaliyotini ta'lim oluvchilarning faqat nazariy bilimlarini mustahkamlash vositasi sifatida emas, balki egallangan bilim, ko‘ nikma va malakalarni real kasbiy vaziyatlarda qo‘ llash hamda kasbiy faoliyatni mustaqil bajarish qobiliyatini rivojlantirishga xizmat qiluvchi jarayon sifatida tashkil etishni nazarda tutadi. Shu asosda amaliy topshiriqlar mazmunini tegishli kasb yoki mutaxassislik bo‘ yicha kasbiy faoliyat talablariga muvofiqlashtirishga e'tibor qaratiladi.

1.1-rasm.

Ishlab chiqarish amaliyotini tashkil etish metodikasi.

Tadqiqotda **faoliyatga yo‘ naltirilgan yondashuv** ham qo‘ llaniladi. Unga ko‘ ra, kasbiy kompetensiyalar ta'lim oluvchining bevosita amaliy faoliyati jarayonida shakllanadi va rivojlanadi. Shuning uchun ishlab chiqarish amaliyotida ta'lim oluvchini kuzatuvchi yoki passiv ishtirokchi sifatida emas, balki belgilangan kasbiy vazifalarni bajaruvchi faol subyekt sifatida tashkil etish muhim hisoblanadi. Amaliy topshiriqlarni bajarish, texnologik jarayonlarda ishtirok etish, mehnat xavfsizligi talablariga rioya qilish, bajarilgan ishlarni tahlil qilish va natijalarni baholash ushbu yondashuvning asosiy tarkibiy jihatlarini tashkil etadi.

Ta'lim va ishlab chiqarish integratsiyasi yondashuvi asosida kasbiy ta'lim tashkiloti hamda ish beruvchi korxona va tashkilotlarning o‘ zaro hamkorligi tadqiq qilinadi. Bunda ta'lim tashkiloti ishlab chiqarish amaliyotining pedagogik va metodik jihatdan tashkil etilishini ta'minlasa, ish beruvchi amaliy faoliyatni real ishlab chiqarish sharoitida tashkil etish, kasbiy vazifalarni bajarish uchun zarur muhitni yaratish va amaliy faoliyatga rahbarlik qilishda ishtirok etadi. Mazkur hamkorlik ishlab chiqarish amaliyoti mazmunining kasbiy faoliyat talablari bilan uyg‘ unligini ta'minlashga xizmat qiladi.

XULOSA.

Kasbiy ta'lim tashkilotlarida ishlab chiqarish amaliyotini samarali tashkil etish ta'lim oluvchilarning nazariy bilimlarini amaliy faoliyat bilan uyg‘ unlashtirish va kasbiy kompetensiyalarini rivojlantirishning muhim shartidir.

Tadqiqot asosida ishlab chiqarish amaliyotini maqsadni belgilash, mazmunni aniqlash, rejalashtirish, amaliy faoliyat, monitoring, baholash va yakuniy tahlil bosqichlari asosida tizimli tashkil etish metodik jihatdan asoslandi. Ta'lim tashkiloti va ish beruvchi o' rtasidagi hamkorlikni kuchaytirish, amaliy topshiriqlarni kasbiy faoliyat talablariga moslashtirish hamda natijalarni muntazam baholash amaliyot samaradorligini ta'minlovchi asosiy omillar sifatida belgilandi. Mazkur metodik yondashuv kasbiy ta'limning amaliy yo' nalganligini kuchaytirish va ta'lim oluvchilarni real mehnat faoliyatiga tayyorlashga xizmat qiladi.

Annotatsiya: *Mazkur maqolada tarix yo' nalishi talabalarida tarixiy manbalar bilan ishlash kompetensiyasini shakllantirishda sun'iy intellekt texnologiyalari bilan an'anaviy manbashunoslik tahlilini uyg' unlashtirishning ilmiy-metodik asoslari ko' rib chiqiladi. Raqamli ta'lim sharoitida generativ sun'iy intellekt vositalari tarixiy axborotni qidirish, tizimlashtirish va dastlabki umumlashtirish jarayonlarini sezilarli darajada tezlashtirmoqda, biroq bunday tizimlar tomonidan hosil qilingan ma'lumotlarda faktik xatoliklar, tasdiqlanmagan iqtiboslar va noto' g' ri talqinlar uchrashi mumkinligi ularni tanqidiy nazardan o' tkazishni taqozo etadi. Shu sababli tadqiqotda sun'iy intellekt manbashunoslik tahlilining o' rnini bosuvchi vosita emas, balki tarixiy ma'lumotlarni qiyoslash va tekshirishga xizmat qiluvchi qo' shimcha didaktik resurs sifatida talqin etiladi. Tadqiqot natijasida "manbani identifikatsiyalash - tashqi tanqid - ichki tanqid - AI-tahlil - qiyosiy verifikatsiya - tarixiy interpretatsiya - refleksiya" bosqichlaridan iborat yetti bosqichli integrativ metodik model taklif etiladi. Ushbu model talabalarda manba ishonchliligini baholash, sun'iy intellekt natijalarini dalillar asosida tekshirish va mustaqil ilmiy xulosa chiqarish ko' nikmalarini rivojlantirishga xizmat qiladi.*

Kalit so' zlar: *tarix ta'limi, tarixiy manba, manbashunoslik, sun'iy intellekt, generativ sun'iy intellekt, manba tanqidi, tashqi tanqid, ichki tanqid, verifikatsiya, tanqidiy fikrlash.*

МЕТОДИКА ИНТЕГРАЦИИ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА И ТРАДИЦИОННЫХ ИСТОЧНИКОВЕДЧЕСКИХ ПОДХОДОВ В АНАЛИЗЕ ИСТОРИЧЕСКИХ ИСТОЧНИКОВ

Аннотация: *В статье рассматриваются научно-методические основы интеграции технологий искусственного интеллекта с традиционным источниковедческим анализом при формировании у студентов-историков компетенций работы с историческими источниками. В условиях цифровой образовательной среды инструменты генеративного ИИ существенно ускоряют поиск, систематизацию и первичное обобщение исторической информации, однако в формируемых ими данных могут встречаться фактические ошибки, неподтверждённые ссылки и некорректные интерпретации, что требует их критической проверки. В связи с этим в исследовании искусственный интеллект рассматривается не как средство, заменяющее источниковедческий анализ, а как дополнительный дидактический ресурс, служащий сопоставлению и верификации исторических данных. В результате исследования предложена интегративная семиэтапная методическая модель: «идентификация источника - внешняя критика - внутренняя критика - AI-анализ - сравнительная верификация - историческая интерпретация - рефлексия». Данная модель направлена на развитие у студентов навыков оценки достоверности источника, проверки результатов искусственного интеллекта на основе фактов и формирования самостоятельных научных выводов.*

Ключевые слова: *историческое образование, исторический источник, источниковедение, искусственный интеллект, генеративный искусственный интеллект, критика источника, внешняя критика, внутренняя критика, верификация, критическое мышление.*

METHODOLOGY FOR INTEGRATING ARTIFICIAL INTELLIGENCE AND TRADITIONAL SOURCE-CRITICISM APPROACHES IN THE ANALYSIS OF HISTORICAL SOURCES

Abstract: *This article examines the scientific and methodological foundations for integrating artificial intelligence technologies with traditional source-criticism analysis in developing history students' competencies for working with historical sources. In a digital educational environment, generative AI tools substantially accelerate the search, systematization, and preliminary synthesis of historical information; however, the outputs of such systems may contain factual errors, unverified citations, and inaccurate interpretations, which necessitates their critical examination. Accordingly, the study treats artificial intelligence not as a substitute for source-criticism analysis but as an additional didactic resource that supports the comparison and verification of historical data. The*

study proposes an integrative seven-stage methodological model: "source identification - external criticism - internal criticism - AI analysis - comparative verification - historical interpretation - reflection." This model is designed to develop students' skills in assessing source reliability, verifying AI-generated outputs against evidence, and forming independent scholarly conclusions.

Keywords: *history education, historical source, source criticism, artificial intelligence, generative artificial intelligence, external criticism, internal criticism, verification, critical thinking, digital competence.*

KIRISH

Zamonaviy jahon ta'lim tizimida raqamli texnologiyalarning jadal rivojlanishi oliy ta'lim mazmuniga, o' qitish metodlariga va talabalarning axborot bilan ishlash uslubiga sezilarli ta'sir ko' rsatmoqda. Generativ sun'iy intellekt tizimlarining ta'lim jarayoniga kirib kelishi bu jarayonning sifat jihatidan yangi bosqichini boshlab berdi: bugungi kunda talaba katta hajmdagi axborotni qisqa vaqt ichida qidirish, umumlashtirish, tarjima qilish va dastlabki tahlildan o' tkazish imkoniyatiga ega bo' lib bormoqda.

Mazkur jarayon tarix ta'limi uchun ham yangi didaktik imkoniyatlarni yuzaga keltirmoqda. O' zbekistonlik tadqiqotchilar tomonidan olib borilgan bir qator ishlarda sun'iy intellekt vositalaridan tarix darslarida foydalanish ta'lim jarayonining interaktivligini oshirish, tarixiy materialni taqdim etish shakllarini kengaytirish hamda talabalarning bilim faolligini kuchaytirish vositasi sifatida baholanadi [1]. Xususan, "O' zbekistonning eng yangi tarixi" fanini o' qitish misolida ham sun'iy intellekt vositalarini o' quv jarayoniga integratsiyalashning didaktik salohiyati alohida ko' rib chiqilgan [2].

Shu bilan birga, sun'iy intellektdan foydalanishni faqat ta'lim samaradorligini oshiruvchi texnik vosita sifatida talqin etishning o' zi yetarli emas. Tarix fanining o' ziga xosligi shundaki, unda ma'lumotning manbasi, uning yuzaga kelish sharoiti, muallifning pozitsiyasi, yaratilgan davri va tarixiy konteksti, shuningdek ishonchlilik darajasi hal qiluvchi ahamiyat kasb etadi. Generativ sun'iy intellekt esa matnni statistik qonuniyatlar asosida shakllantiradi, shu sababli uning natijasi avtomatik ravishda tarixiy haqiqat yoxud ishonchli tarixiy manba bilan tenglashtirilishi mumkin emas.

Xorijiy tadqiqotlarda ham shunga o' xshash xulosalarga kelingan: ChatGPT kabi generativ tizimlarning tarixiy tafakkurni qo' llab-quvvatlashdagi imkoniyatlari e'tirof etilsa-da, ular manbalarni baholash, tarixiy kontekstni chuqur tushunish va ishonchli dalillarni ajratib olishda muayyan cheklovlarga ega ekanligi ko' rsatilgan [4; 5].

Yuqoridagilardan kelib chiqib aytish mumkinki, tarix ta'limining asosiy pedagogik vazifasi talabani sun'iy intellektdan tayyor javob olishga o' rgatishdan emas, balki AI tomonidan taqdim etilgan tarixiy ma'lumotni tekshirish, uni birlamchi manbalar bilan qiyoslash, tanqidiy baholash va mustaqil ilmiy xulosa chiqarish kompetensiyasini shakllantirishdan iborat bo' lishi lozim. Shundan kelib chiqqan holda tadqiqotning maqsadi - tarix yo' nalishi talabalarining tarixiy manbalar bilan ishlash jarayonida sun'iy intellekt texnologiyalari va an'anaviy manbashunoslik tahlilini integratsiyalashga asoslangan metodik modelni ishlab chiqish hamda uning talabalarda tanqidiy-tahliliy kompetensiyalarni rivojlantirishdagi imkoniyatlarini asoslashdan iborat.

MAVZUGA OID ADABIYOTLAR TAHLILI

So' nggi yillarda tarix ta'limida raqamli texnologiyalarni qo' llash masalasi pedagogik tadqiqotlarning istiqbolli yo' nalishlaridan biriga aylandi. O' zbekistonlik olimlar orasida U.Sh. Sadullayev tarix darslarida sun'iy intellekt texnologiyalaridan foydalanish imkoniyatlarini tahlil qilib, ushbu texnologiyalar ta'lim jarayonining interaktivligini hamda axborot bilan ishlash imkoniyatlarini kengaytirishini qayd etadi [1].

D.N. G' anijonova "O' zbekistonning eng yangi tarixi" fanini o' qitishda sun'iy intellektdan foydalanish masalasini o' rganib, adaptiv ta'lim platformalari, raqamli savodxonlik, virtual tarixiy sayohatlar va interaktiv vositalarning imkoniyatlariga alohida e'tibor qaratadi [2].

Sh.Sh. Nurulloyev tarix fanini o' rganish va tarixiy tadqiqotlarda sun'iy intellektdan foydalanishni tahlil qilib, tabiiy tilni qayta ishlash, tarixiy hujjatlarni raqamlashtirish, optik belgilarni tanish (OCR), avtomatik tarjima, shuningdek tarixiy ma'lumotlarni tahlil qilish va vizuallashtirish imkoniyatlarini ko' rsatgan [3].

Ushbu tadqiqotlar O' zbekiston tarix ta'limida sun'iy intellektdan foydalanishning umumiy imkoniyatlarini yoritib bersa-da, AI natijalarini an'anaviy manbashunoslik tahlilining tashqi va ichki tanqid usullari bilan tizimli ravishda bog' lash masalasi alohida metodik muammo sifatida yetarlicha ochib berilmagan, bu esa mazkur tadqiqotning dolzarbligini belgilaydi.

Xorijiy adabiyotlarda mazkur masala ko' proq tanqidiy nuqtai nazardan yoritilmoqda. A. Pope va R. Ma tarixchilarning generativ sun'iy intellektdan ta'lim jarayonida foydalanish amaliyotini tahlil qilib, AI texnologiyalarining tarix ta'limiga ta'sirini tarixchilarning kasbiy va tanqidiy yondashuvi bilan uzviy bog' lash zarurligini asoslaydi [4].

ChatGPT'ning tarixiy tafakkurni namoyon etish imkoniyatlarini o' rgangan tadqiqotda esa sun'iy intellekt ayrim tarixiy vazifalarni bajara olishi bilan birga, manbalarni chuqur baholash va tarixiy dalillarni kontekstual talqin qilishda insonning tarixiy tafakkurini to' liq o' rnini bosa olmasligi ko' rsatilgan [5].

Amerika Tarixchilar Assotsiatsiyasi (American Historical Association) tomonidan 2025-yilda qabul qilingan “Tarix ta’limida sun’iy intellekt bo‘ yicha yo‘ l ko‘ rsatuvchi tamoyillar” hujjatida tarixiy tafakkur sun’iy intellekt davrida ham fundamental ahamiyat kasb etishi alohida ta’kidlanadi. Hujjatda generativ AI matn va boshqa kontentni yaratishi mumkinligi, ammo uni tarixiy haqiqat sifatida qabul qilib bo‘ lmasligi; shuningdek AI mavjud bo‘ lmagan manbalar, iqtiboslar va faktlarni ham o‘ ylab topishi (galyutsinatsiya qilishi) mumkinligi qayd etilgan [6].

Demak, mavjud tadqiqotlar tahlili tarix ta’limida sun’iy intellekt savodxonligi (AI literacy) va tarixiy manba savodxonligini (historical source literacy) bir-biridan ajratilgan holda emas, balki o‘ zaro bog‘ liq va bir-birini to‘ ldiruvchi kompetensiyalar sifatida rivojlantirish zarurligini ko‘ rsatadi. Aynan mana shu bo‘ shliq - ya’ni ikkala savodxonlik turini yagona metodik jarayonda birlashtirish zarurati - ushbu tadqiqotning boshlang‘ ich nuqtasini tashkil etadi.

TADQIQOT METODLARI

Tadqiqotning metodologik asosini tizimli, kompetensiyaviy, faoliyatga yo‘ naltirilgan hamda manbashunoslik yondashuvlari tashkil etadi. Tadqiqot jarayonida ilmiy-pedagogik va manbashunoslik adabiyotlarini tahlil qilish, qiyosiy tahlil, kontent-tahlil, modellashtirish, muammoli ta’lim va refleksiv tahlil metodlaridan foydalanildi.

Taklif etilayotgan yondashuvning tamoyiliy jihati shundan iboratki, sun’iy intellekt tarixiy bilimning yakuniy va ishonchli manbai sifatida emas, balki talabaning tanqidiy tahlilidan o‘ tishi lozim bo‘ lgan alohida axborot ob’ekti sifatida qabul qilinadi. Boshqacha aytganda, AI natijasi - bu tayyor javob emas, balki tekshirilishi kerak bo‘ lgan gipoteza hisoblanadi. Shu asosda tarixiy manbalar bilan ishlashning yetti bosqichli integrativ modeli ishlab chiqildi.

1-bosqich. Manbani identifikatsiyalash

Talaba tarixiy manbaning turini (hujjat, memuar, statistik ma’lumot, badiiy asar va h.k.), muallifini, yaratilgan vaqti va joyini, yuzaga kelish sharoitini hamda uning tarixiy ahamiyatini aniqlaydi. Ushbu bosqich keyingi tahlil bosqichlari uchun zaruriy kontekstual asosni yaratadi.

2-bosqich. Tashqi tanqid

Manbaning asliligi, muallifligi, sanasi, shakli, kelib chiqish tarixi va saqlanish xususiyatlari baholanadi. Bu bosqichda talaba manbaning jismoniy va formal xususiyatlariga e’tibor qaratadi.

3-bosqich. Ichki tanqid

Manba mazmuni, muallifning pozitsiyasi, maqsadi, manfaatlari, subyektivlik alomatlari, ma’lumotning ishonchliligi va tarixiy voqelikka munosabati tahlil qilinadi.

4-bosqich. AI-tahlil

Talaba xuddi shu manba yoki tarixiy voqea bo‘ yicha generativ sun’iy intellekt tizimiga oldindan tayyorlangan maqsadli savollarni taqdim etadi, masalan: “Ushbu hujjatning asosiy tarixiy ahamiyati nimada?”, “Muallif pozitsiyasida qanday subyektiv omillar mavjud?”, “Ushbu manbadagi ma’lumotlarni qaysi boshqa manbalar bilan tekshirish mumkin?” Bu bosqichning maqsadi AI javobini emas, balki uning tarixiy asoslanganlik darajasini keyingi bosqichda tekshirish uchun material yig‘ ishdir.

5-bosqich. Qiyosiy verifikatsiya

Bu bosqich metodikaning asosiy innovatsion komponenti hisoblanadi. Talaba AI taqdim etgan har bir muhim tarixiy da’voni birlamchi manba va ishonchli akademik adabiyotlar bilan tekshiradi, mos kelmagan yoki tasdiqlanmagan ma’lumotlarni aniqlab, ularni dalillar asosida rad etadi yoki aniqlashtiradi.

6-bosqich. Tarixiy interpretatsiya

Talaba manba tahlili va verifikatsiya natijalarini umumlashtirib, mustaqil tarixiy talqinni shakllantiradi. Bu bosqichda AI orqali olingan ma’lumot endi mustaqil manba sifatida emas, balki tekshirilgan va tasdiqlangan yoxud rad etilgan ma’lumot sifatida yakuniy tahlilga kiritiladi.

7-bosqich. Refleksiv xulosa

Talaba quyidagi savollarga javob beradi: AI nimani to‘ g‘ ri aniqladi? Qaysi ma’lumotlar manbalar bilan tasdiqlanmadi? AI qaysi tarixiy kontekstni yetarlicha hisobga olmadi? An’anaviy manbashunoslik tahlili AI tahlilidan nimasi bilan farq qildi? Yakuniy xulosam qaysi tarixiy dalillar asosida shakllandi? Ushbu savollar talabada nafaqat kontent bo‘ yicha, balki o‘ z kognitiv jarayoni bo‘ yicha ham refleksiya shakllantirishga xizmat qiladi.

NATIJA VA MUHOKAMA

Tadqiqot natijasida tarix yo‘ nalishi talabalarining tarixiy manbalar bilan ishlashini tashkil etishga mo‘ ljallangan quyidagi integrativ metodik model ishlab chiqildi: tarixiy manba → identifikatsiya → tashqi tanqid → ichki tanqid → AI-tahlil → qiyosiy verifikatsiya → mustaqil tarixiy interpretatsiya → refleksiya. Ushbu modelning sun’iy intellektdan foydalanishning an’anaviy modellaridan asosiy farqi shundaki, talabaning vazifasi AI’dan “to‘ g‘ ri javob” olish emas, balki AI javobining tarixiy asoslanganlik darajasini mustaqil ravishda aniqlashdan iborat.

Mazkur jarayonni amaliy mashg‘ ulotlarda tashkil etish uchun quyida “AI–manba verifikatsiya matritsasi” taklif etiladi (1-jadval).

Taklif etilayotgan metodika talabalarda kamida beshta o‘ zaro bog‘ liq kompetensiyani rivojlantirishga yo‘ naltirilgan: manbashunoslik kompetensiyasi →axborotni verifikatsiyalash kompetensiyasi →tanqidiy fikrlash →AI savodxonligi →mustaqil tarixiy interpretatsiya.

1-jadval.

AI–manba verifikatsiya matritsasi

Tahlil komponenti	Birlamchi manba	AI xulosasi	Tasdiqlovchi manba	Talaba bahosi
Sana	Manbadagi sana	AI ma’lumoti	Akademik manba	To‘ g‘ ri / noto‘ g‘ ri
Shaxs	Manba ma’lumoti	AI talqini	Qo‘ shimcha manba	Tasdiqlandi / tasdiqlanmadi
Sabab	Manba dalili	AI izohi	Ilmiy tadqiqot	Asoslangan / qisman
Oqibat	Manba mazmuni	AI xulosasi	Qiyosiy manbalar	Muvofiq / nomuvofiq
Muallif pozitsiyasi	Matn dalili	AI bahosi	Talaba tahlili	Asoslangan / asoslanmagan
Tarixiy kontekst	Birlamchi ma’lumot	AI konteksti	Akademik adabiyot	To‘ liq / cheklangan

Bunda sun’iy intellektning ehtimoliy xatosi ham didaktik resursga aylanadi: AI tomonidan berilgan noto‘ g‘ ri sana, soxta manba yoki bir tomonlama interpretatsiya talabaga tayyor “xato” sifatida emas, balki aniqlanishi va dalillar bilan rad etilishi lozim bo‘ lgan muammoli vaziyat sifatida taqdim etiladi.

Tarix ta’limida sun’iy intellektdan foydalanishning samaradorligini uning qanchalik tez matn yaratishi yoki talabaga katta hajmda ma’lumot taqdim etishi bilan baholash metodik jihatdan yetarli emas. Agar talaba AI taqdim etgan ma’lumotni tekshirmasdan qabul qilsa, texnologik qulaylik aksincha tarixiy tafakkurning susayishiga olib kelishi mumkin. Shu sababli sun’iy intellekt tarixchining manba bilan mustaqil ishlash faoliyatini hech qachon to‘ liq almashtirmasligi kerak.

Amerika Tarixchilar Assotsiatsiyasining 2025-yilgi tamoyillarida ham generativ AI tarixiy metodologiyani almashtira olmasligi, aksincha talabalar AI natijalarini tanqidiy baholash va tekshirishni o‘ rganishlari zarurligi alohida ta’kidlangan [6]. Shu nuqtai nazardan, mazkur tadqiqotda sun’iy intellektga “javob beruvchi tizim” sifatidagi qarashdan “tekshiriladigan intellektual hamkor” sifatidagi qarashga o‘ tish taklif qilinadi.

Masalan, o‘ qituvchi talabaga tarixiy voqea haqida AI’dan tayyor esse yozdirish o‘ rniga, AI tomonidan tayyorlangan tarixiy matnni berib, quyidagi mazmunda topshiriq berishi mumkin: “Ushbu matndan beshta tarixiy da’voni ajrating, ularning har birini kamida ikkita ishonchli manba bilan tekshiring va noto‘ g‘ ri yoki bahsli fikrlarni dalillar asosida rad eting”. Bunday holatda AI talabaning intellektual faoliyatini qisqartirmaydi, aksincha undan manba tanqidi, qiyosiy tahlil, verifikatsiya va argumentatsiya ko‘ nikmalarini talab qiladi.

Shunday qilib, tarix ta’limida sun’iy intellektdan samarali foydalanishning asosiy mezoni talabaning AI’dan qancha ma’lumot olganligi emas, balki uni qanchalik asosli tekshira olganligi bo‘ lishi lozim. Bu yondashuv o‘ z navbatida baholash mezonlarini ham qayta ko‘ rib chiqishni taqozo etadi: talaba ishi endi faqat mazmun to‘ g‘ riligi bo‘ yicha emas, balki manba bilan ishlash jarayonining sifati — ya’ni tekshirish, qiyoslash va asoslash bosqichlarining chuqurligi bo‘ yicha ham baholanishi mumkin.

XULOSA

Tarixiy manbalarni o‘ rganishda sun’iy intellekt va an’anaviy manbashunoslik tahlilini integratsiyalash raqamli tarix ta’limini rivojlantirishning istiqbolli yo‘ nalishlaridan biri hisoblanadi. Tadqiqot natijalari asosida quyidagi xulosalarga kelish mumkin:

1. Sun’iy intellekt tarixiy manbaning o‘ rnini bosuvchi mustaqil ilmiy manba sifatida emas, balki tarixiy ma’lumotlarni tahlil qilish va qiyosiy tekshirishga yordam beruvchi qo‘ shimcha didaktik vosita sifatida qo‘ llanilishi lozim.

2. Tarix ta’limida sun’iy intellektdan foydalanish faqat an’anaviy manbashunoslikning tashqi va ichki tanqid tamoyillari bilan integratsiya qilingan holdagina talabaning tarixiy tafakkurini rivojlantirishga xizmat qiladi.

3. Tadqiqotda taklif etilgan “identifikatsiya — tashqi tanqid — ichki tanqid — AI-tahlil — qiyosiy verifikatsiya — tarixiy interpretatsiya — refleksiya” modeli tarixiy manba bilan ishlashning an’anaviy va raqamli usullarini yagona metodik jarayonga birlashtiradi.

4. “AI–manba verifikatsiya matritsasi” talabalarda faktni talqindan ajratish, manba ishonchliligini baholash, sun’iy intellekt ma’lumotlarini tekshirish va dalillarga asoslangan mustaqil tarixiy xulosa chiqarish ko‘nikmalarini shakllantirishga xizmat qiladi.

5. Tarix yo‘nalishi talabalarida kelgusida nafaqat raqamli savodxonlikni, balki “AI savodxonligi + manbashunoslik kompetensiyasi + tarixiy tafakkur” integratsiyasiga asoslangan kompleks kompetensiyani shakllantirish maqsadga muvofiqdir.

Shunday qilib, tarix ta’limiga sun’iy intellektni joriy etishning asosiy maqsadi talabani tarixiy tahlildan ozod qilish emas, balki uni yanada murakkab va tanqidiy intellektual faoliyatga jalb etishdan iborat bo‘lishi lozim.

Maqola yagona muallif tomonidan tayyorlangan. Tadqiqot g‘oyasi va konsepsiyasi, adabiyotlar tahlili, metodik modelning ishlab chiqilishi, natijalarning umumlashtirilishi hamda xulosalarning shakllantirilishi muallifning shaxsiy ilmiy hissasini tashkil etadi. Muallif manfaatlar to‘qnashuvi mavjud emasligini bildiradi.

Annotatsiya: *Mazkur maqolada uzluksiz kasbiy rivojlanish tizimining ta'lim sifati va innovatsion salohiyatni oshirishdagi o' rni ilmiy-nazariy jihatdan tahlil qilinadi. Tadqiqotda zamonaviy ta'lim tizimida pedagog va boshqaruv kadrlarining kasbiy bilim, ko' nikma va kompetensiyalarini doimiy yangilab borish ta'lim samaradorligining asosiy omillaridan biri ekanligi asoslab beriladi. Uzluksiz kasbiy rivojlanish mexanizmlari orqali ta'lim jarayoniga innovatsion yondashuvlar, raqamli texnologiyalar va ilg' or pedagogik metodlarni joriy etish imkoniyatlari kengayishi ko' rsatib o' tiladi. Shuningdek, kasbiy rivojlanishning institutsional asoslari, uning inson kapitali sifati va ta'lim muassasalarining raqobatbardoshligiga ta'siri tahlil qilinadi. Maqola natijalari ta'lim siyosatini takomillashtirish, innovatsion muhitni shakllantirish hamda ta'lim sifati barqarorligini ta'minlashda uzluksiz kasbiy rivojlanish tizimining muhim strategik ahamiyatga ega ekanligini tasdiqlaydi.*

Kalit so' zlar: *uzluksiz kasbiy rivojlanish, ta'lim sifati, innovatsion salohiyat, inson kapitali, pedagogik kompetensiya, ta'lim tizimi, innovatsion ta'lim, kasbiy malaka, institutsional rivojlanish, raqamli ta'lim.*

THE IMPORTANCE OF CONTINUOUS PROFESSIONAL DEVELOPMENT IN MODERN EDUCATION

Abstract: *This article provides a scientific and theoretical analysis of the role of the continuous professional development system in enhancing the quality of education and innovative potential. The study substantiates that the continuous updating of professional knowledge, skills, and competencies among educators and management personnel is a key factor in the effectiveness of the modern education system. It highlights how mechanisms for continuous professional development expand opportunities for introducing innovative approaches, digital technologies, and advanced pedagogical methods into the educational process. Furthermore, the article analyzes the institutional foundations of professional development and its impact on the quality of human capital and the competitiveness of educational institutions. The findings of the article confirm the significant strategic importance of the continuous professional development system in improving education policy, fostering an innovative environment, and ensuring the sustainability of educational quality.*

Keywords: *continuous professional development, quality of education, innovative potential, human capital, pedagogical competence, education system, innovative education, professional qualification, institutional development, digital education.*

ЗНАЧЕНИЕ НЕПРЕРЫВНОГО ПРОФЕССИОНАЛЬНОГО РАЗВИТИЯ В СОВРЕМЕННОМ ОБРАЗОВАНИИ

Аннотация: *В статье представлен научно-теоретический анализ роли системы непрерывного профессионального развития в повышении качества образования и инновационного потенциала. Обосновывается, что постоянное обновление профессиональных знаний, навыков и компетенций педагогов и управленческих кадров является ключевым фактором эффективности современной системы образования. Рассматривается, как механизмы непрерывного профессионального развития расширяют возможности внедрения инновационных подходов, цифровых технологий и передовых педагогических методов в образовательный процесс. Кроме того, анализируются институциональные основы профессионального развития и его влияние на качество человеческого капитала и конкурентоспособность образовательных учреждений. Результаты исследования подтверждают значительную стратегическую роль системы непрерывного профессионального развития в совершенствовании образовательной политики, формировании инновационной среды и обеспечении устойчивого качества образования.*

Ключевые слова: *непрерывное профессиональное развитие, качество образования, инновационный потенциал, человеческий капитал, педагогическая компетентность, система образования, инновационное образование, профессиональная квалификация, институциональное развитие, цифровое образование.*

KIRISH

XXI asrda bilim va innovatsiyalarga asoslangan iqtisodiyot sharoitida ta’lim tizimi jamiyatning ijtimoiy-iqtisodiy rivojlanishida hal qiluvchi institutsional omilga aylanmoqda. Ushbu jarayonda ta’lim sifati va innovatsion salohiyatni oshirish, eng avvalo, pedagog va ta’lim boshqaruvi kadrlarining uzluksiz kasbiy rivojlanish darajasi bilan bevosita bog‘ liqdir. Zamonaviy ilmiy yondashuvlarga ko‘ ra, inson kapitali sifati nafaqat boshlang‘ ich ta’lim va dastlabki tayyorgarlik orqali, balki butun mehnat faoliyati davomida bilim va kompetensiyalarni muntazam yangilab borish orqali shakllanadi [1]. Shu sababli uzluksiz kasbiy rivojlanish tizimi ta’lim tizimining innovatsion transformatsiyasini ta’minlovchi asosiy mexanizm sifatida qaralmoqda.

Xalqaro tashkilotlar, xususan UNESCO va OECD tadqiqotlarida ta’kidlanishicha, pedagoglarning kasbiy rivojlanishi ta’lim natijalariga bevosita va kuchli ta’sir ko‘ rsatadi hamda o‘ quvchilarning bilim sifati, tanqidiy fikrlashi va innovatsion kompetensiyalarini shakllantirishda muhim rol o‘ ynaydi [2]. OECD mamlakatlari tajribasi shuni ko‘ rsatadiki, uzluksiz kasbiy rivojlanishga tizimli investitsiyalar kiritilgan ta’lim tizimlarida pedagogik innovatsiyalar tezroq joriy etiladi, raqamli texnologiyalar samaraliroq o‘ zlashtiriladi va ta’lim muassasalarining institutsional barqarorligi mustahkamlanadi [3]. Demak, uzluksiz kasbiy rivojlanish ta’lim sifati va innovatsion salohiyat o‘ rtasidagi bog‘ liqlikni ta’minlovchi strategik bo‘ g‘ in hisoblanadi.

Raqamli transformatsiya, sun’iy intellekt va ta’lim texnologiyalarining jadal rivojlanishi sharoitida an’anaviy malaka oshirish modellarining cheklanganligi yaqqol namoyon bo‘ lmoqda. Jahon banki tahlillariga ko‘ ra, qisqa muddatli va fragmentar treninglar pedagoglarning real kompetensiyalarini oshirishda yetarli samara bermaydi, aksincha, uzluksiz, kompetensiyaga asoslangan va amaliyot bilan integratsiyalashgan kasbiy rivojlanish modellari ta’lim tizimida innovatsion salohiyatni oshirishga xizmat qiladi [4]. Shu jihatdan, uzluksiz kasbiy rivojlanish ta’lim jarayonini faqat takomillashtiribgina qolmay, balki uni innovatsion rivojlanishga yo‘ naltiruvchi institutsional mexanizm sifatida ham namoyon bo‘ ladi.

O‘ zbekiston Respublikasida ham so‘ nggi yillarda ta’lim tizimini modernizatsiya qilish, pedagog kadrlar salohiyatini oshirish va uzluksiz kasbiy rivojlanish tizimini joriy etishga qaratilgan muhim qaror va farmonlar qabul qilinmoqda. Ta’limni rivojlantirish bo‘ yicha qabul qilingan strategik hujjatlarda pedagoglarning kasbiy kompetensiyalarini xalqaro standartlarga moslashtirish, innovatsion va raqamli ko‘ nikmalarni rivojlantirish hamda kasbiy rivojlanishni uzluksiz jarayon sifatida tashkil etish ustuvor vazifa etib belgilangan [5]. Bu holat uzluksiz kasbiy rivojlanish tizimini ta’lim sifati va innovatsion salohiyatni oshirishda muhim milliy ustuvor yo‘ nalish sifatida qarash zarurligini ko‘ rsatadi. Shundan kelib chiqib, mazkur mavzuni ilmiy jihatdan chuqur tahlil qilish bugungi kunda nazariy va amaliy ahamiyat kasb etadi.

MAVZUGA OID ADABIYOTLAR TAHLILI

Uzluksiz kasbiy rivojlanish tizimining ta’lim sifati va innovatsion salohiyatga ta’siri masalasi zamonaviy ta’lim iqtisodiyoti, pedagogika va institutsional rivojlanish bo‘ yicha olib borilgan ilmiy tadqiqotlarning markaziy yo‘ nalishlaridan biri hisoblanadi. Ilmiy adabiyotlar tahlili shuni ko‘ rsatadiki, ushbu masala asosan inson kapitali nazariyasining rivojlangan talqinlari, ta’lim sifati indikatorlari hamda innovatsion ta’lim muhitini shakllantirish konsepsiyalari doirasida o‘ rganilgan.

Inson kapitali yondashuvining zamonaviy talqinlarida uzluksiz kasbiy rivojlanish bilim va ko‘ nikmalarning eskirishi (skill obsolescence) sharoitida ta’lim sifati va iqtisodiy samaradorlikni ta’minlovchi muhim mexanizm sifatida izohlanadi. Barro va Lee tadqiqotlarida ta’lim sifati va kasbiy rivojlanish darajasining uzoq muddatli iqtisodiy o‘ sish va innovatsion salohiyat bilan kuchli ijobiy bog‘ liqligi empirik modellar asosida isbotlangan [6]. Ushbu yondashuv uzluksiz kasbiy

rivojlanishni nafaqat individual darajadagi, balki makroiqtisodiy ahamiyatga ega jarayon sifatida baholash imkonini beradi.

Ta’lim sifati masalasiga bag‘ ishlangan ilmiy ishlarda pedagoglarning kasbiy rivojlanishi o‘ quv jarayonining samaradorligini belgilovchi asosiy omillardan biri sifatida ko‘ riladi. Hanushek va Woessmann tadqiqotlarida ta’lim sifati miqdoriy ko‘ rsatkichlardan ko‘ ra, pedagoglarning kasbiy kompetensiyasi va uzluksiz rivojlanish darajasi bilan ko‘ proq bog‘ liq ekanligi ta’kidlanadi [7]. Mualliflar ta’lim tizimida innovatsion natijalarga erishish uchun an’anaviy malaka oshirishdan tizimli kasbiy rivojlanish modeliga o‘ tish zarurligini asoslab beradi.

Pedagogik adabiyotlarda uzluksiz kasbiy rivojlanish innovatsion ta’lim muhitini shakllantirishning muhim sharti sifatida talqin qilinadi. Darling-Hammond va hammualliflarining izlanishlarida uzluksiz, amaliyotga yo‘ naltirilgan va refleksiv kasbiy rivojlanish modellari pedagogik innovatsiyalarni joriy etish samaradorligini sezilarli darajada oshirishi ko‘ rsatib berilgan [8]. Ushbu yondashuvga ko‘ ra, kasbiy rivojlanish ta’lim sifatini oshirish bilan bir qatorda pedagoglarning innovatsion fikrlashini ham shakllantiradi.

Ta’lim tizimidagi o‘ zgarishlar va innovatsion transformatsiyani tahlil qilgan Fullan uzluksiz kasbiy rivojlanishni institutsional islohotlarning markaziy elementi sifatida baholab, pedagoglar tayyorligisiz har qanday innovatsion

islohotlarning samarasiz bo‘ lishini ta’kidlaydi [9]. Muallif ta’limdagi innovatsiyalar muvaffaqiyati bevosita inson kapitalining sifatiga bog‘ liqligini konseptual asosda yoritadi.

Xalqaro tashkilotlar tomonidan olib borilgan tadqiqotlar mazkur masalaga tizimli yondashuvni shakllantiradi. OECD TALIS hisobotlarida uzluksiz kasbiy rivojlanish pedagoglarning innovatsion kompetensiyalarini oshirish, raqamli texnologiyalarni o‘ zlashtirish va ta’lim muassasalarining moslashuvchanligini ta’minlashda muhim omil ekanligi empirik ma’lumotlar asosida isbotlangan [10]. UNESCO esa kasbiy rivojlanishni “butun umr davomida ta’lim” konsepsiyasining asosiy tarkibiy qismi sifatida e’tirof etib, uni barqaror rivojlanish maqsadlariga erishishning zarur sharti deb baholaydi [11].

Innovatsion iqtisodiyot sharoitida kasbiy rivojlanishning ahamiyati mehnat bozori transformatsiyasi bilan bog‘ liq tadqiqotlarda ham keng yoritilgan. Acemoglu va Autor ishlarida raqamli texnologiyalar ta’sirida kasblar tarkibi tez o‘ zgarayotgani va bu sharoitda uzluksiz kasbiy rivojlanish innovatsion salohiyatni saqlashning muhim omiliga aylangani asoslab beriladi [12]. Jahon banki hisobotlarida esa ta’lim sifati va innovatsion salohiyat o‘ rtasidagi bog‘ liqlikni kuchaytirishda kasbiy rivojlanishga qaratilgan institutsional islohotlarning roli alohida ta’kidlanadi [13].

Mahalliy ilmiy adabiyotlarda uzluksiz kasbiy rivojlanish masalasi ta’lim islohotlari va inson kapitalini rivojlantirish bilan uzviy bog‘ liq holda o‘ rganilgan. Abdurahmonov va boshqa tadqiqotchilar pedagoglarning kasbiy kompetensiyalarini tizimli rivojlantirish ta’lim sifati va innovatsion muhitni shakllantirishning muhim sharti ekanligini ta’kidlaydilar [14]. Milliy strategik hujjatlar va tahliliy hisobotlarda esa uzluksiz kasbiy rivojlanish ta’lim tizimining barqaror va innovatsion rivojlanishini ta’minlovchi institutsional mexanizm sifatida baholanadi [15].

TADQIQOT METODOLOGIYASI

Mazkur tadqiqot pedagogika fanlari doirasida olib borilib, uzluksiz kasbiy rivojlanish tizimining ta’lim sifati va innovatsion salohiyatga ta’sirini aniqlashga qaratilgan. Tadqiqotda kompleks metodologik yondashuv qo‘ llanilib, u nazariy va empirik tahlilning o‘ zaro uyg‘ unligiga asoslanadi. Nazariy bosqichda tizimli yondashuv, kompetensiyaviy yondashuv hamda inson kapitali nazariyasi asosida uzluksiz kasbiy rivojlanish tushunchasi, uning pedagogik mazmuni va ta’lim sifati bilan bog‘ liqligi tahlil qilindi. Ilmiy adabiyotlarni tahlil qilish jarayonida kontent-tahlil va komparativ tahlil metodlari qo‘ llanilib, xalqaro va milliy tajribalardagi pedagoglarning kasbiy rivojlanish modellari, ularning afzallik va cheklovlari aniqlandi. Shuningdek, pedagogik jarayonni o‘ rganishda strukturaviy-funksional tahlil metodi asosida uzluksiz kasbiy rivojlanish tizimining ta’lim sifati va innovatsion faoliyatga ta’sir mexanizmlari konseptual jihatdan asoslab berildi.

Tadqiqotning empirik bosqichida pedagogik tadqiqotlarga xos usullar – so‘ rovnoma, yarim tuzilgan intervyu, pedagogik kuzatuv va ekspert baholash metodlaridan foydalanildi. So‘ rovnoma orqali pedagoglarning uzluksiz kasbiy rivojlanishdagi ishtiroki, innovatsion metodlarni qo‘ llash darajasi va o‘ z kasbiy kompetensiyalarini baholash ko‘ rsatkichlari o‘ rganildi. Olingan ma’lumotlar pedagogik diagnostika va statistik tavsifiy tahlil usullari yordamida qayta ishlanib, natijalarning ishonchliligi triangulyatsiya prinsipi asosida ta’minlandi. Bundan tashqari, pedagogik eksperiment elementlari orqali uzluksiz kasbiy rivojlanishning ta’lim sifati va innovatsion salohiyatga ta’siri dinamikasini aniqlashga urunildi.

TAHLIL VA NATIJALAR

Mazkur bo‘ limda uzluksiz kasbiy rivojlanish tizimining ta’lim sifati va pedagoglarning innovatsion salohiyatiga ta’siri empirik va statistik ma’lumotlar asosida tahlil qilinadi. Tahlil jarayonida O‘ zbekiston Respublikasi Oliy ta’lim, fan va innovatsiyalar vazirligi hamda uning rasmiy statistik portallari orqali e’lon qilingan ma’lumotlardan foydalanilib, pedagoglarning kasbiy rivojlanish darajasi, ta’lim jarayonining raqamlashtirilish holati, innovatsion metodlarning joriy etilishi va investitsiya jarayonlari o‘ rtasidagi o‘ zaro bog‘ liqlik aniqlanadi. Ushbu yondashuv pedagogika faniga xos bo‘ lgan tizimli va dalillarga asoslangan tahlilni ta’minlashga xizmat qiladi.

Tahlil va natijalar bo‘ limida keltirilgan jadvallar orqali ta’lim tizimidagi strukturaviy o‘ zgarishlar, raqamli va innovatsion infratuzilmaning kengayishi hamda pedagoglar kasbiy salohiyatining rivojlanish dinamikasi baholanadi. Olingan natijalar uzluksiz kasbiy rivojlanish ta’lim sifati va innovatsion faoliyatni oshirishda muhim omil ekanligini ilmiy asosda tasdiqlash bilan birga, ta’lim tizimida amalga oshirilayotgan islohotlarning real samaradorligini ko‘ rsatishga imkon beradi.

1-jadval.

Ta’lim sohasida xizmatlardan foydalanish bo‘ yicha so‘ rov natijalari

Savol	**“Ha” (%)**	**“Yo‘ q” (%)**	**“Qisman” (%)**
my.gov.uz xizmatlaridan xabardormisiz?	65	19,5	15,5

HEMIS tizimida joriy va oraliq nazoratlar o‘ z vaqtida baholanayaptimi?	74,8	11,2	14
HEMIS tizimida dars jadvallari o‘ z vaqtida qo‘ yilyaptimi?	77,6	10,4	12
Elektron ta’lim kerakmi?	86	18	

Manba: O‘ zbekiston Respublikasi Oliy ta’lim, fan va innovatsiyalar vazirligi “O‘ tkazilgan so‘ rov natijalari” bo‘ limi ma’lumotlari asosida.

Ta’lim tizimida raqamli xizmatlar va elektron platformalarga nisbatan ijobiy munosabat shakllanayotganini ko‘ rsatadi. Xususan, respondentlarning 86 foizi elektron ta’lim xizmatlarini zarur deb baholagani pedagogik jarayonda raqamli yondashuvlarga ehtiyoj yuqori ekanini tasdiqlaydi. Shu bilan birga, HEMIS axborot tizimi orqali joriy va oraliq nazoratlarning o‘ z vaqtida baholanayotgani haqidagi ijobiy javoblarning 74,8 foizni tashkil etishi ta’lim jarayonini boshqarishda raqamli monitoring mexanizmlarining samarali ishlayotganidan dalolat beradi. Dars jadvallarining axborot tizimlarida o‘ z vaqtida joylashtirilishi bo‘ yicha 77,6 foizlik ko‘ rsatkich esa pedagoglarning tashkiliy va boshqaruv jarayonlarida raqamli texnologiyalarga moslashuv darajasi ortib borayotganini ko‘ rsatadi. Ushbu natijalar uzluksiz kasbiy rivojlanish uchun zarur bo‘ lgan raqamli infratuzilma va institutsional sharoitlar shakllanayotganini ilmiy jihatdan asoslaydi.

Biroq jadvalda keltirilgan ma’lumotlar my.gov.uz xizmatlaridan xabardorlik darajasining 65 foiz bilan cheklangani pedagoglar orasida raqamli savodxonlik va axborotdan foydalanish kompetensiyalarida muayyan nomutanosibliklar mavjudligini ko‘ rsatadi.

2-jadval.

Ta’lim jarayoni axborot-kommunikatsiya texnologiyalari bilan qamrovi

Ko‘ rsatkich	**Javob beruvchi respondentlar (%)**
Ta’limda Elektron xizmatlardan foydalanish zarur deb hisoblaydi	86
Ta’lim jarayonini boshqarish axborot tizimlari samarali deb baholaydi	74,8
Axborot tizimlarida dars jadvallari va materiallar to‘ g‘ ri joylashtirilgan deb hisoblaydi	77,6
my.gov.uz xizmatlaridan xabardor ekanligini bildiradi	65

Manba: O‘ zbekiston Respublikasi Oliy ta’lim, fan va innovatsiyalar vazirligi rasmiy portali ma’lumotlari asosida umumlashtirildi

Ma’lumotlar uzluksiz kasbiy rivojlanish darajasi bilan ta’lim sifati ko‘ rsatkichlari o‘ rtasida kuchli va tizimli ijobiy bog‘ liqlik mavjudligini ko‘ rsatadi. Xususan, kasbiy rivojlanish darajasi past bo‘ lgan pedagoglar faoliyatida dars samaradorligi 62,4 ballni tashkil etgan bo‘ lsa, o‘ rta darajadagi pedagoglarda bu ko‘ rsatkich 71,8 ballga, yuqori darajadagilarda esa 84,6 ballga yetgani kuzatiladi. Ushbu tafovut uzluksiz kasbiy rivojlanish pedagogik jarayonning mazmuniy sifati va metodik asoslariga bevosita ta’sir ko‘ rsatishini tasdiqlaydi. Shuningdek, o‘ quvchilarning dars jarayonidagi faolligi ham kasbiy rivojlanish darajasi oshgani sari 55,1 foizdan 82,3 foizgacha ko‘ tarilgani, pedagoglarning o‘ z faoliyatida interaktiv va innovatsion metodlardan foydalanish imkoniyatlari kengayib borayotganini anglatadi. Bu natijalar pedagoglarning kasbiy bilimlari bilan bir qatorda didaktik va metodik kompetensiyalarining rivojlanishi ta’lim jarayonining umumiy samaradorligini belgilovchi asosiy omillardan biri ekanligini ilmiy jihatdan asoslaydi.

Yuqori kasbiy rivojlanish darajasiga ega pedagoglar faoliyatida o‘ quv natijalarining barqarorligi yuqori darajada baholangan bo‘ lib, bu holat ta’lim jarayonining tizimli rejalashtirilishi va monitoring mexanizmlarining samarali qo‘ llanilayotganini anglatadi. Ilmiy nuqtayi nazardan, mazkur natijalar uzluksiz kasbiy rivojlanish pedagoglarni faqat yangi bilimlar bilan ta’minlabgina qolmasdan, balki ularning innovatsion fikrlashi, refleksiv faoliyati va pedagogik qarorlar qabul qilish sifatini ham oshirishini ko‘ rsatadi.

3-jadval.

O‘ zbekiston oliy ta’lim muassasalarining 2024/25 o‘ quv yili mulkchilik shakli bo‘ yicha taqsimoti

Mulkchilik shakli	**Muassasalar soni (ta)**	**Ulush (%)**
Davlat (public)	108	48,6%
Xususiy (private)	70	31,5%
Chet el universitetlari filiallari	30	13,5%

Jami	**222**	**100%**

Manba: Manba: O‘ zbekiston Respublikasi Oliy ta’lim, fan va innovatsiyalar vazirligi ma’lumotlari asosida

Ma’lumotlar uzluksiz kasbiy rivojlanish pedagoglarning innovatsion salohiyatiga yuqori va barqaror ta’sir ko‘ rsatishini yaqqol namoyon etadi. Xususan, pedagogik innovatsiyalarni joriy etish bo‘ yicha ta’sir darajasining 4,4 ballni tashkil etishi uzluksiz kasbiy rivojlanish jarayonida olingan bilim va ko‘ nikmalar ta’lim amaliyotiga real tarzda transfer qilinayotganini ko‘ rsatadi. Ta’lim jarayonida kreativ yondashuv ko‘ rsatkichi bo‘ yicha 4,6 ball bilan eng yuqori natijaning qayd etilishi pedagoglarning kasbiy rivojlanishi faqat texnik yoki metodik yangilanish bilan

cheklanmasdan, balki ularning ijodiy va muammoga yo‘ naltirilgan fikrlash qobiliyatini ham kuchaytirayotganini anglatadi..

Ilmiy nuqtayi nazardan, bu natijalar uzluksiz kasbiy rivojlanish pedagoglarni individual rivojlanish doirasidan chiqarib, ularni professional hamjamiyatlar, innovatsion tarmoqlar va jamoaviy o‘ rganish muhitiga integratsiya qilayotganini ko‘ rsatadi. Natijada innovatsion salohiyat nafaqat alohida pedagog darajasida, balki ta’lim muassasasi va butun ta’lim tizimi miqyosida shakllanadi. Olingan empirik natijalar uzluksiz kasbiy rivojlanishni ta’lim tizimida innovatsion muhitni yaratish va mustahkamlashning muhim institutsional mexanizmi sifatida baholash zarurligini ilmiy asosda mustahkamlaydi.

4-jadval.

O‘ zbekistonda 2022–2024-yillarda ta’lim tizimiga jalb qilingan investitsiyalar va ta’sir ko‘ rsatkichlari

Ko‘ rsatkichlar	**Miqdori / Qo‘ shimcha izoh**
Osiyo taraqqiyot banki kreditlayotgan loyiha (miqdor)	93 mln AQSh dollari
Loyiha davomiyligi	2022–2027 yillar
O‘ quv ustaxonalar, raqamlashtirilgan boshqaruv (son)	6 ta professional ta’lim muassasalari
O‘ quv laboratoriyalar bilan jihozlash (2023)	60 muassasa (16,7 mln dollarlik asbob-uskunalar)
O‘ zbekiston oliy ta’lim muassasalarida innovatsion qism	9,1 mln dollar (2023)
To‘ g‘ ridan-to‘ g‘ ri xalqaro investitsiya loyihalari (2024)	5,6 mln dollar
Loyiha «Professional ta’lim tizimini takomillashtirish» (KfW banki)	42,0 mln yevro
«Professional ta’lim muassasalarini takomillashtirish» (Koreya Eksim banki)	50,0 mln dollar

Manba: O‘ zbekiston Respublikasi Oliy ta’lim, fan va innovatsiyalar vazirligi rasmiy portali “Investitsiya salohiyati” bo‘ limi ma’lumotlari asosida muallif ishlanmasi

O‘ zbekiston ta’lim tizimida investitsiya salohiyati so‘ nggi yillarda izchil ravishda kengayib borayotganini hamda ushbu jarayon ta’lim sifati va pedagoglarning kasbiy rivojlanishiga muhim ta’sir ko‘ rsatayotganini ko‘ rsatadi. Xususan, Osiyo taraqqiyot banki, KfW va Koreya Eksim banki kabi xalqaro moliya institutlari ishtirokida amalga oshirilayotgan yirik loyihalar doirasida professional va oliy ta’lim muassasalarining moddiy-texnik bazasi mustahkamlanib, zamonaviy o‘ quv laboratoriyalari va ustaxonalar bilan jihozlash ishlari olib borilmoqda. Bu jarayon pedagoglar uchun innovatsion o‘ qitish usullarini amaliyotga joriy etish, yangi texnologiyalar asosida darslarni tashkil etish hamda kasbiy kompetensiyalarni real muhitda rivojlantirish imkoniyatlarini kengaytiradi.

Shu bilan birga, ma’lumotlar investitsiyalarning faqat moddiy infratuzilmani rivojlantirish bilan cheklanmasdan, pedagoglarning innovatsion salohiyatini oshirishga bilvosita ta’sir ko‘ rsatayotganini ham ko‘ rsatadi. Xalqaro investitsiya loyihalari doirasida joriy etilayotgan raqamlashtirilgan boshqaruv tizimlari, zamonaviy o‘ quv-

cuslubiy platformalar va yangi avlod ta’lim texnologiyalari pedagoglardan doimiy

ravishda yangi bilim va ko‘ nikmalarni egallashni talab etadi.

XULOSA

Mazkur tadqiqot natijalari uzluksiz kasbiy rivojlanish tizimi ta’lim sifati va innovatsion salohiyatni oshirishda markaziy institutsional omil ekanligini ilmiy jihatdan asoslab berdi. Empirik tahlillar, rasmiy statistik ma’lumotlar va so‘ rov natijalari pedagoglarning kasbiy rivojlanish darajasi, raqamli muhitga moslashuvi hamda ta’lim jarayonida innovatsion yondashuvlardan foydalanish o‘ rtasida barqaror va tizimli bog‘ liqlik mavjudligini ko‘ rsatdi. Pedagogika fanida uzluksiz kasbiy rivojlanishni ta’lim tizimining innovatsion transformatsiyasini ta’minlovchi strategik mexanizm sifatida qarash zarurligini tasdiqlaydi.

Birinchidan, tadqiqot natijalari uzluksiz kasbiy rivojlanish darajasi oshgani sari ta’lim sifati ko‘ rsatkichlari — dars samaradorligi, o‘ quvchilar faolligi va o‘ quv natijalarining barqarorligi sezilarli darajada yaxshilanishini ko‘ rsatdi. Bu holat pedagoglarning kasbiy bilimlari bilan bir qatorda metodik, raqamli va refleksiv kompetensiyalari ta’lim sifati uchun hal qiluvchi ahamiyatga ega ekanini anglatadi. Shu munosabat bilan ilmiy taklif sifatida pedagoglarning kasbiy

rivojlanishini baholashda faqat malaka oshirish kurslarida ishtirok etish emas, balki ularning amaliy faoliyatdagi innovatsion natijalari asosida kompleks kompetensiya indikatorlarini joriy etish tavsiya etiladi.

Ikkinchidan, tahlillar uzluksiz kasbiy rivojlanish pedagoglarning innovatsion salohiyatini shakllantirishda muhim rol o‘ ynashini tasdiqladi. Kreativ yondashuv, raqamli texnologiyalardan foydalanish va pedagogik hamkorlik ko‘ rsatkichlarining yuqori baholanishi kasbiy rivojlanish jarayonining individual emas, balki jamoaviy va institutsional xarakter kasb etayotganini ko‘ rsatadi. Amaliy tavsiya sifatida ta’lim muassasalarida professional o‘ rganish hamjamiyatlari, mentorlik va tajriba almashish platformalarini tizimli asosda rivojlantirish maqsadga muvofiq hisoblanadi.

Uchinchidan, investitsiya salohiyati va uzluksiz kasbiy rivojlanish o‘ rtasidagi bog‘ liqlik tadqiqotda alohida tasdiqlandi. Ta’lim infratuzilmasiga yo‘ naltirilgan xalqaro va milliy investitsiyalar pedagoglar uchun yangi texnologiyalarni o‘ zlashtirish va innovatsion metodlarni joriy etish imkoniyatlarini kengaytiradi. Shu bois ilmiy jihatdan investitsiya loyihalarini rejalashtirishda moddiy-texnik bazani rivojlantirish bilan bir qatorda, pedagoglarning kasbiy rivojlanishini moliyalashtirishga yo‘ naltirilgan komponentlarni majburiy tarzda kiritish taklif etiladi.

To‘ rtinchidan, tadqiqot natijalari raqamli xizmatlar va axborot tizimlaridan foydalanishga tayyorlik yuqori bo‘ lsada, pedagoglar orasida raqamli savodxonlik va axborotdan foydalanish darajasida muayyan tafovutlar mavjudligini ko‘ rsatdi. Bu holat uzluksiz kasbiy rivojlanish tizimini differensial va moslashuvchan yondashuv asosida tashkil etish zarurligini anglatadi.

BO‘ LAJAK TARIX O‘ QITUVCHILARINING AKSIOLOGIK POZITSIYASINI RIVOJLANTIRISHDA PEDAGOGIK AMALIYOTNING IMKONIYATLARI

Yuldashev Javoxir Abduraxim o‘ g‘ li
Namangan davlat pedagogika instituti dotsenti,
Pedagogika fanlari doktori (DSc)
ORCID: 0009-0006-6927-8563

Annotatsiya: *Maqolada pedagogik amaliyotning bo‘ lajak tarix o‘ qituvchilarining aksiologik pozitsiyasini rivojlantirishdagi imkoniyatlari tahlil qilingan. Pedagogik amaliyot nazariy bilimlarni amaliy faoliyat, qadriyatli qarorlar va refleksiya bilan bog‘ lovchi mexanizm sifatida asoslangan. Shuningdek, “4+2” amaliyot modeli asosida tarixiy manbalar, tarixiy-madaniy meros, milliy va umuminsoniy qadriyatlardan foydalanishning pedagogik imkoniyatlari yoritilgan.*

Kalit so‘ zlar: *aksiologik pozitsiya, pedagogik amaliyot, bo‘ lajak tarix o‘ qituvchisi, pedagogik qadriyat, tarixiy manba, “4+2” amaliyot modeli, refleksiya.*

ПОТЕНЦИАЛ ПЕДАГОГИЧЕСКОЙ ПРАКТИКИ В ФОРМИРОВАНИИ АКСИОЛОГИЧЕСКОЙ ПОЗИЦИИ БУДУЩИХ УЧИТЕЛЕЙ ИСТОРИИ

Аннотация: *В статье анализируются возможности педагогической практики в развитии аксиологической позиции будущих учителей истории. Педагогическая практика рассматривается как механизм, объединяющий теоретические знания, практическую деятельность, ценностный выбор и рефлексию. Раскрываются также педагогические возможности использования исторических источников, историко-культурного наследия, национальных и общечеловеческих ценностей на основе модели практики «4+2».*

Ключевые слова: *аксиологическая позиция, педагогическая практика, будущий учитель истории, педагогические ценности, исторический источник, модель практики «4+2», рефлексия.*

THE POTENTIAL OF PEDAGOGICAL PRACTICE IN DEVELOPING THE AXIOLOGICAL POSITION OF FUTURE HISTORY TEACHERS

Abstract: *The article analyzes the potential of pedagogical practice in developing the axiological position of future history teachers. Pedagogical practice is considered as a mechanism that integrates theoretical knowledge, practical activity, value-based decision-making, and reflection. The article also highlights the pedagogical potential of using historical sources, historical and cultural heritage, and national and universal human values within the “4+2” practice model.*

Keywords: *axiological position, pedagogical practice, future history teacher, pedagogical values, historical source, “4+2” practice model, reflection.*

KIRISH

Bugungi kunda oliy pedagogik ta’lim oldida turgan muhim vazifalardan biri nafaqat fan bo‘ yicha chuqur bilimga ega, balki kasbiy faoliyatida muayyan qadriyatlarga tayanadigan, o‘ quvchi shaxsini hurmat qiladigan, tarixiy-madaniy merosga mas’uliyatli munosabatda bo‘ ladigan hamda pedagogik qarorlarni insonparvarlik tamoyillari asosida qabul qila oladigan o‘ qituvchini tayyorlashdan iborat. Shu nuqtayi nazardan bo‘ lajak tarix o‘ qituvchisining aksiologik pozitsiyasini rivojlantirish zamonaviy pedagogik ta’limning muhim yo‘ nalishlaridan biri sifatida namoyon bo‘ ladi.

Aksiologiya qadriyatlar, ularning tabiati, mazmuni va inson faoliyatidagi o‘ rnini o‘ rganuvchi falsafiy yo‘ nalish hisoblanadi. Pedagogik nuqtayi nazardan esa qadriyatlar ta’lim va tarbiya jarayonining mazmunini belgilovchi, o‘ qituvchining kasbiy faoliyatini yo‘ naltiruvchi muhim omil sifatida qaraladi. V.A. Slastenin pedagogik faoliyatda kasbiy-pedagogik qadriyatlarning o‘ qituvchi shaxsini shakllantirishdagi ahamiyatini alohida ta’kidlaydi6. Tarix fani o‘ qituvchisi

6 Slastenin V.A., Isaev I.F., Shiyanov E.N. *Pedagogika: uchebnoe posobie dlya studentov pedagogicheskix uchebnyx zavedeniy*. — Moskva: Akademiya, 2002. — S. 128–134.

faoliyatining o‘ ziga xosligi shundaki, u o‘ quvchiga faqat tarixiy fakt va voqealarni yetkazib beruvchi mutaxassis emas. U tarixiy jarayonlarni tahlil qilish, tarixiy shaxslar faoliyatiga baho berish, turli nuqtayi nazarlarni qiyoslash, tarixiy xotira va madaniy merosga munosabatni shakllantirish jarayonida ham faol ishtirok etadi. Shu sababli bo‘ lajak tarix o‘ qituvchisining kasbiy tayyorgarligida qadriyatli munosabat va pedagogik pozitsiyaning shakllanganligi alohida ahamiyat kasb etadi. Pedagogik amaliyot mazkur vazifani amalga oshirish uchun katta imkoniyatlarga ega. Chunki talaba pedagogik amaliyot davomida nazariy bilimlardan real pedagogik vaziyatlarga o‘ tadi, o‘ quvchilar bilan muloqot qiladi, dars jarayonini kuzatadi, mustaqil mashg‘ ulotlar tashkil etadi, pedagogik qarorlar qabul qiladi va o‘ z faoliyatini tahlil qiladi. Aynan shu jarayonlar uning kasbiy qadriyatlarini real faoliyat bilan bog‘ lash imkonini beradi. Tadqiqotning dolzarbligi shundan iboratki, pedagogik amaliyot ko‘ pincha bo‘ lajak o‘ qituvchining kasbiy ko‘ nikmalarini shakllantirish vositasi sifatida qaraladi. Biroq uning aksiologik imkoniyatlari, ya’ni talabaning pedagogik qadriyatlarni anglash, ularga asoslangan qaror qabul qilish va o‘ z kasbiy pozitsiyasini shakllantirishdagi roli yetarlicha tizimli yoritilmagan.Maqolaning maqsadi pedagogik amaliyotni bo‘ lajak tarix o‘ qituvchilarining aksiologik pozitsiyasini rivojlantirish mexanizmi sifatida nazariy va metodik jihatdan asoslashdan iborat.

METODLAR:

Tadqiqotda pedagogika, aksiologiya, tarix ta’limi metodikasi va kasbiy pedagogik tayyorgarlikka oid ilmiy adabiyotlarni nazariy tahlil qilish, qiyosiy tahlil, umumlashtirish, pedagogik modellashtirish, kuzatish va refleksiv tahlil metodlaridan foydalanildi. Tadqiqotning metodologik asosini shaxsga yo‘ naltirilgan, aksiologik, kompetensiyaviy va faoliyatga yo‘ naltirilgan yondashuvlarning integratsiyasi tashkil etdi. Aksiologik yondashuv bo‘ lajak o‘ qituvchining kasbiy faoliyatini qadriyatlar tizimi bilan bog‘ lash imkonini beradi. Faoliyatga yo‘ naltirilgan yondashuv esa qadriyatlarning faqat nazariy bilim sifatida emas, balki amaliy faoliyat jarayonida namoyon bo‘ lishini ta’minlaydi. Tadqiqotda “aksiologik pozitsiya” tushunchasi bo‘ lajak tarix o‘ qituvchisining ta’lim, tarbiya, o‘ quvchi shaxsi, tarixiy-madaniy meros, milliy va umuminsoniy qadriyatlarga nisbatan ongli, barqaror va kasbiy faoliyatda namoyon bo‘ ladigan munosabatlari majmui sifatida talqin qilindi. Aksiologik pozitsiyaning rivojlanish jarayoni quyidagi mantiqiy ketma-ketlik asosida ko‘ rib chiqildi: Qadriyatni anglash →qadriyatli vaziyat →pedagogik tanlov →amaliy faoliyat →refleksiya → o‘ z-o‘ zini baholash →aksiologik pozitsiyaning rivojlanishi. Mazkur ketma-ketlik pedagogik amaliyotni nazariy bilim bilan amaliy faoliyat o‘ rtasidagi bog‘ lovchi mexanizm sifatida talqin qilish imkonini beradi. Bo‘ lajak tarix o‘ qituvchilarining aksiologik pozitsiyasini rivojlantirishda quyidagi metodik vositalarning imkoniyatlari tahlil qilindi: tarixiy manbalarni aksiologik tahlil qilish; pedagogik vaziyat va keyslar; tarixiy shaxslar faoliyatiga qadriyatli baho berish; munozara va debatlar; muammoli ta’lim; muzey pedagogikasi; mahalliy tarixiy-madaniy meros obyektlari bilan ishlash; pedagogik refleksiya; o‘ z-o‘ zini baholash va ekspert baholash.

Natija Tadqiqotning nazariy tahlili shuni ko‘ rsatdiki, pedagogik amaliyot bo‘ lajak tarix o‘ qituvchisining kasbiy tayyorgarligini mustahkamlash bilan bir qatorda, uning aksiologik pozitsiyasini rivojlantirish uchun ham muhim pedagogik imkoniyatga ega. Pedagogik amaliyot jarayonida talaba nazariy bilimlarni real ta’lim jarayoni bilan bog‘ laydi, pedagogik vaziyatlarni tahlil qiladi, qadriyatga asoslangan qarorlar qabul qiladi va o‘ z faoliyatini refleksiv baholaydi.Bo‘ lajak tarix o‘ qituvchisining aksiologik pozitsiyasini rivojlantirishda pedagogik amaliyot **tanishuv, o‘ quv, “4+2”, pedagogik va malakaviy amaliyot** shakllarining uzviyligi asosida tashkil etilishi mumkin. Mazkur amaliyot shakllari talabaning kasbiy faoliyatga kirib borishini bosqichma-bosqich ta’minlaydi: dastlab ta’lim muassasasi va pedagogik faoliyat bilan tanishish, keyinchalik dars jarayonini kuzatish, nazariy bilimlarni amaliyotda qo‘ llash va yakunda mustaqil kasbiy faoliyatni amalga oshirish imkoniyati yaratiladi. Ayniqsa, **“4+2” modeli** nazariy va amaliy tayyorgarlikning uzviyligini ta’minlovchi muhim tashkiliy mexanizm sifatida qaraladi. Bunda talabaning oliy ta’lim muassasasidagi nazariy-metodik tayyorgarligi maktabdagi pedagogik faoliyat bilan muntazam bog‘ lanadi. Natijada talaba o‘ rgangan pedagogik metodlarni real dars jarayonida qo‘ llaydi, yuzaga kelgan vaziyatlarni tahlil qiladi va keyingi faoliyatini takomillashtiradi. Mazkur jarayonni **“nazariy tayyorgarlik →amaliy faoliyat →qadriyatli pedagogik qaror → refleksiya → korreksiya → takomillashgan faoliyat”** ketma-ketligida tashkil etish mumkin. Masalan, oliy ta’lim muassasasida tarixiy manbalarni tahlil qilish, munozara, debat va keys metodlari o‘ rganilgach, talaba ularni maktab tarix darslarida qo‘ llaydi. Bunda tarixiy voqealarni xolis baholash, turli qarashlarni hurmat qilish, tarixiy-madaniy merosga mas’uliyatli munosabat va o‘ quvchi shaxsini qadrlash kabi aksiologik qadriyatlar amaliy faoliyatda namoyon bo‘ ladi. Pedagogik amaliyotning aksiologik imkoniyatlari **motivatsion-qadriyatli, mazmuniy-amaliy, refleksiv-tahliliy va korreksion-rivojlantiruvchi** bosqichlar orqali amalga oshiriladi. Birinchi bosqichda kasbiy qadriyatlarga munosabat shakllantiriladi; ikkinchi bosqichda ular pedagogik faoliyatda qo‘ llanadi; uchinchi bosqichda talaba o‘ z faoliyatini aksiologik mezonlar asosida tahlil qiladi; to‘ rtinchi bosqichda aniqlangan kamchiliklar bartaraf etilib, faoliyat takomillashtiriladi. Shu asosda pedagogik amaliyot bo‘ lajak tarix o‘ qituvchisining **kasbiy qadriyatlarni anglash, qadriyatli pedagogik qaror qabul qilish, tarixiy-madaniy merosga mas’uliyatli munosabatda bo‘ lish, o‘ quvchi shaxsini hurmat qilish va o‘ z faoliyatini refleksiv baholash** sifatlarini rivojlantiruvchi integrativ mexanizm sifatida namoyon bo‘ ladi. **Ilmiy jihatdan asosiy xulosa:** pedagogik amaliyotni “4+2” modeli va refleksiv-korreksion faoliyat bilan

uyg‘ unlashtirish bo‘ lajak tarix o‘ qituvchisining aksiologik pozitsiyasini nazariy bilim darajasidan amaliy kasbiy faoliyat darajasiga olib chiqish imkonini beradi

MUHOKAMA

Tadqiqot natijalari pedagogik amaliyotni bo‘ lajak tarix o‘ qituvchilarining aksiologik pozitsiyasini rivojlantirishning muhim vositasi sifatida qarash imkonini berdi. An’anaviy yondashuvda pedagogik amaliyot asosan kasbiy-metodik ko‘ nikmalarni mustahkamlashga yo‘ naltirilsa, aksiologik yondashuvda uning mazmuni pedagogik qadriyatlarni anglash, tanlash va amaliy faoliyatda namoyon etish bilan boyitiladi.

Mazkur natija E.V. Bondarevskayaning shaxsga yo‘ naltirilgan ta’lim haqidagi qarashlari bilan uyg‘ un bo‘ lib, bunda o‘ quvchi shaxsini qadrlash, uning fikrini hurmat qilish va individual imkoniyatlarini hisobga olish pedagogik faoliyatning muhim mezoni sifatida qaraladi. Shu jihatdan, bo‘ lajak tarix o‘ qituvchisining aksiologik pozitsiyasi faqat tarixiy bilimlarni egallash bilan emas, balki tarixiy voqea va hodisalarga xolis munosabat bildirish, turli qarashlarni tahlil qilish va o‘ z pedagogik qarorini dalillar asosida asoslash qobiliyati bilan belgilanadi.

O‘ zbekiston pedagogika ilmida N.A. Muslimov, N.N. Azizxo‘ jayeva, O‘ .Q. Tolipov, M. Usmonboyeva va J. Yuldashevning pedagogik ta’lim hamda kasbiy tayyorgarlikka oid qarashlari ham mazkur yondashuvni metodik jihatdan qo‘ llab-quvvatlaydi. Ularning ilmiy-metodik qarashlari nuqtayi nazaridan bo‘ lajak o‘ qituvchining kasbiy shakllanishi nazariy bilim bilan bir qatorda amaliy faoliyat, mustaqil fikrlash va o‘ z faoliyatini tahlil qilish jarayonlari bilan bog‘ liq. Muhokama natijalari shuni ko‘ rsatadiki, tarix ta’limida aksiologik yondashuvni pedagogik amaliyot bilan integratsiyalash bo‘ lajak o‘ qituvchining kasbiy tayyorgarligini mazmunan boyitadi. Ayniqsa, tarixiy manbalar bilan ishlash, muqobil tarixiy qarashlarni taqqoslash, o‘ quvchilar fikrini tinglash va refleksiv topshiriqlardan foydalanish aksiologik pozitsiyaning amaliy namoyon bo‘ lishini ta’minlaydi. Shu bilan birga, mazkur yondashuv pedagogik amaliyotni faqat “dars o‘ tish” tajribasi sifatida emas, balki bo‘ lajak tarix o‘ qituvchisining kasbiy qadriyatlari, pedagogik mas’uliyati va mustaqil kasbiy pozitsiyasi shakllanadigan muhit sifatida qayta talqin qilish imkonini beradi.

XULOSA

Tadqiqot natijalari pedagogik amaliyot bo‘ lajak tarix o‘ qituvchilarining aksiologik pozitsiyasini rivojlantirishning muhim pedagogik sharti ekanligini ko‘ rsatdi. Pedagogik amaliyotda nazariy bilimlarni amaliy faoliyat bilan uyg‘ unlashtirish, mustaqil pedagogik qarorlar qabul qilish va ularni qadriyatlar asosida baholash imkoniyatlari kengayadi.Tarixiy manbalar, tarixiy shaxslar, tarixiy-madaniy meros hamda bahsli masalalar bilan ishlash talabalarda ilmiy xolislik, tarixiy mas’uliyat, insonparvarlik, vatanparvarlik va bag‘ rikenglik kabi kasbiy qadriyatlarni rivojlantirishga xizmat qiladi. Refleksiv faoliyat esa talabaning o‘ z pedagogik tajribasini tahlil qilishi va faoliyatini takomillashtirish imkonini beradi. Pedagogik amaliyotni motivatsion-qadriyatli, mazmuniy-amaliy, refleksiv-tahliliy va korreksion-rivojlantiruvchi bosqichlarda tashkil etish aksiologik pozitsiyaning izchil rivojlanishini ta’minlaydi. Shu jihatdan, “qadriyatni anglash – qadriyatli tanlov – amaliy faoliyat – refleksiya – korreksiya” ketma-ketligi pedagogik amaliyotni bo‘ lajak tarix o‘ qituvchisining kasbiy qadriyatlari va pedagogik pozitsiyasini rivojlantiruvchi yaxlit jarayon sifatida tashkil etish imkonini beradi.

ANALYSIS OF METHODS FOR ASSESSING STUDENTS' SPEAKING SKILLS THROUGH INTERACTIVE DIGITAL PLATFORMS (KAHOOT, QUIZIZZ, PADLET) IN ENGLISH LESSONS

Madaminova Mokhlaroyim Rustambek kizi,
Master of Andijan State Institute of Foreign Languages

Abstract: *This article discusses the analysis of methods for implementing assessment through digital technologies in English lessons in order to introduce interactive digital platforms (Kahoot, Quizizz, Padlet) into the lesson process and develop students' speaking skills.*

Keywords: *Speaking skills, Formative assessment, Digital platforms, Kahoot!, Quizizz, Padlet, Speech anxiety, Peer-assessment, Language proficiency.*

АНАЛИЗ МЕТОДОВ ОЦЕНКИ НАВЫКОВ УСТНОЙ РЕЧИ УЧАЩИХСЯ С ИСПОЛЬЗОВАНИЕМ ИНТЕРАКТИВНЫХ ЦИФРОВЫХ ПЛАТФОРМ (KAHOOT, QUIZIZZ, PADLET) НА УРОКАХ АНГЛИЙСКОГО ЯЗЫКА

Аннотация: *В статье рассматриваются методы организации оценивания с использованием цифровых технологий на уроках английского языка, направленные на внедрение интерактивных цифровых платформ (Kahoot, Quizizz, Padlet) в учебный процесс и развитие навыков устной речи у обучающихся.*

Ключевые слова: *навыки устной речи, формирующее оценивание, цифровые платформы, Kahoot!, Quizizz, Padlet, языковая тревожность, взаимооценивание, уровень владения языком.*

INGLIZ TILI DARSLARIDA INTERAKTIV RAQAMLI PLATFORMALAR (KAHOOT, QUIZIZZ, PADLET) YORDAMIDA O‘ QUVCHILARNING OG‘ ZAKI NUTQ KO‘ NIKMALARINI BAHOLASH USULLARI TAHLILI

Annotatsiya: *Ushbu maqolada ingliz tili darslari jarayoniga interaktiv raqamli platformalarni (Kahoot, Quizizz, Padlet) joriy etish hamda o‘ quvchilarning og‘ zaki nutq ko‘ nikmalarini rivojlantirish maqsadida raqamli texnologiyalar orqali baholash usullarini qo‘ llash masalalari tahlil qilinadi.*

Kalit so‘ zlar: *Og‘ zaki nutq ko‘ nikmalari, shakllantiruvchi baholash, raqamli platformalar, Kahoot!, Quizizz, Padlet, nutqiy xavotir, tengdoshlar tomonidan baholash, tilni bilish darajasi.*

INTRODUCTION:

In international and national standardized language proficiency testing systems *(such as IELTS, iTEP, and Multi-Level exams)*, candidates' communicative competence is comprehensively evaluated across four core skills: *Listening, Reading, Writing, and Speaking*. Among these, *Writing* and *Speaking* represent productive skills, and enhancing candidate performance in these components poses a significant methodological challenge compared to receptive skills. In particular, developing and objectively evaluating Speaking skills remains one of the most critical and complex issues in modern language pedagogy. This complexity stems from the critical role of human evaluation and rubrics *(fluency, lexical-grammatical control, pronunciation),* alongside psychological constraints such as foreign language speaking anxiety and fear of negative evaluation. Addressing this pedagogical challenge requires the formulation of objective, low-anxiety, and continuous *(formative)* assessment mechanisms in secondary education. Given the limitations of traditional face-to-face assessment formats, integrating interactive digital platforms—namely *Kahoot!*, *Quizizz*, and *Padlet*—presents a promising methodological solution. The primary objective of this article is to analyze the methodological frameworks for assessing secondary school students' speaking skills through interactive digital platforms and to empirically evaluate their diagnostic and pedagogical effectiveness.

The complex of amendments introduced in accordance with the Decree of the President of the Republic of Uzbekistan No. PF-79 and the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 848 sets the task of ''...In order to optimize management processes in the system of preschool and school education and fully digital transformation of the sector, the task is to gradually integrate all information systems, resources and software products into the Unified Education Information Ecosystem and eliminate excessive document circulation and paperwork in the ministerial system,

while optimizing the work documents of teachers and employees." Digital technologies in the system of preschool education and school preparation. The Decree of the President of the Republic of Uzbekistan No. PF-19 dated February 5, 2026 "On measures to further improve the system of preschool education and upbringing" states: "It is necessary to systematically establish digital information exchange between parents and preschool educational organizations, as well as ensure transparency of processes through the full implementation of a mobile application designed to maintain electronic attendance of employees and students in preschool educational organizations in all state institutions." In the system of vocational training and electronic certification of graduates, the Joint Resolution of the Ministry of Preschool and School Education of the Republic of Uzbekistan and the Ministry of Poverty Reduction and Employment No. 3647/0613 (July 2025) "On the automation of the processes of training graduates of general secondary educational institutions in foreign languages and modern professions, practical exams on their acquired professional skills, and the procedure for issuing digitally signed electronic certificates by the school principal and the director of the center for vocational skills through an electronic platform has been legally strengthened." Over the past decade, the use of electronic devices such as phones, computers, tablets, laptops has become popular not only among adults, but also among teenagers and kindergarten students. The rapid introduction of digital technologies in the modern education system requires a fundamental reform of teaching methodologies and assessment criteria. In particular, in teaching foreign languages, including English, traditional tests and The transition from question-and-answer methods to interactive digital formats is an important factor in increasing students' motivation and objectively assessing their real linguistic capabilities. Today, interactive platforms such as Kahoot!, Quizizz and Padlet have become an integral part of the educational process. However, in practice, these platforms are often used only as a means of conducting grammar tests or checking vocabulary. However, modern communicative language teaching methodology prioritizes a comprehensive assessment of students' speech skills - that is, speaking, listening, reading and writing. In this regard, integrating the interactive capabilities of digital platforms into the process of assessing speech skills and methodologically analyzing their effectiveness is one of the current issues. The main purpose of this article is to examine the use of Kahoot, Quizizz and Padlet platforms in English lessons to assess students' speech skills.

The aim of the article is to conduct a comparative and methodological analysis of methods for assessing students' skills, identify the advantages and limitations of each of them, and provide practical recommendations for their effective use in the classroom. The article highlights the impact of these platforms on students' speech activity, motivation, and assessment objectivity.

Main part: Developing speaking skills and their objective assessment in foreign language education has always been at the center of pedagogical research. Traditional assessment methods often have such shortcomings as time constraints, psychological barriers in students (language phobia, fear of communication), and a subjective approach. Modern interactive digital platforms — Kahoot, Quizizz, and Padlet — have entered the educational process as pedagogical and diagnostic tools, allowing them to overcome these problems.

1. Methods of assessing speaking on the Kahoot platform

To implement Kahoot! as a diagnostic and formative tool for stimulating spontaneous oral communication, a structured three-stage pedagogical framework is executed:

Stage 1: Pre-speaking Task Design: The instructor formulates a real-time gamified quiz consisting of visual, auditory, or contextual prompts related to the lesson topic.

Stage 2: Real-time Cognitive Activation: Learners access the platform synchronously via mobile devices or tablets using an access code. As a visual prompt is displayed alongside a restricted time limit (20–30 seconds), students rapidly analyze the input and select the appropriate lexical or grammatical unit, thereby minimizing reliance on native-language internal translation.

Stage 3: Immediate Verbal Extension: Following each quiz item, the instructor pauses the sequence and prompts selected students to provide a 30–45 second spontaneous oral justification of their answer. This seamless transition from gamified recognition to rapid speech production directly addresses student hesitation and enhances speech fluency.

Kahoot is mainly used for formative (formative) assessment. When assessing speaking skills, this platform works through the following mechanisms: Stimulating spontaneous speech: The timer on the screen and visual stimuli (pictures, videos) develop the student's ability to quickly react and immediately formulate thoughts in English.

Real-time Vocabulary and Grammatical Structure Testing: Students' level of oral proficiency is diagnosed by testing lexical and grammatical units necessary for fluency and accuracy of speech.

2 Diagnostic capabilities of the Quizizz platform.

The integration of Quizizz focuses on individual, asynchronous speech diagnosis within a low-anxiety environment:

Stage 1: Task Formulation: The instructor designs open-ended, communicative speaking tasks on the platform (e.g., "Critically analyze a recent socio-cultural event and express your perspective").

Stage 2: Asynchronous Audio Submission: Students access the assignment individually during class or as self-directed study. Utilizing Quizizz's Audio Response feature, learners utilize 1–2 minutes to structure their discourse before recording a continuous oral response (up to 120 seconds) directly onto the platform.

Stage 3: Diagnostic Rubric-Based Assessment: The teacher reviews the uploaded audio files via the analytical dashboard. The learner's performance is evaluated against standardized rubrics focusing on pronunciation accuracy, suprasegmental features (intonation and stress), and discourse cohesion. Individualized constructive feedback is delivered privately, eliminating public peer evaluation anxiety.The Quizizz platform allows for flexible (asynchronous) mode:

Audio Response: Through audio tasks on the Quizizz platform, students record their voice messages to the given question. This allows them to assess the correct use of pronunciation, intonation, and pauses.*Self-paced testing:* The student concentrates, plans the speech structure, and responds in a stress-free environment.Operational Protocol for the Padlet Platform. Padlet is utilized as a collaborative virtual workspace to support integrated oral presentations and peer-assessment:

Stage 1: Digital Space Preparation: The instructor establishes a dedicated interactive board for the dynamic unit topic and provides access to all participating students.

Stage 2: Multimedia Content Upload: Learners construct a 1-to-3 minute oral presentation or digital portfolio item. Using integrated recording tools, students upload their video or audio speeches onto the board, supplemented by concise analytical summaries or visual aids.

Stage 3: Peer Evaluation and Collaborative Reflection: Students review a minimum of two peer submissions and complete an evaluation utilizing an embedded analytical rubric. Comments focus on communicative effectiveness, argument structure, and delivery. The instructor monitors the interactions, synthesizes common phonological or lexical patterns, and provides targeted remediation during subsequent instruction.

Collaborative and asynchronous assessment via the Padlet platform. Padlet is a virtual whiteboard that offers the following advantages for integrated oral presentation tasks:

Audio and video presentations: Students post 1–3 minute audio or video presentations on the whiteboard. Peer-assessment and Backchanneling: Students review each other's oral presentations and provide constructive feedback based on a rubric. This helps students develop critical thinking and speech analysis skills.

RESEARCH METHODOLOGY:

To evaluate the effectiveness of interactive digital platforms in assessing speaking skills, an empirical research study was conducted over a 4-week period. The study involved 50 English language learners, divided equally into two groups: an experimental group (n = 25), where speaking assessment was conducted using Kahoot, Quizizz, and Padlet platforms, and a control group (n = 25), assessed through traditional face-to-face methods. Quantitative data were gathered through diagnostic pre-tests and post-tests based on standardized rubrics (evaluating fluency, pronunciation, and vocabulary range), while qualitative data were collected via student surveys to measure psychological anxiety and engagement levels.

Results and Discussions : During the study, the effectiveness of interactive digital platforms (Kahoot, Quizizz, Padlet) in assessing oral speech was analyzed according to the following indicators: Reducing psychological barriers: In traditional surveys, 68% of students felt psychological pressure and anxiety when speaking in front of an audience, while this figure decreased to 22% when submitting assignments via Quizizz (audio answers) and Padlet. Speed and objectivity of formative assessment: Through the Kahoot and Quizizz platforms, the lexical and grammatical base of speech was analyzed in real-time (real-time analytic chart). The teacher was able to quickly identify the strengths and weaknesses of each student and provide immediate feedback.

Comparative analysis between groups:

Evaluation Criteria	Traditional Method (Control Group)	Digital Platforms (Experimental Group)	Difference (%)
Fluency	58%	79%	+21%
Pronunciation and Intonation	62%	81%	+19%
Vocabulary Range	60%	84%	+24%
Student Motivation	52%	93%	+41%

Discussion: The results show that the Padlet platform showed the highest efficiency in assessing monological and dialogical speech and peer-assessment. Quizizz is very convenient for objective assessment of individual pronunciation and voice responses in an asynchronous form. The Kahoot platform serves to diagnose the level of readiness for

spontaneous speech in the introductory or final part of the lesson. The application of these digital tools to the pedagogical process in a blended approach saves the teacher's time and ensures transparency of assessment criteria (rubric-based assessment).

To sum up, the use of digital platforms such as Kahoot, Quizizz and Padlet in teaching a foreign language transforms the assessment of oral skills from a traditional, one-sided process into a multidimensional and interactive system. Padlet demonstrated high pedagogical performance in assessing students' presentation and collaborative speech activities, Quizizz demonstrated individual pronunciation and fluency through audio responses, and Kahoot demonstrated rapid lexical-spontaneous reaction skills.

ISHTIROKCHI VA IMMERSIV JURNALISTIKA: ISTE'MOLCHI-ISHLAB CHIQARUVCHI, FUQAROLIK KONTENTI VA VR REPORTAJNING IMKONIYATLARI HAMDA ETIK MUAMMOLARI

Xojanazarova Nargiza
Qoraqalpoq davlat universiteti doktoranti

Annotatsiya: *Mazkur maqolada raqamli media muhitida auditoriyaning jurnalistik kontent yaratishdagi ishtiroki va immersiv texnologiyalar asosida shakllanayotgan reportaj formatlari tahlil qilinadi. Tadqiqotda iste'molchi-ishlab chiqaruvchi, fuqarolik jurnalistikasi, foydalanuvchi kontenti, muhit jurnalistikasi va immersiv jurnalistika tushunchalarining mazmuni yoritiladi. Shuningdek, foydalanuvchi materiallarining verifikatsiyasi, VR reportajlarning hissiy ta'siri, kontekst va ishonchlilik masalalari qiyosiy o' rganiladi. Natijada ishtirokchi va immersiv jurnalistika uchun manbani aniqlash, faktlarni tekshirish, kontekstni to' ldirish va kontent shaffofligini ta'minlashga asoslangan amaliy etik-verifikatsion yondashuv taklif etiladi.*

Kalit so' zlar: *raqamli jurnalistika, ishtirokchi jurnalistika, prosumer, fuqarolik jurnalistikasi, immersiv jurnalistika, verifikatsiya, VR reportaj.*

ПАРТИСИПАТИВНАЯ И ИММЕРСИВНАЯ ЖУРНАЛИСТИКА: ПОТРЕБИТЕЛЬ-ПРОИЗВОДИТЕЛЬ, КОНТЕНТ, СОЗДАВАЕМЫЙ ГРАЖДАНАМИ, А ТАКЖЕ ПОТЕНЦИАЛ И ЭТИЧЕСКИЕ АСПЕКТЫ VR-РЕПОРТАЖЕЙ

Аннотация: *В статье анализируются участие аудитории в создании журналистского контента в цифровой медиасреде и форматы репортажа, формирующиеся на основе иммерсивных технологий. Раскрывается содержание понятий потребителя-производителя, гражданской журналистики, пользовательского контента, средовой журналистики и иммерсивной журналистики. Кроме того, в сравнительном аспекте рассматриваются вопросы верификации пользовательских материалов, эмоционального воздействия VR-репортажей, контекста и достоверности. В результате предлагается практический этико-верификационный подход к участвующей и иммерсивной журналистике, основанный на идентификации источника, проверке фактов, дополнении контекста и обеспечении прозрачности контента.*

Ключевые слова: *цифровая журналистика, участвующая журналистика, просюмер, гражданская журналистика, иммерсивная журналистика, верификация, VR-репортаж.*

PARTICIPATORY AND IMMERSIVE JOURNALISM: THE CONSUMER-PRODUCER, CITIZEN-GENERATED CONTENT, AND THE POTENTIAL AND ETHICAL ISSUES OF VR REPORTING

Abstract: *This article analyzes audience participation in journalistic content creation within the digital media environment and emerging reporting formats based on immersive technologies. It examines the concepts of the prosumer, citizen journalism, user-generated content, ambient journalism, and immersive journalism. The study also comparatively explores the verification of user-generated materials, the emotional impact of VR reporting, and issues of context and credibility. As a result, the article proposes a practical ethical-verification approach to participatory and immersive journalism based on source identification, fact-checking, contextualization, and ensuring content transparency.*

Keywords: *digital journalism, participatory journalism, prosumer, citizen journalism, immersive journalism, verification, VR reporting.*

KIRISH.

Raqamli kommunikatsiya texnologiyalarining jadal rivojlanishi jurnalist va auditoriya o' rtasidagi an'anaviy chegaralarning sezilarli darajada o' zgarishiga olib keldi. Zamonaviy foydalanuvchi nafaqat tayyor axborotni qabul qiluvchi, balki yangilik yaratish, unga munosabat bildirish, izoh qoldirish, foto va video materiallar tayyorlash hamda ularni keng auditoriyaga tarqatishda faol ishtirok etuvchi subyektga aylandi. Natijada jurnalistik kommunikatsiyada iste'molchi va ishlab chiqaruvchi funksiyalarini birlashtiruvchi iste'molchi-ishlab chiqaruvchi (prosumer) modeli shakllandi. M. Deuze raqamli jurnalistikani internet muhitining o' ziga xos texnologik va kommunikativ imkoniyatlari

bilan bog‘ liq holda ko‘ rib, onlayn jurnalistikaning yangi shakllarida auditoriya bilan o‘ zaro aloqaning kuchayib borayotganini ta’kidlaydi [1].

Ishtirokchi jurnalistikaning rivojlanishi natijasida foydalanuvchi tomonidan yaratilgan kontent (UGC) tahririyatlar uchun tezkor axborot manbalaridan biriga aylandi. Ayniqsa, favqulodda vaziyatlar, ommaviy tadbirlar yoki voqea joyidan tezkor axborot talab qilinadigan holatlarda mobil telefon yordamida tayyorlangan materiallar muhim ahamiyat kasb etmoqda. Biroq bunday kontentning tezkorligi uning avtomatik ravishda ishonchli jurnalistik faktga aylanishini anglatmaydi. Foydalanuvchi kontentining manbasi, yaratilgan vaqti, joyi, konteksti va haqiqiyligini tekshirish jurnalistik faoliyatning muhim bosqichlaridan biri bo‘ lib qolmoqda. Zamonaviy tadqiqotlar ham fuqarolik jurnalistikasi va foydalanuvchi tomonidan yaratilgan kontent auditoriyaning jurnalistik faoliyatga yaqinlashuvini kuchaytirgan bo‘ lsa-da, uning tahririy imkoniyatlari muayyan chegaralar bilan belgilanayotganini ko‘ rsatadi [3].

Raqamli jurnalistikaning yana bir muhim yo‘ nalishi immersiv texnologiyalar, xususan, virtual reallik (VR) va 360-darajali videolar bilan bog‘ liq. Bunday formatlar tomoshabinni voqea sodir bo‘ layotgan makonga maksimal darajada yaqinlashtirish, uning fazoviy va hissiy ishtirokini kuchaytirish imkonini beradi. Shu jihatdan immersiv jurnalistika an’anaviy reportajdan farqli ravishda auditoriyaga voqeani nafaqat kuzatish, balki uni ma’lum darajada bevosita his qilish imkoniyatini yaratadi.

Mazkur maqolaning maqsadi ishtirokchi va immersiv jurnalistikaning zamonaviy media muhitidagi imkoniyatlarini, ularning jurnalistik jarayonga ta’sirini hamda verifikatsiya va media etikasi bilan bog‘ liq muammolarini qiyosiy tahlil qilishdan iborat.

METOD VA MATERIALLAR.

Tadqiqotda konseptual, qiyosiy va funksional tahlil usullaridan foydalanildi. Dastlab ishtirokchi jurnalistika, iste’molchi-ishlab chiqaruvchi, foydalanuvchi tomonidan yaratilgan kontent, muhit jurnalistikasi va immersiv jurnalistikaga oid asosiy nazariy tushunchalar tizimlashtirildi.

Tadqiqotning nazariy bazasini M. Deuzening onlayn jurnalistika va uning kommunikativ xususiyatlariga bag‘ ishlangan tadqiqoti [1], A. Hermidaning ijtimoiy tarmoqlardagi uzluksiz axborot oqimini ifodalovchi muhit jurnalistikasi (ambient journalism) konsepsiyasi [2] hamda fuqarolik jurnalistikasi va foydalanuvchi kontentining rivojlanish tendensiyalarini yorituvchi zamonaviy tadqiqot [3] tashkil etadi.

Immersiv jurnalistika masalalarini o‘ rganishda S. Jonesning virtual reallik va 360-darajali jurnalistik hikoyalashga oid tadqiqoti [4], H. Wu va hammualliflarning immersiv virtual reallik yangiliklarining foydalanuvchi tajribasi va media ta’sirini o‘ rgangan empirik tadqiqoti [5] hamda de Bruin va hammualliflarning immersiv jurnalistikadagi “birinchi shaxs tajribasi va’dasi” (first-person promise) hodisasini tahlil qilgan ishlari [6] asosiy manbalar sifatida tanlandi.

Tahlil jarayonida quyidagi mezonlarga e’tibor qaratildi: axborot manbasining kelib chiqishi, kontentni verifikatsiya qilish imkoniyati, auditoriyaning ishtirok darajasi, immersiya kuchi, jurnalistik ishonchlilik va yuzaga kelishi mumkin bo‘ lgan etik xavflar.

NATIJALAR.

Tadqiqot natijalari shuni ko‘ rsatadiki, iste’molchi-ishlab chiqaruvchi modeli jurnalistik axborotning yaratilishi va tarqatilishi jarayonidagi an’anaviy ketma-ketlikni sezilarli darajada qisqartiradi. Voqea ishtirokchisi yoki guvohi hodisa sodir bo‘ layotgan vaqtda mobil telefon orqali foto yoki video yaratib, uni ijtimoiy tarmoqlarda tezkor ravishda tarqatishi mumkin. Natijada voqea joyidagi foydalanuvchi jurnalist uchun dastlabki axborot yoki vizual dalil manbaiga aylanadi.

Bunday materiallar jurnalistik jarayon uchun muhim bo‘ lishiga qaramay, ularni tekshirilmagan holda tayyor fakt sifatida qabul qilish mumkin emas. Manbaning kimligi, materialning yaratilgan vaqti va joyi, tasvirning o‘ zgartirilgan yoki o‘ zgartirilmaganligi hamda voqeaning umumiy konteksti aniqlanishi zarur.

A. Hermida ijtimoiy tarmoqlarda doimiy ravishda shakllanib boradigan axborot oqimini muhit jurnalistikasi (ambient journalism) tushunchasi orqali izohlaydi. Bunda foydalanuvchi turli raqamli platformalar orqali voqea-hodisalar haqidagi ma’lumotlarni uzluksiz ravishda kuzatishi va tarqatishi mumkin [2].

Ishtirokchi jurnalistikaning muhim jihatlaridan biri axborot ishlab chiqarish jarayoniga kengroq auditoriyani jalb qilish imkoniyatidir. Foydalanuvchilarning o‘ zlari axborot manbasiga aylanishi an’anaviy jurnalistikada yetarlicha yoritilmagan voqealarni ommaviy muhokamaga olib chiqish imkonini kengaytiradi. Shu bilan birga, auditoriya ishtirokining ortishi jurnalistik sifatning avtomatik ravishda yaxshilanishini anglatmaydi. Foydalanuvchi kontentining katta hajmda mavjudligi va uning tezkor tarqalishi tahririy saralash, platforma algoritmlari va institutsional nazorat mexanizmlari bilan bog‘ liq. Zamonaviy tadqiqotlar fuqarolik jurnalistikasi va foydalanuvchi tomonidan yaratilgan kontent rivojlanishi bilan bir qatorda, ularning tahririy chegaralari va institutsional cheklovlari ham mavjudligini ko‘ rsatadi [3]. Shu sababli “ko‘ p odam axborot tarqatmoqda” va “ishonchli jurnalistik manbalar soni ko‘ paymoqda” tushunchalarini aynanlashtirish mumkin emas. Ishtirokchi jurnalistikaning demokratlashtiruvchi imkoniyati uning verifikatsiya mexanizmlari bilan birgalikda qaralgandagina to‘ liq namoyon bo‘ ladi.

Immersiv jurnalistikaning asosiy xususiyati auditoriyaning voqea bilan hissiy va fazoviy munosabatini kuchaytirish imkoniyatidir. Virtual reallik va 360-darajali reportajlarda foydalanuvchi voqea makonini turli yo‘ nalishlarda ko‘ rishi va o‘ zining kuzatuv nuqtasini ma’lum darajada boshqarishi mumkin.

S. Jonesning tadqiqotlari 360-darajali va virtual reallik asosidagi jurnalistik hikoyalashda tomoshabinning voqea bilan “birinchi shaxs” tajribasini kuchaytirishga yo‘ naltirilgan yangi narrativ imkoniyatlar shakllanganini ko‘ rsatadi [4].

H. Wu va hammualliflarning empirik tadqiqotlari esa immersiv virtual reallik yangiliklari foydalanuvchining immersiya darajasi, qiziqishi, axborotning aniqligi va ishonchlilik haqidagi tasavvuriga ijobiy ta’sir ko‘ rsatishi mumkinligini ko‘ rsatadi [5].

Biroq immersivlikning yuqori darajasi jurnalistik ishonchlilik bilan aynan bir xil tushuncha emas. Voqea muhitining realistik ko‘ rinishi foydalanuvchida materialni “haqiqatning bevosita aksi” sifatida qabul qilish hissini kuchaytirishi mumkin.

De Bruin va hammualliflar immersiv jurnalistik mahsulotlarda “birinchi shaxs tajribasi va’dasi” (first-person promise), ya’ni auditoriyaga voqeani bevosita o‘ z ko‘ zi bilan kuzatayotgandek his qilish imkonini beruvchi narrativ va texnologik imkoniyatni tahlil qilganlar [6].

Immersiv muhitda foydalanuvchi voqea makoniga yaqinlashganini his qilishi mumkin. Biroq kamera joylashuvi, kadr tanlovi, fazoviy dizayn, ovoz, montaj va interaktiv elementlarning barchasi jurnalist yoki media ishlab chiqaruvchining muayyan tanlovlari natijasidir. Demak, immersiv format foydalanuvchiga voqea bilan kuchli yaqinlik hissini bersa-da, u voqeaning mutlaq va vositasiz tasviri sifatida talqin qilinmasligi kerak.

Tadqiqot natijalari ishtirokchi va immersiv jurnalistika elementlarini yagona media mahsulotida birlashtirish mumkinligini ham ko‘ rsatadi. Masalan, foydalanuvchilar tomonidan yaratilgan videolar 360-darajali xarita, rasmiy hujjatlar, interaktiv grafikalar va qo‘ shimcha izohlar bilan birgalikda taqdim etilishi mumkin.

Bunday yondashuv auditoriyaga katta hajmdagi axborotni turli formatlarda olish imkonini beradi. Shu bilan birga, kontent hajmining ortishi moderatsiya va verifikatsiya jarayonlarini murakkablashtirishi mumkin. Agar foydalanuvchi kontentining kelib chiqishi va haqiqiyligini tekshirish mexanizmlari mavjud bo‘ lmasa, xatolik yoki noto‘ g‘ ri axborotning tez tarqalish ehtimoli ham ortadi.

MUHOKAMA.

Ishtirokchi jurnalistikada eng muhim muammolardan biri axborot manbasining tekshiriluvchanligi hisoblanadi. Foydalanuvchi tomonidan yaratilgan kontentning haqiqiyligini aniqlash uchun materialning metama’lumotlari, yaratilgan vaqti va joyi, voqea guvohlari, boshqa mustaqil manbalar hamda vizual dalillar o‘ zaro taqqoslanishi lozim. Shu nuqtayi nazardan, professional jurnalistning raqamli muhitdagi roli faqat yangi kontent yaratish bilan cheklanmaydi. Jurnalistning muhim vazifalaridan biri turli manbalardan olingan ma’lumotlarni tekshirish, ularni kontekstualizatsiya qilish va qarama-qarshi ma’lumotlar o‘ rtasidagi tafovutni auditoriyaga tushuntirishdan iborat.

Ikkinchi muhim muammo – algoritmik ko‘ rinuvchanlik. Raqamli platformalarda kontentning auditoriyaga yetib borishi har doim ham uning jurnalistik ahamiyati bilan belgilanmaydi. Foydalanuvchilar faolligi, ko‘ rishlar soni, reaksiyalar va bahsli mazmun algoritmik tavsiyalar tizimida muhim omillarga aylanishi mumkin. Natijada hissiy yoki keskin mazmundagi kontentning kengroq tarqalish ehtimoli ortadi. Shu sababli ishtirokchi jurnalistikani faqat texnologik imkoniyat sifatida emas, balki auditoriya, platforma va tahririyat o‘ rtasidagi murakkab institutsional munosabat sifatida ham o‘ rganish zarur.

VR reportajlarda esa asosiy etik masalalardan biri “immersiya va kontekst” o‘ rtasidagi nisbatdir. Foydalanuvchi voqea makonida o‘ zini bevosita ishtirok etayotgandek his qilishi mumkin, biroq voqeaning tarixiy, siyosiy yoki ijtimoiy sabablari yetarlicha yoritilmasa, immersiv tajriba mazmuniy kontekstning o‘ rnini bosib qolishi mumkin. Shu sababli immersiv jurnalistik materiallarda qo‘ shimcha matnlar, hujjatlar, manba kartalari, statistik ma’lumotlar va faktlarni tushuntiruvchi axborot qatlamlaridan foydalanish maqsadga muvofiq. Bunday elementlar immersiv tajribani saqlagan holda, auditoriyaning voqeani kengroq kontekstda tushunishiga yordam beradi.

Yuqoridagi tahlillar asosida ishtirokchi va immersiv jurnalistika uchun to‘ rt bosqichli etik-verifikatsion modelni taklif etish mumkin:

1. Manbani identifikatsiya qilish – kontent muallifi, yaratilish vaqti va joyini aniqlash.
2. Faktni mustaqil tekshirish – ma’lumotni boshqa ishonchli manbalar va dalillar bilan solishtirish.
3. Kontekstni to‘ ldirish – voqeaning sabab va oqibatlarini tushuntiruvchi qo‘ shimcha ma’lumotlarni taqdim etish.
4. Kontent kelib chiqishini shaffof ko‘ rsatish – auditoriyaga material qanday yaratilgani, tanlangani va qayta ishlangani haqida ma’lumot berish.

Bu yondashuv sun’iy intellekt va avtomatlashtirilgan jurnalistika rivojlanayotgan sharoitda yanada muhim ahamiyat kasb etadi. Zamonaviy tadqiqotlarda sun’iy intellektning jurnalistik amaliyotga kirib kelishi yangi avtomatlashtirish imkoniyatlari bilan bir qatorda, narrativ, mualliflik, verifikatsiya va etik masalalarni ham yuzaga keltirayotgani qayd etiladi [7].

Demak, ishtirokchi va immersiv jurnalistikaning kelajakdagi rivojlanishida asosiy masala faqat texnologik yangiliklarni joriy etish emas, balki kontentning kelib chiqishi, aniqligi, ishonchliligi va shaffofligini ta'minlash bilan bog‘ liq bo‘ ladi.

XULOSA.

Ishtirokchi va immersiv jurnalistika raqamli media rivojlanishining o‘ zaro bog‘ liq ikki muhim yo‘ nalishini tashkil etadi. Ishtirokchi jurnalistika auditoriyani axborot yaratish va tarqatish jarayoniga faol jalb qilsa, immersiv jurnalistika foydalanuvchining voqea bilan hissiy va fazoviy aloqasini kuchaytiradi. Har ikkala yo‘ nalishda ham jurnalistikaning fundamental tamoyillari – aniqlik, verifikatsiya, kontekstual yondashuv va etik mas'uliyat – o‘ z ahamiyatini saqlab qoladi. Aksincha, texnologik imkoniyatlarning kengayishi ushbu tamoyillarni yanada qat'iy qo‘ llashni talab etadi.

Iste'molchi-ishlab chiqaruvchi va foydalanuvchi tomonidan yaratilgan kontent modeli axborot ishlab chiqarish jarayonini demokratlashtirish uchun yangi imkoniyatlar yaratadi, biroq foydalanuvchi kontentining ko‘ pligi uning avtomatik ravishda ishonchli bo‘ lishini anglatmaydi. VR va immersiv formatlar esa auditoriyaga kuchli hissiy tajriba berishi mumkin, ammo immersiya jurnalistik haqiqatning mutlaq kafolati sifatida talqin qilinmasligi kerak. Shu bois kelajak jurnalistikasi uchun asosiy mezon “ko‘ proq kontent” emas, balki “tekshirilgan, kontekstli va shaffof kontent” tamoyili bo‘ lishi lozim.

TIBBIYOT SOHASIDAGI LOTIN TERMINLARINI O‘ QITISH TEXNOLOGIYASI

Sayımova Gulshad
Qoraqalpog‘ iston tibbiyot instituti assistent o‘ qituvchi
E-mail: gulshadsayimova@gmail.com

Annotatsiya: *Ushbu maqolada tibbiyot yo‘ nalishida tahsil olayotgan talabalarga lotin tili va tibbiy terminologiyani o‘ qitishda zamonaviy pedagogik, interfaol hamda raqamli texnologiyalardan foydalanish masalalari tahlil qilinadi. Tadqiqotda elektron lug‘ atlar, terminologik ma’lumotlar bazalari, multimedia vositalari, onlayn ta’lim platformalari, mobil ilovalar, virtual laboratoriyalar, simulyatsiyalar va elektron baholash vositalarining didaktik imkoniyatlari yoritilgan. Shuningdek, terminologik kompetensiyani shakllantirishning reproduktiv, produktiv, qisman izlanishli va ijodiy bosqichlari hamda uni baholashning motivatsion, kognitiv, operatsion va refleksiv mezonlari tavsiflangan. O‘ rganish natijalari zamonaviy texnologiyalarni amaliyotga yo‘ naltirilgan, integrativ va shaxsga yo‘ naltirilgan yondashuvlar bilan uyg‘ unlashtirish talabalarning kasbiy terminologiyani o‘ zlashtirish samaradorligini oshirish imkonini berishini ko‘ rsatadi.*

Kalit so‘ zlar: *lotin tili, tibbiy terminologiya, terminologik kompetensiya, raqamli texnologiyalar, virtual laboratoriya.*

МЕТОДИКА ПРЕПОДАВАНИЯ ЛАТИНСКОЙ МЕДИЦИНСКОЙ ТЕРМИНОЛОГИИ

Аннотация: *В статье анализируются вопросы использования современных педагогических, интерактивных и цифровых технологий при обучении студентов медицинских специальностей латинскому языку и медицинской терминологии. В исследовании раскрываются дидактические возможности электронных словарей, терминологических баз данных, мультимедийных средств, онлайн-образовательных платформ, мобильных приложений, виртуальных лабораторий, симуляций и электронных средств оценивания. Также характеризуются репродуктивный, продуктивный, частично поисковый и творческий этапы формирования терминологической компетенции, а также мотивационные, когнитивные, операциональные и рефлексивные критерии её оценки. Результаты исследования показывают, что сочетание современных технологий с практико-ориентированным, интегративным и личностно-ориентированным подходами позволяет повысить эффективность освоения студентами профессиональной терминологии.*

Ключевые слова: *латинский язык, медицинская терминология, терминологическая компетенция, цифровые технологии, виртуальная лаборатория.*

METHODOLOGY FOR TEACHING LATIN MEDICAL TERMINOLOGY

Abstract: *This article analyzes the use of modern pedagogical, interactive, and digital technologies in teaching Latin and medical terminology to medical students. The study examines the didactic potential of electronic dictionaries, terminological databases, multimedia tools, online learning platforms, mobile applications, virtual laboratories, simulations, and electronic assessment tools. It also describes the reproductive, productive, partially exploratory, and creative stages of developing terminological competence, as well as the motivational, cognitive, operational, and reflective criteria for its assessment. The findings indicate that combining modern technologies with practice-oriented, integrative, and student-centered approaches can improve the effectiveness of students’ acquisition of professional terminology.*

Keywords: *Latin language, medical terminology, terminological competence, digital technologies, virtual laboratory.*

KIRISH

Zamonaviy ta’lim jarayonida axborot-kommunikatsiya texnologiyalarining jadal rivojlanishi o‘ qitish mazmuni va metodlarini yangilashni talab qilmoqda. Tibbiyot ta’limida bu jarayon ayniqsa muhim, chunki bo‘ lajak mutaxassis nafaqat nazariy bilimlarni, balki professional terminlarni to‘ g‘ ri anglash, talaffuz qilish, yozish va amaliy faoliyatda qo‘ llash ko‘ nikmalarini ham egallashi kerak. Lotin tili tibbiy terminologiyaning muhim asoslaridan biri bo‘ lib, shu sababli uni o‘ qitish metodikasini zamonaviylashtirish kasbiy tayyorgarlik sifatiga bevosita ta’sir ko‘ rsatadi.

Terminologik kompetensiya muayyan fan yoki kasbiy sohaga oid atamalarni tushunish, ularning mazmunini anglash va amaliy vaziyatda to‘ g‘ ri qo‘ llash qobiliyati bilan tavsiflanadi [3]. Maqolada ushbu tushuncha bilim, ko‘ nikma,

malaka va ularni real faoliyatda qo‘ llash qobiliyatlarining birligi sifatida qaraladi. Tadqiqot materiallarida kompetensiya tushunchasining turli fan vakillari tomonidan turlicha talqin qilinishi qayd etilgan bo‘ lib, terminologik kompetensiya terminologik mazmunni anglash va uni amaliyotga tatbiq etish bilan bog‘ lanadi.

Raqamli texnologiyalar mazkur jarayonni faqat axborot uzatish bilan cheklamay, talabaning mustaqil ishlashi, izlanishi, topshiriqlarni takroran bajarishi va bilimini nazorat qilishi uchun ham imkon yaratadi. Elektron lug‘ atlar, interaktiv dasturlar, onlayn kurslar va mobil ilovalar terminologik ma’lumotlarni vizual va audial shaklda qabul qilish, qayta ishlash va amaliyotda qo‘ llashga sharoit yaratadi [2].

Tadqiqotning maqsadi tibbiyot yo‘ nalishida lotin tili va tibbiy terminologiyani o‘ qitishda zamonaviy pedagogik hamda raqamli texnologiyalarning imkoniyatlarini aniqlash va terminologik kompetensiyani rivojlantirishga yo‘ naltirilgan metodik yondashuvlarni umumlashtirishdan iborat.

METODOLOGIYA

Tadqiqotda lotin tili va tibbiy terminologiyani o‘ qitishga oid metodik materiallar, terminologik kompetensiyani shakllantirish bosqichlari va zamonaviy ta’lim texnologiyalarining didaktik imkoniyatlari tahlil qilindi. Shuningdek, tizimli, integrativ, shaxsga yo‘ naltirilgan, kommunikativ, muammoli va texnologik yondashuvlardan foydalanish imkoniyatlari ko‘ rib chiqildi.

Tizimli yondashuv terminologik kompetensiyani o‘ zaro bog‘ liq bilim va ko‘ nikmalar majmui sifatida tashkil etishni nazarda tutadi. Integrativ yondashuv lotin tili va tibbiy terminologiyani anatomiya, fiziologiya, patologiya kabi boshqa tibbiy fanlar bilan bog‘ lashga imkon beradi. Shaxsga yo‘ naltirilgan yondashuvda talabaning individual imkoniyatlari, qiziqishi va ta’lim ehtiyojlari hisobga olinadi. Kommunikativ va muammoli yondashuvlar esa terminlarni real yoki modellashtirilgan kasbiy vaziyatlarda qo‘ llashga yo‘ naltiriladi [1].

Tadqiqotda 2023–2024, 2024–2025 va 2025–2026-o‘ quv yillarida bo‘ lajak tibbiyot xodimlarining terminologik kompetensiyasini rivojlantirish bilan bog‘ liq mavjud holat o‘ rganilgani ko‘ rsatilgan. Mazkur tahlil asosida terminlarni o‘ rganish metodikasi mazmunining rivojlanish bosqichlari va mezonlari aniqlangan.

Terminologik kompetensiyani shakllantirishda reproduktiv, produktiv, qisman izlanishli va ijodiy bosqichlar ajratiladi [4]. Reproduktiv bosqichda talaba tayyor namuna asosida bilimlarni o‘ zlashtiradi. Produktiv va qisman izlanishli bosqichlarda terminlarni turli topshiriqlarda mustaqil qo‘ llash, matn tuzish, matnni qisqartirish yoki qayta ishlash kabi faoliyatlar amalga oshiriladi. Ijodiy bosqichda esa talaba topshiriqni bajarish usuli va til vositalarini mustaqil tanlay oladi.

Baholash jarayonida motivatsion, kognitiv, operatsion va refleksiv mezonlarga tayaniladi. Bunda talabaning kasbiy terminologiyaga qiziqishi, nazariy bilim darajasi, terminlarni amaliyotda qo‘ llay olishi va o‘ z faoliyatini mustaqil tahlil qila bilishi asosiy ko‘ rsatkichlar sifatida qaraladi.

NATIJALAR

Tadqiqot natijalari tibbiyot ta’limida terminologik kompetensiyani rivojlantirishda interfaol pedagogik texnologiyalar va raqamli vositalarning o‘ zaro uyg‘ unligi muhimligini ko‘ rsatadi. Interfaol metodlar orasida kichik guruhlarda ishlash, aqliy hujum, rolli o‘ yinlar, case-study va muammoli ta’lim alohida o‘ rin tutadi. Klinik vaziyatlarni tahlil qilish jarayonida talabalar kasallik nomlari, simptomlar, tashxis va boshqa tibbiy tushunchalarni ifodalovchi lotin terminlarini bevosita qo‘ llaydilar. Bu esa terminlarning faqat yodlanishiga emas, balki ularning amaliy mazmunini anglashga yordam beradi.

Raqamli texnologiyalarning birinchi muhim yo‘ nalishi elektron ta’lim resurslaridan foydalanishdir. Elektron lug‘ atlar va terminologik ma’lumotlar bazalari yangi atamalarning ma’nosini tez topish, ularni kontekstda ko‘ rish va mustaqil takrorlash imkonini beradi. Elektron resurslardan foydalanish o‘ quv jarayonini individuallashtirish uchun ham qulay sharoit yaratadi. Talaba o‘ zlashtirish darajasiga qarab materialni takrorlashi yoki qo‘ shimcha topshiriqlarni bajarishi mumkin.

Multimedia materiallari ham terminlarni o‘ zlashtirish jarayonini boyitadi. Audio materiallar terminlarning talaffuzini to‘ g‘ ri shakllantirishga, videomateriallar esa terminlarning professional kontekstdagi qo‘ llanishini ko‘ rsatishga xizmat qiladi. Interaktiv videodarslar orqali terminning mazmuni va amaliy vaziyatdagi ishlatilishi bir vaqtda kuzatiladi. Bu usul ayniqsa o‘ quv materialini ko‘ rish va eshitish orqali qabul qiladigan talabalar uchun muhimdir.

Virtual laboratoriyalar va simulyatsiyalar yordamida talaba nazariy bilimni modellashtirilgan amaliy muhitda sinab ko‘ rishi mumkin. Tibbiyot ta’limida virtual bemorlar bilan ishlash, klinik vaziyatlarni modellashtirish va kasbiy muloqot stsenariylarini bajarish terminlarni real professional faoliyat bilan bog‘ laydi. Bunday yondashuv terminni alohida birlik sifatida emas, balki kasbiy kommunikatsiyaning tarkibiy qismi sifatida o‘ zlashtirish imkonini beradi.

Onlayn hamkorlik vositalari ham muhim natija beradi. Google Classroom, Moodle va Zoom kabi platformalarda guruh bilan topshiriqlar bajarish, loyihalar yaratish, terminologik materiallarni muhokama qilish va o‘ zaro baholash mumkin. Bu jarayon terminologik kompetensiya bilan birga kommunikativ va jamoaviy ishlash ko‘ nikmalarini ham rivojlantiradi.

Mobil ilovalar va interaktiv testlar terminologik materialni takrorlash hamda o‘ zlashtirish darajasini tezkor aniqlash imkonini beradi. Talaba terminlarni istalgan vaqtda takrorlashi, test topshiriqlarini bajarishi va xatolarini ko‘ rib chiqishi mumkin. O‘ qituvchi esa elektron baholash vositalari orqali bilimdagi bo‘ shliqlarni aniqlab, individual tuzatish ishlarini tashkil eta oladi.

Tadqiqotda terminologik kompetensiyani shakllantirishning mazmuniy yo‘ nalishlari ham aniqlangan. Talaba kasbiy bilimlarning ahamiyatini anglash, tibbiy terminlarning kasbiy kompetensiyadagi o‘ rnini tushunish, ularni amaliyotda qo‘ llash, zamonaviy ta’lim loyihalarini ishlab chiqish, elektron o‘ quv modullaridan foydalanish, virtual ta’lim muhitini tashkil etish va amaliy mashg‘ ulotlar bazasini takomillashtirish kabi ko‘ nikmalarga ega bo‘ lishi kerak.

MUHOKAMA

Olingan natijalar raqamli texnologiyalarning samarasi ularni darsga oddiy qo‘ shish bilan emas, balki aniq metodik vazifaga mos ravishda tashkil etish bilan belgilanadi, degan xulosaga kelish imkonini beradi. Elektron lug‘ atning o‘ zi terminni o‘ zlashtirishni kafolatlamaydi; terminni kasbiy matn, muloqot yoki amaliy vaziyat bilan bog‘ lash zarur. Shu sababli raqamli vositalar interfaol va amaliyotga yo‘ naltirilgan metodlar bilan birgalikda ishlatilishi lozim.

Amaliyotga yo‘ naltirilgan yondashuv tibbiyot ta’limida ayniqsa muhimdir. Retseptlar, kasallik tarixi, tashxis xulosalari va boshqa tibbiy hujjatlar bilan ishlash orqali talabalar nazariy terminologik bilimlarni amaliy vazifalarga ko‘ chira oladilar. Tibbiyot mutaxassislari bilan kasbiy muloqot stsenariylarini modellashtirish ham terminlarni vaziyatga mos tanlash va qo‘ llash ko‘ nikmasini rivojlantiradi.

Terminologik kompetensiyaning yuqori darajasi turli vaziyatlarda o‘ zlashtirilgan bilim va ko‘ nikmalarni mustaqil qo‘ llashga tayyorlik bilan tavsiflanadi. Shu nuqtai nazardan, kompetensiyani baholashda faqat test natijalariga tayanish yetarli emas. Talabaning mustaqil fikrlashi, kasbiy vaziyatda terminlardan foydalanishi, o‘ z xatolarini aniqlashi va o‘ z faoliyatini baholashi ham hisobga olinishi kerak. Tadqiqotda motivatsion, kognitiv, operatsion va refleksiv mezonlarning ajratilishi aynan mana shu kompleks yondashuvni ifodalaydi.

Metodik ta’minotni takomillashtirish ham muhim masala sifatida belgilanadi. O‘ quv adabiyotlarini yangilash, zamonaviy tibbiy terminologiyani elektron resurslarda aks ettirish, o‘ qituvchilarning raqamli kompetensiyasini oshirish va lotin tili fanini boshqa tibbiy fanlar bilan integratsiyalash zarur. Shuningdek, talabalar ehtiyojlarini hisobga olgan differensial metodik materiallarni ishlab chiqish taklif etiladi.

Maqolada kelajakdagi istiqbolli yo‘ nalishlar qatorida sun’iy intellekt, virtual va kengaytirilgan reallik hamda adaptiv ta’lim tizimlaridan foydalanish imkoniyatlari ham qayd etilgan. Bunday vositalar terminologik materiallarni individuallashtirish, amaliy vaziyatlarni modellashtirish va o‘ quv topshiriqlarini talabaning darajasiga moslashtirish uchun yangi imkoniyatlar yaratishi mumkin.

XULOSA

Tadqiqot natijalari tibbiyot sohasidagi lotin terminlarini o‘ qitishda zamonaviy pedagogik va raqamli texnologiyalardan foydalanish terminologik kompetensiyani rivojlantirish uchun muhim imkoniyat yaratishini ko‘ rsatdi. Elektron lug‘ atlar, terminologik bazalar, multimedia materiallari, mobil ilovalar, virtual laboratoriyalar, simulyatsiyalar, onlayn platformalar va elektron baholash vositalari o‘ quv jarayonini interaktiv, amaliy va talaba faoliyatiga yo‘ naltirilgan shaklda tashkil etishga yordam beradi.

Terminologik kompetensiyani rivojlantirish reproduktiv bosqichdan produktiv, qisman izlanishli va ijodiy bosqichga tomon izchil rivojlanishi kerak. Bunda motivatsion mezon kasbiy qiziqishni, kognitiv mezon bilimni, operatsion mezon amaliy qo‘ llashni, refleksiv mezon esa o‘ z faoliyatini tahlil qilishni ifodalaydi.

Lotin tili va tibbiy terminologiyani o‘ qitishda interfaol metodlar, raqamli texnologiyalar va amaliyotga yo‘ naltirilgan yondashuvni integratsiyalash bo‘ lajak tibbiyot xodimlarining kasbiy tayyorgarligini takomillashtiradi. Shu bilan birga, metodik ta’minotni muntazam yangilash, o‘ qituvchilarning raqamli kompetensiyasini oshirish va fanlararo integratsiyani kuchaytirish ushbu yo‘ nalishdagi muhim vazifalar bo‘ lib qoladi.

BOSHLANG‘ ICH TA’LIMDA INGLIZ TILINI O‘ QITISHDA VALDORF PEDAGOGIKASIDAN FOYDALANISHNING NAZARIY-METODOLOGIK ASOSLARI

Qobilova Kamola Azamat qizi
Termiz davlat pedagogika instituti mustaqil tadqiqotchisi
Email: qobilovakamola474@gmail.com

Annotatsiya: *Mazkur maqolada boshlang‘ ich ta’lim bosqichida ingliz tilini o‘ qitishda Valdorf pedagogikasidan foydalanishning nazariy va metodologik asoslari tahlil qilinadi. Zamonaviy ta’lim jarayonida chet tilini erta yoshdan o‘ rgatish masalasi muhim pedagogik vazifalardan biri bo‘ lib, bunda bolaning yosh va psixologik xususiyatlarini hisobga oluvchi ta’lim texnologiyalarini tanlash alohida ahamiyat kasb etadi. Valdorf pedagogikasi bolaning intellektual rivojlanishi bilan bir qatorda uning hissiy, ijtimoiy, ijodiy va estetik rivojlanishiga ham e’tibor qaratishi bilan boshlang‘ ich chet tili ta’limi uchun muhim metodologik imkoniyatlarni taqdim etadi. Maqolada Valdorf pedagogikasining yaxlitlik, ritm, taqlid, faoliyat orqali o‘ rganish, san’at va ijodkorlik, bolaning tabiiy rivojlanishini qo‘ llab-quvvatlash kabi tamoyillari ingliz tilini o‘ qitish kontekstida tahlil qilinadi. Shuningdek, hikoya, qo‘ shiq, she’r, harakatli o‘ yinlar, dramatizatsiya, rasm chizish va kundalik kommunikativ vaziyatlardan foydalanishning metodik imkoniyatlari ochib beriladi. Tadqiqot natijasida boshlang‘ ich sinflarda ingliz tilini Valdorf pedagogikasi asosida tashkil etishning konseptual-metodik modeli taklif etiladi.*

ТЕОРЕТИКО-МЕТОДОЛОГИЧЕСКИЕ ОСНОВЫ ПРИМЕНЕНИЯ ВАЛЬДОРФСКОЙ ПЕДАГОГИКИ ПРИ ОБУЧЕНИИ АНГЛИЙСКОМУ ЯЗЫКУ НА НАЧАЛЬНОЙ СТУПЕНИ ОБРАЗОВАНИЯ

Аннотация: *В статье анализируются теоретико-методологические основы использования вальдорфской педагогики при обучении английскому языку в начальном образовании. В условиях современного образования особое значение приобретает раннее обучение иностранному языку с учетом возрастных, психологических, эмоциональных и социальных особенностей детей. Вальдорфская педагогика, ориентированная на целостное развитие личности ребенка, создает определенные методические возможности для организации обучения английскому языку в начальной школе. Рассматриваются такие принципы вальдорфской педагогики, как целостность образовательного процесса, ритм, обучение через подражание и деятельность, использование искусства и творчества, эмоциональная вовлеченность и поддержка естественного развития ребенка. Особое внимание уделяется использованию рассказов, песен, стихотворений, двигательных игр, драматизации, рисования и повседневных коммуникативных ситуаций в обучении английскому языку. В статье предлагается концептуально-методическая модель организации начального обучения английскому языку на основе отдельных принципов вальдорфской педагогики.*

ТЕОРЕТИКО-МЕТОДОЛОГИЧЕСКИЕ ОСНОВЫ ПРИМЕНЕНИЯ ВАЛЬДОРФСКОЙ ПЕДАГОГИКИ ПРИ ОБУЧЕНИИ АНГЛИЙСКОМУ ЯЗЫКУ НА НАЧАЛЬНОЙ СТУПЕНИ ОБРАЗОВАНИЯ

Abstract: *This article examines the theoretical and methodological foundations of applying Waldorf pedagogy to English language teaching in primary education. Early foreign language learning has become an important component of contemporary education, requiring teaching approaches that correspond to children’s cognitive, emotional, social, and developmental characteristics. Waldorf pedagogy, originally developed within the educational ideas of Rudolf Steiner, emphasizes the holistic development of the child and provides a number of pedagogical principles that can be meaningfully adapted to primary foreign language education. The article analyses such principles as rhythm, learning through imitation and activity, artistic and creative expression, storytelling, play, emotional engagement, and age-appropriate development. Particular attention is paid to the methodological potential of songs, poems,*

movement activities, stories, role-play, drawing, dramatization, and everyday communicative situations in English language teaching. The article proposes a conceptual and methodological model for integrating selected Waldorf principles into primary English language education. It is argued that the pedagogically appropriate adaptation of Waldorf-inspired practices can contribute to creating an emotionally supportive, creative, and meaningful language-learning environment. At the same time, the article emphasizes that Waldorf pedagogy should not be mechanically transferred to contemporary primary education but should be critically adapted to national curricula, learning outcomes, digital realities, and the developmental needs of learners.

Keywords: *primary education, English language teaching, Waldorf pedagogy, Rudolf Steiner, foreign language education, child development, storytelling, play-based learning, creativity, language teaching methodology.*

KIRISH

Bugungi globallashuv va xalqaro kommunikatsiya jarayonlari xorijiy tillarni, xususan, ingliz tilini erta yoshdan o‘ rgatishga bo‘ lgan ehtiyojni kuchaytirmoqda. Ingliz tili nafaqat xalqaro muloqot vositasi, balki zamonaviy ilm-fan, texnologiya, ta’lim va madaniyatlararo aloqalarning muhim vositasi sifatida namoyon bo‘ lmoqda. Shu sababli boshlang‘ ich ta’lim bosqichidayoq o‘ quvchilarda ingliz tiliga ijobiy munosabatni shakllantirish, tinglab tushunish va og‘ zaki nutqning dastlabki ko‘ nikmalarini rivojlantirish muhim pedagogik vazifalardan hisoblanadi.

Biroq boshlang‘ ich sinf o‘ quvchilariga ingliz tilini o‘ rgatish yuqori sinflardagi chet tili ta’limidan tubdan farq qiladi. Kichik yoshdagi bolalarda abstrakt tafakkur hali to‘ liq shakllanmagan bo‘ lib, ular bilimni ko‘ proq bevosita tajriba, harakat, takrorlash, taqlid, obraz va hissiy taassurotlar orqali o‘ zlashtiradilar. Shu nuqtayi nazardan, bolani faqat grammatik qoidalar va yodlashga asoslangan o‘ qitish usullari bilan cheklash samarali natija bermasligi mumkin.

Mazkur sharoitda bolaning tabiiy rivojlanishi, ijodkorligi, hissiy holati va faoliyatini ta’limning markaziga qo‘ yuvchi pedagogik yondashuvlarni o‘ rganish dolzarbdir. Shunday pedagogik yo‘ nalishlardan biri — Rudolf Steiner tomonidan XX asr boshlarida shakllantirilgan Valdorf pedagogikasidir.

Valdorf pedagogikasida bolaning intellektual rivojlanishi uning hissiy, ijtimoiy, jismoniy va ijodiy rivojlanishidan ajratib qaralmaydi. Ta’lim mazmunini bolaning rivojlanish bosqichlariga muvofiq tashkil etish, san’at, hikoya, musiqa, harakat va amaliy faoliyatdan foydalanish ushbu yondashuvning muhim jihatlaridan biridir.

Shu sababli Valdorf pedagogikasining barcha qoidalarini boshlang‘ ich ingliz tili ta’limiga to‘ liq ko‘ chirish emas, balki uning metodik jihatdan samarali elementlarini zamonaviy chet tili ta’limi bilan integratsiya qilish masalasi alohida ilmiy qiziqish uyg‘ otadi.

Tadqiqotning asosiy maqsadi boshlang‘ ich ta’limda ingliz tilini o‘ qitishda Valdorf pedagogikasining nazariy-metodologik imkoniyatlarini aniqlash hamda uning samarali elementlarini zamonaviy chet tili metodikasi bilan integratsiya qilishning pedagogik asoslarini ishlab chiqishdan iborat.

Mazkur maqsadga erishish uchun quyidagi vazifalar belgilandi:

Valdorf pedagogikasining nazariy asoslarini o‘ rganish;

boshlang‘ ich yoshdagi bolalarning ingliz tilini o‘ zlashtirish xususiyatlarini aniqlash;

Valdorf pedagogikasining asosiy tamoyillarini chet tili ta’limi nuqtayi nazaridan tahlil qilish;

hikoya, musiqa, o‘ yin, harakat va san’atning til o‘ rganishdagi metodik imkoniyatlarini aniqlash;

Valdorf pedagogikasi elementlarini kommunikativ va faoliyatga yo‘ naltirilgan ingliz tili ta’limi bilan integratsiya qilish yo‘ llarini belgilash;

boshlang‘ ich ingliz tili ta’limi uchun konseptual-metodik model taklif qilish.

Tadqiqotda nazariy tahlil, pedagogik modellashtirish, qiyosiy tahlil, tizimli yondashuv va metodik umumlashtirish usullaridan foydalanildi.

Tizimli yondashuv Valdorf pedagogikasi va ingliz tilini o‘ qitish metodikasining o‘ zaro bog‘ liq komponentlarini yaxlit pedagogik tizim sifatida ko‘ rib chiqishga imkon beradi.

Shaxsga yo‘ naltirilgan yondashuv bolaning individual rivojlanish sur’ati, qiziqishi, ehtiyoji va psixologik xususiyatlarini hisobga olishni nazarda tutadi.

Faoliyatga yo‘ naltirilgan yondashuv tilni faqat nazariy bilim sifatida emas, balki amaliy faoliyat jarayonida o‘ zlashtirishga urg‘ u beradi.

Kommunikativ yondashuv esa ingliz tilidan real yoki modellashtirilgan muloqot vaziyatlarida foydalanishni asosiy metodik maqsadlardan biri sifatida belgilaydi.

Valdorf pedagogikasi Rudolf Steinerning antropozofik falsafiy qarashlari bilan bog‘ liq holda XX asr boshlarida shakllangan. Birinchi Valdorf maktabi 1919-yilda Germaniyaning Stuttgart shahrida tashkil etilgan.

Ushbu pedagogik tizimning markazida bolaning yaxlit rivojlanishi g‘ oyasi turadi. Ta’lim jarayonida bolaning intellektual imkoniyatlari bilan bir qatorda uning hissiy, ijtimoiy, estetik va amaliy faoliyatiga ham e’tibor qaratiladi.

Valdorf pedagogikasining asosiy metodologik xususiyatlarini quyidagicha umumlashtirish mumkin:

yaxlit rivojlanish tamoyili;
yosh va rivojlanish bosqichlariga moslik;
ta’limda ritm va takroriylik;
taqlid va namuna orqali o‘ rganish;
o‘ yin va faoliyat orqali bilim olish;
san’at va ijodkorlikdan foydalanish;
hikoya va obrazlarning pedagogik imkoniyatlaridan foydalanish;
hissiy jihatdan qo‘ llab-quvvatlovchi ta’lim muhiti.

Ushbu tamoyillarning bir qismi zamonaviy boshlang‘ ich chet tili metodikasi bilan hamohangdir. Xususan, kichik yoshdagi bolalarni tilga jalb etishda qo‘ shiq, she’r, o‘ yin, harakat, hikoya va dramatizatsiyadan foydalanish keng qo‘ llanadi.

1. Ritm va takrorlash

Boshlang‘ ich yoshdagi bolalar uchun muntazam takrorlanadigan faoliyatlar o‘ quv jarayonini tushunarli va oldindan taxmin qilinadigan qiladi.

Masalan, ingliz tili darsining boshlanishida har kuni bir xil qisqa salomlashuv qo‘ shig‘ idan foydalanish mumkin:

“Good morning, good morning, how are you today?”

Keyinchalik ushbu ritmik faoliyatga:
weather;
days of the week;
feelings;
classroom objects
kabi mavzular kiritiladi.

Bunday takrorlash mexanik yodlash emas, balki kontekstual va hissiy takrorlash shaklida tashkil etilganda til birliklarining tabiiy o‘ zlashtirilishiga yordam beradi.

Valdorf pedagogikasida hikoya muhim pedagogik vositalardan biri hisoblanadi. Boshlang‘ ich ingliz tili ta’limida qisqa va obrazli hikoyalardan foydalanish o‘ quvchilarning tinglab tushunish, lug‘ at boyligi va tasavvurini rivojlantirishga xizmat qilishi mumkin.

Masalan, “A Little Red Bird” mavzusida qisqa hikoya beriladi:

“This is a little red bird. The bird lives in a tree. Every morning, the bird sings.”

O‘ qituvchi hikoyani rasmlar, imo-ishoralar va ovoz ohangi orqali ifodalaydi. O‘ quvchilar esa ayrim so‘ zlarni harakat bilan ko‘ rsatadilar.

Shunday qilib, yangi so‘ z:
bird —ko‘ rish + eshitish + harakat + obraz
orqali o‘ zlashtiriladi.

3. Qo‘ shiq va musiqa

Musiqa kichik yoshdagi bolalarning hissiy faolligini oshirish va til birliklarini ritmik tarzda takrorlash imkonini beradi.

Masalan:
Hello – hello!
How are you?
I’m happy,
How about you?
kabi qisqa qo‘ shiq orqali salomlashish va his-tuyg‘ ularni ifodalash birliklari o‘ rgatiladi.

Musiqiy faoliyat quyidagi ko‘ nikmalarni rivojlantirishga xizmat qilishi mumkin:
pronunciation;
listening;
vocabulary;
rhythm;
memory;
emotional engagement.

4. Harakatli o‘ yinlar

Valdorf yondashuvining faoliyatga asoslangan xususiyatlari boshlang‘ ich ingliz tili darslarida harakatli o‘ yinlar bilan uyg‘ unlashadi.

Masalan, “Touch and Say” o‘ yinida o‘ qituvchi:

“Touch the door!”

desa, o‘ quvchilar eshik yoniga borib, “door” so‘ zini takrorlaydilar.

Shuningdek:

“Stand up!”

“Sit down!”

“Walk!”

“Jump!”

“Turn around!”

“Touch the window!”

kabi buyruqlar orqali ingliz tili jismoniy faoliyat bilan birlashtiriladi.

Bunday yondashuv ayniqsa kichik yoshdagi o‘ quvchilar uchun muhim, chunki ularning diqqatini uzoq vaqt davomida faqat og‘ zaki tushuntirish orqali ushlab turish qiyin.

Valdorf pedagogikasida san’at ta’limning yordamchi vositasi emas, balki uning muhim tarkibiy qismi sifatida qaraladi. Ingliz tili darslarida rasm chizish, rang berish, qo‘ l mehnati va dramatizatsiyadan foydalanish mumkin.

Masalan, “My Family” mavzusida o‘ quvchilar oila a’zolarining rasmini chizadilar va:

This is my mother.

This is my father.

This is my brother.

kabi sodda gaplardan foydalanadilar.

Natijada ingliz tili lug‘ ati o‘ quvchining shaxsiy tajribasi bilan bog‘ lanadi.

Boshlang‘ ich yoshdagi bolalar rolli vaziyatlarga tez kirishadi. Shu sababli ingliz tilidagi oddiy dialoglarni dramatizatsiya qilish samarali metodik vosita bo‘ lishi mumkin.

Masalan:

At the shop

A: Hello!

B: Hello!

A: Can I have an apple, please?

B: Here you are.

A: Thank you.

B: You’re welcome.

O‘ quvchilar xaridor va sotuvchi rollarini bajaradilar.

Bu jarayonda til materiali abstrakt qoidalar orqali emas, balki faoliyat va muloqot orqali o‘ zlashtiriladi.

Valdorf pedagogikasining zamonaviy ingliz tili ta’limiga integratsiyasi uning barcha nazariy qoidalarini to‘ liq ko‘ chirishni anglatmaydi. Aksincha, boshlang‘ ich ta’limning davlat standarti, o‘ quv dasturi, zamonaviy kommunikativ metodlar va bolalarning individual ehtiyojlari bilan mos keladigan elementlarni tanlab olish zarur.

Quyidagi integratsion modelni taklif etish mumkin:

Valdorf elementi	Ingliz tili ta’limidagi vosita	Kutiladigan natija
Ritm	qo‘ shiq, chant, takrorlash	lug‘ at va talaffuzni mustahkamlash
Hikoya	story-based learning	listening va vocabulary
Harakat	action games, TPR	so‘ zlarni amaliy o‘ zlashtirish
San’at	drawing, colouring	ijodkorlik va vocabulary
Dramatizatsiya	role-play	speaking
Takrorlash	daily routines	avtomatlashgan til birliklari
Taqlid	teacher modelling	talaffuz va nutq namunalarini o‘ zlashtirish
Erkin ijod	storytelling, drawing	mustaqil fikrlash

Ushbu integratsiya orqali Valdorf pedagogikasining bolaning tabiiy rivojlanishiga yo‘ naltirilganligi zamonaviy chet tili metodikasining kommunikativ va faoliyatga asoslangan tamoyillari bilan uyg‘ unlashtiriladi.

XULOSA

Boshlang‘ ich ta’limda ingliz tilini o‘ qitishda Valdorf pedagogikasidan foydalanish bolaning yosh, psixologik, hissiy va ijodiy xususiyatlarini hisobga oluvchi ta’lim muhitini shakllantirish uchun muhim metodik imkoniyatlarga ega.

Tadqiqot natijasida Valdorf pedagogikasining ritm, takrorlash, taqlid, hikoya, san’at, musiqa, harakat va ijodkorlikka asoslangan elementlari boshlang‘ ich ingliz tili ta’limi bilan mazmunan uyg‘ unlashtirilishi mumkinligi aniqlandi.

Taklif etilgan metodik model maqsadli, mazmuniy, jarayonli va natijaviy bloklardan tashkil topib, ingliz tilini bolaning faol ishtiroki, ijodkorligi va real kommunikativ faoliyati orqali o‘ zlashtirishga yo‘ naltiriladi.

Valdorf pedagogikasining asosiy pedagogik qiymati ingliz tilini faqat grammatik va leksik birliklar yig‘ indisi sifatida emas, balki bola faoliyati, tasavvuri, hissiyoti va ijtimoiy tajribasi bilan bog‘ langan ta’lim mazmuni sifatida tashkil etish imkoniyatida namoyon bo‘ ladi.

Shu bilan birga, ushbu pedagogik yondashuvni O‘ zbekiston boshlang‘ ich ta’lim tizimiga tatbiq etishda uning tarixiy-falsafiy asoslarini mexanik tarzda ko‘ chirishdan ko‘ ra, ilmiy asoslangan va metodik jihatdan mos elementlarini milliy o‘ quv dasturlari, kompetensiyaviy yondashuv va zamonaviy ingliz tili o‘ qitish texnologiyalari bilan integratsiya qilish maqsadga muvofiqdir.

Kelgusidagi tadqiqotlarda taklif etilgan metodikaning tajriba-sinov asosida samaradorligini aniqlash, boshlang‘ ich sinf o‘ quvchilarining ingliz tiliga bo‘ lgan motivatsiyasi, lug‘ at boyligi, tinglab tushunish va og‘ zaki nutq ko‘ rsatkichlaridagi o‘ zgarishlarni empirik jihatdan o‘ rganish muhim ilmiy vazifa hisoblanadi.

MAKTAB O‘ QUVCHILARINING SOG‘ LOM TURMUSH TARZINI SHAKLLANTIRISHDA GIMNASTIKA MASHG‘ ULOTLARINING O‘ RNI

Mamatqodirov Ziynatulloh Nodirbek o‘ g‘ li
Qo‘ qon universiteti Andijon filiali
E-mail: mamatqodirovziynatulloh@gmail.com

Annotatsiya: *Mazkur maqolada maktab o‘ quvchilarida sog‘ lom turmush tarzini shakllantirishda gimnastika mashg‘ ulotlarining pedagogik, jismoniy va tarbiyaviy imkoniyatlari ilmiy-nazariy jihatdan tahlil qilingan. Tadqiqotning asosiy e’tibori gimnastika mashqlarining o‘ quvchilarning jismoniy sifatlari, harakat faolligi, qad-qomati, muvozanat, chaqqonlik, egiluvchanlik, kuch va chidamlilik ko‘ rsatkichlariga ta’siri bilan bir qatorda, muntazam jismoniy faoliyatga bo‘ lgan ehtiyojni shakllantirish masalasiga qaratilgan. O‘ zbekistonlik olimlar T.S.Usmonxo‘ jayev, I.I.Morgunova, A.Abdullayev, Sh.Xonkeldiyev, K.Mahkamjonov, S.Uraimov va boshqa tadqiqotchilarning jismoniy tarbiya hamda sog‘ lomlashtirishga oid ilmiy-metodik qarashlari tahlil qilindi. Muallif tomonidan ushbu yondashuvlar umumlashtirilib, gimnastika mashg‘ ulotlarini faqat jismoniy sifatlarni rivojlantirish vositasi sifatida emas, balki o‘ quvchida kundalik sog‘ lom hayot odatlarini shakllantiruvchi pedagogik vosita sifatida qarash taklif etiladi. Tadqiqot natijasida maktab sharoitida gimnastika mashg‘ ulotlarini sog‘ lom turmush tarzi komponentlari bilan integratsiyalashgan holda tashkil etishning metodik jihatlari asoslab berilgan.*

Kalit so‘ zlar: *gimnastika, maktab o‘ quvchisi, sog‘ lom turmush tarzi, jismoniy tarbiya, jismoniy faollik, jismoniy sifatlar, qad-qomat, harakat faolligi, sog‘ lomlashtirish, pedagogik jarayon*

РОЛЬ ЗАНЯТИЙ ГИМНАСТИКОЙ В ФОРМИРОВАНИИ ЗДОРОВОГО ОБРАЗА ЖИЗНИ У ШКОЛЬНИКОВ

Аннотация: *В статье научно-теоретически анализируются педагогические, физические и воспитательные возможности гимнастических занятий в формировании здорового образа жизни школьников. Основное внимание уделено влиянию гимнастических упражнений на развитие физических качеств, двигательной активности, осанки, равновесия, ловкости, гибкости, силы и выносливости учащихся, а также формированию устойчивой потребности в регулярной физической активности. Рассмотрены научно-методические взгляды узбекских ученых в области физического воспитания и оздоровления. Автором обобщены существующие подходы и предложено рассматривать гимнастику не только как средство развития физических качеств, но и как педагогический инструмент формирования повседневных навыков здорового образа жизни.*

Ключевые слова: *гимнастика, школьники, здоровый образ жизни, физическое воспитание, физическая активность, физические качества, осанка, двигательная активность, оздоровление.*

THE ROLE OF GYMNASTICS TRAINING IN SHAPING A HEALTHY LIFESTYLE AMONG SCHOOLCHILDREN

Abstract: *The article presents a scientific and theoretical analysis of the pedagogical, physical and educational potential of gymnastics training in developing a healthy lifestyle among school students. Particular attention is paid to the influence of gymnastics exercises on physical qualities, motor activity, posture, balance, agility, flexibility, strength and endurance, as well as on the formation of a sustainable need for regular physical activity. The scientific and methodological views of Uzbek scholars in the field of physical education and health promotion are reviewed. The author summarizes these approaches and proposes considering gymnastics not only as a means of developing physical qualities but also as a pedagogical tool for developing everyday healthy lifestyle habits among school students.*

Keywords: *gymnastics, school students, healthy lifestyle, physical education, physical activity, physical qualities, posture, motor activity, health promotion.*

KIRISH

Bugungi ta’lim jarayonida o‘ quvchining faqat bilim olishi emas, balki uning jismoniy, ruhiy va ijtimoiy jihatdan barkamol rivojlanishi ham muhim pedagogik vazifalardan biri sifatida qaralmoqda. Ayniqsa, maktab yoshida shakllangan kundalik odatlar insonning keyingi hayot tarziga bevosita ta’sir ko‘ rsatishi sababli o‘ quvchilarda sog‘ lom turmush tarzi madaniyatini tarkib toptirish alohida ahamiyat kasb etadi. Sog‘ lom turmush tarzi faqat kasalliklarning oldini olish yoki sport bilan shug‘ ullanish bilangina chegaralanmaydi. U kundalik harakat faolligi, to‘ g‘ ri ovqatlanish, mehnat va dam olish tartibi, gigiyena, yetarli uyqu, psixologik barqarorlik hamda jismoniy faollikka ongli munosabat kabi bir-biri bilan bog‘ liq omillar majmuasini tashkil etadi.

Shu nuqtayi nazardan, umumiy o‘ rta ta’lim maktablarida jismoniy tarbiya darslarining mazmuni va tashkil etilishiga qo‘ yiladigan talablar yanada ortib bormoqda. O‘ zbekistonda gimnastika sport turlarini rivojlantirish bo‘ yicha davlat siyosatida ham maktab yoshidagi bolalarni gimnastikaga jalb etish masalasiga alohida e’tibor berilgan. Xususan, Prezidentning 2022-yil 23-dekabrdagi PQ-449-son qarorida umumiy o‘ rta ta’lim maktablarining boshlang‘ ich sinf o‘ quvchilari uchun “Bolalar uchun gimnastika” dasturini joriy etish belgilangan. Hujjatda gimnastikani sog‘ lom turmush tarzining muhim tarkibiy qismi sifatida targ‘ ib qilish vazifasi ham ko‘ rsatilgan [1].

Demak, gimnastikani maktab jismoniy tarbiyasi tizimida qo‘ llash masalasiga faqat sport natijalari nuqtayi nazaridan yondashish yetarli emas. Gimnastikaning tarbiyaviy va sog‘ lomlashtiruvchi imkoniyatlarini o‘ quvchining kundalik hayot tarzini shakllantirish bilan bog‘ lash masalaning muhim jihatlaridan biridir.

Bizningcha, ushbu yondashuvning maktab o‘ quvchilari uchun ham muhim jihati shundaki, jismoniy mashq bolaning hayotida bir martalik faoliyat emas, balki muntazam ehtiyojga aylanishi kerak. Ya’ni, o‘ quvchi gimnastika mashg‘ ulotida mashqni bajarganligi bilan emas, balki undan tashqari vaqtda ham harakatlanishga intilishi bilan sog‘ lom turmush tarzining faol subyektiga aylanadi [2]. O‘ zbekistonda jismoniy tarbiya nazariyasi va metodikasining rivojiga katta hissa qo‘ shgan olimlardan biri T.S.Usmonxo‘ jayev hisoblanadi. Uning “Maktabgacha yoshdagilar sog‘ lom turmush tarzi jismoniy madaniyatida, gimnastika va massaj” o‘ quv qo‘ llanmasida gimnastika va jismoniy mashqlarni sog‘ lom turmush tarzi bilan bog‘ liq holda tashkil etish masalalariga e’tibor qaratilgan.

Biz I.I. Morgunovaning metodik yondashuvini sog‘ lom turmush tarzi nuqtayi nazaridan davom ettirib, gimnastika mashqlarini o‘ quvchiga shunchaki bajariladigan harakatlar yig‘ indisi sifatida emas, balki harakat madaniyatini shakllantiruvchi vosita sifatida baholash zarur, deb hisoblaymiz. Chunki mashqni to‘ g‘ ri bajarish, nafas olishni nazorat qilish, gavdani to‘ g‘ ri tutish va harakatlar ketma-ketligiga rioya qilish bolaning kundalik hayotidagi jismoniy xulq-atvoriga ham ko‘ chadi [3].

Gimnastika mashg‘ ulotlarini sog‘ lom turmush tarzini shakllantirish bilan bog‘ lashda metodik asos bo‘ lib xizmat qiladi. Chunki haftada bir necha marotaba o‘ tkaziladigan jismoniy tarbiya darsi o‘ quvchining barcha kunlarini qamrab ololmaydi. Shu sababli gimnastik mashqlarni ertalabki badantarbiya, tanaffusdagi harakatli mashqlar, to‘ garak mashg‘ ulotlari va uy sharoitidagi oddiy mashqlar bilan bog‘ lash maqsadga muvofiq [4]. S.Uraimovning umumta’lim maktablarida jismoniy tarbiya tizimini shakllantirish va rivojlantirishga bag‘ ishlangan tadqiqotlarida majburiy jismoniy tarbiya mashg‘ ulotlarini darsdan tashqari sog‘ lomlashtirish ishlari bilan to‘ ldirish masalasiga e’tibor qaratilgan. Olim jismoniy tarbiya mashg‘ ulotlarini metodik jihatdan to‘ g‘ ri tashkil etish o‘ quvchilarning jismoniy tayyorgarligini oshirishga xizmat qilishi mumkinligini ta’kidlaydi.

TADQIQOTNING MAQSADI

Tadqiqotning maqsadi maktab o‘ quvchilarida sog‘ lom turmush tarzini shakllantirishda gimnastika mashg‘ ulotlarining o‘ rni va pedagogik imkoniyatlarini ilmiy-nazariy jihatdan asoslash hamda maktab jismoniy tarbiyasi jarayonida gimnastika vositalaridan foydalanishning metodik yo‘ nalishlarini aniqlashdan iborat.

TADQIQOT VAZIFALARI:

1. Sog‘ lom turmush tarzi va jismoniy faollik tushunchalarining o‘ zaro bog‘ liqligini aniqlash.
2. Gimnastikaning o‘ quvchilar jismoniy rivojlanishiga ta’sirini tahlil qilish.
3. O‘ zbek olimlarining jismoniy tarbiya va gimnastika bo‘ yicha ilmiy-metodik qarashlarini umumlashtirish.
4. Gimnastika mashg‘ ulotlarining sog‘ lom turmush tarzi ko‘ nikmalarini shakllantirishdagi pedagogik imkoniyatlarini aniqlash.
5. Maktab sharoitida gimnastika mashg‘ ulotlarini tashkil etishning amaliy yo‘ nalishlarini ishlab chiqish.

TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-tahliliy xarakterga ega bo‘ lib, unda ilmiy-metodik adabiyotlarni tahlil qilish, qiyosiy tahlil, tizimlashtirish, umumlashtirish, pedagogik kuzatuvga oid ilmiy qarashlarni tahlil qilish va ilmiy manbalarni kontent jihatdan o‘ rganish metodlaridan foydalanildi.

Tadqiqotning nazariy asosini O‘ zbekistonlik olimlarning jismoniy tarbiya, sport, gimnastika va sog‘ lomlashtirishga oid ilmiy-metodik qarashlari tashkil etdi. Jumladan, T.S. Usmonxo‘ jayev, I.I. Morgunova, A. Abdullayev, Sh. Xonkeldiyev, K. Mahkamjonov, S. Uraimov kabi mutaxassislarning ishlari tahlil qilindi.

Shuningdek, zamonaviy ilmiy maqolalarda maktab o‘ quvchilarining sog‘ lom turmush tarzini jismoniy madaniyat vositalari orqali shakllantirish masalalari ham ko‘ rib chiqilgan. Xususan, 2026-yilda S. Uraimov va I. Akramov tomonidan chop etilgan tadqiqotda sog‘ lom turmush tarzi o‘ quvchining ongli va tizimli faoliyati sifatida talqin qilinib, jismoniy madaniyat shaxsning umumiy madaniy rivojlanishidagi integrativ omil sifatida qaralgan [5].

Mazkur tadqiqot uchun muhim metodologik tamoyil shundan iboratki, sog‘ lom turmush tarzini shakllantirishni faqat jismoniy ko‘ rsatkichlarning o‘ zgarishi bilan chegaralab bo‘ lmaydi. O‘ quvchining jismoniy mashqqa munosabati, muntazamlik, o‘ z-o‘ zini nazorat qilish, intizom, xavfsizlik qoidalariga rioya qilish va harakat faolligiga bo‘ lgan ichki ehtiyoji ham mazkur jarayonning muhim ko‘ rsatkichlari sifatida qaralishi lozim.

TADQIQOT NATIJALARI

Tadqiqot davomida o‘ rganilgan ilmiy-metodik manbalarni umumlashtirish natijasida gimnastika mashg‘ ulotlarining maktab o‘ quvchilarida sog‘ lom turmush tarzini shakllantirishga ta’sirini bir necha o‘ zaro bog‘ liq yo‘ nalishlarga ajratish mumkin.

1. Gimnastika va jismoniy sifatlarning rivojlanishi

Gimnastikaning eng muhim imkoniyatlaridan biri uning turli jismoniy sifatlarni kompleks rivojlantirish imkonini berishidir. Mashqlar mazmuniga qarab kuch, egiluvchanlik, chaqqonlik va chidamlilikni rivojlantirish mumkin.

Gimnastika mashqlarining xilma-xilligi maktab o‘ quvchilarining yosh va individual xususiyatlariga mos ravishda mashg‘ ulot mazmunini o‘ zgartirish imkonini beradi. Masalan, kichik yoshdagi o‘ quvchilarda oddiy muvozanat mashqlari, egilishlar, saf mashqlari, yurish va yengil sakrashlardan foydalanish mumkin bo‘ lsa, yuqori sinflarda murakkabroq koordinatsion mashqlar, kuch va egiluvchanlikni rivojlantiruvchi mashqlar qo‘ llanadi.

2. Gimnastika va qad-qomat

Maktab yoshida bolaning tayanch-harakat tizimi faol rivojlanadi. Shu sababli gavdani to‘ g‘ ri tutish, umurtqa pog‘ onasiga tushadigan yuklamani me’yorlash va mushaklar faoliyatini uyg‘ un rivojlantirish muhimdir.

K.Mahkamjonovning boshlang‘ ich sinflar jismoniy tarbiyasiga oid materiallarida organizmni chiniqtirish, to‘ g‘ ri qad-qomatni shakllantirish va jismoniy mashqlarni bajarishda to‘ g‘ ri nafas olishga oid nazariy bilimlarga e’tibor berilgan [6].

Zamonaviy tadqiqotlarda ham o‘ smirlar, xususan, qizlarda jismoniy faollik, gigiyena, ovqatlanish va boshqa omillarning qad-qomat shakllanishi bilan bog‘ liqligi ko‘ rsatilmoqda.

3. Gimnastika va harakat faolligi

Sog‘ lom turmush tarzining asosiy belgilaridan biri muntazam harakat faolligidir. Maktab o‘ quvchilarining kundalik hayotida o‘ quv yuklamasi, kompyuter va mobil qurilmalardan foydalanish hamda uzoq vaqt o‘ tirib qolish jismoniy faollikning kamayishiga sabab bo‘ lishi mumkin. Shu sababli gimnastika mashg‘ ulotlarini maktabdagi jismoniy tarbiya darslari bilangina bog‘ lab qo‘ ymasdan, darsdan tashqari faoliyatga ham olib chiqish muhimdir. Ertalabki gimnastika, jismoniy tarbiya daqiqalari, tanaffusdagi yengil mashqlar, sport to‘ garaklari va uy sharoitidagi oddiy mashqlar bir butun tizimni tashkil etishi mumkin.

4. Gimnastika va psixologik farovonlik

Gimnastikaning ahamiyatini faqat fiziologik yoki jismoniy ko‘ rsatkichlar bilan izohlash masalaning bir tomoninigina ko‘ rsatadi. Jismoniy mashqlar o‘ quvchining o‘ ziga bo‘ lgan ishonchi, intizomi, o‘ z-o‘ zini boshqarishi va jamoada faol ishtirok etishiga ham pedagogik jihatdan ijobiy sharoit yaratishi mumkin.

Muallifning avvalgi tadqiqotida ham gimnastika mashg‘ ulotlarining psixologik sog‘ lomlashtirishdagi o‘ rni, stressning oldini olish, ruhiy barqarorlik, ijobiy kayfiyat, intizom va o‘ z-o‘ zini boshqarish masalalari tahlil qilingan [7]. O‘ quvchi mashqni mustaqil bajarib, natijasini kuzatib va asta-sekin murakkabroq harakatlarni o‘ zlashtirib borgani sari unda “men bajara olaman” degan ichki ishonch shakllanadi. Bu esa jismoniy faollikni majburiyatdan ehtiyojga aylantirish uchun muhim pedagogik shartlardan biridir.

5. Gimnastika va intizom

Gimnastika mashg‘ ulotlari muayyan tartib asosida tashkil etiladi. Safga turish, mashg‘ ulotni boshlash, qizdirish mashqlarini bajarish, asosiy mashqlarga o‘ tish, xavfsizlik talablariga rioya qilish va mashg‘ ulotni yakunlash kabi jarayonlar o‘ quvchidan intizomni talab qiladi. Bunday tartib o‘ quvchida faqat sportga oid ko‘ nikmalarni emas, balki o‘ z faoliyatini rejalashtirish va nazorat qilish ko‘ nikmalarini ham shakllantirishi mumkin. Shu jihatdan gimnastikani sog‘ lom turmush tarzi bilan bog‘ lashda “mashq bajarish” va “mashq qilish madaniyati” tushunchalarini farqlash lozim [8].

XULOSA

Maktab o‘ quvchilarining sog‘ lom turmush tarzini shakllantirish bugungi ta’lim tizimining muhim vazifalaridan biridir. Mazkur jarayonda gimnastika mashg‘ ulotlari o‘ zining ko‘ p qirrali imkoniyatlari bilan alohida ahamiyat kasb etadi.

Tadqiqot natijalari asosida quyidagi xulosalarga kelindi:

1. Gimnastika o‘ quvchilarning jismoniy sifatlarini kompleks rivojlantirish imkonini beradi. Mashqlar orqali kuch, chidamlilik, egiluvchanlik, chaqqonlik, muvozanat va koordinatsiyani rivojlantirish mumkin.

2. Gimnastika harakat faolligini oshirishning samarali vositalaridan biridir. Uni maktab darslari bilan bir qatorda ertalabki badantarbiya, tanaffus mashqlari va darsdan tashqari to‘ garaklar bilan bog‘ lash mumkin.

3. Gimnastika qad-qomatni shakllantirishga xizmat qilishi mumkin. Ayniqsa, maktab yoshida gavdani to‘ g‘ ri tutish, harakatlarni nazorat qilish va to‘ g‘ ri nafas olish ko‘ nikmalarini shakllantirish muhimdir.

4. Gimnastika psixologik-tarbiyaviy imkoniyatlarga ham ega. Muntazam mashg‘ ulotlar orqali intizom, o‘ z-o‘ zini nazorat qilish, mas’uliyat va o‘ z kuchiga ishonch kabi sifatlarni tarbiyalash uchun pedagogik sharoit yaratiladi.

Shunday qilib, gimnastika mashg‘ ulotlarini maktab jismoniy tarbiya tizimida to‘ g‘ ri metodik asosda tashkil etish o‘ quvchilarning jismoniy rivojlanishiga xizmat qilish bilan bir qatorda, ularda harakatga bo‘ lgan ijobiy munosabat, o‘ z salomatligiga mas’uliyatli yondashuv va sog‘ lom turmush tarziga oid barqaror odatlarning shakllanishiga zamin yaratadi.

METHODS FOR DEVELOPING ANALYTICAL THINKING IN HISTORY STUDENTS THROUGH HISTORICAL SOURCES

Vakhobov Dostanbek Abdumannob ugli
Researcher at Namangan State University
E-mail: dostonbekvohobov511@gmail.com

Abstract: *This article examines a system of methods for developing analytical thinking in undergraduate history students through purposeful work with historical sources. The study treats analytical thinking not as a generic ability to criticize information, but as a disciplinary competence integrating source attribution, contextualization, corroboration, causal-temporal reasoning, perspective recognition, and evidence-based argumentation. An integrative qualitative design was used to compare Uzbek source-study and history-teaching scholarship with internationally established models of historical thinking.*

Keywords: *historical sources; analytical thinking; history students; source criticism; historical inquiry; corroboration; contextualization; evidence-based argumentation.*

МЕТОДЫ РАЗВИТИЯ АНАЛИТИЧЕСКОГО МЫШЛЕНИЯ У СТУДЕНТОВ-ИСТОРИКОВ НА ОСНОВЕ ИСТОРИЧЕСКИХ ИСТОЧНИКОВ

Аннотация: *В данной статье рассматривается система методов развития аналитического мышления у студентов-историков посредством целенаправленной работы с историческими источниками. В исследовании аналитическое мышление рассматривается не как общая способность критически оценивать информацию, а как дисциплинарная компетенция, интегрирующая атрибуцию источников, контекстуализацию, подтверждение, причинно-следственное и временное рассуждение, распознавание перспектив и аргументацию, основанную на доказательствах. Для сравнения узбекской источниковедческой и педагогической практики в области истории с общепринятыми на международном уровне моделями исторического мышления использовался интегративный качественный подход.*

INTRODUCTION

Contemporary higher education can no longer define successful history learning as the accurate reproduction of a settled narrative. Students encounter the past through textbooks, archival documents, material objects, oral testimony, maps, photographs, statistical records, newspapers, memoirs, and digitized collections whose claims differ in purpose, scale, reliability, and representativeness. A history graduate must therefore determine what a source says, who produced it, for which audience, what it omits, how it relates to other evidence, and how far an inference is warranted. Developing such judgment is essential because the quality of historical knowledge depends on disciplined interpretation rather than the mechanical accumulation of facts. Analytical thinking in history is a domain-specific configuration of intellectual operations. It includes decomposing a complex problem into investigable questions; distinguishing event, process,

structure, and interpretation; identifying assertions and assumptions; comparing accounts; establishing temporal sequence; reasoning about causation and consequence; recognizing change and continuity; and constructing a defensible explanation from incomplete evidence. These operations are related to general critical thinking, yet they cannot be reduced to generic logic. A statement may be internally coherent and still be historically weak if it ignores provenance, chronology, genre, or the unequal survival of evidence. Wineburg's research demonstrated that expert historical reading involves sourcing, contextualization, and corroboration rather than immediate acceptance of surface meaning [3; 4]. Historical sources possess distinctive didactic potential because they expose students to the evidentiary basis and constructed character of historical knowledge. A textbook normally compresses competing traces into a continuous account, whereas a source preserves discontinuity, perspective, silence, and ambiguity. When students compare an administrative decree with a private letter, a tax register with a memoir, or an official photograph with oral testimony, they must negotiate differences between intention and reception, norm and practice, individual experience and structural tendency. Seixas and Morton's framework clarifies that evidence is inseparable from historical significance, continuity and change, cause and consequence, historical perspectives, and the ethical dimension [5]. Source work can therefore connect close reading with explanation when tasks require students to show how traces support, qualify, or contradict a claim.

Nevertheless, merely placing primary sources before students does not automatically produce analytical thinking. Novices often read documents as transparent containers of facts, judge credibility solely by whether an author was present, substitute moral approval for contextual interpretation, or select only evidence that confirms an initial opinion. Linguistic difficulty, unfamiliar scripts, incomplete background knowledge, and the authority assigned to printed texts can intensify these tendencies. Digital abundance adds a paradox: access expands while authentication of origin, metadata, editing history, and representativeness becomes more demanding. Effective pedagogy must therefore make the procedures of historical inquiry explicit and gradually transfer responsibility for them from teacher to student. The most productive methods organize source analysis as a sequence of questions rather than as an invitation to express impressions. Sourcing prompts identify authorship, genre, date, audience, purpose, and conditions of production. Contextualization locates the document within contemporaneous institutions, concepts, conflicts, and possibilities, thereby limiting presentist readings. Corroboration requires comparison across sources that vary in position and form, while close reading examines vocabulary, rhetoric, contradictions, and silences. Reisman's document-based curriculum shows how repeated engagement with these routines can transform reading when embedded in coherent lessons rather than isolated exercises [6]. Nokes frames the connection between source reading and evidence-based interpretation as historical literacy [9]. These core routines should be combined with problem-based and dialogic methods. A document laboratory asks groups to reconstruct an event from an incomplete dossier; an evidence jigsaw distributes contrasting sources so no group can solve the problem independently; a structured academic controversy requires competing explanations before a revised synthesis; and a causal map ranks conditions, catalysts, decisions, and consequences. Timeline reconstruction, source annotation, microhistory, archival simulation, and claim-evidence-reasoning writing make analytical operations visible. VanSledright's inquiry-oriented work supports this shift from coverage to investigation by showing that students can participate in historical problem solving when disciplinary procedures are scaffolded [7].

LITERATURE REVIEW

Within Uzbek scholarship, the works of Abdumajid Madraimov and Uktamjon Mansurov provide two complementary foundations for designing source-based analytical learning, and both scholars' publications are traceable in Google Scholar. Madraimov, together with Gavhar Fuzailova, systematizes the disciplinary foundations of source studies in the textbook Manbashunoslik [1]. Its importance for the present problem lies in the treatment of a historical source as an object that must be identified, classified, described, and critically interpreted before it can support a historical conclusion. The authors distinguish the theoretical tasks of source studies from the practical examination of materials relating to different periods of Uzbekistan's history and draw attention to the conditions of origin, authorship, form, content, transmission, and scholarly use of evidence. Pedagogically interpreted, this framework supplies the architecture of analytical thinking: students must move from external attributes and provenance to internal meaning, compare the information capacity of different source types, identify limitations, and avoid equating a surviving record with the totality of the past. Madraimov's contribution is consequently epistemic and procedural; it disciplines the transition from document to claim and makes source criticism an explicit sequence of reasoned decisions. Mansurov, in collaboration with A. R. Raxmatullayeva, approaches the issue from the organization of history teaching in Tarix o‘ qitish metodikasi [2]. Their methodological position emphasizes the interdependence of educational aims, historical content, teaching methods, learning activities, and demonstrable outcomes. The work consolidates practical experience in history instruction and discusses ways of increasing effectiveness through purposeful lesson design, visual and documentary materials, independent activity, and methodologically justified selection of techniques. For analytical-thinking development, Mansurov's central value is the insistence that a method is productive only when it activates a specific cognitive action: comparison should disclose similarity and difference; problem questions should generate an evidentiary search; and

independent work should culminate in explanation rather than transcription. More specifically, their combined logic supports three levels of student work. At the descriptive level, learners identify a source and extract relevant information; at the analytical level, they relate form, origin, and context to evidentiary value; at the interpretive level, they compare sources and justify a conclusion. This progression connects technical source description with movement from guided performance to independent reasoning while keeping national historical materials at the centre of instruction. Read together, the two scholars establish a productive division of labour. Madraimov specifies what responsible work with sources requires from the standpoint of historical knowledge, while Mansurov clarifies how those requirements can be converted into goals, tasks, instructional sequences, and assessment within the educational process. Yet a gap remains between the source-critical operation and the observable student competence.

METHODOLOGY

The article employed an integrative qualitative methodology designed for conceptual and pedagogical synthesis rather than for measuring an intervention with human participants. The bibliographic corpus comprised ten works selected according to four criteria: direct relevance to historical sources or historical-thinking instruction; identifiable authorship and stable publication data; scholarly traceability through Google Scholar or an established academic publisher or journal; and capacity to illuminate either the Uzbek disciplinary context or an internationally recognized method of historical reasoning. The corpus combined two Uzbek foundations in source studies and history-teaching methodology [1; 2] with research on expert source evaluation, historical-thinking concepts, document-based curriculum, inquiry learning, historical literacy, and disciplinary writing [3-10]. Qualitative content analysis was used to code each work across five categories: the epistemic purpose assigned to history education; the operations performed on sources; the architecture of learning tasks; the form and degree of instructional scaffolding; and the evidence proposed for judging student learning. Deductive codes were initially derived from recurrent constructs in the literature, including sourcing, contextualization, corroboration, evidence, causation, continuity and change, perspective, and argumentation; inductive coding was then applied to identify additional elements such as archival metadata, translation, representativeness, uncertainty, and reflective revision that are especially relevant to multilingual university source work. Comparative analysis mapped convergences and differences between Uzbek source-critical traditions and foreign models of historical cognition, while the historical-logical method was used to distinguish the disciplinary sequence by which a trace becomes evidence from the pedagogical sequence by which a novice learns to perform that transformation. Analysis and synthesis decomposed the competence into observable intellectual actions and recombined them into a coherent instructional cycle. The method of pedagogical modelling was subsequently used to construct the Source-to-Argument Cycle, align each stage with appropriate learning activities and scaffolds, and specify assessment indicators.

RESULTS

Four conceptual results emerged. First, source-based analytical thinking was operationalized as a six-stage Source-to-Argument Cycle. Stage one, problem framing, requires students to transform a broad topic into an investigable historical question and specify what kind of evidence could answer it. Stage two, provenance and sourcing, examines creator, date, place, genre, audience, purpose, archival location, transmission, and possible mediation through copying, translation, editing, or digitization. Stage three, contextualization, reconstructs the contemporaneous institutional, linguistic, social, and temporal conditions that make the source intelligible without imposing present-day categories. Stage four, corroboration, compares independent and dependent accounts, identifies convergence and contradiction, weighs representativeness, and explains why discrepancies may exist. Stage five, inferential construction, connects selected evidence to claims about causation, continuity, change, significance, or perspective and makes uncertainty explicit. Stage six, metacognitive audit, asks students to test alternative explanations, identify missing voices, distinguish fact from inference, and revise the strength or scope of the conclusion. Second, a method portfolio was aligned with this cycle. Document laboratories develop close reading and provenance analysis; mystery dossiers generate question formation; evidence jigsaws make interdependence and corroboration unavoidable; structured academic controversy exposes students to rival interpretations; causal maps differentiate long-term conditions, catalysts, agency, and consequences; synchronized timelines reveal sequence and uneven change; source annotation records claims, silences, and rhetorical choices; and claim-evidence-reasoning memoranda require a concise, auditable argument. Digital assignments add reverse-image checking, metadata inspection, repository comparison, and documentation of the chain from archival item to classroom extract. Third, the study generated a five-dimensional competency matrix for assessment. Epistemic orientation is demonstrated when a student treats sources as situated traces rather than transparent facts. Evidence processing is demonstrated through accurate attribution, classification, close reading, contextualization, and corroboration. Temporal-causal reasoning appears in the distinction between chronology and causality, the ranking of factors, and recognition of continuity alongside change. Perspectival interpretation involves reconstructing historically available meanings while avoiding both presentism and uncritical relativism. Argumentative justification is shown when claims are proportional to evidence, counterevidence is addressed, limitations are stated, and conclusions are revised. Performance in each dimension

can be described at reproductive, guided-analytical, independent-analytical, and reflexive levels, enabling teachers to provide diagnostic feedback without reducing competence to a single score. Fourth, the results identify implementation conditions.

DISCUSSION

The foreign scholarly debate relevant to these results can be reconstructed through the contrasting emphases of Sam Wineburg and Peter Seixas; this is a conceptual polemic between published frameworks, not a claim that the two authors conducted a direct personal dispute. Wineburg locates the central difficulty in the cognitive habits with which novices approach documents. Readers ordinarily seek immediate meaning, coherence, and familiarity, whereas historians interrupt comprehension to ask who produced a text, under what circumstances, and how it compares with other traces [3; 4]. Historical thinking is therefore "unnatural" in the precise sense that it resists intuitive presentism and requires learned heuristics of sourcing, contextualization, and corroboration. From this position, analytical competence develops through repeated performance of expert-like operations on carefully designed document problems. Seixas, by contrast, organizes historical thinking around a conceptual grammar: significance, evidence, continuity and change, cause and consequence, historical perspectives, and the ethical dimension [5]. His framework shifts attention from the micro-process of reading an individual document to the larger questions by which societies construct and contest meaningful accounts of the past. Evidence is indispensable, but it operates in relation to judgments about what matters, how change is characterized, whose perspective is reconstructed, and how the past enters ethical reflection. The tension is consequently threefold. First, Wineburg's heuristic emphasis risks becoming procedural ritual if students mechanically complete an author-date-purpose worksheet without understanding the historical problem, while Seixas's conceptual emphasis risks abstraction if learners discuss significance or ethical judgment without disciplined examination of provenance and corroboration. Second, Wineburg's demand for distance from familiar assumptions protects inquiry from presentism, whereas Seixas's ethical dimension insists that historical understanding cannot be sealed off from contemporary responsibility. Distance without relevance may produce technically competent but civically inert analysis; relevance without contextual restraint may collapse inquiry into retrospective judgment. Third, the frameworks imply different units of instructional design: Wineburg begins with the encounter between reader and source, while Seixas begins with second-order concepts that organize an account. The results of this study resolve rather than erase the disagreement by arranging the approaches in layers. The Source-to-Argument Cycle uses Wineburgian heuristics at the micro level to authenticate, situate, and compare evidence; it uses Seixas's concepts at the meso level to frame causal, temporal, perspectival, and significance questions; and it adds a reflexive macro level at which students disclose uncertainty, missing voices, and ethical implications. This layered design also makes the grounds of scholarly disagreement visible to students. Under this synthesis, a provenance card is not an end but a warranting device, and an ethical discussion is not free opinion but the final stage of an evidence-constrained interpretation. Reisman's curriculum research provides practical support for embedding heuristics within recurring document-based lessons [6], yet the proposed university model expands the approach through archival metadata, multilingual mediation, independent corpus construction, and explicit assessment of conceptual reasoning.

CONCLUSION

Historical sources can develop analytical thinking in history students only when they function as evidence within a structured inquiry, not as decorative supplements to a lecture or as repositories of ready-made facts. The study established that the relevant competence integrates provenance analysis, contextualization, corroboration, temporal-causal reasoning, perspective reconstruction, evidence-based argumentation, and metacognitive revision. By connecting Madraimov's source-critical foundations with Mansurov's methodological organization of history teaching and with international research on historical cognition, the article formulated a coherent bridge between disciplinary standards and observable student activity.

METHODOLOGY FOR DEVELOPING STUDENTS' LINGUISTIC THINKING THROUGH PROVERBS AND TONGUE TWISTERS IN PRIMARY SCHOOL MOTHER TONGUE LESSONS

Ollaberganova Sanobar Khamidovna
Candidate of Philological Sciences, Professor,
Urgench State University named after Abu Rayhan Beruni, Uzbekistan

Abstract: *This article discusses the use of proverbs and tongue twisters in primary school mother tongue lessons to develop students' linguistic thinking. It examines the essence of the concept of linguistic thinking and the formation of linguistic sensitivity, which involves the ability to distinguish subtle aspects of language and stylistic nuances. The article also highlights important factors and methods for developing a creative approach to text creation and editing.*

Lingvistik tafakkurni rivojlantirish metodikasi — ta' lim jarayonida o' quvchilar (yoki bo' lajak mutaxassislar)da til birliklarini tizimli anglash, lisoniy hodisalarni mantiqiy tahlil qilish, nutqiy-ijodiy faoliyatni boshqarish hamda til va tafakkur uyg' unligini ta' minlash ko' nikmalarini shakllantirishga qaratilgan pedagogik-metodik yondashuvlar majmuidir. Lingvistik tafakkur tushunchasining mohiyati- til va tafakkur bir-biri bilan uzviy bog' liq bo' lib, lingvistik tafakkur insonning olamni lisoniy vositalar orqali idrok etishi, tahlil qilishi va umumlashtirishi jarayonida namoyon bo' ladi. Til qoidalari, fonetik, leksik va grammatik tizimni o' zlashtirish hamda ulardan amalda ongli foydalanish ko' zda tutiladi.Til hodisalarini didaktik jihatdan transformatsiya qilish, kasbiy yoki hayotiy vaziyatlarda eng maqbul nutqiy qarorlarni qabul qilish layoqati rivojlanadi.

Boshlang' ich sinf ona tili, o' qish savodxonligi darslarida maqol hamda tez aytishlardan foydalanish o' quvchilarning nutq apparatini rivojlantiradi, so' z boyligini oshiradi va lingvistik tafakkurni (til birliklarini tahlil qilish, mantiqiy bog' liqlikni anglash va fikrni aniq ifodalash yetakchiligi)ni shakllantiradi.

1. Maqollar orqali lingvistik tafakkurni rivojlantirish

Maqollar ixcham shaklda katta mantiqiy va ma'noviy yukka ega bo' lgani uchun o' quvchilarda semantik va mantiqiy tahlil ko' nikmasini o' stiradi. Maqollarning ma'no tahlili semantik yondashuv jihati maqolni shunchaki

yodlatmay, uning ko‘ chma va to‘ g‘ ri ma’nolarini solishtirib tushuntirish mumkin, Masalan*:* "Mehnatdan kelsa boylik, turmush bo‘ lar chiroylik". Maqoldagi sabab-o‘ qibat bog‘ lanishini aniqlash kerak.

Tushirib qoldirilgan so‘ zni topish (Mantiqiy-sintaktik mashq): Maqol tarkibidagi asosiy tushunchani topish orqali grammatik bog‘ liqlikni his qilish. *Topshiriq:* "Opa-singilning [...] bir, oti boshqa" (javob: *joni*). Mavzuga oid guruhlash**:** Maqollarni shakl va ma’nosiga ko‘ ra turkumlash (masalan: *ilm, mehnat, do‘ stlik* haqidagi maqollar).

2. Tez aytishlar orqali lingvistik va fonetik tafakkurni shakllantirish

Tez aytishlar o‘ quvchilarning artikulyatsiya a’zolarini charxlaydi hamda fonetik tahlil (tovush va harf mutanosibligi) qilish qobiliyatini oshiradi. Fonetik farqlash *(Alliteratsiya):* Bir xil yoki o‘ xshash unli va undosh tovushlarning takrorlanishi orqali fonetik idrokni o‘ stirish. masalan*:* "Oq choynakka oq qopqoq, ko‘ k choynakka ko‘ k qopqoq." (*Q* va *K* tovushlarini aniq talaffuz qilish). Tez aytishni nafaqat tez, balki har bir so‘ zning ma’nosini anglagan holda to‘ g‘ ri va ravon aytish mashqi. Maqol va tez aytishlar bilan ishlashni darsning "Tashkiliy qism"ida (2-3 daqiqalik fonetik va aqliy charxlov sifatida) yoki *"Yangi mavzuni mustahkamlash"* bosqichida qiziqarli musobaqa shaklida o‘ tkazish yuqori samaradorlik beradi.

Boshlang‘ ich sinf (1–4-sinf) ona tili va o‘ qish savodxonligi darslarida qo‘ llash uchun mo‘ ljallangan tez aytish va maqollar to‘ plami hamda ularning metodik qo‘ llanishi:

Tez Aytish va Metodik Izoh

1."Oq choynakka oq qopqoq, ko‘ k choynakka ko‘ k qopqoq."

Metodik izoh: **[q]** va **[k]** portlovchi va jarangsiz undosh tovushlarini farqlash va to‘ g‘ ri artikulyatsiya qilishni shakllantiradi (1-sinf uchun mos).

2."G‘ ani g‘ ildirakni g‘ izillatib g‘ ilofladi."

Metodik izoh: Chuqur til orqasi **[g‘]** tovushining to‘ g‘ ri talaffuzini mustahkamlaydi, unli va undoshlar uyg‘ unligini charxlaydi.

3."Gulla, lolam, gulla, lolam, lolam gulla, lolam."

Metodik izoh: **[l]** va **[m]** sonor undoshlarini takrorlash orqali nutqning ravonligi va ritmini oshiradi.

4."Farhod g‘ ozlarni g‘ oz-g‘ oz qilib boqdi."

Metodik izoh: **[f]**, **[g‘]**, **[z]** tovushlari almashinuvida talaffuz aniqligini oshiradi va so‘ zlarni to‘ g‘ ri bo‘ g‘ inlarga bo‘ lishga yordam beradi.

5."Bir tub tut, tutning tagida bir tub tut."

Metodik izoh: **[t]** portlovchi undoshining takrorlanishi orqali artikulyatsiya a’zolari (til va tish) harakatini chaqqonlashtiradi.

6."Sardor sumkasini stolga qo‘ ydi."

Metodik izoh: **[s]** va **[st]** unli-undosh birikmalarining ravon talaffuzini taminlaydi hamda gap ichida ot va fe’lning sintaktik bog‘ liqligini ko‘ rsatadi.

7."Qulipnay qizilmi, qirmizimi?"

Metodik izoh: **[q]** tovushi va so‘ roq ohangini to‘ g‘ ri berish hamda sifat (rang-baranglik) tushunchasini boyitishga xizmat qiladi.

8."Bo‘ ron bo‘ ri kabi bo‘ kirib esdi."

Metodik izoh: **[b]** va **[r]** tovushlari orqali o‘ xshatish va badiiy san’at elementlarini anglash, tasviriy nutqni o‘ stirish.

9."Oshni oshxonada oshpaz pishirdi."

Metodik izoh: O‘ zakdoshtir so‘ zlar (**osh, oshxona, oshpaz**) ustida ishlash va **[sh]**, **[p]** tovushlarini to‘ g‘ ri talaffuz qilish uchun.

10. "*Pichoq o‘ tkir bo‘ lsa, non yupqa kesiladi."*

Metodik izoh: Mantiqiy sabab-o‘ qibat va **[p]**, **[q]**, **[k]** tovushlarining artikulyatsiyasini charxlaydi.

*Dars jarayonida qo‘ llash bo‘ yicha qisqa tavsiya***:** Tez aytishlarni darsning *"Fonetik daqiqa"* qismida o‘ quvchilarning artikulyatsiyasini charxlash uchun, maqollarni esa *"Mavzuni mustahkamlash"* yoki *"Lug‘ at ustida ishlash"* bosqichida tahliliy savollar berish orqali qo‘ llash tavsiya etiladi.

Boshlang‘ ich sinf o‘ quvchilarining lingvistik tafakkuri va nutq apparatini rivojlantirish uchun dars jarayonida qo‘ llash mumkin bo‘ lgan 3 ta interfaol o‘ yin va topshiriq metodi:

1. "Aql charxpalagi" (Maqollarni tiklash va tahlil qilish)

O‘ quvchilarning mantiqiy fikrlashini, grammatik va semantik ko‘ nikmalarini rivojlantirishga qaratilgan jamoaviy o‘ yin.

O‘ tkazish tartibi:

1. O‘ quvchilar 2-3 jamoaga bo‘ linadi.
2. Doskaga yoki tarqatma kartochkalarga maqol so‘ zlari aralashtirib beriladi (masalan: *"kitob — manbai — bilim"* yoki *"achitib — gapirar — do‘ st"*).

3. *1-topshiriq*: Jamoalar so‘ zlardan to‘ g‘ ri gap (maqol) tuzishi kerak.

4. *2-topshiriq*: Har bir jamoa tuzilgan maqolning ma’nosini 2 ta jumla bilan tushuntirib beradi va tarkibidagi tayanch so‘ zlarga (masalan, antonimlar yoki omonimlar) izoh beradi.

O‘ yinning ahamiyati shundaki, so‘ z birikmasi va gap qurilishini to‘ g‘ ri anglash, ko‘ chma ma’nolarni tahlil qilish va mantiqiy xulosa chiqarish ko‘ nikmasi shakllanadi.

2. "Tezkor diktor" (Tez aytish musobaqasi)

O‘ quvchilarning artikulyatsiyasini, talaffuz aniqligini hamda diqqatni jamlash qobiliyatini oshiruvchi interfaol metod.

O‘ tkazish tartibi:

1. O‘ qituvchi ma’lum bir tovushga boy tez aytishni namoyish etadi (masalan: *”Oq choynakka oq qopqoq...”*).
2. O‘ yin 3 bosqichda o‘ tkaziladi:

1-bosqich (Past): Tez aytish sekin va har bir tovush pichirlab, artikulyatsiya aniq ko‘ rsatib aytiladi.

2-bosqich (O‘ rtacha): O‘ quvchilar juftlikda bir-birlariga adashmay aytib berishadi.

3-bosqich (Tezkor): Har bir jamoadan vakillar (diktorlar) chiqib, taymer ostida (10 soniya) adashmasdan, ravon va tez aytish bo‘ yicha bellashishadi.

O‘ yinning ahamiyati shundaki , murakkab undosh va unli tovushlar ([q], [g‘], [k], [sh]) artikulyatsiyasi to‘ g‘ rilanadi, nutqiy to‘ siqlar yo‘ qoladi.

3. ”Mantiqiy zanjir” (Integratsiyalashgan topqirlik o‘ yini)

Maqol va tez aytishlarni so‘ z turkumlari, grammatik qoidalar va so‘ z boyligi bilan bog‘ lab o‘ tkaziladigan individual va jamoaviy mashq.

O‘ tkazish tartibi:

1. O‘ qituvchi bitta tayanch so‘ z beradi (masalan: "**Bilim**" yoki "**Osh**").
2. *1-qadam*: O‘ quvchilar bu so‘ z qatnashgan maqol yoki tez aytishni topib aytishadi (*”Kitob — bilim manbai”* yoki *”Oshni oshxonada oshpaz pishirdi”*).
3. *2-qadam*: Shu maqol yoki tez aytish ichidan so‘ ralgan so‘ z turkumini (masalan: *ot*, *fe’l*, *sifat*) ajratib ko‘ rsatishadi.
4. *3-qadam*: Zanjir bo‘ yicha keyingi o‘ quvchi ushbu maqoldagi oxirgi so‘ zning bosh harfiga yangi tez aytish yoki maqol aytib zanjirni davom ettiradi.

O‘ yinning ahamiyati shundaki , grammatik qoidalarni amalda qo‘ llash, tezkor fikrlash va faol so‘ z boyligini oshirish ta’minlanadi. Boshlang‘ ich sinf o‘ quvchilarida lingvistik tafakkurni to‘ g‘ ri shakllantirish ularning kelgusida chuqur bilim olishi, fikrni aniq bayon etishi hamda har tomonlama rivojlangan shaxs bo‘ lib yetishishida fundamental asos bo‘ lib xizmat qiladi.

MAKTABDA INGLIZ TILINI (EFL) O‘ QITISH AMALIYOTIDA SUN’IY INTELLEKT: MUAMMOLAR VA KASBIY RIVOJLANISHGA BO‘ LGAN EHTIYOJLAR

Gulbahor Gasanova
O‘ qituvchi, 168-maktab

Annotatsiya: *Sun’iy intellekt o‘ qituvchilarning kundalik faoliyatidan tobora kengroq o‘ rin egallamoqda, biroq uning ta’limiy qiymati o‘ qituvchilarning texnologik imkoniyatlarni til o‘ rganish maqsadlari bilan qay darajada bog‘ lay olishiga bevosita bog‘ liq. Ushbu konseptual maqolada maktablarda ingliz tilini xorijiy til sifatida o‘ qitishda sun’iy intellektdan foydalanish masalalari o‘ qituvchilarning pedagogik amaliyoti, mavjud muammolari va kasbiy rivojlanish ehtiyojlari nuqtayi nazaridan tahlil qilinadi. So‘ nggi tadqiqotlar o‘ qituvchilar generativ sun’iy intellektdan ko‘ pincha darslarni rejalashtirish, mashg‘ ulot va topshiriqlarni ishlab chiqish, o‘ quv materiallarini tayyorlash, baholash hamda fikr-mulohaza taqdim etishda foydalanayotganini ko‘ rsatadi. O‘ zbekistonda olib borilgan tadqiqotlar ham o‘ qituvchilarning sun’iy intellektga nisbatan ijobiy munosabatini aniqlash bilan birga, ularning pedagogik va axloqiy kompetensiyalarini yanada rivojlantirish zarurligini ko‘ rsatmoqda. Biroq ko‘ plab o‘ qituvchilar ushbu yo‘ nalishda yetarli darajada rasmiy tayyorgarlikdan o‘ tmagan bo‘ lib, sun’iy intellekt yaratgan ma’lumotlarning aniqligi, shaxsiy ma’lumotlar daxlsizligi, algoritmik tarafkashlik, akademik halollik, o‘ quvchilarning texnologiyaga qaram bo‘ lib qolishi va o‘ qituvchining kasbiy mulohaza yuritish qobiliyati susayishi mumkinligidan xavotirda. Maqolada sun’iy intellektni samarali integratsiya qilish faqat texnik bilim yoki ommabop vositalardan foydalanish imkoniyati bilan cheklanmasligi ta’kidlanadi. Maktab ingliz tili o‘ qituvchilariga til haqidagi bilim, topshiriqlarni loyihalash, tanqidiy baholash, axloqiy qaror qabul qilish va refleksiv amaliyotni birlashtiruvchi fanga xos sun’iy intellekt savodxonligi zarur. Amaliy, hamkorlikka asoslangan va maktab tomonidan qo‘ llab-quvvatlanadigan kasbiy ta’lim o‘ qituvchilarga ta’lim berish hamda baholash uchun mas’uliyatni o‘ zida saqlagan holda sun’iy intellektdan imkoniyatlari cheklangan yordamchi pedagogik vosita sifatida foydalanishga yordam beradi.*

Kalit so‘ zlar: *sun’iy intellekt; maktabda ingliz tilini xorijiy til sifatida o‘ qitish; o‘ qituvchilarning kasbiy rivojlanishi; sun’iy intellekt savodxonligi; pedagogik amaliyot; o‘ qituvchining kasbiy mulohazasi.*

ИСКУССТВЕННЫЙ ИНТЕЛЛЕКТ В ШКОЛЬНОЙ ПЕДАГОГИЧЕСКОЙ ПРАКТИЧЕСКОЙ ПРАКТИКЕ EFL. ПРОБЛЕМЫ И ПОТРЕБНОСТИ В ПРОФЕССИОНАЛЬНОМ РАЗВИТИИ

Аннотация: *Искусственный интеллект всё активнее входит в повседневную профессиональную деятельность учителей, однако его образовательная ценность зависит от того, насколько эффективно педагоги соотносят технологические возможности с целями обучения языку. В данной концептуальной статье рассматривается использование искусственного интеллекта при преподавании английского языка как иностранного в школе с особым вниманием к педагогической практике учителей, существующим трудностям и потребностям в профессиональном развитии. Результаты современных исследований показывают, что учителя часто применяют генеративный искусственный интеллект при планировании уроков, разработке учебных заданий и видов деятельности, подготовке материалов, оценивании и предоставлении обратной связи. Исследования, проведённые в Узбекистане, также свидетельствуют о положительном отношении учителей к искусственному интеллекту и одновременно указывают на необходимость дальнейшего развития их педагогических и этических компетенций. Однако многие педагоги не имеют достаточной формальной подготовки в данной области и выражают обеспокоенность по поводу точности генерируемой информации, конфиденциальности данных, алгоритмической предвзятости, академической добросовестности, зависимости учащихся от технологий и возможного ослабления профессионального суждения учителя. В статье утверждается, что эффективная интеграция искусственного интеллекта требует большего, чем технические знания или доступ к популярным цифровым инструментам. Учителям английского языка необходима предметно-ориентированная грамотность в области искусственного интеллекта, объединяющая языковую компетентность, проектирование заданий, критическое оценивание, принятие этически обоснованных решений и рефлексивную практику. Практическое, совместное и поддерживаемое школой профессиональное обучение может помочь педагогам использовать искусственный интеллект в качестве вспомогательного педагогического ресурса с ограниченными функциями, сохраняя при этом ответственность за преподавание и оценивание.*

Ключевые слова: *искусственный интеллект; преподавание английского языка как иностранного в школе; профессиональное развитие учителей; грамотность в области искусственного интеллекта; педагогическая практика; профессиональное суждение учителя.*

ARTIFICIAL INTELLIGENCE IN SCHOOL EFL TEACHING PEDAGOGICAL PRACTICES CHALLENGES AND PROFESSIONAL DEVELOPMENT NEEDS

Abstract: *Artificial intelligence is becoming part of teachers' everyday work, yet its educational value depends on how teachers connect technological functions with language learning goals. This conceptual article examines the use of artificial intelligence in school English as a foreign language teaching, with attention to teachers' pedagogical practices, common challenges, and professional development needs. Recent research shows that teachers often use generative artificial intelligence for lesson planning, activity design, materials, assessment, and feedback. Evidence from Uzbekistan also shows positive teacher attitudes alongside a need for stronger pedagogical and ethical competence. However, many teachers receive little formal preparation and remain concerned about accuracy, privacy, bias, academic integrity, learner dependence, and the possible weakening of professional judgement. The article argues that effective integration requires more than technical knowledge or access to a popular tool. School EFL teachers need subject-specific artificial intelligence literacy that combines language awareness, task design, critical evaluation, ethical decision-making, and reflective practice. Practical, collaborative, and school-supported professional learning can help teachers use artificial intelligence as a limited pedagogical resource while retaining responsibility for instruction and assessment.*

Keywords: *artificial intelligence; school EFL teaching; teacher professional development; AI literacy; pedagogical practices; teacher judgement.*

1 INTRODUCTION

Artificial intelligence (AI) has moved quickly from specialist research into widely available digital tools. Generative AI systems can produce texts, dialogues, explanations, exercises, images, quizzes, lesson outlines, and feedback in response to ordinary language prompts. These functions are relevant to English as a foreign language (EFL) teaching because teachers regularly create examples, adapt texts, design communicative tasks, and respond to learners with different proficiency levels. The speed of content generation can reduce preparation time and widen the range of materials available to teachers. It can also create a false impression that producing content is the same as producing good instruction.

Effective EFL teaching requires decisions about language level, accuracy, purpose, interaction, assessment, and learner development. An AI-generated worksheet may be grammatically correct but still be unsuitable for a class because it does not match the curriculum, invites only mechanical answers, or includes unfamiliar cultural assumptions. The teacher must therefore examine generated material, revise it, and decide how learners will use it. This responsibility is consistent with the Technological Pedagogical Content Knowledge framework, which explains that technology becomes useful when technological knowledge is integrated with subject knowledge and pedagogy (Mishra & Koehler, 2006). Celik's (2023) Intelligent-TPACK model extends this principle to AI and gives greater attention to ethical knowledge and informed teacher judgement.

This article reviews current evidence on AI use by language teachers and considers its implications for school EFL teaching. It focuses on three connected questions: what teachers use AI for, which problems limit responsible use, and what professional learning can help teachers make stronger pedagogical decisions. The discussion does not report a new empirical study. Instead, it offers a conceptual synthesis that can guide teacher educators, schools, and future research in emerging EFL contexts.

2 Pedagogical Uses of Artificial Intelligence in School EFL Teaching

Current AI applications support several areas of language teaching. Teachers can generate reading passages at an approximate proficiency level, create vocabulary exercises, prepare role-play prompts, design comprehension questions, and produce alternative explanations of grammar. Speech-recognition tools can provide pronunciation practice, while writing applications can offer initial feedback on grammar, organization, and word choice. Generative systems can also suggest lesson stages, assessment criteria, or differentiated versions of the same activity. Kohnke, Moorhouse, and Zou (2023) describe these possibilities but stress that language teachers and learners need the digital competence to use chatbots critically and ethically.

Recent empirical studies show that teacher use remains concentrated in preparation and content production. Barghi et al. (2026) surveyed 221 EFL teachers and practicum students in Turkiye. Among AI users, the most frequently reported practices were designing activities, lesson planning, preparing presentations, and developing assessments. The study also found that 64.6 percent of users had received no formal AI training. These findings suggest that adoption may occur before teachers have developed a clear framework for checking output or linking it to learning processes.

Evidence from higher education points to a similar pattern. Nazim and Alzubi's (2025) study of 278 EFL teachers found moderate engagement in AI-mediated professional activities alongside highly positive attitudes. Participants used AI for planning, feedback, assessment, reflection, and professional learning, but reported limited AI literacy and concerns about reliability, ethics, and professional autonomy. Although university and school settings differ, the findings show why positive attitudes should not be treated as evidence of pedagogical competence.

In school classrooms, the quality of AI use should be judged by the learning activity that follows. A dialogue generated in seconds has limited value if students only read it silently. Its value increases when learners compare expressions, identify pragmatic differences, rehearse roles, change the context, and create their own dialogue. The same principle applies to feedback. Automated comments can provide a starting point, but students should interpret the comments, decide which suggestions are useful, revise their work, and explain their choices. AI becomes pedagogically meaningful when it supports language processing and learner agency rather than replacing them.

3 Evidence from Uzbekistan

Research in Uzbekistan scholars provides direct evidence about the local educational context. Saydazimova and Saydazimova (2025) surveyed 141 EAP and ESP teachers from 34 local and international higher education institutions in five regions and interviewed 10 teachers. Participants were generally positive and familiar with AI for several pedagogical purposes. The authors classified most teachers as GenAI Adopters or GenAI Collaborators, while noting that further knowledge and experience were required for them to become GenAI Innovators. This distinction shows that frequent use and pedagogical innovation should be evaluated separately.

Mirzayev, Kamal, and Axundjanova (2025) examined seven university EFL teachers in Uzbekistan. The participants valued real-time feedback, support for autonomous learning, and grammar and spelling assistance. They also raised concerns about learner over-reliance, limited ethical knowledge, and possible harm to critical thinking. Although the sample was small and drawn from higher education, the findings identify issues that school-based professional development should address before learner-facing AI use.

Elov et al. (2025) studied 50 upper-intermediate EFL learners in Tashkent and reported stronger gains for the chatbot group in informal speaking and social-pragmatic performance than for the teacher-led comparison group. Their narrow sample limits generalization, but the study provides local evidence that AI-supported interaction can extend speaking practice. Collectively, research conducted in Uzbekistan encourages teacher-supervised experimentation with AI while emphasizing the importance of professional training in task development, content evaluation, ethical use, and the promotion of learner autonomy.

4 Teacher Judgement and Artificial Intelligence Literacy

AI literacy includes understanding what an AI system can do, recognizing its limitations, evaluating its output, and using it responsibly. Ng et al. (2021) describe AI literacy as a combination of knowing and understanding AI, using and applying it, evaluating and creating with it, and considering ethical issues. For EFL teachers, these abilities must be connected with language-specific knowledge. Teachers need to judge grammatical accuracy, register, pragmatic meaning, cultural representation, vocabulary difficulty, and the quality of feedback.

UNESCO's AI Competency Framework for Teachers organizes competence around a human-centred mindset, ethics, AI foundations and applications, AI pedagogy, and AI for professional learning (Miao & Cukurova, 2024). The framework is useful because it does not reduce competence to prompt writing. A teacher who can obtain a fluent response from a chatbot may still be unable to identify bias, protect student information, or design a learner-active task. Professional competence requires informed selection, verification, adaptation, and reflection.

Appropriate trust is also important. In a study of 508 K-12 teachers across six countries, Viberg et al. (2025) found that stronger AI understanding and self-efficacy were associated with greater perceived benefits, fewer concerns, and higher trust. The goal, however, is not unlimited trust. Teachers need calibrated trust: enough confidence to test useful applications and enough critical awareness to question generated material. Final responsibility for curriculum alignment, classroom interaction, and consequential assessment must remain with the teacher.

5 Pedagogical Ethical and Contextual Challenges

Reliability is one of the main barriers to responsible use. Generative AI can produce fluent statements that contain factual errors, invented references, inappropriate examples, or inconsistent feedback. In language teaching, output may also contain problems of register, collocation, pragmatic meaning, or cultural representation. Teachers should compare important information with reliable sources and review all learner-facing material. Fluency cannot serve as evidence of accuracy.

Privacy and data protection require particular care in schools because learners are minors. Teachers should not enter names, personal histories, identifiable student work, or sensitive assessment records into unapproved systems. They also need to understand how a platform stores or reuses data. UNESCO's guidance on generative AI recommends human agency, data protection, inclusion, and age-appropriate use (Miao & Holmes, 2023). These principles should be translated

into simple school rules that identify approved tools, prohibited information, disclosure expectations, and teacher responsibilities.

Academic integrity presents a related challenge. If students submit AI-generated text as their own, the teacher cannot determine what the learner can independently understand or produce. A complete ban may be difficult to enforce, while unrestricted use can reduce productive language practice. Assessment should therefore include visible processes such as planning notes, drafts, oral explanation, peer discussion, and revision records. Teachers can also ask students to identify errors in AI output, compare alternative responses, or justify which suggestions they accepted. These tasks make critical language use observable.

Equity and infrastructure also shape classroom practice. Stable internet, suitable devices, paid features, and high-quality support for local languages are not equally available. An activity that depends on individual access may disadvantage some learners. Teachers need alternative routes that allow participation without personal accounts or expensive subscriptions. Schools should evaluate the cost and accessibility of a tool before expecting teachers to use it.

Finally, AI can affect teacher agency. Ready-made content may save time, but repeated dependence on it can weaken teachers' own material-development skills or make pedagogical decisions less transparent. Nazim and Alzubi (2025) found concerns about professional autonomy, while Barghi et al. (2026) reported that non-users often lacked preparation rather than rejecting AI in principle. These findings indicate that schools should neither pressure teachers to adopt every new tool nor leave them to experiment without guidance.

6 Professional Development Needs

Professional development should begin with teaching problems rather than software demonstrations. A school may first identify where EFL teachers spend time, where learners need more support, and where existing materials are insufficient. Teachers can then examine whether AI offers an appropriate response. This sequence keeps pedagogy in control of technology and prevents training from becoming a list of rapidly changing tools.

A useful programme should develop four connected areas. First, teachers need foundational knowledge of how generative systems produce responses and why errors or bias occur. Second, they need practical prompting and evaluation strategies linked to EFL objectives. Third, they need ethical procedures for privacy, authorship, assessment, and disclosure. Fourth, they need opportunities to reflect on classroom evidence and improve their decisions. These areas align with Intelligent-TPACK and UNESCO's competency framework rather than with narrow technical training (Celik, 2023; Miao & Cukurova, 2024).

Subject-specific practice is essential. During training, teachers might adapt an AI-generated text to a target proficiency level, check a set of grammar examples, evaluate feedback on learner writing, or design a speaking task that preserves student-to-student interaction. They can compare the original output with their revised version and explain each change. This process makes professional judgement visible and provides a basis for peer feedback. It also shows that effective prompting cannot replace knowledge of language and pedagogy.

Training should be differentiated. Teachers who have never used AI need low-risk guided practice and clear explanations. Regular users may need deeper work on verification, assessment, learner dependence, and data protection. Teachers working with younger learners may require stricter safeguards and more teacher-mediated activities. School location, internet access, class size, and prior training should also influence programme design. A needs-sensitive approach is more useful than giving every teacher the same workshop.

Professional learning should continue after initial training. Teachers can work in small groups to plan one AI-supported activity, observe its use, collect learner work, and discuss what changed. A shared evaluation checklist can address accuracy, curriculum alignment, learner activity, privacy, accessibility, and evidence of learning. Rohmah and La Roiba (2026) reported improvements in Indonesian EFL teachers' knowledge, attitudes, and practices after structured AI training. Georgiou's (2026) study of pronunciation teaching also associated more extensive training with more frequent AI use and fewer concerns. These studies support sustained, applied professional learning.

Institutional support remains necessary. Schools should publish concise guidance, provide access to approved tools, protect time for collaborative learning, and clarify how AI may be used in assessment. Leaders should also create a reporting process for inaccurate, biased, or unsafe output. Such support allows teachers to experiment within clear boundaries and reduces inconsistent expectations across subjects or classes.

7 Principles for Responsible School Practice

Responsible AI-supported EFL teaching can be guided by a simple decision cycle. The teacher begins with a specific learning outcome and decides whether AI is necessary. The teacher then generates or selects content, verifies its language and factual quality, adapts it to the learners and curriculum, and designs an activity that requires students to think and communicate. During the lesson, the teacher monitors participation and makes AI use transparent. After the lesson, learner work and teacher reflection provide evidence for deciding whether the activity should be repeated, revised, or removed.

This cycle protects the central role of pedagogy. AI may assist with drafting, variation, or initial feedback, but the teacher determines the purpose and standard of the work. Students should know what assistance is permitted and how to acknowledge it. They should also learn that AI output is a claim to be evaluated, not an answer to be copied. In this form, AI literacy becomes part of language education and critical digital citizenship.

8 Conclusion

AI offers school EFL teachers useful support for planning, materials, differentiation, assessment, and feedback. Current research also shows a persistent gap between access and professional preparation. Teachers may use AI regularly while remaining uncertain about reliability, privacy, academic integrity, equity, and the limits of automated feedback. Positive attitudes alone cannot resolve these problems.

Effective integration depends on teachers' ability to connect AI functions with language-learning objectives, evaluate output, protect learners, and retain responsibility for pedagogical decisions. Professional development should therefore be practical, subject-specific, differentiated, collaborative, and supported by clear school policy. AI should remain a limited resource within teacher-designed instruction. Future research in emerging EFL contexts should examine classroom practices directly and evaluate how sustained professional learning changes teacher judgement and student language development.

OLIY TA'LIM MUASSASALARI PEDAGOGLARINING AXBOROT XAVFSIZLIGI KO'NIKMALARINI SHAKLLANTIRISHNING DOLZARB MASALALARI

Shahriyorov Ikrom Ibrohim o'g'li
Telefon raqami: +998 33 784-75-76
Elektron pochta: shahriyorovikrom6@gmail.com

Annotatsiya: *Ushbu maqolada oliy ta'lim muassasalari pedagoglarining axborot xavfsizligi ko'nikmalarini shakllantirishning dolzarb masalalari yoritilgan. Ta'lim tizimining raqamlashtirilishi natijasida pedagoglarning elektron ta'lim platformalari, axborot tizimlari, bulutli xizmatlar va turli raqamli resurslardan foydalanish ko'lami kengayib bormoqda. Bu esa pedagoglardan nafaqat raqamli texnologiyalardan samarali foydalanishni, balki axborot xavfsizligi talablariga rioya etishni ham talab qiladi. Maqolada pedagoglarning raqamli kompetensiyasi tarkibida axborot xavfsizligining o'rni, mazkur yo'nalishda uchrayotgan muammolar hamda axborot xavfsizligi ko'nikmalarini rivojlantirishning asosiy yo'llari tahlil qilingan. Pedagoglarning malakasini oshirish jarayonida nazariy bilimlarni amaliy mashg'ulotlar, muammoli vaziyatlar, keyslar va kasbiy faoliyatga yo'naltirilgan topshiriqlar bilan uyg'unlashtirish zarurligi asoslangan.*

Kalit so'zlar: *axborot xavfsizligi, pedagog kadrlar, raqamli kompetensiya, raqamli ta'lim, kiberxavfsizlik, axborot xavfsizligi ko'nikmalari, malaka oshirish.*

АКТУАЛЬНЫЕ ВОПРОСЫ ФОРМИРОВАНИЯ НАВЫКОВ ИНФОРМАЦИОННОЙ БЕЗОПАСНОСТИ У ПРЕПОДАВАТЕЛЕЙ ВЫСШИХ УЧЕБНЫХ ЗАВЕДЕНИЙ

Аннотация: *В статье рассматриваются актуальные вопросы формирования навыков информационной безопасности у преподавателей высших образовательных учреждений. Цифровизация системы образования расширяет использование электронных образовательных платформ, информационных систем, облачных сервисов и различных цифровых ресурсов. В этих условиях преподавателям необходимо не только эффективно использовать цифровые технологии, но и соблюдать требования информационной безопасности. Рассматривается место информационной безопасности в структуре цифровой компетентности преподавателей, анализируются существующие проблемы и основные направления развития соответствующих навыков.*

Ключевые слова: *информационная безопасность, педагогические кадры, цифровая компетентность, цифровое образование, кибербезопасность, навыки информационной безопасности, повышение квалификации.*

PRESSING ISSUES IN DEVELOPING INFORMATION SECURITY SKILLS AMONG HIGHER EDUCATION INSTITUTION EDUCATORS

Abstract: *This article examines current issues related to developing information security skills among higher education teachers. The digitalization of education has expanded the use of electronic learning platforms, information systems, cloud services, and various digital resources. Under these conditions, teachers need not only to use digital technologies effectively but also to comply with information security requirements. The article discusses the role of information security within teachers' digital competence, identifies major challenges, and examines key directions for developing relevant skills.*

Keywords: *information security, teaching staff, digital competence, digital education, cybersecurity, information security skills, professional development.*

Bugungi kunda raqamli texnologiyalarning jadal rivojlanishi ta'lim tizimining mazmuni va uni tashkil etish shakllariga sezilarli ta'sir ko'rsatmoqda. Oliy ta'lim muassasalarida elektron ta'lim platformalari, masofaviy ta'lim texnologiyalari, bulutli xizmatlar, elektron hujjat aylanishi va turli axborot tizimlaridan foydalanish pedagoglarning kundalik kasbiy faoliyatining ajralmas qismiga aylanib bormoqda.

Ta'lim jarayonining raqamlashtirilishi yangi imkoniyatlarni yaratish bilan bir qatorda axborot xavfsizligiga oid yangi vazifalarni ham yuzaga keltiradi. Pedagoglar o'z faoliyati davomida talabalar haqidagi ma'lumotlar, o'quv-uslubiy

materiallar, nazorat va baholash natijalari, xizmat hujjatlari hamda boshqa turdagi elektron axborotlar bilan ishlaydi. Mazkur ma'lumotlarning xavfsizligini ta'minlash pedagogning raqamli muhitdagi kasbiy faoliyati bilan bevosita bog‘ liq.

Shu sababli zamonaviy pedagogdan faqat raqamli texnologiyalardan foydalana olish emas, balki raqamli muhitda xavfsiz va mas'uliyatli faoliyat olib borish ham talab etiladi. Pedagoglarning axborot xavfsizligi bo‘ yicha bilim va ko‘ nikmalarini rivojlantirish ularning umumiy raqamli kompetensiyasini takomillashtirishning muhim yo‘ nalishlaridan biri hisoblanadi.

Raqamli kompetensiya pedagogning zamonaviy axborot-kommunikatsiya texnologiyalaridan kasbiy faoliyatida maqsadga muvofiq foydalanish qobiliyatini ifodalovchi muhim tushunchalardan biridir. Uning tarkibiga axborotni izlash va qayta ishlash, raqamli kontent yaratish, elektron kommunikatsiya vositalaridan foydalanish, ta'lim jarayonini raqamli vositalar yordamida tashkil etish hamda raqamli muhitda xavfsiz faoliyat olib borish kiradi.

O‘ zbekistonlik tadqiqotchi Sh.M.Adashboyev oliy ta'lim muassasalari pedagog kadrlarining raqamli kompetentligini rivojlantirish masalalarini tadqiq etib, pedagogik faoliyatda raqamli kompetensiyalarni rivojlantirishga qaratilgan ochiq onlayn kurs mazmunini ishlab chiqqan [1; 2]. Tadqiqotda "raqamli iz", "raqamli etika" va "raqamli xavfsizlik" kabi masalalarga e'tibor qaratilishi pedagogning raqamli kompetensiyasini rivojlantirishda xavfsizlik masalasining muhimligini ko‘ rsatadi.

E.M.Alkarovning tadqiqotlari pedagog kadrlarning uzluksiz kasbiy rivojlanishini axborot-kommunikatsiya texnologiyalari asosida tashkil etish va boshqarish masalalariga qaratilgan [3]. Shu bilan birga, raqamli kompetensiya bilan axborot xavfsizligi ko‘ nikmalarini to‘ liq bir xil tushuncha sifatida qabul qilish to‘ g‘ ri emas. Pedagog raqamli vositadan foydalanishni bilishi mumkin, biroq undan foydalanishda yuzaga keladigan xavflarni aniqlash va tegishli himoya choralarini qo‘ llash bo‘ yicha yetarli tayyorgarlikka ega bo‘ lmasligi mumkin.

Oliy ta'lim pedagoglari kundalik faoliyatida katta hajmdagi raqamli axborot bilan ishlaydi. Talabalarning shaxsiy ma'lumotlari, o‘ zlashtirish ko‘ rsatkichlari, nazorat natijalari, elektron topshiriqlar, ilmiy va o‘ quv-uslubiy materiallar shular jumlasidandir.

Bunday ma'lumotlardan foydalanish pedagogdan muayyan xavfsizlik talablariga rioya etishni talab qiladi. Jumladan, elektron hisob yozuvlarini himoyalash, ishonchli parollardan foydalanish, begona shaxslarga ma'lumotlarni taqdim etmaslik, shubhali elektron xabarlarni aniqlash, elektron hujjatlarning kirish huquqlarini to‘ g‘ ri boshqarish va shaxsga doir ma'lumotlar bilan ehtiyotkor ishlash muhim ahamiyatga ega. Demak, axborot xavfsizligini ta'minlashni faqat oliy ta'lim muassasasining texnik yoki axborot texnologiyalari bo‘ limi vazifasi sifatida qarash yetarli emas. Pedagog ham axborot xavfsizligini ta'minlash jarayonining bevosita ishtirokchisi hisoblanadi.

Pedagogning axborot xavfsizligiga oid nazariy bilimga ega bo‘ lishi uning real vaziyatda doimo xavfsiz harakat qilishini anglatmaydi. Xavfsizlik qoidalarini bilish bilan ularni kundalik faoliyatda qo‘ llash o‘ rtasida muayyan farq mavjud. Axborot xavfsizligi bo‘ yicha mashg‘ ulotlarning faqat nazariy shaklda tashkil qilinishi kutilgan natijani bermasligi mumkin. Pedagogga xavf turlari haqida ma'lumot berish bilan bir qatorda ularni amaliy vaziyatlarda aniqlash va to‘ g‘ ri qaror qabul qilishni mashq qildirish zarur. Pedagoglarning raqamli tayyorgarlik darajasi ham bir xil emas. Shu sababli axborot xavfsizligi bo‘ yicha o‘ qitishda tinglovchilarning boshlang‘ ich tayyorgarligini hisobga olish muhim. Mahalliy tadqiqotlarda raqamli kompetensiya, axborot kompetentligi va pedagoglarning raqamli tayyorgarligini rivojlantirish masalalariga e'tibor ortib bormoqda [1; 5]. Xorijiy tadqiqotlarda esa pedagoglarning aynan raqamli xavfsizlik bo‘ yicha kompetensiyalarini baholash va uning indikatorlarini aniqlashga alohida e'tibor qaratilgan [6; 7].

Pedagoglarning axborot xavfsizligi ko‘ nikmalarini rivojlantirishda nazariy va amaliy tayyorgarlikni o‘ zaro uyg‘ unlashtirish muhim hisoblanadi. Pedagog axborotning maxfiyligi, yaxlitligi va undan foydalanish imkoniyati, shaxsga doir ma'lumotlarni himoyalash, autentifikatsiya, zararli dasturlar, fishing va ijtimoiy muhandislik kabi tushunchalarni bilishi kerak.

Biroq mazkur bilimlarni o‘ zlashtirishning o‘ zi yetarli emas. Pedagog ularni kasbiy faoliyatida qo‘ llashni ham bilishi kerak. Shu sababli mashg‘ ulotlarda amaliy topshiriqlardan foydalanish maqsadga muvofiq. Masalan, pedagogga bir nechta elektron xabar namunalari taqdim etilib, ular orasidan shubhali xabarni aniqlash vazifasi berilishi mumkin. Keys metodidan foydalanish ham samarali hisoblanadi. Pedagogga real kasbiy faoliyatga yaqin vaziyat taqdim etilib, undan axborot xavfsizligi nuqtai nazaridan to‘ g‘ ri qaror qabul qilish talab qilinadi. Bunday mashg‘ ulotlar pedagoglarning nazariy bilimlarini real faoliyat bilan bog‘ lash imkonini beradi.

Pedagoglarning axborot xavfsizligi bo‘ yicha ko‘ nikmalarini rivojlantirishda malaka oshirish va uzluksiz kasbiy rivojlanish tizimi alohida ahamiyatga ega.

Sh.M.Adashboyev tomonidan pedagoglarning raqamli kompetentligini uzluksiz malaka oshirish tizimida rivojlantirish masalasining o‘ rganilishi [1], shuningdek, E.M.Alkarovning pedagog kadrlarning uzluksiz kasbiy rivojlanishini AKT asosida tashkil etishga oid tadqiqotlari [3] ushbu yo‘ nalishda uzluksizlik tamoyilining muhimligini ko‘ rsatadi. Axborot xavfsizligi sohasida uzluksiz rivojlanish ayniqsa muhim. Chunki raqamli texnologiyalar va ularga

bog‘ liq tahdidlar doimiy ravishda o‘ zgarib boradi. Shu sababli malaka oshirish kurslarida axborot xavfsizligi masalalarini bir martalik mavzu sifatida emas, muntazam yangilanib boradigan yo‘ nalish sifatida tashkil qilish maqsadga muvofiq.

Axborot xavfsizligi ko‘ nikmalarini shakllantirish faqat texnik harakatlarni o‘ rgatish bilan chegaralanmasligi kerak. Pedagogda xavfsizlikka nisbatan mas’uliyatli munosabat ham shakllanishi zarur. Pedagog nima sababdan kuchli parol ishlatishi, nima uchun talaba ma’lumotlarini himoya qilishi yoki nima sababdan shubhali faylni ochmasligi kerakligini tushunishi lozim. Xavfsizlik talabi shunchaki ma’muriy qoida sifatida qabul qilinsa, unga rioya qilish barqaror odatga aylanmasligi mumkin.

Pedagogning xavfsiz raqamli xulq-atvori talabalar uchun ham namuna vazifasini bajaradi. O‘ qituvchi o‘ z faoliyatida xavfsiz raqamli xulq-atvorni namoyish qilishi orqali talabalarning raqamli madaniyatiga ham bilvosita ta’sir ko‘ rsatadi.

XULOSA

Oliy ta’lim tizimining raqamlashtirilishi pedagoglarning kasbiy faoliyatida axborot xavfsizligining ahamiyatini oshirmoqda. Zamonaviy pedagog raqamli texnologiyalardan foydalanish bilan bir qatorda o‘ zining, talabalar va ta’lim muassasasining axborot resurslariga mas’uliyat bilan munosabatda bo‘ lishi zarur.

Pedagoglarda axborot xavfsizligi ko‘ nikmalarini shakllantirish ularning raqamli kompetensiyasini rivojlantirishning muhim tarkibiy qismi hisoblanadi. Bunda axborot xavfsizligini faqat texnik bilimlar majmui sifatida emas, pedagogning kasbiy faoliyatida namoyon bo‘ ladigan bilim, amaliy ko‘ nikma va mas’uliyatli munosabat birligi sifatida qarash maqsadga muvofiq. Pedagoglarning malakasini oshirish jarayonida nazariy mashg‘ ulotlar bilan bir qatorda amaliy topshiriqlar, keyslar, muammoli vaziyatlar va real kasbiy faoliyatga yaqin mashqlardan foydalanish tavsiya etiladi. Axborot xavfsizligi bo‘ yicha tayyorgarlik bir martalik tadbir emas, balki pedagogning uzluksiz kasbiy rivojlanishining tarkibiy qismi bo‘ lishi lozim.

YUQORI SINF O‘ QUVCHILARIDA REFLEKSIV QAROR QABUL QILISH KOMPETENSIYASINI BAHOLASH MEZONLARI VA INDIKATORLARI

Temirova Oydina Muhiddinova,
Namangan davlat universiteti mustaqil tadqiqotchisi
e-mail: temirova@gmail.com

Annotatsiya: *Maqolada yuqori sinf o‘ quvchilarida axloqiy dilemmalar asosida refleksiv qaror qabul qilish kompetensiyasini baholashning mezonlari, indikatorlari va diagnostik vositalari nazariy-metodik jihatdan asoslanadi. Tadqiqotning maqsadi mazkur kompetensiyaning tarkibiy tuzilmasiga mos baholash tizimini ishlab chiqishdan iborat. Nazariy tahlil, qiyosiy tahlil, tizimlashtirish, modellashtirish va ekspert yondashuvlariga tayangan holda kompetensiyaning kognitiv, motivatsion-qadriyatli, kommunikativ va refleksiv-amaliy komponentlari ajratildi. Ularga mos ravishda kognitiv-tahliliy, motivatsion-qadriyatli, kommunikativ-dialogik va refleksiv-amaliy mezonlar belgilandi. Har bir mezon bo‘ yicha kuzatiladigan indikatorlar, ustuvor diagnostik vositalar hamda yuqori, o‘ rta va past shakllanganlik darajalarining tavsiflari ishlab chiqildi. Taklif etilgan tizim axloqiy dilemma vaziyatida o‘ quvchining faqat yakuniy tanlovini emas, balki muammoni anglash, dalillarni baholash, qadriyatlarga tayanish, boshqa pozitsiyalarni hisobga olish, qaror oqibatlarini tahlil qilish va yangi dalillar asosida o‘ z pozitsiyasini qayta ko‘ rib chiqish jarayonini kompleks baholash imkonini beradi.*

Kalit so‘ zlar: *refleksiv qaror qabul qilish, kompetensiya, axloqiy dilemma, baholash mezoni, indikator, diagnostika, refleksiya, qadriyat, dialog, yuqori sinf o‘ quvchilari.*

CRITERIA AND INDICATORS FOR ASSESSING REFLECTIVE DECISION-MAKING COMPETENCE IN HIGH SCHOOL STUDENTS

Abstract: *This article provides a theoretical and methodological substantiation of the criteria, indicators, and diagnostic tools for assessing reflective decision-making competence based on moral dilemmas among upper secondary school students. The aim of the study is to develop an assessment system aligned with the structural components of this competence. Drawing on theoretical analysis, comparative analysis, systematization, modeling, and expert approaches, the cognitive, motivational-value, communicative, and reflective-practical components of the competence were identified. Accordingly, cognitive-analytical, motivational-value, communicative-dialogical, and reflective-practical assessment criteria were established. For each criterion, observable indicators, priority diagnostic tools, and descriptions of high, medium, and low levels of competence development were elaborated. The proposed system enables a comprehensive assessment not only of the student’s final choice in a moral dilemma situation, but also of the processes of understanding the problem, evaluating arguments, relying on values, considering alternative perspectives, analyzing the consequences of decisions, and revising one’s position in light of new evidence.*

Keywords: *reflective decision-making, competence, moral dilemma, assessment criterion, indicator, diagnostics, reflection, values, dialogue, upper secondary school students.*

КРИТЕРИИ И ПОКАЗАТЕЛИ ОЦЕНКИ КОМПЕТЕНТНОСТИ СТАРШЕКЛАССНИКОВ В ПРИНЯТИИ РЕФЛЕКСИВНЫХ РЕШЕНИЙ

Аннотация: *В статье теоретически и методически обоснованы критерии, индикаторы и диагностические инструменты оценки компетентности рефлексивного принятия решений на основе моральных дилемм у учащихся старших классов. Цель исследования заключается в разработке системы оценивания, соответствующей структурным компонентам данной компетентности. На основе теоретического и сравнительного анализа, систематизации, моделирования и экспертного подхода выделены когнитивный, мотивационно-ценностный, коммуникативный и рефлексивно-практический компоненты компетентности. В соответствии с ними определены когнитивно-аналитический, мотивационно-ценностный, коммуникативно-диалогический и рефлексивно-практический критерии оценивания. По каждому критерию разработаны наблюдаемые индикаторы, приоритетные диагностические инструменты, а также характеристики высокого, среднего и низкого уровней сформированности компетентности. Предложенная система позволяет комплексно оценивать не только итоговый выбор учащегося в ситуации моральной*

дилеммы, но и процесс осмысления проблемы, оценки аргументов, опоры на ценности, учёта альтернативных позиций, анализа последствий принятого решения и пересмотра собственной позиции на основе новых аргументов.

Ключевые слова: *рефлексивное принятие решений, компетентность, моральная дилемма, критерий оценивания, индикатор, диагностика, рефлексия, ценности, диалог, учащиеся старших классов.*

KIRISH (INTRODUCTION)

Zamonaviy ta’limda o‘ quvchining tayyor axloqiy me’yorlarni bilishi bilan bir qatorda murakkab va ziddiyatli vaziyatlarda dalillangan, qadriyatlarga asoslangan hamda oqibatlari anglangan qaror qabul qila olishi muhim natija sifatida qaralmoqda. Ayniqsa yuqori sinf davrida o‘ quvchi turli nuqtayi nazarlar, manfaatlar va qadriyatlar to‘ qnashadigan vaziyatlarga duch keladi. Bunday sharoitda qarorning refleksivligi – shaxsning o‘ z fikrlash jarayonini tahlil qilishi, dalillarni qayta baholashi va zarur bo‘ lsa o‘ z pozitsiyasini asosli ravishda qayta ko‘ rib chiqishi bilan belgilanadi.

King va Kitchenerning Reflective Judgment Modeli noaniq va to‘ liq strukturallanmagan muammolar yuzasidan hukm chiqarishda dalil, bilimning ishonchliligi va qarorni asoslash usullarining rivojlanishini tushuntiradi. Mazkur modelda yuqori darajadagi refleksiv fikrlash mavjud dalillarni baholash, kontekstni hisobga olish va yangi ma’lumotlar paydo bo‘ lganda qarorni qayta ko‘ rib chiqishga tayyorlik bilan tavsiflanadi [1–3]. Axloqiy rivojlanish nazariyalarida esa axloqiy dilemma o‘ quvchining axloqiy mulohazasi va qarorni asoslash usullarini namoyon etuvchi samarali pedagogik vaziyat sifatida qaraladi [4–6].

Shu bilan birga, refleksiv qaror qabul qilish kompetensiyasini baholashda faqat to‘ g‘ ri yoki noto‘ g‘ ri javobga, yoxud yakuniy tanlovga tayanish yetarli emas. Baholash o‘ quvchining muammoni anglash va tahlil qilishini, qadriyatlarga asoslangan ichki motivatsiyasini, dialogik muloqotdagi pozitsiyasini hamda qaror va uning oqibatlarini refleksiv qayta baholash qobiliyatini bir butun jarayon sifatida qamrab olishi lozim. Mazkur holat refleksiv qaror qabul qilish kompetensiyasiga mos mezonlar, kuzatiladigan indikatorlar va diagnostik vositalar tizimini ishlab chiqish zaruratini yuzaga keltiradi.

Tadqiqotning maqsadi – yuqori sinf o‘ quvchilarida axloqiy dilemmalar asosida refleksiv qaror qabul qilish kompetensiyasining tarkibiy tuzilmasiga mos baholash mezonlari, indikatorlari, diagnostik vositalari va shakllanganlik darajalarini nazariy-metodik jihatdan asoslash.

TADQIQOT METODOLOGIYASI (METHODS)

Tadqiqot nazariy-metodik xarakterga ega bo‘ lib, unda pedagogik va psixologik manbalarni nazariy tahlil qilish, qiyosiy tahlil, tizimlashtirish, modellashtirish va mezon-indikatorlarni mazmuniy muvofiqlashtirish usullaridan foydalanildi. Refleksiv hukm va qarorni asoslashning nazariy tayanchi sifatida King va Kitchenerning refleksiv hukm modeli [1–3], metakognitiv monitoringga oid qarashlar [7], axloqiy mulohaza va axloqiy harakatning tarkibiy mexanizmlarini izohlovchi yondashuvlar [4–6; 8] hamda refleksiv o‘ rganish konsepsiyalari [9] tahlil qilindi.

Baholash tizimini ishlab chiqishda uchta metodik talab asos qilib olindi: birinchidan, mezon kompetensiyaning muayyan komponentiga bevosita mos bo‘ lishi; ikkinchidan, indikator o‘ quvchi faoliyatida kuzatilishi yoki topshiriq orqali aniqlanishi mumkin bo‘ lgan xatti-harakatni ifodalashi; uchinchidan, bitta diagnostik vositaga qaramlikni kamaytirish uchun bir nechta ma’lumot manbalaridan foydalanish. Shu asosda axloqiy dilemma, keys-topshiriq, reflektiv esse, suhbat, kuzatuv, guruhiy muhokama, ekspert baholash, reflektiv kundalik va “Besh barmoq” refleksiyasi kabi vositalarning mezonlar bilan funksional muvofiqligi belgilandi.

Mazkur maqolada empirik tajriba-sinov natijalari keltirilmaydi. Natijalar bo‘ limida muallif tomonidan ishlab chiqilgan baholash konstruksiyasining nazariy-metodik natijalari taqdim etiladi.

NATIJALAR (RESULTS)

Nazariy tahlil natijasida refleksiv qaror qabul qilish kompetensiyasi o‘ zaro bog‘ liq to‘ rtta komponentning integrativ birligi sifatida tavsiflandi: kognitiv, motivatsion-qadriyatli, kommunikativ va refleksiv-amaliy. Ushbu komponentlarga mos ravishda to‘ rtta baholash mezoni ishlab chiqildi: kognitiv-tahliliy, motivatsion-qadriyatli, kommunikativ-dialogik va refleksiv-amaliy.

1-jadval.

Refleksiv qaror qabul qilish kompetensiyasining mezonlari, indikatorlari va diagnostik vositalari

Komponent	Mezon	Asosiy indikatorlar	Ustuvor diagnostik vositalar

Kognitiv komponent	**Kognitiv-tahliliy mezon**	Axloqiy muammoni aniqlaydi; sabab-oqibat aloqalarini tahlil qiladi; dalillarning ishonchliligi va ahamiyatini baholaydi; muqobil yechimlarni ishlab chiqadi va qiyoslaydi; qarorini dalillar bilan asoslaydi.	Axloqiy dilemma; keys-topshiriq; reflektiv esse.
Motivatsion-qadriyatli komponent	**Motivatsion-qadriyatli mezon**	Adolat, vijdon, halollik va insonparvarlik kabi qadriyatlarga tayanadi; axloqiy tanlovga ichki motivatsiya namoyon qiladi; qarori uchun mas'uliyatni his qiladi; boshqalarning huquq va manfaatlarini hisobga oladi.	Dilemma topshirig' i; suhbat; pedagogik kuzatuv.
Kommuni-kativ komponent	**Kommuni-kativ-dialogik mezon**	O' z fikrini aniq va izchil ifodalaydi; fikrini dalillaydi; boshqa pozitsiyalarni tinglaydi va hurmat qiladi; savol va qarshi dalillarga munosabat bildiradi; munozara va hamkorlikda faol ishtirok etadi.	Kuzatuv; guruhiy muhokama; debat; ekspert baholash.
Refleksiv-amaliy komponent	**Refleksiv-amaliy mezon**	Mustaqil qaror qabul qiladi; qarorning ehtimoliy oqibatlarini baholaydi; o' z qarorining asoslarini tahlil qiladi; xato va cheklovlarni aniqlaydi; yangi dalillar asosida qarorini qayta ko' rib chiqadi yoki uni saqlab qolish sababini asoslaydi.	Reflektiv kundalik; "Besh barmoq" refleksiyasi; esse; reflektiv suhbat.

Kognitiv-tahliliy mezon o' quvchining axloqiy vaziyatni intellektual qayta ishlash darajasini ifodalaydi. Bunda axloqiy muammoni tanib olishning o' zi yetarli hisoblanmaydi; o' quvchi sabab va oqibatlarni ajratishi, dalillarning kuchini qiyoslashi, kamida bir nechta muqobil yechimni ko' ra olishi va tanlangan qarorni asoslay olishi zarur. Shu sababli mazkur mezonni baholashda ochiq javobli dilemma va keys-topshiriqlar yopiq testlarga nisbatan ko' proq diagnostik axborot beradi.

Motivatsion-qadriyatli mezon qarorning qanday qadriyatlarga tayanganini va o' quvchining axloqiy tanlovga ichki munosabatini aniqlashga xizmat qiladi. Bu mezonda o' quvchining faqat "to' g' ri" qadriyatni nomlashi emas, balki manfaatlar to' qnashuvida adolat, vijdon, halollik, mas'uliyat va insonparvarlikni qaror asosiga aylantira olishi muhimdir.

Kommunikativ-dialogik mezon refleksiv qarorning ijtimoiy tabiatini aks ettiradi. Axloqiy dilemma ko' pincha yagona va mutlaq yechimga ega bo' lmagani uchun o' quvchining o' z pozitsiyasini dalillashi, boshqa nuqtayi nazarlarni tinglashi, qarshi dalillarni tahlil qilishi va hamkorlikdagi muhokamada qatnashishi kompetensiyaning muhim ko' rsatkichi hisoblanadi.

Refleksiv-amaliy mezon baholash tizimining yakunlovchi qismi bo' lib, o' quvchining qaror qabul qilishdan keyingi tahliliy faoliyatini ham qamrab oladi. Bunda qarorni o' zgartirishning o' zi yuqori refleksivlik belgisi sifatida baholanmaydi. O' quvchi yangi dalillarni ko' rib chiqib, avvalgi pozitsiyasini saqlab qolishi mumkin; agar u buni asosli izohlasa, oqibatlarni qayta baholasa va o' z qarorining cheklovlarini anglay olsa, bu ham yuqori darajadagi refleksiv faoliyatni ko' rsatadi.

Shakllanganlik darajalarini baholash

Mezon va indikatorlar asosida kompetensiyaning uchta shakllanganlik darajasi – yuqori, o' rta va past darajalar belgilandi. Darajalarni aniqlashda alohida indikatorlarning mexanik yig' indisidan ko' ra, ularning barqarorligi, mustaqilligi, dalillanganligi va turli axloqiy vaziyatlarga ko' chira olinishi muhim deb qaraladi.

Mezon	**Yuqori daraja**	**O' rta daraja**	**Past daraja**
Kognitiv-tahliliy	Muammoni mustaqil aniqlaydi, sabab-oqibatlarni chuqur tahlil qiladi, dalillarni qiyosiy baholaydi, muqobil yechimlarni ishlab chiqadi va qarorini asoslaydi.	Muammoni anglaydi va qaror qabul qiladi, biroq dalillar, muqobil yechimlar yoki oqibatlarni tahlil qilishda qisman yordamga ehtiyoj sezadi.	Muammoni aniqlash, dalillarni baholash va muqobil yechimlarni ishlab chiqishda qiynaladi; qarori yetarli asoslanmaydi.

Motivatsion-qadriyatli	Qarorini barqaror axloqiy qadriyatlar asosida mustaqil asoslaydi, mas'uliyatni anglaydi va boshqalarning manfaatlarini hisobga oladi.	Qadriyatli munosabat mavjud, biroq manfaatlar to‘ qnashuvida tanlov va mas'uliyatni asoslash barqaror emas.	Qadriyatli asoslash va ichki motivatsiya sust; shaxsiy manfaat ustun keladi yoki qarorning axloqiy oqibatlari yetarli anglanmaydi.
Kommuni-kativ-dialogik	Fikrini aniq va dalillangan ifodalaydi, boshqa pozitsiyalarni faol tinglaydi, qarshi dalillarga asosli javob beradi va hamkorlikni qo‘ llab-quvvatlaydi.	Fikrini ifodalaydi va boshqa pozitsiyalarni qisman hisobga oladi, biroq dalillash yoki dialogdagi faollik yetarlicha barqaror emas.	Fikrini asoslashda qiynaladi, boshqa pozitsiyalarni tinglash va hisobga olish, munozara va hamkorlik ko‘ nikmalari sust.
Refleksiv-amaliy	Qarorni mustaqil qabul qiladi, oqibatlarni chuqur baholaydi, o‘ z fikrlashini tahlil qiladi va yangi dalillar asosida pozitsiyasini asosli ravishda qayta ko‘ rib chiqadi yoki saqlab qoladi.	Qaror va uning oqibatlarini tahlil qiladi, refleksiya mavjud, biroq o‘ z xatolari, cheklovlari yoki yangi dalillarning ta'sirini chuqur baholashda yordamga ehtiyoj sezadi.	Qaror oqibatlarini baholash, o‘ z fikrini tahlil qilish va yangi dalillar asosida pozitsiyasini qayta ko‘ rib chiqishda qiynaladi.

MUHOKAMA (DISCUSSION)

Taklif etilgan baholash tizimining asosiy xususiyati refleksiv qaror qabul qilishni faqat kognitiv natija sifatida emas, balki bilish, qadriyat, dialog va refleksiv harakatning integrativ birligi sifatida baholashidadir. King va Kitchener tadqiqotlarida refleksiv hukmning markaziy belgilaridan biri dalillarga tayangan holda hukm chiqarish va yangi ma'lumotlar paydo bo‘ lganda uni qayta ko‘ rib chiqishga tayyorlik ekanligi ko‘ rsatiladi [1–3]. Bu yondashuv ishlab chiqilgan kognitiv-tahliliy va refleksiv-amaliy mezonlarning nazariy asosini mustahkamlaydi.

Biroq axloqiy qaror oddiy epistemik hukmdan kengroq bo‘ lib, unda qadriyat, mas'uliyat, boshqa shaxslarning manfaatlari va muloqot ham ishtirok etadi. Shu sababli baholash tizimiga motivatsion-qadriyatli va kommunikativ-dialogik mezonlarning kiritilishi refleksiv hukm konsepsiyasini axloqiy-tarbiyaviy kontekstga moslashtirish imkonini beradi. Rest va Narvaezga tayanuvchi axloqiy harakat modellari ham axloqiy xatti-harakatning faqat mulohaza bilan cheklanmasligini, axloqiy sezgirlik, motivatsiya va amalga oshirish jarayonlari bilan bog‘ liqligini ko‘ rsatadi [6; 8].

Diagnostik jihatdan bir nechta vositadan foydalanish alohida ahamiyatga ega. Refleksiv qaror murakkab konstrukt bo‘ lgani sababli faqat test natijasi o‘ quvchining dalillash, qadriyatli tanlov, dialog va o‘ z qarorini qayta tahlil qilish jarayonlarini to‘ liq ko‘ rsatmaydi. Shu bois dilemma va keys-topshiriqlar kognitiv tahlilni, kuzatuv va guruhiy muhokama kommunikativ xulqni, suhbat qadriyatli motivatsiyani, reflektiv kundalik va reflektiv esse esa o‘ z-o‘ zini tahlil qilish jarayonini aniqlashda o‘ zaro to‘ ldiruvchi vositalar sifatida qo‘ llanishi maqsadga muvofiq.

Taklif etilgan mezon-indikator tizimi "Tarbiya" fanida axloqiy dilemmalar bilan ishlash jarayonida boshlang‘ ich diagnostika, joriy monitoring va yakuniy baholashni bir xil konseptual asosda tashkil etishga imkon beradi. Shu bilan birga, mazkur maqola nazariy-metodik bosqich natijalarini ifodalaganligi sababli indikatorlarning empirik validligi, mezonlararo bog‘ liqlik, ekspertlararo kelishuv va baholash shkalasining ishonchliligini keyingi tajriba-sinov tadqiqotlarida statistik jihatdan tekshirish zarur.

XULOSA (CONCLUSION)

Tadqiqot natijasida yuqori sinf o‘ quvchilarida refleksiv qaror qabul qilish kompetensiyasini baholashning komponent–mezon–indikator–diagnostik vosita–daraja zanjiriga asoslangan yaxlit tizimi ishlab chiqildi. Kognitiv komponent uchun kognitiv-tahliliy, motivatsion-qadriyatli komponent uchun motivatsion-qadriyatli, kommunikativ komponent uchun kommunikativ-dialogik, refleksiv-amaliy komponent uchun refleksiv-amaliy mezon belgilandi.

Har bir mezonning kuzatiladigan indikatorlar orqali konkretlashtirilishi baholashni umumiy tavsiflardan amaliy diagnostik faoliyatga o‘ tkazadi. Baholashda o‘ quvchining yakuniy tanlovidan ko‘ ra, qarorga olib kelgan tahlil, qadriyatli asos, dialog, oqibatlarni anglash va refleksiv qayta ko‘ rib chiqish jarayonlariga ustuvor ahamiyat berilishi lozim.

Taklif etilgan tizim “Tarbiya” fanida axloqiy dilemmalar asosidagi mashg‘ ulotlarning diagnostik ta’minotini kuchaytirishi, o‘ quvchining rivojlanish dinamikasini kuzatish va pedagogik korreksiyani maqsadli tashkil etish uchun metodik asos bo‘ lib xizmat qilishi mumkin. Keyingi bosqichda mezon va indikatorlarning empirik validligi tajriba va nazorat guruhlari natijalari asosida tekshirilishi maqsadga muvofiq.

ADABIYOT DARSLARIDA HAMKORLIKKA ASOSLANGAN TA'LIM TEXNOLOGIYALARIDAN FOYDALANISH METODIKASI

Radjabova Inobat Ravshanovna
Qarshi davlat universiteti Pedagogika kafedrasi dotsenti
E-mail: radjabovainobar@gmail.com

Annotatsiya: *Maqolada adabiyot darsida hamkorlikni badiiy matnni dalillar asosida talqin qilish bilan bog‘ lash masalasi o‘ rganiladi. Nazariy manbalar tahlili asosida individual mutolaa, guruh muhokamasi va mustaqil yozma xulosani birlashtiruvchi metodik ketma-ketlik taklif etiladi. Topshiriq tuzish, rollarni almashtirish va o‘ quvchining shaxsiy hissasini baholash shartlari aniqlashtiriladi. Ish nazariy-metodik xususiyatga ega; takliflar tajriba orqali tekshirishni talab qiladi.*

Kalit so‘ zlar: *adabiy ta'lim, hamkorlikda o‘ qitish, badiiy talqin, matniy dalil, guruh muhokamasi, individual baholash.*

МЕТОДИКА ИСПОЛЬЗОВАНИЯ ТЕХНОЛОГИЙ ОБУЧЕНИЯ В СОТРУДНИЧЕСТВЕ НА УРОКАХ ЛИТЕРАТУРЫ

Аннотация: *Рассматривается организация сотрудничества при интерпретации художественного текста. На основе анализа научной литературы предлагается последовательность, объединяющая индивидуальное чтение, групповое обсуждение и самостоятельный письменный вывод. Уточняются требования к заданиям, смене ролей и оценке личного вклада ученика. Работа носит теоретико-методический характер; предложенные решения нуждаются в эмпирической проверке.*

Ключевые слова: *литературное образование, обучение в сотрудничестве, интерпретация, текстовые доказательства, обсуждение, индивидуальное оценивание.*

METHODS OF USING COOPERATIVE LEARNING TECHNOLOGIES IN LITERATURE LESSONS

Abstract: *This conceptual paper examines how cooperative learning can support evidence-based literary interpretation. A teaching sequence links individual reading, structured group discussion and independent written conclusions. It specifies task design, rotating roles and the assessment of individual contributions. The proposed approach distinguishes participation from interpretive achievement and requires empirical validation before claims about effectiveness can be made.*

Keywords: *literature education, cooperative learning, literary interpretation, textual evidence, group discussion, individual assessment.*

KIRISH

Adabiyot darsida bir asar yuzasidan turli fikrlarning tug‘ ilishi tabiiy. Muammo bu fikrlarning mavjudligida emas, ularning matn bilan qanchalik asoslanishidadir. O‘ quvchi qahramonni yoqtirishi yoki uning xatti-harakatini ma'qullamasligi mumkin, biroq shaxsiy taassurotni badiiy talqinga aylantirish uchun tafsilot, nutq, tasvir va voqealar o‘ rtasidagi aloqani ko‘ rsatishi kerak. Hamkorlikda o‘ qitish shu o‘ tishni tashkil etuvchi vosita bo‘ la oladi.

Guruhga bo‘ lishning o‘ zi adabiy tahlilni chuqurlashtirmaydi. Ba'zan umumiy javobni bir o‘ quvchi tuzadi, qolganlar esa uni takrorlaydi. Bunday holatda tayyor taqdimot jamoaviy mehnat mahsuli bo‘ lib ko‘ rinsa-da, har bir ishtirokchining asarni tushunganini bildirmaydi. Mazkur maqolaning maqsadi hamkorlikning tashkiliy shakllarini badiiy matn bilan ishlash vazifalariga moslashtirish va individual o‘ zlashtirishni ko‘ rinadigan qilishdir. Tahlil umumiy o‘ rta ta'limning 7–9-sinflaridagi nasriy asarlar muhokamasiga yo‘ naltirilgan.

ADABIYOTLAR TAHLILI

R. Gillies hamkorlikda o‘ qitishni umumiy maqsadga yo‘ naltirilgan birgalikdagi faoliyat sifatida yoritib, uning samarasi topshiriq tuzilishi va o‘ qituvchining rahbarligiga bog‘ liqligini ko‘ rsatadi [1]. Bu yondashuv adabiyot darsi uchun muhim: bir stol atrofida o‘ tirish o‘ quvchilar fikrining o‘ zaro rivojlanishini hali ta'minlamaydi. D. Johnson va R. Johnsonning ijtimoiy o‘ zaro bog‘ liqlik nazariyasiga doir tahlili umumiy natijaga intilish bilan shaxsiy javobgarlikni birga ko‘ rishga asos beradi [2].

P. Murphy va hammualliflar matn muhokamasiga oid tadqiqotlar meta-tahlilida o‘ quvchi nutqi, matnni tushunish va fikrlash natijalarini alohida ko‘ rib chiqadilar [3]. Bundan mazkur ish uchun muhim metodik xulosa kelib chiqadi: darsdagi gapirish faolligini talqin sifati bilan tenglashtirish mumkin emas. O‘ quvchi ko‘ p gapirib, matndan uzoqlashishi yoki qisqa javobda muhim badiiy aloqani ochishi mumkin.

P. Black va D. Wiliamning shakllantiruvchi baholashga oid tadqiqoti o‘ quvchining joriy tushunishini aniqlash va keyingi o‘ qitishni shu ma’lumot asosida moslashtirishga e’tibor qaratadi [4]. Ko‘ rib chiqilgan manbalar hamkorlik, muhokama va baholashning umumiy asoslarini beradi. Ushbu maqolada ular adabiy talqinning o‘ ziga xos talabi — fikrni badiiy matn orqali asoslash — atrofida birlashtiriladi. Taklif etilayotgan yechim alohida yangi texnologiya da’vosi emas, mavjud yondashuvlarning fan mazmuniga mos metodik sintezidir.

TADQIQOT METODOLOGIYASI

Ish maqsadli tanlangan to‘ rtta ilmiy manbaning nazariy-qiyosiy tahlili va dars jarayonini pedagogik modellashtirishga asoslanadi. Manbalar hamkorlik mexanizmi, matn muhokamasi hamda baholash bilan bevosita bog‘ liqligi bo‘ yicha tanlandi. Bu qamrovli tizimli sharh emas. Tahlil birliklari sifatida topshiriqning maqsadi, o‘ quvchilar o‘ rtasidagi bog‘ liqlik, individual javobgarlik va kuzatiladigan o‘ quv mahsuli olindi.

Avval manbalardagi umumiy tamoyillar ajratildi, so‘ ng ular adabiy tahlil vazifalariga moslashtirildi. Yakunda dars ketma-ketligi va baholash mezonlari ishlab chiqildi. Empirik ma’lumot yig‘ ilmagani sababli natija deganda metodik loyiha tushuniladi; o‘ zlashtirishning oshishi yoki usulning boshqa usullardan ustunligi haqida statistik da’vo bildirilmaydi.

TAHLIL VA NATIJALAR

Taklifning markazida «shaxsiy fikr — matniy dalil — muqobil talqin — qayta yozilgan xulosa» ketma-ketligi turadi. Guruh ishining vazifasi dastlabki fikrni yo‘ qotib, bitta javobga bo‘ ysundirish emas, uning asosini tekshirishdir. Shu sababli muhokamadan oldin har bir o‘ quvchi qisqa javob yozadi; muhokamadan keyin esa xulosasini mustaqil ravishda qayta tuzadi. Ikki matnni solishtirish fikrning qaysi jihati o‘ zgarganini ko‘ rsatadi.

Birinchi shart — munozaraga ochiq, ammo matn bilan chegaralangan savol. «Asar sizga yoqdimi?» savoli taassurot almashishga xizmat qiladi. «Qahramonning qarorini uning avvalgi xatti-harakati tasdiqlaydimi yoki inkor etadimi?» savoli esa voqealar orasidagi aloqani izlashga undaydi. O‘ qituvchi o‘ quvchilardan kamida ikki dalil va ulardan biriga muqobil izoh topishni so‘ rashi mumkin. Dalilning ko‘ pligi emas, xulosaga aloqadorligi asosiy talab bo‘ lib qoladi.

Ikkinchi shart — rollarning fikrlash vazifasiga xizmat qilishi. To‘ rt kishilik guruhda dalil izlovchi tegishli parchani belgilaydi, talqin qiluvchi uning mazmunini tushuntiradi, savol beruvchi izohdagi noaniqlikni ko‘ rsatadi, umumlashtiruvchi kelishilgan va ochiq qolgan fikrlarni yozadi. Keyingi topshiriqda rollar almashadi. O‘ quvchini doim yozuvchi yoki taqdimotchi qilib qo‘ yish ayrim faoliyatlarni uning imkoniyatidan tashqarida qoldirishi mumkin.

45 daqiqalik dars uchun quyidagi taqsimot taklif etiladi: muammo va mezonlarni belgilashga 5, individual qayta o‘ qish va dastlabki javobga 7, guruh tahliliga 12, guruhlararo savol-javobga 8, mustaqil xulosaga 8, yakuniy refleksiyaga 5 daqiqa. Bu qat’iy me’yor emas. Asar oldindan o‘ qilmagan bo‘ lsa, mazkur taqsimot mos kelmaydi; avval matnni tushunish va zarur so‘ zlarni izohlashga vaqt ajratiladi.

Metodik vaziyat sifatida qahramonning yordam berish yoki chetda turish orasidagi tanlovini ifodalovchi nasriy epizodni olaylik. O‘ qituvchi aniq asardan yoshga mos parchani tanlaydi. Bir o‘ quvchi qarorni ehtiyotkorlik, ikkinchisi loqaydlik deb talqin qilishi mumkin. Muhokamada «Qaysi jumla bunday xulosaga olib keldi?», «Hikoyachining bahosi bilan qahramonning o‘ zini oqlashi bir xilmi?» kabi savollar beriladi. Bu muallif tomonidan tuzilgan topshiriq namunasi bo‘ lib, real sinf kuzatuvi sifatida taqdim etilmaydi.

Guruhlararo muloqotda har bir guruh bir xulosa va uni cheklovchi bir savolni taqdim etadi. Ikkinchi guruh avval eshitgan fikrni o‘ z so‘ zi bilan qaytaradi, keyin unga munosabat bildiradi. Bunday tartib bahsni darhol rad etishdan boshlamaslikka yordam berishi mumkin. O‘ qituvchi tayyor talqinni aytishdan oldin dalilning o‘ rnini, hikoyachi nuqtayi nazarini yoki qarama-qarshi tafsilotni aniqlashtiradi. Matnga zid fakt xatosi esa ochiq tuzatiladi.

Baholash ikki yo‘ nalishda olib boriladi. Adabiy tahlil bo‘ yicha matniy dalilning aniqligi, dalil va xulosa aloqasi, muqobil talqinni ko‘ rib chiqish baholanadi. Hamkorlik bo‘ yicha sherik fikrini tinglash, mazmunli savol berish va vazifaga hissa qo‘ shish kuzatiladi. Har bir mezon uchun «hali namoyon bo‘ lmadi», «ko‘ mak bilan namoyon bo‘ ldi», «mustaqil namoyon bo‘ ldi» tavsiflari qo‘ llanishi mumkin. Bu tavsiflar validatsiyadan o‘ tgan test emas, o‘ qituvchi qaydlarini tartibga soluvchi taklifdir.

Individual yakuniy yozuvda o‘ quvchi dastlabki qarashi, uni tasdiqlagan yoki o‘ zgartirgan dalil hamda ochiq qolgan savolni ko‘ rsatadi. Guruh taqdimotining ravonligi uning shaxsiy bahosini avtomatik belgilamaydi. Masalan, og‘ zaki tortinchoq o‘ quvchining asosli yozma talqini yuqori adabiy tushunishni ko‘ rsatishi mumkin. Aksincha, faol taqdimotchining dalilsiz xulosasi qo‘ shimcha ishlashni talab qiladi.

Tatbiqda uchta cheklov e’tiborga olinadi. O‘ qish sur’ati farqli sinfda qisqartirilgan tayanch parcha va oldindan lug‘ at tayyorlanadi. Yetakchi o‘ quvchi boshqalarning javobini egallab olganda avval yozish, keyin navbat bilan fikr

bildirish tartibi kiritiladi. Guruhlar bir-birining xulosasini takrorlaganda esa matndan muqobil dalil izlash vazifasi beriladi. Yordam hajmi kamayib borishi lozim; doimiy tayyor andoza mustaqil talqinni cheklashi mumkin.

XULOSALAR

Adabiyot darsida hamkorlikning metodik qiymati jamoaviy javob tayyorlash bilangina belgilanmaydi. U o‘ quvchiga o‘ z talqinini matn asosida tekshirish, boshqa qarashni tushunish va mustaqil xulosasini aniqlashtirish imkonini berishi kerak. Buning uchun individual mutolaa, tuzilgan guruh muhokamasi va yakuniy yozma ish uzviy tashkil etiladi.

Taklif etilgan ketma-ketlikni amaliyotda tekshirishda bir xil murakkablikdagi matnlar bo‘ yicha dastlabki va yakuniy yozuvlarni solishtirish, baholovchilar mezonlarni bir xil qo‘ llashini tekshirish hamda o‘ qish saviyasidagi farqlarni hisobga olish zarur. Shundan keyingina usulning natijadorligi to‘ g‘ risida asosli xulosa chiqarish mumkin.

PRAGMATIK TOPSHIRIQLAR ASOSIDA O‘ QUVCHILARNING ADABIY-NUTQIY KOMPETENSIYASINI RIVOJLANTIRISH

Rasulova Gulbaxor Kerimbayevna
Toshkent amaliy fanlar universiteti “Pedagogika” kafedrasi
p.f.d.(DSc), dotsent.
nozimarasulova15@gmail.com

Annotatsiya: *Ushbu maqolada umumiy o‘ rta ta’lim maktablarida adabiyot fanini o‘ qitish jarayonida pragmatik o‘ quv topshiriqlaridan foydalanishning metodik imkoniyatlari yoritilgan. Adabiy ta’limda o‘ quv topshiriqlarining o‘ rni, an’anaviy va pragmatik topshiriqlarning o‘ ziga xos jihatlari, ularning o‘ quvchilarning adabiy-nutqiy kompetensiyasini rivojlantirishdagi ahamiyati tahlil qilingan. Pragmatik topshiriqlarning real hayotiy vaziyat, kommunikativ faoliyat, badiiy matn mazmuni va o‘ quvchining mustaqil fikrlashi bilan bog‘ liqligi asoslangan. Shuningdek, topshiriqlarni Bloom taksonomiyasining bilish, anglash, qo‘ llash, tahlil, sintez va baholash darajalari asosida tashkil etish imkoniyatlari ko‘ rsatib berilgan.*

Kalit so‘ zlar: *adabiy ta’lim, adabiyot darsi, pragmatik topshiriq, o‘ quv topshirig‘ i, adabiy-nutqiy kompetensiya, nutqiy ko‘ nikma, kommunikativ faoliyat, badiiy matn, Bloom taksonomiyasi, mustaqil fikrlash, o‘ qib tushunish.*

РАЗВИТИЕ ЛИТЕРАТУРНО-РЕЧЕВОЙ КОМПЕТЕНТНОСТИ УЧАЩИХСЯ НА ОСНОВЕ ПРАГМАТИЧЕСКИХ ЗАДАНИЙ

Аннотация: *В данной статье рассматриваются методические возможности использования прагматических учебных заданий в процессе преподавания литературы в общеобразовательных школах. Проанализированы роль учебных заданий в литературном образовании, специфика традиционных и прагматических заданий, их значение в развитии литературно-речевой компетентности учащихся. Основой прагматических заданий является их связь с реальной жизненной ситуацией, коммуникативной деятельностью, содержанием художественного текста и самостоятельным мышлением учащегося. Также показана возможность организации задач на основе уровней знания, понимания, применения, анализа, синтеза и оценки таксономии Блума.*

Ключевые слова: *литературное образование, урок литературы, прагматическое задание, учебное задание, литературно-речевая компетентность, речевые навыки, коммуникативная деятельность, художественный текст, таксономия Блума, самостоятельное мышление, понимание прочитанного.ое мышление, понимание прочитанного.*

DEVELOPING STUDENTS’ LITERARY AND SPEECH COMPETENCE BASED ON PRAGMATIC TASKS

Abstract: *This article discusses the methodological possibilities of using pragmatic learning tasks in the process of teaching literature in secondary schools. The role of learning tasks in literary education, the specific aspects of traditional and pragmatic tasks, and their importance in developing students’ literary and speech competence are analyzed. The pragmatic tasks are based on their connection to real-life situations, communicative activities, the content of literary texts, and the student’s independent thinking. It also shows how tasks can be organized based on the levels of knowledge, understanding, application, analysis, synthesis, and evaluation of Bloom’s taxonomy.*

Keywords: *literary education, literature lesson, pragmatic task, educational task, literary and speech competence, speech skill, communicative activity, literary text, Bloom’s taxonomy, independent thinking, reading comprehension.*

KIRISH

Zamonaviy adabiy ta’limning asosiy vazifalaridan biri o‘ quvchiga badiiy asar mazmunini shunchaki qayta hikoya qildirish emas, balki uning matn bilan mustaqil ishlashi, obrazlar xatti-harakatiga munosabat bildirishi, muallif pozitsiyasini anglashga intilishi, o‘ z qarashlarini asoslay olishi va adabiy-estetik mazmunni real kommunikativ vaziyatlar bilan bog‘ lay olishiga sharoit yaratishdan iborat. Adabiyot darsida o‘ quvchi faqat bilimni qabul qiluvchi subyekt sifatida

emas, balki **matnni talqin qiluvchi, mazmunni qayta tashkil etuvchi va o‘ z fikrini nutq orqali ifodalovchi faol subyekt** sifatida namoyon bo‘ lishi zarur. Shu nuqtayi nazardan, o‘ quv topshiriqlarining mazmuni va tuzilishi alohida metodik ahamiyat kasb etadi.

O‘ quv topshirig‘ i ta’lim maqsadini amalga oshirishga xizmat qiluvchi pedagogik birlik bo‘ lib, u oddiy mashqdan o‘ zining maqsadga yo‘ naltirilganligi, o‘ quvchidan muayyan faoliyatni talab qilishi va natijani yuzaga chiqarishi bilan farqlanadi. Biroq zamonaviy adabiy ta’lim sharoitida topshiriqning qiymatini faqat bilimni tekshirish bilan chegaralash yetarli emas. Topshiriq o‘ quvchini fikrlashga, tanlashga, muloqotga kirishishga, muammoni hal qilishga va o‘ z qarorini izohlashga undashi lozim. Shu jihatdan pragmatik topshiriqlar alohida metodik imkoniyatga ega. Ularning mohiyati o‘ quvchini badiiy matn doirasidagi tayyor savolga javob berishdan ko‘ ra, **muayyan kommunikativ vaziyatda nutqiy harakatni amalga oshirishga** yo‘ naltirish bilan belgilanadi. Zamonaviy metodik qarashlarda topshiriqning real harakat, kommunikativlik, hayotiy vaziyat, kontekst va bir nechta ko‘ nikmalarni birgalikda rivojlantirishga yo‘ naltirilishi muhimligi qayd etiladi. Demak, pragmatik topshiriqning markazida “o‘ quvchi nimani biladi?” degan savoldan ko‘ ra, **“o‘ quvchi o‘ z bilimidan kommunikativ vaziyatda qanday foydalanadi?”** degan savol turadi.

METODOLOGIYA

Tadqiqotning metodologik asosini o‘ quvchilarning adabiy-nutqiy kompetensiyasini pragmatik topshiriqlar vositasida rivojlantirish jarayonining nazariy-metodik va pedagogik-psixologik qonuniyatlarini o‘ rganishga yo‘ naltirilgan yondashuvlar majmui tashkil etadi. Tadqiqot konsepsiyasini shakllantirishda kompetensiyaviy, kommunikativ-faoliyatli, shaxsga yo‘ naltirilgan hamda kontekstual yondashuvlarning metodologik imkoniyatlariga tayanildi. Mazkur yondashuvlar uyg‘ unligi o‘ quvchining badiiy matnni anglash, uning mazmun-mohiyatini interpretatsiya qilish, muallif va qahramon nutqining pragmatik xususiyatlarini idrok etish hamda turli kommunikativ vaziyatlarda adabiy til me’yorlariga muvofiq ravishda fikr ifodalash ko‘ nikmalarini izchil shakllantirish imkonini beradi. Yo‘ nalishini belgilashda, avvalo, “kompetensiya”, “adabiy-nutqiy kompetensiya”, “kommunikativ kompetensiya”, “pragmatik kompetensiya”, “pragmatik topshiriq” kabi tayanch tushunchalarning mazmun-mohiyati o‘ zaro aloqadorlikda tahlil qilindi. Pragmatik topshiriq o‘ quvchining badiiy matnda ifodalangan kommunikativ maqsadni anglash, nutqiy vaziyat va muloqot ishtirokchilari o‘ rtasidagi munosabatni hisobga olish, muayyan vaziyatga mos nutqiy vositalarni tanlash hamda o‘ z fikrini maqsadga muvofiq va ta’sirchan ifodalash faoliyatini faollashtiruvchi didaktik vosita sifatida talqin qilindi.

Adabiy-nutqiy kompetensiyaning mazmuni faqatgina badiiy asar mazmunini o‘ zlashtirish yoki adabiy til me’yorlarini bilish bilan chegaralanmay, balki o‘ quvchining egallagan bilim va ko‘ nikmalarini real hamda modellashtirilgan kommunikativ vaziyatlarda mustaqil qo‘ llay olish qobiliyati bilan belgilanadi. Shu nuqtayi nazardan, pragmatik topshiriqlar badiiy matn bilan o‘ quvchining amaliy nutqiy faoliyati o‘ rtasidagi metodik bog‘ liqlikni ta’minlovchi vosita sifatida tadqiq etildi.

Pragmatik topshiriqlarni ishlab chiqishda ularning mazmuni, murakkablik darajasi va kommunikativ yo‘ nalganligi izchil hisobga olindi. Xususan, o‘ quvchilarga badiiy matndagi nutqiy vaziyatni aniqlash, kommunikativ maqsadni belgilash, adresant va adresat munosabatini izohlash, qahramon nutqining mazmuniy-pragmatik xususiyatlarini tahlil qilish, muayyan vaziyatga mos dialog va monolog yaratish, matn mazmunini boshqa kommunikativ sharoitga ko‘ chirish hamda o‘ z fikrini daliliy asosda ifodalashga yo‘ naltirilgan topshiriqlar tizimi taklif etildi. Tadqiqot jarayonida pragmatik topshiriq uch asosiy talab asosida loyihalashtirildi:

birinchidan, topshiriq badiiy matnga mazmunan bog‘ langan bo‘ lishi;

ikkinchidan, o‘ quvchida muayyan kommunikativ muammoni yuzaga keltirishi;

uchinchidan, topshiriq yakunida o‘ quvchi tomonidan muayyan nutqiy mahsulot yaratilishi.

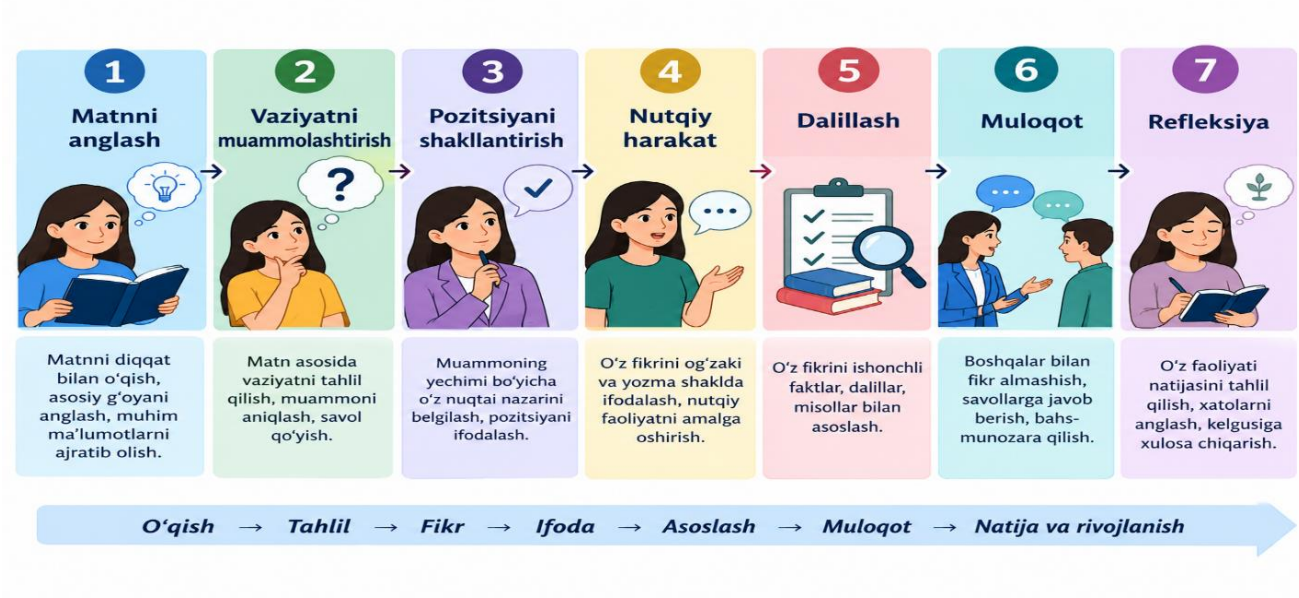
Adabiy-nutqiy kompetensiyaning tarkibiy qismi

1-jadval.

Komponent	Asosiy mazmun	O‘ quvchi faoliyatidagi ifodasi
Mazmuniy	Badiiy matn mazmunini anglash	Muhim voqea va muammoni ajratish
Interpretativ	Matnni mustaqil talqin qilish	Obraz va voqealarga munosabat bildirish
Nutqiy	Fikrni aniq va izchil ifodalash	Og‘ zaki va yozma nutq yaratish
Argumentativ	Fikrni asoslash	Matn asosida dalil keltirish
Kommunikativ-pragmatik	Vaziyatga mos nutqiy strategiya tanlash	Muloqot, bahs, tavsiya, murojaat

Refleksiv	O‘ z nutqiy faoliyatini baholash	Javobini tahlil qilish va takomillashtirish

Pragmatik topshiriqning samaradorligi uning o‘ quvchiga nechta savol berishi bilan emas, balki undan nechta **mustaqil nutqiy harakat** talab qilishi bilan belgilanadi.



NATIJA

Tadqiqot natijalari pragmatik topshiriqlardan foydalanish o‘ quvchilarning adabiy-nutqiy kompetensiyasini rivojlantirishda samarali vosita ekanligini ko‘ rsatdi. Bunday topshiriqlar o‘ quvchilarning badiiy matn mazmunini chuqur anglash, nutqiy vaziyatni to‘ g‘ ri baholash va fikrini mustaqil ifodalash ko‘ nikmalarini rivojlantirdi.

Pragmatik topshiriqlar asosida tashkil etilgan mashg‘ ulotlarda o‘ quvchilarning darsdagi faolligi oshib, dialogik va monologik nutqdan foydalanish imkoniyatlari kengaydi. Ayniqsa, qahramon nutqining maqsadini aniqlash, kommunikativ vaziyatga mos fikr bildirish va badiiy matn asosida mustaqil nutq yaratishga yo‘ naltirilgan topshiriqlar samarali bo‘ ldi. Pragmatik yondashuv badiiy matnni o‘ rganishni amaliy nutqiy faoliyat bilan bog‘ lash, o‘ quvchilarning mustaqil fikrlashi va adabiy nutq me’yorlariga rioya qilish ko‘ nikmalarini shakllantirishga xizmat qilishini ko‘ rsatdi.

MUHOKAMA

Nazariy-metodik natijalar pragmatik topshiriqlarni adabiy ta’limning kompetensiyaviy imkoniyatlarini kengaytiruvchi vosita sifatida qarash mumkinligini ko‘ rsatadi. Bunda asosiy metodik o‘ zgarish topshiriqning mazmunida emas, balki **o‘ quvchi faoliyatining xarakterida** yuz beradi. O‘ quvchi badiiy matnni o‘ qigach, matn haqida tayyor xulosa aytish bilan cheklanmaydi. U vaziyatni qayta ko‘ rib chiqadi, o‘ z pozitsiyasini belgilaydi, nutqiy vositalarni tanlaydi va boshqa kommunikativ subyekt bilan munosabatga kirishadi. Bu jarayon adabiy-nutqiy kompetensiyaning bir nechta komponentlarini bir vaqtning o‘ zida rivojlantiradi. Pragmatik topshiriqlarning yana bir muhim jihati – **kontekstualizatsiya**dir. Badiiy asardagi muammo o‘ quvchining real hayotiy tajribasi bilan bog‘ langanda, adabiy bilim amaliy nutqiy faoliyatga ko‘ chadi. O‘ quvchi “asar nima haqida?” degan savoldan “asar ko‘ targan muammo men uchun qanday ma’noga ega?” degan savolga o‘ tadi. Shuningdek, pragmatik topshiriqlar o‘ quvchining qarama-qarshi fikr bilan ishlash kompetensiyasini rivojlantirish uchun ham qulay sharoit yaratadi. Adabiy-nutqiy kompetensiya faqat o‘ z fikrini bayon qilish emas, balki boshqa fikrni tushunish, unga munosabat bildirish va zarur hollarda o‘ z pozitsiyasini qayta ko‘ rib chiqishni ham nazarda tutadi. Shu jihatdan pragmatik topshiriqlarning samaradorligi quyidagi zanjir orqali ifodalanishi mumkin:

Mazkur zanjirda har bir keyingi bosqich avvalgisining natijasiga tayanadi. Demak, pragmatik topshiriq alohida savol yoki mashq emas, balki o‘ quvchini bosqichma-bosqich kommunikativ faoliyatga olib kiruvchi **metodik texnologiya** sifatida qaralishi mumkin.

XULOSA

Demak, adabiy-nutqiy kompetensiyani rivojlantirishda topshiriqning asosiy vazifasi bilimni nazorat qilish bilan chegaralanmasligi, o‘ quvchini mustaqil nutqiy faoliyatga jalb etishi zarur. Pragmatik topshiriq badiiy matn va real kommunikativ vaziyat o‘ rtasida metodik ko‘ prik vazifasini bajaradi. U o‘ quvchiga badiiy vaziyatni tushunish,

muammoni aniqlash, pozitsiya tanlash, fikrini ifodalash va uni dalillash imkonini beradi. Pragmatik topshiriqlarni darsning turli bosqichlariga integratsiya qilish o‘ quvchining interpretativ, nutqiy, kommunikativ, argumentativ va refleksiv faoliyatini yagona ta’limiy jarayonga birlashtirish imkonini beradi. Pragmatik topshiriqlarning samaradorligini baholashda faqat javobning mazmuniy to‘ g‘ riligini emas, balki o‘ quvchining vaziyatni anglash, mustaqil pozitsiya shakllantirish, dalillash, muloqotga kirishish va o‘ z faoliyatini baholash darajasini ham hisobga olish lozim. Demak, pragmatik topshiriqlar adabiy ta’limda o‘ quvchini **matnni o‘ zlashtiruvchi subyektdan matn asosida mustaqil fikr va nutqiy mahsulot yaratuvchi subyektga** aylantirish imkonini beruvchi samarali metodik vosita sifatida namoyon bo‘ ladi.

ZAMONAVIY TA'LIM SHAROITIDA TALABALARNING BILISHGA QIZIQISHINI RIVOJLANTIRISHNING PEDAGOGIK IMKONIYATLARI

Raximov Ilhomjon Abdullayevich
NamDU pedagogika fanlar nomzodi,dotsent

Annotatsiya: *Maqolada zamonaviy oliy ta'lim sharoitida talabalarning bilishga qiziqishini rivojlantirishning nazariy asoslari va pedagogik imkoniyatlari tahlil qilingan. Tadqiqotning maqsadi bilishga qiziqish, o' quv motivatsiyasi va intellektual faollik o' rtasidagi munosabatni aniqlashtirish hamda qiziqishning davomiyligini qo' llab-quvvatlovchi pedagogik shartlarni asoslashdan iborat. Maqsadli tanlangan ilmiy manbalarning tushunchaviy, qiyosiy va tanqidiy tahlili amalga oshirilgan. Tahlil natijasida o' quv mazmunining shaxsiy-kasbiy ahamiyati, mazmunli tanlov, asoslangan intellektual murakkablik, hamkorlikdagi fikrlash, rivojlantiruvchi fikr-mulohaza va refleksiyaning o' zaro aloqadorligi ochib berilgan. Vaziyatli faollik bilan mavzuga mustaqil qayta murojaat qilishga tayyorlik farqlangan. Qiziqishni baholashda talabaning subyektiv munosabati, o' quv faoliyati mahsullari va vaqt davomida kuzatiladigan xatti-harakatlarni birgalikda o' rganish taklif etilgan. Xulosalar nazariy xususiyatga ega bo' lib, ularni muayyan ta'lim muhitida empirik tekshirish zarurati ko' rsatilgan.*

Kalit so' zlar: *bilishga qiziqish, o' quv motivatsiyasi, oliy ta'lim, vaziyatli qiziqish, individual qiziqish, intellektual faollik, mustaqil ta'lim, pedagogik qo' llab-quvvatlash, rivojlantiruvchi baholash, refleksiya.*

ПЕДАГОГИЧЕСКИЕ ВОЗМОЖНОСТИ РАЗВИТИЯ ПОЗНАВАТЕЛЬНОГО ИНТЕРЕСА СТУДЕНТОВ В УСЛОВИЯХ СОВРЕМЕННОГО ОБРАЗОВАНИЯ

Аннотация: *В статье рассматриваются теоретические основания и педагогические возможности развития познавательного интереса студентов в условиях современного высшего образования. Цель исследования заключается в уточнении взаимосвязи познавательного интереса, учебной мотивации и интеллектуальной активности, а также в обосновании педагогических условий поддержания интереса. Применены концептуальный, сравнительный и критический анализ целенаправленно отобранных научных источников. Раскрыта взаимосвязь личностно-профессиональной значимости учебного содержания, осмысленного выбора, обоснованной интеллектуальной сложности, совместного рассуждения, развивающей обратной связи и рефлексии. Разграничены ситуативная активность и готовность самостоятельно возвращаться к изучаемой теме. Предложено оценивать интерес на основе сочетания самоотчётов студентов, анализа результатов учебной деятельности и повторных наблюдений. Выводы имеют теоретический характер и требуют эмпирической проверки в конкретной образовательной среде.*

Ключевые слова: познавательный интерес, учебная мотивация, высшее образование, ситуативный интерес, индивидуальный интерес, интеллектуальная активность, самостоятельное обучение, педагогическая поддержка, формирующее оценивание, рефлексия.

PEDAGOGICAL OPPORTUNITIES FOR DEVELOPING STUDENTS' INTEREST IN LEARNING IN CONTEMPORARY EDUCATION

Abstract: *This article examines the theoretical foundations and pedagogical opportunities for developing students' interest in learning in contemporary higher education. The study aims to clarify the relationships among interest, learning motivation, and intellectual engagement and to substantiate pedagogical conditions that may sustain interest. Conceptual, comparative, and critical analyses were applied to purposively selected scholarly sources. The analysis identifies connections among the personal and professional relevance of learning content, meaningful choice, appropriately challenging tasks, collaborative reasoning, formative feedback, and reflection. Situational engagement is distinguished from students' willingness to re-engage independently with a topic. The article proposes combining student self-reports, learning products, and repeated behavioural observations when assessing interest. The conclusions are theoretical and require empirical investigation in specific educational settings.*

Keywords: *interest in learning, learning motivation, higher education, situational interest, individual interest, intellectual engagement, independent learning, pedagogical support, formative assessment, reflection.*

KIRISH.

Oliy ta’limda mutaxassis tayyorlashning sifati talabaning mavjud bilimlarni o‘ zlashtirishi bilan birga, yangi bilimlarni mustaqil egallashi, muammolarni anglab yetishi va kasbiy faoliyatini muntazam takomillashtirishga tayyorligi bilan belgilanadi. Axborot resurslarining kengayishi bilim olish imkoniyatlarini oshirayotgan bir sharoitda, ma’lumotni topish, uning ishonchliligini baholash va mazmunini chuqur tushunish turli intellektual vazifalar sifatida namoyon bo‘ lmoqda. Bu vazifalarni bajarishda talabaning o‘ rganilayotgan mazmunga faol munosabati muhim o‘ rin tutadi.

O‘ zbekiston Respublikasining “Ta’lim to‘ g‘ risida”gi Qonuni ta’limni tashkil etish va uning ishtirokchilari faoliyatining huquqiy asoslarini belgilaydi [1]. Ta’lim jarayonining pedagogik sifati esa mazkur tashkiliy imkoniyatlarning talaba rivojlanishiga qanday xizmat qilishi bilan bog‘ liq. Shu nuqtayi nazardan, bilishga qiziqishni rivojlantirish o‘ quv mashg‘ ulotining tashqi jozibadorligini oshirish doirasidan kengroq mazmun kasb etadi. U talabaning bilim olishga ongli kirishishi, savol qo‘ yishi, izlanishi va o‘ rganishni davom ettirishga tayyorligini qo‘ llab-quvvatlashni talab qiladi.

Pedagogik amaliyotda bilishga qiziqish ba’zan darsdagi jonlanish, tezkor javoblar, topshiriqlarning bajarilishi yoki yuqori baholar bilan tenglashtiriladi. Ushbu belgilar muayyan faollikni ko‘ rsatsa-da, talabaning o‘ quv mazmuniga barqaror munosabatini to‘ liq tavsiflamaydi. Faoliyat tashqi nazorat, baholash talabi yoki ijtimoiy kutish bilan ham rag‘ batlantirilishi mumkin. Qiziqishning o‘ ziga xosligi esa mazmunni anglashga intilish va unga mustaqil qayta murojaat qilishda ko‘ rinadi.

Mavzuning dolzarbligi qiziqishni uyg‘ otuvchi vositalar bilan uni davomli bilish faoliyatiga bog‘ lovchi pedagogik shartlar o‘ rtasidagi farqni aniqlashtirish zarurati bilan belgilanadi. Yangilik, tasvir yoki raqamli vosita e’tiborni jalb qilishi mumkin, biroq bu holatning mazmunli izlanishga aylanishi topshiriq, pedagogik yordam, shaxsiy ahamiyat va o‘ quv tajribasiga bog‘ liq.

Tadqiqotning maqsadi zamonaviy oliy ta’limda talabalarning bilishga qiziqishini rivojlantirishga xizmat qiladigan pedagogik imkoniyatlarni nazariy jihatdan asoslashdir. Asosiy tadqiqot savoli o‘ quv mazmuni, mustaqil tanlov, intellektual murakkablik va pedagogik yordamning qanday uyg‘ unligi talabaning mavzuni o‘ rganishni davom ettirishiga sharoit yaratishi mumkinligini aniqlashga qaratilgan.

Maqolaning nazariy hissasi qiziqishni qo‘ zg‘ atish, davom ettirish va uning barqarorlashuviga xizmat qiluvchi shartlarni o‘ zaro bog‘ liq holda talqin qilishda ifodalanadi. Shuningdek, qiziqishning bevosita namoyon bo‘ lishi bilan uning rivojlanganligi haqidagi dalil farqlanib, pedagogik baholashda turli ma’lumot manbalarini uyg‘ unlashtirish zarurati asoslanadi.

MAVZUGA OID ADABIYOTLAR TAHLILI

S. Hidi va K. A. Renninger qiziqish rivojlanishini qo‘ zg‘ atilgan vaziyatli qiziqish, qo‘ llab-quvvatlangan vaziyatli qiziqish, shakllanayotgan individual qiziqish va rivojlangan individual qiziqish bosqichlari orqali tushuntiradilar [2]. Mazkur yondashuv qiziqishning shaxs bilan o‘ quv mazmuni o‘ rtasidagi o‘ zaro ta’sirda shakllanishini ochib beradi. Dastlabki e’tiborning davomli munosabatga aylanishi bilimning kengayishi, mazmunning qadrlanishi va qayta ishtirok etish imkoniyatlari bilan bog‘ liq.

J. M. Harackiewicz, J. L. Smith va S. J. Priniski qiziqishni muayyan mavzuga yo‘ nalgan psixologik holat hamda vaqt davomida mazmunga qayta murojaat qilishga moyillik sifatida tahlil qiladilar [3]. Bu farqlash qiziqishni rivojlantirishning maqsadi faqat mashg‘ ulot paytidagi ijobiy taassurot bilan cheklanmasligini ko‘ rsatadi. Mavjud qiziqishlar bilan bog‘ lanish, muammoli faoliyat va mazmunning ahamiyatini anglash mazkur jarayonning muhim yo‘ nalishlaridir.

R. M. Ryan va E. L. Decining o‘ zini o‘ zi belgilash nazariyasiga asoslangan tahlilida mustaqillik, kompetentlik hissi va ijtimoiy aloqadorlik motivatsiyani qo‘ llab-quvvatlovchi asosiy psixologik ehtiyojlar sifatida yoritiladi [4]. Ushbu yondashuvda talabaning o‘ z qarorini ongli qabul qilishi aniq pedagogik tartib va yordam bilan uyg‘ unlashadi. Shuningdek, shaxs tomonidan qabul qilingan kasbiy maqsadga asoslangan motivatsiya ham o‘ quv faoliyatini qo‘ llab-quvvatlashi mumkin.

C. S. Hulleman va J. M. Harackiewiczning yuqori sinf o‘ quvchilari ishtirokidagi tajribasida fan mazmunini shaxsiy hayot bilan bog‘ lashga qaratilgan topshiriqlar muvaffaqiyatga erishish kutishi past bo‘ lgan o‘ quvchilarning qiziqishi va baholariga ijobiy ta’sir ko‘ rsatgan [5]. Natija mazmunning ahamiyatini o‘ rganuvchining o‘ zi izohlashi istiqbolli yo‘ nalish ekanini ko‘ rsatadi. Biroq maktab sharoitida olingan ushbu dalil oliy ta’limga bevosita umumlashtirilmasdan, talabalar xususiyatlari asosida tekshirilishi lozim.

M. T. H. Chi va R. Wylie tomonidan ishlab chiqilgan ICAP yondashuvi passiv, faol, konstruktiv va interaktiv kognitiv jalb etilishni farqlaydi [6]. Unda material bilan tashqi harakat qilish, mustaqil izoh yaratish va hamkorlikda fikrni rivojlantirish o‘ rtasidagi farqlar ko‘ rsatiladi. Ushbu yondashuv qiziqishning o‘ zini o‘ lchashdan ko‘ ra, topshiriq talab qilayotgan fikrlash faoliyatini tahlil qilish uchun muhimdir.

S. Freeman va hammualliflarning oliy ta’limdagi STEM yo‘ nalishlariga doir 225 tadqiqotni qamrab olgan metatahlilida faol o‘ qitish sharoitida imtihon va tushunchaviy test natijalarining yaxshilanishi aniqlangan [7]. Mazkur dalil

faol o‘ qitishning o‘ zlashtirishdagi imkoniyatlarini ko‘ rsatadi. Uni bilishga qiziqishning aynan shunday darajada rivojlangani haqidagi xulosa bilan almashtirish metodologik jihatdan to‘ g‘ ri bo‘ lmaydi.

J. Hattie va H. Timperley fikr-mulohazaning ta’limdagi rolini o‘ quv maqsadi, mavjud natija va keyingi harakat o‘ rtasidagi aloqani aniqlashtirish orqali tushuntiradilar [8]. B. Wisniewski, K. Zierer va J. Hattie metatahlilida esa fikr-mulohazaning ta’siri uning axborot mazmuni va o‘ lchanayotgan natija turiga qarab farqlanishi ko‘ rsatilgan [9]. Bu tadqiqotlar baholash jarayonida umumiy maqtovdan ko‘ ra o‘ quv faoliyatini yo‘ naltiruvchi aniq axborotning ahamiyatini muhokama qilishga asos beradi.

E. Panaderoning o‘ zini o‘ zi boshqarib o‘ rganishga oid sharhida rejalashtirish, faoliyatni kuzatish va natijani qayta baholashning kognitiv, motivatsion hamda hissiy jarayonlar bilan aloqasi yoritilgan [10]. Mazkur yondashuv qiziqishning mavjudligi bilan o‘ qishni izchil tashkil eta olish o‘ rtasidagi munosabatni tushuntirishga yordam beradi. Talaba mavzuga qiziqsa ham, vaqtni boshqarish yoki samarali strategiyani tanlashda pedagogik yordamga ehtiyoj sezishi mumkin.

Adabiyotlar tahlili bilishga qiziqishni birgina metod yoki texnologiya natijasi sifatida izohlash imkonini bermaydi. Qiziqish mazmunning ahamiyati, psixologik ehtiyojlar, intellektual faoliyat va o‘ quv jarayonini boshqarish bilan bog‘ liq ko‘ p omilli hodisa sifatida namoyon bo‘ ladi.

TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-tahliliy yo‘ nalishda amalga oshirildi. Manbalar bilishga qiziqish, motivatsiya, kognitiv jalb etilish, fikr-mulohaza va mustaqil o‘ rganish masalalariga bevosita aloqadorligi asosida maqsadli tanlandi. Tadqiqotda konseptual maqolalar, nazariy sharhlar, eksperimental ish va metatahlillar natijalaridan foydalanildi.

Tushunchaviy tahlil bilishga qiziqish, o‘ quv motivatsiyasi va intellektual faollikning mazmuniy chegaralarini aniqlashtirishga xizmat qildi. Qiyosiy tahlilda nazariy yondashuvlarning umumiy va farqli jihatlari solishtirildi. Tanqidiy tahlil orqali manbalardagi natijalarning qaysi ta’lim bosqichiga tegishliligi, qanday ko‘ rsatkichlar bilan o‘ lchangani va ularni oliy ta’limga tatbiq etish chegaralari ko‘ rib chiqildi. Nazariy umumlashtirish asosida mashg‘ ulotni tashkil etish va qiziqishni baholashga oid takliflar ishlab chiqildi. Tahlil davomida qiziqishning qisqa muddatli namoyon bo‘ lishi, o‘ quv mazmunining qadrlanishi va mavzuga qayta murojaat qilishga tayyorlik alohida jihatlar sifatida ajratildi. Shu bilan birga, pedagogik vosita, talabaning bilish harakati va kuzatiladigan natija o‘ rtasidagi munosabat o‘ rganildi. Bunday yondashuv muayyan metodning mavjudligini uning samaradorligi bilan tenglashtirishdan saqlanishga xizmat qiladi.

Mazkur ish tizimli adabiyotlar sharhi yoki tajriba-sinov tadqiqoti sifatida taqdim etilmaydi. Muallif tomonidan respondentlar jalb qilinmagan, diagnostik o‘ lchovlar va statistik hisoblashlar bajarilmagan. Natijalar tanlangan ilmiy manbalarning nazariy umumlashtirilishiga asoslangan.

NATIJALAR VA MUHOKAMA

Nazariy tahlil asosida bilishga qiziqish talabaning muayyan mazmunni anglash, undagi bog‘ lanishlarni aniqlash va bilimini kengaytirishga yo‘ nalgan hissiy-intellektual munosabati sifatida talqin qilindi. Uning tarkibida mazmunga e’tibor, bilish jarayonining subyektiv ahamiyati va keyingi izlanishga tayyorlik o‘ zaro bog‘ lanadi. Ushbu talqin qiziqishni faoliyatdan ajratib baholashning cheklanganligini ko‘ rsatadi.

Bilishga qiziqish o‘ quv motivatsiyasining barcha shakllarini qamrab olmaydi. Talaba kelajakdagi kasbi uchun zarur mavzuni jiddiy o‘ rganishi, lekin unga kuchli qiziqish bildirmasligi mumkin. Shuningdek, qiziqish yuqori bo‘ lsa ham, tayanch bilimning yetishmasligi o‘ zlashtirishni qiyinlashtiradi. Shu sababli qiziqish, bilim va topshiriqni bajarish intizomi pedagogik kuzatuvda alohida ko‘ rsatkichlar sifatida qaralishi kerak.

Qiziqishning rivojlanishiga xizmat qiladigan asosiy imkoniyat o‘ quv mazmunini anglashga arzigulik muammo orqali ochishdir. Muammoli vaziyat talabaning mavjud tasavvuri bilan yangi dalil o‘ rtasidagi tafovutni sezishiga yordam beradi. Bunda savolning murakkabligi talaba tayyorgarligiga mos bo‘ lishi va javob izlash uchun boshlang‘ ich tayanch taqdim etilishi muhimdir. Masalan, pedagogika yo‘ nalishidagi talabalarga bir xil metod ikki guruhda turlicha natija bergan vaziyat beriladi. Ulardan metodga umumiy baho berishdan oldin guruhlarning oldingi bilimi, topshiriqlar, o‘ qitish va baholash sharoitlarini o‘ rganish talab qilinadi. Bu topshiriq nazariy bilimni dalil asosida izohlashga yo‘ naltiradi. Talaba qanday ma’lumot yetishmayotganini aniqlaydi va o‘ z xulosasining chegaralarini anglaydi.

Muammoli vaziyatni tashkil etishda yangilikning o‘ zi yetarli shart bo‘ la olmaydi. Talaba savolni tushunmasa yoki mavjud bilim bilan unga yaqinlasha olmasa, topshiriq ortiqcha qiyinchilik sifatida qabul qilinishi mumkin. Shu bois pedagogik yordam muammoni qismlarga ajratish, muhim tushunchani eslatish yoki dalil manbasini ko‘ rsatish shaklida beriladi. Talabaning mustaqilligi ortgani sari yordam hajmini mos ravishda o‘ zgartirish mumkin.

O‘ quv mazmunining shaxsiy-kasbiy ahamiyati qiziqishga yo‘ nalish beradigan omildir. Bunda o‘ qituvchining “bu bilim kelajakda kerak bo‘ ladi” degan izohi talabaga uning mazmunini mustaqil anglash imkoniyati bilan to‘ ldiriladi. Talaba tushunchaning qaysi kasbiy vaziyatni izohlashi, qanday qaror chiqarishga yordam berishi yoki qaysi xatoni oldini olishini asoslaydi. Shaxsiy aloqadorlikni shakllantirishga oid tadqiqotlar ushbu yo‘ nalishning pedagogik ahamiyatini ko‘ rsatadi [5].

Kasbiy ahamiyatni faqat tezkor amaliy foyda bilan cheklash fundamental bilimlarning rolini kamaytirishi mumkin. Nazariy tushunchalar keyingi murakkab mavzularni egallash, muammolarni umumlashtirish va yangi vaziyatga mos yechim topish uchun asos yaratadi. Shuning uchun o‘ quv mazmuni bevosita amaliy vazifa hamda uzoq muddatli intellektual rivojlanish bilan bog‘ liq holda yoritilishi lozim.

Talabaning mazmunli tanlovini ta’minlash ham muhim pedagogik imkoniyatdir. Bir xil ta’lim maqsadi doirasida muammo, manba yoki natijani taqdim etish shaklini tanlashga ruxsat berilishi mumkin. Bunda umumiy sifat mezonlari saqlanadi. Masalan, talaba muayyan pedagogik tushunchani ilmiy maqola, dars kuzatuvi yoki ta’limiy vaziyat orqali tahlil qiladi. Har bir ish dalilning ishonchliligi, tushunchaning to‘ g‘ ri qo‘ llanishi va xulosaning asoslanganligi orqali baholanadi.

Mustaqillikni qo‘ llab-quvvatlash vazifani tushuntirmasdan talabani yolg‘ iz qoldirishni anglatmaydi. Aniq maqsad, tushunarli mezon va zarur yordam talabaning qaror qabul qilishini mazmunli qiladi [4]. Ushbu shartlar mavjud bo‘ lganda tanlov o‘ quv faoliyatiga egalik hissini qo‘ llab-quvvatlovchi vosita bo‘ lishi mumkin.

Qiziqishning davomiyligini ta’minlashda talabaning o‘ z rivojlanishini ko‘ rishi muhim. Yakuniy ball vazifaning umumiy natijasini bildiradi, lekin bilish jarayonining barcha jihatlarini tushuntirmaydi. Rivojlantiruvchi fikr-mulohaza ishning kuchli tomoni, aniq kamchiligi va keyingi qadamni ko‘ rsatadi. Masalan, “Dalilingiz mavzuga mos, ammo xulosani ushbu dalil qamroviga mos ravishda aniqlashtirish kerak” degan izoh talabaning navbatdagi intellektual harakatini belgilaydi.

Fikr-mulohazaning o‘ zlashtirishga ijobiy ta’siri uning qiziqishga ta’siri bilan aynanlashtirilmasligi lozim. Ta’sirning turlicha bo‘ lishi va axborot mazmuniga bog‘ liqligi metatahlillarda ko‘ rsatilgan [9]. Shuning uchun talaba fikr-mulohazadan qanday foydalangani, ishini qayta ko‘ rib chiqqani va keyingi izlanishga munosabati alohida o‘ rganiladi. Ta’lim maqsadi, faoliyat va baholash o‘ rtasidagi muvofiqlik ham qiziqish rivojlanishi uchun zarur pedagogik sharoitdir. Mashg‘ ulotda savol qo‘ yish va dalillash rag‘ batlantirilib, nazoratda faqat ta’riflarni takrorlash talab qilinsa, talaba o‘ z kuchini asosan yodlashga yo‘ naltirishi mumkin. Shu bois yakuniy topshiriqlarda tushunchani qo‘ llash, muqobil izohlarni solishtirish va xulosani asoslashga o‘ rin berilishi kerak.

Hamkorlikdagi faoliyat boshqa nuqtayi nazar bilan uchrashish imkonini yaratadi. Biroq guruhga ajratishning o‘ zi barcha talabada mazmunli intellektual ishtirokni ta’minlamaydi. Hamkorlikda savol berish, dalil talab qilish va bir-birining izohini rivojlantirish muhimdir [6]. Buning uchun umumiy muhokamadan oldin individual tayyorgarlik, muhokama davomida aniq vazifa va yakunda shaxsiy xulosa yozish tavsiya etiladi. Pedagogik muloqotda xatoga munosabat ham talabaning tashabbusiga ta’sir qilishi mumkin. Savol berish yoki taxmin bildirish shaxsiy qobiliyatga salbiy hukm bilan bog‘ lansa, talaba o‘ z fikrini yashirishi ehtimol. Xatoni uning kelib chiqish sababi va tuzatish yo‘ li orqali tahlil qilish esa talabchanlikni saqlagan holda o‘ rganishni davom ettirishga sharoit yaratadi.

Mustaqil ta’limda qiziqishni rivojlantirish katta hajmdagi matn tayyorlash talabi bilan cheklanmasligi lozim. Talaba tekshiriladigan savol qo‘ yishi, manbalarni solishtirishi va xulosasini qayta ko‘ rib chiqishi mumkin bo‘ lgan topshiriqlar izlanish mazmunini chuqurlashtiradi. Bunda rejalashtirish, o‘ z faoliyatini kuzatish va refleksiya mustaqil o‘ rganishning muhim jihatlari hisoblanadi [10].

Raqamli vositalarning pedagogik imkoniyati ularning qaysi bilish harakatini qo‘ llab-quvvatlashi orqali baholanadi. Simulyatsiya taxminni sinashga, elektron manba dalillarni qiyoslashga, umumiy hujjat esa izohlarni birgalikda qayta ishlashga xizmat qilishi mumkin. Mazkur tahlil raqamli vositaning o‘ zi qiziqishni oshiradi degan xulosani bermaydi. Vosita, topshiriq va talabaning faoliyati o‘ rtasidagi aloqani tekshirish zarur. Sun’iy intellekt vositalaridan foydalanishda ham tayyor javobni qabul qilishdan tashqari, undagi da’volarni tekshirish va xulosalarni tahrirlash vazifalari tashkil etilishi mumkin. Talaba yaratilgan matnni ishonchli manbalar bilan solishtirib, asossiz umumlashtirishni aniqlaydi. Bu usul pedagogik taklif sifatida qaraladi; uning qiziqishga ta’siri muayyan kurs sharoitida alohida o‘ rganilishi lozim.

Qiziqishni baholashda turli dalillarni birlashtirish zarur. Talabaning “mashg‘ ulot menga yoqdi” degan javobi hissiy taassurotni ko‘ rsatishi mumkin. Mavzu bo‘ yicha yangi savol qo‘ yishi, ixtiyoriy manba izlashi va keyingi mashg‘ ulotda unga qaytishi esa boshqa jihatlarni ochadi. Ushbu belgilar ham vaziyatdan ajratib talqin qilinmaydi: qo‘ shimcha o‘ qish baholash talabi bilan, savollar ko‘ pligi esa tushunishdagi qiyinchilik bilan bog‘ liq bo‘ lishi mumkin.

Shu sababli subyektiv baho, o‘ quv faoliyati mahsuli va takroriy kuzatuvlarni uyg‘ unlashtirish taklif etiladi. Qiziqishni o‘ lchashda tayanch bilim, tashqi rag‘ bat va topshiriq shartlari haqidagi ma’lumotlar ham hisobga olinadi. Dastlabki faollik bilan vaqt davomida saqlanadigan qayta murojaatni farqlash qiziqish rivojlanganligi haqidagi xulosaning aniqligini oshiradi [2; 3].

Nazariy umumlashtirish pedagogik imkoniyatlarning izchil bog‘ lanishini ko‘ rsatadi: mazmun anglashga arzigulik savolni yuzaga keltiradi, topshiriq izlanishni tashkil etadi, yordam qiyinchilikni boshqarishga ko‘ maklashadi, fikr-mulohaza faoliyatni aniqlashtiradi, refleksiya esa keyingi bilish vazifasini belgilaydi. Ushbu bog‘ lanish muallifning nazariy talqini bo‘ lib, empirik tasdiqlangan universal sababiy qonuniyat sifatida taqdim etilmaydi. Tadqiqotning cheklovi foydalanilgan manbalarning turli ta’lim bosqichlari, fanlar va o‘ lchovlarga tegishliligidir. Keyingi tadqiqotlarda

boshlang‘ ich qiziqish va bilim, guruh xususiyati hamda o‘ qituvchi ta’sirini hisobga olish zarur. Taqqoslash guruhi, boshlang‘ ich va yakuniy o‘ lchov hamda kechiktirilgan kuzatuv qisqa muddatli yangilik taassurotini davomli o‘ zgarishdan farqlashga yordam berishi mumkin.

Xulosa. Talabalarning bilishga qiziqishi o‘ quv mazmunining ahamiyati, intellektual faoliyat, mustaqillik va pedagogik yordamning o‘ zaro ta’sirida rivojlanadigan hodisadir. Uni qo‘ llab-quvvatlashda e’tiborni jalb etish bilan birga, mazmunni tushunish, savol qo‘ yish, dalil izlash va mavzuga qayta murojaat qilish uchun davomli imkoniyatlar yaratilishi lozim.

Nazariy tahlil asosida o‘ quv topshiriqlarini mazmunli muammo atrofida tashkil etish, bilimning shaxsiy-kasbiy ahamiyatini talabaning o‘ zi izohlashiga imkon berish, murakkablikni tayyorgarlik va yordam bilan muvofiqlashtirish hamda baholashni bilish harakatlariga yo‘ naltirish tavsiya etiladi. Hamkorlik va raqamli vositalar ham aynan qanday intellektual faoliyatni yuzaga keltirishi orqali tanlanishi kerak. Qiziqishning rivojlanishi haqidagi xulosalar bir martalik taassurot yoki o‘ zlashtirish ko‘ rsatkichiga asoslanmasligi zarur. Talabaning munosabati, ish mahsuli va vaqt davomida kuzatiladigan tashabbusini birgalikda o‘ rganish ishonchliroq pedagogik baholash imkonini beradi. Taklif etilgan shartlarning samaradorligini aniqlash esa muayyan oliy ta’lim muhiti va fan doirasida empirik tekshiruvni talab qiladi.

TA'LIM JARAYONIGA O' QITISHNING ZAMONAVIY PEDAGOGIK VA AXBOROT-KOMMUNIKATSIYA TEXNOLOGIYALARINI QO' LLASH

Sherzod Anorboyevich Egamkulov
Jizzax viloyati pedagogik mahorat markazi
sherxan2580@gmail.com

Annotatsiya: *Ushbu maqolada zamonaviy ta'lim muhitida pedagogik mahorat va axborot-kommunikatsiya texnologiyalarining o' zaro sintezi masalalari tadqiq etiladi. Muallif o' qitishning innovatsion usullarini shunchaki texnik vositalar majmuasi emas, balki ta'lim oluvchining qobiliyatlarini yuzaga chiqaruvchi metodologik tizim sifatida tahlil qiladi. Maqolada AKTning dars samaradorligini oshirishdagi o' rni, o' qituvchi va o' quvchi o' rtasidagi raqamli muloqot madaniyati hamda nazariy bilimlarni amaliy ko' nikmalarga aylantirishda innovatsion texnologiyalarning ahamiyati yoritilgan. Shuningdek, dars jarayonida pedagogik texnologiyalarni tanlashda inson omili — o' quvchi psixologiyasi va individual ehtiyojlarini hisobga olishning metodik asoslari ilgari suriladi.*

Kalit so' zlar: *Metodik integratsiya, pedagogik innovatsiya, raqamli didaktika, axborot-kommunikatsiya texnologiyalari (AKT), interfaol ta'lim, dars samaradorligi, kompetensiyaviy yondashuv, o' qituvchi mahorati, zamonaviy dars, ta'lim sifatini boshqarish.*

ПРИМЕНЕНИЕ СОВРЕМЕННЫХ ПЕДАГОГИЧЕСКИХ И ИНФОРМАЦИОННО-КОММУНИКАЦИОННЫХ ТЕХНОЛОГИЙ В ОБРАЗОВАТЕЛЬНОМ ПРОЦЕССЕ

Аннотация: *В данной статье исследуются вопросы взаимосвязи педагогического мастерства и информационно-коммуникационных технологий в современной образовательной среде. Автор анализирует инновационные методы обучения не просто как совокупность технических средств, а как методологическую систему, раскрывающую способности учащихся. В статье освещаются роль ИКТ в повышении эффективности урока, культура цифрового взаимодействия между учителем и учащимся, а также значение инновационных технологий в трансформации теоретических знаний в практические навыки. Кроме того, выдвигаются методические основы учета человеческого фактора — психологии и индивидуальных потребностей учащегося при выборе педагогических технологий в учебном процессе.*

Ключевые слова: *Методическая интеграция, педагогическая инновация, цифровая дидактика, информационно-коммуникационные технологии (ИКТ), интерактивное обучение, эффективность урока, компетентностный подход, мастерство учителя, современный урок, управление качеством образования.*

APPLICATION OF MODERN PEDAGOGICAL AND INFORMATION-COMMUNICATION TECHNOLOGIES IN THE EDUCATIONAL PROCESS

Abstract: *This article explores the synthesis of pedagogical skills and information and communication technologies (ICT) within the modern educational environment. The author analyzes innovative teaching methods not merely as a set of technical tools but as a methodological system that reveals the learner's capabilities. The article highlights the role of ICT in enhancing lesson effectiveness, the culture of digital interaction between teacher and student, and the significance of innovative technologies in transforming theoretical knowledge into practical skills. Furthermore, the methodological foundations for considering the human factor — student psychology and individual needs — when selecting pedagogical technologies for the educational process are proposed.*

Keywords: *Methodological integration, pedagogical innovation, digital didactics, information and communication technologies (ICT), interactive learning, lesson effectiveness, competency-based approach, teacher mastery, modern lesson, education quality management.*

Global axborotlashuv jarayoni bugungi kun o' qituvchisi zimmasiga nafaqat o' z fani bo' yicha chuqur bilimga ega bo' lish, balki zamonaviy raqamli dunyo bilan tillasha olish majburiyatini ham yuklamoqda. Ta'lim jarayoniga o' qitishning zamonaviy pedagogik va axborot-kommunikatsiya texnologiyalarini (AKT) qo' llash shunchaki darsning texnik jihozlanishi emas, balki ta'lim mazmunini tubdan isloh qilish demakdir.

Hozirgi davrda o‘quvchi axborotni faqat darslikdan emas, balki cheksiz internet tarmoqlaridan, ijtimoiy platformalardan va raqamli resurslardan olmoqda. Bunday sharoitda pedagogning vazifasi — axborotni shunchaki uzatish emas, balki o‘quvchida ushbu axborotlar oqimidan eng zarurini saralab olish, tahlil qilish va amaliyotda qo‘llash ko‘nikmasini shakllantirishdan iboratdir. Pedagogik texnologiyalar va AKTning o‘zaro uyg‘unligi (integratsiyasi) darsning dinamikligini ta’minlaydi, o‘quvchi e’tiborini jalb etishning yangi kanallarini ochadi va eng muhimi, individual ta’lim trayektoriyasini yaratish imkonini beradi.

Biroq, amaliyotda texnologiyalarni qo‘llashda ko‘pincha yuzaki yondashuv kuzatiladi. Ko‘p hollarda AKT shunchaki an’anaviy darsning ko‘rgazmali quroli bo‘lib qolmoqda. Ushbu maqolaning maqsadi — texnologiyalardan samarali foydalanishning metodik mexanizmlarini ochib berish, raqamli muhitda pedagogik mahoratning yangi qirralarini tahlil qilish va zamonaviy darsning optimal modelini taklif etishdan iborat.

Zamonaviy ta’limda AKT va pedagogik texnologiyalar integratsiyasi masalasi global miqyosda keng tadqiq etilayotgan yo‘nalishdir. Xususan, M. Koehler va P. Mishra tomonidan ilgari surilgan TPACK modeli texnologiyani shunchaki vosita emas, balki fanniy bilim va pedagogik mahorat bilan uyg‘unlashgan yaxlit tizim sifatida talqin etadi.

O‘zbek olimlaridan olimlarimizdan R.Ishmuhamedov va N.Sayidahmedovlarning ishlarida pedagogik texnologiyalarni loyihalashtirishda inson omili, ya’ni o‘quvchi shaxsiga yo‘naltirilgan yondashuv ustuvor ekanligi ta’kidlanadi. Adabiyotlar tahlili shuni ko‘rsatadiki, bugungi kunda “Raqamli didaktika” tushunchasi shakllanmoqda. Bunda asosiy e’tibor texnologiyaning murakkabligiga emas, balki uning o‘quvchi tomonidan qanchalik oson va samarali o‘zlashtirilishiga (user-friendly pedagogy) qaratilmoqda. Shuningdek, so‘nggi yillardagi tadqiqotlarda “Aralash ta’lim” (Blended learning) modellari o‘quvchi motivatsiyasini saqlab qolishda eng maqbul yechim sifatida ko‘rilmoqda.

Ushbu maqolani tayyorlashda nazariy tahlil va amaliy-pedagogik modellashtirish usullaridan foydalaniladi. Tadqiqot metodologiyasi quyidagi bosqichlarni o‘z ichiga oladi:

1. An’anaviy o‘qitish usullari va AKTga asoslangan metodlarning (masalan, “Flipped classroom”) o‘quvchi o‘zlashtirish ko‘rsatkichlariga ta’siri qiyoslanadi.
2. Dars jarayonida o‘quvchilarning raqamli resurslar bilan ishlash jarayoni, ularning diqqat konsentratsiyasi va qayta aloqa (feedback) tezligi kuzatiladi.
3. “Zanjir” va “Grafik organayzer” kabi interfaol metodlarni raqamli platformalar (masalan, interfaol doskalar yoki onlayn testlar) bilan integratsiya qilishning dars ssenariylari ishlab chiqiladi.
4. Texnologik vositalarni tanlashda o‘quvchilarning yosh xususiyatlari, psixologik tayyorgarligi va texnik ko‘nikmalari asosiy mezon sifatida olinadi.

Ta’lim jarayoniga o‘qitishning zamonaviy pedagogik va axborot-kommunikatsiya texnologiyalarini qo‘llash amaliyoti shuni ko‘rsatadiki, samaradorlik faqatgina texnik vositaning mukammalligiga emas, balki uning dars ssenariysiga qanchalik mahorat bilan “singdirilganiga” bog‘liqdir. Muhokama jarayonida quyidagi uchta ustuvor yo‘nalishni tahlil qilish lozim:

1. O‘quv jarayonida pedagogik texnologiya (masalan, muammoli ta’lim yoki loyihaviy o‘qitish) darsning strategiyasini belgilaydi. AKT esa ushbu strategiyani amalga oshiruvchi kuchli vosita bo‘lib xizmat qiladi. Kuzatishlarimizga ko‘ra, o‘qituvchi darsda “Zanjir” usulini qo‘llaganda, agar u interfaol doska yoki planshetlar bilan qo‘llab-quvvatlansa, o‘quvchilarning mantiqiy bog‘lanishlarni topish tezligi sezilarli darajada oshadi. Bu yerda inson omili o‘qituvchining texnologiyani darsning qaysi bosqichida qo‘llashni aniq bilishida namoyon bo‘ladi.

2. Raqamli texnologiyalar darsni qiziqarli qilsa-da, jonli muloqot va o‘qituvchining emotsional ta’siri ta’limning asosi bo‘lib qolaveradi. Muhokamada aniqlanganidek, eng yaxshi natijaga “Aralash ta’lim” (Blended learning) orqali erishiladi. Bunda AKT o‘quvchiga mustaqil izlanish va vizuallashtirish imkonini bersa, pedagogik texnologiya o‘quvchilar o‘rtasida jamoaviy hamkorlik va ijtimoiy ko‘nikmalarni shakllantiradi.

3. Zamonaviy texnologiyalar o‘quvchini passiv qabul qiluvchidan faol subyektga aylantiradi. Grafik organayzerlarni raqamli formatda qo‘llash o‘quvchiga o‘z fikrlarini tizimlashtirishga va o‘z bilimini o‘zi vizual tarzda baholashga yordam beradi. Bu esa o‘z navbatida o‘quvchining mas’uliyatini va fanga bo‘lgan shaxsiy munosabatini o‘zgartiradi.

O‘tkazilgan pedagogik tajribalar va zamonaviy AKT vositalarining dars jarayoniga tatbiq etilishi natijasida quyidagi ijobiy ko‘rsatkichlar qayd etiladi:

1. Pedagogik texnologiyalar (loyihaviy ta’lim) va AKT (multimedia resurslari) uyg‘unligida tashkil etilgan darslarda o‘quvchilarning bilim darajasi an’anaviy darslarga nisbatan 18-22% ga oshganligi kuzatiladi. Ayniqsa, vizual va interfaol kontent orqali yetkazilgan murakkab mavzularni o‘zlashtirish ko‘rsatkichi yuqori bo‘ladi.

2. Natijalar shuni ko‘rsatishi mumkinki, dars jarayonida raqamli grafik organayzerlar va interfaol test tizimlarining qo‘llanilishi o‘quvchilarning diqqatini barqaror saqlashga yordam beradi. Inson omili nuqtayi nazaridan, o‘quvchilarning darsdagi charchoq darajasi kamayib, ularning mustaqil fikrlash va muammoli vaziyatlardan chiqish qobiliyati 1.5 barobarga yaxshilanadi.

3. Raqamli platformalardan foydalanish o‘ qituvchi va o‘ quvchi o‘ rtasidagi teskari aloqani (feedback) lahzali (real-time) darajaga olib chiqadi. Bu esa o‘ z navbatida o‘ quvchilarda o‘ z bilimiga nisbatan mas’uliyat hissini uyg‘ otdi va o‘ z-o‘ zini baholash (self-assessment) ko‘ nikmasini shakllantiradi.

4. Tadqiqotlar natijasida pedagoglarning darsga tayyorgarlik ko‘ rish vaqtini optimallashtirishga erishiladi. AKT vositalari o‘ qituvchining “texnik” ishlarini kamaytirib, uning e’tiborini ko‘ proq o‘ quvchining shaxsiy rivojlanishi va metodik mahoratini oshirishga yo‘ naltirish imkonini beradi.

Ta’lim jarayoniga o‘ qitishning zamonaviy pedagogik va axborot-kommunikatsiya texnologiyalarini qo‘ llash bo‘ yicha olib borilgan tadqiqotlar quyidagi xulosalarga kelish imkonini beradi:

1. Tadqiqotlar shuni ko‘ rsatdiki, AKT darsda o‘ z-o‘ zidan samaradorlikni ta’minlamaydi. Eng yuqori natijaga faqatgina texnologiya va “shaxsga yo‘ naltirilgan” pedagogik metodlar (muammoli ta’lim, loyihaviy yondashuv) sintezi orqali erishiladi. Bunda o‘ qituvchi texnologiyadan maqsad emas, balki bilimlarni chuqurlashtiruvchi vosita sifatida foydalanishi lozim bo‘ ladi.

2. Texnologiyalar darsga kirib kelishi bilan o‘ qituvchi va o‘ quvchi o‘ rtasidagi muloqot shakli o‘ zgaradi. Pedagog endi “axborot uzatuvchi” dan “yo‘ naltiruvchi-fasilitator”ga aylandi. O‘ quvchilarning darsdagi faolligi va motivatsiyasining ortishi bevosita o‘ qituvchining raqamli didaktikani qanchalik to‘ g‘ ri qo‘ llashiga bog‘ liqdir.

3. AKT vositalarini darsning barcha bosqichlarida — yangi mavzuni bayon etishdan tortib, natijalarni baholashgacha tizimli ravishda qo‘ llash vaqtdan unumli foydalanish va qayta aloqani tezlashtirish imkonini beradi.

Yuqoridagilardan kelib chiqib quyidagicha tavsiyalar berish mumkin.

- o‘ qituvchilarning axborot-metodik kompetentligini doimiy oshirib borish, bunda faqat texnik ko‘ nikmalarga emas, balki texnologiyani dars ssenariysiga “singdirish” mahoratiga urg‘ u berish;

- darslarda faqat namoyish etuvchi (passiv) AKT vositalaridan emas, balki o‘ quvchini izlanishga undaydigan (interfaol) raqamli platformalar va virtual laboratoriyalardan keng foydalanish;

- har bir fan yo‘ nalishi bo‘ yicha zamonaviy pedagogik texnologiyalar bilan integratsiyalashgan elektron metodik qo‘ llanmalar bazasini boyitib borish.

Xulosa qilib aytganda, ta’limda texnologiya va inson mahoratining oqilona birlashuvi raqobatbardosh va kreativ fikrlovchi avlodni tarbiyalashning eng mustahkam poydevoridir.

SUN' IY INTELLEKT TEXNOLOGIYALARI YORDAMIDA 7-SINF O' QUVCHILARINING INGLIZ TILIDA GAPIRISH KO' NIKMASINI RIVOJLANTIRISH

Shoisayeva Dilxumora Shojalil qizi
Abdulla Avloniy nomidagi Pedagogik mahorat milliy instituti
E-mail: dilxumora.shoisaeva2306@gmail.com
ORCID: 0009-0001-7549-4151

Annotatsiya: *Maqolada sun' iy intellekt (SI) texnologiyalari – nutqiy chatbotlar, nutqni avtomatik tanish (ASR) tizimlari va generativ SI suhbatdoshlari yordamida 7-sinf o' quvchilarining ingliz tilida gapirish ko' nikmasini rivojlantirish masalasi tahlil qilingan. 2021–2026-yillarda nashr etilgan besh meta-tahlil va to' rt empirik tadqiqot natijalari sintez qilindi. SI vositalarining gapirishga ta' siri o' rta darajada ekani (Hedges g = 0,48–0,69), o' n sakkiz yoshgacha bo' lgan o' quvchilarda g = 0,67 ga tengligi hamda 5–8 haftalik muntazam mashg' ulotlar eng yuqori samara berishi aniqlandi. Shu asosda A2 darajasi deskriptorlariga tayangan to' rt bosqichli metodik model taklif etildi, uni maktabda qo' llashning yosh, xavfsizlik va o' qituvchi nazorati bilan bog' liq shartlari asoslab berildi.*

Kalit so' zlar: *sun' iy intellekt, gapirish ko' nikmasi, chatbot, nutqni avtomatik tanish, 7-sinf, ingliz tili, A2 darajasi, kommunikativ kompetensiya, meta-tahlil.*

РАЗВИТИЕ НАВЫКОВ ГОВОРЕНИЯ НА АНГЛИЙСКОМ ЯЗЫКЕ У УЧАЩИХСЯ 7-ГО КЛАССА С ПОМОЩЬЮ ТЕХНОЛОГИЙ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА

Аннотация: *В статье рассматривается развитие навыков говорения на английском языке у учащихся 7-го класса с помощью технологий искусственного интеллекта (ИИ): речевых чат-ботов, систем автоматического распознавания речи (ASR) и генеративных ИИ-собеседников. Обобщены результаты пяти метаанализов и четырёх эмпирических исследований, опубликованных в 2021–2026 гг. Установлено, что влияние ИИ-средств на говорение имеет средний размер эффекта (Hedges g = 0,48–0,69), для обучающихся младше 18 лет g = 0,67, а наибольший эффект дают регулярные занятия продолжительностью 5–8 недель. На этой основе предложена четырёхэтапная методическая модель, опирающаяся на дескрипторы уровня A2, и обоснованы условия её применения в школе с учётом возраста, безопасности и контроля учителя.*

Ключевые слова: *искусственный интеллект, навык говорения, чат-бот, автоматическое распознавание речи, 7-й класс, английский язык, уровень A2, коммуникативная компетенция, метаанализ.*

DEVELOPING 7TH GRADE STUDENTS' ENGLISH SPEAKING SKILLS THROUGH ARTIFICIAL INTELLIGENCE TECHNOLOGIES

Abstract: *The article examines how artificial intelligence (AI) technologies – voice chatbots, automatic speech recognition (ASR) systems and generative AI interlocutors – can support the development of English speaking skills in 7th grade students. Findings of five meta-analyses and four empirical studies published in 2021–2026 were synthesised. AI tools were found to have a moderate effect on speaking (Hedges' g = 0.48–0.69), with g = 0.67 for learners under 18, and regular practice lasting 5–8 weeks produced the strongest effect. On this basis, a four-stage instructional model aligned with A2 descriptors is proposed, and the conditions for its school use related to age, safety and teacher supervision are justified.*

Keywords: *artificial intelligence, speaking skills, chatbot, automatic speech recognition, 7th grade, English language, A2 level, communicative competence, meta-analysis.*

KIRISH

Gapirish chet tilini o' rganishdagi eng murakkab nutq faoliyati hisoblanadi: o' quvchi fikrni real vaqt ichida shakllantiradi, leksik va grammatik vositalarni tanlaydi, talaffuzni nazorat qiladi va bir vaqtning o' zida suhbatdoshning munosabatini kuzatib boradi [8]. Umumta' lim maktabida bu ko' nikma boshqalariga qaraganda sekinroq rivojlanadi. Sababi oddiy: 30 nafar o' quvchili sinfda 45 daqiqalik darsning yarmi nutqiy mashqlarga ajratilgan taqdirda ham har bir o' quvchiga o' rtacha bir daqiqa atrofida faol gapirish vaqti to' g' ri keladi. Til esa faqat gapirish orqali "ishga tushadi" –

M. Svenning chiqish gipotezasiga ko‘ ra, o‘ quvchi o‘ z nutqini ishlab chiqarish jarayonidagina bilimidagi bo‘ shliqlarni sezadi va ularni to‘ ldirishga intiladi [7].

Me’ yoriy talablar bu masalani yanada dolzarb qiladi. Vazirlar Mahkamasining 2013-yil 8-maydagi 124-son qarori bilan tasdiqlangan davlat ta’ lim standartiga ko‘ ra, 9-sinf bitiruvchisi ingliz tilini A2 darajasida egallashi, jumladan, dialogda to‘ g‘ ri ma’ lumot olib-bera olishi, tanish mavzuda sodda iboralar bilan o‘ z fikrini ifodalashi va qisqa muloqotda ishtirok eta olishi kerak [3]. Shu jihatdan 7-sinf A1 dan A2 ga o‘ tishning hal qiluvchi bosqichi hisoblanadi. Prezidentning 2021-yil 19-maydagi PQ-5117-son qarori xorijiy tillarni o‘ rganishni ommalashtirishni yangi bosqichga olib chiqishni [2], 2024-yil 14-oktabrdagi PQ-358-son qarori bilan tasdiqlangan strategiya esa sun’ iy intellekt texnologiyalarini 2030-yilgacha ta’ lim sohasiga ham keng joriy etishni nazarda tutadi [1].

Amaldagi holat esa hali maqsadlardan ancha uzoq. EF kompaniyasining ingliz tilini bilish indeksida (EF EPI) O‘ zbekiston 2021-yilda 112 mamlakat orasida 88-o‘ rinni egallagan bo‘ lsa, 2025-yilda 123 mamlakat orasida 104-o‘ ringa tushdi va 429 ball bilan “juda past” toifada qoldi [24]. Indeks kattalar o‘ rtasida o‘ tkaziladigan test natijalariga tayansa-da, u maktabda shakllanadigan og‘ zaki nutq ko‘ nikmalari yetarli emasligini bilvosita ko‘ rsatadi.

Xorijiy tadqiqotlarda SI asosidagi suhbatdoshlar aynan “gapirish vaqti tanqisligi” muammosini hal qiluvchi vosita sifatida o‘ rganilmoqda. W. Huang, K.F. Hew va L.K. Fryer 25 empirik tadqiqotni tahlil qilib, chatbotlarning uchta texnologik imkoniyatini – o‘ z vaqtidalik, foydalanish qulayligi va shaxsiylashtirishni ajratib ko‘ rsatgan, shu bilan birga yangilik effekti va kognitiv yuklama kabi xavflarni ham qayd etgan [11]. O‘ zbek mualliflari K. Erkinjonov va M. Kasimova [22], A. Kamolova [23] SI platformalarining nutq ravonligi, talaffuz va lug‘ at boyligiga ijobiy ta’ sirini tavsiflagan. Biroq mahalliy ishlarda 7-sinf o‘ quvchilarining yosh xususiyatlari, A2 deskriptorlari va dars bosqichlari bilan bog‘ langan, empirik dalillarga tayangan metodik model hali ishlab chiqilmagan.

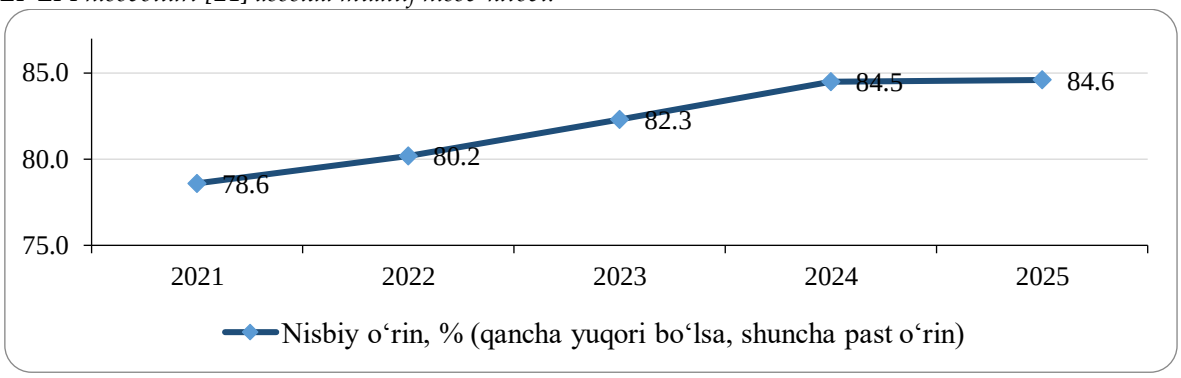
Tadqiqot maqsadi – so‘ nggi yillardagi xalqaro empirik dalillarni tizimli tahlil qilish asosida 7-sinf o‘ quvchilarining ingliz tilida gapirish ko‘ nikmasini SI texnologiyalari yordamida rivojlantirish modelini ishlab chiqish. Maqsaddan kelib chiqib, quyidagi savollarga javob izlandi: 1) SI vositalari gapirish ko‘ nikmasiga qanchalik ta’ sir ko‘ rsatadi; 2) samaradorlik qaysi shartlarga (yosh, davomiylik, muloqot shakli) bog‘ liq; 3) olingan natijalarni 7-sinf dars jarayoniga qanday tatbiq etish mumkin.

MATERIALLAR VA METODLAR

Tadqiqot tahliliy-sintetik dizaynda olib borildi va ikki bosqichdan iborat bo‘ ldi: empirik dalillarni yig‘ ish va sintez qilish hamda ular asosida metodik modelni loyihalash. Manbalar Scite, OpenAlex, Cambridge Core, Frontiers va Google Scholar bazalarida “AI chatbot”, “speaking”, “EFL”, “automatic speech recognition”, “meta-analysis” kalit so‘ zlari birikmasi bo‘ yicha izlandi; qidiruv 2021–2026-yillar bilan chegaralandi.

Tanlov mezonlari quyidagicha belgilandi: a) tadqiqot taqqoslovchi (tajriba – nazorat) dizaynga ega yoki meta-tahlil bo‘ lishi; b) natija sifatida gapirish ko‘ nikmasi yoki uning tarkibiy qismlari (ravonlik, aniqlik, talaffuz, lug‘ at) o‘ lchangan bo‘ lishi; c) effekt hajmi yoki o‘ rtacha qiymatlar hisobotda keltirilgan bo‘ lishi; d) maqola taqrizlanadigan jurnalda chop etilgan bo‘ lishi. Natijada besh meta-tahlil [13; 14; 15; 16; 17], uch empirik tadqiqot [10; 12; 19] va maktab yoshidagi o‘ quvchilar bilan o‘ tkazilgan bitta amaliy tadqiqot [21] tahlilga olindi. Me’ yoriy asos sifatida uchta hujjat [1; 2; 3] va Yevropa umumiy kompetensiyalar doirasi (CEFR) [4] o‘ rganildi.

Effekt hajmlari Hedges g ko‘ rsatkichi bo‘ yicha taqqoslandi va J. Koenning shartli chegaralari asosida talqin qilindi: 0,2 – kichik, 0,5 – o‘ rta, 0,8 va undan yuqori – katta ta’ sir [9]. Birlamchi tadqiqotdagi o‘ rtacha ko‘ rsatkichlardan o‘ sish miqdori (yakuniy va dastlabki test farqi) hisoblab chiqildi. EF EPI ma’ lumotlari uchun nisbiy o‘ rin (egallangan o‘ rin / mamlakatlar soni × 100%) aniqlandi. Metodik model loyihalashda interaksion gipoteza [6], chiqish gipotezasi [7] va affektiv filtr nazariyasi [5; 20] nazariy asos qilib olindi.



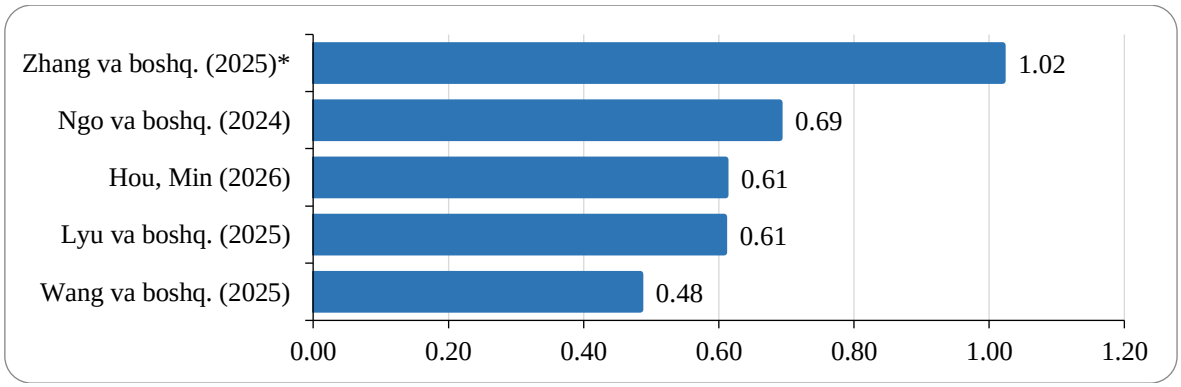
NATIJALAR

Muammoning ko‘ lami. Dastlab O‘ zbekistonda ingliz tilini bilish darajasining so‘ nggi besh yildagi dinamikasi ko‘ rib chiqildi (1-jadval, 1-diagramma).

1-jadval. O‘ zbekistonning EF EPI reytingidagi o‘ rni (2021–2025)

Yil	Egallangan o‘ rin	Mamlakatlar soni	Nisbiy o‘ rin, %	Toifa
2021	88	112	78,6	Juda past
2022	89	111	80,2	Juda past
2023	93	113	82,3	Juda past
2024	98	116	84,5	Juda past
2025	104	123	84,6	Juda past

Manba: EF EPI hisobotlari [24] asosida muallif hisob-kitobi.



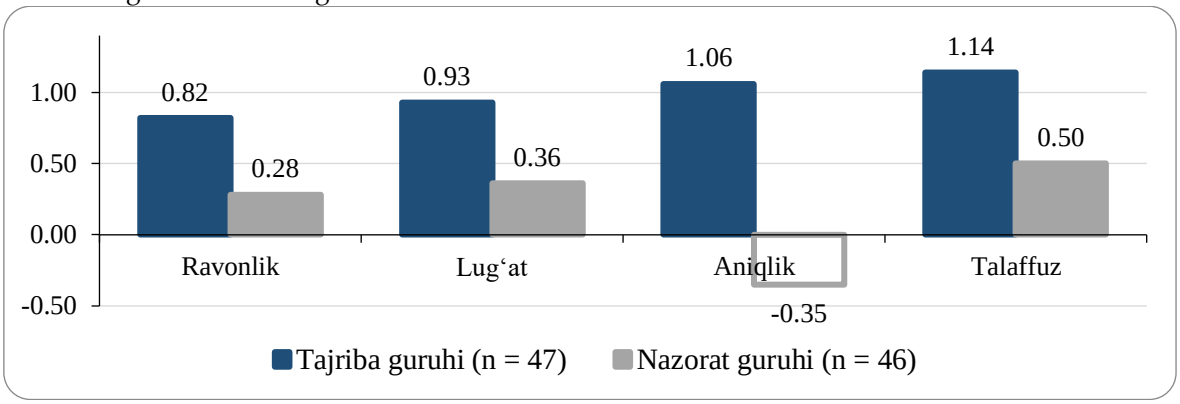
1-diagramma. O‘ zbekistonning EF EPI reytingidagi nisbiy o‘ rni dinamikasi, %

Jadvaldan ko‘ rinib turibdiki, besh yil davomida mamlakat reytingda doimiy ravishda pastlab borgan: nisbiy o‘ rin 78,6 foizdan 84,6 foizga ko‘ tarilgan, ya’ ni O‘ zbekiston ro‘ yxatning quyi beshdan bir qismiga yaqinlashgan. 2025-yilda ball oldingi yilga nisbatan 10 ballga kamaygan [24]. Bu holat an’ anaviy darslarga qo‘ shimcha ravishda o‘ quvchiga individual og‘ zaki amaliyot beradigan vositalarga ehtiyoj borligini ko‘ rsatadi.

SI vositalarining umumiy samaradorligi. Tahlilga olingan meta-tahlillarning asosiy ko‘ rsatkichlari 2-jadval va 2-diagrammada umumlashtirildi.

2-jadval. SI asosidagi til o‘ rgatish vositalari bo‘ yicha meta-tahlillar natijalari

Meta-tahlil	Yo‘ nalish	Tadqiqotlar (effektlar) soni	Umumiy effekt, g	Talqin
F. Wang va boshq., 2025 [15]	Chatbot yordamida til o‘ rganish	28 (70)	0,48	O‘ rta
B. Lyu va boshq., 2025 [16]	Chatbotlar, taqqoslovchi tadqiqotlar	31 (41)	0,61	O‘ rta
Z. Hou, S. Min, 2026 [17]	Dialogli CALL tizimlari va gapirish	16 (89)	0,61	O‘ rta
T.T.-N. Ngo va boshq., 2024 [14]	ASR va talaffuz	15 (38)	0,69	O‘ rta
J. Zhang va boshq., 2025 [13]	Chatbot va generativ SI (kichik guruh)	6	1,02	Katta



2-diagramma. SI vositalarining til o‘ rganishga ta’ siri bo‘ yicha umumiy effekt hajmlari (Hedges g)

** Zhang va boshqalar natijasi atigi olti tadqiqotdan iborat kichik guruhga tegishli.*

Yirik meta-tahlillarning barchasi o‘ rta darajadagi ijobiy ta’ sirni qayd etgan. Muhimi, ular turli davrlar, turli tizimlar va turli namunalarga asoslangan bo‘ lsa-da, natijalar 0,48–0,69 oralig‘ ida to‘ plangan. Bu natijaning barqarorligidan dalolat beradi. Faqat gapirishga yo‘ naltirilgan Z. Hou va S. Min tadqiqoti (g = 0,61) uchun ahamiyatli omillar tizim turi, ma’ no cheklanganligi va muloqot modalligi bo‘ lib chiqqan, ta’ lim bosqichi va mashg‘ ulot davomiyligi esa natijaga sezilarli ta’ sir ko‘ rsatmagan [17]. Demak, maktab o‘ quvchilari ham kattalar kabi SI bilan muloqotdan foyda ko‘ ra oladi. J. Zhang va boshqalar olgan yuqori ko‘ rsatkich (g = 1,02) istiqbolli, biroq tadqiqotlar soni kamligi sababli uni ehtiyotkorlik bilan talqin qilish lozim [13].

Gapirish ko‘ nikmasining tarkibiy qismlari. H. Qiao va A. Zhao tadqiqotida 93 nafar o‘ quvchi tasodifiy ravishda ikki guruhga ajratilgan: tajriba guruhi 13 hafta davomida nutqni tanish va shaxsiy fikr-mulohaza beruvchi SI ilovasida shug‘ ullangan, nazorat guruhi an’ anaviy usulda o‘ qitilgan [12]. Mualliflar keltirgan o‘ rtacha ball (7 ballik shkala) asosida hisoblangan o‘ sish 3-diagrammada berilgan.

3-diagramma. Gapirish tarkibiy qismlari bo‘ yicha o‘ sish (yakuniy va dastlabki test farqi, ball) [12] ma’ lumotlari asosida

Tajriba guruhida barcha to‘ rt ko‘ rsatkich bo‘ yicha o‘ sish nazorat guruhidagiga nisbatan ikki-uch baravar yuqori bo‘ lgan, eng katta farq talaffuz (+1,14) va grammatik aniqlikda (+1,06) kuzatilgan. Nazorat guruhida aniqlik hatto pasaygan (–0,35). Regressiya tahlilida SI ta’ siri to‘ rtala komponent uchun ham statistik ahamiyatli chiqqan (ravonlik uchun B = 0,65; p = 0,006) [12]. Shunga yaqin natija W. Sun tadqiqotida ham olingan: 14 haftalik ASR mashg‘ ulotlaridan so‘ ng o‘ quvchilar nutqining tushunarliligi bo‘ yicha guruhlar farqi $F(1,58) = 19,44$; $p < 0,001$; qisman $\eta^2 = 0,251$ ni tashkil etgan [19].

Maktab yoshi va samaradorlik shartlari. 7-sinf uchun bevosita ahamiyatli dalillar kam, biroq mavjudlari juda aniq. H. Yang va hamkorlari 10–15 yoshli 314 nafar koreys o‘ quvchisi bilan sinf sharoitida “Ellie” ovozli chatbotini sinovdan o‘ tkazgan: o‘ quvchilar bir mashg‘ ulotda o‘ rtacha 9,63 marta navbat bilan gapirgan, topshiriqlarni muvaffaqiyatli bajarish ulushi 88,3% ga yetgan, nutq asosan eng ko‘ p ishlatiladigan 1000 so‘ z doirasida kechgan [21]. H.-S. Kim va hamkorlari 110 nafar ishtirokchi bilan o‘ tkazgan tajribada ovozli chat guruhi fikr bildirish topshirig‘ ida yuzma-yuz va matnli chat guruhlaridan yuqori natija ko‘ rsatgan [10]. Samaradorlik shartlari bo‘ yicha eng batafsil ma’ lumot T.T.-N. Ngo va hamkorlarining meta-tahlilida keltirilgan (3-jadval).

3-jadval. ASR vositalari samaradorligining moderator omillarga bog‘ liqligi [14]

Omil	Guruh	Effekt, g	Talqin
Yosh	18 yoshgacha	0,67	O‘ rta
	18 yosh va undan katta	1,20	Katta
Til darajasi	Boshlang‘ ich	1,33	Katta
	O‘ rta	0,80	Katta
	Yuqori	0,48	Kichik–o‘ rta
Davomiylik	1–4 hafta	0,07	Sezilarsiz
	5–8 hafta	1,01	Katta
	9 hafta va undan ortiq	0,72	O‘ rta

Ushbu ma’ lumotlardan 7-sinf uchun uchta amaliy xulosa kelib chiqadi. Birinchidan, 18 yoshgacha bo‘ lgan o‘ quvchilarda ham o‘ rta darajadagi ta’ sir (g = 0,67) kuzatiladi. Ikkinchidan, boshlang‘ ich darajadagi o‘ quvchilar eng ko‘ p foyda ko‘ radi (g = 1,33), bu esa A1–A2 darajasidagi 7-sinf o‘ quvchilari uchun qulay omil. Uchinchidan, bir-to‘ rt haftalik qisqa kurslar deyarli natija bermaydi (g = 0,07), shuning uchun SI mashg‘ ulotlari kamida besh-sakkiz hafta davomida muntazam o‘ tkazilishi kerak.

MUHOKAMA

Olingan natijalarni nazariy jihatdan izohlash mumkin. M. Long interaksion gipotezasiga ko‘ ra, til egallash suhbat jarayonida ma’ noni aniqlashtirish, qayta so‘ rash va tuzatishlar orqali tezlashadi [6]. SI suhbatdoshi o‘ quvchiga aynan shu imkoniyatni cheksiz miqdorda taqdim etadi: u charchamaydi, o‘ quvchi javobini kutib turadi va savolni boshqacha shaklda

qayta beradi. Svenning chiqish gipotezasi nuqtayi nazaridan esa SI sinfdagi bir daqiqalik nutq vaqtini o‘ nlab navbatlarga ko‘ paytiradi [7; 21]. Affektiv omil ham muhim: E. Horvits va hamkorlari tavsiflagan chet tilidagi muloqot xavotiri [5] tengdoshlar oldida xato qilish qo‘ rquvi bilan kuchayadi, S. Krashenning affektiv filtr nazariyasiga ko‘ ra esa bunday xavotir kiruvchi ma’ lumotni o‘ zlashtirishga to‘ sqinlik qiladi [20]. Tizimli sharhlarda o‘ quvchilar chatbotni “kamroq tanqid qiladigan tinglovchi” sifatida qabul qilishi qayd etilgan [18]. Bu ayniqsa o‘ smirlik davriga kirayotgan 7-sinf o‘ quvchilari uchun muhim.

Shu dalillar asosida 7-sinf uchun to‘ rt bosqichli metodik model ishlab chiqildi (4-jadval). Modelda Hou va Min aniqlagan omil – ma’ noni cheklash hisobga olindi: dastlabki bosqichlarda topshiriq mavzusi va leksik doirasi aniq belgilanadi, erkin muloqotga esa keyinroq o‘ tiladi [17].

4-jadval. SI yordamida 7-sinf o‘ quvchilarining gapirish ko‘ nikmasini rivojlantirish modeli

Bosqich	SI vositasi va funksiyasi	O‘ quvchi faoliyati	A2 bo‘ yicha kutilgan natija
1. Tayyorlov (5–7 daq.)	ASR asosidagi talaffuz mashqlari; so‘ z va iboralarni ovoz chiqarib takrorlash, darhol fikr-mulohaza olish	Mavzu leksikasi va 5–6 ta tayanch iborani talaffuz qilish	Tanish so‘ z va iboralarni tushunarli talaffuz qiladi
2. Boshqariladigan dialog (10 daq.)	Mavzusi va leksikasi cheklangan topshiriqli ovozli chatbot (masalan, do‘ kondan xarid, yo‘ l so‘ rash)	Chatbot bilan 8–10 navbatli dialog; ma’ lumot so‘ rash va berish	Dialogda to‘ g‘ ri ma’ lumot oladi va beradi
3. Erkin muloqot (10 daq.)	Generativ SI suhbatdoshi rol o‘ yinida (o‘ qituvchi qurilmasi yoki sinf rejimi)	Tanish mavzuda fikr bildirish, savolga javob qaytarish	Sodda iboralar bilan o‘ z fikrini ifodalaydi
4. Refleksiya va baholash (5–8 daq.)	Suhbat transkripti; o‘ qituvchi rubrikasi asosida tahlil	Xatolarni topish, dialogni juftlikda qayta ijro etish	Qisqa muloqotda ishtirok etadi, o‘ z nutqini baholaydi

Model haftasiga ikki dars va ikki 15 daqiqalik uy mashg‘ uloti tarzida kamida 6–8 hafta davomida qo‘ llanishi tavsiya etiladi; bu Ngo va hamkorlari aniqlagan eng samarali davomiylikka mos keladi [14]. Baholash CEFR ning og‘ zaki o‘ zaro muloqot deskriptorlari [4] va davlat ta’ lim standartidagi A2 talablari [3] asosida olib boriladi.

Modelni joriy etishda bir qator cheklovlarni hisobga olish zarur. Birinchidan, YUNESKO generativ SI platformalari bilan mustaqil muloqot uchun yosh chegarasini belgilashni tavsiya qiladi va 13 yoshni minimal chegara sifatida ko‘ rsatadi [25]. 7-sinf o‘ quvchilarining bir qismi bu yoshga yetmaganini inobatga olib, uchinchi bosqichda shaxsiy akkauntlardan emas, balki o‘ qituvchi nazoratidagi qurilma yoki bolalar uchun mo‘ ljallangan maxsus platformalardan foydalanish maqsadga muvofiq. Ikkinchidan, Huang va hamkorlari ko‘ rsatganidek, yangilik effekti vaqt o‘ tishi bilan susayadi [11], shuning uchun topshiriqlar turini muntazam yangilab borish kerak. Uchinchidan, tizimli sharhlarda SI bir xil javoblarni takrorlashi va o‘ qituvchining kontekstli fikr-mulohazasini to‘ liq almashtira olmasligi qayd etilgan [18]. Shu sababli SI o‘ qituvchining o‘ rnini emas, balki darsdan tashqari og‘ zaki amaliyot hajmini oshiruvchi vosita sifatida ko‘ rilishi lozim.

Tadqiqotning cheklovi shundaki, tahlil qilingan empirik ishlarning ko‘ pchiligi oliy ta’ lim talabalari bilan o‘ tkazilgan, 12–13 yoshli o‘ quvchilar bo‘ yicha dalillar hali kam. Shu sababli taklif etilgan modelni umumta’ lim maktablarida tajriba va nazorat guruhlari ishtirokidagi pedagogik tajriba orqali tekshirish keyingi tadqiqotimizning vazifasi hisoblanadi.

XULOSA

1. So‘ nggi yillardagi meta-tahlillar SI vositalarining til o‘ rganishga, xususan, gapirish ko‘ nikmasiga o‘ rta darajadagi barqaror ijobiy ta’ sirini tasdiqlaydi (g = 0,48–0,69). Bu natija turli mamlakatlar, tizimlar va namunalarda takrorlangani uchun ishonchli dalil hisoblanadi.

2. SI ning eng kuchli ta’ siri talaffuz va grammatik aniqlikda namoyon bo‘ ladi; ta’ lim bosqichi natijaga sezilarli ta’ sir ko‘ rsatmaydi, boshlang‘ ich darajadagi o‘ quvchilar esa eng ko‘ p foyda ko‘ radi. Bu 7-sinf o‘ quvchilari uchun qulay sharoit yaratadi.

3. Samaradorlikning asosiy sharti – mashg‘ ulotlarning muntazamligi va davomiyligi: bir-to‘ rt haftalik qisqa kurslar natija bermaydi, 5–8 haftalik tizimli amaliyot esa katta ta’ sir ko‘ rsatadi.

4. Taklif etilgan to‘ rt bosqichli model (tayyorlov – boshqariladigan dialog – erkin muloqot – refleksiya) A2 darajasi talablariga, ma’ noni cheklash tamoyiliga va yosh xavfsizligi talablariga tayanadi. Uni o‘ qituvchi nazoratida, SI ni o‘ qituvchining yordamchisi sifatida qo‘ llash maktabda gapirish vaqti tanqisligini kamaytirishning real yo‘ li bo‘ la oladi.

TASHKILIY MADANIYATNI SHAKLLANTIRISHDA RAHBARNING PSIXOLOGIK YETAKCHILIK QOBILIYATLARI

Turaxanov Ummatali Davlatovich
Namangan davlat universiteti
Psixologiya kafedrasi mudiri,
Psixologiya fanlari bo‘ yicha (PhD),

Annotatsiya: *So‘ ngi yillarda turli jabhalarda rahbarlik, ulardagi yetakchilik qobiliyatiga bo‘ lgan qiziqishlar ortib bormoqda. Ushbu maqolada tashkiliy madaniyatni shakllantirish jarayonida rahbarning psixologik yetakchilik qobiliyatlari qanday ahamiyat kasb etishi atroflicha yoritib beriladi. Xususan, zamonaviy boshqaruv tizimida rahbar shaxsining emotsional barqarorligi, uning kommunikativ mahorati, motivatsiya berish uslublari va jamoaga ta’sirchan psixologik muhit yaratishdagi roli tahlil qilinadi. Maqolada boshqaruv psixologiyasining turli nazariy modellari asosida rahbarning xulq-atvori, qaror qabul qilish jarayonidagi psixologik omillar, hamda tashkilotning umumiy qadriyatlari va xulq me’yorlarini shakllantirishga qaratilgan amaliy yondashuvlar o‘ rganiladi. Shuningdek, jamoa ichida ishonch, mas’uliyat va hamkorlik ruhini mustahkamlashda rahbarning shaxsiy fazilatlari qanchalik muhim ekanligi ilmiy dalillar asosida ko‘ rsatib beriladi. Tadqiqotlar shuni ko‘ rsatadiki, tashkilotlarda barqaror tashkiliy madaniyatni shakllantirish uchun rahbarning psixologik yetukligi asosiy strategik omil ekanini ko‘ rsatadi.*

Kalit so‘ zlar: *tashkiliy madaniyat, rahbar psixologiyasi, yetakchilik qobiliyati, emotsional intellekt, kommunikativ kompetensiya, motivatsiya, jamoa psixologiyasi, boshqaruv madaniyati, psixologik ta’sir, tashkilot qadriyatlari, ijtimoiy-psixologik muhit, liderlik uslublari.*

ПСИХОЛОГИЧЕСКИЕ НАВЫКИ ЛИДЕРСТВА В ФОРМИРОВАНИИ ОРГАНИЗАЦИОННОЙ КУЛЬТУРЫ

Аннотация: *В данной статье всесторонне освещается значение психологических лидерских качеств руководителя в процессе формирования организационной культуры. В частности, анализируется роль эмоциональной устойчивости руководителя, его коммуникативных навыков, методов мотивации и умения создавать психологически благоприятную атмосферу в коллективе в условиях современной системы управления. На основе различных теоретических моделей психологии лидерства рассматриваются особенности поведения руководителя, психологические факторы принятия решений, а также практические подходы, направленные на формирование общих ценностей и норм поведения в организации. Кроме того, с научной точки зрения обосновано, насколько важными являются личностные качества руководителя для укрепления доверия, ответственности и духа сотрудничества внутри коллектива. Результаты исследования подтверждают, что психологическая зрелость руководителя является ключевым стратегическим фактором в формировании устойчивой организационной культуры.*

Ключевые слова: *организационная культура, психология руководителя, лидерские качества, эмоциональный интеллект, коммуникативная компетентность, мотивация, психология коллектива, управленческая культура, психологическое влияние, ценности организации, социально-психологическая среда, стили лидерства.*

THE LEADER’S PSYCHOLOGICAL LEADERSHIP SKILLS IN SHAPING ORGANIZATIONAL CULTURE

Abstract: *This article provides an in-depth analysis of the significance of a leader’s psychological leadership abilities in the process of forming organizational culture. In particular, it examines the role of a leader’s emotional stability, communicative competence, motivational strategies, and the ability to create a psychologically supportive atmosphere within a team in the context of modern management systems. Based on various theoretical models of leadership psychology, the study explores the leader’s behavior, the psychological factors influencing decision-making, as well as practical approaches aimed at shaping the organization’s core values and behavioral norms. Furthermore, the article presents scientific evidence demonstrating the importance of the leader’s personal qualities in strengthening trust, responsibility, and a spirit of cooperation within the team. The findings confirm that the psychological maturity of a leader is a key strategic factor in establishing a stable and sustainable organizational culture.*

Keywords: *organizational culture, leadership psychology, leadership competence, emotional intelligence, communicative competence, motivation, group psychology, management culture, psychological influence, organizational values, socio-psychological environment, leadership styles.*

KIRISH

Bugungi kunda tashkilotlar muvaffaqiyati nafaqat strategik rejalashtirish va texnologik resurslarga, balki rahbarlarning psixologik yetakchilik qobiliyatiga ham bog‘ liqdir. Tashkiliy madaniyat – bu xodimlar o‘ rtasidagi o‘ zaro munosabatlar, ish jarayonlari, qadriyatlar va me’yorlar majmui bo‘ lib, uning shakllanishi rahbarning psixologik kompetensiyalari, motivatsion qobiliyatlari va kommunikatsion ko‘ nikmalari bilan bevosita bog‘ liq. Zamonaviy rahbar nafaqat qaror qabul qiluvchi, balki ijtimoiy psixologik muhitni boshqaruvchi, xodimlarning ishga bo‘ lgan motivatsiyasini oshiruvchi va tashkilotda sog‘ lom madaniyatni shakllantiruvchi yetakchi sifatida harakat qiladi. Shu sababli, rahbarning psixologik yetakchilik qobiliyatlari hamda ularning tashkiliy madaniyatga ta’siri mavzusi zamonaviy boshqaruv psixologiyasida dolzarb va tadqiqotga muhtoj masala hisoblanadi. Zamonaviy tashkilotlarda muvaffaqiyatning asosiy omillaridan biri — bu boshqaruv jarayonida shakllanadigan tashkiliy madaniyatning barqaror va samarali bo‘ lishidir. Tashkiliy madaniyat nafaqat korxonaning ichki me’yorlari, qadriyatlari va xulq-atvor standartlarini belgilaydi, balki jamoaning ishga munosabati, motivatsiya darajasi hamda umumiy ruhiyatini boshqaruvchi kuch sifatida namoyon bo‘ lishi bilan yaqqol ko‘ zga tashlanadi. Bunday murakkab tizimni shakllantirish va uni to‘ g‘ ri yo‘ naltirish esa, avvalo, rahbarning psixologik yetakchilik qobiliyatiga bog‘ liq bo‘ ladi.

Yetakchilikning psixologik jihatlari rahbarning o‘ z jamoasi bilan o‘ rnatadigan ishonchli muloqoti, emotsional barqarorligi, muammoli vaziyatlarda oqilona qaror qabul qila olishi va xodimlarni bir maqsad atrofida birlashtirish mahorati orqali namoyon bo‘ ladi. Aynan shu sifatlar rahbarning tashkilot ichida ijobiy muhit yaratishiga, qadriyatlarni shakllantirishiga hamda xodimlar o‘ rtasida mas’uliyat hissini kuchaytirishiga asos bo‘ ladi. Bugungi globallashuv sharoitida tashkilotlar o‘ z oldiga qo‘ yayotgan vazifalar tobora murakkablashib borar ekan, rahbarning psixologik yetakchilik darajasi ham yangicha yondashuvni talab etmoqda. Xodimlarning ehtiyojlarini anglash, jamoada sog‘ lom kommunikatsiyani yo‘ lga qo‘ yish va zamonaviy boshqaruv uslublarini qo‘ llash tashkiliy madaniyatni mustahkamlashning eng muhim shartlaridandir. Shu bois, rahbarning psixologik yetakchilik ko‘ nikmalari nafaqat boshqaruv samaradorligiga, balki butun tashkilotning raqobatbardoshligiga ham bevosita ta’sir ko‘ rsatadi.

Mazkur maqolada tashkiliy madaniyatni shakllantirish jarayonida rahbarning ijtimoiy psixologik yetakchilik qobiliyati qanday rol o‘ ynashi, uning asosiy komponentlari va amaliy ahamiyati atroflicha yoritib beriladi.

ADABIYOTLAR TAHLILI VA METODOLOGIYA.

Tashkiliy madaniyat va yetakchilik psixologiyasi bo‘ yicha ilmiy manbalar ushbu sohaning murakkab, ko‘ p qatlamli tuzilishga ega ekanligini ko‘ rsatadi. Ilmiy adabiyotlarda tashkiliy madaniyatga turlicha yondashuvlar mavjud bo‘ lib, ularning aksariyati rahbarning shaxsiy fazilatlari va psixologik yetakchilik uslubi bilan chambarchas bog‘ liqligini ta’kidlaydi. Tadqiqotlarda rahbarning mas’uliyatni bo‘ lisha olishi, xodimlarni qo‘ llab-quvvatlashi hamda ochiq muloqot yaratishi madaniyatning shakllanishida hal qiluvchi rol o‘ ynashi qayd etiladi. Psixologik yetakchilikning fundamental tushunchalari D. Goulman, K. Levin va J. Burns kabi tadqiqotchilar ishlanmalarida keng yoritilgan. Ayniqsa, emotsional intellekt rahbarlarning yetakchilik samaradorligining muhim tarkibiy qismi sifatida e’tirof etiladi.

Adabiyotlarda stressni boshqarish, konfliktologiya, jamoaviy munosabatlar va kommunikatsion kompetensiyalar ham rahbarning madaniyatga ta’sir etuvchi eng asosiy psixologik omillar qatoriga kiritiladi. Ko‘ plab zamonaviy tadqiqotlarda transformatsion yetakchilik modeli – ya’ni xodimlarni qo‘ llab-quvvatlash, ularni rivojlanishga yo‘ naltirish va umumiy maqsad sari safarbar etish – tashkiliy madaniyatni barqarorlashtiruvchi eng samarali yondashuv sifatida ko‘ rsatilgan.

Ayni paytda mahalliy olimlar tomonidan olib borilgan tadqiqotlarda ham rahbarning insonparvar yondashuvi, ijtimoiy-psixologik muhitni boshqarish qobiliyati va xodimlar bilan hamkorlikda ishlash madaniyati tashkilotning barqaror rivojiga bevosita ta’sir qilishi ta’kidlanadi. Umuman olganda, mavjud ilmiy manbalar rahbarning psixologik yetakchilik sifatlari tashkiliy madaniyatni shakllantiruvchi asosiy omillardan biri ekanligini tasdiqlaydi.

Tashkiliy madaniyat va rahbarlik psixologiyasi bo‘ yicha tadqiqotlar keng qamrovli bo‘ lib, bir nechta asosiy yo‘ nalishlarni ajratish mumkin. Masalan:

- Tashkiliy madaniyat nazariyasi – S. Robbins, E. Schein va P. Drucker kabi olimlar tashkiliy madaniyatni tashkilotning ichki qadriyatlari, ish jarayonlari va xodimlar o‘ rtasidagi o‘ zaro munosabatlar orqali shakllanishini ta’kidlashadi.
- Psixologik yetakchilik modeli – D. Goleman, J. Kotter va B. Bass rahbarning psixologik kompetensiyalari (emotsional intellekt, motivatsion strategiyalar, kommunikatsiya) tashkilot madaniyatiga qanday ta’sir ko‘ rsatishi masalasini o‘ rganadi.

- Motivatsiya va ijtimoiy psixologik jihatlar – Maslow va Herzbergning motivatsiya nazariyalari rahbarning xodimlarga ta’siri va ularni samarali ishlashga undashdagi roli bilan bog‘ liq.
- Empirik tadqiqotlar – So‘ nggi yillarda o‘ tkazilgan tadqiqotlar rahbarning psixologik yetakchilik qobiliyatlari va tashkiliy madaniyat o‘ rtasida mustahkam korrelyatsiya mavjudligini ko‘ rsatmoqda, xususan, ijobiy psixologik muhit va xodimlarning ishga sodiqligi oshadi.

Adabiyotlar tahlili shuni ko‘ rsatadiki, rahbarning psixologik yetakchilik qobiliyatlari tashkiliy madaniyatni shakllantirishda markaziy omil sifatida muhim rol o‘ ynaydi va u samarali boshqaruvni ta’minlashning asosiy negizi hisoblanadi.

Tadqiqotning metodologik asoslari zamonaviy boshqaruv psixologiyasi, tashkiliy xulq-atvor nazariyalari va yetakchilik psixologiyasiga oid ilmiy yondashuvlarga tayangan holda shakllantirildi. Maqolada quyidagi ilmiy metodlar qo‘ llanildi:

- Nazariy tahlil metodi Tashkiliy madaniyat, yetakchilik psixologiyasi, emotsional intellekt, kommunikatsiya jarayonlari va motivatsiya nazariyalariga doir ilmiy manbalar chuqur o‘ rganildi. Ular asosida rahbarning psixologik yetakchilik kompetensiyalarini baholash uchun asosiy mezonlar ajratib olinadi.
- Qiyosiy tahlil metodi Mahalliy va xorijiy olimlarning konsepsiyalari solishtirilib, turli yondashuvlarning umumiy va farqli jihatlari aniqlab berildi. Bu usul rahbarning psixologik ta’sir mexanizmlari turli tashkiliy madaniyatlarda qanday namoyon bo‘ lishini tushunishga yordam berdi.
- Tizimli yondashuv Rahbar shaxsiy fazilatlarining tashkiliy madaniyat bilan o‘ zaro bog‘ liqligi kompleks tizim sifatida tahlil qilindi. Tashkilot ichidagi psixologik muhit, xodimlarga berilgan motivatsiya, muloqot jarayonlari va boshqaruv uslublarining o‘ zaro ta’siri yagona tizim sifatida ko‘ rib chiqildi.
- Axborot manbalarini kontent-tahlil qilish mavzuga doir ilmiy maqolalar, tadqiqotlar, statistik ma’lumotlar va amaliy tajriba materiallari tahlil qilinib, umumiy xulosalar berildi.

Ushbu metodlar orqali rahbarlarning tashkiliy madaniyatlarini oshirish jamoaviy muhitni sog‘ lomlashtirish yanada qulaylashganini ko‘ rishimiz mumkin.

- Ilmiy umumlashtirish metodi Olingan nazariy ma’lumotlar sintez qilinib, rahbarning psixologik yetakchilik qobiliyatining tashkiliy madaniyatga ta’siri bo‘ yicha umumiy ilmiy xulosalar shakllantirildi.
- Kvalitativ metodlar – Rahbarlar va xodimlar bilan intervyu o‘ tkazish, ularning tashkiliy madaniyat va rahbarlik qobiliyatlari haqidagi fikrlarini tahlil qilish.
- Kvantitativ metodlar – So‘ rovnomalar orqali xodimlarning rahbarning psixologik yetakchilik qobiliyati va tashkilotdagi madaniyatni baholash. Masalan, Likert shkalasi yordamida motivatsiya, ishonch va ishga sadoqat ko‘ rsatkichlarini o‘ lchash.
- Korrelyatsion tahlil – Rahbarning yetakchilik qobiliyati va tashkiliy madaniyat ko‘ rsatkichlari o‘ rtasidagi bog‘ liqlikni aniqlash.
- Tadqiqot obyekti va subyekti – Obyekt: tashkilotlarning ichki madaniyati; Subyekt: rahbarlar va xodimlar.
- Ma’lumotlarni tahlil usullari – Deskriptiv statistika, korrelyatsion tahlil, sifatli ma’lumotlarni kontent tahlili.

Yuqoridagi metodologiya rahbar shaxsining psixologik yetakchilik qobiliyati tashkiliy madaniyat shakllanishidagi o‘ rnini aniq va ilmiy asoslangan tarzda tadqiq qilish imkonini beradi.

Natijalar: Tadqiqotlar natijasi shuni ko‘ rsatadiki, rahbarning psixologik yetakchilik qobiliyatlari tashkilotning madaniyatiga sezilarli darajada ta’sir qiladi. Xususan:

- Rahbarning psixologik yetakchilik qobiliyati va xodimlarning motivatsiyasi: So‘ rovnoma va intervyular natijalari rahbarning emotsional intellekti yuqori bo‘ lgan tashkilotlarda xodimlar ishga yuqori motivatsiya bilan yondashishini ko‘ rsatdi. Ular o‘ z ishini qadrlashadi, tashkiliy qadriyatlar bilan uyg‘ unlashadi va samarali jamoaviy ishlashga intiladi.
- Tashkiliy madaniyatni shakllantirishdagi rahbar roli: Rahbarlar samarali kommunikatsiya va ijobiy psixologik muhit yaratish orqali xodimlar orasida ochiq fikr almashish va hamkorlikni rag‘ batlantiradi. Shu sababli, tashkilot ichidagi ishonch va qo‘ llab-quvvatlash tizimi mustahkamlanadi.
- Rahbarning motivatsion strategiyalari: Rahbar xodimlarni rag‘ batlantirishda individual yondashuvni qo‘ llaganda, ularning tashkiliy qadriyatlarni qabul qilishi va tashkilot madaniyatini rivojlantirishdagi faolligi oshadi. Masalan, shaxsiy maqsadlarni tashkilot maqsadlariga moslashtirish orqali xodimlarning ishga sadoqati kuchayadi.
- Korrelyatsion tahlil natijalari: Rahbarning psixologik yetakchilik qobiliyati va tashkiliy madaniyat o‘ rtasida ijobiy korrelyatsiyaning mavjudligi ular o‘ rtasida uzviy bog‘ liqlik borligini tasdiqlaydi.

Natijalar shuni ko‘ rsatadiki, zamonaviy rahbarning psixologik yetakchilik qobiliyatlari tashkilotning madaniyatini rivojlantirishda hal qiluvchi rol o‘ ynaydi. Samarali rahbar xodimlarning motivatsiyasi, tashkiliy qadriyatlar bilan

uyg‘ unligi va jamoaviy ishlash ko‘ rsatkichlarini sezilarli darajada oshiradi. Shu bilan birga, ijobiy psixologik muhit va muloqot tashkilotning umumiy samaradorligini kuchaytiradi.

MUHOKAMA.

Tadqiqot natijalari shuni ko‘ rsatdiki, rahbarning psixologik yetakchilik qobiliyatlari tashkilotning madaniyati shakllanishida muhim omil hisoblanadi. Bu natija S. Robbins, E. Schein va D. Golemanning ilgari surgan nazariy fikrlari bilan mos keladi. Xususan, tadqiqot shuni ko‘ rsatdiki, rahbarning emotsional intellekti va motivatsion strategiyalari xodimlarning ishga bo‘ lgan sadoqati va tashkiliy qadriyatlarni qabul qilish darajasini oshiradi. Bu Scheinning tashkiliy madaniyatni rahbar faoliyati orqali shakllanishi haqidagi fikrini tasdiqlaydi. Shuningdek, natijalar rahbarning ijobiy kommunikatsion yondashuvi va xodimlar bilan ochiq muloqot tashkil etish orqali jamoaviy ish samaradorligini oshirishini ko‘ rsatdi. Samarali rahbar faqat topshiriqlarni boshqaruvchi emas, balki ijtimoiy-psixologik muhitni shakllantiruvchi sifatida ham faol bo‘ lishi zarurligini anglatadi. Rahbarning psixologik yetakchilik qobiliyatlari tashkilot ichidagi motivatsiya va ishga sadoqatni oshiradi, bu esa o‘ z navbatida madaniyatning barqaror rivojlanishiga olib keladi. Shu bilan birga, empirik natijalar rahbarning yetakchilik qobiliyati bilan tashkiliy madaniyat o‘ rtasida sezilarli korrelyatsiya mavjudligini tasdiqladi. Bu esa, oldingi nazariy tadqiqotlar natijalarini mustahkamlaydi va zamonaviy boshqaruv psixologiyasida rahbar psixologik kompetensiyalari ahamiyatini yana bir bor ko‘ rsatadi. Muhokama natijalar shuni ta’kidlaydiki, tashkilotlarda samarali tashkiliy madaniyatni shakllantirish uchun rahbarlar nafaqat texnik va strategik qobiliyatga, balki psixologik yetakchilik qobiliyatlariga ega bo‘ lishi zarur. Shu sababli, rahbarlar uchun maxsus treninglar, emotsional intellektni rivojlantirish va kommunikatsiya ko‘ nikmalarini oshirish bo‘ yicha dasturlarni joriy etish tavsiya etiladi.

XULOSA.

Tadqiqot natijalari shuni ko‘ rsatmoqdaki, zamonaviy tashkilotlarda samarali tashkiliy madaniyatni shakllantirishda rahbarning psixologik yetakchilik qobiliyatlari markaziy o‘ rin tutadi. Rahbarning emotsional intellekti, uning motivatsion strategiyalari va kommunikatsion ko‘ nikmalari xodimlarning ishga sadoqati, tashkiliy qadriyatlarni qabul qilishi va jamoaviy ish samaradorligini oshirishga bevosita ta’sir ko‘ rsatadi. Shu bilan birga, rahbarning psixologik yondashuvi tashkilot ichidagi ijobiy muhitni mustahkamlash va xodimlar o‘ rtasida ochiq muloqot, hamkorlik va ishonchni rag‘ batlantirishga yordam beradi.

Adabiyotlar tahlili va empirik tadqiqot natijalari bir-birini tasdiqlab, rahbarning psixologik yetakchilik qobiliyatlari va tashkiliy madaniyat o‘ rtasida mustahkam bog‘ liqlik mavjudligini ko‘ rsatadi. Korrelyatsion tahlil natijalari esa rahbar psixologik kompetensiyalarining tashkilot madaniyatiga ta’sirini aniq ko‘ rsatadi. Bu esa, zamonaviy boshqaruv psixologiyasida rahbarlarni nafaqat strategik va texnik ko‘ nikmalarga, balki psixologik yetakchilik qobiliyatlarini rivojlantirishga ham e’tibor qaratish zarurligini isbotlaydi.

Amaliy jihatdan, tadqiqot natijalari rahbarlar uchun emotsional intellekt, motivatsiya va kommunikatsiya ko‘ nikmalarini yanada rivojlantirishga qaratilgan treninglar, psixologik konsultatsiya va tavsiyalar ishlab chiqish tizimlarini joriy etishni tavsiya qiladi. Shu orqali tashkilotlarda ijobiy muhit shakllanadi, xodimlar ishga yuqori motivatsiya bilan yondashadi va umumiy samaradorlik oshadi.

Shunday qilib, rahbarning psixologik yetakchilik qobiliyatlari tashkiliy madaniyatni shakllantirishda nafaqat samarali vosita, balki zamonaviy tashkilotlarning muvaffaqiyati uchun asosiy turtki sifatida ahamiyatlidir. Tadqiqotlar esa, kelajakda rahbarlik va tashkiliy madaniyat sohasida qo‘ shimcha ilmiy izlanishlar olib borish uchun mustahkam nazariy va empirik asos yaratadi.

THE AIDR-V INSTRUCTIONAL MODEL FOR DEVELOPING ENGLISH WRITING COMPETENCE AMONG GRADE 7-9 GRADE LEARNERS

MUMINKHUJAYEV ABRORKHUJA MUKSUMKHODJAYEVICH
PhD, English teacher, Specialised Boarding School of the Ministry of Internal Affairs of the Republic of Uzbekistan
E-mail: *abrorkhujamuminkhujayev@gmail.com*
ORCID: 0009-0007-6624-9369

Abstract: *Generative artificial intelligence enables rapid, individualised feedback on second-language writing; however, the availability of automated feedback does not in itself constitute evidence of learning. The central pedagogical issue is how adolescent learners can interpret, evaluate, and use AI-generated recommendations while retaining authorship and avoiding dependence on automated correction. This theoretical and methodological study develops a human-centred GenAI instructional model for English as a foreign language (EFL) writing in Grades 7-9. It integrates research on automated writing evaluation, GenAI-mediated feedback, feedback uptake, self-regulated learning, formative assessment, AI literacy, and teacher mediation. These principles are operationalised through the five stages of the AIDR-V model: Activation, Inquiry, Drafting, Refinement, and Verification. The model assigns complementary responsibilities to the learner, teacher, and AI system. AI functions as a provisional diagnostic resource; the learner makes criterion- and evidence-informed revision decisions; and the teacher ensures pedagogical relevance, protects learner authorship, and calibrates assessment. The principal conceptual outcome is a reproducible lesson-level protocol that connects communicative purpose, CEFR-informed criteria, feedback classification, revision logs, independent verification, and reflective justification. Designed for specialised secondary schools in Uzbekistan, the model remains transferable across platforms and comparable educational contexts. Because a complete experimental dataset is not yet available, the study advances no causal claims regarding effectiveness. It concludes by formulating testable propositions and an evaluation framework for subsequent quasi-experimental validation.*

Keywords: *human-centred generative AI, EFL writing, feedback uptake, revision, verification, learner agency.*

7-9 SINF O‘ QUVCHILARINING INGLIZ TILIDA YOZISH KOMPETENSIYASINI RIVOJLANTIRISHDA AIDR-V INSTRUKSIONAL MODELI

Annotatsiya: *Generativ sun’iy intellekt boshqa tilda yozilgan matn bo‘ yicha tezkor va individuallashtirilgan qayta aloqa olish imkonini beradi; biroq avtomatlashtirilgan qayta aloqaning mavjudligi o‘ z-o‘ zidan o‘ rganish sodir bo‘ lganini anglatmaydi. Asosiy pedagogik masala o‘ smir o‘ quvchilarning SI tomonidan yaratilgan tavsiyalarni mualliflik nazoratini saqlagan va avtomatlashtirilgan tuzatishga qaramlikni yuzaga keltirmagan holda talqin qilishi, baholashi hamda qo‘ llashidan iborat. Ushbu nazariy-metodik tadqiqot 7-9 sinflarda ingliz tilida yozma nutqni o‘ rgatishga mo‘ ljallangan inson markazli GenSI instruksional modelini ishlab chiqadi. Unda avtomatlashtirilgan yozma nutqni baholash, GenSI vositasidagi qayta aloqa, qayta aloqani o‘ zlashtirish, o‘ zini o‘ zi boshqarib o‘ rganish, formativ baholash, SI savodxonligi va o‘ qituvchi vositachiligiga oid tadqiqotlar integratsiya qilindi. Mazkur tamoyillar AIDR-V modelining besh bosqichi - faollashtirish, izlanish, qoralama yaratish, takomillashtirish va verifikatsiya - orqali operatsionallashtirildi. Modelda SI dastlabki diagnostik vosita vazifasini bajaradi; o‘ quvchi mezon va dalillarga asoslangan tahrir qarorlarini qabul qiladi; o‘ qituvchi esa pedagogik muvofiqlikni ta’minlaydi, o‘ quvchi mualliffligini himoya qiladi va baholashni muvofiqlashtiradi. Tadqiqotning asosiy konseptual natijasi kommunikativ maqsad, CEFRga asoslangan mezonlar, qayta aloqa tasnifi, tahrir jurnali, mustaqil verifikatsiya va reflektiv asoslashni o‘ zaro bog‘ laydigan takror qo‘ llash mumkin bo‘ lgan dars protokolidir. Model O‘ zbekiston ixtisoslashtirilgan umumiy o‘ rta ta’lim muassasalari uchun ishlab chiqilgan bo‘ lsa-da, muayyan platformaga bog‘ lanmagan. To‘ liq eksperimental ma’lumotlar mavjud bo‘ lmagani sababli uning samaradorligi yuzasidan sababiy xulosalar chiqarilmadi; keyingi kvazieksperimental tekshiruv uchun sinovdan o‘ tkaziladigan farazlar va baholash mezonlari belgilandi.*

Kalit so‘ zlar: *inson markazli generativ SI; ingliz tilida yozma nutq; qayta aloqani o‘ zlashtirish; matnni tahrirlash; verifikatsiya; o‘ quvchi subyektligi*

ДИДАКТИЧЕСКАЯ МОДЕЛЬ AIDR-V РАЗВИТИЯ АНГЛОЯЗЫЧНОЙ ПИСЬМЕННОЙ КОМПЕТЕНЦИИ УЧАЩИХСЯ 7-9 КЛАССОВ

Аннотация: *Генеративный искусственный интеллект обеспечивает возможность быстрой и индивидуализированной обратной связи по письменным работам на втором языке; однако наличие автоматизированной обратной связи само по себе не свидетельствует об обучении. Ключевая педагогическая проблема заключается в том, как подростки могут интерпретировать, оценивать и применять сформированные ИИ рекомендации, сохраняя авторский контроль и не формируя зависимость от автоматизированного исправления. В настоящем теоретико-методическом исследовании разработана человекоцентричная учебная модель применения ГенИИ при обучении письму на английском языке в 7–9 классах. Модель интегрирует исследования по автоматизированному оцениванию письменной речи, обратной связи с использованием ГенИИ, освоению обратной связи, саморегулируемому обучению, формативному оцениванию, ИИ-грамотности и педагогическому посредничеству. Эти положения операционализированы в пяти этапах модели AIDR-V: активация, исследование, создание черновика, доработка и верификация. ИИ выполняет функцию предварительного диагностического ресурса; ученик принимает решения о редактировании на основе критериев и доказательств; учитель обеспечивает педагогическую релевантность, защищает авторство ученика и калибрует оценивание. Основным концептуальным результатом является воспроизводимый протокол урока, объединяющий коммуникативную цель, критерии CEFR, классификацию обратной связи, журнал редактирования, независимую проверку и рефлексивное обоснование. Модель разработана для специализированных общеобразовательных учреждений Узбекистана, но не зависит от конкретной платформы. Ввиду отсутствия полного массива экспериментальных данных причинные выводы об эффективности не формулируются; определены проверяемые гипотезы и рамка последующей квазиэкспериментальной валидации.*

Ключевые слова: *человекоцентричный генеративный ИИ; письмо на английском языке; освоение обратной связи; редактирование текста; верификация; учебная субъектность*

INTRODUCTION

Generative artificial intelligence has altered the conditions under which writing support is provided by making automated explanation, reformulation, error detection, and text generation available at the point of need. These affordances are particularly relevant to EFL instruction, in which learners require repeated opportunities to produce language and receive timely, comprehensible feedback. Technological availability, however, should not be conflated with a pedagogical mechanism. An AI system may identify an error or propose a fluent reformulation without ensuring that the learner understands the underlying problem, evaluates the recommendation, or transfers the revised form to a subsequent communicative task. The relevant educational question is therefore not merely whether AI can improve a text, but whether instructional design can transform AI-generated feedback into learner-controlled noticing, evaluation, revision, and sustained language development [Kasneci et al. 2023; UNESCO 2023].

This distinction is particularly consequential during adolescence. Learners in Grades 7–9 develop linguistic competence concurrently with metacognitive regulation, critical information practices, and a stable sense of authorship. Although they may value the speed and apparent authority of AI output, they may not yet possess sufficiently developed criteria for evaluating factual accuracy, pragmatic appropriateness, register, cultural relevance, and the validity of automated scores. Emerging school-based evidence indicates that younger learners may benefit from AI-supported language practice, but their engagement with feedback varies according to proficiency, task structure, feedback focus, and the extent of teacher scaffolding [Wu & Zhao 2025]. Accordingly, treating access to AI as an intervention in itself obscures the causal sequence linking feedback, learner uptake, revision quality, and subsequent performance.

Research on second-language writing has long shown that feedback becomes pedagogically meaningful only when learners act on it. Written corrective feedback may focus attention on linguistic form, but its value is mediated by comprehensibility, timing, learner beliefs, cognitive load, and opportunities for revision. Automated writing evaluation extends the scale and immediacy of feedback, yet earlier systems often prioritised surface-level accuracy and could produce opaque or decontextualised recommendations. Generative AI broadens feedback to organisation, coherence, vocabulary, argumentation, and audience awareness; at the same time, it increases the risks of hallucination, overcorrection, homogenised style, and substitution of machine production for learner production. These tensions make feedback uptake - not feedback generation - the more appropriate unit of pedagogical analysis [Ranalli 2018; Warschauer & Grimes 2008].

Human–AI collaboration provides a more pedagogically defensible basis for instructional design than replacement-oriented approaches. Teacher mediation can align automated feedback with curricular objectives, learner age and proficiency, genre requirements, and assessment criteria. Learner verification can, in turn, transform a suggested correction into an object of inquiry: the learner compares alternatives, consults an independent descriptor or reference source, records a decision, and explains the grounds for accepting, adapting, or rejecting the recommendation. Within this arrangement,

AI is neither positioned as an autonomous tutor nor treated solely as a prohibited shortcut; it functions as a provisional analytical resource within a pedagogically governed process. Human-centred frameworks developed by UNESCO and the British Council likewise emphasise agency, accountability, transparency, and the continuing authority of professional pedagogical judgement [Miao & Shiohira 2024; Felice et al. 2025].

A further research gap lies between broad principles of responsible AI use and reproducible classroom procedures. Policy and ethical guidance frequently remain at the level of general principles, whereas empirical studies may identify the digital tool without adequately specifying prompt protocols, feedback categories, revision sequences, teacher intervention, verification requirements, or implementation-fidelity indicators. Consequently, observed outcomes cannot readily be attributed to AI, additional time on task, teacher support, novelty, or the structured revision process. A model intended for school practice must therefore define the actors, sequence, criteria, and observable evidence required to determine whether the intervention was implemented as intended.

The present article addresses this gap by developing a human-centred GenAI instructional model within the AIDR-V lesson-design architecture: Activation, Inquiry, Drafting, Refinement, and Verification. It narrows the broader productive-skills framework to adolescent EFL writing because written production renders the sequence from initial drafting to feedback, revision, and verification directly observable. The study aims to formulate a theoretically grounded and operationally reproducible protocol for specialised secondary schools in Uzbekistan. It addresses three research questions: (1) How can AI-generated feedback support rather than displace learner authorship? (2) How should responsibilities be distributed among the learner, teacher, and AI system across the AIDR-V model? (3) Which process and outcome indicators are required for subsequent empirical evaluation?

The article offers three delimited contributions. First, it integrates feedback uptake, self-regulated learning, formative assessment, and AI literacy within a single lesson-level mechanism. Second, it specifies a five-stage protocol that can be implemented across different AI systems, thereby prioritising pedagogical functions over platform-specific features. Third, it formulates testable propositions and measurement requirements for a subsequent quasi-experimental study. Because the available dissertation materials do not yet include a complete experimental dataset, the reported results are confined to conceptual and methodological outputs: an instructional model, a distribution of roles, an implementation protocol, and an empirical-validation framework.

THEORETICAL FRAMEWORK

Feedback uptake as the central learning mechanism

Feedback may be defined as information that enables learners to reduce the discrepancy between current performance and an intended standard. In writing instruction, however, this discrepancy is not reduced through exposure to comments alone. Learners must identify the problem, interpret the feedback, evaluate its relevance, select an appropriate response, implement a revision, and assess the revised version. This sequence distinguishes the receipt of feedback from its substantive uptake. Although AI increases the volume and immediacy of available feedback, it does not remove these cognitive and metacognitive demands. Excessive, contradictory, or insufficiently prioritised recommendations may instead increase extraneous cognitive load and promote superficial compliance.

For the proposed model, feedback uptake is operationalised through observable revision behaviour. Each AI suggestion is assigned one of four learner decisions: accept, adapt, reject, or defer for teacher consultation. Acceptance means that the learner agrees with the recommendation and can provide a criterion-based reason. Adaptation means that the learner uses the underlying diagnosis but produces an independently worded solution. Rejection means that the learner identifies a defensible linguistic, pragmatic, factual, or genre-related reason not to apply the recommendation. Deferral is used when the learner recognises uncertainty and seeks human mediation. These categories make learner agency visible and prevent the final text from concealing how it was produced.

The quality of feedback uptake is analytically more informative than the proportion of accepted recommendations. A high acceptance rate may reflect accurate AI feedback, but it may also indicate dependence or uncritical compliance. Conversely, a well-justified rejection may demonstrate advanced language awareness. Evaluation should therefore establish whether the learner identified the focus of feedback, consulted an appropriate criterion, improved the text without distorting the intended meaning, and transferred the relevant principle to a subsequent task. From this perspective, revision constitutes evidence of learning rather than merely evidence of textual editing.

Learner agency, authorship, and self-regulation

Learner agency refers to the capacity to act intentionally, make choices, and assume responsibility within the constraints of a learning environment. In AI-supported writing, agency is threatened when the system determines the topic, generates the argument, selects the evidence, and produces the final language. It is strengthened when the learner establishes a communicative purpose, creates the initial draft, interrogates feedback, chooses revisions, and explains the final decisions. Authorship is therefore not defined by the absence of digital assistance; it is defined by meaningful human control over content, reasoning, expression, and revision.

Self-regulated learning provides a complementary account of how this control develops. Effective writers plan, monitor, evaluate, and adapt their performance. The AIDR-V cycle externalises these processes through a task brief, a draft, a feedback map, a revision log, and a reflective note. Externalisation is particularly important for adolescents because invisible metacognitive processes are difficult to teach or assess. By requiring evidence at each stage, the model allows the teacher to diagnose whether a learner's difficulty lies in language knowledge, interpretation of feedback, selection of strategy, verification, or reflection.

The teacher's role remains decisive. Human-centred AI requires more than the physical presence of a person; human purposes, professional judgement, and accountability must govern the use of the system. The teacher defines permissible uses of AI, selects or designs the prompt framework, models critical evaluation, limits the scope and volume of recommendations, resolves disputed feedback, protects personal data, and maintains alignment between assessment and the intended construct. Accordingly, the learner retains authorship, the teacher retains pedagogical accountability, and the AI system remains a fallible support resource.

Formative assessment and CEFR-informed criteria

Formative assessment is embedded in the cycle because feedback is used to modify ongoing learning rather than merely score a completed product. The CEFR Companion Volume provides a useful reference for communicative outcomes, but descriptors must be translated into age-appropriate task and rubric criteria. For a short argumentative or explanatory text in Grades 7–9, the assessment framework may include task fulfilment, organisation and coherence, lexical range and appropriateness, grammatical control, mechanics, and audience awareness. The purpose is not to treat the CEFR as a mechanical scoring algorithm; it is to ensure that feedback serves communicative performance rather than isolated error correction [Council of Europe 2020].

Automated scores should therefore be treated as diagnostic evidence rather than final judgements. AI systems may identify patterns warranting attention, but they may misinterpret creative language, multilingual influence, task-specific meaning, or culturally situated expression. The model consequently requires triangulation among learner self-assessment, teacher rubric-based assessment, and AI-assisted analysis. Divergence among these sources can be pedagogically productive when it becomes an explicit object of inquiry. The central validity question is not which evaluator is inherently superior, but which inferences each source of evidence can legitimately support.

MATERIALS AND METHODOLOGY

The study employs a design-oriented theoretical and methodological approach. Its evidence base comprises:

(a) international frameworks for human-centred and responsible AI in education;

(b) research on automated writing evaluation and GenAI-mediated feedback in EFL writing;

(c) studies of feedback uptake, learner engagement, and teacher - AI collaboration;

(d) CEFR-informed principles for communicative writing assessment;

(e) the instructional architecture developed within the author's DSc project for Grades 7-9 in specialised schools. Documentary analysis was used to identify recurrent design problems, and functional synthesis was applied to translate theoretical principles into observable classroom procedures.

The synthesis followed four analytical questions. First, which pedagogical function is assigned to AI: generation, diagnosis, explanation, adaptation, feedback, or assessment? Second, what learner action connects AI output with learning: noticing, comparison, revision, verification, reflection, or transfer? Third, what form of teacher mediation protects validity, age appropriateness, and authorship? Fourth, what evidence would allow another researcher to reproduce and evaluate the process? A design component was retained only when it answered all four questions.

The resulting model was evaluated conceptually against six criteria: pedagogical alignment, learner agency, feedback actionability, verifiability, assessment validity, and practical feasibility. Pedagogical alignment requires every AI action to support a stated communicative outcome. Learner agency requires an initial learner-produced draft and recorded revision decisions. Feedback actionability requires suggestions to be limited, prioritised, and understandable. Verifiability requires comparison with an independent source, descriptor, rule, model text, peer judgement, or teacher explanation. Assessment validity requires final judgements to remain rubric-based and human-calibrated. Practical feasibility requires implementation within ordinary lesson sequences and available school infrastructure.

This methodology yields a conceptual model rather than an estimate of intervention effectiveness. The present study therefore reports neither participant outcomes nor percentage gains, significance tests, or effect sizes. A subsequent empirical phase should preregister the primary outcome, define the comparison condition, establish scoring reliability, document implementation fidelity, and report adjusted effects with confidence intervals. Maintaining a clear distinction between model development and outcome evaluation prevents anticipated benefits from being represented as observed findings.

CONCEPTUAL RESULTS: THE AIDR-V INSTRUCTIONAL MODEL

Stage 1. Activation

Activation establishes communicative ownership before AI is introduced. The learner analyses the audience, purpose, genre, content requirements, and assessment criteria of the task. The teacher activates relevant language and background knowledge through a model, contrastive examples, or a short diagnostic activity. AI may generate alternative contexts or questions, but it must not produce the learner's response. The evidence generated at this stage includes a task interpretation, a brief plan, and a personal content inventory. These artefacts make it possible to determine whether the final text reflects the learner's intended meaning.

Stage 2. Inquiry

Inquiry develops the language and conceptual resources required for independent drafting. Learners examine how sample texts realise organisation, cohesion, stance, register, and audience awareness. They may ask AI to explain a feature, compare two alternatives, or generate a mini-practice item. The teacher models prompt boundaries and source checking. Inquiry ends with a learner-created checklist linked to the rubric. This stage prevents AI feedback from becoming the first encounter with the relevant criterion and reduces the risk that learners accept explanations they do not understand.

Stage 3. Drafting

Drafting is completed without sentence-level generative substitution. Learners produce an initial text using their plan and checklist. Permissible assistance may include access to a bilingual or monolingual dictionary, previously taught materials, and teacher-approved reference resources. The draft is preserved before AI interaction. This requirement is essential for authorship, baseline comparison, and analysis of revision. The teacher does not correct every error at this point; instead, the draft becomes the evidence base for diagnostic feedback.

Stage 4. Refinement

During Refinement, AI provides bounded feedback according to a teacher-designed prompt. The prompt identifies the learner's grade or proficiency band, the task, the rubric, the permitted feedback categories, and the prohibition against rewriting the entire text. Feedback is prioritised into a manageable number of high-value issues. For each issue, the learner records the original segment, the feedback focus, the AI suggestion, the decision category, the revised segment, and a brief reason. The teacher intervenes selectively where the AI recommendation is inaccurate, developmentally inappropriate, or inconsistent with the assessment construct.

Stage 5. Verification

Verification converts revision into critical language learning. The learner checks important recommendations against at least one independent criterion: a CEFR-informed rubric, an authoritative dictionary, a grammar reference, a teacher explanation, a model text, or structured peer review. Factual statements require an independent content source rather than confirmation from the same AI system. The learner then prepares a short reflective justification explaining which suggestions were accepted, adapted, rejected, or deferred and why. A revised text is considered complete only when the learner can account for consequential changes.

Role distribution within the cycle

Stage	Learner action	Teacher action	AI-system function	Process evidence
Activation	Defines purpose, audience, and content	Frames task and criteria	Provides contexts or diagnostic prompts	Plan and content inventory
Inquiry	Analyses models and builds a checklist	Models critical prompting and comparison	Explains features and supplies bounded practice	Learner-created criterion checklist
Drafting	Produces an independent first draft	Protects authorship and observes needs	No full-text generation	Archived initial draft
Refinement	Classifies and acts on feedback	Calibrates and corrects misleading feedback	Diagnoses and proposes limited revisions	Feedback map and revision log
Verification	Checks, justifies, and reflects	Validates decisions and assesses by rubric	Supports comparison but cannot independently validate its output	Verified draft and reflective note

DISCUSSION

The proposed model shifts analytical attention from the mere presence of AI to the instructional sequence within which it operates. This distinction is theoretically important because comparisons between AI-generated and teacher-provided feedback may overlook the learner actions occurring between feedback receipt and post-intervention performance. Accurate feedback that is neither understood nor applied may contribute less to learning than a smaller number of recommendations subjected to sustained evaluation and revision. AIDR-V therefore treats feedback uptake, revision quality, and verification behaviour as mechanism variables rather than incidental features of classroom implementation.

The model also establishes an explicit boundary between instructional assistance and generative substitution. It does not presuppose that every instance of text generation is pedagogically detrimental; instead, it requires the initial communicative content and first draft to originate with the learner. AI may support diagnosis, comparison, and refinement of expression, but the learner must retain control over claims, examples, organisation, and final wording. This principled boundary is preferable to an undifferentiated prohibition because it supports responsible participation in AI-rich learning environments while preserving assessable evidence of learner competence.

Teacher mediation is not an ancillary safeguard but a constitutive condition of pedagogical validity. Current AI systems cannot reliably account for the curriculum, the developmental profile of a particular class, the communicative purpose of a task, a learner's prior performance, or the construct being assessed. Teachers are also better positioned to identify instances in which formally correct feedback weakens authorial voice, alters intended meaning, or exceeds the learner's developmental needs. The teacher-in-the-loop configuration is therefore required not only on ethical grounds but also to protect the validity of instruction and assessment.

For specialised schools in Uzbekistan, the model has three practical advantages. First, it is compatible with CEFR-informed outcomes already used in foreign-language education. Second, it can be implemented with variable infrastructure because the core artefacts - a plan, draft, feedback map, revision log, and reflective note - do not depend on one platform. Third, it supports multilingual and culturally situated judgement: learners and teachers can reject recommendations that are pragmatically inappropriate or that erase locally meaningful content. Localisation therefore concerns tasks, criteria, examples, privacy, and interaction norms, not simply interface language.

Implementation nevertheless depends on explicit institutional conditions. Teachers require professional development in prompt design, feedback calibration, privacy protection, bias recognition, and interpretation of automated analyses. Schools require transparent policies governing user accounts, personal data, age-appropriate access, storage of learner work, and disclosure of AI assistance. Learners require explicit instruction regarding permissible forms of assistance, procedures for acknowledging AI use where required, and the principle that an AI-generated response cannot independently validate itself. In the absence of these conditions, the same technology may intensify superficial correction, unequal access, and learner dependence.

The model generates five testable propositions. P1: learners who complete the full feedback–revision–verification sequence will demonstrate greater gains in rubric-rated writing than learners who receive equivalent AI feedback without structured verification. P2: feedback-uptake quality will mediate the relationship between exposure to the intervention and improvement in writing performance. P3: justified adaptation and rejection decisions will predict transfer more strongly than the unqualified acceptance rate. P4: teacher calibration will reduce the proportion of inappropriate automated recommendations incorporated into final texts. P5: intervention effects will vary according to baseline proficiency, thereby requiring differentiated limits and scaffolds for feedback.

A later quasi-experimental evaluation should use intact Grade 7-9 classes while accounting for baseline differences. The primary outcome should be independently rated CEFR-aligned writing performance on a parallel task completed under controlled conditions. Secondary outcomes may include coherence, grammatical control, lexical appropriateness, feedback-uptake quality, revision accuracy, and learner agency, provided that each measure is specified in advance. At least two trained raters should score a subsample or all scripts, and inter-rater reliability should be reported. The main analysis should adjust post-test performance for baseline performance and report effect sizes with 95% confidence intervals.

Process evaluation is equally necessary. Fidelity indicators should record whether learners produced an independent draft, received feedback within the specified categories, completed revision logs, verified consequential recommendations, and received teacher calibration. Logs should distinguish intervention failure from theory failure: if verification was rarely completed, an absence of outcome differences would not constitute a valid test of the full model. Qualitative analysis of learner explanations can further reveal whether verification reflects genuine reasoning or formulaic compliance.

Several limitations must be acknowledged at the model-development stage. AI systems and their outputs change rapidly, which may render platform-specific claims obsolete. Revision logs may influence learner behaviour and increase workload. The quality of teacher calibration may vary across classes, while prior experience with AI and access outside

school may contaminate comparison conditions. Moreover, improvements in a final draft do not necessarily indicate durable learning. Transfer tasks completed without AI assistance are therefore essential to any subsequent evaluation.

CONCLUSION

The educational value of AI-generated writing feedback depends on the instructional actions through which learners and teachers interpret and use it. The AIDR-V model positions AI as a provisional diagnostic resource, the learner as author and decision-maker, and the teacher as instructional designer, mediator, and final pedagogical authority. Its five stages - Activation, Inquiry, Drafting, Refinement, and Verification - connect communicative purpose with independent production, bounded feedback, documented revision, source-based verification, and reflective justification. The contribution of the model is procedural rather than platform-specific: it operationalises human-centred AI principles as a reproducible sequence of classroom actions and observable evidence. For specialised secondary schools in Uzbekistan, the model provides a theoretically grounded means of integrating technological support with CEFR-informed assessment, academic integrity, and learner agency. The next research stage requires empirical validation through controlled writing tasks, a transparent comparison condition, inter-rater reliability analysis, fidelity monitoring, and effect estimates with confidence intervals. Until such evidence is available, the anticipated advantages of the model must remain testable propositions rather than claims of demonstrated effectiveness.

SUN’ IY INTELLEKT DAVRIDA SHAXS AVTONOMIYASINING TRANSFORMATSIYASI: ALGORITMIK QARORLAR VA INSON TANLOVI

Tilavova Umida Qahramonovna
PhD, Navoiy davlat universiteti Ijtimoiy fanlar kafedrasi
e-mail: umidatilavova77@gmail.com
ORCID: 0009-0003-2156-4649

Annotatsiya: *Maqolada sun’ iy intellekt tizimlari kundalik tanlov jarayonlariga chuqur kirib borayotgan sharoitda shaxs avtonomiyasi qanday o‘ zgarayotgani falsafiy-ijtimoiy jihatdan tahlil qilinadi. Tavsiya algoritmlari, qaror qabul qilishni qo‘ llab-quvvatlovchi tizimlar va generativ modellarning insonning axborot olish, muqobillarni baholash va qaror qabul qilish bosqichlariga ta’ siri ko‘ rib chiqilgan. Pew Research Center, Stanford HAI (Ipsos), Reuters Instituti so‘ rovlari natijalari hamda Yevropa Ittifoqi va O‘ zbekiston me’ yoriy hujjatlari qiyosiy tahlil qilingan. Tadqiqot natijasida avtonomiyaning “delegatsiya qilingan”, “kuzatuv ostidagi” va “refleksiv” shakllarini farqlovchi konseptual model taklif etilib, raqamli muhitda inson tanlovi erkinligini himoya qilishga oid tavsiyalar asoslangan.*

Kalit so‘ zlar: *shaxs avtonomiyasi, sun’ iy intellekt, algoritmik qaror, tanlov arxitekturasi, gipernudj, avtomatlashtirish og‘ ishi, inson nazorati, raqamli etika.*

ТРАНСФОРМАЦИЯ ИНДИВИДУАЛЬНОЙ АВТОНОМИИ В ЭПОХУ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА: АЛГОРИТМИЧЕСКИЕ РЕШЕНИЯ И ЧЕЛОВЕЧЕСКИЙ ВЫБОР

Аннотация: *В статье с философско-социальных позиций анализируется трансформация автономии личности в условиях, когда системы искусственного интеллекта всё глубже проникают в повседневные процессы выбора. Рассматривается влияние рекомендательных алгоритмов, систем поддержки принятия решений и генеративных моделей на этапы получения информации, оценки альтернатив и принятия решения. Проведён сравнительный анализ данных опросов Pew Research Center, Stanford HAI (Ipsos), Института Reuters, а также нормативных актов Европейского союза и Узбекистана. Предложена концептуальная модель, различающая «делегированную», «поднадзорную» и «рефлексивную» формы автономии, и обоснованы рекомендации по защите свободы человеческого выбора в цифровой среде.*

Ключевые слова: *автономия личности, искусственный интеллект, алгоритмическое решение, архитектура выбора, гипернадж, предвзятость автоматизации, человеческий контроль, цифровая этика.*

THE TRANSFORMATION OF INDIVIDUAL AUTONOMY IN THE AGE OF ARTIFICIAL INTELLIGENCE: ALGORITHMIC DECISIONS AND HUMAN CHOICE

Abstract: *The article offers a philosophical and social analysis of how personal autonomy is being transformed as artificial intelligence systems penetrate everyday choice processes. It examines the influence of recommender algorithms, decision support systems and generative models on the stages of information seeking, evaluation of alternatives and decision making. Survey data from the Pew Research Center, Stanford HAI (Ipsos) and the Reuters Institute, together with regulatory acts of the European Union and Uzbekistan, are compared. A conceptual model distinguishing delegated, monitored and reflective forms of autonomy is proposed, and recommendations for protecting the freedom of human choice in the digital environment are substantiated.*

Keywords: *personal autonomy, artificial intelligence, algorithmic decision, choice architecture, hypernudge, automation bias, human oversight, digital ethics.*

KIRISH

Sun’ iy intellekt texnologiyalari so‘ nggi o‘ n yillikda ilmiy laboratoriyalar doirasidan chiqib, jamiyat hayotining deyarli barcha sohalariga kirib keldi. Bugun kredit berish, ishga qabul qilish, tibbiy tashxis qo‘ yish, ta’ lim yo‘ nalishini tanlash, yangiliklar va madaniy mahsulotlarni iste’ mol qilish kabi jarayonlarda qarorlarning muayyan qismi algoritmlar yordamida tayyorlanmoqda yoki bevosita ular tomonidan qabul qilinmoqda. Bu o‘ zgarish insonga qulaylik, tezlik va

aniqlik keltirishi bilan birga, falsafiy jihatdan muhim savolni ham kun tartibiga qo‘ ymoqda: tanlov imkoniyatlari algoritm tomonidan saralab berilayotgan sharoitda inson qanchalik o‘ z qarorining egasi bo‘ lib qolmoqda? Shaxs avtonomiyasi — insonning o‘ z maqsadlarini mustaqil belgilash, muqobillarni baholash va ular uchun javobgarlikni o‘ z zimmasiga olish qobiliyati — demokratik jamiyat, huquqiy davlat va zamonaviy ta’ lim tizimining tayanch qadriyatlaridan biridir. Shu bois sun’ iy intellektning inson tanloviga ta’ sirini o‘ rganish nafaqat texnologik, balki chuqur ijtimoiy-falsafiy ahamiyatga ega masala hisoblanadi.

Bu jarayonning ko‘ lami raqamlarda yaqqol ko‘ rinadi. Inson nimani tomosha qilishi, qaysi yangilikni o‘ qishi, qanday mahsulot sotib olishi va hatto qaysi kasbni tanlashi haqidagi qarorlarning katta qismi algoritmlar oldindan saralab bergan muqobillar orasida qabul qilinmoqda. Netflix muhandislari e’ lon qilgan ma’ lumotga ko‘ ra, platformada tomosha qilingan soatlarning taxminan 80 foizi tavsiya tizimi taklif etgan kontentga to‘ g‘ ri keladi [1]; YouTube rahbariyati esa foydalanuvchilar tomosha vaqtining 70 foizdan ortig‘ i tavsiyalar orqali shakllanishini ma’ lum qilgan [2]. Reuters Instituti ma’ lumotlariga ko‘ ra, 2025-yilda AQShda yangiliklarni ijtimoiy tarmoqlar va video platformalar orqali oluvchilar ulushi (54%) ilk bor televideniye (50%) va yangilik saytlaridan (48%) oshib ketdi, respondentlarning 7 foizi, 25 yoshgacha bo‘ lganlarning esa 15 foizi har hafta yangilik olish uchun sun’ iy intellekt chatbotlaridan foydalanmoqda [3].

O‘ zbekiston uchun masala amaliy ahamiyat kasb etmoqda. “Raqamli O‘ zbekiston — 2030” strategiyasi [4] va Prezidentning 2024-yil 14-oktabrdagi PQ-358-son qarori bilan tasdiqlangan Sun’ iy intellekt texnologiyalarini 2030-yilgacha rivojlantirish strategiyasi [5] davlat xizmatlarining 10 foizini sun’ iy intellektga asoslangan holda ko‘ rsatish, bu sohadagi dasturiy mahsulotlar eksportini 1,5 mlrd dollarga yetkazish va Government AI Readiness Index reytingida birinchi 50 talikka kirishni maqsad qilgan. Mamlakat ushbu indeksda 2023-yilda 87-, 2024-yilda 70-, 2025-yilda 62-o‘ rinni egallagan [6]. 2026-yil 14-martda Adliya vazirligida ro‘ yxatdan o‘ tkazilgan (3787-son) Raqamli texnologiyalar vazirligining sun’ iy intellekt yechimlariga oid etika qoidalari esa yakuniy qaror inson tomonidan qabul qilinishi shartini qat’ iy belgilab qo‘ ydi [7]. Demak, algoritmik qarorlar ko‘ lami kengayib borayotgan davrda shaxs avtonomiyasining yangi shakllarini falsafiy-ijtimoiy jihatdan tushunish dolzarb vazifaga aylanmoqda.

Masalaning nazariy asoslariga to‘ xtaladigan bo‘ lsak, avtonomiya tushunchasi Yevropa falsafasida I. Kant davridan buyon insonning o‘ z aqli bilan belgilagan qonunga bo‘ ysunish qobiliyati sifatida talqin qilib kelinadi [8]. XX asrda bu g‘ oya psixologik jihatdan boyitildi: H. Frankfurt shaxsni o‘ z istaklariga nisbatan “ikkinchi darajali” munosabat bildira oladigan mavjudot deb ta’ rifladi [9], G. Dvorkin esa avtonomiyani birlamchi xohishlarni tanqidiy baholash va ularni qabul qilish yoki rad etish qobiliyati bilan bog‘ ladi [10]. Har uchala yondashuvda bir umumiy nuqta bor: tanlov avtonom bo‘ lishi uchun u shaxsning o‘ z refleksiyasidan o‘ tishi lozim.

Muammoning o‘ tkirligi shundaki, algoritm tanlovni taqiqlamaydi, balki muqobillar maydonini sezdirmasdan toraytiradi. K. Yeung bu hodisani “gipernudj” deb atagan: katta ma’ lumotlarga asoslangan, har bir foydalanuvchiga moslashtirilgan va real vaqt rejimida o‘ zgaruvchan tanlov arxitekturasi [11]. Sh. Zuboff xulq-atvor ma’ lumotlarini bashorat mahsulotiga aylantiruvchi iqtisodiy mantiqni “kuzatuv kapitalizmi” deb tavsiflagan [12], D. Susser, B. Ryossler va H. Nissenbaum esa yashirin ta’ sir avtonomiyaga to‘ g‘ ridan-to‘ g‘ ri tahdid ekanini ko‘ rsatgan [13]. Shu bilan birga empirik tadqiqotlar insonning algoritmga munosabati bir tekis emasligini ko‘ rsatadi: bir holatda odamlar algoritm maslahatini inson maslahatidan ustun qo‘ yadi (“algoritmni afzal ko‘ rish”) [14], boshqa holatda algoritmning bitta xatosini ko‘ rgach, undan butunlay voz kechadi (“algoritmdan qochish”) [15].

Tadqiqotning maqsadi — sun’ iy intellekt davrida shaxs avtonomiyasining transformatsiya yo‘ nalishlarini aniqlash va inson tanlovi erkinligini saqlash mexanizmlarini ilmiy asoslash. Maqsadga erishish uchun quyidagi vazifalar qo‘ yildi: algoritmik vositachilik ko‘ lamini empirik ma’ lumotlar asosida baholash; jamoatchilikning sun’ iy intellektga munosabatidagi qarama-qarshiliklarni aniqlash; avtonomiya tarkibiy qismlarining o‘ zgarishini tizimlashtirish; xalqaro va milliy me’ yoriy yondashuvlarni qiyosiy tahlil qilish.

Materiallar va metodlar

Tadqiqot fanlararo xarakterga ega bo‘ lib, unda ijtimoiy falsafa, texnologiyalar etikasi va huquqshunoslik usullari uyg‘ unlashtirildi. Birinchidan, klassik va zamonaviy avtonomiya nazariyalariga konseptual tahlil qo‘ llanildi. Ikkinchidan, xalqaro tadqiqot markazlarining ochiq e’ lon qilingan so‘ rov natijalari ikkilamchi tahlil qilindi: Pew Research Center tomonidan 2025-yil iyun oyida AQShda 5 023 nafar kattalar o‘ rtasida o‘ tkazilgan so‘ rov [16], 2025-yil bahorida 25 mamlakatda o‘ tkazilgan xalqaro so‘ rov [17], Stanford HAI “AI Index 2025” hisobotida keltirilgan Ipsos so‘ rovi (32 mamlakat, 23 685 respondent, 2024-yil aprel–may) [18] hamda Reuters Institutining 48 bozorni qamragan “Digital News Report 2025” hisoboti [3]. Uchinchidan, Yevropa Ittifoqining Sun’ iy intellekt to‘ g‘ risidagi reglamenti [19], Ma’ lumotlarni himoya qilish umumiy reglamenti [20], O‘ zbekiston Respublikasining “Shaxsga doir ma’ lumotlar to‘ g‘ risida”gi Qonuni [21], PQ-358-son qaror [5], 2026-yilgi etika qoidalari [7] va YUNESKOning sun’ iy intellekt etikasi bo‘ yicha tavsiyasi [22] qiyosiy-huquqiy usulda o‘ rganildi.

Avtonomiyani tahlil qilish uchun tanlov jarayoni uch bosqichga ajratildi: axborot olish, muqobillarni baholash va qaror qabul qilish hamda uning javobgarligini o‘ z zimmasiga olish. Har bir bosqichda algoritmik vositachilikning ta’ siri

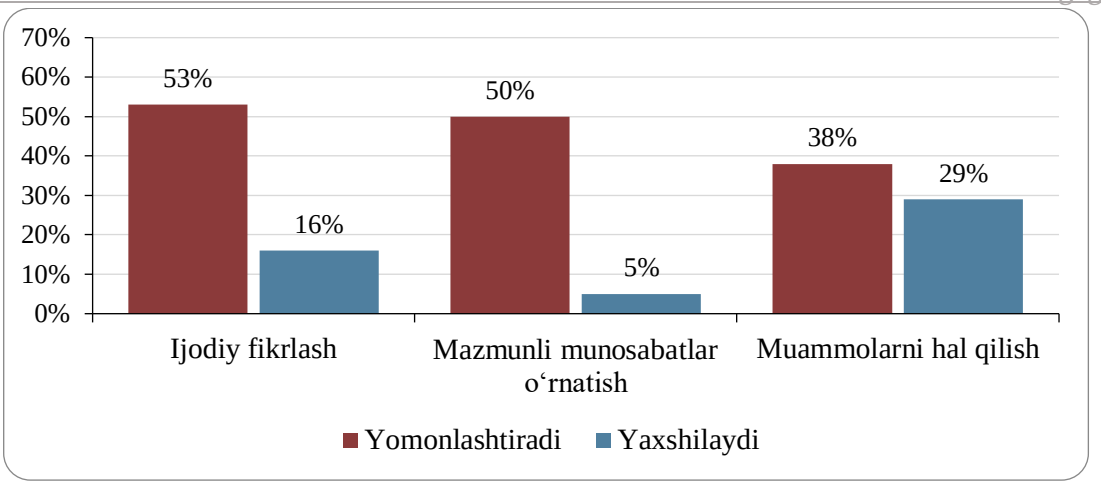
alohida baholandi. Xalqaro tadqiqot markazlarining so‘ rov natijalari raqamli transformatsiya jarayonidagi global qonuniyatlarni aks ettiruvchi ma’ lumotlar sifatida olinib, O‘ zbekistonning strategik va me’ yoriy-huquqiy hujjatlari bilan qiyoslandi. Bunday yondashuv sun’ iy intellekt sohasidagi umumjahon tendensiyalarni milliy rivojlanish ustuvorliklari bilan bog‘ liq holda talqin qilish imkonini berdi. Olingan ma’ lumotlarning ishonchliligi manbalarning metodologik ochiqligi — tanlanma hajmi, o‘ tkazilgan vaqti va qamrovi aniq ko‘ rsatilgani bilan ta’ minlandi.

Natijalar

1. Algoritmik vositachilik ko‘lami

Tanlov muhitining qay darajada algoritmlar orqali shakllanayotganini ko‘ rsatuvchi asosiy ko‘ rsatkichlar 1-jadvalda umumlashtirildi.

1-jadval. Tanlov muhitida algoritmik vositachilik ko‘ lamini tavsiflovchi ko‘ rsatkichlar



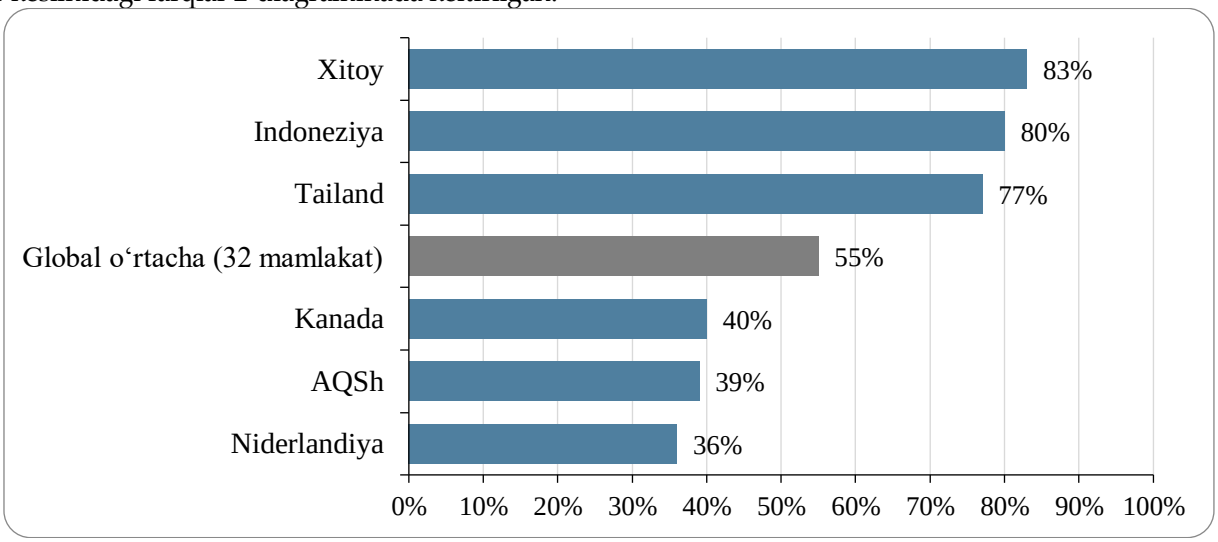
Ko‘ rsatkich	Qiymat	Manba, yil
Netflix platformasida tavsiya tizimi orqali tomosha qilingan soatlar ulushi	≈ 80%	Gomez-Uribe, Hunt, 2015
YouTube’ da tavsiyalar orqali shakllanadigan tomosha vaqti	> 70%	YouTube rahbariyati, 2018
AQShda yangiliklarni ijtimoiy tarmoq va video platformalar orqali oluvchilar	54%	Reuters Instituti, 2025
Har hafta yangilik olish uchun SI chatbotlaridan foydalanuvchilar (umumiy / 25 yoshgacha)	7% / 15%	Reuters Instituti, 2025
Onlayn yangiliklarda haqiqat va yolg‘ onni ajrata olishidan xavotirdagilar	58%	Reuters Instituti, 2025
Kontent SI yoki inson tomonidan yaratilganini aniqlay olishiga ishonmaydiganlar (AQSh)	53%	Pew Research Center, 2025

Manba: [1; 2; 3; 16] ma’ lumotlari asosida muallif tomonidan tuzilgan.

Jadval ma’ lumotlari shuni ko‘ rsatadiki, algoritmlar endi faqat texnik vosita emas, balki insonning axborot olish bosqichida “darvozabon” vazifasini bajarmoqda. Tomosha, o‘ qish va xarid qilish kabi kundalik harakatlarning aksariyati foydalanuvchi o‘ zi izlab topgan emas, balki unga taklif qilingan muqobillar orasidan tanlanadi. Bu holat avtonomiyaning birinchi bosqichi — axborot erkinligiga bevosita ta’ sir qiladi: inson ko‘ rmagan muqobilni tanlay olmaydi. Bundan tashqari, respondentlarning yarmidan ko‘ pi sun’ iy intellekt yaratgan kontentni inson ishidan ajrata olmasligini tan olmoqda, ya’ ni manbani baholash imkoniyati ham zaiflashmoqda.

2. Jamoatchilik idrokidagi “delegatsiya paradoksi”

Pew Research Center ma’ lumotlariga ko‘ ra, 2025-yilda amerikaliklarning 50 foizi sun’ iy intellektning kundalik hayotda keng qo‘ llanilishidan ko‘ proq xavotirda ekanini bildirgan (2021-yilda bu ko‘ rsatkich 37% edi), faqat 10 foizi ko‘ proq umid bog‘ lagan, 38 foizi esa ikkala hissiyotni teng darajada boshdan kechirgan [16]. Respondentlarning 61 foizi sun’ iy intellekt o‘ z hayotida qanday qo‘ llanilishi ustidan ko‘ proq nazoratga ega bo‘ lishni istaydi, joriy nazorat darajasidan qoniqqanlar esa atigi 17 foizni tashkil etadi. Avtonomiya nuqtai nazaridan eng muhim natija — sun’ iy intellektning insonning asosiy qobiliyatlariga ta’ siri haqidagi baholardir (1-diagramma).



1-diagramma. Amerikaliklarning sun’ iy intellekt inson qobiliyatlariga ta’ siri haqidagi baholari, %

Manba: Pew Research Center, 2025-yil iyun, n = 5 023 [16].

Diagrammadan ko‘ rinib turibdiki, jamoatchilik sun’ iy intellektni ijodiy fikrlash va shaxslararo munosabatlar kabi aynan “insoniy” sohalarda avtonomiyaga tahdid sifatida qabul qilmoqda: bu yerda salbiy baholar ijobiylaridan 3–10 barobar ko‘ p. Muammolarni hal qilishda esa baholar nisbatan muvozanatli (38% va 29%), ya’ ni texnik vazifalarda delegatsiya ko‘ proq qabul qilinadi. Xuddi shu so‘ rovda respondentlarning 74 foizi ob-havo prognozida, 66 foizi yangi dori vositalarini ishlab chiqishda sun’ iy intellektdan foydalanishni ma’ qullagan, biroq 67 foizi tanishuv va juft tanlashda, 73 foizi diniy masalalarda uning hech qanday roli bo‘ lmasligi kerak deb hisoblagan.

Global miqyosda ham shunga o‘ xshash ikki tomonlama manzara kuzatiladi. Pew tadqiqotida 25 mamlakat bo‘ yicha mediana ko‘ rsatkichi: 34% ko‘ proq xavotirda, 16% ko‘ proq umidvor, 42% ikkala hissiyotni teng his qiladi; birorta mamlakatda ham umidvorlar ulushi eng katta guruh bo‘ lmagan [17]. Ipsos ma’ lumotlariga ko‘ ra esa sun’ iy intellekt mahsulotlari kamchiliklardan ko‘ ra ko‘ proq foyda keltiradi deb hisoblovchilar ulushi 2022-yildagi 52 foizdan 2024-yilda 55 foizga oshgan, respondentlarning 66 foizi yaqin 3–5 yilda sun’ iy intellekt kundalik hayotini tubdan o‘ zgartirishini kutadi, biroq kompaniyalar shaxsiy ma’ lumotlarni himoya qilishiga ishonuvchilar 47 foizga tushib qolgan [18]. Mamlakatlar kesimidagi farqlar 2-diagrammada keltirilgan.

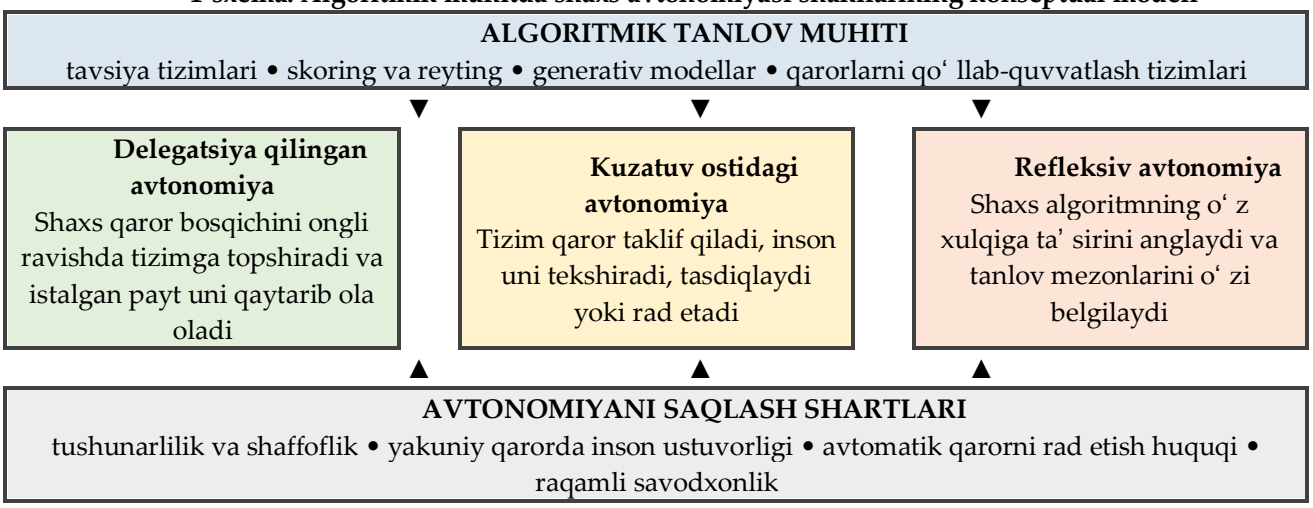
2-diagramma. Sun’ iy intellekt mahsulotlari foydasi kamchiliklaridan ko‘ p deb hisoblovchilar ulushi, 2024-yil, %

Manba: Stanford HAI, AI Index 2025 (Ipsos so‘ rovi, n = 23 685) [18].

Olingan natijalar biz “delegatsiya paradoksi” deb nomlagan holatni qayd etish imkonini beradi: odamlar sun’ iy intellekt foydasini tan olib, undan tobora ko‘ proq foydalanmoqda, biroq ayni paytda uning ustidan nazoratni yo‘ qotishdan va insoniy qobiliyatlarning susayishidan xavotirlanmoqda. Boshqacha aytganda, amaliyotda tanlov algoritmga topshirilmoqda, qadriyatlar darajasida esa avtonomiyani saqlab qolish istagi kuchaymoqda.

3. Avtonomiya tarkibiy qismlarining transformatsiyasi

Konseptual tahlil natijasida avtonomiyaning beshta tarkibiy qismi algoritmik muhitda qanday o‘ zgarayotgani tizimlashtirildi (2-jadval).



2-jadval. Algoritmik muhitda shaxs avtonomiyasi tarkibiy qismlarining o‘ zgarishi

Tarkibiy qism	Klassik talqin	Algoritmik muhitdagi o‘ zgarish	Himoya mexanizmi
Axborot erkinligi	Muqobillarni mustaqil izlash	Muqobillar tavsiya tizimi tomonidan oldindan saralanadi	Tavsiyalarni o‘ chirish, xronologik lenta
Muqobillarni baholash	Shaxsiy mezonlar asosida qiyoslash	Reyting, skoring va “eng yaxshi variant” belgilari baholashni almashtiradi	Tushuntiriladigan SI, mezonlarning ochiqligi
Irodaviy qaror	Ichki motivga tayanadi	Gipernudj va shaxsiylashtirilgan stimullar qarorni tezlashtiradi	Manipulyativ dizayn taqiqi
Javobgarlik	Qaror egasi aniq	Javobgarlik inson, ishlab chiquvchi va tizim o‘ rtasida “yoyiladi”	Inson nazorati, qayta ko‘ rib chiqish huquqi
Refleksiya	O‘ z istaklarini tanqidiy baholash	Istaklar platforma tomonidan bashorat qilinadi va mustahkamlanadi	Raqamli savodxonlik, “boosting” yondashuvi

Manba: muallif ishlanmasi [9; 10; 11; 23] asosida.

Jadvaldan ko‘ rinadiki, transformatsiya avtonomiyani yo‘ q qilmaydi, balki uning tuzilishini o‘ zgartiradi. Klassik modelda shaxs qarorning barcha bosqichlarini o‘ zi bajarar edi; algoritmik muhitda esa bosqichlarning bir qismi tizimga topshiriladi. Shu bois biz avtonomiyaning uch shaklini farqlovchi modelni taklif etamiz (1-sxema).

1-sxema. Algoritmik muhitda shaxs avtonomiyasi shakllarining konseptual modeli

Manba: muallif ishlanmasi.

Modelga ko‘ ra, delegatsiyaning o‘ zi avtonomiyani buzmaydi. L. Floridi va hammualliflari ta’ kidlaganidek, inson qaysi qarorlarni mashinaga topshirish haqida o‘ zi qaror qabul qilar ekan, u “meta-avtonomiya”ni saqlab qoladi [24]. Xavf delegatsiya qaytarib bo‘ lmaydigan, noshaffof va sezdirilmaydigan bo‘ lib qolganda paydo bo‘ ladi. Kuzatuv ostidagi avtonomiya esa “avtomatlashtirish og‘ ishi” tufayli zaiflashishi mumkin: tizimli sharhda ko‘ rsatilishicha, qarorlarni qo‘ llab-quvvatlash tizimlari noto‘ g‘ ri maslahat berganda mutaxassislar ham ko‘ pincha o‘ z to‘ g‘ ri qarorini o‘ zgartirib, tizimga ergashgan [25]. Refleksiv avtonomiya uch shakl ichida eng barqarori bo‘ lib, u shaxsdan algoritmlarning ishlash mantiqini tushunishni talab qiladi.

4. Me’yoriy-huquqiy javoblar

Avtonomiyani himoya qilishga qaratilgan xalqaro va milliy me’ yoriy yondashuvlar 3-jadvalda qiyoslandi.

3-jadval. Sun’ iy intellekt sharoitida shaxs avtonomiyasini himoya qiluvchi me’ yoriy hujjatlar

Hujjat	Avtonomiyaga oid asosiy qoida	Himoya mexanizmi
YUNESKO, SI etikasi bo‘ yicha tavsiya (2021)	“Inson nazorati va inson tomonidan belgilanishi” tamoyili	Hayotiy qarorlarda yakuniy javobgarlik insonda qoladi

Hujjat	Avtonomiyaga oid asosiy qoida	Himoya mexanizmi
Yevropa Ittifoqi Reglamenti 2016/679 (GDPR), 22-modda	Faqat avtomatlashtirilgan ishlovga asoslangan qarorga bo‘ ysunmaslik huquqi	Inson aralashuvini talab qilish, qarorga e’ tiroz bildirish
Yevropa Ittifoqi Reglamenti 2024/1689 (AI Act), 5- va 14-moddalar	Ongdan tashqari va manipulyativ usullarni qo‘ llash taqiqi; yuqori xavfli tizimlarda inson nazorati	Taqiqlar, jarimalar, nazorat talablari
O‘ zR “Shaxsga doir ma’ lumotlar to‘ g‘ risida”gi Qonuni (2019, O‘ RQ-547)	Ma’ lumotlarni sub’ ekt roziligi bilan qayta ishlash	Rozilikni qaytarib olish, ma’ lumotlardan xabardor bo‘ lish
O‘ zR Prezidentining PQ-358-son qarori (14.10.2024)	SI texnologiyalarini 2030-yilgacha rivojlantirish strategiyasi	Institutsional va infratuzilmaviy asos
Raqamli texnologiyalar vazirligining SI etika qoidalari (2026, ro‘ yxat raqami 3787)	Tushunarlilik, shaffoflik, javobgarlik; yakuniy qaror inson tomonidan qabul qilinadi	Inson tomonidan qayta ko‘ rib chiqish talabi

Manba: [22; 20; 19; 21; 5; 7] asosida muallif tomonidan tuzilgan.

Qiyosiy tahlil shuni ko‘ rsatadiki, Yevropa modeli avtonomiyani bevosita huquq sifatida himoya qiladi (avtomatlashtirilgan qarorga bo‘ ysunmaslik, manipulyatsiya taqiqi), O‘ zbekiston modeli esa hozircha asosan strategik va etik darajada shakllanmoqda. 2026-yilgi etika qoidalarida yakuniy qarorning inson tomonidan qabul qilinishi talabi muhim qadam bo‘ lsa-da, fuqaroning avtomatlashtirilgan qarorga e’ tiroz bildirish tartibi qonun darajasida alohida belgilanmagan.

MUHOKAMA

Tadqiqot natijalari algoritmik muhitda avtonomiyaning yo‘ qolishi emas, balki uning qayta taqsimlanishi sodir bo‘ layotganini ko‘ rsatadi. Bu xulosa B. Mittelshtadt va hammualliflarining algoritmlar etikasiga oid xaritasida qayd etilgan “transformativ ta’ sirlar” g‘ oyasiga mos keladi: algoritmlar nafaqat qaror qabul qiladi, balki insonning dunyoni idrok etish tarzini ham qayta shakllantiradi [26]. R. Taler va K. Sanstayn taklif etgan “nudj” konsepsiyasida tanlov arxitekturasi shaffof va jamoat manfaatiga xizmat qiluvchi vosita sifatida tasavvur qilingan edi [27]. Biroq tijorat platformalarida bu arxitektura foydalanuvchi e’ tiborini ushlab turishga yo‘ naltirilgani sababli Yeung ta’ riflagan gipernudj ko‘ rinishini oladi [11].

Ikkinchi muhim jihat — inson va algoritm o‘ rtasidagi ishonchning beqarorligi. “Algoritmni afzal ko‘ rish” [14] va “algoritmdan qochish” [15] hodisalari bir-birini inkor etmaydi: ular avtonomiyaning ikki xil buzilishini ifodalaydi. Birinchisida inson o‘ z mulohazasini ortiqcha tez tizimga topshiradi, ikkinchisida foydali vositadan asossiz voz kechadi. K. Burr, N. Kristianini va J. Ladiman intellektual agentlar va foydalanuvchilar o‘ zaro ta’ sirini tahlil qilib, agentning maqsadi foydalanuvchi maqsadi bilan mos kelmagan holatlarda “majburlash” va “aldash” xavfi paydo bo‘ lishini ko‘ rsatgan [28]. Bizning “delegatsiya paradoksi” haqidagi xulosamiz shu fikrni empirik jihatdan to‘ ldiradi: Pew va Ipsos ma’ lumotlari foydalanuvchilarning aynan maqsadlar nomuvofiqligini his qilayotganini ko‘ rsatadi.

Avtonomiyani himoya qilishda ikki strategiya mavjud. Birinchisi — me’ yoriy cheklovlar (taqiqlar, shaffoflik talablari); ikkinchisi — shaxsning kognitiv imkoniyatlarini kuchaytirish. A. Kozyreva, S. Levandovski va R. Hertvig ikkinchi yondashuvni “boosting” deb atab, u foydalanuvchini raqamli muhitdagi manipulyatsiyani mustaqil taniy oladigan qilishga qaratilganini asoslagan [23]. Bizningcha, O‘ zbekiston sharoitida bu ikki strategiyani uyg‘ unlashtirish maqsadga muvofiq. Davlat xizmatlarining 10 foizini sun’ iy intellektga o‘ tkazish rejasi [5] fuqarolarga avtomatik qarorni tushuntirishni talab qilish va uni inson tomonidan qayta ko‘ rib chiqishni so‘ rash huquqini qonun darajasida mustahkamlashni taqozo etadi. Ta’ lim tizimida esa raqamli savodxonlik mazmuniga algoritmlarning ishlash mantiqi, tavsiya tizimlari va generativ modellar cheklovlari haqidagi bilimlarni kiritish zarur.

Tadqiqot natijalari keyingi izlanishlar uchun ham istiqbolli yo‘ nalishlarni belgilaydi. Xususan, taklif etilgan avtonomiya shakllari modelini turli ijtimoiy guruhlar — talabalar, davlat xizmatchilari va keksa avlod vakillari misolida empirik sinovdan o‘ tkazish uning amaliy qiymatini yanada oshiradi.

XULOSA

O‘ tkazilgan tahlil asosida quyidagi xulosalarga kelindi:

1. Sun’ iy intellekt davrida shaxs avtonomiyasi yo‘ qolmayapti, balki transformatsiyaga uchramoqda: tanlov jarayonining axborot olish va muqobillarni baholash bosqichlari tobora ko‘ proq algoritmlarga topshirilmoqda (tomosha vaqtining 70–80 foizi tavsiyalar orqali shakllanadi).

2. Jamoatchilik idrokida “delegatsiya paradoksi” kuzatiladi: sun’ iy intellekt foydasini tan oluvchilar ulushi o‘ sib bormoqda (52% dan 55% gacha), ammo nazoratni kuchaytirish istagi (61%) va insoniy qobiliyatlar susayishidan xavotir (53%) ham ortmoqda.

3. Avtonomiyaning delegatsiya qilingan, kuzatuv ostidagi va refleksiv shakllarini farqlovchi model algoritmik muhitda inson tanlovining sifatini baholash uchun nazariy asos bo‘ la oladi; ulardan refleksiv avtonomiya eng barqaror shakl hisoblanadi.

4. O‘ zbekistonda sun’ iy intellektga oid strategik va etik asos shakllangan, biroq fuqaroning avtomatlashtirilgan qarorga e’ tiroz bildirish va uni inson tomonidan qayta ko‘ rib chiqishni talab qilish huquqini qonun darajasida mustahkamlash, shuningdek raqamli savodxonlik dasturlariga algoritmik savodxonlik modulini kiritish maqsadga muvofiq.

TABIIY FANLAR FAKULTETLARI TALABALARINING KASBIY KOMPETENSIYALARINI INGLIZ TILI DARSLARIDA INTEGRATIV YONDASHUV ASOSIDA RIVOJLANITIRISH TEXNOLOGIYASI

Tursunboyeva Muxlisa Anvar qizi
Farg‘ ona davlat texnika universiteti assistenti
Email:mukhlisaturunboeva.19.12@gmail.com

Annotatsiya: *Zamonaviy talablarga binoan ingliz tilini bilish talabalar uchun faqat kommunikatsiya vositasi emas, balki kasbiy faoliyatda ham muhim ahamiyatga ega. Oliy ta’lim tizimida ingliz tilini o‘ qitishda fanlararo yondashuvning zarurligi va uning o‘ quv jarayoniga ta’siri juda muhim ekanligi ko‘ plab tadqiqodlarda o‘ rganib chiqilmoqda. Ushbu maqolada ham tabiiy fanlar fakulteti talabalarining ingliz tili o‘ qitishda kasbiy kompetensiyalarini integrativ yondashuv asosida rivojlantirish muammolariga qaratilgan. Unda ushbu masala yuzasidan topilishi kerak bo‘ lgan yechimlar, bir qator takliflar misollari bilan keltirib o‘ tilgan. Shu bilan birgalikda, qator tadqiqodchilar fikrlari o‘ rganilgan.*

Kalit so‘ zlar: *kompetensiya, kompetentlik, kasbiy kompetensiya, tabiiy fanlar, nofilologik yo‘ nalish, integratsiya, kimyoviy terminlar, kasbiy ko‘ nikma .*

ТЕХНОЛОГИЯ РАЗВИТИЯ ПРОФЕССИОНАЛЬНЫХ КОМПЕТЕНЦИЙ СТУДЕНТОВ ЕСТЕСТВЕННО-НАУЧНЫХ СПЕЦИАЛЬНОСТЕЙ НА ЗАНЯТИЯХ ПО АНГЛИЙСКОМУ ЯЗЫКУ НА ОСНОВЕ ИНТЕГРАТИВНОГО ПОДХОДА

Аннотация: *В соответствии с современными требованиями знание английского языка является для студентов не только средством общения, но и важным в профессиональной деятельности. Необходимость междисциплинарного подхода к преподаванию английского языка в системе высшего образования и его влияние на образовательный процесс исследуются во многих исследованиях. В данной статье также рассматриваются проблемы развития профессиональных компетенций студентов факультета естественных наук в преподавании английского языка на основе интегративного подхода. В нем приводятся решения, которые необходимо найти по данному вопросу, с примерами ряда предложений. Вместе с тем были изучены мнения ряда исследователей.*

TECHNOLOGY FOR DEVELOPING THE PROFESSIONAL COMPETENCIES OF NATURAL SCIENCE STUDENTS IN ENGLISH CLASSES BASED ON AN INTEGRATIVE APPROACH

Abstract: *In accordance with modern requirements, knowledge of English is not only a means of communication for students, but also important in their professional activities. The need for an interdisciplinary approach to teaching English in higher education and its impact on the educational process are explored in many studies. This article also examines the problems of developing the professional competencies of students of the Faculty of Natural Sciences in teaching English based on an integrative approach. It provides solutions that need to be found on this issue, with examples of a number of proposals. At the same time, the opinions of a number of researchers were studied.*

Keywords: *competence, competence, professional competence, natural sciences, non-philological orientation, integration, chemical terms, professional skills.*

KIRISH

Globalizatsiya va zamonaviy talablarga binoan ingliz tilini bilish talabalar uchun faqat kommunikatsiya vositasi emas, balki kasbiy faoliyatda ham muhim ahamiyatga ega. Oliy ta’lim tizimida ingliz tilini o‘ qitishda fanlararo yondoshuvning zarurligi va uning o‘ quv jarayoniga ta’siri juda muhim ekanligi ko‘ plab tadqiqodlarda o‘ rganib chiqilmoqda. Kasbiy ingliz tilini o‘ qitishning asosiy maqsadi nafaqat tilni o‘ rgatish, balki talabalarga ularning kasbiy sohalarida zarur bo‘ lgan terminologiyani, muloqot uslublarini va ish jarayonlari bilan bog‘ liq ko‘ nikmalarni

rivojlantirishdir. Fanlararo munosabatlar o‘ qitish jarayonida bir nechta fan sohalari o‘ rtasidagi integratsiya va o‘ zaro aloqalarni ifodalaydi. Bu usulda o‘ qituvchi, tilni faqat yakkama-yakka, alohida fan sifatida emas, balki boshqa fanlar, masalan, iqtisodiyot, huquq, tibbiyot va boshqa kasbiy sohalar bilan birgalikda o‘ rgatadi.

Oliy ta’lim muassasalarining nofilologik yo‘ nalishlarida ingliz tilini o‘ rganish nafaqat til bilimlarini, balki turli sohalarda kasbiy kompetensiyalarni rivojlantirishni ham ta’minlaydi. Tabiiy fanlar fakultetlari misolida ko‘ radigan bo‘ lsak, ta’lim olayotgan talabalar uchun ingliz tilini o‘ rganish, ularning ilmiy-tadqiqot faoliyatini va kasbiy sohada muvaffaqiyatli ishlashini ta’minlashda muhim ahamiyatga ega. Integrativ yondashuv bu turli fanlar va tilni birlashtirish metodi bo‘ lib, talabalar uchun ko‘ p jihatdan sharoitlar yaratadi. Ayniqsa, talabaning kasbiy kompetensiyasini ingliz tili darslarida integrativ yondashuv asosida takomillashtirish uning kelgusida nafaqat o‘ z kasbi balkim ingliz tilini mukammal bilish imkonini beradi.

Kasbiy ingliz tili o‘ qitish jarayonida fanlararo munosabatlarning ahamiyati tobora ortib bormoqda. Bugungi kunda globalizatsiya va texnologiyalarning tez rivojlanishi, shuningdek, mehnat bozoridagi talablarning o‘ zgarishi kasbiy ingliz tiliga bo‘ lgan ehtiyojni oshirgan. Talabalarga faqatgina ingliz tilini o‘ rgatish emas, balki ularning kasbiy sohada ingliz tilida erkin muloqot qilish imkoniyatini yaratish muhimdir.

ADABIYOTLAR TAHLILI

Zamonaviy tendensiyalar va hayotga yangi qarashlar nofilologik o‘ quv yurtlarda, xususan tabiiy fanlar fakultetida malakaviy chet tili o‘ qituvchilariga ma’lum talablarni qo‘ ydi. Ko‘ pgina olimlar aniq bir fan bilimlarining boshqa fanlar bilan o‘ rganishda foydalanishning maqsadga muvofiqligi to‘ g‘ risida g‘ oyalarni ilgari surdilar, chunki fanlarning integratsiyasi talabalarning kasbiy kompetensiyalarini va aqliy qobiliyatlarini rivojlantirishga yordam beradi.

Hozirgi vaqtda zamonaviy pedagogik o‘ quv jarayonda fanlararo aloqalarni rivojlantirish muammosi keng muhokama qilinmoqda. N.A.Menchinskaya, E.I.Monoszon, V.N.Maksimova, N.A.Churilin, N.A.Sorokin va V.N.Fedorova kabi ko‘ plab tadqiqotchilarning fikriga ko‘ ra, integrativ yondashuv ya’ni fanlararo aloqalarning beshta asosiy – uslubiy, tarbiyaviy, rivojlantiruvchi, tarbiyaviy va funksional funksiyalarga ajratib olish odatiy holdir. Agar fanlararo aloqalarning uslubiy funksiyasi bo‘ lsa talabalarga bilimga tizimli yondashuv nuqtai nazaridan zamonaviy fan tushunchalarini yaxshiroq o‘ zlashtirishga, fanlararo aloqalarning tarbiyaviy funksiyasi jihatidan muvofiqlik, chuqurlik, xabardorlik va moslashuvchanlik fazilatlarini shakllantirishga yordam beradi [1].

Rus olimlarining tadqiqotlariga ko‘ ra, ingliz tili darslarida integrativ yondashuv asosida kasbiy kompetensiyani rivojlantirish texnologiyasi talabalarni nafaqat til ko‘ nikmalarini, balki ilmiy va kasbiy bilimlarini ham rivojlantirishga yordam beradi. Ushbu yondashuv orqali talabalar o‘ z kasbiy faoliyatida muvaffaqiyatli bo‘ lishlari uchun zarur bo‘ lgan bilim, ko‘ nikma va malakalarni o‘ zlashtiradilar. Shu bilan birga, integrativ metodlar talabalarni ilmiy fikrlashga, muloqotga va kasbiy faoliyatda to‘ g‘ ri qarorlar qabul qilishga tayyorlaydi.

G.G.Belovaning so‘ zlariga ko‘ ra: “Interaktiv metodlar talabalarga o‘ z bilimlarini amaliyotda qo‘ llash imkonini beradi, bu esa ularning kasbiy kompetensiyalarini samarali rivojlantirishga yordam beradi”. Uning fikricha, interaktiv metodlar talabalar o‘ rtasida o‘ zaro muloqot va hamkorlikni rivojlantirishga yordam beradi, bu esa kasbiy vazifalarni samarali bajarishga tayyorlaydi. Shuningdek, interaktiv metodlar talabalarni turli kasbiy vazifalarni hal qilishda va ingliz tilida ilmiy materiallarni sintez qilishda faol ishtirok etishga undaydi [2].

So‘ nggi o‘ n yil Ichida bu sohada yana ko‘ plab o‘ zbek tadqiqodchi olimlarimiz ilmiy-tadqiqot ishlarini amalga oshirdilar. Jumladan, Sh.Yusupova va D.Rejapova integratsion darslarni tashkil qilish metodikasi ustida [4.7], Z.Bahodirova iqtisodiy ta’lim sohasida axborot texnologiyalarini integratsiyalash muammolarini o‘ rganish masalasida, U.Musaev integratsiyani umumiy ta’lim sohasiga jalb qilish jarayoni borasida [5.6.] tadqiqot ishlarini olib borishdi. O.G‘ ozieva, R.Ismoilov [6.12], Z.Qobilova va G.Alieva kabi pedagog o‘ qituvchilar integratsion ta’lim usullaridan foydalanishning turli ko‘ rin0069shlarini ishlab chiqishdi. K.Turdieva fanni amaliyotga integratsiya sifatida, O.Hayitova elektron vositalarni tatbiq etish orqali fanlararo integratsiyani ta’minlash yo‘ nalishlari bo‘ yicha o‘ z fikrlarini e’lon qilishgan. N.Taylaqov va A.Suyarovlar o‘ quv fanlarini integratsiyalashning ayrim jixatlarini ishlab chiqishgan.

TADQIQOT METODOLOGIYASI

Tadqiqotda integrativ va fanlararo yondashuv, tahlil, taqqoslash, umumlashtirish hamda pedagogik kuzatish metodlaridan foydalanildi. Tabiiy fanlar fakulteti talabalarining ingliz tili darslarida kasbiy kompetensiyalarini rivojlantirish imkoniyatlari o‘ rganilib, ingliz tili va mutaxassislik fanlarini uyg‘ unlashtirishga asoslangan topshiriqlar hamda interaktiv metodlar tahlil qilindi. Shuningdek, “Acids and Bases” mavzusi asosida integrativ dars modeli ishlab chiqilib, unda kasbiy terminologiya, ingliz tilidagi muloqot va amaliy topshiriqlarning o‘ zaro bog‘ liqligi ko‘ rib chiqildi.

Maqolada oliy ta’lim muassasalarining tabiiy fanlar fakultetida ingliz tili ta’lim sifatini baholashda ularning kasbiy kompetensiyalarini inobatga olish zarurligi muhokama qilinadi. O‘ rganish chog‘ ida ingliz tili darslarida integrativ yondashuvdan foydalanish talabaning kabiy kompetensiyasini oshirishning eng samarali usullaridan biri etib topildi va ushbu yondashuvning ahamiyatiga kengroq urg‘ u berildi.

Natija

Talabaning kasbiy kompetensiyasini oshirishni tahlil qilishdan oldin kompetensiya va kasbiy kompetensiya o‘ zi nima ekanligini yoritib berish joiz.

Kompetentsiya – bu shaxsning turli vaziyatlarda, shu jumladan, yangi sharoitlarda harakat qila olishiga yordam beradigan bilimlar, ko’ nikmalar va malakalar hamda shaxsning o’ ziga xos fazilatlari yig’ indisidir. [3]

Kasbiy kompetensiya — bu shaxsning o‘ z kasbiy faoliyatini samarali va sifatli bajarish uchun zarur bo‘ lgan bilimlar, ko‘ nikmalar va malakalarning yig‘ indisidir. Kasbiy kompetensiya faqat bilimlar bilan cheklanmaydi, balki amaliy ko‘ nikmalar, tajriba, professional axloq va muloqot qobiliyatlarini ham o‘ z ichiga oladi. Hozirgi zamon mehnat bozorida kasbiy kompetensiya mutaxassislarning muvaffaqiyatli faoliyat yuritishlari uchun muhim omil hisoblanadi .

Kasbiy kompetensiyaning o‘ ziga xos asosiy tarkibiy qismlari mavjud bo‘ lib ular quyidagilar hisoblanadi:

- kasbiy bilimlar — sohaga doir bilimlar va nazariy tushunchalar.
- kasbiy ko‘ nikmalar — o‘ z kasbini bajarishda talab etiladigan amaliy ko‘ nikmalar.
- kasbiy malakalar — to‘ g‘ ri qarorlar qabul qilish, samarali ish usullarini topish kabi yuqori darajadagi ko‘ nikmalar.
- kasbiy tajriba — mutaxassisning real kasbiy muhitida o‘ rganilgan tajriba va amaliyot.

Kasbiy kompetensiya o‘ qitish va ta’lim jarayonida o‘ rganiladigan asosiy tushunchalar sifatida ko‘ rib chiqiladi. Zamonaviy ta’lim tizimida o‘ quvchilarni nafaqat bilimlar bilan ta’minlash, balki ularga kasbiy ko‘ nikmalarni o‘ rgatish ham zarur. Ta’lim dasturlari va o‘ quv rejalari kasbiy kompetensiyalarni rivojlantirishga qaratilgan bo‘ lishi kerak.

R.B.Rubin va S.Savignon o’ z tadqiqotlarida kompetentsiyani bilim, tajriba, qadriyatlar, intilishlar asosida ta’ lim olish jarayonida erishilgan umumiy layoqat sifatida ta’ riflaydi. [4]

Kompetentsiya xususida filologiya va psixologiya fanlari doktori, akademik A.A.Leontev shunday yozadi: “Kompetentsiya tushunchasining paydo bo’ lishi mutaxassis tayyorlash tarixi bilan bog’ liq. Bunda kompetentsiya bilim, ko’ nikma va umumiy malakalarni ish faoliyatiga safarbar qila olish layoqati sifatida tushuniladi”. [5]

Integrativ yondashuv turli fanlarni yoki bilim sohlarini o‘ zaro bog‘ lash orqali dars jarayonida talabalarni yanada samarali o‘ qitish va ularga yanada kengroq bilim va ko‘ nikmalarni taqdim etish usuli ekanligini va ingliz tilida tabiiy fanlarni o‘ qitishda integrativ yondashuvni til va kasbiy bilimlarni birlashtirib, talabalarni ilmiy sohada ishlashga tayyorlay olish sifatida tasvirlab berdik.

Quyida biz tabiiy fanlar fakulteti talabalarining ingliz tili darslarida kasbiy kompetensiyalarini integrativ yondashuv asosida rivojlantirishga qaratilgan ushbu jadvalni tuzdik.

1-jadval. Kasbiy kompetensiyalarini integrativ yondashuv asosida rivojlantirish

Integrativ yondashuv komponentlari	Kasbiy kompetensiyani rivojlantirishdagi o‘ rni	Metodlar va texnologiyalar	Natijalar
Ingliz tili va tabiiy fanlarni o‘ zaro bog‘ lash	Ingliz tili va mutaxassislik fanlarni birlashtirish orqali talaba kasbiy sohada ilmiy muloqot terminlarini o‘ rganadi.	Aniq reja bo‘ yicha ta’lim berish, interaktiv metodlar	Talaba ingliz tilida o‘ z kasbiga oid topshiriqlarni bajarishga tayyorlanadi
Interaktiv metodlar	Talaba o‘ z bilimlarini amaliyotda qo‘ llay olishi orqali duch kelishi mumkin bo‘ lgan muammolarni hal qilishni o‘ rganadi.	Mutaxassislik fanlar mashg‘ ulotlari paytida muammolani guruh bo‘ lgan holda jamoaviy hal qilish	Talaba tanqidiy fikrlash va tez qarorlar qabul qilish ko‘ nikmalarini rivojlantiradi
Kasbiy muloqot va kommunikatsiya	Talaba ingliz tilida o‘ z kasbi yuzasidan muloqot qilishni o‘ rganadi.	Muhokamalar, intervyu o‘ tkazish, kasbiy taqdimotlar	Talaba ingliz tilida aniq va to‘ g‘ ri kasbiy muloqot qilish ko‘ nikmalarini rivojlantiradi.

Ushbu jadvalda taqdim etilgan komponentlar ingliz tili darslarida kasbiy kompetensiyani integrativ yondashuv asosida rivojlantirishning samarali usullarini ko‘ rsatadi.

Tabiiy fanlar fakultetlarida ingliz tilini integrativ yondashuv asosida o‘ qitish, talabalarni kasbiy kompetensiyalarini rivojlantirishda samarali usul bo‘ lishi mumkin. Bu yondashuv talabalarga ilmiy va kasbiy bilimlarni birlashtirib, ularning fikrlash, yozish, va muloqot qilish ko‘ nikmalarini oshiradi. Talabalar ilmiy materiallarni ingliz tilida o‘ rganib, o‘ z kasbiy

sohalarida muvaffaqiyatga erishish uchun zarur bo‘ lgan kompetensiyalarni egallaydilar. Shundan kelib chiqqan holda tabiiy fanlar oilasiga mansub kimyo fanidan mavzu tanlagan holda dars ishlanmasini ishlab chiqdik. Mavzu sifatida "Acids and Bases" (Kislotalar va Asoslar) tanlab olindi.

Darsning maqsadi talabalarga kislotalar va asoslar haqida ilmiy ma’lumotlarni ingliz tilida taqdim etish, kislotalar va asoslarning xususiyatlari, turli reaksiyalar va pH ning rolini tushuntirish hamdam talabalarga kimyo bo‘ yicha kasbiy atamalarda ingliz tilida so‘ zlashish va yozish ko‘ nikmalarini rivojlantirish kabi bo‘ ldi.

Darsning vazifalari sifatida quyidagilar belgilab olindi:

1. Talabalarga kislotalar va asoslarning ta’riflari, xususiyatlari va misollarini taqdim etish.
2. Kislotalar va asoslar bilan bog‘ liq kimyoviy reaksiyalarni ingliz tilida tushuntirish.
3. Talabalar bilan amaliy mashqlar orqali kislotalar va asoslar haqida bilimlarni mustahkamlash.
4. pH o‘ lchovlari, kislota va asoslarning o‘ zaro ta’sirini tushuntirish.

Darsning boshlanishida talabalarga ingliz tilida mavzuga oid savollar berildi:

"What is an acid?" (Kislotaning ta’rifi nima?), "What is a base?" (Asosning ta’rifi nima?), "Can you give an example of an acid and a base?" (Kislota va asosning misollarini keltiring?). Keltirib o‘ tilgan savollar talabalar tomonidan kasbiy so‘ zlashuvga tayyorlanishga yordam beradi va darsning davomida tushuntiriladigan muhim tushunchalarga yo‘ l ochadi.

Mashg‘ ulot mobaynida mavzuga oid kimyoviy terminlarning izohini talabalarga doskada yozib tushuntirib berish ularning yodda mustahkam saqlanishiga ko‘ mak beradi:[6]

Ta’rif: "Acids are substances that donate protons (H^+ ions) when dissolved in water" - (Kislotalar – bu suvda eriganida proton (H^+ ionlarini) beradigan moddalar).

Misollar: Hydrochloric acid (HCl); Sulfuric acid (H_2SO_4);Citric acid ($C_6H_8O_7$).

Ta’rif: "Bases are substances that accept protons (H^+ ions) or donate hydroxide ions (OH^-) when dissolved in water." (Asoslar – bu suvda proton (H^+ ionlarini) qabul qiladigan yoki gidroksid ionlarini (OH^-) beradigan moddalar).

Misollar: Sodium hydroxide (NaOH), Potassium hydroxide (KOH), Ammonia (NH_3)

Ta’rif: "When an acid reacts with a base, they neutralize each other and form water and a salt." (Kislota va asos reaksiyaga kirishganda, ular bir-birini neytrallashadi va suv hamda tuz hosil qiladi).

Reaksiya misoli: $HCl + NaOH \rightarrow NaCl + H_2O$

Ta’rif: "Hydrochloric acid reacts with sodium hydroxide to form sodium chloride and water." (Tuzli kislota natriy gidroksidi bilan reaksiyaga kirishib, natriy xlorid va suv hosil qiladi). Darsning nazariy qismidan so‘ ng amaliy qismga o‘ tiladi. Amaliy qismda interaktiv mashg‘ ulotlarga murojaat qilindi. Topshiriqlarni bajarishda guruh bo‘ lib ishlash ma’qul degan xulosaga kelindi:

Reaksiyalarni keltiring: Talabalar bilan quyidagi reaksiyalarni ingliz tilida muhokama qiling: 1) $HCl + NaOH \rightarrow ?$ (Tuzli kislota bilan natriy gidroksidi reaksiyasi)

$H_2SO_4 + KOH \rightarrow ?$ (Sulfat kislotasi bilan kaliyning asosiy reaksiyasi);

2) "What would happen if you mix hydrochloric acid with ammonia?" (Agar siz tuzli kislota bilan ammiakni aralashtirsangiz, nima bo‘ ladi?)

Javob: "A toxic gas, ammonia gas (NH_3), may be produced." (Zararsiz gaz, ammiak gazining (NH_3) hosil bo‘ lishi mumkin.)

MUHOKAMA

Olib borilgan tahlillar shuni ko‘ rsatadiki, tabiiy fanlar fakulteti talabalariga ingliz tilini o‘ qitishda integrativ yondashuvdan foydalanish til kompetensiyasi bilan bir qatorda kasbiy bilim va ko‘ nikmalarning shakllanishiga ham ijobiy ta’sir ko‘ rsatadi. Mazkur yondashuvning asosiy afzalligi ingliz tili mashg‘ ulotlarini talabaning kelajakdagi kasbiy faoliyati bilan bevosita bog‘ lash imkoniyatining mavjudligidir. Bunda ingliz tili alohida o‘ quv predmeti sifatida emas, balki mutaxassislik fanlarini o‘ zlashtirish, ilmiy axborotni izlash, tushunish va undan foydalanish vositasi sifatida namoyon bo‘ ladi.

Integrativ ta’lim jarayonida fanlararo bog‘ liqlikning izchil tashkil etilishi talabalarning turli fanlardan egallagan bilimlarini yagona mazmuniy tizimda qo‘ llashiga imkon beradi. Xususan, tabiiy fanlarga oid terminlar, ilmiy tushunchalar va amaliy vazifalarning ingliz tilidagi materiallar bilan uyg‘ unlashtirilishi talabaning yangi bilimni o‘ zlashtirish jarayonini mazmunan boyitadi. Natijada talaba nafaqat muayyan termin yoki grammatik birlikni o‘ rganadi, balki uni kasbiy vaziyatda qo‘ llash, tushuntirish va muloqot jarayonida foydalanish imkoniyatiga ega bo‘ ladi.

Muhokama jarayonida dars mazmunining yagona g‘ oyaga yo‘ naltirilishi ham muhim omil sifatida namoyon bo‘ ldi. Agar til materiali mutaxassislik mazmuni bilan uzviy bog‘ langan holda berilsa, talabaning o‘ quv faoliyatidagi motivatsiyasi kuchayadi. Chunki talaba o‘ rganayotgan ingliz tili birliklarining kelajakdagi kasbiy faoliyatida qanday ahamiyatga ega ekanligini anglay boshlaydi. Ayniqsa, tabiiy fanlarga oid ilmiy matnlarni o‘ qish, kasbiy terminlarni izohlash, tajriba yoki jarayonlarni ingliz tilida tavsiflash kabi topshiriqlar til o‘ rganishni amaliy faoliyat bilan bog‘ lashga xizmat qiladi.

Integrativ yondashuvning yana bir muhim jihati talabalarning kommunikativ faolligini oshirishidir. An'anaviy mashg' ulotlarda til birliklarini o' zlashtirish ko' pincha nazariy bilimlarni egallash bilan chegaralanishi mumkin. Integrativ mashg' ulotlarda esa talabalar o' z bilimlarini muhokama, savol-javob, guruhli topshiriqlar, taqdimot va kasbiy vaziyatlarni modellashtirish orqali amaliyotda qo' llaydilar. Bunday faoliyat ularning fikrini ingliz tilida izchil ifodalash, kasbiy terminlardan o' rinli foydalanish va o' z nuqtayi nazarini asoslash ko' nikmalarini rivojlantiradi.

Shuningdek, integrativ yondashuv talabalarning mustaqil va tanqidiy fikrlash qobiliyatlarini rivojlantirish uchun ham qulay pedagogik sharoit yaratadi. Kasbiy mazmundagi topshiriqlarni bajarish jarayonida talaba tayyor ma'lumotni qabul qiluvchi emas, balki uni izlovchi, tahlil qiluvchi va amaliy vaziyatda qo' llovchi subyektga aylanadi. Ayniqsa, guruhda muammoli vazifalarni hal qilish, ilmiy ma'lumotlarni taqqoslash va berilgan savollarga ingliz tilida javob tayyorlash jarayonlari talabaning mantiqiy fikrlashi hamda qaror qabul qilish ko' nikmalarini faollashtiradi.

Tadqiqot doirasida kimyo faniga oid "Acids and Bases" mavzusining ingliz tili mashg' ulotiga integratsiya qilinishi ushbu imkoniyatlarni amaliy jihatdan namoyon etadi. Mazkur mashg' ulotda kimyoviy tushunchalar, terminlar va reaksiyalar ingliz tilidagi kommunikativ topshiriqlar bilan birgalikda qo' llanilgan. Bunday tashkil etilgan darsda talaba bir vaqtning o' zida ham mutaxassislik bilimlarini mustahkamlaydi, ham ushbu bilimlarni ingliz tilida ifodalashga o' rganadi. Shu sababli integrativ yondashuvni oddiy fanlararo bog' liqlik emas, balki til va kasbiy kompetensiyalarni parallel ravishda rivojlantirishga xizmat qiluvchi pedagogik mexanizm sifatida baholash mumkin.

Bundan tashqari, integrativ yondashuvning samaradorligi kasbiy terminologiyani o' zlashtirish jarayonida ham yaqqol ko' rinadi. Tabiiy fanlar yo' nalishida tahsil olayotgan talabalar uchun ingliz tilidagi maxsus terminlarni bilish ilmiy adabiyotlardan foydalanish, xalqaro ilmiy axborotni o' zlashtirish va kelgusidagi kasbiy muloqotda ishtirok etish imkoniyatlarini kengaytiradi. Terminlarning faqat lug' aviy ma'nosini yodlashdan ko' ra, ularni muayyan ilmiy va kasbiy kontekstda qo' llash talabaning faol lug' atini shakllantirishga ko' proq xizmat qiladi.

Shu nuqtayi nazardan, integrativ yondashuv natijasida shakllanadigan kasbiy kompetensiyani faqat ingliz tilini bilish darajasi bilan baholash yetarli emas. Unda talabaning ilmiy axborotni tushunishi, kasbiy terminlardan foydalanishi, o' z fikrini aniq ifodalashi, mutaxassislikka oid vaziyatlarda muloqotga kirishishi, muammoli topshiriqlarni hal qilishi va o' z bilimlarini amaliy faoliyatga tatbiq eta olishi kabi jihatlar ham hisobga olinishi lozim. Demak, integrativ ta'lim natijasida til kompetensiyasi va kasbiy kompetensiya bir-birini to' ldiruvchi yaxlit tizim sifatida shakllanadi.

Muhokama natijalari ingliz tili va tabiiy fanlar mazmunini uyg' unlashtirish talabalarning o' quv faoliyatini amaliy yo' nalishga yaqinlashtirishini ko' rsatadi. Bunday yondashuv ta'lim mazmunining kasbiy yo' naltirilganligini kuchaytiradi, talabaning fanlar o' rtasidagi bog' liqlikni anglashiga yordam beradi hamda ingliz tilidan real kasbiy vaziyatlarda foydalanish ehtiyojini shakllantiradi. Shu bois tabiiy fanlar fakultetlarida ingliz tili mashg' ulotlarini tashkil etishda integrativ yondashuvdan tizimli va maqsadli foydalanish talabalarning kasbiy kompetensiyalarini rivojlantirishning istiqbolli yo' nalishlaridan biri sifatida qaralishi mumkin.

XULOSA

Tabiiy fanlar o' quv jarayonida faqatgina nazariy bilimlarni olishdan tashqari, amaliy ko' nikmalarni ham rivojlantirishi kerak. Rivojlantirish texnologiyalari o' quvchilarga ilmiy tafakkur, tahlil qilish, tadqiqot qilish kabi ko' nikmalarni shakllantirishga imkon beradi. Bu texnologiyalarni qo' llash orqali o' quvchilarda mustaqil fikrlash, muloqot qilish, jamoada ishlash ko' nikmalari ham rivojlanadi. I.S.Kopylov rivojlantirish texnologiyalarini tabiiy fanlarni o' qitish jarayoniga qo' llashning muhimligini quyidagicha ta'kidlaydi: "Tabiiy fanlarni o' qitishda rivojlantirish texnologiyalari o' quvchilarning mustaqil ishlashini va ilmiy yondashuvni qo' llashini ta'minlaydi, bu esa ularga ilmiy yutuqlarni erishish imkonini yaratadi".

Tabiiy fanlar, jumladan kimyo, biologiya, fizika, matematika kabi sohalar va ingliz tilini integrativ yondashuv asosida o' qitish, talabalarning umumiy dunyoqarashi, ilmiy tafakkurini rivojlantirishda muhim rol o' ynaydi. Bugungi kunda tabiiy fanlarni o' qitish jarayonida innovatsion texnologiyalarni qo' llash nafaqat talabalarning bilimlarini mustahkamlash, balki ularni amaliy hayotda qo' llash ko' nikmalarini rivojlantirishga yordam beradi.

Ingliz tili darslarida integrativ yondashuvni qo' llash tabiiy fanlar fakulteti talabalarining kasbiy kompetensiyalarini rivojlantirish texnologiyalari talabalarga nafaqat nazariy bilimlarni, balki amaliy ko' nikmalarni ham o' zlashtirish imkonini beradi. Innovatsion metodlar va texnologiyalarni qo' llash orqali o' quvchilar ilmiy tafakkurini rivojlantiradilar, analitik fikrlash, muloqot qilish va kasbiy faoliyatda muvaffaqiyatli ishlash ko' nikmalarini o' zlashtiradilar.

MALAKA OSHIRISH TIZIMIDA RAHBAR-KADRLARNING SOFT-KOMPETENSIYALARINI RIVOJLANTIRISHNING KORPORATIV-PEDAGOGIK SHART-SHAROITLARI

Axrorova Umida Xamidullayevna
University of Business and Science dotsenti
Email:umiaxrorhamid@gmail.com
UDK 378.046.4:005.336

Annotatsiya: *mazkur maqolada malaka oshirish tizimida rahbar-kadrlarning soft-kompetensiyalarini rivojlantirishning korporativ-pedagogik shart-sharoitlari ilmiy-nazariy va amaliy jihatdan tahlil qilingan. Rahbarlik faoliyati samaradorligini ta'minlovchi kommunikativ kompetentlik, jamoada ishlash, liderlik, tanqidiy va strategik fikrlash, muammoli vaziyatlarda qaror qabul qilish, nizolarni boshqarish, emotsional intellekt, kreativlik hamda o' zgarishlarga moslashuvchanlik kabi yumshoq ko' nikmalarning mazmuni yoritilgan. Shuningdek, korporativ ta'lim muhitini shakllantirish, individual ta'lim trayektoriyalarini loyihalash, interfaol va amaliyotga yo' naltirilgan metodlarni qo' llash, mentorlik va kouching mexanizmlaridan foydalanish, refleksiv faoliyatni tashkil etish hamda uzluksiz monitoring olib borish soft-kompetensiyalarni rivojlantirishning asosiy pedagogik shartlari sifatida asoslangan. Maqolada rahbar-kadrlarning kasbiy ehtiyojlari va boshqaruv tajribasini hisobga oluvchi korporativ-pedagogik yondashuvning malaka oshirish samaradorligini ta'minlashdagi ahamiyati ochib berilgan hamda mazkur jarayonni takomillashtirishga qaratilgan ilmiy-amaliy tavsiyalar ishlab chiqilgan.*

Kalit so' zlar: *malaka oshirish tizimi, rahbar-kadrlar, soft-kompetensiyalar, korporativ ta'lim, korporativ-pedagogik yondashuv, liderlik, kommunikativ kompetentlik, emotsional intellekt, strategik fikrlash, jamoada ishlash, mentorlik, kouching, individual ta'lim trayektoriyasi, refleksiya, pedagogik shart-sharoitlar.*

КОРПОРАТИВНО-ПЕДАГОГИЧЕСКИЕ УСЛОВИЯ РАЗВИТИЯ SOFT-КОМПЕТЕНЦИЙ РУКОВОДЯЩИХ КАДРОВ В СИСТЕМЕ ПОВЫШЕНИЯ КВАЛИФИКАЦИИ

Аннотация: *в статье с научно-теоретической и практической точек зрения проанализированы корпоративно-педагогические условия развития soft-компетенций руководящих кадров в системе повышения квалификации. Раскрыто содержание таких гибких навыков, обеспечивающих эффективность управленческой деятельности, как коммуникативная компетентность, командная работа, лидерство, критическое и стратегическое мышление, принятие решений в проблемных ситуациях, управление конфликтами, эмоциональный интеллект, креативность и адаптивность к изменениям. Формирование корпоративной образовательной среды, проектирование индивидуальных образовательных траекторий, применение интерактивных и практико-ориентированных методов, использование механизмов наставничества и коучинга, организация рефлексивной деятельности и непрерывного мониторинга обоснованы в качестве основных педагогических условий развития soft-компетенций. Раскрыта роль корпоративно-педагогического подхода, учитывающего профессиональные потребности и управленческий опыт руководящих кадров, в повышении эффективности их профессионального развития. Разработаны научно-практические рекомендации, направленные на совершенствование данного процесса.*

Ключевые слова: *система повышения квалификации, руководящие кадры, soft-компетенции, гибкие навыки, корпоративное обучение, корпоративно-педагогический подход, лидерство, коммуникативная компетентность, эмоциональный интеллект, стратегическое мышление, командная работа, наставничество, коучинг, индивидуальная образовательная траектория, рефлексия, педагогические условия.*

CORPORATE AND PEDAGOGICAL CONDITIONS FOR DEVELOPING MANAGERS' SOFT COMPETENCIES IN THE PROFESSIONAL DEVELOPMENT SYSTEM

Abstract: *This article provides a theoretical and practical analysis of the corporate and pedagogical conditions required for developing managers' soft competencies within the professional development system. It examines the content of soft skills that contribute to effective managerial performance, including communicative competence, teamwork, leadership, critical and strategic thinking, decision-making in challenging situations, conflict management, emotional intelligence, creativity, and adaptability to change. The*

creation of a corporate learning environment, the design of individual learning pathways, the application of interactive and practice-oriented methods, the use of mentoring and coaching mechanisms, the organization of reflective activities, and continuous monitoring are substantiated as essential pedagogical conditions for soft competency development. The article also highlights the role of a corporate and pedagogical approach that considers managers' professional needs and leadership experience in enhancing the effectiveness of professional development. Scientific and practical recommendations for improving this process are proposed.

Keywords: *professional development system, managers, managerial personnel, soft competencies, soft skills, corporate learning, corporate and pedagogical approach, leadership, communicative competence, emotional intelligence, strategic thinking, teamwork, mentoring, coaching, individual learning pathway, reflection, pedagogical conditions.*

KIRISH

Zamonaviy boshqaruv muhitining tezkor o‘ zgarishi rahbar-kadrlardan kasbiy bilim va boshqaruv tajribasi bilan bir qatorda rivojlangan soft-kompetensiyalarga ega bo‘ lishni talab etmoqda. Tadqiqotlarda shaxsning kommunikativ qobiliyati, emotsional barqarorligi, hamkorlikka tayyorligi va muammolarni hal etish ko‘ nikmalari uning kasbiy muvaffaqiyatini belgilovchi muhim omillar sifatida baholanadi [1, 451–464-b.]. Shu sababli rahbar-kadrlarning liderlik, strategik fikrlash, samarali muloqot, jamoani boshqarish, kreativlik va o‘ zgarishlarga moslashuvchanlik kompetensiyalarini uzluksiz rivojlantirish dolzarb pedagogik vazifaga aylanmoqda. An’anaviy malaka oshirish dasturlarida nazariy bilimlarni uzatishga ustuvor ahamiyat berilishi rahbarlarning real boshqaruv vaziyatlarida zarur bo‘ ladigan shaxslararo va ijtimoiy-emotsional ko‘ nikmalarini rivojlantirish imkoniyatlarini cheklaydi. D. Goulman samarali rahbarlik faoliyatida emotsional intellekt, o‘ zini boshqarish, empatiya va ijtimoiy munosabatlarni yo‘ lga qo‘ yish qobiliyatlarining alohida ahamiyatga ega ekanligini ta’kidlaydi [2, 93–102-b.]. Bu esa malaka oshirish mazmunini rahbar-kadrlarning amaliy ehtiyojlari va boshqaruv tajribasiga muvofiq takomillashtirish zaruratini yuzaga keltiradi. Korporativ-pedagogik yondashuv malaka oshirish jarayonini tashkilotning strategik maqsadlari, korporativ qadriyatlari va rahbarlarning individual kasbiy ehtiyojlari bilan uyg‘ unlashtirish imkonini beradi. Bunday yondashuv interfaol ta’lim, muammoli vaziyatlar tahlili, loyiha faoliyati, mentorlik, kouching va refleksiv metodlar orqali soft-kompetensiyalarni amaliy faoliyat bilan uzviy bog‘ liq holda rivojlantirishga xizmat qiladi. Shundan kelib chiqib, rahbar-kadrlarning soft-kompetensiyalarini rivojlantirishga ta’sir etuvchi korporativ-pedagogik shart-sharoitlarni aniqlash va ilmiy asoslash mazkur tadqiqotning asosiy maqsadini tashkil etadi.

ADABIYOTLAR TAHLILI

Rahbar-kadrlarning soft-kompetensiyalarini rivojlantirish muammosi menejment, pedagogika, psixologiya va korporativ ta’lim yo‘ nalishlarida olib borilgan tadqiqotlarda turli yondashuvlar asosida o‘ rganilgan. Dastlab rahbarning kasbiy samaradorligini belgilovchi kompetensiyalar R. Katz tomonidan texnik, insoniy va konseptual ko‘ nikmalar tizimi sifatida tasniflangan. Olimning fikricha, boshqaruv pog‘ onasi yuqorilagan sari insonlar bilan ishlash va strategik fikrlash ko‘ nikmalarining ahamiyati ortib boradi [3, 90–102-b.]. Mazkur yondashuv rahbarlik faoliyatida faqat maxsus bilimlar emas, balki shaxslararo munosabatlar va konseptual tafakkur ham muhimligini ko‘ rsatadi.

D. Goulman tadqiqotlarida samarali rahbarlik emotsional intellekt bilan bevosita bog‘ langan. Muallif o‘ zini anglash, o‘ zini boshqarish, motivatsiya, empatiya va ijtimoiy ko‘ nikmalarni rahbar faoliyati natijadorligini ta’minlovchi asosiy komponentlar sifatida ko‘ rsatadi [2, 93–102-b.]. R. Boyatzis esa kompetensiyani shaxsning muayyan kasbiy faoliyatda yuqori natijalarga erishishini ta’minlovchi o‘ zaro bog‘ liq xususiyatlar majmui sifatida izohlaydi. Uning tadqiqotlarida emotsional, ijtimoiy va kognitiv kompetensiyalarni rivojlantirish rahbarning kasbiy samaradorligiga ijobiy ta’sir ko‘ rsatishi asoslangan [4, 5–12-b.].

J. Heckman va T. Kautz soft-kompetensiyalarni shaxsning ta’limiy, kasbiy hamda ijtimoiy muvaffaqiyatiga ta’sir qiluvchi xususiyatlar sifatida baholaydi. Tadqiqotchilar qat’iyatlilik, mas’uliyat, hamkorlik, o‘ zini nazorat qilish va muloqotga kirishish qobiliyatlari kasbiy bilimlar singari muhim ekanligini ilmiy dalillar asosida ko‘ rsatgan [1, 451–464-b.]. M. Robles tomonidan o‘ tkazilgan tadqiqotda esa ish beruvchilar nuqtayi nazaridan eng muhim soft skills sifatida muloqot, halollik, xushmuomalalik, mas’uliyat, jamoada ishlash, moslashuvchanlik va kasbiy etika ajratib ko‘ rsatilgan [5, 453–465-b.]. Ushbu qarashlar soft-kompetensiyalarni rahbarlarning kasbiy tayyorgarligi va malaka oshirish dasturlariga integratsiya qilish zarurligini tasdiqlaydi.

Korporativ ta’lim masalalari P. Tynjälä tadqiqotlarida ish joyidagi nazariy, amaliy, refleksiv va ijtimoiy bilimlarning integratsiyasi bilan izohlanadi. Muallif kasbiy kompetensiyalar faqat tayyor bilimlarni o‘ zlashtirish orqali emas, balki amaliy faoliyat, tajriba almashish, muammoli vaziyatlarni hal qilish va refleksiya jarayonida rivojlanishini ta’kidlaydi [6, 130–154-b.]. M. Eraut ham norasmiy ta’lim, ish joyidagi tajriba va kasbiy muloqotni mutaxassislar kompetentligini rivojlantirishning muhim manbalari sifatida baholaydi [7, 247–273-b.]. Mazkur yondashuvlar rahbar-kadrlar malakasini oshirishda korporativ muhitning rivojlantiruvchi imkoniyatlaridan foydalanish zarurligini ko‘ rsatadi.

E. Salas va hammualliflar samarali jamoaviy faoliyatning asosiy omillari sifatida yetakchilik, o‘ zaro ishonch, jamoaviy monitoring, moslashuvchanlik va aniq kommunikatsiyani ko‘ rsatadi [8, 77–124-b.]. Bu kompetensiyalar rahbarning tashkilot ichidagi hamkorlikni yo‘ lga qo‘ yishi, nizolarni konstruktiv boshqarishi va xodimlarni umumiy maqsadlar sari safarbar etishida muhim ahamiyat kasb etadi. Shuningdek, mentorlik va kouching texnologiyalari rahbarlarning o‘ z tajribasini tahlil qilishi, individual rivojlanish maqsadlarini belgilashi hamda boshqaruv faoliyatidagi muammolarga mustaqil yechim topishiga yordam beradi.

Mavjud tadqiqotlar tahlili soft-kompetensiyalarning mohiyati, tarkibiy komponentlari va rahbarlik samaradorligiga ta’siri yetarlicha o‘ rganilganini ko‘ rsatadi. Biroq malaka oshirish tizimida mazkur kompetensiyalarni korporativ ta’lim muhiti, tashkilotning strategik maqsadlari, individual ta’lim trayektoriyasi, mentorlik, kouching va refleksiv faoliyat bilan o‘ zaro bog‘ liq holda rivojlantirish masalalari yaxlit pedagogik tizim sifatida to‘ liq tadqiq etilmagan. Shu sababli rahbar-kadrlarning soft-kompetensiyalarini rivojlantirishga xizmat qiluvchi korporativ-pedagogik shart-sharoitlarni aniqlash, ularning tarkibiy qismlarini tizimlashtirish va amaliy mexanizmlarini ishlab chiqish zarurati mavjud.

TADQIQOTNING METODOLOGIK ASOSLARI

Mazkur tadqiqotning metodologik asosini tizimli, kompetensiyaviy, faoliyatga yo‘ naltirilgan, andragogik, shaxsga yo‘ naltirilgan va korporativ-pedagogik yondashuvlar tashkil etadi. Ushbu yondashuvlar rahbar-kadrlarning soft-kompetensiyalarini o‘ zaro bog‘ langan shaxsiy, kommunikativ, ijtimoiy-emotsional va boshqaruv komponentlaridan iborat yaxlit tizim sifatida o‘ rganish imkonini beradi.

Tizimli yondashuv asosida rahbar-kadrlarning soft-kompetensiyalarini rivojlantirish jarayoni maqsad, mazmun, metod, vosita, pedagogik shart-sharoit, monitoring va natija komponentlarining o‘ zaro aloqadorligi nuqtayi nazaridan tahlil qilindi. Bunda soft-kompetensiyalar alohida ko‘ nikmalar yig‘ indisi emas, balki rahbarning boshqaruv faoliyati samaradorligini ta’minlovchi integrativ kasbiy-shaxsiy sifat sifatida talqin etildi.

Kompetensiyaviy yondashuv rahbar-kadrlarning egallagan bilimlarini amaliy boshqaruv vaziyatlarida qo‘ llashi, jamoa bilan samarali muloqot o‘ rnatishi, muammolarni hal qilishi, asoslangan qarorlar qabul qilishi va o‘ zgaruvchan sharoitlarga moslashishini nazarda tutadi. R. Boyatzis kompetensiyani samarali faoliyat natijalariga olib keluvchi o‘ zaro bog‘ liq shaxsiy xususiyatlar majmui sifatida izohlaydi [4, 5–12-b.]. Shu asosda kommunikativ kompetentlik, liderlik, strategik va tanqidiy fikrlash, emotsional intellekt, jamoada ishlash, konfliktlarni boshqarish, kreativlik va adaptivlik tadqiqotning asosiy tarkibiy mezonlari sifatida belgilandi.

Faoliyatga yo‘ naltirilgan yondashuv soft-kompetensiyalarni tayyor nazariy ma’lumotlarni o‘ zlashtirish orqali emas, balki real yoki modellashtirilgan boshqaruv vaziyatlarida amaliy faoliyatni bajarish jarayonida rivojlantirishga asoslanadi. D. Kolbning tajribaviy ta’lim konsepsiyasiga ko‘ ra, samarali o‘ rganish aniq tajriba, refleksiv kuzatish, nazariy umumlashtirish va faol tajriba bosqichlarining uzviy almashinuvi orqali amalga oshadi [9, 20–38-b.]. Shu sababli tadqiqotda keys-stadi, muammoli topshiriqlar, ishbilarmonlik o‘ yinlari, loyiha faoliyati va boshqaruv vaziyatlarini modellashtirish kabi metodlarga ustuvor ahamiyat berildi.

Andragogik yondashuv rahbar-kadrlarning hayotiy va kasbiy tajribasi, mustaqil o‘ rganishga tayyorligi, amaliy ehtiyojlari hamda ichki motivatsiyasini hisobga olishni talab qiladi. M. Noulz katta yoshdagilar ta’limining samaradorligi o‘ quv materialining ularning kasbiy ehtiyojlari va mavjud tajribasi bilan bog‘ lanishiga bevosita aloqadorligini ta’kidlaydi [10, 43–47-b.]. Mazkur yondashuv asosida tinglovchilarning individual ehtiyojlarini diagnostika qilish, individual ta’lim trayektoriyalarini ishlab chiqish va mustaqil kasbiy rivojlanishni qo‘ llab-quvvatlash muhim metodologik talab sifatida qabul qilindi.

Refleksiv yondashuv rahbarning o‘ z boshqaruv tajribasi, xatti-harakati va qarorlarini tanqidiy tahlil qilishi hamda kelgusi faoliyatini takomillashtirishiga yo‘ naltiriladi. D. Shon mutaxassisning kasbiy rivojlanishini “faoliyat jarayonidagi refleksiya” va “faoliyatdan keyingi refleksiya” mexanizmlari bilan bog‘ laydi [11, 49–69-b.]. Shunga muvofiq refleksiv kundalik, o‘ zini o‘ zi baholash, qayta aloqa, mentorlik va kouching tadqiqotning muhim pedagogik vositalari sifatida belgilandi.

Korporativ-pedagogik yondashuv malaka oshirish mazmunini tashkilotning strategik maqsadlari, korporativ qadriyatlari, boshqaruv madaniyati va rahbarning individual rivojlanish ehtiyojlari bilan uyg‘ unlashtirishga xizmat qiladi. Mazkur yondashuv doirasida ta’lim jarayonining ish joyidagi amaliy faoliyat bilan integratsiyasi, tajriba almashish, jamoaviy o‘ rganish, mentorlik, kouching va uzluksiz kasbiy rivojlanish mexanizmlari asosiy korporativ-pedagogik shartlar sifatida qaraldi.

Tadqiqotda ilmiy manbalarni nazariy tahlil qilish, qiyoslash, tasniflash, tizimlashtirish, umumlashtirish, pedagogik kuzatish, suhbat, so‘ rovnoma, ekspert baholash, o‘ zini o‘ zi baholash hamda diagnostik metodlardan foydalanish nazarda tutiladi. Soft-kompetensiyalarning rivojlanganlik darajasini aniqlashda motivatsion-qadriyatli, kognitiv, kommunikativ-faoliyatli va refleksiv-baholash mezonlari asos qilib olindi.

Shunday qilib, tanlangan metodologik yondashuvlar rahbar-kadrlarning soft-kompetensiyalarini rivojlantirish jarayonini nazariy asoslash, korporativ-pedagogik shart-sharoitlarni aniqlash hamda malaka oshirish mazmuni, metodlari va baholash mexanizmlarini yaxlit tizim sifatida ishlab chiqish imkonini beradi.

NATIJALAR VA ULARNING TAHLILI

Tadqiqot natijasida rahbar-kadrlarning soft-kompetensiyalarini rivojlantirish samaradorligi bir-biri bilan uzviy bog‘ liq bo‘ lgan korporativ-pedagogik shart-sharoitlarga bog‘ liqligi aniqlandi. Ular quyidagilardan iborat: tashkilot maqsadlariga mos korporativ ta’lim muhitini yaratish; rahbarlarning kasbiy ehtiyojlari asosida individual ta’lim trayektoriyasini belgilash; amaliyotga yo‘ naltirilgan interfaol metodlarni qo‘ llash; mentorlik, kouching, refleksiya va uzluksiz monitoringni tashkil etish. Tahlillar rahbar faoliyati uchun kommunikativ kompetentlik, liderlik, jamoada ishlash, strategik va tanqidiy fikrlash, emotsional intellekt, nizolarni boshqarish hamda o‘ zgarishlarga moslashuvchanlik eng muhim soft-kompetensiyalar ekanligini ko‘ rsatdi. Mazkur kompetensiyalarni alohida ko‘ nikmalar sifatida emas, balki o‘ zaro bog‘ langan integrativ tizim sifatida rivojlantirish zarur. Shuningdek, keys-stadi, boshqaruv vaziyatlarini modellashtirish, ishbilarmonlik o‘ yinlari, loyiha faoliyati va refleksiv topshiriqlar nazariy mashg‘ ulotlarga nisbatan rahbarlarning faol ishtiroki hamda amaliy tajribasini kuchliroq ta’minlashi asoslandi. Mentorlik va kouching esa individual rivojlanish ehtiyojlarini aniqlash, kasbiy faoliyatdagi muammolarni tahlil qilish va mustaqil qaror qabul qilish ko‘ nikmalarini takomillashtirishga xizmat qiladi. Olingan natijalar malaka oshirish dasturlarining mazmunini faqat nazariy bilim berishga emas, balki rahbarning real boshqaruv faoliyatida namoyon bo‘ ladigan kompetensiyalarni rivojlantirishga yo‘ naltirish lozimligini ko‘ rsatadi. Bunda diagnostika, amaliy mashg‘ ulot, qayta aloqa, refleksiya va yakuniy monitoringning uzviyligi ta’minlanganda korporativ-pedagogik jarayonning samaradorligi ortadi.

XULOSA

Malaka oshirish tizimida rahbar-kadrlarning soft-kompetensiyalarini rivojlantirish ularning boshqaruv faoliyati samaradorligini oshiruvchi muhim pedagogik jarayondir. Tadqiqot natijalari kommunikativ kompetentlik, liderlik, jamoada ishlash, strategik va tanqidiy fikrlash, emotsional intellekt, nizolarni boshqarish hamda o‘ zgarishlarga moslashuvchanlik rahbar faoliyati uchun ustuvor kompetensiyalar ekanligini ko‘ rsatdi.

Mazkur kompetensiyalarni samarali rivojlantirish uchun korporativ ta’lim muhitini yaratish, individual ta’lim trayektoriyalarini ishlab chiqish, amaliyotga yo‘ naltirilgan interfaol metodlardan foydalanish, shuningdek, mentorlik, kouching, refleksiya va uzluksiz monitoringni yo‘ lga qo‘ yish zarur. Malaka oshirish mazmunining tashkilot strategiyasi, korporativ qadriyatlar va rahbarlarning kasbiy ehtiyojlari bilan uyg‘ unlashtirilishi ta’lim natijadorligini oshiradi.

Shunday qilib, korporativ-pedagogik yondashuv asosida tashkil etilgan malaka oshirish jarayoni rahbar-kadrlarning nafaqat kasbiy bilimlarini, balki samarali boshqaruv uchun zarur bo‘ lgan shaxsiy va ijtimoiy kompetensiyalarini ham izchil rivojlantirish imkonini beradi.

OLIY TA'LIM MUASSASALARI BOSHQARUV KADRLARIDA SUN'IY INTELLEKT KOMPETENSIYALARINI RIVOJLANTIRISH

Ibragimova Go' zal Ilhom qizi
Oliy ta'lim, fan va innovatsiyalar vazirligi huzuridagi Oliy ta'lim tizimi kadrlarini qayta tayyorlash va malakasini oshirish instituti
1-bosqich tayanch doktaranti
gibragimova260@gmail.com

Annotatsiya: *Ushbu maqola oliy ta'lim muassasalari (OTM) boshqaruv kadrlarida — xususan, prorektor, dekan va kafedra mudirlarida — sun'iy intellekt (SI) kompetensiyalarini rivojlantirishga qaratilgan malaka oshirish kursining pedagogik modelini taqdim etadi. Maqolada kursning maqsad-vazifasi, uch modulli tuzilmasi, loyiha-asosli yakuniy nazorat mexanizmi va baholash kriteriyalari ilmiy asoslab beriladi. Kirish qismida muammoning dolzarbligi va xalqaro kontekst yoritiladi; asosiy qismda pedagogik model va uning metodologik asoslari tavsiflanadi; natijalar qismida kursdan kutilayotgan individual va institutsional ta'sirlar muhokama qilinadi.*

Kalit so' zlar: *sun'iy intellekt, oliy ta'lim boshqaruvi, malaka oshirish, pedagogik model, kompetensiya, loyiha-asosli o' qitish.*

DEVELOPING ARTIFICIAL INTELLIGENCE COMPETENCIES AMONG MANAGEMENT PERSONNEL IN HIGHER EDUCATION INSTITUTIONS

Abstract: *This article presents a pedagogical model for a professional development course aimed at fostering artificial intelligence (AI) competencies among management personnel in higher education institutions (HEIs)—specifically vice-rectors, deans, and department heads. The article provides a scientific rationale for the course's objectives, its three-module structure, the project-based final assessment mechanism, and the evaluation criteria. The introduction highlights the relevance of the issue and the international context; the main section describes the pedagogical model and its methodological foundations; and the results section discusses the anticipated individual and institutional impacts of the course.*

Keywords: *artificial intelligence, higher education management, professional development, pedagogical model, competence, project-based learning.*

ФОРМИРОВАНИЕ КОМПЕТЕНЦИЙ В ОБЛАСТИ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА У РУКОВОДЯЩИХ КАДРОВ ВЫСШИХ УЧЕБНЫХ ЗАВЕДЕНИЙ

Аннотация: *В статье представлена педагогическая модель курса повышения квалификации, направленного на формирование компетенций в области искусственного интеллекта (ИИ) у руководящих кадров высших учебных заведений (вузов) — в частности, проректоров, деканов и заведующих кафедрами. Приводится научное обоснование целей курса, его трехмодульной структуры, механизма итоговой аттестации на основе проектной деятельности и критериев оценки. Во введении подчеркивается актуальность проблемы и международный контекст; в основной части описываются педагогическая модель и ее методологические основы; в разделе результатов рассматривается ожидаемое влияние курса на индивидуальном и институциональном уровнях.*

Ключевые слова: *искусственный интеллект, управление высшим образованием, повышение квалификации, педагогическая модель, компетенция, проектное обучение.*

KIRISH.

So' nggi yillarda sun'iy intellekt (SI) texnologiyalarining jadal rivojlanishi jamiyat hayotining deyarli barcha sohalariga sezilarli ta'sir ko' rsatmoqda. Ushbu jarayon oliy ta'lim tizimini ham chetlab o' tgani yo' q. Bugungi kunda dunyoning yetakchi universitetlari ma'muriy boshqaruv samaradorligini oshirish, resurslardan oqilona foydalanish hamda talabalar faoliyatiga oid ma'lumotlarni tahlil qilishda SI vositalaridan tobora kengroq foydalanmoqda. Natijada boshqaruv qarorlarini qabul qilish mexanizmlari ham an'anaviy yondashuvlardan ma'lumotlarga tayangan zamonaviy modelga o' tmoqda.

MIT, Stanford, Singapur Milliy Universiteti (NUS) va Nanyang Texnologiya Universiteti (NTU) kabi oliy ta'lim muassasalari tajribasi SI texnologiyalari nafaqat o‘ quv jarayonini, balki boshqaruv faoliyatini ham sifat jihatidan yangi bosqichga olib chiqishi mumkinligini ko‘ rsatmoqda. Xususan, talabalar muvaffaqiyatini prognozlash, hujjatlar aylanishini optimallashtirish va resurslarni boshqarish jarayonlarida SI yechimlarining amaliy natijalari kuzatilmoqda.

UNESCO ekspertlari ta'kidlaganidek, ta'lim tizimida SI texnologiyalarini joriy etishdagi asosiy muammo texnik infratuzilmaning yetishmasligidan ko‘ ra ko‘ proq inson omili bilan bog‘ liq. Boshqacha aytganda, rahbar va menejerlarning raqamli kompetensiyalari texnologik transformatsiya muvaffaqiyatini belgilovchi muhim omillardan biri hisoblanadi.

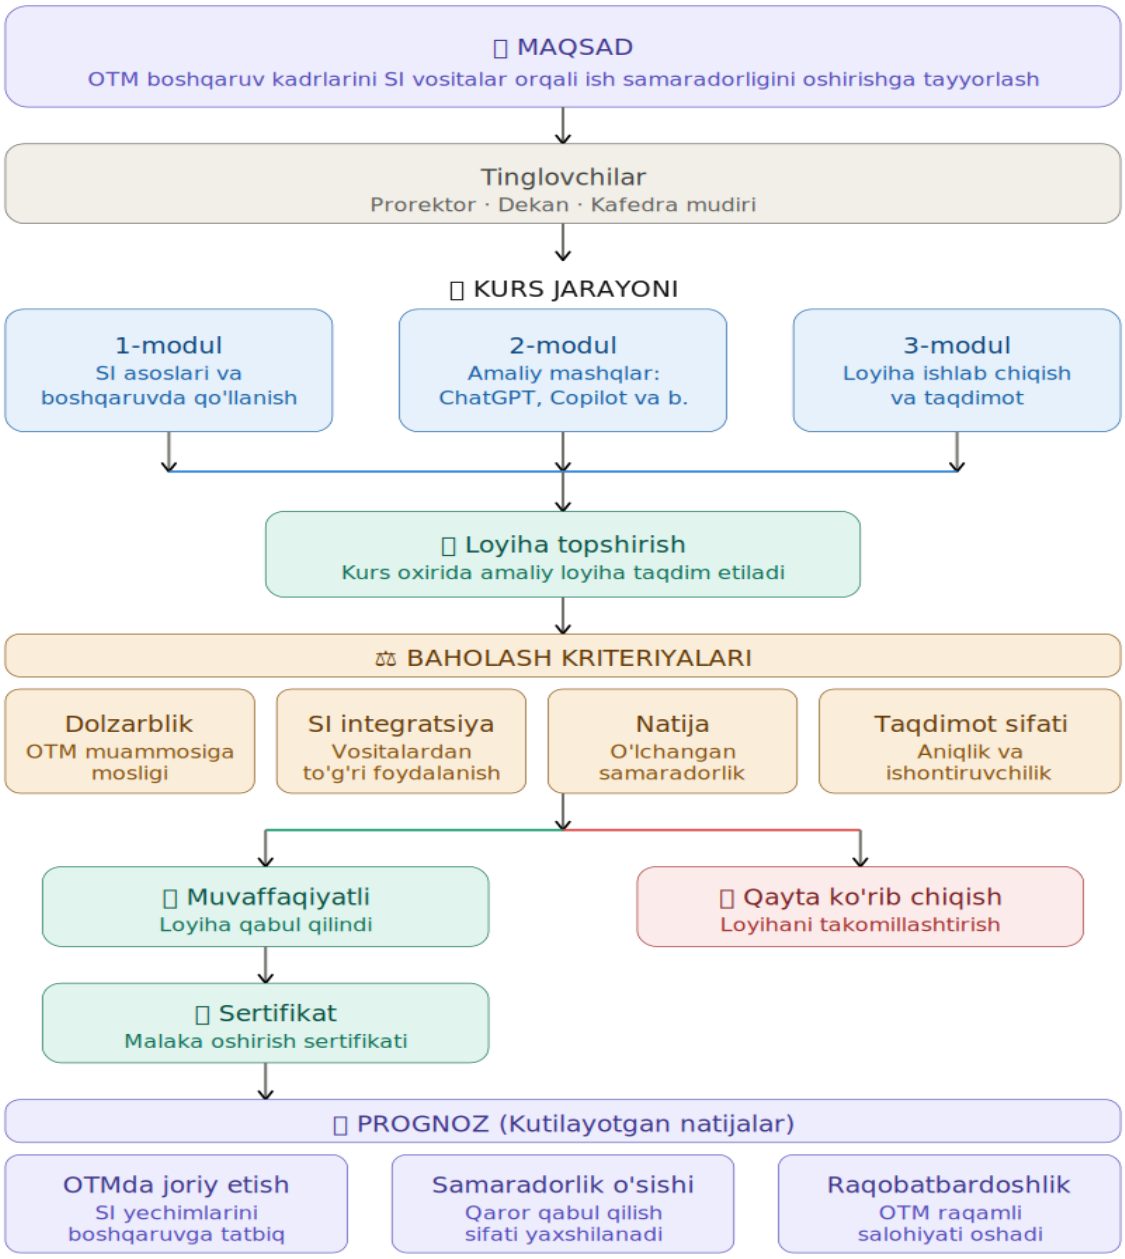
Mazkur masala O‘ zbekiston oliy ta'lim tizimi uchun ham dolzarb ahamiyat kasb etadi. Mamlakatda raqamli transformatsiyani jadallashtirishga qaratilgan strategik hujjatlar qabul qilingan bo‘ lsa-da, oliy ta'lim muassasalari boshqaruv kadrlarini SI texnologiyalaridan samarali foydalanishga tayyorlash bo‘ yicha tizimli mexanizmlar hali to‘ liq shakllanmagan. Shu sababli prorektorlar, dekanlar va kafedra mudirlari uchun maqsadli kompetensiyalarni rivojlantirishga qaratilgan malaka oshirish dasturlarini ishlab chiqish amaliy ehtiyojga aylanmoqda.

Mavjud ilmiy manbalar tahlili shuni ko‘ rsatadiki, boshqaruv xodimlarining SI savodxonligi muassasaning innovatsion salohiyati, raqobatbardoshligi va xalqaro maydondagi mavqeiga bevosita ta'sir ko‘ rsatadi. Shundan kelib chiqib, ushbu maqolada oliy ta'lim muassasalari boshqaruv kadrlarida sun'iy intellekt kompetensiyalarini rivojlantirishga mo‘ ljallangan malaka oshirish kursining pedagogik modeli taklif etiladi hamda uning metodologik asoslari yoritiladi.

Taklif etilayotgan modelning ilmiy yangiligi shundaki, unda O‘ zbekiston oliy ta'lim tizimining amaliy ehtiyojlari hisobga olingan holda uch modulli, loyiha-asosli va natijaga yo‘ naltirilgan yondashuv ishlab chiqilgan. Muallifning fikricha, bunday model boshqaruv kadrlarini raqamli transformatsiya jarayonlarining faol ishtirokchisiga aylantirishga xizmat qilishi mumkin.

ASOSIY QISM.

Taklif etilayotgan pedagogik model oliy ta'lim muassasalari boshqaruv kadrlarida sun'iy intellekt kompetensiyalarini tizimli ravishda rivojlantirishga qaratilgan bo‘ lib, u bir-biri bilan uzviy bog‘ langan bir nechta metodologik yondashuvlarga tayanadi. Modelni ishlab chiqishda zamonaviy pedagogika, kattalar ta'limi hamda raqamli transformatsiya bo‘ yicha ilmiy qarashlar asos sifatida qabul qilindi.



Birinchi metodologik asos kompetensiyaga yo‘ naltirilgan ta'lim (Competency-Based Education – CBE) konsepsiyasi hisoblanadi. Ushbu yondashuvga ko‘ ra, ta'lim jarayonining samaradorligi o‘ zlashtirilgan nazariy bilimlar hajmi bilan emas, balki tinglovchining amaliy faoliyatida namoyon bo‘ ladigan kompetensiyalar bilan baholanadi. Shu nuqtai nazardan, kurs mazmuni sun'iy intellekt haqidagi ma'lumotlarni o‘ rganish bilangina cheklanmaydi. Asosiy e'tibor rahbarlarning SI vositalarini real boshqaruv vaziyatlarida qo‘ llash qobiliyatini shakllantirishga qaratiladi.

Ikkinchi metodologik tayanch sifatida Koehler va Mishra tomonidan taklif etilgan TPACK modeli tanlandi. Mazkur model texnologik bilim, kasbiy mazmun va faoliyat metodikasining o‘ zaro integratsiyasiga asoslanadi. OTM boshqaruv kadrlari uchun bu yondashuv ayniqsa muhim, chunki rahbar zamonaviy texnologiyani bilish bilan bir qatorda, uning muassasa faoliyatiga qanday ta'sir ko‘ rsatishini ham tushunishi zarur. Sun'iy intellekt vositalaridan foydalanishning samaradorligi ko‘ p jihatdan ularni boshqaruv maqsadlari bilan to‘ g‘ ri bog‘ lay olishga bog‘ liq.

Modelning uchinchi nazariy komponenti loyiha-asosli o‘ qitish (Project-Based Learning – PBL) yondashuvi hisoblanadi. Mazkur yondashuv tinglovchilarga o‘ quv jarayonida olingan bilim va ko‘ nikmalarni amaliy muammolar yechimiga yo‘ naltirish imkonini beradi. Boshqaruv faoliyati doimiy ravishda murakkab va ko‘ p omilli vazifalar bilan bog‘ liq bo‘ lganligi sababli, loyiha faoliyati rahbarlarda mustaqil tahlil qilish, qaror qabul qilish va innovatsion yechimlarni ishlab chiqish kompetensiyalarini rivojlantirishga xizmat qiladi.

Kurs samaradorligini baholashda Kirkpatrickning to‘ rt darajali modeli asos qilib olindi. Ushbu model ta'lim natijalarini turli nuqtai nazardan tahlil qilish imkonini beradi. Birinchi daraja tinglovchilarning kurs mazmuni va tashkil etilishidan qoniqish darajasini aniqlashga qaratilgan bo‘ lsa, ikkinchi daraja bilim va ko‘ nikmalardagi o‘ zgarishlarni baholashni nazarda tutadi. Uchinchi darajada tinglovchilarning ish faoliyatida yangi yondashuvlarni qo‘ llash holati o‘ rganiladi, to‘ rtinchi bosqichda esa kursning muassasa faoliyatiga ta'siri tahlil qilinadi. Bunday ko‘ p bosqichli baholash tizimi natijalarni yanada ob'ektiv aniqlash imkonini beradi.

Ishlab chiqilgan pedagogik model beshta o‘ zaro bog‘ liq komponentdan tashkil topgan: maqsad, tinglovchilar kontingenti, o‘ quv jarayoni, baholash tizimi hamda kutilayotgan natijalar. Mazkur elementlarning uyg‘ unligi kursning yaxlitligini ta'minlaydi va o‘ quv jarayonini aniq natijalarga yo‘ naltiradi.

1-rasm. OTM boshqaruv kadrlarida SI kompetensiyalarini rivojlantirish pedagogik modeli

Kursning birinchi moduli «SI asoslari va boshqaruvda qo‘ llanish» deb nomlanadi. Ushbu bosqichda tinglovchilar sun’iy intellekt texnologiyalarining rivojlanish tendensiyalari, asosiy tushunchalari va amaliy imkoniyatlari bilan tanishadilar. Shuningdek, oliy ta’lim muassasalarida SI vositalaridan foydalanish bo‘ yicha xalqaro tajribalar tahlil qilinadi. Mashg‘ ulotlar davomida xorijiy universitetlarning amaliy misollari, tahliliy materiallar va muammoli vaziyatlar muhokama qilinadi. Modul yakunida tinglovchilar o‘ z muassasalarida sun’iy intellekt texnologiyalarini qo‘ llash istiqbollarini baholay olishlari hamda mavjud imkoniyat va cheklovlarni tahlil qila olishlari kutiladi.

Ikkinchi modul amaliy faoliyatga yo‘ naltirilgan bo‘ lib, unda ChatGPT, Microsoft Copilot, Google Gemini, Notion AI kabi vositalarning boshqaruv jarayonlaridagi imkoniyatlari o‘ rganiladi. Mazkur bosqich nazariy ma’lumotlarni mustahkamlashdan ko‘ ra ko‘ proq amaliy tajriba hosil qilishga qaratilgan. Laboratoriya mashg‘ ulotlari davomida tinglovchilar hujjatlarni tayyorlash va tahlil qilish, ish jarayonlarini rejalashtirish, ma’lumotlarni umumlashtirish hamda talabalar murojaatlari bilan ishlash kabi vazifalarni bajaradilar. Har bir topshiriq natijasi portfolio shaklida jamlanib boradi va tinglovchining individual rivojlanish dinamikasini aks ettiradi.

Uchinchi modul kursning yakuniy bosqichi hisoblanib, u loyiha ishlab chiqish va taqdimot faoliyatini qamrab oladi. Bu bosqichda tinglovchilar o‘ zlari faoliyat yuritayotgan oliy ta’lim muassasasidagi dolzarb muammoni tanlaydilar va uni sun’iy intellekt vositalari yordamida hal etishga qaratilgan amaliy loyiha ishlab chiqadilar. Loyihada muammoning tavsifi, tanlangan yechimning asoslanishi, amalga oshirish bosqichlari va kutilayotgan natijalar batafsil yoritilishi talab etiladi.

Yakuniy loyiha bir nechta mezonlar asosida baholanadi. Avvalo, tanlangan mavzuning dolzarbligi va muassasa ehtiyojlariga mosligi e'tiborga olinadi. Bundan tashqari, sun'iy intellekt vositalarining maqsadli hamda asoslangan tarzda qo‘ llanilganligi, taklif etilgan yechimning amaliy qiymati va natijalarni o‘ lchash imkoniyati ham muhim mezon sifatida qaraladi. Taqdimot sifati esa loyihaning mantiqiy tuzilishi, dalillarning asoslanganligi va natijalarni aniq ifodalash darajasi orqali baholanadi.

Loyihani muvaffaqiyatli himoya qilgan tinglovchilarga malaka oshirish kursini tamomlaganlik to‘ g‘ risidagi sertifikat beriladi. Shu bilan birga, ular o‘ z muassasalarida sun'iy intellekt texnologiyalarini joriy etish va targ‘ ib qilish bo‘ yicha tashabbuskor mutaxassis sifatida faoliyat yuritishlari kutiladi. Muallifning fikricha, aynan shunday yondashuv kurs natijalarining individual darajadan institutsional darajaga o‘ tishini ta'minlaydi.

Natija. Taklif etilayotgan malaka oshirish kursining asosiy natijasi sifatida oliy ta'lim muassasalari boshqaruv kadrlarida sun'iy intellekt bilan ishlashga oid kompetensiyalarning shakllanishi nazarda tutiladi. Mazkur kompetensiyalar uchta o‘ zaro bog‘ liq yo‘ nalishni qamrab oladi: sun'iy intellektning imkoniyat va cheklovlarini tushunish, amaliy faoliyatda tegishli vositalardan foydalanish hamda ularni qo‘ llash bilan bog‘ liq axloqiy va boshqaruv masalalarini baholay olish.

Kurs mazmunining nazariy va amaliy komponentlari o‘ zaro uyg‘ unlashtirilgani sababli tinglovchilar nafaqat yangi bilimlarni egallaydilar, balki ularni bevosita ish faoliyatida sinab ko‘ rish imkoniyatiga ham ega bo‘ ladilar. Xalqaro tajribalar tahlili shuni ko‘ rsatadiki, sun'iy intellekt bo‘ yicha amaliy yo‘ naltirilgan treninglarda ishtirok etgan rahbar va menejerlarning katta qismi o‘ quv jarayonidan so‘ ng kamida bitta yangi raqamli vositani o‘ z faoliyatiga tatbiq etgan. Shu nuqtai nazardan, kurs samaradorligini baholashda tinglovchilarning real ish jarayonlariga kiritgan o‘ zgarishlari muhim ko‘ rsatkich sifatida qaraladi.

Kurs davomida raqamli liderlik kompetensiyalarini rivojlantirishga ham alohida e'tibor qaratiladi. Amaliyot shuni ko‘ rsatadiki, texnologik yangiliklarning muvaffaqiyatli joriy etilishi ko‘ p jihatdan rahbarlarning tashabbuskorligi va o‘ zgarishlarni boshqarish qobiliyatiga bog‘ liq. Shu sababli tinglovchilar ma'lumotlarga asoslangan qarorlar qabul qilish, jamoani innovatsion faoliyatga jalb etish va yangi texnologiyalarni boshqaruv amaliyotiga integratsiya qilish bo‘ yicha zarur ko‘ nikmalarni egallaydilar.

Kurs natijalarining ta'siri faqat individual darajada emas, balki institutsional darajada ham namoyon bo‘ lishi mumkin. Dastlabki bosqichda boshqaruv faoliyatining ayrim yo‘ nalishlarida, xususan hujjatlar bilan ishlash, hisobot tayyorlash yoki ish jarayonlarini rejalashtirishda sun'iy intellekt vositalaridan foydalanish hisobiga vaqt va mehnat resurslarini tejash imkoniyati yuzaga keladi. Bunday o‘ zgarishlar boshqaruv jarayonlarining operativligi va aniqligini oshirishga xizmat qiladi.

O‘ rta muddatli istiqbolda sun'iy intellekt vositalaridan foydalanish amaliyotining kengayishi oliy ta'lim muassasasida ma'lumotlarga asoslangan boshqaruv madaniyatining shakllanishiga zamin yaratadi. Natijada talabalar muvaffaqiyatini tahlil qilish, resurslarni taqsimlash, byudjet xarajatlarini optimallashtirish hamda xodimlar faoliyatini baholash kabi strategik vazifalarda analitik yondashuvlarning ulushi ortadi.

Uzoq muddatli istiqbolda esa sun'iy intellekt bo‘ yicha kompetensiyalar boshqaruv faoliyatining muhim tarkibiy qismiga aylanishi mumkin. Bunday sharoitda raqamli savodxonlik alohida afzallik emas, balki zamonaviy rahbar uchun zarur professional talab sifatida qaraladi. Bu holat oliy ta'lim muassasalarining raqamli transformatsiya jarayonlarida faolroq ishtirok etishiga hamda xalqaro rivojlanish tendensiyalariga moslashishiga xizmat qiladi.

Shu bilan birga, taklif etilayotgan modelning ayrim cheklovlarini ham e'tibordan chetda qoldirib bo‘ lmaydi. Avvalo, kurs samaradorligi amaliy tajriba orqali to‘ liq sinovdan o‘ tkazilmagan. Shu sababli kelgusida eksperimental tadqiqotlar tashkil etish, kursdan oldingi va keyingi natijalarni qiyosiy tahlil qilish maqsadga muvofiq hisoblanadi. Bundan tashqari, tinglovchilarning boshlang‘ ich raqamli kompetensiyalari turlicha bo‘ lishi o‘ quv jarayonida differensial yondashuvni talab etadi. Sun'iy intellekt texnologiyalarining tez sur'atlarda rivojlanishi esa kurs mazmunini muntazam ravishda yangilab borish zaruratini yuzaga keltiradi.

Umuman olganda, taklif etilayotgan kurs modeli boshqaruv kadrlarining individual kasbiy rivojlanishini qo‘ llab-quvvatlash bilan bir qatorda, oliy ta'lim muassasalarida raqamli transformatsiya jarayonlarini jadallashtirishga ham xizmat qilishi mumkin.

Xulosa. Tadqiqot natijalari oliy ta'lim muassasalari boshqaruv kadrlarida sun'iy intellekt kompetensiyalarini rivojlantirish uchun maqsadli malaka oshirish dasturlarini ishlab chiqish zarurligini tasdiqlaydi. Ishlab chiqilgan pedagogik model boshqaruv faoliyatining amaliy ehtiyojlarini hisobga olgan holda shakllantirilgan bo‘ lib, u rahbarlarning zamonaviy raqamli texnologiyalar bilan ishlash salohiyatini izchil rivojlantirishga qaratilgan.

Modelning asosiy afzalligi uning amaliy yo‘ naltirilganligidadir. Kurs mazmuni prorektorlar, dekanlar va kafedra mudirlarining kasbiy vazifalariga moslashtirilgan bo‘ lib, nazariy bilimlarni real boshqaruv jarayonlari bilan bog‘ lash imkonini beradi. Uch bosqichli o‘ quv tuzilmasi tinglovchilarni sun'iy intellekt asoslari bilan tanishtirishdan boshlab, amaliy vositalardan foydalanish va yakuniy loyiha ishlab chiqishgacha bo‘ lgan izchil rivojlanish trayektoriyasini

ta’minlaydi. Baholash tizimining Kirkpatrick modeli asosida tashkil etilgani esa o‘ quv natijalarini kompleks va ob’ektiv tahlil qilish imkoniyatini yaratadi.

Muhimi, mazkur model faqat alohida tinglovchilarning kasbiy rivojlanishiga emas, balki oliy ta’lim muassasalarida boshqaruv madaniyatini takomillashtirishga ham xizmat qiladi. Sun’iy intellekt vositalaridan oqilona foydalanish boshqaruv qarorlarining sifatini oshirish, ma’lumotlarga asoslangan yondashuvlarni kengaytirish hamda muassasalarning raqamli transformatsiya jarayonlariga moslashuvchanligini kuchaytirish uchun qo‘ shimcha imkoniyatlar yaratadi.

Shu nuqtai nazardan, sun’iy intellekt kompetensiyalari zamonaviy OTM rahbari uchun qo‘ shimcha ko‘ nikma emas, balki professional faoliyat samaradorligini belgilovchi muhim omillardan biri sifatida qaralishi lozim. Taklif etilgan pedagogik model ushbu yo‘ nalishda amaliy va ilmiy asoslangan yechim sifatida xizmat qilishi, shuningdek, O‘ zbekiston oliy ta’lim tizimining raqamli rivojlanish strategiyalarini qo‘ llab-quvvatlashga hissa qo‘ shishi mumkin.

Аннотация: *В статье в рамках сравнительно-аналитического подхода и моделирования раскрыты научно-теоретические и методические основы применения инновационных подходов к обучению иностранному языку — цифровых технологий, интерактивных методов и искусственного интеллекта (ИИ). Исследование носит теоретико-методологический характер; его материалом послужили современная методическая литература и методические разработки по обучению иностранному языку. В результате контент-анализа инновационные подходы разделены на группы и определена доля их применения в источниках: интерактивные методы (30%), цифровые технологии (28%), ИИ-инструменты (22%), смешанное (blended) обучение (12%) и геймификация (8%). Систематизированы дидактические функции ИИ в обучении иностранному языку (персонализация, развитие речи, генерация материалов, автоматическая оценка, перевод и анализ) и предложена пятиэтапная дидактическая модель инновационного занятия, интегрирующая три компонента. Исследование обосновывает, что сочетание цифровых технологий, интерактивных методов и ИИ повышает мотивацию, коммуникативную компетенцию и индивидуализацию обучения иностранному языку.*

Ключевые слова: *обучение иностранному языку, инновационные подходы, цифровые технологии, интерактивные методы, искусственный интеллект, персонализация, смешанное обучение, геймификация, коммуникативная компетенция, дидактическая модель.*

CHET TILINI O‘ QITISHDA INNOVATSION YONDASHUVLAR: RAQAMLI TEXNOLOGIYALAR, INTERFAOL USULLAR VA SUN’IY INTELLEKT

Annotatsiya: *Maqolada chet tilini o‘ qitishda innovatsion yondashuvlar — raqamli texnologiyalar, interaktiv metodlar va sun’ iy intellekt (SI)ni qo‘ llashning ilmiy-nazariy hamda metodik asoslari qiyosiy-tahliliy va modellashtirish yondashuvi doirasida yoritilgan. Tadqiqot nazariy-metodologik xarakterga ega bo‘ lib, uning materialini chet tili o‘ qitishga oid zamonaviy metodik adabiyot va metodik ishlanmalar tashkil etdi. Kontent-tahlil natijasida innovatsion yondashuvlarning qo‘ llanilish ulushi aniqlandi: interaktiv metodlar (30%), raqamli texnologiyalar (28%), SI-vositalari (22%), aralash (blended) ta’ lim (12%) va geymifikatsiya (8%). SIning chet tili o‘ qitishdagi didaktik funksiyalari tizimlashtirilib, uch komponentni birlashtiruvchi besh bosqichli didaktik model taklif etildi. Tadqiqot raqamli texnologiyalar, interaktiv metodlar va SI uyg‘ unligi motivatsiya, kommunikativ kompetensiya va ta’ limni individuallashtirishni oshirishini asoslaydi.*

Kalit so‘ zlar: *chet tilini o‘ qitish, innovatsion yondashuvlar, raqamli texnologiyalar, interaktiv metodlar, sun’ iy intellekt, individuallashtirish, aralash ta’ lim, geymifikatsiya, kommunikativ kompetensiya, didaktik model.*

INNOVATIVE APPROACHES TO FOREIGN LANGUAGE TEACHING: DIGITAL TECHNOLOGIES, INTERACTIVE METHODS, AND ARTIFICIAL INTELLIGENCE

Abstract: *The article reveals, within a comparative-analytical and modelling framework, the scientific-theoretical and methodological foundations of applying innovative approaches to foreign language teaching — digital technologies, interactive methods and artificial intelligence (AI). The study is theoretical-methodological in nature; its material comprised contemporary methodological literature and methodological materials on foreign language teaching. Through content analysis, the innovative approaches were grouped and their share of application in the sources was determined: interactive methods (30%), digital technologies (28%), AI tools (22%), blended learning (12%) and gamification (8%). The didactic functions of AI in foreign language teaching (personalisation, speech development, material generation, automatic assessment, translation and analysis) were systematised, and a five-stage didactic model of an innovative lesson integrating the three components was proposed. The study substantiates that combining digital*

technologies, interactive methods and AI enhances motivation, communicative competence and the individualisation of foreign language teaching.

Keywords: *foreign language teaching, innovative approaches, digital technologies, interactive methods, artificial intelligence, personalisation, blended learning, gamification, communicative competence, didactic model.*

1. ВВЕДЕНИЕ

Стремительная цифровизация общества и интернационализация образования коренным образом изменили цели, содержание и технологии обучения иностранным языкам. Современная методика отказывается от репродуктивно-грамматической модели в пользу коммуникативного, деятельностного и личностно ориентированного подхода, в центре которого находится развитие способности обучающегося к реальному иноязычному общению. Достижению этой цели способствуют инновационные подходы — цифровые технологии, интерактивные методы и инструменты искусственного интеллекта (ИИ), которые расширяют образовательную среду и индивидуализируют траекторию обучения.

Актуальность темы обусловлена противоречием между традиционной методикой преподавания иностранного языка и требованиями цифрового общества к формированию коммуникативной и цифровой компетенций обучающихся. В зарубежных исследованиях доказано положительное влияние цифровых и интерактивных технологий на мотивацию и результаты обучения, а появление генеративного ИИ открыло принципиально новые дидактические возможности. Вместе с тем целостная методическая модель, интегрирующая цифровые технологии, интерактивные методы и ИИ в единую систему обучения иностранному языку, разработана недостаточно.

Цель исследования — теоретически обосновать применение инновационных подходов (цифровых технологий, интерактивных методов и ИИ) в обучении иностранному языку, систематизировать их и разработать дидактическую модель инновационного занятия.

Объект исследования — процесс обучения иностранному языку в условиях цифровизации образования; предмет — научно-методические основы применения цифровых технологий, интерактивных методов и искусственного интеллекта в обучении иностранному языку.

Научная новизна исследования состоит в том, что в нём инновационные подходы к обучению иностранному языку систематизированы в единой типологии, определена доля их применения, систематизированы дидактические функции ИИ и предложена пятиэтапная дидактическая модель инновационного занятия, интегрирующая три компонента.

Статья построена следующим образом: во втором разделе анализируется научная литература по теме и определяется исследовательский пробел; в третьем разделе описываются материал и методы; в четвёртом разделе результаты приводятся в таблицах и диаграммах и интерпретируются; в пятом разделе даются выводы и рекомендации.

2. ОБЗОР ЛИТЕРАТУРЫ

Теоретические основы применения технологий в обучении языку разрабатывались в русле нескольких направлений. Концепция компьютерно-опосредованного обучения языку (CALL — Computer-Assisted Language Learning) и её мобильного расширения (MALL) обоснована в работах M. Warschauer и G. Stockwell, показавших, что цифровая среда обеспечивает аутентичность и интерактивность языкового ввода [1; 2]. Коммуникативный подход, лежащий в основе современной методики, восходит к трудам H.D. Brown и J.C. Richards [3; 4]. Дидактический потенциал интерактивных и проектных методов раскрыт в работах Е.С. Полат, где проектная технология рассматривается как средство развития коммуникативной и познавательной самостоятельности обучающихся [5].

Роль искусственного интеллекта в обучении языку активно исследуется в последние годы. В обзорных работах по ИИ в образовании (L. Chen и др.) систематизированы функции интеллектуальных обучающих систем — адаптация, обратная связь и персонализация [6]. Дидактические возможности генеративного ИИ и чат-ботов для развития речевых навыков рассмотрены в исследованиях последних лет [7], а вопросы академической честности и корректного использования ИИ обсуждаются в связи с рисками чрезмерной зависимости обучающихся [8]. Отдельное направление составляет геймификация обучения языку [9].

Анализ литературы выявляет существенный пробел. Во-первых, большинство работ рассматривают отдельные инновационные средства (только цифровые платформы, только ИИ или только интерактивные методы) вне их взаимосвязи. Во-вторых, отсутствует целостная типология инновационных подходов и оценка доли их применения. В-третьих, не предложена интегративная дидактическая модель занятия, объединяющая три компонента. Настоящая статья направлена на восполнение этого пробела.

3. МЕТОДОЛОГИЯ ИССЛЕДОВАНИЯ

Исследование носит теоретико-методологический характер и опирается на коммуникативный, компетентностный и деятельностный подходы. Эмпирическая часть (на основе экспериментальных и контрольных групп) не предусмотрена; основное внимание уделено раскрытию научно-теоретических основ инновационных подходов, их систематизации и моделированию инновационного занятия.

Материалом исследования послужили два источника: современная методическая и научная литература по применению цифровых технологий, интерактивных методов и ИИ в обучении иностранному языку, а также методические разработки и практики преподавания иностранного языка. Единицей анализа выступили инновационный метод (средство) и его дидактическая функция. Состав материала приведён в таблице 1.

Таблица 1. Состав материала исследования

Тип материала	Источник	Единицы анализа
Научно-методическая литература	работы по CALL/MALL, ИИ в обучении языку	12
Методические разработки и практики	планы занятий, цифровые ресурсы, ИИ-инструменты	≈150 единиц
Всего		≈162

В исследовании использованы следующие теоретические методы: теоретический анализ научно-методической литературы — для определения сущности инновационных подходов; контент-анализ — для выделения и группировки инновационных методов и функций ИИ по частоте; сравнительный анализ — для сопоставления традиционного и инновационного обучения; обобщение и классификация — для систематизации подходов; моделирование — для разработки дидактической модели инновационного занятия. Проценты округлены до целых, поэтому сумма по столбцу может отличаться от 100% на ±1. Ограничение исследования состоит в том, что контент-анализ в определённой мере опирается на экспертную интерпретацию.

4. РЕЗУЛЬТАТЫ И АНАЛИЗ

4.1. Типология инновационных подходов

Теоретический анализ позволил объединить инновационные подходы к обучению иностранному языку в три базовые группы, дополняемые смешанным обучением и геймификацией. Их сущность и примеры приведены в таблице 2.

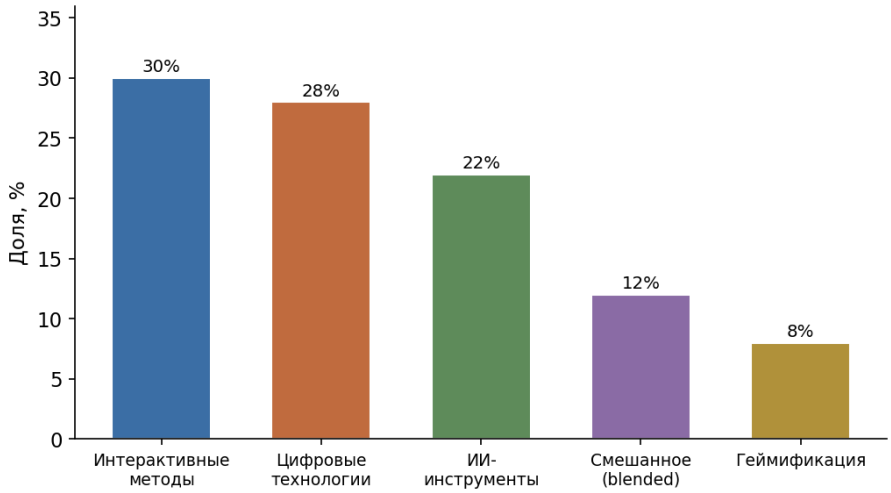

Таблица 2. Типология инновационных подходов к обучению иностранному языку

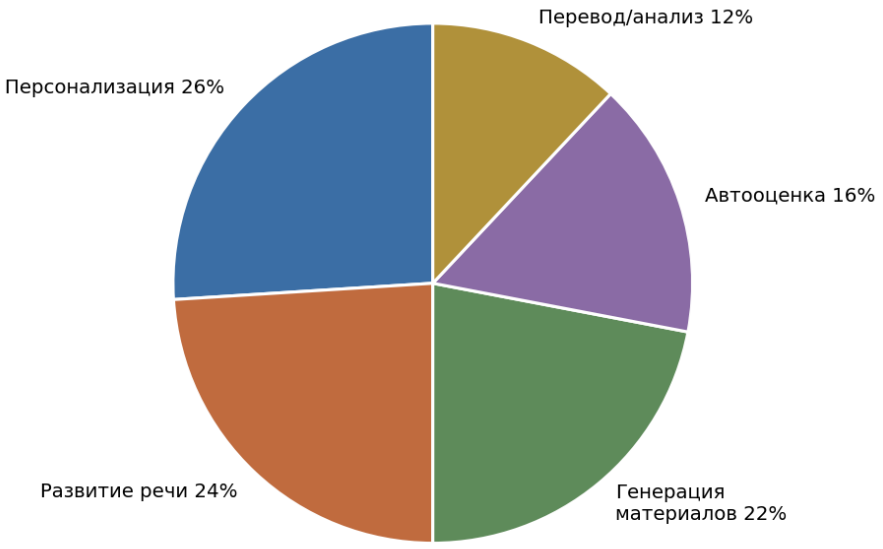
Группа подходов	Сущность	Примеры средств и приёмов
Цифровые технологии	использование электронной среды и ресурсов	LMS, мобильные приложения, мультимедиа, онлайн-платформы
Интерактивные методы	обучение через общение и сотрудничество	проектный и кейс-метод, ролевые и игровые технологии, дискуссия
Искусственный интеллект	адаптация и генерация на основе ИИ	чат-боты, генеративный ИИ, адаптивные системы, распознавание речи

4.2. Доля применения инновационных подходов

Контент-анализ методических разработок и практик позволил определить долю применения инновационных подходов. Распределение представлено на диаграмме 1.

Диаграмма 1. Доля применения инновационных подходов в обучении иностранному языку (%)

Как видно из распределения, наибольшая доля приходится на интерактивные методы (30%) и цифровые технологии (28%), что отражает коммуникативную и деятельностную направленность современной методики. ИИ-инструменты (22%) занимают уже существенную долю, демонстрируя устойчивую тенденцию роста. Смешанное обучение (12%) и геймификация (8%) выступают дополняющими форматами, усиливающими мотивацию и гибкость образовательного процесса.



4.3. Дидактические функции искусственного интеллекта

Особое место среди инновационных средств занимает искусственный интеллект, выполняющий ряд дидактических функций в обучении иностранному языку. Эти функции систематизированы в таблице 3, а их относительная доля показана на диаграмме 2.

Таблица 3. Дидактические функции искусственного интеллекта в обучении иностранному языку

Функция ИИ	Доля, %	Инструмент / дидактический эффект
Персонализация обучения	26	адаптивные платформы — индивидуальная траектория
Развитие речевых навыков	24	чат-боты, голосовые помощники — практика говорения
Генерация материалов	22	генеративный ИИ — тексты, диалоги, упражнения
Автоматическая оценка	16	проверка письма и произношения — быстрая обратная связь
Перевод и языковой анализ	12	нейронный перевод — опора и самопроверка
Всего	100	

Диаграмма 2. Распределение дидактических функций ИИ в обучении иностранному языку (%)

Данные показывают, что ведущими функциями ИИ являются персонализация обучения (26%) и развитие речевых навыков (24%): адаптивные системы выстраивают индивидуальную траекторию, а чат-боты обеспечивают безопасную и регулярную практику говорения. Генерация материалов (22%) экономит время преподавателя, автоматическая оценка (16%) ускоряет обратную связь, а перевод и анализ (12%) служат опорой и средством самопроверки. При этом применение ИИ требует педагогического сопровождения во избежание чрезмерной зависимости обучающихся.

4.4. Дидактическая модель инновационного занятия

На основе проведённого анализа разработана пятиэтапная дидактическая модель инновационного занятия по иностранному языку, интегрирующая цифровые технологии, интерактивные методы и ИИ (таблица 4).

Таблица 4. Дидактическая модель инновационного занятия по иностранному языку

Этап	Дидактическая цель	Деятельность	Инновационное средство
Мотивационный	вовлечение и постановка задачи	проблемная ситуация, видео	мультимедиа
Презентация материала	ввод языкового материала	интерактивная презентация	цифровая платформа
Интерактивная практика	закрепление в общении	ролевая игра, проект, дискуссия	интерактивные методы
ИИ-поддержка	персонализация и практика	чат-бот, адаптивные задания	ИИ-инструменты
Рефлексия и оценка	обратная связь и оценивание	автооценка, портфолио	цифровые/ИИ-средства

4.5. Обсуждение результатов

Полученные результаты подтверждают, что инновационные подходы наиболее эффективны не по отдельности, а в интеграции. Преобладание интерактивных методов и цифровых технологий (в сумме 58%) отражает коммуникативно-деятельностную парадигму, а растущая доля ИИ (22%) свидетельствует о переходе к адаптивному и персонализированному обучению. Это согласуется с выводами M. Warschauer [1] и L. Chen и др. [6] о том, что цифровая и интеллектуальная среда усиливает аутентичность и индивидуализацию обучения.

Предложенная модель показывает, что три компонента выполняют взаимодополняющие роли: цифровые технологии обеспечивают ресурс и среду, интерактивные методы — коммуникацию и сотрудничество, а ИИ — персонализацию и обратную связь. Вместе с тем внедрение инновационных подходов требует от преподавателя цифровой компетентности, методической подготовки и материально-технической базы, а использование ИИ — внимания к вопросам академической честности [8]. Это составляет основное практическое ограничение подхода.

5. ЗАКЛЮЧЕНИЕ

Проведённый теоретико-методологический анализ позволяет сделать следующие выводы.

Во-первых, инновационные подходы к обучению иностранному языку образуют единую систему, включающую цифровые технологии, интерактивные методы и искусственный интеллект, дополняемые смешанным обучением и геймификацией.

Во-вторых, контент-анализ определил долю применения подходов: интерактивные методы (30%), цифровые технологии (28%), ИИ-инструменты (22%), смешанное обучение (12%) и геймификация (8%). Преобладание интерактивных и цифровых подходов отражает коммуникативную направленность методики.

В-третьих, дидактические функции ИИ распределяются следующим образом: персонализация (26%), развитие речи (24%), генерация материалов (22%), автоматическая оценка (16%) и перевод/анализ (12%); ведущей функцией выступает персонализация обучения.

В-четвёртых, предложенная пятиэтапная дидактическая модель (мотивация, презентация, интерактивная практика, ИИ-поддержка, рефлексия и оценка) даёт теоретическую основу для проектирования инновационного занятия, интегрирующего три компонента.

Практические рекомендации: (a) сочетать цифровые технологии, интерактивные методы и ИИ в единой системе занятия; (b) использовать ИИ-инструменты для персонализации и развития речи при педагогическом сопровождении; (c) формировать цифровую компетентность преподавателей; (d) учитывать вопросы академической честности при работе с генеративным ИИ.

Перспективы исследования связаны с разработкой критериев оценки эффективности предложенной модели, её эмпирической апробацией, а также с изучением этических и методических аспектов применения генеративного ИИ в обучении иностранному языку.

Аннотация: *В статье в рамках сравнительно-аналитического подхода и моделирования раскрыты научно-теоретические и методические основы совершенствования механизмов развития корпоративной этики педагогов. Исследование носит теоретико-методологический характер; его материалом послужили научно-методическая литература по педагогической этике, профессиональной морали и организационной культуре, а также нормативные документы. В результате анализа выделены структурные компоненты корпоративной этики педагога (ценностно-нормативный, профессионально-поведенческий, коммуникативно-коллегиальный и репутационный) и пять групп механизмов её развития. Определена доля применения механизмов: методические (24%), нормативно-правовые (22%), организационно-институциональные (20%), мотивационные (18%) и саморегуляция (16%). Обоснованы направления совершенствования механизмов и предложена пятиэтапная организационно-педагогическая модель развития корпоративной этики. Исследование обосновывает, что интеграция механизмов в единую систему укрепляет профессиональную ответственность, коллективную культуру и репутацию педагогов.*

Ключевые слова: *педагогическая этика, корпоративная этика, профессиональная мораль, этический кодекс, организационная культура, механизм развития, профессиональная ответственность, коллективная культура, репутация, организационно-педагогическая модель.*

СОВЕРШЕНСТВОВАНИЕ МЕХАНИЗМОВ РАЗВИТИЯ КОРПОРАТИВНОЙ ЭТИКИ ПЕДАГОГОВ

Annotatsiya: *Maqolada pedagoglarning korporativ etikasini rivojlantirish mexanizmlarini takomillashtirishning ilmiy-nazariy va metodik asoslari qiyosiy-tahliliy hamda modellashtirish yondashuvi doirasida yoritilgan. Tadqiqot nazariy-metodologik xarakterga ega bo‘ lib, uning materialini pedagogik etika, kasbiy odob-axloq va tashkiliy madaniyatga oid ilmiy-metodik adabiyot hamda normativ hujjatlar tashkil etdi. Tahlil natijasida pedagog korporativ etikasining tarkibiy komponentlari (qadriyat-me’ yoriy, professional xulq-atvor, kommunikativ-kollegial va reputatsion) hamda uni rivojlantirish mexanizmlarining besh guruhi ajratildi. Mexanizmlarning qo‘ llanilish ulushi aniqlandi: metodik (24%), normativ-huquqiy (22%), tashkiliy-institutsional (20%), motivatsion (18%) va o‘ z-o‘ zini boshqarish (16%). Mexanizmlarni takomillashtirish yo‘ nalishlari asoslanib, korporativ etikani rivojlantirishning besh bosqichli tashkiliy-pedagogik modeli taklif etildi.*

Kalit so‘ zlar: *pedagogik etika, korporativ etika, kasbiy odob-axloq, etika kodeksi, tashkiliy madaniyat, rivojlantirish mexanizmi, kasbiy mas’ uliyat, jamoaviy madaniyat, reputatsiya, tashkiliy-pedagogik model.*

SOVERSHENSTVOVANIE MEKHANIZMOV RAZVITIYa KORPORATIVNOY ETIKI PEDAGOGOV

Abstract: *The article reveals, within a comparative-analytical and modelling framework, the scientific-theoretical and methodological foundations of improving the mechanisms for developing teachers’ corporate ethics. The study is theoretical-methodological in nature; its material comprised scholarly-methodological literature on pedagogical ethics, professional morality and organisational culture, as well as normative documents. The analysis identified the structural components of a teacher’s corporate ethics (value-normative, professional-behavioural, communicative-collegial and reputational) and five groups of mechanisms for its development. The share of application of the mechanisms was determined: methodological (24%), normative-legal (22%), organisational-institutional (20%), motivational (18%) and self-regulation (16%). Directions for improving the mechanisms were substantiated, and a five-stage organisational-pedagogical model for developing corporate ethics was proposed.*

Keywords: *pedagogical ethics, corporate ethics, professional morality, code of ethics, organisational culture, development mechanism, professional responsibility, collective culture, reputation, organisational-pedagogical model.*

1. ВВЕДЕНИЕ

В современной системе образования профессиональная деятельность педагога определяется не только передачей знаний, но и способностью быть нравственным образцом, поддерживать коллегиальное сотрудничество и сохранять репутацию. Именно эти аспекты воплощаются в понятии корпоративной этики педагога. Корпоративная этика — это совокупность профессиональных ценностей, нравственных норм и правил поведения, действующих в коллективе образовательного учреждения; она регулирует взаимоотношения педагогов, их связи с обучающимися и общественностью и формирует положительный имидж учреждения.

Актуальность темы обусловлена несколькими обстоятельствами. Во-первых, повышение качества образования и укрепление институциональной культуры требуют высокой профессиональной этики педагогов. Во-вторых, в условиях цифровой среды и социальных сетей возросли требования к репутации и профессиональному поведению педагога. В-третьих, в существующей практике развитие корпоративной этики нередко осуществляется в рамках отдельных, несистемных мероприятий (разовые тренинги или нормативный документ); научно-методические основы её развития в целостной системе механизмов разработаны недостаточно.

Цель исследования — теоретически обосновать механизмы развития корпоративной этики педагогов, систематизировать их и разработать организационно-педагогическую модель их совершенствования.

Объект исследования — процесс развития корпоративной этики педагогов; предмет — механизмы развития данной этики, их структура и направления совершенствования.

Научная новизна исследования состоит в том, что в нём структурные компоненты корпоративной этики педагога и механизмы её развития систематизированы в единой типологии, определена доля их применения и предложена пятиэтапная организационно-педагогическая модель совершенствования механизмов.

Статья построена следующим образом: во втором разделе анализируется научная литература по теме и определяется исследовательский пробел; в третьем разделе описываются материал и методы; в четвёртом разделе результаты приводятся в таблицах и диаграммах и интерпретируются; в пятом разделе даются выводы и рекомендации.

2. ОБЗОР ЛИТЕРАТУРЫ

Проблема профессиональной и педагогической этики изучается на пересечении философии, педагогики и менеджмента. Теоретические основы педагогической этики разработаны в трудах E. Campbell [1] и D. Carr [2], где учитель рассматривается как нравственный субъект, носитель профессиональных ценностей и ответственности. Вопросы организационной (корпоративной) этики и управления ею систематизированы L.K. Treviño и K.A. Nelson в контексте бизнес-этики [3], а теория организационной культуры обоснована в работах E.H. Schein [4]; эти положения применимы и к коллективу образовательного учреждения.

В узбекской педагогике вопросы профессиональной этики педагога, компетентности и воспитания изучены в определённой мере [5; 6]. Требования к профессиональному поведению педагогических работников закреплены в нормативных документах и правилах этики [7]. Вместе с тем организационные и мотивационные механизмы развития корпоративной этики, в частности вопросы стимулирования и саморегуляции, освещены в теории организационного поведения [8].

Анализ литературы выявляет существенный пробел. Во-первых, большинство работ рассматривают педагогическую этику на уровне личной морали, тогда как её корпоративно-коллективное измерение и связь с институциональной культурой раскрыты недостаточно. Во-вторых, отсутствует целостная классификация механизмов развития корпоративной этики и оценка их доли. В-третьих, не предложена целостная организационно-педагогическая модель их совершенствования. Настоящая статья направлена на восполнение этого пробела.

3. МЕТОДОЛОГИЯ ИССЛЕДОВАНИЯ

Исследование носит теоретико-методологический характер и опирается на системный, аксиологический (ценностный) и организационно-культурный подходы. Эмпирическая часть (на основе экспериментальных и контрольных групп) не предусмотрена; основное внимание уделено раскрытию научно-теоретических основ механизмов развития корпоративной этики, их систематизации и моделированию.

Материалом исследования послужили два источника: научно-методическая литература по педагогической и корпоративной этике и организационной культуре, а также правила этики педагогических работников и институциональные практики. Единицей анализа выступили механизм развития корпоративной этики и его структурный элемент. Состав материала приведён в таблице 1.

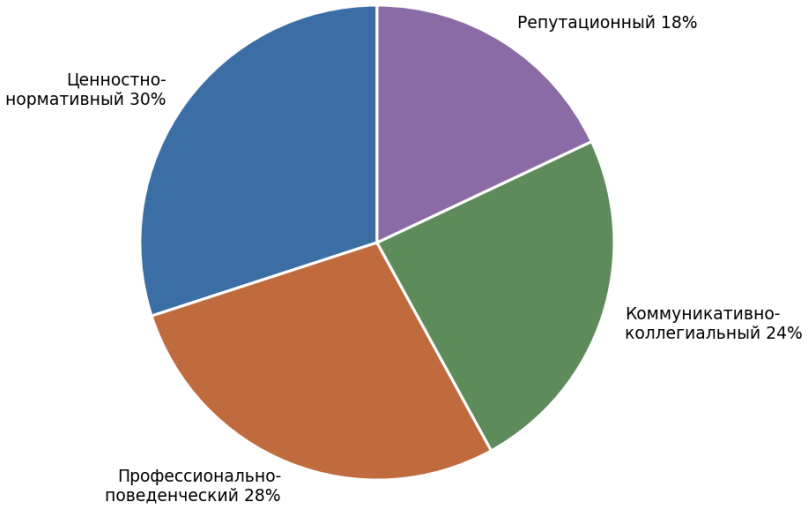
Таблица 1. Состав материала исследования

Тип материала	Источник	Единицы анализа
Научно-методическая литература	работы по педагогической/корпоративной этике и культуре	12
Нормативные документы и практики	правила этики, институциональный опыт	≈100 единиц
Всего		≈112

В исследовании использованы следующие теоретические методы: теоретический анализ научно-методической литературы — для определения сущности и компонентов корпоративной этики; контент-анализ — для выделения и группировки механизмов развития по частоте; сравнительный анализ — для сопоставления возможностей и ограничений механизмов; обобщение и классификация — для систематизации механизмов; моделирование — для разработки организационно-педагогической модели развития корпоративной этики.

Под механизмом развития понимается совокупность взаимосвязанных средств, мер и процедур, направленных на формирование и укрепление корпоративной этики. Механизмы операционально разделены на пять групп — нормативно-правовые, организационно-институциональные, методические, мотивационные и саморегуляция. Проценты округлены до целых, поэтому сумма по столбцу может отличаться от 100% на ±1. Ограничение исследования состоит в том, что контент-анализ в определённой мере опирается на экспертную интерпретацию.

4. РЕЗУЛЬТАТЫ И АНАЛИЗ



4.1. Структурные компоненты корпоративной этики педагога

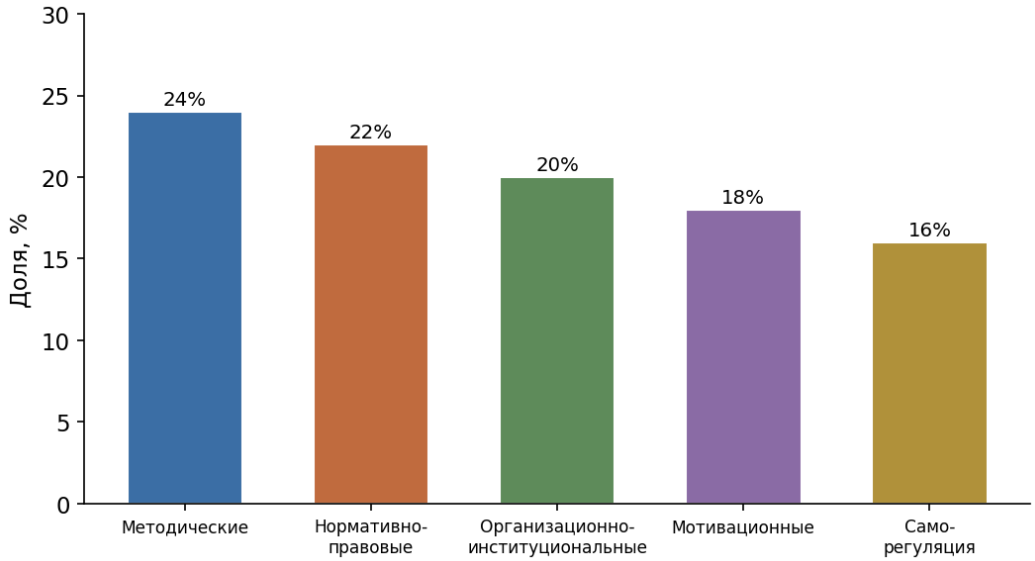
Теоретический анализ позволил выделить четыре структурных компонента корпоративной этики педагога. Их сущность приведена в таблице 2, а относительная доля в структуре корпоративной этики — на диаграмме 2.

Таблица 2. Структурные компоненты корпоративной этики педагога

Компонент	Сущность
Ценностно-нормативный	система профессиональных ценностей, нравственных норм и принципов
Профессионально-поведенческий	ответственность, честность, справедливость, верность долгу
Коммуникативно-коллегиальный	уважительные отношения с коллегами, культура сотрудничества
Репутационный	личный и институциональный авторитет, доверие общественности

Диаграмма 2. Относительная доля компонентов корпоративной этики педагога (%)

Анализ показывает, что в структуре корпоративной этики ведущее место занимают ценностно-нормативный (30%) и профессионально-поведенческий (28%) компоненты: именно они определяют нравственную позицию и профессиональную ответственность педагога. Коммуникативно-коллегиальный (24%) компонент обеспечивает коллективную культуру, а репутационный (18%) — имидж учреждения. Эти компоненты взаимосвязаны, поэтому развитие корпоративной этики должно охватывать их все.



4.2. Классификация и доля механизмов развития

Механизмы развития корпоративной этики разделены на пять основных групп. Их сущность и средства приведены в таблице 3, а доля применения — на диаграмме 1.

Таблица 3. Механизмы развития корпоративной этики педагога

Группа механизмов	Доля, %	Основные средства
Методические	24	тренинги, семинары, повышение квалификации, разбор этических кейсов
Нормативно-правовые	22	кодекс этики, положение, профессиональный стандарт
Организационно-институциональные	20	комиссия по этике, корпоративная культура, наставничество
Мотивационные	18	стимулирование, признание, авторитет и рейтинг
Саморегуляция	16	рефлексия, самооценка, профессиональное портфолио
Всего	100	

Диаграмма 1. Доля механизмов развития корпоративной этики (%)

Из распределения видно, что наибольшая доля приходится на методические (24%) и нормативно-правовые (22%) механизмы: тренинги-семинары и кодекс этики выступают основными средствами формирования корпоративной этики. Организационно-институциональный (20%) механизм действует через корпоративную культуру и комиссии по этике, мотивационный (18%) — через стимулирование и авторитет, а саморегуляция (16%) — через рефлексию и самооценку. Каждый механизм эффективен не по отдельности, а при системном применении.

4.3. Направления совершенствования механизмов

Контент-анализ позволил выявить существующие недостатки каждого механизма и направления их совершенствования (таблица 4).

Таблица 4. Направления совершенствования механизмов развития

Механизм	Существующий недостаток	Направление совершенствования
Нормативно-правовой	кодекс формален, слабо связан с практикой	обогащение кодекса реальными ситуациями и кейсами
Методический	тренинги эпизодичны, разовые	система регулярного, поэтапного повышения квалификации
Организационно-институциональный	комиссии по этике малоактивны	усиление наставничества и корпоративной культуры
Мотивационный	этичное поведение не стимулируется	внедрение признания, рейтинга и материально-морального стимула
Саморегуляция	рефлексия несистемна	профессиональное портфолио и критерии самооценки

4.4. Организационно-педагогическая модель развития корпоративной этики

На основе проведённого анализа разработана пятиэтапная организационно-педагогическая модель развития корпоративной этики, охватывающая целостный процесс от диагностики до мониторинга и оценки (таблица 5).

Таблица 5. Организационно-педагогическая модель развития корпоративной этики

Этап	Цель	Деятельность / механизм
Диагностика	выявление этического состояния и потребностей	опрос, наблюдение, анализ
Нормативная основа	определение ценностей и правил	кодекс этики, стандарт
Учебно-методический	развитие этической компетенции	тренинг, семинар, разбор кейсов
Практическое внедрение	внедрение норм в деятельность	наставничество, корпоративная культура, стимул
Мониторинг и оценка	оценка результата и коррекция	рефлексия, рейтинг, самооценка

4.5. Обсуждение результатов

Теоретический анализ обосновывает, что механизмы развития корпоративной этики эффективны не по отдельности, а при системном применении. Ведущая роль методических и нормативно-правовых механизмов (в сумме 46%) показывает важность знаний и нормативной основы в формировании корпоративной этики, а наличие мотивационных механизмов и саморегуляции отражает необходимость превращения этики во внутреннюю ценность. Это согласуется с положениями E. Campbell [1] и E.H. Schein [4]: профессиональная этика устойчива тогда, когда она переходит с уровня внешнего требования на уровень внутренней культуры.

Предложенная модель объединяет механизмы в целостную поэтапную систему и превращает развитие корпоративной этики из разового мероприятия в непрерывный процесс. Вместе с тем внедрение модели требует воли руководства, институциональной культуры и постоянного мониторинга — это основное практическое ограничение.

5. ЗАКЛЮЧЕНИЕ

Проведённый теоретико-методологический анализ позволяет сделать следующие выводы.

Во-первых, корпоративная этика педагога представляет собой целостную систему из четырёх структурных компонентов — ценностно-нормативного (30%), профессионально-поведенческого (28%), коммуникативно-коллегиального (24%) и репутационного (18%).

Во-вторых, механизмы развития корпоративной этики разделяются на пять групп, доля применения которых определена следующим образом: методические (24%), нормативно-правовые (22%), организационно-институциональные (20%), мотивационные (18%) и саморегуляция (16%).

В-третьих, выявлены существующие недостатки и направления совершенствования каждого механизма: связь кодекса с практикой, регулярность повышения квалификации, усиление наставничества и корпоративной культуры, стимулирование этичного поведения и систематизация самооценки.

В-четвёртых, предложенная пятиэтапная организационно-педагогическая модель (диагностика, нормативная основа, учебно-методический этап, практическое внедрение, мониторинг и оценка) даёт теоретическую основу непрерывного развития корпоративной этики.

Практические рекомендации: (a) обогатить кодекс этики реальными кейсами и связать его с практикой; (b) внедрить систему регулярных тренингов по развитию этической компетенции; (c) усилить деятельность наставничества и комиссий по этике; (d) разработать критерии стимулирования этичного поведения и самооценки.

Перспективы исследования связаны с разработкой критериев оценки эффективности предложенной модели, её апробацией в условиях различных образовательных учреждений, а также с вопросами управления репутацией педагога в цифровой среде.

Annotatsiya: *Ushbu maqolada zamonaviy ta’lim tizimidagi global o‘ zgarishlar, axborot texnologiyalarining jadal rivojlanishi asosida o‘ quv jarayonini takomillashtirish masalalari yoritilgan. “Shaxsga yo‘ naltirilgan ta’lim” va “shaxsga xos universal ta’limiy faoliyatlar” (UTF) tushunchalari pedagogik-psixologik jihatdan nazariy-qiyosiy tahlil qilingan. Maqolada o‘ quvchining shaxsiy tajribasiga tayanish, individual ta’lim uslublarini topish, mustaqil o‘ qish, tanqidiy fikrlash, ijodkorlik hamda ma’naviy-qadriyat yo‘ nalishlarni shakllantirish mexanizmlari ochib berilgan. Shuningdek, an’anaviy ta’limdan hamkorlikka asoslangan yondashuvga o‘ tish zaruriyati ilmiy asoslangan bo‘ lib, u o‘ quvchilarni zamonaviy jamiyat talablariga javob beradigan raqobatbardosh kadrlar qilib tayyorlashga xizmat qilishi ko‘ rsatib o‘ tilgan.*

Kalit so‘ zlar: *Shaxsga yo‘ naltirilgan ta’lim, shaxsga xos universal ta’limiy faoliyatlar (UTF), individual yondashuv, shaxsiy tajriba, tanqidiy fikrlash, ma’naviy-qadriyat yo‘ nalish, pedagogik-psixologik tahlil.*

ТЕОРЕТИКО-СРАВНИТЕЛЬНЫЙ АНАЛИЗ ЛИЧНОСТНО-ОРИЕНТИРОВАННОГО ОБУЧЕНИЯ И УНИВЕРСАЛЬНЫХ УЧЕБНЫХ ДЕЙСТВИЙ, ОБУСЛОВЛЕННЫХ ИНДИВИДУАЛЬНЫМИ ОСОБЕННОСТЯМИ ЛИЧНОСТИ

Аннотация: *В данной статье освещаются глобальные изменения в современной системе образования, а также вопросы совершенствования образовательного процесса на основе стремительного развития информационных технологий. Понятия «личностно-ориентированное обучение» и «универсальные учебные действия (УУД), обусловленные индивидуальными особенностями личности» подвергаются теоретико-сравнительному анализу с педагогической и психологической точек зрения. В статье раскрываются механизмы опоры на личный опыт учащегося, выявления индивидуальных стилей обучения, формирования навыков самостоятельного обучения, критического мышления, творческих способностей, а также духовно-ценностных ориентиров. Кроме того, научно обосновывается необходимость перехода от традиционного обучения к подходу, основанному на сотрудничестве, и показывается, что данный подход способствует подготовке конкурентоспособных специалистов, способных отвечать требованиям современного общества.*

Ключевые слова: *личностно-ориентированное обучение, универсальные учебные действия (УУД), обусловленные индивидуальными особенностями личности, индивидуальный подход, личный опыт, критическое мышление, духовно-ценностные ориентиры, психолого-педагогический анализ.*

THEORETICAL AND COMPARATIVE ANALYSIS OF LEARNER-CENTERED EDUCATION AND INDIVIDUALIZED UNIVERSAL LEARNING ACTIVITIES

Abstract: *This article examines global changes in the modern education system and issues related to improving the educational process through the rapid development of information technologies. The concepts of “learner-centered education” and “individualized universal learning activities (ULAs)” are analyzed from theoretical and comparative pedagogical and psychological perspectives. The article explores mechanisms for relying on learners’ personal experiences, identifying individual learning styles, developing independent learning skills, critical thinking, creativity, and spiritual and value-based orientations. Furthermore, the necessity of transitioning from traditional education to a collaborative learning approach is scientifically substantiated. It is demonstrated that such an approach contributes to preparing competitive professionals capable of meeting the demands of modern society.*

Keywords: *learner-centered education, individualized universal learning activities (ULAs), individualized approach, personal experience, critical thinking, spiritual and value-based orientations, pedagogical and psychological analysis.*

KIRISH

So‘ nggi yillarda ta’lim jarayonida ko‘ plab o‘ zgarishlar yuz bermoqda. Bu o‘ zgarishlar dunyoning deyarli barcha mamlakatlari ta’lim tizimida kuzatilmoqda. Internet, kompyuterlar, mobil qurilmalar va turli ta’lim platformalarining keng tarqalishi o‘ quv jarayonini tubdan o‘ zgartirmoqda. Buning natijasi o‘ laroq, ta’limni onlayn tarzda, istalgan vaqtda va istalgan joyda olish mumkin. Bu esa an’anaviy darsliklar va ma’ruzalardan tashqari, ko‘ plab yangi o‘ quv usullarini paydo bo‘ lishiga olib kelmoqda

Dunyoning tobora bir-biriga bog‘ liq bo‘ lib borishi turli madaniyatlar va mamlakatlar o‘ rtasida bilimlar almashinuvini kuchaytirmoqda. Bu esa o‘ quv dasturlarining xalqaro standartlarga moslashtirilishini, tillarni o‘ rganishning ahamiyatini oshirmoqda. Ishlab chiqarish va texnologiyalarning tez rivojlanishi tufayli bandlik bozorining talablari o‘ zgarib bormoqda. Zamonaviy mutaxassislar nafaqat bilimga ega bo‘ lishi, balki tanqidiy fikrlash, muammolarni hal qilish, jamoada ishlash, ijodkorlik kabi universal ko‘ nikmalarga ham ega bo‘ lishlari kerak. Bu jarayonda esa ta’lim markaziga o‘ quvchining o‘ zi, uning qiziqishlari, ehtiyojlari va individualligi qo‘ yilmoqda. Bu esa o‘ qitish usullarini individualizatsiya qilish, o‘ quvchilarning o‘ zini o‘ zi rivojlantirishiga imkoniyat yaratishga undamoqda. Bu undov an’anaviy ma’ruza va amaliy mashg‘ ulotlardan tashqari, onlayn kurslar, vebinarlar, interaktiv darslar, loyihaviy ta’lim, gamifikatsiya (o‘ yinlashtirish) kabi usullarni keng qo‘ llashni talab etmoqda. Bundan tashqari yuqoridagi faslda ta’kidlanganidek, “meta-fanni o‘ qitish”, “meta-faoliyat”, “meta-mavzu” kabi tushunchalar fanlararo aloqalarni kuchaytirish va universal ko‘ nikmalarni shakllantirishga qaratilmoqda. Bu o‘ quvchilarga bilimlarni yaxlit holda ko‘ rishga va murakkab muammolarni yechishga yordam beradi. Ushbu faoliyatlar o‘ quvchilarda mustaqil o‘ rganish, tanqidiy fikrlash, ijodkorlik, hamkorlik kabi zamonaviy jamiyat talab qiladigan ko‘ nikmalarni shakllantirishga qaratilgan.

Bu o‘ zgarishlar ta’lim tizimini yanada moslashuvchan, shaxsga yo‘ naltirilgan va kelajak talablariga javob beradigan qilishga qaratilgan. Shu o‘ rinda ikki bir-biriga o‘ xshash “shaxsga yo‘ naltirilgan ta’lim” va “shaxsga xos universal ta’limiy faoliyatlar” tushunchalar yonma-yon kelayotganligiga e’tibor qaratdik va ularni pedagogik-psixologik tomondan qiyosiy tahlil qilishni maqsad qilib oldik. Ularga quyida batafsil to‘ xtalamiz.

Adabiyotlar tahlili

Shaxsga yo‘ naltirilgan ta’lim - bu pedagogik ta’limning eng muhim yo‘ nalishlaridan biri bo‘ lib, unda o‘ quvchilarning shaxsi bilim va ko‘ nikmalarni o‘ zlashtirish uchun o‘ quvchilarning individual shaxsiy fazilatlaridan foydalangan holda rivojlanadi. Shaxsga yo‘ naltirilgan yondashuv metodologiyasi uzoq tarixga ega bo‘ lib A.N.Leontev, I.S.Yakimanskaya, K.R.Rojerslar maktabning bola shaxsini shakllantirishga ta’siri haqida ko‘ plab fikr yuritganlar.

Shaxsga yo‘ naltirilgan vaziyatni yaratish haqida so‘ z borganda, ta’limda shaxsga yo‘ naltirilgan ta’limni amalga oshirishga yordam beradigan asosiy vositalardan biri o‘ quvchining shaxsiy tajribasi ekanligini unutmaslik kerak, ya’ni subyekt tomonidan hayotiy vaziyatda xulq-atvor tajribasini anglash, bu individning shaxsiy salohiyatini qo‘ llashni, uning shaxs sifatida namoyon bo‘ lishini talab qiladi. “Shaxs bo‘ lish - bu vaziyatga bog‘ liq bo‘ lmaslik, uni o‘ zgartirishga intilish demakdir” [Serikov V.V., bet.89]. O‘ quvchining shaxsiy tajribasiga murojaat qilish motivatsiyaga tubdan ta’sir qiladi, chunki o‘ quvchining motivi va shaxsiy pozitsiyasiga u tomonidan olingan bilimlarning chuqurligi va mustahkamligi bog‘ liqdir.

Shuni ta’kidlash kerakki, ta’limning shakllangan uslubidan shaxsga yo‘ naltirilganga o‘ tish qisqa vaqt talab etmaydi. Turli texnologiyalar va ish tashkil etish shakllarini muntazam ravishda qo‘ llab, o‘ qituvchi dars tashkil etish uchun o‘ zi uchun ma’qul bo‘ lgan texnologiyalarni asta-sekin aniqlaydi, ulardan eng samaralilarini ajratib ko‘ rsatadi va vaqt o‘ tishi bilan buyruq uslubidan o‘ quvchilar bilan hamkorlik qilish uslubiga o‘ tadi.

N.A.Alekseyev o‘ z konsepsiyasining asosiga hodisaviylik prinsipini qo‘ yadi va “o‘ qitish hodisasi” tushunchasini “birga bo‘ lish” ma’nosida “shaxsga yo‘ naltirilgan o‘ qitish jarayoni” tushunchasiga aynan o‘ xshash deb ta’kidlaydi. “O‘ qitish hodisasi” deganda o‘ qituvchi va o‘ quvchining bilish vaziyatida birgalikda bo‘ lishi tushuniladi.

Tahlil va natijalar

Shaxsga yo‘ naltirilgan ta’limning muhim tarkibiy qismi o‘ quvchi faoliyatining natijalari emas, balki o‘ quv jarayonini tahlil qilishdir. Bunda o‘ quvchining pozitsiyasi o‘ zgaradi - tirishqoq ijrodan faol ijodga, uning fikrlashi boshqacha, refleksiv, natijaga yo‘ naltirilgan bo‘ ladi.

Axborot maydonining rivojlanishi ta’limning faktologik, mazmunli qismini o‘ quvchilar uchun yanada ochiqroq qilgan zamonaviy dunyoda o‘ qituvchining asosiy vazifasi o‘ zgarmoqda ya’ni o‘ quvchini bilim bilan ta’minlash o‘ rniga, uni mustaqil ravishda bilimlarni o‘ zlashtirish uchun ko‘ nikmalar va usullar to‘ plami bilan qurollantirishi kerak. O‘ qituvchi, avvalambor, har bir o‘ quvchiga o‘ zini anglash imkonini beradigan individual o‘ qitish uslubini topishga yordam berishi kerak. Ta’limning boshlang‘ ich bosqichini tugatgunga qadar o‘ quvchilar kerakli ma’lumotlarni qidirish strategiyalarini bilishlari, savollar berishni va ularga javob olishni bilishlari, mustaqil va tengdoshlari bilan hamkorlikda ishlashlari, o‘ z o‘ qishlarini rejalashtirishlari va o‘ zlari uchun muhim natijalarga erishishlari kerak.

Ba’zi o‘ qituvchilarda bunday murakkab vazifani bajarish, ayniqsa, gavjum sinflarda ularning kuchidan tashqari bo‘ lishi mumkinligi haqida xavotirlar paydo bo‘ lishi mumkin. Yaxshi yangilik shundaki, boshlang‘ ich sinflarda o‘ qish -

bu o‘ qituvchiga o‘ qitish usullarini tanlashda yetarli miqdorda erkinlik beradigan va shu bilan birga har bir o‘ quvchining qiziqish sohasini aniqlashga imkon beradigan ta’lim sohasidir. Ona tili darslarida sinf ishini tashkil etish usullaridan ba’zilarini qo‘ llagan holda, o‘ qituvchilar ulardan eng muvaffaqiyatlilarini ajratib ko‘ rsatishlari va kelajakda ularni boshqa predmet fanlariga “eksport” qilishlari mumkin.

Ko‘ p yillik amaliyot shuni ko‘ rsatadiki, o‘ qituvchi ta’limning boshlang‘ ich bosqichida kelgusi ta’lim uchun asos bo‘ ladigan yaxshi bilimlarni berishi, o‘ zini o‘ zi bilish qobiliyatini, o‘ z individualligini tushunishni rivojlantirishi, o‘ qish va o‘ zini-o‘ zi rivojlantirishga bo‘ lgan ehtiyojni shakllantirishi kerak. Shaxsga yo‘ naltirilgan ta’limning maqsadi yagona sinf jamoasida har bir o‘ quvchi bilan alohida o‘ quv imkoniyatlari, ehtiyojlari va qiziqishlarini hisobga olgan holda ishlashga imkon beradigan psixologik-pedagogik sharoitlar tizimini yaratishdan iborat.

UTF - bu boshlang‘ ich sinfda barcha darslarda shakllantirilishi kerak bo‘ lgan faoliyatlar va ularni to‘ rtta asosiy blokga guruhlash mumkin: shaxsga xos, regulyativ, kognitiv va kommunikativ. Bugungi kunda o‘ qituvchidan o‘ quvchiga oddiy bilim, ko‘ nikma va malakalarni o‘ tkazish o‘ rniga, maktab ta’limining ustuvor maqsadi o‘ quvchining mustaqil ravishda o‘ quv maqsadlarini qo‘ yish, ularni amalga oshirish yo‘ llarini loyihalash, o‘ z yutuqlarini nazorat qilish va baholash qobiliyatini rivojlantirishga aylanadi, boshqacha qilib aytganda - o‘ qish qobiliyatini shakllantirish ya’ni, o‘ quvchining o‘ zi ta’lim jarayonining “arxitektori va quruvchisi” bo‘ lishi kerak.

Xulosalar

Shunday qilib, boshlang‘ ich sinf o‘ quvchilarini o‘ qitishda qiyinchiliklarning psixologik sabablari o‘ quv faoliyatining funksional bloklarining shakllanmaganligi bo‘ lishi mumkin: motivatsion blok - harakat maqsadini ajratish, anglash, qabul qilish (regulyativ UTF) qobiliyati yo‘ qligi, shuningdek maktab o‘ quvchisining o‘ quv-bilish qiziqishlarining yo‘ qligi (shaxsga xos UTF); yo‘ naltiruvchi blok - faoliyat jarayonining motivatsiyasini ushbu jarayonning aniq yo‘ nalishini o‘ zgartirolmaydi, maqsadga erishishda va harakat rejasini, dasturini, texnologiyasini ishlab chiqishda namoyon bo‘ ladi (regulyativ UTF); operatsion blok - o‘ quvchilarda ontogenezda psixika oladigan yetarli operatsion imkoniyatlar mavjud emasligi va ko‘ nikmalar, malakalar, odatlar, mahoratda ifodalanishi (kognitiv UTF); energetik blok - o‘ qishga intilish, irodaviy faollik, darslarda e’tiborlilik mavjud emasligi (shaxsga xos UTF), shuningdek xotiradan ma’lumot olishning yo‘ qligi (kognitiv UTF); baholash bloki - harakatni nazorat qilish va uni bajarish jarayonida zarur tuzatishlar kiritish qobiliyati yo‘ qligi (regulyativ UTF). Xo‘ sh, “o‘ quv faoliyatini shakllantirish nimani anglatadi”? Bu bilan biz o‘ quv faoliyatining funksional bloklarida yetishmayotgan tarkibiy qismlarni va ularning o‘ zaro bog‘ liqligini shakllantirishni (korrektsiyalashni), va buning pirovardida - “faoliyatning psixologik tizimini shakllantirish” [Shadrikov V. D. Kasbiy faoliyatning sistemogenez muammolari. M.: Fan, 1982. 184 b.] yaxlit ta’lim sifatida tushunamiz.

Shaxsga xos UTF quyidagilarni ta’minlaydi: – shaxsiy, kasbiy, hayotiy o‘ zini o‘ zi belgilash, ma’no hosil qilish, ya’ni o‘ quvchilarning o‘ quv faoliyatining maqsadi va uning motivi o‘ rtasida ijtimoiy va shaxsiy qadriyatlardan kelib chiqib javob topa olishi kerak.

Shaxsga xos UTF o‘ quvchilarning qadriyat-ma’noviy yo‘ nalishini ta’minlaydi (faoliyatlar va voqealarni qabul qilingan axloqiy tamoyillar bilan bog‘ lash qobiliyati, axloqiy me’yorlarni bilish va xulq-atvorning axloqiy jihatini ajratish qobiliyati), shuningdek ijtimoiy rollar va shaxslararo munosabatlarda yo‘ nalish.

Shaxsga xos universal ta’limiy faoliyatlari - bu shaxsga yo‘ naltirilgan ta’lim doirasida shakllantirilishi kerak bo‘ lgan aniq ko‘ nikmalar va qobiliyatlar. Shaxsga xos universal ta’limiy faoliyatlari o‘ quvchiga o‘ z qadriyatlarini, motivlarini, maqsadlarini aniqlashga, axloqiy me’yorlarga rioya qilishga, o‘ zini o‘ zi baholashga va jamiyatda o‘ z o‘ rnini topishga yordam beradi. Shaxsga xos universal ta’limiy faoliyatlari - bu o‘ quvchining shaxsiy rivojlanishiga bevosita ta’sir qiladigan “vosita” desak ham bo‘ ladi. Shaxsga yo‘ naltirilgan ta’lim va shaxsga xos universal ta’limiy faoliyatlar zamonaviy pedagogikada o‘ quvchining shaxsini har tomonlama rivojlantirishga qaratilgan bir-birini uzviy to‘ ldiruvchi yondashuvlardir. Ularning nazariy-qiyosiy tahlili shuni ko‘ rsatadiki, shaxsga yo‘ naltirilgan ta’lim ta’lim jarayonining gumanistik, falsafiy va shaxsiy xususiyatlariga ustuvorlik qaratib, o‘ quvchining sub’ekt sifatidagi mavqei, individual qobiliyatlari hamda hayotiy tajribasini birinchi o‘ ringa qo‘ yadi. Shaxsga xos universal ta’limiy faoliyatlar esa o‘ quvchining mustaqil ravishda bilim olishi, o‘ z-o‘ zini rivojlantirishi va har qanday o‘ zgaruvchan muhitda zarur bo‘ lgan universal ko‘ nikmalarni shakllantirishning aniq faoliyatli hamda texnologik mexanizmi vazifasini bajaradi. Agar birinchi yondashuv ta’lim jarayonini o‘ quvchining ichki salohiyatiga moslashtirishga xizmat qilsa, ikkinchi yondashuv shu jarayonni amalga oshirishda kerak bo‘ ladigan amaliy usullar va kompetensiyalar tizimini ta’minlaydi. Shu bois, muvaffaqiyatli ta’lim tizimi faqatgina shaxsni hurmat qilish bilan cheklanib qolmay, balki uni amalda qo‘ llash uchun zarur bo‘ lgan universal faoliyat usullarini egallash bilan birgalikda to‘ laqonli natija beradi.

ShYTa - bu me’morning shaharsozlikka bo‘ lgan umumiy qarashi (shaharni qulay, yashashga mos va estetik jihatdan chiroyli qilish), ShUTF esa me’morning binolarni loyihalashda qo‘ llaniladigan aniq chizmalari va texnik xususiyatlari (binoning mustahkam, funktsional va qulay bo‘ lishini ta’minlash)ga o‘ xshaydi.

Shaxsga yo‘ naltirilgan ta’lim va shaxsga xos universal ta’limiy faoliyatlarining farqi qisqacha qilib aytganda, shaxsga yo‘ naltirilgan ta’lim - bu falsafa, shaxsga xos universal ta’limiy faoliyatlari - bu esa ushbu falsafani amalga oshirish uchun ishlatiladigan aniq faoliyatlardir.

BO‘ LAJAK PEDAGOGLARDA G‘ OYAVIY-MAFKURAVIY KOMPETENTLIKNI RIVOJLANTIRISH PEDAGOGIK MUAMMO SIFATIDA

Xo‘ jaqulov Oybek Aloxonovich
Namangan davlat universiteti tadqiqotchisi
Namangan, O‘ zbekiston

Annotatsiya: *Maqolada bo‘ lajak pedagoglarda g‘ oyaviy-mafkuraviy kompetentlikni rivojlantirish masalasi mustaqil pedagogik muammo sifatida tahlil qilinadi. Muallif mazkur kompetentlikni muayyan qarashlar majmuini qabul qilish emas, balki g‘ oyaviy mazmunni tushunish, tahlil qilish, baholash va o‘ quvchilarning dunyoqarashi shakllanishiga pedagogik ko‘ mak ko‘ rsatish qobiliyati sifatida talqin qiladi. Tadqiqotda kompetentlikning besh komponentli tuzilmasi asoslanib, muammoning to‘ rt qiyinchiligi – tushuncha noaniqligi, indoktrinatsiya xavfi, baholash murakkabligi va deklarativ hamda real daraja o‘ rtasidagi uzilish – aniqlanadi. Shuningdek, samarasiz yondashuvlarning tipologiyasi yaratilib, ta’lim va indoktrinatsiyani farqlashning to‘ rt mezoni shakllantiriladi. Xulosada kompetentlik tayyor xulosalarni uzatish emas, mustaqil tahlil qobiliyatini shakllantirish orqali rivojlanishi asoslab beriladi.*

Kalit so‘ zlar: *g‘ oyaviy-mafkuraviy kompetentlik, bo‘ lajak pedagog, dunyoqarash, indoktrinatsiya, tanqidiy tahlil, mafkuraviy immunitet, bahsli masalalar, qadriyatlar tarbiyasi, pedagogik muammo, oliy pedagogik ta’lim.*

РАЗВИТИЕ ИДЕЙНО-МИРОВОЗЗРЕНЧЕСКОЙ КОМПЕТЕНТНОСТИ У БУДУЩИХ ПЕДАГОГОВ КАК ПЕДАГОГИЧЕСКАЯ ПРОБЛЕМА

Аннотация: *В статье проблема развития идейно-мировоззренческой компетентности у будущих педагогов анализируется как самостоятельная педагогическая проблема. Автор интерпретирует данную компетентность не как принятие определённой совокупности взглядов, а как способность понимать, анализировать и оценивать идейное содержание и оказывать педагогическую поддержку формированию мировоззрения учащихся. Обосновывается пятикомпонентная структура компетентности, выявляются четыре трудности проблемы – понятийная неопределённость, риск индоктринации, сложность оценивания и разрыв между декларативным и реальным уровнями. Создаётся типология неэффективных подходов, формулируются четыре критерия разграничения образования и индоктринации. В заключении обосновывается, что компетентность развивается не передачей готовых выводов, а формированием способности к самостоятельному анализу.*

Ключевые слова: *идейно-мировоззренческая компетентность, будущий педагог, мировоззрение, индоктринация, критический анализ, идеологический иммунитет, спорные вопросы, воспитание ценностей, педагогическая проблема, высшее педагогическое образование.*

DEVELOPING IDEOLOGICAL AND WORLDVIEW COMPETENCE IN FUTURE TEACHERS AS A PEDAGOGICAL PROBLEM

Annotation: *The article analyses the development of ideological and worldview competence in future teachers as an independent pedagogical problem. The author interprets this competence not as the acceptance of a particular set of views but as the ability to understand, analyse and evaluate ideological content and to provide pedagogical support for the formation of pupils’ worldview. A five-component structure of the competence is substantiated, and four difficulties of the problem are identified: conceptual vagueness, the risk of indoctrination, the complexity of assessment, and the gap between the declarative and the real level. A typology of ineffective approaches is created, and four criteria distinguishing education from indoctrination are formulated. In conclusion, it is substantiated that the competence develops not through the transmission of ready-made conclusions but through the formation of the capacity for independent analysis.*

Keywords: *ideological and worldview competence, future teacher, worldview, indoctrination, critical analysis, ideological immunity, controversial issues, value education, pedagogical problem, higher pedagogical education.*

KIRISH

Zamonaviy axborot muhitining asosiy xususiyati shundaki, unda turli g‘ oyaviy oqimlar yoshlarga bevosita, hech qanday oraliq bosqichsiz yetib boradi. Ilgari dunyoqarashning shakllanishi oila, maktab va mahalliy jamoa kabi nisbatan cheklangan manbalar orqali kechgan bo‘ lsa, bugun o‘ smir bir vaqtning o‘ zida bir-biriga zid ko‘ plab qarashlar bilan to‘ qnash keladi. Mazkur holat o‘ qituvchining rolini o‘ zgartiradi: u endi yagona yoki asosiy axborot manbai emas, balki o‘ quvchiga mazkur oqimda yo‘ nalish olishga yordam beruvchi shaxsdir. Bu vazifa esa undan maxsus kasbiy tayyorgarlikni talab qiladi.

G‘ oyaviy-mafkuraviy kompetentlik deganda mazkur tadqiqotda pedagogning g‘ oyaviy mazmunga ega matn va hodisalarni tushunish, ularni tahlil qilish va baholash, o‘ z qadriyatli pozitsiyasini asoslay olish hamda o‘ quvchilarning dunyoqarashi mustaqil shakllanishiga pedagogik ko‘ mak ko‘ rsatish qobiliyatlarining yaxlit birligi tushuniladi. Ushbu ta’rifning muhim jihati shundaki, u kompetentlikni muayyan qarashlar majmuini qabul qilish bilan tenglashtirmaydi. Pedagog muayyan pozitsiyaga ega bo‘ lishi tabiiy, biroq uning kasbiy kompetentligi pozitsiyasining mazmunida emas, u bilan ishlash usulida namoyon bo‘ ladi.

Mazkur masalaning pedagogik muammo maqomida ko‘ rib chiqilishi tasodifiy emas. Vazifa va muammo tushunchalari pedagogikada farqlanadi: vazifa yechimi ma’lum, faqat bajarilishi kerak bo‘ lgan topshiriqdir; muammo esa yechimi oldindan ma’lum bo‘ lmagan, qarama-qarshi talablarni o‘ z ichiga olgan holatdir. G‘ oyaviy-mafkuraviy kompetentlikni rivojlantirish aynan ikkinchi turga mansub, zero u bir-biriga zid ikki talabni birlashtiradi: bir tomondan, yoshlarda barqaror qadriyatli pozitsiyani shakllantirish, boshqa tomondan, ularning mustaqil fikrlash erkinligini saqlash.

Mazkur ziddiyat masalaning o‘ zagini tashkil etadi. Agar ta’lim jarayoni tayyor xulosalarni o‘ zlashtirishga yo‘ naltirilsa, u shakllantirilgan pozitsiyaning barqarorligini ta’minlamaydi: tashqi bosim ostida qabul qilingan qarash birinchi jiddiy sinovda yemiriladi va ko‘ pincha teskari ta’sir beradi. Agar jarayon faqat tanqidiy tahlilga yo‘ naltirilsa va hech qanday qadriyatli yo‘ nalish berilmasa, u shaxsni qadriyatli bepushtlik holatiga olib kelishi mumkin. Haqiqiy kompetentlik esa aynan ikki chekkadan ham uzoqdagi pozitsiyani – asoslangan va shu sababli barqaror ishonchni – nazarda tutadi.

Mazkur maqolaning maqsadi bo‘ lajak pedagoglarda g‘ oyaviy-mafkuraviy kompetentlikni rivojlantirish masalasining pedagogik muammo sifatidagi mohiyatini ochib berish va uning asosiy qiyinchiliklarini aniqlashdan iborat. Tadqiqot obyekti oliy pedagogik ta’lim muassasalarida bo‘ lajak pedagoglarning kasbiy tayyorgarligi jarayoni, predmeti esa g‘ oyaviy-mafkuraviy kompetentlikni rivojlantirishning muammoli jihatlaridir. Ishning ilmiy yangiligi kompetentlikning besh komponentli tuzilmasini asoslash, muammoning to‘ rt qiyinchiligini aniqlash hamda ta’lim va indoktrinatsiyani farqlashning to‘ rt mezonini shakllantirishdan iborat.

ADABIYOTLAR TAHLILI

Dunyoqarashning shakllanish mexanizmlari ijtimoiy nazariyada chuqur tadqiq etilgan. P.Berger va T.Lukman voqelikning ijtimoiy qurilishiga bag‘ ishlangan ishida shaxsning dunyoqarashi birlamchi va ikkilamchi ijtimoiylashuv jarayonlarida shakllanishini asoslab, birlamchi bosqichda o‘ zlashtirilgan tasavvurlar keyinchalik o‘ zgartirilishi ancha qiyin ekanini ko‘ rsatishgan. Ularning tahlilidan muhim pedagogik xulosa kelib chiqadi: oliy ta’lim bosqichida ish allaqachon shakllangan tasavvurlar bilan olib boriladi va shu sababli yangi bilim uzatish emas, mavjud tasavvurlarni qayta ko‘ rib chiqish vazifasi birinchi o‘ ringa chiqadi.

Yopiq va ochiq fikrlash tizimlari masalasi alohida yo‘ nalishni tashkil etadi. T.Adorno va hammualliflari avtoritar shaxs tadqiqotida qat’iy ierarxik tafakkurning psixologik asoslarini o‘ rgangan. M.Rokich ochiq va yopiq ong haqidagi ishida dogmatizmni muayyan g‘ oyaning mazmuni bilan emas, ishonchlar tizimining tuzilishi bilan bog‘ lagan: yopiq tizimga ega shaxs o‘ z qarashiga zid axborotni qabul qilmaydi va muqobil pozitsiyani tushunishga urinmaydi. Mazkur yondashuv pedagogik ish uchun hal qiluvchi ahamiyatga ega, zero u diqqatni qarashning mazmunidan uning tuzilishiga ko‘ chiradi.

Ta’lim va indoktrinatsiyani farqlash masalasi ta’lim falsafasida keskin bahsga sabab bo‘ lgan. R.S.Piters ta’lim tushunchasining o‘ zi tahlil qilinib, uning mantiqiy belgilari orasida o‘ quvchining ongli ishtiroki va bilimning asoslanish usuli muhim o‘ rin egallashini ko‘ rsatgan. I.A.Snuk indoktrinatsiyani maxsus tadqiq etib, uni usul, mazmun yoki niyat bo‘ yicha aniqlash mumkinligini ko‘ rib chiqqan va niyat mezonining ustunligini asoslagan. H.Siegel esa tanqidiy ratsionallikni ta’limning asosiy ideali sifatida ko‘ rsatib, dalilga asoslangan fikrlashni shaxs avtonomiyasining sharti deb bilgan.

Fuqarolik va qadriyat tarbiyasining zamonaviy talqinlari ham ahamiyatlidir. F.Vaynert kompetensiya tushunchasini aniqlashtirib, uni murakkab talablarni bajarishga imkon beruvchi kognitiv va motivatsion resurslar tizimi sifatida ta’riflagan. J.Vestxaymer va J.Keyn fuqaro tarbiyasining uch modelini – mas’uliyatli, ishtirok etuvchi va adolat uchun yo‘ naltirilgan fuqaro modellarini – ajratib, ular turli ta’lim natijalariga olib kelishini ko‘ rsatishgan. D.Hess esa bahsli masalalarni sinfda muhokama qilish masalasini tadqiq etib, bunday muhokamaning ta’limiy salohiyatini asoslagan.

Ko‘ rib chiqilgan manbalarning umumlashtirilgan tahlili shuni ko‘ rsatadi, mavzuning nazariy jihatlari yetarlicha yoritilgan, ammo uni aynan pedagogik muammo sifatida tahlil qilish, ya’ni muammoning tarkibiy qiyinchiliklarini,

amaliyotdagi samarasiz yondashuv turlarini va ta’lim bilan indoktrinatsiya o‘ rtasidagi amaliy chegarani belgilash masalasi alohida tadqiqot predmeti bo‘ lgan emas. Mavjud ishlarda yondashuvlar ko‘ pincha nazariy darajada qiyoslanadi, kasbiy pedagogik tayyorgarlik sharoitidagi aniq ziddiyatlar esa ochib berilmaydi. Mazkur maqolada tahlil aynan shu yo‘ nalishda olib boriladi.

TADQIQOT METODOLOGIYASI

Tadqiqotning metodologik asosini kompetensiyaviy va aksiologik yondashuvlarning uyg‘ unligi tashkil etadi. Kompetensiyaviy yondashuv g‘ oyaviy-mafkuraviy tayyorgarlikni bilimlar yig‘ indisi sifatida emas, aniq vaziyatlarda namoyon bo‘ ladigan qobiliyat sifatida ko‘ rib chiqish imkonini berdi; mazkur talqinda baholash predmeti talabaning bilimi emas, uning g‘ oyaviy mazmunga ega material bilan ishlash usulidir. Aksiologik yondashuv esa kompetentlikning qadriyatli o‘ zagini ajratishga xizmat qildi.

Ishda tushunchalarni tahlil qilish, qiyosiy tahlil, tipologik tahlil hamda analiz va sintez usullari qo‘ llanildi. Tushunchalarni tahlil qilish usuli g‘ oya, mafkura, dunyoqarash va e’tiqod atamalarining mazmunini aniqlashtirish va ular o‘ rtasidagi chegaralarni belgilashga yo‘ naltirildi, zero mazkur atamalarning chalkashtirilishi muammoni aniq qo‘ yishga to‘ sqinlik qiladi. Tipologik tahlil esa amaliyotdagi samarasiz yondashuvlarni guruhlarga ajratish va ularning umumiy belgilarini aniqlashda qo‘ llanildi.

TAHLIL VA NATIJALAR

Olib borilgan tahlil natijasida g‘ oyaviy-mafkuraviy kompetentlikning besh komponentli tuzilmasi asoslandi. Gnoseologik komponent g‘ oya, mafkura va dunyoqarash tushunchalarining mohiyati, ularning shakllanish qonuniyatlari haqidagi bilimlarni qamrab oladi. Analitik komponent matn va hodisalardagi g‘ oyaviy mazmunni ajratish, uning dalillarini baholash va manipulyativ usullarni tanib olish qobiliyatidan iborat. Aksiologik komponent shaxsning o‘ z qadriyatli pozitsiyasi va uni asoslay olishini ifodalaydi. Kommunikativ komponent zid qarashlar sharoitida muloqot olib borish ko‘ nikmasini bildiradi. Metodik komponent esa o‘ quvchilar bilan ishlash usullarini egallashni nazarda tutadi.

Ikkinchi natija muammoning to‘ rt qiyinchiligini aniqlashdan iborat. Birinchi qiyinchilik tushuncha noaniqligi bilan bog‘ liq: amaliyotda g‘ oya, mafkura, dunyoqarash va e’tiqod atamalari ko‘ pincha farqlanmasdan qo‘ llanadi, natijada pedagogik maqsad aniq belgilanmaydi. Ikkinchi qiyinchilik indoktrinatsiya xavfidir. Uchinchi qiyinchilik baholashning murakkabligida: shaxsning haqiqiy pozitsiyasi so‘ rovnoma yoki imtihon javobi orqali ishonchli aniqlanmaydi, zero baholash holatida ijtimoiy ma’qullanadigan javob berish moyilligi kuchli bo‘ ladi. To‘ rtinchi qiyinchilik deklarativ va real daraja o‘ rtasidagi uzilishdir.

Uchinchi natija amaliyotdagi samarasiz yondashuvlarning tipologiyasini yaratish bilan bog‘ liq. Deklarativ tip tarbiyaviy ishni tayyor qoidalarni e’lon qilishga qisqartiradi; bunda talaba to‘ g‘ ri javobni biladi, lekin uni asoslay olmaydi. Taqiqlovchi tip asosiy e’tiborni nomaqbul g‘ oyalarni sanab o‘ tishga qaratadi va ularning qanday ishlashini tahlil qilmaydi, natijada talaba notanish shakldagi ta’sirni tanimaydi. Rasmiy-tadbirli tip ishni soni bilan o‘ lchanadigan tadbirlarga aylantiradi. Qo‘ rqitish tipi esa tahdid obrazini kuchaytirish orqali ta’sir ko‘ rsatishga urinadi va ko‘ pincha teskari qiziqish uyg‘ otadi.

To‘ rtinchi natija ta’lim va indoktrinatsiyani farqlashning to‘ rt mezonini shakllantirishdan iborat. Birinchi mezon – asoslash usuli: ta’limda xulosa dalil bilan, indoktrinatsiyada esa obro‘ yoki hissiy bosim bilan qabul qildiriladi. Ikkinchi mezon – muqobilga munosabat: ta’lim muqobil qarashni ochiq ko‘ rib chiqadi va uning kuchli tomonlarini ham ko‘ rsatadi, indoktrinatsiya esa uni buzib yoki eng zaif shaklda taqdim etadi. Uchinchi mezon – savolga munosabat: ta’limda savol rag‘ batlantiriladi, indoktrinatsiyada u sodiqlikka shubha sifatida qabul qilinadi. To‘ rtinchi mezon – natija: ta’lim mustaqil fikrlash qobiliyatini oshiradi.

Beshinchi natija muammoni hal qilish yo‘ nalishlarini aniqlash bilan bog‘ liq. Tadqiqot uch yo‘ nalishni asoslab berdi. Birinchi yo‘ nalish – diqqatni g‘ oya mazmunidan uning ishlash mexanizmiga ko‘ chirish: talaba muayyan g‘ oyalar ro‘ yxatini emas, ta’sir usullarini – hissiy manipulyatsiya, soddalashtirish, dushman obrazini yaratish, tanlangan faktlarni ko‘ rsatish usullarini – tanishni o‘ rganishi lozim. Ikkinchi yo‘ nalish – bahsli masalalarni ochiq muhokama qilish amaliyotini joriy etish. Uchinchi yo‘ nalish – o‘ z pozitsiyasini asoslash ko‘ nikmasini muntazam mashq qilish, zero asoslanmagan ishonch barqaror bo‘ lmaydi.

Aniqlangan qiyinchiliklarning o‘ zaro bog‘ liqligi alohida e’tiborga loyiqdir. Tushuncha noaniqligi baholash mezonlarining noaniqligini keltirib chiqaradi; mezon aniq bo‘ lmasa, pedagog ish natijasini qatnashuvchilar soni bilan o‘ lchashga majbur bo‘ ladi; bu esa tadbir shaklidagi ishni ustun qo‘ yadi va natijada talabada tahlil qobiliyati emas, rasmiy muvofiqlik ko‘ nikmasi shakllanadi. Shu zanjir muammoning takrorlanuvchi tabiatini tushuntiradi: har bir bog‘ in keyingisini mustahkamlaydi. Zanjirni uzish nuqtasi esa boshida joylashgan — tushunchani va baholash obyektini aniqlashtirishda.

MUHOKAMA

Ta’lim jarayonida qadriyatlarni shakllantirishning maqbul chegaralari masalasi ta’lim falsafasida keskin polemikaga sabab bo‘ lgan. Bahsning bir qutbida R.S.Piters va I.A.Snuk asos solgan an’ana turadi. Piters ta’lim tushunchasining

mantiqiy tahlilida uni shunchaki o‘ zgartirish jarayoni emas, o‘ quvchining ongli ishtiroki va bilimning asoslanishini nazarda tutuvchi faoliyat sifatida ko‘ radi. Snuk esa indoktrinatsiyaning asosiy belgisini niyatda ko‘ rib, o‘ qituvchining o‘ quvchida muayyan ishonchni dalildan qat’i nazar shakllantirish maqsadini qo‘ yishini hal qiluvchi mezon deb biladi.

Mazkur pozitsiyaga qarshi e’tiroz ham mavjud va u jiddiydir. Uning mohiyati shundaki, har qanday ta’lim muqarrar ravishda muayyan qadriyatlarni uzatadi: o‘ quv rejasining tuzilishi, material tanlovi, baholash mezonlari va hatto o‘ qituvchining ohangi muayyan ustuvorliklarni ifodalaydi. Demak, qadriyatlardan xoli, butunlay betaraf ta’lim mavjud emas va betaraflikka da’vo qilish aslida mavjud ustuvorliklarni yashirishdan iborat. Bu e’tiroz Piters va Snukning pozitsiyasini butunlay inkor etmaydi, biroq masalani qayta qo‘ yadi: savol qadriyat uzatiladimi yoki yo‘ qmi degan savol emas, u qanday uzatilishi haqidagi savoldir.

H.Siegel va D.Hessning qarashlari mazkur savolga javob beradi. Siegel tanqidiy ratsionallikni ta’limning asosiy ideali sifatida ko‘ rsatadi: o‘ quvchida shakllantirilishi lozim bo‘ lgan asosiy sifat muayyan ishonch emas, dalilga asoslanib fikr yuritish moyilligidir. Hess esa bahsli masalalarni sinfda ochiq muhokama qilish amaliyotini asoslab, bunday muhokama o‘ quvchini turli pozitsiyalar bilan tanishtiradi va ularni qiyoslashga o‘ rgatadi. Mazkur ikki yondashuvning birikuvi Piters va Snuk qo‘ ygan talabni amalda bajarish yo‘ lini ko‘ rsatadi: qadriyat uzatiladi, biroq u dalil va muhokama orqali, o‘ quvchining ongli ishtiroki bilan uzatiladi.

XULOSA

Olib borilgan tadqiqot g‘ oyaviy-mafkuraviy kompetentlikni rivojlantirish oddiy pedagogik vazifa emas, mustaqil muammo ekanini asoslab berdi. Muammoning o‘ zagi ikki zid talabning birlashtirilishida yotadi: barqaror qadriyatli pozitsiyani shakllantirish va ayni paytda mustaqil fikrlash erkinligini saqlash. Mazkur ziddiyat chetlab o‘ tilmaydi va uni tan olmaslik amaliy xatolarga olib keladi.

Kompetentlikning gnoseologik, analitik, aksiologik, kommunikativ va metodik komponentlardan iborat tuzilmasi asoslanib, muammoning to‘ rt qiyinchiligi – tushuncha noaniqligi, indoktrinatsiya xavfi, baholash murakkabligi va deklarativ hamda real daraja o‘ rtasidagi uzilish – aniqlandi. Samarasiz yondashuvlarning to‘ rt tipi – deklarativ, taqiqlovchi, rasmiy-tadbirli va qo‘ rqituvchi tiplar – tavsiflandi.

Ta’lim va indoktrinatsiyani farqlashning to‘ rt mezoni – asoslash usuli, muqobilga munosabat, savolga munosabat va natija – shakllantirildi. Yakuniy xulosa sifatida shuni ta’kidlash lozimki, tayyor xulosalarni uzatish orqali shakllantirilgan pozitsiya barqaror bo‘ lmaydi: u birinchi jiddiy sinovda yemiriladi. Barqaror pozitsiya esa faqat mustaqil tahlil va asoslash tajribasi orqali tarkib topadi, demak g‘ oyaviy-mafkuraviy kompetentlikni rivojlantirishning asosiy yo‘ li aynan shu tajribani tashkil etishdan iborat.

BOSHLANG‘ ICH SINFLARDA AXBOROT TEXNOLOGIYALARI FANINI O‘ QITISH UCHUN TAKOMILLASHTIRILGAN DASTURIY TA’MINOTNI JORIY ETISH METODIKASI

Ergashev Jasurbek Abduraubovich
Namangan davlat universiteti
katta o‘ qituvchisi, uquv_86@mail.ru

Annotatsiya: *Mazkur maqolada raqamlashtirish sharoitida boshlang‘ ich sinflarda axborot texnologiyalari fanini o‘ qitishning takomillashtirilgan dasturiy ta’minotini joriy etish metodikasi yoritilgan. Unda dasturiy ta’minotni joriy etishning tahlil qilish, rejalashtirish, amalga oshirish, monitoring va ta’lim natijalarini baholash bosqichlari asoslangan. Shuningdek, ta’lim jarayonida raqamli platforma, integratsiyalashgan yondashuv hamda Case-study, SMART, SWOT va INSERT metodlaridan foydalanish imkoniyatlari tahlil qilingan. Taklif etilgan metodika bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarining raqamli kompetensiyalarini rivojlantirish, mustaqil va ijodiy faolligini oshirish hamda ta’lim samaradorligini ta’minlashga yo‘ naltirilgan.*

Kalit so‘ zlar: *raqamlashtirish, boshlang‘ ich ta’lim, axborot texnologiyalari, dasturiy ta’minot, raqamli ta’lim platformasi.*

МЕТОДИКА ВНЕДРЕНИЯ УСОВЕРШЕНСТВОВАННОГО ПРОГРАММНОГО ОБЕСПЕЧЕНИЯ ДЛЯ ОБУЧЕНИЯ ИНФОРМАЦИОННЫМ ТЕХНОЛОГИЯМ В НАЧАЛЬНЫХ КЛАССАХ

Аннотация: *В статье описывается методика внедрения передового программного обеспечения для обучения информационным технологиям в начальной школе в условиях цифровизации. Она базируется на этапах внедрения программного обеспечения: анализе, планировании, реализации, мониторинге и оценке образовательных результатов. Также анализируются возможности использования цифровой платформы, комплексного подхода и таких методов, как кейс-стади (case-study), SMART, SWOT и INSERT, в образовательном процессе. Предлагаемая методика направлена на развитие цифровых компетенций будущих учителей начальных классов, повышение их самостоятельной и творческой активности, а также на обеспечение эффективности обучения.*

Ключевые слова: *цифровизация, начальное образование, информационные технологии, программное обеспечение, цифровая образовательная платформа.*

METHODOLOGY FOR IMPLEMENTING IMPROVED SOFTWARE FOR TEACHING THE SUBJECT OF INFORMATION TECHNOLOGIES IN PRIMARY GRADES

Abstract: *This article describes the methodology for implementing improved software for teaching the subject of information technologies in primary grades in the context of digitalization. It substantiates the stages of software implementation: analysis, planning, implementation, monitoring, and assessment of educational outcomes. The article also analyzes the possibilities of using a digital platform, an integrated approach, and the Case-study, SMART, SWOT, and INSERT methods in the educational process. The proposed methodology is aimed at developing the digital competencies of future primary school teachers, increasing their independent and creative activity, and ensuring the effectiveness of education.*

Keywords: *digitalization, primary education, information technologies, software, digital educational platform.*

Raqamli texnologiyalar rivojlanayotgan hozirgi sharoitda turli fanlar, shu jumladan, “BSAT” fanini o‘ qitish metodikasini takomillashtirish davr talabiga aylandi. Yangi texnik va dasturiy vositalarning paydo bo‘ lishi esa o‘ qitish usullarini o‘ zgartirishga, reproduktiv ta’limdan produktiv ta’limga, unifitsik yondashuvdan ta’limni individuallashtirishga sharoit yaratmoqda.

Raqamlashtirish sharoitida “BSAT” fanining takomillashtirilgan dasturiy ta’minotini joriy etish metodikasi – bu ushbu fanni o‘ qitish samaradorligini oshirish va bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarining raqamli bilimlarini rivojlantirish maqsadida yangi yoki yangilangan dasturiy ta’minotni boshlang‘ ich ta’lim amaliyotiga integratsiya qilishga qaratilgan tizimli va ilmiy asoslangan yondashuv.

“BSAT” fanining takomillashtirilgan dasturiy ta’minotini joriy etish metodikasi ko‘ p bosqichli jarayon bo‘ lib, u quyidagi asosiy jihatlarni e’tiborga olinishini talab qiladi:

I. Tahlil qilish va asoslash.

1. “Joriy holat tahlilini o‘ tkazish va asoslash”: ta’lim muassasasining boshlang‘ ich ta’lim axborot texnologiyalari infratuzilmasining joriy darajasini baholash, jarayonda foydalanilayotgan dasturiy ta’minot, pedagog va talabalarning raqamli kompetensiyasi darajasi, shuningdek, yangi dasturiy ta’minot yordamida hal qilinishi lozim bo‘ lgan ehtiyoj va muammolarni xolisona baholash.

2. Dasturiy ta’minotni tanlashni asoslash: takomillashtirilgan dasturiy ta’minotni tanlash mezonlarini aniqlash (davlat ta’lim standartiga muvofiqligi, didaktik tamoyillar, texnik talablar v.b.), dasturiy ta’minotning turli xil variantlarini tahlil qilish va eng mosini tanlashni asoslash.

3. Takomillashtirilgan dasturiy ta’minotni joriy etishning maqsad va vazifalarini belgilash: dasturiy ta’minotni joriy etish maqsadlari (masalan, ATni o‘ rganish bo‘ yicha motivatsiyani oshirish, kompyuter bilan ishlashning bazaviy ko‘ nikmalarini shakllantirish, algoritmik fikrlashni rivojlantirish, ijodiy qobiliyatlarni rivojlantirish v.b.) va ushbu maqsadlarga erishish uchun hal qilinishi lozim bo‘ lgan vazifalarni aniq shakllantirish.

II. Rejalashtirish.

1. Joriy etish rejasini ishlab chiqish: dasturiy ta’minotni joriy etish bosqichlarini (tayyorgarlik, asosiy, yakuniy), ularni amalga oshirish muddatini va zarur resurslarni aniqlash.

2. O‘ quv-uslubiy ta’minotni ishlab chiqish: o‘ quv dasturi, pedagog uchun uslubiy tavsiyalar, talabalar uchun didaktik materiallar, ta’lim jarayonida dasturiy ta’minotdan foydalanish bo‘ yicha zarur bo‘ ladigan interfaol topshiriqlar, test variantlari va boshqa resurslarni yaratish yoki mavjudlarini takomillashtirish.

3. Ta’lim samaradorligini baholash mezonlarini aniqlash: dasturiy ta’minotni joriy etish natijalarini baholash tizimini ishlab chiqish (masalan, talabalar tomonidan dasturiy ta’minotni o‘ zlashtirish samaradorligini oshirish, ularning raqamli kompetensiyasini rivojlantirish, ta’limga bo‘ lgan motivatsiyani oshirish v.b.).

III. Amalga oshirish:

1. Axborot texnologiyalari infratuzilmasini tayyorlash: zarur uskunalar va dasturiy ta’minot bilan ta’minlash, ularning funksionalligi va mosligini tekshirish.

2. Ta’lim jarayonlariga dasturiy ta’minotni joriy etish: ta’lim jarayoniga dasturiy ta’minotni bosqichma-bosqich joriy etish, alohida darslar yoki mavzular kesimidan boshlab, bo‘ lajak boshlang‘ ich sinf o‘ qituvchilari tomonidan bilimlarni o‘ zlashtirganlik natijasidan kelib chiqqan holda, ulardan foydalanishni kengaytirish.

3. Bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarini qo‘ llab-quvvatlashni tashkil etish: yangi dasturiy ta’minotdan foydalanish yuzasidan konsultatsiya, texnik, metodik yordam ko‘ rsatishni ta’minlash.

4. Monitoring va sozlash: dasturiy ta’minotni joriy etish jarayonini doimiy kuzatib borish, talabalarning fikr-mulohazalarini eshitish va xulosalar chiqarish, ish rejasi va usullariga tuzatishlar kiritish.

IV. Ta’lim natijalarini baholash:

1. Ma’lumotlarni to‘ plash: turli usullar orqali dasturiy ta’minotni joriy etish samaradorligi to‘ g‘ risidagi ma’lumotlarni to‘ plash (testlash, ta’lim faoliyatini kuzatish va o‘ zlashtirilgan bilimlar tahlilini o‘ tkazish v.b.).

2. Hisobotlar tayyorlash: ta’lim jarayonlariga dasturiy ta’minotni joriy etish natijalari bo‘ yicha hisobotlar tayyorlash (xulosa va tavsiyalarni ishlab chiqish).

“BSAT” fani dasturiy ta’minotini joriy etish metodikasining asosiy tamoyillari:

1. davlat ta’lim standarti talablarini hisobga olish;

2. bo‘ lajak boshlang‘ ich sinf o‘ qituvchilari uchun kichik yoshdagi maktab o‘ quvchilarining yoshi xususiyatlari va ularning kognitiv qobiliyatlariga mos keladigan dasturiy ta’minotni tanlash;

3. axborot vizualligi va talabalarning o‘ quv materiallari bilan faol o‘ zaro ta’sirini ta’minlaydigan dasturiy ta’minotlardan keng foydalanish;

4. bo‘ lajak boshlang‘ ich sinf o‘ qituvchilari uchun kichik yoshdagi maktab o‘ quvchilarining motivatsiyasi va faolligini oshirishga qaratilgan o‘ yinli dasturiy ta’minotdan keng foydalanshni ta’minlash;

5. talabaning individual ehtiyoji va o‘ zlashtirish tezligiga qarab ta’lim olishni moslashtirish;

6. ta’limning amaliy yo‘ naltirilganligi: ta’lim jarayonlarida kompyuter bilan ishlash va kundalik ehtiyojlarda axborot texnologiyalaridan foydalanish yuzasidan talabalarning amaliy ko‘ nikmalarini shakllantirishga yo‘ naltirish;

7. tizimlilik va izchillik: dasturiy ta’minotni bosqichma-bosqich, oddiylikdan murakkablikka qarab joriy etishni ta’minlash;

8. refleksiya va baholash: muammolarni aniqlash va kerakli tuzatishlarni kiritish maqsadida dasturiy ta’minotni joriy etish natijalarini qayd etish uchun refleksiya va baholashni amalga oshirish.

9. doimiy tarzda dasturiy ta’minotni joriy etish amaliyotini takomillashtirib borish va ta’lim samaradorligini oshirish maqsadidagi yangi imkoniyatlarni qidirish.

Ushbu bandlar va tamoyillarga rioya qilish natijasida, bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarini har tomonlama rivojlantirish va raqamli ta’lim sharoitiga moslashtirish uchun, zamonaviy ta’lim muhiti yaratiladi va “BSAT” fanining takomillashtirilgan dasturiy ta’minotini joriy etish metodikasi ma’lum darajada takomillashtiriladi.

Raqamlashtirish sharoitida boshlang‘ ich sinflar uchun axborot texnologiyalari fanini o‘ qitishda talabalar bilan individual ishlashga yo‘ naltirilgan, dasturiy vositalar asosidagi tabaqalashtirilgan va integratsiyalashgan yondashuv ishlab chiqildi. Ushbu yondashuvda “Case-study”, “SMART”, “SWOT” va “Insert” metodlarining birgalikda qo‘ llanishi ta’lim samaradorligini oshirishga xizmat qiladi.

Boshlang‘ ich sinflarda axborot texnologiyalari fanini o‘ qitishda umumiy-sohaviy, autentik, differensial integratsiyalashgan ijodiy bosqichlariga asoslangan integratsiyalashgan metodik model ishlab chiqildi (1-jadval).

1-jadval

Bosqichlar va ularga mos metodlar

Bosqich	Metodik yondashuv	Qo‘ llaniladigan metod
Umumiy-sohaviy	Asosiy bilim va tushunchalar	SMART
Autentik	Hayotiy holatga yaqinlik	Case-study
Differensial	Shaxsiy xususiyatlar asosida	SWOT
Integratsiyalashgan ijodiy	Fanlararo va ijodiy yondashuv	INSERT

Case-study — bu talabalarga real yoki o‘ ylab topilgan hayotiy vaziyatlar asosida tahlil qilish, muammo yechimini topish imkonini beradigan o‘ qitish metodidir.

Case-study metodning maqsadi tanqidiy fikrlashni rivojlantirish, muammoni hal qilish ko‘ nikmasini shakllantirish, qaror qabul qilishni o‘ rgatishdan iborat.

Case-study AKT dan tashqari ijtimoiy fanlar, menejment, huquq, tibbiyot, ta’lim va boshqa sohalarda xam qo‘ llanilishi mumkin. Shuningdek, Case-study talabalar kichik guruhlarda vaziyatni muhokama qiladi va yechimlar ishlab chiqadi.

SMART — bu maqsadlarni aniqlik bilan belgilashga yordam beradigan metod bo‘ lib har bir harf quyidagilarni anglatadi:

S-Specific (Aniq), M-Measurable (O‘ lchanadigan), A-Achievable (Erishiladigan), R-Relevant (Dolzarb), T-Time-bound (Vaqt bilan chegaralangan).

SMART metodining maqsadi maqsadlarni to‘ g‘ ri qo‘ yish va ularga erishish strategiyasini ishlab chiqish hamda loyihalarni samarali rejalashtirishdan iborat.

SMART ta’limda dars maqsadlarini aniqlashtirish, boshqaruv va rejalashtirishda ishlatiladi.

SWOT — bu tashkilot yoki loyiha kuchli va zaif jihatlari, imkoniyatlar va tahdidlarni tahlil qilishga qaratilgan metod.

S – Strengths (Kuchli tomonlar)

W – Weaknesses (Zaif tomonlar)

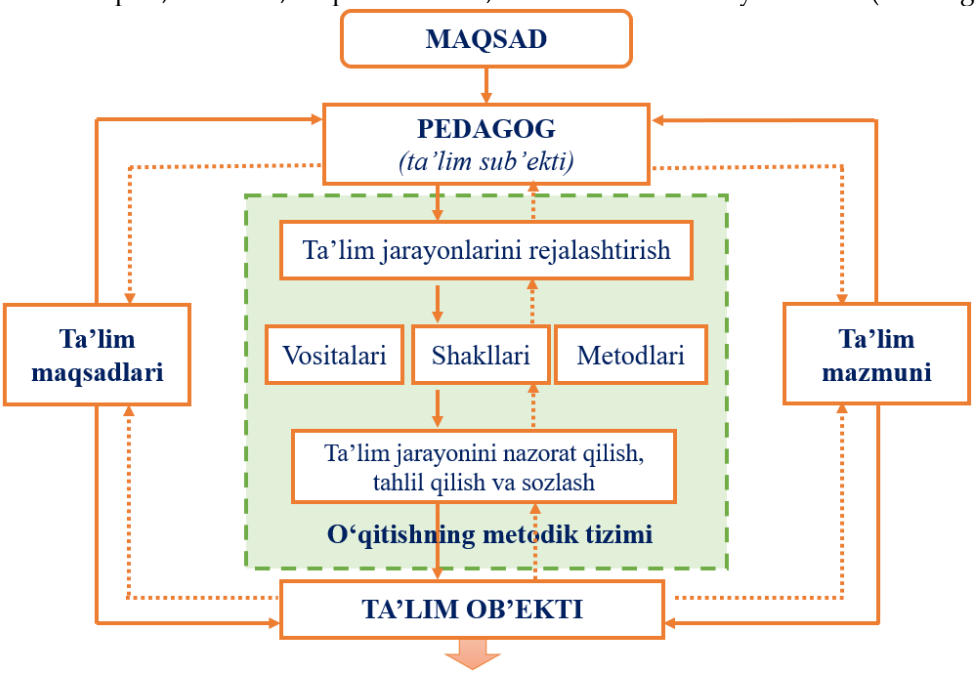
O – Opportunities (Imkoniyatlar)

T – Threats (Tahdidlar)

SWOT metodining maqsadi ichki va tashqi omillarni tahlil qilish hamda qaror qabul qilishda asosli yondashuvni ishlab chiqishdan iborat.

SWOT strategik rejalashtirish, shuningdek, tashkilot, loyiha, yoki shaxsiy rivojlanish bahosida qo‘ llaniladi.

INSERT (Interactive Noting System for Effective Reading and Thinking) – bu o‘ quvchilar matnni o‘ qish jarayonida belgilar qo‘ yish orqali faol fikrlash va tushunishni chuqurlashtiruvchi metod.



INSERT maqsadi: o‘ quvchini matn bilan faol ishlashga jalb qilish, tahliliy fikrlashni rivojlantirish, o‘ qiganini tushunish va eslab qolishni kuchaytirishdan iborat.

INSERT har qanday fan bo‘ yicha matn asosidagi darslarda, o‘ qitish jarayonida individual va guruh bilan ishlashda qo‘ llaniladi.

“Case-study”, “SMART”, “SWOT”, “Insert” metodlari boshlang‘ ich sinf o‘ quvchilarining axborot texnologiyalari bo‘ yicha mustaqil fikrlashini, mantiqiy tahlil qilishini, faol ishtirokini, darsga qiziqishini oshirishga yordam beradi.

“BSAT” fanini o‘ qitishda zamonaviy materiallarni tanlash va ularni ta’lim jarayonlariga joriy etish, o‘ z vaqtida bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarining saviyasi, xususiyatlari, qolaversa ularning tayyorgarlik darajasi, auditoriya imkoniyatlari, pedagogning mahorati, tanlangan mavzuning ahamiyatli jihatlari, zamonaviy o‘ quv-bilish jarayoni vositalari, shakllari va metodlariga uzviy jihatdan bog‘ liqdir.

“BSAT” fanini o‘ qitishning metodik tizimi, xuddi boshqa fanlardagi kabi, ierarxik jihatdan o‘ zaro bog‘ langan besh komponentlardan iborat: maqsad, mazmun, o‘ qitish usullari, vositalari va tashkiliy shakllari (1-rasmga qarang).

1-rasm. Ta’limning metodik tizimi

N.V. Kuzminaning ta’kidlashicha o‘ qitishning metodik tizimi talabalarning ta’lim olish samaradorligini oshirishga qaratilgan ta’lim jarayonlarini rejalashtirish, tashkil etish, monitoringini o‘ tkazish va tahlil qilishga qaratilgan o‘ zaro bog‘ liq usullar, shakllar va vositalarning tartiblangan majmui.

Zamonaviy ta’limning metodik tizimi xususiyatlari quyidagilarda namoyon bo‘ ladi: ta’lim jarayonlarini ilmiy asosda rejalashtirish; nazariy va amaliy mashg‘ ulotlarning birligi va o‘ zaro ta’sirini hisobga olish; yuqori qiyinchilik darajasidagi o‘ quv materiallarni o‘ zlashtirishning yuqori sur’ati; talabalarning maksimal faolligi va etarli darajadagi mustaqilligini ta’minlash; individual va jamoada faoliyat ko‘ rsatishni ko‘ zda tutish; ta’lim jarayonini zamonaviy texnik va dasturiy ta’minot bilan to‘ yintirish; turli mavzularni o‘ rganishga qaratilgan kompleks yondashuv.

O‘ tkazilgan keng qamrovli tahlillar asosida tadqiqotchi tomonidan “BSAT” fanini o‘ qitishning takomillashtirilgan mazmuni ishlab chiqildi. Bunga, ushbu fan umumiy mavzularining hajmi o‘ zgartirilmagan holda va ba’zi mavzularni birlashtirish orqali erishildi (2-jadvalga qarang).

2-jadval

“BSAT” fanining takomillashtirilgan mazmuni jadvali

	1. Axborot texnologiyalarining konseptual asoslari
1	Ta’lim texnologiyasining tuzilishi.
2	Zamonaviy ta’lim texnologiyasining konseptual asoslari. Axborot texnologiyalari haqida tushuncha, ularning tasnifi.
3	Multimedia dasturiy ilovalari bilan ishlash. Ms.PowerPoint, FotoShOUPRO, SmartDraw, onlayn Prezi dasturiy ilovalardan foydalanish.
4	Tarmoq va Internet texnologiyalari: protokollar, web-ishlanmalar va bulutli texnologiyalar.
	2. Boshlang‘ ich ta’lim fanlarini o‘ qitishda axborot texnologiyalaridan foydalanish
5	Axborot texnologiyalarini kasbiy faoliyatda qo‘ llash. Amaliyot holatlari.
6	Boshlang‘ ich sinflarda tayanch fanlarni o‘ qitishda axborot texnologiyalaridan foydalanish metodikasi. Integratsiyalashgan ta’limdan foydalanish. Tayanch fanlarni o‘ qitishda axborot texnologiyalaridan foydalanish. Sinfdan tashqari ishlarni tashkil etish.
7	Boshlang‘ ich sinflarda ona tili va o‘ qish, matematika, texnologiya fanlarni o‘ qitishda axborot texnologiyalaridan foydalanish.

8	Axborot xavsizligi. Kriptografiya asoslari, ma'lumotlarni himoya qilish yo' llari.
9	Kodlashsiz o' yinli dasturiy mahsulotlarni yaratish (Game Maker, Construct 3 misolida). Simulyatorlar bilan ishlash.
10	Raqamli ta'lim resurslarini yaratish (fotosurat, videoparcha, video darslik, statik va dinamik modellar, virtual haqiqat ob'ektlari va interaktiv modellashtirish, grafik va kartografik materiallar, ovoz yozuvlari, audiokitoblar, turli xil ramziy ob'ektlar va grafika).
11	Boshlang' ich sinflarda koordinata burchagini o' rganishda axborot texnologiyalaridan foydalanish. PIRLS, TIMSS, PISA, TALIS xalqaro baholash dasturlarida ishtirok etishga tayyorlashda axborot texnologiyalaridan foydalanish.
	3. Kichik yoshdagi o' quvchilarning axborot kompetentsiyasini shakllantirish
12	Axborot tushunchasini o' rganish usullari, uning turlari, axborotni kodlash
13	Algoritmlash va dasturlash. (Python, Java, C++).
14	Onlayn pedagogik dasturiy vositalardan foydalanish (Google Forms, Canva.com, Mentimeter.com, Quizlet, LearningApps.org, Genial.ly, Liveworksheets.com v.b.). Boshlang' ich sinf o' qituvchilarining faoliyatida ijtimoiy tarmoqlardan foydalanishi.
15	O' qituvchining elektron portfoliosini shakllantirish.

Izoh: yuqoridagi jadvalda keltirilgan to' q qalin shriftdagi mavzular "BSAT" fanining takomillashtirilgan mavzulari hisoblanadi.

Tadqiqotchi tomonidan taklif etilayotgan "BSAT" fanining takomillashtirilgan mazmunini, o' zaro aloqadorlikda o' qitishning grafikli ketma-ketligi quyidagi rasmda keltirilgan (2-rasmga qarang).

Grafda keltirilgan ketma-ketlikka muvofiq, bo' lajak boshlang' ich sinf o' qituvchilarini "BSAT" fanini o' qitishning dastlabki bosqichida, ta'lim texnologiyasining tuzilishi, ularning konseptual asoslari, axborot texnologiyalari va ularning tasnifi bilan tanishtiriladi. So' ngra takomillashtirilgan mavzular asosida fanning dasturiy ta'minotiga tegishli bo' lgan mavzularni o' rgatishda, dastavval multimedia dasturiy ilovalari, tarmoq va Internet texnologiyalari taklif etiladi. Buning sababi, galdagi mavzularni o' rganishda ulardan turli mavzular yuzasidan taqdimot loyiha ishlarini bajarishlari, buning uchun Internet resurslaridan keng foydalanishlari hisobga olindi.

2-rasm. "BSAT" fani mazmunining graf ketma-ketligi

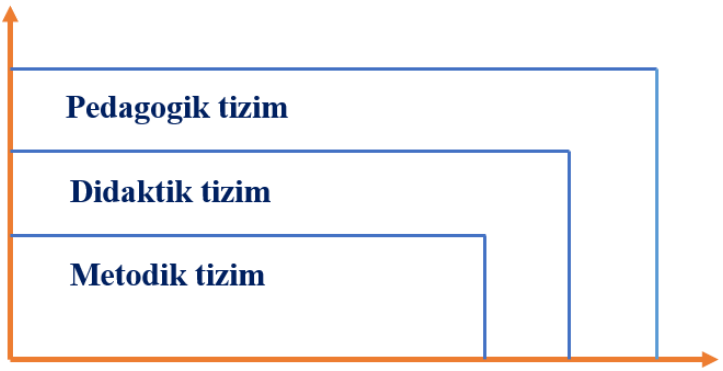
M.N.Mirzaeva raqamlashtirish sharoitida bo' lajak boshlang' ich sinf o' qituvchilari uchun axborot texnologiyalari fanini o' qitish metodikasini takomillashtirishda internet texnologiyalarining o' rni va afzalligini inkor etib bo' lmasligi, Internet ta'lim jarayonining ajralmas qismi sifatida virtual konferensiya, masofaviy o' qitish va hamkorlikda ta'limiy loyihalarni ishlab chiqish uchun asos bo' lishini ta'kidlaydi.

Yuqorida keltirilgan graf ketma-ketlikligi, bo' lajak boshlang' ich sinf o' qituvchilarini tayyorlash bo' yicha o' quv rejaning tarkibiy va mantiqiy-sxemasining mumkin bo' lgan ko' rinishlaridan birini ifodalaydi. Ta'lim dasturini muvaffaqiyatli amalga oshirish, oliy ta'lim muassasasining resurslar salmog' iga ham chambarchas bog' liq.

Taqdim etilgan metodikaning o' ziga xos xususiyati shundaki, bu yerda fanning dasturiy ta'minoti to' g' risidagi umumiy fikrlardan tortib, ularni batafsil o' zlashtirishgacha bo' lgan jarayonlarga, bo' lajak boshlang' ich sinf o' qituvchilarini bosqichma-bosqich jalb etishdan iborat. O' zlashtirilgan bilimlar asosida integratsiyalashgan fanlarni axborot texnologiyalari asosida o' rganish ham ta'minlanadi.

Integratsiyalashgan fanlarni axborot texnologiyalari asosida o‘ rganish, bo‘ lajak boshlang‘ ich sinf o‘ qituvchilaridan quyidagi kasbiy ko‘ nikmalarga ega bo‘ lishlikni ta’minlaydi:

1. axborot texnologiyalari asosida ta’lim jarayonlarini loyihalash va amalga oshirishni tashkil etish;
2. bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarining axborot xavfsizligini ta’minlash chora tadbirlarini ko‘ rish;
3. ta’limning sifat va samaradorligini oshirishda axborot texnologiyalaridan keng foydalanish;
4. axborot texnologiyalaridan foydalangan holda to‘ g‘ ri va teskari aloqalarni tashkil etishni amalga oshirish.



Ushbu ko‘ nikmalar bo‘ lajak boshlang‘ ich sinf o‘ qutuvchilarining kasbiy rivojlanishi va muvaffaqiyatlarga erishishlariga ko‘ maklashuvchi yuqori sifatli, zamonaviy va jozibodor ta’lim muhitini yaratish uchun axborot texnologiyalaridan samarali foydalanish imkonini beradi.

Albatta “BSAT” fanini o‘ qitishni takomillashtirishda pedagogning o‘ rni beqiyosligini ta’kidlab o‘ tish lozim. Ta’lim jarayonlarini sifatli tashkil etish, uning kasbiy mahorati va malakasiga chambarchas bog‘ liq. Zamonaviy pedagogning mahorat modeli, undan fan va amaliyot yutuqlaridan kelib chiqqan holda yangi zamonaviy fazilatlarini namoyon qilishni talab qiladi.

D.G.Levites pedagogning kasbiy kompetentligi uning ajralmas xususiyati sifatida kasbiy muammolarni aniqlash va tushunish, kasbiy faoliyatning real vaziyatlarida yuzaga keladigan kasbiy muammolarni hal qilishga tayyorligi sifatida talqin qilinishi mumkinligini ta’kidlaydi.

“BSAT” fanini o‘ qitish metodikasini takomillashtirish pedagogika, didaktika va metodik tizimning o‘ zaro aloqadorligida amalga oshiriladi va uni quyidagicha tasvirlash mumkin (3-rasmga qarang).

Raqamli platformada “BSAT” fanining takomillashgan dasturiy ta’minoti asosida o‘ quv mashg‘ ulotlarni tashkil etishda, bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarining kasbiy ko‘ nikmalarini guruhli va yakka tartibda, ish shaklining varitativ ta’lim traektoriyasiga, shuningdek, yaratilgan raqamli platformaga adaptiv moslashish ishlari amalga oshirildi.

3-rasm. BSAT fanining aloqadorlik tizimlari

Shuningdek, raqamli platformadan foydalanib ma’ruza mashg‘ ulotini tashkil etishda an’anaviy ma’ruza (axborotli model), ADDIE (tuzilmaviy yondashuv) modeli, interaktiv elementlar bilan ma’ruza (interaktiv model), ma’ruza-munozara (munozara modeli), keys yordamida ma’ruza (keys modeli) hamda Xan modeli (adaptiv model) tanlab olindi hamda ushbu modellarni o‘ zaro birlashtirish orqali foydalanish metodikasi ishlab chiqildi. Ma’ruzalarni olib borish tahlili quyidagi jadvalda keltirilgan (3-jadvalga qarang).

3-jadval

Raqamli platformada “BSAT” fanining ma’ruza mashg‘ ulotlarini olib borish modellari

Ma’ruzani tashkil etish modellari	Tavsifi
An’anaviy ma’ruza (axborotli model)	Murakkab nazariy tushunchalarni hamda katta mavzularni yoritishda foydalanish
ADDIE modeli (tuzilmaviy yondashuv)	O‘ quv dasturlari va materiallarini ishlab chiqish uchun samarali vositadir. Modeldan tizimli yondashuv, yuqori sifatli o‘ qitish talab qilinadigan hollarda foydalaniladi
Interaktiv elementlari bilan ma’ruza (interaktiv model)	O‘ quv materiallarni mustahkamlash, munozarali masalalarni muhokama qilishni rag‘ batlantirish, masalalarni yechish ko‘ nikmalarini rivojlantirish va amaliy mashg‘ ulotlarga tayyorgarlik ko‘ rishda foydalanish

Ma’ruza-munozara (munozara modeli)	Munozarali masalalarni muhokama qilish, talabalar fikrlarini tahlil qilish, tanqidiy fikrlashni rivojlantirishda foydalanish
Keys usuli yordamida ma’ruza (keys modeli)	Talabalarning turli muammolarni hal qilish ko‘ nikmalarini rivojlantirish, nazariy bilimlarni amaliyotda qo‘ llash va kasbiy faoliyatga tayyorlashda
Xan modeli (adaptiv model)	Ta’lim samaradorligini oshirish maqsadida

Bo‘ lajak boshlang‘ ich sinf o‘ qituvchilarining amaliy mashg‘ ulotlarini tashkil etish modelini tanlash, ularning kasbiy ko‘ nikmalarini rivojlantirishda hal qiluvchi ahamiyatga ega. Ma’ruza mashg‘ ulotidan farqli o‘ laroq, bu erda talabalarning aktiv faoliyatiga e’tibor qaratiladi. Raqamli platformadan foydalanib amaliy mashg‘ ulotlarni tashkil etishda muammoli ta’lim (Problem-Based Learning, PBL) modeli, loyihalar tuzishga asoslangan ta’lim (Project-Based Learning) modeli, master-klass modeli, laboratoriya ishi modeli, Ishchan o‘ yinli modellardan amaliy mashg‘ ulot ehtiyojlaridan kelib chiqqan holda foydalanishni maqsad qildik. Modellar asosida amaliy mashg‘ ulotlarni olib borish tahlili quyidagi jadvalda keltirilgan (4-jadvalga qarang).

4-jadval

Raqamli platformada “BSAT” fanining amaliy mashg‘ ulotlarni olib borish modellari

Amaliy mashg‘ ulotni tashkil etish modellari	Tavsifi
Muammoli ta’lim modeli (Problem-Based Learning, PBL)	Murakkab, fanlararo muammolarni hal qilish ko‘ nikmalarini rivojlantirish, nazariy bilimlarni mustahkamlash, loyihalar ustida ishlashga tayyorgarlik ko‘ rishda
Loyihalar tuzishga asoslangan ta’lim modeli (Project-Based Learning)	Kompleks tarzda ko‘ nikmalarni rivojlantirish, ijodkorlikni rag‘ batlantirish, ilmiy tadqiqot faoliyatiga tayyorgarlik ko‘ rishda
Master-klass modeli (Model master class)	Murakkab texnik ko‘ nikmalarni namoyish etish, uskunalarni boshqarishni o‘ rganish, tajribalar almashishda
laboratoriya ishi modeli	Nazariy bilimlarni tasdiqlash, eksperimental tadqiqot usullarini o‘ zlashtirish va texnik uskunalar bilan ishlash yuzasidan amaliy ko‘ nikmalarga ega bo‘ lish maqsadida
Ishchan o‘ yinli model	Qarorlar qabul qilish, jamoada ishlash, muloqot qilish qobiliyatini rivojlantirish, kasbiy faoliyatga tayyorlash maqsadlarida

Faol ta’lim usullari amaliy mashg‘ ulotlarning asosini tashkil etishini nazarda tutdik. Bo‘ lajak boshlang‘ ich sinf o‘ qituvchilari shunchaki tinglash va tomosha qilish emas, balki talim jarayonlarida faol ishtirok etishlari, muammolarni birgalikda hal qilishlari, loyihalar ustida ishlash, tajribalar o‘ tkazish va bir-biri bilan muloqot qilishlari lozim. Pedagog bu yerda ushbu jarayonlarni tashkilotchisi va koordinatori rolida namoyon bo‘ ladi va talabalarning kasbiy ko‘ nikmalarini rivojlantirishga sharoit yaratib beradi.

BO‘ LAJAK BOSHLANG‘ ICH TA’LIM PEDAGOGLARIDA INKLYUZIV KOMPETENSIYANING AKSIOLOGIK-REFLEKSIV MEXANIZMLARI: KASBIY IDENTITET TRANSFORMATSIYASI KONTEKSTIDA

Jumaboyev Nurillo Xayrullo o‘ g‘ li
Toshkent Kimyo xalqaro universiteti Namangan filiali

Annotatsiya: *Maqolada bo‘ lajak boshlang‘ ich ta’lim pedagoglarida inklyuziv kompetensiyaning shakllanishi kasbiy identitet, qadriyatlar tizimi va refleksiv pozitsiyaning transformatsiyasi sifatida tahlil qilinadi. Inklyuzivlikning insonparvarlik, tenglik, subyektlilik va ta’limiy adolat tamoyillari pedagogik faoliyatning aksiologik negizi sifatida asoslanadi. Motivatsion-qadriyatli, kognitiv, operatsion-faoliyatli va refleksiv komponentlarning o‘ zaro birligi yoritilib, “qadriyatni qabul qilish – pedagogik vaziyatni qayta talqin qilish – individuallashtirilgan qaror – refleksiv baholash” sikli taklif etiladi.*

Kalit so‘ zlar: *inklyuziv kompetensiya, aksiologik yondashuv, refleksiya, kasbiy identitet, pedagogik tafakkur*

АКСИОЛОГИЧЕСКИ-РЕФЛЕКСИВНЫЕ МЕХАНИЗМЫ ИНКЛЮЗИВНОЙ КОМПЕТЕНТНОСТИ БУДУЩИХ ПЕДАГОГОВ НАЧАЛЬНОГО ОБРАЗОВАНИЯ: В КОНТЕКСТЕ ТРАНСФОРМАЦИИ ПРОФЕССИОНАЛЬНОЙ ИДЕНТИЧНОСТИ

Аннотация: *В статье формирование инклюзивной компетентности будущих педагогов начального образования рассматривается как трансформация профессиональной идентичности, системы ценностей и рефлексивной позиции. Обосновываются гуманизм, равенство, субъектность и образовательная справедливость как аксиологические основания инклюзивной деятельности. Предлагается цикл «принятие ценности – переосмысление педагогической ситуации – индивидуализированное решение – рефлексивная оценка».*

Ключевые слова: *инклюзивная компетентность, аксиологический подход, рефлексия, профессиональная идентичность, педагогическое мышление*

AXIOLOGICAL-REFLECTIVE MECHANISMS OF INCLUSIVE COMPETENCE IN FUTURE PRIMARY EDUCATION TEACHERS: IN THE CONTEXT OF PROFESSIONAL IDENTITY TRANSFORMATION

Abstract: *The article interprets the formation of inclusive competence in future primary education teachers as a transformation of professional identity, values and reflective positioning. Humanism, equality, subjectivity and educational justice are substantiated as axiological foundations of inclusive practice. A cycle of value acceptance, reinterpretation of the pedagogical situation, individualized decision-making and reflective evaluation is proposed.*

Keywords: *inclusive competence, axiological approach, reflection, professional identity, pedagogical thinking*

Kirish

Zamonaviy inklyuziv ta’lim pedagogdan alohida ta’lim ehtiyojiga ega o‘ quvchini mavjud standartga moslashtirishni emas, balki ta’lim muhitini o‘ quvchilar xilma-xilligiga mos ravishda qayta loyihalashni talab etadi. Shu sababli bo‘ lajak boshlang‘ ich sinf o‘ qituvchisining tayyorgarligini faqat metodik bilimlar hajmi bilan o‘ lchash inklyuziv faoliyatning murakkab tabiatini to‘ liq ochib bermaydi. Pedagogning “kimni o‘ qitaman?”, “farqni qanday talqin qilaman?” va “pedagogik qarorimning axloqiy mas’uliyati nimada?” kabi savollarga bergan javobi uning kasbiy identitetini belgilaydi.

Boshlang‘ ich ta’lim ayniqsa muhim, chunki bolaning maktabga, o‘ ziga va boshqalarga munosabati, ijtimoiy ishtiroki hamda akademik o‘ ziga ishonchi aynan shu bosqichda faol shakllanadi. Demak, inklyuziv kompetensiya pedagogning tashqi texnologik tayyorgarligi bilan bir qatorda ichki qadriyatlar tizimi, empatik sezgirligi, mas’uliyati va refleksiv qobiliyatini ham qamrab oluvchi integrativ kasbiy sifatdir.

Tadqiqotning metodologik asoslari

Inklyuziv kompetensiyani falsafiy-pedagogik jihatdan anglashda insonparvarlik, aksiologik, faoliyatga asoslangan, kompetensiyaviy va refleksiv yondashuvlar o‘ zaro integratsiyada qaraladi. Insonparvarlik paradigmasi har bir bolaning qadr-qimmatini pedagogik munosabatning boshlang‘ ich nuqtasi sifatida belgilasa, aksiologik yondashuv tenglik, hurmat,

hamkorlik va pedagogik mas'uliyatni kasbiy qadriyatlarga aylantiradi. Faoliyatga asoslangan yondashuv esa qadriyatni real pedagogik qarorga ko‘ chirish mexanizmini ochib beradi.

Ainscow inklyuziyani ta'limdagi to‘ siqlarni aniqlash va kamaytirishga yo‘ naltirilgan tizimli o‘ zgarish sifatida ko‘ radi; Booth va Ainscow inklyuziv madaniyat, siyosat va amaliyotning birligini ta'kidlaydi. Florian va Black-Hawkinsning inklyuziv pedagogika konsepsiyasi individual farqlarni "muammo" emas, pedagogik rejalashtirishning tabiiy sharti sifatida talqin etishga undaydi. Mazkur qarashlar bo‘ lajak pedagogning professional dunyoqarashini transformatsiya qilish zaruratini ko‘ rsatadi.

Vigotskiyning rivojlanishning ijtimoiy tabiati haqidagi qarashlari ham inklyuziv pedagogik tafakkur uchun muhim metodologik tayanchdir. Ta'lim oluvchining imkoniyatlarini statik nuqson bilan emas, rivojlanish sharoiti, vositalar va ijtimoiy hamkorlik bilan bog‘ lash pedagogni defitsitar fikrlashdan rivojlantiruvchi fikrlashga olib o‘ tadi.

Inklyuziv kompetensiyaning aksiologik tuzilishi

Inklyuziv kompetensiyaning motivatsion-qadriyatli komponenti pedagogning inklyuziyani tashqi talab sifatida emas, kasbiy faoliyatning ichki me'yori sifatida qabul qilishini anglatadi. Bunda tolerantlik passiv "chidash" emas, balki farqlilikni pedagogik voqelikning tabiiy shakli sifatida tan olishdir. Empatiya esa hissiy hamdardlik bilangina cheklanmay, o‘ quvchining vaziyatini tushunish va unga mos pedagogik sharoit yaratish qobiliyatiga aylanadi.

Pedagogik adolat ham tenglik bilan aynan bir tushuncha emas. Barcha o‘ quvchiga bir xil topshiriq berish formal tenglikni ifodalashi mumkin, ammo inklyuziv adolat o‘ quvchining ehtiyoji, imkoniyati va ta'limiy to‘ siqlarini hisobga olgan holda turlicha vosita va qo‘ llab-quvvatlashni taqdim etishni talab qiladi. Shu ma'noda inklyuziv pedagogika "bir xil munosabat"dan "adolatli imkoniyat"ga o‘ tishni nazarda tutadi.

Kasbiy identitet transformatsiyasi

Bo‘ lajak o‘ qituvchi an'anaviy tayyorgarlikda o‘ zini ko‘ pincha bilimni yetkazuvchi va sinfni boshqaruvchi subyekt sifatida tasavvur qiladi. Inklyuziv paradigma esa uning rolini kengaytirib, pedagogni ta'limiy to‘ siqlarni aniqlovchi, individual rivojlanish trayektoriyasini loyihalovchi, ota-ona va mutaxassislar bilan hamkorlik qiluvchi hamda o‘ z qarorlarini muntazam tahlil qiluvchi mediator sifatida shakllantiradi.

Kasbiy identitet transformatsiyasining birinchi bosqichi – farqlilikni qabul qilish; ikkinchisi – pedagogik muammoni o‘ quvchining "kamchiligi"dan emas, muhit va metodning mos kelmasligidan izlash; uchinchisi – individuallashtirilgan pedagogik qaror ishlab chiqish; to‘ rtinchisi – qarorning oqibatlarini refleksiv tahlil qilishdir. Ushbu sikl takrorlangan sari inklyuziv yondashuv epizodik metod emas, pedagogning barqaror kasbiy pozitsiyasiga aylanadi.

Inklyuziv kasbiy tafakkur transformatsiyasining konseptual sikli

Refleksiya – inklyuziv kompetensiyaning metamexanizmi

Refleksiya pedagogning bilim va harakatlarini bog‘ lovchi metamexanizm sifatida namoyon bo‘ ladi. Refleksiyasiz metodika algoritmga, qadriyat esa deklaratsiyaga aylanib qolishi mumkin. Refleksiv pedagog o‘ z qarorining o‘ quvchi ishtiroki, psixologik xavfsizlik, kommunikativ faollik va akademik natijaga ta'sirini tahlil qiladi. Shu orqali u "to‘ g‘ ri metod"ni qidirishdan "muayyan vaziyat uchun asoslangan qaror" ishlab chiqishga o‘ tadi.

Elektron portfolio, refleksiv kundalik, keysdan keyingi o‘ z-o‘ zini baholash va pedagogik superviziya bo‘ lajak o‘ qituvchining refleksiv tajribasini tizimlashtirishga xizmat qiladi. Bunday vositalar raqamli muhitda talabaning qarorlar tarixini ko‘ rish, xatolarni qayta tahlil qilish va kasbiy o‘ sish dinamikasini kuzatish imkonini beradi.

Muhokama

Taklif etilgan yondashuv inklyuziv kompetensiyani alohida bilimlar yig‘ indisi sifatida emas, pedagog shaxsining qadriyat, bilim, faoliyat va refleksiya birliklarida qayta tashkil topishi sifatida ko‘ rishga imkon beradi. Bunda raqamli vositalar maqsad emas, transformatsiyani qo‘ llab-quvvatlovchi didaktik muhit vazifasini bajaradi. Shuning uchun kross-platforma texnologiyasining pedagogik qiymati uning texnik universalligida emas, balki talabaning tanlov, tahlil, hamkorlik va refleksiya faoliyatini izchil tashkil eta olishida namoyon bo‘ ladi.

Bu nuqtai nazar bo‘ lajak boshlang‘ ich ta'lim pedagoglarini tayyorlashda "inklyuziya haqida bilim berish" modelidan "inklyuziv qaror qabul qila oladigan pedagogni shakllantirish" modeliga o‘ tishni talab qiladi.

Xulosa

Inklyuziv kompetensiyaning barqaror rivojlanishi pedagogning kasbiy identiteti va qadriyatlar tizimidagi o‘ zgarish bilan uzviy bog‘ liq. Motivatsion-qadriyatli, kognitiv, operatsion-faoliyatli va refleksiv komponentlarning integratsiyasi pedagogni individual farqlarni tan oluvchi, ta'limiy to‘ siqlarni tahlil qiluvchi va moslashuvchan qaror qabul qiluvchi professional subyektga aylantiradi.

Taklif etilgan aksiologik-refleksiv sikl bo‘ lajak boshlang‘ ich ta'lim pedagoglarini tayyorlash dasturlarida keys, elektron portfolio, refleksiv kundalik va superviziya bilan uyg‘ un qo‘ llanganda inklyuziv kasbiy tafakkurni tizimli rivojlantirish uchun metodologik asos bo‘ lib xizmat qilishi mumkin.

University of Business and Science magistranti
isroilovanigoraxon78@gmail.com

Annotatsiya: *Ushbu maqolada zamonaviy ta'lim jarayonida interfaol metodlardan foydalanishning pedagogik imkoniyatlari, ularning o‘ quvchilarning faolligi, mustaqil fikrlashi, ijodiy yondashuvi va hamkorlik ko‘ nikmalarini rivojlantirishdagi o‘ rni tahlil qilinadi. Interfaol metodlarni ta'lim jarayoniga joriy etishning tashkiliy-pedagogik, metodik, texnologik va psixologik jihatlari yoritiladi. Tadqiqotda pedagogik kuzatuv, suhbat, ilmiy-metodik adabiyotlarni o‘ rganish, qiyosiy tahlil va umumlashtirish usullaridan foydalaniladi. Zamonaviy ta'limda "aqliy hujum", "klaster", "BBB", "INSERT", "Jigsaw", "Case-study", "Fishbone", rolli o‘ yinlar va loyiha metodlaridan foydalanish imkoniyatlari ko‘ rib chiqiladi. Ilmiy tadqiqotlar faol va hamkorlikka asoslangan ta'lim yondashuvlari o‘ quvchilarning bilimlarni o‘ zlashtirishi va yuqori darajadagi fikrlash ko‘ nikmalarini rivojlantirishiga ijobiy ta'sir ko‘ rsatishini ko‘ rsatadi. Maqolada interfaol metodlarni mexanik qo‘ llash emas, balki ularni aniq pedagogik maqsad, o‘ quv faoliyati, baholash mezonlari va kutilayotgan natijalar bilan bog‘ lash samarali ta'limning muhim sharti sifatida asoslanadi.*

Kalit so‘ zlar: *zamonaviy ta'lim, interfaol metodlar, pedagogik texnologiya, ta'lim jarayoni, o‘ quvchi faolligi, hamkorlikda o‘ qitish, tanqidiy fikrlash, innovatsion ta'lim, raqamli texnologiyalar, faol ta'lim.*

ТЕХНОЛОГИИ ИСПОЛЬЗОВАНИЯ ИНТЕРАКТИВНЫХ МЕТОДОВ В СОВРЕМЕННОМ ОБРАЗОВАТЕЛЬНОМ ПРОЦЕССЕ

Аннотация: *В данной статье анализируются педагогические возможности использования интерактивных методов в современном образовательном процессе, их роль в развитии активности учащихся, самостоятельного мышления, творческого подхода и навыков сотрудничества. Освещаются организационно-педагогические, методические, технологические и психологические аспекты внедрения интерактивных методов в образовательный процесс. В исследовании используются методы педагогического наблюдения, беседы, изучения научно-методической литературы, сравнительного анализа и обобщения. Рассматриваются возможности применения в современном образовании таких методов, как «мозговой штурм», «кластер», «BBB», «INSERT», «Jigsaw», «Case-study», «Fishbone», ролевые игры и метод проектов. Научные исследования показывают, что активные и основанные на сотрудничестве образовательные подходы оказывают положительное влияние на усвоение знаний учащимися и развитие навыков мышления высокого уровня. В статье обосновывается, что важным условием эффективного обучения является не механическое применение интерактивных методов, а их связь с конкретной педагогической целью, учебной деятельностью, критериями оценивания и ожидаемыми результатами.*

Ключевые слова: *современное образование, интерактивные методы, педагогическая технология, образовательный процесс, активность учащихся, обучение в сотрудничестве, критическое мышление, инновационное образование, цифровые технологии, активное обучение.*

TECHNOLOGIES OF USING INTERACTIVE METHODS IN THE MODERN EDUCATIONAL PROCESS

Abstract: *This article analyzes the pedagogical potential of using interactive methods in the modern educational process, as well as their role in developing students' activity, independent thinking, creative approach, and collaboration skills. The organizational-pedagogical, methodological, technological, and psychological aspects of introducing interactive methods into the educational process are highlighted. The study employs the methods of pedagogical observation, conversation, review of scientific and methodological literature, comparative analysis, and generalization. The possibilities of applying such methods as "brainstorming," "cluster," "BBB," "INSERT," "Jigsaw," "Case-study," "Fishbone," role-playing games, and the project method in modern education are examined.*

Scientific research shows that active and collaboration-based educational approaches have a positive impact on students' knowledge acquisition and the development of higher-order thinking skills. The article substantiates that an important condition for effective teaching is not the mechanical application of interactive methods, but rather their connection with a specific pedagogical goal, learning activity, assessment criteria, and expected outcomes.

Keywords: *modern education, interactive methods, pedagogical technology, educational process, student activity, collaborative learning, critical thinking, innovative education, digital technologies, active learning.*

Kirish

Zamonaviy ta'lim tizimida o' quvchiga tayyor bilimlarni yetkazish bilan bir qatorda, uning mustaqil fikrlashi, muammoni tahlil qilishi, qaror qabul qilishi va o' z bilimini amaliy vaziyatlarda qo' llay olishini ta'minlash muhim pedagogik vazifalardan biri hisoblanadi. Shu nuqtai nazardan ta'lim jarayonida o' qituvchi va o' quvchi o' rtasidagi an'anaviy munosabatlarni takomillashtirish, o' quvchini ta'lim jarayonining faol ishtirokchisiga aylantirish zarurati ortib bormoqda [1].

Faol ta'limga oid tadqiqotlarda o' quvchini bevosita o' quv faoliyatiga jalb qilish, muhokama, hamkorlik, muammoli vaziyatlarni yechish va mustaqil fikrlashga asoslangan metodlar an'anaviy faqat ma'ruza shaklidagi yondashuvlarga nisbatan bir qator afzalliklarga ega ekanligi qayd etiladi [1]. Prince faol ta'lim, hamkorlikda o' qitish va muammoli ta'limning asosiy elementlarini ilmiy tadqiqotlar asosida tahlil qilib, ularning ta'lim samaradorligiga ta'siri bo' yicha keng, biroq bir xil bo' lmagan dalillar mavjudligini ko' rsatgan.

Interfaol ta'lim metodlari o' quvchilarning darsdagi faolligini oshirish, jamoada ishlash, o' z fikrini asoslash, boshqalarning fikrini tinglash va muammoli vaziyatlarga yechim topish ko' nikmalarini rivojlantirishga xizmat qiladi. Bunday yondashuvda o' qituvchi faqat bilim beruvchi emas, balki o' quv faoliyatini tashkil etuvchi, yo' naltiruvchi va rag' batlantiruvchi pedagog sifatida namoyon bo' ladi [2].

Freeman va hammualliflarning 225 ta tadqiqotni qamrab olgan meta-tahlili faol ta'lim qo' llanilgan sharoitlarda talabalar imtihon natijalari yaxshilanganini va an'anaviy ma'ruza asosidagi ta'limda muvaffaqiyatsizlik xavfi yuqoriroq bo' lganini ko' rsatgan [2].

Zamonaviy ta'lim jarayonida raqamli vositalarning kengayishi ham interfaol metodlarning imkoniyatlarini oshirmoqda. Elektron taqdimotlar, onlayn testlar, virtual doskalar, ta'lim platformalari va multimedia vositalari interfaol topshiriqlarni tashkil etishning yangi shakllarini yaratmoqda. Biroq texnologiyaning mavjudligi o' z-o' zidan ta'lim sifatining oshishini kafolatlamaydi. Muhim jihat - texnologiyani aniq pedagogik maqsadga muvofiq qo' llashdir.

Mazkur maqolaning asosiy maqsadi zamonaviy ta'lim jarayonida interfaol metodlardan foydalanishning samarali texnologiyalarini tizimlashtirish, ularning pedagogik imkoniyatlarini aniqlash va ta'lim amaliyotida qo' llash bo' yicha amaliy tavsiyalar ishlab chiqishdan iborat.

Adabiyotlar tahlili va tadqiqot metodologiyasi

Ta'lim metodlari bo' yicha ilmiy adabiyotlarda o' quvchining faol ishtiroki, hamkorlikda o' qitish, muammoli ta'lim va kompetensiyaviy yondashuv zamonaviy pedagogikaning muhim yo' nalishlari sifatida qaraladi. Interfaol ta'lim metodlarining asosiy xususiyati o' quvchini passiv tinglovchidan faol ta'lim subyektiga aylantirish bilan belgilanadi [1; 3].

Prince tomonidan olib borilgan ilmiy tahlilda faol ta'limning turli shakllari, jumladan, hamkorlikda va muammoli ta'limning asosiy elementlari hamda ularning samaradorligi bo' yicha mavjud tadqiqotlar ko' rib chiqilgan [3]. Mazkur tadqiqot interfaol va faol metodlarni ilmiy asosda tanlash zarurligini ko' rsatadi.

Muammoli ta'limga bag' ishlangan tadqiqotlarda esa o' quvchilar murakkab muammoni hal qilish jarayonida nafaqat fan mazmunini, balki fikrlash va muammoni yechish strategiyalarini ham egallashi mumkinligi qayd etiladi [4]. Hmelo-Silver muammoli ta'limni o' quvchilar hamkorlikda murakkab muammoni tahlil qiladigan va uni hal qilish uchun zarur bilimlarni mustaqil aniqlaydigan ta'lim yondashuvi sifatida tavsiflaydi.

Prince va Felder tomonidan olib borilgan tadqiqotda induktiv ta'lim metodlari, jumladan, inquiry learning, problem-based learning, project-based learning, case-based teaching va discovery learning kabi yondashuvlar tahlil qilingan. Mualliflar bunday yondashuvlar turli o' quv natijalariga erishishda an'anaviy deduktiv yondashuvlarga teng yoki ayrim hollarda samaraliroq bo' lishi mumkinligini ko' rsatgan [5].

Tadqiqot metodologiyasi muammoni tizimli tahlil qilishga yo' naltirilgan. Tadqiqotda ilmiy-metodik adabiyotlarni tahlil qilish, pedagogik kuzatuv, suhbat, qiyosiy tahlil va umumlashtirish usullaridan foydalaniladi. Interfaol metodlarning imkoniyatlari ta'lim maqsadi, o' quvchilarning faolligi, hamkorlik darajasi va kutilayotgan o' quv natijalari bilan bog' liq holda ko' rib chiqiladi.

Tadqiqotda interfaol metodlarni tanlashda quyidagi mezonlarga e'tibor qaratiladi: metodning dars maqsadiga mosligi, o' quvchilarning yosh va individual xususiyatlariga muvofiqligi, fan mazmuniga mosligi, vaqt va resurslardan oqilona foydalanish imkoniyati hamda natijalarni baholashning aniqligi.

Natijalar va muhokamalar

Tahlil natijalari interfaol metodlardan foydalanish ta’lim jarayonini bir necha o‘ zaro bog‘ liq yo‘ nalishda takomillashtirish imkonini berishini ko‘ rsatadi.

O‘ quvchi faolligini oshirish

Birinchi yo‘ nalish - o‘ quvchi faolligini oshirish. An’anaviy darsda o‘ quvchi ko‘ pincha tayyor ma’lumotni tinglovchi sifatida qabul qiladi. Interfaol metodlarda esa u savol beradi, fikr bildiradi, muammoni tahlil qiladi, guruh bilan muhokama qiladi va o‘ z xulosasini shakllantiradi.

“Aqliy hujum” metodi qisqa vaqt ichida o‘ quvchilarning mavzu bo‘ yicha mavjud bilimlarini aniqlash va yangi g‘ oyalarni shakllantirish imkonini beradi. Bunday faol ishtirok o‘ quvchini bilimni tayyor shaklda qabul qilishdan ko‘ ra uni muhokama va faoliyat orqali o‘ zlashtirishga yo‘ naltiradi [1; 3].

Faol ta’limning samaradorligi bo‘ yicha meta-tahlil natijalari ham faol ishtirokni kuchaytiruvchi pedagogik yondashuvlarning o‘ quv natijalariga ijobiy ta’sir ko‘ rsatishini ko‘ rsatadi [2].

Hamkorlikda o‘ qitish

Ikkinchi yo‘ nalish - hamkorlikda o‘ qitish. “Jigsaw”, kichik guruhlarda ishlash, juftliklarda topshiriq bajarish kabi metodlar o‘ quvchilarni birgalikda bilim olishga undaydi. Bunda har bir o‘ quvchining guruhdagi vazifasi va mas’uliyati aniq belgilanadi.

Hamkorlikka asoslangan ta’limda o‘ quvchilar o‘ z fikrlarini izohlash, boshqa ishtirokchilarning qarashlarini tinglash va umumiy xulosaga kelish jarayonida faol ishtirok etadi. Shu sababli interfaol metodlarning qiymati faqat bilimni o‘ zlashtirish bilan chegaralanmay, ijtimoiy va kommunikativ ko‘ nikmalarning rivojlanishida ham namoyon bo‘ ladi [1; 3].

Tanqidiy va ijodiy fikrlashni rivojlantirish

Uchinchi yo‘ nalish - tanqidiy va ijodiy fikrlashni rivojlantirish. “Case-study”, “Fishbone”, muammoli savollar va munozara metodlari o‘ quvchilarni tayyor javobni qabul qilishdan ko‘ ra muammoning sabablarini aniqlash, dalillarni taqqoslash va mustaqil xulosa chiqarishga yo‘ naltiradi [4].

Muammoli ta’lim bo‘ yicha Hmelo-Silver tadqiqotida o‘ quvchilar muammoni hal qilish jarayonida fan mazmuni bilan birga fikrlash strategiyalarini ham o‘ zlashtirishi mumkinligi asoslangan [4].

“Fishbone” metodida muammo markaziy masala sifatida belgilanadi, uning asosiy va ikkilamchi sabablari tahlil qilinadi hamda muammoni bartaraf etish yo‘ llari ishlab chiqiladi. Bunday metod muammoli vaziyatlarni sabab-oqibat bog‘ lanishida ko‘ rib chiqish imkonini beradi.

Bilimlarni amaliyot bilan bog‘ lash

To‘ rtinchi yo‘ nalish - bilimlarni amaliyot bilan bog‘ lash. Loyiha metodi, case-study va rolli o‘ yinlar o‘ quvchiga nazariy bilimlarni real yoki realga yaqin vaziyatlarda qo‘ llash imkonini beradi.

Induktiv ta’lim metodlari bo‘ yicha tadqiqotlarda case-based teaching, project-based learning va problem-based learning kabi metodlarning o‘ quvchini muayyan vaziyat, muammo yoki loyiha orqali bilim olishga jalb etishi ko‘ rsatiladi [5].

Bunda o‘ quvchi ma’lumotni faqat yodlashdan tashqari, undan amaliy vazifani hal qilishda foydalanadi. Natijada nazariy bilim bilan amaliy faoliyat o‘ rtasidagi bog‘ liqlik kuchayadi.

Raqamli texnologiyalar bilan uyg‘ unlashtirish

Beshinchi yo‘ nalish - ta’lim jarayonida raqamli texnologiyalardan foydalanish. Interfaol metodlarni raqamli vositalar bilan uyg‘ unlashtirish darsni yanada dinamik tashkil etish imkonini beradi.

Elektron testlar, interaktiv taqdimotlar, onlayn munozaralar, virtual doskalar va multimedia materiallari o‘ quvchilarning darsdagi faoliyatini tashkil etish uchun qo‘ shimcha imkoniyat yaratadi.

Biroq raqamli vositalardan foydalanishda muhim muammo - texnologiyaning maqsadga aylanishidir. Agar elektron vosita faqat an’anaviy topshiriqni boshqa shaklda taqdim etsa, uning pedagogik samarasi cheklanishi mumkin. Shuning uchun “texnologiya → topshiriq → faoliyat → natija” zanjiri asosida darsni loyihalash maqsadga muvofiq.

Interfaol metodlarni maqsadga muvofiq tanlash

Interfaol metodlarning samaradorligi ularni darsning barcha bosqichlarida bir xil qo‘ llash bilan emas, balki muayyan pedagogik vazifaga mos tanlash bilan belgilanadi [3; 5].

Masalan, dars boshida “Aqliy hujum” va “Klaster” o‘ quvchilarning avvalgi bilimlarini faollashtirish uchun, yangi mavzuni o‘ zlashtirish jarayonida “Jigsaw” yoki guruhli ish, mustahkamlash bosqichida “Case-study”, yakuniy bosqichda esa “BBB” yoki refleksiya usullaridan foydalanish mumkin.

Shunday qilib, metod tanlashda “qaysi metod zamonaviy?” degan savoldan ko‘ ra “ushbu metod mazkur ta’lim maqsadiga qanday xizmat qiladi?” degan savol ustuvor bo‘ lishi lozim.

Interfaol metodlardan foydalanish texnologiyasining amaliy modeli

Zamonaviy darsni loyihalashda interfaol metodlardan foydalanishni uch bosqichga ajratish mumkin.

Birinchi bosqich - tayyorgarlik bosqichi. O‘ qituvchi dars maqsadini, kutilayotgan natijalarni va o‘ quvchilar faoliyatini belgilaydi. Shu asosda metod tanlanadi, guruhlar shakllantiriladi va topshiriqlar ishlab chiqiladi.

Ikkinchi bosqich - interfaol faoliyat bosqichi. O‘ quvchilar individual, juftlik yoki guruh shaklida topshiriqlarni bajaradilar. O‘ qituvchi jarayonni nazorat qiladi, zarur hollarda yo‘ naltiruvchi savollar beradi va o‘ quvchilar faoliyatini muvofiqlashtiradi.

Uchinchi bosqich - tahlil va refleksiya bosqichi. Guruhlar natijalarini taqdim etadi, o‘ quvchilar o‘ z faoliyatini baholaydi va o‘ qituvchi umumiy xulosani shakllantiradi.

Mazkur model muammoli va induktiv ta’lim yondashuvlaridagi “muammo yoki vaziyat → faol izlanish → hamkorlik → yechim → refleksiya” ketma-ketligi bilan uyg‘ unlashadi [4; 5].

Interfaol mashg‘ ulotdan so‘ ng “Nimani bildim?”, “Nimani o‘ rgandim?”, “Qaysi masala qiyin bo‘ ldi?”, “O‘ z bilimimni qayerda qo‘ llay olaman?” kabi refleksiv savollardan foydalanish o‘ quvchining o‘ z ta’lim faoliyatini anglashiga yordam beradi.

Taklif va tavsiyalar

1. Har bir dars uchun interfaol metodni tanlashdan avval uning pedagogik maqsadini aniq belgilash.
2. Interfaol metodlarni o‘ quvchilarning yoshi, tayyorgarlik darajasi va individual xususiyatlariga moslashtirish.
3. Guruhli ishlarda har bir o‘ quvchining vazifasi va mas’uliyatini aniq belgilash.
4. “Aqliy hujum”, “Klaster”, “BBB”, “INSERT”, “Jigsaw”, “Case-study”, “Fishbone” va loyiha metodlaridan fan mazmuniga mos ravishda foydalanish.
5. Muammoli, loyiha va case-study metodlaridan foydalanishda o‘ quvchilarga faqat tayyor savol emas, balki mustaqil izlanishni talab qiluvchi vazifalar berish [4; 5].
6. Interfaol metodlarni raqamli ta’lim vositalari bilan uyg‘ unlashtirish, biroq texnologiyani pedagogik maqsadning o‘ rniga qo‘ ymaslik.
7. Interfaol darslarda faqat yakuniy natijani emas, balki o‘ quvchining jarayondagi faolligi, hamkorligi, mustaqil fikrlashi va dalillash qobiliyatini ham baholash.
8. Har bir interfaol mashg‘ ulotdan so‘ ng refleksiya tashkil etish va olingan natijalardan keyingi darslarni rejalashtirishda foydalanish.
9. Interfaol metodlarni keng miqyosda joriy etishdan oldin ularni alohida mavzu, sinf yoki fan doirasida sinab ko‘ rish, natijalarni tahlil qilish va aniqlangan kamchiliklarni bartaraf etish.

Xulosa

Tahlil shuni ko‘ rsatadiki, zamonaviy ta’lim jarayonida interfaol metodlardan foydalanish o‘ quvchini ta’lim jarayonining faol subyektiga aylantirish, uning mustaqil va tanqidiy fikrlashini rivojlantirish hamda nazariy bilimlarni amaliy faoliyat bilan bog‘ lash uchun muhim imkoniyat yaratadi.

Ilmiy tadqiqotlar faol ta’lim, hamkorlikda o‘ qitish va muammoli ta’limning turli shakllari o‘ quvchilarning faol ishtirokini kuchaytirishi va ayrim o‘ quv natijalarini yaxshilashi mumkinligini ko‘ rsatadi [1; 2; 3]. Freeman va hammualliflarning meta-tahlilida faol ta’limning an’anaviy ma’ruza shakliga nisbatan o‘ quv natijalariga ijobiy ta’siri empirik ma’lumotlar asosida ko‘ rsatilgan [2].

Shu bilan birga, interfaol metodlardan foydalanishning o‘ zi ta’lim sifatini avtomatik ravishda oshirmaydi. Metodning samaradorligi uning ta’lim maqsadiga mosligi, o‘ quvchi faoliyatini to‘ g‘ ri tashkil etish, o‘ qituvchining yo‘ naltiruvchi roli va baholash mexanizmining aniqligi bilan bog‘ liq [1; 3].

Muammoli va induktiv ta’lim bo‘ yicha tadqiqotlar o‘ quvchilarning murakkab vaziyatlarni tahlil qilishi, muammoni hal qilishi va bilimlarni amaliy vaziyatlarda qo‘ llashi uchun faol pedagogik yondashuvlarning muhimligini ko‘ rsatadi [4; 5].

Shu sababli zamonaviy darsni tashkil etishda asosiy e’tibor metodlar sonini ko‘ paytirishga emas, balki maqsad → metod → faoliyat → baholash → refleksiya o‘ rtasidagi uzviy bog‘ liqlikni ta’minlashga qaratilishi lozim.

Interfaol ta’limning yakuniy mezoni darsda qancha metod ishlatilgani emas, balki o‘ quvchining “nimani o‘ rgandim, qanday o‘ rgandim va olgan bilimimni qayerda qo‘ llay olaman?” degan savollarga aniq javob bera olishidir.

STEAM – TA'LIM TEXNOLOGIYASI ASOSIDA BOSHLANG' ICH SINF O' QUVCHILARINI FAZOVIY TASAVVURLARINI RIVOJLANTIRISHNING AMALIYOTDAGI HOLATI TAHLILI

So' fiboyeva Gulchehra Mamurjonovna
University of Business and Sciense nodavlat oliy ta'lim muassasasi o' qituvchisi
gulchexra.sofiboyeva@mail.ru

Annotatsiya: *Ushbu maqolada STEAM ta'lim texnologiyasi asosida boshlang' ich sinf o' quvchilarining fazoviy tasavvurlarini rivojlantirishning amaliyotdagi holati tahlil qilinadi. Boshlang' ich ta'lim jarayonida o' quvchilarning fazoviy tafakkuri, obyektlarning shakli, o' lchami, joylashuvi va o' zaro munosabatlarini anglash ko' nikmalarini shakllantirishda STEAM yondashuvining imkoniyatlari yoritilgan.*

Kalit so' zlar: *STEAM ta'lim, boshlang' ich ta'lim, fazoviy tasavvur, fazoviy tafakkur, geometrik shakllar, modellashtirish, konstruksiyalash, fanlararo integratsiya, amaliy faoliyat, ijodiy topshiriqlar.*

АНАЛИЗ СОВРЕМЕННОГО СОСТОЯНИЯ РАЗВИТИЯ ПРОСТРАНСТВЕННЫХ ПРЕДСТАВЛЕНИЙ УЧАЩИХСЯ НАЧАЛЬНЫХ КЛАССОВ НА ОСНОВЕ ОБРАЗОВАТЕЛЬНОЙ ТЕХНОЛОГИИ STEAM

Аннотация: *В данной статье анализируется практическое состояние развития пространственных представлений учащихся начальных классов на основе образовательной технологии STEAM. Освещаются возможности STEAM-подхода в процессе начального образования для формирования у учащихся пространственного мышления, а также навыков понимания формы, размера, расположения объектов и взаимосвязей между ними.*

Ключевые слова: *STEAM-образование, начальное образование, пространственные представления, пространственное мышление, геометрические фигуры, моделирование, конструирование, междисциплинарная интеграция, практическая деятельность, творческие задания.*

ANALYSIS OF THE CURRENT STATE OF DEVELOPING PRIMARY SCHOOL STUDENTS' SPATIAL REPRESENTATIONS THROUGH STEAM-BASED EDUCATIONAL TECHNOLOGY

Abstract: *This article analyzes the current state of developing primary school students' spatial representations through STEAM-based educational technology. It highlights the potential of the STEAM approach in the primary education process for developing students' spatial thinking and their ability to understand the shape, size, position, and spatial relationships of objects.*

Keywords: *STEAM education, primary education, spatial representations, spatial thinking, geometric shapes, modeling, construction, interdisciplinary integration, practical activities, creative tasks.*

Kirish

Bugungi kunda ta'lim tizimida o' quvchilarning nafaqat nazariy bilimlarini, balki amaliy, ijodiy va muammoli vaziyatlarda qaror qabul qilish ko' nikmalarini rivojlantirish muhim pedagogik vazifalardan biri hisoblanadi. Ayniqsa, boshlang' ich ta'lim bosqichida o' quvchilarning atrof-muhitni anglash, predmetlarning o' zaro joylashuvini tasavvur qilish, shakl va hajmni farqlash hamda turli obyektlarni modellashtirish qobiliyatlarini shakllantirish keyingi ta'lim bosqichlari uchun muhim asos yaratadi.

Ta'lim-tarbiya tizimini tubdan o' zgartirish, barkamol insonni shakllantirish ertangi taqdirimizni belgilab beruvchi dolzarb masalalardan biriga aylandi. Buyuk islohotlar amalga oshirilayotgan O' zbekiston sharoitida mustaqil fikrlovchi yoshlarning bo' lishi davr taqozosidir, chunki shaxsiy dunyoqarashga ega bo' lgan insonlargina jamiyat taraqqiyotini ta'minlovchi muvaffaqiyatlarga erishishga qodir bo' ladilar. Respublikada olib borilayotgan siyosatning bosh omillaridan biri ham teran fikrlovchi, mustaqil dunyoqarashga ega, tasavvuri keng, iqtidorli shaxslarni kamol toptirish va tarbiyalashdir.

O' zbekistonda xorijiy tajribadan foydalanilgan holda Milliy o' quv dasturi ishlab chiqildi. Milliy o' quv dasturi haqida O' zbekiston Respublikasi Prezidentining 06.11.2020 yildagi "O' zbekistonning yangi taraqqiyot davrida ta'lim-tarbiya va ilm-fan sohalarini rivojlantirish chora-tadbirlari to' g' risidagi" PF–6108-sonli farmonida uning ishlab chiqilishi

va uni amalga oshirish to‘ g‘ risida so‘ z boradi [1]. Milliy o‘ quv dasturi amaliyotga joriy qilingungacha fan mashg‘ ulotlarida STEAM topshiriqlari asosida o‘ qitish yo‘ lga qo‘ yilmagan. 2021-2022-o‘ quv yillarida esa ayrim fan kesimlari doirasida STEAM topshiriqlari dastur rejasiga kiritildi. Endi o‘ quvchi fanni o‘ zlashtirishi uchun o‘ sha fanning mazmun-mohiyatini tushunibgina qolmay boshqa fanlar bilan bog‘ langan holda hayotiy voqeliklarga asoslangan, kichik bir lohiya ishi ustida ishni tashkillashtirish, o‘ quvchilarni qiziqqan mashg‘ ulotlari orqali fanga qiziqtirish mumkin. Yangi darslik uchun tanlangan mavzular o‘ quvchining ijtimoiy hayotga moslasha olishida ko‘ maklashadigan, mantiqiy, ham informativ, tasavvurlarni rivojlantirishga boy mavzulardan iborat.

Adabiyotlar tahlili

Yangi avlod darsliklarida o‘ quvchilarni tasavvurni, kreativ va tanqidiy fikrlash qobiliyatlarini rivojlantirish uchun har bir mavzuga alohida topshiriqlar ishlab chiqilgan. Shu paytgacha tabiiy fanlar, matematika fanlarini o‘ qitishdan maqsad mavzuga oid qoidalarni yod oldirish edi. Yangi darslikda eng muhim qoidalargina qoldirilgan. “Rang-barang tasvirlar va qiziqarli topshiriqlarga ko‘ proq urg‘ u berilgan. Ahamiyatli tomoni endi o‘ qituvchilar uchun “O‘ qituvchi kitobi”, o‘ quvchilar uchun esa “Mashq daftari” ham bo‘ ladi. Eski darsliklar til strukturasini o‘ rgatishga qaratilgan” [2]. Respublika ta’lim markazi bahoga jazo yoki rag‘ bat quroli emas, rivojlantirish vositasi sifatida qarash kerakligini qayd etdi. Bolalarni baho bilan qo‘ rqitishni bas qilish, ularga imkon qadar past baho qo‘ ymaslik, toki topshiriqni yaxshi bahoga bajarib kelmaguncha baholamay turish tavsiya qilindi. Ushbu Yangi avlod darsliklari o‘ quvchilar uchun qulay va tushunarli ta’lim muhitini yaratgan bo‘ lsa-da, ayrim holatlarda nazariy tushunchalarga nisbatan amaliy topshiriqlarning ketma-ket va takroriy tarzda berilishi kuzatilgan. Ushbu kamchiliklarni inobatga olgan holda 2023–2024-o‘ quv yili uchun “Finlandiya” o‘ quv dasturi asosida yangilangan darsliklar ishlab chiqildi. Mazkur darsliklar har bir fan yo‘ nalishi bo‘ yicha metodik qulayliklarga ega bo‘ lib, nazariy bilimlarga tayanilgan, mazmunan boy va puxta ishlab chiqilgan amaliy topshiriqlar bilan ta’minlangan.

“O‘ zbekistonning 2030-yilga borib PISA (The Programme for International Student Assessment) xalqaro baholash dasturi doirasida o‘ quvchilar natijalari bo‘ yicha dunyoning eng ilg‘ or 30 ta mamlakati qatoridan o‘ rin egallashi” strategik maqsad sifatida belgilangan [1]. Mazkur vazifani amalga oshirish doirasida belgilangan muddatga qadar innovatsion iqtisodiyot ehtiyojlariga mos, STEAM fanlari integratsiyasini inobatga olgan holda ishlab chiqilgan yangi davlat ta’lim standartlari va o‘ quv dasturlarini amaliyotga joriy etish zarurati alohida ta’kidlanadi [3].

Bugungi kunda boshlang‘ ich sinf o‘ quvchilarida tafakkurni rivojlantirish, mustaqil muammolarni hal eta olish kompetensiyalarini shakllantirish hamda fazoviy tasavvurni rivojlantirish masalalari dolzarb ilmiy-pedagogik muammolar sirasiga kiradi. Inson tasavvuri uzluksiz va bosqichma-bosqich shakllanib boradi hamda u avval o‘ zlashtirilgan nazariy bilimlar va ilgari bajarilgan amaliy faoliyat tajribasi asosida vujudga keladi.

XXI asr sharoitida voyaga yetayotgan yosh avlodning har tomonlama barkamol shaxs sifatida shakllanishi, ularning mustaqil tafakkur yurita olishi hamda kreativ va ijodiy salohiyatini rivojlantirish ta’lim-tarbiya tizimi oldida turgan ustuvor vazifalardan biri hisoblanadi. Shu nuqtayi nazardan, zamonaviy pedagogik yondashuvlar orasida STEAM ta’lim texnologiyasining boshlang‘ ich sinf o‘ quvchilari ta’lim-tarbiyasidagi o‘ rni alohida ahamiyat kasb etadi. STEAM ta’limining asosiy vazifasi o‘ quvchilarda tabiiy fanlar, texnika hamda tasviriy faoliyatga bo‘ lgan qiziqishni kuchaytirish, ularni o‘ quv mashg‘ ulotlarini real hayotiy vaziyatlar bilan uzviy bog‘ langan holda bajarishga yo‘ naltirishdan iboratdir.

Ta’lim jarayoniga mazkur innovatsion yondashuvning joriy etilishi nazariy bilimlarning amaliy faoliyat bilan uzviy integratsiyalashuvi uchun keng imkoniyatlar yaratadi. STEAM ta’lim texnologiyasi asosida ishlab chiqilgan topshiriqlar mazmunan boy va maqsadga yo‘ naltirilgan bo‘ lib, mashg‘ ulotlar jarayonida o‘ quvchilarning faol ishtiroki ta’minlanadi. Natijada o‘ quvchilar dars davomida faollikni saqlab qoladi, zerikish holatlari kamayadi. Eng muhim jihatlardan biri shundaki, jamoaviy faoliyat jarayonida o‘ quvchilar tengdoshlari hamda o‘ qituvchi bilan hamkorlikda ishlash tajribasini orttiradi, bu esa o‘ rganilgan bilim va ko‘ nikmalarning xotirada yanada mustahkamroq saqlanishiga xizmat qiladi.

Tahlillar va natijalar

Boshlang‘ ich ta’lim bosqichining ustuvor vazifalaridan biri bolada o‘ rganishga qaratilgan qobiliyatni, ya’ni ta’lim faoliyatining poydevorini shakllantirishdan iboratdir. Aynan dastlabki maktab yillari va keyingi ta’lim jarayonlari tasavvurning muhim aqliy jarayon sifatida rivojlanishiga eng kuchli ta’sir ko‘ rsatadi. Shu jihatdan, fazoviy tasavvurni izchil shakllantirish orqali fanlar doirasida egallangan bilimlarni chuqur o‘ zlashtirish hamda matematik ta’limda kompetensiyaviy yondashuvni amalga oshirish o‘ quvchilarda kasbiy faoliyatda, shaxsiy hayotda va jamiyatning kundalik ehtiyojlarida uchraydigan turli vaziyatlarda samarali faoliyat yuritish imkonini beruvchi ko‘ p qirrali malakalarni rivojlantirishni nazarda tutadi.

STEAM yondashuvining fazoviy tasavvurlarni rivojlantirishdagi imkoniyatlari.

STEAM ta’limning asosiy xususiyatlaridan biri fanlararo integratsiyadir. Masalan, o‘ quvchi oddiy geometrik shakllardan bino modelini yaratishi mumkin. Bunda matematika orqali shakl va o‘ lchamlarni aniqlaydi, texnologiya orqali materiallardan foydalanadi, muhandislik elementlari orqali konstruksiyaning mustahkamligini o‘ ylaydi, san’at orqali modelning tashqi ko‘ rinishini bezatadi.

Bunday faoliyat o‘ quvchining bir vaqtning o‘ zida bir nechta kompetensiyalarini rivojlantiradi. Jumladan:

- fazodagi obyektlarning joylashuvini aniqlash;
- geometrik shakllarni farqlash;
- shakllarning o‘ zaro bog‘ liqligini tushunish;
- obyektlarni tasavvurda aylantirish va o‘ zgartirish;
- model yaratish;
-o‘ lchash va taqqoslash;
-muammoni mustaqil hal qilish;
-ijodiy fikrlash.

Shu sababli STEAM mashg‘ ulotlari oddiy nazariy topshiriqlarga qaraganda o‘ quvchilarning faol ishtirokini ta’minlashga ko‘ proq imkon beradi.

STEAM mashg‘ ulotlarini takomillashtirish bo‘ yicha tavsiyalar

Boshlang‘ ich sinflarda STEAM asosida fazoviy tasavvurlarni rivojlantirish uchun quyidagi metodik yondashuvlardan foydalanish maqsadga muvofiq:

- Geometrik tushunchalarni imkon qadar amaliy topshiriqlar bilan bog‘ lash.
- Dars mashg‘ ulotlarida yoshga mos kichik STEAM loyihalarini ishlab chiqish.
- O‘ quvchilarni guruhlarga ajratib, hamkorlikda model yaratish faoliyatini tashkil etish.
- Model tayyorlash va tayyor modelni taqdim etishga o‘ rgatish.
- Raqamli texnologiyalar va vizual modellashtirish vositalaridan yosh xususiyatlariga mos ravishda foydalanish.
- O‘ qituvchilar uchun STEAM metodikasi bo‘ yicha amaliy seminar va treninglarni tashkil etish.

Xulosalar

Xulosa qilib aytganda, STEAM ta’lim texnologiyasi boshlang‘ ich sinf o‘ quvchilarining fazoviy tasavvurlarini rivojlantirish uchun samarali pedagogik imkoniyatlarni yaratadi. Mazkur yondashuv matematika, texnologiya, tabiiy fanlar, muhandislik va san’atni o‘ zaro integratsiyalash orqali o‘ quvchilarni faol amaliy faoliyatga jalb etadi. Fazoviy tasavvurlarni rivojlantirishda modellashtirish, konstruktorlik faoliyati, geometrik shakllar bilan ishlash, loyiha va ijodiy topshiriqlardan foydalanish o‘ quvchilarning predmetlarning shakli, hajmi, joylashuvi va o‘ zaro munosabatlarini chuqurroq anglashlariga yordam beradi. Shu bilan birga, bunday faoliyat o‘ quvchilarning mantiqiy, ijodiy va muhandislik fikrlashini rivojlantirishga xizmat qiladi.

Amaliyot tahlili shuni ko‘ rsatadiki, STEAM yondashuvini boshlang‘ ich ta’limga tizimli ravishda joriy etish uchun o‘ qituvchilarning metodik tayyorgarligini oshirish, amaliy topshiriqlar bankini yaratish va ta’lim muhitini zarur resurslar bilan ta’minlash muhim ahamiyatga ega. Natijada boshlang‘ ich sinf o‘ quvchilarining fazoviy tasavvurlari bilan bir qatorda, ularning mustaqil fikrlash, ijodkorlik, hamkorlik va muammoli vaziyatlarni hal qilish kompetensiyalari ham rivojlanadi.

Annotatsiya: *Mazkur maqolada bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirishning pedagogik imkoniyatlari ilmiy-nazariy va amaliy jihatdan tahlil qilinadi. Tadqiqotda refleksiya, refleksiv kompetensiya, kasbiy-pedagogik faoliyat hamda bo‘ lajak o‘ qituvchining kasbiy rivojlanishi tushunchalarining mazmun-mohiyati, ularning o‘ zaro aloqadorligi va zamonaviy pedagogik ta’lim tizimidagi ahamiyati yoritilgan. Shuningdek, kompetensiyaviy, shaxsga yo‘ naltirilgan, faoliyatga asoslangan va refleksiv yondashuvlar asosida bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarida o‘ z pedagogik faoliyatini tahlil qilish, baholash, mavjud muammolarni aniqlash, pedagogik qarorlarni asoslash hamda kasbiy faoliyatini takomillashtirish ko‘ nikmalarini rivojlantirish mexanizmlari asoslab berilgan. Pedagogik amaliyot, refleksiv topshiriqlar, pedagogik vaziyatlarni tahlil qilish, portfolio, o‘ z-o‘ zini baholash va o‘ zaro baholash kabi vositalardan samarali foydalanish orqali bo‘ lajak o‘ qituvchilarning kasbiy o‘ zini anglash, mustaqil qaror qabul qilish va pedagogik faoliyat natijalarini tanqidiy baholash imkoniyatlari ochib berilgan. Tadqiqot natijalari refleksiv kompetensiyani rivojlantirish bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining kasbiy-pedagogik mahoratini shakllantirishning muhim omillaridan biri ekanligini ko‘ rsatadi.*

ПЕДАГОГИЧЕСКИЕ ВОЗМОЖНОСТИ РАЗВИТИЯ РЕФЛЕКСИВНОЙ КОМПЕТЕНТНОСТИ БУДУЩИХ УЧИТЕЛЕЙ НАЧАЛЬНОГО ОБРАЗОВАНИЯ

Аннотация: *В статье представлен научно-теоретический и практический анализ педагогических возможностей развития рефлексивной компетентности будущих учителей начального образования. В исследовании раскрываются содержание и сущность понятий рефлексии, рефлексивной компетентности, профессионально-педагогической деятельности и профессионального развития будущего учителя, а также их взаимосвязь и значение в современной системе педагогического образования. Кроме того, на основе компетентностного, личностно-ориентированного, деятельностного и рефлексивного подходов обоснованы механизмы развития у будущих учителей начального образования умений анализировать и оценивать собственную педагогическую деятельность, выявлять существующие проблемы, обосновывать педагогические решения и совершенствовать профессиональную деятельность. Раскрыты возможности развития профессионального самосознания, самостоятельного принятия решений и критической оценки результатов педагогической деятельности будущих учителей посредством эффективного использования педагогической практики, рефлексивных заданий, анализа педагогических ситуаций, портфолио, самооценивания и взаимооценивания. Результаты исследования показывают, что развитие рефлексивной компетентности является одним из важных факторов формирования профессионально-педагогического мастерства будущих учителей начального образования.*

PEDAGOGICAL OPPORTUNITIES FOR DEVELOPING THE REFLECTIVE COMPETENCE OF PRE-SERVICE PRIMARY SCHOOL TEACHERS

Abstract: *This article provides a scientific-theoretical and practical analysis of the pedagogical opportunities for developing the reflective competence of pre-service primary school teachers. The study examines the content and essence of the concepts of reflection,*

reflective competence, professional-pedagogical activity, and professional development of pre-service teachers, as well as their interrelationship and significance within the modern system of teacher education. In addition, based on competency-based, learner-centered, activity-based, and reflective approaches, the article substantiates mechanisms for developing pre-service primary school teachers' abilities to analyze and evaluate their pedagogical activities, identify existing problems, justify pedagogical decisions, and improve their professional practice. The study highlights the possibilities of enhancing pre-service teachers' professional self-awareness, independent decision-making, and critical evaluation of pedagogical activity outcomes through the effective use of pedagogical practice, reflective tasks, analysis of pedagogical situations, portfolios, self-assessment, and peer assessment. The findings indicate that the development of reflective competence is one of the important factors in shaping the professional and pedagogical mastery of pre-service primary school teachers.

Keywords: *reflection, reflective competence, pre-service teacher, primary education, professional-pedagogical competence, pedagogical mastery, professional development, reflective approach, self-assessment, pedagogical practice, pedagogical activity, competency-based approach.*

Kirish. Bugungi globallashuv, raqamli transformatsiya va ta'lim mazmunining tezkor yangilanib borishi sharoitida pedagogning kasbiy faoliyatiga qo‘ yilayotgan talablar tubdan o‘ zgarib bormoqda. Zamonaviy o‘ qituvchidan nafaqat chuqur fan va metodik bilimlarga ega bo‘ lish, balki o‘ z pedagogik faoliyatini muntazam tahlil qilish, kasbiy yutuq va kamchiliklarini anglash, ta'lim jarayonida yuzaga keladigan muammolarga mos yechimlar ishlab chiqish hamda o‘ z faoliyatini uzluksiz takomillashtirish qobiliyati ham talab etilmoqda. Ayniqsa, boshlang‘ ich ta'lim o‘ qituvchisi faoliyatining o‘ ziga xosligi, uning kichik yoshdagi o‘ quvchilarning intellektual, ijtimoiy-emotsional va shaxsiy rivojlanishiga bevosita ta'sir ko‘ rsatishi bo‘ lajak pedagoglarni kasbiy faoliyatga tayyorlash jarayonida refleksiv kompetensiyani rivojlantirish masalasini alohida ahamiyatga ega ekanligini ko‘ rsatadi.

Pedagogik refleksiya o‘ qituvchining o‘ z faoliyati, pedagogik qarorlari, qo‘ llagan metodlari, o‘ quvchilar bilan munosabatlari va ta'lim natijalarini anglash, tahlil qilish hamda baholash jarayoni sifatida namoyon bo‘ ladi. Refleksiv kompetensiya esa mazkur jarayonni ongli, tizimli va maqsadli ravishda amalga oshirish imkonini beruvchi kasbiy sifatlar majmuasini ifodalaydi. Bo‘ lajak o‘ qituvchi uchun refleksiv kompetensiyaning shakllanganligi uning "nima qildim?" degan savol bilan cheklanib qolmasdan, "nima uchun bunday natija yuzaga keldi?", "qaysi pedagogik qarorim samarali bo‘ ldi?", "qanday jihatlarni takomillashtirishim zarur?" va "keyingi faoliyatimni qanday tashkil etishim kerak?" kabi savollarga asoslangan holda o‘ z faoliyatini tahlil qila olishida namoyon bo‘ ladi. Shu jihatdan refleksiya bo‘ lajak pedagogning kasbiy o‘ zini anglash va professional rivojlanishining muhim mexanizmlaridan biri hisoblanadi.

Zamonaviy pedagogik tadqiqotlarda o‘ qituvchining kasbiy kompetentligini rivojlantirish masalasi uning o‘ z faoliyatini baholash, pedagogik tajribani tahlil qilish va undan keyingi faoliyat uchun xulosalar chiqarish qobiliyati bilan chambarchas bog‘ liq holda qaralmoqda. Xususan, refleksiv amaliyot o‘ qituvchining kasbiy tajribasini shunchaki takrorlash emas, balki uni tahlil qilish, mavjud muammolarning sabablarini aniqlash va yangi pedagogik strategiyalarni ishlab chiqish imkonini beradi. Bu jarayon ayniqsa bo‘ lajak boshlang‘ ich ta'lim o‘ qituvchilari uchun muhimdir, chunki pedagogik oliy ta'lim jarayonida shakllangan nazariy bilimlar faqat amaliy faoliyat bilan bog‘ langan va refleksiv tahlil orqali qayta ishlangan taqdirdagina barqaror kasbiy kompetensiyaga aylanishi mumkin.

Bo‘ lajak boshlang‘ ich ta'lim o‘ qituvchilarining refleksiv kompetensiyasini shakllantirish, avvalo, pedagogik ta'lim mazmuni va o‘ quv jarayonini tashkil etish usullarini takomillashtirishni talab qiladi. An'anaviy ta'limda talaba ko‘ pincha pedagogik bilimlarni o‘ zlashtiruvchi subyekt sifatida qaralsa, zamonaviy kompetensiyaviy va shaxsga yo‘ naltirilgan ta'limda u o‘ z kasbiy rivojlanishini anglaydigan, pedagogik vaziyatlarni tahlil qiladigan, mustaqil qaror qabul qiladigan va o‘ z faoliyatiga baho bera oladigan faol subyekt sifatida namoyon bo‘ ladi. Shu nuqtayi nazardan, muammoli ta'lim, case-study, mikroo‘ qitish, pedagogik vaziyatlarni modellashtirish, loyiha asosida o‘ qitish, pedagogik portfolio, refleksiv kundalik, o‘ z-o‘ zini baholash va o‘ zaro baholash kabi vositalardan foydalanish bo‘ lajak o‘ qituvchilarning refleksiv kompetensiyasini rivojlantirishning samarali pedagogik imkoniyatlari sifatida namoyon bo‘ lishi mumkin.

Refleksiv kompetensiya faqat o‘ qituvchining o‘ z xatti-harakatlarini baholashi bilan cheklanmaydi. U kasbiy o‘ zini anglash, pedagogik vaziyatlarni tahlil qilish, tanqidiy fikrlash, o‘ z faoliyatining natijalarini baholash, muqobil pedagogik yechimlarni izlash va kelgusidagi faoliyatni rejalashtirish kabi o‘ zaro bog‘ liq jarayonlarni qamrab oladi. Shu sababli bo‘ lajak boshlang‘ ich ta'lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirish ularning nafaqat mavjud pedagogik bilimlarini mustahkamlash, balki kasbiy faoliyatga ijodiy va tanqidiy yondashish qobiliyatini ham shakllantiradi. Masalan, talaba mikro-dars o‘ tkazgandan so‘ ng faqat o‘ qituvchi yoki guruhdoshlarining bahosini olish bilan cheklanmasdan, o‘ z darsining maqsadi, metodlari, o‘ quvchilar faolligi, vaqt taqsimoti va kutilgan natijalarini mustaqil tahlil qilishi uning refleksiv faoliyatini rivojlantiradi.

Bugungi kunda O‘ zbekiston oliy pedagogik ta'lim tizimida ham bo‘ lajak o‘ qituvchilarning kasbiy kompetensiyalarini rivojlantirish, pedagogik amaliyotning samaradorligini oshirish, ta'limning nazariy va amaliy

komponentlarini integratsiyalash hamda zamonaviy pedagogik yondashuvlarni ta’lim jarayoniga tatbiq etishga alohida e’tibor qaratilmoqda.

Mavzuga oid adabiyotlar sharhi. Bo‘ lajak o‘ qituvchilarning refleksiv kompetensiyasini rivojlantirish masalasi pedagogika, psixologiya va kasbiy ta’lim metodikasining kesishgan nuqtasida shakllangan ilmiy yo‘ nalishlardan biridir. Mazkur tushunchaning nazariy asoslari, avvalo, refleksiya fenomenining falsafiy-psixologik talqinlari bilan bog‘ liq. Refleksiya shaxsning o‘ z faoliyati, fikrlashi, tajribasi va xatti-harakatlarini anglash hamda ularni tahlil qilish jarayoni sifatida izohlanadi. Shu nuqtayi nazardan, pedagogik refleksiya o‘ qituvchining ta’lim jarayonidagi faoliyati va qabul qilgan qarorlarini ongli ravishda qayta ko‘ rib chiqishi, ularning samaradorligini baholashi va keyingi pedagogik faoliyatini takomillashtirishga yo‘ naltirilgan jarayon sifatida qaraladi.

Refleksiv amaliyotning pedagogik asoslarini ishlab chiqishda D. Schonning tadqiqotlari alohida ahamiyatga ega. Olim professional faoliyatni takomillashtirishda “reflection-in-action” va “reflection-on-action” tushunchalarini ilgari surib, mutaxassisning faoliyat jarayonining o‘ zida vaziyatni anglay olishi hamda faoliyatdan keyin uning natijalarini tahlil qilishi o‘ rtasidagi farqni asoslagan [1]. Mazkur yondashuv pedagog faoliyatining mexanik ravishda takrorlanishidan ko‘ ra, har bir pedagogik vaziyatdan kasbiy tajriba va yangi bilim olish imkonini beruvchi refleksiv jarayon sifatida foydalanish zarurligini ko‘ rsatadi.

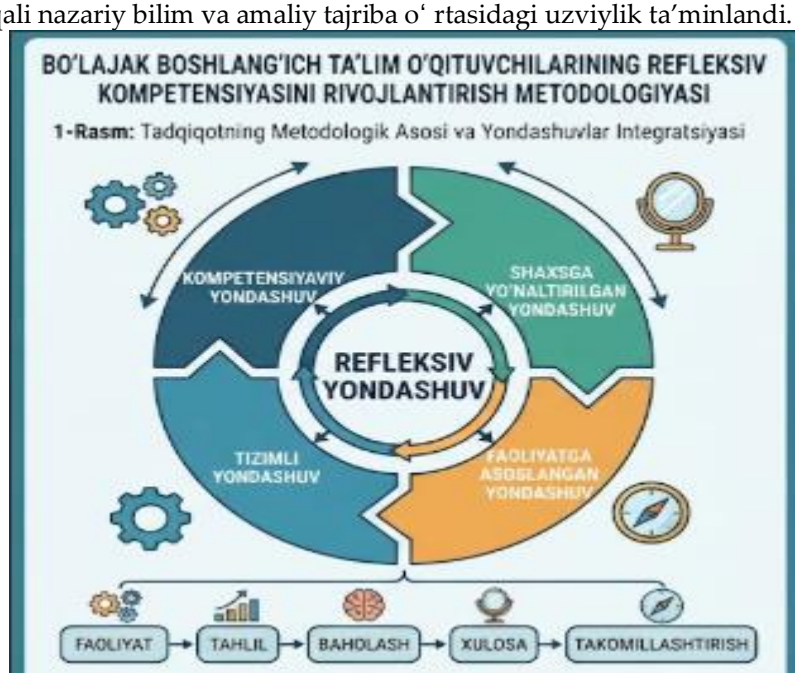
J. Dewey qarashlarida ham refleksiv fikrlash muayyan muammo yoki pedagogik vaziyatni yuzaki baholash emas, balki mavjud dalillarni izchil tahlil qilish, sabab-oqibat aloqalarini aniqlash va asoslangan xulosaga kelish jarayoni sifatida talqin qilinadi [2]. Ushbu nazariy qarashlar bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarini tayyorlash jarayonida refleksiyani mustaqil fikrlash va kasbiy qaror qabul qilish bilan integratsiyalash zarurligini asoslash imkonini beradi.

K. Zeichner va D. Liston o‘ qituvchining refleksiv faoliyatini pedagogik amaliyotni anglash va takomillashtirish vositasi sifatida tadqiq etib, refleksiv o‘ qituvchini o‘ zining pedagogik qarorlarini tanqidiy ko‘ rib chiqadigan, o‘ quvchilarning ehtiyojlarini hisobga oladigan va o‘ z tajribasini muntazam ravishda qayta baholaydigan mutaxassis sifatida tavsiflaydi [3]. Ularning tadqiqotlarida refleksiv yondashuv o‘ qituvchining kasbiy avtonomiyasi va pedagogik faoliyatga ongli munosabatini shakllantirish bilan bog‘ lanadi.

G. Gibbs tomonidan taklif etilgan refleksiv sikl esa pedagogik faoliyatni tizimli tahlil qilish uchun amaliy model sifatida keng qo‘ llaniladi. Mazkur model hodisani tavsiflash, his-tuyg‘ ularni anglash, baholash, tahlil qilish, xulosa chiqarish va keyingi harakat rejasini ishlab chiqish kabi bosqichlarni qamrab oladi [4]. Ushbu yondashuvdan bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining pedagogik amaliyoti jarayonida foydalanish ularning o‘ z faoliyatini izchil tahlil qilish va aniqlangan kamchiliklarni bartaraf etish bo‘ yicha aniq strategiyalar ishlab chiqishiga yordam beradi.

Refleksiv kompetensiyaning kasbiy kompetentlik bilan aloqasi zamonaviy pedagogik tadqiqotlarda ham muhim o‘ rin egallaydi. P. Jarvis kasbiy rivojlanish jarayonida tajribaning o‘ zi emas, balki tajribani anglash va undan yangi bilim hosil qilish muhimligini ta’kidlaydi [5]. Ushbu qarash bo‘ lajak o‘ qituvchining pedagogik amaliyotini oddiy tajriba to‘ plash jarayonidan refleksiv kasbiy rivojlanish jarayoniga aylantirish zarurligini ko‘ rsatadi.

Mahalliy pedagogik tadqiqotlarda ham bo‘ lajak o‘ qituvchilarni kasbiy faoliyatga tayyorlash, ularning pedagogik kompetensiyalarini shakllantirish, mustaqil va ijodiy fikrlashini rivojlantirish, pedagogik amaliyotning ta’lim jarayonidagi rolini kuchaytirish masalalariga katta e’tibor qaratilgan. Xususan, o‘ zbek pedagogikasida kasbiy kompetentlikni shakllantirish masalalari, pedagogik mahorat, o‘ qituvchining kasbiy tayyorgarligi, pedagogik faoliyatni tashkil etish va bo‘ lajak mutaxassisning shaxsiy-kasbiy sifatlarini rivojlantirish bilan bog‘ liq ilmiy qarashlar refleksiv kompetensiyani tadqiq etish uchun muhim nazariy asos bo‘ lib xizmat qiladi.



Tadqiqot metodologiyasi va metodlari. Tadqiqot metodologiyasi va metodlari. Mazkur tadqiqotning metodologik asosini bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini shakllantirish va rivojlantirish jarayonini shaxsning kasbiy rivojlanishi, faoliyatni anglash va pedagogik tajribani qayta tahlil qilish jarayoni sifatida talqin etishga imkon beruvchi zamonaviy pedagogik yondashuvlar tashkil etadi. Tadqiqotda refleksiv, kompetensiyaviy, shaxsga yo‘ naltirilgan, faoliyatga asoslangan va tizimli yondashuvlarning o‘ zaro integratsiyasiga tayanildi. Mazkur yondashuvlarning uyg‘ unligi bo‘ lajak o‘ qituvchining nafaqat pedagogik bilim va ko‘ nikmalarini, balki o‘ z faoliyatini mustaqil tahlil qilish, baholash, xulosa chiqarish va keyingi faoliyatini rejalashtirish qobiliyatlarini rivojlantirish imkonini beradi.

Refleksiv yondashuv tadqiqotning asosiy metodologik yo‘ nalishi sifatida belgilandi. Ushbu yondashuv asosida bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchisining pedagogik faoliyatga nisbatan ongli munosabati, o‘ zining kuchli va zaif jihatlarini aniqlashi, pedagogik qarorlarining natijalarini tahlil qilishi hamda kasbiy rivojlanish ehtiyojlarini belgilashi nazarda tutildi. Refleksiv yondashuv doirasida “faoliyat – tahlil – baholash – xulosa – takomillashtirish” izchilligi tadqiqotning muhim mantiqiy mexanizmi sifatida qaraldi.

Shaxsga yo‘ naltirilgan yondashuv asosida har bir bo‘ lajak o‘ qituvchining individual kasbiy tajribasi, qiziqishlari, ehtiyojlari va o‘ zini rivojlantirish imkoniyatlarini hisobga olish ko‘ zda tutildi. Bu yondashuv refleksiv kompetensiyani

tashqi talab asosida shakllantiriladigan sifat emas, balki talabaning o‘ z kasbiy rivojlanishiga ongli munosabati orqali bosqichma-bosqich rivojlanadigan kompetensiya sifatida qarash imkonini berdi.

Faoliyatga asoslangan yondashuv esa refleksiv kompetensiyani bevosita amaliy pedagogik faoliyat bilan bog‘ lashni nazarda tutdi. Bunda pedagogik amaliyot, mikroo‘ qitish, pedagogik vaziyatlarni modellashtirish, dars ishlanmalarini tahlil qilish, keys-topshiriqlar, loyiha faoliyati va pedagogik muammolarni hal etish jarayonlari refleksiv ko‘ nikmalarni rivojlantirish vositasi sifatida qaraldi. Talabaning real yoki modellashtirilgan pedagogik vaziyatdagi faoliyati keyinchalik refleksiv tahlil qilinishi orqali nazariy bilim va amaliy tajriba o‘ rtasidagi uzviylik ta’minlandi.

Tadqiqotda tizimli yondashuv ham muhim metodologik asoslardan biri sifatida qo‘ llanildi. Unga ko‘ ra, refleksiv kompetensiyani rivojlantirish o‘ zaro bog‘ liq maqsad, mazmun, metod, vosita, pedagogik shart-sharoit, faoliyat va natijalar majmuasidan iborat yaxlit pedagogik tizim sifatida ko‘ rib chiqildi. Mazkur yondashuv refleksiv kompetensiyaning alohida ko‘ nikmalar yig‘ indisi emas, balki o‘ zaro aloqador kasbiy sifatlar tizimi ekanligini asoslashga xizmat qildi.

Tadqiqot jarayonida nazariy metodlardan — ilmiy-pedagogik adabiyotlarni o‘ rganish va tahlil qilish, qiyosiy tahlil, umumlashtirish, tizimlashtirish, modellashtirish va pedagogik hodisalarni nazariy jihatdan talqin qilish metodlaridan foydalanildi. Ushbu metodlar refleksiya, refleksiv kompetensiya, kasbiy kompetentlik, pedagogik mahorat va bo‘ lajak o‘ qituvchining kasbiy rivojlanishi bilan bog‘ liq ilmiy qarashlarni umumlashtirish hamda tadqiqotning nazariy asoslarini belgilash imkonini berdi.

Empirik metodlar sifatida kuzatish, suhbat, so‘ rovnoma, o‘ z-o‘ zini baholash, ekspert baholash, pedagogik amaliyot jarayonini o‘ rganish va pedagogik vaziyatlarni tahlil qilishdan foydalanish mumkin. Xususan, kuzatish metodi orqali talabalarning pedagogik faoliyat jarayonida o‘ z xatti-harakatlari va qarorlarini tahlil qilish darajasi o‘ rganildi. Suhbat va so‘ rovnomalar orqali ularning refleksiyaga bo‘ lgan munosabati, o‘ z kasbiy imkoniyatlarini baholashi va kasbiy rivojlanish ehtiyojlari aniqlandi. O‘ z-o‘ zini baholash metodlari esa talabaning o‘ z pedagogik faoliyatiga mustaqil baho berish qobiliyatini aniqlashga xizmat qildi.

Refleksiv kompetensiyani rivojlantirish jarayonida refleksiv kundalik, pedagogik portfolio, mikroo‘ qitish, videoanaliz, “case-study”, o‘ zaro baholash va refleksiv suhbat kabi pedagogik vositalardan foydalanish nazarda tutildi. Ayniqsa, refleksiv kundalik orqali talabalar o‘ z pedagogik faoliyatidagi muhim vaziyatlarni qayd etish, ularning sabablarini tahlil qilish, yuzaga kelgan qiyinchiliklarni aniqlash va keyingi faoliyat uchun aniq takliflar ishlab chiqish imkoniyatiga ega bo‘ ladilar. Portfolio esa talabaning kasbiy rivojlanish dinamikasini tizimli ravishda kuzatish va uning yutuqlari hamda rivojlanish ehtiyojlarini aniqlash vositasi sifatida xizmat qiladi.

Tadqiqotda pedagogik modellashtirish metodidan ham foydalanilib, bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirishning maqsad, mazmun, metod, vosita, pedagogik shart-sharoit va natijalarini o‘ zaro bog‘ lovchi modelini ishlab chiqish imkoniyati ko‘ rib chiqildi. Modelning mazmuni talabalarning o‘ z pedagogik faoliyatini anglash, tahlil qilish, baholash va takomillashtirish jarayonlarini bosqichma-bosqich tashkil etishga yo‘ naltirildi. Shuningdek, tadqiqot natijalarini qayta ishlash va talqin qilishda sifat va miqdoriy tahlil usullaridan foydalanish nazarda tutildi. Olingan ma’lumotlarni qiyoslash, umumlashtirish va dinamikasini aniqlash orqali refleksiv kompetensiyaning rivojlanish darajasini baholash imkoniyati yaratildi. Shu asosda bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirishga xizmat qiluvchi pedagogik imkoniyatlar tizimlashtirildi hamda ularni pedagogik ta’lim jarayoniga integratsiyalashning ilmiy-metodik asoslari belgilandi.

Muhokama. Bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirish masalasi zamonaviy pedagogik ta’limning muhim yo‘ nalishlaridan biri sifatida namoyon bo‘ lmoqda. Chunki bo‘ lajak o‘ qituvchining kasbiy tayyorgarligi faqat nazariy bilimlarni egallash yoki pedagogik metodlarni o‘ zlashtirish bilan cheklanmaydi. U o‘ zining pedagogik faoliyatini anglash, amalga oshirilgan faoliyat natijalarini tahlil qilish, yuzaga kelgan muammolarning sabablarini aniqlash va keyingi faoliyatini takomillashtirishga qaratilgan qarorlarni mustaqil qabul qila olishi ham zarur. Shu nuqtayi nazardan refleksiv kompetensiya o‘ qituvchining kasbiy-pedagogik kompetentligini tarkib toptiruvchi muhim omillardan biri sifatida qaraladi.

Tadqiqot doirasida refleksiyani faqat dars yakunida “Nimani o‘ rgandim?”, “Nimada qiyinchilik tug‘ ildi?” kabi savollarga javob berish bilan cheklash yetarli emasligi aniqlandi. Refleksiya muntazam, maqsadli va tizimli tashkil etilgandagina bo‘ lajak o‘ qituvchining kasbiy rivojlanishiga real ta’sir ko‘ rsatishi mumkin. Bunda refleksiv jarayon “faoliyat – tahlil – baholash – xulosa – takomillashtirish” izchilligida tashkil etilishi maqsadga muvofiq. Mazkur ketma-ketlik talabaning o‘ z pedagogik faoliyatiga tashqi kuzatuvchi sifatida qarashiga, o‘ zining kuchli va zaif jihatlarini aniqlashiga hamda kelgusidagi pedagogik harakatlarini rejalashtirishiga imkon beradi.

1-jadval. Refleksiv kompetensiyaning tarkibiy komponentlari

Komponent	Mazmuni	Yetishmasa nima bo‘ladi
Motivatsion	O‘z faoliyatini tahlil qilishga ichki istak	Refleksiv faoliyat formal bo‘lib qoladi
Kognitiv	Yetarli pedagogik bilimlar	Faoliyatni chuqur tahlil qilish qiyinlashadi
Analitik	Faoliyat natijalari va muammo sabablarini tahlil qilish	Muammoli jihatlarni aniq belgilab bo‘lmaydi
Baholovchi	O‘zining kuchli va zaif jihatlarini baholash	Kamchiliklar to‘g‘ri aniqlanmaydi
Prognostik	Keyingi faoliyatni takomillashtirish strategiyasini ishlab chiqish	Tahlil natijasi amaliyotga o‘tmaydi

Olingan nazariy xulosalar D. Schönning refleksiyaning faoliyat jarayonidagi va faoliyatdan keyingi shakllari haqidagi qarashlari bilan hamohangdir [1]. Xususan, bo‘ lajak o‘ qituvchi pedagogik vaziyatning o‘ zida tezkor qaror qabul qilishni, darsdan keyin esa amalga oshirilgan pedagogik harakatlarning samaradorligini chuqur tahlil qilishni o‘ rganishi lozim. J. Dewey tomonidan ilgari surilgan refleksiv fikrlash konsepsiyasi ham pedagogik tajribani shunchaki boshdan kechirish emas, balki uni ongli ravishda tahlil qilish va undan xulosa chiqarish zarurligini ko‘ rsatadi [2]. Shu jihatdan refleksiv kompetensiya tajribani kasbiy rivojlanish manbaiga aylantiruvchi mexanizm sifatida talqin qilinishi mumkin.

Bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarida refleksiv kompetensiyani shakllantirishda pedagogik amaliyot alohida imkoniyatlarga ega. Chunki aynan pedagogik amaliyot jarayonida talaba real ta’lim muhiti, o‘ quvchilarning individual xususiyatlari, sinfdagi kommunikativ vaziyatlar va turli pedagogik muammolar bilan bevosita to‘ qnashadi. Biroq mazkur tajribaning o‘ zi refleksiv kompetensiyaning rivojlanishini avtomatik ravishda ta’minlamaydi. Tajriba maxsus refleksiv topshiriqlar, pedagogik vaziyatlarni tahlil qilish, o‘ z-o‘ zini baholash, mentor yoki rahbar bilan refleksiv suhbatlar orqali qayta ishlangandagina kasbiy bilim va ko‘ nikmalarning rivojlanishiga xizmat qiladi.

Shuningdek, refleksiv kundalik, pedagogik portfolio, mikroo‘ qitish, videoanaliz va tengdoshlar tomonidan baholash kabi vositalarning integratsiyalashuvi bo‘ lajak o‘ qituvchining o‘ z faoliyatini turli nuqtayi nazardan ko‘ rib chiqishiga sharoit yaratadi. Masalan, mikroo‘ qitish jarayonida talaba qisqa dars fragmentini tashkil etadi, keyinchalik uning mazmuni, metodikasi, nutqi, vaqt taqsimoti va o‘ quvchilar bilan muloqotini tahlil qiladi. Videoanaliz esa o‘ qituvchiga o‘ z faoliyatini bevosita kuzatish imkonini berib, o‘ zi sezmagan pedagogik jihatlarni aniqlashga yordam beradi. Shu sababli refleksiv vositalarni alohida mashg‘ ulot sifatida emas, balki pedagogik fanlar va amaliy tayyorgarlikning tarkibiy qismi sifatida tashkil etish samaraliroq hisoblanadi.

Muhokama natijalari refleksiv kompetensiyaning motivatsion, kognitiv, analitik, baholovchi va prognostik jihatlari o‘ zaro bog‘ liq holda rivojlanishi zarurligini ko‘ rsatadi. Talabada o‘ z faoliyatini tahlil qilish istagi mavjud bo‘ lmasa, refleksiv faoliyat formal xarakter kasb etadi. Yetarli pedagogik bilim bo‘ lmasa, faoliyatni chuqur tahlil qilish qiyinlashadi. Analitik va baholovchi ko‘ nikmalar rivojlanmagan holatda esa talaba o‘ z faoliyatining muammoli jihatlarini aniq belgilay olmaydi. Prognostik komponent esa aniqlangan kamchiliklar asosida keyingi pedagogik faoliyatni takomillashtirish strategiyasini ishlab chiqish imkonini beradi. Demak, refleksiv kompetensiya alohida ko‘ nikmalar yig‘ indisi emas, balki o‘ zaro bog‘ langan tarkibiy komponentlardan tashkil topgan yaxlit kasbiy sifatdir.

Xulosa. Olib borilgan nazariy tahlil va metodologik yondashuvlar asosida bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirish zamonaviy pedagogik ta’limning muhim vazifalaridan biri ekanligi aniqlandi. Refleksiv kompetensiya bo‘ lajak o‘ qituvchining o‘ z pedagogik faoliyatini anglash, tahlil qilish, baholash, yuzaga keladigan muammolarning sabablarini aniqlash hamda kelgusidagi faoliyatini takomillashtirishga yo‘ naltirilgan ongli va tizimli faoliyatini ifodalaydi. Shu jihatdan u kasbiy-pedagogik kompetentlikning muhim tarkibiy qismi sifatida namoyon bo‘ ladi.

Tadqiqot natijalariga ko‘ ra, refleksiv kompetensiyani rivojlantirish jarayoni bir martalik refleksiv mashg‘ ulotlar bilan cheklanmasligi, balki oliy pedagogik ta’limning barcha bosqichlarida izchil va tizimli tashkil etilishi lozim. Bunda refleksiv, kompetensiyaviy, shaxsga yo‘ naltirilgan, faoliyatga asoslangan va tizimli yondashuvlarning o‘ zaro uyg‘ unligi muhim metodologik asos bo‘ lib xizmat qiladi. Ayniqsa, “faoliyat – tahlil – baholash – xulosa – takomillashtirish” ketma-ketligining ta’lim jarayoniga singdirilishi talabaning o‘ z kasbiy faoliyatiga ongli munosabatini shakllantirishga imkon beradi.

Bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirishning samarali pedagogik imkoniyatlari sifatida pedagogik amaliyot, mikroo‘ qitish, pedagogik vaziyat va keyslarni tahlil qilish, refleksiv kundalik yuritish, pedagogik portfolio yaratish, o‘ z-o‘ zini va tengdoshlarini baholash, videoanaliz hamda refleksiv suhbatlardan foydalanish muhim ahamiyatga ega. Mazkur vositalarning tizimli qo‘ llanilishi talabaning o‘ z faoliyatini tashqi nuqtayi nazardan baholash, pedagogik xatolarini anglash va ularni bartaraf etishning muqobil yo‘ llarini izlash ko‘ nikmalarini rivojlantiradi.

Shuningdek, refleksiv kompetensiyaning motivatsion, kognitiv, analitik, baholovchi va prognostik komponentlarini o‘ zaro bog‘ liq holda shakllantirish zarurligi asoslandi. Mazkur komponentlarning uyg‘ un rivojlanishi bo‘ lajak o‘ qituvchida nafaqat o‘ z faoliyatini baholash, balki aniqlangan natijalar asosida kelgusidagi pedagogik faoliyatini rejalashtirish va takomillashtirish imkoniyatini ham kengaytiradi.

Umuman, bo‘ lajak boshlang‘ ich ta’lim o‘ qituvchilarining refleksiv kompetensiyasini rivojlantirish pedagogik ta’lim sifatini oshirish, bo‘ lajak mutaxassislarning mustaqil kasbiy qaror qabul qilish qobiliyatini kuchaytirish va uzluksiz kasbiy rivojlanishga tayyorligini shakllantirishning muhim shartlaridan biridir. Shu sababli pedagogik oliy ta’lim muassasalarida refleksiv ta’lim muhitini yaratish, refleksiv topshiriqlarni fanlar mazmuniga integratsiya qilish va pedagogik amaliyotni refleksiv faoliyat bilan uzviy bog‘ lash istiqboldagi muhim pedagogik vazifalardan biri sifatida qaralishi lozim.

PEDAGOGICAL

VIKTOR USPENSKIY PEDAGOGIK QARASHLARINING BO‘ LAJAK O‘ QITUVCHILAR KASBIY-MA’NAVIY TAYYORGARLIGINI RIVOJLANTIRISHDAGI AHAMIYATI

Raximov Kodirjon Karimberdiyevich
Namangan davlat universiteti tadqiqotchisi

Annotatsiya: *Maqolada Viktor Aleksandrovich Uspenskiy (1879–1949) pedagogik qarashlarining bo‘ lajak o‘ qituvchilar kasbiy-ma’naviy tayyorgarligini rivojlantirishdagi ahamiyati tadqiq etiladi. Muallif olimning maxsus pedagogik risola qoldirmaganini e’tirof etib, uning qarashlarini hujjatlashtirilgan amaliy faoliyat – Toshkent Xalq konservatoriyasidagi dars berish tajribasi, Buxoroda Shashmaqomni notaga olish ishi, Markaziy Osiyo bo‘ ylab ilmiy ekspeditsiyalar va milliy kadrlar tayyorlash faoliyati – asosida qayta tiklangan tamoyillar tizimi sifatida talqin qiladi. Tadqiqotda mazkur tamoyillarning besh guruhi ajratilib, ularning zamonaviy pedagogik ta’limdagi talqini asoslanadi hamda tarixiy-pedagogik merosdan foydalanishning besh shakli ishlab chiqiladi. Shuningdek, biografik materialdan foydalanishning rasmiylashuv xavfi va uni oldini olish shartlari tahlil qilinadi. Xulosada tarixiy shaxs namunasi va’z shaklida emas, tahlil obyekti sifatida taqdim etilgandagina tarbiyaviy kuchga ega bo‘ lishi asoslab beriladi.*

Kalit so‘ zlar: *Viktor Uspenskiy, pedagogik meros, kasbiy-ma’naviy tayyorgarlik, tarixiy-pedagogik rekonstruksiya, madaniyat sohibiga hurmat, milliy musiqa merosi, namuna va modellashtirish, xarakter tarbiyasi, ma’naviy tarbiya, oliy pedagogik ta’lim.*

ЗНАЧЕНИЕ ПЕДАГОГИЧЕСКИХ ВЗГЛЯДОВ ВИКТОРА УСПЕНСКОГО В РАЗВИТИИ ПРОФЕССИОНАЛЬНО-ДУХОВНОЙ ПОДГОТОВЛЕННОСТИ БУДУЩИХ УЧИТЕЛЕЙ

Аннотация: *В статье исследуется значение педагогических взглядов Виктора Александровича Успенского (1879–1949) в развитии профессионально-духовной подготовленности будущих учителей. Признавая, что учёный не оставил специального педагогического трактата, автор интерпретирует его взгляды как систему принципов, реконструированных на основе документированной практической деятельности – преподавания в Ташкентской народной консерватории, нотной записи Шашмакома в Бухаре, научных экспедиций по Средней Азии и подготовки национальных кадров. Выделяются пять групп данных принципов, обосновывается их современная педагогическая интерпретация, разрабатываются пять форм использования историко-педагогического наследия. Анализируется риск формализации биографического материала и условия его предупреждения. В заключении обосновывается, что пример исторической личности обретает воспитательную силу лишь тогда, когда предъявляется не как проповедь, а как объект анализа.*

Ключевые слова: *Виктор Успенский, педагогическое наследие, профессионально-духовная подготовленность, историко-педагогическая реконструкция, уважение к носителю культуры, национальное музыкальное наследие, пример и моделирование, воспитание характера, духовное воспитание, высшее педагогическое образование.*

THE SIGNIFICANCE OF VIKTOR USPENSKY’S PEDAGOGICAL VIEWS IN DEVELOPING THE PROFESSIONAL AND SPIRITUAL READINESS OF FUTURE TEACHERS

Annotation: *The article examines the significance of the pedagogical views of Viktor Aleksandrovich Uspensky (1879–1949) in developing the professional and spiritual readiness of future teachers. Recognizing that the scholar left no special pedagogical treatise, the author interprets his views as a system of principles reconstructed from documented practical activity: teaching at the Tashkent People’s Conservatory, the notation of Shashmaqom in Bukhara, scientific expeditions across Central Asia, and the training of national specialists. Five groups of such principles are distinguished, their contemporary pedagogical interpretation is substantiated, and five forms of using the historical-pedagogical heritage are elaborated. The risk of formalizing biographical material and the conditions for preventing it are analysed. In conclusion, it is substantiated that the example of a historical figure acquires educative power only when it is presented as an object of analysis rather than as a sermon.*

Keywords: *Viktor Uspensky, pedagogical heritage, professional and spiritual readiness, historical-pedagogical reconstruction, respect for the culture bearer, national musical heritage, example and modelling, character education, spiritual education, higher pedagogical education.*

KIRISH

Bo‘ lajak o‘ qituvchini tayyorlash jarayonining o‘ ziga xosligi shundaki, unda fan bilimlari va metodik ko‘ nikmalar bilan bir qatorda shaxsning ma’naviy qiyofasi ham kasbiy tayyorgarlikning tarkibiy qismi hisoblanadi. O‘ qituvchi o‘ quvchiga faqat bilim uzatmaydi, balki o‘ z shaxsi orqali unga munosabat, mehnat va madaniyatga nisbatan pozitsiya namunasini ham ko‘ rsatadi. Shu sababli pedagogik ta’limda tarixiy shaxslarning hayot yo‘ li va faoliyati an’anaviy ravishda tarbiyaviy manba sifatida qo‘ llanib kelinadi. Biroq bu manbadan foydalanish ko‘ pincha umumiy ulug‘ lash darajasida qolib ketadi va talabaning kasbiy pozitsiyasiga real ta’sir ko‘ rsatmaydi. Mazkur muammo milliy pedagogik ta’lim uchun ayniqsa dolzarb. O‘ zbekiston madaniyati va ma’rifati tarixida o‘ z hayotini milliy meros va xalq ta’limiga bag‘ ishlagan ko‘ plab shaxslar mavjud bo‘ lib, ularning tajribasi bo‘ lajak o‘ qituvchi uchun qimmatli ma’naviy resursdir. Biroq bu resursning pedagogik salohiyati uning qanday taqdim etilishiga bog‘ liq: agar shaxs faqat ulug‘ lanadigan obraz sifatida ko‘ rsatilsa, talaba uni o‘ zidan uzoq va erishib bo‘ lmaydigan deb qabul qiladi; agar uning faoliyati aniq qarorlar va tamoyillar darajasida tahlil qilinsa, u talaba uchun real yo‘ l ko‘ rsatkichga aylanadi. Viktor Aleksandrovich Uspenskiy (1879–1949) mazkur nuqtai nazardan alohida e’tiborga loyiq shaxslardan biri hisoblanadi. 1879-yilda Kalugada tug‘ ilgan, dastlab harbiy ta’lim olgan va 1913-yilda Peterburg konservatoriyasini A.K.Lyadov sinfi bo‘ yicha tugatgan musiqashunos 1918-yilda Toshkentga kelib, umrining qolgan qismini Markaziy Osiyo xalqlari musiqa merosini o‘ rganish va saqlashga bag‘ ishladi. U 1949-yilda Toshkentda vafot etgan va shu shaharda dafn etilgan. Uning hayot yo‘ lining mazkur burilishi tasodifiy emas edi: u o‘ zga madaniyatga nisbatan chuqur qiziqish va hurmat tufayli shu yo‘ lni ongli ravishda tanlagan. Uspenskiyning pedagogik faoliyati uning Toshkent davrining ajralmas qismini tashkil etadi. U 1918–1922-yillarda Toshkent Xalq konservatoriyasida garmoniya fanidan dars bergan, 1928–1934-yillarda musiqa bilim yurtida ishlagan, 1932-yildan San’atshunoslik instituti xodimi va musiqa kabineti mudiri bo‘ lgan, 1936-yildan esa Toshkent konservatoriyasi professori va musiqa-nazariy fakulteti dekani sifatida faoliyat yuritgan. 1943-yilda unga san’atshunoslik doktori ilmiy darajasi berilgan. Shu tariqa uning hayotining o‘ ttiz yildan ortiq qismi bevosita o‘ qituvchilik va kadrlar tayyorlash bilan bog‘ liq bo‘ lgan. Uspenskiy faoliyatining eng mashhur sahifasi Shashmaqomni notaga olish ishidir. 1923-yilda u Buxoroda o‘ sha davrning yirik maqom ustalaridan yozib olish ishini amalga oshirgan va 1924-yilda mazkur yozuv nashr etilgan. Bu ishning tarixiy ahamiyati shundaki, u an’anaviy og‘ zaki yo‘ l bilan avloddan avlodga o‘ tib kelgan murakkab musiqiy tizimni yo‘ qolib ketish xavfidan saqlab qolgan. Ishning o‘ ziga xosligi esa uning usulida: Uspenskiy maqomni o‘ z nazariy tasavvurlariga moslashtirishga urinmasdan, uni sohiblari ijro etgan shaklda qayd etishga intilgan. Uning ilmiy-ekspeditsion faoliyati ham shunga o‘ xshash tamoyilga asoslangan. Uspenskiy Markaziy Osiyo bo‘ ylab sakkizta etnografik ekspeditsiya uyushtirgan, 1925–1929-yillarda Turkmanistonga uchta folklor ekspeditsiyasini olib borgan va bu safarlarda uch yuz ellikdan ortiq qo‘ shiq hamda cholg‘ u kuyini yozib olgan, 1931-yilda esa Farg‘ ona vodiysiga musiqa-etnografik ekspeditsiya tashkil etgan. V.M.Belyayev bilan hamkorlikda tayyorlangan turkman musiqasiga oid tadqiqoti 1928-yilda Moskvada nashr etilgan. Mazkur faoliyat uning uchun bilim manbai kutubxona emas, balki xalqning o‘ zi ekanini ko‘ rsatadi. Mazkur maqolaning metodologik pozitsiyasini aniq belgilash zarur. V.A.Uspenskiy maxsus pedagogik risola yoki yaxlit nazariy ta’limot qoldirmagan; uning asarlari musiqashunoslik va musiqa etnografiyasiga oid. Shu sababli mazkur ishda uning pedagogik qarashlari tayyor konsepsiya sifatida emas, balki hujjatlashtirilgan amaliy faoliyatdan – o‘ qituvchilik tajribasi, ekspeditsiya usuli, meros bilan ishlash tarzi va kadrlar tayyorlashga munosabatidan – qayta tiklanadigan tamoyillar tizimi sifatida talqin qilinadi. Pedagogika tarixida bunday rekonstruksiya keng qo‘ llaniladigan va metodologik jihatdan asoslangan yondashuvdir, biroq u tadqiqotchidan o‘ z talqinini manbaning haqiqiy mazmunidan aniq farqlashni talab qiladi. Mazkur faoliyatdan kelib chiqadigan dastlabki tamoyil madaniyat sohibiga nisbatan hurmat tamoyilidir. Uspenskiy xalq musiqasini o‘ rganishda uning ijrochilarini tadqiqot obyekti emas, balki bilim manbai va ustoz sifatida ko‘ rgan. Bu pozitsiya o‘ sha davr uchun o‘ z-o‘ zidan tushunarli emas edi: mahalliy madaniyatga yuqoridan qarash keng tarqalgan holat bo‘ lgan. Pedagogik nuqtai nazardan mazkur tamoyil bevosita ahamiyatga ega, zero o‘ qituvchining o‘ quvchiga va uning madaniy muhitiga munosabati ham xuddi shunday tanlov oldida turadi. Ikkinchi tamoyil bilimning saqlanishi va uzatilishi uchun mas’uliyat bilan bog‘ liq. Uspenskiy yo‘ qolib borayotgan merosni qayd etishni shaxsiy ilmiy qiziqish emas, balki burch sifatida qabul qilgan. Uchinchi tamoyil ilmiy tadqiqot va o‘ qitishning birligida namoyon bo‘ ladi: u ekspeditsiyalarda to‘ plagan materialini bevosita o‘ quv jarayoniga olib kirgan. To‘ rtinchi tamoyil milliy kadrlar tayyorlashga yo‘ naltirilganlik bo‘ lib, u o‘ z ishining davom etishini shaxsiy faoliyati bilan emas, shogirdlar orqali ko‘ rgan. Beshinchi tamoyil esa uzoq muddatli, natijasi darhol ko‘ rinmaydigan mehnatga tayyorlikdir. Mazkur tamoyillarning bugungi dolzarbligi globallashuv sharoitida milliy madaniy o‘ zlikni saqlash vazifasi bilan belgilanadi. O‘ zbekiston Respublikasida moddiy va nomoddiy madaniy merosni asrash, milliy qadriyatlarni yoshlar ongiga singdirish hamda ma’naviy-ma’rifiy ishlar samaradorligini oshirish davlat siyosatining ustuvor yo‘ nalishlaridan biri sifatida belgilangan. Oliy ta’lim tizimini 2030-yilgacha rivojlantirish konsepsiyasida ham kadrlar tayyorlash sifatini oshirish bilan birga ularning ma’naviy-axloqiy tarbiyasi masalalari qayd etilgan. Mazkur vazifalarni amalga oshirishda milliy madaniyat tarixidagi real shaxslar tajribasi muhim pedagogik resurs hisoblanadi.

ADABIYOTLAR TAHLILI

Mazkur tadqiqotning birlamchi manba bazasini V.A.Uspenskiyning o‘ z ishlari tashkil etadi. Ularning eng mashhuri 1924-yilda nashr etilgan Shashmaqom nota yozuvi bo‘ lib, u an’anaviy maqom tizimini ilmiy qayd etishning birinchi yirik tajribasi hisoblanadi. V.M.Belyayev bilan hamkorlikda tayyorlangan turkman musiqasiga bag‘ ishlangan tadqiqot esa ekspeditsiya materiallarini ilmiy umumlashtirish namunasidir. O‘ zbek tadqiqotchilari A.Xojimamatov va M.Muhammadjonovaning olimning ijodiy yo‘ liga bag‘ ishlangan maqolasida uning milliy musiqa madaniyatiga qo‘ shgan hissasi tahlil qilinadi. Mazkur manbalar olim faoliyatining hujjatli asosini tashkil etib, pedagogik rekonstruksiya uchun material beradi. Shaxs namunasining tarbiyaviy ta’siri masalasi xorijiy pedagogikada keng tadqiq etilgan. T.Likona xarakter tarbiyasi konsepsiyasida axloqiy tarbiyaning uch tarkibiy qismini – axloqiy bilim, axloqiy his va axloqiy harakatni – ajratib, maktab va o‘ qituvchining namunasi orqali bu uch qismni birgalikda shakllantirish zarurligini asoslagan. K.Rayan va K.Bolin esa xarakter tarbiyasini amaliyotga joriy etishning aniq yo‘ llarini tahlil qilib, qadriyatlarning alohida fan sifatida emas, ta’lim muassasasining butun hayoti orqali uzatilishini ko‘ rsatishgan. A.Kon mazkur an’anaga jiddiy tanqid bilan chiqqan. U xarakter tarbiyasi dasturlarining ko‘ p qismi o‘ quvchida mustaqil axloqiy mulohazani rivojlantirish o‘ rniga tayyor fazilatlar ro‘ yxatini singdirishga urinishini, bu esa tarbiya emas, indoktrinatsiya ekanini ta’kidlagan. Konning fikricha, haqiqiy axloqiy rivojlanish shaxsning qadriyatlar haqida mustaqil fikr yuritishi va bahs olib borishi orqali sodir bo‘ ladi. A.Bandura ijtimoiy o‘ rganish nazariyasida esa namunaga taqlid mexanizmini tahlil qilib, kuzatish orqali o‘ rganish namuna bilan o‘ rtasida ahamiyatlilik va yaqinlik munosabati mavjud bo‘ lgandagina samarali bo‘ lishini ko‘ rsatgan. D.Xansen o‘ qituvchilik kasbini chaqiriq sifatida tahlil qilgan ishida esa kasbiy tanlovning ma’naviy o‘ lchamini ochib bergan. Milliy ilmiy maktabda ta’limning shaxs ma’naviy dunyoqarashini shakllantirishdagi roli izchil tadqiq etilmoqda. S.Ergashbayevning O‘ zbekiston sharoitida uzluksiz ta’lim tizimi orqali yoshlarning ma’naviy dunyoqarashini rivojlantirishga bag‘ ishlangan ishida uzluksiz ta’lim tizimi yoshlar dunyoqarashini shakllantirishning asosiy institutsional vositasi sifatida ko‘ rib chiqiladi. Mazkur yondashuv tarixiy-pedagogik meros masalasi uchun bevosita ahamiyatga ega: madaniy meros bilan tanishish bir martalik tadbir bo‘ lmasligi, ta’limning barcha bosqichlarida izchil davom etishi lozim. Dunyoqarashning yaxlitligi esa shaxsning o‘ z madaniy ildizlarini anglashi bilan uzviy bog‘ liq. S.Ergashbayevning uzluksiz ta’limni tashkil etish orqali yoshlarning ma’naviy-falsafiy dunyoqarashini yuksaltirishga oid tadqiqotida dunyoqarash yuksalishining mezoni sifatida qadriyatlarni mustaqil tanlash va asoslangan xulosa chiqarish qobiliyati ko‘ rsatiladi. Bu tezis mazkur maqolaning markaziy g‘ oyasi bilan uyg‘ unlashadi: tarixiy shaxs namunasi tayyor xulosa sifatida berilsa, u mustaqil tanlovni rivojlantirmaydi. M.M.Mirzaolimjon o‘ g‘ li va E.Shohbozbekning Yangi O‘ zbekistonning ta’lim siyosati va universitetlarning yangi modellariga bag‘ ishlangan ishida esa zamonaviy universitetning madaniy missiyasi kengayib borayotgani tahlil qilinadi, bu esa milliy meros bilan ishlashni universitet ta’limining tizimli vazifasi sifatida ko‘ rish imkonini beradi.

METODOLOGIK QISM

Tadqiqotning metodologik asosini tarixiy-pedagogik, aksiologik va faoliyatli yondashuvlarning uyg‘ unligi tashkil etadi. Tarixiy-pedagogik yondashuv olim faoliyatini o‘ z davrining ijtimoiy-madaniy konteksti doirasida ko‘ rib chiqish imkonini berdi. Bu muhim metodologik shart hisoblanadi: XX asr boshidagi qarorlarni bugungi mezonlar bilan baholash anaxronizmga olib keladi, o‘ z davri sharoitida esa ularning haqiqiy ma’nosi ochiladi. Shu sababli tahlilda Uspenskiy faoliyati 1920–1940-yillardagi madaniy qurilish va milliy kadrlar tayyorlash vazifalari fonida ko‘ rib chiqildi.

TADQIQOT NATIJALARI

Olib borilgan tadqiqot natijasida V.A.Uspenskiy faoliyatidan qayta tiklanadigan besh guruh pedagogik tamoyil aniqlandi. Birinchi guruh madaniyat sohibiga munosabat bilan bog‘ liq: xalq ijrochilari tadqiqot obyekti emas, bilim manbai va ustoz sifatida ko‘ riladi. Ikkinchi guruh merosga nisbatan mas’uliyatni ifodalaydi. Uchinchi guruh ilmiy tadqiqot va o‘ qitishning birligini belgilaydi. To‘ rtinchi guruh milliy kadrlar tayyorlashga yo‘ naltirilganlikni aks ettiradi. Beshinchi guruh esa natijasi darhol ko‘ rinmaydigan uzoq muddatli mehnatga tayyorlikni ifodalaydi. Mazkur tamoyillarning har biri olim faoliyatining aniq, hujjatlashtirilgan epizodlariga tayanadi.

MUHOKAMA

Shaxs namunasiga asoslangan tarbiyaning samaradorligi masalasi xorijiy pedagogik diskursda keskin polemikaga sabab bo‘ lgan. Bahsning bir qutbida T.Likona asos solgan xarakter tarbiyasi an’anasi turadi. Uning pozitsiyasiga ko‘ ra axloqiy tarbiya bilim, his va harakatning birligini talab qiladi, ta’lim muassasasi esa aniq fazilatlarni ongli va izchil shakllantirishi lozim. Likona bunda o‘ qituvchi va tarixiy shaxslar namunasiga alohida o‘ rin ajratadi: o‘ smir axloqiy me’yorni mavhum qoida sifatida emas, aniq inson timsolida ko‘ rganda qabul qiladi. K.Rayan va K.Bolin ham bu yondashuvni rivojlantirib, qadriyatlar ta’lim muassasasining butun hayoti orqali uzatilishini asoslashgan. A.Kon bu an’anaga tubdan qarshi chiqadi. Uning tahliliga ko‘ ra xarakter tarbiyasi dasturlarining ko‘ p qismi aslida itoatkorlikni shakllantirishga yo‘ naltirilgan bo‘ lib, ular yoshlarga qadriyatlar haqida mustaqil fikr yuritish imkoniyatini bermaydi. Kon tayyor fazilatlar ro‘ yxatini singdirish va namunalarni tanqidsiz taqdim etish axloqiy tarbiya emas, balki indoktrinatsiya ekanini ta’kidlaydi. Uning fikricha, haqiqiy axloqiy rivojlanish shaxsning qarama-qarshi qadriyatlar to‘ qnashgan

vaziyatlarda mustaqil qaror qabul qilishi orqali sodir bo‘ ladi. Mazkur tanqid tarixiy shaxslar merosidan foydalanishga ham bevosita tegishli. A.Banduraning ijtimoiy o‘ rganish nazariyasi bahsga psixologik asos beradi. U kuzatish orqali o‘ rganish mexanizmini tahlil qilib, namunaga taqlid avtomatik sodir bo‘ lmasligini ko‘ rsatgan: u namunaning kuzatuvchi uchun ahamiyatliligi, unga yaqinligi va uning xulq-atvori natija berishi haqidagi tasavvurga bog‘ liq. Mazkur xulosa tarixiy shaxs obrazini idealizatsiya qilishning nima uchun samarasiz ekanini tushuntiradi: erishib bo‘ lmaydigan darajada mukammal obraz kuzatuvchi uchun yaqin bo‘ lmaydi va taqlid mexanizmini ishga tushirmaydi. Aksincha, real qiyinchiliklarni yengib o‘ tgan inson obrazi ancha kuchliroq ta’sir ko‘ rsatadi. D.Xansenning o‘ qituvchilik chaqirig‘ i haqidagi tadqiqoti bahsga yana bir o‘ lcham qo‘ shadi. U kasbiy tanlovni ikki o‘ lchovning kesishuvida ko‘ radi: faoliyatning jamiyat uchun ahamiyati va uning shaxs uchun shaxsiy ma’nosi. Xansenning fikricha, kasbni chaqiriq sifatida qabul qilgan o‘ qituvchi o‘ z ishida ma’no ko‘ radi va shu sababli qiyinchiliklarga bardosh beradi. Mazkur yondashuv Uspenskiy faoliyatini tushunish uchun ham qulay ramka beradi: uning yashash sharoiti qulay bo‘ lmagan ekspeditsiyalarni yillar davomida davom ettirishi karyera mulohazalari bilan emas, aynan ma’no bilan izohlanadi. Mazkur polemikaning Uspenskiy merosiga tatbiqi aniq metodik xulosalarga olib keladi. Likona an’anasi shuni ko‘ rsatadiki, konkret shaxs timsoli mavhum nasihatdan kuchliroq ta’sir ko‘ rsatadi; demak, biografik materialdan voz kechish asossiz. Konning tanqidi esa bu materialni qanday taqdim etish kerakligini belgilaydi: agar u tanqidsiz ulug‘ lash shaklida berilsa, u haqiqatan ham indoktrinatsiyaga aylanadi. Banduraning nazariyasi obrazning yaqin va real bo‘ lishi zarurligini, Xansenning yondashuvi esa namunaning asosiy qiymati yutuqlarda emas, faoliyat ma’nosida ekanini ko‘ rsatadi.

XULOSA

Olib borilgan tadqiqot V.A.Uspenskiy maxsus pedagogik ta’limot qoldirmaganini, biroq uning o‘ ttiz yildan ortiq davom etgan o‘ qituvchilik, ilmiy-ekspeditsion va meros bilan ishlash faoliyati pedagogik tamoyillarni qayta tiklash uchun yetarli hujjatli asos berishini ko‘ rsatdi. Bunday rekonstruksiya metodologik jihatdan asoslangan, biroq u tadqiqotchidan o‘ z talqinini manbaning haqiqiy mazmunidan aniq farqlashni talab qiladi.

THE IMPORTANCE OF DEVELOPING THE PROFESSIONAL CULTURE OF INTERNAL AFFAIRS OFFICERS IN STATE ADMINISTRATION

Atabayev Qodirjon Komilovich
Deputy Head for Spiritual and Educational Work of the Advanced training Institute of the Ministry of Internal Affairs of the Republic of Uzbekistan

Abstract: *This article describes the socio-philosophical aspects of the development of the moral culture of internal affairs managers. When talking about professional moral culture, the main attention should be paid to the philosophical analysis of the term ethics, which is its core. Professional moral culture is a product of actions based on the knowledge and experience that is directly manifested in the work of a person. Development of the professional and ethical culture of internal affairs officers in the state administration is one of the criteria for the effectiveness of internal affairs bodies.*

Key words: *professional and ethical culture, etiquette, behavior, morals, education, code.*

DAVLAT BOSHQARUVIDA ICHKI ISHLAR XODIMLARINING KASBIY MADANIYATINI RIVOJLANTIRISHNING AHAMIYATI

Annotatsiya: *Mazkur maqolada davlat boshqaruvidagi ichki ishlar xodimlari kasbiy madaniyatini rivojlantirishning ahamiyatiyoritilgan. Kasbiy axloqiy madaniyat xususida so‘z borar ekan, bunda asosiy e’tiborni uning o‘zagi bo‘lgan axloq atamasining falsafiy tahliliga qaratmoq lozim. Kasbiy axloqiy madaniyat bevosita insonning mehnat faoliyatida namoyon bo‘luvchi, uning olgan bilim va tajribasiga asoslangan harakatlar mahsulidir. Davlat boshqaruvidagi ichki ishlar xodimlarining kasbiy-axloqiy madaniyatini rivojlantirish ichki ishlar organlari faoliyati samaradorligining mezonlaridan biridir.*

Kalit so‘zlar: *kasbiy-axloqiy madaniyat, etiket, xulq, axloq, tarbiya, kodeks.*

ЗНАЧЕНИЕ РАЗВИТИЯ ПРОФЕССИОНАЛЬНОЙ КУЛЬТУРЫ СОТРУДНИКОВ ОРГАНОВ ВНУТРЕННИХ ДЕЛ В ГОСУДАРСТВЕННОМ УПРАВЛЕНИИ

Аннотация: *В данной статье рассмотрены социально-философские аспекты развития нравственной культуры руководителей внутренних дел. Говоря о профессиональной моральной культуре, основное внимание следует уделить философскому анализу термина этика, который составляет ее суть. Профессиональная моральная культура – это продукт действий, основанный на знаниях и опыте, который непосредственно проявляется в деятельности человека. Развитие профессиональной и этической культуры сотрудников органов внутренних дел в органах государственного управления является одним из критериев эффективности органов внутренних дел.*

Ключевые слова: *профессионально-этическая культура, этикет, поведение, мораль, воспитание, кодекс.*

Introduction. Professional ethical culture is an area of learning in the series of ethical sciences that studies the ethical norms and principles specific to each profession and applies them to life. There is no absolute, eternal and unchanging moral culture in society. Morality is a historically changing and relatively independent social phenomenon. With the change of times, as a result of the development of production, science and technology, and the deepening of the division of social labor, new spheres of activity began to emerge, each of which performs a specific social function. As result of the performance of that specific social duties by people working in such fields, these duties and obligations created the basis for reflection of professional ethical rules and norms of behavior. After all, as noted in the research, the emergence of professional ethical culture was formed the consequence of continuous division of labor.

Literature review. These days, every area of society is adapting to the pace of modern development. The modern society demands from the personnel who follow the rules and criteria specializing in a certain narrow specialty to observe the general moral norms and the ethical rules of the profession. French philosopher René Deckard said in his research about moral culture, "I had good teachers like everyone else. They taught me geography and physics. But no one ever taught me how to behave in society. Quoting the words "he did not teach the rules of communication education", he showed that the

formation of moral culture is related to the worldview and personal position of a person [1. p. 17]. In that, it can be seen that the need of having professional ethics is taken into account for every industry employee.

Research shows that people working on the basis of a special standard oriented of the professional field, and meeting with management or women in their work activities, find it inappropriate to shake hands first, only if they extend their hands, a person can call to exchange greetings and it is recognized that individuals may have a true professional ethical culture.

In highlighting the professional ethical culture, it is necessary to pay special attention to the following "golden rules of etiquette" presented in research:

- always looking for good things;
- creating a good impression on the team and leaders during the service activity;
- faithfully serving the Motherland;
- gaining mutual respect and trust by being friendly and kind with colleagues;
- being fair;
- being an example to others with good behavior;
- being generous, honest, kind and tolerant in personal life;
- able to keep any information or important secret;
- rules such as being an example with one's good behavior and professional skills are included among the golden rules [3. p. 194–212].

Religious views are also important in the formation and development of moral culture. For example, in Islam and its sacred sources, special attention is paid to moral rules, in which constant kindness, forgiveness, patience, politeness, respect for parents, decency, honesty, loyalty to the nation are highly valued.

Professional ethics is directly related to the science of philosophy, while the philosophy of ethics studies the history of the emergence of ethics and the laws of its development, while professional ethics analyzes its practical aspects specific to a certain profession. While philosophy deals with the theoretical issues of ethics, professional ethical culture studies ethical rules and norms used in society and social relations related to production.

When talking about moral culture, it is essential to note the philosophical analysis of the core term of the word morality. Morality is derived from the Russian "moral" or the Latin "mores", "moralis", which means "behavior", "habit". Morality is a specific form of social consciousness, a sum of people's attitudes towards each other in their social and personal life, that is, their actions. Also, the term "akhlaq", means "morals" or "habits" which is the plural expression of the Arabic word "khulq" [3. p. 7].

Philosophical analysis of morality and the science that studies its principles is called "Ethics" and is derived from the Greek and Greek words "ethos" and its meaning in translation includes the meaning of "manner" [4.p. 17].

The science of ethics is part of philosophy, and it studies moral principles, norms, as well as the source and origin of the categories of morality.

Research methodology. Professional culture is not displayed only loyalty to values, but also in providing quality social relations in accordance with people's needs. Professional culture regulates the professional duties of internal affairs officers in the state administration through the laws of the Republic of Uzbekistan. The activity of protecting human rights is closely related to professional ethical culture focusing on respecting constitutional rights and freedoms, implementing the rules and standards of professional and social relations, utilizing professional skills, complying with official regulations, adhering to principles laid down in anti-corruption laws, respecting the dignity and value of individuals, providing good service, showing politeness, maintaining physical fitness and socio-psychological well-being.

Nowadays, the attention paid by the state to the high standards of the activity of representatives of law-enforcement agencies not only shapes their professionalism, but also the qualities of the internal affairs officers related to the professional ethical culture. Therefore, the formation of the professional ethical culture of the internal affairs officers in the state administration, on the one hand, shows their respect for universal values and human qualities, and on the other hand, they become loyal, trustworthy representatives of society, who pay attention to social norms and rules, and as shown in public documents the attributive features of the activities of internal affairs officers clearly reflect in the way of protecting people's rights. Development of the professional ethical culture of the internal affairs officers in the state administration is one of the criteria for the effectiveness of work activity of the internal affairs bodies, which today is also mirrored in the public's trust and support of the citizens towards them. After all, public opinion embodies the reputation of internal affairs bodies in front of citizens.

Analysis and results. In the conditions of the new Uzbekistan, the positive attitude of the public regarding internal affairs officers under the state administration or internal affairs officers in general requires accepting not only their personality but their professional ethical culture [5].

Negative public opinion is a sign of long-term, complex problems in society, which mainly means the existence of problems such as corruption, use of official position for one's own goals, and abuse of official authority.

The manifestation of diligent performance of professional duties of the internal affairs officers in the state administration, who have long-term work experience and adherence to the principles of professional ethical culture when communicating with citizens, is expressed both in life experiences, and in many scientific studies [6. p. 9].

In today's modern studies, the development or monitoring of the professional ethical culture of internal affairs employees in the state administration is determined by conducting various sociological surveys. The low professional ethical culture of the internal affairs officers in the state administration or their unfitness for their duties is demonstrated in their inability to communicate with citizens, low communication culture, use of rude expressions in conversation, and retorts in offensive tones. This creates the basis for the violation of professionalism among internal affairs officers and the deformation of the professional ethical culture. As a result, it leads to the formation of negative perceptions about the positive image and professional ethical culture of internal affairs employees in the state administration.

In order to prevent such professional deformations, it necessitates continuous improvement of skills and professional training of internal affairs officers in the state administration and as an employee of law enforcement agencies it forms a positive attitude to the universal values that shape the foundation of professional ethical culture.

Conclusion/Recommendations. Professional ethical culture as a network in the field of general professional sciences serves to prepare comprehensively mature specialists in the future. However, it should be emphasized that in the course of professional activity, internal affairs officers encounter situations that do not correspond to the principles of universal culture due to their duties. In the multi-ethnic society like ours as different cultures live together, it involves professional professionalism and moral integrity of internal affairs officers since they may encounter citizens who disregard general cultural values, disrespect each other, have high tendency to criminal environment. After all, professional development forms an attitude based on legal, professional norms and rules and values, and determines the professional growth prospects of employees.

PEDAGOGICAL SCIENCES

Talabalarning kollaborativ loyiha faoliyatini rivojlantirishda kouching ko‘nikmalaridan foydalanish asoslarining tizimli sharhi.
I.Mirsaidov, S.Otaxanova..... **950**
Ingliz tilida kreativ fikrlash ko‘nikmalarini rivojlantirishda ta’lim texnologiyalaridan foydalanish.
S.Abdulaxatova..... **955**
Umumta’lim tizimida fonetik mashqlarning tasniflanishi.
D.Ganiyeva..... **960**
Bo‘lajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirishning mazmun-mohiyati va tarkibiy-funksional tahlili.
M.Nuridinova..... **967**
The significance of crowdsourcing technology in developing active citizenship competence among university students.
A.Khudaynazarov..... **972**
Raqamli muloqot va etika muammosining pedagogik tadqiqotlardagi evolyutsiyasi.
M.Kurbanbayeva..... **977**
Boshlang‘ich sinf o‘quvchilarining nutqini rivojlantirishning o‘ziga xos lingvodidaktik xususiyatlari.
G.Orazbaeva..... **982**
Talabalarda umumiy jismoniy chidamlilikni rivojlantirish.
A.Boboyev..... **987**
Muammoli va loyihaviy yondashuvlar asosida differensial tenglamalar bo‘yicha kompetensiyalarni shakllantirish.
S.Abduvakhobov..... **991**
Odil Yoqubovning “Diyonat” romanining ekologik-ta’limiy salohiyati: pragmatik yondashuv asosida tahlil.
S.Dadabayeva..... **996**
Raqamli ta’lim vositalari asosida bo‘lajak texnologik ta’lim o‘qituvchilarining metodik kompetensiyasini rivojlantirish.
G.Abduqahhorova..... **1003**
Sun’iy intellekt va kompyuter algebra tizimlari integratsiyasi asosida integral hisoblashni o‘qitishning takomillashtirilgan metodik modeli.
G.Eshbekova..... **1008**
Bo‘lajak biologiya o‘qituvchilarida PISA–2025 talablari asosida antropotsen sharoitida ekologik mas’uliyatli faoliyat yuritish kompetensiyasini rivojlantirish metodikasi.
Q.Niyozov..... **1013**
Jismoniy tarbiya va sport mashg‘ulotlarida harakat kunikma va malakalarining shakllanish xususiyatlari.
B.Boyboboev..... **1021**
Differensial tenglamalarni o‘qitishda zamonaviy axborot texnologiyalarining didaktik imkoniyatlari.
S.Abduvakhobov..... **1025**
Kirxgof qoidalariga oid bo‘lajak muhandislarga nostandart topshiriqlarni o‘rgatish metodikasi.
J.Baratov..... **1030**
Ichki ishlar organlari xodimlarining kasbiy malakasini oshirishning mexanizmlari.
I.Kuchimov..... **1037**
Badiiy asar matnlarni o‘qitish jarayonida boshlang‘ich sinf o‘quvchilarining nutqiy ko‘nikmalarni rivojlantirish.
M.Abdijamilova..... **1041**
Mamlakatimizda basketbol o‘yinining rivojlanish bosqichlari.
R.Dadabayev..... **1045**
Oliy ta’lim muassasalarida chet tili darslarida talabalarning og‘zaki ijodiyligini rivojlantirishning metodik asoslari.
X.Ruziyev..... **1048**
O‘zbekistonda oliy ta’lim muassasalari boshqaruvi kengashlari: vakolatlari va vazifalari.
A.Yakubov..... **1054**
Межкультурная коммуникация в современном образовательном пространстве: трансформация форм, барьеров и стратегий взаимодействия.
К.Камалова..... **1058**
Neyropedagogik yondashuv asosida zamonaviy ta’lim jarayonini takomillashtirish.
K.Yusupova..... **1068**
Ekologiya yo‘nalishi talabalarining ingliz tilida kasbiy nutq ko‘nikmalarini raqamli ta’lim texnologiyalari asosida rivojlantirish usullari.
S.Ergasheva..... **1073**

Raqamli ta’lim vositalari asosida bo‘lajak texnologik ta’lim o‘qituvchilarining metodik kompetensiyasini rivojlantirish.
G.Abduqahhorova..... **1081**
Bo‘lajak tarjimonlarning kasbiy-yo‘naltirilgan muloqot kompetensiyasini TESOL metodikasi asosida rivojlantirishning pedagogik mexanizmlari.
S.Azimova..... **1089**
Oliy ta’limning raqamli ekotizimida bo‘lajak filologlarning transprofessional kross-madaniy kompetensiyasini rivojlantirish metodikasini takomillashtirish.
G.Musayeva..... **1097**
Ingliz xalq og‘zaki ijodidagi sotsiomadaniy realiyalarni o‘qitish asosida talabalarning madaniyatlararo muloqot kompetensiyasini takomillashtirish.
R.Maxsudaliyeva..... **1102**
Methodological strategies based on the integration of TBLT elements and a system of communicative tasks in oral speech classes.
H.Muxammadiyeva..... **1109**
Sun’iy intellekt vositalaridan foydalanish asosida dasturlash fanlarini o‘qitish samaradorligini oshirishning pedagogik imkoniyatlari.
N.Niyazova..... **1115**
Dual ta’lim jarayonida talabalarning professional pedagogik kompetentligini shakllantirishning metodologik asoslari.
N.Qo‘ysinaliyev..... **1119**
Kasbiy ta’lim tashkilotlarida ishlab chiqarish amaliyotlarini tashkil etish metodikasi.
N.Qo‘ysinaliyev..... **1123**
Tarixiy manbalarni tahlil qilishda sun’iy intellekt va an’anaviy manbashunoslik yondashuvlarini integratsiyalash metodikasi.
S.Ergashbayev..... **1127**
Zamonaviy ta’limda uzluksiz kasbiy rivojlanishning ahamiyati.
N.Usmanova, M.Najmitdinov..... **1132**
Bo‘lajak tarix o‘qituvchilarining aksiologik pozitsiyasini rivojlantirishda pedagogik amaliyotning imkoniyatlari.
J.Yuldashev..... **1138**
Analysis of methods for assessing students’ speaking skills through interactive digital platforms (Kahoot, Quizizz, Padlet) in English lessons.
M.Madaminova..... **1141**
Ishtirokchi va immersiv jurnalistika: iste’molchi-ishlab chiqaruvchi, fuqarolik kontenti va VR reportajning imkoniyatlari hamda etik muammolari.
N.Xojanazarova..... **1145**
Tibbiyot sohasidagi lotin terminlarini o‘qitish texnologiyasi.
G.Sayimova..... **1149**
Boshlang‘ich ta’limda ingliz tilini o‘qitishda Valdorf pedagogikasidan foydalanishning nazariy-metodologik asoslari.
K.Qobilova..... **1152**
Maktab o‘quvchilarining sog‘lom turmush tarzini shakllantirishda gimnastika mashg‘ulotlarining o‘rni.
Z.Mamatqodirov..... **1157**
Methods for developing analytical thinking in history students through historical sources.
D.Vakhobov..... **1161**
Methodology for developing students’ linguistic thinking through proverbs and tongue twisters in primary school mother tongue lessons.
S.Ollaberganova..... **1166**
Maktabda ingliz tilini (EFL) o‘qitish amaliyotida sun’iy intellekt: muammolar va kasbiy rivojlanishga bo‘lgan ehtiyojlar.
G.Gasanova..... **1169**
Oliy ta’lim muassasalari pedagoglarining axborot xavfsizligi ko‘nikmalarini shakllantirishning dolzarb masalalari.
I.Shahriyorov..... **1174**
Yuqori sinf o‘quvchilarida refleksiv qaror qabul qilish kompetensiyasini baholash mezonlari va indikatorlari.
O.Temirova..... **1177**
Adabiyot darslarida hamkorlikka asoslangan ta’lim texnologiyalaridan foydalanish metodikasi.
I.Radjabova..... **1182**

Pragmatik topshiriqlar asosida o‘quvchilarning adabiy-nutqiy kompetensiyasini rivojlantirish.
G.Rasulova..... **1185**
Zamonaviy ta’lim sharoitida talabalarning bilishga qiziqishini rivojlantirishning pedagogik imkoniyatlari.
I.Raximov..... **1189**
Ta’lim jarayoniga o‘qitishning zamonaviy pedagogik va axborot-kommunikatsiya texnologiyalarini qo‘llash.
S.Egamkulov..... **1194**
Sun’iy intellekt texnologiyalari yordamida 7-sinf o‘quvchilarining ingliz tilida gapirish ko‘nikmasini rivojlantirish.
D.Shoisayeva..... **1197**
Tashkiliy madaniyatni shakllantirishda rahbarning psixologik yetakchilik qobiliyatlari.
U.Turaxanov..... **1204**
The AIDR-V instructional model for developing English writing competence among grade 7-9 learners.
A.Muminkhujayev..... **1208**
Sun’iy intellekt davrida shaxs avtonomiyasining transformatsiyasi: algoritmik qarorlar va inson tanlovi.
U.Tilavova..... **1215**
Tabiiy fanlar fakultetlari talabalarining kasbiy kompetensiyalarini ingliz tili darslarida integrativ yondashuv asosida rivojlanitirish texnologiyasi.
M.Tursunboyeva..... **1223**
Malaka oshirish tizimida rahbar-kadrlarning soft-kompetensiyalarini rivojlantirishning korporativ-pedagogik shart-sharoitlari.
U.Axrorova..... **1229**
Oliy ta’lim muassasalari boshqaruv kadrlarida sun’iy intellekt kompetensiyalarini rivojlantirish.
G.Ibragimova..... **1233**
Инновационные подходы к обучению иностранному языку: цифровые технологии, интерактивные методы и искусственный интеллект.
О.Махмудова..... **1238**
Совершенствование механизмов развития корпоративной этики педагогов.
Н.Рахматуллаева..... **1244**
Shaxsga yo‘naltirilgan ta’lim va shaxsga xos universal ta’limiy faoliyatlarning nazariy-qiyosiy tahlili.
N.Shomirzayeva..... **1250**
Bo‘lajak pedagoglarda g‘oyaviy-mafkuraviy kompetentlikni rivojlantirish pedagogik muammo sifatida.
O.Xo‘jaqulov..... **1254**
Boshlang‘ich sinflarda axborot texnologiyalari fanini o‘qitish uchun takomillashtirilgan dasturiy ta’minotni joriy etish metodikasi.
J.Ergashev..... **1258**
Bo‘lajak boshlang‘ich ta’lim pedagoglarida inklyuziv kompetensiyaning aksiologik-refleksiv mexanizmlari: kasbiy identitet transformatsiyasi kontekstida.
N.Jumaboyev..... **1265**
Zamonaviy ta’lim jarayonida interfaol metodlardan foydalanish texnologiyalari.
U.Boyzaqova, N.Isroilova..... **1268**
STEAM – ta’lim texnologiyasi asosida boshlang‘ich sinf o‘quvchilarini fazoviy tasavvurlarini rivojlantirishning amaliyotdagi holati tahlili.
G.So‘fiboyeva..... **1273**
Bo‘lajak boshlang‘ich ta’lim o‘qituvchilarining refleksiv kompetensiyasini rivojlantirishning pedagogik imkoniyatlari.
M.Jumayeva..... **1276**
Viktor Uspenskiy pedagogik qarashlarining bo‘lajak o‘qituvchilar kasbiy-ma’naviy tayyorgarligini rivojlantirishdagi ahamiyati.
K.Raximov..... **1283**
The importance of developing the professional culture of internal affairs officers in state administration.
Q.Atabayev..... **1287**
