Farg‘ ona viloyatining Chimyon tumanida joylashgan “Chimyon” sihatgohida quyidagi turlarni topdik: *Adalia tetraspilota, Coccinella septempunctata, Hippodamia variegate, Psyllobora vigintiduopunctata, Calvia punctata, Oenopia conglobate, Propylaea quatuordecimpunctata, Scymnus subvillosus, Parexochomus nigromaculatus.* Bu turlarni aksariyat imago holatida uchratdik, faqatgina *Scymnus subvillosus* turini ham lichinka ham imago bosqichlariga duch keldik. *Parexochomus nigromaculatus* turi boshqa turlarga nisbatan juda ham ko‘ p uchradi, bir tup yosh oddiy qarag‘ ay daraxtidan 56 ta koksinellidni terdik. Daraxt shoxlarida esa yangi tark etilgan *Parexochomus nigromaculatus* turining g‘ umbaklari ham kuzatuvimizdan qochmadi.

Bu hududda tarqalgan koksinellidlarning voltinlik va qishlovga kirish xususiyatlari boshqa mintaqalarga nisbatan o‘ zgacha bo‘ lib, bunga asosiy sabab bu hududning o‘ ziga xos bo‘ lgan havo harorati asosiy o‘ rinni egallaydi. Masalan, barcha hududlarda tarqalgan *Coccinella septempunctata* turimiz agrolanshaftlarda yoz davomida ikki uch marotaba avlod bersa, tog‘ oldi va tog‘ hududida ikki marta yoki bir marta avlod berishi kuzatildi, *Stethorus pusillus* turimiz g‘ o‘ za maydonlari va mevali bog‘ larda yoz davomida 4 martagacha nasl bergan bo‘ lsa, tog‘ oldi hududida ikki marta avlod qoldirdi. Bu hududda tarqalgan koksinellidlarning qishlovdan chiqishi aprel oyining ikkinchi dekadasiga to‘ g‘ ri kelsa, qishlovga kirishi oktyabr oyining birinchi dekasiga to‘ g‘ ri keldi. Albatta bu holatlar haroratning keskin o‘ zgarishi va bu hududdagi koksinellidlarning oziqlarining holatiga qarab o‘ zgarishi mumkin.

a **b** **c** **d**

1-rasm. a-*Calvia muiri*, b-*Coelophora quadrivittata*, c-*Brachiacontha ursine*, d - *Novius yemensis* (original).

Xulosa: Xulosa qilib aytadigan bo‘ lsak Farg‘ ona vodiysi tog‘ oldi va tog‘ hududlaridan jami 27 tur koksinellidlar tarqalganligi ilk bor aniqlandi. Tadqiqot jarayonida shu hududda uchragan turlar ichidan hududda topilgan *Calvia muiri, Coelophora quadrivittata, Brachiacontha ursine , Novius yemenensis* kabi turlar O‘ zbekiston faunasi uchun yangi turlar hisoblandi.Ushbu turlar juda ham sonli tarqalib, muhofaza muhtoj turlar deb topildi.

NAMANGAN VILOYATI SUV HAVZALARINING CYANOPHYTA FLORASI VA ULARNING EKOLOGIK-BIOINDIKATSION XUSUSIYATLARI

Qo‘chqarova Mashxura Qodirjon qizi
“University business and science” o‘qituvchisi
ORCID: 0009-0009-5477-2392
E-mail: mashkhurakuchkarova01@gmail.com

Annotatsiya: *Ushbu maqolada Namangan viloyati suv havzalarida uchraydigan Cyanophyta florasining ekologik xususiyatlari va bioindikatsion imkoniyatlari ilmiy adabiyotlar hamda hududning tabiiy-ekologik sharoitlari asosida tahlil qilindi. Tadqiqotda Cyanophyta vakillarining suv muhitidagi tarqalishi, plankton, bentos va perifiton shakllarida rivojlanishi, harorat, yorug‘lik, pH, suv oqimi hamda azot va fosfor birikmalarining ularning rivojlanishiga ta’siri ko‘rib chiqildi. Shuningdek, sianobakteriyalar biomassasining ortishi, dominant turlarning shakllanishi va “suv gullashi” jarayonlari evtrofikatsiya holatini baholashdagi ahamiyati yoritildi. Namangan viloyatidagi daryo, kanal, suv ombori va boshqa suv obyektlarining antropogen yuklamasi qishloq xo‘jaligi faoliyati, mineral o‘g‘itlar, oqova suvlar va suv rejimining o‘zgarishi bilan bog‘liq holda baholandi. Tahlil natijasida Cyanophyta tur tarkibi, dominantlik darajasi, biomassasi va mavsumiy dinamikasidan suv havzalarining ekologik holatini kompleks monitoring qilishda foydalanish mumkinligi asoslandi. Maqolada Namangan viloyati suv havzalari uchun floristik, ekologik va bioindikatsion monitoringni birlashtiruvchi taklifiy model ishlab chiqildi.*

Kalit so‘zlar: *Cyanophyta, sianobakteriyalar, algoflora, suv havzalari, bioindikatsiya, evtrofikatsiya, ekologik monitoring, Namangan viloyati.*

ФЛОРА CYANOPHYTA ВОДОЕМОВ НАМАНГАНСКОЙ ОБЛАСТИ И ИХ ЭКОЛОГО-БИОИНДИКАЦИОННЫЕ СВОЙСТВА

Аннотация: *В статье проанализированы экологические особенности и биоиндикационные возможности представителей Cyanophyta водоемов Наманганской области на основе научной литературы и природно-экологических условий региона. Рассмотрены распространение цианобактерий в водной среде, их развитие в планктоне, бентосе и перифитоне, а также влияние температуры, освещенности, pH, скорости течения и соединений азота и фосфора. Особое внимание уделено увеличению биомассы, формированию доминирующих видов и процессам «цветения» воды как показателям эвтрофикации. Антропогенная нагрузка на реки, каналы, водохранилища и другие водные объекты региона рассмотрена в связи с сельскохозяйственной деятельностью, применением минеральных удобрений, поступлением сточных вод и изменением водного режима. Показано, что видовой состав, степень доминирования, биомасса и сезонная динамика Cyanophyta могут использоваться для комплексного мониторинга экологического состояния водоемов. Предложена модель мониторинга, объединяющая флористические, экологические и биоиндикационные показатели для водных объектов Наманганской области.*

Ключевые слова: *Cyanophyta, цианобактерии, альгофлора, водоемы, биоиндикация, эвтрофикация, экологический мониторинг, Наманганская область.*

CYANOPHYTA FLORA OF WATER BODIES OF NAMANGAN REGION AND THEIR ECOLOGICAL-BIOINDICATIVE PROPERTIES

Annotation: *The article analyzes the ecological characteristics and bioindicative potential of Cyanophyta occurring in water bodies of Namangan Region on the basis of scientific literature and the natural and ecological conditions of the region. The distribution of cyanobacteria in aquatic environments, their development as planktonic, benthic and periphytic forms, and the effects of temperature, light, pH, water flow, nitrogen and phosphorus compounds were considered. Particular attention was paid to biomass increase, dominance patterns and algal blooms as indicators of eutrophication. Anthropogenic pressure on rivers, canals, reservoirs and other water bodies was assessed in relation to agricultural activity, mineral fertilizers, wastewater inputs and changes in the hydrological regime. The analysis demonstrates that species composition, dominance, biomass and seasonal dynamics of Cyanophyta*

can be used for integrated assessment of aquatic ecosystem condition. A monitoring model combining floristic, ecological and bioindicative parameters was proposed for water bodies of Namangan Region.

Keywords: *Cyanophyta, cyanobacteria, algal flora, water bodies, bioindication, eutrophication, ecological monitoring, Namangan Region.*

KIRISH

Suv ekotizimlari biologik xilma-xillikni saqlash, moddalar aylanishi va hududlarning ekologik barqarorligini ta'minlashda muhim o' rin tutadi. Suv havzalarining ekologik holatini baholashda fizik-kimyoviy ko' rsatkichlar bilan bir qatorda biologik indikatorlardan foydalanish tobora kengayib bormoqda. Mikroalgalar va sianobakteriyalar suv muhitidagi o' zgarishlarga tez javob berishi sababli ekologik monitoring uchun muhim biologik guruhlardan hisoblanadi [1, 2].

Cyanophyta an'anaviy algologik adabiyotlarda ko' k-yashil suvo' tlar sifatida yuritilgan bo' lib, zamonaviy biologiyada ko' pincha sianobakteriyalar nomi bilan ifodalanadi. Ularning ayrim vakillari yuqori harorat, yorug' lik, ozuqa elementlari miqdori va suvning gidrologik rejimidagi o' zgarishlarga moslasha oladi. Shu sababli sianobakteriyalar jamoasining tarkibi va biomassasidagi o' zgarishlar suv ekotizimlarining trofik holati haqida muhim ma'lumot beradi [3, 4].

Namangan viloyati Farg' ona vodiysining sharqiy qismida joylashgan bo' lib, hududda daryolar, kanallar, suv omborlari, kollektor-drenaj tarmoqlari va turli sun'iy suv havzalari mavjud. Sug' orma dehqonchilikning rivojlanganligi suv obyektlariga tushadigan antropogen yuklamaning shakllanishiga sabab bo' ladi. Mazkur sharoitda Cyanophyta florasining ekologik xususiyatlarini o' rganish hudud suv havzalarining ekologik holatini baholash uchun dolzarb hisoblanadi.

Suv havzalarining ekologik holatini faqat fizik-kimyoviy parametrlar asosida baholash ayrim hollarda yetarli bo' lmasligi mumkin. Chunki biologik jamoalar muhitdagi o' zgarishlarning ma'lum vaqt davomida shakllangan integrallashgan ifodasini beradi. Shu sababli suv organizmlarining tur tarkibi, dominantlik darajasi va mavsumiy dinamikasi ekologik monitoringning muhim komponentlari hisoblanadi [1, 2].

Tadqiqotning maqsadi - Namangan viloyati suv havzalarida Cyanophyta florasining ekologik xususiyatlari va bioindikatsion ahamiyatini ilmiy adabiyotlar hamda hududning ekologik sharoitlari asosida tahlil qilish.

Tadqiqot vazifalari quyidagilardan iborat: Cyanophyta ning suv ekotizimlaridagi ekologik rolini tahlil qilish; ularning plankton, bentos va perifiton shakllarini tavsiflash; harorat, yorug' lik, pH, suv oqimi, azot va fosforning sianobakteriyalar rivojlanishiga ta'sirini yoritish; eutrofikatsiya va "suv gullashi" jarayonlarida Cyanophyta ning ahamiyatini baholash; Namangan viloyati suv havzalari uchun bioindikatsion monitoring modelini taklif etish.

ADABIYOTLAR TAHLILI

Cyanobacteria suv ekotizimlarining holatini baholashda bioindikator va bioreporter sifatida qo' llanishi mumkinligi Mateo va hammualliflar tomonidan batafsil yoritilgan. Mualliflar sianobakteriyalarning ekologik omillarga javob reaksiyasi va ayrim taksonlarning atrof-muhitdagi o' zgarishlarni aks ettirish imkoniyatlarini ko' rsatgan [1]. Daryo mikroalgalaridan biologik monitoringda foydalanish bo' yicha tadqiqotlarda esa tur tarkibi, jamoa tuzilishi va ekologik xususiyatlar suv muhitining holatini baholashda muhim indikatorlar ekanligi qayd etilgan [2].

Cyanobakterial "gullash" jarayonlari bo' yicha zamonaviy tadqiqotlar bu hodisaning ozuqa elementlari bilan boyish, suv haroratining oshishi, suvning turg' unlashuvi va iqlim omillari bilan bog' liqligini ko' rsatadi [3, 4, 9]. Evtrofikatsiya kuchaygan suv havzalarida ayrim sianobakteriyalar tez ko' payib, jamoada ustunlik qilishi mumkin [11, 12]. Bunday jarayonlar suvning shaffofligi, kislorod rejimi va ekologik sifatiga ta'sir ko' rsatadi.

O' zbekiston va Farg' ona vodiysi suv havzalari algoflorasiga oid tadqiqotlar ham Cyanophyta vakillarining mahalliy suv obyektlarida muhim guruh ekanligini ko' rsatadi. Eskiyer suv ombori algoflorasining sistematik tahlilida Cyanophyta vakillari alohida guruh sifatida ko' rib chiqilgan [5]. Katta Namangan va Katta Farg' ona kanallari algoflorasining taksonomik tarkibiga oid tadqiqotlar esa sug' orish kanallarida algalar xilma-xilligini o' rganishning ilmiy-amaliy ahamiyatini ko' rsatadi [6].

Cyanobacteria ekologiyasi bo' yicha fundamental manbalarda ularning turli ekologik sharoitlarga moslashish mexanizmlari, plankton va bentos shakllari, azot fiksatsiyasi hamda yorug' lik va haroratga munosabati batafsil yoritilgan [7, 14, 19]. Azot va fosforning ortiqcha tushishi esa sianobakterial biomassaning ko' payishi va suv "gullashi" jarayonlari bilan bog' lanadi [8, 9, 11].

Bundan tashqari, sianobakteriyalarning ekologik monitoringdagi ahamiyati ularning muayyan ekologik omillarga sezgirligi bilan ham izohlanadi. Ayrim turlar oziqa elementlari ko' paygan sharoitlarda tez rivojlanishi mumkin bo' lsa, boshqa guruhlar suv oqimi, yorug' lik yoki substrat xususiyatlariga nisbatan o' ziga xos munosabat bildiradi [7, 15].

Shuning uchun Cyanophyta jamoasining o‘ zgarishini suv havzasining ekologik sharoitlari bilan birgalikda baholash zarur.

Tadqiqot tahliliy-ekologik yondashuvga asoslandi. Unda Cyanophyta ekologiyasi, bioindikatsiya, evtrofikatsiya va chuchuk suv algoflorasi bo‘ yicha ilmiy adabiyotlar umumlashtirildi hamda Namangan viloyatining suv obyektlari uchun qo‘ llash mumkin bo‘ lgan ekologik mezonlar tizimlashtirildi. Mahalliy sharoitni tavsiflashda daryo, kanal, suv ombori va boshqa suv obyektlarining gidrologik xususiyatlari hamda antropogen yuklama omillari hisobga olindi.

Tahlilda asosiy ekologik mezonlar sifatida tur tarkibi, dominant taksonlar, rivojlanish darajasi, mavsumiy dinamika, plankton-bentos-perifiton shakllari, harorat, yorug‘ lik, pH, suv oqimi, azot va fosfor birikmalari hamda antropogen ta’sir darajasi olindi. Bioindikatsion baholashda Cyanophyta ning mavjudligi bitta ko‘ rsatkich sifatida emas, balki fizik-kimyoviy va biologik ma’lumotlar bilan birgalikda talqin qilinishi zarurligi qabul qilindi [1, 2].

Suv havzalarini ekologik jihatdan baholashda biologik indikatorlardan foydalanish uchun birinchi navbatda tur tarkibi aniqlanadi. Keyingi bosqichda dominant taksonlar, ularning rivojlanish darajasi va mavsumiy o‘ zgarishlari baholanadi. Fizik-kimyoviy ma’lumotlar ushbu biologik ko‘ rsatkichlar bilan birlashtirilganda suv havzasining ekologik holati haqida kompleks xulosa chiqarish imkoniyati oshadi.

Muhim metodologik cheklov shundan iboratki, mazkur maqolada yangi dala o‘ lchovlari asosida olingan pH, harorat, azot, fosfor yoki biomassa qiymatlari sun’iy ravishda kiritilmagan. Natijalar mavjud ilmiy manbalar va ekologik qonuniyatlarning Namangan viloyati suv havzalariga nisbatan tahliliy talqiniga asoslangan.

Namangan viloyati suv havzalari gidrologik va antropogen sharoitlarning xilma-xilligi bilan tavsiflanadi. Daryolarda oqim nisbatan faol bo‘ lsa, kanallar va ayrim suv omborlarida suv almashinuvi boshqariladigan yoki mavsumiy xususiyatga ega. Bunday farqlar algalar jamoasining tarkibi va rivojlanishiga bevosita ta’sir qiladi.

Suv oqimi pasaygan, oziqa moddalari to‘ plangan va yorug‘ lik yetarli bo‘ lgan uchastkalarda planktonik sianobakteriyalar biomassasi oshishi uchun qulay sharoit yuzaga kelishi mumkin. Aksincha, oqim tez bo‘ lgan suv obyektlarida planktonik organizmlarning uzoq vaqt davomida bir joyda to‘ planishi qiyinlashadi. Bunday sharoitlarda substratga birikuvchi bentik va perifiton shakllarining ekologik ahamiyati ortishi mumkin.

Cyanophyta ekologik jihatdan planktonik, bentik va perifiton shakllarda uchrashi mumkin. Planktonik vakillar suv qatlamida erkin rivojlanib, suvning trofik holati va mavsumiy o‘ zgarishlarini aks ettiradi. Bentik vakillar tub cho‘ kindilari yoki substrat yuzasida rivojlanib, suv havzasining lokal sharoitlarini ifodalaydi. Perifiton tarkibidagi sianobakteriyalar esa suv o‘ simliklari, toshlar va boshqa substratlarga birikkan holda yashaydi [7, 15].

1-jadval. Cyanophyta ko‘ rsatkichlarining bioindikatsion ahamiyati

Ko‘ rsatkich	Ekologik mazmuni	Bioindikatsion ahamiyati
Tur tarkibi	Sianobakteriyalar xilma-xilligi	Suv muhitining ekologik xususiyatlarini baholash
Dominant turlar	Jamoada ustunlik qiluvchi vakillar	Muayyan ekologik sharoitlarni ko‘ rsatish
Biomassa	Umumiy rivojlanish darajasi	Evtrofikatsiya va “suv gullashi”ni baholash
Mavsumiy dinamika	Yil davomida o‘ zgarish	Ekologik sharoitlar vaqt dinamikasini aniqlash
Ekologik guruhlar	Plankton, bentos, perifiton	Suv obyektining ekologik tipini tavsiflash
Fizik-kimyoviy bog‘ liqlik	pH, harorat, N, P va oqim	Kompleks ekologik monitoring

1-jadvaldan ko‘ rinib turibdiki, Cyanophyta ning bioindikatsion imkoniyatlari birgina tur mavjudligi bilan chegaralanmaydi. Tur tarkibi, dominantlik, biomassaning o‘ zgarishi va mavsumiy dinamika birgalikda baholanganda ekologik holatni ancha ishonchli tavsiflash mumkin. Bu yondashuv biologik va fizik-kimyoviy monitoringni birlashtirishga imkon beradi [1, 2].

Cyanophyta rivojlanishiga fizik-kimyoviy omillarning ta’siri.

Harorat sianobakteriyalar rivojlanishining asosiy ekologik omillaridan biridir. Ko‘ plab chuchuk suv sianobakteriyalari iliq davrda faol rivojlanadi va suv haroratining oshishi ayrim turlarning raqobatbardoshligini kuchaytirishi mumkin [3, 10]. Namangan sharoitida yozgi issiq davr va suv almashinuvi sust bo‘ lgan havzalarning mavjudligi Cyanophyta rivojlanishini monitoring qilishni ayniqsa muhim qiladi.

Yorug‘ lik suv qatlamidagi fotosintetik jarayonlarning intensivligini belgilaydi. Suvning loyqaligi, chuqurligi va suv o‘ simliklari bilan qoplanish darajasi yorug‘ likning kirib borishini o‘ zgartiradi. Suv oqimining kuchayishi esa ayrim planktonik shakllarning to‘ planishiga to‘ sqinlik qilishi mumkin. Aksincha, turg‘ un yoki sekin oqadigan suvlar sianobakterial biomassaning to‘ planishi uchun qulayroq bo‘ lishi mumkin [7, 10].

Suv reaksiyasi - pH ham Cyanophyta jamoalarining shakllanishida muhim omillardan biridir. Biroq faqat pH qiymatiga asoslanib ekologik holat haqida yakuniy xulosa chiqarish noto‘ g‘ ri bo‘ ladi. pH, harorat, oziqa elementlari va biologik ko‘ rsatkichlar birgalikda tahlil qilinishi lozim.

Suvning shaffofligi ham algalar rivojlanishiga ta’sir etuvchi muhim ko‘ rsatkichlardan biridir. Suvda muallaq zarrachalar ko‘ payishi yorug‘ likning suv qatlamlariga kirib borishini kamaytiradi. Shu sababli shaffoflikning o‘ zgarishini Cyanophyta biomassasi bilan birgalikda kuzatish suv ekotizimining ekologik holatini yaxshiroq tushunishga yordam beradi.

Azot va fosfor suv ekotizimlarida birlamchi mahsuldorlikni belgilovchi muhim biogen elementlardir. Ularning ortiqcha miqdorda suv havzalariga tushishi eutrofikatsiya jarayonini tezlashtirishi mumkin [11]. Ayrim sianobakteriyalar atmosfera azotini biologik o‘ zlashtirish imkoniyatiga ega bo‘ lib, bu xususiyat ularga ayrim ekologik sharoitlarda raqobat ustunligini beradi [16].

Qishloq xo‘ jaligi yerlaridan o‘ g‘ itlarning yuvilishi, maishiy va boshqa oqova suvlarning tushishi suv obyektlarida azot va fosfor yuklamasini oshirishi mumkin. Shu sababli Namangan viloyati suv havzalarida Cyanophyta rivojlanishini baholashda suv havzasining oziqa elementlari bilan ta’minlanganlik darajasini hisobga olish zarur.

Azot va fosfor miqdorining ortishi har doim ham sianobakteriyalar biomassasining bir xil darajada oshishiga olib kelmaydi. Chunki ularning rivojlanishi harorat, yorug‘ lik, suvning gidrodinamik holati va boshqa omillar bilan birgalikda belgilanadi. Demak, bioindikatsion baholashda ozuqa elementlarini boshqa ekologik ko‘ rsatkichlar bilan integratsiyalashgan holda tahlil qilish ilmiy jihatdan to‘ g‘ riroq yondashuv hisoblanadi.

Evtrofikatsiya - suv havzasiga biogen elementlarning ortiqcha kelishi natijasida biologik mahsuldorlikning kuchayishi bilan kechadigan ekologik jarayon. Bunday sharoitda ayrim Cyanophyta vakillari tez ko‘ payib, suv yuzasida yoki suv qatlamida ko‘ zga tashlanadigan biomassani hosil qilishi mumkin [3, 4].

Zamonaviy tadqiqotlar sianobakterial dominantlikning trofik holat bilan bog‘ liqligini ko‘ rsatadi [13]. Ayniqsa, suv almashinuvi sust bo‘ lgan va oziqa elementlari to‘ planadigan havzalarda sianobakteriyalarning rivojlanishi kuchayishi mumkin.

“Suv gullashi”ning kuchayishi suvning estetik sifatini pasaytirishdan tashqari, suvning kislorod rejimiga, shaffofligiga va boshqa organizmlar uchun yashash sharoitlariga ta’sir ko‘ rsatishi mumkin. Ayrim sianobakteriyalar biologik faol birikmalar ishlab chiqarishi mumkinligi sababli suv resurslarini boshqarishda bunday holatlarni erta aniqlash muhimdir [4, 17, 18].

Shu nuqtayi nazardan Cyanophyta biomassasining mavsumiy o‘ zgarishini kuzatish ekologik monitoringning muhim yo‘ nalishlaridan biri bo‘ lishi mumkin. Biroq suvning “gullashi”ni faqat ko‘ z bilan kuzatish asosida baholash yetarli emas. Mikroskopik identifikatsiya, biomassa yoki hujayra zichligini baholash hamda fizik-kimyoviy ko‘ rsatkichlar bilan solishtirish talab etiladi.

Namangan viloyatida suv resurslaridan sug‘ orish, maishiy ehtiyojlar va boshqa xo‘ jalik faoliyatlarida foydalanilishi suv ekotizimlariga turli darajadagi antropogen bosimni yuzaga keltiradi. Qishloq xo‘ jaligi faoliyati bilan bog‘ liq ozuqa elementlari, tuproq zarrachalari va boshqa moddalar suvga tushishi mumkin. Suv rejimining o‘ zgarishi ham algalar jamoasi tarkibiga ta’sir ko‘ rsatadi.

Bentos sianobakteriyalari antropogen bosimni baholashda alohida qiziqish uyg‘ otadi. Ularning substrat bilan bevosita aloqasi lokal ekologik sharoitni aks ettirishi mumkin [15]. Shu bilan birga, Cyanophyta mavjudligining o‘ zi suvning ifloslanganligini anglatmaydi. Bioindikatsion xulosa tur tarkibi, dominantlik, biomassasi, ekologik guruh va fizik-kimyoviy ko‘ rsatkichlar majmuasi asosida chiqarilishi kerak.

Antropogen yuklamani baholashda suv havzasining joylashuvi, unga tushuvchi oqimlarning xususiyati, qishloq xo‘ jaligi maydonlariga yaqinligi va suvdan foydalanish intensivligi ham hisobga olinishi lozim. Bunday kompleks yondashuv Cyanophyta ning ekologik ko‘ rsatkich sifatidagi imkoniyatlarini ancha to‘ liq ochib beradi.

Cyanophyta jamoalari yil davomida bir xil tarkibda saqlanib qolmaydi. Harorat, yorug‘ lik davomiyligi, yog‘ ingarchilik, suv oqimi va biogen elementlar miqdorining mavsumiy o‘ zgarishi ularning rivojlanishiga ta’sir etadi. Shu sababli bir martalik kuzatuv asosida suv havzasining ekologik holatiga yakuniy baho berish cheklangan xulosalarga olib kelishi mumkin.

Mavsumiy monitoringda bahor, yoz, kuz va zarur hollarda qish davrlarida namunalar olish maqsadga muvofiq. Bunda bir xil kuzatuv nuqtalaridan foydalanish vaqt davomida o‘ zgarishlarni solishtirish imkonini beradi. Ayniqsa yozgi davrda suv haroratining oshishi va suv almashinuvining kamayishi sianobakteriyalar rivojlanishiga qulay sharoit yaratishi mumkin [3, 10].

Mavsumiy ma’lumotlarni bir necha yil davomida yig‘ ish esa yanada muhim natijalar beradi. Chunki bir yil ichidagi o‘ zgarishlar qisqa muddatli ekologik omillar bilan bog‘ liq bo‘ lishi mumkin, uzoq muddatli kuzatuvlar esa suv havzasidagi barqaror ekologik tendensiyalarni aniqlashga yordam beradi.

Namangan viloyati suv havzalari uchun ekologik monitoringni uch yo‘ nalishda tashkil etish maqsadga muvofiq: floristik, ekologik va bioindikatsion monitoring. Floristik monitoring tur tarkibi va tarqalish xususiyatlarini qayd etishga; ekologik monitoring suv harorati, pH, suvning shaffofligi, oqim va oziqa elementlarini kuzatishga; bioindikatsion monitoring esa biologik ko‘ rsatkichlarni fizik-kimyoviy ma’lumotlar bilan bog‘ lashga qaratiladi.

Bunday tizim suv havzalarida mavsumiy o‘ zgarishlarni aniqlash, evtrofikatsiya xavfini erta baholash va ekologik boshqaruv choralarini rejalashtirish imkonini beradi. Jahon sog‘ liqni saqlash tashkiloti ham sianobakteriyalar bilan bog‘ liq xavflarni boshqarishda monitoring va boshqaruvning tizimli yondashuvini ta’kidlaydi [17, 18].

2-jadval. Namangan viloyati suv havzalari uchun taklif etilayotgan monitoring modeli

Monitoring yo‘ nalishi	Asosiy ko‘ rsatkichlar	Kuzatish davri	Kutiladigan natija
Floristik	Tur tarkibi, dominant taksonlar	Mavsumiy	Cyanophyta xilma-xilligini aniqlash
Ekologik	Harorat, pH, shaffoflik, oqim	Muntazam	Muhit omillarining dinamikasini baholash
Trofik	Azot, fosfor, biomassa	Mavsumiy va zaruratga ko‘ ra	Evtrofikatsiya xavfini baholash
Bioindikatsion	Tur tarkibi , dominantlik ,biomassa	Kompleks	Ekologik holatni integral baholash

Taklif etilayotgan modelning asosiy afzalligi shundaki, unda biologik indikatorlar fizik-kimyoviy ko‘ rsatkichlardan ajratib qo‘ yilmaydi. Masalan, sianobakteriyalar biomassasining ortishi qayd etilgan bo‘ lsa, shu davrda suv harorati, pH, azot va fosfor miqdori ham aniqlanishi lozim. Keyinchalik bu ko‘ rsatkichlar o‘ rtasidagi bog‘ liqlik statistik usullar yordamida baholanishi mumkin.

Kelgusida ushbu model asosida Namangan viloyatining alohida suv obyektlari uchun monitoring kartalari tuzish, namunalar olishning standart nuqtalarini belgilash va ma’lumotlar bazasini shakllantirish mumkin. Bu esa hududiy ekologik monitoringning ilmiy asosini mustahkamlashga xizmat qiladi.

Mazkur ishning ilmiy jihatdan muhim tomoni Namangan viloyati suv havzalarida Cyanophyta florasini ekologik-bioindikatsion yondashuv asosida baholash mezonlarini tizimlashtirishdan iborat. Hudud suv obyektlari uchun tur tarkibi, dominantlik, biomassa, mavsumiy dinamika va fizik-kimyoviy ko‘ rsatkichlarni birlashtiruvchi monitoring modeli taklif etildi.

Tadqiqotning ilmiy ahamiyati Namangan viloyati suv havzalaridagi Cyanophyta florasini ekologik yondashuv asosida baholash mezonlarini tizimlashtirish bilan belgilanadi. Mahalliy algoflora bo‘ yicha mavjud ma’lumotlarni umumlashtirish hudud suv obyektlarining biologik monitoringini rivojlantirish uchun asos bo‘ lib xizmat qiladi.

Amaliy jihatdan Cyanophyta tur tarkibi, dominantligi va biomassasini muntazam kuzatish suv havzalarida ekologik o‘ zgarishlarni erta aniqlashga yordam beradi. Natijalardan ekologik monitoring, suv resurslarini boshqarish, biologiya va ekologiya fanlarini o‘ qitish hamda keyingi dala tadqiqotlarini rejalashtirishda foydalanish mumkin.

Shuningdek, mazkur yondashuv suv havzalarida evtrofikatsiya xavfini oldindan baholash uchun dastlabki biologik mezon sifatida xizmat qilishi mumkin. Bunda Cyanophyta ko‘ rsatkichlari mustaqil diagnostika vositasi sifatida emas, balki boshqa biologik va fizik-kimyoviy ko‘ rsatkichlar bilan birgalikda qo‘ llanilishi kerak.

Ushbu maqolaning asosiy cheklovi yangi dala kuzatuvlari asosida olingan miqdoriy ma’lumotlarning maqolaga kiritilmaganidir. Shu sababli keltirilgan xulosalar ilmiy adabiyotlar va hududning ekologik xususiyatlari asosidagi tahliliy xulosalar sifatida qaralishi lozim.

Kelgusidagi dala tadqiqotlarida Namangan viloyatining tanlangan suv obyektlaridan mavsumiy ravishda suv va substrat namunalari olish, Cyanophyta vakillarini mikroskopik aniqlash, tur tarkibini shakllantirish, dominant turlarni aniqlash va biomassa yoki hujayra zichligini hisoblash muhim vazifa hisoblanadi.

Shuningdek, har bir kuzatuv nuqtasida suv harorati, pH, shaffoflik, elektr o‘ tkazuvchanlik, erigan kislorod, azot va fosfor birikmalarini aniqlash maqsadga muvofiq. Olingan ma’lumotlarni statistik jihatdan qayta ishlash orqali Cyanophyta tarkibi bilan ekologik omillar o‘ rtasidagi bog‘ liqlikni aniqlash mumkin.

Bunday tadqiqotlar natijasida Namangan viloyati suv havzalarining Cyanophyta florasiga oid haqiqiy hududiy ma’lumotlar bazasi yaratiladi. Bu esa keyinchalik hudud uchun ilmiy asoslangan bioindikatsion mezonlarni ishlab chiqish imkonini beradi.

Namangan viloyati suv havzalarida Cyanophyta florasi ekologik sharoitlarning o‘ zgarishiga sezgir biologik guruhlardan biri sifatida qaralishi mumkin. Ularning rivojlanishi harorat, yorug‘ lik, pH, suv oqimi va biogen elementlar miqdori bilan chambarchas bog‘ liq.

Cyanophyta ning tur tarkibi, dominantlik darajasi, biomassasi va mavsumiy dinamikasini o‘ rganish suv havzalarining trofik holatini va antropogen bosim darajasini baholashga qo‘ shimcha biologik mezon beradi. Biroq bioindikatsion xulosa faqat sianobakteriyalarning mavjudligiga emas, balki bir nechta ekologik ko‘ rsatkichlarning kompleks tahliliga asoslanishi lozim.

Namangan viloyati uchun floristik, ekologik va bioindikatsion monitoringni birlashtiruvchi tizimni joriy etish suv havzalarining ekologik holatini muntazam baholash, evtrofikatsiya xavfini erta aniqlash va suv resurslarini oqilona boshqarish uchun istiqbolli yo‘ nalish hisoblanadi.

Kelgusidagi dala tadqiqotlarida aniq suv obyektlari kesimida tur tarkibi, biomassa, pH, harorat, azot va fosfor miqdorlarini mavsumiy takroriy kuzatish ushbu xulosalarning empirik asosini kuchaytiradi. Ayniqsa, bir necha yil davomida olib boriladigan muntazam monitoring Cyanophyta jamoalarining hududiy va mavsumiy dinamikasini chuqurroq tushunish imkonini beradi.

Annotatsiya: *Ushbu maqolada Namangan viloyatida ko‘ kalamzorlashtirishda foydalanilayotgan daraxt va butalarning taksonomik tahlili o‘ rganildi. Bunda viloyatida ko‘ kalamzorlashtirishda 76 ta turkum, 131 ta tur va 5 ta formadan keng foydalanilayotgani ma’lum bo‘ ldi. Ular 41 ta oilaga mansubligi, yetakchi oilalar soni 5 ta ni tashkil qilib, bunda Rosaceae, Pinaceae, Cupressaceae, Fabaceae va Caprifoliaceae lar adaptiv imkoniyatlari yuqori, turlar xilma-xilligi ko‘ p ekanligi ma’lum bo‘ ldi. Foydalinayotgan assortimentlarning foydalanish sohalari bo‘ yicha ham tahlil amalga oshirilganda yetakchi o‘ rinni ko‘ kalamzorlashtirish va o‘ rmonchilik sohalari qamrab olgani ma’lum bo‘ ldi. Foydalanilayotgan o‘ simliklarni introduksion muvoffaqqiyati (IMI) bo‘ yicha 1 dan 5 ballik shkalada baholanganda 89 % dan ortiq turlar yuqori moslashuvchanlikka, 11 % kam moslashuvchanlikka ega bo‘ lganligi kuzatildi.*

Kalit so‘ zlar: *Introduksiya, ko‘ kalamzorlashtirish, taksonomik tahlil, Namangan, daraxt, buta, manzarali, dendrologik tahlil, yashil hudud, o‘ rmonchilik.*

ТАКСОНОМИЧЕСКИЙ АНАЛИЗ ДЕРЕВЬЕВ И КУСТОВ, ИСПОЛЬЗУЕМЫХ В Озеленении РЕГИОНА НАМАНГАН

Примечание: *В данной статье проведен таксономический анализ деревьев и кустарников, используемых в озеленении региона Наманган. Установлено, что в регионе широко используются 76 родов, 131 вид и 5 форм. Они принадлежат к 41 семейству, из которых 5 являются ведущими, причем Rosaceae, Pinaceae, Cupressaceae, Fabaceae и Caprifoliaceae обладают высоким адаптивным потенциалом и большим видовым разнообразием. При анализе используемых сортов по областям применения было установлено, что ведущее место занимают области озеленения и лесоводства. При оценке успешности интродукции (УИ) используемых растений по шкале от 1 до 5 было отмечено, что более 89% видов обладают высокой адаптивностью, а 11% — низкой.*

Ключевые слова: *Введение, озеленение, таксономический анализ, Наманган, дерево, кустарник, декоративное растение, дендрологический анализ, зеленая зона, лесное хозяйство.*

TAXONOMIC ANALYSIS OF TREES AND SHRUBS USED FOR GREENING IN THE NAMANGAN REGION

Abstract: *This article presents a taxonomic analysis of the trees and shrubs used for landscaping and greening in the Namangan region. The study revealed that 76 genera, 131 species, and 5 forms are widely utilized for this purpose. These plants belong to 41 families, with five leading families—Rosaceae, Pinaceae, Cupressaceae, Fabaceae, and Caprifoliaceae—demonstrating high adaptive capacity and significant species diversity. An analysis of the areas of application showed that landscaping and forestry are the primary sectors utilizing these plant varieties. When evaluated on a 1-to-5 scale for introduction success (IS), over 89% of the species exhibited high adaptability, while 11% showed lower adaptability.*

Keywords: *Introduction, greening, taxonomic analysis, Namangan, tree, shrub, ornamental, dendrological analysis, green space, forestry.*

KIRISH

Ma’lumki so‘nggi yillarda Respublikamizda ko‘kalamzorlashtirish, obodonlashtirish hamda yashil hududlarni kengaytirshda istiqbolli, manzarali, daraxt butalar assortimenti va introduksiya jarayonlarini yanada rivojlantirish, hamda biologik xilma-xillikni saqlashga keng e’tibor qaratilmoqda. Bu borada ko‘kalamzorlashtirishda foydalanilayotgan mahalliy introdutsent assortimentlarning biologiyasini o‘rganish muhim ahamiyat kasb etadi. Bunda keskin kontinental iqlim sharoitlarimizga chidamli bo‘lgan introdusent turlarni tadbiq etish kelgusida ulardan samarali

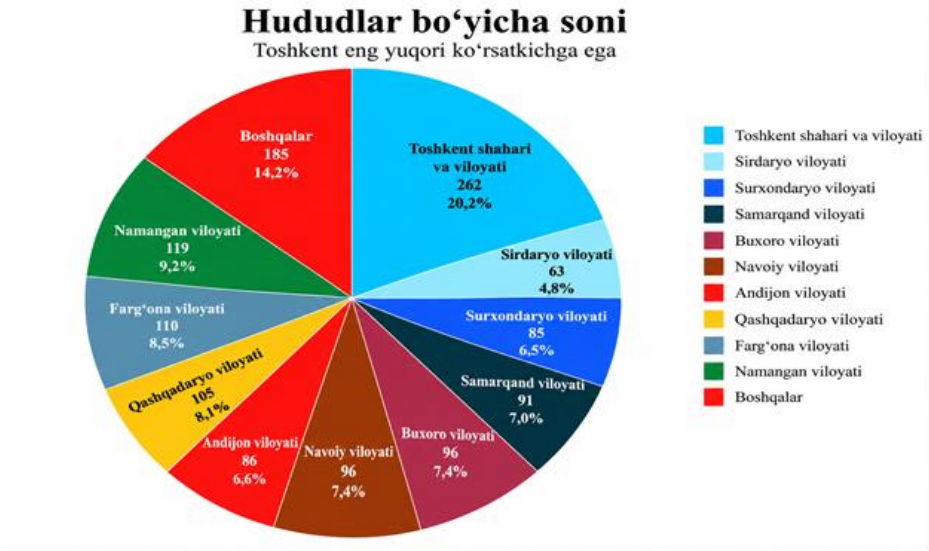
foydalanish imkonini beradi. Inson faoliyati o‘ simliklar bilan uzviy bog‘ liqligi juda qadimdan ma’lum. Ular dastlab oziq-ovqat sifatida keng ishlatilgan. Keyinchalik esa bu o‘ simliklarning ayrim imkoniyatlari, jumladan ko‘ kalamzorlashtirish hamda dorivor o‘ simliklar sifatida foydalanish keng tarqala boshlagan [1]. Bugungi kunga kelib bu turdagi daraxt butalardan ko‘ kalamzorlashtirish, obodonlashtirish sohalarida keng foydalanib kelinmoqda. Shuningdek, mamlakatimizda ham so‘ ngi yillarda “Yashil makon” umummilliy loyihasi doirasida birgina 2024 yil bahorgi mavsumning o‘ zida Respublika bo‘ yicha 127 million tupdan ziyod daraxt va buta ko‘ chatlar ekildi. Ekologiya, atrof-muhitni muhofaza qilish va iqlim o‘ zgarishi vazirligi ma’lumotiga ko‘ ra, har bir viloyatlarda o‘ rtacha 8–10 million tup manzarali mevali ko‘ chatlar o‘ tqazilgan. Shuningdek, Namangan viloyatida 2024 yil 9 aprel holatiga ko‘ ra 10 million 113 ming tup daraxt va buta ko‘ chatlar ekilib, loyiha doirasida hududlarni ko‘ kalamzorlashtirish bo‘ yicha yuqori ko‘ rsatkichga erishildi [2].

Mamlakatimizda ko‘ kalamzorlashtirish va manzarali bog‘ dorchilik maqsadlarida daraxt-butalar va gullovchi manzarali o‘simliklar introduksiyasi hajmi sezilarli darajada oshib bormoqda. Jumladan: Namangan viloyatida ham mahalliy ekotizimni yanada boyitish va ekologik vaziyatni barqarorlashtirish maqsadida yuqori manzarali, ko‘ kalamzorlashtirish, farmatsevtika va o‘rmon xo‘jaligida foydalanish uchun istiqbolli daraxt-buta hamda o‘t o‘simliklar turlari introduksiya qilinmoqda. Bu ishlar shahar hamda qishloq hududlarida yashil maydonlarni yanada kengaytirish, atmosferadagi havo sifatini yaxshilash va aholi uchun sog‘ lom tabiiy muhitni yaratishga xizmat qilmoqda.

ADABIYOTLAR TAHLILI VA METODLAR

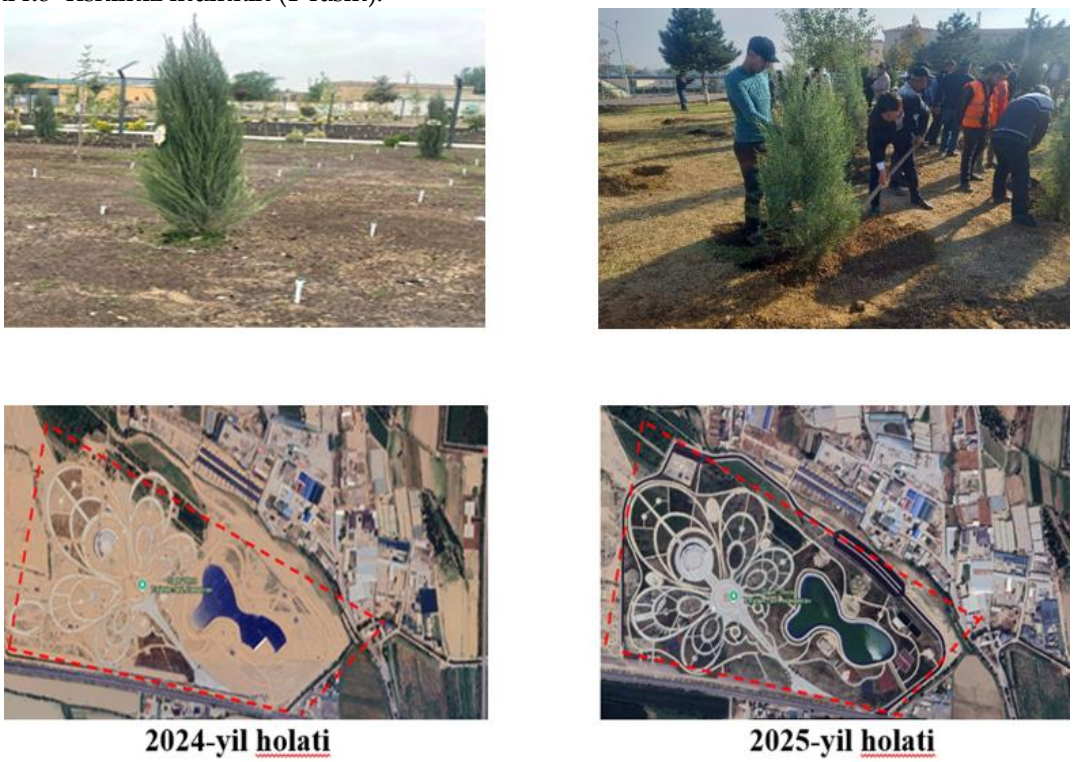
Qayimov A.K., Berdiyev E.T., va boshqalar tomonidan 2012-yil berilgan ma’lumotlarida keltirilishicha qadimgi Misrda jamoat joylarida, saroy bog‘ lari va xonalarini ko‘ kalamzorlashtirishda manzarali daraxt butalardan foydalanib kelinganligi, Tel-El Amarandan topilgan qadimiy yozuvlardagi ma’lumotlarga ko‘ ra yo‘ l chetlarida manzaralari o‘ simliklar ekilgani aniqlanishi bo‘ yicha asoslar keltirilgan. Shuningdek, O‘ zbekiston respublikasida o‘ suvchi mahalliy hamda introduksiya qilingan daraxt-buta turlarining sistematikasi, biologik va ekologik xususiyatlari, tarqalish areali, ko‘ kalamzorlashtirish va o‘ rmon xo‘ jaligidagi amaliy ahamiyati bo‘ yicha asosiy jihatlar ko‘ rsatib berilgan. [3]

Namangan viloyati 1941-yil 6-martda tashkil etilgan bo‘lib, Farg‘ ona vodiysining shimoliy qismida, asosan tekislik hududda joylashgan. Iqlimi keskin kontinental, yozda issiq, qishda nisbatan sovuq. Vegetatsiya davri esa o‘ simliklarda o‘rtacha 220-240 kun. Yillik yog‘ in miqdori hududlar kesimida 90–600 mm oralig‘ ida bo‘lib, asosan bahor va kuz fasllarida kuzatiladi. Tuproqlari o‘tloq, bo‘z hamda prolyuvial turlarga mansub bo‘lib, ayrim joylarda sho‘rxok hududlar uchraydi [4,5,6,7].



Zakirov K.Z ning 1971-yilda berilgan ma’lumotlariga ko‘ ra Namangan viloyatida daraxt butalar introduksiyasi dastlab miloddan avvalgi ilk o‘ rta asrlarda. Anjir (*Ficus carica*), anor (*Punica granatum*), zaytun (*Olea europaea*), uzum (*Vitis vinifera*), chinor (*Platanus orientalis*) kabi o‘ simliklar keltirilgan [8].

XIX asr oxiri XX asr boshlarida esa kashtan (*Aesculus hippocastanum*), oq akatsiya (*Robinia pseudoacacia*), lipa (*Tilia cordata*), yapon saforasi (*Sophora japonica*), zarang (*Acer spp.*) qizil eman (*Quercus rubra*), amerika zarangi (*Acer negundo*), pavlovniya (*Paulownia* tomentosa), terak navlari (*Populus italica*), forsitsiya (*Forsythia*), oddiy siren (*Syringa vulgaris*), Suriya gibiskusi (*Hibiscus syriacus*), shamshod (*Buxus sempervirens*), lavanda (*Lavandula*) olib kelinganligi bo‘ yicha Qodirov A va A.Fayziyevlarning ma’lumotlarida keltirilgan [9].



Namangan viloyati hududlarining dendrologik tahlili 2022-yilda Toshkent botanika bog‘ i dendrologlari E.Temirov va boshqalar tomonidan berilgan ma’lumotlarga ko‘ ra 119 ta turdagi ko‘ kalamzorlashtirishda foydalanilayotgan daraxt butalar assortimenti borligi aniqlangan [10].

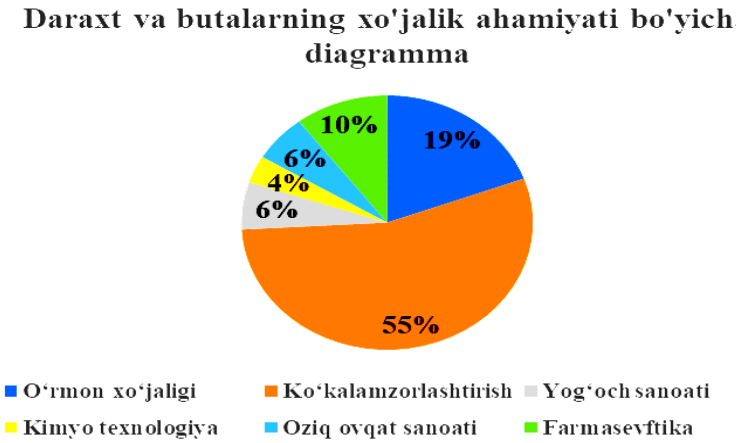
Tadqiqot obyektlari uchun Namangan viloyati shahar, tuman markazlari bog‘ park, hiyobonlar, dam olish maskanlari, hokimlik binolari hududlari tanlab olindi. O‘ simliklarning taksonomik nomlari va sistematik mansubligini aniqlashda Plants of the World Online (POWO) xalqaro elektron ma’lumotlar bazasidan foydalanildi [11]. Manzarali daraxt-buta turlarining introduksion muvaffaqiyatlilik darajasi Lapin va Sidneva (1973) tomonidan ishlab chiqilgan 5 ballik baholash shkalasi yordamida tahlil qilindi [12]. Tadqiqot ishini xaritalash orqali o‘ rganish jarayoni A.D. Pastushenko (2023) tomonidan 2012–2021-yillar davomida Ryazan shahri dendroflorasi to‘ rtizimli xaritalash usuli asosida o‘ rganildi. Bunda daraxt va butalar tarqalishi, turlarning tarkibi hamda hududiy joylashuvini aniqlashda qo‘ llanilgan [13].

TADQIQOT NATIJALARI 2025-yilda olib borilgan tadqiqot natijalarga ko‘ ra, o‘ rganilgan hududlarda 41 ta oila, 76 ta turkumga mansub 131 ta tur va 5 ta forma shundan 9 ta maxalliy 122 ta xorijiy turlardan iborat assortimentlardan foydalanilayotganligi ma’lum bo‘ ldi. Oilalar bo‘ yicha turlar sonini notekis taqsimlanganligi kuzatildi. 2022-yil Toshkent botanika bog‘ i xodimlari tomonidan Namangan viloyatida ko‘ kalamzorlashtirishda foydalanilayotgan turlar soni 119 ta ekanligi qayd etilgan (1-diagramma).

1-diagramma Assortimentlarning yangi turlar bilan boyishiga viloyatda so‘nggi yillarda “Yashil makon” umummilliy loyihasi doirasida Yangi O‘zbekiston bog‘i, Nuroniylar bog‘i va ilmiy tadqiqotlar uchun mo‘ljallangan NamDU hududida tashkil etilgan Ekobog‘ kabi xududlarni misol qilib keltirishimiz mumkin. Buning natijasida so‘nggi uch yilda oilalar soni 37 tadan 41 taga turlar soni 119 tadan 131 taga yetdi. Assortimentlardan yangi 4 ta ***Celastraceae, Myrtaceae, Ericaceae, Garryaceae*** oilalarga mansub 5 ta tur *Callistemon, Rhododendron* sp., *Aucuba japonica, Euonymus japonicus ’Bravo‘ , E. japonicus ‘Aureomarginatus’* qolgan turlar esa avvaldan mavjud oilalar tarkibiga kiruvchi yangi tur hisoblanadi. Ko‘kalamzorlashtirish, obodonlashtirish ishlari natijasida viloyat hududida yashil xududlarning ortib borayotganligini ko‘rishimiz mumkin (1-rasm).

1-rasm Ayrim oilalar yuqori tur boyligi bilan ajralib, ko‘kalamzorlashtirishda yuqori o‘rinni egallaydi. Eng yuqori tur soni ko‘rsatkichiga ega bo‘lgan oila ***Rosaceae*** bo‘lib, jami 16 ta tur aniqlandi. Ushbu oila vakillari hududni ko‘kalamzorlashtirishda muhim tarkibiy qismini tashkil etib, ekologik moslashuvchanligi hamda xo‘jalik ahamiyati bilan ajralib turadi.

Ikkinchi o‘rinda esa *Cupressaceae* oilasi joylashgan bo‘lib, 10 ta tur bilan ifodalangan. Ushbu oila vakillari ko‘kalamzorlashtirish va landshaft dizaynida juda keng qo‘llanilishi bilan alohida ahamiyatga ega. Yuqori tur boyligiga ega bo‘lgan oilalar safiga *Pinaceae, Leguminosae (Fabaceae)* va *Caprifoliaceae* - 9 ta dan tur, *Salicaceae* - 7 ta, *Sapindaceae* - 5 ta , *Fagaceae* va *Hydrangeaceae* — har biridan 4 ta turlar mavjudligi ma’lum bo‘ldi. (1-jadval).



Namangan viloyatida ko‘ kalamzorlashtirishda foydalanilayotgan daraxt va butalar oilalasi va turlar soni

1-jadval

№	Oilalar nomi	Turlar soni	№	Oilalar nomi	Turlar soni
1	*Malvaceae*	1	**22**	*Magnoliaceae*	2
2	*Lythraceae*	1	**23**	*Moraceae*	4
3	*Hydrangeaceae*	4	**24**	*Platanaceae*	2
4	*Oleaceae*	10	**25**	*Apocynaceae*	1
5	*Berberidaceae*	5	**26**	*Buxaceae*	2
6	*Leguminosae Fabaceae*	9	**27**	*Asparagaceae*	1
7	*Rosaceae*	16	**28**	*Arecaceae*	1
8	*Caprifoliaceae*	9	**29**	*Ginkgoaceae*	1
9	*Fagaceae*	4	**30**	*Elaeagnaceae*	1
10	*Sapindaceae*	5	**31**	*Paeoniaceae*	1
11	*Ebenaceae*	2	**32**	*Lamiaceae*	1
12	*Tiliaceae*	2	**33**	*Meliaceae*	1
13	*Ulmaceae*	2	**34**	*Aquifoliaceae*	2
14	*Cannabaceae*	1	**35**	*Bignoniaceae*	2
15	*Simaroubaceae*	1	**36**	*Anacardiaceae*	1
16	*Juglandaceae*	2	**37**	*Scrophulariaceae*	1
17	*Salicaceae*	7	**38**	*Calycanthaceae*	1
18	*Cupressaceae*	10	**39**	*Paulowniaceae*	1
19	*Pinaceae*	9	**40**	*Myrtaceae*	1
20	*Celastraceae*	2	**41**	*Ericaceae*	1
21	*Garryaceae*	1			

Ushbu oilalar ko‘ kalamzorlashtirishda biologik xilma-xillikni oshirishda muhim ahamiyat kasb etadi. Qolgan oilalar esa aksariyati 1–2 tadan turlar bilan ifodalangan bo‘ lib, ular yashil hududda kam uchraydigan yoki tor ekologik moslashuvga ega bo‘ lgan guruhlarni tashkil etadi. Umuman olganda, tadqiqot hududimizda ***Rosaceae, Pinaceae, Cupressaceae va Fabaceae*** oilalari turlar soni jihatdan dominant hisoblanadi. Bunda oilalarning ustunligi hududning iqlim sharoiti, tuproq xususiyatlari hamda antropogen omillar bilan chambarchas bog‘ liqligini ko‘ rishimiz mumkin.

Viloyat hududida ko‘ kalamzorlashtirishda foydalanilayotgan assortimentlarning xo‘ jalik sohalarida foydalanish bo‘ yicha tahlili amalga oshirildi. Buda foydalanish sohalarini shartli ravishda oltita yo‘ nalishga bo‘ lindi. Bular quyidagi sohalar: O‘ rmon xo‘ jaligi, ko‘ kalamzorlashtirish, yog‘ och sanoati, kimyo texnologiya, oziq ovqat sanoati, va farmasevftika sohalari bo‘ yicha tahlili keltiriladi (2- diagramma)

2-diagramma Diagramma natijalari shuni ko‘ rsatadiki, o‘ rganilgan o‘ simlik turlari xo‘ jalik ahamiyatiga ko‘ ra eng yuqori ko‘ rsatkichda ko‘ kalamzorlashtirishda 127 ta tur, o‘ rmon xo‘ jaligida 45 ta, farmasevftika sohasida 24 ta, yog‘ och sanoati 14 ta, oziq ovqat sanoati 14 ta, turlardan foydalanish imkoniyati mavjud. Eng past ko‘ rsatkich kimyo texnologiyasi yo‘ nalishi bo‘ lib, 8 ta tur bilan ifodalangan. Umuman olganda, yuqoridagi natijalar yashil hududlarni ko‘ p tarmoqli xo‘ jalik ahamiyatga ega ekanligini ko‘ rsatadi.

Ko‘ kalamzorlashtirishda foydalanilayotgan o‘ simliklarni introduksion muvoffaqqiyati (IMI) bo‘ yicha 1-5 ballik shkalada ham tahlil qilindi. Bunda ularning 67 % 5 ball, 22 % 4 ball bilan baholangan, qolgan 11 % esa past ballarni tashkil etadi (2-jadval).

2-jadval

Namangan viloyati dendroflorasi introdutsentlarni muvaffaqiyatlilik moslashuv indeksi

Ushbu holatni ham ijobiy baholash mumkin, chunki assortimentning 80 % dan ortig' i yashil hududlarni kengaytirishda samarali foydalanilmoqda, bu esa ko' kalamzorlashtirish jarayonida ijobiy dinamika mavjudligini ko' rsatadi.

XULOSA

Xulosa qilib aytganda bugungi kunda Namangan viloyatida yashil hududlarni kengayib borayotganligi hamda aholi yashash sharoitini ya'ni ekologik vaziyatni yumshatish chora tadbirlari so' ngi uch yilda ortgani kuzatildi. Bu esa biologik xilma-xillikni saqlab qolishga katta xizmat qiladi. Shu o' rinda Namangan viloyatida ko' kalamzorlashtirishda 76 ta turkum 131 ta turdan keng foydalanayotgani ma'lum bo' ldi. Ular 41 ta oilaga mansubligi hamda yetakchi oilalar soni 5 ta ni tashkil qilib, bunda *Rosaceae, Pinaceae, Cupressaceae, Fabaceae va Caprifoliaceae* lar adaptiv imkoniyatlari yuqori ekanligi, turlar xilma-xilligi ko' p ekanligi ma'lum bo' ldi. Qolgan asosiy oilalarda asosiy turlar soni 1 ta dan ekanligi kuzatildi. Shuningdek, foydalinayotgan assortimentlarning xo' jalik sohalari bo' yicha ham tahlil amalga oshirilganda yetakchi o' rinni ko' kalamzorlashtirish va o' rmonchilik sohalari qamrab olingani ma'lum bo' ldi. Foydalanilayotgan o' simliklarni introduksion muvoffaqqiyati (IMI) bo' yicha baholanganda esa 80% yuqori moslashuvchanlikka, 11 % kam moslashuvchanlikka ega bo' lganligi kuzatildi. Ushbu xolatni ham ijobiy baholash mumkin chunki assortimentlarning 80 % dan foydalanilayotgani bu dinamikaning ijobiy ekanligini bildiradi.

KLIMAT ÓZGERISI JAǴDAYÍNDA VETERINARIYALÍQ ÁHMIYETKE IYE PARAZITLERDIŃ TARQALÍW DINAMIKASÍ HÁM HAYWANLARDÍŃ DEN SAWLÍǴÍNA TÁSIRI

Nurimova Periyzat Shorazali qızı
Samarqand mámleketlik veterinariya medicinası,
sharwashılıq hám biotexnologiyalar universitetin pitkeriwshisi
E-mail: nurimovaperiyzat573@gmail.com

Annotaciya. *Maqalada global hám regionallıq klimat ózgerisiniń veterinariyalıq áhmiyetke iye parazitlerdiń (gelmintler, iksod keneleri, qan parazitleri) tarqalıw dinamikasına hám awıl xojalıǵı haywanlarınıń den sawlıǵına tásiri tallanǵan. 2009–2025-jılları járiyalanǵan xalıqaralıq hám milliy ilimiy dereklerdi sistemalı tallaw tiykarında temperatura, jawın-shashın hám ızǵarlıq kórsetkishleriniń parazitlerdiń ómir ciklíniń sırtqı ortalıqtaǵı basqıshlarına, aralıq xojayınlar hám tasıwshılar populyaciyasına tásiri bahalanǵan. Temperatura jıyındısı (dáreje-kún) hám Ollerenshaw indeksi sıyaqlı boljaw modellerıniń qollanılıw múmkinshilikleri kórsetilgen. Ózbekstannıń agroklimatlıq aymaqları ushın parazitar qáwiptiń sapalıq boljawı usınılǵan hám beyimlesiwshi profilaktika ilajları tiykarlanǵan.*

Tayanısh sózler: *klimat ózgerisi, parazitler, gelmintozlar, fasciolyoz, gemonxoz, iksod keneleri, teylerioz, dáreje-kún modeli, epizootologiyalıq boljaw, «Birden-bir den sawlıq».*

ВЛИЯНИЕ ИЗМЕНЕНИЯ КЛИМАТА НА ДИНАМИКУ РАСПРОСТРАНЕНИЯ ВЕТЕРИНАРНЫХ ЗАБОЛЕВАНИЙ И ПАРАЗИТОВ У ЖИВОТНЫХ.

Аннотация. *В статье проанализировано влияние глобального и регионального изменения климата на динамику распространения паразитов ветеринарного значения (гельминтов, иксодовых клещей, кровепаразитов) и здоровье сельскохозяйственных животных. На основе систематического анализа источников 2009–2025 гг. оценено влияние температуры, осадков и влажности на свободноживущие стадии паразитов, популяции промежуточных хозяев и переносчиков. Предложен качественный прогноз паразитарного риска для агроклиматических зон Узбекистана и обоснованы адаптивные меры профилактики.*

Ключевые слова: *изменение климата, паразиты, гельминтозы, фасциолёз, гемонхоз, иксодовые клещи, прогнозирование.*

CLIMATE CHANGE EFFECTS OF VETERINARY AND PARASITE DISTRIBUTION DYNAMICS ON ANIMALS

Abstract. *The article analyses the impact of global and regional climate change on the distribution dynamics of parasites of veterinary importance (helminths, ixodid ticks, haemoparasites) and on livestock health. Based on a systematic review of literature published in 2009–2025, the effects of temperature, precipitation and humidity on free-living parasite stages, intermediate hosts and vectors are evaluated. A qualitative parasitic-risk forecast for the agro-climatic zones of Uzbekistan is proposed, and adaptive control measures are substantiated.*

Keywords: *climate change, parasites, helminthoses, fasciolosis, haemonchosis, ixodid ticks, forecasting.*

KIRISISH

Klimat ózgerisi XXI ásirde awıl xojalıǵı hám den sawlıqtı saqlaw sistemaları aldında turǵan eń quramalı global máselelerdiń birine aylandı. Klimat ózgerisi boyınsha Húkimetleraralıq ekspertler toparınıń (IPCC) altınshı bahalaw esabatına muwapıq, 2011–2020-jılları Jer betiniń ortasha temperaturası sanaatlasıwǵa shekemgi dáwirge salıstırǵanda shama menen 1,1 °C qa artqan, al ekstremal hawa rayı qubılısları – ıssılıq tolqınları, qurǵaqshılıq hám nóserli jawınlardıń qaytalanıwı sezilerli dárejede kóbeygen [1]. Oraylıq Aziya, sonıń ishinde Ózbekstan, jılınıw páti global ortasha kórsetkishten joqarı bolǵan aymaqlar qatarına kiredi [2].

Veterinariyalıq áhmiyetke iye parazitlerdiń kópshiligi ómir ciklíniń bir bólegin sırtqı ortalıqta (máyek, lichinka, invaziyalıq basqısh) yamasa suwıq qanlı aralıq xojayınlar hám tasıwshılar organizminde ótkeredi. Sonlıqtan olardıń rawajlanıw tezligi, tiri qalıwshańlıǵı hám máwsimlik aktivligi tikkeley temperatura hám ızǵarlıqqa baylanıslı [3]. Klimat kórsetkishleriniń salıstırmalı kishi ózgerisleri de parazitlerdiń geografiyalıq arealında, invaziya máwsiminiń dawamlılıǵında hám haywanlardıń invaziyalanıw intensivliginde sezilerli jılısıwlarǵa alıp keliwi múmkin. Bul processler sharwashılıq ónimdarlıǵınıń tómenlewi, emlew qárejetleriniń artıwı hám zoonoz keselliklerdiń qáwipiniń kúsheyiwi arqalı ekonomikalıq hám sociallıq aqıbetlerge iye [4].

Sońǵı jılları Evropa hám Arqa Amerikada *Fasciola hepatica*, *Haemonchus contortus*, *Nematodirus battus* hám iksod kenelériniń tarqalıwınıń klimat penen baylanıslı ózgerisleri boyınsha salmaqlı maǵlıwmatlar toplanǵan [5; 6]. Biraq arid hám kontinentallıq klimatlı Oraylıq Aziya aymaǵı ushın bunday tallawlar ele de jeterli emes. Ózbekstanda sharwashılıqtı rawajlandırıw hám veterinariya xızmetin reformalawǵa baǵdarlanǵan mámleketlik siyasat jaǵdayında parazitar keselliklerdiń klimatqa baylanıslı qáwipin bahalaw áhmiyetli ilimiy-ámeliy wazıypa bolıp tabıladı.

Izertlewdiń maqseti – klimat ózgerisi jaǵdayında veterinariyalıq áhmiyetke iye tiykarǵı parazitler toparlarınıń tarqalıw dinamikasın ilimiy derekler tallawı tiykarında bahalaw, olardıń haywanlar den sawlıǵına tásir etiw mexanizmlerin ashıp beriw hám Ózbekstan jaǵdayı ushın beyimlesiwshi profilaktika jantasıwların tiykarlawdan ibarat.

MATERIALLAR HÁM USÍLLAR

Izertlew sistemalı ádebiyatlar sholıwı hám analitikalıq sintez usılında orınlandı. Dereklerdi izlew PubMed, Scopus, Web of Science, ScienceDirect hám Google Scholar maǵlıwmatlar bazalarında, sonday-aq rus tilindegi basılımlar ushın eLIBRARY hám CyberLeninka platformalarında ámelge asırıldı. Izlewde tómendegi tayanısh sózler hám olardıń kombinaciyalarınan paydalanıldı: «climate change», «parasite», «helminth», «Fasciola hepatica», «Haemonchus contortus», «tick-borne disease», «degree-day model», «livestock», sonday-aq olardıń rus, ózbek hám qaraqalpaq tillerindegi sáykesleri.

Dereklerdi tańlaw kriteriyleri tómendegishe boldı: (1) 2009–2025-jılları recenziyalanatuǵın jurnallarda járiyalanǵan bolıwı; (2) awıl xojalıǵı haywanlarınıń parazitlerine tiyisli bolıwı; (3) klimat faktorları hám parazit biologiyası yamasa epidemiologiyası arasındaǵı muǵdarlıq yamasa sapalıq baylanıstı úyreniwi. Klassikalıq epizootologiyalıq boljaw modellerin sáwlelendiriw maqsetinde ayırım fundamental miynetler de tallawǵa kirgizildi. Ózbekstan klimatına tiyisli maǵlıwmatlar Jáhán banki hám Aziya rawajlanıw bankiniń klimat qáwipi profilinen hám Ózbekstannıń BMShtıń Klimat ózgerisi haqqındaǵı ramkalıq konvenciyasına usınǵan milliy xabarlamalarınan alındı [2].

Tańlanǵan dereklerden parazit túri, aralıq xojayın yamasa tasıwshı, rawajlanıwdıń temperatura shegaraları, ızǵarlıqqa bolǵan talap, baqlanǵan yamasa modellestirilgen areal ózgerisleri hám haywanlar den sawlıǵına tásir kórsetkishleri ajıratıp alındı. Maǵlıwmatlar salıstırmalı-analitikalıq usılda ulıwmalastırıldı, al regionallıq qáwip parazitlerdiń biologiyalıq talapların Ózbekstan agroklimatlıq aymaqlarınıń klimat tendenciyaları menen salıstırıw arqalı sapalıq (joqarı, orta, tómen) shkala boyınsha bahalandı.

NÁTIYJELER

1. Klimat faktorları hám parazitler biologiyası arasındaǵı baylanıs

Tallaw nátiyjeleri klimat ózgerisiniń parazitlerge úsh tiykarǵı jol menen tásir etetuǵının kórsetti: birinshiden, sırtqı ortalıqtaǵı basqıshlardıń rawajlanıw tezligi hám tiri qalıwshańlıǵın ózgertiw arqalı; ekinshiden, aralıq xojayınlar (mollyuskalar, oribatid keneler) hám tasıwshılar (iksod keneleri, qan soríwshı shıbın-shirkeyler) populyaciyası hám aktivlik máwsimine tásir etiw arqalı; úshinshiden, sharwashılıq ámeliyatı – jaylawdan paydalanıw múddetleri, suwǵarıw sistemaları hám haywanlardı kóshiriw tártibiniń ózgeriwi arqalı janapay túrde [3].

Poykiloterm organizmlerdiń rawajlanıwı ádette belgili bir tómengi temperatura shegarasınan (bazalıq temperatura) baslanadı hám effektiv temperaturalar jıyındısı – dáreje-kúnlerdiń toplanıwı menen anıqlanadı. Bul jantasıw parazitlerdiń rawajlanıwın boljawda keń qollanıladı hám tómendegi formula menen esaplanadı: $GDD = \Sigma \max(0; T_{ort} - T_{baz})$, bunda T_{ort} – kúnlik ortasha temperatura, T_{baz} – rawajlanıwdıń tómengi shegarası [7]. Klimattıń jılınıwı dáreje-kúnlerdiń tezirek toplanıwına, yaǵnıy bir máwsimde parazit áwladları sanınıń kóbeyiwine alıp keledi. Tiykarǵı parazitler toparlarınıń klimatqa baylanıslı biologiyalıq ózgeshelikleri 1-kestede ulıwmalastırılǵan.

1-keste. Veterinariyalıq áhmiyetke iye parazitlerdiń klimatqa sezgir biologiyalıq ózgeshelikleri (ádebiyat maǵlıwmatları tiykarında)

Parazit / topar	Klimatqa sezgir basqısh hám talaplar	Jılınıwdıń kútilip atırǵan tásiri	Derek
Fasciola hepatica	Mollyuska (Galba truncatula) ishindegi rawajlanıw ≈10 °C tan joqarıda; joqarı ızǵarlıq talap etiledi	Invaziya máwsiminiń uzarıwı; ızǵarlıq saqlanǵan aymaqlarda qáwiptiń artıwı	[5; 8]

Parazit / topar	Klimatqa sezgir basqısh hám talaplar	Jılınıwdıń kútilip atırǵan tásiri	Derek
Haemonchus contortus	Sırtqı ortalıqtaǵı lichinkalar ıssı hám ızǵar jaǵdayda tez rawajlanadı; suwıqqa shıdamsız	Arealdıń arqaǵa hám tawlı aymaqlarǵa keńeyiwi, jılına kóbirek áwlad	[6; 7]
Teladorsagia / Ostertagia spp.	Tómen temperaturaǵa salıstırmalı shıdamlı; qıslawda tiri qalıwı joqarı	Qıslawshı lichinkalar sanınıń artıwı, jaylaw kontaminaciyasınıń erte baslanıwı	[6]
Nematodirus battus	Máyekten shıǵıw ushın suwıq dáwir hám onnan keyingi jılıw zárúr	Máyekten shıǵıw waqtınıń jılısıwı, gúzgi invaziya jaǵdayları	[6]
Iksod keneleri (Hyalomma, Rhipicephalus, Dermacentor)	Aktivligi temperatura hám salıstırmalı ızǵarlıqqa baylanıslı; qısqı diapauza	Aktivlik dáwiriniń uzarıwı, jańa aymaqlarǵa kirip barıwı	[9]
Keneler arqalı juǵatuǵın qan parazitleri (Theileria, Babesia, Anaplasma)	Tasıwshı kene aktivligi menen anıqlanadı	Teylerioz hám babezioz máwsiminiń uzarıwı	[9]

Eskertiw: kestedegi temperatura kórsetkishleri shamalı bolıp, parazit shtammı hám mikroklimatqa baylanıslı parıq qılıwı múmkin.

2. Gelmintozlardıń tarqalıw dinamikasındaǵı ózgerisler

Fasciolyoz. F. hepatica nıń ómir cikli dushshı suw mollyuskası *Galba truncatula* arqalı ótedi, sonlıqtan bul trematodoz klimat ózgerisine eń sezgir gelmintozlardıń biri bolıp tabıladı. Ullı Britaniya jaǵdayında ótkerilgen modellestiriw nátiyjeleri jaqın on jıllıqlarda fasciolyoz qáwipiniń sezilerli artatuǵının kórsetken [5]. Mas-Coma hám birge avtorları trematodozlarǵa klimat tásiriniń quramalı hám sızıqlı emes ekenin, qurǵaqshılıq ayırım aymaqlarda mollyuskalardıń jasaw orınların qısqartıp, qáwipti azaytıwı múmkin ekenin atap ótedi [8].

Asqazan-ishek nematodozları. Kúyis qaytaratuǵın haywanlardıń strongilyataları, ásirese *H. contortus*, sırtqı ortalıqtaǵı basqıshlarınıń rawajlanıwı ushın ıssı hám ızǵar jaǵdaydı talap etedi. Orta keńliklerde jaylasqan aymaqlarda jılınıw sebepli gemonxozdıń arqa aymaqlarda kóbirek dizimge alınıwı, invaziya máwsiminiń erte baslanıp, kesh tamamlanıwı baqlanbaqta [6]. GLOWORM-FL simulyaciyalıq modeli klimat maǵlıwmatları tiykarında jaylawdaǵı invaziyalıq lichinkalar sanınıń máwsimlik dinamikasın boljawǵa múmkinshilik beredi hám jılınıw jaǵdayında ayırım nematodalar ushın juǵıwshańlıq shıńınıń jılısıwın kórsetken [7]. Áhmiyetli tárepi sonda, júdá joqarı temperatura hám qurǵaqlıq lichinkalardıń óliwin arttıradı, sonlıqtan arid aymaqlarda jazǵı invaziya azayıp, báhárgi hám gúzgi shıńlar kúsheyiwi múmkin.

3. Keneler hám olar arqalı juǵatuǵın kesellikler

Iksod keneleri ómiriniń úlken bólegin sırtqı ortalıqta ótkeredi, olardıń rawajlanıwı, xojayın izlew aktivligi hám qıslawı temperatura hám ızǵarlıqqa qatań baylanıslı [9]. Gilberttiń sholıwına muwapıq, jılınıw kenelerdiń joqarı keńlikler hám biyikliklerge tarqalıwına alıp kelmekte [9]. Oraylıq Aziya ushın ayrıqsha áhmiyetke iye *Hyalomma* áwladı keneleri tropikalıq teylerioz (*Theileria annulata*) hám Qırım-Kongo gemorragiyalıq qızbası virusınıń tasıwshısı bolıp tabıladı, olardıń arealı ıssı hám qurǵaq klimat jaǵdayında keńeyiw tendenciyasına iye.

4. Haywanlardıń den sawlıǵı hám ónimdarlıǵına tásiri

Parazitar kesellikler sharwashılıqqa keltiretuǵın ekonomikalıq zıyan júdá úlken. Charlier hám birge avtorlarınıń esaplawlarına qaraǵanda, Evropada kúyis qaytaratuǵın haywanlardıń tek úsh topar gelmintozları (asqazan-ishek nematodozları, fasciolyoz hám ókpe nematodozları) jılına shama menen 1,8 mlrd evro zıyan keltiredi, onıń tiykarǵı bólegin ónimdarlıq joǵaltıwları quraydı [4]. Klimat ózgerisi bul zıyandı eki jol menen kúsheytedi. Birinshiden, invaziya basımınıń artıwı nátiyjesinde dene salmaǵınıń ósiwi ástelenedi, sút ónimdarlıǵı hám kóbeyiw kórsetkishleri tómenleydi, bawır sıyaqlı organlardıń brakovkası kóbeyedi [4]. Ekinshiden, ıssılıq stressi haywanlardıń immunlıq juwabın hálsiretedi hám olardıń parazitlerge shıdamlılıǵın azaytadı, bul bolsa klinikalıq kesellik hám óliw jaǵdayların arttıradı [3].

Jáne bir áhmiyetli tárep – antigelmintiklerge shıdamlılıq máselesi. Invaziya máwsiminiń uzarıwı fermerlerdi antigelmintik preparatlardı jiyi qollanıwǵa iytermeleydi, bul bolsa shıdamlı parazit populyaciyalarınıń tańlanıwın tezlestiredi. Solay etip, klimat ózgerisi hám antigelmintik rezistentlik bir-birin kúsheytiwshi faktorlar sıpatında kórinedi.

5. Ózbekstan agroklimatlıq aymaqları ushın parazitar qáwiptiń sapalıq boljawı

Ózbekstanda ortasha jıllıq temperatura XX ásirdiń ortalarınan berli turaqlı túrde kóterilip barmaqta, jawın-shashınnıń máwsimlik bóliniwi ózgermekte, qurǵaqshılıq dáwirleri jiyi qaytalanbaqta [2]. Usı tendenciyalar hám 1-kestedegi biologiyalıq talaplar tiykarında mámlekettiń tiykarǵı agroklimatlıq aymaqları ushın parazitar qáwiptiń sapalıq boljawı islep shıǵıldı (2-keste).

2-keste. Ózbekstan agroklimatlıq aymaqlarında klimat ózgerisi jaǵdayında parazitar qáwiptiń sapalıq boljawı

Aymaq	Tiykarǵı klimat tendenciyası	Qáwip dárejesi	Birinshi gezektegi parazitozlar
Suwǵarılatuǵın oypatlar (Ferǵana, Zarafshan, Tashkent oazisi)	Temperaturanıń artıwı, suwǵarıw esabınan ızǵarlıqtıń saqlanıwı	Joqarı	Fasciolyoz, strongilyatozlar, teylerioz
Tómengi Ámiwdárya (Qaraqalpaqstan, Xorezm)	Jılınıw, qurǵaqshılıq, suw tanqıslıǵı, duzlanıw	Orta – joqarı	Keneler hám teylerioz; kollektor-drenaj tarmaqları átirapında fasciolyoz
Taw eteki hám taw jaylawları	Jılınıwdıń biyiklik boyınsha jılısıwı, qar qatlamınıń qısqarıwı	Orta (artıp barıwshı)	Gemonxoz, diktiokaulyoz, dikrocelioz
Shól hám yarım shól jaylawları (Qızılqum, Ústirt)	Kúshli jılınıw hám qurǵaqlıq	Tómen – orta	Hyalomma keneleri; gelmintozlar máwsimlik hám noqatlı

Eskertiw: boljaw sapalıq xarakterge iye bolıp, onı aymaqlıq dala izertlewleri hám monitoring maǵlıwmatları menen tastıyıqlaw talap etiledi.

2-kesteden kórinip turǵanınday, eń joqarı qáwip suwǵarılatuǵın oypatlarda kútilmekte. Bul aymaqlarda iri qara mal hám usaq maldıń tıǵızlıǵı joqarı, jaylawlar kóbinese suwǵarıw kanalları, zawırlar hám shalı atızlarına jaqın jaylasqan. Temperaturanıń artıwı mollyuskalardıń aktivlik dáwirin uzartsa, suwǵarıw ızǵarlıqtı turaqlı saqlap turadı; nátiyjede fasciolyoz qozdırıwshısınıń mollyuska ishindegi rawajlanıwı ushın qolaylı dáwir báhárdiń basınan kesh gúzge shekem sozıladı [5; 8]. Tómengi Ámiwdárya aymaǵında bolsa suw tanqıslıǵı hám duzlanıw tábiyiy suw háwizlerin qısqartıp, gelmintozlar ushın jaǵdaydı shekleydi, biraq kollektor-drenaj tarmaqları átirapında jergilikli «ızǵarlıq atawları» saqlanıp qaladı. Sonıń menen birge ıssı hám qurǵaq klimat *Hyalomma* keneleri ushın qolaylı bolıp, teylerioz qáwipin arttıradı [9].

Taw eteki hám taw jaylawlarında jılınıwdıń biyiklik boyınsha jılısıwı ayrıqsha itibarǵa ılayıq. Burın suwıq klimat sebepli sheklengen biyikliklerde *H. contortus* sıyaqlı ıssısúygish nematodalardıń rawajlanıwı múmkin bolǵan dáwir uzarmaqta. Máwsimlik kóshpeli sharwashılıq (jaylawǵa aydaw) jaǵdayında haywanlar parazitlerdi hár qıylı biyiklik zonaları arasında tasıp júredi, bul bolsa jańa oshaqlardıń qáliplesiwine alıp keliwi múmkin [6; 7]. Shól jaylawlarında joqarı temperatura hám qurǵaqlıq sırtqı ortalıqtaǵı lichinkalardıń óliwin arttırǵanlıqtan gelmintozlar salıstırmalı tómen dárejede saqlanadı, biraq qudıqlar hám suwatlar átirapında invaziyanıń noqatlı toplanıwı baqlanadı.

TALQÍLAW

Alınǵan nátiyjeler klimat ózgerisiniń parazitler tarqalıwına tásiriniń bir tárepleme emes ekenin kórsetedi. Temperaturanıń artıwı rawajlanıw tezligin arttırǵanı menen, ızǵarlıqtıń jetispewshiligi sırtqı ortalıqtaǵı basqıshlardıń tiri qalıwshańlıǵın shekleydi. Sonlıqtan Ózbekstan sıyaqlı arid klimatlı mámleketlerde parazitar qáwiptiń tiykarǵı «ıssı noqatları» tábiyiy klimatqa qaraǵanda kóbirek antropogenlik ızǵarlıq derekleri – suwǵarıw kanalları, kollektor-drenaj tarmaqları, shalı atızları hám suw háwizleri átirapında qáliplesedi. Bul juwmaq Mas-Coma hám birge avtorlarınıń trematodozlar boyınsha pikirlerine [8] sáykes keledi.

Morgan hám Wall atap ótkenindey, klimat ózgerisiniń parazitar keselliklerge tásiri kóp jaǵdaylarda fermerlerdiń beyimlesiwshi sheshimleri – jaylawlardan almaslap paydalanıw, emlew múddetleri hám haywanlardı satıp alıw ámeliyatı arqalı ózgeriwi múmkin [3]. Basqasha aytqanda, klimat qáwipti belgileydi, biraq onıń ámelge asıwı kóp tárepten basqarıw sheshimlerine baylanıslı. Sonlıqtan dástúriy kalendar tiykarındaǵı profilaktikalıq degelmintizaciya sxemaları klimat jaǵdayı ózgeriwshi bolǵan dáwirde óz nátiyjeliligin joǵaltadı hám olardı hawa rayı maǵlıwmatlarına tiykarlanǵan beyimlesiwshi sistemalar menen almastırıw zárúr [7].

Ámeliy kóz qarastan tómendegi jantasıwlar birinshi gezektegi bolıp esaplanadı: (1) dáreje-kún hám Ollerenshaw indeksi sıyaqlı ápiwayı klimat-epizootologiyalıq modellerdi aymaqlıq veterinariya xızmetleri ámeliyatına engiziw; (2) nıshanalı selektiv emlew principin (targeted selective treatment) qollanıp, antigelmintiklerden paydalanıwdı optimallastırıw hám refugiyanı saqlaw; (3) shıdamlılıqtı anıqlaw ushın tezektegi máyekler sanınıń azayıw testin (FECRT) xalıqaralıq usınıslarǵa muwapıq turaqlı ótkeriw [10]; (4) kenelerge qarsı gúresti tasıwshılardıń máwsimlik aktivligi

boljawı tiykarında rejelestiriw; (5) «Birden-bir den sawlıq» (One Health) koncepciyası sheńberinde veterinariya, medicina hám gidrometeorologiya xızmetleri arasında maǵlıwmat almasıwdı jolǵa qoyıw.

Klimatqa beyimlesken monitoring sisteması ushın ápiwayı hám ólshenetuǵın kórsetkishler tańlanıwı tiyis. Olardıń qatarına hár bir rayon boyınsha aylıq dáreje-kúnler jıyındısı hám jawın-shashın muǵdarı, qadaǵalaw xojalıqlarında tezektegi máyekler sanınıń máwsimlik dinamikası, soyıw punktlerinde bawır fasciolyozı boyınsha brakovka kórsetkishleri, báhár hám gúzde kenelerdiń tıǵızlıǵı hám antigelmintiklerdiń nátiyjeliligin bahalaytuǵın FECRT nátiyjeleri kiredi [3; 10]. Bul maǵlıwmatlar gidrometeorologiya xızmetiniń maǵlıwmatları menen biriktirilse, aymaqlıq veterinariya xızmetleri degelmintizaciya hám akaricid islewlerin kalendar boyınsha emes, al haqıyqıy qáwip dárejesine qarap rejelestiriw múmkinshiligine iye boladı. Ekonomikalıq kóz qarastan bunday jantasıw artıqsha islewlerdi azaytadı hám rezistentliktiń rawajlanıwın ásteletedi [4].

Izertlewdiń sheklewleri de bar. Birinshiden, xalıqaralıq dereklerdiń kópshiligi orta keńliklerdegi mámleketlerde orınlanǵan hám olardıń nátiyjelerin arid jaǵdayǵa tikkeley kóshiriw abaylılıqtı talap etedi. Ekinshiden, Ózbekstanda parazitozlar boyınsha uzaq múddetli, keńisliklik anıqlıqqa iye monitoring maǵlıwmatları sheklengen. Sonlıqtan usınılǵan boljaw dáslepki xarakterge iye hám keyingi dala izertlewleri menen tastıyıqlanıwı tiyis.

JUWMAQ

1. Klimat ózgerisi veterinariyalıq áhmiyetke iye parazitlerdiń tarqalıw dinamikasına olardıń sırtqı ortalıqtaǵı rawajlanıw basqıshları, aralıq xojayınlar hám tasıwshılar arqalı sezilerli tásir kórsetedi; tásir sızıqlı emes bolıp, temperatura hám ızǵarlıqtıń birgeliktegi tásiri menen anıqlanadı.

2. Jılınıw nátiyjesinde gemonxoz, fasciolyoz hám keneler arqalı juǵatuǵın keselliklerdiń invaziya máwsiminiń uzarıwı, areallarınıń joqarı keńlikler hám biyiklikler tárepke keńeyiwi kútiledi; arid aymaqlarda bolsa qáwip tiykarınan antropogenlik ızǵarlıq derekleri átirapında toplanadı.

3. Parazitar invaziya basımınıń artıwı ıssılıq stressi hám antigelmintik rezistentlik penen birgelikte haywanlardıń den sawlıǵına hám sharwashılıq ónimdarlıǵına kompleksli unamsız tásir kórsetedi.

4. Ózbekstan jaǵdayında suwǵarılatuǵın oypatlar hám taw eteki jaylawları parazitar qáwip artıp baratuǵın birinshi gezektegi aymaqlar bolıp esaplanadı; olar ushın klimat maǵlıwmatlarına tiykarlanǵan epizootologiyalıq monitoring hám boljaw sistemasın islep shıǵıw usınıs etiledi.

5. Profilaktika strategiyası kalendar tiykarındaǵı jantasıwdan klimat-model tiykarındaǵı beyimlesiwshi, nıshanalı emlew hám «Birden-bir den sawlıq» principlerine tiykarlanǵan sistemaǵa ótiwi tiyis.

Аннотация: *Грибы рода Fusarium являются опасными фитопатогенами, вызывающими корневые гнили и фузариоз колоса зерновых культур, а также продуцирующими опасные микотоксины. Точная видовая идентификация и филогенетическая характеристика локальных штаммов необходимы для фитосанитарного контроля и селекции на устойчивость. В статье приведены результаты молекулярно-генетической идентификации и филогенетического анализа изолятов грибов Fusarium acuminatum и Fusarium equiseti, выделенных из пораженных растений озимой пшеницы в Узбекистане. На основе ПЦР-амплификации и секвенирования вариабельных участков генов ITS и TEF1-α были определены нуклеотидные последовательности штаммов и депонированы в международную базу данных NCBI GenBank (акцессионные номера PZ194281, PZ194410, PZ194414, PZ194422, PZ194660). Филогенетический анализ, проведенный методом Maximum Likelihood в программе MEGA 12, подтвердил высокую гомологию (98–100%) узбекских изолятов с референсными мировыми штаммами.*

Ключевые слова: *Fusarium acuminatum, Fusarium equiseti, озимая пшеница, ПЦР, ITS-регион, TEF1-α, GenBank, MEGA* 12, Maximum Likelihood, филогенетический анализ, Узбекистан.

MOLECULAR-GENETIC CHARACTERIZATION AND PHYLOGENETIC ANALYSIS OF *FUSARIUM ACUMINATUM* AND *FUSARIUM EQUISETI* ISOLATES RECOVERED FROM WINTER WHEAT IN UZBEKISTAN

Abstract: *Fungi of the genus Fusarium are dangerous phytopathogens causing root rot and head blight in cereal crops, as well as producing hazardous mycotoxins. Accurate species identification and phylogenetic characterization of local strains are essential for phytosanitary monitoring and breeding for resistance. The article presents the results of molecular-genetic identification and phylogenetic analysis of Fusarium acuminatum and Fusarium equiseti isolates obtained from infected winter wheat plants in Uzbekistan. Based on PCR amplification and sequencing of variable regions of the ITS and TEF1-α genes, nucleotide sequences were determined and deposited into the NCBI GenBank database (accession numbers PZ194281, PZ194410, PZ194414, PZ194422, PZ194660). Phylogenetic analysis performed using the Maximum Likelihood method in MEGA 12 confirmed high sequence identity (98–100%) between the Uzbek isolates and global reference strains.*

Keywords: *Fusarium acuminatum, Fusarium equiseti, winter wheat, PCR, ITS region, TEF1-α, GenBank, MEGA 12, Maximum Likelihood, phylogenetic analysis, Uzbekistan.*

O‘ ZBEKISTONDA QISHKI BUG‘ DOYDAN AYRILGAN FUSARIUM ACUMINATUM VA FUSARIUM EQUISETI IZOLATLARINING MOLEKULYAR GENETIK XUSUSIYATLARI VA FILOGENETIK TAHLIL

Annotatsiya: *Fusarium turkumiga mansub zamburug‘ lar don ekinlarining ildiz chirishi va boshoq fuzariozini keltirib chiqaradigan hamda xavfli mikotoksinlar ishlab chiqaradigan fitopatogenlar hisoblanadi. Mahalliy shtammlarni aniq tur darajasida identifikatsiya qilish va filogenetik tavsiflash fitosanitariya nazorati hamda chidamlilikka erishish selektsiyasi uchun muhim ahamiyatga ega. Maqolada O‘ zbekistonning kuzgi bug‘ doyzorlaridan ajratib olingan Fusarium acuminatum va Fusarium equiseti zamburug‘ izolyatlarining molekulyar-genetik identifikatsiyasi va filogenetik tahlili natijalari keltirilgan. ITS va TEF1-α genlarining o‘ zgaruvchan ketma-ketliklarini PZR-amplifikatsiya qilish va sekvenirlash asosida nukleotid ketma-ketliklari aniqlandi hamda NCBI GenBank xalqaro ma’lumotlar bazasiga joylashtirildi (aktsessiya raqamlari PZ194281, PZ194410, PZ194414,*

PZ194422, PZ194660). MEGA 12 dasturida Maximum Likelihood usuli yordamida o‘ tkazilgan filogenetik tahlil O‘ zbekiston izolyatlarining jahon etalon shtammlari bilan yuqori darajadagi gomologiyasini (98–100%) tasdiqladi.

Kalit so‘ zlar: *Fusarium acuminatum, Fusarium equiseti, kuzgi bug‘ doy, PZR, ITS-region, TEF1-α, GenBank, MEGA 12, Maximum Likelihood, filogenetik tahlil, O‘ zbekiston.*

Введение: Озимая пшеница (*Triticum aestivum* L.) является ключевой продовольственной культурой Узбекистана, обеспечение стабильного урожая которой напрямую связано с продовольственной безопасностью страны. Среди широкого спектра фитопатогенов, поражающих посевы пшеницы, особую опасность представляют грибы рода *Fusarium*, вызывающие корневые и прикоренневые гнили, а также фузариоз колоса. Инфицирование данными микроорганизмами приводит не только к существенным потерям урожая, но и к накоплению в зерне вторичных метаболитов — микотоксинов (трихотецены, зеараленон и др.), представляющих прямую угрозу здоровью человека и сельскохозяйственных животных. Среди большого видового разнообразия рода особое место занимают виды *Fusarium acuminatum* и *Fusarium equiseti*, входящие в сложные видовые комплексы. Традиционные методы их идентификации, основанные на морфолого-культуральных признаках (строение макро- и микроконидий, скорость роста колоний, пигментация), часто оказываются неэффективными. Это обусловлено высокой фенотипической изменчивостью патогенов, зависимостью от условий культивирования и давлением факторов окружающей среды.

Для преодоления ограничений классической микологии в практику фитопатологического мониторинга активно внедряются молекулярно-генетические методы. Разделительный потенциал универсального маркерного региона ITS (Internal Transcribed Spacer) рДНК часто оказывается недостаточным для точной межвидовой дифференциации внутри рода *Fusarium*. В связи с этим современные филогенетические исследования опираются на белок-кодирующие гены, среди которых ген фактора элонгации трансляции 1-альфа (TEF1-*α*) признан наиболее информативным маркером благодаря высокой скорости накопления нуклеотидных замен и наличию вариабельных интронных участков.

Несмотря на активное изучение фузариозов в мире, молекулярно-генетическая структура популяций *F. acuminatum* и *F. equiseti*, циркулирующих на пшеничных полях Узбекистана, остаётся недостаточно изученной. Отсутствие зарегистрированных в международных базах данных локальных штаммов затрудняет проведение сравнительного эволюционного анализа и разработку специфичных диагностических тест-систем.

Целью данного исследования являлась молекулярно-генетическая идентификация, филогенетический анализ и депонирование в базу данных NCBI GenBank нуклеотидных последовательностей изолятов *Fusarium acuminatum* и *Fusarium equiseti*, выделенных из пораженных растений озимой пшеницы в Узбекистане.

Методы исследования.

Выделение и культивирование фитопатогенов.

Объектами исследования послужили изоляты грибов рода *Fusarium*, выделенные из пораженных прикоренневых частей стебля и колоса озимой пшеницы (*Triticum aestivum* L.), отобранных в ходе фитосанитарного мониторинга посевов в Узбекистане. Выделение чистых культур проводили путем высева фрагментов пораженных тканей на картофельно-декстрозный агар (PDA). Для исключения гетерокариоза и получения чистых генетических линий получение моноспоровых культур осуществляли методом предельных разведений микроконидий.

Экстракция геномной ДНК.

Экстракцию геномной ДНК выполняли из свежевыращенного мицелия 5-суточных моноспоровых культур. Навеску мицелия растирали в жидком азоте с использованием стерильной ступки и пестика. Выделение ДНК проводили с использованием коммерческого набора *GeneJET Genomic DNA Purification Kit* (Thermo Fisher Scientific) в соответствии с протоколом производителя. Концентрацию и чистоту выделенной ДНК оценивали на спектрофотометре NanoDrop по соотношению оптической плотности A_{260}/A_{280}.

ПЦР-амплификация маркерных генов.

Для молекулярно-генетической идентификации использовали два маркерных локуса:

1. Вариабельный участок гена фактора элонгации трансляции 1-альфа (**TEF1-*α***) с использованием специфичных праймеров EF1-1 и EF1-2.
2. Внутренний транскрибируемый спейсер рибосомальной ДНК (**ITS-регион**).

Реакцию проводили в объеме 25 мкл, содержащем:

- 12,5 мкл 2 × DreamTaq PCR Master Mix (Thermo Fisher Scientific);
- по 1 мкл каждого праймера (10 пмоль/мкл);
- 1,8 мМ $MgCl_2$ (оптимизированная концентрация для устранения неспецифического связывания);

• 4 мкл матрицы ДНК (~50 нг);

• 6,5 мкл ddH_2O, свободной от нуклеаз.

Амплификацию выполняли в термоциклере по следующей программе: первичная денатурация при 94 °C (5 мин); 35 циклов: денатурация при 94 °C (30 сек), отжиг праймеров при 59 °C для TEF1-*α* / 53 °C для ITS (40 сек), элонгация при 72 °C (1 мин); финальная элонгация при 72 °C (7 мин). Визуализацию продуктов ПЦР осуществлили методом гель-электрофореза в 1,8% агарозном геле с окрашиванием бромистым этидием.

Секвенирование и филогенетический анализ.

Очистку ПЦР-продуктов и их двунаправленное секвенирование по методу Сенгера проводили на автоматическом анализаторе. Полученные хроматограммы проанализированы и отредактированы. Поиск гомологичных последовательностей выполняли с помощью алгоритма **BLASTn** в международной базе данных NCBI GenBank.

Аннотированные нуклеотидные последовательности были зарегистрированы и депонированы в базы данных GenBank (NCBI). Множественное выравнивание нуклеотидных последовательностей узбекских изолятов и референсных штаммов из GenBank проводили с помощью алгоритма Muscle. Филогенетическое древо строили в программе **MEGA 12** с использованием метода максимального правдоподобия (**Maximum Likelihood**). Эволюционные расстояния рассчитывали на основе модели замен Tamura-Nei. Надежность топологии филогенетического древа оценивали с помощью бутстреп-анализа (Bootstrap test) с 1000 повторностей.

Результаты исследования.

Идентификация и депонирование нуклеотидных последовательностей.

В результате ПЦР-амплификации и последующего секвенирования вариабельных участков генов **ITS** и **TEF1-*α*** была проведена точная видовая идентификация исследуемых изолятов грибов рода *Fusarium*. Проведенный BLAST-анализ показал высокую степень гомологии (98–100%) полученных нуклеотидных последовательностей с референсными штаммами из базы данных NCBI.

Определенные последовательности были успешно аннотированы и депонированы в международную базу данных **NCBI GenBank** под соответствующими акцессионными номерами:

• **PZ194281** — *Fusarium acuminatum* (изолят F-12);

• **PZ194410** — *Fusarium acuminatum* (изолят F-13);

• **PZ194414** — *Fusarium acuminatum* (изолят F-14);

• **PZ194422** — *Fusarium equiseti* (изолят F-15);

• **PZ194660** — *Fusarium equiseti* (изолят F-16).

Таблица 1

Молекулярно-генетическая характеристика и номера доступа в GenBank изолятов грибов рода *Fusarium*, выделенных из озимой пшеницы

№	Вид гриба (Organism)	Шифр изолята	Регион сбора (Район)	Количество нуклеотидов (п.о.)	Номер доступа (Accession number)
1	*Fusarium acuminatum*	T-12	Ташкентская обл., Янгибазар	585	PZ194281
2	*Fusarium acuminatum*	T-13	Ташкентская обл., Паркент	585	PZ194410
3	*Fusarium acuminatum*	T-14	Ташкентская обл., Янгибазар	585	PZ194414
4	*Fusarium equiseti*	T-15	Бухарская обл.	584	PZ194422
5	*Fusarium equiseti*	T-16	Ташкентская обл., Янгибазар	605	PZ194660

Филогенетический анализ

На основе выровненных последовательностей гена TEF1-*α* с использованием программы **MEGA 12** методом **Maximum Likelihood** (Максимального правдоподобия) было сконструировано филогенетическое древо.

Топология полученного древа позволила чётко разделить исследуемые изоляты на две основные клады:

1. **Клада *Fusarium acuminatum*:** Изоляты с акцессионными номерами PZ194281, PZ194410 и PZ194414 сгруппировались в единый монофилетический кластер с эталонными мировыми штаммами *F. acuminatum*. Высокий уровень бутстреп-поддержки (>90%) подтверждает их генетическую идентичность и стабильность маркерного локуса TEF1-α.

2. **Клада *Fusarium equiseti*:** Изоляты PZ194660 и PZ19422 сформировали обособленную ветвь внутри комплекса видов *Fusarium incarnatum-equiseti* (FIESC), проявив 99–100% сходство с референсными изолятами *F. equiseti*.

Сравнительный филогенетический анализ подтвердил высокую разрешающую способность гена TEF1-α для видовой дифференциации грибов рода *Fusarium* по сравнению с ITS-регионом, позволив достоверно разграничить близкородственные виды.

Заключение

В ходе проведенных молекулярно-генетических исследований осуществлена точная видовая идентификация и филогенетическая характеристика локальных изолятов фитопатогенных грибов *Fusarium acuminatum* и *Fusarium equiseti*, выделенных с пораженных растений озимой пшеницы в Узбекистане. Впервые нуклеотидные последовательности маркерного локуса исследуемых штаммов были аннотированы и депонированы в международную базу данных NCBI GenBank под номерами PZ194281, PZ194410, PZ194414, PZ194422 и PZ194660. Филогенетический анализ, выполненный методом Maximum Likelihood в программе MEGA 12, подтвердил высокую степень эволюционной гомологии (98–100%) узбекских изолятов с референсными мировыми штаммами *F. acuminatum* и *F. equiseti*. Полученные результаты подтверждают высокую информативность и дискриминационную способность гена TEF1-α для дифференциации видов *Fusarium*. Депонированные последовательности формируют фундаментальную базу для фитосанитарного мониторинга, разработки высокоточных диагностических ПЦР-тест-систем и селекции пшеницы на устойчивость к фузариозам.

Annotatsiya.*Ushbu maqolada “OS-SHIFO” shifobaxsh oziq-ovqat qo‘ shimchasi tarkibidagi aminokislotalar miqdori yuqori samarali suyuqlik xromatografiyasi (YuSSX) usulida aniqlangan. Mazkur oziq-ovqat qo‘ shimchasi tarkibiga kiruvchi tikanli tuyasingren (Atraphaxis spinosa L.), limono‘ ti (Melissa officinalis L.) va tog‘ yalpizi (Mentha longifolia L.) o‘ simliklarining xalq tabobatida qo‘ llanilishi va ahamiyati haqida ma’lumotlar keltirilgan.Tadqiqot natijasida oziq-ovqat qo‘ shimchasi tarkibidagi aminokislotalar tarkibi va miqdoriy ko‘ rsatkichlari aniqlangan.*

Kalit so‘ zlar: *Atraphaxis spinosa L., Melissa officinalis L., Mentha longifolia L., ”OS-SHIFO” shifobaxsh oziq-ovqat qo‘ shilmasi, aminokislotalar, YuSSX, o‘ simlik xomashyosi, xalq tabobati*

ОПРЕДЕЛЕНИЕ СОДЕРЖАНИЯ АМИНОКИСЛОТ В ЛЕКАРСТВЕННОЙ ПИЩЕВОЙ ДОБАВКЕ «ОС-ШИФО», ПРИГОТОВЛЕННОЙ НА ОСНОВЕ ATRAPHAXIS SPINOSA L., MELISSA OFFICINALIS L., MENTHA LONGIFOLIA L., МЕТОДОМ ЮССХ И ЕГО ЗНАЧЕНИЕ В НАРОДНОЙ МЕДИЦИНЕ.

Аннотация*. В данной статье содержание аминокислот в лечебной пищевой добавке ”OS-SHIFO” определено методом высокоэффективной жидкостной хроматографии (ВЭЖХ). Приведены сведения о применении и значении в народной медицине растений курчавка колючая (Atraphaxis spinosa L.), мелисса (Melissa officinalis L.) и горной мяты (Mentha longifolia L.), входящих в состав данной пищевой добавки. В результате исследования определены состав и количественные показатели аминокислот в пищевом добавке.*

Ключевые слова*: Atraphaxis spinosa L., Melissa officinalis L., Mentha longifolia L. Лечебная пищевая добавка ”OS-SHIFO”, аминокислоты, ВЭЖХ, растительное сырье, народная медицина*

DETERMINATION OF AMINO ACID CONTENT IN THE “OS-SHIFO” THERAPEUTIC FOOD SUPPLEMENT (BASED ON *ATRAPHAXIS SPINOSA* L., *MELISSA OFFICINALIS* L., AND *MENTHA LONGIFOLIA* L.) USING THE YUSSX METHOD AND ITS SIGNIFICANCE IN FOLK MEDICINE

Abstract*. In this article, the amount of amino acids in the ”OS-SHIFO” medicinal food supplement was determined by high-performance liquid chromatography (HPLC). Information is provided on the use and significance in folk medicine of the thorny camelthorn (Atraphaxis spinosa L.), lemon balm (Melissa officinalis L.), and mountain mint (Mentha longifolia L.) plants included in this food supplement. As a result of the research, the composition and quantitative indicators of amino acids in the plants raw materials were determined.*

Keywords: *Atraphaxis spinosa L., Melissa officinalis L., Mentha longifolia L., "OS-SHIFO" medicinal food supplement, amino acids, HPLC, plant raw materials, folk medicine*

Kirish

Bugungi kunda aholi salomatligini saqlash, organizmning fiziologik ehtiyojlarini ta'minlash va biologik faol moddalarga boy mahsulotlardan samarali foydalanishga alohida e'tibor qaratilmoqda. Shu nuqtai nazardan, dorivor o‘ simliklar asosida tayyorlangan biologik faol mahsulotlar, jumladan oziq-ovqat qo‘ shimchalarining kimyoviy tarkibini o‘ rganish muhim ilmiy ahamiyat kasb etadi.

Qadimdan shifobaxsh o‘ simliklar xalq tabobatida turli kasalliklarni oldini olish va davolashda asosiy vosita hisoblangan. Xususan, Markaziy Osiyo xalq tabobati tajribasida hamda Abu Ali ibn Sino ta'limotida o‘ simlik xomashyolaridan tayyorlangan damlama va qaynatmalar keng qo‘ llanilgan. Tadqiqotda foydalanilgan *Atraphaxis spinosa L.* xalq tabobatida me'da ichak kasalliklari, diareya va yallig‘ lanish jarayonlarini davolashda, *Melissa officianalis L.* asab tizimini tinchlantirish, uyqusizlik va yurak spazmlarini bartaraf etishda, *Mentha longifolia L.* esa nafas yo‘ llari va ovqat hazm qilish tizimi buzilishlarida, shamollashga qarshi hamda spazmolitik vosita sifatida ishlatilgan. Asrlar davomida xalq tabobatida o‘ z isbotini topgan ushbu o‘ simliklarning shifobaxsh xususiyatlarini zamonaviy fizik kimyoviy usullar yordamida tadqiq etish va ular asosida ko‘ p komponentli "OS-SHIFO" oziq-ovqat qo‘ shimchasining biokimyoviy tarkibini asoslab berish alohida ilmiy va amaliy ahamiyatga ega.

O‘ simliklar tarkibidagi oqsillar, aminokislotalar, fenol birikmalar, flavonoidlar, vitaminlar, mineral moddalar va boshqa biologik faol birikmalar ularning oziqaviy va fiziologik- farmakologik qiymatini belgilashda muhim o‘ rin tutadi. Xususan, aminokislotalar organizmda oqsillar sintezi, fermentlar va boshqa biologik muhim birikmalar hosil bo‘ lishida ishtirok etadi. Shu sababli o‘ simlik xomashyosi va ular asosida tayyorlangan mahsulotlarning aminokislotalar tarkibini aniqlash ularning biologik va oziqaviy qiymatini baholashning muhim ko‘ rsatkichlaridan biri hisoblanadi.

Aminokislotalarning sifat va miqdor jihatdan aniqlashda zamonaviy xromatografik usullar, jumladan, yuqori samarali suyuqlik xromatografiyasi (YuSSX) samarali analitik usullardan hisoblanadi.

Adabiyotlar tahlili

Aminokislotalar tirik organizmlar metabolizmida muhim o‘ rin tutuvchi organik birikmalar bo‘ lib, oqsillar va peptidlarning asosiy tarkibiy qismlarini tashkil etadi. Shu bilan birga, aminokislotalar azot almashinuvi, energiya metabolizmi, hujayra signalizatsiyasi va organizmning turli tashqi ta'sirlarga moslashuv jarayonlarida ishtirok etadi. O‘ simliklarda aminokislotalar oqsil biosintezi bilan bir qatorda azotni tashish va saqlash, stressga javob reaksiyalari hamda ikkilamchi metabolitlar sintezida muhim rol o‘ ynaydi. O‘ simliklarda aminokislotalar metabolizmi energetik tanqislik va stress sharoitida sezilarli darjada o‘ zgarishi, ayrim aminokislotalar esa signal molekulalari sifatida ishtirok etishi mumkin [1].

O‘ simlik xomashyosini oziqaviy qiymatini baholashda aminokislotalar tarkibi muhim ko‘ rsatkichlardan biri hisoblanadi. Tadqiqotchilar tomonidan iqtisodiy ahamiyatga ega bo‘ lgan 142 ta o‘ simlik turning aminokislota tarkibi tahlil qilinib, o‘ simliklarda aminokislotalar miqdori turga qarab sezilarli darajada farq qilishi ko‘ rsatilgan, o‘ simliklar tarkibida almashinmaydigan aminokislotalarning mavjudligi ularning oziqaviy ahamiyatini baholashda muhim ekanligini qayd etilgan [2].

Aminokislotalar orasida inson organizmida sintezlanmaydigan yoki yetarli darajada hosil bo‘ lmaydigan lizin, metionin, treonin, fenilalanin, triptofan, valin, izoleysin, leysin va gistidin almashinmaydigan aminokislotalar sifatida qaraladi. Tadqiqotlarda o‘ simliklarda ushbu aminokislotalarning sintezi va to‘ planishi, ayniqsa ularning oziqaviy qiymatini oshirishdagi ahamiyati keng o‘ rganilgan [3]. Shu nuqtai nazardan, o‘ simliklarning aminokislota tarkibini o‘ rganish nafaqat biokimyoviy jihatdan, balki ulardan oziq-ovqat mahsulotlari va biologik faol qo‘ shimchalar tayyorlash imkoniyatlarini baholashda ham muhimdir. Turli botanik xomashyolar va ulardan tayyorlangan preparatlarda erkin aminokislotalar tarkibi o‘ rganilib, o‘ simlik turlari o‘ rtasida erkin aminokislotalarning umumiy miqdori va nisbati keskin farq qilishi aniqlagan. Tadqiq etilgan o‘ simliklarning bir qismida arginin, asparagin, glutamin, prolin nisbatan yuqori miqdorda uchrashi ko‘ rsatilgan [4]. Erkin aminokislotalar o‘ simliklarning nafaqat oziqaviy, balki fiziologik hususiyatlarini shakllantirishda ham ishtirok etadi. Xususan, prolin o‘ simliklarning qurg‘ oqchilik, sho‘ rlanish va oksidlovchi stressga moslashuvida muhim rol o‘ ynashi, glutamin esa signal uzatish jarayonlarida ishtirok etishi qayd etilgan.

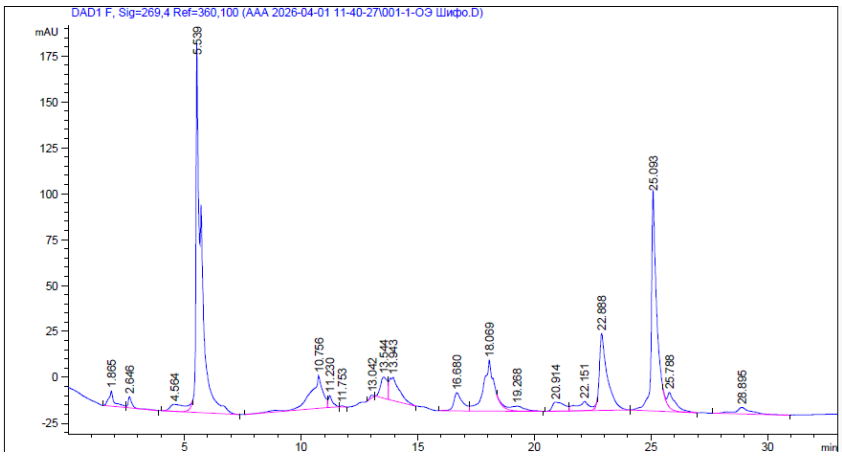
Zamonaviy tadqiqotlarda aminokislotalarning o‘ simliklarda signal molekulalari, osmoprotektorlar va stressga qarshi himoya mexanizmlarining komponentlari sifatidagi vazifalariga alohida e'tibor qaratilmoqda. O‘ simlik xomashyosidagi aminokislotalarni miqdoriy va sifat jihatidan aniqlashda yuqori samarali suyuqlik xromatografiyasi keng qo‘ llaniladi. Aminokislotalarni fenilizotiosianat bilan oldindan derivatizatsiya qilishga asoslangan yuqori samarali suyuqlik xromatografiya (YuSSX) usulini ishlab chiqilqan. Ushbu yondashuvda aminokislotalarning feniltiokarbamil

hosilalari hosil qilinib, ularni xromatografik ajratish va miqdoriy aniqlash imkoniyati yaratiladi. Mazkur usul murakkab biologik matrisalarda aminokislotalarni aniqlash uchun yuqori sezgirlik va takrorlanuvchanlikka ega [5].

Xalq tabobatida *Atraphaxis spinosa L.(tikanli tuyasingren*) o‘ simligining ildizi, poyasi va barglari turli kasalliklarni davolashda, xususan me’da-ichak tizimi kasalliklari (diareya, dizenteriya), yallig‘ lanish jarayonlari hamda isitmani tushirishda damalamalar va qaynatmalar holida tavsiya etiladi. Bu o‘ simlik flavonoid va oshlovchi moddalarga boy bo‘ lgani uchun mikroblarga qarshi, yaralarni tuzatuvchi va qon to‘ htatuvchi ta’sirga ega [6].

Markaziy Osiyo va Evropa xalq tabobatida *Melissa officinalis (limono‘ ti)* asosan asab tizimi va yurak-qon tomir faoliyatini yaxshilashda foydalanib kelingan. Shuningdek, tinchlantiruvchi sifatida, uyqusizlik, xafaqon, bosh og‘ rig‘ i, spazmlar va yurak urishi tezlashganda qo‘ llaniladi [7].

Mentha longifolia L. Sharq tabobatida, jumladan Abu Ali ibn Sino asarlarida keng yoritilgan. Nafas yo‘ llari kasalliklarida (shamollash, yo‘ tal), me’da ichak buzilishlari (ko‘ ngil aynishi, ovqat xazm bo‘ lmasligi) va o‘ t haydovchi vosita sifatida ishlatiladi. Tarkibidagi efir moylari (mentol) hisobiga og‘ riq qoldiruvchi, antiseptik, shamollashga qarshi va spazmolitik ta’sirga ega [8].



Shunday qilib, adabiyotlarda aminokislotalar o‘ simliklarning o‘ sishi, rivojlanishi, stressga chidamliligi va oziqaviy qiymatini shakllantirishdagi ahamiyati keng yoritilgan. Biroq *Atraphaxis spinose* L. o‘ simligi tarkibidagi erkin aminokilslotalarning sifat va miqdoriy tarkibi, ularning o‘ zaro nisbati hamda mazkur ko‘ rsatkichlarning o‘ simlik xomashyosini biologik va oziqaviy qiymati bilan bog‘ liqligi yetarlicha o‘ rganilmagan. Shu sababli *Atraphaxis spinosa L., Melissa officinalis L., Mentha longifolia L* o‘ simliklari asosida tayyorlangan “OS-SHIFO” oziq-ovqat qo‘ simchasi tarkibidagi erkin aminokislotalarni YuSSX usulida aniqlash va ularning miqdoriy tarkibini baholash dolzarb ilmiy vazifalardan biri hisoblanadi.

Tadqiqot metodologiyasi

Erkin aminokislotalarni ajratish. O‘ simlik namunasi tarkibidagi erkin aminokislotalarni ajratish uchun suvli ekstraktlardan foydalanildi. Namunalar tarkibidagi oqsil va peptidlarni cho‘ ktirish sentrifuga stakanlarida amalga oshirildi. Buning uchun tekshirilayotgan namunadan 1 ml olinib, unga 1ml 20% li trixlorsirka kislotasi (TXSK) qo‘ shildi. Aralashma 10 daqiqa davomida saqlangandan so‘ ng 8000 ayl/min tezlikda 15 daqiqa sentrifugalandi. Hosil bo‘ lgan cho‘ kma ajratilib, uning ustidagi suyuqlik qismi olib tashlandi. Cho‘ kma liofil quritish usulida quritildi. Quruq qoldiq trietilamin-atsetonitril-suv aralashmasida 1:7:1 nisbatda eritildi. Kislotali muhitni neytrallash va namunani tayyorlash maqsadida ushbu operasiya ikki marta takrorlandi. Aminokislotalarni xromatografik tahlilga tayyorlashda ular feniltioizotsianat bilan derivatizasiya qilinib, aminokislotalarning feniltiokarbamil hosilalari olindi. Derivatizasiya jarayoni Stiven A.Koen va Daniel usuli asosida amalga oshirildi [9].

Olingan aminokislotalar hosilalarini identifikatsiya qilish yuqori samarali suyuqlik xromatografiyasi usulida amalga oshirildi. Xromatografik tahlil Agilent Technologies 1200 xromatografida, AD detektori va Discovery HS C18 (75×4,6mm) kolonkasida bajarildi. Xromatografik ajratishda B elyuent sifatida atsetonitrildan foydalanildi. Oqim tezligi 1,2 ml/min, deteksiya to‘ lqin uzunligi 269 nm ni tashkil etdi. Gradiyent elyusiya rejimi quyidagicha olib borildi:0-2,5 daqiqa-1-6% B; 2,51-40 daqiqa-6-30%B; 40,1-45 daqiqa -30-60% B; 45,1-50 daqiqa-60%B; 50-daqiqadan so‘ ng-60-0% B.

1-rasm

Aminokislotalarni identifikatsiya qilish ularning xromatografik ushlanish vaqtlarini standart namunalarning ushlanish vaqtlari bilan solishtirish asosida amalga oshirildi.

Natijalar va ularning tahlili

“OS-SHIFO” oziq-ovqat qo‘ shimchasi tarkibidagi erkin aminokislotalar miqdori YuSSX usulida tahlil qilindi.

Aminokislotalarning nomi	OS-SHIFO

	Konsentratsiya mg/g
Asparagin kislota	0.461
Glutamin kislota	0.297
Serin	0.346
Glitsin	0.334
Asparagin	0.657
Glutamin	1.867
Sistein	4.187
Treonin	1.452
Arginin	0.191
Alanin	0.483
Prolin	1.055
Tirozin	0.193
Valin	0.397
Metionin	0.804
Gistidin	0.309
Izoleysin	0.224
Leysin	0.173
Triptofan	0.627
Fenilalanin	0.025
Lizin	0.038
Jami	**14.122**

1-jadval

1-jadval natijalariga ko‘ ra, oziq-ovqat qo‘ shimchasi tarkibida jami 20 ta erkin aminokislota aniqlandi. Ularning umumiy miqdori 14,122 mg/g ni tashkil etdi. Aniqlangan aminokisllotalar tarkibi o‘ simliklarda almashinadigan, shartli almashinmaydigan hamda almashinmaydigan aminokislotalar mavjudligini ko‘ rsatadi.

Miqdoriy jihatdan sistein- 4,187 mg/g bilan eng yuqori ko‘ rsatkichni namoyon qildi. Bu umumiy aminokislotalar miqdorining taxminan 29,7% ini tashkil etadi. Keyingi yuqori ko‘ rsatkichlar glutamin-1,867 mg/g (13.2%), treonin-1,452 mg/g (10,3%) va prolin-1,055mg/g (7,5%) xissasiga to‘ g‘ ri keladi. Mazkur aminokislotalarning nisbatan yuqori miqdorda bo‘ lishi “OS-SHIFO” oziq-ovqat qo‘ shimchasini biologik qiymatini baholashda muhim ahamiyatga ega.

Almashinmaydigan aminokislotalar sifatida treonin, valin, metionin, gistidin, izoleysin, leysin, triptofan, fenilalanin va lizin aniqlangan. Ularning jami miqdori hisob-kitob bo‘ yicha taxminan 4,049mg/g ni tashkil etadi. Demak, aniqlangan erkin aminokislotalarning taxminan 28,7% qismi almashinmaydigan aminokislotalar xissasiga to‘ g‘ ri keladi. Shuningdek, metionin (0,804mg/g), asparagin (0,657mg/g), triptofan (0,627mg/g), alanin (0,483mg/g), asparagin kislotasi (0,461mg/g) va valin (0,397mg/g) kabi aminokislotalarni aniqlanganligi o‘ simliklarda azot almashinuvi va oqsil biosintezi bilan bog‘ liq metabolik jarayonlar faol kechishini ko‘ rsatuvchi muhim kimyoviy ko‘ rsatkichlardan biri hisoblanadi.

Eng kam miqdordagi aminokislotalar fenilalanin- 0,025mg/g, lizin-0,038 mg/g, leysin-0,173 mg/g, arginin-0,191mg/g va tirozin-0,193 ekanligi ma’lum bo‘ ldi.

Xulosa

Olib borilgan tadqiqotlar va yuqori samarali suyuqlik xromatografiyasi tahlillari natijasida *Atraphaxis spinosa L., Melissa officinalis L. va Mentha longifolia L.* o‘ simliklari xomashyolari asosida yaratilgan “OS-SHIFO” shifobaxsh oziq-ovqat qo‘ shimchasining ozuqaviy va biologik qiymati yuqori ekanligi ilmiy jihatdan o‘ z tasdig‘ ini topdi.Tahlillar shuni ko‘ rsatadiki, ushbu qo‘ shimcha tarkibida inson organizmi uchun muhim bo‘ lgan jami 20 xil aminokislota mavjud bo‘ lib, ularning umumiy miqdori 14,122 mg/g ni tashkil etadi. Aminokislotalar tarkibida sistein, glutamin, treonin va prolinning nisbatan yuqori miqdorda uchrashi qayd etildi. Almashinmaydigan aminokislotalarning aniqlanishi mazkur o‘ simlik xomashyosining oziqaviy va biologik qiymatlarini baholashda muhim ahamiyatga ega. Asrlar davomida xalq tabobatida tinchlantiruvchi, yallig‘ lanishga qarshi va xazm qilishni yaxshilovchi vosita sifatida qo‘ llanib kelingan ushbu

uchta o‘ simlikning terapevtik xususiyatlari ularning boy aminokislota tarkibi bilan bevosita bog‘ liqligi bilan namoyon bo‘ ldi. Xususan, asab tizimini tinchlantiruvchi xususiyatlari tarkibidagi triptofan, glutamin va glitsin kabi neyromediatorlar sintezida qatnashuvchi aminokislotalar bilan ilmiy jihatdan asoslanadi.

Demak,”OS-SHIFO” oziq-ovqat qo‘ shimchasi nafaqat xalq tabobati an’analariga asoslangan shifobaxsh vosita, balki zamonaviy biokimyoviy tahlillar bilan tasdiqlangan, inson organizmini zarur oqsillar qurilish ashyolari bilan ta’minlovchi samarali biologik faol mahsulot hisoblanadi. Uni aholi salomatligini mustahkamlash, kasalliklarning oldini olish va kundalik ratsionni foydali moddalar bilan boyitish maqsadida amaliyotga joriy etish tavsiya etiladi.

Аннотация: *Введение. Республика Узбекистан характеризуется выраженным этногеографическим и демографическим многообразием субпопуляций, что теоретически способно влиять на частоту и структуру генетически детерминированных форм мужского бесплодия. Систематизированные данные о региональном распределении микроделеций AZF-региона Y-хромосомы на территории страны ранее отсутствовали. Цель исследования — оценить особенности регионального (этногеографического) распределения частоты и спектра микроделеций локусов AZFa, AZFb и AZFc Y-хромосомы у мужчин 18 лет и старше с бесплодием в 14 административно-территориальных единицах Республики Узбекистан. Материалы и методы. Обследовано 626 мужчин 18 лет и старше с клинически верифицированным диагнозом мужского бесплодия (необструктивная азооспермия и тяжёлая олигозооспермия), постоянно проживающих в 14 регионах Республики Узбекистан (от n=7 в Республике Каракалпакстан до n=113 в г. Ташкенте). Микроделеции AZFa, AZFb, AZFc определяли методом мультиплексной ПЦР в реальном времени по 13 STS-маркерам с использованием сертифицированной тест-системы. Для повышения статистической мощности регионы были дополнительно объединены в три укрупнённые экономико-географические зоны. Результаты и их обсуждение. Микроделеции AZF выявлены у 93 из 626 пациентов (14,86%); частота варьировала от 13,27% (г. Ташкент) до 16,67% (Сурхандарьинская область) без статистически значимых межрегиональных различий (χ^2=0,002–0,190; p=0,663–0,969). Сравнение трёх укрупнённых зон (Ташкентская агломерация, Ферганская долина, остальные регионы) также не выявило значимых различий (χ^2=0,195; df=2; p=0,907). Во всех без исключения регионах абсолютно доминировали делеции AZFc (58,33–100% структуры выявленных нарушений). Заключение. Установленная однородность регионального распределения микроделеций AZF свидетельствует о преимущественно спонтанном, не зависящем от территориальной и этнической принадлежности механизме их формирования и обосновывает применение единого общенационального диагностического алгоритма без необходимости регион-специфической адаптации, при обязательном учёте азиат-специфичного полиморфизма rs72609647 в сайте связывания праймера sY84.*

Ключевые слова: *мужское бесплодие; Y-хромосома; микроделеции AZF; этногеографическое распределение; регионы Узбекистана; консангвинность; sY84; азооспермия.*

ETHNOGEOGRAPHIC DISTRIBUTION OF Y-CHROMOSOME AZF LOCUS MICRODELETIONS IN INFERTILE MEN ACROSS REGIONS OF THE REPUBLIC OF UZBEKISTAN

Abstract*.Introduction. The Republic of Uzbekistan is characterized by pronounced ethnogeographic and demographic diversity of subpopulations, which could theoretically influence the frequency and structure of genetically determined forms of male infertility. Systematic data on the regional distribution of Y-chromosome AZF microdeletions across the country had not previously been available. The aim of the study was to assess the regional (ethnogeographic) distribution of the frequency and spectrum of AZFa,*

AZFb and AZFc microdeletions in infertile men aged 18 years and older across 14 administrative-territorial units of the Republic of Uzbekistan. Materials and methods. A total of 626 men aged 18 years and older with a clinically verified diagnosis of male infertility (non-obstructive azoospermia and severe oligozoospermia), permanently residing in 14 regions of Uzbekistan (from n=7 in the Republic of Karakalpakstan to n=113 in Tashkent city), were examined. AZFa, AZFb and AZFc microdeletions were detected by real-time multiplex PCR using 13 STS markers with a certified test system. To increase statistical power, the regions were additionally pooled into three enlarged economic-geographic zones. Results and discussion. AZF microdeletions were detected in 93 of 626 patients (14.86%); the frequency ranged from 13.27% (Tashkent city) to 16.67% (Surkhandarya region) with no statistically significant inter-regional differences (χ^2=0.002–0.190; p=0.663–0.969). Comparison of three pooled zones (Tashkent metropolitan zone, Fergana Valley, other regions) likewise showed no significant differences (χ^2=0.195; df=2; p=0.907). AZFc deletions predominated in every region examined (58.33–100% of the deletion structure). Conclusion. The demonstrated homogeneity of the regional distribution of AZF microdeletions indicates a predominantly spontaneous mechanism of their formation, independent of territorial or ethnic affiliation, and supports the use of a single unified national diagnostic algorithm without the need for region-specific adaptation, while requiring the mandatory use of primer systems accounting for the Asian-specific rs72609647 polymorphism at the sY84 primer binding site.

Keywords: *male infertility; Y chromosome; AZF microdeletions; ethnogeographic distribution; regions of Uzbekistan; consanguinity; sY84; azoospermia.*

Введение

Мужское бесплодие остаётся одной из наиболее социально значимых медицинских проблем современности, а генетические факторы ответственны за 15–30% его случаев [1, 3, 4]. Среди верифицированных генетических причин второе место после синдрома Клайнфельтера занимают микроделеции региона AZF (azoospermia factor) длинного плеча Y-хромосомы, подразделяющегося на три субрегиона — AZFa, AZFb и AZFc [6]. Частота и спектр AZF-микроделеций демонстрируют значительную межпопуляционную вариабельность в масштабах планеты [3, 4], что закономерно ставит вопрос о наличии подобной вариабельности и внутри отдельно взятой страны.

Республика Узбекистан представляет собой уникальный ареал с точки зрения этногенеза и популяционной генетики. Формирование современного населения страны происходило под влиянием масштабных исторических миграционных процессов, контактов различных этнических групп и сохранения в ряде регионов традиций эндогамных (близкородственных) браков [13, 14]. Отдельные наблюдения свидетельствуют о повышенной частоте кровнородственных браков в некоторых субпопуляциях Узбекистана и сопредельных стран Центральной Азии [15, 16], что теоретически могло бы способствовать локальному накоплению редких генетических вариантов по механизму эффекта основателя. Вместе с тем систематизированные данные о том, распределены ли AZF-микроделеции по территории Узбекистана равномерно либо демонстрируют региональную кластеризацию, в литературе отсутствовали.

Дополнительную актуальность региональному анализу придаёт описанный в литературе технический артефакт молекулярной диагностики AZFa: однонуклеотидный полиморфизм rs72609647 в сайте связывания обратного праймера STS-маркера sY84, распространённый преимущественно у лиц азиатского происхождения и способный имитировать истинную микроделецию AZFa при использовании устаревших диагностических панелей [11, 12]. Поскольку население Узбекистана этногенетически относится к азиатскому макрорегиону, оценка регионального распределения делеций AZFa приобретает не только эпидемиологическое, но и методологическое значение.

Цель исследования — оценить особенности регионального (этногеографического) распределения частоты и спектра микроделеций локусов AZFa, AZFb и AZFc Y-хромосомы у мужчин 18 лет и старше с бесплодием в 14 административно-территориальных единицах Республики Узбекистан.

Материал и методы исследования

Исследование выполнено в формате обсервационного аналитического исследования на базе клиники «Доктор Д» (г. Ташкент). В анализ включены 626 мужчин 18 лет и старше с клинически верифицированным диагнозом мужского бесплодия (медиана возраста 30,80±5,33 года), из которых 352 (56,2%) пациента с необструктивной азооспермией и 274 (43,8%) пациента с тяжёлой олигозооспермией (концентрация сперматозоидов менее 5 млн/мл). Оценку эякулята проводили дважды в соответствии с руководством Всемирной организации здравоохранения по лабораторному исследованию и обработке эякулята человека (6-е издание, 2021 г.) [5]; азооспермию верифицировали с обязательным исследованием осадка эякулята после центрифугирования.

Каждый пациент был отнесён к одному из 14 регионов Республики Узбекистан (г. Ташкент, Андижанская, Бухарская, Джизакская, Кашкадарьинская, Навоийская, Наманганская, Самаркандская, Сурхандарьинская,

Сырдарьинская, Ташкентская, Ферганская, Хорезмская области, Республика Каракалпакстан) на основании постоянного места жительства на момент включения в исследование. Ввиду выраженной неравномерности объёма выборки по регионам (от n=7 до n=113) для повышения статистической мощности сравнения регионы были дополнительно объединены в три укрупнённые экономико-географические зоны: Ташкентская агломерация (г. Ташкент и Ташкентская область), Ферганская долина (Андижанская, Наманганская и Ферганская области) и остальные регионы Республики (Бухарская, Джизакская, Кашкадарьинская, Навоийская, Самаркандская, Сурхандарьинская, Сырдарьинская, Хорезмская области, Республика Каракалпакстан).

Биологическим материалом служила периферическая венозная кровь, взятая в вакуумные пробирки с антикоагулянтом ЭДТА. Выделение геномной ДНК проводили с использованием комплекта «ПРОБА-РАПИД-ГЕНЕТИКА» (Р-021/4). Детекцию микроделеций AZFa, AZFb и AZFc выполняли методом качественной мультиплексной полимеразной цепной реакции с флуоресцентной детекцией в режиме реального времени с использованием сертифицированной тест-системы «Делеции локуса AZF» (регистрационное удостоверение РЗН № 2014/2078, производство НПО «ДНК-Технология», Россия) на амплификаторе ДТпрайм. Аналитическая панель включала 13 неполиморфных STS-маркеров (sY84, sY86, sY615 — AZFa; sY127, sY134, sY142 — AZFb; sY254, sY255, sY1197, sY1125, sY1206, sY242, sY1291 — AZFc), а также маркер гена SRY и внутренний контроль амплификации. Каждый запуск сопровождался положительным и отрицательным контролями.

Статистическую обработку данных выполняли в пакете IBM SPSS Statistics 26.0 и OpenEpi 3.01. Качественные признаки представлены абсолютными и относительными частотами (n, %). Сравнение частот между регионами и между укрупнёнными зонами проводили с использованием критерия χ^2 Пирсона; при ожидаемых частотах менее 5 применяли точный критерий Фишера. Критический уровень значимости принят равным 0,05.

Результаты исследования и их обсуждение

Из 626 обследованных пациентов 18 лет и старше микроделеции локуса AZF выявлены у 93 человек, что составило 14,86% (табл. 1). При распределении по 14 регионам Республики Узбекистан частота выявления делеций варьировала в узком диапазоне — от минимального значения 13,27% в г. Ташкенте (n=15 из 113) до максимальных 16,67% в Сурхандарьинской области (n=8 из 48) и 16,33% в Наманганской области (n=8 из 49). В среднем по всем исследованным регионам показатель стабильно удерживался на уровне 14–16%.

Таблица 1

Частота и структура микроделеций AZF у пациентов с мужским бесплодием (18 лет и старше) по регионам Республики Узбекистан

Регион	AZFa n	AZFa %	AZFb n	AZFb %	AZFc n	AZFc %	Всего n	Всего %	χ^2	p

Примечание: составлена автором на основе полученных данных в ходе исследования.

* Доля от общего числа обследованных мужчин 18 лет и старше по республике (n=626); в остальных столбцах таблицы — доля от числа выявленных делеций внутри региона.

При детализации структуры генетических нарушений по субрегионам установлено абсолютное преобладание повреждений локуса AZFc во всех без исключения анализируемых регионах — от 58,33% (Наманганская область) до 100% (Хорезмская область и Республика Каракалпакстан) структуры выявленных делеций. Делеции субрегионов AZFa и AZFb регистрировались значительно реже; в ряде регионов (Андижанская, Бухарская, Навоийская, Сурхандарьинская, Сырдарьинская, Ферганская, Хорезмская области и Республика Каракалпакстан) изолированные делеции AZFa не выявлены вовсе. Значения критерия χ^2 для всех сравниваемых территорий находились в диапазоне от 0,002 до 0,190, соответствующие уровни значимости (p) — от 0,663 до 0,969, что не позволяет отвергнуть нулевую гипотезу об отсутствии статистически значимых различий в частоте встречаемости микроделеций AZF в зависимости от региона проживания пациента.

Учитывая малый объём отдельных региональных выборок (n=7–15 в Республике Каракалпакстан, Навоийской и Хорезмской областях), с целью повышения статистической мощности сравнения регионы были объединены в три укрупнённые экономико-географические зоны (табл. 2).

Таблица 2

Сравнительный анализ частоты микроделеций AZF в укрупнённых экономико-географических зонах Республики Узбекистан

Укрупнённая зона	n	Пациенты с делециями n	%	χ^2	df	p
Ташкентская агломерация (г. Ташкент + Ташкентская обл.)	166	23	13,86			
Ферганская долина (Андижанская, Наманганская, Ферганская обл.)	96	15	15,63			
Остальные регионы Республики	364	55	15,11			
Итого	**626**	**93**	**14,86**	**0,195**	**2**	**0,907**

Примечание: составлена автором на основе полученных данных в ходе исследования.

Сопоставление трёх укрупнённых зон подтвердило результаты регионального анализа: частота выявления AZF-микроделеций составила 13,86% в Ташкентской агломерации, 15,63% в Ферганской долине и 15,11% в остальных регионах республики, статистически значимых различий между зонами не установлено (χ^2=0,195; df=2; p=0,907). Таким образом, ни укрупнение выборки, ни детализация по отдельным регионам не выявили территориальной кластеризации частоты AZF-микроделеций на территории Республики Узбекистан.

Анализ структуры выявленных нарушений по укрупнённым зонам (табл. 3) показал, что во всех трёх зонах доминирующим типом перестройки закономерно оставалась делеция AZFc, доля которой варьировала от 66,67% (Ферганская долина) до 73,85% (прочие регионы) от суммарного числа зарегистрированных инцидентов делеций внутри зоны, что демонстрирует однородность молекулярного профиля AZF-микроделеций вне зависимости от географического положения и этнического состава населения.

Таблица 3

Структура микроделеций AZF по субрегионам в укрупнённых экономико-географических зонах

Укрупнённая зона AZFa, доля от делеций зоны, % AZFb, доля от делеций зоны, % AZFc, доля от делеций зоны, % Всего инцидентов делеций, n

Укрупнённая зона	**AZFa, доля от делеций зоны, %**	**AZFb, доля от делеций зоны, %**	**AZFc, доля от делеций зоны, %**	**Всего инцидентов делеций, n**
Ташкентская агломерация	10,71	21,43	67,86	28
Ферганская долина	9,52	23,81	66,67	21
Остальные регионы	4,62	21,54	73,85	65

Примечание: составлена автором на основе полученных данных в ходе исследования.

Полученные результаты имеют принципиальное значение для интерпретации гипотезы об этногенетической детерминированности AZF-микроделеций. Несмотря на описанную в литературе повышенную частоту кровнородственных браков в отдельных субпопуляциях Центральной Азии, в том числе Узбекистана [15, 16], настоящее исследование не выявило накопления AZF-делеций в регионах с традиционно более высоким уровнем эндогамии по сравнению с крупными городскими агломерациями. Поскольку подавляющее большинство микроделеций AZF, в отличие от классических аутосомно-рецессивных заболеваний, возникает de novo вследствие внутрихромосомной неаллельной гомологичной рекомбинации между палиндромными и ампликонными структурами мужского специфичного региона Y-хромосомы [7, 8, 9], а не наследуется по рецессивному типу от гетерозиготных носителей, эффект близкородственных браков, характерный для аутосомных рецессивных мутаций, на частоту данной патологии закономерно не распространяется. Это согласуется с полученными данными о территориальной однородности показателя и подтверждает универсальность молекулярного механизма нестабильности Y-хромосомы независимо от степени эндогамии популяции.

Этногеографическая однородность распределения имеет и важное практическое следствие в отношении интерпретации результатов молекулярной диагностики. Население Узбекистана этногенетически относится к азиатскому макрорегиону, для которого характерно широкое распространение однонуклеотидного полиморфизма rs72609647, локализованного в пятом нуклеотиде сайта связывания обратного праймера STS-маркера sY84 [11]. Присутствие данного SNP приводит к отсутствию амплификации маркера sY84 независимо от истинного генетического статуса AZFa и в устаревших диагностических алгоритмах способно ложно интерпретироваться как микроделеция [11, 12]. Поскольку в настоящем исследовании частота изолированных делеций AZFa во всех регионах оставалась низкой (0,73–1,28% от общей выборки) и не демонстрировала неожиданных региональных всплесков, которые могли бы указывать на неучтённый технический артефакт, можно заключить, что применённая мультиплексная панель адекватно учитывала азиат-специфичный полиморфизм sY84. Тем не менее, с учётом обновлённых рекомендаций EAA/EMQN 2023 г. [12], использование адаптированной последовательности обратного праймера sY84 должно оставаться обязательным элементом лабораторного алгоритма во всех регионах страны.

Ограничениями настоящего этапа исследования являются значительная неравномерность объёма выборки по отдельным регионам (от n=7 до n=113), что снижает статистическую мощность анализа для малочисленных территорий, а также ретроспективный характер учёта места постоянного проживания пациентов без верификации этнической принадлежности и семейного анамнеза кровнородственных браков. Дальнейшие проспективные многоцентровые исследования с включением данных об этнической принадлежности и коэффициенте инбридинга позволят более детально оценить вклад отдельных субпопуляционных факторов в формирование генетического профиля мужского бесплодия в Узбекистане.

Выводы

1. Частота микроделеций локуса AZF Y-хромосомы среди мужчин 18 лет и старше с бесплодием в обследованной узбекской когорте составила 14,86% (93 из 626) и варьировала по 14 регионам страны в узком диапазоне — от 13,27% (г. Ташкент) до 16,67% (Сурхандарьинская область) — без статистически значимых межрегиональных различий (χ^2=0,002–0,190; p=0,663–0,969).

2. Сравнение трёх укрупнённых экономико-географических зон (Ташкентская агломерация — 13,86%, Ферганская долина — 15,63%, остальные регионы — 15,11%) подтвердило отсутствие статистически значимой территориальной гетерогенности частоты AZF-микроделеций (χ^2=0,195; df=2; p=0,907).

3. Во всех без исключения регионах Республики Узбекистан в структуре выявленных нарушений абсолютно доминировали делеции AZFc (от 58,33% в Наманганской области до 100% в Хорезмской области и Республике Каракалпакстан), что подтверждает единство молекулярного механизма формирования данного типа перестроек на всей территории страны.

4. Отсутствие накопления AZF-микроделеций в регионах с традиционно более высоким уровнем эндогамии свидетельствует о преимущественно спонтанном (de novo) механизме их формирования, не подчиняющемся закономерностям наследования классических аутосомно-рецессивных заболеваний.

5. Установленная региональная однородность обосновывает применение единого общенационального диагностического алгоритма молекулярно-генетического скрининга AZF-региона в Республике Узбекистан без необходимости регион-специфической адаптации, при обязательном сохранении в составе мультиплексной панели праймерной системы, учитывающей азиат-специфичный полиморфизм rs72609647 маркера sY84.

Заключение

Проведённое исследование впервые предоставляет систематизированные данные о региональном (этногеографическом) распределении микроделеций AZF-региона Y-хромосомы у мужчин с бесплодием на всей территории Республики Узбекистан. Установленная территориальная однородность частоты (14,86%) и структуры выявленных нарушений с абсолютным преобладанием делеций AZFc отражает универсальный, преимущественно спонтанный молекулярный механизм нестабильности мужского специфичного региона Y-хромосомы, не зависящий от этногеографических и демографических особенностей отдельных субпопуляций страны. Полученные результаты формируют доказательную основу для внедрения единого общенационального алгоритма молекулярно-генетического скрининга мужского бесплодия в Узбекистане, а также подчёркивают необходимость обязательного учёта азиат-специфичного полиморфизма сайта связывания праймера sY84 при интерпретации результатов диагностики делеций AZFa.

PLOCAMA VASSILCZENKOI (LINCZ.) M. BACKLUND & THULIN TURINING FARG‘ ONA VODIYSIDAGI MORFOLOGIK, FITOGEOGRAFIK XUSUSIYATLARI VA MUHOFAZA MUAMMOLARI

M.I. Maxmudov
Namangan davlat universiteti

Annotatsiya: *Mazkur maqolada Rubiaceae Juss. oilasiga mansub, Farg‘ ona vodiysining tor arealli endem turi hisoblangan Plocama vassilczenkoi (Lincz.) M. Backlund & Thulin turining morfologik, fitogeografik va ekologik xususiyatlari hamda muhofaza masalalari kompleks yoritilgan. 2024–2026-yillarda Namangan va Farg‘ ona viloyatlarining adir va tog‘ oldi hududlarida o‘ tkazilgan dala tadqiqotlari, TASH va FRU gerbariy fondlari materiallari, shuningdek GBIF, POWO va IPNI xalqaro elektron ma’lumotlar bazalari asosida turning 1915–2025-yillarga oid 34 ta uchrash nuqtasi tahlil qilindi. Tadqiqot natijalariga ko‘ ra, tur asosan Chorkesar (58,8%), Janubiy Chotqol (35,3%) va Sharqiy Oloy (5,9%) botanik-geografik rayonlarida, dengiz sathidan 406–1221 m balandlik oralig‘ ida, skeletli va gipslashgan bo‘ z tuproqlarda tarqalgan bo‘ lib, uning ekologik optimumi 500–800 m balandlikka to‘ g‘ ri keladi. BIOMOD2 platformasida amalga oshirilgan ensemble bioiqlimiy modellashtirish SSP245 iqlim ssenariysi bo‘ yicha 2080–2100-yillarga kelib turning tarqalish areali (EOO) 27–38%, egallanish maydoni (AOO) esa 39–53% ga qisqarishini bashorat qildi. GeoCAT vositasi yordamida hisoblangan EOO (≈12 932 km²) va AOO (≈120 km²) ko‘ rsatkichlari hamda populyatsiyalarning kichik va parchalanganligi asosida tur IUCN mezonlariga ko‘ ra EN (Endangered – Xavf ostida) kategoriyasiga kiritildi. Tadqiqot natijalari asosida in-situ va ex-situ muhofaza chora-tadbirlari, jumladan yangi muhofaza hududlarini tashkil etish, yaylov boshqaruvi, urug‘ bankini yaratish va reintroduksiya dasturi ishlab chiqildi.*

Kalit so‘ zlar: *Plocama vassilczenkoi, Rubiaceae, endem tur, Farg‘ ona vodiysi, fitogeografiya, bioiqlimiy modellashtirish, IUCN, muhofaza.*

МОРФОЛОГИЧЕСКИЕ, ФИТОГЕОГРАФИЧЕСКИЕ ОСОБЕННОСТИ И ПРОБЛЕМЫ ОХРАНЫ ВИДА *PLOCAMA VASSILCZENKOI* (LINCZ.) M. BACKLUND & THULIN В ФЕРГАНСКОЙ ДОЛИНЕ

Аннотация: *В статье комплексно освещены морфологические, фитогеографические и экологические особенности, а также вопросы охраны Plocama vassilczenkoi (Lincz.) M. Backlund & Thulin — узкоареального эндемичного вида Ферганской долины из семейства Rubiaceae Juss. На основе полевых исследований, проведённых в 2024–2026 гг. в адырных и предгорных районах Наманганской и Ферганской областей, материалов гербарных фондов TASH и FRU, а также международных электронных баз данных GBIF, POWO и IPNI проанализированы 34 точки встречаемости вида за 1915–2025 гг. Согласно результатам исследования, вид распространён преимущественно в Чоркесарском (58,8%), Южно-Чаткальском (35,3%) и Восточно-Алайском (5,9%) ботанико-географических районах, на высотах 406–1221 м над уровнем моря, на скелетных и гипсоносных сероземах; его экологический оптимум приходится на высоты 500–800 м. Ансамблевое биоклиматическое моделирование, выполненное на платформе BIOMOD2, прогнозирует к 2080–2100 гг. при климатическом сценарии SSP245 сокращение площади распространения вида (EOO) на 27–38%, а площади обитания (AOO) — на 39–53%. На основании показателей EOO (≈12 932 км²) и AOO (≈120 км²), рассчитанных с помощью инструмента GeoCAT, а также малочисленности и фрагментированности популяций вид отнесён по критериям МСОП (IUCN) к категории EN (Endangered — находящийся под угрозой исчезновения). По результатам исследования разработаны меры охраны in-situ и ex-situ, включая создание новых охраняемых территорий, регулирование выпаса, создание банка семян и программу реинтродукции.*

Ключевые слова: *Plocama vassilczenkoi, Rubiaceae, эндемичный вид, Ферганская долина, фитогеография, биоклиматическое моделирование, МСОП (IUCN), охрана.*

MORPHOLOGICAL AND PHYTOGEOGRAPHICAL CHARACTERISTICS AND CONSERVATION PROBLEMS OF *PLOCAMA VASSILCZENKOI* (LINCZ.) M. BACKLUND & THULIN IN THE FERGANA VALLEY

Abstract: *This article presents a comprehensive analysis of the morphological, phytogeographical, and ecological characteristics, as well as the conservation status, of Plocama vassilczenkoi (Lincz.) M. Backlund & Thulin (Rubiaceae), a narrow-range endemic species of the Fergana Valley. Based on field surveys conducted in the Namangan and Fergana regions during 2024–*

2026, herbarium materials from the TASH and FRU collections, and data from the GBIF, POWO, and IPNI international databases, 34 occurrence records spanning 1915–2025 were analyzed. The results show that the species is distributed mainly within the Chorkesar (58.8%), South Chatkal (35.3%), and East Alai (5.9%) botanical-geographical districts at elevations of 406–1221 m, occurring predominantly on skeletal and gypsiferous grey soils, with an ecological optimum at 500–800 m. Ensemble species distribution modeling performed in BIOMOD2 predicted, under the SSP245 climate scenario, a 27–38% reduction in the extent of occurrence (EOO) and a 39–53% reduction in the area of occupancy (AOO) by 2080–2100. Based on EOO (~12,932 km²) and AOO (~120 km²) values calculated using GeoCAT, together with the small and fragmented nature of the populations, the species was assigned to the IUCN category Endangered (EN). A set of in-situ and ex-situ conservation measures, including the establishment of new protected areas, grazing management, seed banking, and a reintroduction program, was developed on the basis of the study results.

Keywords: *Plocama vassilczenkoi, Rubiaceae, endemic species, Fergana Valley, phytogeography, species distribution modeling, IUCN, plant conservation.*

KIRISH

Markaziy Osiyo florasi yuqori endemizm darajasi va tor arealli noyob taksonlarga boyligi bilan jahon botanik-geografik rayonlashtirish tizimida alohida o‘ rin egallaydi. Ushbu mintaqada, xususan Farg‘ ona vodiysining adir va tog‘ oldi zonalarida shakllangan endemik flora elementlari nafaqat mahalliy, balki global biologik xilma-xillik nuqtai nazaridan ham muhim ilmiy ahamiyat kasb etadi. Rubiaceae Juss. oilasiga mansub *Plocama Aiton* turkumi (jahon florasida 36, O‘ zbekiston florasida 7 tur) geografik jihatdan tor arealga ega, antropogen ta’sirlarga yuqori darajada sezgir turlarni birlashtiradi, shu sababli ularni muhofaza qilish maqsadli va kompleks tadqiqotlarni talab qiladi [1, 20].

Plocama vassilczenkoi (Lincz.) M. Backlund & Thulin – Farg‘ ona vodiysining tor arealli endem turi bo‘ lib, murakkab va uzoq nomenklaturaviy tarixga ega. Tur 1915-yilda V. Drobov tomonidan ilk bor yig‘ ib olingandan so‘ ng, XX asr davomida Gaillonia A.Rich. ex DC. va Neogaillonia Lincz. turkumlari tarkibida bir necha bor qayta nomlangan, faqat 2007-yilda M. Backlund va M. Thulin tomonidan o‘ tkazilgan molekulyar-filogenetik tahlillar natijasida hozirgi sistematik holatiga ega bo‘ lgan [2, 3, 24]. Bu murakkab taksonomik tarix ko‘ plab adabiy manbalarda eskirgan nomenklaturaning saqlanib qolishiga sabab bo‘ lgan.

Tur bo‘ yicha olib borilgan adabiyotlar tahlili [20, 38, 39, 45] shuni ko‘ rsatadiki, turning Farg‘ ona vodiysi botanik-geografik rayonlari bo‘ yicha tarqalishi tizimli tahlil qilinmagan, barcha ma’lum uchrash nuqtalari (1915–2025) to‘ liq tizimlashtirilmagan, tuproq tiplari va balandlik mintaqalari bo‘ yicha miqdoriy ekologik tahlil yetarli emas, muhofaza holati turli manbalarda turlicha (VU, EN, CR) baholangan bo‘ lib, yagona va hujjatlashtirilgan baholash amalga oshirilmagan. Bundan tashqari, turning iqlim o‘ zgarishiga nisbatan sezgirligi bioiqlimiy modellashtirish usullari yordamida hali baholanmagan.

O‘ zbekiston Respublikasida biologik xilma-xillikni saqlash davlat siyosati darajasidagi muhim vazifalardan biri hisoblanadi, bu O‘ zbekiston Respublikasining “O‘ simlik dunyosini muhofaza qilish va undan foydalanish to‘ g‘ risida”gi Qonuni (2016), Prezidentning atrof-muhitni muhofaza qilish konsepsiyasi (2019), biologik xilma-xillikni saqlash strategiyasi (2019) va boshqa me’yoriy-huquqiy hujjatlarda o‘ z aksini topgan.

Tadqiqotning maqsadi – *Plocama vassilczenkoi* (Lincz.) turining morfologiyasi, fitogeografiyasi va muhofaza masalalarini kompleks o‘ rganishdan iborat. Ushbu maqsadga erishish uchun quyidagi vazifalar belgilandi: turning tirik namunalar asosidagi morfologik tahlilini amalga oshirish; botanik-geografik rayonlar bo‘ yicha tarqalishini tahlil qilish; tuproq tiplari va balandlik mintaqalari bo‘ yicha ekologik xususiyatlarini aniqlash; turni bioiqlimiy modellashtirish; IUCN kategoriyalari bo‘ yicha baholash; muhofaza qilish choralarini ishlab chiqish.

Tadqiqotning ilmiy yangiligi shundan iboratki, ilk bor turning ekologik nishi BIOMOD2 platformasida ensemble modellashtirish usuli yordamida baholandi, turning Farg‘ ona vodiysidagi barcha ma’lum uchrash nuqtalari (1915–2025) tizimlashtirilib, botanik-geografik rayonlar kesimida tahlil qilindi, tuproq tiplari va balandlik mintaqalari bo‘ yicha miqdoriy ekologik tahlil o‘ tkazildi hamda IUCN mezonlari asosida yagona, hujjatlashtirilgan muhofaza baholashi amalga oshirildi.

TADQIQOT MATERIALLARI VA USULLARI

Tadqiqot obyekti va hududi. Tadqiqot obyekti sifatida Rubiaceae Juss. oilasiga mansub, Farg‘ ona vodiysi endemigi hisoblangan *Plocama vassilczenkoi* (Lincz.) M. Backlund & Thulin turi tanlab olindi. Tadqiqot hududi sifatida Farg‘ ona vodiysining shimoliy va shimoli-sharqiy qismlarida joylashgan Namangan viloyati (Namangan, Chust, Pop, Chortoq, To‘ raqo‘ rg‘ on, Uychi, Yangiqo‘ rg‘ on tumanlari) hamda Farg‘ ona viloyatining (Oltiariq, Quvasoy, Beshariq tumanlari) adir hududlari xizmat qildi. Tadqiqot hududlari dengiz sathidan 406–1221 m balandlikda joylashgan bo‘ lib, chala cho‘ l va adir mintaqalariga xos quruq kontinental iqlim, bo‘ z va gipslashgan tuproqlar bilan tavsiflanadi [13, 46].

Dala tadqiqotlari va gerbariy materiallari

2024–2026-yillarning mart–avgust oylarida A.I. Tolmachev (1974) hamda A.V. Shcherbakov va S.R. Mayorov (2006) metodikalari asosida maqsadli dala tadqiqotlari olib borildi. Marshrutlar oldingi adabiyot va gerbariy ma'lumotlari asosida rejalashtirilib, populyatsiyalarning GPS-koordinatalari, balandligi, o' sish sharoiti va fenologik holati qayd etildi. Tadqiqot materiallari TASH (26 namuna) va FRU (4 namuna) gerbariy fondlari, shuningdek GBIF, POWO va IPNI xalqaro elektron ma'lumotlar bazalaridan olingan ma'lumotlar bilan to' ldirildi. Natijada 1915–2025-yillar (110 yillik davr) oralig' ini qamrab olgan jami 34 ta uchrash yozuvi tizimlashtirildi.

Morfologik tahlil

Turning vegetativ (poya, barg) va generativ (gul, meva) organlarining morfometrik ko' rsatkichlari 8 ta populyatsiyada o' tkazilgan o' lchashlar asosida aniqlandi. Olingan ma'lumotlar O' zbekiston florasi uchun endem bo' lgan yaqin turlar – *Plocama botschantzevii* va *Plocama bucharica* – bilan qiyosiy tahlil qilindi.

Botanik-geografik rayonlashtirish

Turning tarqalishini tahlil qilishda R.V. Kamelin (1973) tomonidan ishlab chiqilgan va K.Sh. Tojibaev va boshq. (2016) tomonidan yangilangan Farg' ona vodiysining botanik-geografik rayonlashtirish sxemasi qo' llanildi [37]. Ushbu sxema bo' yicha vodiy hududi Tog' li O' rta Osiyo va Turon provinsiyalariga, ular esa o' z navbatida G' arbiy Tyanshan, Farg' ona, Farg' ona-Oloy va Markaziy Farg' ona okruglariga mansub 7 botanik-geografik rayonga bo' linadi. Barcha uchrash nuqtalari ushbu rayonlar chegaralari bo' yicha taqsimlanib, Google Earth Pro 7.1 dasturi yordamida xaritalashtirildi [15].

Tuproq tiplari va balandlik mintaqalari bo' yicha tahlil

Adir mintaqasi chegaralarini belgilashda Q.Z. Zokirov (1955, 1961) ma'lumotlariga asoslanildi [47]. O' zbekiston o' simliklarini balandlik zonalari bo' yicha tasniflashda Zokirov (1955) taklif etgan to' rt mintaqali sxema (cho' l – 450–500 m gacha; adir – 500–1450 m; tog' – 1450–2800 m; yaylov – 2800–4600 m) qo' llanildi. Turning o' sish nuqtalaridagi tuproq tiplari dala kuzatuvlari, adabiyot ma'lumotlari va gerbariy etiketkalari tavsiflari asosida aniqlandi. Balandlik va tuproq tiplari bo' yicha to' plangan ma'lumotlar Microsoft Excel dasturida qayta ishlanib, o' rtacha qiymat, minimal-maksimal ko' rsatkichlar, standart og' ish va variatsiya koeffitsienti hisoblandi.

Bioiqlimiy modellashtirish

Turning potensial tarqalish arealini bashoratlash uchun Species Distribution Modeling (SDM) usuli, xususan BIOMOD2 platformasi (R dasturlash muhiti) qo' llanildi [26]. Bir nechta algoritmlar (GLM, RF, FDA, MAXENT.Phillips.2) asosida jami 10 ta RUN va 40 ta individual model yaratilib, ularning natijalari TSS og' irligi bo' yicha o' rtacha (EMmeanByTSS va EMwmeanByTSS) ensemble modellashtirish usulida umumlashtirildi. Modellashtirish uchun WorldClim 2.1 versiyasidagi 19 ta bioiqlimiy o' zgaruvchidan Pearson korrelyatsion tahlili ($|r| > 0,8$) asosida oltitasi (Bio2, Bio3, Bio4, Bio5, Bio8, Bio15) tanlab olindi hamda turning stenoedafik xususiyatini aks ettirish maqsadida oltita tuproq o' zgaruvchisi (soil_cn, soil_cec, soil_n, soil_oc, soil_ph, soil_silt) qo' shildi – jami 12 ta o' zgaruvchi modelga kiritildi. Kelajakdagi iqlim o' zgarishini bashoratlash uchun SSP245 (Shared Socioeconomic Pathway 2–4.5) – o' rta yo' l ssenariysi, proyeksiya davri sifatida 2080–2100-yillar tanlandi [17, 31]. Model sifati TSS (True Skill Statistic) ko' rsatkichi orqali baholandi (0,7–1,0 oralig' i – yaxshi va a'lo daraja) [47].

IUCN kategoriyalari bo' yicha baholash

Turning muhofaza holatini baholashda IUCN Qizil ro' yxatining 3.1 versiyasi mezonlaridan foydalanildi. Turning EOO (Extent of Occurrence – tarqalish areali) va AOO (Area of Occupancy – egallanish maydoni) ko' rsatkichlari GeoCAT (Geospatial Conservation Assessment Tool) onlayn vositasi yordamida hisoblandi. EOO barcha ma'lum uchrash nuqtalarini o' rab turgan minimal qavariq poligon (minimum convex polygon) maydoni sifatida, AOO esa 2×2 km o' lchamdagi grid hujayralari asosida aniqlandi. Baholash B mezoni (EOO, AOO va subpopulyatsiyalar soni) hamda C mezoni (populyatsiya hajmi va uning kamayishi) bo' yicha, global va mahalliy darajada amalga oshirildi.

NATIJALAR VA MUHOKAMA

1. Taksonomik holat va morfologik xususiyatlar

Plocama vassilczenkoi (Lincz.) M. Backlund & Thulin turi Taxon jurnalining 56-jildida (2007) tavsiflangan bo' lib, uning sinonimlariga *Neogaillonia vassilczenkoi* Lincz. (1973) va Gaillonia vassilczenkoi (Lincz.) Ehrend. & Schönb.-Tem. (2005) kiradi [2, 3, 7, 24]. Tur bo' yi 15–40 sm bo' lgan ko' p yillik, past bo' yli, shoxlangan yarim buta bo' lib, yaxshi rivojlangan o' q ildiz tizimiga ega (50–70 sm chuqurlik). Poyasi tik, silindrsimon, oq yoki kulrang-yashil rangda, pastki qismi yog' ochlashgan. Barglari oddiy, qarama-qarshi joylashgan, nashtarsimon, uzunligi 8–20 mm, eni 3–8 mm. Gullari ikki jinsli, 2–4 gulli dixaziy to' pgulda joylashgan, gultoji 4–6 mm, pushti-oqish sariq rangda. Mevasi quruq sxizokarp, 3–4 mm, och jigarrang. Tur may–iyun oylarida gullab, iyul–avgustda mevalaydi [12].

8 populyatsiyada o' tkazilgan morfometrik o' lchashlar natijalari 1-jadvalda keltirilgan.

1-jadval. P. vassilczenkoi ning asosiy morfometrik ko‘ rsatkichlari

Belgilar	Minimal	Maksimal	O‘ rtacha	Standart og‘ ish
Poya balandligi (sm)	15	40	24,6	±5,2
Barg uzunligi (mm)	8	20	14,1	±3,0
Barg eni (mm)	3	8	5,3	±1,2
Gulpoya uzunligi (mm)	10	25	16,8	±3,5
Gultoji uzunligi (mm)	4	6	5,1	±0,5
Meva uzunligi (mm)	2,5	4,5	3,6	±0,4

O‘ zbekiston florasi uchun endem bo‘ lgan yaqin turlar – *Plocama botschantzevii* (Surxondaryo viloyati) va Plocama bucharica (Qashqadaryo, Samarqand viloyatlari) – bilan o‘ tkazilgan qiyosiy tahlil (2-jadval) turlarni hayotiy shakli, barg joylashishi va shakli, to‘ pgul tipi, gultoji rangi hamda geografik tarqalishi bo‘ yicha ishonchli farqlash mumkinligini ko‘ rsatdi [25, 39].

2-jadval. P. vassilczenkoi va yaqin turlarning qiyosiy morfologik tahlili

Belgilar	P. vassilczenkoi	P. botschantzevii	P. bucharica
Hayotiy shakli	Yarim buta, 15–40 sm	Buta, 30–60 sm	Yarim buta, 20–50 sm
Barg joylashishi	Qarama-qarshi	Qarama-qarshi	G‘ alvirsimon
Barg shakli	Nashtarsimon, 8–20 mm	Elliptik, 10–25 mm	Tuxumsimon, 12–30 mm
To‘ pgul tipi	2–4 gulli dixaziy	Ko‘ p gulli shingil	1–2 gulli
Gultoji rangi	Oqish–och sariq	Sariq	Oq
Meva	Sxizokarp, 3–4 mm	Sxizokarp, 4–5 mm	Sxizokarp, 3–4 mm
Areali	Farg‘ ona vodiysi (tor)	Surxondaryo viloyati	Qashqadaryo, Samarqand

Tadqiqot davomida turning morfometrik ko‘ rsatkichlari balandlik gradienti bo‘ yicha izchil o‘ zgarishi aniqlandi: 450–550 m balandlikda poya balandligi 15–20 sm ni tashkil etsa, 700–850 m balandlikda bu ko‘ rsatkich 25–40 sm gacha oshgan; xuddi shunday tendensiya barg, gul va meva o‘ lchamlarida ham kuzatildi. Bu natijalar turda ekologik omillarga, xususan balandlik bilan bog‘ liq iqlim va edafik sharoitlarga nisbatan morfologik plastiklik mavjudligini tasdiqlaydi.

2. Botanik-geografik tarqalish

Farg‘ ona vodiysining R.V. Kamelin (1973) va K.Sh. Tojibaev (2016) sxemalari bo‘ yicha 7 botanik-geografik rayonga bo‘ linishi fonida, P. vassilczenkoi faqat uchtasida – Chorkesar, Janubiy Chotqol va Sharqiy Oloy rayonlarida – qayd etildi (3-jadval).

3-jadval. P. vassilczenkoi turining botanik-geografik rayonlar bo‘ yicha taqsimlanishi

Okrug	Botanik-geografik rayon	Uchrashlar soni	Ulushi (%)	Balandlik diapazoni (m)
G‘ arbiy Tyanshan	Chorkesar	20	58,8	550–820
Farg‘ ona	Janubiy Chotqol	12	35,3	430–650
Farg‘ ona-Oloy	Sharqiy Oloy	2	5,9	997–1200
Jami	–	34	100	–

Chorkesar botanik-geografik rayoni (G‘ arbiy Tyanshan okrugi) turning asosiy areali va tip areali hisoblanadi: barcha uchrashlarning 58,8% (20 ta yozuv) shu yerda qayd etilgan, balandlik diapazoni 550–820 m (o‘ rtacha 658±79 m) ni tashkil etadi. Aynan shu rayonda, xususan Chust tumanining Baymoq, To‘ ymas va Mashat hududlarida hamda Pop tumani chap adirliklarida turning eng zich va barqaror populyatsiyalari (30–50 individ, tabiiy yangilanish 8–15%) joylashgan. Janubiy Chotqol rayoni (Farg‘ ona okrugi) ikkinchi darajali areal bo‘ lib, uchrashlarning 35,3% (12 ta yozuv) shu yerga to‘ g‘ ri keladi; bu yerda populyatsiyalar kichikroq (10–20 individ) va yuqori antropogen bosim ostida – ba’zi tarixiy lokalitetlar (masalan, Vladikino, 413 m) so‘ nggi yillarda butunlay yo‘ qolib ketgan. Sharqiy Oloy rayonida (Farg‘ ona-Oloy okrugi) tur kam va refugial xarakterda uchraydi (5,9%; 2 ta yozuv), bu yerdagi populyatsiyalar turning yuqori balandlik chegarasini (997–1221 m) ifodalaydi hamda genetik jihatdan izolyatsiyalangan [37, 39].

Turning notekis tarqalishi antropogen bosim (yaylov chorvachiligi, qurilish, yer o‘ zlashtirish), ekologik ixtisoslashuv (stenoedafik xususiyat), balandlik chegaralanishi, tarixiy-geografik omillar (Chorkesar rayonining refugium sifatidagi roli) hamda ayrim rayonlarning (G‘ arbiy Oloy, Qayraqum-Yozyovon) yetarli darajada o‘ rganilmaganligi bilan izohlanadi. Xronologik tahlil shuni ko‘ rsatdiki, eng ko‘ p yozuvlar (38,9%) 1935–1954-yillarga – Farg‘ ona vodiysining intensiv floristik o‘ rganilish davriga – to‘ g‘ ri kelsa, zamonaviy dala tadqiqotlari (2020–2025; 22,2%) turning Chust–Pop adirliklari va Namangan viloyati Axcha qishlog‘ i atrofida hali ham faol populyatsiyalarga ega ekanligini tasdiqladi [20, 38].

3. Tuproq tiplari va balandlik mintaqalari bo‘ yicha ekologik tahlil

Turning substrat spektri yetti kategoriyaga ajratildi (4-jadval). Dominant substrat – adir va chap adirlik biotopi (36,1%) bo‘ lib, undan keyin tog‘ oldi/yonbag‘ ir skeletli tuproqlar (19,4%) va shag‘ alli substratlar (13,9%) keladi. Skeletli substratlar (shag‘ alli, petrofil va yuvilma konus) jami uchrashlarning 33,3% ini tashkil etib, turning quruq, yaxshi drenajlangan va toshloq muhitlarga yuqori darajada moslashganligini tasdiqlaydi.

4-jadval. P. vassilczenkoi turining substrat tiplari bo‘ yicha ekologik tavsifi

Substrat tipi	n	Foiz	O‘ rtacha balandlik (m±SD)
Adir/chap adirlik biotopi	13	36,1	658±79
Tog‘ oldi/yonbag‘ ir skeletli tuproqlar	7	19,4	826±112
Shag‘ alli substratlar	5	13,9	525±63
Toshloq tik yonbag‘ ir	4	11,1	642±89
Yuvilma konus	3	8,3	689±358
Lalmi hududlar	3	8,3	1224±52
Mayda toshli tuproq	1	2,8	680
Jami	34	100	–

Q.Z. Zokirov (1955) balandlik mintaqalanishi tasnifi bo‘ yicha turning uchrash balandligi 406–1221 m ni qamrab oladi (M=790 m; SD=277 m). Turning asosiy ekologik optimumi adir mintaqasining quyi qismida – 500–800 m balandlikda (45,5%; n=15) joylashgan bo‘ lib, umuman olganda uchrashlarning 75,8% i (n=25) 500–1200 m adir mintaqasi doirasida qayd etilgan (5-jadval).

5-jadval. Q.Z. Zokirov balandlik mintaqalari asosida uchrash taqsimoti

Hudud	Balandlik (m)	n	Foiz	O‘ rtacha balandlik
Cho‘ l mintaqasi	<500	5	15,2	438±32
Adir quyi qismi	500–800	15	45,5	658±79
Adir yuqori qismi	800–1200	10	30,3	1004±141
Tog‘ mintaqasi	≥1200	3	9,1	1318±144

Turning tor ekologik amplitudaga ega bo‘ lishi – stenoedafik xususiyati, ya’ni faqat skeletli, gipslashgan va yaxshi drenajlangan bo‘ z tuproqlarga moslashuvi – uning tarqalishidagi asosiy chegaralovchi omillardan biri hisoblanadi [21, 44].

4. Bioiqlimiy modellashtirish natijalari

BIOMOD2 platformasida amalga oshirilgan ensemble modellashtirish natijalariga ko‘ ra, turning yuqori yaroqlilikdagi hozirgi potensial hududlari asosan Farg‘ ona vodiysining sharqiy sektorida – vodiyga tutash tog‘ oldi hududlarida (Chatqol tizmasi janubiy yonbag‘ irlari, Pop–Chust tog‘ etaklari) saqlanib qoladi, markaziy O‘ zbekiston hamda Qozog‘ iston janubi turning yashashi uchun mutlaqo yaroqsiz hudud sifatida baholandi.

SSP245 iqlim ssenariysi bo‘ yicha 2080–2100-yillarga kelib turning potensial tarqalish areali (EOO) hozirgi ~8 200 km² dan 5 100–6 000 km² gacha (27–38% qisqarish), egallanish maydoni (AOO) esa ~180 km² dan 85–110 km² gacha (39–53% qisqarish) kamayishi prognoz qilindi (6-jadval). Shu bilan birga, haroratning +2,0–2,7°C ga oshishi hisobiga turning optimal yashash balandligi hozirgi 450–750 m dan kelajakda 750–1100 m gacha yuqoriga siljishi aniqlandi.

6-jadval. Iqlim o‘ zgarishi (SSP245) sharoitida turning EOO va AOO ko‘ rsatkichlari dinamikasi

Ko‘ rsatkich	Hozirgi holat (2020–2025)	SSP245 (2080–2100)	Qisqarish (%)
EOO (tarqalish hududi)	~8 200 km²	~5 100–6 000 km²	27–38
AOO (egallanish hududi)	~180 km²	~85–110 km²	39–53

Modelda eng muhim ekologik omil sifatida yog‘ ingarchilik mavsumiyligi (Bio15) namoyon bo‘ lib, u turning quruq yoz va nisbatan nam bahor sharoitlariga moslashganligini aks ettiradi; tuproq o‘ zgaruvchilaridan esa soil_ph, soil_cn va soil_oc turning ishqoriy (pH 7,5–8,5), organik moddaga kambag‘ al tuproqlarga bog‘ liqligini tasdiqladi. Olingan natijalar AOO ning EOO ga nisbatan tezroq qisqarishini ko‘ rsatib, bu turning yashash joylari parchalanishi va populyatsiyalar zichligi pasayishi xavfining ortib borishidan dalolat beradi [22, 43].

5. IUCN kategoriyalari bo‘ yicha baholash

GeoCAT vositasi yordamida hisoblangan ko‘ rsatkichlarga ko‘ ra, turning tarqalish areali (EOO) ~12 932 km², egallanish maydoni (AOO) esa ~120 km² ni tashkil etdi (7-jadval). Har ikkala ko‘ rsatkich ham IUCN B mezoni bo‘ yicha EN (Xavf ostida) chegaralaridan (EOO<5000 km², AOO<500 km²) past bo‘ lib chiqdi.

7-jadval. P. vassilczenkoi turini IUCN mezonlari bo‘ yicha baholash natijalari

Mezon	Tavsif	Qiymat	Kategoriya
B1	Tarqalish areali (EOO)	~12 932 km²	EN
B2	Turar joy maydoni (AOO)	~120 km²	EN
C1	Populyatsiya kamayishi	>20% (10 yil)	EN
C2a	Yetuk individlar soni	<2 500	EN
D	Juda kichik populyatsiya	<250	VU–EN

Dala tadqiqotlari natijalariga ko‘ ra, turning taxminiy umumiy populyatsiya hajmi 2000–2500 yetuk individni tashkil etadi; populyatsiyalar odatda kichik (10–50 individ) va bir-biridan geografik jihatdan izolyatsiyalangan. Generativ individlar ulushi 40–60% ni tashkil etsa, ko‘ chatlar ulushi atigi 8–15% ni tashkil etib, tabiiy yangilanishning zaifligidan dalolat beradi. Barcha mavjud mezonlar (B1ab(iii)+B2ab(iii); C1+C2a(i)) asosida Plocama vassilczenkoi turi IUCN Qizil ro‘ yxati bo‘ yicha EN (Endangered – Xavf ostida) kategoriyasiga kiritilishi to‘ liq asoslandi.

6. Tahdid omillari va muhofaza chora-tadbirlari

Turning tabiiy populyatsiyalariga ta’sir etuvchi asosiy tahdid omillari sifatida quyidagilar aniqlandi: adirlarning qishloq xo‘ jaligi maqsadlarida o‘ zlashtirilishi (1990–2023-yillarda yashash maydonining 22–28% ga qisqarishi), chorva boqish bosimining intensivlashuvi (populyatsiyalarning 68–72% ida haddan ortiq o‘ tlatish belgilari), yo‘ l va infratuzilma qurilishi, tuproq eroziyasi hamda iqlimning qurg‘ oqlashuvi (yozgi quruq davrning 12–18 kunga uzayishi) (8-jadval).

8-jadval. P. vassilczenkoi populyatsiyalariga ta’sir etuvchi tahdid omillari

Tahdid omili	Ta’sir darajasi	Qamrovi
Adirlarning qishloq xo‘ jaligi uchun o‘ zlashtirilishi	Yuqori	22–28% maydon qisqarishi (1990–2023)
Chorva boqish intensivligining ortishi	Yuqori	68–72% lokuslarda kuzatilgan
Yo‘ l va infratuzilma qurilishi	O‘ rtacha	Namangan, Chust, Pop tumanlari
Tuproq eroziyasi	O‘ rtacha	Toshloq yonbag‘ irlar
Iqlimning qurg‘ oqlashuvi	Yuqori	Yozgi quruqchilik 12–18 kunga uzaygan

Aniqlangan tahdidlar asosida kompleks muhofaza strategiyasi ishlab chiqildi: (1) in-situ muhofaza – turning eng yirik va barqaror populyatsiyasi joylashgan Arbag‘ ish (Chortoq tumani) hududida “Chortoq adirlari” tabiat yodgorligini tashkil etish, kam sonli populyatsiyalar (Qizilqiya, Imomota, Qorabog‘ atrofi) uchun 10–50 ga hajmdagi mikroqo‘ riqxonalar ajratish; (2) yaylov boshqaruvi – turning gullash va urug‘ lanish davrida (mart–may) chorva o‘ tlatishni vaqtincha cheklash, yaylov yuklamasini 5–7 bosh/gadan 2–3 bosh/gagacha kamaytirish va rotatsion tizim joriy

etish; (3) ex-situ saqlash – urug‘ larni qisqa muddatli (+4°C, 15–20% namlik, 1–3 yil) va uzoq muddatli (–20°C, 5–10% namlik, 10–20 yil) sharoitda saqlash rejimlarini joriy etish; (4) reintroduksiya dasturi – donor populyatsiyalarni tanlash, urug‘ yig‘ ish, ko‘ chat yetishtirish va tarixiy arealga qayta ekishdan iborat 5 bosqichli dastur; (5) monitoring tizimi – populyatsiya hisobi, fenologik kuzatuv, yaylov bosimi, tuproq holati va EOO/AOO ko‘ rsatkichlarini muntazam yangilab borish.

O‘ tkazilgan tadqiqot natijalari shuni ko‘ rsatdiki, Plocama vassilczenkoi bo‘ yi 15–40 sm gacha yetadigan ko‘ p yillik yarim buta bo‘ lib, yaqin turlardan (P. botschantzevii, P. bucharica) hayotiy shakli, barg morfologiyasi, to‘ pgul tipi, gultoji rangi va areali bo‘ yicha ishonchli farqlanadi; balandlik ortishi bilan morfometrik ko‘ rsatkichlarning izchil o‘ sishi turda ekologik plastiklik mavjudligini tasdiqlaydi. Turning 1915–2025-yillarga oid 34 ta uchrash nuqtasi birinchi marta tizimli tahlil qilinib, u Farg‘ ona vodiysining faqat uch botanik-geografik rayonida – Chorkesar (58,8%), Janubiy Chotqol (35,3%) va Sharqiy Oloy (5,9%) – tarqalganligi aniqlandi, Chorkesar rayoni esa turning asosiy areali va refugial markazi sifatida belgilandi. Tur asosan adir mintaqasining 500–800 m balandlik oralig‘ idagi skeletli, toshloq-shag‘ alli va gipslashgan bo‘ z tuproqlarda (dominant substrat – 36,1%) tarqalgan bo‘ lib, stenoedafik ekologik xususiyatga ega. BIOMOD2 platformasida o‘ tkazilgan bioiqlimiy modellashtirish SSP245 ssenariysi bo‘ yicha 2080–2100-yillarga kelib turning tarqalish areali (EOO) 27–38%, egallanish maydoni (AOO) 39–53% ga qisqarishini va ekologik optimal balandlikning 450–750 m dan 750–1100 m gacha yuqoriga siljishini bashorat qildi. GeoCAT vositasi asosida hisoblangan EOO (~12 932 km²) va AOO (~120 km²) ko‘ rsatkichlari, populyatsiyalarning kichik (10–50 individ) va parchalanganligi hamda zaif tabiiy yangilanishi (ko‘ chatlar ulushi 8–15%) asosida tur IUCN mezonlariga ko‘ ra EN (Xavf ostida) kategoriyasiga kiritildi (B1ab(iii)+B2ab(iii); C1+C2a(i)). Turning asosiy tahdidlari – qishloq xo‘ jaligi uchun yer o‘ zlashtirish (22–28% maydon qisqarishi), yaylov bosimi (68–72% lokuslarda) va iqlimning qurg‘ oqlashuvi – aniqlanib, ularga qarshi kompleks in-situ va ex-situ muhofaza strategiyasi (tabiat yodgorligi va mikroqo‘ riqxonalar tashkil etish, yaylov boshqaruvi, urug‘ banki, reintroduksiya dasturi, monitoring tizimi) ishlab chiqildi. Yakun sifatida ta’kidlash joizki, tadqiqot natijalari Rubiaceae oilasining endem turlarini o‘ rganish, Farg‘ ona vodiysi florasining bioxilma-xilligini saqlash hamda O‘ zbekiston Respublikasining biologik xilma-xillikni saqlash strategiyasiga ilmiy-amaliy hissa qo‘ shadi va turning Qizil kitobning navbatdagi nashriga EN kategoriyasida kiritilishi tavsiya etiladi.

ASTRAGALUS NAMANGANICUS POPOV TURINING FARG‘ONA VODIYSIDAGI MORFOLOGIK, FITOGEOGRAFIK XUSUSIYATLARI VA MUHOFAZA MUAMMOLARI

S.N. Mashrabov
Namangan davlat universiteti

Annotatsiya: *Mazkur maqolada Fabaceae Lindl. oilasiga mansub, Farg‘ona vodiysining mintaqaviy endem turi hisoblangan Astragalus namanganicus Popov turining morfologik, fitogeografik va ekologik xususiyatlari hamda muhofaza masalalari kompleks yoritilgan. 2022–2026-yillarda Namangan, Andijon va Farg‘ona viloyatlarining adir va tog‘oldi hududlarida o‘tkazilgan dala tadqiqotlari, TASH, LE, FRU va MW gerbariy fondlari materiallari (70 dan ortiq namuna), shuningdek GBIF, POWO va Plantarium ma’lumotlar bazalari asosida turning 1925–2026-yillarga oid 250 dan ortiq uchrash nuqtasi tahlil qilindi. Tadqiqot natijalariga ko‘ra, tur Farg‘ona vodiysining to‘rt botanik-geografik rayonida – Janubiy Chotqol (51,2%), Sharqiy Oloy (25,6%), Chorkesar (19,2%) va Qayroqqum–Yozyovon (4,0%) – dengiz sathidan 430–1130 m balandlik oralig‘ida, tosh-shag‘alli va gipsli bo‘z tuproqlarda tarqalgan bo‘lib, ekologik optimumi 550–750 m balandlikka to‘g‘ri keladi. 2022–2026-yillarda aniqlangan yangi o‘sish nuqtalari asosida turning ma’lum tarqalish maydoni sezilarli darajada kengaytirilib, EOO ko‘rsatkichi 4 099 km² dan 13 561 km² gacha, AOO ko‘rsatkichi esa 52 km² dan 264 km² gacha oshirildi. BIOMOD2 platformasida amalga oshirilgan ensemble bioiqlimiy modellashtirish SSP245 iqlim ssenariysi bo‘yicha 2080–2100-yillarga kelib turning potensial areali 27–37% ga qisqarishini va optimal balandlik zonasining 550–800 m dan 900–1300 m gacha yuqoriga siljishini bashorat qildi. GeoCAT vositasi yordamida hisoblangan ko‘rsatkichlar, populyatsiyalarning kuchli fragmentatsiyasi va doimiy qisqarish tendensiyasi asosida tur IUCN mezonlariga ko‘ra EN (Endangered – Xavf ostida) kategoriyasiga kiritildi. Tadqiqot natijalari asosida in-situ va ex-situ muhofaza chora-tadbirlari, jumladan yangi muhofaza hududlarini tashkil etish, yaylov boshqaruvi, urug‘ bankini yaratish, reintroduksiya dasturi hamda O‘zbekiston–Qirg‘iziston transchegaraviy hamkorlik mexanizmi ishlab chiqildi.*

Kalit so‘zlar: *Astragalus namanganicus, Fabaceae, endemik tur, Farg‘ona vodiysi, fitogeografiya, bioiqlimiy modellashtirish, BIOMOD2, IUCN, EOO, AOO, muhofaza biologiyasi.*

МОРФОЛОГИЧЕСКИЕ, ФИТОГЕОГРАФИЧЕСКИЕ ОСОБЕННОСТИ И ПРОБЛЕМЫ ОХРАНЫ ВИДА *ASTRAGALUS NAMANGANICUS* POPOV В ФЕРГАНСКОЙ ДОЛИНЕ

Аннотация: *В статье комплексно освещены морфологические, фитогеографические и экологические особенности, а также вопросы охраны Astragalus namanganicus Popov — регионального эндемичного вида Ферганской долины из семейства Fabaceae Lindl. На основе полевых исследований, проведённых в 2022–2026 гг. в адырных и предгорных районах Наманганской, Андижанской и Ферганской областей, материалов гербарных фондов TASH, LE, FRU и MW (более 70 образцов), а также баз данных GBIF, POWO и Plantarium проанализировано более 250 точек встречаемости вида за 1925–2026 гг. Согласно результатам исследования, вид распространён в четырёх ботанико-географических районах Ферганской долины — Южно-Чаткальском (51,2%), Восточно-Алайском (25,6%), Чоркесарском (19,2%) и Кайраккум–Язъяванском (4,0%) — на высотах 430–1130 м над уровнем моря, на каменисто-щебнистых и гипсоносных сероземах; экологический оптимум приходится на высоты 550–750 м. На основе новых точек произрастания, выявленных в 2022–2026 гг., известная площадь распространения вида существенно расширена: показатель EOO увеличен с 4 099 км² до 13 561 км², показатель AOO — с 52 км² до 264 км². Ансамблевое биоклиматическое моделирование на платформе BIOMOD2 прогнозирует к 2080–2100 гг. при климатическом сценарии SSP245 сокращение потенциального ареала на 27–37% и смещение оптимальной высотной зоны вверх — с 550–800 м до 900–1300 м. На основании показателей, рассчитанных с помощью GeoCAT, сильной фрагментации популяций и устойчивой тенденции к сокращению вид отнесён по критериям МСОП (IUCN) к категории EN (Endangered — находящийся под угрозой исчезновения). По результатам исследования разработаны меры охраны in-situ и ex-situ, включая создание новых охраняемых территорий, регулирование выпаса, создание банка семян, программу реинтродукции, а также механизм узбекско-кыргызского трансграничного сотрудничества.*

Ключевые слова: *Astragalus namanganicus, Fabaceae, эндемичный вид, Ферганская долина, фитогеография, биоклиматическое моделирование, BIOMOD2, МСОП (IUCN), EOO, AOO, биология охраны.*

MORPHOLOGICAL AND PHYTOGEOGRAPHICAL CHARACTERISTICS AND CONSERVATION PROBLEMS OF *ASTRAGALUS NAMANGANICUS* POPOV IN THE FERGANA VALLEY

Abstract: *This article presents a comprehensive analysis of the morphological, phytogeographical, and ecological characteristics, as well as the conservation status, of Astragalus namanganicus Popov (Fabaceae), a regional endemic species of the Fergana Valley. Based on field surveys conducted in the Namangan, Andijan, and Fergana regions during 2022–2026, more than 70 herbarium specimens from the TASH, LE, FRU, and MW collections, and data from the GBIF, POWO, and Plantarium databases, more than 250 occurrence records spanning 1925–2026 were analyzed. The results show that the species is distributed across four botanical-geographical districts of the Fergana Valley – South Chatkal (51.2%), East Alai (25.6%), Chorkesar (19.2%), and Kayrakkum–Yazyavan (4.0%) – at elevations of 430–1130 m, occurring predominantly on stony-gravelly and gypsiferous grey soils, with an ecological optimum at 550–750 m. Based on newly discovered occurrence points recorded in 2022–2026, the known distribution area was substantially expanded, increasing the extent of occurrence (EOO) from 4,099 km² to 13,561 km² and the area of occupancy (AOO) from 52 km² to 264 km². Ensemble species distribution modeling performed in BIOMOD2 predicted, under the SSP245 climate scenario, a 27–37% reduction in the potential range and an upward shift of the optimal elevation zone from 550–800 m to 900–1300 m by 2080–2100. Based on GeoCAT-derived indices, strong population fragmentation, and an ongoing decline trend, the species was assigned to the IUCN category Endangered (EN). A set of in-situ and ex-situ conservation measures, including the establishment of new protected areas, grazing management, seed banking, a reintroduction program, and an Uzbekistan–Kyrgyzstan transboundary cooperation mechanism, was developed on the basis of the study results.*

Keywords: *Astragalus namanganicus, Fabaceae, endemic species, Fergana Valley, phytogeography, species distribution modeling, BIOMOD2, IUCN, EOO, AOO, conservation biology.*

KIRISH

Astragalus L. turkumi Fabaceae Lindl. oilasining eng yirik va murakkab taksonlaridan biri boʻlib, dunyo florasida 3000 dan ortiq turni oʻz ichiga oladi. Oʻrta Osiyo hududi, xususan Oʻzbekiston va unga tutash togʻli mintaqalar Astragalus turkumining turlarga eng boy markazlaridan biri hisoblanadi, bu yerda koʻplab tor arealli, endemik va relikt turlar shakllangan boʻlib, ularning sistematik oʻrni, morfologik chegaralari va ekologik moslashuvlari hali ham ilmiy munozaralar markazida qolmoqda [3, 19].

Astragalus namanganicus Popov – Fargʻona vodiysining mintaqaviy endem turi boʻlib, uning oʻrganilish tarixi 100 yildan ortiq davrni qamrab oladi. Tur ilk bor 1925-yil 4-mayda Fargʻona viloyati (hozirgi Namangan viloyati), Namangan tumani, Taxtakoʻl yaqinidagi tepalikdan Soikina tomonidan yigʻib olingan, tip namunasi Oʻzbekiston Milliy gerbariysi (TASH) fondida saqlanadi. Tur haqidagi dastlabki ma'lumotlar 1926-yilda M.F. Popov tomonidan chop etilgan. XX asr davomida turning tarqalishi va ekologik xususiyatlari S.N. Kudryashev (1933–1935), A.G. Borisova (1946), M. Nabiyev (1951–1953), N.F. Goncharov (1955), E.V. Nikitina (1957), R.V. Kamelin (1981), R.S. Vernik va T. Raximova (1982) kabi olimlar tomonidan qisman yoritilgan, biroq bu manbalarda turning ekologik ixtisoslashuvi, populyatsion strukturasi va areal dinamikasi chuqur tahlil qilinmagan [11].

Soʻnggi yillarda G.A. Lazkov (2005), F. Hassanov va boshq. (2015), K.Sh. Tojibaev va boshq. (2022) hamda X.R. Xoshimov (2021–2023) tomonidan olib borilgan tadqiqotlar turning yangi oʻsish nuqtalarini aniqlashga xizmat qilgan boʻlsa-da, adabiyotlar tahlili quyidagi ilmiy boʻshliqlarni koʻrsatadi: turning morfologik tavsifi turli manbalarda qisman tafovutlar bilan keltirilgan va morfometrik koʻrsatkichlari zamonaviy talablar darajasida toʻliq oʻrganilmagan; turning tarqalishi Fargʻona vodiysining Oʻzbekiston va Qirgʻiziston hududlarini qamrab olishiga qaramay, uni mintaqaviy endemik tur sifatida baholovchi kompleks tahlil amalga oshirilmagan; turning ekologik talablari (tuproq tiplari, balandlik mintaqalari, ekologik optimumi) boʻyicha miqdoriy ma'lumotlar yetarli emas; turning iqlim oʻzgarishi sharoitidagi istiqboldagi arealini bioiqlimiy modellashtirish boʻyicha tadqiqotlar deyarli amalga oshirilmagan; muhofaza holati turli manbalarda turlicha (yagona, hujjatlashtirilmagan) baholangan.

Antropogen omillarning kuchayishi, tabiiy landshaftlarning oʻzlashtirilishi, yaylovlardan notoʻgʻri foydalanish va iqlim oʻzgarishi natijasida koʻplab Astragalus turlari, jumladan A. namanganicus populyatsiyalarining qisqarib borishi kuzatilmoqda. Oʻzbekiston Respublikasida biologik xilma-xillikni saqlash davlat siyosati darajasidagi muhim vazifalardan biri hisoblanadi, bu Oʻzbekiston Respublikasining "Oʻsimlik dunyosini muhofaza qilish va undan foydalanish toʻgʻrisida"gi Qonuni (2016), Prezidentning atrof-muhitni muhofaza qilish konsepsiyasi (2019) va biologik xilma-xillikni saqlash strategiyasi (2019) kabi me'yoriy-huquqiy hujjatlarda oʻz aksini topgan.

Tadqiqotning maqsadi – Astragalus namanganicus Popov turining morfologiyasi, fitogeografiyasi va muhofaza masalalarini kompleks oʻrganishdan iborat. Ushbu maqsadga erishish uchun quyidagi vazifalar belgilandi: turning tirik namunalar asosidagi morfologik tahlilini amalga oshirish; botanik-geografik rayonlar boʻyicha tarqalishini tahlil qilish;

tuproq tiplari va balandlik mintaqalari bo‘yicha ekologik xususiyatlarini aniqlash; turni bioiqlimiy modellashtirish; IUCN kategoriyalari bo‘yicha baholash; muhofaza qilish choralarini ishlab chiqish.

Tadqiqotning ilmiy yangiligi shundan iboratki, turning morfologik tavsifi zamonaviy talablar asosida aniqlashtirilib, Astragalus brachyrachis Bunge bilan qiyosiy tahlil qilindi; 1925–2026-yillarga oid barcha ma’lum uchrash nuqtalari birinchi marta tizimlashtirilib, botanik-geografik rayonlar kesimida tahlil qilindi va tarqalish xaritasi yaratildi; tuproq tiplari va balandlik mintaqalari bo‘yicha miqdoriy ekologik tahlil o‘tkazildi; ilk bor turning ekologik nishi BIOMOD2 platformasida ensemble modellashtirish usuli yordamida baholandi; IUCN mezonlari asosida global va mahalliy darajada yagona, hujjatlashtirilgan muhofaza baholashi amalga oshirildi.

TADQIQOT MATERIALLARI VA USULLARI

Tadqiqot obyekti va hududi. Tadqiqot obyekti sifatida Fabaceae Lindl. oilasiga mansub, Farg‘ona vodiysi endemigi hisoblangan Astragalus namanganicus Popov turi tanlab olindi. Tadqiqot ishlari Farg‘ona vodiysining shimoliy va sharqiy qismlarida joylashgan Namangan viloyati (Namangan, Chust, Pop, Chortoq, Kosonsoy, To‘raqo‘rg‘on, Uychi, Yangiqo‘rg‘on), Andijon viloyati (Andijon, Jalaquduq, Xo‘jaobod, Marxamat, Xonobod) va Farg‘ona viloyati (Oltiariq, Quvasoy, Beshariq tumanlari) hududlarida olib borildi. Tadqiqot hududlari dengiz sathidan 430–1130 m balandlikda joylashgan bo‘lib, chala cho‘l va adir mintaqalariga xos quruq kontinental iqlim, bo‘z va gipslashgan tuproqlar bilan tavsiflanadi.

Dala tadqiqotlari va gerbariy materiallari

2022–2026-yillarning mart–avgust oylarida A.I. Tolmachev (1974) hamda A.V. Shcherbakov va S.R. Mayorov (2006) metodikalari asosida maqsadli dala tadqiqotlari olib borildi. Marshrutlar adabiyot ma’lumotlari, gerbariy fondlaridagi namunalarning geografik koordinatalari hamda oldingi tadqiqotchilarning (Soikina, 1925; Ioffe, 1928; Kudryashev, 1933; Nabiyev, 1951; Pavlov, 1965; Vernik va Raximova, 1971; Xoshimov, 2021–2022; Sharipov, Sheraliyev, 2024) ma’lumotlari asosida belgilandi. Dala tadqiqotlari davomida turning 10 dan ortiq gerbariy namunasi yig‘ilib, Namangan davlat universiteti Biologik tadqiqotlar markazi gerbariy fondiga topshirildi. Tadqiqot materiallari O‘zbekiston Milliy gerbariysi (TASH), V.L. Komarov nomidagi Rossiya Botanika instituti gerbariysi (LE), Qirg‘iziston Fanlar akademiyasi gerbariysi (FRU) va Moskva davlat universiteti gerbariysi (MW) fondlaridan olingan jami 70 dan ortiq namuna, shuningdek GBIF va Plantarium onlayn platformalari ma’lumotlari bilan to‘ldirildi. Natijada 1925–2026-yillarni qamrab olgan jami 250 dan ortiq uchrash yozuvi tizimlashtirildi.

Morfologik va morfometrik tahlil

Morfologik tavsif tirik o‘simlik namunalari va gerbariy materiallari asosida amalga oshirildi. Vegetativ organlardan ildiz tizimi, poya, barg va bargchalar, generativ organlardan gulpoya, to‘pgul, gulyonbarglari, gulkosacha, gultoji va dukkak diagnostik belgilari o‘rganildi. Morfometrik o‘lchashlar 10 ta populyatsiyadan 30 tadan individda amalga oshirilib, har bir belgi bo‘yicha minimal, maksimal va o‘rtacha qiymatlar hisoblandi. Olingan ma’lumotlar turning ekologik moslanish xususiyatlarini aniqlash hamda Astragalus brachyrachis Bunge bilan qiyosiy tahlil qilish uchun foydalanildi.

Botanik-geografik rayonlashtirish

Turning Farg‘ona vodiysidagi tarqalishini tahlil qilishda R.V. Kamelin (1973) tomonidan taklif etilgan va K.Sh. Tojibaev va boshqalar (2016) tomonidan ishlab chiqilgan zamonaviy botanik-geografik rayonlashtirish sxemasi asos qilib olindi. Ushbu sxemaga muvofiq hudud Tog‘li O‘rta Osiyo va Turon provinsiyalarini o‘z ichiga oladi. Barcha uchrash nuqtalari botanik-geografik rayonlar bo‘yicha taqsimlanib, ArcGIS 10.6.1 dasturida (WGS 1984 proyeksiyasida) xaritalashtirildi.

Tuproq tiplari va balandlik mintaqalari bo‘yicha tahlil

Adir mintaqasi chegaralarini belgilashda Q.Z. Zokirov (1955, 1961) ma’lumotlariga asoslanildi. O‘zbekiston o‘simliklarini balandlik zonalari bo‘yicha tasniflashda Zokirov (1955) taklif etgan to‘rt mintaqali sxema (cho‘l – 450–500 m gacha; adir – 500–1450 m; tog‘ – 1450–2800 m; yaylov – 2800–4600 m) qo‘llanildi. Turning o‘sish nuqtalaridagi tuproq tiplari dala kuzatuvlari, adabiyot ma’lumotlari va gerbariy etiketkalari tavsiflari asosida aniqlandi. Balandlik va tuproq tiplari bo‘yicha to‘plangan ma’lumotlar Microsoft Excel dasturida qayta ishlanib, o‘rtacha qiymat, minimal-maksimal ko‘rsatkichlar, standart og‘ish va variatsiya koeffitsienti hisoblandi; populyatsiya zichligi va hayotiylik darajasi o‘rtasidagi bog‘liqlik korrelyatsion tahlil yordamida baholandi.

Bioiqlimiy modellashtirish

Turning potensial tarqalish arealini bashoratlash uchun Species Distribution Modeling (SDM) usuli, xususan BIOMOD2 platformasi (R dasturlash muhiti) qo‘llanildi. To‘rt algoritm (GLM, RF, FDA, MAXENT.Phillips.2) asosida jami 10 ta RUN va 40 ta individual model yaratilib, ularning natijalari TSS og‘irligi bo‘yicha o‘rtacha (EMmeanByTSS va EMwmeanByTSS) ensemble modellashtirish usulida umumlashtirildi. Modellashtirish uchun WorldClim 2.1 versiyasidagi 19 ta bioiqlimiy o‘zgaruvchidan Pearson korrelyatsion tahlili ($|r| > 0,8$) asosida oltitasi (Bio2, Bio3, Bio4, Bio5, Bio8, Bio15) tanlab olindi hamda turning stenoedafik xususiyatini aks ettirish maqsadida oltita tuproq o‘zgaruvchisi

(soil_cn, soil_cec, soil_n, soil_oc, soil_ph, soil_silt) qo‘shildi – jami 12 ta o‘zgaruvchi modelga kiritildi. Kelajakdagi iqlim o‘zgarishini bashoratlash uchun SSP245 (Shared Socioeconomic Pathway 2–4.5) – o‘rta yo‘l ssenariysi, proyeksiya davri sifatida 2080–2100-yillar tanlandi; qiyoslash uchun SSP126 va SSP585 ssenariylari adabiyot ma’lumotlari asosida jalb qilindi. Model sifati TSS (True Skill Statistic) ko‘rsatkichi orqali baholandi (0,7–1,0 oralig‘i – yaxshi va a’lo daraja).

IUCN kategoriyalari bo‘yicha baholash

Turning muhofaza holatini baholashda IUCN Qizil ro‘yxatining 3.1 versiyasi mezonlaridan foydalanildi. Turning EOO (Extent of Occurrence) va AOO (Area of Occupancy) ko‘rsatkichlari GeoCAT (Geospatial Conservation Assessment Tool) onlayn vositasi yordamida hisoblandi. EOO barcha ma’lum uchrash nuqtalarini o‘rab turgan minimal qavariq poligon maydoni sifatida, AOO esa 2×2 km o‘lchamdagi grid hujayralari asosida aniqlandi. Baholash B mezoni (EOO, AOO, subpopulyatsiyalar soni va fragmentatsiya) bo‘yicha, global (O‘zbekiston va Qirg‘iziston) hamda mahalliy (O‘zbekiston qismi) darajada amalga oshirildi.

NATIJALAR VA MUHOKAMA

1. Morfologik xususiyatlar va yaqin tur bilan qiyosiy tahlil

Astragalus namanganicus Popov – shoxlangan o‘q ildiz tizimiga ega ko‘p yillik o‘t o‘simlik (yarim buta), ildiz bo‘g‘zi qisman yog‘ochlashgan. Poyaning balandligi 17 smdan 60 sm gacha o‘zgaradi (o‘rtacha 20–35 sm), kalta, yog‘ochlashgan, zich yotiq oq tukli. Barglari murakkab, patsimon, uzunligi 6–20 sm, bargchalari 4–8 juft, keng teskari tuxumsimon-yumaloq shaklda. Gulpoyasi 13–30 sm, barglariga nisbatan 1,5–3 marta uzun. To‘pguli siyrak shingilsimon, uzunligi 12–25 sm, bir to‘pgulda 8–15 ta gul joylashgan. Gultoji sariq rangda, yelkanchasi 26–30 mm. Dukkagi biroz egilgan, cho‘ziq, 10–15 mm uzunlikda, ikki uyali, qalin oq momiq tukli – bu belgi turning A. brachyrachis dan farqli asosiy diagnostik belgilaridan biridir. Tur aprel–may oylarida gullab, iyun–iyul oylarida urug‘ beradi.

10 ta populyatsiyadan 30 tadan individda o‘tkazilgan morfometrik o‘lchashlar natijalari 1-jadvalda keltirilgan.

1-jadval. A. namanganicus turining asosiy morfometrik ko‘rsatkichlari

Belgilar	Minimal	Maksimal	O‘rtacha	Standart og‘ish
Poya balandligi (sm)	17	60	28,4	±8,7
Barg uzunligi (sm)	6	20	13,2	±3,4
Bargchalar soni (juft)	4	6	5,1	±0,7
Bargcha uzunligi (mm)	6	15	10,3	±2,1
Gulpoya uzunligi (sm)	13	30	18,6	±3,2
To‘pgul uzunligi (sm)	12	25	19,4	±3,5
Gullar soni	8	15	11,2	±2,1
Gulkosacha uzunligi (mm)	14	18	16,1	±1,2
Yelkancha uzunligi (mm)	26	30	28,1	±1,1
Dukkak uzunligi (mm)	10	15	12,4	±1,3
Dukkak eni (mm)	3	5	4,1	±0,5

Popov (1926) turning dastlabki tavsifida uning Astragalus brachyrachis Bunge turiga eng yaqin ekanligini, ammo bargchalarining ko‘pligi, shingilining siyrakligi va dukkagining qisqa hamda tukli bo‘lishi bilan ajralib turishini ta’kidlagan. D.R. Axmatova (2025) ma’lumotlari va dala kuzatuvlari asosida o‘tkazilgan qiyosiy tahlil (2-jadval) ikki turni bir qator ishonchli diagnostik belgilar bo‘yicha farqlash mumkinligini ko‘rsatdi.

2-jadval. A. namanganicus va A. brachyrachis turlarining qiyosiy tahlili

Belgilar	A. namanganicus	A. brachyrachis
Poya balandligi	17–60 sm, o‘zgaruvchan	15–30 sm, barqaror
Barg uzunligi	6–20 sm	10–15 sm
Bargchalar soni	4–8 juft	5–8 juft
Tuklanish	O‘rtacha darajada	Zich
Gul uzunligi	26–30 mm	20–25 mm

Belgilar	A. namanganicus	A. brachyrachis
Dukkak	Ikki uyali, qalin oq tukli	Bir uyali, siyrak tukli
Dukkak uzunligi	10–15 mm	8–12 mm
Areali	Tor, Farg‘ona vodiysi	Keng ekologik amplitudali

Generativ organlar tahlili A. namanganicus ning gulpoyasi, guli va gulkosachasi A. brachyrachis ga nisbatan yirikroq ekanligini ko‘rsatadi. Dukkak tuzilishi ikki turni farqlovchi asosiy diagnostik belgi bo‘lib, A. namanganicus ikki uyali va qalin oq tuklar bilan qoplangan dukkakka ega. Ekologik nuqtai nazardan, A. namanganicus ning areali Farg‘ona vodiysi bilan chegaralangan tor tarqalish hududini egallaydi, bu uning ekologik ixtisoslashgan va endemik xususiyatga ega ekanligini tasdiqlaydi; A. brachyrachis esa keng ekologik amplitudaga ega. Balandlik gradienti bo‘yicha morfometrik ko‘rsatkichlar ham izchil o‘sish tendensiyasini namoyon etdi: 450–700 m mintaqasida poya balandligi 17–25 sm bo‘lsa, 1000–1200 m mintaqasida bu ko‘rsatkich 25–60 sm gacha yetdi, bu turda ekologik plastiklik mavjudligidan dalolat beradi.

2. Botanik-geografik tarqalish

Farg‘ona vodiysining R.V. Kamelin (1973) va K.Sh. Tojibaev (2016) sxemalari bo‘yicha rayonlashtirilishi fonida, A. namanganicus to‘rtta botanik-geografik rayonda – Chorkesar, Janubiy Chotqol, Sharqiy Oloy va Qayroqqum–Yozyovon rayonlarida – qayd etildi (3-jadval).

3-jadval. A. namanganicus turining botanik-geografik rayonlar bo‘yicha taqsimlanishi

Okrug	Botanik-geografik rayon	Uchrashlar soni	Ulushi (%)	Balandlik diapazoni (m)
Farg‘ona	Janubiy Chotqol	128	51,2	430–807
Farg‘ona-Oloy	Sharqiy Oloy	64	25,6	542–1128
G‘arbiy Tyanshan	Chorkesar	48	19,2	–
Markaziy Farg‘ona	Qayroqqum-Yozyovon	10	4,0	430–480
Jami	–	250	100	430–1130

Janubiy Chotqol rayoni (Farg‘ona okrugi) turning asosiy areali bo‘lib, uchrashlarning 51,2% (128 ta yozuv) shu yerda qayd etilgan; asosiy topilmalar Namangan shahri atrofi, Chortoq tumani (Qorabog‘, Kuchon, Arbag‘ish), Uychi tumani (G‘ayrat), Yangiqo‘rg‘on va Kosonsoy tumanlarida joylashgan. Sharqiy Oloy rayoni (Farg‘ona-Oloy okrugi) ikkinchi darajali areal (25,6%; 64 ta yozuv) bo‘lib, eng keng balandlik diapazoniga (542–1128 m) ega; so‘nggi yillarda (2022–2024) Andijon viloyati Jalaquduq, Xo‘jaobod va Marxamat tumanlarida ko‘plab yangi populyatsiyalar aniqlangan, jumladan Xo‘jaobod tumani Imomota qishlog‘i atrofida turning eng baland (1105–1128 m) populyatsiyalari qayd etilgan. Chorkesar rayoni (G‘arbiy Tyanshan okrugi) turning tip areali hisoblanadi (19,2%; 48 ta yozuv), bu yerda turning eng zich va barqaror populyatsiyalari tosh-shag‘alli va gipsli bo‘z tuproqlarda joylashgan. Qayroqqum–Yozyovon rayoni (Markaziy Farg‘ona okrugi) periferik areal bo‘lib (4,0%; 10 ta yozuv), turning eng past balandlikdagi (430–480 m) populyatsiyalarini o‘z ichiga oladi.

Bu holat Astragalus L. turkumiga mansub ko‘plab endemik turlar uchun xos bo‘lgan qonuniyatlarga to‘liq mos keladi va Farg‘ona vodiysida endemizm markazlarining asosan adir va tog‘oldi hududlariga to‘g‘ri kelishini yana bir bor tasdiqlaydi. 2022–2026-yillardagi dala tadqiqotlari natijasida aniqlangan yangi o‘sish nuqtalari turning ma’lum arealini sezilarli darajada kengaytirdi, biroq populyatsiyalarning fragmentatsiyalangan holda, tarixiy tip areal doirasida saqlanib qolganligi ham aniqlandi.

3. Tuproq tiplari va balandlik mintaqalari bo‘yicha ekologik tahlil

1925–2025-yillar oralig‘ida to‘plangan 250 dan ortiq gerbariy va dala kuzatuvlari ma’lumotlarining tahlili turning dengiz sathidan 430 m dan 1130 m gacha bo‘lgan balandlik oralig‘ida tarqalganligini ko‘rsatdi (4-jadval).

4-jadval. Turning balandlik mintaqalari bo‘yicha taqsimlanishi

Balandlik oralig‘i	Mintaqa	Uchrash nuqtalari soni	Foizi (%)
430–500 m	Quyi adir	22	8,8
500–600 m	Quyi adir	54	21,6
600–700 m	O‘rta adir	82	32,8
700–800 m	O‘rta adir	60	24,0

Balandlik oralig‘i	Mintaqa	Uchrash nuqtalari soni	Foizi (%)
800–900 m	Yuqori adir	24	9,6
900–1130 m	Yuqori adir / tog‘ etagi	8	3,2
Jami	–	250	100

Balandlik gradienti bo‘ylab populyatsiyalarning taqsimlanishi tahlil qilinganda, tur uchun optimal balandlik oralig‘i 550–750 m ekanligi aniqlandi; ushbu oralikda turning eng yuqori hayotiylik ko‘rsatkichlari, eng zich populyatsiyalari va eng ko‘p uchrash nuqtalari (56,4%) kuzatildi, ayniqsa 600–700 m oralig‘ida turning eng barqaror populyatsiyalari (zichligi 8–12 individ/100 m², hayotiylik darajasi 5 ball) shakllangan bo‘lib, bu balandlikda namlik rejimi (250–400 mm yog‘in) va harorat sharoitlari turning talablariga to‘liq javob beradi.

Tuproq tiplari bo‘yicha tahlil (5-jadval) turning tipik bo‘z va toshloq-shag‘alli substratlarda eng yuqori uchrash chastotasi va eng yaxshi populyatsiya holatiga ega ekanligini ko‘rsatdi.

5-jadval. Turning tuproq tiplari bo‘yicha taqsimlanishi

Tuproq tipi	Substrat xususiyati	Uchrash chastotasi	Populyatsiya holati
Tipik bo‘z tuproq	Shag‘alli, skeletli	Yuqori (45–50%)	Yaxshi
Toshloq-shag‘alli substrat	Skeletli, chaqir toshli	Yuqori (40–45%)	Eng yaxshi
Gipsli tuproq	Gips qatlamli	O‘rtacha (15–20%)	Yaxshi
Och bo‘z tuproq	Yengil mexanik tarkibli	O‘rtacha (20–25%)	O‘rtacha
Gil-qumoq tuproq	Mayin dispersli	Past (5–8%)	Past
Sho‘rlangan tuproq	Tarkibida tuzlar	Past (2–3%)	Past

Tur stenoedafik (tor tuproq talablariga ega) xususiyatga ega bo‘lib, eng yaxshi populyatsiyalari tarkibida 30–45% gacha skeletli elementlar bo‘lgan tuproqlarda shakllangan hamda gipsli substratlarga nisbatan tolerantlik namoyon etadi. Shu bilan birga, Uychi tumanidagi (G‘ayrat qishlog‘i atrofi) sug‘oriladigan hududlar ta’sirida bo‘lgan sho‘rxok tuproqlarda turning populyatsiyalari degradatsiyaga uchraganligi aniqlanib, bu turning sho‘rlanish darajasiga nisbatan yuqori sezgirligidan dalolat beradi. Ekologik valentlik tahlili turni balandlik omiliga nisbatan mezostenobiont, tuproq omiliga nisbatan stenoedafik, iqlim omiliga nisbatan esa kseromezofil sifatida tavsiflash imkonini berdi.

4. Bioiqlimiy modellashtirish natijalari

BIOMOD2 platformasida amalga oshirilgan ensemble modellashtirish natijalariga ko‘ra, turning yuqori yaroqlilikdagi hozirgi potensial hududlari Farg‘ona vodiysining shimoliy va sharqiy tog‘li hududlarida (Janubiy Chatqol, Sharqiy Oloy, Oloy tizmalari) kuzatiladi, quyi adir hududlari (Beshariq, Oltiariq, Namangan atrofi, Toshko‘mir) past yaroqlilik zonasiga kiradi, Qozog‘istonning janubiy tekisliklari va Turon pasttekisligi esa turning yashashi uchun mutlaqo yaroqsiz hudud sifatida baholandi.

SSP245 iqlim ssenariysi bo‘yicha 2080–2100-yillarga kelib turning potensial tarqalish areali (EOO) hozirgi 13 561 km² dan 8 500–9 800 km² gacha (27–37% qisqarish), egallanish maydoni (AOO) esa 264 km² dan 130–160 km² gacha (40–50% qisqarish) kamayishi prognoz qilindi (6-jadval). Shu bilan birga, turning optimal balandlik oralig‘i hozirgi 550–800 m dan kelajakda 900–1300 m gacha yuqoriga siljishi aniqlandi, bu SSP245 ssenariysi bo‘yicha Markaziy Osiyoda kutilayotgan +2,0–2,7°C harorat oshishiga mos keladi.

6-jadval. Iqlim o‘zgarishi (SSP245) sharoitida turning EOO va AOO ko‘rsatkichlari dinamikasi

Ko‘rsatkich	Hozirgi holat (2020–2025)	SSP245 (2080–2100)	Qisqarish (%)
EOO (tarqalish hududi)	13 561 km²	8 500–9 800 km²	27–37
AOO (egallanish hududi)	264 km²	130–160 km²	40–50

Boshqa iqlim ssenariylari (SSP126, SSP585) bilan qiyosiy tahlil shuni ko‘rsatdiki, optimistik SSP126 ssenariysida EOO 15–25%, AOO 25–35% ga qisqarishi, pessimistik SSP585 ssenariysida esa mos ravishda 50–60% va 60–75% ga qisqarishi kutilmoqda, optimal balandlik esa 700–1600 m oralig‘ida joylashadi. Bioiqlim omillaridan Bio5 (eng issiq oyning maksimal harorati, 34,8% hissa) va Bio15 (yog‘ingarchilik mavsumiyligi, 22,5% hissa) eng muhim omillar sifatida ajralib chiqdi, tuproq omillaridan esa soil_cec va soil_ph turning bo‘z tuproqlarga bog‘liqligini tasdiqladi. Sharqiy Oloy

tizmasining 1000–1300 m oralig‘i (Xo‘jaobod–Imomota, Quvasoy–Log‘on) hamda Oloy va Chatqol tizmalarining yuqori qismlari asosiy iqlim refugiumlari sifatida aniqlandi, bu hududlar turning 2050–2100-yillardagi omon qolish ehtimolini belgilaydi.

5. IUCN kategoriyalari bo‘yicha baholash

GeoCAT vositasi yordamida hisoblangan ko‘rsatkichlarga ko‘ra, 2022–2026-yillarda aniqlangan yangi o‘sish nuqtalari hisobiga turning EOO ko‘rsatkichi 4 099,75 km² dan 13 560,97 km² gacha, AOO ko‘rsatkichi esa 52 km² dan 264 km² gacha oshdi. IUCN B mezoni bo‘yicha EOO ko‘rsatkichi VU chegarasiga (<20 000 km²) to‘g‘ri kelsa-da, AOO ko‘rsatkichi (264 km²) EN chegarasidan (<500 km²) past bo‘lib chiqdi (7-jadval); IUCN qoidalariga ko‘ra, mezonlardan biri bajarilgan taqdirda eng yuqori xavf darajasi qabul qilinadi, shu sababli tur EN toifasida baholandi.

7-jadval. A. namanganicus turini IUCN mezonlari bo‘yicha baholash natijalari

Daraja	EOO (km²)	AOO (km²)	Kategoriya	Mezonlar
Global (O‘zbekiston + Qirg‘iziston)	13 560,97	264	EN	B1ab(i,ii,iii)+B2ab(i,ii,iii)
Mahalliy (O‘zbekiston)	443,97	28	EN	B1ab(i)+B2ab(i,ii)

B mezonining “b” bandi (fragmentatsiya va qisqarish) bo‘yicha o‘tkazilgan tahlil populyatsiyalar orasidagi o‘rtacha masofa 35–50 km ni tashkil etishini, ayrim hududlarda (Namangan va Andijon viloyatlari o‘rtasida) ekologik koridorlarning mavjud emasligini hamda so‘nggi 30 yil ichida populyatsiyalar sonining 30–40% ga qisqarganligini ko‘rsatdi. Tur 7 ta asosiy subpopulyatsiyaga (Chust-Pop, Namangan atrofi, Chortoq, Uychi, Jalaquduq, Xo‘jaobod, Beshariq) ega bo‘lib, ularning ko‘pchiligi kuchli izolyatsiyalangan. Ushbu ma’lumotlar asosida Astragalus namanganicus Popov turi IUCN Qizil ro‘yxati bo‘yicha EN B1ab(i,ii,iii)+B2ab(i,ii,iii) (Endangered – Xavf ostida) kategoriyasiga kiritilishi to‘liq asoslandi.

6. Tahdid omillari va muhofaza chora-tadbirlari

Dala tadqiqotlari natijasida aniqlangan 250 dan ortiq uchrash nuqtasining 200 dan ortig‘i (80% dan ko‘prog‘i) hech qanday muhofaza rejimiga ega bo‘lmagan hududlarda joylashganligi aniqlandi. Turning tabiiy populyatsiyalariga eng katta tahdid mayda shoxli hayvonlarning tartibsiz boqilishi, yerlarni qishloq xo‘jaligi uchun o‘zlashtirish, qurilish ishlari hamda iqlim o‘zgarishi hisoblanadi; bu omillar ayniqsa Uychi tumani G‘ayrat qishlog‘i atrofida va Chortoq tumanining ayrim hududlarida keskin namoyon bo‘lmoqda (8-jadval).

8-jadval. A. namanganicus turining asosiy populyatsiyalari va tavsiya etiladigan muhofaza choralari

Hudud	Tuman (viloyat)	Balandlik (m)	Tavsiya etiladigan muhofaza chorasi
“Chap” trakti (Uyg‘ursoy)	Pop (Namangan)	594–718	Mavjud o‘rmon fondi doirasida qat’iy muhofaza zonasi
Arbag‘ish va Kuchon adirlari	Chortoq (Namangan)	624–807	Mahalliy ahamiyatdagi tabiat yodgorligi
Imomota qishlog‘i atrofi	Xo‘jaobod (Andijon)	1105–1128	IPA tarkibida muhofaza zonasi
G‘ayrat qishlog‘i atrofi	Uychi (Namangan)	549–646	Yaylovlardan foydalanishni tartibga solish
Qorabog‘ suv ombori atrofi	Chortoq (Namangan)	677–762	Suv ombori qirg‘og‘i bo‘ylab muhofaza chizig‘i

Aniqlangan tahdidlar asosida kompleks muhofaza strategiyasi ishlab chiqildi: (1) in-situ muhofaza – “Chap” trakti (Pop tumani) hududida mavjud O‘rmon fondi yerlarida qat’iy muhofaza rejimini o‘rnatish, Chortoq tumani Arbag‘ish va Kuchon adirlarida “Chortoq adirlari” mahalliy ahamiyatdagi tabiat yodgorligini tashkil etish, Xo‘jaobod tumani Imomota qishlog‘i atrofini IPA tarkibiga kiritish; (2) yaylov boshqaruvi – populyatsiyalar joylashgan hududlarda yaylov yuklamasini 1 ga maydonga 2–3 boshdan oshirmaslik, o‘tlatish mavsumini (mart–aprel, gullash va erta vegetatsiya davri) cheklash hamda mahalliy chorvadorlar bilan o‘tlatish jadvallari bo‘yicha shartnomalar tuzish; (3) qonunchilik choralari – turni O‘zbekiston Respublikasi Qizil kitobining navbatdagi nashriga EN toifasida kiritish hamda O‘zbekiston–Qirg‘iziston transchegaraviy muhofaza ro‘yxatiga kiritish; (4) ex-situ saqlash – urug‘lik banki tashkil etish, Toshkent Botanika bog‘i va Namangan davlat universitetida tirik kolleksiya yaratish; (5) reintroduksiya dasturi – donor populyatsiyani (masalan, Chortoq Arbag‘ish) tanlash, urug‘ yig‘ish, botanika bog‘ida ko‘chat yetishtirish, tarixiy arealga qayta ekish va kamida 3 yillik monitoring; (6) monitoring tizimi – populyatsiyalar hisobini har 3 yilda, fenologik

kuzatuvlarni har yili, yashash joyi holatini har 5 yilda baholash hamda GeoCAT tizimi yordamida EOO/AOO koʻrsatkichlarini muntazam yangilab borish; (7) xalqaro hamkorlik – Oʻzbekiston–Qirgʻiziston qoʻshma monitoring guruhini (Namangan–Jalolobod transchegaraviy hududi) tashkil etish hamda Kew Qirollik botanika bogʻi, GBIF va Plantlife International bilan hamkorlikni yoʻlga qoʻyish.

XULOSA

Oʻtkazilgan tadqiqot natijalari asosida quyidagi umumlashtirilgan xulosaga kelindi: Astragalus namanganicus Popov – poya balandligi 17–60 sm gacha yetadigan koʻp yillik oʻt oʻsimlik boʻlib, yaqin tur Astragalus brachyrachis Bunge dan dukkagining ikki uyali va qalin tukli boʻlishi, toʻpgulining siyrakligi hamda generativ organlarining yiriklashishi bilan ishonchli farqlanadi. Turning 1925–2026-yillarga oid 250 dan ortiq uchrash nuqtasi birinchi marta toʻliq tizimli tahlil qilinib, u Fargʻona vodiysining toʻrt botanik-geografik rayonida – Janubiy Chotqol (51,2%), Sharqiy Oloy (25,6%), Chorkesar (19,2%) va Qayroqqum–Yozyovon (4,0%) – dengiz sathidan 430–1130 m balandlik oraligʻida, ekologik optimumi esa 550–750 m da (ayniqsa 600–700 m) joylashgan holda tarqalganligi aniqlandi; tur asosan tosh-shagʻalli va gipsli boʻz tuproqlarda oʻsib, shoʻrlangan tuproqlarga yuqori sezgirlik namoyon etadi. 2022–2026-yillarda aniqlangan yangi oʻsish nuqtalari hisobiga turning maʼlum tarqalish maydoni sezilarli darajada kengaytirilib, EOO koʻrsatkichi 4 099 km² dan 13 561 km² gacha, AOO koʻrsatkichi esa 52 km² dan 264 km² gacha oshirildi. BIOMOD2 platformasida oʻtkazilgan bioiqlimiy modellashtirish SSP245 ssenariysi boʻyicha 2080–2100-yillarga kelib turning potensial areali 27–37% ga qisqarishini va optimal balandlik zonasining 550–800 m dan 900–1300 m gacha yuqoriga siljishini bashorat qildi, bunda Sharqiy Oloy va Oloy tizmalarining yuqori qismlari asosiy iqlim refugiumlari sifatida belgilandi. GeoCAT koʻrsatkichlari, populyatsiyalarning kuchli fragmentatsiyasi (oʻrtacha masofa 35–50 km), soʻnggi 30 yilda 30–40% ga qisqarishi hamda uchrash nuqtalarining 80% dan ortigʻi hech qanday muhofaza rejimiga ega emasligi asosida tur IUCN mezonlariga koʻra global va mahalliy darajada EN B1ab(i,ii,iii)+B2ab(i,ii,iii) (Xavf ostida) kategoriyasiga kiritildi. Aniqlangan asosiy tahdidlarga – yaylov bosimi, yerlarni oʻzlashtirish, qurilish ishlari va iqlim oʻzgarishi – qarshi kompleks in-situ va ex-situ muhofaza strategiyasi (tabiat yodgorliklari va IPA zonalarini tashkil etish, yaylov boshqaruvi, urugʻ banki, reintroduksiya dasturi, monitoring tizimi va Oʻzbekiston–Qirgʻiziston transchegaraviy hamkorlik) ishlab chiqildi. Yakun sifatida taʼkidlash joizki, tadqiqot natijalari Fabaceae oilasining endem turlarini oʻrganish, Fargʻona vodiysi florasining bioxilma-xilligini saqlash hamda Oʻzbekiston Respublikasining biologik xilma-xillikni saqlash strategiyasiga ilmiy-amaliy hissa qoʻshadi va turning Qizil kitobning navbatdagi nashriga EN kategoriyasida kiritilishi tavsiya etiladi.

XX ASRNING 80-90-YILLARIDA FARG‘ ONA VODIYSIDA MILLATLARARO TOTUVLIK TARIXI

Ataxanov Baxtiyor
Namangan davlat pedagogika instituti dotsenti, tarix fanlari bo‘ yicha falsafa doktori (PhD)

Annotatsiya: *Mazkur maqolada XX asrning 80-90-yillarida Farg‘ ona vodiysida millatlararo totuvlikning tarixiy rivojlanish jarayonlari tarixiy-etnologik nuqtai nazardan tahlil qilingan. Tadqiqotda tarixiy-genetik, qiyosiy-tarixiy va statistik tahlil usullari asosida aholi tarkibi, migratsiya jarayonlari hamda etnik munosabatlarning o‘ ziga xos jihatlari o‘ rganilgan. 1989-yilgi Farg‘ ona voqealarining yuzaga kelishiga ta’sir etgan ijtimoiy-iqtisodiy va demografik omillar ilmiy manbalar asosida yoritilgan. Mahalliy tarixchi va etnolog olimlarning ilmiy xulosalari asosida vodiyda bag‘ rikenglik va etnomadaniy hamkorlikning tarixiy ildizlari ochib berilgan. Tadqiqot natijalari mustaqillik yillarida amalga oshirilgan millatlararo totuvlik siyosati hududda ijtimoiy barqarorlik va fuqarolar hamjihatligini mustahkamlashga xizmat qilganligini ko‘ rsatadi.*

Kalit so‘ zlar: *Farg‘ ona vodiysi, demografik jarayonlar, millatlararo munosabatlar, etnik jarayonlar, 1989-yil Farg‘ ona voqealari, etnomadaniy hamkorlik, bag‘ rikenglik, etnik barqarorlik, migratsiya omillari, millatlararo totuvlik siyosati.*

ИСТОРИЯ МЕЖНАЦИОНАЛЬНОГО СОГЛАСИЯ В ФЕРГАНСКОЙ ДОЛИНЕ В 80-90-Е ГОДЫ XX ВЕКА

Аннотация: *В данной статье с историко-этнологической точки зрения проанализированы процессы исторического развития межнационального согласия в Ферганской долине в 80-90-е годы XX века. В исследовании на основе историко-генетического, сравнительно-исторического и статистического методов анализа изучены состав населения, миграционные процессы, а также своеобразные аспекты межэтнических отношений. На основе научных источников освещены социально-экономические и демографические факторы, повлиявшие на возникновение Ферганских событий 1989 года. На основе научных выводов местных историков и этнологов раскрыты исторические корни толерантности и этнокультурного сотрудничества в долине. Результаты исследования показывают, что политика межнационального согласия, осуществлённая в годы независимости, служила укреплению социальной стабильности и гражданского единства в регионе.*

Ключевые слова: *Ферганская долина, демографические процессы, межнациональные отношения, этнические процессы, Ферганские события 1989 года, этнокультурное сотрудничество, толерантность, этническая стабильность, факторы миграции, политика межнационального согласия.*

THE HISTORY OF INTERETHNIC HARMONY IN THE FERGANA VALLEY IN THE 1980S–1990S

Abstract: *This article analyses, from a historical and ethnological perspective, the processes of the historical development of interethnic harmony in the Fergana Valley in the 1980s and 1990s. Using historical-genetic, comparative-historical and statistical methods of analysis, the study examines the composition of the population, migration processes and the distinctive features of interethnic relations. The socio-economic and demographic factors that influenced the emergence of the Fergana events of 1989 are discussed on the basis of scholarly sources. Drawing on the scholarly conclusions of local historians and ethnologists, the historical roots of tolerance and ethnocultural cooperation in the valley are revealed. The findings of the study show that the policy of interethnic harmony implemented during the years of independence has served to strengthen social stability and civic solidarity in the region.*

Keywords: *Fergana Valley, demographic processes, interethnic relations, ethnic processes, Fergana events of 1989, ethnocultural cooperation, tolerance, ethnic stability, migration factors, policy of interethnic harmony.*

Kirish

XX asrning 80-90-yillari Farg‘ ona vodiysi tarixida murakkab siyosiy, ijtimoiy va etnodemografik jarayonlar bilan tavsiflanadi. Ushbu davr sobiq SSSRning inqirozi, iqtisodiy tanglikning kuchayishi, migratsiya jarayonlarining faollashuvi va milliy o‘ zlikni anglash jarayonlarining jadallashuvi bilan xarakterlanadi. Mazkur omillar Farg‘ ona vodiysidagi millatlararo munosabatlarga bevosita ta’sir ko‘ rsatgan.

1980-yillarning o‘ rtalariga kelib Farg‘ ona vodiysi sobiq Ittifoqdagi aholi eng zich joylashgan hududlardan biriga aylandi. 1989-yilgi aholini ro‘ yxatga olish ma’lumotlariga ko‘ ra, Andijon viloyatida 1,9 mln, Namangan viloyatida 1,6 mln

va Farg‘ ona viloyatida 2,1 mln aholi istiqomat qilgan. Natijada vodiy aholisi 5,6 million kishidan oshib, O‘ zbekiston SSR aholisining qariyb 28 foizini tashkil etgan [1].

Mazkur davrda Farg‘ ona vodiysida o‘ zbeklar bilan bir qatorda tojiklar, qirg‘ izlar, ruslar, tatarlar, koreyslar, mesxeti turklari va boshqa millat vakillari yashagan. Ko‘ p millatli tarkibning shakllanishi tarixiy jarayon bo‘ lib, u uzoq davr davomida iqtisodiy va madaniy integratsiyani yuzaga keltirgan.

Tadqiqotning maqsadi XX asrning 80-90-yillarida Farg‘ ona vodiysidagi millatlararo totuvlik tarixini, uning saqlanishi va ayrim davrlarda yuzaga kelgan murakkab jarayonlarni tarixiy-etnologik nuqtai nazardan tahlil qilishdan iborat. Tadqiqot natijalari bugungi kunda millatlararo hamjihatlik siyosatining tarixiy ildizlarini tushunishga xizmat qiladi.

Tadqiqot metodologiyasi va o‘ rganilganlik darajasi:

Tadqiqotda tarixiylik va xolislik tamoyillari asosiy metodologik mezon sifatida qo‘ llanildi. Tarixiy-genetik usul yordamida 1980-1990-yillardagi etnik munosabatlarning shakllanish omillari va rivojlanish bosqichlari o‘ rganildi.

Qiyosiy-tarixiy usul orqali Farg‘ ona vodiysidagi etnik jarayonlar sobiq SSSRning boshqa ko‘ p millatli hududlari bilan taqqoslandi. Ushbu metod etnik ziddiyatlarning umumiy va o‘ ziga xos jihatlarini aniqlash imkonini berdi.

Statistik tahlil usuli asosida 1979 va 1989-yillardagi aholini ro‘ yxatga olish materiallari, O‘ zbekiston SSR Davlat statistika qo‘ mitasi ma’lumotlari hamda demografik ko‘ rsatkichlar o‘ rganildi. Mazkur metod yordamida aholi soni, migratsiya va etnik tarkibdagi o‘ zgarishlar aniqlashtirildi.

Milliy identiklik va etnik munosabatlar nazariyasini ishlab chiqishda Ernest Gellner, Benedik Anderson hamda Antony D. Smithning ilmiy qarashlari alohida ahamiyatga ega. Ernest Gellner millatchilikni industrial jamiyat mahsuli sifatida baholab, zamonaviy davlatlarning iqtisodiy va madaniy jihatdan bir xil kommunikativ makonga ehtiyoj sezishi natijasida milliy identiklik shakllanishini ta’kidlaydi. Uning fikricha, millatchilik millatlarni yaratadi, millatlar esa millatchilikning mahsuli hisoblanadi[2]. Gellner nazariyasi Farg‘ ona vodiysida XX asrning 80-yillarida demografik o‘ sish, urbanizatsiya va iqtisodiy transformatsiyalar etnik jarayonlarga qanday ta’sir ko‘ rsatganini tahlil qilishda muhim metodologik asos bo‘ lib xizmat qiladi.

B. Anderson esa millatni “tasavvur qilingan siyosiy hamjamiyat” sifatida izohlaydi. Olimning ta’kidlashicha, bir millat vakillari bir-birlarini shaxsan tanimasalar ham, o‘ zlarini yagona jamoa sifatida tasavvur qiladilar. Anderson milliy ongning shakllanishida matbuot, ommaviy axborot vositalari va umumiy axborot makonining rolini alohida ko‘ rsatadi [3]. Ushbu yondashuv Farg‘ ona vodiysida sovet davrida shakllangan umumiy siyosiy-madaniy makon hamda etnik guruhlar o‘ rtasidagi o‘ zaro munosabatlarni tahlil qilish imkonini beradi.

A. Smith etnosimvolizm nazariyasi orqali zamonaviy millatlar tarixiy xotira, umumiy afsonalar, ramzlar, an’analar va etnik meros asosida shakllanishini asoslab bergan. Uning fikricha, milliy identiklikni faqat zamonaviy siyosiy jarayonlar bilan izohlash yetarli emas, balki tarixiy-etnik meros ham muhim omil hisoblanadi [4]. Smitning konsepsiyasi Farg‘ ona vodiysidagi o‘ zbeklar, tojiklar, qirg‘ izlar va boshqa etnik guruhlar o‘ rtasida asrlar davomida shakllangan madaniy yaqinlik, tarixiy xotira va qo‘ shnichilik munosabatlarini o‘ rganishda muhim nazariy asos vazifasini bajaradi.

Shunday qilib, Gellnerning modernistik yondashuvi, Andersonning “tasavvur qilingan hamjamiyat” konsepsiyasi va Smithning etnosimvolizm nazariyasi Farg‘ ona vodiysidagi millatlararo munosabatlarni tarixiy-etnologik nuqtai nazardan kompleks tahlil qilish imkonini beradi. Ushbu nazariyalar yordamida 1980-1990-yillardagi etnik jarayonlar, identiklik masalalari va millatlararo totuvlik omillari ilmiy jihatdan izohlandi.

MDH olimlari orasida Markaziy Osiyodagi etnik jarayonlar va millatlararo munosabatlarni tadqiq etishda V.A. Tishkov, S.N. Abashin, V.I. Bushkov hamda D.V. Mikulskiylarning ilmiy ishlari alohida ahamiyat kasb etadi. V.A. Tishkov etnik ziddiyatlarni faqat milliy qarama-qarshilik mahsuli sifatida emas, balki ijtimoiy, iqtisodiy va siyosiy omillar bilan bog‘ liq murakkab jarayon sifatida baholaydi. Uning fikricha, postsovet hududidagi ko‘ plab etnik mojarolar aslida resurslar taqsimoti, migratsiya va siyosiy boshqaruv inqirozi bilan chambarchas bog‘ liq bo‘ lgan. Shu sababli Farg‘ ona vodiysidagi 1989-yil voqealarini ham faqat etnik omillar orqali izohlash ilmiy jihatdan yetarli emas.

Jumladan, S.N. Abashin Farg‘ ona vodiysida olib borgan etnografik tadqiqotlari asosida vodiy aholisining kundalik hayotida etnik mansublikdan ko‘ ra mahalliylik (mahalla, qishloq, hududiy identiklik) omili ko‘ proq ahamiyat kasb etishini ta’kidlaydi. Olimning fikricha, vodiyda o‘ zbeklar, tojiklar, qirg‘ izlar va boshqa etnik guruhlar o‘ rtasida uzoq tarixiy davr davomida shakllangan qo‘ shnichilik, qarindoshlik va xo‘ jalik aloqalari mavjud bo‘ lib, ular millatlararo totuvlikning muhim omili hisoblanadi [5]. Abashin etnik munosabatlarni o‘ rganishda mikroetnografik kuzatuv usulidan foydalanib, kundalik hayotdagi hamkorlik etnik tafovutlardan ustun turishini ilmiy asoslagan.

V.I. Bushkov va D.V. Mikulskiy esa Markaziy Osiyoda yuz bergan etnosiyosiy jarayonlarni tadqiq qilib, mintaqadagi keskinliklarning asosiy sabablaridan biri sifatida demografik o‘ sish, yer-suv resurslari taqchilligi va migratsion bosimni ko‘ rsatadilar. Ularning tadqiqotlarida Farg‘ ona vodiysi aholisi zich joylashgan hudud sifatida tavsiflanib, 1980-yillarda aholi sonining tez o‘ sishi ijtimoiy infratuzilmaga sezilarli bosim o‘ tkazgani qayd etiladi [6, 7]. Olimlarning xulosasiga ko‘ ra, etnik tus olgan ayrim mojarolar aslida uzoq vaqt davomida to‘ planib kelgan ijtimoiy-iqtisodiy muammolarning namoyon bo‘ lish shakli bo‘ lgan.

Shunday qilib, Tishkovning etnik konfliktlar nazariyasi, Abashinning Farg‘ ona vodiysidagi etnografik kuzatuvlari hamda Bushkov va Mikulskiyning migratsion-demografik jarayonlarga oid tadqiqotlari XX asrning 80-90-yillarida Farg‘ ona vodiysidagi millatlararo munosabatlarni kompleks tarixiy-etnologik tahlil qilish uchun muhim nazariy va metodologik asos bo‘ lib xizmat qiladi.

Mahalliy tarixchi va etnolog olimlar K. Shoniyozov, A.Asqarov, A.. Ashirov, D. Alimova, A. Sagdullaev hamda Ravshan Abdullaevlarning tadqiqotlari Farg‘ ona vodiysidagi etnik jarayonlarni tarixiy-etnologik jihatdan o‘ rganishda muhim ilmiy asos bo‘ lib xizmat qiladi. Karim Shoniyozov o‘ zining “O‘ zbek xalqining shakllanish jarayoni” monografiyasida Movarounnahr va Farg‘ ona hududlarida qadimdan yashab kelgan turkiy va eroniy etnik guruhlarning uzoq davom etgan iqtisodiy, madaniy hamda etnik aloqalari natijasida umumiy etnomadaniy makon shakllanganligini asoslaydi. Olimning xulosasiga ko‘ ra, o‘ zbek xalqining etnik taraqqiyoti mahalliy etnik negiz asosida kechgan bo‘ lib, qo‘ shni xalqlar bilan muntazam madaniy aloqalar etnik bag‘ rikenglikning tarixiy ildizlarini yaratgan [8].

A. Ashirovning etnologik tadqiqotlarida Farg‘ ona vodiysi aholisi orasida shakllangan qo‘ shnichilik, qarindoshlik va xo‘ jalik hamkorligi an’analari millatlararo munosabatlarning barqaror rivojlanishida muhim omil sifatida baholanadi. Uning fikricha, etnik guruhlar o‘ rtasidagi kundalik ijtimoiy munosabatlar, ayniqsa qishloq jamoalaridagi o‘ zaro yordam va hamkorlik tizimi etnik tafovutlarni yumshatib, umumiy hududiy identiklikning shakllanishiga xizmat qilgan [9].

D. Alimova Markaziy Osiyo xalqlari tarixiga bag‘ ishlangan tadqiqotlarida mintaqadagi etnik jarayonlarni tarixiy integratsiya va madaniy almashinuv mahsuli sifatida talqin qiladi. Tadqiqotchining ta’kidlashicha, Farg‘ ona vodiysi Buyuk Ipak yo‘ lining muhim markazlaridan biri sifatida turli etnoslar va madaniyatlarning uzluksiz muloqot maydoniga aylangan. Shu bois hududda etnik xilma-xillik bilan bir qatorda bag‘ rikenglik va madaniy moslashuv an’analari ham shakllangan [10].

A. Sagdullaevning ilmiy xulosalariga ko‘ ra, Farg‘ ona vodiysida etnik jarayonlarning shakllanishida geografik yaqinlik, sug‘ orma dehqonchilik tizimi va umumiy xo‘ jalik makoni muhim rol o‘ ynagan. Olim iqtisodiy hamkorlikning kuchli bo‘ lishi turli etnik guruhlarning bir hududda uzoq muddat tinch-totuv yashashiga zamin yaratganligini qayd etadi [11].

Tadqiqot natijalari:

1930-1940-yillarda Sovet Ittifoqi tomonidan amalga oshirilgan deportatsiya siyosati natijasida O‘ zbekiston, jumladan Farg‘ ona vodiysi ko‘ plab surgun qilingan xalqlarni qabul qilgan hududlardan biriga aylandi. Arxiv ma’lumotlariga ko‘ ra, 1937-yil oktabr-noyabr oylarida Uzoq Sharqdan O‘ zbekistonga 16 307 koreys oilasi yoki 74 500 kishi ko‘ chirildi. Ularning bir qismi Farg‘ ona vodiysi viloyatlariga joylashtirildi. 1938-yil 15-noyabr holatiga ko‘ ra Farg‘ ona viloyatining 64 ta kolxozida 1 130 ta koreys xo‘ jaligi joylashtirilgan bo‘ lib, 1939-yilgi aholini ro‘ yxatga olishda viloyatda 10 572 nafar koreys istiqomat qilgani qayd etilgan [12].

Ikkinchi jahon urushi yillarida deportatsiya siyosati yanada kengaydi. 1944-yilda Qrimdan ko‘ chirib keltirilgan aholi orasida qrim tatarlari, greklar, armanlar va bolgarlar ham bo‘ lgan. Arxiv hujjatlariga ko‘ ra, 1944-yil iyun holatida Farg‘ ona viloyatiga Qrimdan deportatsiya qilingan 3 958 oila yoki 16 175 kishi joylashtirilgan. Ularning 2 594 nafari erkaklar, 5 406 nafari ayollar va 8 175 nafari 16 yoshgacha bo‘ lgan bolalardan iborat edi. Bu aholi viloyatning 13 ta tumaniga taqsimlangan [13].

1944-yil noyabr oyida Stalinning qarori bilan Gruziyaning Mesxeti hududidan 115 mingdan ortiq mesxeti turklari, kurdlar va hamshinlar Markaziy Osiyoga deportatsiya qilindi. Ularning katta qismi O‘ zbekiston SSRga, ayniqsa Farg‘ ona vodiysi hududlariga joylashtirildi. 1989-yilgi Butunittifoq aholini ro‘ yxatga olish ma’lumotlariga ko‘ ra, SSSRdagi 207,5 ming mesxeti turkining 51 foizdan ortig‘ i O‘ zbekistonda yashagan va ularning asosiy qismi Farg‘ ona vodiysida istiqomat qilgan [14].

R.T. Shamsutdinov hamda D.A. Alimova deportatsiya qilingan xalqlarni joylashtirishda Farg‘ ona vodiysi iqtisodiy salohiyati va sug‘ orma dehqonchilik imkoniyatlari muhim omil bo‘ lganligi qayd etiladi. Tadqiqotchilar fikricha, mehnat resurslariga ehtiyoj mavjudligi sababli ko‘ chirib keltirilgan aholi asosan paxtachilik va qishloq xo‘ jaligi tarmoqlariga jalb qilingan [13].

V.A. Tishkov esa Sovet davridagi deportatsiyalarni etnik muhandislik siyosatining bir ko‘ rinishi sifatida baholaydi. Uning fikricha, deportatsiya qilingan xalqlar yashash joylaridan majburan uzib qo‘ yilgan bo‘ lsa-da, yangi hududlarda iqtisodiy faoliyatga jalb qilinishi natijasida mahalliy jamiyat bilan integratsiyalashuv jarayoni yuz bergan. Tishkov 1989-yilgi Farg‘ ona voqealarini tahlil qilib, ularning asosiy sabablari etnik ziddiyatdan ko‘ ra demografik bosim, iqtisodiy tanglik va resurslar taqsimotidagi muammolar bilan bog‘ liq ekanligini ta’kidlaydi [6].

Farg‘ ona vodiysida deportatsiya qilingan xalqlarning mahalliy aholi bilan uzoq muddatli iqtisodiy hamkorligi natijasida o‘ ziga xos etnomadaniy muhit shakllanganligini qayd etadilar. Ularning fikricha, XX asrning ikkinchi yarmida koreyslar va mesxeti turklari vodiyning qishloq xo‘ jaligi, savdo va xizmat ko‘ rsatish sohalarida faol ishtirok etib, mintaqaning ijtimoiy-iqtisodiy rivojlanishiga muhim hissa qo‘ shganlar.

1979-yilgi Butunittifoq aholini ro‘ yxatga olish ma’lumotlariga ko‘ ra, Farg‘ ona vodiysi viloyatlarida aholining yillik o‘ sish sur’ati 2,8-3,1 foizni tashkil etgan. Bu ko‘ rsatkich SSSR o‘ rtacha darajasidan deyarli ikki baravar yuqori bo‘ lgan. Natijada yer va ish o‘ rinlariga bo‘ lgan talab ortib bordi [15]. 1980-1988-yillarda vodiyning qishloq tumanlarida aholi zichligi ayrim hududlarda 1 km² ga 450-600 kishigacha yetgan. Demografik bosim iqtisodiy resurslardan foydalanishda muayyan qiyinchiliklarni yuzaga keltirgan bo‘ lsa-da, kundalik hayotda millatlararo hamkorlik saqlanib qolgan.

1989-yilgi aholini ro‘ yxatga olish natijalariga ko‘ ra, Farg‘ ona viloyatida o‘ zbeklar 82 foizdan ortiq, ruslar 7 foizga yaqin, tojiklar 4 foiz atrofida bo‘ lgan. Andijon va Namangan viloyatlarida ham o‘ zbeklar mutlaq ko‘ pchilikni tashkil etgan, biroq ko‘ plab boshqa etnik guruhlar ham yashagan.

1989-yil may-iyun oylarida Farg‘ ona viloyatida mesxeti turklari bilan bog‘ liq voqealar yuz berdi. Rasmiy ma’lumotlarga ko‘ ra, voqealar oqibatida 100 dan ortiq kishi halok bo‘ lgan, 1000 dan ortiq kishi turli darajada jarohatlangan va minglab oilalar vaqtinchalik ko‘ chirilgan. Tarixchilar ushbu voqealarning sabablarini faqat etnik omillar bilan emas, balki iqtisodiy va ijtimoiy tanglik bilan ham bog‘ laydilar.

Ixtilofni o‘ rganish komissiyasi tarkibida bo‘ lgan Akademik B. Axmedovning xulosalariga ko‘ ra, voqealar butun vodiy aholisi uchun xos bo‘ lgan etnik qarama-qarshilik emas, balki muayyan siyosiy va ijtimoiy sharoit mahsuli bo‘ lgan. Chunki voqealardan keyin ham aholining asosiy qismi o‘ zaro qo‘ shnichilik va xo‘ jalik aloqalarini saqlab qolgan. Akademik E. Yusupov: O‘ sha paytda O‘ zbekiston Fanlar akademiyasi vitse-prezidenti bo‘ lgan olim voqealarni joyiga borib o‘ rgangan va tahliliy maqolalar yozgan. U iqtisodiy inqiroz va ishsizlik bu fojeaning asosiy portlovchi kuchi bo‘ lganini ilmiy asoslab bergan [16].

1991-yilda O‘ zbekiston mustaqillikka erishgach, millatlararo totuvlik davlat siyosatining ustuvor yo‘ nalishiga aylandi. Konstitutsiyaning 18-moddasida barcha fuqarolarning millatidan qat’i nazar teng huquqliligi mustahkamlandi.

1990-yillar oxiriga kelib milliy madaniy markazlar faoliyatining rivojlanishi va davlat tomonidan qo‘ llab-quvvatlanishi natijasida vodiyda etnik hamkorlikning yangi institutsional shakllari vujudga keldi. Bu esa millatlararo munosabatlarning barqarorlashuviga xizmat qildi.

Muhokama:

Farg‘ ona vodiysidagi millatlararo totuvlik uzoq tarixiy taraqqiyot mahsuli ekanligini ko‘ rsatadi. XX asrning 80-yillarida yuzaga kelgan ayrim keskinliklar umumiy tarixiy tendensiyani inkor etmaydi. Statistik ma’lumotlar aholi sonining tez sur’atlarda o‘ sishi iqtisodiy infratuzilmaga katta bosim o‘ tkazganligini ko‘ rsatadi. Shu sababli etnik tus olgan ayrim mojarolarning ildizlari iqtisodiy muammolar bilan chambarchas bog‘ liq bo‘ lgan.

S.N. Abashinning fikricha, Farg‘ ona vodiysidagi etnik munosabatlarni faqat millatchilik nuqtai nazaridan izohlash ilmiy jihatdan to‘ liq emas. Chunki etnik guruhlar o‘ rtasidagi kundalik aloqalar va xo‘ jalik hamkorligi yuqori darajada saqlanib qolgan [17].

A. Ashirov etnografik materiallar asosida vodiy aholisi orasida qo‘ shnichilik, qarindoshlik va savdo aloqalari etnik chegaralardan ustun bo‘ lganligini ta’kidlaydi. Bu holat totuvlikning muhim omili sifatida namoyon bo‘ lgan [9].

Farg‘ ona vodiysidagi vaziyatning Kavkaz yoki boshqa hududlardagi etnik mojarolardan sezilarli farq qilganligini ko‘ rsatadi. Chunki mojaro uzoq davom etuvchi etnik qarama-qarshilikka aylanmagan. Mustaqillikdan keyingi siyosiy-huquqiy islohotlar va milliy madaniy markazlarning faoliyati tarixiy tajribadan to‘ g‘ ri xulosa chiqarilganligini ko‘ rsatadi. Natijada millatlararo munosabatlarning institutsional asoslari mustahkamlandi.

Xulosalar:

Birinchidan, XX asrning 80-90-yillarida Farg‘ ona vodiysi aholisi sonining keskin o‘ sishi va yuqori demografik bosim hududdagi ijtimoiy jarayonlarga sezilarli ta’sir ko‘ rsatgan. Aholi zichligining ortishi natijasida yer, uy-joy, ish o‘ rinlari va boshqa ijtimoiy-iqtisodiy resurslarga bo‘ lgan talab keskin kuchaydi. Ayniqsa, yoshlar sonining ko‘ payishi mehnat bozoridagi raqobatni yanada kuchaytirib, ayrim ijtimoiy muammolarning yuzaga kelishiga zamin yaratdi. Shu sababli mazkur davrda kuzatilgan ayrim ijtimoiy tangliklarni faqat etnik omillar bilan emas, balki murakkab demografik va iqtisodiy jarayonlar bilan ham izohlash zarur.

Ikkinchidan, tahlillar etnik munosabatlardagi ayrim murakkabliklarning asosiy sabablari iqtisodiy va demografik omillar bilan chambarchas bog‘ liq ekanligini ko‘ rsatdi. Tadqiqotlar natijalariga ko‘ ra, millatlararo munosabatlarda yuzaga kelgan ayrim ziddiyatlar ko‘ proq resurslar taqsimoti, bandlik masalalari, migratsiya jarayonlari hamda aholi sonining tez o‘ sishi bilan izohlanadi. Shuningdek, hududning ko‘ p millatli tarkibi va turli etnik guruhlarning tarixiy shakllanish jarayonlari ham mazkur munosabatlarning murakkab xususiyatlarini belgilagan. Shu bois etnik jarayonlarni baholashda ularni kengroq ijtimoiy-iqtisodiy kontekstda tahlil qilish muhim ahamiyat kasb etadi.

Uchinchidan, 1989-yilgi Farg‘ ona voqealari hududdagi millatlararo munosabatlarning umumiy holatini emas, balki muayyan davrdagi ijtimoiy-siyosiy tanglik va murakkab sharoitlarning natijasini aks ettirgan. Mazkur voqealar sobiq ittifoq davrining so‘ nggi bosqichida yuzaga kelgan siyosiy beqarorlik, iqtisodiy qiyinchiliklar hamda boshqaruv tizimidagi muammolar fonida sodir bo‘ lgan. Shu bilan birga, ayrim tashqi va ichki omillar ham vaziyatning keskinlashishiga ta’sir

koʻ rsatgan. Shuning uchun ushbu hodisalarni butun Fargʻ ona vodiysi aholisining millatlararo munosabatlariga xos doimiy holat sifatida emas, balki tarixiy sharoit bilan bogʻ liq istisnoiy voqea sifatida baholash maqsadga muvofiqdir.

Toʻ rtinchidan, mahalliy tarixchi va etnolog olimlarning ilmiy xulosalari Fargʻ ona vodiysida bagʻ rikenglik va etnomadaniy hamkorlik tarixiy an'ana sifatida shakllanganligini tasdiqlaydi. Asrlar davomida hududda turli millat va elatlar vakillari yonma-yon yashab, oʻ zaro iqtisodiy, madaniy va ma'naviy aloqalarni rivojlantirib kelgan. Buyuk Ipak yoʻ li chorrahasida joylashgan Fargʻ ona vodiysi xalqlar va madaniyatlar uchrashgan makon sifatida etnomadaniy xilma-xillikning shakllanishiga xizmat qilgan. Natijada hududda oʻ zaro hurmat, hamjihatlik va madaniy almashinuvga asoslangan munosabatlar tizimi vujudga kelgan boʻ lib, bu an'analar bugungi kunda ham oʻ z ahamiyatini saqlab qolmoqda.

Beshinchidan, mustaqillik yillarida amalga oshirilgan millatlararo totuvlik siyosati 1990-yillarning ikkinchi yarmidan boshlab hududda barqaror etnik munosabatlarning shakllanishiga xizmat qilgan. Davlat tomonidan barcha millat va elatlarning huquq hamda manfaatlarini ta'minlashga qaratilgan huquqiy-me'yoriy asoslar yaratildi, milliy madaniy markazlar faoliyati qoʻ llab-quvvatlandi va fuqarolar oʻ rtasida oʻ zaro hurmat tamoyillari mustahkamlandi. Shuningdek, ta'lim, madaniyat va jamoatchilik institutlari orqali bagʻ rikenglik gʻ oyalari keng targʻ ib qilindi. Natijada Fargʻ ona vodiysida turli etnik guruhlar oʻ rtasidagi hamkorlik va oʻ zaro ishonch kuchayib, hududning ijtimoiy-siyosiy barqarorligi ta'minlanishiga muhim hissa qoʻ shildi.

Foydalanilgan adabiyotlar:

1. 1989-yilgi Butunittifoq aholini roʻ yxatga olish ma'lumotlariga koʻ ra, Fargʻ ona vodiysida 5,48 mln aholi istiqomat qilgan boʻ lib, shundan 1,728 mln kishi Andijon, 1,602 mln kishi Namangan va 2,153 mln kishi Fargʻ ona viloyati hissasiga toʻ gʻ ri kelgan (Всесоюзная перепись населения 1989 года. Том 1. Часть 1. - Москва, 1990. - С. 22-25).

TILAB MAHMUDOV ILMIY MEROSINING PEDAGOGIK TAFAKKUR VA YOSHLAR TARBIYASIDAGI AHAMIYATI

Tursunova Laylo
Farg‘ona davlat universiteti katta o‘qituvchisi
falsafa fanlari bo‘yicha falsafa doktori (PhD)
E-mail: l.e.tursunova@
ORCID: https://orcid.org/0000-0002-7081-550X

Annotatsiya: *Ushbu maqolada Tilab Mahmudovning ilmiy merosi, uning pedagogik tafakkur rivojidagi o‘rni hamda yoshlar tarbiyasiga ko‘rsatgan ta’siri tahlil qilinadi. Muallifning ta’lim, ma’naviyat va estetik tarbiya haqidagi qarashlari zamonaviy pedagogik yondashuvlar bilan uyg‘un holda yoritiladi. Shuningdek, yosh avlodning ma’naviy-axloqiy kamolotida ilmiy merosning ahamiyati ochib beriladi.*

Kalit so‘zlar: *Tilab Mahmudov, pedagogik tafakkur, yoshlar tarbiyasi, ilmiy meros, ma’naviyat, estetik tarbiya, ta’lim, axloqiy kamolot.*

ЗНАЧЕНИЕ НАУЧНОГО НАСЛЕДИЯ ТИЛАБА МАХМУДОВА В ПЕДАГОГИЧЕСКОМ МЫШЛЕНИИ И ВОСПИТАНИИ МОЛОДЕЖИ

Аннотация: *В данной статье анализируется научное наследие Тилаба Махмудова, его роль в развитии педагогического мышления и влияние на воспитание молодежи. Освещаются взгляды ученого на образование, духовность и эстетическое воспитание в контексте современных педагогических подходов. Также раскрывается значение научного наследия в духовно-нравственном становлении молодого поколения.*

Ключевые слова: *Тилаб Махмудов, педагогическое мышление, воспитание молодежи, научное наследие, духовность, эстетическое воспитание, образование, нравственное развитие.*

THE IMPORTANCE OF TILAB MAHMUDOV’S SCIENTIFIC HERITAGE IN PEDAGOGICAL THINKING AND YOUTH EDUCATION

Abstract: *This article analyzes the scientific heritage of Tilab Mahmudov, his contribution to the development of pedagogical thinking, and his influence on youth education. The scholar’s views on education, spirituality, and aesthetic upbringing are highlighted in connection with modern pedagogical approaches. The article also reveals the importance of scientific heritage in the spiritual and moral development of the younger generation.*

Keywords: *Tilab Mahmudov, pedagogical thinking, youth education, scientific heritage, spirituality, aesthetic upbringing, education, moral development.*

KIRISH

“O‘z oldimizga qo‘ygan ulkan maqsadlarga erishish uchun biz tarbiya va ta’lim masalasini hech qachon e’tibordan chetda qoldirmasligimiz zarur. Chunki ma’naviy barkamol, mustaqil fikrlaydigan yosh avlod — Yangi O‘zbekiston poydevoridir”, — deb ta’kidlaydi Shavkat Mirziyoyev. Ushbu fikr zamonaviy pedagogik tafakkur va yoshlar tarbiyasi masalalarining naqadar dolzarb ekanini yaqqol ifodalaydi[1].

Zamonaviy ta’lim tizimida pedagogik tafakkur va ma’naviy tarbiya masalalari muhim ahamiyat kasb etmoqda. Yosh avlodni barkamol inson sifatida voyaga yetkazishda pedagogik qarashlar, milliy qadriyatlar va ma’naviy meros muhim o‘rin tutadi. Shu nuqtai nazardan, o‘zbek ilmiy-pedagogik tafakkuri rivojiga katta hissa qo‘shgan olimlardan biri Tilab Mahmudov hisoblanadi. Uning ilmiy merosi bugungi pedagogik qarashlar bilan uzviy bog‘liq bo‘lib, yoshlarning ma’naviy-axloqiy tarbiyasini shakllantirishda muhim nazariy asos vazifasini bajaradi[2].

Tilab Mahmudov o‘z ilmiy izlanishlarida ta’lim va tarbiyani inson kamolotining asosiy omili sifatida talqin qiladi. Unga ko‘ra, pedagogikaning bosh maqsadi — yosh avlodni nafaqat bilimli, balki ma’naviy yetuk va estetik didli inson

sifatida tarbiyalashdir[3]. Olimning pedagogik qarashlari markazida inson kamoloti, ma’naviy barkamollik hamda estetik tafakkurni rivojlantirish g‘oyalari turadi. Uning fikricha, haqiqiy pedagogika insonni faqat bilim bilan qurollantirish emas, balki uning qalbi, dunyoqarashi, axloqiy fazilatlari va go‘zallikni anglash qobiliyatini shakllantirishga xizmat qilishi kerak.

Mahmudov pedagogikani inson tafakkuri va ma’naviyati bilan chambarchas bog‘liq holda ko‘radi. Uning nazarida ta’lim inson ongini rivojlantiruvchi vosita bo‘lsa, tarbiya shaxsning axloqiy va ma’naviy qiyofasini shakllantiruvchi jarayondir. San’at va adabiyot esa yoshlarning estetik didini tarbiyalovchi muhim omil sifatida talqin qilinadi[4]. Bu qarashlar Sharq mutafakkirlari — Abu Nasr Forobiy va Ibn Sino pedagogik-falsafiy g‘oyalari bilan hamohangdir[5].

Adabiyotlar tahlili va metodologiya

Pedagogik tafakkur va ma’naviy tarbiya masalalari Sharq va G‘arb mutafakkirlari tomonidan keng tadqiq etilgan. Xususan, Abu Nasr Forobiy “Fozil odamlar shahri” asarida inson kamolotida ta’lim va tarbiyaning o‘rnini yoritgan bo‘lsa, Ibn Sino “Donishnoma” asarida axloqiy kamolot va ilmning uyg‘unligini asoslab beradi[5].

Zamonaviy o‘zbek pedagogik tafakkurida esa Tilab Mahmudovning ilmiy ishlari alohida o‘rin egallaydi. Uning “Estetika va tafakkur masalalari”, “Go‘zallik falsafasi” kabi asarlarida estetik ong, ma’naviy madaniyat va yoshlar tarbiyasining nazariy asoslari tahlil etilgan[3]. Shuningdek, pedagogik jarayonda san’at, musiqa va adabiyotning tarbiyaviy imkoniyatlari haqida muhim ilmiy qarashlar ilgari surilgan.

Bugungi kunda pedagogik tafakkur masalalari innovatsion texnologiyalar, interfaol metodlar va raqamli ta’lim vositalari bilan bog‘liq holda ham o‘rganilmoqda. Zamonaviy tadqiqotlarda yoshlarning mustaqil fikrlashi, kreativ tafakkuri va ma’naviy dunyosini rivojlantirish muhim pedagogik vazifa sifatida talqin qilinmoqda[6]. Pedagogik tafakkur va ma’naviy tarbiya masalalari Sharq va G‘arb mutafakkirlari tomonidan keng tadqiq etilgan. Xususan, Abu Nasr Forobiy “Fozil odamlar shahri” asarida inson kamolotida ta’lim va tarbiyaning o‘rnini yoritgan bo‘lsa, Ibn Sino “Donishnoma” asarida axloqiy kamolot va ilmning uyg‘unligini asoslab beradi[5]. Shuningdek, Sharq pedagogik tafakkurida insonni komil shaxs sifatida shakllantirish, uning ma’naviy va axloqiy kamolotini ta’minlash masalalari muhim o‘rin egallaydi. Mutafakkirlar ilm-ma’rifatni insonni yuksaltiruvchi asosiy kuch deb bilganlar hamda yosh avlodni tarbiyalashda odob, axloq, go‘zallik va ezgulik tushunchalariga alohida e’tibor qaratganlar.

G‘arb pedagogik tafakkurida ham inson kamoloti, estetik tarbiya va ta’limning ijtimoiy ahamiyati masalalari chuqur o‘rganilgan. Jumladan, Immanuel Kant insonning axloqiy ongini shakllantirishda estetik tafakkurning rolini yoritgan bo‘lsa, Georg Wilhelm Friedrich Hegel san’at va go‘zallikni inson ruhiy taraqqiyotining muhim omili sifatida talqin etadi. Bu qarashlar pedagogik tafakkurning nafaqat bilim berish, balki insonning ichki dunyosini boyitishga xizmat qiluvchi jarayon ekanini ko‘rsatadi.

Zamonaviy o‘zbek pedagogik tafakkurida esa Tilab Mahmudovning ilmiy ishlari alohida o‘rin egallaydi. Uning “Estetika va tafakkur masalalari”, “Go‘zallik falsafasi” kabi asarlarida estetik ong, ma’naviy madaniyat va yoshlar tarbiyasining nazariy asoslari tahlil etilgan[3]. Shuningdek, pedagogik jarayonda san’at, musiqa va adabiyotning tarbiyaviy imkoniyatlari haqida muhim ilmiy qarashlar ilgari surilgan. Olim yoshlar tarbiyasida milliy qadriyatlar va estetik madaniyat uyg‘unligini muhim omil sifatida baholaydi. Uning fikricha, san’at inson qalbini noziklashtiradi, ma’naviy olamini boyitadi hamda yoshlarning go‘zallikni his etish qobiliyatini shakllantiradi. Shu bois pedagogik faoliyatda musiqa, adabiyot va san’at vositalaridan samarali foydalanish yoshlarning ma’naviy barkamolligini ta’minlashda katta ahamiyat kasb etadi.

Tilab Mahmudov ilmiy merosida ustoz va shogird munosabatlari ham muhim pedagogik qadriyat sifatida talqin qilinadi. Olimning fikricha, ustoz shaxsiy namunasi, axloqiy fazilatlari va ma’naviy dunyosi bilan o‘quvchilar uchun ibrat bo‘lishi kerak. Chunki pedagogning ma’naviy qiyofasi yoshlarning tafakkuri va dunyoqarashi shakllanishiga bevosita ta’sir ko‘rsatadi. Bu qarashlar bugungi zamonaviy ta’lim tizimida ham dolzarb ahamiyat kasb etmoqda.

Bugungi kunda pedagogik tafakkur masalalari innovatsion texnologiyalar, interfaol metodlar va raqamli ta’lim vositalari bilan bog‘liq holda ham o‘rganilmoqda. Zamonaviy tadqiqotlarda yoshlarning mustaqil fikrlashi, kreativ tafakkuri va ma’naviy dunyosini rivojlantirish muhim pedagogik vazifa sifatida talqin qilinmoqda[6]. Ayniqsa, raqamli texnologiyalar va sun’iy intellekt vositalarining ta’lim tizimiga kirib kelishi pedagogik faoliyat mazmunini yangicha shakllantirmoqda. Endilikda pedagogdan nafaqat bilim berish, balki yoshlarni axborot oqimidan to‘g‘ri foydalanishga, mustaqil tahlil qilishga va kreativ fikrlashga yo‘naltirish talab etilmoqda.

Shuningdek, zamonaviy pedagogik tadqiqotlarda milliy va umuminsoniy qadriyatlar uyg‘unligini ta’minlash masalasi ham muhim o‘rin tutmoqda. Chunki globallashuv jarayonida yoshlarning ma’naviy immunitetini mustahkamlash, ularda milliy o‘zlikni anglash hissini rivojlantirish ta’lim tizimining ustuvor vazifalaridan biridir. Shu nuqtai nazardan, Tilab Mahmudovning pedagogik qarashlari va ilmiy merosi bugungi zamonaviy pedagogik konsepsiyalar bilan uyg‘unlashib, yoshlar tarbiyasida muhim nazariy va amaliy manba sifatida xizmat qilmoqda.

Mazkur maqolada Tilab Mahmudovning ilmiy merosini o‘rganishda tarixiylik, tizimli tahlil, qiyosiy-falsafiy va pedagogik yondashuv metodlaridan foydalanildi. Tadqiqot davomida olimning pedagogik qarashlari Sharq mutafakkirlari g‘oyalari hamda zamonaviy pedagogik konsepsiyalar bilan qiyosiy tahlil qilindi. Xususan, uning ta’lim, tarbiya,

ma’naviyat va estetik madaniyat haqidagi qarashlari Abu Nasr Forobiy, Ibn Sino kabi mutafakkirlarning ilmiy-falsafiy merosi bilan uyg‘unlikda tadqiq etildi.

Tadqiqotning metodologik asosini pedagogik tafakkur va ma’naviy tarbiya masalalariga oid ilmiy-nazariy qarashlar tashkil etdi. Shu bilan birga, zamonaviy ta’lim tizimida yoshlar ma’naviyatini shakllantirish, estetik ongni rivojlantirish hamda kreativ fikrlashni qo‘llab-quvvatlashga doir konseptual yondashuvlar ham tahlil qilindi. Tadqiqot jarayonida pedagogik tafakkurning yoshlar ma’naviyati va estetik madaniyatiga ta’siri nazariy jihatdan o‘rganildi.

Maqolada ilmiy bilishning analiz va sintez, induktiv va deduktiv, qiyoslash hamda umumlashtirish metodlaridan ham foydalanildi. Analiz usuli orqali Tilab Mahmudovning pedagogik qarashlari tarkibiy jihatdan tahlil qilinib, uning ta’lim va tarbiyaga oid asosiy g‘oyalari ajratib olindi. Sintez metodi yordamida esa ushbu qarashlarning zamonaviy pedagogik jarayon bilan bog‘liqligi umumlashtirildi.

Qiyosiy-falsafiy yondashuv asosida Sharq va G‘arb pedagogik tafakkurining o‘zaro uyg‘un hamda farqli jihatlari tahlil qilindi. Jumladan, estetik tarbiya, ma’naviy barkamollik va komil inson g‘oyalarining turli pedagogik maktablarda qanday talqin etilgani o‘rganildi. Bu esa Tilab Mahmudov ilmiy merosining universal pedagogik ahamiyatini ochib berishga xizmat qildi.

Tadqiqot davomida pedagogik adabiyotlar, ilmiy maqolalar, monografiyalar va falsafiy manbalar asosida manbashunoslik tahlili amalga oshirildi. Shuningdek, zamonaviy pedagogik texnologiyalar, innovatsion ta’lim usullari hamda raqamli ta’lim muhiti bilan bog‘liq ilmiy qarashlar o‘rganilib, ularning Tilab Mahmudov pedagogik qarashlari bilan bog‘liqligi yoritildi.

Mazkur metodologik yondashuvlar maqolaning ilmiy-nazariy asoslarini mustahkamlashga, Tilab Mahmudov merosining pedagogik tafakkur va yoshlar tarbiyasidagi ahamiyatini kengroq ochib berishga xizmat qildi.

Natijalar va muhokama

Tilab Mahmudovning ilmiy-falsafiy, estetik va badiiy merosi kompleks tahlil qilinib, uning pedagogik qarashlari inson ma’naviy kamoloti, estetik tarbiya va milliy qadriyatlar uyg‘unligiga asoslangan yaxlit pedagogik konsepsiyani tashkil etishi aniqlandi. Mazkur konsepsiyaning asosiy yo‘nalishlari quyidagilardan iborat:

- ta’lim va tarbiya uyg‘unligini ta’minlash;
- yoshlarning estetik didini rivojlantirish;
- milliy qadriyatlar asosida ma’naviy tarbiya berish;
- ijodiy va mustaqil fikrlashni shakllantirish;
- san’at va adabiyotning pedagogik imkoniyatlaridan foydalanish.

Tilab Mahmudovning pedagogik qarashlari nafaqat ilmiy-falsafiy asarlarida, balki badiiy ijodida ham o‘zining yorqin ifodasini topgan. Olimning “Go‘zallik va hayot” risolasida go‘zallik inson ma’naviy kamolotining muhim mezoni sifatida talqin qilinadi. Muallif estetik tarbiya insonning ruhiy olamini boyitishi, unda ezgulik, mehr-oqibat va insonparvarlik tuyg‘ularini shakllantirishini ta’kidlaydi. Ushbu qarashlar pedagogik nuqtai nazardan yosh avlodda estetik ong va didni rivojlantirish zarurligini asoslaydi.

“Mustaqillik va ma’naviyat” asarida esa Mahmudov yoshlarni milliy qadriyatlarga sodiq, vatanparvar va ma’naviy barkamol insonlar qilib tarbiyalash masalalariga alohida e’tibor qaratadi. Muallif mustaqillikni faqat siyosiy hodisa sifatida emas, balki inson tafakkuri va ma’naviy dunyosining erkinlashuvi sifatida talqin etadi. Bu esa ta’lim jarayonida milliy o‘zlikni anglash va ma’naviy mas’uliyat hissini shakllantirishning muhim pedagogik omili ekanligini ko‘rsatadi.

Olimning “Avesto”ga bag‘ishlangan tadqiqotlarida qadimgi ma’naviy meros, ezgulik va adolat g‘oyalari tahlil qilinadi. Mahmudov “ezgu fikr, ezgu so‘z va ezgu amal” tamoyillarini zamonaviy tarbiya tizimi uchun ham muhim metodologik asos sifatida baholaydi. Ushbu yondashuv yoshlarning axloqiy madaniyatini shakllantirishda muhim ahamiyat kasb etadi.

Tilab Mahmudovning badiiy ijodida ham kuchli pedagogik mazmun mujassam. Xususan, “Qaldirg‘och” she’rida inson va tabiat uyg‘unligi, mehr-muhabbat hamda sadoqat g‘oyalari ulug‘lanadi. Asarda yosh avlodni tabiatga ehtiyotkorona munosabatda bo‘lishga, go‘zallikni his etishga undovchi estetik-tarbiyaviy fikrlar ilgari suriladi.

“Abadiy do‘stlik” hikoyasida insoniy sadoqat, do‘stlik va o‘zaro hurmat qadriyatlari badiiy obrazlar orqali yoritiladi. Hikoya mazmuni yoshlarni halollik, ishonch va insoniy munosabatlarga hurmat ruhida tarbiyalashga xizmat qiladi. “Adolat” hikoyasida esa haqqoniylik, rostgo‘ylik va vijdon masalalari markaziy o‘rin egallaydi. Muallif adolatni inson kamolotining asosiy mezonlaridan biri sifatida talqin etadi.

“Oqar daryo oqmasmidi jimgina” hamda “Tanish odam” kabi asarlarida insonning ichki kechinmalari, hayotiy tajribasi va axloqiy tanlovlari tasvirlanadi. Ushbu asarlar yoshlarni mushohada qilishga, hayot hodisalariga mustaqil baho berishga va ma’naviy xulosalar chiqarishga undashi bilan pedagogik ahamiyat kasb etadi.

Tahlillar shuni ko‘rsatadiki, Tilab Mahmudov pedagogikasida ta’lim jarayoni faqat bilim berish bilan cheklanmaydi. U insonning ma’naviy dunyosini boyitish, estetik tafakkurini rivojlantirish va axloqiy fazilatlarini shakllantirishga

qaratilgan yaxlit tizim sifatida talqin qilinadi. Bu jihatdan uning qarashlari Abu Nasr Forobiy va Ibn Sinoning komil inson haqidagi g‘oyalari bilan uyg‘unlashadi.

Shuningdek, Mahmudov san’at va adabiyotni tarbiyaning kuchli vositasi sifatida baholaydi. Uning ilmiy va badiiy merosida go‘zallik, ezgulik, adolat, vatanparvarlik va ma’naviy barkamollik g‘oyalari yetakchi o‘rin tutadi. Shu bois olimning asarlari zamonaviy ta’lim tizimida yoshlar estetik madaniyatini yuksaltirish, mustaqil fikrlashni rivojlantirish hamda ma’naviy barkamol shaxsni tarbiyalashda muhim pedagogik manba sifatida xizmat qiladi.

Umuman olganda, Tilab Mahmudovning ilmiy va badiiy merosi pedagogik tafakkur, estetik tarbiya hamda ma’naviy kamolot masalalarini o‘zida mujassam etgan yaxlit konsepsiyani tashkil etadi. Bu konsepsiya bugungi ta’lim tizimini takomillashtirish va yosh avlodni komil inson ruhida tarbiyalashda muhim nazariy-amaliy ahamiyatga ega.

Xulosa.

Tilab Mahmudov merosi o‘zbek pedagogik tafakkurining muhim bosqichini tashkil etadi. Uning ta’lim, tarbiya va ma’naviy kamolot haqidagi qarashlari bugungi zamonaviy pedagogik konsepsiyalar bilan uyg‘unlashadi. Olimning ilmiy merosi yosh avlodning pedagogik ongini rivojlantirish, estetik didini shakllantirish hamda ularni ma’naviy barkamol inson etib tarbiyalashda muhim nazariy va amaliy ahamiyat kasb etadi.

Shuningdek, Mahmudovning pedagogik qarashlari yoshlarning ijodiy tafakkurini rivojlantirish, milliy qadriyatlarga hurmat ruhida tarbiyalash va zamonaviy ta’lim tizimini takomillashtirishda muhim ilmiy manba bo‘lib xizmat qiladi.

TURKISTONNING OZODLIGI VA MA'RIFATI UCHUN KURASH TARIXIDA MAHMUDXO'JA BEHBUDIYNING O'RNI HAQIDA

Sattorov Shokir Jabborovich
Termiz davlat pedagogika instituti mustaqil tadqiqotchisi (PhD)

Annotatsiya: *Ushbu maqolada Mahmudxo'ja Behbudiyning hayoti, adabiyotimiz tarixidagi tutgan o'rni, jadid hikoyachiligining yo'nalishini belgilashda, milliy dramaturgiyamiz asoschisi sifatida tahlil etilgan.*

Kalit so'zlar: *Turkiston, mudarris, Darg'om, qori, "Mehrobdan chayon" gazetasi, mirzo, tarjimon, adabiyot, Xoji Muin, hikoya, dramaturgiya, ozodlik, muharrir, jurnal, Fitrat, teatr, Samarqand.*

О МЕСТЕ МАХМУДХОДЖИ БЕХБУДИ В ИСТОРИИ БОРЬБЫ ЗА СВОБОДУ И ПРОСВЕЩЕНИЕ ТУРКЕСТАНА

Аннотация: *В данной статье анализируются жизненный путь Махмудходжи Бехбуди и его роль в истории нашей литературы — как основоположника национальной драматургии, определившего вектор развития современной повествовательной традиции.*

Ключевые слова: *Туркестан, мударрис, Даргом, кори, газета «Мехробдан чаён», мирза, переводчик, литература, Ходжи Муин, рассказ, драматургия, свобода, редактор, журнал, Фитрат, театр, Самарканд.*

ON THE PLACE OF MAHMUDKHOJ BEHBUDI IN THE HISTORY OF THE STRUGGLE FOR THE FREEDOM AND ENLIGHTENMENT OF TURKESTAN

Abstract: *This article analyzes the life of Mahmudhoja Behbudi, his role in the history of our literature, as the founder of our national dramaturgy in determining the direction of modern storytelling.*

Keywords: *Turkestan, mudarris, Dargom, qori, Mehrobdan Chayan newspaper, mirza, translator, literature, Khoji Muin, story, dramaturgy, freedom, editor, magazine, Fitrat, theater, Samarkand.*

Turkistonning ozodligi uchun kurash tarixida unutilmas sahifalarni ochgan ajdodlarimizdan biri, millat karvonboshisi, ulug' ma'rifatparvar, betakror salohiyat va taqdir sohibi Mahmudxuja Behbudiydir. U tug'ilgan paytda yurt chor Rossiyasi mustamlakasiga aylangan edi. Samarqand madrasalarida tolibi ilmlarga tahlil berib kelgan mudarrislar va ularning oila a'zolarini bosqinchilar qirg'in-qatag'onidan asrash maqsadida Zarafshon daryosi va uning irmoqlari hisoblangan Siyob hamda Darg'om kanallari bo'ylaridagi vaqf yerlarga ko'chiradilar.

Behbudiy afandi 6-7 yoshta kirgach, o'zining katta tog'asi Muhammad Siddiq huzurida o'qub xat va savodini chiqardi. So'ngra o'zining otasi Behbudxo'ja qori qildurmok, maqsadi bilan unga oz-oz Qur'on o'rgatib yodlata boshladi. 3-4 yil ichida Behbudiy afandi Qur'onni butun yodladi va ramazon kechalarida xatmlarta o'tub yurdi. Behbudiy afandi uch kechalik bir xatmda yolg'uz birgina xato qilton, derlar. Bu esa uning kuvvai hofizasi na darajada ekanligini ko'rsatadi.

Behbudiy afandi yolg'uz qorilik, bilan «qanoatlanmay, 15 yoshlarida o'zining tog'asi mufti mulla Odil huzurida dars o'qurga kirishdi. Arabiy sarfu nahvdan "Qofiya" va "Sharhi mullo"ni, mantiqdan "Shamsiya"ni, fiqhdan "Muxtasar ul-viqoya"ning birinchi daftarini va bir oz "Hoshiya"ni mazkur zotning halqai tadrisida o'qudi. Hisob ilmini ham (masohattacha) shul kishidan o'rgandi".[1] Behbudiyning o'zi Samarqand va Buxoro madrasalarida tahsil olganligini "Turkestanskiye vedomosti" gazetasi muxbiriga bergan intervyusida ta'kidlaydi. Bugungi nuqtai nazar bilan qaraganda, u oliy ta'- lim sistemasining kamida bakalavr va magistr darajasini yoqlagan. "Ustozi mufti mulla Odilning so'ziga ko'ra, Behbudiy afandi yoshlik, chog'ida o'tkur zehnlik va o'qushta juda havasliq bo'lg'on. Ustozining bir qatla o'rgatishi bilan saboqini o'rgana ekan. O'zi g'oyat halim, adablik, oz so'zlik va o'yin-kulguni sevmayturg'on bo'lg'on".[2]

[2] Юқоридаги асар.

Abdulla Qodiriyning “Mehrobdan chayon” asari qahramoni Anvar mirzolik vazifasida ishlardi. Fitrat, Ayniy, Qodiriy, Choʻlpon singari yoshlar ustozi Mahmudxoʻja Behbudiy ham ish faoliyatini mirzolikdan boshlagan. Oʻqib-oʻrganishga boʻlgan iqtidori tufayli oʻz davrining yuksak eʼtiborli lavozimi - muftilik rutbasiga erishdi. Unga munosib koʻrilgan muftilik musulmonlarda oliy lavozimli ruhoniy hisoblanib, diniy-huquqiy masalalarni izohlash, talqin etish borasida hal qiluvchi huquqqa egadir.

Albatta, bunday lavozim sohibi oʻz faoliyati davomida xalqning barcha qatlamlari vakillari bilan muloqotda boʻladi, demakki, kichik masalalardan yirik muammolargacha duch keladi, ularni qiyoslash, xulosa chiqarish va masalalarning yechimi nimada ekanligi toʻgʻrisida fikrlash imkoniga ega edi.

Albatta, mirzolik paytidan boshlab, Rossiyaning mahalliy xalq uchun yoʻriqnomasi - "Turkiston viloyatining gazeti"ni oʻqib borar, oqposhsho va uning siyosatini kuzatardi. Lekin dunyoqarashining kengayishida Rossiya hududida jadidchilik harakatiga asos solgan mashhur maʼrifatparvar Ismoilbek Gaspirali muharrirligida chop etilgan "Tarjimon" gazetasining oʻrni alohida ekanligini Behbudiy ham, uni bilgan insonlar ham taʼ- kidlashgan. Hoji Muin tili bilan aytganda, "Turkiston" gazetasining musulmonlarni atfol etish maqdadi bilan yozaturton soʻzlarini tushuna boshlaydi va oʻzigʻa uchragʻon yoru doʻstlarini mustabid hukumatning buzuq maqsadidan ogohlanturadi".[3]

Xalqimizda dunyoni anglash uchun koʻp oʻqish yoki dunyo kezish kerakligi haqida naql bor. Behbudiy faqat oʻqibgina qolmadi, balki ikkisini-da amalga oshirdi. “1318 sanai hijriyasi tavofi Baytulloga Kafkaz yoʻli ila Istanbul va Misr al-Qohira vositasila borib edim. Muddati safarim sakkiz oydan ziyoda choʻzilub edi”.[4]

Bugungi dorilamon kunlarda "Adabiyot yashasa — millat yashar" degan gaplar koʻpchilikning tiliga tushib, ixlosmandlarning diliga jo boʻldi. XX asr boshlarida esa adiblarni toʻgʻri tarbiyalab, ularning qoʻliga qalam tutqazish, adabiyot orqali oʻzlikni anglashga va oqibat xalqni ozod boʻlishga daʼvat etish jadidlarning orzularidan edi.

Adabiyotshunoslar Behbudiyni milliy dramaturgiyamiz asoschisi deb biladilar. Biroq uning jadid hikoyachiligining yoʻnalishini belgilashda ham ilk mashqi bilan yosh adiblarga namuna boʻlgani, ularga murojaat qilganiga tarix guvohlik bermoqda. Mazkur hikoya “Oq yelpogʻichli chinli xotun” deb nomlanadi. Adib unga “Tasodif” degan kirish soʻzi va soʻngsoʻz oʻrnida “Intiho” deb nomlangan izoh yozgan. Behbudiyning publisistik va muharrirlik faoliyati bilan shugʻullanib, uning maqolalaridan ozodlikka erishish gʻoyalarini, aniqrogʻi, jiddiy, siyosiy daʼvatu harakatlarni aniqlab, taʼqib va tahqirlarga qaramasdan kurashgani, hayotining ayanchli yakunidan qaygʻuga tushib yurgan kezlarimizda eski gazeta taxlamlaridan (“TVG”, 1909 yil, 12-son) shu ajib asarga, bir qarashda Behbudiyga xos boʻlmagan faoliyatga duch kelib, hayratda qolgandik. Oʻshanda adabiyot taratadigan nurafshon ruh, ato etadigan betakror zavqni tuyganmiz. Hikoya asosini dunyo kezayotgan faylasufning qabristondagi hali tuprogʻi qurimagan yangi qabrni oq yelpigʻichi bilan yelpiyotgan juvonni uchratishi va bu notabiiy harakat sinoatini topishga harakat tashkil etadi. Bu goʻzal hikoyani siz ham bir bor oʻqishingizni istadik.

Behbudiy hikoyaga yozgan “Tasodif” deb nomlangan kirish soʻzida oʻgʻli Masʼudxoʻja bilan turli darsliklar va boshqa badiiy adabiyotlar mutolaa qilayotganda ushbu hikoyaga duch kelganini aytadi. Atoqli adabiyotshunos olim Begali Qosimov ana shu fikrlarga asosan “Behbudiy asli xitoy adabiyotidan olingan ushbu hikoyani oʻz qalbi va qalami bilan oʻzbek oʻquvchisiga taqdim etmoqchi boʻladi”, deb yozadi. Shundan boʻlsa kerak, asar jadid hikoyachiligida asosiy oʻrinda tilga olinmaydi. Holbuki, xorijiy ellar, elatlarni tasvirlash usulidan jadidlar koʻp bora foydalanishgan. Masalan, Fitratning “Sayyohi hindi” asari fikrimizga dalil boʻla oladi.

Xulosa shulki, Behbudiyning “Ok, yelpogʻichli chinli xotun” hikoyasi jadid hikoyachiligining boshlanishidir.[5]

Sadriddin Ayniy “1908 ynchi yildan oʻz idorasinda biron gazeta chiqarmok, fikrigʻa tushub, 1913 inchi yil aprel oyinda bu maqsadiga yetishub “Samarqand” gazetasining bir necha raqamini chiqarishga muvaffaq boʻlgʻon” (Mahmudxoʻja Behbudiy hazratlarining qisqacha tarjimai holi // «Mehnat- kashlar tovushi» gazetasi, 1920 yil, 8 aprel) deb yozadi, arxivdagi (Oʻzbekiston Respublikasi Markaziy davlat arxivi, 18-fond, 1-roʻyxat, 8752-ish) maʼlumotlar ham bu fikrlarni isbotlaydi. Shu oʻrinda yozilgan arizalarda Mahmudxoʻja Behbudiyning imzolari saqlanganligini taʼkidlash joiz.

Abdulla Avloniyning kichik sarlavhadagi fikriga kyelsak, darha- qiqat, “Samarqand” oʻzidan avval chiqqan nashrlardan farq qiladi. Bunda Behbudiyning matbuot sohasidagi toʻplagan tajribalari qoʻl kelgan. Gazetaning oʻzgachaligiga birinchi dalil shuki, bu kungacha hech bir nashr uch tilda chiqqan emas. Oʻz davrining taraqqiyparvari va donishmandi boʻlgan Behbudiy gazetani faqatgina oʻzbek tilida chiqarib, forscha soʻzlashadigan xalqlarni ham eʼtibordan chetda qoldira olmasdi. Noshir va muharrir “Samarqand”ning 36-sonidagi maqolasida gazetani nega uch tilda chop etayotganini shunday izohlagan: “Samarqand jaridasi oʻzbekiy, forsiy va rusiy tillarida va Turkistonning oʻrta shevasinda taʼsis etilib turib edi. Mundan maqsad shul ediki, Bahri Hazardan boshlab janubdagi Afgʻoniston fasili, Amu nahri oʻrtasindaki vaseʼ arosigʻa sokin turk va tojik birodarlarimizgʻa bir qadar toqat hidmat etmak va alarni holigʻa va ijobati

asriya, vaqoyi' zamoniyada va Russiya kulturi, ilmi, hunari va sanoatga oshino bo'lishlarig'a ojizona tashviq etmoqdin iborat edi. Maktab bo'lsun, Madrasa bo'lsun, isloh va taraqqiysiga yordam uchun xalqni da'vat etmoq edi. Fosid urf va botil rasmlarni, yomon odatlarni shar'an islohiga qo'shish etmoq, edi".[6]

Muharrir istilohi Navoiy asarlari lug'atida "yozuvchi, tahrir qiluvchi" ma'nosini berishi ta'qiqlanadi. Biroq XX asr boshiga kelib muharrir faqat yozib, tahrir qiladigan emas, balki tahrirdan o'tgan xabar va maqolalarning gazetada berilishini boshqaradigan, muallif jalb etadigan, yana bir qancha vazifalarni bajaradigan mas'ul shaxs darajasiga chiqqandi. Mahmudxo'ja Behbudiy esa Sharqu G'arb tushunchasidagi muharrirning vazi- fasini bemalol bajara oladigan inson edi. Ayniqsa, o'zining qalamiga mansub maqolalarda muharrir nuqtai nazari bilan qarab, qisqa va lo'nda shaklda yozganligini ko'ramiz. "Tahlil oyi", "Millatlar qanday taraqqiy etarlar?", "Ehtiyoji millat" kabi ko'pgina maqolalari fikrimizga dalildir.

"Samarqand"da Munavvar qori Abdurashidxonov, Abdurauf Fitrat, Hoji Muin singari yana ko'plab zamonasining yetuk ma'rifatparvarlari o'z ijodlari bilan ishtirok etgan.[7]

Jurnal sahifalari davrning yangicha yashashga ishtiyoqmand, ozodlik orzusida ziyolilar uchun fikr aytish maydoniga aylanadi. Abdurauf Fitrat, Saidrizo Alizoda, Tavallo, Siddiqiy-Ajziy, Hoji Muin, Mahmud Tarziy (Afg'aniston), Sadriddin Ayniy singari ko'plab ijodkorlar qalamlari shu nashrda sayqal topdi.

Jurnalning dovrug'i yetti iqlimga yetmagan bo'lsa-da, uni Rossiya va yaqin Sharq davlatlari musulmonlari mutolaa qilishgani to'g'risida ma'lumot bizgacha yetib kelgan. "Oyina" Turkistondan boshqa Totoriston, Kofkoz, Afg'anistan, Eron, Turkiya va Misrgacha tarqalar va har yerda suyib o'qilur edi".[8]

1918 yilda Toshkentda Fitrat tashabbusi bilan "Chig'atoy gurungi" adabiy-madaniy uyushmasi maydonga keldi va Cho'lpon, Botu, Elbek, G'ozi Yunus, G'ulom Zafariy, Mannon Uyg'ur, Qayum Ramazon kabi fan va madaniyatimizning yorqin iste'dodlarini o'z atrofiga to'pladi. Bor-yo'g'i bir yarim yilcha faoliyat ko'rsatgan ushbu uyushma-jamiyat til-imlo qoidalarini ishlab chiqishda, adabiyot tarixini o'rganish, sistemalashtirishda, teatrchilikni yuksaktirishda katta ishlar qildi. Biroq, bunday milliy-madaniy tiklanish yo'llari tobora yopila bordi. Va madaniy-adabiy hayot ham sekin-asta siyosat izmiga tushib qoldi.

PHILOSOPHICAL

MANFAATLAR DIALEKTIKASI VA IJTIMOIY ZIDDIYATLAR FENOMENI

Islomov Sharof Abdurahmonovich
Namangan davlat universiteti tadqiqotchisi

Annotatsiya: *Maqolada zamonaviy raqamli-kommunikativ sharoitda kuzatilayotgan ijtimoiy ziddiyatlarning kelib chiqish sabablari, ularni tadqiq etishning falsafiy-metodologik asoslari tahlil etiladi. Ish doirasida M.N. Rutkevichning subyektlarga asoslangan tipologik modeli ko‘rib chiqiladi, E. Dyurkgeym, G. Zimmel, P. Blau va M. Mossning ijtimoiy o‘zaro ta’sirga oid klassik nazariyalari qiyoslanadi, shuningdek muallifning “manfaatlar → ziddiyat → taraqqiyot” konseptual modeli SMART mezonlari orqali sinovdan o‘tkaziladi. A.Ya. Antsupov va S.B. Davletchinaning axborotiy ziddiyatga oid ta’riflari o‘zaro solishtirilib, zamonaviy jamiyatda ziddiyatlarning yetti pog‘onali (individual, shaxslararo, guruhiy, jamiyat miqyosidagi, ijtimoiy-siyosiy, axborot makoni va global) tizimi ishlab chiqiladi. Xulosada ta’kidlanishicha, mazkur ziddiyatlar mintaqaviy hamkorlik va barqaror taraqqiyot masalalaridan izolyatsiyalangan holda o‘rganilishi mumkin emas.*

Kalit so‘zlar: *ijtimoiy ziddiyat; konfliktologiya; manfaatlar dialektikasi; axborotiy ziddiyat; SMART-model; tarmoq jamiyati; geosiyosat; mintaqaviy xavfsizlik.*

ДИАЛЕКТИКА ИНТЕРЕСОВ И ФЕНОМЕН СОЦИАЛЬНЫХ КОНФЛИКТОВ

Аннотация: *В статье анализируются причины возникновения социальных конфликтов в современных условиях цифровой коммуникации, а также философско-методологические основы их исследования. Рассматривается типологическая модель М.Н. Руткевича, сопоставляются классические теории социального взаимодействия Э. Дюркгейма, Г. Зиммеля, П. Блау и М. Мосса, а также апробируется авторская модель “интересы → конфликт → развитие” посредством критериев SMART. Сравниваются определения информационного конфликта А.Я. Анцупова и С.Б. Давлетчиной, разрабатывается семиуровневая система конфликтов в современном обществе.*

Ключевые слова: *социальный конфликт; конфликтология; диалектика интересов; информационный конфликт; SMART-модель; сетевое общество; геополитика; региональная безопасность.*

THE DIALECTIC OF INTERESTS AND THE PHENOMENON OF SOCIAL CONFLICTS

Abstract: *The article examines the causes underlying social conflicts under contemporary digital-communicative conditions, together with the philosophical-methodological foundations for their study. It considers M.N. Rutkevich’s subject-based typological model, compares the classical social-interaction theories of E. Durkheim, G. Simmel, P. Blau, and M. Mauss, and tests the author’s “interests → conflict → development” model against SMART criteria. The definitions of information conflict offered by A.Ya. Antsupov and S.B. Davletchina are compared, and a seven-level system of conflicts in contemporary society is developed. The conclusion holds that such conflicts cannot be studied in isolation from questions of regional cooperation and sustainable development.*

Keywords: *social conflict; conflictology; dialectic of interests; information conflict; SMART model; network society; geopolitics; regional security.*

KIRISH

Jamiyat a’zolarini bog‘lovchi ijtimoiy munosabatlar tizimi qanday tartibga solinishidan qat’i nazar, bu tizim tegishli institutlarsiz o‘z-o‘zidan mavjud bo‘la olmaydi; institutlar esa, o‘z navbatida, aynan mana shu munosabatlarni tartibga solish orqali ijtimoiy boshqaruvning bosh vazifasini bajaradi. Har bir shaxs va guruh o‘ziga xos manfaatlar tashuvchisi sifatida ijtimoiy aloqalarga kirishar ekan, mazkur manfaatlarning xilma-xilligi — ziddiyatlarning tabiiy manbai sifatida — ijtimoiy hayotning ajralmas tarkibiy unsuriga aylanadi. Demak, ziddiyatlarning ildizini izlash uchun, avvalo, jamiyatning institutsional-normativ tuzilishiga va unda kechayotgan manfaatlar kurashiga murojaat etish lozim.

Mavzuning ilmiy dolzarbligi shu bilan izohlanadiki, zamonaviy raqamli-axborot muhiti sharoitida ijtimoiy ziddiyatlarning ichki tabiati tubdan yangilanmoqda: axborot oqimlarining tezlashuvi, raqamli vositalarning ommalashuvi va ijtimoiy aloqalarning transmilliylashuvi ziddiyatlarga xos yangi ko‘rinishlarni keltirib chiqarmoqda. An’anaviy konfliktologik nazariyalarning izohlash salohiyati bunday yangi ko‘rinishlarni to‘liq qamrab olishga yetarli emas, shu

sababli axborotiy omillarni ham hisobga oluvchi yangicha kontseptual apparat zarur bo‘lib qolmoqda. Shundan kelib chiqib, mazkur maqolaning maqsadi quyidagilardan iborat: ziddiyatlarni tasniflashning mavjud yondashuvlarini tanqidiy ko‘rib chiqish; “manfaatlar → ziddiyat → taraqqiyot” nomli original modelni SMART mezonlari yordamida asoslash; axborotiy ziddiyat tushunchasining tarixiy-nazariy evolyutsiyasini kuzatish; hamda zamonaviy jamiyatda ziddiyatlarning ko‘p pog‘onali tizimini ishlab chiqish.

TADQIQOT METODOLOGIYASI

Ishda quyidagi metodologik vositalar qo‘llanildi: tizimli-strukturaviy tahlil, tipologik-qiyosiy usul va SMART-baholash metodikasi. Nazariy poydevorni M.N. Rutkevichning subyektlar mezoniga asoslangan tasnifi, klassik sotsiologlar (E. Dyurkgeym, G. Zimmel, P. Blau, M. Mauss) va zamonaviy konfliktolog-mutaxassislar (A.Ya. Antsupov, S.B. Davletchina, A.A. Plotnikov, E.G. Solovyov, S.A. Danilov, V.N. Porus) asarlari tashkil etdi. Bundan tashqari, mahalliy ilmiy maktab vakillarining dissertatsion ishlari (R.Z. Jumayev, U.A. Ubaydullayev, B.A. Xo‘janov, Q.P. Qabulov, Sh. Hasanov, O. Toshev, B.I. Nazaraliyev, K.A. Yuldashev, F.T. Xoldarova, B.T. Kuyliev, M.Sh. Boymirzayeva, G.S. Ro‘ziyeva, N. Zikirova) kontent-tahlil yordamida umumlashtirildi. Muallif ishlab chiqqan “manfaatlar → ziddiyat → taraqqiyot” modelining ilmiy-amaliy salohiyatini tekshirish uchun SMART (Specific — aniqlik, Measurable — o‘lchovlilik, Achievable — erishiluvchanlik, Relevant — dolzarblik, Time-bound — vaqt chegarasi) mezonlari tizimi qo‘llanildi.

NATIJALAR VA MUHOKAMA

Ziddiyatlarni tasniflashning tipologik va strukturaviy asoslari

Ilmiy adabiyotda ziddiyatlarni tasniflash mezonlari bo‘yicha yagona pozitsiya mavjud emas. M.N. Rutkevich tomonidan ishlab chiqilgan tipologiya subyektlar tarkibini asosiy mezon sifatida oladi va shu asosda to‘rt turni farqlaydi: jamiyat miqyosidagi subyektlar o‘rtasidagi ziddiyatlar, etnik guruhlararo ziddiyatlar, ijtimoiy guruhlar o‘rtasidagi ziddiyatlar hamda jamiyat ichki tarkibidagi turli subyektlar o‘rtasidagi qarama-qarshiliklar. Ushbu yondashuvning afzalligi shundaki, u tahlilni subyektlararo aloqadorlik nuqtai nazaridan tizimlashtiradi; ammo shu bilan birga, ziddiyat kelib chiqishining chuqur mexanizmlarini — ijtimoiy vaziyat, tomonlarning maqsad-manfaatlari va boshqa ko‘p sonli o‘zgaruvchilarni — to‘liq izohlay olmaydi.

Shu sababdan ziddiyat hodisasini subyekt bilan subyekt o‘rtasidagi munosabatning alohida shakli sifatida qarab, strukturaviy tahlil metodini qo‘llash muhim ahamiyat kasb etadi: bunda ziddiyat sub’ektlari, ziddiyat predmeti (obyekti), tomonlarning foydalanadigan vositalari va yakuniy natija kabi tarkibiy unsurlar alohida-alohida o‘rganiladi. Etimologik jihatdan arab tilidan kirib kelgan “ziddiyat” so‘zi o‘zbek tilining izohli lug‘atida dushmanlik, qarshi chiqish, o‘zaro xiloflik va fikriy qarama-qarshilik ma’nolarini ifodalaydi — bu esa hodisaning nafaqat ochiq to‘qnashuv, balki nozik fikriy-ma’naviy farqlanish shaklida ham namoyon bo‘lishi mumkinligini ko‘rsatadi.

Muallif modeli: “manfaatlar → ziddiyat → taraqqiyot” va uning SMART-asoslanganligi

Ijtimoiy ziddiyat — bu jamiyat holatini ifodalovchi tushuncha bo‘lib, uning mohiyati turli subyektlarning manfaatlar to‘qnashuvida namoyon bo‘ladi. Faraz qilaylik, jamiyatdagi barcha guruhlarning manfaati bir-biriga to‘liq mos kelsa — bunday holatda “ziddiyat” kategoriyasi o‘z ilmiy mazmunini yo‘qotgan bo‘lardi; biroq amaliyotda bunday ideal muvofiqlik kuzatilmaydi. Muallif nazdida, “manfaatlar → ziddiyat → taraqqiyot” ketma-ketligi jamiyat evolyutsiyasini chiziqli emas, balki dialektik jarayon sifatida talqin qilishga xizmat qiladi, va aynan zamonaviy axborot-kommunikatsiya sharoitida manfaatlarning tez o‘zgaruvchanligi hamda ziddiyatlarning raqamli makonda tezlashib ketishi ushbu modelning amaliy qiymatini yanada oshiradi.

1-jadval. Muallifning “manfaatlar → ziddiyat → taraqqiyot” modeliga nisbatan SMART-baholash

Mezon	Manfaatlar bosqichi	Ziddiyat bosqichi	Taraqqiyot bosqichi
Aniqlik (S)	Subyektlarning moddiy, ma’naviy va axborotiy ehtiyojlari namoyon bo‘ladi	Ehtiyojlar nomutanosibligi asosida qarama-qarshilik shakllanadi	Qarama-qarshilikni tartibga solish yangilanishga xizmat qiladi
O‘lchovlilik (M)	Manfaatlar tafovuti resurs, mavqe va axborot ko‘rsatkichlari orqali baholanadi	Norozilik va to‘qnashuv darajasi kuzatiladi	Islohotlar va barqarorlik ko‘rsatkichlari orqali o‘lchanadi
Erishiluvchanlik (A)	Manfaatlar xilma-xilligi har qanday jamiyat uchun tabiiy holat	Ziddiyat ijtimoiy tizim uchun muqarrar bosqich	Konstruktiv boshqaruv orqali taraqqiyot mumkin bo‘ladi

Dolzarblik (R)	Manfaatlar raqamli sharoitda tez o‘zgaradi	Axborot muhiti ziddiyatni tezlashtiradi	Barqaror taraqqiyot strategik zarurat sifatida namoyon bo‘ladi
Vaqt omili (T)	Manfaatlar tarixiy sharoitga ko‘ra uzluksiz yangilanadi	Ziddiyat muddati qisqa yoki uzoq bo‘lishi mumkin	Taraqqiyot bosqichma-bosqich, davomiy jarayondir

Keltirilgan SMART-baholash “manfaatlar → ziddiyat → taraqqiyot” ketma-ketligini bashorat qilinishi mumkin bo‘lgan, tizimli ijtimoiy jarayon sifatida talqin qilish imkonini beradi. Muhim jihati shundaki, manfaatlar murosasi ularning yo‘qolishini emas, balki ziddiyatlarning oldini olish va tomonlar o‘z manfaatini saqlagan holda barqarorlikka erishishni anglatadi.

Klassik konfliktologiyaning nazariy merosi: Dyurkgeym, Zimmel, Blau, Mauss

Jamiyat va shaxs o‘rtasidagi bog‘liqlikni ilmiy asoslashda klassik sotsiologiya maktabi muhim rol o‘ynagan, bunda E. Dyurkgeymning hissasi alohida ajralib turadi: u jamiyatni ijtimoiy birdamlikka asoslangan, o‘zaro ta’sir mexanizmi orqali funksiyalashuvchi tizim sifatida talqin qildi. Ushbu o‘zaro ta’sir, tabiiyki, muayyan keskinlikdan xoli bo‘lmaydi — unda subyektiv huquqlarni himoya qilish, raqobat va bellashuv unsurlari doimiy ravishda mavjud bo‘ladi. Xuddi shunday, “raqobatlashgan” ijtimoiy o‘zaro ta’sir mexanizmi G. Zimmel, P. Blau va M. Mauss tomonidan ham chuqur o‘rganilgan bo‘lib, ularning umumiy xulosasi shundan iboratki, bunday o‘zaro ta’sir mohiyat e’tibori bilan almashinuv munosabatlariga asoslanadi.

Axborotiy ziddiyat kontseptiga oid tor va keng talqinlar

Zamonaviy konfliktologik lug‘atlarda “axborotiy ziddiyat” atamasi turlicha talqin etiladi. A.Ya. Antsupov bu hodisani axborotni ishlab chiqarish va tarqatish jarayonida yuzaga keladigan, subyektlaridan biri jurnalist yoki OAV bo‘lgan ijtimoiy ziddiyat sifatida belgilaydi — bunday ta’rif faqat kasbiy-media doirasi bilan chegaralanganligi tufayli nisbatan tor xarakterga ega. Bundan farqli o‘laroq, S.B. Davletchina kengroq talqinni taklif etadi: uning fikricha, axborotiy ziddiyat — axborot oqimlarini nazorat qilish, axborot makonini egallash va undan shaxsiy manfaat yo‘lida foydalanishga, shuningdek raqib tomonning axborotiy manfaatlarini cheklashga qaratilgan qarama-qarshilik shaklidir.

Davletchinaning ushbu talqini zamonaviy sharoitda ziddiyatning sifat jihatdan yangi bosqichga ko‘tarilganini ko‘rsatadi: axborot endi oddiy muloqot vositasi emas, balki strategik ahamiyatga ega resurs bo‘lib, u ustidan nazorat o‘rnatish uchun kurash ziddiyatlarning yetakchi manbalaridan biriga aylanmoqda. E.G. Solovyov shaxslararo aloqalar tabiatining o‘zgarishini qayd etib, qisqa muddatli kontaktlarning uzoq muddatli qarindoshlik-do‘stlik aloqalarini siqib chiqarayotganini ta’kidlaydi. S.A. Danilov ijtimoiy tarmoqlardagi jamoalarning shunchaki muloqot maydoni emas, balki norozilik kayfiyati va norasmiy safarbarlik o‘chog‘iga aylanib borayotganini ko‘rsatadi, V.N. Porus esa axborot hajmi ortishi bilan parallel kechayotgan ma’naviy qashshoqlanishning yangi axloqiy ziddiyatlarni tug‘dirishini ta’kidlaydi.

Zamonaviy jamiyatda ziddiyatlarning ko‘p pog‘onali arxitekturasi

O‘tkazilgan tahlil shuni ko‘rsatadiki, hozirgi sharoitda ziddiyatlar shaxsiy-psixologik darajadan tortib global miqyosgacha bo‘lgan keng diapazonni qamrab oladigan, ko‘p qatlamli tizim shaklida namoyon bo‘ladi.

2-jadval. Zamonaviy jamiyatda ziddiyat darajalari va ularni yuzaga keltiruvchi omillar

Shaxsiy	Axborot ortiqchaligi	Uzluksiz axborot oqimi tanqidiy fikrlashni susaytiradi	Ichki taranglik, psixologik beqarorlik
Shaxslararo	Jonli muloqotning kamayishi	Virtual aloqa real muloqotni siqib chiqarmoqda	Avlodlar o‘rtasidagi begonalashuv
Guruhiy	Raqamli tafovut	Raqamli resurslarga notekis kirish imkoniyati	Adolatsizlik hissi, ijtimoiy norozilik
Jamiyat miqyosida	Qadriyatlar to‘qnashuvi	Mahalliy va global qadriyatlar o‘rtasidagi ziddiyat	Ijtimoiy qutblanish
Ijtimoiy-siyosiy	Dezinformatsiya	Ommaviy ongni boshqarish maqsadida axborotdan foydalanish	Ishonchsizlik, siyosiy beqarorlik
Axborot makoni	Nazorat uchun raqobat	Axborot makonini egallashga yo‘naltirilgan kurash	Konfliktogen muhitning kuchayishi

Global	Notekis raqamlashuv	Rivojlangan va rivojlanayotgan jamiyatlar orasidagi tafovut	Transmilliy qarama-qarshiliklar

Jadval ma’lumotlaridan ko‘rinib turibdiki, barcha darajadagi ziddiyatlarning umumiy konfliktogen negizini uchta omil tashkil etadi: manfaatlarning farqlanishi, resurslarga notekis kirish imkoniyati va qadriyatlar tizimidagi transformatsiya.

Postmodern geosiyosat konteksti va mintaqaviy xavfsizlik masalasi

Zamonaviy axborot inqilobi sharoitida geosiyosiy qarama-qarshiliklar tobora tarmoqli, nolinear va bashorat qilib bo‘lmaydigan xususiyat kasb etmoqda. Internetning ochiq tabiati radikal g‘oyalarning qonuniy kanallar orqali tarqalishini osonlashtirsa, ekstremistik tuzilmalar esa yopiq raqamli kanallardan foydalanib, yangi tarafdorlarni jalb qilish imkoniyatiga ega bo‘lmoqda. Shu asosda “rangli inqilob”, “gibrid urush” va “kiberurush” kabi yangi geosiyosiy tushunchalar ilmiy muomalaga kirib keldi, bular esa geosiyosatning axborotiy paradigmasini shakllantirdi.

Shunga qaramasdan, mintaqaviy hamkorlik jahon miqyosida umuminsoniy qadriyat maqomini saqlab qolmoqda. Bu qarash O‘zbekiston Respublikasining rivojlanish strategiyasida ham mustahkam o‘rin egallagan bo‘lib, unda ikki va ko‘p tomonlama tashabbuslarni, jumladan mintaqaviy xavfsizlik masalalarini ilgari surish ustuvor yo‘nalish sifatida belgilangan. Markaziy Osiyoning geografik-geosiyosiy o‘rni, madaniy-tarixiy rang-barangligi, migratsion jarayonlarning intensivligi va aholining yoshlar ulushi yuqoriligi mintaqa axborot makonini ziddiyatlarga nisbatan sezgir qiladi, bu esa “kiberjihod” singari hodisalarning bilvosita namoyon bo‘lish ehtimolini kuchaytiradi. Shu bois axborot xavfsizligini ta’minlash faqat texnik-huquqiy tadbirlar bilan emas, balki ma’naviy-ma’rifiy siyosat, tanqidiy tafakkurni rivojlantirish hamda diniy-milliy bag‘rikenglikni mustahkamlash orqali amalga oshirilishi lozim.

XULOSA

O‘tkazilgan tadqiqot bir necha muhim xulosaga olib keldi. Birinchidan, ziddiyatlarni faqat subyektlar tarkibiga (Rutkevich bo‘yicha) qarab emas, balki to‘liq strukturaviy sxema (subyekt–obyekt–vosita–natija) asosida tahlil qilish ularning ko‘p qirrali tabiatini yanada chuqurroq ochib beradi. Ikkinchidan, “manfaatlar → ziddiyat → taraqqiyot” modeli SMART mezonlari nuqtai nazaridan yuqori darajada asoslangan bo‘lib, ziddiyatlarni buzg‘unchi emas, balki boshqariladigan va rivojlanishga xizmat qiluvchi omil sifatida qarash imkonini yaratadi.

Uchinchidan, axborotiy ziddiyat kontsepti Antsupovning tor, media-markazli talqinidan Davletchinaning keng, hokimiyat-markazli talqiniga qarab evolyutsiyalashgan bo‘lib, bu evolyutsiya zamonaviy voqelikka ko‘proq mos keladi. To‘rtinchidan, ziddiyatlar yetti bosqichli (shaxsiy, shaxslararo, guruhiy, jamiyat miqyosidagi, ijtimoiy-siyosiy, axborot makoni, global) arxitekturaga ega bo‘lib, bu bosqichlarning barchasi manfaatlar farqlanishi, resurs taqsimotidagi nomutanosiblik va qadriyatlar transformatsiyasi bilan bog‘liq. Beshinchidan, O‘zbekiston va Markaziy Osiyo sharoitida mintaqaviy hamkorlik hamda axborot xavfsizligi siyosati ziddiyatlarning oldini olishning strategik vositasi sifatida ko‘rilishi zarur.

ISHLAB CHIQARISH TA'LIMI SHARTNOMASINI HUQUQIY TARTIBGA SOLISHNING AYRIM MASALALARI

Azizbek Ochilboyev
Toshkent davlat yuridik universiteti mustaqil izlanuvchisi
O'zbekiston Respublikasi, Toshkent shahri
E-mail: azizbekochilboyev0717@gmail.com

Annotatsiya: *Mazkur maqolada ishlab chiqarish ta'limi shartnomasining huquqiy mohiyati, kasbiy ta'lim tizimidagi o'rni hamda uni qo'llashning amaliy ahamiyati tahlil qilinadi. Ishlab chiqarish ta'limi shartnomasi ta'lim tashkiloti, ish beruvchi va ta'lim oluvchi o'rtasidagi huquqiy munosabatlarni tartibga soluvchi muhim institutlardan biri sifatida baholanadi. Maqolada amaldagi qonunchilikning umumiy tavsifi berilib, ishlab chiqarish ta'limini tashkil etish amaliyotida uchrayotgan ayrim tashkiliy va huquqiy masalalar yoritiladi. Shuningdek, ishlab chiqarish ta'limi shartnomalarini qo'llash samaradorligini oshirish, ularni zamonaviy talablar asosida takomillashtirish hamda ta'lim va ishlab chiqarish integratsiyasini yanada mustahkamlash yuzasidan muallifning ayrim takliflari bayon etilgan.*

Kalit so'zlar: *ishlab chiqarish ta'limi, ishlab chiqarish ta'limi shartnomasi, dual ta'lim, kasbiy ta'lim, mehnat huquqi, ish beruvchi, mehnat bozori, amaliy tayyorgarlik.*

НЕКОТОРЫЕ ВОПРОСЫ ПРАВОВОГО РЕГУЛИРОВАНИЯ ДОГОВОРА О ПРОИЗВОДСТВЕННОМ ОБУЧЕНИИ

Аннотация: *В статье анализируются правовая сущность договора о производственном обучении, его место в системе профессионального образования, а также практическое значение его применения. Договор о производственном обучении оценивается как один из важных институтов, регулирующих правовые отношения между образовательной организацией, работодателем и обучающимся. Дана общая характеристика действующего законодательства и освещены отдельные организационные и правовые вопросы, возникающие в практике организации производственного обучения. Кроме того, изложены отдельные предложения автора по повышению эффективности применения договоров о производственном обучении, их совершенствованию в соответствии с современными требованиями, а также по дальнейшему укреплению интеграции образования и производства.*

Ключевые слова: *производственное обучение, договор о производственном обучении, дуальное образование, профессиональное образование, трудовое право, работодатель, рынок труда, практическая подготовка.*

SOME ISSUES OF THE LEGAL REGULATION OF THE PRODUCTION TRAINING CONTRACT

Abstract: *The article analyses the legal essence of the production training contract, its place within the vocational education system and the practical significance of its application. The production training contract is assessed as one of the important institutions regulating the legal relations between an educational institution, an employer and a learner. A general description of the legislation in force is given, and certain organisational and legal issues arising in the practice of organising production training are examined. The article also sets out a number of the author's proposals for raising the effectiveness of production training contracts, improving them in line with modern requirements and further strengthening the integration of education and industry.*

Keywords: *production training, production training contract, dual education, vocational education, labour law, employer, labour market, practical training.*

Kirish

Xalqaro mehnat tashkiloti (ILO) ta'kidlaganidek, "sifatli shogirdlik (apprenticeship) tizimi yoshlarning mehnat bozoriga muvaffaqiyatli kirib borishini ta'minlaydigan eng samarali mexanizmlardan biridir." Mazkur yondashuv ishlab chiqarish ta'limining nafaqat kasbiy kompetensiyalarni shakllantirish, balki barqaror bandlikni ta'minlashdagi ahamiyatini ham ko'rsatadi *(International Labour Organization, Quality Apprenticeships: A Guide for Policy Makers, 2023)*.

Bugungi kunda iqtisodiyotning jadal rivojlanishi, yangi ishlab chiqarish texnologiyalarining keng joriy etilishi hamda mehnat bozori talablarining o'zgarib borishi kasbiy ta'lim tizimi oldiga yangi vazifalarni qo'ymoqda. Zamonaviy

korxonalar nafaqat nazariy bilimga ega, balki amaliy faoliyatni mustaqil amalga oshira oladigan, ishlab chiqarish jarayonlariga tez moslashadigan hamda zamonaviy texnologiyalar bilan ishlash koʻnikmalariga ega mutaxassislarga ehtiyoj sezmoqda. Shu sababli ta'lim va ishlab chiqarish integratsiyasini kuchaytirish bugungi kunning eng muhim yoʻnalishlaridan biri hisoblanadi.

Oʻzbekiston Respublikasida ham kasbiy ta'lim tizimini rivojlantirish, uning mazmunini mehnat bozori ehtiyojlariga moslashtirish va bitiruvchilar bandligini ta'minlash davlat siyosatining ustuvor yoʻnalishlari qatoridan oʻrin olgan. Soʻnggi yillarda dual ta'limni rivojlantirish, ish beruvchilarni ta'lim jarayoniga keng jalb etish, oʻquvchilarning amaliy mashgʻulotlarini bevosita korxonalarda tashkil etish boʻyicha muhim islohotlar amalga oshirilmoqda. Mazkur islohotlar natijasida ishlab chiqarish ta'limining sifati oshib, ta'lim tashkilotlari hamda ish beruvchilar oʻrtasidagi hamkorlik yangi bosqichga koʻtarilmoqda.

Ishlab chiqarish ta'limi mazkur tizimning ajralmas qismi boʻlib, oʻquvchilarda nazariy bilimlarni amaliy koʻnikmalar bilan mustahkamlash, kasbiy kompetensiyalarni shakllantirish va kelgusida mehnat faoliyatiga tayyorlashga xizmat qiladi. Aynan shu jarayonni huquqiy jihatdan tartibga soluvchi asosiy vositalardan biri ishlab chiqarish ta'limi shartnomasi hisoblanadi. Ushbu shartnoma orqali ishlab chiqarish ta'limining maqsadi, muddati, mazmuni, taraflarning huquq va majburiyatlari hamda oʻzaro javobgarligi belgilanadi.

Mamlakatimizda ishlab chiqarish ta'limi shartnomasining huquqiy asoslari Oʻzbekiston Respublikasi Mehnat kodeksining ishlab chiqarish ta'limi shartnomasiga bagʻishlangan normalarida belgilangan. Xususan, Kodeksning 373-moddasida ishlab chiqarish ta'limi shartnomasining tushunchasi hamda uni tuzishning umumiy qoidalari mustahkamlangan boʻlib, mazkur norma ishlab chiqarish ta'limi sohasidagi huquqiy munosabatlarning asosini tashkil etadi. Bundan tashqari, "Ta'lim toʻgʻrisida"gi Qonun hamda kasbiy ta'lim sohasiga oid boshqa normativ-huquqiy hujjatlar ishlab chiqarish ta'limini tashkil etishning huquqiy asoslarini belgilaydi. Mazkur huquqiy baza ishlab chiqarish ta'limining samarali tashkil etilishi uchun zarur sharoit yaratgan boʻlsa-da, amaliyotda ayrim masalalar uchrab turadi. Xususan, ishlab chiqarish ta'limini tashkil etish jarayonida korxonalar va ta'lim tashkilotlari oʻrtasidagi hamkorlik mexanizmlarini takomillashtirish, shartnomalarni qoʻllash amaliyotini yanada bir xillashtirish hamda monitoring tizimini rivojlantirish masalalari dolzarbligicha qolmoqda.

Mazkur maqolaning maqsadi ishlab chiqarish ta'limi shartnomasining huquqiy mohiyatini yoritish, uning amaldagi huquqiy tartibga solinishini umumiy tahlil qilish, amaliyotda uchrayotgan ayrim masalalarni koʻrsatish hamda ularni bartaraf etish yuzasidan takliflar ishlab chiqishdan iborat.

Ishlab chiqarish ta'limi shartnomasining huquqiy mohiyati

Ishlab chiqarish ta'limi shartnomasi mehnat huquqining oʻziga xos institutlaridan biri boʻlib, u shaxsning muayyan kasb, mutaxassislik yoki lavozim boʻyicha amaliy tayyorgarligini tashkil etishga qaratilgan huquqiy munosabatlarni tartibga soladi. Mazkur shartnomaning asosiy maqsadi ta'lim oluvchiga ishlab chiqarish jarayonida bevosita ishtirok etish orqali kasbiy bilim va amaliy koʻnikmalarni egallash imkoniyatini yaratishdan iborat.

Nemis olimi Feliks Raunerning fikricha, "shogirdlik – bu shunchaki ishlab turib oʻrganish emas, balki haqiqiy kasbiy hamjamiyat faoliyatida ishtirok etish orqali oʻrganishdir" *(Rauner F., Smith E. (eds.). Rediscovering Apprenticeship, Springer, 2010)*.

Mazkur yondashuv ishlab chiqarish ta'limi shartnomasining asosiy vazifasi faqat amaliyotni tashkil etish emas, balki ta'lim oluvchini haqiqiy kasbiy muhitga integratsiya qilishdan iborat ekanligini koʻrsatadi.

Ushbu shartnoma oʻzining huquqiy tabiatiga koʻra mehnat shartnomasidan farq qiladi. Mehnat shartnomasining asosiy maqsadi xodim tomonidan muayyan mehnat funksiyasini bajarish va buning evaziga ish haqi olishdan iborat boʻlsa, ishlab chiqarish ta'limi shartnomasida ustuvor maqsad kasbiy tayyorgarlikni ta'minlash hisoblanadi. Oʻquvchining ishlab chiqarish jarayonida ishtirok etishi mehnat natijasini yaratishdan koʻra koʻproq ta'limiy maqsadga xizmat qiladi. Shu jihatdan mazkur shartnoma ta'lim va mehnat munosabatlarining oʻzaro uygʻunlashgan shakli sifatida namoyon boʻladi.

Ishlab chiqarish ta'limi shartnomasining yana bir muhim xususiyati shundaki, unda taraflarning oʻzaro manfaatdorligi yaqqol namoyon boʻladi. Ta'lim oluvchi zamonaviy ishlab chiqarish sharoitida kasbiy tajriba orttiradi, ish beruvchi oʻz korxonasining ehtiyojlariga mos boʻlgan boʻlajak mutaxassisni tayyorlash imkoniyatiga ega boʻladi, ta'lim tashkiloti esa oʻquv dasturlarining amaliy qismini sifatli tashkil etadi. Natijada uchala tomon manfaatlari oʻzaro uygʻunlashadi.

Soʻnggi yillarda dual ta'lim shaklining keng joriy etilishi ishlab chiqarish ta'limi shartnomasining amaliy ahamiyatini yanada oshirdi. Chunki dual ta'limda korxona ta'lim jarayonining toʻlaqonli ishtirokchisiga aylanadi. Korxona mutaxassislari oʻquvchilarga amaliy mashgʻulotlar oʻtadi, ishlab chiqarish ustalari ularning kasbiy tayyorgarligini baholashda ishtirok etadi hamda ayrim hollarda ta'lim dasturlarini takomillashtirish boʻyicha ham oʻz takliflarini bildiradi. Bunday sharoitda ishlab chiqarish ta'limi shartnomasi nafaqat huquqiy hujjat, balki ta'lim va ishlab chiqarish hamkorligini ta'minlovchi amaliy mexanizm sifatida ham xizmat qiladi.

Mehnat kodeksining 373-moddasiga muvofiq, ishlab chiqarish ta’limi shartnomasi ish beruvchi va o‘quvchi o‘rtasida kasbiy bilim, malaka va ko‘nikmalarni egallash yoki qayta tayyorlash maqsadida tuziladigan kelishuv hisoblanadi. Mazkur norma ishlab chiqarish ta’limi shartnomasining asosiy maqsadi mehnat faoliyatini emas, balki kasbiy tayyorgarlikni ta’minlashdan iborat ekanligini ko‘rsatadi

Ishlab chiqarish ta’limi shartnomasi orqali o‘quvchilarning ishlab chiqarishdagi huquqiy maqomi ham belgilanadi. O‘quvchi korxonada bo‘lgan davrida ichki mehnat tartib-qoidalariga, mehnatni muhofaza qilish hamda texnika xavfsizligi talablariga rioya qilishi zarur. O‘z navbatida, ish beruvchi o‘quvchi uchun xavfsiz mehnat sharoitlarini yaratishi, unga malakali ustoz biriktirishi hamda ta’lim dasturida nazarda tutilgan amaliy mashg‘ulotlarni to‘liq tashkil etishi lozim. Mazkur talablarning bajarilishi ishlab chiqarish ta’limining sifati va samaradorligiga bevosita ta’sir ko‘rsatadi.

Ishlab chiqarish ta’limi shartnomasining amalda huquqiy tartibga solinishi

O‘zbekiston Respublikasida ishlab chiqarish ta’limi shartnomasi bilan bog‘liq munosabatlar, avvalo, O‘zbekiston Respublikasi Mehnat kodeksi bilan tartibga solinadi. Kodeksda ishlab chiqarish ta’limi shartnomasiga alohida bob ajratilgan bo‘lib, unda mazkur shartnomaning tushunchasi, uni tuzish tartibi, taraflarning huquq va majburiyatlari, ishlab chiqarish ta’limini tashkil etishning asosiy qoidalari hamda shartnomani bekor qilish bilan bog‘liq masalalar belgilangan. Bu ishlab chiqarish ta’limi shartnomasining mehnat huquqidagi mustaqil institut sifatida e’tirof etilganligini ko‘rsatadi.

Shu bilan birga, ishlab chiqarish ta’limini tashkil etishda “Ta’lim to‘g‘risida”gi Qonun, kasbiy ta’limni rivojlantirishga oid Prezident Farmon va qarorlari, Vazirlar Mahkamasining qarorlari hamda vakolatli davlat organlari tomonidan tasdiqlangan normativ hujjatlar ham muhim ahamiyat kasb etadi. Mazkur hujjatlar ishlab chiqarish ta’limini tashkil etishning tashkiliy asoslarini, ta’lim tashkilotlari hamda ish beruvchilarning o‘zaro hamkorlik mexanizmlarini belgilab beradi.

Kasbiy ta’lim tizimida amalga oshirilayotgan islohotlar natijasida ishlab chiqarish ta’limining mazmuni sezilarli darajada o‘zgardi. Ilgari ishlab chiqarish amaliyoti, asosan, o‘quv rejasining majburiy qismi sifatida qaralgan bo‘lsa, bugungi kunda u mehnat bozorining real ehtiyojlari bilan uzviy bog‘langan ta’lim jarayoniga aylanmoqda. Korxonalarning ta’lim jarayonidagi ishtiroki kengaymoqda, ishlab chiqarish ustalari o‘quvchilarni tayyorlashda faol qatnashmoqda, ayrim ta’lim dasturlari esa ish beruvchilar ishtirokida takomillashtirilmoqda.

Ayniqsa, dual ta’lim tizimining rivojlanishi ishlab chiqarish ta’limi shartnomasining amaliy ahamiyatini yanada oshirdi. Dual ta’lim nazariy bilimlarni ta’lim tashkilotida, amaliy tayyorgarlikni esa ishlab chiqarish korxonalarida tashkil etishga asoslanadi. Natijada o‘quvchi o‘qish davridayoq zamonaviy ishlab chiqarish muhiti bilan tanishadi, texnologik jarayonlarda ishtirok etadi hamda kelgusidagi mehnat faoliyati uchun zarur bo‘lgan ko‘nikmalarni egallaydi. Bu esa bitiruvchilarning ishga moslashish davrini qisqartirish va ularning bandligini ta’minlashga ijobiy ta’sir ko‘rsatmoqda.

Shu bilan birga, ishlab chiqarish ta’limi shartnomasining amaliy qo‘llanilishi faqat normativ-huquqiy hujjatlar mavjudligi bilangina emas, balki ularning to‘g‘ri ijro etilishi bilan ham chambarchas bog‘liq. Huquqiy normalarning amaliyotda bir xilda qo‘llanilishi ishlab chiqarish ta’limining sifatini ta’minlashning muhim omillaridan biri hisoblanadi.

Ishlab chiqarish ta’limi shartnomasini qo‘llash amaliyotidagi ayrim masalalar

UNESCO ekspertlari fikricha, kasbiy ta’lim tizimining muvaffaqiyati normativ-huquqiy hujjatlar soni bilan emas, balki ularning amaliy ijrosi va mehnat bozori bilan uzviy bog‘liqligi orqali belgilanadi *(UNESCO. Strategy for Technical and Vocational Education and Training)*.

Mazkur fikr ishlab chiqarish ta’limi shartnomasining amaliy qo‘llanilishi sifatini muntazam monitoring qilish zarurligini tasdiqlaydi.

Mamlakatimizda ishlab chiqarish ta’limi tizimini rivojlantirish bo‘yicha amalga oshirilayotgan islohotlar ijobiy natijalar bermoqda. Biroq amaliyot tahlili shuni ko‘rsatadiki, ishlab chiqarish ta’limi shartnomasini qo‘llash jarayonida ayrim masalalar mavjud bo‘lib, ular qonunchilikni tubdan o‘zgartirishni emas, balki mavjud mexanizmlarni yanada takomillashtirishni talab etadi.

Birinchi masala ishlab chiqarish ta’limi shartnomalarini rasmiylashtirish amaliyoti bilan bog‘liq. Amaldagi qonunchilik ishlab chiqarish ta’limi shartnomasining asosiy talablarini belgilab bergan bo‘lsa-da, amaliyotda ayrim korxonalarda shartnoma mazmuniga yondashuv turlicha bo‘lishi kuzatiladi. Ayrim hollarda shartnomalarda ishlab chiqarish ta’limining maqsadi, o‘quvchi egallashi lozim bo‘lgan kompetensiyalar, ustozning vazifalari yoki baholash mezonlari umumiy tarzda bayon qilinadi. Bu esa ishlab chiqarish ta’limi yakunida erishilishi lozim bo‘lgan natijalarni aniq baholashni murakkablashtirishi mumkin.

Ikkinchi masala ishlab chiqarish ta’limi natijalarini baholash bilan bog‘liq. Bugungi kunda o‘quvchilarning amaliy tayyorgarligini baholashning umumiy mezonlari mavjud bo‘lsa-da, ayrim korxonalarda baholash uslublari o‘ziga xos tarzda qo‘llaniladi. Bu esa bir xil kasb bo‘yicha tahsil olayotgan o‘quvchilarning kompetensiyalarini baholashda ayrim farqlarni yuzaga keltirishi mumkin. Aslida esa ishlab chiqarish ta’limining yakuniy natijasi, avvalo, o‘quvchi egallagan kasbiy kompetensiyalar orqali baholanishi maqsadga muvofiq.

Uchinchi masala ishlab chiqarish ta'limi jarayonida ta'lim tashkiloti va korxona o'rtasidagi muntazam hamkorlik bilan bog'liq. Ishlab chiqarish ta'limi faqat o'quvchini korxonaga yuborish bilangina cheklanib qolmasligi kerak. Ta'lim tashkiloti mutaxassislari va korxona vakillari ishlab chiqarish ta'limi davomida o'quvchilarning o'zlashtirish darajasini birgalikda tahlil qilib borishi, yuzaga kelayotgan muammolarni o'z vaqtida bartaraf etishi maqsadga muvofiq. Bunday yondashuv ishlab chiqarish ta'limining sifatini oshirish bilan birga, ish beruvchilarning ta'lim jarayoniga bo'lgan qiziqishini ham kuchaytiradi.

To'rtinchi masala ishlab chiqarish ta'limi jarayonini monitoring qilish bilan bog'liq. Hozirgi kunda raqamli texnologiyalar davlat boshqaruvi va ta'lim tizimining barcha yo'nalishlariga jadal kirib kelmoqda. Shu nuqtai nazardan ishlab chiqarish ta'limi shartnomalarining bajarilishi, o'quvchilarning davomatini yuritish, amaliy mashg'ulotlar natijalarini baholash hamda korxonalar faoliyatini monitoring qilish jarayonlarini bosqichma-bosqich raqamlashtirish maqsadga muvofiq hisoblanadi. Bu, o'z navbatida, shaffoflikni ta'minlash, tahliliy ma'lumotlarni tezkor shakllantirish hamda boshqaruv qarorlarini qabul qilish samaradorligini oshirishga xizmat qiladi.

Shuni alohida ta'kidlash joizki, yuqorida qayd etilgan masalalar ishlab chiqarish ta'limi shartnomasining huquqiy asoslari yetarli emasligini anglatmaydi. Aksincha, ular mavjud huquqiy mexanizmlarni amaliyot ehtiyojlaridan kelib chiqib yanada takomillashtirish zarurligini ko'rsatadi. Kasbiy ta'lim tizimida amalga oshirilayotgan izchil islohotlar aynan ushbu yo'nalishlarda tizimli ishlarni davom ettirish uchun mustahkam zamin yaratmoqda.

Germaniya, Shveysariya va Avstriya tajribasi: qiyosiy-huquqiy tahlil

Stephen Billett kasbiy ta'limni tavsiflar ekan, "samarali kasbiy ta'lim ta'lim muassasalari va ish joylari bir-birini to'ldiruvchi ta'lim muhiti sifatida faoliyat yuritganda yuzaga keladi" deb ta'kidlaydi *(Billett S. Vocational Education: Purposes, Traditions and Prospects, Springer, 2011)*.

Kasbiy ta'lim va ishlab chiqarish integratsiyasini samarali tashkil etish bo'yicha Germaniya, Shveysariya hamda Avstriya jahondagi eng ilg'or davlatlar qatoriga kiradi. Ushbu mamlakatlarda dual ta'lim tizimi uzoq yillik tajriba asosida shakllangan bo'lib, ishlab chiqarish ta'limi shartnomasi mazkur tizimning asosiy huquqiy instrumentlaridan biri hisoblanadi. Barcha uch davlatda o'quvchi, ish beruvchi va kasb-hunar ta'limi muassasasi o'rtasidagi hamkorlik qonunchilik bilan tartibga solinadi, biroq ushbu munosabatlarni tashkil etish mexanizmlarida ayrim farqlar mavjud.

Germaniya tajribasi

Germaniyada dual ta'lim tizimining huquqiy asosi Kasbiy ta'lim to'g'risidagi qonun (Berufsbildungsgesetz – BBiG) bilan belgilanadi. Mazkur qonun korxonalarda tashkil etiladigan kasbiy tayyorgarlik, o'quvchilar bilan tuziladigan ta'lim shartnomalari, ish beruvchilarning majburiyatlari, ustozlarning malaka talablari hamda savdo-sanoat palatalarining vakolatlarini batafsil tartibga soladi. Korxona o'quvchini ishlab chiqarish jarayoniga jalb etish bilan bir qatorda, tasdiqlangan o'quv dasturiga muvofiq kasbiy tayyorgarlikni ta'minlash majburiyatini ham oladi. Shuningdek, o'quvchilarga o'qish davrida qonunchilik asosida haq to'lanadi hamda ular ijtimoiy sug'urta tizimi bilan qamrab olinadi.

Germaniya tajribasining yana bir muhim jihati shundaki, ishlab chiqarish ta'limi sifati davlat organlari emas, balki ish beruvchilar uyushmalari va savdo-sanoat palatalari ishtirokida muntazam nazorat qilinadi. Bu esa kasbiy tayyorgarlikning mehnat bozori talablariga mosligini ta'minlashga xizmat qiladi.

Shveysariya tajribasi

Shveysariyada ishlab chiqarish ta'limi shartnomasi fuqarolik-huquqiy shartnomaning alohida turi sifatida e'tirof etilgan bo'lib, u Shveysariya Majburiyatlar kodeksining (Swiss Code of Obligations) 344–346a-moddalari bilan tartibga solinadi. Shartnoma yozma shaklda tuziladi va u kuchga kirishi uchun Shveysariyaning kasbiy ta'lim bo'yicha vakolatli davlat organi tomonidan tasdiqlanishi shart. Shartnomada kasb nomi, o'qish muddati, ish vaqti, ta'til, stipendiya (yoki ish haqi), sinov muddati hamda boshqa asosiy shartlar majburiy ravishda ko'rsatiladi.

Shveysariya tajribasining o'ziga xos jihati shundaki, ishlab chiqarish ta'limi sifati kasbiy ta'lim bo'yicha vakolatli davlat organi tomonidan muntazam monitoring qilinadi. Ta'lim dasturlarining mazmuni iqtisodiyot tarmoqlari vakillari ishtirokida muntazam yangilanib boradi. Bu esa kasbiy ta'limning mehnat bozori ehtiyojlariga tez moslashishini ta'minlaydi.

Avstriya tajribasi

Avstriyada ham dual kasbiy ta'lim tizimi iqtisodiyotning muhim tarkibiy qismi hisoblanadi. Ishlab chiqarish ta'limi korxonalarda olib boriladi, nazariy tayyorgarlik esa kasb-hunar maktablarida tashkil etiladi. O'quvchilar bilan tuziladigan shartnomalar davlat tomonidan belgilangan yagona talablar asosida rasmiylashtiriladi. Korxonalarning o'quvchi tayyorlash faoliyati iqtisodiyot palatalari hamda vakolatli davlat organlari tomonidan nazorat qilinadi. O'quv dasturlari ish beruvchilar, kasaba uyushmalari va davlat organlarining hamkorligida ishlab chiqiladi hamda muntazam ravishda yangilanadi.

O'zbekiston uchun ayrim xulosalar

Qiyosiy tahlil shuni ko'rsatadiki, Germaniya, Shveysariya va Avstriya tajribasida ishlab chiqarish ta'limi shartnomasining muvaffaqiyatli amal qilishi, eng avvalo, uchta omil bilan bog'liq. Birinchidan, ish beruvchilarning kasbiy

ta’lim jarayonidagi mas’uliyati aniq huquqiy normalar bilan mustahkamlangan. Ikkinchidan, ishlab chiqarish ta’limi sifati doimiy monitoring qilinadi va mustaqil institutlar tomonidan baholanadi. Uchinchidan, ta’lim dasturlari mehnat bozori ehtiyojlaridan kelib chiqib muntazam yangilanadi.

O‘zbekistonda ham so‘nggi yillarda dual ta’limni rivojlantirish, ish beruvchilar ishtirokini kengaytirish hamda ishlab chiqarish ta’limining huquqiy asoslarini mustahkamlash borasida muhim islohotlar amalga oshirilmoqda. Xorijiy tajriba shuni ko‘rsatadiki, mavjud huquqiy bazani samarali qo‘llash, monitoring tizimini rivojlantirish, korxonalarda ustozlik institutini metodik jihatdan qo‘llab-quvvatlash hamda ishlab chiqarish ta’limi natijalarini kompetensiyaga asoslangan mezonlar orqali baholash ushbu institut samaradorligini yanada oshirishga xizmat qilishi mumkin.

Ishlab chiqarish ta’limi shartnomasini takomillashtirish yo‘nalishlari

Shu bois ishlab chiqarish ta’limi shartnomasini amalga oshirish jarayonida ish beruvchilarning mas’uliyatini yanada kuchaytirish maqsadga muvofiq hisoblanadi.

Ishlab chiqarish ta’limi shartnomasining amaliy samaradorligini oshirish, avvalo, ta’lim tashkilotlari va ish beruvchilar o‘rtasidagi hamkorlikni yanada mustahkamlash bilan chambarchas bog‘liq. So‘nggi yillarda bu borada muhim islohotlar amalga oshirilayotgan bo‘lsa-da, ishlab chiqarish ta’limining sifati ko‘p jihatdan korxonaning ushbu jarayondagi ishtirokiga bog‘liq bo‘lib qolmoqda. Shu sababli ishlab chiqarish ta’limini tashkil etishda barcha ishtirokchilarning mas’uliyatini oshirish, o‘zaro hamkorlikni yanada tizimlashtirish maqsadga muvofiq hisoblanadi.

Birinchi navbatda, ishlab chiqarish ta’limi shartnomalarining namunaviy shaklini zamonaviy yondashuvlar asosida muntazam takomillashtirib borish lozim. Bugungi kunda amaldagi namunaviy hujjatlar ishlab chiqarish ta’limini tashkil etish uchun yetarli asos yaratmoqda. Biroq iqtisodiyotning rivojlanishi, yangi kasblarning paydo bo‘lishi hamda kompetensiyaga asoslangan ta’lim modelining keng joriy etilishi shartnoma mazmunini ham doimiy ravishda yangilab borishni talab qiladi. Xususan, shartnomada o‘quvchi egallashi lozim bo‘lgan kasbiy kompetensiyalar, amaliy mashg‘ulotlarning natijalari, ustozning vazifalari hamda baholash mezonlarini yanada aniqroq ifodalash ishlab chiqarish ta’limining sifatiga ijobiy ta’sir ko‘rsatadi.

Ikkinchidan, ishlab chiqarish ta’limi jarayonini raqamlashtirish masalasiga alohida e’tibor qaratish lozim. Bugungi kunda ko‘plab davlat xizmatlari va ta’lim jarayonlari elektron platformalar orqali amalga oshirilmoqda. Shu nuqtai nazardan ishlab chiqarish ta’limi shartnomalarini elektron shaklda rasmiylashtirish, ularning ijrosini onlayn monitoring qilish hamda o‘quvchilarning amaliy mashg‘ulotlari natijalarini elektron tizim orqali baholash istiqbolda muhim yo‘nalishlardan biri bo‘lishi mumkin. Bunday tizim nafaqat hujjat aylanishini soddalashtiradi, balki ishlab chiqarish ta’limi sifati bo‘yicha tahliliy ma’lumotlarni shakllantirish imkonini ham yaratadi.

Uchinchidan, ishlab chiqarish ta’limini tashkil etishda korxonalardagi ustozlar faoliyatini metodik jihatdan qo‘llab-quvvatlash maqsadga muvofiq. Amaliyot shuni ko‘rsatadiki, yuqori malakali mutaxassis har doim ham samarali pedagog bo‘lavermaydi. Shu sababli ishlab chiqarish ta’limiga mas’ul xodimlar uchun qisqa muddatli metodik seminarlar, o‘quv kurslari va malaka oshirish dasturlarini tashkil etish ishlab chiqarish ta’limining sifatini oshirishga xizmat qiladi. Natijada o‘quvchilarga kasbiy bilimlarni tizimli va izchil yetkazish imkoniyati kengayadi.

To‘rtinchidan, ishlab chiqarish ta’limi natijalarini baholashda yagona kompetensiyaviy yondashuvni qo‘llash maqsadga muvofiq. O‘quvchining ishlab chiqarish ta’limini muvaffaqiyatli tamomlaganligi faqat amaliyot davrini o‘taganligi bilan emas, balki egallagan kasbiy kompetensiyalari orqali baholanishi lozim. Bunda korxona mutaxassislari, ta’lim tashkiloti pedagoglari hamda zarur hollarda mustaqil ekspertlarning ishtiroki baholashning xolisligi va shaffofligini ta’minlashga xizmat qiladi.

Beshinchidan, ishlab chiqarish ta’limi yakunlari bo‘yicha muntazam tahliliy ishlarni yo‘lga qo‘yish foydali bo‘ladi. Har bir o‘quv yili yakunida ta’lim tashkilotlari va hamkor korxonalar tomonidan ishlab chiqarish ta’limi natijalari muhokama qilinishi, o‘quvchilar va ustozlarning fikr-mulohazalari o‘rganilishi hamda keyingi o‘quv yilida ularni inobatga olgan holda ishlab chiqarish ta’limini tashkil etish mexanizmlari takomillashtirilishi maqsadga muvofiqdir. Bunday yondashuv ishlab chiqarish ta’limining uzluksiz rivojlanishini ta’minlaydi.

Yana bir muhim jihat sifatida ishlab chiqarish ta’limini tashkil etishda ta’lim tashkilotlari va ish beruvchilar o‘rtasidagi ijtimoiy sheriklikni yanada rivojlantirishni ko‘rsatish mumkin. Ishlab chiqarish ta’limi faqat o‘quv jarayonining tarkibiy qismi emas, balki mehnat bozorining ehtiyojlarini qondirishga xizmat qiluvchi muhim mexanizm hamdir. Shu bois ish beruvchilarning ta’lim dasturlarini ishlab chiqish, malaka talablarini belgilash hamda bitiruvchilarni ishga joylashtirish jarayonlaridagi ishtirokini yanada kengaytirish kasbiy ta’lim tizimining samaradorligini oshirishga xizmat qiladi.

Xulosa

Ishlab chiqarish ta’limi shartnomasi kasbiy ta’lim tizimida nazariy bilimlar bilan amaliy ko‘nikmalar o‘rtasidagi uzviy bog‘liqlikni ta’minlaydigan muhim huquqiy institut hisoblanadi. Mazkur shartnoma ta’lim oluvchi, ta’lim tashkiloti va ish beruvchi manfaatlarini o‘zaro uyg‘unlashtirish orqali malakali kadrlar tayyorlashga xizmat qiladi. O‘zbekiston Respublikasida ushbu institutni huquqiy tartibga solish bo‘yicha zarur normativ asoslar shakllantirilgan bo‘lib, so‘nggi

yillarda amalga oshirilayotgan islohotlar ishlab chiqarish ta’limining sifatini yanada oshirish uchun qulay sharoit yaratmoqda.

Shu bilan birga, amaliyot tahlili ishlab chiqarish ta’limi shartnomasining huquqiy asoslarini tubdan qayta ko‘rib chiqish zaruriyatini emas, balki uni qo‘llash mexanizmlarini takomillashtirish muhimligini ko‘rsatadi. Xususan, shartnomalarni rasmiylashtirish amaliyotini yanada bir xillashtirish, baholash mezonlarini takomillashtirish, monitoring jarayonlarini raqamlashtirish hamda ta’lim tashkilotlari va ish beruvchilar o‘rtasidagi hamkorlikni rivojlantirish ishlab chiqarish ta’limi samaradorligini oshirishga xizmat qiladi.

Muallifning fikricha, ishlab chiqarish ta’limi shartnomasini takomillashtirishning asosiy yo‘nalishi yangi huquqiy normalarni ko‘paytirishdan ko‘ra mavjud huquqiy mexanizmlarning amaliy ijrosini kuchaytirish, zamonaviy boshqaruv va raqamli texnologiyalarni keng joriy etish bilan bog‘liq bo‘lishi lozim. Aynan shu yondashuv kasbiy ta’lim tizimining mehnat bozori ehtiyojlariga yanada moslashishiga, bitiruvchilarning bandligini oshirishga hamda ish beruvchilarning ta’lim jarayonidagi ishtirokini kengaytirishga xizmat qiladi.

PHILOSOPHICAL

VAKILLIK HOKIMIYATI — IJTIMOIY O‘ZGARISHLARNING FALSAFIY MOHIYATI

Sherzod Tolibovich Rakhmonov
Head of the Secretariat of the Bukhara Regional Council of People’s Deputies
Doctor of Philosophy (PhD) in Pedagogical Sciences
E-mail: sherzod.hamro@gmail.com
ORCID: https://orcid.org/0009-0007-4941-596X

Annotatsiya: *Ushbu maqolada vakillik hokimiyati fenomenining ijtimoiy-falsafiy mohiyati, uning nazariy-metodologik manbalari hamda jamiyat va davlat munosabatlaridagi fundamental o‘rni tahlil qilinadi. Tadqiqotning maqsadi — O‘zbekistonda mahalliy vakillik hokimiyatini transformatsiya qilishning ijtimoiy-falsafiy zaruriyatini, uning funksiyalarini hamda transformatsiya jarayonining nazariy-metodologik negizlarini ochib berishdan iborat. Tadqiqotda dialektik, aksiologik, sinergetik va germenevtik yondashuvlar metodologik asos sifatida qo‘llanildi. Natijalar shuni ko‘rsatadiki, mahalliy vakillik organlarining kommunikativ, integrasion, nazorat va legitimlashtiruvchi funksiyalarini ijtimoiy-falsafiy jihatdan qayta anglash ularning aholi manfaatlarini ifodalovchi faol institutga aylanishiga xizmat qiladi. Xulosa qilib aytganda, mahalliy vakillik hokimiyatini transformatsiya qilish nafaqat institusional, balki ong va qadriyatlar darajasidagi chuqur ijtimoiy-falsafiy jarayon sifatida baholanishi lozim.*

Kalit so‘zlar: *vakillik hokimiyati, ijtimoiy-falsafiy transformatsiya, mahalliy Kengashlar, legitimlik, ijtimoiy shartnoma, ishtirokchi demokratiya, institusional ishonch, aksiologik yondashuv*

ПРЕДСТАВИТЕЛЬНАЯ ВЛАСТЬ — ФИЛОСОФСКАЯ СУЩНОСТЬ СОЦИАЛЬНЫХ ИЗМЕНЕНИЙ

Аннотация: *В статье анализируется социально-философская сущность феномена представительной власти, его теоретико-методологические источники, а также фундаментальная роль в отношениях между обществом и государством. Цель исследования — раскрыть социально-философскую необходимость трансформации местной представительной власти в Узбекистане, её функции и теоретико-методологические основы процесса трансформации. В качестве методологической основы использованы диалектический, аксиологический, синергетический и герменевтический подходы. Результаты показывают, что переосмысление коммуникативной, интеграционной, контрольной и легитимирующей функций местных представительных органов способствует их превращению в активный институт, выражающий интересы населения. Сделан вывод, что трансформация местной представительной власти должна оцениваться не только как институциональный, но и как глубокий социально-философский процесс на уровне сознания и ценностей.*

Ключевые слова: *представительная власть, социально-философская трансформация, местные Кенгаши, легитимность, общественный договор, партисипативная демократия, институциональное доверие, аксиологический подход*

REPRESENTATIVE AUTHORITY — THE PHILOSOPHICAL ESSENCE OF SOCIAL TRANSFORMATION

Abstract: *The article analyses the socio-philosophical essence of the phenomenon of representative authority, its theoretical and methodological sources, and its fundamental role in the relationship between society and the state. The aim of the study is to reveal the socio-philosophical necessity of transforming local representative authority in Uzbekistan, its functions, and the theoretical and methodological foundations of the transformation process. Dialectical, axiological, synergetic and hermeneutic approaches were applied as the methodological basis. The results show that rethinking the communicative, integrative, control and legitimising functions of local representative bodies contributes to their transformation into an active institution expressing the interests of the population. It is concluded that the transformation of local representative authority should be assessed not only as an institutional process but also as a profound socio-philosophical process at the level of consciousness and values.*

Keywords: *representative authority, socio-philosophical transformation, local Kengashes, legitimacy, social contract, participatory democracy, institutional trust, axiological approach*

Kirish: Vakillik hokimiyati fenomenining ijtimoiy-falsafiy mohiyati, uning nazariy-metodologik manbalari hamda jamiyat va davlat munosabatlaridagi fundamental o‘rni atroflicha tahlil qilinishni talab etuvchi dolzarb masalalardan biri hisoblanadi. Zamonaviy vakillik tizimi shunchaki siyosiy-huquqiy institut bo‘lmay, balki insoniyatning ijtimoiy boshqaruv borasidagi uzoq yillik falsafiy izlanishlari va amaliy tajribasi mahsuli sifatida namoyon bo‘ladi. Jamiyat taraqqiyotining muayyan bosqichida hokimiyatning manbai bo‘lmish xalq va qaror qabul qiluvchi tuzilmalar o‘rtasidagi aloqadorlikni ta’minlash zaruriyati vakillik fenomenining yuzaga kelishiga zamin yaratdi.

“Vakillik hokimiyati” fenomeni, uning ilmiy-nazariy va metodologik asoslari tadqiq etilib, ontologik va gnoseologik mohiyati ochib beriladi. Vakillik tushunchasining mohiyati insonning o‘z suveren huquqlari va irodasini ma’lum bir vakolatli vakilga ishonib topshirish akti orqali shakllanishi ko‘rsatib o‘tiladi. Bu jarayonda hokimiyat va jamiyat o‘rtasidagi legitimlik fenomeni alohida ijtimoiy-falsafiy kategorial tahlil markaziga qo‘yiladi. Vakillik hokimiyati nafaqat davlat boshqaruv mexanizmining tarkibiy qismi, balki jamiyatning o‘z-o‘zini tashkillashtirish va ijtimoiy integratsiyasini ta’minlovchi omil sifatida asoslanadi.

Mavzuning dolzarbligi quyidagi omillar bilan belgilanadi. Birinchidan, global miqyosda boshqaruv tizimlarining demokratlashuvi va nomarkazlashtirilishi jarayonlari kuchaymoqda, bu esa vakillik institutlarining falsafiy-konseptual negizlarini qayta anglashni taqozo etadi. Ikkinchidan, O‘zbekistonda amalga oshirilayotgan davlat boshqaruvi islohotlari, xususan, mahalliy Kengashlar maqomi va vakolatlarini kengaytirishga qaratilgan chora-tadbirlar nazariy asoslanishni talab qiladi. Uchinchidan, raqamli transformatsiya sharoitida fuqarolar va hokimiyat o‘rtasidagi muloqot shakllari tubdan o‘zgarmoqda, bu esa vakillik fenomenining yangi falsafiy talqinini zaruratga aylantirmoqda.

Tadqiqotning ilmiy muammosi shundan iboratki, vakillik hokimiyati ko‘pincha faqat huquqiy-institusional nuqtai nazardan o‘rganiladi, uning ijtimoiy-falsafiy, aksiologik va ontologik qirralari esa yetarlicha tadqiq etilmagan. Mazkur maqolaning maqsadi — vakillik hokimiyati fenomenining falsafiy mohiyatini, uning funksiyalarini hamda O‘zbekistonda mazkur institutni transformatsiya qilishning ijtimoiy-falsafiy zaruriyatini kompleks tarzda tahlil qilishdan iborat. Maqsadga erishish uchun quyidagi vazifalar belgilandi: vakillik hokimiyatining falsafiy-tarixiy genezisini ochib berish; uning asosiy funksiyalarini ijtimoiy-falsafiy nuqtai nazardan tasniflash; mazkur sohadagi tadqiqot metodologiyasini asoslash; O‘zbekiston misolida transformatsiya jarayonining natijalarini tahlil qilish va tegishli xulosalar shakllantirish.

Tadqiqotning ob’yekti sifatida O‘zbekistonda mahalliy vakillik hokimiyati tizimi, predmeti sifatida esa ushbu tizimning transformatsiya jarayonidagi ijtimoiy-falsafiy qonuniyatlari belgilandi. Tadqiqotning ilmiy yangiligi shundan iboratki, unda vakillik hokimiyati funksiyalari birinchi marta aksiologik va sinergetik yondashuvlar prizmasi orqali yaxlit tarzda tahlil qilindi hamda mazkur funksiyalarning o‘zaro uyg‘unligi milliy sharoit misolida ko‘rsatib berildi. Shuningdek, vakillik hokimiyatini baholashning sifatiy mezonlar tizimi ilk bor ijtimoiy-falsafiy nuqtai nazardan tizimlashtirildi.

Maqola quyidagi tuzilishga ega: avvalo vakillik hokimiyati tushunchasining falsafiy-tarixiy genezisiga bag‘ishlangan adabiyotlar tahlili keltiriladi; so‘ngra tadqiqotda qo‘llanilgan metodologik yondashuvlar bayon etiladi; keyingi bo‘limda O‘zbekistonda mahalliy vakillik hokimiyatini transformatsiya qilish zaruriyati, uning funksiyalari va amaliy ahamiyati jadvallar hamda sxema orqali tahlil qilinadi; yakunida esa tadqiqot natijalari umumlashtirilib, nazariy va amaliy xulosalar taqdim etiladi.

Tadqiqotning nazariy ahamiyati shundaki, u vakillik hokimiyati fenomenini ijtimoiy-falsafiy kategoriya sifatida tizimli tahlil qilish orqali mazkur sohadagi mavjud bilimlar bazasini boyitadi. Amaliy ahamiyati esa tadqiqot natijalarining mahalliy davlat hokimiyati organlari faoliyatini takomillashtirish, deputatlarni tayyorlash dasturlarini ishlab chiqish hamda fuqarolik jamiyati institutlari bilan hamkorlik mexanizmlarini mustahkamlashda amaliy qo‘llanma sifatida foydalanilishi mumkinligidan iborat.

ADABIYOTLAR TAHLILI

Ilmiy-nazariy jihatdan qaralganda, vakillik hokimiyati tushunchasi ilk bor antik davr falsafasida shakllana boshlagan. Qadimgi yunon mutafakkirlari, jumladan, Aristotel [1] davlat boshqaruvi shakllarini tahlil qilar ekan, jamiyat manfaatlarini ifoda etuvchi institutlar zarurligini ta’kidlagan. Uning fikricha, davlatning asosiy vazifasi umumiy farovonlikni ta’minlash bo‘lib, bu esa faqat jamiyatning turli qatlamlari manfaatlari hisobga olingan holda amalga oshirilishi mumkin. Aristotelning «politik hayvon» (zoon politikon) konsepsiyasi insonning tabiatan ijtimoiy-siyosiy mavjudot ekanligini asoslab, keyinchalik vakillik hokimiyati konsepsiyasining nazariy poydevoriga aylandi.

Yangi davr falsafasida vakillik hokimiyati masalasi yanada chuqurroq ishlab chiqildi. Xususan, Jon Lokk [2, 3] ijtimoiy shartnoma nazariyasi orqali hokimiyatning manbai xalq ekanligini, davlatning vazifasi esa fuqarolarning tabiiy huquqlarini — hayot, erkinlik va mulkni — himoya qilishdan iborat ekanligini asoslab berdi. Lokkning fikricha, agar hokimiyat ushbu ishonchni oqlamasa, xalq uni almashtirish huquqiga ega, bu esa vakillik institutining hisobdorlik tamoyiliga poydevor yaratdi. Sharl Lui Monteskьyo [4] esa hokimiyatlar bo‘linishi nazariyasi orqali qonunchilik, ijro va sud hokimiyatlari o‘rtasidagi muvozanatni asoslab, vakillik organlarining mustaqil va nazorat qiluvchi maqomini ilmiy jihatdan mustahkamladi. Mazkur g‘oya zamonaviy parlamentarizm va mahalliy o‘zini-o‘zi boshqarish tizimlarining konseptual negiziga aylandi.

Keyingi davr ijtimoiy-falsafiy tadqiqotlarida vakillik hokimiyati masalasi legitimlik nazariyasi doirasida ham keng yoritilgan. Legitimlik — hokimiyatning xalq tomonidan tan olinishi va unga ishonch bildirilishi jarayoni sifatida, vakillik institutlarining faoliyat yuritishi uchun zaruriy shart hisoblanadi. Shuningdek, demokratiya nazariyasi doirasida «ishtirokchi demokratiya» konsepsiyasi alohida ahamiyatga ega. Bu konsepsiyaga koʻra, fuqarolar faqat saylovlarda ishtirok etib qolmasdan, balki doimiy ravishda qaror qabul qilish jarayonlarida qatnashishi kerak. Ushbu yondashuv mahalliy darajadagi vakillik organlarining rolini alohida kuchaytiradi, chunki aynan shu darajada fuqarolar bilan bevosita muloqot imkoniyati eng yuqori boʻladi.

Jan-Jak Russo [6] ijtimoiy shartnoma nazariyasini yanada rivojlantirib, «umumiy iroda» (volonté générale) tushunchasini ilgari surdi va xalq suvereniteti hokimiyatning yagona legitim manbai ekanligini asosladi. Russoning fikricha, vakillik hokimiyati samarali boʻlishi uchun u xalq irodasidan uzilib qolmasligi, aksincha uning uzluksiz ifodasi boʻlib qolishi lozim — bu gʻoya zamonaviy ishtirokchi demokratiya konsepsiyasining falsafiy ildizlaridan birini tashkil etadi. XX asrda Yurgen Xabermas [7] kommunikativ harakat nazariyasi orqali hokimiyatning legitimligini jamoat maydonidagi ochiq, erkin va rasional muloqot jarayoni bilan bogʻladi. Xabermas talqinida vakillik institutlari fuqarolar bilan doimiy dialog yuritish orqaligina oʻz legitimligini saqlab qola oladi, aks holda «legitimlik inqirozi» yuzaga kelishi mumkin. Ushbu gʻoya mazkur tadqiqotda mahalliy vakillik organlarining kommunikativ funksiyasini tahlil qilishda nazariy asos sifatida foydalanildi.

Prezidentimiz Sh.M.Mirziyoyev ushbu masalaga doir oʻz nutqlarida quyidagilarni ta’kidlagan: “Xalq hokimiyatchiligi haqidagi konstitutsiyaviy tamoyilning asl mohiyatini barchamiz chuqur anglab yetishimiz zarur. Buning uchun turli darajadagi ijro hokimiyati organlarining xalq vakillari — parlament va mahalliy kengashlar oldida hisobot berish amaliyotini keng joriy qilish kerak. Parlament, vakillik va jamoatchilik nazorati mexanizmlarini yanada rivojlantirishimiz zarur. Har bir davlat xizmatchisi xalq oldida mas’ul ekanini hech qachon unutmasligi lozim” [5]. Mazkur fikr klassik vakillik nazariyalari bilan uzviy bogʻliq boʻlib, hisobdorlik va legitimlik tamoyillarining milliy boshqaruv amaliyotidagi davomiyligini koʻrsatadi.

Umumlashtirib aytganda, adabiyotlar tahlili shuni koʻrsatadiki, vakillik hokimiyati tushunchasi uch bosqichli evolyusion yoʻlni bosib oʻtgan: antik davrda — jamoat manfaatini ifodalovchi institut sifatida; yangi davrda — ijtimoiy shartnoma va hokimiyatlar boʻlinishi nazariyalari orqali huquqiy-falsafiy asoslangan institut sifatida; zamonaviy davrda esa — ishtirokchi demokratiya va raqamli boshqaruv kontekstida doimiy muloqot va hisobdorlikka asoslangan dinamik institut sifatida. Mazkur evolyusion yoʻl maqolaning keyingi boʻlimlarida tahlil qilinadigan metodologik va amaliy masalalarga nazariy asos yaratadi.

Zamonaviy ijtimoiy-falsafiy adabiyotlarda vakillik institutlarini tahlil qilishda «yangi institusionalizm» nazariyasi ham keng qoʻllaniladi. Ushbu nazariyaga koʻra, institutlar nafaqat rasmiy qoidalar majmui, balki jamiyatda shakllangan norasmiy me’yorlar, an’analar va ishonch munosabatlari bilan ham belgilanadi. Mazkur nuqtai nazardan, mahalliy vakillik hokimiyatining samaradorligi faqat qonunchilik bazasining takomillashuvi bilan emas, balki jamiyatda shakllangan siyosiy madaniyat, oʻzaro ishonch va fuqarolik mas’uliyati darajasi bilan ham chambarchas bogʻliq. Shu sababli, institusional islohotlar madaniy-ma’rifiy ishlar bilan uygʻunlikda olib borilishi tavsiya etiladi.

Shuni alohida ta’kidlash lozimki, mavjud adabiyotlarda vakillik hokimiyati koʻpincha konstitutsiyaviy huquq yoki siyosatshunoslik nuqtai nazaridan oʻrganilgan, ijtimoiy-falsafiy, xususan aksiologik tahlil esa nisbatan kam uchraydi. Mazkur maqola aynan ushbu boʻshliqni toʻldirishga, ya’ni vakillik hokimiyatini qadriyatlar va ijtimoiy madaniyat prizmasi orqali tadqiq etishga qaratilgan.

TADQIQOT METODOLOGIYASI

Vakillik hokimiyati fenomeni va uning funksiyalarini muvaffaqiyatli tadqiq etish uchun faqat huquqiy yoki siyosiy yondashuvlar yetarli emas, balki kompleks va sistematik ijtimoiy-falsafiy metodologiya talab etiladi. Ushbu tadqiqotda dialektik, aksiologik, sinergetik va germenevtik yondashuvlarning integratsiyasidan foydalanildi. Mazkur metodologik plyuralizm tadqiqot ob’yektining — vakillik hokimiyatining — koʻp qirrali tabiatini, ya’ni uning bir vaqtning oʻzida ham huquqiy, ham ijtimoiy, ham aksiologik, ham kommunikativ hodisa ekanligini inobatga olgan holda tanlandi.

Dialektik yondashuv vakillik hokimiyatini statik hodisa emas, balki ob’yektiv va sub’yektiv omillar ta’sirida doimiy rivojlanuvchi, ichki ziddiyatlar orqali takomillashuvchi jarayon sifatida koʻrib chiqish imkonini berdi. Bu yondashuv asosida markazlashgan va nomarkazlashgan boshqaruv modellari oʻrtasidagi ziddiyatlar, shuningdek an’anaviy va raqamli muloqot shakllari oʻrtasidagi oʻzaro ta’sir tahlil qilindi.

Aksiologik yondashuv vakillik hokimiyatini inson qadri, adolat va tenglik kabi fundamental qadriyatlar prizmasi orqali baholashga imkon berdi. Ushbu yondashuv doirasida vakillik institutlarining samaradorligi nafaqat miqdoriy koʻrsatkichlar (masalan, qabul qilingan qarorlar soni), balki sifatiy mezonlar — fuqarolar ishonchi, ijtimoiy adolat darajasi, inson manfaatlarining himoyalanganligi — asosida baholandi.

Sinergetik yondashuv vakillik hokimiyatini oʻz-oʻzini tashkillashtiruvchi va rivojlantiruvchi murakkab ijtimoiy tizim sifatida tahlil qilish imkonini berdi. Bu nuqtai nazardan, mahalliy vakillik organlarining transformatsiyasi chiziqli emas,

balki turli ijtimoiy, iqtisodiy va texnologik omillarning o‘zaro ta’siri natijasida yuzaga keladigan noaniq (nomuvozanat) jarayon sifatida baholandi.

Germenevtik yondashuv esa me’yoriy-huquqiy hujjatlar, rasmiy nutqlar va statistik ma’lumotlarni izohlash va ularning ijtimoiy-falsafiy mazmunini ochib berishda qo‘llanildi. Tadqiqot jarayonida qiyosiy tahlil, mazmuniy tahlil (kontent-tahlil) va tizimli tahlil usullaridan foydalanildi. Ma’lumotlar manbai sifatida falsafiy-nazariy adabiyotlar, me’yoriy-huquqiy hujjatlar (O‘zbekiston Respublikasi Konstitutsiyasi, tegishli qonunlar), Prezident Sh.M.Mirziyoyevning rasmiy nutqlari hamda mahalliy vakillik organlari faoliyatiga oid rasmiy statistik ma’lumotlar qo‘llanildi.

Tadqiqotning cheklovlari haqida ham aytib o‘tish lozim: mazkur maqola asosan falsafiy-nazariy tahlilga asoslangan bo‘lib, keng ko‘lamli sosiologik so‘rovnoma ma’lumotlarini o‘z ichiga olmaydi. Shu bois, tadqiqot natijalari umumnazariy xulosalar darajasida shakllantirilgan bo‘lib, ularni empirik jihatdan tasdiqlash kelgusi tadqiqotlarning vazifasi hisoblanadi. Shunga qaramay, qo‘llanilgan germenevtik va qiyosiy tahlil usullari mavjud nazariy va me’yoriy manbalar asosida ishonchli xulosalar chiqarish imkonini berdi.

NATIJALAR VA ULARNING TAHLILI

O‘zbekistonda mahalliy vakillik hokimiyatini transformatsiya qilishning ijtimoiy-falsafiy zaruriyati milliy va global jarayonlar kontekstida chuqur tahlil qilinadi. Davlat va jamiyat hayotini modernizatsiya qilish sharoitida eskirgan markazlashgan boshqaruv modelidan samarali va nomarkazlashgan boshqaruv tizimiga o‘tish ob’yektiv zaruriyatga aylandi. Ijtimoiy transformatsiyaning falsafiy mohiyati shundaki, u mahalliy Kengashlarni rahbariyat buyrug‘ini ijro etuvchi organ emas, balki aholining haqiqiy manfaatlarini himoya qiluvchi mustaqil vakillik institutiga aylantiradi. Mahalliy darajada vakillik hokimiyatining kuchaytirilishi jamiyatda ijtimoiy adolat, oshkoralik va fuqarolarning siyosiy-huquqiy faolligini oshirishga xizmat qiladi. Transformatsiya jarayonining ob’yektiv va sub’yektiv omillari, tizimdagi ijtimoiy ziddiyatlar va ularni bartaraf etishning falsafiy asoslari quyida batafsil ko‘rib chiqiladi. Bu esa Yangi O‘zbekistonning strategik taraqqiyot maqsadlariga to‘liq mos keladi.

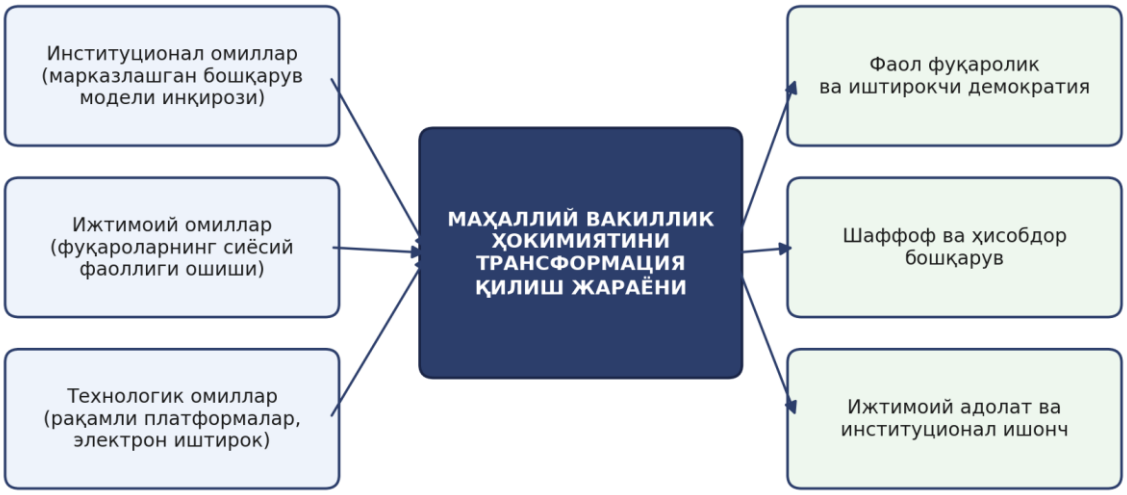
Mazkur tadqiqot vakillik hokimiyati funksiyalarining falsafiy talqiniga bag‘ishlangan bo‘lib, unda mahalliy vakillik organlari bajaradigan ijtimoiy, siyosiy va ma’naviy vazifalar tasniflanadi. Vakillik hokimiyatining funksiyalari shunchaki qonunchilikda belgilangan vakolatlar to‘plami bo‘lmay, balki jamiyat va davlat munosabatlaridagi muvozanatni ta’minlovchi ijtimoiy mexanizmdir. Bunda kommunikativ, integrasion, nazorat va legitimlashtiruvchi funksiyalarning ijtimoiy-falsafiy mohiyati ochib beriladi. Mazkur to‘rt funksiya o‘zaro uzviy bog‘liq bo‘lib, ularning har biri vakillik institutining umumiy samaradorligiga ta’sir ko‘rsatadi (1-jadvalga qarang).

1-jadval. Vakillik hokimiyatining ijtimoiy-falsafiy funksiyalari

№	Funksiya	Mazmuni
1	Kommunikativ	Aholi bilan uzluksiz muloqot yuritish, fikr-mulohazalarni qaror qabul qilish jarayonida inobatga olish.
2	Integrasion	Jamiyatdagi turli ijtimoiy guruhlar manfaatlarini muvofiqlashtirish va yagona siyosiy-huquqiy maydonga birlashtirish.
3	Nazorat	Ijro hokimiyati faoliyati ustidan jamoatchilik nazoratini amalga oshirish, suiste’molliklarning oldini olish.
4	Legitimlashtiruvchi	Hokimiyatning xalq tomonidan tan olinishi va unga nisbatan ishonch shakllanishini ta’minlash.

Funksiyalarning har birini alohida ko‘rib chiqadigan bo‘lsak, kommunikativ funksiya vakillik organlarining aholi bilan uzluksiz muloqot yuritish, ularning fikr-mulohazalarini qabul qilish va qaror qabul qilish jarayonida inobatga olish vazifasini anglatadi. Integrasion funksiya esa jamiyatdagi turli ijtimoiy guruhlar, etnik va ijtimoiy qatlamlar manfaatlarini muvofiqlashtirish va ularni yagona siyosiy-huquqiy maydonga birlashtirishga xizmat qiladi. Nazorat funksiyasi ijro hokimiyati organlarining faoliyati ustidan jamoatchilik nazoratini amalga oshirish, korrupsiya va suiste’molchilikning oldini olishga qaratilgan. Legitimlashtiruvchi funksiya esa hokimiyatning xalq tomonidan tan olinishi va unga ishonch bildirilishini ta’minlaydigan eng muhim vazifa hisoblanadi. Mazkur to‘rt funksiyaning har biri alohida emas, balki bir-birini to‘ldiruvchi yaxlit tizim sifatida faoliyat yuritgandagina, vakillik hokimiyati o‘z mohiyatini to‘liq namoyon qila oladi.

1-jadvalda keltirilgan funksiyalarning amaliy ifodasini deputatlarning kundalik faoliyatida kuzatish mumkin. Deputatlar saylovchilar bilan uchrashuvlar o‘tkazib, ularning muammolarini o‘rganadilar va tegishli organlarga yetkazadilar. Mahalliy Kengashlarning ijtimoiy nazorat qilish funksiyasi hokimiyat suiste’molliklarining oldini oluvchi hamda ijtimoiy barqarorlikni saqlovchi vosita sifatida talqin etiladi. Shu o‘rinda, vakillik hokimiyatining transformatsiyasi



masalasiga ham alohida e’tibor qaratish zarur, chunki zamonaviy globallashuv sharoitida bu institut yangi chaqiriqlar va vazifalarga duch kelmoqda.

Axborot texnologiyalarining rivojlanishi, ijtimoiy tarmoqlarning keng tarqalishi fuqarolarning siyosiy faolligini oshirmoqda. Bu esa vakillik hokimiyatidan yanada ochiqlik va hisobdorlikni talab qiladi. Onlayn petisiyalar, elektron saylov tizimlari va raqamli platformalar orqali fuqarolar davlat boshqaruvida bevosita ishtirok eta boshladilar. O‘zbekiston sharoitida mazkur transformatsiyaning zaruriyati bir nechta omillar bilan izohlanadi — bu omillar institusional, ijtimoiy, iqtisodiy va texnologik tavsifga ega bo‘lib, 2-jadvalda umumlashtirilgan.

2-jadval. Mahalliy vakillik hokimiyatini transformatsiya qilish zaruriyatining omillari

№	Omil turi	Tavsifi
1	Institusional omillar	Markazlashgan va ijro hokimiyatiga qaram boshqaruv modelining zamonaviy talablarga javob bermay qolishi.
2	Ijtimoiy omillar	Fuqarolarning siyosiy-huquqiy ongi va ijtimoiy faolligining ortib borishi.
3	Iqtisodiy omillar	Mahalliy darajada resurslarni samarali taqsimlash va ijtimoiy-iqtisodiy rivojlanishni ta’minlash ehtiyoji.
4	Texnologik omillar	Raqamli platformalar, elektron xizmatlar va onlayn ishtirok vositalarining rivojlanishi.

2-jadvalda keltirilgan omillarning o‘zaro ta’siri natijasida yuzaga keladigan transformatsiya jarayonining umumiy modeli 1-rasmda tasvirlangan. Ko‘rinib turibdiki, institusional, ijtimoiy va texnologik omillar mahalliy vakillik hokimiyatining transformatsiya jarayoniga bevosita ta’sir ko‘rsatadi, bu jarayon o‘z navbatida faol fuqarolik, shaffof boshqaruv va ijtimoiy adolatning qaror topishiga olib keladi.

1-rasm. Mahalliy vakillik hokimiyatini transformatsiya qilish modeli

Xalqaro tajribaga nazar tashlasak, mahalliy vakillik organlarining raqamli transformatsiyasi turli mamlakatlarda turlicha modellar orqali amalga oshirilmoqda. Xususan, Estoniya tajribasida elektron hukumat tizimi orqali fuqarolar mahalliy byudjet taqsimotida bevosita ishtirok etish imkoniga ega bo‘lgan, bu esa fuqarolar ishonchini sezilarli darajada oshirgan. Finlyandiya va Skandinaviya davlatlarida qo‘llanilayotgan «ishtirokchi byudjetlashtirish» (participatory budgeting) amaliyoti esa aholining mahalliy darajadagi qarorlar qabul qilish jarayoniga bevosita jalb etilishining samarali modelini namoyish etadi. Mazkur tajribalar shuni ko‘rsatadiki, vakillik hokimiyatining transformatsiyasi universal sxema bo‘yicha emas, balki har bir mamlakatning milliy-madaniy xususiyatlarini hisobga olgan holda amalga oshirilishi lozim. O‘zbekiston sharoitida bu borada mahalla institutining an’anaviy roli, oshkoralik va jamoatchilik nazorati mexanizmlarining milliy xususiyatlari alohida ahamiyat kasb etadi.

Mahalliy vakillik organlari faoliyatining samaradorligini baholash uchun ilmiy jihatdan asoslangan mezonlar tizimini ishlab chiqish zarur. Mazkur tadqiqot doirasida ijtimoiy-falsafiy tahlil asosida quyidagi baholash mezonlari taklif etiladi: deputatlarning saylovchilar bilan muloqot chastotasi va sifati; qabul qilingan qarorlarning amaliyotga tatbiq etilish

darajasi; aholining mahalliy Kengash faoliyatidan qoniqish darajasi; oshkoralik va axborot ochiqligi ko‘rsatkichlari; raqamli xizmatlardan foydalanish ko‘lami. Ushbu mezonlar 3-jadvalda umumlashtirilgan.

3-jadval. Mahalliy vakillik organlari faoliyatini baholash mezonlari

№	Mezon	Tavsifi
1	Muloqot chastotasi va sifati	Deputatlarning saylovchilar bilan uchrashuvlari soni va ularning natijadorligi.
2	Qarorlarning tatbiq etilishi	Qabul qilingan qarorlarning amaliyotga to‘liq joriy etilish darajasi.
3	Aholi qoniqishi	Fuqarolarning mahalliy Kengash faoliyatidan qoniqish darajasi (so‘rovnoma asosida).
4	Oshkoralik	Byudjet va qarorlar to‘g‘risidagi axborotning ochiqligi hamda foydalanuvchanligi.
5	Raqamli qamrov	Elektron xizmatlar va onlayn platformalardan foydalanuvchilar ulushi.

Mazkur jarayonning ilmiy-nazariy asoslari bir nechta fundamental konsepsiyalarga tayanadi. Jumladan, ijtimoiy shartnoma nazariyasiga ko‘ra, davlat hokimiyati xalq irodasiga asoslanishi kerak. Bu esa vakillik institutlarining rivojlanishini taqozo etadi. Mahalliy vakillik organlari esa ushbu irodaning eng quyi, ya’ni fuqaroga eng yaqin darajadagi ifodasi hisoblanadi. Shuningdek, demokratiya nazariyasi doirasida «ishtirokchi demokratiya» konsepsiyasi alohida ahamiyatga ega. Bu konsepsiyaga ko‘ra, fuqarolar faqat saylovlarda ishtirok etib qolmasdan, balki doimiy ravishda qaror qabul qilish jarayonlarida qatnashishi kerak. O‘zbekistonda mahalliy kengashlar faoliyatini kuchaytirish orqali aynan shu maqsadga erishish ko‘zda tutilmoqda.

Mazkur jarayonni chuqurroq anglash uchun, mahalliy vakillik hokimiyati transformatsiyasining ijtimoiy-falsafiy zaruriyatini faqat institusional o‘zgarishlar bilan cheklab qo‘ymasdan, balki uning ong, qadriyatlar va ijtimoiy munosabatlar tizimidagi o‘zgarishlar bilan uzviy bog‘liqligini ham ko‘rib chiqish lozim. Chunki har qanday institusional islohot, agar u jamiyat a’zolarining dunyoqarashi va siyosiy madaniyatida aks etmasa, samarali natija bermasligi mumkin. Shu nuqtai nazardan, O‘zbekistonda mahalliy vakillik hokimiyatini transformatsiya qilish jarayoni, avvalo, fuqarolarning siyosiy ongi va faolligini oshirish bilan bog‘liq. Ilgari ko‘p hollarda aholi davlat boshqaruvida passiv ishtirok etgan bo‘lsa, bugungi kunda fuqarolar o‘z manfaatlarini himoya qilishda faol pozisiyani egallamoqda. Bu esa mahalliy vakillik organlaridan faqat rasmiy funksiyalarni bajarishni emas, balki haqiqiy muloqot maydoniga aylanishni talab etadi.

Transformatsiya jarayonida institusional xotira va vorisiylik masalasiga ham e’tibor qaratish lozim. Ya’ni, yangi islohotlar amalga oshirilayotganda, avvalgi tajribalar va erishilgan natijalar inobatga olinishi kerak. Bu esa xatolarni takrorlamaslik va samarali yo‘lni tanlash imkonini beradi. Amaliy jihatdan qaraganda, mahalliy vakillik organlarining faoliyatini baholash mezonlarini ishlab chiqish ham muhim vazifa hisoblanadi. Deputatlarning faolligi, qabul qilingan qarorlarning samaradorligi, aholi qoniqish darajasi kabi ko‘rsatkichlar asosida tahlil olib borish mumkin. Bu esa boshqaruv sifatini oshirishga xizmat qiladi.

Vakillik hokimiyati fenomeni jamiyat rivojining muayyan bosqichida yuzaga keladigan, davlat va fuqaro o‘rtasidagi ijtimoiy munosabatlarni tartibga soluvchi muhim ijtimoiy-ontologik hodisadir. Uning fundamental metodologik asosi insonning o‘z suveren huquqlarini jamoaviy manfaatlar yo‘lida muayyan vakillik tuzilmalariga ishonib topshirishi (delegat qilishi) tamoyiliga tayanadi. Mahalliy darajada vakillik hokimiyati fuqarolarning davlat boshqaruvidagi bevosita va bilvosita ishtirokini muvofiqlashtiruvchi markaziy bo‘g‘in bo‘lib, u hokimiyat legitimligining birlamchi va asosiy manbai hisoblanadi. Bu esa vakillik fenomenini faqat yuridik nuqtai nazardan emas, balki aholining ongli ishtirokini ta’minlovchi ijtimoiy-falsafiy hodisa sifatida qabul qilishni talab etadi.

Mahalliy vakillik hokimiyatining nazariy-metodologik negizlarini tadqiq etish shuni ko‘rsatadiki, klassik falsafiy konsepsiyalar, xususan, ijtimoiy shartnoma va xalq suvereniteti nazariyalari bugungi kunda ham o‘z dolzarbligini yo‘qotgani yo‘q. Fuqarolar va mahalliy vakillik organlari o‘rtasidagi munosabatlar aslida o‘zaro mas’uliyat va majburiyatlarga asoslangan ijtimoiy shartnomaning mahalliy darajadagi ko‘rinishidir. Ijtimoiy shartnoma mexanizmining mahalliy darajada to‘g‘ri yo‘lga qo‘yilishi fuqarolarning hokimiyatga bo‘lgan ishonchini orttiradi va byurokratik aynishni oldini oluvchi eng muhim falsafiy-huquqiy kafolatga aylanadi.

Shu bilan birga, transformatsiya jarayonida yuzaga kelishi mumkin bo‘lgan xavf va to‘siqlarni ham e’tibordan chetda qoldirmaslik lozim. Birinchi xavf — byurokratik inersiya va ma’muriy qarshilik bo‘lib, u eskirgan boshqaruv uslublariga o‘rganib qolgan mansabdor shaxslarning yangi, ochiq va hisobdor modelga o‘tishga bo‘lgan ichki qarshiligida namoyon

bo‘ladi. Ikkinchi xavf — raqamli tafovut (digital divide) muammosi, ya’ni aholining turli qatlamlari, ayniqsa qishloq joylarida yashovchi va yoshi katta fuqarolar o‘rtasida raqamli platformalardan foydalanish imkoniyatlarining notekis taqsimlanishidir. Agar vakillik hokimiyatining raqamli transformatsiyasi faqat texnologik jihatdan ko‘rib chiqilib, ijtimoiy-madaniy omillar inobatga olinmasa, bu yangi turdagi ijtimoiy cheklanishni — «raqamli notenglikni» — yuzaga keltirishi mumkin. Uchinchi xavf — mintaqaviy tafovutlar bo‘lib, yirik shaharlar bilan chekka tumanlar o‘rtasida infratuzilma va kadrlar salohiyati borasidagi farq transformatsiya jarayonining bir tekis bormasligiga olib kelishi mumkin. Ushbu xavflarni bartaraf etish uchun differensiallashgan, har bir hududning o‘ziga xos xususiyatlarini hisobga oluvchi yondashuv zarur.

Vakillik hokimiyatining ijtimoiy-falsafiy transformatsiyasi doirasida yoshlar va ayollarning siyosiy ishtiroki masalasi alohida ahamiyat kasb etadi. Jamiyatning turli ijtimoiy-demografik guruhlari manfaatlarini teng darajada ifoda etish vakillik institutining legitimligini mustahkamlovchi muhim omildir. Agar mahalliy Kengashlar tarkibida yoshlar va ayollarning ishtiroki cheklangan bo‘lsa, bu vakillik tamoyilining to‘liq amalga oshmasligidan dalolat beradi. Shu bois, nomzodlarni tanlash va tayyorlash jarayonlarida gender va yosh mutanosibligini ta’minlash, shuningdek yoshlar parlamenti va maslahat kengashlari kabi qo‘shimcha ishtirok mexanizmlarini rivojlantirish vakillik hokimiyatining insonparvarlik mazmunini chuqurlashtirishga xizmat qiladi.

Tadqiqot natijalarini nazariy adabiyotlar bilan qiyoslaganda, bir qator mos keluvchi jihatlarni kuzatish mumkin. Xabermasning kommunikativ legitimlik konsepsiyasi mazkur tadqiqotda aniqlangan kommunikativ funksiyaning markaziy ahamiyatini tasdiqlaydi — fuqarolar bilan doimiy va ochiq muloqot yurita olmagan vakillik organi o‘z legitimligini asta-sekin yo‘qota boradi. Shu bilan birga, Russoning «umumiy iroda» konsepsiyasi bilan taqqoslaganda, tadqiqot natijalari shuni ko‘rsatadiki, zamonaviy sharoitda «umumiy iroda»ni aniqlashning yagona to‘g‘ri yo‘li mavjud emas — bu jarayon doimiy ravishda sosiologik monitoring, jamoatchilik eshituvlari va raqamli platformalar orqali qayta-qayta aniqlashtirilishi lozim bo‘lgan dinamik hodisadir. Mazkur xulosa klassik ijtimoiy shartnoma nazariyasini zamonaviy institusional amaliyot bilan boyitadi va vakillik hokimiyati nazariyasiga methodologik hissa qo‘shadi.

Ushbu konseptual model, aslida, vakillik hokimiyatining klassik nazariy negizlari bilan zamonaviy boshqaruv amaliyoti o‘rtasidagi ko‘prik vazifasini o‘taydi. U bir tomondan Aristotel, Lokk, Monteskьyo va Russoning falsafiy merosiga tayansa, ikkinchi tomondan O‘zbekistonning o‘ziga xos ijtimoiy-madaniy va institusional sharoitlarini hisobga oladi. Aynan shu uyg‘unlik — universal falsafiy negiz va milliy kontekstning birlashuvi — mazkur tadqiqotning metodologik o‘ziga xosligini belgilaydi hamda uning natijalarini boshqa mintaqaviy tadqiqotlar uchun ham qo‘llaniladigan nazariy asos sifatida ko‘rib chiqish imkonini beradi.

XULOSALAR

O‘tkazilgan tadqiqot yakunida quyidagi xulosalarga kelish mumkin. Birinchidan, vakillik hokimiyati fenomeni faqat huquqiy-institusional hodisa emas, balki antik davr falsafasidan boshlab shakllanib kelgan, ijtimoiy shartnoma, legitimlik va ishtirokchi demokratiya nazariyalari bilan uzviy bog‘liq bo‘lgan kompleks ijtimoiy-falsafiy kategoriyadir.

Ikkinchidan, vakillik hokimiyatining kommunikativ, integrasion, nazorat va legitimlashtiruvchi funksiyalari o‘zaro uyg‘unlikda amalga oshirilgandagina, mazkur institut jamiyat va davlat o‘rtasidagi muvozanatni ta’minlovchi samarali mexanizmga aylanadi. Ushbu funksiyalarni faqat rasmiy-huquqiy emas, balki aksiologik prizma orqali qayta anglash vakillik organlarining ijtimoiy mas’uliyatini oshiradi.

Uchinchidan, O‘zbekistonda mahalliy vakillik hokimiyatini transformatsiya qilish jarayoni institusional, ijtimoiy va texnologik omillarning o‘zaro ta’siri natijasida yuzaga kelgan ob’yektiv zaruriyatdir. Bu jarayon muvaffaqiyatli amalga oshishi uchun nafaqat qonunchilik va tashkiliy o‘zgarishlar, balki fuqarolarning siyosiy ongi, madaniyati va faolligini oshirish ham zarur shart hisoblanadi.

To‘rtinchidan, dialektik, aksiologik, sinergetik va germenevtik yondashuvlarning integratsiyasiga asoslangan metodologiya vakillik hokimiyati transformatsiyasining murakkab va ko‘p qirrali tabiatini ochib berishda samarali natija beradi hamda kelgusi tadqiqotlar uchun metodologik asos bo‘lib xizmat qilishi mumkin.

Amaliy ahamiyati nuqtai nazaridan, tadqiqot natijalari mahalliy vakillik organlari faoliyatini baholash mezonlarini ishlab chiqishda, deputatlarning vakolatlari va mas’uliyatini aniqlashtirishda, shuningdek raqamli boshqaruv vositalarini joriy etish strategiyasini takomillashtirishda qo‘llanilishi mumkin. Kelgusi tadqiqotlarda mazkur masalani sosiologik so‘rovlar va empirik ma’lumotlar asosida chuqurlashtirish, shuningdek xorijiy davlatlarning mahalliy boshqaruv tajribasini qiyosiy tahlil qilish istiqbolli yo‘nalish bo‘lishi mumkin.

Shuningdek, tadqiqot davomida aniqlangan xavf va to‘siqlar — byurokratik inersiya, raqamli tafovut va mintaqaviy nomutanosiblik — transformatsiya strategiyasini ishlab chiqishda alohida e’tiborga olinishi lozim bo‘lgan omillar sifatida baholandi. Yoshlar va ayollarning vakillik organlaridagi ishtirokini kengaytirish esa institutning ijtimoiy vakillik tamoyilini to‘laqonli amalga oshirishning zaruriy sharti hisoblanadi.

RAHBAR KADRLAR AXLOQIY MAS'ULIYATI — DAVLAT BOSHQARUVIDA IJTIMOIY-MA'NAVIY BARQARORLIK OMILI

Arzimatova I.M.
Farg'ona davlat universiteti professori, falsafa fanlari doktori (DSc)
E-mail: arzimatova1969@gmail.com

Annotatsiya: *Mazkur maqolada davlat boshqaruvidagi ijtimoiy-ma'naviy muammolar va ularning kelib chiqish omillari, rahbar kadrlar axloqiy mas'uliyatining mazmun-mohiyati hamda uni rivojlantirishning davlat boshqaruvi samaradorligi va jamiyat ijtimoiy-ma'naviy barqarorligini ta'minlashdagi ahamiyati tahlil qilinadi. Shuningdek, rahbar kadrlarda axloqiy mas'uliyatni yuksaltirishning ustuvor yo'nalishlari va istiqbollari yuzasidan ilmiy-nazariy xulosa va takliflar ishlab chiqishga e'tibor qaratiladi.*

Kalit so'zlar: *globallashuv, raqamlashuv sharoiti, ijtimoiy-siyosiy transformatsiyalar, davlat boshqaruvi, boshqaruv mexanizmlari, rahbar kadrlar, axloqiy-ma'naviy fazilatlar, axloqiy mas'uliyat, adolatparvarlik, halollik, manfaatlar to'qnashuvi, korrupsiyaviy holatlar.*

ЭТИЧЕСКАЯ ОТВЕТСТВЕННОСТЬ РУКОВОДЯЩИХ КАДРОВ — ФАКТОР СОЦИАЛЬНО-ДУХОВНОЙ СТАБИЛЬНОСТИ В ГОСУДАРСТВЕННОМ УПРАВЛЕНИИ

Аннотация: *В данной статье анализируются социально-духовные проблемы в системе государственного управления и факторы их возникновения, сущность и содержание этической ответственности руководящих кадров, а также значение её развития в обеспечении эффективности государственного управления и социально-духовной стабильности общества. Особое внимание уделяется разработке научно-теоретических выводов и предложений относительно приоритетных направлений и перспектив повышения уровня этической ответственности руководящих кадров.*

Ключевые слова: *глобализация, условия цифровизации, социально-политические трансформации, государственное управление, механизмы управления, руководящие кадры, нравственно-этические качества, этическая ответственность, справедливость, честность, конфликт интересов, коррупционные проявления.*

ETHICAL RESPONSIBILITY OF MANAGERIAL PERSONNEL AS A FACTOR OF SOCIO-SPIRITUAL STABILITY IN PUBLIC ADMINISTRATION

Abstract: *This article analyzes the socio-spiritual problems in public administration and the factors contributing to their emergence, the essence and content of the ethical responsibility of managerial personnel, as well as the importance of developing such responsibility in ensuring the effectiveness of public administration and the socio-spiritual stability of society. Particular attention is paid to developing theoretical and research-based conclusions and proposals concerning the priority areas and prospects for enhancing the ethical responsibility of managerial personnel.*

Keywords: *globalization, digitalization, socio-political transformations, public administration, governance mechanisms, managerial personnel, moral and ethical qualities, ethical responsibility, commitment to justice, integrity, conflict of interest, manifestations of corruption.*

Bugungi globallashuv, raqamlashuv va ijtimoiy-siyosiy transformatsiyalar sharoitida davlat boshqaruvi tizimi oldida turgan vazifalar nafaqat boshqaruv mexanizmlarini takomillashtirish, balki rahbar kadrlarning axloqiy-ma'naviy fazilatlarini yuksaltirishni ham taqozo etmoqda. Jamiyat taraqqiyotining barqarorligi, davlat institutlariga bo'lgan ishonch va ijtimoiy hamjihatlik ko'p jihatdan davlat boshqaruvida qaror qabul qiluvchi shaxslarning kasbiy salohiyati bilan bir qatorda, ularning axloqiy mas'uliyati, adolatparvarligi, halolligi va jamoat manfaatlariga sadoqatiga bog'liq. Shu nuqtai nazardan, rahbar kadrlarning axloqiy mas'uliyatini davlat boshqaruvi samaradorligini ta'minlovchi muhim ijtimoiy-ma'naviy omil sifatida tadqiq etish dolzarb ilmiy masalalardan biri hisoblanadi.

Zamonaviy davlat boshqaruvida byurokratik yondashuv, manfaatlar to'qnashuvi, korrupsiyaviy holatlar, shaxsiy manfaatlarni jamoat manfaatlaridan ustun qo'yish, mas'uliyatsizlik va qarorlar qabul qilishda adolat mezonlarining buzilishi kabi ijtimoiy-ma'naviy muammolar boshqaruv samaradorligiga salbiy ta'sir ko'rsatishi mumkin. Bunday holatlar

nafaqat davlat organlarining faoliyatiga, balki fuqarolarning davlat institutlariga bo‘lgan ishonchi, jamiyatdagi ijtimoiy adolat va ma’naviy muhitga ham ta’sir etadi. Shu bois rahbar kadrlarning axloqiy mas’uliyatini shakllantirish va rivojlantirish davlat boshqaruvida salbiy tendensiyalarning oldini olish, boshqaruv madaniyatini yuksaltirish hamda ijtimoiy-ma’naviy barqarorlikni ta’minlashning muhim sharti sifatida namoyon bo‘ladi. Axloqiy mas’uliyat rahbarning o‘z xizmat vazifalarini faqat huquqiy me’yorlar doirasida bajarishi bilan cheklanmay, qabul qilayotgan qarorlarining ijtimoiy oqibatlarini anglashi, jamoat manfaatlarini ustuvor qo‘yishi, adolat va halollik tamoyillariga amal qilishi, o‘z faoliyati uchun jamiyat va davlat oldida ma’naviy javobgarlikni his etishini ham nazarda tutadi. Shu ma’noda, rahbar kadrning axloqiy mas’uliyati huquqiy mas’uliyatni to‘ldiruvchi va uning mazmun-mohiyatini boyituvchi ijtimoiy-ma’naviy kategoriya sifatida namoyon bo‘ladi.

ADABIYOTLAR TAHLILI VA METODLAR

Rahbar kadrlar axloqiy mas’uliyati, davlat boshqaruvi madaniyati va jamiyatning ijtimoiy-ma’naviy taraqqiyoti bilan bog‘liq masalalarni o‘rganishda Sh.M. Mirziyoyev [1], «Yangi O‘zbekiston gazetasi» 2023 yil 22 fevral, 36-son [2, 5, 6], Berdiev B. [3, 4] kabi mualliflarning ilmiy va nazariy qarashlaridan foydalanildi. Mazkur manbalarda insonning ma’naviy dunyosi, ijtimoiy munosabatlar, boshqaruv jarayonlari, zamonaviy jamiyat transformatsiyasi va shaxs mas’uliyati bilan bog‘liq masalalar turli nuqtai nazarlardan yoritilgan.

Tadqiqotning metodologik asosini tizimlilik, tarixiylik va umumiy o‘zaro aloqadorlik tamoyillari tashkil etadi. Shuningdek, tahlil va sintez, umumlashtirish, qiyosiy yondashuv kabi umumilmiy usullardan foydalanildi.

NATIJALAR VA MUHOKAMA

Davlat boshqaruvi jamiyatning siyosiy, iqtisodiy va ma’naviy taraqqiyotini ta’minlovchi murakkab ijtimoiy tizim hisoblanadi. Uning samaradorligi nafaqat institutsional mexanizmlar va huquqiy me’yorlarga, balki ushbu tizimni amalga oshiruvchi rahbar kadrlarning kasbiy va axloqiy salohiyatiga ham bog‘liq. Shu ma’noda, rahbar kadrning axloqiy mas’uliyati davlat boshqaruvi samaradorligini ta’minlovchi muhim ijtimoiy-ma’naviy omil sifatida namoyon bo‘ladi. Zero, davlatimiz rahbari Sh.Mirziyoyev ta’kidlaganidek, “Eng asosiysi, islohotlarimiz natijasini yurtimizda yashayotgan har bir inson, har bir oila o‘z kundalik hayotida his etishi kerak. Biz barcha bo‘g‘indagi rahbarlar qog‘ozdagi hisobotlar, foiz va raqamlar ortidan quvmasdan, har qaysi fuqaro uchun, uning hayotiy ehtiyoj va orzu-umidlarini ro‘yobga chiqarish uchun ishlaydigan boshqaruv tizimini yaratishimiz kerak” [1, 30]. Bu yondashuv rahbar mas’uliyatining mohiyatini aniq ifodalaydi: rahbarlik lavozimi avvalo imtiyoz yoki maqom emas, balki jamiyat va inson oldidagi mas’uliyatdir.

Rahbar shaxsning axloqiy mas’uliyatini oshirish istiqbollari yosh avlodni ma’naviy yetuk qilib tarbiyalash, inson kapitaliga sarmoya kiritish bilan ham chambarchas bog‘liq. Zero, kelajak rahbarlari bugungi yoshlar orasidan yetishib chiqadi. Ularni halollik, vatanparvarlik, adolatparvarlik, mas’uliyatlilik ruhida tarbiyalash - ertangi kun uchun eng katta investitsiyadir. Yoshlarni ma’rifatli, bilimli, ijtimoiy faolligi yuqori, vijdonli kishilar sifatida shakllantirish orqali davlat boshqaruvidagi ma’naviy muammolarni ildizidan bartaraf etish mumkin. Shu bilan birga, davlat boshqaruvida ijtimoiy-ma’naviy muammolarni bartaraf etishning eng samarali yo‘li - rahbar kadrlarning axloqiy mas’uliyatini mustahkamlashdir. Vijdoni uyg‘oq, halol, mas’uliyatli rahbar - jamiyatning eng katta kapitali, taraqqiyotning bosh manbai hisoblanadi. Shunday rahbarlar ko‘paygani sari davlat boshqaruvi yanada adolatli, shaffof va samarali bo‘ladi, millatning ma’naviy qudrati ortadi, jamiyatning davlatga bo‘lgan ishonchi mustahkamlanadi. Axloqiy mas’uliyatni yuksaltirish - kelajakning chinakam barqarorligi va taraqqiyoti uchun poydevordir.

Ayni vaqtda, rahbar doimo sezgir va hushyor bo‘lib, qabul qilayotgan har qanday qarorini yetti marta o‘lchab, bir marta kesib, ularning oqibatini o‘ziga puxta tasavvur qilishi, shu yurtni, shu tuproqni asrab-avaylab yashashi shart. Buning uchun esa rahbarning aql-zakovati, bilimi va tajribasi yetarli, fikrlash doirasi albatta keng bo‘lishi lozim. Boshlagan ishlarini oxiriga yetkazish, o‘ziga ishonch bildirgan odamlarning orzu-umidlarini ruyobga chiqarishda qat’iyatliligini namoyon etishi, irodasi baquvvat, e’tiqodi butun bo‘lishi kerak.

Yaxshi niyat bilan mehnat qilayotgan odamlarning boshini qovushtirish, ko‘nglini ko‘tarish, ishni oqilona tashkil qilish, bir so‘z bilan aytganda, qiyinchiliklarda toblangan va suyagi qotgan, or-nomusli o‘zbek xalqi oldiga amaliy rejalar va katta marralarni qo‘yib, ularni shu maqsad sari boshlash avvalo rahbarning vazifasi bo‘lishi kerak. Ana shunday mas’uliyatni o‘z zimmasiga oladigan, o‘zi yashayotgan hududni obod qilishga bel bog‘lagan, shu yurt mening, oilamning, bolalarimning vatani degan fikr bilan yashaydigan odamlarni aynan yetakchi ruhlantirishi, zarur bo‘lganda, ularni himoyalashi kerak. Bu vazifalarning amalga oshirilishi, avvalo, jamiyatimizda tinchlik, ijtimoiy-siyosiy barqarorlik, xavfsizlikning ta’minlanishi bilan bog‘liqdir. “Bunday vaziyatda har bir rahbardan ogohlik, o‘ta hushyorlik, aholining turmush darajasidan tortib ma’naviy holatini xolis baholab, ularni yaxshilash va sog‘lomlashtirish bo‘yicha tegishli chora-tadbirlarni ko‘rish talab etiladi. Bu barqaror taraqqiyotni, milliy xavfsizlikni ta’minlashning eng muhim sharti ekanini aslo unutmasligimiz kerak” [2, 36-son].

Rahbar mas’uliyati, rahbar va fuqaro o‘rtasidagi munosabatlar Sharqda yuksak madaniyat, o‘zaro hamkorlik va hamjihatlikning uyg‘unlashgan shaklida vujudga kelgan. Xalqimizdagi sharqona mentalitetning o‘ziga xos xususiyatlaridan biri – rahbarga nisbatan alohida hurmat bilan munosabatda bo‘lishda namoyon bo‘ladi. Rahbar kadrlar

to‘g‘risida fikr yuritganda, avvalo, uning ishga mas’uliyat bilan yondashayotgani, boshqaruv salohiyati va albatta, madaniy qiyofasi xususida so‘z boradi. Zotan, insoniy fazilatlarga ega bo‘lish har bir rahbarning ziynatidir. Rahbarning ichki dunyosi, hayotiy tamoyillari jamiyat siyosiy hayotiga bevosita ta’sir ko‘rsatishi mumkinligi tarixdan ma’lum. Uning xulq-atvori, yurish-turishi, kayfiyatiga qarab, halqimiz azal-azaldan o‘zi yashayotgan jamiyat haqida xulosa chiqargan, uni qo‘llab-quvvatlagan yoki aksincha, o‘z noroziligini bildirgan. Xalqimizga xos bu xususiyatni e’tiborga olmagan rahbar-xodim, bilib-bilmay, ichki tahdid omilini yuzaga keltirishi mumkin.

Yurtimizda olib borilayotgan tadrijiy islohotlar jarayonida ayrim rahbarlarning o‘z hayotiy pozitsiyasiga ega emasligi tufayli islohotlarga munosabati va mas’uliyatida xato-kamchiliklar ko‘zga tashlanmoqda. Chindan ham, islohotlar jarayonining boshida o‘zi turmagan, iroda va matonat bilan ko‘zlangan maqsad sari boshqalarni ortidan ergashtira olmagan odamni rahbarlik lavozimiga munosib deyish mumkinmi? Shu bois kishilar ongi va ruhiyatidagi eski aqidalardan qutulib, yangicha mafkura shakllanayotgan hozirgi davrda bilimdon, Vatanga sadoqatli, fidoyi rahbarlar zahirasini tashkil qilish, ularning jamiyat hayotini isloh etishda faol ishtirokini ta’minlash uchun zarur shart-sharoit yaratish muhim ahamiyat kasb etadi.

Boshqaruv potensiali – rahbarning o‘z imkoniyatlarini doimo yangilab, boyitib borishidir. Rahbarning ta’lim olishi, o‘z malakasini oshirishga intilishi, o‘z intilish darajasini o‘stirib borishi uning akmeologik jihatdan yetukligini ifodalaydi va professionalizm darajasida turganligini bildiradi. Shunday hollarni ham kuzatish mumkinki, rahbar, yangi tashkilotga kelar ekan, dastlabki vaqtda, shijoat va ma’suliyat bilan kirishgan harakati asta-sekin so‘nib boradi, talabchanligi kamayib, avvalgi shijoat va g‘ayrat pastga qarab ketadi. Yangi vaziyat va sharoit insondan doimo o‘z potensialining yuksak bosqichida turishni, yuksak shijoat va g‘ayratni uyg‘otadi. Rahbar mahoratining professionalizm darajasiga ko‘tarilgan holati ko‘pincha yangi va notanish vaziyat bilan chaqiriladi. Yangi va noma’lum vaziyatda organizm potensialining mobilizatsiyalashuvi biologik qonuniyatlarga asoslanadi. Aynan shu sababli, kundalik hayotiga yangi mazmun kiritib boradigan rahbar doimo cho‘qqilarga intiladi, mahoratning yanada yuksakroq pog‘onalariga ko‘tarilmoqchi bo‘ladi. Demak, rahbarning, o‘z-o‘zini tahlil qilish orqali mukammallikka intilishi muhim ko‘rsatkichlardan biridir.

Davlat tomonidan ishlab chiqiladigan, juda katta umidlar bilan qaraladigan megaloyihalar barbod bo‘lishining asosiy sababi ham aynan rahbar kadrlarni tanlash va ular bajara olmaydigan vazifalarni yuklashdir. Afsuski, uchinchi darajali kadrlarga birinchi darajadagi vazifalar, birinchi darajadagi kadrlarga esa uchinchi darajadagi vazifalar yuklanmoqda. Bu masalalarni chuqur o‘rganmasak, tahlil qilmasak va xatolarni tuzatmasak, dunyoning qoloq davlatlari safida o‘rnimiz “mustahkamlanib” boraveradi. Demak, rahbarlarda boshqaruv salohiyatini rivojlantirish, donolar ta’biri bilan aytganda, “o‘zida bor” mukammal kadrlarni avvalo, yetishtirish va ma’lum bir sinovlardan so‘nggina, mas’uliyatli lavozimlarga tayinlash masalasi davlatimizning strategik vazifasidir [3]. To‘g‘ri, kadr tanlash masalasi juda murakkab jarayon va ulkan mas’uliyat. Lekin murakkabligi yoki qiyinligi uchun salohiyatli kadrlarni tanlash borasida xatolarga yo‘l qo‘yish – bu millat va xalq uchun halokat hamdir.

So‘nggi yillarda O‘zbekistonning dunyo bilan integratsiyalashuvi va o‘z taraqqiyotida turli xalqaro reytinglarni hamda inson resurslarini rivojlantirish indikatorlarini joriy qilayotganligi e’tirofga loyiq masala. Lekin bunda raqamlarga emas, ushbu faoliyatni bevosita aks ettiradigan natijaga e’tiborni qaratish muhim. Rahbarlarning nafaqat saviyasi, balki ishonib topshirilgan tarmoq yoki sohada yangilik qila olish salohiyati, tarmoqni rivojlantira olish qobiliyati, muammolarni hal qila olish borasidagi qisqa muddatli, o‘rta muddatli va uzoq muddatli strategik rejalar belgilashi va uni amalga oshira olishi asosiy mezon bo‘lmog‘i kerak.

Professional rahbar kadrlarni, salohiyatli boshqaruvchilarni tayyorlash va tanlash, ularni o‘z o‘rniga qo‘ya olish jarayoni mamlakat hayotining eng dolzarb masalasi ekan, bu borada doimiy o‘zgarishlar, doimiy yangiliklar va takomillashuv bo‘lishi kerak. Rahbar kadrlarni tanlashning eng oliy mezonlari, lavozimga tayinlashning tajribadan o‘tgan sinovlari qo‘llanilishigina bu borada strategik burilishni, sakrashni ta’minlash mumkin. Ma’lumki, bugungi kun rahbar kadrlarini lavozimlarga tayinlashdan oldin maxsus tizimni, metodologiyani ishlab chiqish va joriy qilish, har qanday tashkilotning yoki tarmoqning faoliyat yo‘nalishiga mos kadrlarni topish, ularning ishchanlik, tashkilotchilik, ma’naviy sifatlarini sinovdan o‘tkazish, ularning qaysi sohaga layoqati mavjud ekanligiga qarab lavozimga tayinlash masalalarini chuqur o‘rganish talab etiladi. Rahbar kadrlarni tanlashning metodologiyasiga esa rahbarning sifatlarini hisobga olish, ya’ni sohani hamda qo‘l ostidagi xodimlarini rivojlantirishi, o‘zining ustida doimiy ishlashi, ijtimoiy-ma’naviy muhitdan xabardorlik singari xususiyatlarni albatta kiritish lozim. Bugungi kun davlat va jamiyat boshqaruvi sohasida faqatgina buyruqni bajaradigan robot mexanizm kadrlardan voz kechib, mustaqil fikrlaydigan, masalaning echimi bo‘yicha puxta va aniq qarorlar qabul qiladigan, ularning ijrosini ta’minlay oladigan kadrlar kerakligini tushunib yetish lozim.

Bu muammolarni hal qilish uchun rahbar kadrlarda avvalo, ish jarayonini tashkil qilish, nostandart qarorlar qabul qilish, turli an’anaviy uslublardan voz kechib, kreativ ishlash mexanizmlarini, ko‘nikmalarini amaliy shakllantirish masalalariga e’tibor qaratish kerak. Eng muhimi, ularning ma’lum bir lavozimlarga tayinlangandan so‘ng, olgan bilimlarini nechog‘li qo‘llayotganligini monitoring yoki tahlil qilishdir. Chunki, zamonaviy bilimlarni olgan kadrlar ko‘pincha o‘z ish idorasiga qaytib borishi bilan yana o‘sha eski byurokratik ish tizimiga asoslangan uslubda davom ettirishga majbur bo‘ladi.

Shuning uchun ham masalaning yana bir muhim jihatini, ya'ni ularga faqatgina zamonaviy va kreativ ish uslubinigina emas, balki o'sha byurokratik ish tizimini o'zgartirish strategiyasini o'rgatishdir.

Bugungi kunda rahbar kadrlar faoliyatida kuzatiladigan eng katta va murakkab muammolardan biri – bu o'z tashkiloti va tarmog'i uchun kadr tanlay olish va ularni boshqarish layoqatining yetishmasligidir. Bu borada afsuski, rahbarlarda HR (inson resurslarini rivojlantirish) borasidagi bilimlarning pastligi saqlanib qolmoqda. Inson huquqlariga zid ravishda, shuningdek, inson resurslari mamlakatning milliy boyligiga aylanishi sharoitida tashkilotga kelgan yangi rahbar tomonidan oldindan ishlaydigan xodimlarga nisbatan "butunlay tozalash" operatsiyasiga moyillikning mavjudligi [4] va bu jamiyatda katta noroziliklarga sabab bo'lishini esa ming afsuski, ko'plab rahbar anglab yetmagan va bunday nomaqbul ishlarni amalga oshirmoqdalar.

"Bugun rahbar bo'lish og'ir, shu bilan birga, sharafli mas'uliyat. Demokratik jamiyatda davlat boshqaruvida xalq rahbarlarni, rahbarlar xalqni qo'llab-quvvatlamas ekan, asl maqsad, mamlakat tinchligi, xalq farovonligi, ertangi kunga ishonch bilan yashashga erishish muammoligicha qolaveradi. Tahlikali, atrofdagi mamlakatlarda sodir bo'layotgan murakkab, notinch holatlarni ko'rib turgan davrimizda rahbarlikni oqilona, mohirona olib borish masalasi juda dolzarb bo'lib qolmoqda" [5, 36-son]. Yana muhim muammolar ichida rahbar kadrlarning himoyasi, huquqlari, manfaati, mavqei, mas'uliyati va burchi kabilar alohida va muhim ahamiyatga ega mavzudir. "Shu o'rinda savol tug'iladi: bugungi kunning, Yangi O'zbekistonning rahbar kadrlari qanday sifatlarga ega bo'lishi kerak? Javob u qadar murakkab emas. Prezidentimiz chorlovi bilan aytganda, bugun rahbarlar o'zini qiynashi kerak. Chunki jamiyat xavfsizligini ta'minlash vazifasi barcha rahbarlarning burchidir" [6, 36-son].

Demak, sodiq, mas'uliyatli, xalq manfaati va tinchligini, farovonligini o'ylaydigan, uning g'amini eydigan, ishning ko'zini biladigan, zamonaviy fikrlash va ishlash qobiliyatiga ega, munosib rahbarlarni topish, tarbiyalash, mas'ul lavozimlarga tayinlash, faoliyatini doimiy monitoring qilish singari vazifalarni davlat siyosatining strategik vazifasi sifatida belgilab olinsa, oldinga qo'yilgan maqsadlarimizga erishamiz. Chunki, zamonning o'zi, bizni taraqqiyot yo'lida yo'qotilgan vaqt o'rnini to'ldirishga, xalqimizning dardu-tashvishlarini bartaraf qilishga, ertangi kunning munosib avlodlarini tayyorlashga va ular oldida mas'uliyatni yanada chuqur his qilishga undamoqda.

XULOSA

Tadqiqot natijalari davlat boshqaruvidagi ijtimoiy-ma'naviy barqarorlikni ta'minlashda rahbar kadrlarning axloqiy mas'uliyati strategik ahamiyatga ega ekanini ko'rsatdi. Axloqiy mas'uliyatni faqat rahbarning shaxsiy fazilati sifatida emas, balki davlat boshqaruvining samaradorligi, jamoat ishonchi va ijtimoiy barqarorlikni ta'minlovchi muhim ijtimoiy-institutsional omil sifatida baholash maqsadga muvofiq. Rahbar kadrning kasbiy salohiyati va axloqiy mas'uliyati o'zaro uyg'un bo'lgandagina boshqaruv qarorlarining ijtimoiy samaradorligi ta'minlanadi. Shuning uchun rahbarlarni tanlash va tayyorlashda kasbiy bilim bilan bir qatorda axloqiy ong, adolatparvarlik, halollik, mas'uliyat, inson qadriga hurmat va jamoat manfaatlariga sadoqat kabi mezonlarni kuchaytirish zarur. Shuningdek, rahbar kadrlar axloqiy mas'uliyatini rivojlantirishni faqat ma'naviy-ma'rifiy tadbirlar bilan cheklab qo'ymasdan, uni kadrlar siyosati, xizmat etikasi, rahbarlar faoliyatini baholash, ochiqlik va hisobdorlik mexanizmlari bilan uzviy bog'lash lozim.

Eng muhimi, davlat boshqaruvida axloqiy mas'uliyatning yuksalishi jamiyatda adolat, ishonch va ijtimoiy hamjihatlik muhitini mustahkamlashga xizmat qiladi. Shu ma'noda, rahbar kadrlar axloqiy mas'uliyatini rivojlantirish davlat boshqaruvining ichki ma'naviy resursi va ijtimoiy-ma'naviy barqarorlikning muhim sharti sifatida namoyon bo'ladi.

PHILOSOPHICAL

AXLOQIY KAPITALNING BOSHQA KAPITAL TURLARI BILAN O‘ZARO ALOQADORLIGI

Sultanova Aziza Rixsivaevna
Toshkent davlat iqtisodiyot universiteti mustaqil izlanuvchi

Annotatsiya: *Maqolada axloqiy kapitalning zamonaviy jamiyat taraqqiyotidagi ijtimoiy-falsafiy mohiyati hamda uning iqtisodiy, ijtimoiy va madaniy kapital bilan dialektik aloqadorligi tahlil qilinadi. Axloqiy kapitalning ishonch, halollik, adolat, mas’uliyat va hamkorlikni shakllantiruvchi aksiologik resurs sifatidagi xususiyatlari asoslanadi. Kapital shakllarining o‘zaro konvertatsiyasi, axloqiy kapitalning integrativ, regulyativ va legitimlashtiruvchi funksiyalari ochib beriladi. Shuningdek, uning iqtisodiy samaradorlik, ijtimoiy barqarorlik va madaniy qadriyatlarni uyg‘unlashtirishdagi o‘rni aniqlanib, barqaror jamiyat taraqqiyotini ta’minlovchi strategik nomoddiy resurs ekanligi ilmiy jihatdan asoslanadi.*

Kalit so‘zlar: *axloqiy kapital, iqtisodiy kapital, ijtimoiy kapital, madaniy kapital, ishonch, halollik, adolat, mas’uliyat, qadriyat, hamkorlik, aksiologiya, konvertatsiya, taraqqiyot.*

ВЗАИМОСВЯЗЬ ЭТИЧЕСКОГО КАПИТАЛА С ДРУГИМИ ВИДАМИ КАПИТАЛА

Аннотация: *В статье анализируется социально-философская сущность нравственного капитала в развитии современного общества и его диалектическая связь с экономическим, социальным и культурным капиталом. Обоснованы характеристики нравственного капитала как аксиологического ресурса, формирующего доверие, честность, справедливость, ответственность и сотрудничество. Раскрываются взаимная конверсия форм капитала, интегративные, регулятивные и легитимизирующие функции нравственного капитала. Также определена его роль в гармонизации экономической эффективности, социальной стабильности и культурных ценностей, научно обосновано, что он является стратегическим нематериальным ресурсом, обеспечивающим устойчивое развитие общества.*

Ключевые слова: *нравственный капитал, экономический капитал, социальный капитал, культурный капитал, доверие, честность, справедливость, ответственность, ценность, сотрудничество, аксиология, конвертация, развитие.*

THE INTERRELATIONSHIP OF ETHICAL CAPITAL WITH OTHER TYPES OF CAPITAL

Abstract: *The article analyzes the socio-philosophical essence of moral capital in the development of modern society and its dialectical connection with economic, social, and cultural capital. The characteristics of moral capital as an axiological resource that forms trust, honesty, justice, responsibility, and cooperation are substantiated. Mutual conversion of forms of capital, integrative, regulatory and legitimating functions of moral capital are revealed. Furthermore, its role in harmonizing economic efficiency, social stability, and cultural values has been identified, and it is scientifically substantiated that it is a strategic intangible resource that ensures the development of a sustainable society.*

Keywords: *moral capital, economic capital, social capital, cultural capital, trust, honesty, justice, responsibility, value, cooperation, axiology, conversion, development.*

Zamonaviy jamiyat taraqqiyotini faqat moddiy resurslar, ishlab chiqarish imkoniyatlari yoki iqtisodiy o‘sish ko‘rsatkichlari orqali tushuntirish yetarli emas. Globallashuv, raqamlashtirish, ijtimoiy munosabatlarning murakkablashuvi va inson omilining ahamiyati oshib borayotgan bir sharoitda jamiyatning taraqqiyot salohiyati uning tasarrufidagi nomoddiy resurslar – bilim, madaniyat, ijtimoiy aloqalar, ishonch, qadriyatlar, axloqiy me’yorlar va mas’uliyat bilan ham belgilanadi. Shu ma’noda, zamonaviy ijtimoiy-falsafiy tafakkurda “kapital” tushunchasining mazmuni an’anaviy iqtisodiy doiradan chiqib, inson va jamiyatning turli nomoddiy resurslarini ifodalovchi keng metodologik kategoriyaga aylanib bormoqda.

XX–XXI asrlar chegarasida iqtisodiy kapital bilan bir qatorda inson kapitali, ijtimoiy kapital, madaniy kapital, intellektual kapital, ramziy kapital singari tushunchalarning faol ilmiy muomalaga kirishi aynan mazkur metodologik o‘zgarishning ifodasidir. Ijtimoiy kapital bo‘yicha zamonaviy tadqiqotlarda mazkur kategoriya ijtimoiy tarmoqlar, ishonch, o‘zaro yordam va umumiy maqsadlarga erishishni ta’minlovchi munosabatlar resursi sifatida izohlanadi. 2000-yildayoq S. Baron, J. Field va T. Schuller tahriri ostidagi fundamental tadqiqotda ijtimoiy kapital ijtimoiy tarmoqlar, o‘zaro

munosabatlar va ular orqali yuzaga keladigan umumiy manfaatlarni amalga oshirish imkoniyatlari bilan bog‘langan edi [1]. Zamonaviy tadqiqotlar ham ijtimoiy kapitalni yagona, qat’iy chegaralangan tushuncha sifatida emas, balki munosabatlar, ishonch va hamkorlikni birlashtiruvchi ko‘p o‘lchovli fenomen sifatida baholamoqda. Bunday nazariy evolyutsiya “axloqiy kapital” tushunchasining shakllanishi uchun ham metodologik sharoit yaratdi. Chunki agar bilim inson faoliyatida resurs sifatida namoyon bo‘lsa, ijtimoiy aloqalar maqsadga erishish vositasiga aylansa, madaniy kompetensiyalar shaxsning ijtimoiy mavqei va imkoniyatlarini belgilasa, shunga o‘xshash tarzda halollik, adolat, mas’uliyat, vijdonlilik, ishonchlilik, burchga sadoqat va umumiy manfaatni e’tirof etish singari axloqiy sifatlar ham shaxs va jamiyat uchun ma’lum ijtimoiy natijalarni yuzaga keltiruvchi resurs sifatida namoyon bo‘lishi mumkin.

J. Kane 2001-yilda nashr etilgan “The Politics of Moral Capital” asarida “moral capital” tushunchasini nazariy jihatdan tizimlashtirib, ijobiy axloqiy baho siyosiy subyektlar va institutlar uchun legitimlik, qo‘llab-quvvatlash va safarbarlik imkoniyatlarini yuzaga keltiradigan resurs ekanligini asoslaydi [2]. Kane konsepsiyasining muhim jihati shundaki, axloq shaxsning ichki fazilati doirasidan chiqarilib, uning ijtimoiy natija tug‘dirish xususiyati ko‘rsatib beriladi. Axloqiy obro‘ to‘planishi, saqlanishi va ayrim xatti-harakatlar natijasida kamayishi mumkinligi “kapital” metaforasining axloq sohasida qo‘llanishi uchun nazariy asos yaratadi. Keyinchalik X. Wang axloqiy kapital tushunchasini iqtisodiy faoliyat bilan bog‘lab yanada kengaytirdi. Uning konsepsiyasida axloq va iqtisod, axloq va foyda o‘rtasidagi munosabat qarama-qarshi emas, balki muayyan sharoitlarda o‘zaro bir-birini kuchaytiruvchi jarayonlar sifatida izohlanadi. Axloqiy kapital iqtisodiy faoliyatda qiymat yaratishi, iqtisodiy subyektning barqaror hamkorlik imkoniyatini oshirishi va uzoq muddatli manfaat uchun sharoit yaratishi mumkin [3]. Shundan kelib chiqib, “axloqiy kapitalni shaxs, ijtimoiy guruh yoki jamiyat tomonidan o‘zlashtirilgan va amaliy xulq-atvorda barqaror namoyon bo‘ladigan, o‘zaro ishonch, mas’uliyat, adolat, halollik va hamkorlikni yuzaga keltirish orqali individual hamda umumijtimoiy maqsadlarga erishish imkoniyatini kengaytiruvchi aksiologik-ma’naviy resurs sifatida ta’riflash mumkin”. Bunday yondashuv axloqiy kapitalning iqtisodiy, ijtimoiy va madaniy kapitaldan mutlaq ajralgan holda mavjud bo‘lmasligini, aksincha, ular o‘rtasidagi murakkab dialektik aloqadorlik orqali shakllanishini ko‘rsatadi. Bu o‘rinda axloqiy va iqtisodiy kapitalning dialektik munosabati masalasini o‘rganish lozim bo‘ladi. Kapitalning klassik iqtisodiy mazmunida u yangi qiymat yaratish imkoniyatiga ega bo‘lgan iqtisodiy resursni anglatadi. Biroq jamiyat taraqqiyotining zamonaviy bosqichi iqtisodiy samaradorlik faqat moddiy resurslar miqdori bilan emas, balki iqtisodiy munosabatlarning qanday axloqiy me’yorlar asosida tashkil etilishi bilan ham bog‘liq ekanligini ko‘rsatmoqda. Ishonch, shartnomalarga rioya qilish, mas’uliyat, halollik va adolat iqtisodiy faoliyatning tashqi bezagi emas, balki uning barqaror ishlashiga ta’sir qiluvchi ijtimoiy omillardir.

P. Bourdieu iqtisodiy, madaniy va ijtimoiy resurslarning jamiyatdagi o‘zaro aylanishi masalasini nazariy jihatdan yoritgan olimlardan hisoblanadi. Uning keyingi davrda qayta nashr etilgan va rivojlantirilgan konsepsiyalarida iqtisodiy munosabatlar sof iqtisodiy mantiq doirasida mavjud emasligi, ular ijtimoiy maydonlar, hokimiyat, madaniy dispozitsiyalar va boshqa kapital shakllari bilan bog‘liqligi ko‘rsatiladi. Bourdieu iqtisodiyotning o‘zini ham ijtimoiy tuzilmalarga singdirilgan hodisa sifatida tahlil qilgan [4]. Axloqiy kapital nuqtayi nazaridan mazkur fikr yanada keng ma’no kasb etadi.

Jahon bankining 2015-yilgi “World Development Report: Mind, Society, and Behavior” hisobotida ham inson xatti-harakatlarini faqat iqtisodiy manfaat bilan tushuntirish yetarli emasligi, qarorlar jamiyatdagi normalar, ijtimoiy tasavvurlar va jamoaviy xulq modellari ta’sirida shakllanishi qayd etiladi [5]. Ijtimoiy normalar odamlarning nima qilishlari va nima qilishlari lozimligi haqidagi umumiy tasavvurlar sifatida norasmiy boshqaruv mexanizmi vazifasini bajarishi alohida ko‘rsatilgan. Shu sababli iqtisodiy kapitalning samarali ishlashi ma’lum darajada axloqiy kapital zaxirasiga bog‘liq. Halol tadbirkor, mas’uliyatli ish beruvchi, o‘z majburiyatiga sodiq xodim va iste’molchiga nisbatan adolat tamoyiliga amal qiluvchi korxona bozordagi faoliyatida nafaqat iqtisodiy, balki axloqiy obro‘ ham to‘playdi. Bunday obro‘ vaqt o‘tishi bilan iqtisodiy natijaga – barqaror mijozlar, hamkorlarning ishonchi, reputatsiya va institutsional barqarorlikka aylanishi mumkin. Bu o‘rinda axloqiy kapitalning iqtisodiy kapitalga “konvertatsiyasi” yuz beradi. Lekin jarayon bir yo‘nalishli emas. Iqtisodiy kapital ham axloqiy kapital rivojlanishi uchun muayyan obyektiv shart-sharoitlarni yaratadi. Yetarli iqtisodiy resurslar oilaning farzand tarbiyasi va ta’limiga investitsiya kiritish imkoniyatini oshiradi, davlatning ta’lim, madaniyat, fuqarolik institutlari va ijtimoiy himoyaga mablag‘ yo‘naltirish salohiyatini kengaytiradi.

E. Dal Bó va hammualliflarning iqtisodiy xulq doirasidagi tadqiqotida “moral capital” shaxsning yaxshilik qilishga nisbatan ichki dispozitsiyasi va o‘z xatti-harakatlariga axloqiy baho berishi bilan bog‘lanadi. Mualliflar yaxshi xatti-harakatlar axloqiy kapitalni mustahkamlashi, noto‘g‘ri xatti-harakatlar esa uni yemirishi mumkinligini modellashtirganlar [6]. Bu yondashuv axloqiy kapitalning iqtisodiy xulqda ham jamg‘ariluvchi yoki kamayuvchi resurs sifatida namoyon bo‘lishini ko‘rsatadi. Shunday qilib, iqtisodiy va axloqiy kapital o‘rtasidagi bog‘lanishni quyidagi dialektik munosabatda ifodalash mumkin: “Axloqiy me’yor → ishonch → iqtisodiy hamkorlik → iqtisodiy samaradorlik → ijtimoiy farovonlik → axloqiy kapitalni qayta ishlab chiqarish uchun imkoniyat.” Mazkur zanjirning biror bo‘g‘inida axloqiy me’yorlar zaiflashsa, kapitalning iqtisodiy ko‘payishi har doim ham umumijtimoiy taraqqiyotga aylanmaydi.

Endi axloqiy kapital va ijtimoiy kapitalning o‘zaro aloqadorligini ko‘rib chiqamiz. Axloqiy kapitalning eng yaqin kategoriyalaridan biri ijtimoiy kapital hisoblanadi. R. Putnam ijtimoiy kapitalni jamoaviy faoliyatni muvofiqlashtirish

imkonini beruvchi ijtimoiy aloqalar, normalar va ishonch bilan bog‘laydi. Uning “Bowling Alone” asari XX asr oxiri va XXI asr boshidagi ijtimoiy kapital konsepsiyasining eng ta’sirchan nazariy manbalaridan biriga aylandi [7]. Keyingi ilmiy adabiyotlarda ham Putnamning ishonch, o‘zaro yordam va fuqarolik ishtiroki haqidagi yondashuvi ijtimoiy kapital tadqiqotlarining asosiy nazariy yo‘nalishlaridan biri sifatida davom etmoqda.

Bu o‘rinda axloqiy va madaniy kapitalning aksiologik munosabatini o‘rganish tadqiqot ishimiz uchun muhim. Axloqiy kapitalning shakllanishida madaniy kapital alohida ahamiyatga ega. Madaniy kapital shaxsning bilimlari, kompetensiyalari, didi, madaniy amaliyotlari, til va ramziy kodlarni o‘zlashtirish darajasi orqali uning jamiyatdagi faoliyat imkoniyatlariga ta’sir qiladi. Bourdieu merosiga bag‘ishlangan zamonaviy tadqiqotlar uning kapital konsepsiyalari ichida aynan madaniy kapital eng ko‘p qo‘llanadigan kategoriyalardan biri bo‘lib qolayotganini ko‘rsatadi [8]. Madaniyat shaxsga nafaqat bilim, balki “nima yaxshi?”, “nima yomon?”, “nimani qadrlash kerak?”, “boshqalarga nisbatan qanday munosabatda bo‘lish lozim?” degan fundamental aksiologik mezonlarni ham yetkazadi. Oila, ta’lim, adabiyot, san’at, din, mahalla, ommaviy kommunikatsiya va tarixiy xotira orqali avloddan-avlodga o‘tadigan mazkur me’yorlar shaxsning axloqiy dispozitsiyalarini shakllantiradi.

D.C. Rose madaniyatning jamiyatdagi rolini tahlil qilar ekan, axloqiy e’tiqodlar va madaniy uzatish mexanizmlari individual manfaatni umumiy manfaat bilan muvofiqlashtirishga xizmat qilishini ko‘rsatadi [9]. Bu holat madaniy kapitalning axloqiy kapital shakllanishidagi generativ ahamiyatini ochib beradi. Bu jarayonni quyidagi mantiqiy zanjir orqali ifodalash mumkin: “madaniy meros → qadriyat → axloqiy me’yor → ichki e’tiqod → xulq-atvor → axloqiy kapital”. Madaniy kapital shaxsga axloqiy xatti-harakat uchun ma’naviy material va ramziy mezonlar beradi. Ammo madaniy kapital ham axloqiy kapital bilan aynan bir hodisa emas. Oila doirasida axloqiy kapitalning avlodlararo uzatilishiga bag‘ishlangan tadqiqotlarda ham chuqur qaror topgan ijtimoiy normalarning avloddan-avlodga o‘tishi va mas’uliyat hissini shakllantirishi “moral capital” konsepsiyasi orqali tushuntiriladi [10]. Mazkur holatdan muhim ijtimoiy-falsafiy xulosa kelib chiqadi: “axloqiy kapital biologik yoki individual tarzda tayyor holda mavjud bo‘lmaydi; u madaniy tajribaning axloqiy o‘zlashtirilishi jarayonida ijtimoiy ravishda ishlab chiqariladi.

Kapital shakllarining o‘zaro konvertatsiyasi va axloqiy kapitalning o‘rni mavzusi bugungi tadqiqotchilarni mushohadaga chorlaydi. Kapital shakllarining alohida-alohida mavjudligi haqidagi qarash ularning jamiyatdagi real harakatini to‘liq tushuntira olmaydi. Iqtisodiy, madaniy, ijtimoiy va axloqiy kapital muntazam ravishda bir-biriga ta’sir etadi hamda muayyan sharoitlarda boshqa kapital turining o‘sishi yoki kamayishiga olib keladi. Masalan:

iqtisodiy kapital → ta’lim imkoniyatlari → madaniy kapital;

madaniy kapital → qadriyat va me’yorlar → axloqiy kapital;

axloqiy kapital → ishonch va hamkorlik → ijtimoiy kapital;

ijtimoiy kapital → samarali hamkorlik → iqtisodiy kapital.

Bunda jarayon yopiq va mexanik aylanishdan iborat emas. Har bir bosqichda institutsional muhit, tarixiy tajriba, siyosiy boshqaruv, tenglik darajasi va jamiyatdagi ustuvor qadriyatlar konvertatsiya yo‘nalishiga ta’sir qiladi.

2024-yilda P. Bartosch va hammualliflar tomonidan sog‘liqni saqlash tizimlari misolida olib borilgan tadqiqotda axloqiy kapital normalar, qadriyatlar va fazilatlarga nisbatan kutilmalar shaklida almashinadigan resurs sifatida talqin qilinib, u Bourdieuning ramziy va madaniy kapital nazariyalari bilan bog‘langan [11]. 2021-yilgi boshqa bir tadqiqotda ham tashkilot doirasidagi axloqiy kapital yig‘ilishi, sarflanishi va almashinishi mumkin bo‘lgan resurs sifatida talqin etilgan [12]. Bu tadqiqotlar “kapital” tushunchasini axloq sohasida qo‘llash oddiy metafora emasligini ko‘rsatadi. Axloqiy sifatlar ijtimoiy munosabatlarda tan olinib, ishonch yoki legitimlik kabi ijtimoiy natijalarga aylangandagina axloqiy kapital funksiyasini bajaradi. J. Kane tomonidan siyosiy institutlarga nisbatan ishlab chiqilgan moral kapital konsepsiyasida aynan legitimlik muhim o‘rin egallaydi. Uning fikriy modeli axloqiy kapitalning siyosiy subyektlar tomonidan to‘planishi va yo‘qotilishi mumkinligini ko‘rsatadi [13]. Mazkur holatni jamiyatning boshqa sohalariga ham tatbiq etish mumkin. Oila ota-onaning axloqiy namunasiga nisbatan ishonchni yo‘qotsa, tarbiyaviy ta’sir zaiflashadi. Ta’lim muassasasida adolat va xolislik buzilsa, uning axloqiy nufuzi kamayadi.

OECDning ishonchga oid tadqiqotlari ham institutsional va interpersonal ishonchni jamiyat farovonligining muhim tarkibiy qismlaridan biri sifatida ko‘rsatmoqda [8]. 2025-yilda e’lon qilingan OECD tadqiqotlarida ham ijtimoiy aloqalar va ularni qo‘llab-quvvatlovchi infratuzilmalar jamiyat farovonligi bilan bog‘liq holda tahlil qilinmoqda [14]. Endi axloqiy kapitalning boshqa kapital turlari bilan o‘zaro ta’sirining konseptual modelini shakllantirish kerak bo‘ladi. Yuqoridagi nazariy tahlillarga asoslangan holda, axloqiy kapitalning boshqa kapital turlari bilan aloqadorligini quyidagi mualliflik modeli orqali tushuntirish mumkin:

Shu o‘rinda axloqiy kapital va jamiyat taraqqiyotining o‘zaro bog‘liqligini taqqoslash lozim bo‘ladi. Jamiyat taraqqiyotining mohiyati faqat iqtisodiy imkoniyatlarning kengayishi bilan chegaralanmaydi. Agar iqtisodiy o‘sish ishonch inqirozi, ijtimoiy begonalashuv, qadriyatlarning yemirilishi va institutlarning axloqiy legitimligi pasayishi bilan birga kechsa, bunday jarayonni to‘laqonli ijtimoiy taraqqiyot deb baholash qiyin. 2023-yilda M. Mladjan tomonidan axloqiy kapitalning iqtisodiy va siyosiy transformatsiyalar bilan bog‘liqligi tahlil qilinib, uning jamiyatning iqtisodiy hamda

noiqtisodiy farovonligi uchun ahamiyatli resurs ekanligi, keskin transformatsiyalar davrida esa u yemirilishi mumkinligi ko‘rsatilgan [15]. 2025-yilda ijtimoiy kapitalga bag‘ishlangan yangi nazariy sharhda ham tushunchani tarmoqlar bilangina cheklamasdan, resurslar va munosabatlar o‘rtasidagi integratsiyalashgan bog‘liqlik sifatida qayta konseptuallashtirishga intilish kuzatilmoqda [16]. Bu holat kapital shakllarini bir-biridan uzilgan kategoriyalar sifatida emas, balki o‘zaro ta’sirlanuvchi tizim sifatida tadqiq etish zaruratini yanada kuchaytiradi. Shu nuqtayi nazardan, jamiyat taraqqiyoti uchun kapitalning miqdori bilan birga uning axloqiy sifati ham muhimdir. Iqtisodiy resursning qanday yo‘l bilan qo‘lga kiritilgani, ijtimoiy tarmoqning qanday maqsadga xizmat qilayotgani, madaniy bilimning qanday qadriyatlarga yo‘naltirilgani jamiyat rivojlanishining axloqiy mazmunini belgilaydi. Bundan kelib chiqib, jamiyat taraqqiyotini kapital shakllarining oddiy yig‘indisi emas, balki ularning axloqiy mezonlar asosida o‘zaro muvofiqlashgan harakati sifatida tushunish maqsadga muvofiq.

Yuqoridagi tahlillar asosida bir qator ilmiy xulosalarni ilgari surish mumkin.

Birinchidan, zamonaviy ijtimoiy taraqqiyot sharoitida “kapital” tushunchasi sof iqtisodiy mazmundan chiqib, moddiy va nomoddiy resurslarni qamrab oluvchi fanlararo kategoriyaga aylangan. Shu jihatdan axloqiy kapital ham jamiyatda qiymat, imkoniyat va ijtimoiy samaradorlik yaratadigan nomoddiy resurs sifatida mazkur konseptual taraqqiyotning mantiqiy davomi hisoblanadi.

Ikkinchidan, axloqiy kapital iqtisodiy, ijtimoiy va madaniy kapitaldan mutlaq ajralgan holda mavjud bo‘lmaydi, balki ular bilan o‘zaro ta’sir va konvertatsiya jarayonida shakllanadi. U boshqa kapital shakllarining ijtimoiy mazmuni va samaradorligiga ta’sir ko‘rsatuvchi aksiologik-regulyativ resurs vazifasini bajaradi.

Uchinchidan, axloqiy va ijtimoiy kapital o‘rtasidagi asosiy bog‘lovchi mexanizm ishonchdir. Ijtimoiy kapital ijtimoiy aloqalar, tarmoqlar va hamkorlik imkoniyatlarini ifodalasa, axloqiy kapital ushbu munosabatlarning adolat, halollik, mas’uliyat va o‘zaro hurmat kabi normativ-aksiologik asoslarini belgilaydi.

Demak, axloqiy kapitalning jamiyat taraqqiyotidagi ahamiyati uning alohida kapital turi ekanligidangina iborat emas. Uning fundamental ijtimoiy-falsafiy mohiyati boshqa kapital shakllariga axloqiy mazmun va ijtimoiy yo‘nalish berish, ular o‘rtasidagi o‘zaro konvertatsiyani tartibga solish hamda iqtisodiy o‘sishni insonparvar va barqaror ijtimoiy taraqqiyotga aylantirish imkoniyatida namoyon bo‘ladi. Aynan shu jihat axloqiy kapitalni jamiyat taraqqiyotini tushuntiruvchi mustaqil ijtimoiy-falsafiy kategoriya sifatida tadqiq etish uchun konseptual asos yaratadi.

OILAVIY MUNOSABATLARDA OTA TARBIYASINING O‘RNI

Dovranova Oysulton Dovrankulovna
Qarshi davlat universiteti Pedagogika kafedrasi o‘qituvchisi
E-mail: oysultondovranova@gmail.com

Annotatsiya: *Maqolada otaning tarbiyaviy ishtiroki bola bilan muloqot, kundalik mas’uliyat va ota-onaning hamkorligi birligida tahlil qilinadi. Ilmiy manbalarni qiyoslash asosida otalik ishtirokining mavjudlik, muntazamlik va munosabat sifati jihatlari farqlanadi. Oilaviy vaziyatlar uchun pedagogik tavsiyalar va kuzatish mezonlari taklif etiladi. Xulosalar nazariy tahlilga asoslangan bo‘lib, mahalliy oilalar bo‘yicha empirik natija sifatida talqin qilinmaydi.*

Kalit so‘zlar: *oilaviy tarbiya, otalik ishtiroki, ota-ona hamkorligi, hissiy qo‘llab-quvvatlash, mas’uliyat, bola mustaqilligi.*

РОЛЬ ОТЦОВСКОГО ВОСПИТАНИЯ В СЕМЕЙНЫХ ОТНОШЕНИЯХ

Аннотация: *Участие отца в воспитании рассматривается во взаимосвязи общения с ребёнком, повседневной ответственности и сотрудничества родителей. На основе сопоставления научных источников разграничиваются присутствие отца, регулярность его участия и качество отношений. Предлагаются педагогические рекомендации и ориентиры наблюдения. Выводы имеют теоретический характер и не представляют результаты эмпирического исследования местных семей.*

Ключевые слова: *семейное воспитание, участие отца, сотрудничество родителей, эмоциональная поддержка, ответственность, самостоятельность ребёнка.*

THE ROLE OF PATERNAL PARENTING IN FAMILY RELATIONSHIPS

Abstract: *This conceptual article examines paternal parenting through communication, everyday responsibility and coparenting. A comparative reading of research distinguishes a father’s presence, the regularity of his involvement and relationship quality. Practical recommendations and observation criteria are proposed for family education. The conclusions derive from theoretical analysis and do not constitute empirical findings about local families.*

Keywords: *family education, father involvement, coparenting, emotional support, responsibility, child autonomy.*

KIRISH

Otaning tarbiyadagi o‘rni ko‘pincha oilani moddiy ta’minlash, tartib o‘rnatish yoki farzandning kelajak kasbini belgilash bilan izohlanadi. Bu vazifalar oilaviy hayotning muayyan tomonlarini ifodalasa-da, bolaning kundalik tajribasidagi otalik munosabatini to‘liq ochmaydi. Farzand uchun otaning va’dasini bajarishi, savolini jiddiy qabul qilishi, xatoga qanday munosabat bildirishi va boshqa oila a’zolari bilan qanday gaplashishi ham tarbiyaviy mazmun kasb etadi.

Maqolaning maqsadi ota tarbiyasini oiladagi alohida hukmronlik mavqeyi sifatida emas, bolaning rivojlanishiga yo‘naltirilgan munosabat va mas’uliyatlar tizimi sifatida tahlil qilishdir. Asosiy savol quyidagicha qo‘yiladi: otaning ishtiroki qaysi pedagogik shartlarda farzandning mustaqilligi, ishonchi va mas’uliyatini qo‘llab-quvvatlaydi? Muhokama asosan maktab yoshidagi farzandlar tarbiyasiga qaratiladi; turli yosh va oilaviy sharoitlar uchun bir xil talab belgilashdan saqlaniladi.

ADABIYOTLAR TAHLILI

A. Sarkadi va hammualliflarning longitudinal tadqiqotlar sharhida otaning faol, muntazam ishtiroki bilan bolalar rivojlanishining qator ijobiy ko‘rsatkichlari o‘rtasida bog‘liqlik qayd etilgan [1]. Mualliflar ishtirokni birga yashash, bevosita muloqot va mas’uliyat kabi o‘lchovlarda ko‘rib chiqadilar. Sharh xulosasi otaning bola bilan aloqasiga e’tiborni kuchaytiradi, biroq alohida oilada kuzatilgan natijani faqat ota ta’siri bilan tushuntirishga asos bermaydi.

N. Cabrera, H. Fitzgerald, R. Bradley va L. Roggman otalik munosabatlarini bolaning xususiyatlari, ota-onaning tarixi va kengroq ijtimoiy sharoitlar bilan bog‘liq dinamik tizim sifatida talqin qiladilar [2]. Bunda ta’sir bir yo‘nalishli emas: ota bolaga munosabat bildirganidek, bolaning yoshi, ehtiyoji va xulqi ham otaning tutumini o‘zgartiradi. Bu yondashuv oilaviy tarbiyani tayyor fazilatlar ro‘yxatiga qisqartirmaslikka imkon beradi.

M. Feinberg ota-onaning birgalikda tarbiyalash munosabatini vazifalarni bo‘lishish, tarbiya yuzasidan kelishuv, o‘zaro qo‘llab-quvvatlash yoki bir-birining mavqeyini susaytirish hamda oilaviy aloqalarni boshqarish orqali tahlil qiladi [3]. N. Cabrera, B. Volling va R. Barr esa otalarni tarbiya tadqiqotlarida mustaqil ishtirokchi sifatida o‘rganish, birga va alohida yashaydigan otalarning vaziyatlarini farqlash zarurligini ko‘rsatadilar [4].

Ushbu manbalar birgalikda ikki xulosaga olib keladi. Birinchidan, otaning mavjudligi bilan uning tarbiyaviy ishtiroki bir tushuncha emas. Ikkinchidan, bu ishtirokni onaning faoliyatidan va oilaning sharoitidan ajratib baholash yetarli bo‘lmaydi. Maqolada shu nazariy asoslar kundalik oilaviy vaziyatlar uchun pedagogik tavsiyalarga aylantiriladi. Xorijiy manbalardagi bog‘liqliklar O‘zbekiston oilalariga tekshirmasdan ko‘chirilmaydi.

TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-tahliliy xususiyatga ega. Ota ishtiroki va birgalikdagi tarbiyaga bevosita oid to‘rtta ilmiy ish maqsadli tanlanib, tushunchaviy va qiyosiy tahlil qilindi. Bu manbalar majmui tizimli sharhning to‘liq qidiruv protokoliga da’vo qilmaydi. Tahlilda ishtirokning shakli, munosabatning sifati, oila a’zolari o‘rtasidagi kelishuv va kontekstual cheklovlar ajratildi.

Tahlil natijalari asosida pedagogik vaziyatlar modellashtirildi va kuzatish uchun savollar tuzildi. Keltirilgan oilaviy misollar shartli bo‘lib, intervyu yoki kuzatuvdan olingan dalil emas. So‘rovnoma, tajriba va statistik hisob-kitob bajarilmagan. Shuning uchun takliflarning amaliy foydasi kelgusida alohida tekshirilishi lozim; mazkur ish ularni asoslash va chegaralarini belgilash bilan cheklanadi.

TAHLIL VA NATIJALAR

Ota tarbiyasini tavsiflashda uch jihatni farqlash taklif etiladi: bola uchun murojaat qilish imkoniyati, tarbiyaviy ishtirokning muntazamligi va munosabat sifati. Bir uyda yashash birinchi jihatning ham to‘liq kafolati emas: doim band yoki faqat tanbeh beradigan kattaga bola muammosini aytmasligi mumkin. Aksincha, boshqa hududda ishlaydigan ota kelishilgan muloqot va bajariladigan majburiyatlar orqali aloqani saqlashga intilishi mumkin. Bunda masofa va imkoniyatlar baribir hisobga olinadi.

Birinchi pedagogik yo‘nalish — tinglash va hissiy javob qaytarish. Farzand maktabdagi kelishmovchilik haqida gapirganda darhol aybdorni aniqlashga o‘tish suhbatni qisqartirishi mumkin. Dastlab nima sodir bo‘lgani, bola vaziyatni qanday tushungani va undan nima kutayotganini aniqlash maqsadga muvofiq. «Seni tushundim» deyishning o‘zi yetarli emas; ota bolaning gapini mazmunan qaytarib, to‘g‘ri tushunganini tekshirishi mumkin. Tinglash xatti-harakatning har qanday ko‘rinishini ma’qullash degani emas.

Ikkinchi yo‘nalish — talabning izchilligi. Qoidaning ma’nosi tushuntirilganda farzand faqat kattadan qo‘rqib emas, xatti-harakat oqibatini anglab qaror qilishga o‘rganishi uchun sharoit yaratiladi. Masalan, uy vazifasi bajarilmaganda bolaning shaxsini kamsitish o‘rniga nima to‘sqinlik qilgani aniqlanadi va keyingi ish rejasi kelishiladi. Ota bolaning o‘rniga topshiriqni bajarib bermaydi, ammo ishni qismlarga ajratishda yordam beradi. Talab va yordam bir-birini to‘ldiradi.

Uchinchi yo‘nalish — kundalik mas’uliyatga qo‘shilish. Farzand bilan suhbatlashish, uning o‘qishidagi qiyinchilikni bilish, uy yumushini birgalikda bajarish va berilgan va’dani eslab qolish tarbiyaning oddiy, ammo kuzatiladigan ko‘rinishlaridir. Bu ishlar faqat onaning eslatmasidan keyin bajarilsa, rejalashtirish yuki baribir bir kishida qoladi. Ota o‘z zimmasidagi vazifani belgilash, bajarish va natijasini kuzatishning butun jarayonida ishtirok etishi maqsadga muvofiq.

To‘rtinchi yo‘nalish — ota-onaning tarbiyaviy kelishuvi. Bir kattaga ma’qul bo‘lgan qoida ikkinchisi tomonidan bola oldida doim bekor qilinsa, talabning mazmuni noaniqlashadi. Kelishuv barcha fikrlarning bir xil bo‘lishini anglatmaydi. Masalan, telefon ishlatish vaqti yuzasidan turli qarashlar mavjud bo‘lsa, ota-ona avval o‘zaro muhokama qiladi, so‘ng bolaga tushunarli tartibni bayon etadi. Vaziyat o‘zgarsa, qoida ham asosli ravishda qayta ko‘rib chiqiladi.

Beshinchi yo‘nalish — mustaqillikka joy qoldirish. Ota farzandning har bir qarorini oldindan hal qilsa, mas’uliyat haqida ko‘p gapirgan taqdirda ham uni mashq qilish imkoniyati qisqaradi. Yoshiga mos tanlovlar, masalan, vazifalarni bajarish ketma-ketligi yoki bo‘sh vaqt mashg‘ulotini kelishish, qaror va oqibat orasidagi aloqani tushunishga xizmat qilishi mumkin. Xavfsizlik va oilaning real imkoniyatlari bilan bog‘liq chegaralar esa kattalar tomonidan aniq belgilanadi.

Shartli vaziyatni ko‘rib chiqaylik: farzand uyda zimmasiga olgan ishni unutdi. Faqat tanbeh berish suhbatni aybni isbotlashga aylantiradi; kattalarning ishni indamay bajarib qo‘yishi esa majburiyatni noaniq qoldiradi. Pedagogik yechim sifatida kelishuvni eslatish, unutish sababini aniqlash va ishni qachon tugatishni bolaning o‘zi bilan belgilash taklif etiladi. Keyingi safar eslatma vositasi kerakmi, degan savol ham muhokama qilinadi. Bu algoritm universal natija va’da qilmaydi, lekin tarbiyaviy harakatning maqsadini aniq qiladi.

Otaning shaxsiy namunasi faqat mehnatsevarlik yoki qat’iyat bilan cheklanmaydi. Xatosini tan olish, uzr so‘rash, uy mehnatini adolatli taqsimlash va suhbatdoshni bo‘lmasdan tinglash ham tarbiyaviy mazmunga ega. Bunday sifatlarni faqat otaga yoki faqat onaga xos deb belgilash asosli emas. Ota tarbiyasining ahamiyati boshqa tarbiyachilar hissasini kamaytirish orqali emas, uning o‘z mas’uliyatini to‘liq bajarishi orqali ochiladi.

Kuzatish uchun to‘rtta amaliy savol taklif etiladi: bola savol bilan murojaat qila oldimi; kelishilgan vazifa bajarildimi; nizoda bolaning fikri eshitildimi; keyingi qarorda unga yoshiga mos ishtirok berildimi? Javoblar umumiy «yaxshi ota»

bahosi shaklida emas, aniq vaziyat qaydi bilan yoziladi. Masalan, «suhbat yaxshi o‘tdi» o‘rniga «bola voqeani tugatguncha tinglandi va keyingi qadam birga belgilandi» deyiladi. Ushbu savollar diagnostik test yoki oilalarni reytinglash vositasi emas.

Maktabning oilalar bilan ishlashida ham topshiriqlar otaning real imkoniyatiga mos tuzilishi lozim. Faqat kunduzgi yig‘ilishga kelishni faollik belgisi deb olish ish jadvali og‘ir otalarni chetda qoldiradi. Qisqa individual suhbat, kelishilgan vaqtdagi aloqa yoki farzand bilan bajariladigan kichik o‘quv vazifasi muqobil shakl bo‘lishi mumkin. Bunda oilaning shaxsiy hayotini oshkor qilish yoki bolaning otasi haqidagi ma’lumotni sinf oldida solishtirish talab etilmaydi.

Takliflar oila tarkibidagi farqlarga sezgir bo‘lishi kerak. Ota bilan yashamaydigan bolaga nisbatan kamchilik haqidagi tayyor hukm chiqarish noto‘g‘ri. Tarbiyaviy yordam bolaning amaldagi ishonchli kattalari va xavfsiz munosabatlariga tayangan holda tashkil etiladi. Ota bilan aloqani muhokama qilishda uning shunchaki mavjudligi emas, bolaning manfaatiga xizmat qilishi asosiy mezon bo‘lib qoladi. Oilaning daromadi, mehnat sharoiti va qo‘llab-quvvatlash imkoniyatlari ham chetda qoldirilmaydi.

XULOSALAR

Ota tarbiyasining oilaviy munosabatlardagi o‘rni muntazam muloqot, izchil talab, kundalik mas’uliyat va ota-onaning kelishuvi orqali namoyon bo‘ladi. Ota obro‘sini qo‘rquvga tayanadigan nazorat bilan tenglashtirish tarbiyaning muloqot va namuna ko‘rsatish tomonlarini toraytiradi. Taklif etilgan yondashuv otaning ishtirokini aniq kundalik harakatlar orqali tavsiflashga imkon beradi.

Kelgusidagi empirik tadqiqotda otalar bilan suhbat, bolalarning yoshiga mos fikrlari va oilaviy vaziyatlar haqidagi qaydlarni o‘zaro solishtirish maqsadga muvofiq. Ishtirok ixtiyoriyligi va ma’lumotlar maxfiyligi ta’minlanishi kerak. Oila tarkibi, ish jadvali va resurslaridagi farqlar hisobga olingandagina mahalliy sharoitga mos tavsiyalarni aniqlashtirish mumkin.

YOSHLAR EKOLOGIK MADANIYATI – O‘ZIGA XOS ZAMONAVIY FALSAFIY FENOMEN SIFATIDA

Oripov Faxriddin Yo‘ldashevich
Namangan davlat universiteti
E-mail: standartnamdu@gmail.com

Annotatsiya: *Ushbu maqolada ekologik madaniyatni yoshlar, hamda jamiyat ijtimoiy hayotida o‘ziga xos doimiy e’tibor talab qiluvchi noyob hodisa ekanligi falsafiy jihatdan olib borilayotgan tadqiqotlar asosida tahlil qilib berilgan. Ko‘plab avvalgi mavjud adabiyotlarni tilga olingan holda keyingi davrda davom ettirilayotgan izlanishlardagi o‘ziga xos yondashuvlarni nazariy jihatdan qiyosan olib tahlil qilishga harakat qilingan. Muallif ekologik madaniyat borasida yoshlar axloqining zaruriy darajadagi tarbiyasi - ijtimoiy taraqqiyotni yuksaltirishning muhim hal qiluvchi yetakchi omillardan biri ekanligiga alohida e’tibor qaratgan.*

Kalit so‘zlar: *fenomen, antropologiya, ekotsentrizm, ekologik etika, ekologik falsafa, ekolofgik madaniyat, maqsadli o‘qitish, ekologik faoliyat, ekologik ehtiyoj, ekologik qadriyat.*

ЭКОЛОГИЧЕСКАЯ КУЛЬТУРА МОЛОДЕЖИ КАК САМОБЫТНЫЙ СОВРЕМЕННЫЙ ФИЛОСОФСКИЙ ФЕНОМЕН

Аннотация: *В данной статье анализируются философские основы исследования экологической культуры как уникального явления в социальной жизни молодежи и общества, требующего постоянного внимания. Опираясь на многочисленные существующие ранее исследования, автор предпринимает попытку теоретического анализа уникальных подходов к исследованию, продолжающемуся в последующий период. Особое внимание уделяется тому факту, что необходимый уровень нравственного воспитания молодежи в области экологической культуры является одним из важных решающих факторов улучшения социального прогресса.*

Ключевые слова: *явление, антропология, экоцентризм, экологическая этика, экологическая философия, экологическая культура, целенаправленное воспитание, экологическая деятельность, экологическая потребность, экологическая ценность.*

YOUTH ENVIRONMENTAL CULTURE AS A DISTINCTIVE MODERN PHILOSOPHICAL PHENOMENON

Abstract: *This article analyzes the philosophical foundations of environmental culture research as a unique phenomenon in the social life of society that requires ongoing attention. Drawing on numerous existing studies, the author undertakes a theoretical analysis of unique approaches to ongoing research. Particular attention is given to the fact that the necessary level of moral education of young people in the area of environmental culture is one of the most important decisive factors in improving social progress.*

Keywords: *phenomenon, anthropology, ecocentrism, environmental ethics, environmental philosophy, environmental culture, purposeful education, environmental activity, environmental need, environmental value.*

KIRISH. Yurtimizda o‘ttiz besh yildan buyon amalga oshirilayotgan islohotlar jamiyatimizni o‘ziga xos yangi rivojlanish bosqichga olib chiqdi. Hozirgi globallashuv va texnologik taraqqiyot sharoitida ekologik muammolar insoniyat oldida turgan eng dolzarb masalalardan biriga aylandi. Iqlim o‘zgarishi, atmosfera havosining ifloslanishi, suv resurslarining kamayishi, biologik xilma-xillikning qisqarishi va chiqindilar muammosi nafaqat tabiiy muhitga, balki jamiyatning ijtimoiy-iqtisodiy barqarorligiga ham jiddiy ta’sir ko‘rsatmoqda [7].

Sog‘lom tafakkurli insonlar olamni yaxlit, bir butun ekanligini anglagan holda, tabiat va jamiyatni bir-biridan ajratib bo‘lmaydigan, tabiiy muhitning bo‘lishligi ijtimoiy muhit mavjud bo‘lishligi sharti ekanligi bois uni birlamchi muhim asos sifatida qadrlab kelganlar.

Ilm-fan tarixiga e’tibor qaratilsa, inson va tabiat o‘rtasida oqilona munosabatlarni qaror toptirish zaruriy va qonuniy muhim jarayon ekanligi uzoq davrlardan boshlab qayta-qayta ta’kidlab kelinadi. Shunday bo‘lsa-da tabiatdagi obyektiv sabablarga qaramay jamiyat a’zolari tomonidan subyektiv ravishda o‘zaro mutanosiblik aloqalari ko‘p vaziyatlarda buzib kelinmoqda.

Hozirgi vaqtda tub o‘zgarish jarayonlari nafaqat ekologik sohaga, balki madaniy sohalarga ham faol ta’sir ko‘rsatmoqda. Ekologik madaniyatni shakllantirish muammosini o‘z vaqtida qayta ko‘rib chiqish so‘nggi yillarda dunyo miqyosida ham, sodir bo‘layotgan ma’naviy, ijtimoiy-siyosiy va iqtisodiy jarayonlar majmuasi bilan bevosita bog‘liq.

ADABIYOTLAR TAHLILI VA METODLARI. Yoshlar ekologik madaniyati fenomen sifatida o‘rganilganda ijtimoiy falsafiy jihatlariga ham e’tibor berish lozim. Bugungi kunda ekologik madaniyat ko‘plab olimlar tomonidan yangi gumanistik nazariya sifatida qaraladi. O‘zgarish nuqtai nazaridan “yangi gumanizm” nazariyasi antropologikdan ekotsentrikgacha bo‘lgan tadqiqotlarda E.V.Girusov, D.S.Lixachev, N.N.Moiseyev, N.N.Marfenin tadqiqotlarida ishlab chiqilgan. Muammoga aksiologik yondashuv esa A.N.Zaxlebniy, Ye.Yu. Nail, V.I.Leshchinskiy asarlarida ham o‘rganilgan. Aksiologik yondashuv, birinchi navbatda, ta’lim va tarbiya sohasidagi ijtimoiy-madaniy o‘zgarishlar jarayonlarini o‘rganuvchi tadqiqotchilarning ishi uchun xarakterlidir. Yangi ekologik madaniyatni shakllantirishning axloqiy asoslari N.N.Moiseyev, P.N.Andreyeva, V.E.Boreyko asarlarida asoslab berilgan. Ekologik etikaning uchinchi ming yillikdagi ko‘zga ko‘ringan xorijiy asoschilaridan: P.Tayler “Tabiatga hurmat”(1986), B.Kollikot “Yer etikasini himoya qilish” (1989), R.Attfild “Ekologik javobgarlik etikasi” (1990), H. Rolston “Ekologik etika mavjudmi?” (1990), Y.Xaggrov “Atrof-muhit munosabatlar asoslari etikasi” (1990), kabilar asarlari ham muhim ahamiyatga egadir. X.Rolston yangi vujudga kelgan Ekologik axloq fanining asoschisi bo‘lishi bilan birga, A.Shveyser, D.Radyar, B.Kallikot, B.Divol, D.Sessionlar qatorida ekologik falsafaning ko‘zga ko‘ringan namoyondasiga aylandi. Uning yana bir muhim xizmati shundaki, axloq, tabiatshunoslik va insoniy qiziqishlarni birlashtirib, ekologik axloqning ilmiy tizimini yaratdi.

Hozirgi vaqtga kelib ekologik muammolarning ortib borishi, yangidan-yangi tabiat bilan bog‘liq tahdidlarni keltirib chiqarib, xalqaro hamjamiyatning diqqat e’tiborini ana shu ekologiyani saqlab qolish zaruriyatini keltirib chiqarmoqda. Hozirgi davrda olib borilayotgan izlanishlarga e’tibor qaratsak o‘ziga xoslikni kuzatish mumkin. Jumladan, yosh tadqiqotchi olima G.Obidovaning talabalarda ekologik madaniyatni rivojlantirish mavzusida olib borgan tadqiqot ishida ekologik madaniyat tushunchasiga quyidagicha ta’rif beradi: “...ekologik madaniyat - umuminsoniy madaniyatning ajralmas qismi bo‘lib, u moddiy va ma’naviy mehnat mahsulining yig‘indisida taqdim qilingan; madaniyatning rivojlanishi kasbiy ekologik ta’limning rivojlanishi bilan o‘zaro bog‘liq”[9].

Madaniyat va ekologiyaning umumiy birligini ifoda etgan ushbu konsepsiya atrof-muhitni saqlash, tiklash va ulardan oqilona foydalanishga qaratilgan ekologik xabardorlikka asoslangan aniq ijtimoiy faoliyatni tavsiflaydi. Hozirgi vaqtda “ekologik madaniyat” tushunchasi munozarali va tadqiqot ishlari davom etmoqda. Bu bir tomondan, ushbu muammo bo‘yicha ko‘plab nuqtai nazarlarning mavjudligini anglatadi va boshqa tomondan, keyingi yo‘naltirilgan tadqiqot ishlarini yanada davom ettirish zarurligini ta’kidlaydi. Ekologik madaniyat va zamonaviy sivilizatsiyaning barqaror rivojlanishi o‘rtasidagi aloqalar bo‘yicha mahalliy tadqiqotlarning hozirgi holatini tavsiflab, shuni ta’kidlash kerakki, yurtimizdagi ko‘plab soha olimlarining ushbu muammoga qiziqishi yanada ortib bormoqda, eng muhimi, falsafa (A.B.G‘ulomov[10]), tarix (D.R.Norqo‘ziyev[11], B.B.Isxakov[12]), madaniyatshunoslik (Z.Sh.Yazdonov) va ko‘proq pedagogika (N.J.Isaqulova[13]) nazariyasi nuqtai nazaridan turib tahlil qilingan yangi ilmiy tadqiqot ishlari yaratildi.

Yuzaga kelgan va kelayotgan yangi-yangi ekologik muammolarning ijobiy yechimi sifatida hozirgi davrga kelib shunday xulosa qilish mumkin-ki, aholining ekologik madaniyati saviyasini rivojlantirishga ko‘proq e’tibor berish lozimligi, ayniqsa, o‘sib voyaga yetayotgan yoshlarga ekologik ta’lim-tarbiyaning serqirra usullari asosida zaruriy zamonaviy bilim va ko‘nikmalarni berib borishdan to‘xtamaslik zarur.

Yoshlar — jamiyatning asosiy tayanchi va kelajagidir. Keng ko‘lamli islohotlarimizni samarali amalga oshirishda ular hal qiluvchi kuch bo‘lib maydonga chiqmoqda. Aynan zamonaviy bilim olgan, ilg‘or kasb-hunarlarni, innovatsion texnologiyalarni, xorijiy tillarni puxta egallagan o‘g‘il-qizlarimiz mamlakatimizni yanada taraqqiy ettirishda yetakchi o‘rinlarni egallamoqdalar.

Endi, uchinchi ming yillik ostonasida, jamiyat bir qator misli ko‘rilmagan global o‘zgarishlarga duch kelgan kezda, yosh avlodni maqsadli o‘qitish zarurati yaqqol namoyon bo‘ldi. Ta’lim mazmuni – yuqori darajadagi insonparvarlik mazmunidagi, texnologik va ekologik madaniyatga ega bo‘lgan axborotlashgan jamiyatni barqaror shakllantirishni ta’minlashi kerak. Buning uchun, shubhasiz, fikrlash va xulq-atvorning turli xil stereotiplariga ega bo‘lgan yangi har tomonlama ma’lumotli, bilimli odamlar kerak. Aytish mumkinki, ta’limning eng muhim maqsadlaridan biri inson

taraqqiyoti muammolari, uning ijtimoiy va tabiiy muhit bilan aloqasi bo‘yicha zarur bilimlar majmuasini shakllantirishdir. Bu shaxsga o‘z tarixining turli bosqichlarida jamiyatni bilishga, madaniyat fenomeni, o‘zi, hamda insoniyatning mavjudligini tushunishga yordam berishi kerak. Tarixiy jihatdan ijtimoiy tizim va jamiyatning siyosiy tizimi doimo ta’limning xususiyatlariga, uning maqsadlari va mazmuniga ta’sir ko‘rsatib kelgan. Demokratik o‘zgarishlar ham ta’lim jarayoniga tubdan yangi imkoniyatlarni olib kelmoqda. Davlat ta’limni rivojlantirishni targ‘ib qiladi, shuningdek uni tashkil etishda yakkahukmron bo‘lishlikni asta-sekin to‘xtatadi. Demokratik munosabatlar keng quloch yozgan sari jamiyatda faol shaxslar, ayrim institutlar mustaqil bo‘lib, xususiy ta’lim muassasalarini tashkil etishlari mumkin.

Xorijlik tadqiqotchi olima Nafiset Asxadovna fikricha “yoshlar ekologik madaniyatining yangi paradigmasini shakllantirish nafaqat zamonaviy ekologik vaziyatni yaxshilashning ajralmas, sog‘lomlashtiruvchi, balki, zamonaviy jamiyatning umumiy mafkuraviy inqirozini bartaraf etish shartlaridan”[3] biri hisoblanadi. Nafiset Asxadovnaning qarashlari bizningcha ham muhim va dolzarbdir. Boisi, yoshlar ekologik madaniyati jamiyatdagi mafkuraning mazmuni, mohiyatini qay ko‘rinishida bo‘lishidan qat’iy nazar uni doimo o‘zida aks ettiradi.

MUHOKAMA. Ma’lumki, yoshlar yangicha fikrlashga, yangi-yangi g‘oyalarni dadil o‘rtaga tashlab, ularni amalga oshirishga, muammolarni ijodiy va nostandart yondashuvlar asosida hal etishga moyil bo‘ladi. Shuning uchun hozirgi kunda yosh avlod vakillarining bilim olishlari, ilm-fan, innovatsiyalar, adabiyot, sport, san’at sohasidagi iste’dod va salohiyatlarini yuzaga chiqarish, ularni jamiyatimizning ijtimoiy-siyosiy hayotida faol ishtirok etishlari uchun barcha sharoitlarni yaratishga ustuvor ahamiyat berilmoqda. Imom Buxoriy hadislaridan birida: “Yoshlikda o‘rganilgan ilm toshga o‘yilgan naqsh kabidir”[14], deyilgan. Buyuk allomalarimiz ana shunday hikmatlarga amal qilib, ilm-fan sohasida buyuk kashfiyotlarni amalga oshirganlari va umumbashariy tafakkur rivojiga beqiyos hissa qo‘shganlari tarixdan yaxshi ma’lum. Ana shunday qutlug‘ an’analarni davom ettirib, yurtimizda yangi Xorazmiylar, Farg‘oniylar, Beruniylar, Ibn Sinolar, Mirzo Ulug‘beklar, Navoiylarni tarbiyalab yetkazish – nafaqat vazifamiz, balki tarix va kelajak oldidagi muqaddas burchimizdir. Biz bu yo‘lda katta ishlarni boshladik. Mamlakatimizda yuqori bilim, malakaga ega bo‘lgan raqobatdosh kadrlar tayyorlash oliygohlari va xorijiy oliy ta’lim muassasalarining filiallari ochildi.

Yoshlarning ekologik madaniyatini oshirib borish doimo dolzarb ahamiyatga ega. Atrof-muhitni muhofaza qilish, ona tabiatni asrash, unga daxldor muammolarni bartaraf etish har bir kishining insoniy vazifasidir. Bugungi kunda ekologik vaziyat bu boradagi muammolarga e’tiborsizlikni xushlamaydi. Yoshlarning mas’uliyatini oshirish, ekologik muammolarni bartaraf etishda shaxsiy daxldorlik hissini oshirish, har bir fuqaro mas’uliyatni his qilgan holda yon-atrofga bee’tibor bo‘lmasligi juda ham muhim.

Ekologik madaniyat namoyon bo‘lishining murakkabligi va nomuvofiqligi, uning ijtimoiy-madaniy omillar ta’sirida o‘zgarishi ushbu hodisani jahon va mahalliy gumanitar fanlarda o‘rganishning oldingi tajribasini hisobga olgan holda yangi bosqichda nazariy tushunishni talab qildi.

NATIJA. Ontologik nuqtai nazardan yondashilganda ekologik madaniyat subyekti – inson bo‘lib, uning obyekti esa – biosferadir. U kompleks tushuncha bo‘lib, mavjud strukturasiga – inson va biosfera orasidagi dialektik munosabatlardan tashkil topgan ekologik borliq, ekologik ong, ekologik faoliyat, ekologik ehtiyoj, ekologik qadriyatlar tizimi, ekologik dunyoqarashlarni qamrab oladi. Ushbu tadqiq etilayotgan muammoni dialektik bir butunlik yoki yaxlitlik paradigmasidan kelib chiqib ijtimoiy falsafiy tahlilni ham tizimli tarzda davom ettirish lozim.

Shuningdek, gnoseologik ma’noda ekologik madaniyat insonlarning empirik darajasi bilan bevosita bog‘liq bo‘lgan-sezish, idrok etish, tasavvur va hissiy qabul qilishlardan (ekologik ma’noda) tashkil topib, uning epistemologik aspektlarini vujudga keltiradi.

Muammoning aksiologik aspekti esa, uni koevolyutsion tadrijiy taraqqiyot jarayonida tabiat va tabiiy jarayonlar bilangina inson o‘zini, yaxlit borliqning ajralmas qismi sifatida haqiqiy qadrli ekanligini, ya’nikim o‘zini baxtli his etishi mumkinligiga e’tibor qaratiladi.

Ekologik madaniyatning prognostik aspekti esa ekzistensial mazmunga ega bo‘lib, mavjudlik va kelajak ko‘proq inson aqli va faoliyatiga aloqador masala sifatida o‘rganiladi.

Muammoning nazariy metodologik darajasi esa-fundamental bilimlarning integratsiyasi asosida shakllanishini, jamiyatning yangi taraqqiyot bosqichida ijtimoiy falsafiy jihatdan tahlil albatta davom ettiriladi.

XULOSA. Shunday qilib, dunyoda sodir bo‘layotgan global o‘zgarishlar sharoitida, atrof-muhitning buzilishi fonida, ekologik madaniyatni shakllantirish va uning voqelikni real jarayonlarida namoyon bo‘lishi muammosi hozirgi paytda alohida ahamiyat kasb etmoqda va falsafiy aks ettirishni, bu haqda to‘plangan g‘oyalarni tizimlashtirishni talab qiladi. Mamlakatimizda barqaror bo‘lgan ekologik vaziyatni, tabiiy atrof-muhit musaffoligini saqlash, himoya qilish va tabiiy zaxiralardan oqilona foydalanishni to‘g‘ri yo‘lda rivojlantirishning muhim subyektiv omili bo‘lgan, voyaga yetib shaxs sifatida shakllanayotgan yoshlarda ekologik ong va madaniyatni yanada yuksaltirishga bo‘lgan e’tibor kuchaytirilmoqda.

[14] https: //www.dkm.gov.uz/uz/islom-dini-insonlarga-zamiatga-xizmat-kiluvchi-kandaj-angilik-va-kasfietni-kadrlaydi

Endilikka kelib, har bir muayyan jamiyat tabiatga nisbatan o‘zining ijobiy munosabatlarini qaror toptirish borasida tabiiy-ilmiy qarashlar tizimini ishlab chiqib uni rivojlantirishga intilmoqdalar. Shu bois mamlakatimizda ekologik madaniyatni yuksaltirishni yuqori bosqichlarga olib chiqish uchun ta’lim va tarbiyaga yanada yangicha zamonaviy mazmun berib, targ‘ibot ishlariga ijodiy yondashib borilsa, hamda oilaviy, milliy, umuminsoniy ekologik qadriyatlar borasida ijtimoiy hamkorlik va o‘zaro tajriba almashinishlarni yo‘lga qo‘yib faollashtirish lozim.

YOSHLAR MA'NAVIYATINI SHAKLLANTIRISHDA FALSAFIY BILIMLARNING O'RNI

Baratova Maxbuba Mubinjanovna
Falsafa fanlari nomzodi, O'zbekiston Davlat Jahon tillari universiteti
Ijtimoiy fanlar kafedrasi dotsenti,
E-mail: makhbubabaratova66@gmail.com

Annotatsiya: *Ushbu maqolada, yoshlar ma'naviyatini shakllantirishda falsafiy bilimlarning o'rni haqida fikr va mulohazalar yuritiladi. Globallashuv, raqamli transformatsiya va ijtimoiy-madaniy paradigmalar o'zgarayotgan zamonaviy davrda yosh avlodning ma'naviy va intellektual rivojlanishi jamiyat taraqqiyotini belgilovchi eng muhim omil hisoblanadi. Ontologiya, epistemologiya, aksiologiya va ekzistensial izlanishlar kesishmasini o'rganish orqali falsafiy ta'limning mustaqil fikrlash, mafkuraviy immunitet va fuqarolik mas'uliyatini yuksaltirishdagi muhim mexanizm ekanligi ko'rsatib berilgan.*

Kalit so'zlar: *yoshlar ma'naviyati, falsafiy bilimlar, ratsional dunyoqarash, mafkuraviy immunitet, globallashuv, milliy va umuminsoniy qadriyatlar.*

РОЛЬ ФИЛОСОФСКИХ ЗНАНИЙ В ФОРМИРОВАНИИ ДУХОВНОСТИ МОЛОДЕЖИ

Аннотация: *В данной статье рассматривается роль философских знаний в формировании духовности молодежи. В современную эпоху глобализации, цифровой трансформации и меняющихся социокультурных парадигм духовное и интеллектуальное развитие молодого поколения является важнейшим фактором, определяющим развитие общества. Изучение взаимосвязи онтологии, эпистемологии, аксиологии и экзистенциальных исследований показывает, что философское образование является важным механизмом повышения самостоятельности мышления, идеологической невосприимчивости и гражданской ответственности.*

Ключевые слова: *духовность молодежи, философские знания, рациональное мировоззрение, идеологическая невосприимчивость, глобализация, национальные и универсальные ценности.*

THE ROLE OF PHILOSOPHICAL KNOWLEDGE IN SHAPING THE SPIRITUALITY OF YOUNG PEOPLE

Abstract: *This article discusses the role of philosophical knowledge in shaping the spirituality of young people. In the modern era—characterized by globalization, digital transformation, and shifting socio-cultural paradigms—the spiritual and intellectual development of the younger generation is a crucial factor determining societal progress. By examining the intersection of ontology, epistemology, axiology, and existential inquiry, the article demonstrates that philosophical education serves as a vital mechanism for fostering independent thinking, ideological immunity, and civic responsibility.*

Keywords: *youth spirituality, philosophical knowledge, rational worldview, ideological immunity, globalization, national and universal values.*

Kirish. Bugungi kunda jahon ta'lim makonida kechayotgan integratsiya jarayonlari talabalarning mafkuraviy kompetentligini yuksaltirish, bozor iqtisodiyoti talablariga javob bera oladigan raqobatbardosh mutaxassislarni tayyorlash metodikasini tubdan yangilashni taqozo etmoqda. Zamonaviy pedagogik tizimlar va o'qitish modellari texnologik taraqqiyot natijalari bilan uyg'unlashgan holda, ta'lim jarayoniga interfaol dasturlar va innovatsion yondashuvlarni keng joriy etishga tayanmoqda.

Xalqaro miqyosda oliy ta'lim tizimining bosh maqsadi yoshlarni kasbiy ijtimoiylashtirish bilan birga, ularda ma'naviy-axloqiy barqarorlik va mafkuraviy immunitetni shakllantirishdan iboratdir. AQSh, Germaniya, Fransiya, Xitoy, Janubiy Koreya va Rossiya kabi yetakchi davlatlar tajribasi shuni ko'rsatadiki, talabalar tafakkurini o'stirish va ularning yashirin qobiliyatlarini yuzaga chiqarishda muammoli hamda modulli o'qitish, aralash ta'lim, mahorat darslari, vebinarlar hamda virtual ta'lim texnologiyalari hal qiluvchi ahamiyatga ega. Ushbu omillar yosh avlodni global g'oyaviy tahdidlardan himoya qilishning pedagogik asosi bo'lib xizmat qilmoqda.

Globallashuv sharoitida turli yot g'oyalar va mafkuraviy poligonlar kurashi faollashgan bir davrda har bir shaxs voqelikka nisbatan mustaqil va mustahkam dunyoqarashiga ega bo'lishi shart. O'zbekiston Respublikasi Prezidenti

Shavkat Mirziyoyev ta’kidlaganidek, agar jamiyat hayotining tanasi iqtisodiyot bo‘lsa, uning joni va ruhi ma’naviyatdir. Yangi O‘zbekistonni barpo etishda bozor tamoyillariga asoslangan kuchli iqtisodiyot bilan bir qatorda, ajdodlarimizning boy merosi va milliy qadriyatlarga asoslangan kuchli ma’naviyat asosiy ustun hisoblanadi.

Ushbu konseptual yondashuv milliy va umuminsoniy qadriyatlar mutanosibligini ta’minlashning bosh mezoni sanaladi. Shu nuqtayi nazardan, ijtimoiy-pedagogik jarayonlarning asosini tashkil etuvchi uchta tayanch tushunchaning mazmun-mohiyatini aniqlashtirib olish o‘rinlidir. Birinchidan, mafkura muayyan ijtimoiy guruh, millat yoki davlatning maqsad-muddaolari, hayotiy manfaatlari va istiqbol rejalari ifodalangan tizimli qarashlar majmui bo‘lib, u jamiyatni jipslashtiruvchi kuch vazifasini o‘taydi.

Belgilangan strategik maqsadlarga erishish oliy ta’lim tizimida dars mashg‘ulotlarini an’anaviy qoliplardan voz kechgan holda, ilg‘or pedagogik texnologiyalar asosida tashkil etishni talab qiladi. Bugungi kun o‘qituvchisi va ta’lim muassasasi rahbari eski andozalardan butunlay voz kechishi, ta’limning bozor iqtisodiyoti talablariga moslashuvchanligini ta’minlashi shart. Islohotlar natijasida mamlakatimiz iqtisodiy va ijtimoiy jihatdan jadal rivojlanmoqda, biroq kelgusi taraqqiyot jahon ta’lim amaliyotidagi yangi fan yutuqlaridan keng foydalanishni taqozo etadi. Zero, zamonaviy texnologiyalar ta’lim oluvchilarning intellektual, ijodiy va axloqiy kamolotining zaruriy shartidir. Jahon ta’lim amaliyoti va mamlakatimizda o‘tkazilgan tahlillar shuni ko‘rsatadiki, ta’lim tizimidagi eng og‘riqli nuqta - talabalarning nazariy bilimlarni amaliyotda qo‘llay olmasligi hamda murakkab hayotiy vaziyatlarda mustaqil qaror qabul qilishga qiynalishidir.

Ushbu muammoni bartaraf etish hamda talabalarda mafkuraviy immunitetni mustahkamlashda dars va ma’naviy-ma’rifiy tadbirlar jarayonida to‘rtta asosiy pedagogik texnologiyadan foydalanish yuqori samara beradi. Bular: katta hajmdagi ma’lumotlar oqimi bilan ishlash va argumentlangan tahlil ko‘nikmasini hosil qiluvchi axborot-rivojlantiruvchi texnologiyalar, talabalarni mustaqil va tanqidiy fikrlashga o‘rgatuvchi muammoli ta’lim texnologiyalari, kasbiy ko‘nikmalarni bevosita amaliy faoliyat orqali o‘zlashtirishga qaratilgan faoliyat texnologiyalari hamda ta’lim oluvchining individual qobiliyatlarini va ijtimoiy-ma’naviy faolligini shakllantiruvchi shaxsga yo‘naltirilgan texnologiyalardir. Zamonaviy axborot va kompyuter texnologiyalari ushbu pedagogik yondashuvlarning ta’sir kuchini bir necha barobarga oshirib, ta’lim tizimini avtoritar metodlardan voz kechib, shaxs manfaatlariga xizmat qiluvchi insonparvarlik pedagogikasiga o‘tishiga xizmat qiladi.

Bunday ko‘p qirrali ma’naviyatni shakllantirishga faqat passiv sotsializatsiya yoki madaniy kodlarni mexanik ravishda o‘zlashtirish orqali erishib bo‘lmaydi. Bu jarayon maqsadli va ichki darajada chuqur anglangan kognitiv faoliyatni talab qiladi. Falsafiy bilimlar ushbu konseptual o‘zgarishlar uchun zarur bo‘lgan tizimli asosni taqdim etadi. Borliq, bilish va qadriyatlar haqidagi tizimli fan sifatida falsafa yoshlarga intellektual mo‘ljal beradi, ularning tashqi axborotni shunchaki qabul qilishdan avtonom axloqiy va ekzistensial o‘z-o‘zini belgilash darajasiga o‘tishini ta’minlaydi.

O‘smirlik davridan yetuklikka o‘tish bosqichi mohiyatan o‘zlikni anglash, izchillik va voqelikning tarkibiy mohiyatini tushunishga intilish davridir. Mustahkam falsafiy poydevor bo‘lmasa, bu intilish ko‘pincha ekzistensial tarqoqlikka, kognitiv dissonansga yoki yuzaki va iste’molchilik qadriyatlarini tanqidiy tahlilsiz qabul qilishga olib keladi. Falsafiy bilimlar inson tajribasini g‘oyalar tarixining keng kontekstiga joylashtirish orqali mukammal dunyoqarash me’mori vazifasini o‘taydi.

Falsafaning ontologik va epistemologik jihatlarini o‘rganish orqali yoshlar dunyoni betartib voqealar ketma-ketligi sifatida emas, balki o‘zaro bog‘langan va qonuniyatlarga asoslangan tizim sifatida ko‘rishni o‘rganadilar. Tarixiy va zamonaviy falsafiy paradigmalarni tadqiq etish yoshlarning kognitiv ufqlarini kengaytiradi, ularni mahalliy ijtimoiy va shaxsiy muammolarga universal prizma orqali qarashga undaydi. Ushbu yaxlit yondashuv intellektual cheklanganlikning oldini oladi hamda shaxsiy hayotda ham, ijtimoiy faoliyatda ham uyg‘unlik, tizimli chuqurlik va uzoq muddatli oqibatlarni ko‘ra bilish qobiliyatini shakllantiradi.

Zamonaviy jamiyatda falsafiy bilimlarning eng muhim funksiyalaridan biri bu dialektik fikrlash va qat’iy intellektual tanqid madaniyatini tarbiyalashdir. Bugungi axborot ekotizimi yoshlarni doimiy ravishda manipulyativ media oqimlari, siyosiy tashviqotlar va buzg‘unchi mafkuraviy tendensiyalarga duchor qilmoqda. Falsafa mantiq, konseptual tahlil va Sokrat metodini qo‘llash orqali insonlarni murakkab argumentlarni qismlarga ajratishga, mantiqiy xatolarni aniqlashga va yashirin mafkuraviy maqsadlarni ochib berishga o‘rgatadi.

Ushbu kognitiv salohiyat zamonaviy ijtimoiy faylasuflar tomonidan “mafkuraviy immunitet” deb ta’riflangan xususiyatni yuzaga keltiradi. Mukammal falsafiy tayyorgarlikka ega bo‘lgan yoshlar axborotni shunchaki yutib yubormaydilar; ular ma’lumotlarning tub mohiyati va axloqiy asoslarini shubha ostiga olib, ob’ektiv tahlil qiladilar. Bunday tahliliy barqarorlik ularni radikalizm, ekstremizm va populistik ritorika ta’siridan himoya qiladi. Binobarin, ularning ma’naviy e’tiqodlari tashqi psixologik manipulyatsiyalar natijasi emas, balki haqiqiy, chuqur o‘ylangan va barqaror qadriyatga aylanadi.

Qadriyatlar haqidagi falsafiy ta’limot - aksiologiya ma’naviy tarbiyaning o‘zagini tashkil etadi. Zamonaviy yoshlar duch kelayotgan axloqiy manzara o‘ta plyuralistik va ko‘pincha qarama-qarshiliklarga boy. Falsafa bu murakkablikni

qat’iy dogmalarni majburlab tiqishtirish orqali emas, balki yoshlarni adolat, fazilat, burch, inson qadr-qimmati va umumiy farovonlik kabi tushunchalarni oqilona tadqiq qilishga jalb etish orqali hal qiladi.

Aristotel va Abu Nasr Forobiyning fazilatlar axloqidan tortib, Immanuel Kantning deontologik tamoyillari va zamonaviy gumanitar axloqgacha bo‘lgan klassik axloqiy tizimlarni o‘rganish orqali yoshlar axloq shunchaki sun’iy cheklovlar to‘plami emas, balki inson baxt-saodati va ijtimoiy jipslik uchun ratsional zaruriyat ekanini anglab yetadilar. Yoshlar ushbu aksiologik tamoyillarni o‘zlashtirganlarida, ularning ma’naviy diqqat-e’tibori xudbinona moddiyatchilikdan altruizm, ijtimoiy empatiya va ongli fuqarolik pozitsiyasiga tomon buriladi.

Yoshlik davri tabiatan chuqur ekzistensial tahlillar davridir. Shaxsiy o‘zlik, chekish va azob-uqubatlarning ma’nosi, erkinlik tabiati va hayotning o‘tkinchiligi haqidagi savollar ruhiy va ma’naviy yetuklik jarayonining ajralmas qismidir. Falsafiy yo‘l-yo‘riq bo‘lmagan taqdirda, bunday keskin ichki savollar kuchli ekzistensial xavotir, loqaydlik, begonalashish yoki nigilizmga olib kelishi mumkin.

Zamonaviy o‘quv dasturlarida falsafiy ta’lim sifatini oshirish va uning integratsiyasini kuchaytirish shunchaki akademik talab emas, balki jamiyatning strategik zaruriyatidir. Faqat falsafiy jihatdan asoslangan, ma’naviy jihatdan barqaror shaxslarni tarbiyalash orqali jamiyat donolik, o‘zaro hurmat va barqaror axloqiy taraqqiyotga asoslangan kelajakni kafolatlashi mumkin.

Xulosa. Yosh avlodning ma’naviy shakllanishini o‘zibo‘larchilik ijtimoiy oqimlarga yoki passiv media ta’siriga tashlab qo‘yish mumkin emas; u tizimli, maqsadli va yuqori darajadagi intellektual tarbiyani talab qiladi. Falsafiy bilimlar ushbu rivojlanish jarayonida ajralmas poydevor bo‘lib xizmat qiladi. Ratsional dunyoqarashni shakllantirish, tanqidiy va dialektik qobiliyatlarni charxlash, mustahkam axloqiy qadriyatlarni singdirish hamda ekzistensial muammolarga chuqur tushunchalar berish orqali falsafa yoshlik salohiyatini yetuk, ma’rifatli ma’naviyatga aylantiradi.

Annotatsiya: *Mazkur maqolada yoshlar identikligining zamonaviy jamiyat transformatsiyasi jarayonidagi ijtimoiy-falsafiy mohiyati tahlil qilinadi. Yoshlar identikligi shaxsning o‘zini muayyan ijtimoiy, madaniy, milliy va fuqarolik makoniga mansub deb anglashi bilan birga, uning jamiyatdagi o‘rni, qadriyatlari, dunyoqarashi va ijtimoiy mas’uliyatini belgilovchi murakkab fenomen sifatida talqin etiladi. Tadqiqotda globallashuv, raqamlashtirish, ommaviy kommunikatsiya, qadriyatlar transformatsiyasi, an’anaviylik va zamonaviylik dialektikasi yoshlar identikligiga ta’sir etuvchi asosiy omillar sifatida ko‘rib chiqiladi. Shuningdek, yoshlarning innovatsion tafakkuri, ijtimoiy faolligi va fuqarolik pozitsiyasi jamiyatning o‘zini o‘zi yangilash mexanizmlari bilan bog‘liq holda tahlil qilinadi. Maqolada yoshlar identikligi “ijtimoiy muhit → identiklik → faoliyat va mas’uliyat → yangi ijtimoiy muhit” tamoyili asosida jamiyat transformatsiyasining subyektiv va aksiologik omili sifatida asoslanadi.*

Kalit so‘zlar: *yoshlar, identiklik, ijtimoiy identiklik, milliy identitet, ijtimoiy ong, qadriyat, globallashuv, raqamli transformatsiya, innovatsion tafakkur, fuqarolik pozitsiyasi, modernizatsiya, ijtimoiy-falsafiy tahlil.*

ИДЕНТИЧНОСТЬ МОЛОДЕЖИ И ТРАНСФОРМАЦИЯ СОВРЕМЕННОГО ОБЩЕСТВА: СОЦИАЛЬНО-ФИЛОСОФСКИЙ АНАЛИЗ

Аннотация: *В статье анализируется социально-философская сущность идентичности молодежи в процессе трансформации современного общества. Идентичность молодежи трактуется как сложный феномен, который наряду с осознанием личностью своей принадлежности к определенному социальному, культурному, национальному и гражданскому пространству определяет ее место в обществе, ее ценности, мировоззрение и социальную ответственность. В исследовании в качестве основных факторов, влияющих на идентичность молодежи, рассматриваются глобализация, цифровизация, массовая коммуникация, трансформация ценностей, а также диалектика традиционности и современности. Кроме того, инновационное мышление, социальная активность и гражданская позиция молодежи анализируются в связи с механизмами самообновления общества. В статье идентичность молодежи обосновывается как субъективный и аксиологический фактор трансформации общества на основе принципа «социальная среда → идентичность → деятельность и ответственность → новая социальная среда».*

Ключевые слова: *молодежь, идентичность, социальная идентичность, национальная идентичность, общественное сознание, ценность, глобализация, цифровая трансформация, инновационное мышление, гражданская позиция, модернизация, социально-философский анализ.*

YOUTH IDENTITY AND THE TRANSFORMATION OF CONTEMPORARY SOCIETY: A SOCIO-PHILOSOPHICAL ANALYSIS

Abstract: *This article analyzes the socio-philosophical essence of youth identity within the process of contemporary societal transformation. Youth identity is interpreted as a complex phenomenon which, together with the individual’s awareness of belonging to a particular social, cultural, national and civic space, also determines their place in society, their values, worldview and social responsibility. The study considers globalization, digitalization, mass communication, the transformation of values and the dialectic of tradition and modernity as the principal factors influencing youth identity. In addition, the innovative thinking, social activity and civic stance of young people are analyzed in connection with society’s mechanisms of self-renewal. The article substantiates youth identity as a subjective and axiological factor of societal transformation on the basis of the principle “social environment → identity → activity and responsibility → new social environment”.*

Keywords: *youth, identity, social identity, national identity, social consciousness, value, globalization, digital transformation, innovative thinking, civic stance, modernization, socio-philosophical analysis.*

KIRISH. Yoshlar identikligi va zamonaviy jamiyat transformatsiyasi masalasi bugungi ijtimoiy-falsafiy tafakkurning inson, jamiyat va tarixiy taraqqiyot munosabatlarini qayta idrok etishni taqozo etayotgan eng murakkab nazariy muammolaridan biridir. Zero, zamonaviy jamiyatning transformatsiyasi faqat iqtisodiy, siyosiy yoki texnologik tizimlarning yangilanishi bilan belgilanmaydi; uning tub mohiyati, avvalo, insonning o‘zini, o‘z ijtimoiy mansubligini, qadriyatlarini, tarixiy xotirasini va kelajak oldidagi mas’uliyatini anglash shakllarining o‘zgarishida namoyon bo‘ladi. Ayniqsa, yoshlar ushbu jarayonning oddiy kuzatuvchisi yoki tashqi ta’sirlarni qabul qiluvchi obyekti emas, balki yangi ijtimoiy-madaniy voqelikni yaratishga qodir faol subyekt sifatida maydonga chiqadi. Shu ma’noda yoshlar identikligini tadqiq etish zamonaviy jamiyat transformatsiyasining insoniy o‘lchamini, uning aksiologik mazmunini va ijtimoiy-madaniy mexanizmlarini anglashning metodologik kaliti sifatida namoyon bo‘ladi.

Identiklik tushunchasining nazariy mazmuni shaxsning o‘zligini anglash jarayonidan ancha keng bo‘lib, u “Men kimman?” degan ekzistensial savol bilan bir qatorda “Men kimlar bilan birgaman?”, “Qaysi qadriyatlarni o‘zimniki deb bilaman?”, “Jamiyatdagi o‘rnim va mas’uliyatim nimadan iborat?” kabi ijtimoiy-falsafiy savollarni ham qamrab oladi. Shu nuqtayi nazardan identiklikni tayyor va o‘zgarmas holat sifatida emas, balki shaxs va ijtimoiy muhitning uzluksiz o‘zaro ta’siri natijasida vujudga keladigan dinamik jarayon sifatida tushunish maqsadga muvofiq. Bu borada Ch. Taylorning dialogik identiklik konsepsiyasi alohida metodologik ahamiyatga ega. Faylasuf insonning o‘zligini mutlaq individual va monologik tarzda yaratishini rad etib, shaxsning identikligi boshqalar bilan munosabat va muloqot jarayonida shakllanishini asoslaydi: “inson o‘zligini aniqlash uchun zarur bo‘lgan ifoda tillarini boshqalar bilan almashinuv orqali egallaydi” [1, 32-b.]. Taylorning mazkur pozitsiyasi yoshlar identikligini tushunishda, avvalo, uning ijtimoiy-muloqotiy tabiatini ochib beradi. Ya’ni yosh insonning “men”i oiladan, ta’lim muhitidan, tengdoshlar guruhidan, milliy-madaniy makondan, ommaviy kommunikatsiyadan va bugungi kunda raqamli tarmoqlardan tashqarida shakllanmaydi. Demak, yoshlar identikligi individual psixologik hodisa emas, balki ijtimoiy munosabatlar, madaniy kodlar va tan olinishi mexanizmlarining kesishish nuqtasida vujudga keladigan ijtimoiy-ontologik hodisadir. Taylorning kuchli jihati shundaki, u identiklikni shaxsning ichki “tayyor mohiyati” sifatida emas, balki dialog, e’tirof va ijtimoiy munosabatlar orqali doimiy ravishda shakllanadigan hodisa sifatida talqin qiladi. Biroq ushbu konsepsiyani zamonaviy raqamli jamiyat sharoitida rivojlantirish zarur: bugungi yoshning “muhim boshqalari” faqat real ijtimoiy muhit bilan chegaralanmaydi, balki algoritmik platformalar, virtual jamoalar va transmilliy kommunikativ makon bilan ham belgilanadi. Shunday ekan, yoshlar identikligi tobora ko‘proq real ijtimoiylik va virtual ijtimoiylikning sintezidan tarkib topayotgan gibrid identiklik xususiyatini kasb etmoqda.

Mazkur jarayonni globallashuvdan ajratib tasavvur qilish mumkin emas. Globallashuv insonning ijtimoiy makonini kengaytirib, mahalliy va global qadriyatlar, milliy va transmilliy identikliklar, an’anaviy va postindustrial hayot tarzlari o‘rtasidagi munosabatni murakkablashtirmoqda. O‘zbekiston ijtimoiy-falsafiy tadqiqotlarida ham mazkur muammo milliy va umuminsoniy qadriyatlar dialektikasi bilan uzviy bog‘langan holda talqin qilinmoqda. Jumladan, A. Erkayevning qarashlari mazkur masalaning aksiologik mohiyatini ochishda muhimdir. Unga ko‘ra, “milliy qadriyatlar umuminsoniy qadriyatlarga zid emas, aksincha, ularning milliy shakldagi ifodasidir” [2, 61-b.]. Mazkur fikrning nazariy qimmati shundaki, u milliylik va umuminsoniylikni o‘zaro inkor qiluvchi ikki qarama-qarshi qutb sifatida emas, balki mazmun va shaklning dialektik birligi sifatida tushunishga imkon beradi. Yoshlar identikligi nuqtayi nazaridan bu juda muhim: milliy identiklikning barqarorligi global ochiqlikni inkor etish bilan emas, balki umuminsoniy qadriyatlarni milliy-madaniy tajriba orqali o‘zlashtirish va qayta talqin qilish bilan ta’minlanadi. Shu bilan birga, Erkayevning yondashuvini faqat qadriyatlarni saqlash paradigmasi bilan chegaralab qo‘yish ham metodologik jihatdan yetarli emas. Chunki transformatsiyalanuvchi jamiyatda qadriyatning hayotiyligi uning o‘zgarmasligida emas, balki yangi tarixiy sharoitlarda o‘z mazmunini saqlagan holda yangi shakllarda namoyon bo‘la olish qobiliyatidadir. Shuning uchun milliy identiklikni “muzlatilgan madaniy xotira” emas, balki tarixiy xotira, zamonaviy tajriba va kelajak tasavvurining dinamik sintezi sifatida baholash lozim.

Mazkur fikrni N. Jo‘rayevning milliy qadriyatlar haqidagi qarashlari yanada chuqurlashtiradi. U “milliy urf-odatlar jamiyatning ma’naviy immuniteti bo‘lib, umuminsoniy qadriyatlar bilan uyg‘unlashgan taqdirdagina barqaror taraqqiyotga xizmat qiladi” [3, 88-b.], deya ta’kidlaydi. Ushbu yondashuvning muhim tomoni shundaki, unda qadriyatlar faqat o‘tmishdan meros bo‘lib qolgan madaniy shakl sifatida emas, balki jamiyatning ijtimoiy barqarorligini ta’minlovchi faol mexanizm sifatida talqin qilinadi. Biroq “ma’naviy immunitet” kategoriyasini ilmiy jihatdan qo‘llashda uning mazmunini aniq belgilash talab etiladi. Aks holda mazkur tushuncha tashqi ta’sirlarning barchasini rad etuvchi konservativ himoya mexanizmiga aylanishi mumkin. Bizningcha, zamonaviy jamiyat sharoitida ma’naviy immunitetning adekvat shakli tashqi ta’sirni mutlaq inkor etish emas, balki uni tanqidiy saralash, aksiologik baholash va konstruktiv

o‘zlashtirish qobiliyati bilan belgilanadi. Aynan shu nuqtada yoshlar identikligi transformatsiyasining eng muhim falsafiy paradoksi yuzaga keladi: identiklikni saqlab qolish uchun uni o‘zgartirish, uni rivojlantirish uchun esa uning tarixiy ildizlarini saqlash zarur. Demak, identiklikning barqarorligi statiklik emas, balki dinamik barqarorlik hodisasidir.

Zamonaviy jamiyatning mazkur dinamik tabiatini Z. Bauman “suyuqlashgan zamonaviylik” konsepsiyasi orqali o‘ziga xos tarzda ifodalaydi. Tadqiqotlarda Bauman qarashlari yoshlar qadriyatlarining o‘zgarishi kontekstida sharhlanib, “an’analar yoshlar uchun qat’iy buyruqdan ko‘ra, tanlab olinadigan ma’naviy resursga aylanadi” [4, 89-b.] degan fikr ilgari suriladi. Bu yondashuv yoshlar identikligining zamonaviy transformatsiyasini tushuntirish uchun nihoyatda muhimdir. Chunki bugungi yosh avlod an’anani shunchaki meros qilib olmaydi; u uni tanlaydi, qayta talqin qiladi, ayrim unsurlarini qabul qiladi, ayrimlarini esa zamonaviy hayot talablari bilan mos kelmagani uchun qayta ko‘rib chiqadi. Demak, an’anaviylikning reproduktiv mexanizmi asta-sekin refleksiv mexanizmga aylanmoqda. Biroq Baumanning “suyuqlik” metaforasi bilan izohlanadigan haddan tashqari o‘zgaruvchanlikni identiklikning barcha shakllariga universal tavsif sifatida tatbiq etish ehtiyotkorlikni talab qiladi. Chunki insonning ijtimoiy mavjudligi nafaqat o‘zgarish, balki davomiylik, xotira, mansublik va ma’naviy tayanchlarga bo‘lgan ehtiyojni ham o‘z ichiga oladi. Shu sababli yoshlar identikligining zamonaviy transformatsiyasi “an’anadan voz kechish” emas, balki an’ananing refleksiv modernizatsiyasi sifatida talqin qilinishi maqsadga muvofiq.

Aynan shu nuqtada A. Giddensning refleksiv modernlik konsepsiyasi alohida nazariy ahamiyat kasb etadi. Giddensning yondashuvida zamonaviylik insonning o‘z “Men”ini qayta-qayta tahlil qilishi va hayotiy tanlovlarini refleksiv ravishda tashkil etishi bilan tavsiflanadi. Tadqiqotlarda uning qarashlari “zamonaviy sharoitda an’analar tanqidiy tanlov obyektiga aylanadi” degan mazmunda ifodalangan [5, 38-b.]. Mazkur qarash yoshlar identikligini jamiyat transformatsiyasining faol subyekti sifatida tushunish uchun metodologik asos beradi: yosh inson tayyor ijtimoiy rolni shunchaki egallamaydi, balki o‘z hayot strategiyasini tanlash, asoslash va qayta ko‘rib chiqish orqali identikligini yaratadi. Bu jarayonning ijodiy jihati shundaki, yoshlar an’anaviy tajriba bilan zamonaviy imkoniyatlar o‘rtasida yangi ma’no va yangi ijtimoiy pozitsiyalarni shakllantiradi. Demak, identiklikning transformatsiyasi jamiyatdagi umumiy modernizatsiyaning inson ongidagi individual aks-sadosigina emas, balki uning faol davom ettirilish mexanizmidir.

M. Castellsning tarmoq jamiyati va identiklik haqidagi konsepsiyasi esa ushbu masalaga yangi — kommunikativ va texnologik o‘lcham qo‘shadi. U axborot jamiyati sharoitida “madaniy identitetlar global axborot oqimlari bilan to‘qnashuvda qayta shakllanadi” [6, 253-b.]. Ushbu fikr bugungi yoshlar identikligini anglash uchun ayniqsa dolzarbdir, chunki raqamli makon yoshlar ijtimoiylashuvining oddiy vositasi emas, balki identiklik ishlab chiqariladigan alohida ijtimoiy makonga aylanmoqda. Yosh inson endilikda o‘zligini faqat oila, mahalla yoki milliy madaniyat doirasida emas, balki global axborot oqimlari, virtual jamoalar, ijtimoiy tarmoqlar va transmilliy madaniy kodlar bilan munosabatda shakllantiradi. Castells yondashuvining kuchli jihati shundaki, u identiklikning axborot-kommunikatsion infratuzilma bilan bog‘liqligini ko‘rsatadi. Shu bilan birga, mazkur konsepsiyani yoshlar masalasiga tatbiq etishda lokal madaniyatlarning qarshilik, moslashish va qayta kodlash salohiyatini ham hisobga olish lozim. Chunki global axborot oqimi mahalliy identiklikni avtomatik ravishda yo‘q qilmaydi; aksincha, ayrim hollarda u milliy o‘zlikning yanada faol anglanishiga ham sabab bo‘lishi mumkin. Demak, raqamlashtirishning identiklikka ta’siri bir yo‘nalishli emas, balki dekonstruksiya va rekonstruksiyaning bir vaqtda kechishi bilan tavsiflanadi.

Yoshlar identikligi transformatsiyasining mazkur jihati zamonaviy ilmiy tadqiqotlarda ham tasdiqlanmoqda. Raqamli globallashuv yosh avlodning identiklik shakllanishiga global va lokal madaniy ta’sirlarning birgalikda kirib kelishiga olib kelayotgani, buning natijasida gibrid identiklik shakllari yuzaga kelayotgani qayd etilgan (Lusianawati, 2025). Bu holat yuqorida qayd etilgan dialektik yondashuvni empirik jihatdan ham mustahkamlaydi: zamonaviy yosh o‘z milliy mansubligini global madaniy tajribadan ajratib emas, balki u bilan o‘zaro aloqada qayta anglamoqda. Shunday qilib, bugungi yoshlar identikligi monolit emas, balki ko‘p qatlamli, kontekstual va refleksiv xarakterga ega bo‘lib bormoqda.

Yoshlar identikligining jamiyat transformatsiyasidagi subyektiv omil sifatidagi mohiyatini X. I. Abduraxmonovning innovatsion tafakkur va yoshlar tashabbuskorligiga bag‘ishlangan tadqiqotlari bilan ham bog‘lash mumkin. Uning ilmiy konsepsiyasida yoshlarning innovatsion tafakkuri faqat texnologik yangilik yaratish qobiliyati emas, balki insonning jamiyat va kelajak haqidagi tasavvurlarini yangilashga qodir ijtimoiy-falsafiy salohiyat sifatida qaraladi. Muallif tadqiqotida “innovatsion tafakkur va faoliyat o‘rtasidagi o‘zaro bog‘liqlik” asosida “bilim–qadriyat–amaliyot” dialektikasi ishlab chiqilgan hamda ta’lim, raqamli kommunikatsiya, fuqarolik faolligi va ma’naviy tarbiya yoshlar tashabbuskorligini shakllantiruvchi o‘zaro bog‘liq ijtimoiy-madaniy omillar sifatida asoslangan [7, 13–14-b.]. Mazkur konsepsiyaning mavzuimiz uchun alohida ahamiyati shundaki, u identiklikni faqat ongdagi mansublik hissi bilan chegaralab qo‘ymasdan, uni faoliyat bilan bog‘laydi. Ya’ni yoshning “men kimman?” degan savoliga javobi uning “men nima qilaman?” degan savoliga javobida konkretlashadi. Shu nuqtayi nazardan identiklik — bu faqat ong holati emas, balki ijtimoiy amaliyotga aylangan o‘zlikdir. Yosh o‘zini innovator, fuqaro, tadqiqotchi, tadbirkor yoki ijodkor sifatida anglashi bilan bir qatorda, ushbu identiklikni real faoliyatda namoyon qilgan taqdirdagina jamiyat transformatsiyasining haqiqiy subyektiga aylanadi. Abduraxmonov tadqiqotining yana bir muhim jihati shundaki, unda yoshlarning innovatsion tashabbuskorligi

an’anaviylik va zamonaviylik o‘rtasidagi dialektik munosabatdan tashqarida emas, balki aynan shu munosabat ichida qaraladi. Shu bois innovatsiya va an’ana qarama-qarshi tushunchalar emas; innovatsion yangilanishning ijtimoiy barqarorligi ko‘pincha tarixiy-madaniy xotira bilan konstruktiv aloqaga bog‘liqdir.

O‘zbek ijtimoiy-falsafiy tafakkurida yoshlar identikligi masalasining yana bir muhim qirrasi urf-odat, an’ana va qadriyatlarning yoshlar ongini transformatsiyalashdagi rolidir. O. Yusupaliyevning tadqiqotida ushbu jarayon “urf-odat, an’ana va qadriyatlarning ijtimoiy-madaniy regulyativ funksiyasi hamda mafkuraviy ongning aksiologik-integrativ tabiati” bilan bog‘liq holda tahlil qilinib, ularning yoshlar ongidagi transformatsiyasi dialektik jarayon sifatida asoslangan [8]. Mazkur yondashuvni identiklik muammosiga tatbiq etganimizda, an’ana va qadriyatlar yoshlar identikligini faqat saqlab qoluvchi mexanizm emas, balki uni qayta ishlab chiqaruvchi va yangi tarixiy sharoitga moslashtiruvchi vosita ekanini ko‘ramiz. Ayniqsa, muallifning “yosh avlod an’analarni to‘liq rad etmaydi, balki ularni zamon talablari asosida qayta mazmun bilan boyitadi” degan N. Jo‘rayev qarashiga murojaati [9, 119-b.] an’ana va transformatsiya o‘rtasidagi munosabatni statik emas, dinamik jarayon sifatida talqin qilish imkonini beradi. Bu yerda ilmiy jihatdan muhim nuqta shundaki, identiklikning davomiyligi aynan uning o‘zgarishga qodirligi bilan ta’minlanadi. Agar an’ana mutlaq o‘zgarmas shakl sifatida qaralsa, u yoshlar uchun begona va faqat tashqi normativ bosim sifatida namoyon bo‘lishi mumkin; agar u refleksiv ravishda qayta talqin qilinsa, an’ana yoshlar identikligining ichki ma’naviy resursiga aylanadi.

Yoshlar identikligi va jamiyat transformatsiyasi munosabatining yana bir fundamental jihati — ijtimoiy e’tirof va kommunikativ legitimlik masalasidir. J. Habermasning kommunikativ ratsionallik konsepsiyasi asosida tadqiqotlarda “qadriyatlar ochiq muloqot va dalillashuv orqali legitimlik kasb etgandagina barqaror bo‘ladi” degan fikr ilgari suriladi [10, 457-b.]. Mazkur yondashuv yoshlar identikligi uchun alohida ahamiyatga ega, chunki yoshlar ongiga qadriyatlarni mexanik singdirish ularning ichki e’tiqodini shakllantirish uchun yetarli emas. Qadriyat shaxs tomonidan anglanishi, muhokama qilinishi, savol ostiga qo‘yilishi va asoslangan holda qabul qilinishi kerak. Shunday sharoitdagina identiklik tashqi ijtimoiy nazorat mahsuli emas, balki refleksiv ravishda o‘zlashtirilgan ijtimoiy pozitsiyaga aylanadi. Demak, zamonaviy jamiyatda yoshlar identikligini shakllantirishning samarali mexanizmi buyruqbozlik yoki biryoqlama targ‘ibot emas, balki dialog, munozara, tanqidiy tafakkur va ijtimoiy e’tirofning birligidir.

Shu o‘rinda yoshlar identikligi masalasining zamonaviy jamiyat transformatsiyasidagi fundamental paradoksi namoyon bo‘ladi: jamiyat bir tomondan yoshlarni mavjud ijtimoiy-madaniy tartibga integratsiya qilishga intiladi, ikkinchi tomondan esa aynan yoshlarning mavjud tartibni yangilashiga ehtiyoj sezadi. Demak, ijtimoiylashuv va innovatsiya o‘rtasidagi qarama-qarshilik aslida absolyut qarama-qarshilik emas. Haqiqiy ijtimoiy taraqqiyot yoshlarni mavjud qadriyatlarni shunchaki takrorlovchi avlod sifatida emas, balki ularni tarixiy tajriba bilan uyg‘unlashtirib, yangi sharoitlarda qayta ma’nolantiruvchi subyekt sifatida shakllantirishni talab qiladi. Shu ma’noda yoshlar identikligi jamiyat transformatsiyasining aksiologik, subyektiv va institutsional kesishuv nuqtasi hisoblanadi.

Mazkur metodologik yondashuvdan kelib chiqib, yoshlar identikligini zamonaviy jamiyat transformatsiyasining uch o‘zaro bog‘liq darajasida tasavvur qilish mumkin: birinchisi — ontologik daraja, bunda yosh inson o‘zining jamiyatdagi mavjudlik shaklini anglaydi; ikkinchisi — aksiologik daraja, bunda u qaysi qadriyatlarni o‘zining ma’naviy tayanchi sifatida qabul qilishini belgilaydi; uchinchisi — praxeologik daraja, bunda identiklik amaliy faoliyat, fuqarolik pozitsiyasi, innovatsion tashabbus va ijtimoiy mas’uliyat orqali real ijtimoiy kuchga aylanadi. Ushbu uchlikning birortasi mavjud bo‘lmasa, identiklik to‘laqonli ijtimoiy hodisaga aylana olmaydi. Faqat mansublik hissi mavjud bo‘lib, faoliyat bo‘lmasa, identiklik passiv xarakter kasb etadi; qadriyatlar mavjud bo‘lib, refleksiya bo‘lmasa, ular dogmatik shaklga tushishi mumkin; innovatsion faoliyat mavjud bo‘lib, aksiologik asos bo‘lmasa, u ijtimoiy jihatdan destruktiv oqibatlarni ham keltirib chiqarishi ehtimoldan xoli emas.

Shu sababli zamonaviy jamiyat transformatsiyasi sharoitida yoshlar identikligini shakllantirish masalasi faqat ma’naviy-tarbiyaviy vazifa emas, balki jamiyatning kelajakdagi ijtimoiy barqarorligi, innovatsion salohiyati va madaniy davomiyligini belgilovchi strategik ilmiy muammo sifatida namoyon bo‘ladi. Yoshlar identikligining konstruktiv modeli milliy va umuminsoniy qadriyatlarning uyg‘unligi, an’ana va innovatsiyaning dialektik birligi, individual erkinlik va ijtimoiy mas’uliyatning muvozanati, real va raqamli ijtimoiy makonlarning o‘zaro integratsiyasi hamda tanqidiy-refleksiv tafakkurga asoslanishi lozim. Aynan shunday identiklik shaxsni jamiyatga moslashuvchi passiv mavjudotdan uni o‘zgartiruvchi faol subyektga aylantiradi. Shunday ekan, mazkur tadqiqotning konseptual asosini “jamiyat yoshlar identikligini shakllantiradi, yoshlar esa o‘z identikligi, qadriyatlari va faoliyati orqali jamiyatning keyingi transformatsiyasini amalga oshiradi” degan dialektik tamoyil tashkil etadi. Bu tamoyil yoshlar identikligini zamonaviy jamiyat taraqqiyotining oddiy natijasi emas, balki uning ichki harakatlantiruvchi kuchlaridan biri sifatida talqin qilish imkonini beradi.

Mavzuga oid adabiyotlar tahlili. Yoshlar identikligi va zamonaviy jamiyat transformatsiyasi muammosi O‘zbekistonda so‘nggi yillarda ijtimoiy-falsafiy tadqiqotlarning muhim yo‘nalishlaridan biriga aylanmoqda. Mavzuga bevosita yaqin tadqiqotlardan biri O. O. Yusupaliyevning “Yoshlar mafkuraviy ongi transformatsiyalashuvida urf-odatlar, an’analar va qadriyatlar o‘rni” nomli falsafa fanlari bo‘yicha PhD dissertatsiyasidir. Muallif yoshlar ongidagi o‘zgarishlarni

urf-odat, an’ana va qadriyatlarning transformatsiyasi bilan uzviy bog‘liq jarayon sifatida talqin qilib, ularning “ijtimoiy-madaniy regulyativ funksiyasi” va mafkuraviy ongning “aksiologik-integrativ tabiati” o‘rtasidagi dialektik aloqani asoslaydi. Ushbu tadqiqotning mavzuimiz uchun muhim jihati shundaki, unda yoshlar ongining transformatsiyasi faqat tashqi mafkuraviy ta’sirlar natijasi emas, balki milliy va umuminsoniy qadriyatlarning o‘zaro ta’siri asosida kechadigan murakkab ijtimoiy-madaniy jarayon sifatida ko‘rsatiladi.

Mazkur dissertatsiyada globallashuv va raqamli kommunikatsiyalar sharoitida yoshlar dunyoqarashining o‘zgarishi ham alohida tahlil qilingan. Muallif yoshlar ongidagi transformatsiyani “milliy qadriyatlar va umuminsoniy tamoyillar uyg‘unligi asosida faol, ongli va maqsadli qayta qurilish jarayoni” sifatida baholaydi. Bu yondashuv yoshlar identikligini zamonaviy jamiyatdagi o‘zgarishlarning passiv mahsuli emas, balki ularni anglash, saralash va qayta talqin qilishga qodir faol subyekt sifatida ko‘rish imkonini beradi.

X. I. Abduraxmonovning “Yoshlarda innovatsion tashabbuskorlikni rivojlantirishning falsafiy-konseptual asoslari” mavzusidagi falsafa fanlari doktori (DSc) dissertatsiyasi avtoreferati ham mavzuning ilmiy asoslarini kengaytiradi. Muallif yoshlarning innovatsion tashabbusini “insonning yaratuvchan tabiatini ijtimoiy reallikka tatbiq etuvchi subyektiv-ijodiy jarayon” sifatida talqin qiladi va uni yoshlarni ijtimoiy taraqqiyotning faol subyektiga aylantiruvchi mexanizm sifatida asoslaydi. Ushbu qarash yoshlar identikligi masalasini faqat mansublik va qadriyatlar doirasida emas, balki ijodkorlik, tashabbuskorlik va ijtimoiy faoliyat bilan bog‘liq holda tadqiq etish zarurligini ko‘rsatadi.

Shuningdek, Abduraxmonov tadqiqotida zamonaviy fan, raqamli tafakkur va ijtimoiy ongning o‘zaro aloqasi hamda an’anaviylik va zamonaviylik dialektikasi yoshlar innovatsion faolligini shakllantiruvchi omillar sifatida ko‘rsatilgan. Bu yondashuvdan kelib chiqib, zamonaviy yoshlar identikligi milliy-madaniy merosni saqlash bilan bir qatorda, yangi bilim, texnologiya va innovatsiyalarni o‘zlashtirish qobiliyati bilan ham tavsiflanishini qayd etish mumkin.

Umuman, tahlil qilingan adabiyotlar yoshlar identikligi va jamiyat transformatsiyasi o‘rtasidagi munosabatni qadriyatlar, milliy o‘zlik, mafkuraviy ong, raqamli muhit va innovatsion tafakkurning o‘zaro ta’siri orqali tushuntirish imkonini beradi. Shu bilan birga, mavjud tadqiqotlarda ushbu omillarning aksariyati alohida yo‘nalishlarda o‘rganilgan. Shuning uchun yoshlar identikligini milliy va umuminsoniy qadriyatlar, raqamli transformatsiya hamda innovatsion faollikning yagona tizimidagi hodisa sifatida kompleks ijtimoiy-falsafiy tadqiq etish dolzarb ilmiy vazifa bo‘lib qolmoqda.

Tadqiqot metodologiyasi. Mazkur tadqiqotning metodologik asosini yoshlar identikligi va zamonaviy jamiyat transformatsiyasini o‘zaro bog‘liq, dinamik va ko‘p omilli ijtimoiy-falsafiy hodisalar sifatida o‘rganish tamoyili tashkil etadi. Tadqiqotda dialektik, tizimli, qiyosiy, strukturaviy-funksional, fenomenologik va konstruktivistik yondashuvlar uyg‘unlashtirildi. Dialektik yondashuv orqali yoshlar identikligining an’ana va zamonaviylik, milliylik va umuminsoniylik, barqarorlik va o‘zgaruvchanlik o‘rtasidagi ziddiyatli, biroq o‘zaro ta’sirchan munosabatlari tahlil qilindi. Tizimli yondashuv identiklikni qadriyat, ijtimoiy mansublik, fuqarolik pozitsiyasi, tarixiy xotira, raqamli muhit va innovatsion faollik kabi tarkibiy qismlarning yaxlit tizimi sifatida ko‘rib chiqishga imkon berdi. Qiyosiy yondashuv asosida turli ilmiy tadqiqotlarda yoshlar identikligining globallashuv, raqamlashtirish va ijtimoiy-madaniy o‘zgarishlar sharoitidagi namoyon bo‘lish xususiyatlari solishtirildi. Xususan, zamonaviy tadqiqotlarda fuqarolik identikligi yoshlarning qadriyatlari, ijtimoiy rollari va mas’uliyatini belgilovchi hamda jamiyatning ijtimoiy-madaniy transformatsiyasiga ta’sir qiluvchi omil sifatida baholanadi. Shuningdek, raqamli globallashuv sharoitida yoshlar identikligi global va mahalliy madaniy ta’sirlarning uyg‘unlashuvi natijasida shakllanishi mumkinligi haqidagi ilmiy xulosalar metodologik jihatdan hisobga olindi. Tadqiqotda analiz va sintez, induksiya va deduksiya, umumlashtirish va tizimlashtirish kabi umumilmiy usullardan foydalanilib, mavjud ilmiy qarashlar asosida yoshlar identikligining zamonaviy jamiyat transformatsiyasidagi o‘rni konseptual jihatdan asoslandi. Shu bilan birga, raqamli makonning identiklik shakllanishiga ta’sirini aniqlashda onlayn va oflayn ijtimoiy tajribaning o‘zaro aloqadorligi ham metodologik mezon sifatida olindi; tadqiqotlar raqamli muhit yoshlarning ijtimoiy va madaniy identikligini qayta qurish uchun yangi kommunikativ makon yaratishini ko‘rsatadi. Natijada mazkur tadqiqotda yoshlar identikligi jamiyat transformatsiyasining faqat natijasi emas, balki uning ijtimoiy, aksiologik va innovatsion subyekti sifatida metodologik jihatdan talqin qilindi.

Natija va muhokamalar. Tadqiqot natijalari yoshlar identikligi va zamonaviy jamiyat transformatsiyasi o‘rtasidagi munosabat ikki tomonlama va dialektik xarakterga ega ekanini ko‘rsatadi. Bir tomondan, ijtimoiy, madaniy va texnologik o‘zgarishlar yoshlarning o‘zligini anglash, qadriyatlarni tanlash va jamiyatdagi mavqeini belgilash jarayonlariga bevosita ta’sir ko‘rsatadi; ikkinchi tomondan, yoshlarning shakllangan identikligi ularning ijtimoiy faolligi, fuqarolik pozitsiyasi va innovatsion tashabbuslari orqali jamiyatning keyingi transformatsiyasiga ta’sir qiladi. Yoshlarning fuqarolik identikligi ularning qadriyatlari, ijtimoiy mas’uliyati va jamiyatdagi rollarini belgilovchi muhim omil bo‘lib, ijtimoiy transformatsiya davrlarida uning mazmuni ham o‘zgarib boradi.

Tahlil natijalari, avvalo, qadriyatlar tizimidagi o‘zgarishlar yoshlar identikligining asosiy tarkibiy omillaridan biri ekanini ko‘rsatadi. Globallashuv, modernizatsiya va axborot oqimlarining kuchayishi an’anaviy qadriyatlarni yo‘q qilib yubormaydi, balki ularning mazmuni va qo‘llanish shakllarini qayta talqin qilishga olib keladi. O‘zbekistondagi yoshlar va qadriyatlar transformatsiyasiga bag‘ishlangan tadqiqot ham yoshlar qadriyatlar tizimining jamiyat modernizatsiyasi

jarayonida o‘zgarib borishini ko‘rsatadi (Ergashev, 2022). Shu jihatdan yoshlar identikligi an’anaviy va zamonaviy qadriyatlarning oddiy qarama-qarshiligi emas, balki ularning yangi ijtimoiy sharoitda qayta uyg‘unlashuvi sifatida namoyon bo‘ladi.

Muhim natijalardan yana biri shundaki, raqamli muhit yoshlar identikligini shakllantiruvchi mustaqil ijtimoiy makonga aylanmoqda. Ijtimoiy tarmoqlar yoshlarning o‘zini namoyon qilishi, boshqa guruhlar bilan muloqot qilishi va o‘z ijtimoiy mavqeini belgilashi uchun yangi imkoniyatlar yaratadi. Biroq bu jarayon identiklikning beqarorlashuvi, stereotiplarning kuchayishi va virtual hamda real “Men” o‘rtasidagi tafovutning yuzaga kelishi kabi xavflarni ham keltirib chiqarishi mumkin. Demak, raqamli transformatsiyani yoshlar identikligi uchun faqat imkoniyat yoki xavf sifatida emas, balki ikki tomonlama ta’sirga ega ijtimoiy-madaniy jarayon sifatida baholash lozim.

Tadqiqotlar shuni ham ko‘rsatadiki, global raqamli madaniyatning kirib kelishi yoshlarning milliy va mahalliy identikligini mutlaq ravishda zaiflashtirmaydi. Aksincha, yoshlarning faol va tanqidiy ishtiroki mavjud bo‘lgan sharoitda global madaniy unsurlar mahalliy qadriyatlar bilan uyg‘unlashib, gibrid identiklikni shakllantirishi mumkin. Bu holat zamonaviy yoshlar identikligining eng muhim xususiyatlaridan biri — tanlovchanlik va refleksivlik kuchayayotganini ko‘rsatadi. Yoshlar global madaniy tajribani tayyor shaklda qabul qilish o‘rniga uni o‘zining milliy-madaniy tajribasi bilan uyg‘unlashtirishi mumkin.

Shuningdek, natijalar yoshlar identikligining fuqarolik faolligi bilan bevosita bog‘liqligini ko‘rsatadi. Fuqarolik identikligi kuchli bo‘lgan yoshlarning jamiyatdagi ijtimoiy rollar, mas’uliyat va umumiy qadriyatlarga munosabati faolroq shakllanadi. Shu sababli yoshlar identikligini rivojlantirish faqat ma’naviy-tarbiyaviy vazifa emas, balki jamiyatning ijtimoiy birdamligi va transformatsion salohiyatini kuchaytiruvchi omil sifatida qaralishi lozim. Tadqiqot natijalari yoshlar identikligini “merosni o‘zlashtirish – tanqidiy qayta anglash – yangi ijtimoiy tajribani yaratish” jarayonlarining uzviy birligi sifatida tavsiflash imkonini beradi. Zamonaviy jamiyatning transformatsiyasi yoshlar identikligini o‘zgartiradi, yoshlarning yangilanayotgan identikligi esa o‘z navbatida jamiyatning qadriyatlari, ijtimoiy munosabatlari va madaniy rivojlanish yo‘nalishlariga ta’sir ko‘rsatadi. Shu bois yoshlar identikligini mustahkamlashning eng maqbul modeli milliy-madaniy ildizlarni saqlagan holda global va raqamli muhit bilan tanqidiy muloqot qila oladigan, fuqarolik mas’uliyati va innovatsion faollikka ega shaxsni shakllantirishga yo‘naltirilishi lozim.

Xulosa va takliflar. Yoshlar identikligi zamonaviy jamiyat transformatsiyasining muhim ijtimoiy-falsafiy omili bo‘lib, u milliy qadriyatlar, globallashuv, raqamli muhit va innovatsion jarayonlar ta’sirida doimiy ravishda shakllanib va yangilanib boradi. Tadqiqot natijalari yoshlar identikligini mustahkamlashda milliy va umuminsoniy qadriyatlar uyg‘unligi, tanqidiy tafakkur, fuqarolik mas’uliyati va innovatsion faollik muhim ahamiyatga ega ekanini ko‘rsatdi. Shu bois yoshlarni jamiyatdagi o‘zgarishlarning passiv ishtirokchisi emas, balki uning faol va ijodiy subyekti sifatida shakllantirish zamonaviy taraqqiyotning muhim shartidir.

Annotatsiya: *Ushbu maqolada globallashuv sharoitida fuqarolik jamiyati institutlarining jamiyat taraqqiyotidagi o‘rni va roli tadqiq etilgan. Fuqarolarning jamiyatda ijtimoiy-siyosiy faolligini yanada oshirish, ularni qonuniy manfaatlarini himoya qilish va davlat organlari hamda jamoatchilik o‘rtasidagi hamkorliklarni yanada mustahkamlashda fuqarolik jamiyati institutlarining ahamiyati tadqiq qilingan. Bundan tashqari, hozirgi globallashuv davrida ommaviy axborot vositalari, jamoatchilik tuzilmalari va nodavlat notijorat tashkilotlarining faoliyatlariga ta’sir qiluvchi omillar ijtimoiy-falsafiy jihatdan tahlil qilindi. Olib borgan tadqiqotimiz natijasida, fuqarolik jamiyati institutlari jamiyatimizda demokratik qadriyatlarni shakllantirish va qaror toptirish hamda barqaror rivojlanishda katta ahamiyat kasb etishi aniqlangan.*

Kalit so‘zlar: *fuqarolik jamiyati, globallashuv, fuqarolik institutlari, jamoatchilik nazorati, demokratik taraqqiyot, fuqarolik faolligi, ijtimoiy hamkorlik, ommaviy axborot vositalari, nodavlat notijorat tashkilotlari, huquqiy davlat*

ОСОБАЯ РОЛЬ ИНСТИТУТОВ ГРАЖДАНСКОГО ОБЩЕСТВА В КОНТЕКСТЕ ГЛОБАЛИЗАЦИИ

Аннотация: *В данной статье рассматривается роль и место институтов гражданского общества в развитии общества в контексте глобализации. Анализируется важность институтов гражданского общества в дальнейшем повышении социально-политической активности граждан в обществе, защите их законных интересов и дальнейшем укреплении сотрудничества между государственными органами и общественностью. Кроме того, с социально-философской точки зрения анализируются факторы, влияющие на деятельность средств массовой информации, государственных структур и неправительственных некоммерческих организаций в современную эпоху глобализации. В результате исследования установлено, что институты гражданского общества играют значительную роль в формировании и принятии демократических ценностей в нашем обществе, а также в устойчивом развитии.*

Ключевые слова: *гражданское общество, глобализация, гражданские институты, общественный контроль, демократическое развитие, гражданский активизм, социальное сотрудничество, СМИ, неправительственные организации, верховенство права*

THE SPECIAL ROLE OF CIVIL SOCIETY INSTITUTIONS IN THE CONTEXT OF GLOBALIZATION

Abstract: *This article examines the role and place of civil society institutions in the development of society in the context of globalization. The importance of civil society institutions in further increasing the socio-political activity of citizens in society, protecting their legitimate interests, and further strengthening cooperation between state bodies and the public is examined. In addition, the factors influencing the activities of the media, public structures, and non-governmental non-profit organizations in the current era of globalization are analyzed from a socio-philosophical perspective. As a result of our research, it was determined that civil society institutions play a significant role in the formation and adoption of democratic values in our society, as well as in sustainable development.*

Keywords: *civil society, globalization, civic institutions, public oversight, democratic development, civic activism, social cooperation, media, non-governmental organizations, rule of law*

Kirish (Introduction). Fuqarolik jamiyati borasidagi qarashlar qadimgi falsafiy maktablarda boshlangan bo‘lib, hozirgi zamonaviy siyosiy va huquqiy konsepsiyalargacha bo‘lgan ko‘p asrlik rivojlanish yo‘lini bosib o‘tgan. Qadimgi davrlarda yashab o‘tgan mutafakkir va olimlar insonlarning jamiyat hayotidagi o‘rni, erkinligi va adolatli jamiyat haqida turli-xil g‘oyalarni ilgari surganlar. Ushbu fikrlar asosida fuqarolik jamiyati to‘g‘risida tushunchalar sekin-asta shakllandi va rivojlanishning turli davrlarida o‘ziga xos mazmun kasb etdi.

Mamlakatimiz taraqqiyoti va xalqimiz farovonligini ta’minlash maqsadida chiqarilayotgan Prezident Farmonlari va hukumatimiz qarorlari bu borada faoliyatimizning asosiy dasturilamali bo‘lishi zarur. Vatanimiz ozod, mamlakatimiz obod va erkin hamda farovon hayot asosiy yo‘limiz ekanligi, mamlakatimiz taraqqiyoti va xalqimizning hayot darajasini yuksaltirish – barcha demokratik yangilanish va iqtisodiy islohotlarimizdan ko‘zlangan asosiy maqsad eng avvalo xalq manfaati va yoshlarimiz kelajagi uchun qaratilmog‘i joiz.

Yangi O‘zbekistonda o‘ziga hos o‘rin tutayotgan mahallalarimiz ijtimoiy va madaniy-ma’naviy hayotida tub o‘zgarishlar ro‘y bermoqda. Mahalla faoliyatiga doir bir nechta qonun va qarorlar qabul qilindi, uning vakolatlari kengaytirildi, jamiyatimiz islohotlarini amalga oshirishning ishonchli tayanchi va ta’sirchan vositasi sifatida shakllana boshladi.

Mavzuga oid adabiyotlarning taxlili (Literature revitw). Maqola yuzasidan xorijda va yurtimizning faoliyat yuritgan olimlarining ilmiy tadqiqotlarida fuqarolik jamiyatini rivojlantirishning ijtimoiy falsafiy tahlili va bu bo‘yicha ularning fikrlari, shuningdek, bir qator olimlarning fuqarolik jamiyatini rivojlanish bo‘yicha tadqiqotlar olib borishgan.

Jumladan: G‘arbning buyuk mutafakkirlari hisoblangan – Platon, Aristotel, Plutarx, N. Makiavelli, G. Gegel, Sh. Montesk’e, A. Tokvil hamda F. Nitshening bir qator asarlarida fuqarolik jamiyati va kishilarning jamoaviy yashash tarziga bag‘ishlangan fundamental falsafiy ma’lumotlar aks etgan[15].

Keyingi davrlarda esa, bu borada M. Veber, R. Taker, T. Karleyl, K. Yaspers, J. Blondel, A. Bodalev, L. Rutkevich, E. Abashkin, Y. Kosolapova, G. Avsinova, D. Adair, G. Avsinova, G. Ashin, I. Graus, I. Dubov, R. Krichevskiy, S. Maletin, J. Maksvell, N. Pishulin, D. Slizovskiy[16] va boshqa olimlarning tadqiqotlarida fuqarolik jamiyatini rivojlantirishning ilmiy nazariyalari, siyosiy, falsafiy hamda sotsiologik ta’limotlari mavjud.

Bundan tashqari, yurtimiz tarixi haqidagi qimmatli manba hisoblangan “Avesto”, Imom al-Buxoriy, Abu Nasr Forobiy, Abu Rayhon Beruniy, Abu Ali ibn Sino, Nizomulmulk, Husayn Voiz Koshifiy, Abu Xomid G‘azoli, Yusuf Xos Hojib, Alisher Navoiy va Zahiriddin Muhammad Bobur[17] singari mutafakkirlarimizning asarlarida adolatli boshqaruv, fuqarolik jamiyati haqidagi sharqona qarashlar, mahalla va uning tarixiy rivojlanish bosqichlari, urf-odat hamda marosimlar haqidagi qimmatli ma’lumotlar keltirilgan.

Shuning uchun ham mamlakatimiz o‘z mustaqilligini qo‘lga kiritgandan so‘ng xalqimizning urf-odat, an’ana, qadriyat va udumlarini tiklash hamda mamlakatimizda demokratik jamiyat qurishning asosiy omillaridan biri sifatida “mahalla” institutini tiklash, rivojlantirish va uning faoliyatini izchillik bilan amalga oshirishga katta e’tibor qaratildi va hozirgi kunda bu soha borasida keng ko‘lamli ishlar amalga oshirilmoqda.

Tadqiqot metodologiyasi (Research Methodology). Tadqiqotni olib borishda tarixiylik, mantiqiylik, qiyosiylik, kuzatish, o‘zaro aloqadorlik ilmiy tadqiqot tamoyillaridan kelib chiqqan holda qiyosiy tahlil kabi tadqiqot usullaridan foydalanildi.

- **Tahlil va natijalar (Analysis and results).** Tadqiqotimiz davomida shunga amin bo‘ldikki, globallashuv davrida fuqarolik jamiyati institutlarining ahamiyati katta hisoblanadi. Umuman olganda, Fuqarolik jamiyati tushunchasi antik davrdan g‘arb ma’rifatchilarigacha bo‘lgan uzoq davr mobaynida turlicha ko‘rinishlarda namoyon bo‘lgan[18].

Fuqarolik jamiyatining paydo bo‘lishiga qadar aksariyat mamlakatlarda mutlaq monarxiya tizimlari amalda bo‘lgan. Davlat shaxs hayotini sinfiy tizim qoidalari asosida qattiq chegaralar edi. Davlat birgina monarx timsolida ba’zi sinflarga

keng imtiyozlar bersa, boshqalarini barcha imkoniyatlardan mahrum qilar edi[19]. Albatda, bundey jamiyat bilan uzoqqa borib bo‘lmasligini tarix bizga ko‘rsatdi. Chunki, qadimdan insonning manfaatlari himoyasi, huquqlari va erkinliklari bo‘yicha o‘sha davr xurfikrlari ommani ruxlantirish va xaq xuquqlarini bilib olishlari uchun turli-xil asarlar va nutqlar so‘zlab kelishgan.

Jamiyatning ijtimoiy-iqtisodiy taraqqiyotni ta’minlash va har jihatdan barkamol avlod va komil inson tarbiyasiga bog‘liqdir. Bugungi globallashuv davrida yoshlarimizni ma’naviy tahdidlardan himoya etishda ularni milliy ma’naviy qadriyatlarimizni va sharqona madaniyat asosida tarbiyalash muhim ahamiyat kasb etadi va shu bilan birga yurtimizda qadim zamonlardan buyon tarbiya maskani sifatida oilani muqaddas hisoblab kelgan. O‘zbek oilalarida bolalarni faqat ota-onagina emas, balki qarindosh urug‘lar, qo‘ni-qo‘shnilar, mahalla-ko‘y tarbiyalaydi, degan gap bor[20]. Shuning uchun ham hozirgi kunda jamoatchilik nazorati kabi xalqimizning eng faol qatlamlari uyushmasiga keng imkoniyat va vakolatlar berilmoqda. Chunki, xalqimizda bir gap bor bir bolaga yetti mahalla ota-ona degan. Shularni inobatga olgan holda yoshlarimizga bo‘sh vaqtlarini mazmunli tashkil etish va ish bilan ta’minlash davlat siyosati darajasiga ko‘tarilmoqda.

Bugungi dunyodagi globallashuv muhiti kechayotgan davrda aholi faolligini oshirishining samarali tizimini yaratish zamon talabiga aylandi. Fuqarolarimizning jamoatchilik nazorati natijasida “Harakatlar strategiyasidan – Taraqqiyot strategiyasi sari[21]” tamoyiliga, asosan, ishlab chiqilgan yettita ustuvor yo‘nalishdan iborat 2022–2026-yillarga mo‘ljallangan Yangi O‘zbekistonning taraqqiyot strategiyasi qabul qilinishi asosida 2022-yil O‘zbekistonda “Inson qadrini ulug‘lash va faol mahalla yili”[22], deb e’lon qilindi. Inson manfaatlari va uning qadri ustuvorligiga asoslangan xalqchil siyosat mamlakatimizda xalqimizning noyob an’ana va qadriyatlari, shaxsning jamiyat oldidagi majburiyatlari bajarilishini kafolatlaydigan, o‘zini o‘zi boshqarish institutining o‘ziga xos ko‘rinishi bo‘lgan mahalla institutining rivojlantirilishi asosida fuqarolik jamiyatini shakllantirishga xizmat qilmoqda.

Keyingi paytlarda mamlakatimizda ushbu bo‘g‘inning nufuzini oshirish va unga qo‘shimcha vakolatlar berish borasida qator me’yoriy hujjatlar qabul qilinib, tizimning yangicha ishlash mexanizmlari yaratilmoqda.

Jumladan, fuqarolik jamiyati institutlarini faoliyatini demokratlashtirish va erkinlashtirish, ularning ijtimoiy-siyosiy va ijtimoiy-iqtisodiy islohotlarni chuqurlashtirish jarayonidagi keng ishtirokini ta’minlashda salmoqli ishlar amalga oshirildi. Xususan, ushbu institutlar faoliyatining huquqiy asoslarini yaratishda alohida e’tibor qaratildi[23].

Fuqarolik jamiyatida demokratik tuzimning mavjudligi va uning mustahkamlanib borishi fuqarolarda siyosiy-huquqiy madaniyatni shakllantirish va rivojlantirishning asosiy shartidir. Bunday siyosiy tizim shaxs siyosiy – huquqiy ongi va faoliyatining rivojlanishiga keng imkoniyatlar yaratadi, uni rag‘batlantiradi. Jamiyat siyosiy tizimi qanchalik demokratik bo‘lsa, inson siyosiy hayotda shunchalik faol ishtirok etadi. Bu – aksiomadir[24]. Mamlakatimizda ro‘y berayotgan ijobiy o‘zgarishlar va erishilayotgan yutuqlarda fuqarolik jamiyati institutlarining munosib hissasi bor. Fuqarolarga huquqiy yordam ko‘rsatish, ularning siyosiy ongi va tafakkurini yuksaltirish, yoshlar va xotin-qizlar bilan ishlash, ularni ishga joylashtirish, aholining yordamga muhtoj qatlamlarini qo‘llab-quvvatlash va boshqa sohalarda fuqarolik jamiyati institutlarining roli oshib borayotgani buning isbotidir. Bunda ularni davlat tomonidan qo‘llab-quvvatlash bo‘yicha samarali tizim yaratilgani muhim ahamiyat kasb etmoqda.

O‘zbekistonda fuqarolik jamiyatini rivojlantirish globallashuv davri salbiy hodisalari xavfini kamaytirish va yoshlarni ma’naviy yetuk shaxslar etib tarbiyalash uchun ularda faol fuqarolik pozitsiyasini shakllantirish zarur. Zero, fuqarolik pozitsiyasiga ega bo‘lgan yoshlargina jamiyatning asosiy maqsadlari nimadan iboratligini tushunib, xalq va jamiyat oldidagi mas’uliyatini chuqur anglaydi[25]. Hozirgi vaqtda ko‘plab davlatlarda yoshlarning buzg‘unchi g‘oyalarga uchib yo‘ldan adashib qolganlari ham kam emas albatta. Shuning uchun mahalla faollari va oila boshliqlari farzand tarbiyasi bilan shug‘ullanishi va ularni bo‘sh vaqtlarida kitob o‘qishni targ‘ib qilishlari va ular bilan do‘stona munosabatda bo‘lishlari talab etiladi.

Globallashuv vositalari – ommaviy madaniyatni keng yoyilishiga imkoniyat yaratayotgan ayni bir paytda, ayniqsa dunyo yoshlarining soni ikki milliarddan oshib ketgani, xalqaro terrorizm va ekstremizm shiddat bilan o‘sib borayotganligi va ularning kelajagi uchun himoya zarurligi muhim masaladir. Ommaviy madaniyat o‘zbek xalqining tafakkuriga, musiqasi, kiyinishi, o‘zaro muomalasi, oilasi, oilaviy munosabatlariga, hatto orzulariga ham chang solmoqda[26]. Bunday

illatlardan yoshlarimizni asrash uchun milliyligimizni targ‘ib qiluvchi madaniy tadbirlarni ommalashtirish muhim hisoblanadi.

Xulosa va takliflar (Conclusion/Recommendations). Xulosa qilib aytganda, globallashuv jarayonlari jamiyatning deyarli barcha jabhalariga o‘z ta’sirini ko‘rsatib, fuqarolik jamiyati institutlarining qanchalik ahamiyatli ekanligini ko‘rsatib bermoqda. Avvalo, fuqarolik jamiyati institutlarining asosiy vazifa fuqarolarning huquq va erkinliklarini birinchi o‘ringa qo‘yish, ularni ijtimoiy-siyosiy faolliklarini doimiy qo‘llab-quvvatlash hamda davlat va jamiyat o‘rtasida o‘zaro muloqotni samarali ta’minlashda muhim ahamiyat kasb etadi. Hozirgi globallashuv sharoitida ommaviy axborot vositalari, nodavlat notijorat tashkilotlari va boshqa jamoatchilik tuzilmalari demokratik qadriyatlarning saqlab qolish va rivojlantirishda hamda fuqarolik madaniyati shakllantirshda ahamiyati ortib bormoqda.

Takliflar:

1. Fuqarolik jamiyati institutlarining huquqiy asoslarini yanada takomillashtirish,
2. Nodavlat notijorat tashkilotlarining ijtimoiy loyihalarini moliyaviy va tashkiliy jihatdan qo‘llab-quvvatlash mexanizmlarini kengaytirish,
3. Fuqarolarning ijtimoiy-siyosiy faolligini oshirishga qaratilgan targ‘ibot ishlarini kengaytirish
4. Zamonaviy texnologiyalar yordamida jamoatchilik nazorati va fuqarolar ishtirokini yanada kengaytirish
5. Davlat organlari va fuqarolik jamiyati institutlari o‘rtasidagi ochiq muloqot mexanizmlarini takomillashtirish

OLIY TA'LIM TALABALARINING RAQAMLI JAMIYATDAGI IJTIMOIY MOSLASHUVI: MILLIY MENTALITET VA GLOBAL TA'LIM QADRYATLARI O'RTASIDAGI O'ZARO TA'SIRI

Mohira Xudayberdiyeva Osimjonovna
PhD, katta o'qituvchi
University of Business and Science, Ijtimoiy fanlar kafedrasi
E-mail: mohirahudayberdiyeva13@gmail.com

Annotatsiya: *Raqamli texnologiyalarning tez rivojlanishi butun dunyo bo'ylab oliy ta'lim tizimlarini tubdan o'zgartirdi. Universitet talabalaridan nafaqat yangi raqamli o'quv muhitlariga moslashish, balki ularning milliy mentaliteti va madaniy an'analari bilan farq qilishi mumkin bo'lgan global ta'lim qadriyatlariga ham moslashish talab qilinmoqda. Ushbu maqola universitet talabalarining raqamli jamiyatda ijtimoiy moslashuvini milliy mentalitet va global ta'lim qadriyatlari o'rtasidagi o'zaro ta'sir orqali tahlil qiladi. So'rov ma'lumotlari va sifatli tahlilni birlashtirgan aralash metodlar yondashuvidan foydalanib, tadqiqot talabalarining moslashuvchan qobiliyatlariga ta'sir qiluvchi asosiy omillarni aniqlaydi, jumladan raqamli kompetentsiya, madaniy identitet va qadriyat orientatsiyasi. Natijalar shuni ko'rsatadiki, muvaffaqiyatli ijtimoiy moslashuv milliy mentalitetni saqlash va global akademik normalarni integratsiya qilish o'rtasidagi muvozanatga bog'liq. Tadqiqot talabalarning raqamli jamiyatda moslashuvini konseptual modelini taklif qilish orqali ijtimoiy falsafa va ta'lim fanlariga hissa qo'shadi va oliy ta'lim muassasalari uchun amaliy tavsiyalarni beradi.*

Kalit so'zlar: *raqamli texnalogiyalar, ijtimoiylashuv, milliy mentaalitet, global ta'lim, qadriyatlar, raqamli jamiyat, oliy ta'lim talabalari, raqamli kompitensiya.*

СОЦИАЛЬНАЯ АДАПТАЦИЯ СТУДЕНТОВ ВЫСШИХ УЧЕБНЫХ ЗАВЕДЕНИЙ В УСЛОВИЯХ ЦИФРОВОГО ОБЩЕСТВА: ВЗАИМОДЕЙСТВИЕ НАЦИОНАЛЬНОГО МЕНТАЛИТЕТА И ГЛОБАЛЬНЫХ ОБРАЗОВАТЕЛЬНЫХ ЦЕННОСТЕЙ

Аннотация: *Стремительное развитие цифровых технологий коренным образом изменило системы высшего образования во всем мире. От студентов университетов требуется не только адаптация к новым цифровым образовательным средам, но и освоение глобальных образовательных ценностей, которые могут отличаться от их национального менталитета и культурных традиций. В данной статье анализируется социальная адаптация студентов университетов в условиях цифрового общества через взаимодействие национального менталитета и глобальных образовательных ценностей. Используя смешанный методологический подход, сочетающий данные опросов и качественный анализ, исследование выявляет основные факторы, влияющие на адаптационные способности студентов, включая цифровую компетентность, культурную идентичность и ценностные ориентации. Результаты показывают, что успешная социальная адаптация зависит от достижения баланса между сохранением национального менталитета и интеграцией глобальных академических норм. Исследование вносит вклад в социальную философию и педагогические науки, предлагая концептуальную модель адаптации студентов к цифровому обществу, а также практические рекомендации для учреждений высшего образования.*

SOCIAL ADAPTATION OF HIGHER EDUCATION STUDENTS IN THE DIGITAL SOCIETY: THE INTERACTION BETWEEN NATIONAL MENTALITY AND GLOBAL EDUCATIONAL VALUES

Abstract: *The rapid development of digital technologies has fundamentally transformed higher education systems worldwide. University students are required not only to adapt to new digital learning environments but also to align themselves with global educational values that may differ from their national mentality and cultural traisions. This article analyzes the social adaptation of university students in a digital society through the interaction between national mentality and global educational values. Using a mixed-methods approach that combines survey data and qualitative analysis, the study identifies key factors influencing students'*

adaptive capacities, including digital competence, cultural identity, and value orientation. The findings indicate that successful social adaptation depends on achieving a balance between preserving national mentality and integrating global academic norms. The study contributes to social philosophy and educational sciences by proposing a conceptual model of students' adaptation to the digital society and offers practical recommendations for higher education institutions.

Keywords: *digital technologies, socialization, national mentality, global education, values, digital society, higher education students, digital competence.*

KIRISH

Raqamli jamiyatning shakllanishi oliy ta'lim tizimida nafaqat texnologik, balki chuqur ijtimoiy-falsafiy o'zgarishlarni yuzaga keltirmoqda. Ta'lim jarayonining raqamlashtirilishi bilimga kirish imkoniyatlarini kengaytirar ekan, ayni paytda talabalar ijtimoiy moslashuvining yangi shakllarini ham talab qilmoqda. Bu jarayonda talaba endilikda faqat akademik muhitga emas, balki global miqyosda shakllanayotgan ta'limiy qadriyatlar tizimiga moslashishga majbur bo'lmoqda.[1.34]

Zamonaviy ilmiy adabiyotlarda raqamli jamiyat tushunchasi ko'pincha tarmoq texnologiyalari, axborot oqimlari va ijtimoiy institutlarning transformatsiyasi bilan izohlanadi. M. Kastels raqamli jamiyatni "ijtimoiy tuzilmalarning axborot tarmoqlari orqali qayta tashkil etilishi" sifatida talqin qiladi.[2.246] Ushbu sharoitda oliy ta'lim muassasalari global akademik makonning faol subyektiga aylanib, universal standartlar, kompetensiyalar va qadriyatlarni ilgari surmoqda.

Biroq global ta'limiy qadriyatlarning joriy etilishi milliy mentalitetga ega jamiyatlarda muayyan ijtimoiy-psixologik ziddiyatlarni yuzaga keltirishi mumkin. Milliy mentalitet — bu jamiyat a'zolarining tarixiy tajribasi, madaniy an'analari va kollektiv qadriyatlari asosida shakllangan barqaror dunyoqarash tizimidir.[3.9]

So'nggi yillarda olib borilgan tadqiqotlar talabalar ijtimoiy moslashuvida raqamli kompetensiya muhim omil ekanini ko'rsatmoqda.[4.41] Shu bilan birga, faqat texnik ko'nikmalarning rivojlanishi moslashuvning barqarorligini ta'minlamaydi. Tadqiqotchilar talabaning madaniy identiteti va qadriyatlar tizimi bilan global akademik talablar o'rtasidagi muvozanatni moslashuv jarayonining hal qiluvchi sharti sifatida qayd etmoqda.[5.88]

Ijtimoiy-falsafiy nuqtayi nazardan qaralganda, moslashuv jarayoni global va milliy omillar o'rtasidagi dialektik munosabat sifatida namoyon bo'ladi. A. Giddens ta'kidlaganidek, zamonaviylik sharoitida an'anaviy ijtimoiy tuzilmalar yo'qolmaydi, balki yangi kontekstda qayta talqin qilinadi. [6.54] Demak, raqamli jamiyat sharoitida talabalar moslashuvi milliy mentalitetni inkor etish emas, balki uni global ta'limiy qadriyatlar bilan uyg'unlashtirish jarayoni sifatida tushunilishi lozim.

ADABIYOTLAR TAHLILI METADOLOGIYASI

Talabalarning ijtimoiy moslashuvi masalasi sotsiologiya, ijtimoiy falsafa va ta'limshunoslik doirasida turli nazariy yondashuvlar asosida talqin qilingan. Klassik yondashuvlarda moslashuv individning mavjud ijtimoiy normalar va institutlarga moslashish jarayoni sifatida qaraladi. J. Berry ushbu jarayonni madaniyatlararo kontekstda tahlil qilib, moslashuvni integratsiya, assimilyatsiya, ajralish va marginalizatsiya strategiyalariga ajratadi.[7.698] Ushbu tasnif raqamli jamiyat sharoitida ham o'z dolzarbligini saqlab qolmoqda.

Raqamli jamiyat nazariyasi doirasida ijtimoiy moslashuv masalasi axborot texnologiyalarining kundalik hayot va institutlarga chuqur kirib borishi bilan izohlanadi. M. Kastels tarmoq jamiyati sharoitida shaxsning ijtimoiy mavqei va identiteti axborot oqimlarida ishtirok etish darajasi bilan belgilanishini ta'kidlaydi.[8.247] Bu holat oliy ta'lim talabalarining raqamli muhitga moslashuvini faqat texnik kompetensiya bilan cheklab bo'lmasligini ko'rsatadi.

So'nggi tadqiqotlarda raqamli kompetensiya talabalarning akademik muvaffaqiyati va ijtimoiy integratsiyasida muhim omil sifatida e'tirof etiladi. OECD ma'lumotlariga ko'ra, raqamli ko'nikmalari rivojlangan talabalar masofaviy va gibrid ta'lim sharoitida o'zlarini ijtimoiy jihatdan barqarorroq his qiladilar.[9.39] Biroq mazkur yondashuvning cheklangan tomoni shundaki, u madaniy va qadriyatlar omilini ikkinchi darajaga tushirib qo'yadi.

Milliy mentalitet masalasi madaniyatlararo tadqiqotlarda alohida e'tiborga ega. G. Hofstede milliy mentalitetni jamiyat a'zolarining kollektiv xulq-atvori va qadriyatlarini belgilovchi omil sifatida tahlil qiladi.[10.8] Uning fikricha, individualistik va kollektivistik madaniyatlar global institutlarga, jumladan ta'lim tizimiga moslashishda turlicha strategiyalarni namoyon etadi. Shu jihatdan, global akademik qadriyatlar milliy mentalitet bilan to'qnash kelganida moslashuv jarayoni murakkablashadi.

Z. Bauman zamonaviy jamiyatni "suyuq modernlik" tushunchasi orqali izohlab, ijtimoiy barqarorlikning susayishi shaxs identitetini doimiy qayta qurishga majbur etishini ta'kidlaydi.[11.19] Raqamli ta'lim muhitida talabalar ko'pincha tezkor moslashuvga majbur bo'lib, bu holat chuqur ichki qabul qilish emas, balki yuzaki moslashuv shakllarini keltirib chiqarishi mumkin.

Ta'limning globallashuvi masalasini tahlil qilgan S. Marginson global ta'limiy qadriyatlar — akademik erkinlik, tanqidiy fikrlash va raqobatbardoshlik — milliy kontekstda qayta talqin qilinmasa, ijtimoiy ziddiyatlarni kuchaytirishini

qayd etadi.[12.86] Shu sababli zamonaviy tadqiqotlarda moslashuv jarayoni global integratsiya va milliy identitet o‘rtasidagi muvozanat nuqtai nazaridan tahlil qilinmoqda.

Shu bilan birga, mavjud adabiyotlar tahlili shuni ko‘rsatadiki, raqamli jamiyat sharoitida talabalar ijtimoiy moslashuvida milliy mentalitet va global ta’limiy qadriyatlarning o‘zaro ta’siri yetarlicha kompleks tarzda o‘rganilmagan. Aksariyat tadqiqotlar texnologik yoki psixologik omillarga urg‘u berib, ijtimoiy-falsafiy yondashuvni cheklangan holda qo‘llaydi. Mazkur holat ushbu maqolada integrativ nazariy model ishlab chiqish zaruratini yuzaga keltiradi.

Mazkur tadqiqot raqamli jamiyat sharoitida oliy ta’lim talabalari ijtimoiy moslashuvining murakkab tabiatini aniqlashga qaratilgan bo‘lib, aralash metodologiya (mixed-methods) yondashuvi asosida olib borildi. Ushbu yondashuv miqdoriy va sifat tahlilining o‘zaro uyg‘unligini ta’minlab, moslashuv jarayonining nafaqat tashqi ko‘rsatkichlarini, balki qadriyatlar va identitet bilan bog‘liq ichki mexanizmlarini ham chuqurroq ochib berishga imkon yaratadi.[13.214]

Aralash metodologiya tanlanishining asosiy sababi shundaki, talabalar ijtimoiy moslashuvi faqat statistik ko‘rsatkichlar bilan cheklanmay, ijtimoiy-falsafiy mazmunga ega bo‘lgan subyektiv tajribalarni ham o‘z ichiga oladi. Shu bois tadqiqotda ketma-ket izohlovchi dizayn (sequential explanatory design) qo‘llanildi, ya’ni dastlab miqdoriy ma’lumotlar yig‘ilib tahlil qilindi, so‘ngra sifatli ma’lumotlar orqali ularning mazmuniy talqini berildi.[14.99]

3.2. Tanlanma va tadqiqot ishtirokchilari

Tadqiqotning miqdoriy bosqichida 320 nafar oliy ta’lim talabalari ishtirok etdi. Respondentlar turli akademik yo‘nalishlar bo‘yicha tahsil olayotgan bo‘lib, ularning barchasi raqamli ta’lim elementlari joriy etilgan ta’lim muassasalarida o‘qiydi. Tanlanma tasodifiy-klaster usuli asosida shakllantirildi, bu esa ma’lumotlarning umumlashtirilish imkoniyatini oshirdi.[15.155]

Sifatli bosqichda esa 20 nafar talaba bilan yarim tuzilmali intervyular o‘tkazildi. Intervyu ishtirokchilari miqdoriy tadqiqot natijalari asosida, ya’ni moslashuv darajasi yuqori, o‘rtacha va past bo‘lgan guruhlardan tanlab olindi. Bu yondashuv moslashuv strategiyalarining farqli jihatlarini aniqlashga xizmat qildi.

Miqdoriy ma’lumotlar tuzilmaviy so‘rovnoma orqali yig‘ildi. So‘rovnoma quyidagi asosiy bloklardan iborat bo‘ldi:

1. raqamli kompetensiya darajasi;
2. ijtimoiy moslashuv ko‘rsatkichlari;
3. milliy qadriyatlarga orientatsiya;
4. global ta’limiy qadriyatlarni qabul qilish darajasi.

So‘rovnoma bandlari oldin sinovdan o‘gan xalqaro tadqiqotlarga tayangan holda moslashtirildi. Instrumentning ichki ishonchliligi Cronbach’s alpha (α = 0.81) ko‘rsatkichi orqali tasdiqlandi, bu esa o‘lchov vositasining metodologik barqarorligini ko‘rsatadi.[16.789]

Sifatli bosqichda qo‘llanilgan yarim tuzilmali intervyular talabalar tomonidan raqamli ta’lim muhitida boshdan kechirilgan moslashuv tajribalarini, qadriyatlar ziddiyatini va identitetga oid qarashlarni aniqlashga qaratildi.

3.4. Ma’lumotlarni tahlil qilish usullari

Miqdoriy ma’lumotlar deskriptiv va korrelyatsion tahlil usullari yordamida qayta ishlanib, raqamli kompetensiya, ijtimoiy moslashuv va qadriyatlar orientatsiyasi o‘rtasidagi bog‘liqliklar aniqlashtirildi. Natijalar statistik ahamiyatlilik darajasi $p < 0.05$ mezoni asosida baholandi.

Sifatli ma’lumotlar esa tematik tahlil asosida kodlanib, talabalar moslashuvining asosiy strategiyalari va semantik modellari aniqlandi. Ushbu yondashuv individual tajribalarni umumiy nazariy xulosalar bilan bog‘lash imkonini berdi.[17.71]

Tadqiqot jarayonida barcha ishtirokchilarning ixtiyoriy roziligi olindi hamda ularning shaxsiy ma’lumotlari maxfiyligi ta’minlandi. Tadqiqot xalqaro ilmiy etik me’yorlarga muvofiq amalga oshirildi.

Modelning asosiy nazariy farazi shundan iboratki, raqamli jamiyat sharoitida talabaning muvaffaqiyatli ijtimoiy moslashuvi global akademik talablarga bir tomonlama moslashish orqali emas, balki milliy qadriyatlar va madaniy identitetni saqlagan holda global ta’limiy normalarni ichki qabul qilish orqali yuzaga keladi. Ushbu yondashuv J. Berry tomonidan taklif etilgan integrativ moslashuv konsepsiyasining raqamli ta’lim kontekstidagi kengaytirilgan talqiniga asoslanadi.[18.701]

Konseptual modelda milliy mentalitet talabaning qadriyatlar tizimi va ijtimoiy xulq-atvorini belgilovchi barqaror omil sifatida ko‘riladi. Milliy qadriyatlar ta’lim jarayonida talabaning o‘zini identifikatsiya qilishi, ijtimoiy barqarorligi va motivatsiyasiga bevosita ta’sir ko‘rsatadi. G. Hofstede ta’kidlaganidek, kollektivistik qadriyatlar ustuvor bo‘lgan jamiyatlarda ta’lim jarayoni ijtimoiy mas’uliyat va hamkorlik orqali anglanadi.[19.11] Shu sababli milliy mentalitetni inkor etuvchi global ta’lim modellarining joriy etilishi moslashuvning yuzaki shakllariga olib kelishi mumkin.

Global ta’limiy qadriyatlar mazkur modelda talabaning akademik avtonomiyasi, tanqidiy fikrlashi va raqobatbardoshligini shakllantiruvchi omil sifatida namoyon bo‘ladi. Ta’limning globallashuvi jarayonida ushbu qadriyatlar oliy ta’lim muassasalari orqali universal me’yor sifatida ilgari surilmoqda. S. Marginsonning fikricha, global

akademik qadriyatlar milliy kontekstga moslashtirilmagan holatda joriy etilganda, ular ijtimoiy begonalashuv va identitet ziddiyatini kuchaytiradi.[20.93]

Modelning markaziy elementi sifatida raqamli kompetensiya qaraladi. Raqamli kompetensiya nafaqat texnik ko‘nikmalar majmuasi, balki axborotni tanqidiy tahlil qilish, raqamli muhitda muloqot qilish va o‘z-o‘zini boshqarish qobiliyatlarini ham o‘z ichiga oladi. OECD tadqiqotlariga ko‘ra, raqamli kompetensiya global akademik qadriyatlarni amaliy jihatdan o‘zlashtirishda vositachi (mediator) rolini bajaradi.[21.49]

Ijtimoiy-falsafiy nuqtayi nazardan, mazkur model global va milliy omillar o‘rtasidagi dialektik munosabatni aks ettiradi. A. Giddensning zamonaviylik haqidagi qarashlariga tayangan holda, model milliy qadriyatlarning yo‘qolishini emas, balki ularning global raqamli kontekstda qayta talqin qilinishini asoslaydi.[22.55] Shu jihatdan, taklif etilayotgan konseptual model raqamli jamiyat sharoitida talabalar ijtimoiy moslashuvining nazariy asoslarini kengaytirib, oliy ta’lim tadqiqotlariga yangi yondashuvni taklif etadi.

5. NATIJALAR VA MUHOKAMA

Miqdoriy tahlil natijalari raqamli jamiyat sharoitida talabalar ijtimoiy moslashuvi ko‘p omilli jarayon ekanini tasdiqladi. Deskriptiv statistik tahlil respondentlarning katta qismi raqamli ta’lim muhitida o‘zini qisman moslashgan deb baholashini ko‘rsatdi, biroq to‘liq ijtimoiy integratsiya darajasi nisbatan past bo‘lib qoldi. Bu holat moslashuvning faqat texnologik omillar bilan cheklanmasligini anglatadi.

Korrelyatsion tahlil natijalariga ko‘ra, raqamli kompetensiya va ijtimoiy moslashuv darajasi o‘rtasida ijobiy va statistik ahamiyatli bog‘liqlik aniqlandi ($r > 0.45$, $p < 0.05$). Ushbu natija raqamli ko‘nikmalarga ega talabalar akademik jarayonda o‘zlarini ishonchliroq his qilishini va ijtimoiy aloqalarni faolroq shakllantirishini ko‘rsatadi. Shu bilan birga, global ta’limiy qadriyatlarni yuqori darajada qabul qilish, agar u milliy mentalitet bilan uyg‘unlashmagan bo‘lsa, moslashuv darajasining pasayishi bilan bog‘liq ekani kuzatildi.

Mazkur holat milliy qadriyatlarga orientatsiya va global ta’limiy talablar o‘rtasidagi nomuvofiqlik talabalar orasida identitet ziddiyatini yuzaga keltirishi mumkinligini ko‘rsatadi. Bu esa moslashuvning barqaror emas, balki vaziyatga moslashish (situational adaptation) shaklida kechishiga olib keladi.

Yarim tuzilmali intervyular asosida olib borilgan tematik tahlil talabalar ijtimoiy moslashuvining uchta asosiy strategiyasini aniqlash imkonini berdi: integrativ, selektiv va konformal moslashuv. Ushbu strategiyalar ilgari ishlab chiqilgan konseptual modelning empirik tasdig‘i sifatida namoyon bo‘ldi.

Integrativ moslashuv strategiyasini namoyon etgan talabalar milliy qadriyatlarni saqlagan holda global akademik me’yorlarni ongli ravishda qabul qilishga moyillik bildirdilar. Ular raqamli ta’lim muhitini shaxsiy va kasbiy rivojlanish imkoniyati sifatida baholab, ijtimoiy barqarorlik va akademik qoniqish darajasi yuqori ekanini ta’kidlashdi.

Konformal moslashuv strategiyasiga ega talabalar esa global ta’lim talablariga tashqi moslashuvni namoyon etib, ichki qabul qilishning yetishmasligini qayd etdilar. Intervyu natijalariga ko‘ra, mazkur guruhda akademik stress va ijtimoiy begonalashuv hissi kuchliroq kuzatildi.

Tadqiqot natijalari oliy ta’limda ijtimoiy moslashuv masalasini faqat pedagogik yoki texnologik muammo sifatida emas, balki ijtimoiy-falsafiy jarayon sifatida talqin qilish zarurligini ko‘rsatadi. Taklif etilgan konseptual model raqamli jamiyat sharoitida talabalar moslashuvini tahlil qilishda yangi nazariy ramka vazifasini bajarishi mumkin.

6. XULOSA

Mazkur tadqiqot raqamli jamiyat sharoitida oliy ta’lim talabalari ijtimoiy moslashuvini ijtimoiy-falsafiy nuqtayi nazardan tahlil qilib, ushbu jarayonning faqat texnologik moslashuv bilan cheklanmasligini asoslab berdi. Tadqiqot natijalari talabalar moslashuvi milliy mentalitet, global ta’limiy qadriyatlar va raqamli kompetensiya o‘rtasidagi murakkab o‘zaro ta’sir mahsuli ekanini ko‘rsatdi..

Mazkur tadqiqot ayrim cheklovlarga ega. Birinchidan, empirik ma’lumotlar ma’lum bir ijtimoiy-madaniy kontekst bilan chegaralangan bo‘lib, natijalarni barcha ta’lim tizimlariga to‘liq umumlashtirish imkonini cheklaydi. Ikkinchidan, tadqiqotda asosan korrelyatsion tahlil qo‘llanilganligi sababli sabab-oqibat munosabatlarini aniqlash imkoniyati cheklangan.

Kelajakdagi tadqiqotlarda raqamli jamiyat sharoitida talabalar moslashuvini qiyosiy (cross-national) tadqiqotlar orqali o‘rganish, shuningdek, uzoq muddatli (longitudinal) yondashuv asosida milliy mentalitet va global qadriyatlar o‘rtasidagi munosabatlarning dinamikasini tahlil qilish maqsadga muvofiqdir. Bundan tashqari, raqamli ta’lim siyosati va institutsional omillarning moslashuv jarayoniga ta’sirini chuqurroq o‘rganish ilmiy jihatdan muhim yo‘nalishlardan biri bo‘lib qoladi.

THE CASE OF THE CHINA-KYRGYZSTAN-UZBEKISTAN RAILWAY: THE BELT AND ROAD INITIATIVE AND UZBEKISTAN'S MULTI-VECTOR DIPLOMACY STRATEGY

Burkhonova Kumush Davron qizi
2nd-year student, Academic Lyceum under Namangan State University

Abstract: *This article examines Uzbekistan's multi-vector diplomacy strategy through the case of the China-Kyrgyzstan-Uzbekistan (CKU) railway, a flagship project of China's Belt and Road Initiative (BRI). The study traces the project's historical evolution, economic indicators and geopolitical significance, and reviews the "debt-trap diplomacy" debate in light of Uzbekistan's experience. It concludes that Uzbekistan pursues a strategic balancing policy typical of small and middle powers by simultaneously engaging China, Russia and Western partners.*

Keywords: *Belt and Road Initiative, multi-vector diplomacy, Central Asia, China-Kyrgyzstan-Uzbekistan railway, debt-trap diplomacy, strategic balancing.*

XITOY-QIRG'IZISTON-O'ZBEKISTON TEMIR YO'LI MISOLIDA: "BIR KAMAR, BIR YO'L" TASHABBUSI VA O'ZBEKISTONNING MULTI-VEKTORLI DIPLOMATIYA STRATEGIYASI

Annotatsiya: *Mazkur maqolada Xitoyning "Bir kamar, bir yo'l" (Belt and Road Initiative, BRI) global tashabbusi doirasida amalga oshirilayotgan Xitoy-Qirg'iziston-O'zbekiston (XQO) temir yo'li loyihasi misolida O'zbekistonning multi-vektorli diplomatiya strategiyasi tahlil qilinadi. Ishda loyihaning tarixiy evolyutsiyasi, iqtisodiy ko'rsatkichlari va geosiyosiy ahamiyati, shuningdek BRI atrofidagi "qarz tuzog'i diplomatiyasi" munozarasi O'zbekiston tajribasi asosida ko'rib chiqiladi. Xulosa qilinadiki, O'zbekiston yirik davlatlar (Xitoy, Rossiya, G'arb) bilan bir vaqtning o'zida hamkorlik qilish orqali kichik va o'rta davlatlarga xos strategik muvozanat siyosatini amalga oshirmoqda.*

Introduction

The Belt and Road Initiative (BRI), announced by the leadership of the People's Republic of China in 2013, has become one of the largest geo-economic projects of the past decade, encompassing more than 140 countries [18]. Central Asia, including Uzbekistan, lies at the geographic center of this initiative; alongside expanding infrastructure, trade and investment opportunities for the region, it also raises the risk of growing economic dependence on major powers.

At the same time, since 2016, under President Shavkat Mirziyoyev, Uzbekistan has been consistently pursuing a new foreign-policy course based on the principle of "multi-vectorism" — described in the scholarly literature as a strategy of balanced cooperation with China, Russia, the United States, the European Union and neighboring states simultaneously [10; 12; 16]. The purpose of this article is to show, through the case of the China-Kyrgyzstan-Uzbekistan (CKU) railway project, how Uzbekistan's participation in the BRI has become a practical illustration of its multi-vector diplomacy.

1. The Belt and Road Initiative and Central Asia: Conceptual Foundations

The BRI comprises two main directions — the overland "Silk Road Economic Belt" and the maritime "21st Century Maritime Silk Road." Scholarly interpretations of the BRI vary: some researchers treat it as a purely economic and infrastructural project, while others regard it as an ideologically driven undertaking of the Chinese Communist Party with clear geopolitical dimensions [19]. For the landlocked states of Central Asia, the BRI is, above all, significant as a means of connecting the region to global trade networks.

2. The China-Kyrgyzstan-Uzbekistan Railway: From Vision to Reality

Although the idea of the CKU railway was first discussed in Paris as early as 1997, the project remained unrealized for nearly thirty years [7]. Real momentum came at the Shanghai Cooperation Organisation summit held in Samarkand in September 2022, followed by documents on the financing model signed at the China–Central Asia Summit in Xi'an in May 2023 [8]. On June 6, 2024, the governments of China, Kyrgyzstan and Uzbekistan signed a trilateral intergovernmental agreement on the railway's construction in Beijing; the agreement was signed by Zheng Shanjie, Chairman of China's National Development and Reform Commission, Tilek Kydyrmaevich Tekebaev, Kyrgyzstan's Minister of Transport and Communications, and Ilkhom Mahkamov, Uzbekistan's Minister of Transport [1; 3].

The 523-kilometre line begins in Kashgar, China, and passes through Torugart, Kosh-Dobo and Kazarman in Kyrgyzstan before terminating in Andijan, Uzbekistan [1; 5]. Construction was ceremonially launched on December 27, 2024, in Kyrgyzstan's Jalal-Abad region, while the financing arrangement — estimated at roughly US$4.7 billion — was finalized in December 2025 [6]. According to the South China Morning Post, the line's ultimate freight capacity could reach up to 15 million tons annually, more than doubling Kyrgyzstan's 2025 capacity [7].

Uzbek officials have repeatedly stressed the project's strategic significance: President Shavkat Mirziyoyev has described the CKU railway as the shortest overland route linking China with Central Asia, one that would eventually open access, via the Trans-Afghan corridor, to the markets of South Asia and the Middle East [3; 9]. This illustrates Uzbekistan's strategy of diversifying transport and trade routes rather than tying itself to a single direction, such as Russia or China alone.

3. Uzbekistan's Multi-Vector Diplomacy: Theory and Practice

In the scholarly literature, Uzbekistan's foreign policy has been described in various ways — as a "geopolitical pendulum," a "regionalist chameleon," a "zigzag policy," and so on [12]. Following the leadership transition from Islam Karimov to Shavkat Mirziyoyev in 2016, researchers note a departure from isolationism toward active regional engagement [12; 16]. At the same time, core principles of the 2012 Foreign Policy Concept — such as military neutrality and the rejection of foreign military bases — remain in place; what has changed is the scale and intensity with which these principles are implemented [10; 13].

Scholars often compare Uzbekistan's strategy with Kazakhstan's self-styled role as a "Eurasian Bridge": whereas Kazakhstan emphasizes multilateralism and mediation, Uzbekistan projects more of an "independent actor" posture, prioritizing sovereignty and regime security through selective and cautious institutional commitments [14]. Economically, Uzbekistan seeks to address domestic challenges — poverty and scarcity of arable land and water resources — by simultaneously developing trade and economic ties with China, the United States, the European Union, Turkey, South Korea and the member states of the Eurasian Economic Union [11].

4. The "Debt-Trap Diplomacy" Debate and Uzbekistan's Experience

The most widely discussed critique surrounding BRI projects is the concept of "debt-trap diplomacy," first proposed by Indian scholar Brahma Chellaney in 2017 [16; 22]. According to this theory, China extends loans to developing countries on onerous terms with a view to acquiring control of strategic infrastructure — ports, mines and the like — should the borrower default. However, a number of researchers, notably Deborah Brautigam, argue that this narrative, while widespread in media and policy circles, lacks robust empirical grounding and functions more as a "meme" than a documented strategy [17; 19].

Analyses focused on Central Asia show that the debt burden owed to China varies sharply by country: Kazakhstan's debt is considered relatively manageable, Uzbekistan and Turkmenistan — buoyed respectively by economic growth and gas exports — face no serious difficulties, while Kyrgyzstan and Tajikistan are regarded as the most vulnerable in the region [16]. This divergence can be read as a consequence of Uzbekistan's cautious economic policy of drawing on diverse financing sources rather than relying on China alone.

5. Economic Indicators: Opportunities and Risks

Recent statistics point to rapidly deepening economic ties between Uzbekistan and China. Official data show that bilateral trade reached US$17.2 billion in 2025, accounting for 21.2 percent of Uzbekistan's total foreign trade turnover and making China the country's leading trade partner [21; 22]. At the same time, the trade balance has tilted markedly in China's favor — a pattern that reflects a structural vulnerability in the Uzbek economy and its growing dependence on imports of technological and chemical goods [20].

Uzbekistan continues to diversify its trading partners: in 2025, trade with Russia stood at US$13 billion, with Kazakhstan at US$5 billion, and with Turkey at US$3 billion [21]. These figures confirm that, even as it deepens cooperation with China, Uzbekistan is actively developing other directions to avoid excessive economic dependence on a single partner — the economic dimension of multi-vector diplomacy in practice.

Conclusion

Analysis of the China-Kyrgyzstan-Uzbekistan railway project shows that Uzbekistan treats its participation in the BRI not as an attachment to a single geopolitical direction but as a means of leveraging available strategic opportunities. While expanding infrastructure and trade cooperation with China, the country's leadership is simultaneously developing active ties with Russia, the European Union, the United States and neighboring states — a pattern that fits the "strategic balancing" model described in the literature for small and middle powers [12; 14]. Once construction of the CKU railway is complete, a quantitative assessment of its impact on the structure of Uzbekistan's foreign trade and on the regional transport-logistics architecture remains a promising direction for future research.

ORCID: https://orcid.org/0009-0008-5363-1048

Annotatsiya: *Mazkur maqolada sog‘lom turmush tarzining mazmun-mohiyati, uni shakllantiruvchi asosiy omillar hamda inson salomatligi va hayot sifatiga ta’siri ijtimoiy-falsafiy nuqtayi nazardan tahlil qilinadi. Tadqiqotda sog‘lom turmush tarzi faqat kasalliklarning oldini olishga qaratilgan xulq-atvor tizimi sifatida emas, balki insonning jismoniy, ruhiy, ma’naviy va ijtimoiy imkoniyatlarini uyg‘un rivojlantirishga xizmat qiluvchi qadriyatli hayot modeli sifatida talqin etiladi.*

Kalit so‘zlar: *sog‘lom turmush tarzi, hayot sifati, salomatlik, aksiologiya, gumanizm, jismoniy faollik, sog‘lom ovqatlanish, ruhiy osoyishtalik, ijtimoiy muhit, salomatlik madaniyati.*

СОЦИАЛЬНО-ФИЛОСОФСКИЕ ОСНОВЫ ФОРМИРОВАНИЯ ЗДОРОВОГО ОБРАЗА ЖИЗНИ И ЕГО ВЛИЯНИЕ НА КАЧЕСТВО ЖИЗНИ ЧЕЛОВЕКА

Аннотация: *В данной статье с социально-философской точки зрения анализируются сущность здорового образа жизни, основные факторы его формирования и его влияние на здоровье и качество жизни человека. Здоровый образ жизни рассматривается не только как система поведения, направленная на профилактику заболеваний, но и как ценностная модель жизни, обеспечивающая гармоничное развитие физических, психических, духовно-нравственных и социальных возможностей личности.*

Ключевые слова: *здоровый образ жизни, качество жизни, здоровье, аксиология, гуманизм, физическая активность, здоровое питание, психологическое благополучие, социальная среда, культура здоровья.*

SOCIO-PHILOSOPHICAL FOUNDATIONS OF FORMING A HEALTHY LIFESTYLE AND ITS IMPACT ON HUMAN QUALITY OF LIFE

Abstract: *This article analyzes the essence of a healthy lifestyle, its major determinants, and its impact on human health and quality of life from a socio-philosophical perspective. A healthy lifestyle is interpreted not merely as a system of behaviours aimed at preventing diseases but as a value-based model of life that promotes the harmonious development of physical, psychological, spiritual, and social capacities.*

Keywords: *healthy lifestyle, quality of life, health, axiology, humanism, physical activity, healthy nutrition, psychological well-being, social environment, health culture.*

KIRISH

Zamonaviy jamiyat taraqqiyoti inson salomatligi va hayot sifatini ta’minlash masalasini eng muhim ijtimoiy muammolardan biriga aylantirdi. Inson salomatligi faqat tibbiy yoki biologik hodisa bo‘lib qolmay, balki uning turmush tarzi, qadriyatlari, kundalik faoliyati, ijtimoiy muhiti va o‘z hayotiga bo‘lgan munosabati bilan belgilanadigan murakkab ijtimoiy-falsafiy hodisadir.

Sog‘lom turmush tarzining mohiyati insonning jismoniy imkoniyatlarini saqlash bilangina cheklanmaydi. U shaxsning ruhiy osoyishtaligi, ijtimoiy faolligi, ma’naviy dunyosi va hayotdan qoniqish darajasi bilan ham bog‘liqdir. Shu bois sog‘lom turmush tarzini inson hayotining alohida bir sohasi sifatida emas, balki uning kundalik hayotini tashkil etuvchi yaxlit tizim sifatida o‘rganish muhimdir.

Bugungi kunda sog‘lom turmush tarzi tushunchasi ovqatlanish, jismoniy harakat, uyqu, dam olish va zararli odatlardan voz kechish kabi xatti-harakatlar majmui bilan izohlanadi. Biroq ijtimoiy-falsafiy nuqtayi nazardan qaraganda,

mazkur omillar insonning hayotiy qadriyatlari va ongli tanlovi bilan bog‘liqdir. Inson nima uchun sog‘lom yashashni tanlaydi, salomatlikni qanday qadriyat sifatida qabul qiladi va sog‘lom hayot tarzini kundalik hayotiga qanday singdiradi — ana shu masalalar sog‘lom turmush tarzining ijtimoiy-falsafiy mohiyatini belgilaydi.

MAVZUGA OID ADABIYOTLARNING TAHLILI

Sog‘lom turmush tarziga oid zamonaviy tadqiqotlarda uning bir nechta asosiy tarkibiy omillari ajratib ko‘rsatiladi. Jumladan, ratsional ovqatlanish, jismoniy faollik, tamakidan voz kechish, me’yoriy tana vaznini saqlash va alkogol iste’molini cheklash sog‘lom xulq-atvorning muhim ko‘rsatkichlari sifatida talqin qilinadi. Butunjahon sog‘liqni saqlash tashkiloti o‘zining 1948-yildagi asosiy Nizomida salomatlikni nafaqat kasallik yoki nogironlikning yo‘qligi, balki to‘liq jismoniy, ruhiy va ijtimoiy farovonlik holati sifatida ta’riflagan — bu ta’rif sog‘lom turmush tarzini sof tibbiy emas, balki kompleks ijtimoiy hodisa sifatida qarash zaruriyatining ilk rasmiy asosini yaratdi.

Yevropa va Amerika tadqiqotlarida bir nechta sog‘lom xulq-atvor omillarini birgalikda amalga oshirish inson salomatligi uchun alohida ahamiyatga ega ekanligi qayd etiladi. Xususan, Buyuk Britaniyada o‘tkazilgan EPIC-Norfolk aholi tadqiqotida chekmaslik, jismoniy faollik, mikdorli alkogol iste’moli va yetarli sabzavot-meva iste’moli kabi to‘rtta sog‘lom xulq-atvor omilining birgalikdagi ta’siri o‘lim xavfini sezilarli darajada — yoshni o‘rtacha 14 yilga "yoshartirish"ga teng darajada — kamaytirishi aniqlangan. Shunga o‘xshash tarzda, 11 ta Yevropa davlatida o‘tkazilgan tadqiqotda o‘rtacha va yuqori yoshdagi aholi orasida O‘rta dengiz tipidagi ovqatlanish, mikdorli alkogol iste’moli, jismoniy faollik va chekmaslikning birgalikdagi ta’siri o‘lim ko‘rsatkichini uch baravar kamaytirishi qayd etilgan. Bu yondashuv sog‘lom turmush tarzini alohida-alohida odatlar yig‘indisi sifatida emas, balki kompleks hayotiy tizim sifatida baholash imkonini beradi.

Sog‘liqni mustahkamlashga bag‘ishlangan tadqiqotlarda insonning xulq-atvori yashayotgan muhitdan ajratib o‘rganilmasligi kerakligi ta’kidlanadi. Oila, ta’lim tizimi, mehnat sharoiti, iqtisodiy imkoniyatlar va madaniy qadriyatlar insonning sog‘lom yoki nosog‘lom hayot tarzini tanlashiga bevosita ta’sir ko‘rsatadi.

Shuningdek, bio-psixo-ijtimoiy yondashuv salomatlikning jismoniy, ruhiy va ijtimoiy jihatlari o‘zaro uzviy bog‘langanligini ko‘rsatadi. Ushbu yondashuv sog‘lom turmush tarzini o‘rganishda bir yoqlama biologik qarashdan voz kechib, insonni yaxlit mavjudot sifatida tushunishga imkon beradi.

TADQIQOT METODOLOGIYASI

Mazkur maqolada tizimli, qiyosiy, aksiologik, ijtimoiy-falsafiy va umumlashtirish metodlaridan foydalanildi.

Tizimli yondashuv sog‘lom turmush tarzini o‘zaro bog‘langan xulq-atvor va hayotiy qadriyatlar tizimi sifatida tahlil qilish imkonini berdi.

Aksiologik yondashuv salomatlikning inson va jamiyat hayotidagi qadriyat sifatidagi o‘rnini aniqlashga xizmat qildi.

Ijtimoiy-falsafiy yondashuv orqali sog‘lom turmush tarzining shaxs, oila, ijtimoiy guruh va jamiyat taraqqiyoti bilan aloqadorligi tahlil qilindi.

Qiyosiy tahlil metodi turli tadqiqotlarda ilgari surilgan sog‘lom xulq-atvor omillarini umumlashtirish imkonini berdi.

Tadqiqotning metodologik asosini salomatlikning biologik, psixologik va ijtimoiy jihatlari birligiga asoslangan yondashuv tashkil etadi.

TAHLIL VA NATIJALAR

Sog‘lom turmush tarzi yaxlit qadriyatlar tizimi sifatida

Tadqiqotlar asosida sog‘lom turmush tarzining quyidagi asosiy xulosasi ilgari surilishi mumkin: inson salomatligi bitta xatti-harakat natijasi emas, balki kundalik hayotda amalga oshiriladigan bir nechta omillarning o‘zaro uyg‘unligidir.

Masalan, inson muntazam jismoniy faoliyat bilan shug‘ullansa-yu, zararli odatlardan voz kechmasa yoki doimiy ruhiy zo‘riqish holatida yashasa, uning hayot tarzini to‘liq sog‘lom deb baholash qiyin. Shu sababli sog‘lom turmush tarzining asosiy xususiyati uning kompleksligi va tizimliligi bilan belgilanadi.

Sog‘lom turmush tarzining asosiy tarkibiy yo‘nalishlari:

Sog‘lom va muvozanatli ovqatlanish.

Doimiy jismoniy faollik.

Biologik ritmga mos mehnat va dam olish tartibi.

Ruhiy va emotsional osoyishtalik.

Zararli odatlardan voz kechish.

Ijtimoiy munosabatlar va sog‘lom muhitni shakllantirish.

Mazkur olti yo‘nalish inson hayotining bir-biridan ajralmagan tomonlarini tashkil etadi.

Sog‘lom turmush tarzi va hayot sifati

Sog‘lom turmush tarzining asosiy natijalaridan biri hayot sifatining yaxshilanishidir. Hayot sifati faqat uzoq umr ko‘rish bilan belgilanmaydi. U insonning o‘zini jismonan tetik, ruhan xotirjam, ijtimoiy jihatdan faol va hayotidan qoniqqan holda his etishi bilan bog‘liq.

Shu nuqtayi nazardan sog‘lom turmush tarzi:

insonning jismoniy imkoniyatlarini kengaytiradi;

kundalik faoliyat sifatini oshiradi;

yordam ruhiy zo‘riqishni kamaytirishga beradi;

ijtimoiy faollikni kuchaytiradi;

o‘z salomatligi uchun shaxsiy mas’uliyatni shakllantiradi.

Demak, sog‘lom turmush tarzi inson hayotining davomiyligigina emas, balki mazmuni va sifatiga ham ta’sir ko‘rsatadi.

Sog‘lom turmush tarzini shakllantirishda ijtimoiy muhitning o‘rni

Sog‘lom turmush tarzi faqat individual tanlov mahsuli emas. Insonning kundalik xatti-harakati uning yashash sharoiti va ijtimoiy muhiti bilan chambarchas bog‘liq.

Oila sog‘lom odatlarning dastlabki maktabidir. Bolaning ovqatlanish madaniyati, jismoniy faollikka munosabati, dam olish va mehnat tartibi avvalo oilada shakllanadi.

Ta’lim muassasalari esa sog‘lom turmush tarzi haqidagi bilimlarni kundalik amaliyotga aylantirishda muhim ijtimoiy institut hisoblanadi. Bunda faqat nazariy targ‘ibot bilan cheklanmasdan, ta’lim muassasasining o‘zida sog‘lom muhit yaratish muhimdir.

Mehnat jamoalari ham xodimlarning salomatligiga ta’sir ko‘rsatuvchi ijtimoiy makon sifatida qaralishi lozim.

Shu asosda quyidagi ijtimoiy-falsafiy xulosani ilgari surish mumkin: sog‘lom turmush tarzi shaxsning individual tanlovi va jamiyat tomonidan yaratilgan sog‘lom muhitning dialektik birligi mahsulidir.

Sog‘lom turmush tarzining aksiologik mohiyati

Sog‘lom turmush tarzining barqaror shakllanishi, avvalo, salomatlikning inson ongida qadriyat sifatida qaror topishiga bog‘liq. Agar salomatlik inson uchun oliy hayotiy qadriyatlardan biri sifatida qabul qilinsa, u kundalik hayotida sog‘lom tanlovlarni ongli ravishda amalga oshirishga intiladi.

Shu sababli sog‘lom turmush tarzini shakllantirishda faqat "bunday qil", "bunday qilma" kabi ko‘rsatmalar yetarli emas. Insonda quyidagi ichki qadriyatlar shakllanishi lozim:

-salomatlik qadriyati;

-o‘z hayotiga mas’uliyat;

-tana va ruh uyg‘unligini saqlash;

-kelajak oldidagi javobgarlik;

-oila va jamiyat salomatligi uchun mas’uliyat.

MUALLIFLIK TAKLIFI: "SOG‘LOM HAYOT TARZI PIRAMIDASI"

Mazkur maqola doirasida sog‘lom turmush tarzini tizimli ifodalash uchun "Sog‘lom hayot tarzi piramidasi" konseptual modelini taklif etish mumkin.

Piramidaning asosi: Salomatlikni qadriyat sifatida anglash.

Ikkinchi bosqich — Kundalik sog‘lom odatlar:

ovqatlanish;

jismoniy harakat;

uyqu va dam olish;

zararli odatlardan voz kechish.

Uchinchi bosqich — Ruhiy va ma’naviy barqarorlik:

stressni boshqarish;

ijobiy fikrlash;

ruhiy osoyishtalik;

o‘zini anglash.

To‘rtinchi bosqich — Sog‘lom ijtimoiy muhit:

sog‘lom oila;

sog‘lom ta’lim muhiti;

sog‘lom mehnat jamoasi.

Piramidaning cho‘qqisi: Yuqori hayot sifati va inson farovonligi.

Mazkur modelning asosiy g‘oyasi shundan iboratki, yuqori hayot sifatiga faqat bitta sog‘lom odat orqali erishib bo‘lmaydi. Hayot sifati salomatlik qadriyatiga asoslangan individual xulq-atvor, ruhiy barqarorlik va sog‘lom ijtimoiy muhitning birligi orqali shakllanadi.

XULOSA VA TAKLIFLAR

O‘tkazilgan ijtimoiy-falsafiy tahlil asosida quyidagi xulosalarga kelindi.

Birinchidan, sog‘lom turmush tarzi insonning jismoniy holati bilan cheklanadigan biologik tushuncha emas, balki uning jismoniy, ruhiy, ma’naviy va ijtimoiy hayotini qamrab oluvchi kompleks hayotiy tizimdir.

Ikkinchidan, sog‘lom turmush tarzining samaradorligi alohida sog‘lom odatlar soni bilangina emas, balki ushbu odatlarning bir-birini to‘ldiruvchi yaxlit tizimga aylanishi bilan belgilanadi.

Uchinchidan, salomatlikni mustahkamlash shaxsning individual mas’uliyati bilan bir qatorda jamiyatning sog‘lom ijtimoiy muhit yaratishdagi mas’uliyatini ham talab qiladi.

To‘rtinchidan, sog‘lom turmush tarzini shakllantirishning barqaror asosi salomatlikni insonning muhim aksiologik qadriyatlaridan biri sifatida shakllantirishdir.

Amaliy takliflar:

Oliy ta’lim muassasalarida "Sog‘lom hayot tarzi va hayot sifati" mavzusida muntazam ma’rifiy mashg‘ulotlarni yo‘lga qo‘yish.

Sog‘lom turmush tarzini faqat tibbiy targ‘ibot sifatida emas, balki qadriyat va madaniyat sifatida targ‘ib qilish.

Ta’lim va mehnat jamoalarida jismoniy faollikni rag‘batlantiruvchi sharoitlarni yaratish.

Sog‘lom ovqatlanish, ruhiy salomatlik va jismoniy faollikni yagona dastur doirasida birlashtirish.

Shaxsning sog‘lom hayot tarziga tayyorgarligini aniqlashda motivatsion suhbat va bosqichma-bosqich qo‘llab-quvvatlash mexanizmlaridan foydalanish.

Taklif etilgan "Sog‘lom hayot tarzi piramidasi" modelidan sog‘lom turmush tarziga oid targ‘ibot va ta’lim dasturlarini ishlab chiqishda foydalanish.

TALABA YOSHLARNING MUSTAQIL FIKRLASHI VA AXBOROTNI BAHOLASH MADANIYATINING HOZIRGI HOLATI

Eshova Hurriyat Xurramovna
Jurnalistika va o‘zbek filologiyasi fakulteti “Jurnalistika” kafedrasi katta o‘qituvchisi
Falsafa fanlari bo‘yicha falsafa doktori (PhD)
Mirzo Ulug‘bek nomidagi O‘zbekiston Milliy universiteti

Annotatsiya: *Ushbu maqolada zamonaviy oliy ta’lim muhitida talaba yoshlarning mustaqil fikrlash qobiliyati ilmiy-nazariy jihatdan tahlil qilinadi. Shuningdek, ularning axborotni izlash, saralash, tekshirish, tahlil qilish hamda undan mas’uliyatli foydalanish madaniyatining hozirgi holati yoritib beriladi. Raqamli texnologiyalar, internet tarmoqlari, ijtimoiy media va sun’iy intellekt vositalarining ta’lim jarayoniga jadal kirib kelishi yoshlarning axborot bilan ishlash imkoniyatlarini sezilarli darajada kengaytirmoqda. Shu bilan birga, axborotning ishonchliligini aniqlash hamda manipulyativ mazmunni ajratish ko‘nikmalariga bo‘lgan ehtiyoj tobora ortib bormoqda. Turli manbalarni qiyoslash, dalil va fikrni farqlash kabi kompetensiyalar esa zamonaviy talabalar uchun muhim intellektual ko‘nikmalardan biriga aylanmoqda. Maqolada mustaqil fikrlash va axborot madaniyati o‘zaro bog‘liq pedagogik hodisa sifatida talqin qilinib, talabalarning tayyor axborotni qabul qilmasdan, uni izchil tahlil qiluvchi, baholovchi yangi bilimga aylantiruvchi subyekt sifatidagi mavqei asoslab beriladi. Ta’lim tizimida yaratilayotgan raqamli ta’lim muhiti, mustaqil ta’limga qo‘yilayotgan talablar, media savodxonlik va axborot madaniyatiga oid mahalliy ilmiy-metodik ma’lumotlar asosida mavjud muammolarni bartaraf etish yo‘llari yoritiladi. Shuningdek, talabalarning mustaqil fikrlashini rivojlantirishda muammoli ta’lim, manbalarni qiyosiy tahlil qilish, dalillash, refleksiya, loyiha va tadqiqot faoliyatining pedagogik imkoniyatlari ochib beriladi.*

Kalit so‘zlar: *mustaqil fikrlash, talaba yoshlar, axborot madaniyati, axborotni baholash, media savodxonlik, tanqidiy tafakkur, raqamli ta’lim, axborot savodxonligi, internet, raqamli kompetensiya, mustaqil ta’lim, axborot xavfsizligi.*

СОВРЕМЕННОЕ СОСТОЯНИЕ САМОСТОЯТЕЛЬНОГО МЫШЛЕНИЯ СТУДЕНЧЕСКОЙ МОЛОДЕЖИ И КУЛЬТУРЫ ОЦЕНКИ ИНФОРМАЦИИ

Аннотация: *В данной статье в научно-теоретическом аспекте анализируется способность студенческой молодежи к самостоятельному мышлению в условиях современного высшего образования. Также рассматривается современное состояние культуры поиска, отбора, проверки, анализа и ответственного использования информации студентами. Стремительное внедрение цифровых технологий, интернет-сетей, социальных медиа и инструментов искусственного интеллекта в образовательный процесс значительно расширяет возможности молодежи по работе с информацией. Вместе с тем возрастает потребность в развитии навыков определения достоверности информации и выявления манипулятивного содержания. Умение сопоставлять различные источники, различать факты и мнения становится одной из важных интеллектуальных компетенций современного студента. В статье самостоятельное мышление и информационная культура рассматриваются как взаимосвязанные педагогические явления. Обосновывается позиция студента как активного субъекта образовательного процесса, который не просто воспринимает готовую информацию, а последовательно анализирует, оценивает ее и преобразует в новые знания. На основе отечественных научно-методических материалов, посвященных цифровой образовательной среде, требованиям к самостоятельному обучению, медиаграмотности и информационной культуре, освещаются существующие проблемы и пути их решения. Кроме того, раскрываются педагогические возможности проблемного обучения, сравнительного анализа источников, аргументации, рефлексии, проектной и исследовательской деятельности в развитии самостоятельного мышления студентов.*

Ключевые слова: *самостоятельное мышление, студенческая молодежь, информационная культура, оценка информации, медиаграмотность, критическое мышление, цифровое образование, информационная грамотность, цифровая компетентность, самостоятельное обучение, информационная безопасность.*

THE CURRENT STATE OF INDEPENDENT THINKING AND THE INFORMATION EVALUATION CULTURE OF UNIVERSITY STUDENTS

Abstract: *This article provides a scientific and theoretical analysis of students' ability to think independently in the context of modern higher education. It also examines the current state of students' information culture, including their ability to search for, select, verify, analyze, and use information responsibly. The rapid integration of digital technologies, Internet networks, social media, and artificial intelligence tools into the educational process has significantly expanded young people's opportunities to work with information. At the same time, the need to develop skills for determining the reliability of information and identifying manipulative content is becoming increasingly important. The ability to compare different sources and distinguish facts from opinions is becoming one of the essential intellectual competencies of modern students. The article considers independent thinking and information culture as interconnected pedagogical phenomena. It substantiates the role of students as active subjects of the educational process who do not simply receive ready-made information but consistently analyze, evaluate, and transform it into new knowledge. Based on local scientific and methodological materials related to the digital educational environment, requirements for independent learning, media literacy, and information culture, the article highlights existing challenges and possible ways to address them. Furthermore, it explores the pedagogical potential of problem-based learning, comparative analysis of information sources, argumentation, reflection, project-based learning, and research activities in developing students' independent thinking.*

Keywords: *independent thinking, university students, information culture, information evaluation, media literacy, critical thinking, digital education, information literacy, digital competence, independent learning, information security.*

Bugungi globallashuv va raqamlashtirish jarayonlari insonning bilim olish, axborot izlash va uni qayta ishlash faoliyatiga tub o‘zgarishlar olib keldi. Avvalgi ta’lim modelida bilimning asosiy manbai darslik, o‘qituvchi ma’ruzasi, kutubxona va ilmiy adabiyotlar hisoblangan. Zamonaviy talabalarda esa bir vaqtning o‘zida minglab, hatto millionlab axborot birliklariga murojaat qilish imkoniyatiga egadir. Bu kabi muhitda ta’limning asosiy muammosi axborotning yetishmasligidan iborat emas. Aksincha uning haddan tashqari ko‘pligi, sifat jihatidan turlicha ekanligi va ishonchlilik darajasining bir xil emasligidir. Shu bois ham zamonaviy talabalar uchun “axborotni topish” ko‘nikmasining o‘zi yetarli emas. Undan axborotning ma’lumotni aniqlash, mualliflik pozitsiyasini anglash, faktlarni tekshirish, qarama-qarshi fikrlarni taqqoslashtirish, xulosa chiqarish hamda olingan ma’lumotni yangi bilimga aylantirish qobiliyati talab qilinadi.

Oliy ta’lim muassasalari tizimida ham mustaqil ta’lim, kreativ va tanqidiy fikrlash, raqamli kompetensiyalar hamda axborot resurslaridan samarali foydalanish masalalariga tobora ko‘proq e’tibor qaratilmoqda. Tadqiqotchilarni metodik manbalarda mustaqil ta’lim talabalarning o‘z bilimini mustaqil ravishda kengaytirishi, kerakli ma’lumotlarni izlab topishi, ularni tahlil qilishi, muammoni aniqlashi va yechimlarni ishlab chiqishi bilan bog‘liq faoliyat sifatida talqin etiladi[27]. Bunday yondashuv mustaqil fikrlashni faqat psixologik qobiliyat bo‘lmasdan, undan ta’lim jarayonida rivojlantiriladigan kompetensiya sifatida ko‘rish imkoniyatini beradi.

Talaba-yoshlarning mustaqil fikrlashi, avvalo, uning tayyor xulosani qabul qilish bilan cheklanmasligi, muayyan masala yuzasidan o‘z savolini qo‘ya olishi, turli qarashlarni qiyoslashi va asoslangan xulosaga kelishi bilan bevosida belgilanadi. Xususan fikrlash jarayoni shunchaki ko‘p ma’lumotga ega bo‘lish bilan belgilanmaydi. Balki, olingan bilimning xaddan ortiq ko‘pligi uning mazmuniy qayta ishlanishi bilan uyg‘unlashgandagina intellektual salohiyatga aylanadi. Pedagogik ma’lumotlarda ham fikrlash murakkab va faol jarayon sifatida izohlanib, talabalarning o‘qigan yoki eshitgan ma’lumotiga o‘z munosabatini bildira olishi kerakligi ta’kidlanadi[28]. Jumladan, mustaqil fikrlashning asosiy belgisi axborotni takrorlashdan iborat bo‘lmasdan, unga nisbatan shaxsiy, mantiqiy va dalillangan munosabatni rivojlantirishdir.

Mustaqil ravishda fikrlashning takomillanishi talabalarning o‘quv faoliyatidagi subyektlik darajasi bilan o‘zaro bog‘liqdir. Mabodo talaba-yoshlar faqat o‘qituvchi bergan savollarga javob berish yoki tayyor matnni yodlash bilan cheklansa, bu faoliyat mustaqil fikrlashning shakillantirish imkoniyatini pasaytiradi. Shuningdek, internetdan topilgan ma’lumotlarni mazmunan o‘zlashtirmasdan ko‘chirib olish ham talabaning tahliliy va ijodiy fikrlash ko‘nikmalarining shakllanishiga salbiy ta’sir ko‘rsatadi.

Bundan tashqari, talabalar muammoni o‘zi aniqlasa, ma’lumot manbalarini tanlasa, faktlarni solishtirsa, qarama-qarshi nuqtayi nazarlarni ko‘rib chiqsa va o‘z pozitsiyasini asoslashga harakat qilsa, uning analitik faoliyati faollashadi.

Ko‘pgina tadqiqotlarni metodik adabiyotlarda talabaning mustaqil ish faoliyati bilimlarni chuqurlashtirish hamda kengaytirish, ijodiy faoliyatga qiziqish uyg‘otish, ta’lim olish usullarini egallash, fikrlash qobiliyatini rivojlantirish va mustaqil xulosa chiqarish ko‘nikmasini shakllantirishga xizmat qilishi qayd etilgan[29]. Bunday fikrlar hozirgi raqamli sharoitda yanada muhim ahamiyat kasb etadi. Sababi internet talabalarning oldiga juda katta hajmdagi ma’lumotni olib keladi. Ammo bu ma’lumotning ilmiy qiymatini aniqlash uchun insonning o‘z intellektual mezonlari bo‘lishi lozim.

Bugungi talaba-yoshlarning axborot bilan munosabatida ikki xil tendensiya ko‘zga tashlanadi. Birinchi tendensiya axborot resurslaridan foydalanish imkoniyatlarining nihoyatda kengayganidir. Bunda elektron kutubxonalar, ilmiy ma’lumotlar bazalari, elektron darsliklar, ta’lim platformalari, videodarslar, ochiq kurslar va raqamli ilmiy resurslar bilim olish imkoniyatlarini sezilarli darajada oshirmoqda. Ikkinchi tendensiya bo‘lsa, axborotning ishonchliligi va sifatini aniqlash muammosining kuchayishidir. Talaba bir xil mavzu bo‘yicha bir-biriga zid bo‘lgan ma’lumotlarni uchratishi mumkin. Ularning ayrimlari ilmiy ma’lumotga, boshqalari shaxsiy fikrga, yana bir qismi esa reklama yoki manipulyativ maqsadga asoslangan bo‘lishi ehtimoldan xoli emas.

Mazkur nuqtayi nazardan axborot madaniyati tushunchasini faqat kompyuter va internetdan foydalana olish ko‘nikmasi sifatida talqin qilish ilmiy jihatdan tor yondashuv hisoblanadi. Axborot madaniyati insonning axborotni izlash, olish, tushunish, tasniflash, tekshirish, saqlash, qayta ishlash, undan foydalanish va uni boshqalarga yetkazish jarayonidagi bilim, ko‘nikma, qadriyat hamda mas’uliyatlar tizimidir. Manbalarda axborot madaniyatini rivojlantirish masalasida axborotga mas’uliyatli munosabat, zamonaviy axborot texnologiyalaridan foydalanish, mustaqil nazorat va o‘z-o‘zini boshqarish ko‘nikmalariga alohida e’tibor beriladi[30].

Talaba-yoshlarning axborot madaniyatini baholashda birinchi muhim mezon manba bilan ishlash qobiliyati hisoblanadi. Har qanday internet sahifasida berilgan ma’lumotni ilmiy haqiqat sifatida qabul qilish to‘g‘ri bo‘lmaydi. Ya’ni talaba, eng avvalo, Bu ma’lumotni kim taqdim etgan?, Muallifning ilmiy yoki kasbiy vakolati qanday?, Ushbu fikr qanday dalillar bilan asoslangan?, Ma’lumot qachon e’lon qilingan?, Boshqa ishonchli manbalarda ham shu xulosa tasdiqlanganmi? kabi savollarni bera olishi lozim. Aynan shu kabi savollar axborot iste’molini passiv jarayondan faol tahliliy faoliyatga aylantiradi.

Xususan bu jarayonda mustaqil fikrlash bilan axborot madaniyati o‘rtasidagi uzviy aloqani ko‘rish mumkin. Mustaqil fikrlash axborotni tahlil qilishning intellektual mexanizmini ta’minlasa, axborot madaniyati mazkur holatning amaliy, texnologik va axloqiy asoslarini belgilaydi. Bir tomondan, mustaqil fikrlash rivojlanmagan talaba-yosh turli axborotlarni tanqidiy tekshirishda qiyinchilikka duch keladi. Ikkinchi tomondan bo‘lsa, axborot bilan ishlash madaniyati yetarli bo‘lmagan insonning mustaqil fikri ishonchsiz yoki tasodifiy ma’lumotlarga asoslanib qolishi mumkin.

Oliy ta’lim tizimida media savodxonlik va axborot madaniyatiga oid o‘quv-metodik materiallarning ko‘payib borayotgani ushbu muammoning ta’limiy ahamiyati oshganidan dalolat beradi. Shuningdek, olim Z.Sh.Nurmamatov tomonidan tayyorlangan Media savodxonlik va axborot madaniyati o‘quv-uslubiy majmuasida mazkur yo‘nalish oliy ta’lim uchun alohida o‘quv mazmuni sifatida yoritilgan[31]. Bu esa talaba-yoshlarning raqamli axborot davrida ongli tafakkur yuritishi bugungi mutaxassis tayyorlash jarayonining muhim komponentiga aylanayotganini ko‘rsatadi. Umuman olganda axborotni baholash madaniyati, ayniqsa, ijtimoiy tarmoqlardan foydalanish muhitida alohida ahamiyat kasb etadi. Xususan ijtimoiy tarmoqlarda ma’lumotlarning tez tarqalishi ularning haqiqatga mosligini avtomatik tarzda kafolatlamaydi. Balki, emotsional mazmun, shov-shuvli sarlavha, qisqa va ta’sirchan videolar ko‘pincha foydalanuvchini chuqur tahlildan ko‘ra tezkor reaksiyaga undaydi. Buning natijada talabalar ma’lumotning mazmunidan ko‘ra uning ko‘rilishlar soni, layklar yoki repostlar miqdoriga asoslanib xulosa chiqarishi lozim. Ilmiy nuqtayi nazardan bo‘lsa ommaviylik va ishonchlilik bir xil tushuncha bo‘lmaydi.

Shu sababli Oliy ta’lim tizimida “ko‘p axborot bilish”dan ko‘ra “axborotni to‘g‘ri baholash” kompetensiyasiga urg‘u berish kerak. Misol uchun, talabalar ilmiy maqola, blog posti, reklama materiali, yangilik xabari hamda ijtimoiy tarmoqdagi shaxsiy fikr o‘rtasidagi farqni aniqlay olishi lozim. Bu kabi farqlash qobiliyati shakllanmagan inson ilmiy manba bilan subyektiv fikrni tenglashtirib qo‘yishi mumkin. Talaba-yoshlarning axborotni baholash madaniyatini shakillantirishda ma’lumotlarni solishtirish usuli yuqori pedagogik samaradorlikka egadir. Biror bir mavzu bo‘yicha ikki yoki uch xil ma’lumotni taqdim etadi. Ularning muallifi, maqsadi, faktlari, foydalanilgan statistikasi, xulosalari va uslubini taqqoslash topshirig‘i talabaning analitik tafakkurini faollashtiradi. Bunda asosan o‘qituvchi tayyor to‘g‘ri javobni bermasdan, talabani xulosaga mustaqil ravishda kelishi maqsadga muvofiqdir. Shu boisham talabalar nafaqat ma’lumot oladi, balki undan bilimning qanday hosil bo‘lishini ham anglay boshlaydi.

Shu bilan birga mustaqil fikrlashning hozirgi holatini baholashda yana bir muhim jihat reproduktiv va produktiv faoliyat o‘rtasidagi nisbatdir. Xususan reproduktiv faoliyatda talaba o‘zlashtirilgan ma’lumotni qayta bayon qiladi. Produktiv faoliyatda bo‘lsa, u mavjud bilimlardan yangi vaziyatda foydalanadi, muammoni yechadi, gipoteza ilgari suradi yoki o‘z nuqtayi nazarini ishlab chiqadi. Shuningdek zamonaviy oliy ta’limning maqsadi aynan ikkinchi turdagi faoliyatni kengaytirishga qaratilishi kerak. Olib borilgan tadqiqotlarda ham mustaqil fikrlash madaniyatini rivojlantirish shaxsning ijtimoiy faolligi, kasbiy layoqati va o‘zini takomillashtirib borishi bilan bog‘lanadi[32]. Mustaqil bilim olish tamoyili masalani yechish yo‘lini izlash, maqsadni aniqlash va mustaqil xulosa chiqarishga intilish bilan tavsiflanadi. Bunday yondashuvdan

[30] Oliy ta’limda axborot madaniyatini shakllantirishga oid o‘quv- Toshkent: ZiyoNET elektron kutubxonasi. Ziyonet

[31] Nurmamatov Z.Sh. **Media savodxonlik va axborot madaniyati**: o‘quv-uslubiy majmua. — 2023. ZiyoNET

[32] **Mustaqil fikrlash madaniyatini rivojlantirish**ga oid ilmiy-metodik materiallar. — “Xalq ta’limi” ilmiy-metodik jurnali materiallari, 2015.

kelib chiqib, talabaning mustaqil fikrlashini faqat auditoriyadagi savol-javoblar bilan emas. Aksincha uning ilmiy izlanishi, mustaqil o‘qishi va axborot bilan ishlash faoliyati orqali ham baholash mumkin. Talaba yoshlarning axborot madaniyatida kuzatiladigan muammolardan biri bu tayyor materialni o‘zlashtirmasdan ko‘chirishdir. Internetdagi referat, maqola yoki boshqa materialdan foydalanishning o‘zi salbiy holat hisoblanmaydi. Muammo materialning mazmunini anglamasdan, ma’lumotga havola bermasdan yoki o‘z fikri bilan ajratmasdan foydalanilganda yuzaga keladi. Ilmiy madaniyatning asosiy talablaridan biri axborotning kelib chiqishini ko‘rsatish va boshqa muallifning g‘oyasini o‘z fikridan farqlash hisoblanadi.

Mazkur jihatdan akademik halollik axborot madaniyatining tarkibiy qismi sifatida qaralishi lozim. Talaba-yoshlar ma’lumotdan foydalanishni bilishi bilan birga undan qanday foydalanish mumkinligini ham tushunishi kerak. Iqtibos keltirish, parafraz qilish, bibliografik ma’lumotlarni to‘g‘ri rasmiylashtirishdir, shu bilan birga mualliflik huquqiga rioya qilish kabi ko‘nikmalar ilmiy faoliyatning tashqi texnik talablari bo‘libgina qolmay, intellektual mas’uliyatni shakllantirish vositasi hamdir. Talabalarning mustaqil fikrlashini shakillantirishda mustaqil ta’limning o‘rni nihoyatda katta. Mustaqil ta’lim talaba-yoshlarning o‘qituvchi ishtirokisiz faoliyat yuritishi degani emas. Balki, u maqsadli tashkil etilgan, metodik jihatdan qo‘llab-quvvatlangan va natijasi baholangan faoliyat bo‘lishi kerak. Mahalliy manbalarda talabaning mustaqil ishlarini tashkil etishda topshiriqlarni tizimlashtirish, ularning bosqichma-bosqich murakkablashishini ta’minlash va bajarilish sifatini nazorat qilish zarurligi ko‘rsatilgan[33].

Raqamli muhit mustaqil ta’lim uchun katta imkoniyatlar yaratadi. Talaba elektron kutubxonalardan ilmiy adabiyotlarni izlash, ochiq ma’lumotlar bazalaridan foydalanish lozim. Shuningdek, videoma’ruzalarni ko‘rish, masofaviy kurslarda qatnashish, turli elektron platformalar orqali topshiriqlarni bajarish imkoniyatiga ega. Ammo texnologik imkoniyatning mavjudligi avtomatik ravishda yuqori darajadagi mustaqil ta’limni ta’minlamaydi. Agar talabalar raqamli vositalardan faqat tayyor javobni topish uchun foydalansa, texnologiya uning fikrlashini shakillantirish o‘rniga passivlikni kuchaytirishi mumkin.

O‘quv-uslubiy materiallarda ham raqamli ta’lim jarayonida mustaqil faoliyatga tayyorgarlikni shakilllashtirish, axborot ta’minotini integratsiyalash va talabaning mustaqil faoliyatini rivojlantirish masalalari tadqiq etilmoqda. Bu holat raqamli davrda talabalarning mustaqil faoliyatini tashkil etish alohida metodik yo‘nalishga aylanayotganini ko‘rsatadi. Hozirgi muhitda axborot madaniyatining yana bir muhim komponenti media savodxonlikdir. Media savodxonlik insonning media mahsulotlarini tushunishi, ularning yaratilish maqsadini anglay olishdir. Shu bilan birga mazmunni tahlil qilishi va axborotning auditoriyaga qanday ta’sir ko‘rsatishini baholay olish qobiliyatini qamrab oladi. Media savodxon talabalar xabarning sarlavhasi va mazmuni o‘rtasidagi farqni, fakt va sharhning tafovutini, reklama hamda axborot o‘rtasidagi chegarani, tasvir va kontekstning o‘zaro munosabatini anglaydi.

O‘quv dasturlarida media savodxonlik va axborot madaniyati fanining mazmuniga zamonaviy axborot makoni, media, raqamli davr, ommaviy madaniyat va axborotni tanqidiy qabul qilish masalalari kiritilayotgani kuzatiladi[34]. Xususan, Termiz davlat universiteti o‘quv-uslubiy materiallarida “Media savodxonlik va axborot madaniyati” fanining mazmunida global axborot makonida qabul qilinayotgan axborotni tushunish, baholash va tanqidiy tafakkurni shakllantirish vazifalari qayd etilgan. Axborot oqimining jadallashuvi talabalarning psixologik holatiga ham ta’sir ko‘rsatadi. Bir vaqtning o‘zida ko‘plab ma’lumotlardan manba olish diqqatning bo‘linishiga, yuzaki o‘qishga va tezkor xulosalarga olib kelishi mumkin. Bunday vaziyatda talaba-yoshlar matnni chuqur o‘rganishdan ko‘ra uning qisqa mazmuni yoki tayyor xulosasini izlashga moyil bo‘ladi. Shuning uchun oliy ta’lim muassasalarda “chuqur o‘qish” madaniyatini shakillantirish ham axborot madaniyatining muhim yo‘nalishidir.

Bunday yondashuv o‘qituvchining rolini ham o‘zgartiradi. O‘qituvchi faqat bilim beruvchi hisoblanmaydi. Aksincha axborot makonida yo‘l ko‘rsatuvchi, manbalarni tanlash mezonlarini tushuntiruvchi, munozarani boshqaruvchi va talabaning intellektual mustaqilligini rag‘batlantiruvchi pedagog sifatida namoyon bo‘ladi. Tadqiqotlarda ham ta’lim jarayonida o‘qituvchi va talaba munosabatlarini o‘zgartirish, bilim oluvchini ta’lim jarayonining faol ishtirokchisiga aylantirish mustaqil fikrlashni rivojlantirishning muhim sharti sifatida ko‘rsatiladi[35].

Talabaning axborotni baholash madaniyatini takomillantirishda muammoli ta’lim texnologiyalaridan foydalanish samarali natija beradi. Muammoli topshiriqda talaba tayyor javob bilan ta’minlanmaydi. U mavjud axborotlardan foydalanib muammoni mustaqil tahlil qilishi, ehtimoliy yechimlarni ilgari surishi va ulardan eng asoslisini tanlashi kerak. Bu jarayon fikrlashning tahlil, sintez, taqqoslash, umumlashtirish va baholash kabi operatsiyalarini faollashtiradi. Munozara va debatlar ham mustaqil fikrlashning muhim vositalaridan biridir. Talaba o‘z pozitsiyasini himoya qilishi uchun dalil keltirishi, boshqa fikrni tinglashi va uning kuchli yoki zaif tomonlarini ko‘rsatishi lozim. Eng muhimi,

[33] Adinayev Sh.Sh. Raqamli ta’lim muhitida talabalarning mustaqil faoliyatga tayyorgarligini integrativ axborot ta’minoti vositasida takomillashtirish metodikasi. — avtoreferat, 2025.

[34] **Media savodxonlik va axborot madaniyati** fani bo‘yicha o‘quv dasturi va metodik materiallar. — Termiz, 2023. Ziyonet

[35] **Psixologiya**: oliy ta’lim uchun o‘quv materiallari. — Namangan davlat universiteti elektron kutubxonasi, 2024. www.namdu.uz

munozara talabaning “men shunday deb o‘ylayman” darajasidan “mening fikrim quyidagi dalillarga asoslanadi” darajasiga ko‘tarilishiga yordam beradi.

Axborotni baholash madaniyatida faktcheking ko‘nikmasi ham alohida o‘rin tutadi. Talabalar internetdagi xabarni qabul qilishdan oldin uning boshqa mustaqil manbalarda qay darajada tasdiqlanganini tekshirishi lozim. Ayniqsa statistik ma’lumotlar, ilmiy natijalar, ijtimoiy hodisalar, tarixiy faktlar va jamoatchilikka ta’sir qiluvchi xabarlar bir nechta ishonchli manba asosida qiyoslanishi maqsadga muvofiqdir. Bu jarayonda talabaning shubha qilish qobiliyati inkor qilish emas, balki ilmiy tekshiruv vositasi sifatida shakllantiriladi. Talabalarning hozirgi axborot madaniyatini tahlil qilganda, ularning texnologik savodxonligi bilan axborot-analitik savodxonligini farqlash zarur. Xususan smartfon, kompyuter yoki turli dasturlardan foydalana olish texnik ko‘nikmani bildiradi. Ammo texnik jihatdan faol foydalanuvchi ham yolg‘on axborotni haqiqiy deb qabul qilishi mumkin. Demak, raqamli kompetensiyaning yuqori darajasi faqat texnik operatsiyalarni bajarish hisoblanmaydi. Aksincha axborotning mazmuniy va ijtimoiy qiymatini baholash bilan belgilanadi.

Hozirgi kunda sun’iy intellekt texnologiyalarining ta’limga kirib kelishi ushbu masalani yanada dolzarb qilmoqda. Talaba sun’iy intellekt vositalaridan ma’lumot izlash, matnni tahlil qilish, g‘oyalar ishlab chiqish yoki dastlabki reja tuzishda foydalanishi mumkin. Natijada sun’iy intellekt tomonidan berilgan javob ham tekshirilishi, ishonchli manbalar bilan taqqoslashtirilishi va insonning mustaqil fikri bilan qayta ishlanishi lozim. Shuning uchun yangi texnologiyalar davrida axborot madaniyati tushunchasi yanada kengayib, raqamli natijalarni tekshirish va ularning ilmiy asoslanganligini aniqlash kompetensiyasini ham o‘z ichiga oladi. Oliy ta’limda mustaqil fikrlash va axborot madaniyatini shakillantirishning yana bir samarali yo‘nalishi tadqiqot topshiriqlaridir. Talabaga kichik ilmiy muammo berilib, u muammo bo‘yicha adabiyotlar sharhini tuzish, manbalarni tasniflash, asosiy qarashlarni solishtirish lozim. Mavjud bo‘shliqni aniqlash va o‘z xulosasini ishlab chiqish talab etilsa, uning axborot bilan ishlash kompetensiyasi tabiiy ravishda rivojlanadi.

Shuningdek, talabalarga axborot ma’lumotlarining anglatish muhim. Darslik, monografiya, ilmiy maqola, dissertatsiya, rasmiy statistika, qonunchilik hujjati, ilmiy konferensiya materiali, ommaviy axborot vositasi va ijtimoiy tarmoq posti bir xil ilmiy maqomga ega emas. Ularning har biridan foydalanish maqsadi va ishonchlilik mezoni turlichadir. Talaba buni tushunib yetganida uning ilmiy izlanishlari ham mazmunan, ham metodologik jihatdan takomillashadi. Ilmiy-uslubiy manbalarda ham mustaqil ta’lim jarayonida darslik, o‘quv qo‘llanma, metodik adabiyotlar, ilmiy va davriy nashrlar, internet resurslaridan foydalanish zarurligi qayd etilgan[36]. Demak, zamonaviy talabaning axborot makoni faqat internet bilan chegaralanmaydi. Raqamli manbalarni an’anaviy ilmiy adabiyotlar bilan birlashtirish bilimning ishonchliligini oshiradi. Talaba-yoshlarning mustaqil fikrlashini shakllantirishda milliy-ma’naviy omillar ham muhim ahamiyatga egadir. Mustaqil fikr shaxsning ijtimoiy mas’uliyatidan ajralgan holda rivojlanmasligi kerak. Talaba o‘z fikrini erkin ifodalashi bilan birga, boshqa insonlarning huquqi, sha’ni, qadr-qimmati va fikriga hurmat bilan munosabatda bo‘lishi lozim. Shu sababli axborot madaniyati texnik va intellektual kompetensiyalardan tashqari axloqiy mas’uliyatni ham qamrab oladi.

Ilmiy-pedagogik adabiyotlarida ta’lim va madaniyatning uzviyligi, ta’lim jarayonida milliy-ma’naviy qadriyatlarning ahamiyati ham qayd etilgan[37]. Talabaning zamonaviy axborot muhitida faol ishtirok etishi uning milliy va umuminsoniy qadriyatlar asosidagi ijtimoiy mas’uliyatini kamaytirmasligi, aksincha, kuchaytirishi lozim

Hozirgi holatning yana bir jihati shundaki, talabalar o‘rtasidagi axborot bilan ishlash darajasi bir xil emas. Ayrim yoshlar ilmiy ma’lumotlar bazalari, elektron kutubxonalar va akademik resurslardan samarali foydalanadi. Boshqalar esa qidiruv tizimining dastlabki natijalari yoki ijtimoiy tarmoqdagi ommabop materiallar bilan cheklanib qolishi mumkin. Shu bois oliy ta’lim muassasalarida axborot madaniyatini rivojlantirish barcha talabalar uchun bir xil yondashuv asosida emas, balki ularning boshlang‘ich kompetensiyalarini hisobga olgan differensial metodika asosida tashkil etilishi maqsadga muvofiqdir. Bunday metodikada talabalarning axborot bilan ishlash darajasini aniqlash uchun diagnostik topshiriqlardan foydalanish mumkin. Masalan, ularga bir mavzuga oid beshta manba berilib, ularni ishonchlilik darajasiga ko‘ra tartiblash, tanlovini asoslash, bir manbadagi ma’lumotni boshqa manbalar bilan tekshirish va yakuniy xulosa yozish topshiriladi. Buning natijasida orqali talabaning qidirish, saralash, tekshirish, tahlil qilish va xulosa chiqarish bosqichlaridagi kompetensiyasi aniqlanadi.

Shuningdek, axborot madaniyatini rivojlantirishni alohida bitta fan bilan cheklash to‘g‘ri emas. Ushbu kompetensiya barcha fanlar mazmuniga integratsiya qilinishi lozim. Tarix fanida tarixiy manbalarni taqqoslash, huquqda qonunchilik hujjatlarini tahlil qilish, iqtisodiyotda statistik ma’lumotlarning ishonchliligini baholash, pedagogikada ilmiy maqolalarni qiyoslash, tibbiyotda klinik ma’lumotlarning manbasini tekshirish kabi topshiriqlar orqali axborot madaniyati kasbiy

[36] **O‘zbekiston tarixi** fanidan talabalar mustaqil ishlarini bajarish uchun uslubiy ko‘rsatma. — ZiyoNET elektron kutubxonasi, 2023. ZiyoNET

[37] Jumanazarova A., Tursunov L.E. Talabalarda ta’lim madaniyatini shakllantirishning ijtimoiy-falsafiy muammolari // Research Focus. — 2023. — Vol. 2, Issue 7. КиберЛенинка

tayyorgarlik bilan birlashtirilishi mumkin. Bunday tashqari, talaba yoshlarning mustaqil fikrlashi va axborotni baholash madaniyatining hozirgi holatini bir tomonlama “yaxshi” yoki “yomon” tarzda baholash ilmiy jihatdan yetarli emas. Zamonaviy talaba avvalgi avlodlarga nisbatan axborotga kirish imkoniyatlari jihatidan ancha katta resurslarga egadir. Shu bilan birga, axborot hajmining ortishi uning ishonchliligini aniqlash, tanqidiy saralash va ilmiy jihatdan qayta ishlash masalasini murakkablashtirmoqda. Shuning uchun hozirgi ta’limning asosiy vazifalaridan biri talabani shunchaki axborot bilan ta’minlash emas, balki uni axborot ustidan fikrlashga o‘rgatishdan iborat.

Umuman olganda, mustaqil fikrlash va axborotni baholash madaniyati bir-birini to‘ldiruvchi ikki muhim kompetensiyadir. Mustaqil fikrlash talabaga o‘z pozitsiyasini shakllantirish imkonini bersa, axborot madaniyati ushbu pozitsiyaning ishonchli dalillar va sifatli manbalarga asoslanishini ta’minlaydi. Ularning uyg‘unligi natijasida talaba tayyor bilimni o‘zlashtiruvchi subyektdan bilimni izlovchi, tekshiruvchi, tahlil qiluvchi va yaratuvchi shaxsga aylanadi. Bundan tashqari, talabalarning mustaqil fikrlashini baholashda faqat yakuniy javob emas, balki javobga olib kelgan fikrlash jarayoni ham hisobga olinishi lozim. Talaba qanday manbalarni tanladi, nima uchun aynan shu manbalarga tayandi, qarama-qarshi fikrlarni qanday ko‘rib chiqdi. Xulosasini qanday dalillar bilan asoslay oldi. Mana shu mezonlar uning intellektual mustaqilligi haqida ancha aniq tasavvur beradi.

Shuningdek, oliy ta’lim muassasalarida axborot madaniyatini shakllantirish bo‘yicha amaliy laboratoriyalar, “fact-checking” mashg‘ulotlari, manbalar bilan ishlash seminarlar, ilmiy munozaralar, talabalar tadqiqot loyihalari va media tahlil mashg‘ulotlarini yo‘lga qo‘yish mumkin. Bunday faoliyatlar talabaning real axborot muhitida qaror qabul qilish qobiliyatini mustahkamlaydi.

Xulosa qilib aytganda, zamonaviy talaba uchun mustaqil fikrlash shaxsiy fikrga ega bo‘lishning o‘zi emas. Ushbu fikrni bilim, dalil, mantiq va ilmiy manbalar asosida shakllantira olish qobiliyatidir. Axborotni baholash madaniyati esa ma’lumotni shunchaki qabul qilish emas, uning kelib chiqishi, maqsadi, mazmuni, dalillari va ishonchlilik darajasini tahlil qilishni nazarda tutadi. Raqamli jamiyat sharoitida mazkur ikki kompetensiyaning rivojlanganligi talabaning nafaqat akademik muvaffaqiyatini, balki uning kelajakdagi kasbiy faoliyati, ijtimoiy mas’uliyati va intellektual mustaqilligini ham belgilaydi.

KICHIK OILA MODELI TUSHUNCHASINING MOHIYATI VA EVOLYUTSION RIVOJLANISHI

Saodat Inoyatova
Oila va gender ilmiy tadqiqot instituti doktaranti (DSc)

Annotatsiya: *Ushbu maqolada kichik oila modeli tushunchasining mazmun-mohiyati, shakllanishi va evolyutsion rivojlanish xususiyatlari ijtimoiy-falsafiy nuqtayi nazardan tahlil qilinadi. Kichik oilaning asosiy belgilari, tarkibiy tuzilishi, shaxs va jamiyat hayotidagi o‘rni yoritiladi. Shuningdek, urbanizatsiya, modernizatsiya, globallashuv va ijtimoiy-iqtisodiy o‘zgarishlarning oilaviy munosabatlar hamda oilaviy qadriyatlar transformatsiyasiga ta’siri ochib beriladi. Tadqiqotda kichik oila modelining afzalliklari, mavjud cheklovlari va zamonaviy jamiyat sharoitidagi rivojlanish tendensiyalari ilmiy-nazariy jihatdan asoslanadi.*

Kalit so‘zlar: *Kichik oila, oila modeli, evolyutsiya, modernizatsiya, globallashuv, qadriyat, jamiyat, transformatsiya.*

СУТЬ И ЭВОЛЮЦИОННОЕ РАЗВИТИЕ КОНЦЕПЦИИ МОДЕЛИ МАЛОЙ СЕМЬИ

Аннотация: *В данной статье анализируется сущность, формирование и эволюционное развитие концепции модели малой семьи с социально-философской точки зрения. Выделены основные особенности малой семьи, её структурная структура и роль в жизни индивида и общества. Также раскрывается влияние урбанизации, модернизации, глобализации и социально-экономических изменений на трансформацию семейных отношений и семейных ценностей. Исследование предоставляет научно-теоретическую основу для преимуществ, существующих ограничений и тенденций развития модели малой семьи в современном обществе.*

Ключевые слова: *Малая семья, модель семьи, эволюция, модернизация, глобализация, ценности, общество, трансформация.*

THE ESSENCE AND EVOLUTIONARY DEVELOPMENT OF THE CONCEPT OF THE SMALL FAMILY MODEL

Abstract: *This article analyzes the essence, formation and evolutionary development of the concept of a small family model from a socio-philosophical point of view. The main features of a small family, its structural structure, and its role in the life of an individual and society are highlighted. The impact of urbanization, modernization, globalization, and socio-economic changes on the transformation of family relations and family values is also revealed. The study provides a scientific and theoretical basis for the advantages, existing limitations, and development trends of the small family model in modern society.*

Keywords: *Small family, family model, evolution, modernization, globalization, value, society, transformation.*

KIRISH. Kichik oila modeli zamonaviy jamiyatda nikohda bo‘lgan er-xotin va ularning bir yoki ikki farzandidan tashkil topadigan, avlodlararo tarkibi nisbatan ixcham bo‘lgan oilaviy tuzilmani anglatadi. Mazkur modelni faqat farzandlar sonining kamayishi bilan izohlash yetarli emas. U oilaning ijtimoiy vazifalari, iqtisodiy faoliyati, gender munosabatlari, tarbiya usullari, shaxsiy tanlov erkinligi va jamiyatning demografik qadriyatlaridagi o‘zgarishlarni ham ifodalaydi. Shu sababli kichik oila modeli tarixiy jihatdan jamiyatning ijtimoiy-iqtisodiy va ma’naviy-madaniy transformatsiyasi bilan uzviy bog‘liq holda shakllangan. Kichik oilaning ildizlarini insoniyat tarixining dastlabki davrlaridan izlash mumkin bo‘lsa-da, qadimgi va an’anaviy jamiyatlarda asosiy oila modeli, odatda, kengaygan yoki ko‘p avlodli oila shaklida mavjud bo‘lgan. Agrar jamiyatda oila nafaqat biologik va tarbiyaviy, balki ishlab chiqarish birligi sifatida ham faoliyat yuritgan. Ko‘p farzandlilik mehnat resurslarini ko‘paytirgan, keksalarni qo‘llab-quvvatlash va xo‘jalikni davom ettirish imkoniyatini yaratgan. Shuning uchun ko‘p farzandli oila iqtisodiy jihatdan ham, ijtimoiy jihatdan ham muhim qadriyat hisoblangan.

ADABIYOTLAR SHARHI. Kichik oila modeli tushunchasining mohiyati va evolyutsion rivojlanishi masalasi demografiya, sotsiologiya, oilashunoslik va ijtimoiy falsafa doirasida keng tadqiq etilgan. Mazkur yo‘nalishdagi tadqiqotlarda oilaning tarkibiy tuzilishi, farzandlar sonining kamayishi, urbanizatsiya, modernizatsiya, iqtisodiy omillar hamda individualizmning kuchayishi kichik oilaning shakllanishiga ta’sir etuvchi omillar sifatida tahlil qilinadi. Shuningdek, zamonaviy tadqiqotlarda kichik oilaning shaxs tarbiyasi, gender munosabatlari va ijtimoiylashuv jarayonlariga ta’siri yoritilgan. Mazkur tadqiqotning birinchi farqli jihati – kichik oila modeli faqat demografik hodisa emas,

balki ijtimoiy transformatsiya sifatida izohlanadi. Ikkinchi farqli jihati – uning tarixiy-evolyutsion rivojlanishi an'anaviy oiladan zamonaviy kichik oilaga o'tish jarayoni hamda globallashuv va modernizatsiya ta'siri bilan uzviy bog'liq holda kompleks tahlil qilinadi.

TADQIQOT METODOLOGIYASI. Tadqiqotda kichik oila modeli tushunchasining mohiyati va evolyutsion rivojlanishini ochib berish uchun tizimli, tarixiy-qiyosiy, dialektik va ijtimoiy-falsafiy yondashuvlardan foydalanildi. Tarixiy-qiyosiy metod orqali oilaning an'anaviy, industrial va zamonaviy shakllari o'zaro taqqoslandi. Tizimli yondashuv kichik oilaning demografik, iqtisodiy, ma'naviy-axloqiy va ijtimoiy omillar bilan bog'liqligini aniqlashga xizmat qildi. Dialektik yondashuv asosida kichik oila shakllanishidagi imkoniyat va ziddiyatlar tahlil qilindi. Shuningdek, analiz, sintez, induksiya, deduksiya va ilmiy abstraksiyalash usullaridan foydalanildi.

MUHOKAMA VA NATIJALAR. Kichik oila modelining shakllanishidagi birinchi muhim evolyutsion bosqichni **an'anaviy oiladan yadroviy oilaga o'tish jarayoni** bilan bog'lanadi. Yadroviy oila er-xotin va ularning farzandlaridan iborat bo'lib, ota-ona, aka-uka, buva-buvi kabi qarindoshlarning bir xo'jalik doirasida yashash zaruriyati asta-sekin kamaygan. Bu jarayon, ayniqsa, sanoatlashuvning kuchayishi bilan tezlashdi. XIX–XX asrlarda sanoat korxonalarining rivojlanishi, urbanizatsiya, mehnat bozorining kengayishi va aholining qishloqlardan shaharlarga ko'chishi oilaning ishlab chiqarish funksiyasini qisqartirdi. Kichik oila modeli bo'yicha dastlabki tipologik yondashuvlar va uning tuzilishini ilmiy tasniflashga birinchi jiddiy urinishlardan biri fransuz ijtimoiy muhandisi va sotsiologi Frederik Le Play tomonidan amalga oshirilgan. U o'zining 1871-yilda yozilgan "Oilaning tashkil etilishi" asarida "Yevropa oilalarini uch turga ajratadi: patriarxal oila, tayanch-o'zak oila va "kichik oila" deb ham ataydi. Uning fikricha, bu tur – er-xotin va ularning farzandlaridan iborat, mulkning teng taqsimlanishiga asoslangan, kattalar avlodi bilan doimiy birga yashamaydigan oila shakli – sanoat jamiyatiga xos beqaror, ammo erkinlik va tenglik g'oyalariga mos keluvchi model"[1] sifatida shakllangan deb hisoblaydi. Shunday qilib, "kichik oila" atamasining ilmiy muomalaga kiritilishi bevosita Le Playning XIX asr o'rtalaridagi tadqiqotlariga borib taqaladi.

Ikkinchi bosqich – industrial jamiyat sharoitida kichik oilaning institutsional shakllanishidir. Shaharlashuv natijasida uy-joy, daromad, farzand tarbiyasi va ta'lim xarajatlari oilaning reproduktiv xatti-harakatlariga ta'sir ko'rsata boshladi. Bolalar sonining ko'pligi avvalgi agrar jamiyatdagi kabi iqtisodiy ustunlik emas, aksincha, oilaning moddiy va vaqt resurslariga qo'shimcha yuk sifatida namoyon bo'ldi. XIX asr oxirida oila tarixiyligi masalasi boshqa nuqtai nazardan evolyutsion antropologiya orqali ko'rib chiqila boshlandi. Fridrix Engels o'zining "Oila, xususiy mulk va davlatning kelib chiqishi" asaridagi "Oila" deb nomlangan II bobini Lyuis Morganning 1877-yilda yozilgan "Ancient Society" (Qadimgi jamiyat) asaridagi materiallarga tayanib, oila taraqqiyotining bosqichma-bosqich rivojlanish sxemasini taklif qiladi: qarindosh oila (consanguine family), juftlashgan oila (pairing family) va nihoyat monogam oila ko'rinishidagi modelni taklif qiladi. Fridrix Engels "aynan juftlashgan oiladan monogam oilaga o'tishni mulkchilik munosabatlarining o'zgarishi bilan bog'laydi. Bu yondashuvda kichik (monogam) oila tarixiy taraqqiyotning natijasi, xususan xususiy mulk va meros huquqining paydo bo'lishi bilan bog'liq ijtimoiy-iqtisodiy hodisa sifatida talqin qilinadi"[2] bu Le Playning tipologik – tavsifiy yondashuvidan farqli, sabab-oqibat munosabatlariga asoslangan nazariy modelga aylanadi. Aynan F.Engels tomonidan taklif qilingan modelni evolyutsionistik-marksistik bosqich deb ham atash mumkin. Bu kichik oila modelining demografik asoslarini mustahkamlanishiga zamin yaratdi.

Uchinchi bosqich – XX asrning ikkinchi yarmida reproduktiv xulq-atvorning modernizatsiyalashuvi bilan tavsiflanadi. Bu davrda ta'lim darajasining oshishi, ayollarning ijtimoiy va iqtisodiy faolligining kuchayishi, sog'liqni saqlash tizimining rivojlanishi hamda oilani rejalashtirish imkoniyatlarining kengayishi farzandlar soniga bo'lgan munosabatni o'zgartirdi. XX asrning o'rtalarida amerikalik antropolog Jorj Piter Merdok kichik oilaning shakllanishida funksionalistik-universalistik bosqichga o'tish modelini taklif qilib, kichik oila kontseptsiyasini yangi – kross-madaniy statistik asos sifatida izohlaydi. U 250 ta jamiyatni qiyosiy tahlil qilib, o'zining "Ijtimoiy tuzilma" asarini yozib, "oilaga quyidagi klassik ta'rifni beradi: oila – umumiy turar joy, iqtisodiy hamkorlik va reproduksiya bilan tavsiflanuvchi ijtimoiy guruh bo'lib, kamida ikkita jinsiy hamkor va ularning bir yoki bir nechta farzandidan iborat bo'lib, kichik (nuklear) oilani jamiyatning universal, ya'ni barcha madaniyatlarda uchraydigan asosiy birligi bo'lib, o'zida to'rtta jinsiy, reproduktiv, ta'lim-tarbiyaviy va iqtisodiy funksiyalarni birlashtiradi"[3]. Bu bilan "kichik oila" tushunchasi endi tarixiy-o'tkinchi hodisa emas, balki insoniyat jamiyatining tabiiy-universal birligi sifatida talqin qilina boshlanadi. Natijada, oila qurish va farzand ko'rish masalalari tobora ko'proq shaxsiy tanlov, iqtisodiy imkoniyat va hayotiy strategiya bilan bog'lana boshladi. Shu tariqa "ko'p farzandlilik – oilaning iqtisodiy zaruriyati" paradigmasi o'rnini "kam farzandli, lekin sifatli tarbiyaga yo'naltirilgan oila" paradigmasi egallay boshladi.

1949–1950-yillarda amerikalik sotsiolog Talkott Parsons kichik oila kontseptsiyasini sanoatlashuv jarayonining mahsuli ekanligi bilan bog'laydi. Uning "izolyatsiyalashgan kichik oila" (isolated nuclear family) tushunchasi ilgari suriladi: sanoat jamiyatida oila kengaygan qarindoshlik tarmog'idan ajralib, mustaqil iqtisodiy-ijtimoiy birlikka aylanadi. Kichik oilaning ikkita "qisqarmas" funksiyasi – bolalarning birlamchi sotsializatsiyasi va kattalar shaxsining barqarorlashtirilishi asoslab beriladi"[4]. Parsonsning "izolyatsiyalashgan kichik oila" tezisi tez orada empirik tanqidga

uchraydi. Marvin Sussman o‘zining tadqiqotlarida “amerika oilalari o‘rtasida qarindoshlik aloqalari sanoatlashuvdan keyin ham saqlanib qolganini ko‘rsatuvchi dalillarni keltiradi va kichik oilaning to‘liq izolyatsiyalashgan holati ko‘p jihatdan nazariy mif ekanligini isbotlaydi”[5]. Bu tanqid kichik oila modelining bir xilda universal emasligini, balki madaniy-tarixiy kontekstga bog‘liq holda turlicha shakllanishini ko‘rsatdi.

XXI asrga kelib oila tuzilishiga raqamlashtirish, globallashuv, individualizatsiya, ta’lim va professional karyeraga bo‘lgan ehtiyoj kuchli ta’sir ko‘rsatmoqda**. Postindustrial va axborot jamiyati sharoitidagi kichik oila modeli bu z**amonaviy shaxs uchun hayot sifati, kasbiy rivojlanish, iqtisodiy mustaqillik, shaxsiy erkinlik va farzand tarbiyasining sifati tobora muhim qadriyatlarga aylanmoqda. Bir yoki ikki farzandli oilalar ko‘plab jamiyatlarda keng tarqalgan demografik modelni vujudga kelishiga turtki berdi. Biroq kichik oila modelini faqat demografik hodisa sifatida baholash mumkin emas. Uning **ma’naviy-axloqiy mazmuni** ham mavjud bo‘lib, kichik oilada ota-onaning har bir farzandga ajratadigan vaqti, ta’lim va tarbiya resurslari nisbatan ko‘proq ahamiyatlidir. Bu holat farzandda mas’uliyat, mustaqillik, o‘zini boshqarish, hamkorlik va ijtimoiy moslashuv kabi sifatlarning rivojlanishiga imkon yaratadi. Shu bilan birga, kichik oilaning ayrim cheklovlari ham mavjud: avlodlararo aloqalarning zaiflashishi, qarindoshlik munosabatlarining qisqarishi, yolg‘izlik xavfi va individualizmning kuchayishi shular jumlasidandir.

O‘zbekiston sharoitida kichik oila modelining shakllanishi o‘ziga xos xususiyatga ega. An’anaviy o‘zbek oilasida ko‘p avlodlilik, qarindoshlik rishtalari, kattalarga hurmat, o‘zaro yordam muhim qadriyatlar hisoblangan. Mustaqillikdan keyingi davrda urbanizatsiya, ta’lim darajasining oshishi, ayollarning mehnat bozoridagi ishtiroki, uy-joy va iqtisodiy sharoitlarning o‘zgarishi natijasida oilaning hajmi va reproduktiv xulq-atvorida ham transformatsion jarayonlarining jadallashishiga olib keldi. Shu bilan birga, kichik oila modeli milliy oilaviy qadriyatlarni to‘liq inkor etmaydi; aksincha, an’anaviy qadriyatlarning yangi ijtimoiy sharoitga moslashuvi asosida shakllanib boradi. Evolyutsion nuqtayi nazardan kichik oila modelini **an’anaviy ko‘p avlodli oila → yadroviy oila → kam farzandli oila → ongli rejalashtiriladigan kichik oila → individuallashgan va sifatga yo‘naltirilgan zamonaviy oila** tarzidagi jarayon sifatida tavsiflash mumkin. Bunda har bir bosqich oldingisini to‘liq inkor etmaydi, balki uning ayrim elementlarini saqlagan holda yangi ijtimoiy sharoitga moslashtiradi.

Umuman, kichik oila modelining tarixiy shakllanishi jamiyatning modernizatsiyasi, urbanizatsiyasi, iqtisodiy munosabatlarning o‘zgarishi, ta’lim va tibbiyotning rivojlanishi, gender rollarining transformatsiyasi hamda individual qadriyatlarning kuchayishi bilan bog‘liq murakkab ijtimoiy jarayondir. Uning asosiy xususiyati oilaning miqdoriy jihatdan kichrayishi bilangina emas, balki **oilaviy hayotning mazmuni, funksiyalari va qadriyatlar tizimining sifat jihatidan transformatsiyalanishi** bilan belgilanadi. Shu nuqtayi nazardan, kichik oila modeli shaxsning ma’naviy-axloqiy kapitalini shakllantirish uchun yangi imkoniyatlar yaratishi bilan birga, avlodlararo uzviylik va ijtimoiy birdamlikni saqlash masalasida muayyan cheklovlarni ham yuzaga keltiruvchi zamonaviy ijtimoiy institut sifatida namoyon bo‘ladi.

“Kichik oila modeli zamonaviy jamiyatda oilaning demografik, ijtimoiy, iqtisodiy, ma’naviy-axloqiy va tarbiyaviy funksiyalarining transformatsiyasi natijasida shakllangan ijtimoiy institut sifatida namoyon bo‘ladi. Uni faqat oiladagi farzandlar sonining kamligi bilan tavsiflash metodologik jihatdan yetarli emas”[6]. Chunki kichik oila modeli oilaning ichki tuzilishi, a’zolar o‘rtasidagi munosabatlar, reproduktiv qarorlarni qabul qilish mexanizmlari, tarbiyaviy strategiyalar, iqtisodiy resurslarning taqsimlanishi va shaxsning individual rivojlanishiga yaratiladigan imkoniyatlarni ham qamrab oladi. Shu jihatdan kichik oila modeli shaxs va jamiyat o‘rtasidagi munosabatlarning muhim vositachisi bo‘lib, uning mazmunini kompleks ijtimoiy-falsafiy tahlil qilish talab etiladi.

“Kichik oila modelining birinchi asosiy belgisi – oilaning nisbatan kam sonli tarkibga egaligidir. Odatda bunday oila er-xotin va ularning bir yoki ikki farzandidan tashkil topgan yadroviy oila shaklida namoyon bo‘ladi. Biroq “kichik oila” tushunchasini faqat qat’iy statistik mezon bilan chegaralash maqsadga muvofiq emas”[7]. Chunki oilaning kichik yoki katta ekanligi jamiyatning demografik holati, tarixiy-madaniy an’analari va oilaviy me’yorlariga nisbatan belgilanadi. Muhimi, kichik oila modelida oilaviy resurslar nisbatan kam sonli a’zolar o‘rtasida taqsimlanadi. Ikkinchi belgi – reproduktiv xulq-atvorning ongli va rejalashtirilganligi bo‘lib, an’anaviy jamiyatlarda farzandlar soni ko‘pincha iqtisodiy, diniy, urf-odat va qarindoshlik omillari bilan belgilangani holda, zamonaviy kichik oilada farzand ko‘rish masalasi tobora ko‘proq er-xotinning ongli qaroriga aylanmoqda. Ota-onalar farzandlar sonini oilaning moddiy imkoniyatlari, uy-joy sharoiti, ta’lim va tarbiya imkoniyatlari hamda kelajakdagi hayotiy rejalar bilan bog‘lab belgilaydi. Demak, reproduktiv tanlov kichik oila modelining muhim tarkibiy xususiyatlaridan biridir.

Uchinchi belgi – oilaviy resurslarning sifatga yo‘naltirilishidir. Kichik oilada vaqt, mablag‘, e’tibor, ta’limiy imkoniyat va boshqa resurslar kamroq farzandlar o‘rtasida taqsimlanadi. Bu esa har bir farzandning individual ehtiyojlarini hisobga olish imkoniyatini oshiradi. Xususan, ta’lim olish, kasbiy rivojlanish, qo‘shimcha bilim va ko‘nikmalarni egallash hamda shaxsiy qobiliyatlarni rivojlantirish uchun ko‘proq sharoit yaratilishi mumkin. Shu nuqtayi nazardan kichik oila modelida “farzandlar soni”dan ko‘ra “farzandlar rivojlanishining sifati” muhimroq mezonga aylanadi.

To‘rtinchi belgi – ota-ona va farzandlar o‘rtasidagi individual muloqotning kuchayishidir. Oila a’zolari sonining nisbatan kamligi ota-onaga har bir farzandning qiziqishi, qobiliyati, hissiy holati va ehtiyojlarini yaxshiroq anglash imkonini beradi. Tarbiya jarayoni umumiy talablar asosida emas, balki individual yondashuv asosida tashkil etilishi mumkin. Bu jarayon bolaning o‘z fikrini erkin ifodalashi, mustaqil qaror qabul qilishi va shaxsiy mas’uliyatini rivojlantirishga ijobiy ta’sir ko‘rsatadi.

Kichik oila modelining beshinchi tarkibiy xususiyati – oilaviy rollarning transformatsiyasi hisoblanib, zamonaviy kichik oilada ota faqat moddiy ta’minotchi, ona esa faqat uy-ro‘zg‘or va tarbiya uchun mas’ul shaxs sifatida qaraladigan an’anaviy rollar nisbatan o‘zgarib bormoqda. Er-xotin o‘rtasida iqtisodiy, maishiy, tarbiyaviy va emotsional mas’uliyatni taqsimlashning yangi shakllari paydo bo‘lmoqda. Bu esa oiladagi sheriklik, o‘zaro hurmat va kelishuv tamoyillarining kuchayishiga olib keladi.

Oltinchi belgi – iqtisodiy ratsionallik va oilaviy farovonlikka intilishdir. Kichik oila modelida oilaning daromadi va xarajatlarini rejalashtirish, farzandlarning ta’limi va kelajagiga investitsiya qilish, uy-joy va boshqa ehtiyojlarni hisobga olish muhim ahamiyat kasb etadi. Farzandlar sonining nisbatan kamligi oilaning mavjud iqtisodiy resurslarini har bir a’zoning ehtiyojlariga mos ravishda taqsimlash imkonini beradi. Shu bilan birga, kichik oila modeli iqtisodiy barqarorlikni avtomatik ravishda ta’minlamaydi; uning natijasi oilaning daromad darajasi, bandlik imkoniyatlari va ijtimoiy himoya tizimiga ham bog‘liq.

Yettinchi xususiyat – ma’naviy-axloqiy tarbiyaning individuallashuvi bo‘lib, oila shaxsning dastlabki ijtimoiylashuv muhiti bo‘lib, unda halollik, vijdon, adolat, mas’uliyat, hurmat, mehr-oqibat, sadoqat va hamjihatlik kabi qadriyatlar shakllanadi. Kichik oilada ota-onaning farzand bilan bevosita muloqoti kuchaygani sababli ushbu qadriyatlarni kundalik xatti-harakatlar orqali singdirish imkoniyati ortishi mumkin. Shu ma’noda kichik oila modeli shaxsning ma’naviy-axloqiy kapitalini shakllantirish uchun mikroijtimoiy muhit vazifasini bajaradi. Biroq kichik oila modelining cheklovlari ham mavjud. Aka-uka va opa-singillar sonining kamayishi bolaning tengdoshlar bilan kundalik oilaviy muloqot tajribasini qisqartirishi mumkin. Shuningdek, avlodlararo aloqalarning zaiflashuvi natijasida oilaviy xotira, urf-odat va an’analarni uzatish mexanizmlari o‘zgarishi ehtimoli mavjud. Ayrim holatlarda ota-onaning farzandga haddan tashqari individual e’tibori ortiqcha himoyachilik yoki individualizmning kuchayishiga olib kelishi mumkin. Demak, kichik oila modeli imkoniyatlar bilan birga muayyan ijtimoiy-pedagogik va ma’naviy cheklovlarni ham o‘zida mujassam etadi.

“Kichik oila modeli zamonaviy jamiyatda er-xotin va ularning farzandlaridan iborat nisbatan ixcham oilaviy tuzilmani anglatib, demografik, iqtisodiy, ijtimoiy va ma’naviy jarayonlarning o‘zgarishi bilan bog‘liq holda shakllangan. Mazkur modelning rivojlanishi urbanizatsiya, mehnat migratsiyasi, ayollarning ijtimoiy faolligi, ta’lim darajasining oshishi, individual tanlov va turmush tarzining diversifikatsiyasi kabi omillar bilan chambarchas bog‘liq. Kichik oila modeli jamiyat va shaxs taraqqiyoti uchun muayyan imkoniyatlar yaratishi bilan birga, ayrim ijtimoiy va ma’naviy cheklovlarni ham yuzaga keltiradi”[8]. Avvalo, kichik oilaning shaxs rivoji uchun muhim imkoniyati oiladagi resurslarning nisbatan kam sonli a’zolar o‘rtasida taqsimlanishidir. Farzandlar sonining kamligi ota-onaga har bir bolaning ta’limi, sog‘lom rivojlanishi, qiziqishlari va individual ehtiyojlariga ko‘proq e’tibor qaratish imkonini beradi. Natijada bolaning intellektual salohiyati, mustaqil fikrlashi, kasbiy yo‘nalishi va ijtimoiy kompetensiyalarini rivojlantirish uchun qulay sharoit shakllanishi mumkin. Shuningdek, ota-onalar farzand tarbiyasida zamonaviy pedagogik va psixologik yondashuvlardan foydalanishga ko‘proq vaqt va imkoniyat topadilar.

Kichik oila iqtisodiy jihatdan ham muayyan afzalliklarga ega. Oilaning daromadlari kamroq a’zolar o‘rtasida taqsimlanganligi sababli uy-joy, ta’lim, sog‘liqni saqlash, madaniy hordiq va boshqa ehtiyojlarga ko‘proq mablag‘ yo‘naltirish imkoniyati paydo bo‘ladi. Bu esa oilaning moddiy barqarorligini mustahkamlab, uning inson kapitaliga investitsiya qilish salohiyatini oshiradi. Jamiyat miqyosida esa kichik oila modeli aholi soni o‘sishining nisbatan muvozanatli kechishiga, mehnat resurslari va ijtimoiy infratuzilmaga tushadigan bosimni boshqarishga yordam berishi mumkin. Bundan tashqari, kichik oila shaxsiy erkinlik va individual rivojlanish uchun kengroq imkoniyat yaratadi. Oila a’zolari kasbiy faoliyat, ta’lim, ijod, tadbirkorlik va ijtimoiy faoliyat bilan shug‘ullanishga ko‘proq vaqt ajratishi mumkin. Ayniqsa, ayollarning ta’lim olishi va mehnat bozoridagi ishtiroki uchun kichik oila modeli qo‘shimcha imkoniyatlar yaratadi.

Biroq ushbu modelning cheklovlari ham mavjud. Eng avvalo, farzandlar sonining kamligi oiladagi avlodlararo munosabatlarning torayishiga olib kelishi mumkin. Bola aka-uka yoki opa-singillar bilan doimiy muloqot qilish imkoniyatidan mahrum bo‘lsa, hamkorlik, murosa, o‘zaro yordam va jamoaviy mas’uliyat kabi ijtimoiy ko‘nikmalarni shakllantirish asosan tashqi ijtimoiy muhitga bog‘liq bo‘lib qoladi. Shuningdek, kichik oilada ota-onaning farzandga haddan tashqari e’tibori uning mustaqilligi va mas’uliyatini rivojlantirishga salbiy ta’sir ko‘rsatishi mumkin. Jamiyat nuqtayi nazaridan esa kichik oilalarning keng tarqalishi tug‘ilish darajasining pasayishi va aholining qarishi kabi demografik muammolarni kuchaytirishi mumkin. Keksalarni parvarish qilish yukining kam sonli farzandlar zimmasiga tushishi, avlodlar o‘rtasidagi ijtimoiy aloqalarning zaiflashishi ham ehtimoliy cheklovlardan biridir. Shunday qilib, kichik oila modeli o‘z mohiyatiga ko‘ra na mutlaq ijobiy, na mutlaq salbiy hodisadir. Uning samaradorligi oiladagi tarbiya sifati,

ma’naviy-axloqiy qadriyatlar, davlatning ijtimoiy siyosati va jamiyatdagi avlodlararo hamkorlik tizimiga bog‘liq. Asosiy vazifa kichik oilaning iqtisodiy va shaxsiy rivojlanish imkoniyatlarini saqlagan holda, uning ma’naviy, ijtimoiy va demografik cheklovlarini kamaytirishdan iborat.

“Globallashuv va modernizatsiya jarayonlari zamonaviy jamiyatning ijtimoiy tuzilmasi, qadriyatlar tizimi, turmush tarzi hamda shaxslararo munosabatlariga sezilarli ta’sir ko‘rsatmoqda. Mazkur jarayonlar ta’sirida oilaning an’anaviy shakllari ham transformatsiyaga uchrab, kichik oila modeli tobora keng tarqalgan ijtimoiy hodisaga aylandi. Ushbu transformatsiya faqat oila a’zolari sonining kamayishi bilan emas, balki oilaning funksiyalari, ichki munosabatlari, gender rollari, farzand tarbiyasi va ma’naviy-axloqiy qadriyatlarining yangicha mazmun kasb etishi bilan ham tavsiflanadi”[9]. Modernizatsiya, avvalo, urbanizatsiya, sanoatlashuv, ta’limning ommalashuvi va mehnat bozorining diversifikatsiyasi orqali kichik oila modelining shakllanishiga ta’sir ko‘rsatadi. Shaharlashuv sharoitida uy-joy, bandlik va iqtisodiy xarajatlarning ortishi ko‘p farzandli oilaga nisbatan kichik oilani iqtisodiy jihatdan qulayroq model sifatida namoyon etadi. Shu bilan birga, ota-onalarning farzandlar sonidan ko‘ra ularning ta’limi, sog‘lom rivojlanishi va kelajakdagi ijtimoiy mavqeiga ko‘proq e’tibor qaratishi kuzatiladi.

“Globallashuv esa oilaviy qadriyatlarning madaniy almashinuv va axborot-kommunikatsiya texnologiyalari orqali transformatsiyasini jadallashtirmoqda. Internet, ijtimoiy tarmoqlar va ommaviy madaniyat turli jamiyatlardagi oilaviy hayot shakllarini keng namoyish etib, shaxslarning nikoh, farzandlik, gender tengligi va shaxsiy erkinlik haqidagi tasavvurlarini o‘zgartirmoqda. Oilada an’anaviy ierarxik munosabatlardan sheriklik, o‘zaro kelishuv va individual mas’uliyatga asoslangan munosabatlarga o‘tish kuchayishiga olib keldi”[10]. Kichik oila transformatsiyasining muhim jihatlaridan biri gender rollarining qayta taqsimlanishidir. Zamonaviy sharoitda ayollarning oliy ta’lim olishi, kasbiy faoliyat va tadbirkorlikdagi ishtiroki ortib, oilaviy vazifalarni faqat bir jins zimmasiga yuklash o‘rniga er-xotin o‘rtasida hamkorlik tamoyili rivojlanadi. Biroq transformatsiya ayrim xavflarni ham yuzaga keltiradi. Individualizmning kuchayishi, iste’molchilik qadriyatlarining ustuvorligi, avlodlararo aloqalarning susayishi va raqamli muhitning oilaviy muloqotga ta’siri oilaning ma’naviy-axloqiy barqarorligiga muayyan bosim yaratadi. Shunday qilib, globallashuv va modernizatsiya sharoitida kichik oila modeli an’anaviylik va zamonaviylik, jamoaviylik va individualizm, moddiy manfaat va ma’naviy mas’uliyat o‘rtasidagi muvozanat izlash jarayonida transformatsiyalanmoqda. Mazkur jarayonning ijobiy natijasi oilaning moslashuvchanligi va shaxs rivoji imkoniyatlarini kengaytirish bilan belgilanadi.

XULOSA. Kichik oila modeli zamonaviy jamiyatning demografik, iqtisodiy, ijtimoiy va ma’naviy o‘zgarishlari ta’sirida shakllangan murakkab ijtimoiy hodisa hisoblanadi. Tadqiqot natijalari shuni ko‘rsatadiki, kichik oilaning rivojlanishi faqat farzandlar sonining kamayishi bilan cheklanmay, balki oilaviy qadriyatlar, nikoh munosabatlari, ota-onalik mas’uliyati, gender rollari va shaxsning ijtimoiylashuvi mazmunidagi o‘zgarishlarni ham ifodalaydi. Uning evolyutsiyasi an’anaviy ko‘p avlodli oiladan zamonaviy, nisbatan ixcham va individual ehtiyojlarga yo‘naltirilgan oilaviy modelga o‘tish jarayonini aks ettiradi. Shu bilan birga, kichik oila modeli shaxsga ta’lim, tarbiya va individual rivojlanish uchun qo‘shimcha imkoniyatlar yaratishi bilan bir qatorda, avlodlararo aloqalarning zaiflashuvi, demografik muvozanat va ijtimoiy qo‘llab-quvvatlash bilan bog‘liq ayrim cheklovlarni ham yuzaga keltiradi. Demak, kichik oila modelini jamiyat taraqqiyotining obyektiv tendensiyasi sifatida baholash bilan birga, uning ijtimoiy-ma’naviy barqarorligini ta’minlash muhim ahamiyat kasb etadi.

AMALIY TAKLIFLAR. Oilaviy-ma’rifiy dasturlarni takomillashtirish orqali, yoshlarni kichik oila sharoitida mas’uliyatli nikoh, ongli ota-onalik, farzand tarbiyasi va oilaviy qadriyatlar masalalariga tayyorlashga yo‘naltirilgan maxsus ma’rifiy dasturlarni ishlab chiqish.

- Avlodlararo munosabatlarni mustahkamlash natijasida, kichik oilalarda katta avlod tajribasi va zamonaviy yoshlar qarashlarini uyg‘unlashtiruvchi “avlodlar muloqoti” loyihalarini joriy etish hamda oilaviy an’analarni davom ettirish mexanizmlarini rivojlantirish.

- Oilalarni ijtimoiy qo‘llab-quvvatlashni kuchaytirish. Yosh oilalarning uy-joy, bandlik, ta’lim, tibbiy xizmat va bolalar tarbiyasi bilan bog‘liq ehtiyojlarini hisobga olgan holda kompleks ijtimoiy-iqtisodiy qo‘llab-quvvatlash choralarini takomillashtirish.

- Kichik oilaning ijtimoiy-ma’naviy monitoringini yo‘lga qo‘yish. Kichik oila modelining shaxs ma’naviy-axloqiy rivoji, farzand tarbiyasi, ijtimoiylashuv va avlodlararo munosabatlarga ta’sirini muntazam o‘rganish uchun sotsiologik monitoring tizimini shakllantirish.

KORRUPSIYAGA MUNOSABATDA INSONNING AXLOQIY POZITSIYASI: ONG, IRODA VA MAS'ULIYAT MUAMMOSI

Abdullayev Bobomurod Jo'rayevich
Qo'riqlash bosh boshqarmasi bo'lim boshlig'i
E-mail: abobomurod187@gmail.com

Annotatsiya: *Mazkur maqolada korrupsiyaga munosabatning inson axloqiy pozitsiyasi bilan bog'liq ijtimoiy-falsafiy jihatlari tahlil qilinadi. Korrupsion xatti-harakatning shakllanishida inson ongi, axloqiy tanlovi, irodasi va mas'uliyatining o'zaro dialektik aloqasi ochib beriladi. Korrupsiyaga qarshi kurashni faqat huquqiy va institutsional mexanizmlar bilan cheklab qo'yish yetarli emasligi, uning barqaror samaradorligi shaxsda halollik, adolat, vijdon, burch va fuqarolik mas'uliyati kabi qadriyatlarning ichki e'tiqodga aylanishiga bog'liqligi asoslanadi.*

Kalit so'zlar: *korrupsiya, axloqiy pozitsiya, ong, iroda, mas'uliyat, axloqiy tanlov, halollik, adolat, vijdon, fuqarolik mas'uliyati, antikorrupsiya madaniyati, ma'naviy immunitet.*

КОРРУПЦИЯ И НРАВСТВЕННАЯ ПОЗИЦИЯ ЧЕЛОВЕКА: ПРОБЛЕМА СОЗНАНИЯ, ВОЛИ И ОТВЕТСТВЕННОСТИ

Аннотация: *В статье анализируются социально-философские аспекты отношения к коррупции во взаимосвязи с нравственной позицией человека. Раскрывается диалектическая взаимосвязь сознания, нравственного выбора, воли и ответственности человека в формировании коррупционного поведения. Обосновывается, что ограничение борьбы с коррупцией исключительно правовыми и институциональными механизмами недостаточно; её устойчивая эффективность во многом зависит от превращения таких ценностей, как честность, справедливость, совесть, долг и гражданская ответственность, во внутренние убеждения личности.*

Ключевые слова: *коррупция, нравственная позиция, сознание, воля, ответственность, нравственный выбор, честность, справедливость, совесть, гражданская ответственность, антикоррупционная культура, духовный иммунитет.*

THE MORAL POSITION OF THE INDIVIDUAL TOWARDS CORRUPTION: THE PROBLEM OF CONSCIOUSNESS, WILL AND RESPONSIBILITY

Abstract: *This article analyzes the socio-philosophical aspects of attitudes toward corruption in relation to the moral position of the individual. It reveals the dialectical interrelationship of human consciousness, moral choice, will, and responsibility in the formation of corrupt behavior. The study substantiates that limiting the fight against corruption solely to legal and institutional mechanisms is insufficient; its sustainable effectiveness largely depends on transforming such values as honesty, justice, conscience, duty, and civic responsibility into the individual's internal convictions.*

Keywords: *corruption, moral position, consciousness, will, responsibility, moral choice, honesty, justice, conscience, civic responsibility, anti-corruption culture, moral immunity.*

Kirish. Globallashuv, raqamlashtirish, institutsional transformatsiya va ijtimoiy munosabatlarning tobora murakkablashib borishi sharoitida korrupsiya fenomeni zamonaviy jamiyat taraqqiyotining barqarorligiga tahdid soluvchi ko'p qatlamli ijtimoiy hodisa sifatida namoyon bo'lmoqda. Uning xavfliligi faqat davlat yoki xo'jalik boshqaruvida vakolatlarning suiiste'mol qilinishi, moddiy manfaatlarning noqonuniy tarzda o'zlashtirilishi yoxud huquqiy normalarning buzilishi bilan cheklanmaydi; korrupsiya, eng avvalo, jamiyatning axloqiy me'yorlari, adolat haqidagi tasavvurlari, fuqarolik mas'uliyati, institutsional ishonch va shaxsning o'z xatti-harakatlariga bergan ichki bahosi bilan bog'liq bo'lgan murakkab ma'naviy-ijtimoiy deformatsiya sifatida qaralishi lozim. Shu ma'noda korrupsiyaga munosabat masalasini insonning axloqiy pozitsiyasi, uning ongi, irodasi, erkin tanlovi va mas'uliyati bilan uzviy aloqadorlikda tadqiq etish masalaning huquqiy yoki iqtisodiy doirasidan chiqib, uni ijtimoiy falsafa va etikaning fundamental muammolaridan

biri sifatida talqin qilish imkonini beradi. Isomiddinovning korrupsiyaga qarshi kurashish madaniyatiga bag‘ishlangan doktorlik tadqiqotida mazkur hodisa “postmodern sotsiumning eng global destruktiv muammolaridan biri” sifatida baholanib, korrupsiyaning nafaqat iqtisodiy, balki ijtimoiy, siyosiy va ma’naviy hayotga destruktiv ta’sir ko‘rsatishi alohida ta’kidlanadi [1, 5–7-b.]. Mazkur fikrning e’tiborga molik jihati shundaki, muallif korrupsiyani alohida huquqbuzarliklar yig‘indisi tarzida emas, balki jamiyatning ichki institutsional va qadriyaviy muvozanatini izdan chiqaruvchi tizimli hodisa sifatida ko‘radi. Professorlik nuqtayi nazaridan qaralganda, aynan shu metodologik yondashuv korrupsiyaga munosabatning subyektiv-axloqiy tomonini tadqiq etish uchun nazariy poydevor yaratadi: agar korrupsiya jamiyatning axloqiy va institutsional negizlarini yemiruvchi hodisa bo‘lsa, unga qarshi immunitetni faqat tashqi nazorat va jazo vositalari bilan emas, balki shaxsning ichki axloqiy mezonlari orqali ham shakllantirish zarur bo‘ladi. Isomiddinov tadqiqotida O‘zbekistonda korrupsiyaga qarshi kurashning huquqiy-institutsional mexanizmlari bilan bir qatorda “inson qadr-qimmatini e’zozlaydigan ijtimoiy boshqaruv mexanizmlari”ni qaror toptirish zarurligi qayd etiladi [1, 5–6-b.]. Bu yondashuv korrupsiyaga qarshi siyosatning antropotsentrik mohiyatini ochib beradi: davlat boshqaruvi samaradorligi oxir-oqibat uni amalga oshirayotgan insonning axloqiy sifati, mas’uliyat hissi va jamoat manfaatiga munosabati bilan belgilanadi. Demak, korrupsiyaga qarshi kurashning strategik markazida “korrupsiyani qanday jazolash kerak?” degan savol bilan bir qatorda “inson nima sababdan korrupsion tanlovni amalga oshiradi yoki undan voz kechadi?” degan etik-falsafiy savol ham turishi lozim. Mazkur masalaning dolzarbligi O‘zbekiston Respublikasining korrupsiyaga qarshi siyosatida ham yaqqol namoyon bo‘ladi. “Korrupsiyaga qarshi kurashish to‘g‘risida”gi O‘RQ–419-son Qonunda korrupsiyaga qarshi kurashishning asosiy yo‘nalishlari sifatida qonuniylik, fuqarolar huquq va manfaatlarining ustuvorligi, ochiqlik va shaffoflik, davlat va fuqarolik jamiyati hamkorligi, korrupsiyaning oldini olishga doir chora-tadbirlarning ustuvorligi hamda javobgarlikning muqarrarligi kabi prinsiplar belgilangan. Biroq mazkur prinsiplarning amaliy samaradorligi ularning faqat normativ-huquqiy hujjatlarda mavjudligi bilan emas, balki shaxs ongida axloqiy e’tiqodga aylanish darajasi bilan belgilanadi. Chunki qonun tashqi xatti-harakat chegarasini belgilashi mumkin, biroq insonning ichki motivini, manfaatlar to‘qnashuvi sharoitida qiladigan tanlovini va vijdoniy qarorini to‘liq boshqara olmaydi. Shu nuqtayi nazardan korrupsiyaga qarshi barqaror pozitsiyaning shakllanishi “qonuniy talab”dan “axloqiy e’tiqod”ga, “tashqi nazorat”dan “ichki o‘zini nazorat qilish”ga, “jazodan qo‘rqish”dan “adolatsizlikni rad etish”ga o‘tish jarayonini anglatadi. Aynan mana shu o‘tish korrupsiyaga munosabatda insonning axloqiy pozitsiyasi shakllanganligini ko‘rsatuvchi eng muhim mezondir.

Mazkur nazariy muammoning yana bir muhim jihati shundan iboratki, korrupsiyaga qarshi ongni oddiy huquqiy bilim bilan tenglashtirish ilmiy jihatdan yetarli emas. Inson korrupsiyaning qonunga zid ekanligini bilishi mumkin, biroq shaxsiy manfaat, ijtimoiy bosim, qarindoshlik munosabatlari, tanish-bilishchilik, moddiy ehtiyoj yoki lavozimiy manfaat ta’sirida ushbu bilimga zid qaror qabul qilishi ehtimoli mavjud. Demak, bilim va xatti-harakat o‘rtasida axloqiy baholash hamda iroda vositachilik qiladi. B. Abdullayevning O‘zbekiston yoshlarining korrupsiyaga munosabatiga bag‘ishlangan ijtimoiy-falsafiy tadqiqotida aynan shu masala alohida konseptual darajada qo‘yilgan bo‘lib, muallif korrupsiyaga munosabatni “inson ongi, erk va axloqiy mas’uliyat kategoriyalari uyg‘unligida” tahlil qiladi [4, 8–9-b.]. Muallifning mazkur yondashuvida e’tiborga molik jihat shundaki, korrupsion xatti-harakat shaxsdan tashqarida sodir bo‘ladigan mexanik jarayon emas, balki insonning qadriyatlar tizimi, erkinligi va axloqiy tanlovi bilan bog‘liq individual qaror sifatida talqin qilinadi. Tadqiqotda “korrupsiyaga munosabat shakllanishi” uch bosqichli jarayon — ijtimoiy me’yorni anglash, uni axloqiy baholash va amaliy qaror qabul qilish — tarzida izohlanadi [4, 13-b.]. Muallifning “axloqiy baholash — korrupsiyaga qarshi ichki qarshilikni belgilaydigan hal qiluvchi omil” degan xulosasi ayniqsa muhimdir [4, 13-b.]. Ushbu fikrni rivojlantirib aytish mumkinki, korrupsiyaga qarshi axloqiy pozitsiya insonning shunchaki “nima to‘g‘ri?” degan savolga javob topishi bilan emas, balki “men uchun foydali bo‘lgan, biroq jamiyat uchun adolatsiz bo‘lgan harakatni amalga oshirishdan voz kecha olamanmi?” degan real axloqiy vaziyatdagi tanlovi bilan namoyon bo‘ladi. Shuning uchun korrupsiyaga qarshi kurashning eng chuqur darajasi huquqiy bilimni oshirish emas, balki shaxsning axloqiy refleksiyasi va irodaviy barqarorligini rivojlantirish bilan belgilanadi.

Bu jihatni Immanuil Kantning axloqiy falsafasi bilan bog‘lash ham metodologik jihatdan asosli. Abdullayev Kantning qarashlarini sharhlar ekan, insonni “maqsad sifatida mavjud bo‘lgan subyekt” sifatida talqin qiladi va shaxsiy manfaatni umumiy axloqiy qonundan ustun qo‘yish inson qadrini inkor etishga olib kelishini ta’kidlaydi [4, 13-b.]. Ushbu fikr korrupsiyaning axloqiy mohiyatini ochishda nihoyatda muhim nazariy imkoniyat beradi: korrupsion xatti-harakatda boshqa inson, jamiyat yoki davlat manfaatlari shaxsiy manfaatga bo‘ysundiriladi, ya’ni insonning universal axloqiy maqomi vositaga aylantiriladi. Shu sababli korrupsiyani faqat “qonun buzilishi” sifatida emas, balki inson qadrini instrumentalizatsiya qilish, umumiy manfaatni xususiy manfaatga bo‘ysundirish va adolatning universal mezonini shaxsiy foyda mezoniga almashtirish sifatida baholash mumkin. Bu esa mavzuni bevosita etikaning burch, vijdon, adolat, erkinlik va mas’uliyat kategoriyalari bilan bog‘laydi.

Korrupsiyaga munosabatning axloqiy tabiatini tushuntirishda Habibullayevning tadqiqoti ham alohida ilmiy ahamiyatga ega. Ma’rufjon Habibullayevning “Yangi O‘zbekistonda korrupsiyaga qarshi kurashning ma’naviy-ma’rifiy

omillari: ijtimoiy-falsafiy tahlil” nomli PhD avtoreferatida korrupsiya muammosi ma’naviy-ma’rifiy omillar bilan bog‘liq holda tadqiq etilgan [2, 3–6-b.]. Ushbu tadqiqotning mavzuga bevosita aloqador jihati shundaki, muallif korrupsiyaga qarshi kurashni ma’naviy tarbiya, ta’lim, axloqiy qadriyatlar va ijtimoiy ong transformatsiyasi bilan bog‘laydi. Tadqiqotda korrupsiyaning “buzish, pora evaziga og‘dirish” ma’nosini anglatadigan *corruptio* tushunchasidan kelib chiqishi qayd etiladi va uning tizimli xarakteri alohida tahlil qilinadi [2, 12-b.]. Habibullayev A.I. Kirpichnikovning korrupsiyaga bergan “korrupsiya — hokimiyatning chirishi” degan axloqiy-falsafiy ta’rifini keltiradi [2, 12-b.]. Mazkur metaforaning ilmiy ahamiyati nihoyatda yuqori: “chirishi” tushunchasi korrupsiyani bir martalik huquqbuzarlik emas, balki hokimiyat instituti va jamiyatning axloqiy to‘qimalarini asta-sekin yemiruvchi jarayon sifatida anglash imkonini beradi. Metallning zanglashi qanday qilib tashqi ko‘rinishda kichik nuqta sifatida boshlanib, keyinchalik butun konstruksiyaning mustahkamligini yemirsa, korrupsion amaliyot ham dastlab “kichik imtiyoz”, “tanish orqali hal qilish”, “ishga kirishga yordam”, “sovg‘a” yoki “xizmat uchun minnatdorchilik” kabi ijtimoiy jihatdan yumshatilgan shakllarda namoyon bo‘lib, vaqt o‘tishi bilan noqonuniy xatti-harakatni normal holat sifatida qabul qiluvchi axloqiy muhitni vujudga keltirishi mumkin. Shu nuqtayi nazardan korrupsiyaga qarshi kurashning asosiy vazifasi faqat uning jinoyat shakllarini aniqlash emas, balki korrupsion xatti-harakatni ijtimoiy jihatdan oqlovchi va legitimlashtiruvchi axloqiy stereotiplarni bartaraf etishdan ham iboratdir. Habibullayevning tadqiqoti aynan shu ma’naviy-ma’rifiy profilaktika zaruratini asoslash bilan mavzuning nazariy chegaralarini kengaytiradi.

Soxibovning “Jamiyatda korrupsiya xavfsizligi: ijtimoiy-falsafiy tahlil” mavzusidagi PhD tadqiqoti esa masalaga shaxsiy axloqiy pozitsiya bilan bir qatorda ijtimoiy xavfsizlik va institutsional muhit nuqtayi nazaridan yondashish imkonini beradi [3, 3–6-b.]. Mazkur tadqiqot Farg‘ona davlat universitetida bajarilgan va PhD.03/30.04.2021.F.76.06 ilmiy kengashida himoya uchun tayyorlangan avtoreferat sifatida rasmiylashtirilgan [3, 3–4-b.]. Soxibovning e’tiborga molik xulosalaridan biri shundaki, korrupsiyaga qarshi kurashda rahbar kadrlar va davlat xizmatchilarida “halollik, vijdonlilik va mas’uliyat” kabi yuksak axloqiy fazilatlarni rivojlantirish zarur [3, 18-b.]. Bu fikr mavzuning “mas’uliyat” komponentini konkretlashtiradi. Mas’uliyat bu yerda faqat huquqiy javobgarlikning sinonimi emas; u vakolatni qabul qilgan shaxsning o‘z lavozimi, jamiyat, fuqarolar va davlat manfaatlari oldidagi axloqiy burchini anglashini bildiradi. Professorlik darajasidagi nazariy umumlashtirish shuni ko‘rsatadiki, mansab va vakolatning kengayishi bilan shaxsning axloqiy mas’uliyati ham mutanosib ravishda ortishi kerak. Chunki vakolat qanchalik katta bo‘lsa, shaxsning birgina noto‘g‘ri qarori shunchalik keng ijtimoiy oqibatlarni yuzaga keltirishi mumkin. Demak, korrupsiyaga qarshi siyosatda “mas’uliyatli shaxs” modelini shakllantirish huquqiy nazoratdan kam bo‘lmagan darajada muhimdir.

Soxibovning yana bir muhim ilmiy jihati korrupsiyaga qarshi kurashni faqat individual xulq-atvor masalasi sifatida emas, balki ijtimoiy institutlar faoliyati, manfaatlar to‘qnashuvi, ta’lim, huquqiy madaniyat va jamoatchilik nazorati bilan bog‘lashidadir. Tadqiqot natijalarida uzluksiz ta’lim tizimida huquqiy madaniyatni rivojlantirish, huquqiy ta’lim va tarbiya samaradorligini oshirish orqali jamiyatda korrupsiyaga nisbatan murosasiz munosabatni shakllantirish mumkinligi asoslanadi [3, 18-b.]. Bu yerda individual axloq va institutsional muhit o‘rtasidagi dialektik bog‘liqlik namoyon bo‘ladi: halol shaxs sog‘lom institutsional muhitni yaratadi, sog‘lom institutsional muhit esa halol xatti-harakatni rag‘batlantiradi. Aksincha, korrupsion munosabatlar normalizatsiyalashgan muhitda halol pozitsiyani egallash shaxs uchun ijtimoiy va psixologik jihatdan murakkablashadi. Shuning uchun korrupsiyaga qarshi axloqiy pozitsiyani shakllantirishni faqat shaxsni tarbiyalashga yuklash ham metodologik jihatdan biryoqlama bo‘ladi; bunda shaxs — ijtimoiy muhit — institut — qadriyatlar tizimining o‘zaro ta’sirini hisobga olish zarur.

Mazkur fikr Isomiddinovning korrupsiyaga qarshi kurashish madaniyati haqidagi konsepsiyasi bilan hamohangdir. U korrupsiyaga qarshi kurashning samaradorligini fuqarolik jamiyati, ochiqlik, jamoatchilik nazorati va ma’naviy qadriyatlar bilan bog‘laydi hamda korrupsiyaning oldini olishda profilaktik yondashuvning ahamiyatini asoslaydi [1, 5–7-b.]. Isomiddinov tomonidan ishlab chiqilgan yondashuvning muhim tomoni shundaki, korrupsiyaga qarshi kurashni “korrupsiya sodir bo‘lgandan keyingi javob reaksiyasi” darajasidan “korrupsiyani yuzaga keltiruvchi ijtimoiy-ma’naviy shart-sharoitlarni oldindan bartaraf etish” darajasiga ko‘taradi. Bunday yondashuv mavzudagi insonning axloqiy pozitsiyasi bilan bevosita tutashadi: agar korrupsiyaning ildizlaridan biri qadriyatlar deformatsiyasi bo‘lsa, unda korrupsiyaga qarshi strategiyaning asosiy obyekti faqat korrupsion akt emas, balki ushbu aktni axloqan maqbul deb ko‘rsatuvchi ong va ijtimoiy muhit ham bo‘lishi kerak.

Shaxsning axloqiy pozitsiyasi masalasida vijdon kategoriyasining o‘rni ham alohida ta’kidlanishi lozim. Vijdon insonning tashqi nazorat mavjud bo‘lmagan sharoitda ham o‘z xatti-harakatlarini ichki axloqiy mezon asosida baholash imkonini beruvchi ma’naviy mexanizmdir. Agar qonun “mumkin” va “mumkin emas”ning tashqi chegarasini belgilasa, vijdon “men buni qilishim kerakmi?” degan ichki savolni qo‘yadi. Shu sababli korrupsiyaga qarshi haqiqiy axloqiy immunitet qonuniy jazodan qo‘rqishdan yuqoriroq darajada — insonning o‘z qadrini, kasbiy sha’nini va jamiyat oldidagi burchini anglashida shakllanadi. Abdullayevning tadqiqotida V.V. Kiselevga tayanib, korrupsion qarorlarning “ichki axloqiy nazorat mexanizmlari zaifligi” bilan bog‘liqligi qayd etiladi [4, 13-b.]. Ushbu qarash mavzuning markaziy ilmiy g‘oyasini kuchaytiradi: korrupsiyaga qarshi kurashda huquqiy savodxonlik zarur, biroq u yetarli shart emas; huquqiy

bilimni axloqiy e'tiqodga aylantiruvchi ichki nazorat mexanizmlari — vijdon, burch, mas'uliyat, adolat hissi va iroda — mavjud bo'lmasa, bilim real xulq-atvorga transformatsiyalanmasligi mumkin.

Shu nuqtayi nazardan iroda korrupsiyaga qarshi axloqiy pozitsiyaning faol komponenti sifatida namoyon bo'ladi. Inson korrupsiyani axloqan noto'g'ri deb bilishi, uning jamiyatga zararini anglashi va hatto uni qoralashi mumkin; biroq real manfaatlar to'qnashuvi yuzaga kelgan vaziyatda ana shu bilimni amaliy qarorga aylantirish uchun iroda talab etiladi. Iroda insonning tashqi bosim, moddiy manfaat, guruhiy talab yoki mansabiy manfaatga qaramay, o'zining axloqiy e'tiqodiga muvofiq qaror qabul qilish qobiliyatidir. Shuning uchun korrupsiyaga qarshi tarbiya faqat axborot beruvchi xarakterda emas, balki shaxsni axloqiy dilemmalar sharoitida mustaqil qaror qabul qilishga tayyorlovchi xarakterda bo'lishi lozim. Bu jihat ayniqsa yoshlar tarbiyasida muhimdir. Abdullayev tadqiqotida yoshlarning korrupsiyaga munosabati milliy qadriyatlar, ta'lim muhiti, ommaviy axborot vositalari va virtual muhitning o'zaro ta'siri bilan bog'liq holda tahlil qilinib, mazkur omillarning yoshlar dunyoqarashini shakllantirishdagi roli asoslanadi [4, 17-b.]. Demak, axloqiy pozitsiya individual psixologik hodisa bo'lish bilan birga, ijtimoiylashuv jarayonida shakllanadigan qadriyaviy konstruktsiya hamdir.

Bu jihatdan ta'lim tizimining roli alohida strategik ahamiyat kasb etadi. Habibullayevning tadqiqotida ma'naviy-ma'rifiy omillar korrupsiyaga qarshi kurashning profilaktik resursi sifatida ko'riladi [2, 5–6-b.]. Uning yondashuvida ta'limning vazifasi faqat korrupsiya to'g'risidagi huquqiy bilimlarni yetkazishdan iborat emas; u shaxsda halollik, adolat, vijdon, burch, mas'uliyat va fuqarolik pozitsiyasini shakllantiradigan ma'naviy muhitni yaratishi kerak. Shu nuqtayi nazardan "antikorrupsiya ta'limi" tushunchasini kengaytirib, uni axloqiy tafakkurni shakllantirish instituti sifatida talqin qilish maqsadga muvofiq. Ya'ni talaba korrupsiyaning huquqiy oqibatlarini bilishi bilan birga, nima sababdan korrupsiya adolatga zid, nima sababdan shaxsiy manfaatni jamoat manfaatidan ustun qo'yish axloqiy jihatdan nomaqbul, nima sababdan korrupsion amaliyotga befarq qolish ham fuqarolik mas'uliyati nuqtayi nazaridan muammoli ekanligini mustaqil ravishda anglay olishi zarur. Shundagina axloqiy bilim ijtimoiy e'tiqodga, e'tiqod esa barqaror xulq-atvorga aylanadi.

Korrupsiyaga munosabatning shakllanishida zamonaviy axborot va virtual muhitning ta'siri ham tobora kuchayib bormoqda. Tadqiqotimizda ta'lim, ommaviy axborot vositalari va virtual makon yoshlar axloqiy pozitsiyasini shakllantiruvchi o'zaro bog'liq institutsional omillar sifatida ko'rsatiladi [4, 19-b.]. Virtual muhitning ikkiyoqlama xususiyati shundaki, u bir tomondan ochiqlik, shaffoflik, jamoatchilik nazorati va korrupsion holatlarni fosh etish imkoniyatlarini kengaytirsa, ikkinchi tomondan anonimlik va mas'uliyatning nisbatan susayishi kabi xavflarni ham yuzaga chiqarishi mumkin [4, 19-b.]. Shu sababli raqamli makonni faqat texnologik vosita sifatida emas, balki zamonaviy axloqiy ijtimoiylashuv makoni sifatida baholash zarur. Bugungi yosh inson korrupsiya, halollik, adolat va fuqarolik mas'uliyati haqidagi tasavvurlarni nafaqat oila va ta'lim muassasasidan, balki ijtimoiy tarmoqlar, bloglar, videoplatformalar va virtual jamoalardan ham oladi. Demak, antikorrupsiya madaniyatining zamonaviy modeli raqamli kommunikatsiya muhitining axloqiy salohiyatini ham hisobga olishi kerak.

Umuman, mavjud ilmiy manbalar tahlili shuni ko'rsatadiki, korrupsiyaga qarshi kurashning samaradorligi uch o'zaro bog'liq darajaning birligiga tayanadi: institutsional daraja — qonun, nazorat, ochiqlik va javobgarlik mexanizmlari; ijtimoiy-ma'naviy daraja — ta'lim, qadriyatlar, jamoatchilik fikri va ijtimoiy muhit; individual-axloqiy daraja — ong, vijdon, iroda, axloqiy tanlov va mas'uliyat. Mazkur uchlikdan birortasining zaifligi umumiy antikorrupsiya strategiyasining samaradorligini pasaytiradi. Faqat jazoga asoslangan tizim insonning ichki axloqiy motivlarini shakllantira olmaydi; faqat ma'naviy targ'ibotga asoslangan yondashuv esa institutsional nazoratning zarurligini inkor eta olmaydi. Shuning uchun korrupsiyaga qarshi kurashning optimal modeli tashqi va ichki nazoratning, huquq va axloqning, institut va shaxsning, jazo va profilaktikaning dialektik birligiga asoslanishi lozim. Aynan shu nuqtada insonning axloqiy pozitsiyasi korrupsiyaga qarshi siyosatning yakuniy maqsadi sifatida emas, balki uning barqaror ijtimoiy natijasini ta'minlovchi ichki mexanizm sifatida namoyon bo'ladi. Boshqacha aytganda, korrupsiyasiz jamiyatni faqat korrupsion xatti-harakatlarni aniqlash va jazolash orqali barpo etib bo'lmaydi; bunday jamiyatni shakllantirish uchun halollikni tashqi majburiyat emas, ichki e'tiqod; adolatni abstrakt tamoyil emas, kundalik xulq-atvor mezoni; mas'uliyatni jazodan qochish vositasi emas, insonning o'z erkinligi va tanlovining tabiiy oqibati sifatida anglaydigan shaxsni tarbiyalash zarur. Shu ma'noda korrupsiyaga munosabatda insonning axloqiy pozitsiyasi ongda anglangan qadriyatning iroda orqali tanlovga, tanlovning esa mas'uliyatli xatti-harakatga aylanish jarayoni sifatida talqin qilinishi mumkin. Mazkur konseptual yondashuv korrupsiyaga qarshi kurashni faqat huquqiy yoki boshqaruv muammosi sifatida emas, balki insonning ma'naviy kamoloti, axloqiy erkinligi va jamiyat oldidagi mas'uliyatini namoyon etuvchi fundamental ijtimoiy-falsafiy muammo sifatida tadqiq etish zaruratini belgilaydi.

Mavzuga oid adabiyotlarning tahlili (Literature review). Korrupsiya fenomeni, uning ijtimoiy-falsafiy mohiyati va unga nisbatan shaxsning axloqiy munosabati masalalari mahalliy va xorijiy tadqiqotchilar tomonidan turli metodologik yondashuvlar asosida o'rganilgan. Xususan, Yu.Yu. Isomiddinov tadqiqotlarida korrupsiyaga qarshi kurashish madaniyati, uning ijtimoiy-ma'naviy asoslari hamda jamiyatda korrupsiyaga nisbatan murosasiz munosabatni

shakllantirish masalalari yoritilgan. Muallif korrupsiyaga qarshi kurashni faqat huquqiy choralar bilan cheklamasdan, jamiyatning ma'naviy-axloqiy madaniyati va fuqarolik mas'uliyatini yuksaltirish bilan bog'laydi.

M.O. Habibullayevning tadqiqotlarida korrupsiyaga qarshi kurashning ma'naviy-ma'rifiy omillari, ta'lim-tarbiya jarayoni hamda shaxsning axloqiy fazilatlarini rivojlantirish masalalariga alohida e'tibor qaratilgan. S.A. Soxibov esa korrupsiyani ijtimoiy xavfsizlik va jamiyat barqarorligiga tahdid soluvchi tizimli hodisa sifatida tahlil qilib, halollik, vijdonlilik va mas'uliyat kabi fazilatlarning korrupsiyaga qarshi immunitetni shakllantirishdagi ahamiyatini asoslaydi. O'zbekiston yoshlarining korrupsiyaga munosabati inson ongi, axloqiy mas'uliyat, erkin tanlov, milliy qadriyatlar, ta'lim va axborot muhiti bilan bog'liq holda tahlil qilingan. Muallifning yondashuvida korrupsiyaga munosabatning shakllanishi shaxsning ijtimoiy me'yorni anglashi, uni axloqiy baholashi va tegishli amaliy qaror qabul qilishi bilan izohlanadi. Mazkur yondashuv mavzuning insonning axloqiy pozitsiyasi bilan bog'liq jihatlarini ochib berishda muhim nazariy asos bo'lib xizmat qiladi.

Umuman, mavjud adabiyotlar tahlili korrupsiyaga qarshi kurashni faqat huquqiy yoki institutsional muammo sifatida emas, balki insonning axloqiy ongi, qadriyatlari, vijdoni, mas'uliyati va fuqarolik pozitsiyasi bilan bog'liq kompleks ijtimoiy-falsafiy hodisa sifatida o'rganish zarurligini ko'rsatadi. Biroq insonning axloqiy pozitsiyasi, ichki e'tiqodi va korrupsion vaziyatdagi axloqiy tanlovining o'zaro bog'liqligini yaxlit konseptual tizim sifatida tadqiq etish masalasi yanada chuqur ilmiy tahlilni talab etadi.

Tadqiqot metodologiyasi (Research Methodology). Tadqiqotda korrupsiyaga munosabatda insonning axloqiy pozitsiyasini ochib berish uchun dialektik, tizimli, aksiologik, ijtimoiy-falsafiy va qiyosiy tahlil metodlaridan foydalanildi. Shuningdek, ong, iroda, vijdon, mas'uliyat, axloqiy tanlov va fuqarolik pozitsiyasi tushunchalarining o'zaro bog'liqligi tahlil qilindi. Tadqiqotning metodologik asosini shaxsning axloqiy qarorlari bilan uning ijtimoiy muhiti, qadriyatlari va mas'uliyati o'rtasidagi dialektik munosabatni aniqlash tashkil etdi.

Tahlil va natijalar. (Analysis and results). Tadqiqot natijalari shuni ko'rsatadiki, korrupsiyaga munosabat insonning huquqiy bilimidan tashqari, uning axloqiy ongi, irodasi, vijdoni va mas'uliyat hissi bilan ham bevosita bog'liq. Shaxs korrupsion holatni anglash, unga axloqiy baho berish va undan voz kechish jarayonida o'zining ichki e'tiqodi hamda qadriyatlariga tayanadi.

Tahlil jarayonida ong korrupsiyaning mohiyati va oqibatlarini anglash, iroda noqonuniy manfaatdan voz kechish va to'g'ri tanlov qilish, mas'uliyat esa o'z xatti-harakatlarining ijtimoiy oqibatlarini anglash mexanizmi sifatida namoyon bo'lishi aniqlandi. Shu jihatdan korrupsiyaga qarshi barqaror pozitsiya shaxsning halollik, adolat, vijdon va qonuniylik kabi qadriyatlarni ichki e'tiqod darajasida qabul qilishi bilan shakllanadi.

Natijalar korrupsiyaning oldini olishda faqat jazolash va nazorat mexanizmlariga tayanish yetarli emasligini ko'rsatadi. Axloqiy tarbiya, huquqiy madaniyat, fuqarolik mas'uliyati va halollik qadriyatlarini mustahkamlash korrupsiyaga qarshi ongni shakllantirishning muhim shartlaridir. Shu asosda insonning axloqiy pozitsiyasi korrupsiyaga qarshi kurashning individual-axloqiy poydevori sifatida baholanishi mumkin.

Xulosa va takliflar (Conclusion/Recommendation). Xulosa qilib aytganda, korrupsiyaga qarshi kurash samaradorligi nafaqat huquqiy va institutsional mexanizmlarga, balki insonning axloqiy ongi, irodasi va mas'uliyatiga ham bevosita bog'liq. Korrupsiyaga nisbatan barqaror axloqiy pozitsiya halollik, adolat, vijdon, qonuniylik va fuqarolik mas'uliyati kabi qadriyatlarning shaxs ongida mustahkam qaror topishi asosida shakllanadi.

Inson korrupsion xatti-harakatning salbiy oqibatlarini anglab, manfaat va axloqiy burch o'rtasida to'g'ri tanlov qila olishi uning axloqiy yetukligining muhim ko'rsatkichidir. Shu sababli korrupsiyaning oldini olishda huquqiy choralar bilan bir qatorda axloqiy tarbiya, ma'naviy-ma'rifiy ta'lim va fuqarolik mas'uliyatini kuchaytirish muhim ahamiyat kasb etadi. Bunday yondashuv jamiyatda korrupsiyaga nisbatan murosasiz munosabatni shakllantirish va halollik tamoyillarini qaror toptirishning muhim sharti hisoblanadi.

YOSHLARNING IJTIMOIYLASHUVIGA SUBMADANIYATLARNING TA'SIRI

Raximova Dildora Abzalovna
Farg'ona davlat universiteti tadqiqotchisi
Fan va texnologiyalar universiteti "Ijtimoiy fanlar kafedrasi" katta o'qituchisi

Annotatsiya: *Mazkur maqolada submadaniyatlarning yoshlar ijtimoiylashuviga ta'siri ijtimoiy-falsafiy jihatdan tahlil qilinadi. Unda submadaniyatlarning yoshlar dunyoqarashi, qadriyatlari, xulq-atvori, ijtimoiy identifikatsiyasi va muloqot madaniyatini shakllantirishdagi o'rni yoritiladi. Shuningdek, yoshlarning submadaniy guruhlarga qo'shilish motivlari, ijtimoiy tajribani o'zlashtirish jarayoni hamda jamiyatdagi faolligiga ta'sir etuvchi omillar ochib beriladi. Raqamli muhitda shakllanayotgan virtual submadaniyatlarning ijobiy imkoniyatlari va salbiy ta'sirlari ham tahlil qilinadi. Tadqiqotda yoshlarning konstruktiv ijtimoiylashuvini ta'minlashda milliy va umuminsoniy qadriyatlar uyg'unligining ahamiyati asoslanadi.*

Kalit so'zlar: *submadaniyat, yoshlar, ijtimoiylashuv, qadriyat, identifikatsiya, xulq-atvor, muloqot, raqamli muhit, ijtimoiy faollik, moslashuv.*

ВЛИЯНИЕ СУБКУЛЬТУР НА СОЦИАЛИЗАЦИЮ МОЛОДЕЖИ

Аннотация: *В данной статье анализируется влияние субкультур на социализацию молодежи с социально-философской точки зрения. Подчеркивается роль субкультур в формировании мировоззрения, ценностей, поведения, социальной идентификации и культуры общения молодежи. Также раскрываются мотивы вступления молодых людей в субкультурные группы, процесс ассимиляции социального опыта и факторы, влияющие на их активность в обществе. Анализируются как позитивный потенциал, так и негативные последствия формирования виртуальных субкультур в цифровой среде. Исследование обосновывает важность гармонии национальных и универсальных ценностей в обеспечении конструктивной социализации молодежи.*

Ключевые слова: *субкультура, молодежь, социализация, ценности, идентификация, поведение, общение, цифровая среда, социальная активность, адаптация.*

THE INFLUENCE OF SUBCULTURES ON THE SOCIALIZATION OF YOUTH

Abstract: *This article analyzes the influence of subcultures on the socialization of youth from a socio-philosophical perspective. It highlights the role of subcultures in the formation of youth's worldview, values, behavior, social identification and culture of communication. It also reveals the motives of young people joining subcultural groups, the process of assimilating social experience and factors affecting their activity in society. The positive potential and negative effects of virtual subcultures forming in the digital environment are also analyzed. The study substantiates the importance of the harmony of national and universal values in ensuring the constructive socialization of youth.*

Keywords: *subculture, youth, socialization, values, identification, behavior, communication, digital environment, social activity, adaptation.*

KIRISH. Yoshlar submadaniyatlarining xilma-xilligi o'smirlar dunyoqarashini shakllantiruvchi ijtimoiy-madaniy muhit bo'lib, ushbu jarayonni chuqur o'rganish muhim ahamiyatga ega. O'smirlarning norasmiy guruhlarga qo'shilishi oiladagi nosog'lom muhit, o'qishdagi muvaffaqiyatsizliklar, o'zligini anglash ehtiyoji hamda ommaviy madaniyatning tashqi ta'siri kabi belgilovchi omillar bilan izohlanadi. Shuningdek, mazmunli dam olish imkoniyatlarining cheklanganligi va jamiyatdagi mavjud tartiblarga nisbatan norozilik kayfiyati yoshlarning bunday guruhlardagi faolligini oshiruvchi asosiy turtki sifatida baholanadi. Yoshlar submadaniyati tarqalishi ijtimoiy muhit, texnologik rivojlanish va yoshlar guruhlarining qiziqishlari bilan bog'liqdir. Internet va yangi media platformalari yoshlar submadaniyatining jamiyat bilan aloqasini kuchaytirib, innovatsion g'oyalar orqali ijtimoiy-madaniy taraqqiyotga hissa qo'shadi. Shu bilan birga, virtual makon yoshlarni erkin fikr bildirish imkoniyati bilan ta'minlasa-da, submadaniyatning haddan tashqari mantiqsiz tarqalishi ma'naviy inersiya va yangi, barqaror bo'lmagan qadriyatlarning paydo bo'lishiga olib kelishi mumkin. Shuning uchun yoshlar submadaniyatining foydali jihatlarini o'rganish, innovatsion g'oyalarni ijtimoiy hayotga tadbiq etish va

submadaniyat bilan ma'naviy qadriyatlar o'rtasida samarali muloqot o'rnatish muhim ahamiyatga ega. Shunday qilib, yoshlar submadaniyati yashash uslubi, xulq-atvor, guruh normalari, qadriyatlari va stereotiplarining umumiyligiga ega ma'lum yosh avlodning madaniyat hisoblanadi. Kattalarning yoshlar submadaniyati bilan samarali ish olib borish uchun tegishli psixologik-pedagogik shartlar yaratish zarur.

ADABIYOTLAR SHARHI. Yoshlarning ijtimoiylashuviga submadaniyatlarning ta'siri xorijiy va mahalliy ilmiy adabiyotlarda turli nazariy yondashuvlar asosida tadqiq etilgan. Xususan, E. Erikson yoshlarning identifikatsiya va ijtimoiy o'zlikni anglash jarayonlarini, P. Bourdieu madaniy kapital va ijtimoiy muhitning shaxs shakllanishiga ta'sirini yoritgan. D. Hebdige submadaniyatni yoshlarning dominant madaniyatga munosabati va o'ziga xos madaniy ifoda shakli sifatida talqin qilgan. S. Hall esa identifikatsiya, madaniyat va ijtimoiy munosabatlarning o'zaro bog'liqligini tahlil qilgan. Zamonaviy tadqiqotlarda raqamli submadaniyatlar, virtual hamjamiyatlar va ijtimoiy tarmoqlarning yoshlar dunyoqarashi hamda xulq-atvoriga ta'siri alohida o'rganilmoqda. Mavjud tadqiqotlar submadaniyatlarning ijtimoiylashuvdagi ijobiy va salbiy jihatlarini ko'rsatib, yoshlarning qadriyatlari, ijtimoiy faolligi va moslashuviga ta'sirini kompleks o'rganish zarurligini asoslaydi.

TADQIQOT METODOLOGIYASI. Mazkur tadqiqotda yoshlarning ijtimoiylashuviga submadaniyatlarning ta'sirini o'rganishda kompleks ijtimoiy-falsafiy metodologiyadan foydalaniladi. Tadqiqotning nazariy-metodologik asosini tizimli, dialektik, aksiologik, antropologik va qiyosiy yondashuvlar tashkil etadi. Tahlil va sintez, induksiya va deduksiya, abstraktlashtirish hamda umumlashtirish metodlari orqali submadaniyat va ijtimoiylashuv tushunchalarining mazmun-mohiyati ochib beriladi. Shuningdek, yoshlarning submadaniy guruhlardagi ishtiroki, qadriyatlarni o'zlashtirishi, ijtimoiy identifikatsiyasi va xulq-atvoridagi o'zgarishlarni aniqlash maqsadida sotsiologik so'rov, kuzatish va qiyosiy tahlil usullaridan foydalaniladi. Raqamli submadaniyatlarning ta'sirini baholashda kontent-tahlil va tizimli monitoring yondashuvlari qo'llanilib, ularning yoshlar ijtimoiylashuviga ko'rsatadigan konstruktiv va destruktiv ta'siri aniqlanadi. Olingan natijalar asosida yoshlarning ijtimoiylashuvini takomillashtirishga qaratilgan ilmiy-amaliy xulosalar ishlab chiqiladi.

MUHOKAMA VA NATIJALAR. «Jamiyat rivojlanishi bilan "yoshlar" tushunchasi o'zgardi va aniqroq bo'ldi. Yoshlarning maxsus ijtimoiy guruh sifatida ta'rifi haqida munozaralar juda uzoq vaqtdan beri davom etmoqda. Ilmiy adabiyotlarda ushbu tushunchaning ko'plab talqinlarini topishimiz mumkin. Yoshlar va ularning muammolari turli gumanitar fanlar: demografiya, psixologiya, tarix, falsafa va boshqalarda o'rganiladi»[1]. Yoshlarni tushunishga yondashuvlarning eng istiqbolli tasniflaridan biri mashhur rus sotsiologi V.I.Chuprov tomonidan taklif qilingan. U ijtimoiy va gumanitar fanlarda paydo bo'lgan barcha turdagi yoshlar ta'riflarini uchta asosiy yo'nalishga bo'lishni taklif qildi: «psixoanalitik, tarkibiy-funksional va madaniy»[2]. Zamonaviy ijtimoiy va gumanitar fanlarda yoshlarning yosh intervallarini aniqlashda o'ziga xoslik mavjud. Dastlabki savolning murakkabligi shundaki, ijtimoiy va gumanitar fanlarda yoshlarning yosh cheklovlarining o'ziga xos xususiyatlari haqidagi g'oyalar juda xilma-xil va ilmiy nutqning kun tartibidir. «Yosh chegaralarini aniqlash muammosi sotsiologiyada ancha oldin paydo bo'lgan va uning paydo bo'lishi bevosita ushbu guruh tahliliga sotsiologik yondashuvning mohiyati bilan bog'liq. Aniq fanlarda, masalan, demografiya yoki statistikada yoshlarning yosh chegaralari u yoki bu darajada qat'iy belgilangan va asosan 14-15 yoshdan 29-30 yoshgacha bo'lgan davr sifatida belgilanadi»[3]. Ijtimoiylashuv – bu, birinchi navbatda, insonning ijtimoiy ahamiyatga ega ijtimoiy rollarni, xatti-harakatlar normalarini, madaniy va tarixiy an'analarni va boshqalarni o'zlashtirish jarayoni va natijasi. Aksincha, ijtimoiylashuv buzilishlari antisotsial xulq-atvor bilan bog'liq: deviatsiya, huquqbuzarlik va boshqalar va resosializatsiya tushunchasi ijtimoiy me'yorlarni o'rganishning takroriy jarayonini tasvirlash uchun ishlatiladi, ular erta buzilganda. Shunday qilib, ijtimoiylashuvni ko'rib chiqishning eng muhim jihati uning sifat jihati - muvaffaqiyat - muvaffaqiyatsizlik nuqtai nazaridan ifodalanishi mumkin bo'lgan ijtimoiylashuv natijalarini baholashdir. Ya'ni, natijalarga qarab, yoshning ijtimoiy ma'qullangan rollarini o'zlashtirganda muvaffaqiyatli yoki normal deb hisoblanishi mumkin yoki jamiyatda ma'qullanmagan va noqonuniy deb hisoblangan ijtimoiy rollarni o'zlashtirganda muvaffaqiyatsiz, g'ayritabiiy deb hisoblanadi»[4].

I.Xakimova fikricha, "ijtimoiy qarovsizlikda asotsial axloq bilan bir qatorda qimmatli-me'yoriy tasavvurlar, qimmatli yo'nalishlar, ijtimoiy hukmron g'oyalar tizimi keskin deformatsiyalanadi, mehnatga salbiy munosabat, tirikchilik uchun shubhali va noqonuniy vositalar hisobiga mehnatsiz daromad topish va "chiroyli hayotga" erishish maqsadi hamda unga intilish istagi shakllanadi. Bunday shaxslarning referent munosabatlari va qimmatli yo'nalishlari pozitiv yo'nalishli ijtimoiy aloqalar va ijtimoiy institutlarning shaxslardan anchagina begonalashishi bilan tavsiflanadi"[5].

S.Roslaykova, «zamonaviy ijtimoiy muhitning o'ziga xos xususiyati shundaki, bugungi kunda bizda zamonaviy inson mavjud bo'lgan ikkita makon - real va virtual mavjud. Hozirgi vaqtda ular endi qarama-qarshi voqelik sifatida emas, balki zamonaviy insonning mavjudligi, shakllanishi va rivojlanishining yagona, butun muhitini ifodalaydi. Aynan shu omil zamonaviy o'smirlarning ijtimoiylashuv jarayonining murakkabligini aniqlay oladi, chunki ular o'zlarining shaxsiy va yosh rivojlanishini bir vaqtning o'zida ikkita makonda amalga oshiradilar va ikkalasi ham ta'sir qiladi»[6] deb hisoblaydi.

O‘smirlik davrida ijtimoiylashuv tananing jismoniy va ruhiy qayta tuzilishi tufayli turli qiyinchiliklarga duch keladi. Tashqi ko‘rinishdagi nomutanosibliklar, tengdoshlar bilan munosabatlarni o‘rnatishdagi psixologik muammolar axloqiy tamoyillar va ijtimoiy mas’uliyatni egallash jarayoniga ta’sir qiladi. Shu davrda shaxsiy xatti-harakatlar va xarakter shakllanadi, bunda eng muhim rolni oila o‘ynaydi.

O‘smir shaxsini rivojlantirishning eng muhim elementi bu oila bo‘lib, unga ijtimoiy tajriba to‘plashda yordam beradi. S.A.Ambalovaning fikricha, «oila muloqot, o‘z a’zolariga alohida g‘amxo‘rlik muhiti, kundalik foydali faoliyati orqali o‘smirda axloqiy qadriyatlar va ideallar, dunyoqarash, ijtimoiy kamolotni shakllantirish uchun imkoniyatlar yaratadi. Zamonaviy oilalar tuzilishi, turmush tarzi, ota-ona va bola munosabatlarining turi, ta’lim usullari va ijtimoiylashuv mazmuni va ushbu jarayonning natijalari bog‘liq bo‘lgan boshqa mezonlar bo‘yicha farqlanadi»[7].

«Misol uchun, TikTok-da video suratga olish uchun fotosuratlar va videolarni qayta ishlash uchun bir nechta ilovalarni o‘zlashtirish va kosplay festivali uchun kostyumlar tayyorlash uchun tikishni va trikotajni o‘rganish kerak. Atrof-muhitni saqlash, chiqindilarni saralash va suv havzalari qirg‘oqlarini tozalashni maqsad qilgan ijobiy uyushmalar ham mavjud. Bunday jamoalar o‘smirda faol fuqarolik pozitsiyasini shakllantirishga xizmat qiladi. Ammo o‘smir submadaniyatga qanchalik ishtiyoqli ekanligini, yoshlar uyushmasi qanday madaniy kodlar va ijtimoiy xulq-atvorni olib kelishini anglashi lozim. Tengdoshlarning bolaga ta’sir doirasini baholash muhimdir. Hech bir jamoa oilaning o‘rnini bosmasligi kerak»[8].

«Yoshlar submadaniyatlari yoshlarni ijtimoiylashuvining muhim institutlari (oila, ta’lim tizimi) qarama-qarshi va nomuvofiq xulq-atvor namunalari va normalari tufayli o‘z ta’sirini zaiflashtirganda ayniqsa ahamiyatli bo‘ladi, bu esa yoshlarning o‘z-o‘zini anglashi va hayotda o‘z o‘rnini topishini qiyinlashtiradi»[9]. Yoshlar submadaniyati yoshlarning o‘zini namoyon qilish, jamiyatda o‘rnini topish va ijtimoiy-madaniy muhitga moslashish jarayonida tez tarqaladi. U yosh avlod ijtimoiylashuvining muhim bosqichi bo‘lib, Margaret Midning prefigurativ madaniyat tushunchasiga mos ravishda, bolalar va ota-onalar o‘zaro o‘rganish jarayonida faol ishtirok etadi. Submadaniyatlar musiqiy uslubdan tortib shaxsiy munosabatlargacha turli qiziqishlarni aks ettiradi va fendomlar ta’sirida vujudga kelishi mumkin. Ko‘pchilik uchun notanish va yopiqligi sababli submadaniyatlar jamoatchilik tomonidan qarshiliklarga duch keladi, bu esa ba’zan ziddiyatlarni keltirib chiqaradi va aksilmadaniyat shakllanishiga olib keladi. Submadaniyatlar yoshlar uchun norozilik va eskapizm vositasi bo‘lib, ular o‘ziga xos til va sleng elementlari orqali o‘z madaniy identifikatsiyasini ifodalaydi.

Globallashuv sharoitida axborot texnologiyalari va yangi media-platformalar yoshlar hayotiga chuqur kirib, ularning submadaniy makonini shakllantirmoqda. Virtual muhit yoshlar submadaniyatining yangi shakllarini yaratish, keng tarqatish va interfaol muloqot orqali rivojlantirishga imkon beradi. Media makon jins, yosh va ijtimoiy kelib chiqish farqlarini kamaytirib, turli submadaniyat guruhlarini birlashtiradi, ularni o‘ziga xos kontent yaratish va baham ko‘rishga yo‘naltiradi. Shu orqali yoshlar submadaniyati nafaqat o‘zini namoyon qilish vositasi, balki jamiyatga integratsiya va ijtimoiy rivojlanish omiliga aylanadi, yangi media makon esa uning tez tarqalishi va diversifikatsiyasini ta’minlaydi.

Yoshlar submadaniyatining paydo bo‘lishi ko‘ngilxushlik ruhiyati bilan bog‘liq bo‘lgan. Aloqa vositalarining diversifikatsiyasi yoshlar guruhlariga ko‘ngilxushlik uchun turli xil tanlov imkoniyatini bermoqda. Bunda yoshlar axborot makonidagi kontentni hazil va istehzo ko‘rinishida buzib talqin qiladi va o‘zgartiradi, qiziqarli onlayn ijod namunalarini yaratadi hamda shu orqali o‘z-o‘zini namoyon qiladi. Bugungi kunda hazil-mutoyiba yoshlar submadaniyatining o‘ziga xos xususiyatiga aylandi. Misol uchun, “yoshlar tomonidan yaratilgan Internet-buzwords (Internetdagi moda jargon so‘zlar) mavjud og‘zaki va yozma nutqdan farq qiladi, lekin ko‘ngilxushlik ruhiyatini ijtimoiy muhit bilan yaqinlashtirishga xizmat qiladi. Yoshlar virtual makonda moda bo‘lgan jargon so‘zlar orqali o‘z tilak va istaklarini bildirishadi hamda jamoatchilik fikrining ma’lum bir ko‘rinishini ifodalaydi. O‘z navbatida Internetdagi jargon so‘zlar madaniy tashuvchi vazifasini ham bajaradi”[10]. Bu nafaqat ko‘ngilxushlik uchun, balki qadriyatni baholash vazifasini ham bajarib, individual yutuqqa erishish va oqilona fikr yuritish orqali yoshlar guruhlarini birlashtiradi hamda ularni masofaviy muloqotda yaqinlashtiradi. Bu esa o‘z navbatida onlayn platformalar orqali yoshlar submadaniyatini ko‘proq ko‘pchilikka tanitish imkonini beradi.

XULOSA. Xulosa qilib aytganda, submadaniyatlar yoshlarning ijtimoiylashuv jarayonida muhim ijtimoiy-madaniy omil sifatida namoyon bo‘ladi. Ular yoshlarning dunyoqarashi, qadriyatlari, xulq-atvori, muloqot uslubi va ijtimoiy identifikatsiyasining shakllanishiga bevosita ta’sir ko‘rsatadi. Submadaniy guruhlarda ishtirok etish yoshlarning o‘zaro muloqot qilishi, ijtimoiy tajriba almashishi, jamoaviy faoliyatga moslashishi va mustaqil fikrlash ko‘nikmalarini rivojlantirish imkonini beradi. Shu bilan birga, ayrim submadaniyatlarda mavjud bo‘lgan destruktiv qarashlar yoshlarning ijtimoiy me’yorlardan uzoqlashishi, begonalashuvi yoki salbiy xulq-atvor shakllarini egallashiga sabab bo‘lishi mumkin. Ayniqsa, raqamli texnologiyalar rivojlanishi virtual submadaniyatlarning yoshlar hayotidagi ta’sirini kuchaytirmoqda. Shuning uchun yoshlar submadaniyatini o‘rganishda uning ijobiy imkoniyatlari bilan bir qatorda mavjud xavf va cheklovlarni ham hisobga olish zarur. Yoshlarning konstruktiv ijtimoiylashuvini ta’minlash uchun milliy va umuminsoniy qadriyatlarni uyg‘unlashtirish, media savodxonlikni rivojlantirish hamda ijtimoiy faollikni qo‘llab-quvvatlash muhim ahamiyatga ega.

YANGI TARAQQIYOT BOSQICHIDAGI O‘ZBEKISTONDA IJTIMOIY KAPITAL – IJTIMOIY DAVLATNING STRATEGIK RESURSI

Uktamov Nodir Ibroximovich
Falsafa fanlari bo‘yicha falsafa doktori (PhD)
Namangan davlat universiteti katta o‘qituvchisi
E-mail: nodiruktamov2@gmail.com

Annotatsiya: *Ushbu maqolada Yangi O‘zbekistonning taraqqiyot strategiyasida ijtimoiy kapitalning tutgan o‘rni tahlil qilinib, unda jamiyatda ishonch, hamkorlik, faol fuqarolik, o‘zaro mas’uliyat kabi qadriyatlar majmui sifatida talqin etiladigan ijtimoiy kapitalning barqaror rivojlanish, inson qadri, ijtimoiy adolat va farovonlikni ta’minlashdagi ahamiyati ochib beriladi.*

Maqolada ijtimoiy davlat tamoyillarini ro‘yobga chiqarishda inson omilining ustuvorligi, mahalla institutining kuchayishi, fuqarolik jamiyati tashkilotlarining rivoji, manfaatlar muvozanatini ta’minlash kabi jarayonlar tahlil qilinadi. Shuningdek, ijtimoiy kapitalni mustahkamlashning Yangi O‘zbekiston sharoitidagi mexanizmlari — raqamlashtirish, ijtimoiy himoya tizimini modernizatsiya qilish, ta’lim va madaniyatning strategik roliga alohida e’tibor qaratiladi.

Kalit so‘zlar: *Yangi O‘zbekiston, ijtimoiy kapital, ijtimoiy davlat, strategik resurs, fuqarolik jamiyati, ishonch, hamkorlik, ijtimoiy adolat, barqaror rivojlanish, inson omili, mahalla instituti, raqamlashtirish, ijtimoiy himoya, modernizatsiya, ijtimoiy institutlar, manfaatlar muvozanati.*

СОЦИАЛЬНЫЙ КАПИТАЛ УЗБЕКИСТАНА НА НОВОМ ЭТАПЕ РАЗВИТИЯ ЯВЛЯЕТСЯ СТРАТЕГИЧЕСКИМ РЕСУРСОМ СОЦИАЛЬНОГО ГОСУДАРСТВА

Аннотация: *В данной статье анализируется роль социального капитала в стратегии развития Нового Узбекистана и раскрывается важность социального капитала, понимаемого как совокупность ценностей в обществе, таких как доверие, сотрудничество, гражданская активность и взаимная ответственность, в обеспечении устойчивого развития, человеческого достоинства, социальной справедливости и благополучия. В исследовании анализируются такие процессы, как приоритет человеческого фактора в реализации принципов социального государства, укрепление института махалли, развитие организаций гражданского общества и обеспечение баланса интересов. Особое внимание уделяется также механизмам укрепления социального капитала в условиях Нового Узбекистана – цифровизации, модернизации системы социальной защиты и стратегической роли образования и культуры.*

Ключевые слова: *Новый Узбекистан, социальный капитал, социальное государство, стратегический ресурс, гражданское общество, доверие, сотрудничество, социальная справедливость, устойчивое развитие, человеческий фактор, институты соседства, цифровизация, социальная защита, модернизация, социальные институты, баланс интересов.*

SOCIAL CAPITAL IN UZBEKISTAN AT A NEW STAGE OF DEVELOPMENT IS A STRATEGIC RESOURCE OF THE SOCIAL STATE

Abstract: *This article analyzes the role of social capital in the development strategy of New Uzbekistan, and reveals the importance of social capital, which is interpreted as a set of values in society, such as trust, cooperation, civic activity, and mutual responsibility, in ensuring sustainable development, human dignity, social justice, and well-being. The study analyzes processes such as the priority of the human factor in implementing the principles of the social state, the strengthening of the mahalla institution, the development of civil society organizations, and ensuring a balance of interests. Special attention is also paid to the mechanisms for strengthening social capital in the conditions of New Uzbekistan - digitalization, modernization of the social protection system, and the strategic role of education and culture.*

Keywords: *New Uzbekistan, social capital, social state, strategic resource, civil society, trust, cooperation, social justice, sustainable development, human factor, neighborhood institution, digitalization, social protection, modernization, social institutions, balance of interests.*

Kirish.

Bugungi globallashuv va axborotlashuv jarayonlari jadal kechayotgan sharoitda jamiyat taraqqiyotining asosiy omillaridan biri sifatida ijtimoiy kapitalning ahamiyati tobora ortib bormoqda. Ijtimoiy kapital – bu insonlar o‘rtasidagi ishonch, hamkorlik, o‘zaro yordam, jamoaviylik, fuqarolik faolligi va ijtimoiy institutlarning barqaror faoliyatini ta’minlovchi munosabatlar majmuasidir. Rivojlangan davlatlar tajribasi shuni ko‘rsatadiki, iqtisodiy resurslar, texnologik imkoniyatlar va moddiy boyliklarning o‘zi jamiyat taraqqiyoti uchun yetarli emasligini inobatga olib fuqarolar bilan davlat va jamiyat o‘rtasida mustahkam ishonch munosabatlari mavjud bo‘lishi zarurligini ko‘rsatmoqda.

Yangi O‘zbekiston taraqqiyot strategiyasida ham ijtimoiy kapitalni mustahkamlash eng ustuvor vazifalardan biri sifatida qaraladi. Zero, “inson qadri”ni ulug‘lash, fuqarolarni davlat boshqaruvida faol ishtirokchi sifatida shakllantirish, ochiqlik va shaffoflik tamoyillariga asoslangan ijtimoiy davlat qurish ijtimoiy kapitalning rivojlanishini talab etadi. Mamlakatda olib borilayotgan keng ko‘lamli siyosiy, huquqiy va ijtimoiy-iqtisodiy islohotlar ham aynan fuqarolar o‘rtasidagi ishonchni oshirish, jamiyatdagi birdamlik va hamjihatlikni kuchaytirish, davlat va xalq o‘rtasidagi muloqotni mustahkamlashga qaratilgan.

Bundan tashqari, mahalla institutining modernizatsiya qilinishi, fuqarolik jamiyati tashkilotlari faoliyatining kengayishi, korrupsiyaga qarshi tizimning kuchaytirilishi, sud-huquq tizimidagi adolat va ochiqlik barchasi siyosati Yangi O‘zbekiston sharoitida ijtimoiy kapitalning o‘sishiga xizmat qilmoqda. Shu ma’noda, ijtimoiy kapital ijtimoiy davlatning poydevori, jamiyat barqarorligi va taraqqiyotining bosh strategik resursi sifatida namoyon bo‘lmoqda.

Mazkur mavzuni o‘rganishning dolzarbligi shundaki, Yangi O‘zbekistonning taraqqiyot modeli ijtimoiy kapitalning barcha shakllarini – jamiyatdagi ishonch, totuvlik, fuqarolik faolligi, mahalla institutlari, ijtimoiy hamkorlik va o‘zaro yordam tizimini rivojlantirishni nazarda tutadi. Shu bois ijtimoiy kapitalning mazmuni, uning ijtimoiy davlat barpo etishdagi o‘rni va strategik ahamiyatini tahlil qilish bugungi davrning eng muhim ilmiy-amaliy masalalaridan biri hisoblanadi.

Adabiyotlar tahlili.

Ijtimoiy kapitalning nazariy va amaliy tomonlarini tadqiq etishga, eng avvalo, uning yangiligi, bu boradagi tushunchalarning xilma-xilligi ko‘p tarmoqliligini inobatga olgan holda dunyoning turli mintaqalarida asosiy tadqiqot sohasi sifatida qaralib, ko‘plab izlanuvchilarning diqqat markazida bo‘lib kelgan.

Ijtimoiy kapitalga oid falsafiy bilimlarning tegishli sohalari fanlararo yo‘nalish sifatida siyosiy, sotsiologik nuqtayi nazardan qisman tadqiq etilgan. Mavjud izlanishlar esa G‘arb olimlaridan L.J.Hanifan, P.Burdyo, J.Koulman, V.L.Tammy, E.Dyurkgeym, F.Fukuyama[6] kabi tadqiqotchi olimlar izlanishlarida ko‘rinadi.

Jamiyat barqarorligini ta’minlashda ijtimoiy kapital fenomenining rolini aniqlashga doir tadqiqotlar S.Ponomar, S.Yegorova, A.Kiykov, A.Konkov, O.Polyakovalar ishlarida; ijtimoiy kapitalning kishilar o‘rtasidagi o‘zaro birdamlikni ta’minlashga doir vazifalarini belgilash S.Veronika, E.Bondar, B.Stolyarlar; ijtimoiy kapital va ijtimoiy davlatning siyosiy taraqqiyotdagi o‘rni M.Melanin, M.Korniychuk kabi olimlar tomonidan o‘rganilgan. Ishonch kategoriyasining ijtimoiy kapitalni rivojlantirishdagi o‘rni esa O.Taxanova, Sargolzai Ali Rizo Muxammad, S.Svetlana asarlarida; globallashuv sharoitida ijtimoiy kapitalning o‘zgarishlar tendensiyalarini ochib berish I.E.Diskin, V.V.Radaev, V.Stepanenko, L.V.Strelnikova, F.G.Karasev, N.N.Lebedeva, O.A.Lomovtseva[5] kabi tadqiqotchilar ilmiy izlanishlarida o‘z ifodasini topgan.

So‘nggi vaqtlarda yurtimizda iqtisodchilar, sotsiologlar, siyosatshunoslar va faylasuflar “Inson” va “Ijtimoiy kapital” tushunchalarining ilmiy-nazariy jihatlarini tadqiq etishmoqda. Iqtisodchi olimlardan Q.Abdurahmonov, J.Ataniyazov,

T.Jalilov, D.Rahmonov hamda B.Usmonovlar mazkur yo‘nalishda keng ko‘lamli ishlar olib bormoqdalar. Inson kapitali va ijtimoiy kapitalning sotsiologik jihatlari M.Sodirjonov, X.Akramov, E.Abdullayev, F.Qosimov, M.Muxammedovlar tomonidan tadqiq etilgan. Jamiyatda ijtimoiy kapitalning o‘rni va ahamiyati, uning zamonaviy mexanizmlari va jamiyat taraqqiyotiga ta’siriga doir masalalarning falsafiy va siyosiy jihatlari M.Norqobilov, S.Saidov, D.Ernazarov[7] lar tomonidan tahlil qilingan.

Tadqiqot metodologiyasi.

Maqolada Empirik tadqiqot, mantiqiylik, tizimlilik, analiz, sintez, o‘zaro aloqadorlik ilmiy tadqiqot tamoyillaridan kelib chiqqan holda qiyosiy tahlil kabi tadqiqot usullaridan foydalanildi.

Tahlillar va natijalar.

Bugungi kunda mamlakatimiz yangi taraqqiyot bosqichiga qadam qo‘yib, davlat va jamiyat hayotining barcha sohalarida keng ko‘lamli islohotlar amalga oshirilmoqda. Ushbu jarayonning asosiy maqsadi demokratik tamoyillarga asoslangan, fuqarolarning huquq va erkinliklarini ta’minlaydigan hamda ijtimoiy adolatni qaror toptiradigan ijtimoiy davlatni shakllantirishdan iboratdir. Bunday sharoitda jamiyat taraqqiyotining muhim omillaridan biri sifatida ijtimoiy kapital tushunchasi alohida ahamiyat kasb etmoqda.

Ijtimoiy kapital jamiyat a’zolari o‘rtasidagi o‘zaro ishonch, ijtimoiy aloqalar, hamkorlik, birdamlik hamda umumiy qadriyatlar tizimini ifodalovchi muhim ijtimoiy resurs hisoblanadi. Mazkur tushuncha ilmiy adabiyotlarda turli olimlar

tomonidan tadqiq qilingan bo‘lib, amerikalik sotsiolog Robert Putnam ijtimoiy kapitalni jamiyat a’zolari o‘rtasidagi hamkorlikni rivojlantiruvchi ijtimoiy tarmoqlar va o‘zaro ishonch tizimi sifatida talqin qiladi [8]. Shuningdek, fransuz sotsiologi Pyer Burdye ijtimoiy kapitalni insonlarning ijtimoiy aloqalari orqali yuzaga keladigan resurslar majmui sifatida izohlaydi [9]. Ushbu yondashuvlar ijtimoiy kapitalning jamiyat rivojlanishidagi muhim strategik ahamiyatga ega ekanligini ko‘rsatadi.

Yangi taraqqiyot bosqichidagi O‘zbekistonda amalga oshirilayotgan islohotlar jarayonida ham ijtimoiy kapitalning roli tobora ortib bormoqda. Chunki jamiyatda o‘zaro ishonch, hamkorlik va ijtimoiy hamjihatlik mavjud bo‘lmas ekan, har qanday islohotlarning samaradorligini ta’minlash qiyin kechadi. Shu bois mamlakatda fuqarolik jamiyati institutlarini rivojlantirish, jamoatchilik nazoratini kuchaytirish, aholining ijtimoiy faolligini oshirish orqali ijtimoiy kapitalni mustahkamlashga alohida e’tibor qaratilmoqda.

O‘zbekiston sharoitida ijtimoiy kapitalni rivojlantirishda mahalla instituti alohida ahamiyatga ega. Mahalla nafaqat an’anaviy ijtimoiy institut sifatida, balki fuqarolarning o‘zaro hamkorligi, ijtimoiy birdamligi va jamoaviy mas’uliyatini shakllantiruvchi muhim omil sifatida namoyon bo‘ladi. Mahalla tizimi orqali aholining ijtimoiy muammolarini hal etish, ijtimoiy yordam ko‘rsatish hamda jamiyatda barqaror ijtimoiy muhitni ta’minlash imkoniyati kengaymoqda. Bu esa ijtimoiy kapitalning amaliy namoyon bo‘lishini ta’minlaydi.

Bundan tashqari, nodavlat notijorat tashkilotlari, jamoat birlashmalari va fuqarolik jamiyati institutlari ham ijtimoiy kapitalni rivojlantirishda muhim rol o‘ynaydi. Ular jamiyatda fuqarolik faolligini oshirish, ijtimoiy muammolarni hal etishda jamoatchilik ishtirokini kengaytirish hamda davlat va jamiyat o‘rtasidagi samarali muloqotni ta’minlashga xizmat qiladi. Shu jihatdan ijtimoiy kapital jamiyatning ijtimoiy barqarorligini ta’minlash, ijtimoiy ziddiyatlarning oldini olish va ijtimoiy adolat tamoyillarini mustahkamlashda muhim omil hisoblanadi.

Hozirda jamiyatimizning barcha sohalarida sezilarli o‘zgarishlar ro‘y berayotganligini ko‘rish mumkin jumladan yurtimizda yangi ta’lim standartlarining joriy etilishi, rivojlangan mamlakatlar ilg‘or texnologiyalarining ta’lim tizimimizga moslashtirilishi, ushbu tizimga tobora ko‘proq axborot-kommunikatsiya texnologiyalarining jalb qilinayotgani shular jumlasidandir. Bugun dunyo hamjamiyatiga nazar tashlaydigan bo‘lsak, qaysiki davlat rivojlanish cho‘qqilarini egallayotgan bo‘lsa, albatta, ta’lim tizimidagi islohotlar orqali erishayotganini ko‘rmoqdamiz. Shu bilan birga, rivojlangan mamlakatlar ta’lim tizimining qiyosiy tahlili shuni ko‘rsatadiki, ta’lim standartlarining yangi avlodiga o‘tish shartlari ta’lim dargohlaridagi paradigmalarni o‘zgartirishni talab qiladi. Bu esa ta’lim tizimini to‘laligicha jamoaviy harakatlar natijasida yangi bosqichga ko‘tarishimizni taqozo etadi. Yangi zamonaviy standartlarda ta’lim natijalariga qo‘yiladigan talablar quyidagi usullar orqali o‘z aksini topadi:

– o‘qitishda o‘yin usullaridan foydalanish texnologiyasi: biznes, rolli va boshqa turdagi o‘quv o‘yinlari;
– “tanqidiy fikrlash”ni rivojlantirish texnologiyalari;
– masofaviy ta’lim texnologiyalari va boshqalar;
– jamoaviy ta’lim tizimi (CSE);
– tadqiqot muammolarini hal qilish texnologiyasi (TRIZ);
– universal o‘quv faoliyati;
– ta’lim faoliyati natijalari;
– portfolio tizimi shakllanishi;
– ilmiy salohiyatni oshirish;
– “uztoz-shogird” an’analarini takomillashtirish.

Yuqoridagi usullar bugungi kunda ta’limdagi ko‘plab islohotlarning yaratilishiga zamin bo‘ladi. Yangi standartlar joriy etilishining asosiy talablaridan yana biri o‘quvchi-talabalarning hamkorlikda ishlash usullarini ishlab chiqishdir. Shu sababli ta’lim dargohlarini jamiyatning ijtimoiy kapitali manbayi deb hisoblashimiz mumkin. Biz ta’limni rivojlantirish mexanizmlarini mamlakatimiz pedagoglari salohiyatini oshirishda odamlarning umumiy maqsadga erishish uchun birlasha olish qobiliyati bilan bog‘liq bo‘lgan aloqalarni yo‘lga qo‘yishini taqozo etmoqda, bu esa pirovardida, sifatli ta’lim taraqqiyoti poydevori sifatida ijtimoiy munosabatlarning takomillashuviga olib kelib, kapital va ta’lim tashkilotining rivojlanishini ta’minlaydi.

O‘zbekiston taraqqiyotining yangi bosqichida jamiyatni har jihatdan transformatsiyalash hamda uni ijtimoiy-madaniy texnologiyalar asosida yuksaltirish taraqqiyot darajasini belgilab bermoqda. Xususan, O‘zbekiston Respublikasi Prezidentining 2020-yil 18-fevraldagi “Jamiyatda ijtimoiy-ma’naviy muhitni sog‘lomlashtirish, mahalla institutini yanada qo‘llab-quvvatlash hamda oila va xotin-qizlar bilan ishlash tizimini yangi darajaga olib chiqish chora-tadbirlari to‘g‘risida”gi PF-5938-son Farmonida[2] belgilanganidek, “...mahalla - sektor - xalq qabulxonasi – mahalla” tamoyili asosida samarali hamkorlik tizimini joriy etish, mahallani xalq bilan davlat o‘rtasida ishonchli “ko‘prik” bo‘lishini amalda ta’minlash, oila va xotin-qizlarni qo‘llab-quvvatlash borasida kompleks chora-tadbirlar amalga oshirish”[1] belgilandi. Shuningdek, “Manzilli chora-tadbirlar dasturi” hamda O‘zbekiston Respublikasi Prezidentining “Iqtisodiy taraqqiyot va

kambag‘allikni qisqartirish vazirligi huzuridagi Mahallabay ishlash va tadbirkorlikni rivojlantirish agentligi faoliyatini tashkil etish chora-tadbirlari to‘g‘risida”gi 2021-yil 24-dekabrdagi PQ-62-son qarori ishlab chiqilgan.[4]

“Eng quyi bo‘g‘in – mahalla darajasiga tushgan holda kambag‘allikni qisqartirish bo‘yicha O‘zbekiston tajribasini yaratdik”[3], – dedi prezident Shavkat Mirziyoyev Samarqand shahrida o‘tayotgan Osiyo infratuzilmaviy investitsiyalar banki boshqaruvchilari kengashining to‘qqizinchi yillik yig‘ilishidagi nutqida.

Albatta, mahallaning ijtimoiy kapitalni shakllantirish va rivojlantirishda muhim ijtimoiy-madaniy omil bo‘lib xizmat qilishi barchamizga ayon. Qadimdan har bir oila o‘zining ijtimoiy aloqa va munosabatlarida yuzaga keladigan natijalari va muammolarini dastlab mahalla bilan yechishga harakat qilgan. Mahalla ijtimoiy birdamlik, hamjihatlik, bag‘rikenglik, do‘stlik, yaqinlik va o‘zaro bahamjihatlik bilan faoliyat tashkil etib, ijtimoiy-madaniy mexanizm vazifasini bajarib keladi.

Bizning jamiyatdagi mahallalarda ijtimoiy kapitalning sifati va takomillashishi qanday kechishiga e’tibor qaratamiz. Masalan, azaldan “o‘zbek mahallasidagi xonadonlarga qulf osilmasligi ijtimoiy ishonchning mavjudligidan dalolatdir. Mahalladagi bemor insonlardan boxabar bo‘lish, kambag‘allarga hayr-saxovat ko‘rsatish ham ijtimoiy kapitalga misol bo‘la oladi. Abdulla Qahhorning “O‘g‘ri” hikoyasi yoki “Suyunchi” kinofilmidagi darvozaga osilgan qulf bilan bog‘liq sahnani eslagandayoq o‘zbek jamiyatida ishonch mustahkam ekanligiga guvoh bo‘lish mumkin”.

Olib borilgan tadqiqotlardan shuni xulosa qilish mumkinki, imkoniyatlar tengligining kamayishi bilan yoshlar o‘rtasida ta’lim olish, mutaxassislik bo‘yicha ishga joylashish, mavjud ish joyini yo‘qatishdan qo‘rqish muammolari, ayniqsa, keskinlashmoqda. Mehnat bozoridagi talab va bugungi kunda mamlakatimiz oliy o‘quv yurtlari tomonidan oliy ma’lumotli mutaxassislar tayyorlanayotgan mutaxassisliklar o‘rtasida mutanosiblik mavjud emasligi sababli yoshlar bandligini ta’minlash masalalari keskinlashmoqda.

FUQAROLIK JAMIYATI TUSHUNCHASI, UNING MAZMUN-MOHIYATI VA GENEZISI

To‘xtasinov Shukurjon Shavkatjon o‘g‘li
Namangan davlat universiteti falsafa fanlari bo‘yicha falsafa doktori (PhD)
E-mail: shukurjon4545@gmail.com

Annotatsiya: *Jadidchilik harakati XIX asr oxiri va XX asr boshlarida O‘rta Osiyo, xususan, Turkiston hududida ijtimoiy, ma’naviy va siyosiy islohotlarning muhim harakatkor kuchi sifatida maydonga chiqdi. Jadidlar milliy birlik va siyosiy hokimiyat masalalariga o‘ziga xos yondashuvlari bilan jamiyatning ma’rifiy va ijtimoiy-falsafiy rivojlanishiga katta hissa qo‘shdilar. Ularning qarashlari nafaqat o‘sha davrning ijtimoiy-siyosiy muammolariga javob berishga xizmat qilgan, balki hozirgi kunda ham milliy birlik va davlat boshqaruvi masalalarida dolzarb sanaladi. Ushbu maqola jadidlarning milliy birlik va siyosiy hokimiyatga oid qarashlarini ijtimoiy-falsafiy nuqtai nazardan tahlil qilishga bag‘ishlanadi.*

Kalit so‘zlar: *Jadidchilik, milliy birlik, siyosiy hokimiyat, ijtimoiy-falsafiy ahamiyat, ma’rifat, ta’lim, adolatli boshqaruv, ijtimoiy uyg‘unlik, legitimlik, insonparvarlik, axloqiy qadriyatlar, mahalliy boshqaruv, taraqqiyot, zamonaviy O‘zbekiston, ijtimoiy konsensus, vatanparvarlik, mustaqillik.*

ПОНЯТИЕ ГРАЖДАНСКОГО ОБЩЕСТВА, ЕГО СУЩНОСТЬ И ГЕНЕЗИС

Аннотация: *Движение джадидов стало важной движущей силой социальных, духовных и политических реформ в Центральной Азии, особенно в Туркестане, в конце XIX – начале XX веков. Джадиды внесли большой вклад в образовательное и социально-философское развитие общества благодаря своим уникальным подходам к вопросам национального единства и политической власти. Их взгляды не только служили ответом на социально-политические проблемы того времени, но и актуальны сегодня в вопросах национального единства и государственного управления. Данная статья посвящена анализу взглядов джадидов на национальное единство и политическую власть с социально-философской точки зрения.*

Ключевые слова: *джадидизм, национальное единство, политическая власть, социально-философское значение, просвещение, образование, справедливое управление, социальная гармония, легитимность, гуманизм, моральные ценности, местное самоуправление, развитие, современный Узбекистан, общественный консенсус, патриотизм, независимость.*

THE CONCEPT OF CIVIL SOCIETY, ITS ESSENCE AND GENESIS

Abstract: *The Jadid movement emerged as an important driving force of social, spiritual and political reforms in Central Asia, particularly in Turkestan, at the end of the 19th and beginning of the 20th centuries. The Jadids made a great contribution to the educational and socio-philosophical development of society with their unique approaches to the issues of national unity and political power. Their views not only served to respond to the socio-political problems of that time, but are also relevant today in matters of national unity and state governance. This article is devoted to the analysis of the Jadids’ views on national unity and political power from a socio-philosophical perspective.*

Keywords: *Jadidism, national unity, political power, socio-philosophical significance, enlightenment, education, fair governance, social harmony, legitimacy, humanity, moral values, local government, development, modern Uzbekistan, social consensus, patriotism, independence.*

Kishilik jamiyati paydo bo‘libdiki, azaldan jamoaviylik, birlik va hamjihatlik alohida hamiyat berib kelgan. Inson yer yuzida yashay boshlagan davrlardan beri necha ming yillar o‘tdi, ammo jamoaviylik birdamlik g‘oyalari o‘z ahamiyatini yo‘qotmadi. Nega? Inson jamoaviylikdan yakkalik sari va aksincha yakkalikdan jamoaviylik sari harakat qilib hamjihatlikda yashashni istaydi. Boisi, tarixning ilk davrlarida inson tabiat oldidagi ojizligi uning jamoa bo‘lib birlashishiga zamin yaratgan va ushbu jarayon tadrijiy taraqqiyot natijasida matriarhat va keyinchalik patriarhat tuzumlarini vujudga keltirdi. Bundan keyingi bosqichda patriarhal oila, urug‘, qabila, qabilalar ittifoqi, xududiy qo‘shnichilik jamoalari va davlatchilik shakllandi. Davlat va jamiyat shu tariqa rivojlandi. O‘zbekiston Respublikasi Prezidenti Shavkat Mirziyoev “mamlakatimizda demokratik islohotlarni yanada chuqurlashtirish va fuqarolik jamiyatini rivojlantirish konsepsiyasi hokimiyat institutlarini shakllantirilishi va ularning to‘laqonli faoliyat ko‘rsatishi, fuqarolarning huquq va erkinliklarini

himoya qilish, mulkchilikning barcha turlarini, fuqarolarning davlat boshqaruvidagi faol ishtirokini ta'minladi"[38] degan qarashlari davlatchiligimiz tarixi va asosida fuqarolik jamiyatining ko'plab o'ziga xos xususiyatlari asrlar davomida yashab kelganligini ko'rsatadi. Bugungi globallashuv sharoitida O'zbekistonning strategik maqsadi, ijtimoiy hayotni demokratik qadriyatlar asosida yangilash va rivojlantirish orqali ijtimoiy davlatni barpo etishga erishidir.

Prezident Sh.M.Mirziyoev davlat rahbari sifatida Fuqarolik jamiyati barpo etish borasida shunday deydi "yurtdoshlarimizning erkinlik va tashabbuslarini, mamlakatimiz ijtimoiy hayotidagi ishtirokini kengaytirish kelgusida ham O'zbekiston siyosiy tizimini rivojlantirishning muhim yo'nalishi bo'lib qoladi"[39]. Darhaqiqat hozirgi axborotlashish va globallashuv jarayonlarining ortib borishi, mafkuraviy va g'oyaviy kurashlarning avj olishi barobarida jamiyat va davlatchilikning mustahkamlash va saqlab qolish kafolati bu demokratik boshqaruvni takomillashtirish va qonun ustivorligini ta'minlashdir. Shundagina ijtimoiy adolat mezonlari barqarorlikni ta'minlaydi.

Adabiyotlarda fuqarolik jamiyatining quyidagi xususiyatlari keltirib o'tiladi "plyuralizm, erkinlik, ochiqlik, o'zini o'zi boshqarish va qonuniylik[40]. Erk ozodlik qadim-qadimdan insoniyatning oliy mezoni bo'lgan bo'lsa, hurfikrlilik va qonuniylik barqarorlik va tenglikning tayanchi hisoblangan.

Jamiyatlar davlat boshqaruviga doir ilk qarashlar miloddan avvalgi VI-V- asrlarda paydo bo'la boshladi.

Fuqarolik jamiyati haqidagi ilk qarashlar bugungi kundagi yoki o'rta asrlardagi qarashlardan ma'lum ma'noda farq qilardi. Boisi, eramizdan oldingi davr davlatchiliklari dastlab Osiyo va Afrika hududlarida shakllangan va ushbu davlatchiliklar yakka shaxs tomonidan idora etiladigan, avloddan-avlodga meros bo'lib o'tadigan, despotik quldorlik jamiyatlari edi. Bunday jamiyatlarda inson xuquqlari, boshqaruvning ijtimoiy barqarorligi, qonunlarning ustivorli va shunga o'hshash masalalar o'ziga xos tarzda amalga oshirilardi. Va bu jarayonlar hozirgi kunda ham Osiyo va Afrikaning ko'plab davlatlari boshqaruv tizimlarini tashkil etadi. Milliy va mental xususiyatlar ming yillar davomida shakllanib, ming yillar davomida yashab qoladi. Eramizdan avvalgi VI–V asrlar g'arb bugungi yevropa qit'asidagi davlatchiliklarda esa boshqaruvning demokratik va jamoaviylik shakllari paydo bo'ldi. Bunda aholining erkinlik va xuquqlar uchun kurash xususiyatlari muhim o'rin tutgan. Masalan, eramizdan avvalgi 510-509-yillarda Rimning yettinchi xukmdori tarkviniy hokimiyatni oqsoqollar kengashi bilan emas o'zi idora etishni istan qoladi. Aholi esa o'sha zahoti unga qarshi kurashib uni tahtdan ag'darishadi va mamlakatdan haydab yuborishadi. Bu bilan biz g'arb davlatchiligida demokratik tafakkur va erkinlik dunyoqarashi eradan avvalgi davrlardan shakllanganligi aytmoqchimiz.

To'g'ri Afina demokratiyasi va Rim respublikasida ham quldorlik tuzumi o'zining klassik cho'qqisiga chiqqan bo'lishiga qaramay, fuqarolikka ega qatlam katta imtiyozlarga ega bo'lgan. Fuqarolik jamiyati to'g'risidagi ilk belgilarini dastlab Mesopotamiz xususan Xammurapi boshqaruvi davrlarida ko'rishimiz mumkin. Hukmdor Hammurapi o'z davrida va dunyo tarixida birinchi bo'lib mamlakatda asosiy qonun "Hammurapi qonunlar to'plami" ni ishlab chiqdi va joriy etdi. Bu esa mamlakatda turli ko'rinishdagi kengashlar, jamoaviy boshqaruvlarni shakllanishiga olib keldi. Shu bilan birga Qadimgi Misr, Qadimgi Xindiston hududlarida ham ilk fuqarolik jamiyatlari elementlarini ko'rishimiz mumkin. Masalan, diniy jamoalarning mamlakat boshqaruvidagi roli, jamoatchilik vakillari, aholining turli kasb birlashmalari, ijtimoiy adolat mezonlarining diniy va ma'naviy ahamiyatiga doir narrativlar (turli xalq eposlari, rivoyat va asotirlar) ni keltirishimiz mumkin.

SHAXS VA JAMIYAT UYG‘UNLIGIDA SADOQATNING BARQAROR QADRIYAT SIFATIDA SHAKLLANISHI

To‘laboyeva Shoira Abdulhamidovna
Farg‘ona davlat universiteti mustaqil tadqiqotchisi
E-mail: shoiraxonabdulhamidona@gmail.com
ORCID: https://orcid.org/0009-0006-6262-7249

Annotatsiya: *Maqolada shaxs va jamiyat o‘rtasidagi axloqiy munosabatlarni uyg‘unlashtirishda sadoqatning barqaror qadriyat sifatida shakllanishi tahlil qilinadi. Sadoqatning hissiy bog‘lanish, ongli axloqiy tanlov, mas’uliyat, ishonch, identifikatsiya va ijtimoiy daxldorlik bilan aloqasi ochib beriladi. Uning ko‘r-ko‘rona itoatkorlik va konformizmdan farqi asoslanib, konstruktiv tanqid bilan uyg‘un refleksiv sadoqat konsepsiyasi ilgari suriladi. Oila, ta’lim, mahalla, fuqarolik jamiyati, davlat va raqamli axborot muhiti sadoqatni shakllantiruvchi institutlar sifatida baholanadi. Muallif tomonidan barqaror sadoqatning aksiologik-kognitiv, emotsional-identifikatsion, normativ-mas’uliy, faoliyatli va refleksiv komponentlardan iborat modeli taklif qilinadi. Shuningdek, institutlararo aksiologik muvofiqlik, ishonch va adolat sadoqatning barqarorligini belgilovchi asosiy shartlar sifatida ko‘rsatiladi.*

Kalit so‘zlar: *sadoqat, shaxs, jamiyat, axloqiy qadriyat, ijtimoiy uyg‘unlik, ishonch, mas’uliyat, identifikatsiya, refleksiv sadoqat, ijtimoiy institut, aksiologik muvofiqlik, fuqarolik fazilati.*

ФОРМИРОВАНИЕ ЛОЯЛЬНОСТИ КАК УСТОЙЧИВОЙ ЦЕННОСТИ В ГАРМОНИИ ЛИЧНОСТИ И ОБЩЕСТВА

Аннотация: *В статье социально-философски анализируется формирование лояльности как устойчивой ценности в гармонизации нравственных отношений личности и общества. Раскрывается связь лояльности с осознанным моральным выбором, доверием, ответственностью, идентификацией и социальной сопричастностью. Обосновывается различие между зрелой лояльностью, слепым подчинением и конформизмом. Предлагается модель устойчивой лояльности, включающая аксиологико-когнитивный, эмоционально-идентификационный, нормативно-ответственный, деятельностный и рефлексивный компоненты.*

Ключевые слова: *лояльность, личность, общество, нравственная ценность, социальная гармония, доверие, ответственность, идентификация, рефлексивная лояльность, социальный институт.*

FORMATION OF LOYALTY AS A SUSTAINABLE VALUE IN THE HARMONY OF THE INDIVIDUAL AND SOCIETY

Abstract: *The article provides a socio-philosophical analysis of loyalty as a sustainable value in harmonizing moral relations between the individual and society. Loyalty is examined in relation to conscious moral choice, trust, responsibility, identification and social belonging. Mature loyalty is distinguished from blind obedience and conformism, and the concept of reflective loyalty compatible with constructive criticism is advanced. A model of sustainable loyalty comprising axiological-cognitive, emotional-identificational, normative-responsible, behavioral and reflective components is proposed.*

Keywords: *loyalty, individual, society, moral value, social harmony, trust, responsibility, identification, reflective loyalty, social institution.*

Kirish. Globallashuv, raqamli kommunikatsiyalar va ijtimoiy mobillik jadallashgan hozirgi sharoitda shaxsning turli guruhlar, institutlar va qadriyatlar tizimiga mansubligi tobora murakkablashmoqda. Inson bir vaqtning o‘zida oila a’zosi, kasbiy jamoa vakili, mahalla va fuqarolik jamiyati subyekti, davlat fuqarosi hamda global axborot makonining ishtirokchisi sifatida turli normativ talablar bilan yuzlashadi. Bunday ko‘p qatlamli identifikatsiya sharoitida shaxs va jamiyat o‘rtasidagi axloqiy munosabatlarni barqarorlashtiruvchi qadriyatlar masalasi alohida ilmiy ahamiyat kasb etadi. Sadoqat ana shunday qadriyatlardan biri bo‘lib, u shaxsning muayyan munosabat, jamoa, tamoyil yoki umumiy maqsad bilan uzoq muddatli va mas’uliyatli bog‘lanishini ifodalaydi [1]. Sadoqat erkinlikning inkori emas, balki erkinlikning mas’uliyat bilan uyg‘unlashgan shaklidir. J. Royce sadoqatni shaxsning o‘zidan kattaroq maqsadga amaliy va izchil bag‘ishlanishi bilan

bog‘lagan bo‘lsa [2], zamonaviy tadqiqotlarda uning identifikatsiya, ishonch, hamkorlik va ijtimoiy kapital bilan aloqasi ko‘proq ta’kidlanadi [3; 4]. Muammoning dolzarbligi shundaki, zamonaviy jamiyatda sadoqatning obyektlari ko‘paygani sari ular o‘rtasida ziddiyatlar ham yuzaga keladi. Oilaga sadoqat kasbiy burch bilan, guruh manfaatiga sadoqat umumjamiyat manfaatlari bilan, tashkilotga sadoqat esa adolat yoki qonuniylik tamoyillari bilan to‘qnashadi. Bunday holatda sadoqatning axloqiy qiymati uning mavjudligining o‘zi bilan emas, balki qaysi obyektga, qanday asosda va qanday chegaralarda yo‘naltirilgani bilan belgilanadi. Demak, sadoqatni barqaror qadriyat sifatida tadqiq etish uning mazmuni bilan birga me’yoriy chegaralarini ham aniqlashni talab qiladi.

Maqsadimiz shaxs va jamiyat uyg‘unligida sadoqatning barqaror qadriyat sifatida shakllanish qonuniyatlarini ochib berish, uning strukturaviy komponentlari va institutsional shartlarini aniqlash hamda zamonaviy sharoitga mos refleksiv sadoqat modelini asoslashdan iborat.

Adabiyotlar tahlili. Sadoqat muammosi falsafa tarixida turli tushunchalar - vafodorlik, vafo, burch, do‘stlik, fuqarolik fazilati, e’tiqodga sodiqlik va jamoaga mansublik doirasida yoritilgan. Aristotel do‘stlik va polis hayotini fazilatli hayotning muhim sharti sifatida ko‘rib, barqaror munosabatlar o‘zaro ezgulik istagi va adolat bilan mustahkamlanishini ko‘rsatadi [5]. Sharq axloqiy tafakkurida esa vafo, ahdga sodiqlik, do‘stlik va jamoa farovonligi komil insonning asosiy fazilatlari qatorida talqin qilingan. Abu Nasr Forobiyning fozil jamiyat konsepsiyasida shaxsiy kamolot umumiy saodatga yo‘naltirilgan hamkorlik bilan bog‘lanadi [6]. Bu yondashuv sadoqatni alohida hissiyot emas, balki umumiy ezgulikni ro‘yobga chiqaruvchi ijtimoiy-axloqiy munosabat sifatida anglash imkonini beradi. Alisher Navoiy merosida vafo insoniy munosabatlarning axloqiy mezoni sifatida ko‘rinadi. Uning asarlarida ahdga sodiqlik, do‘stga vafo, saxovat va adolat insonning ma’naviy qiyofasini belgilovchi fazilatlar sifatida talqin etiladi [7]. Mazkur an’ana sadoqatning Sharq tafakkuridagi muhim xususiyatini - uning axloqiy komillik, or-nomus va ijtimoiy mas’uliyat bilan birligini ko‘rsatadi. G‘arb falsafasida sadoqatni mustaqil axloqiy kategoriya darajasida tizimli ishlab chiqqan mutafakkirlardan biri Josiah Royce hisoblanadi. U sadoqatni insonning o‘z hayotiga yaxlit ma’no beradigan sabab yoki maqsadga ongli, amaliy va davomli bag‘ishlanishi sifatida izohlaydi [2]. Royce uchun haqiqiy sadoqat boshqa insonlarning sadoqat qobiliyatini buzmasligi, aksincha uni qo‘llab-quvvatlashi lozim. “Loyalty to loyalty” g‘oyasi sadoqatning axloqiy chegarasini belgilovchi meta-mezon vazifasini bajaradi. Bu g‘oya bugungi pluralistik jamiyatda ham ahamiyatli: shaxsning bir guruhga sadoqati boshqa guruhlarning insoniy qadr-qimmatini inkor etishga aylanmasligi kerak. J. Kleinig sadoqatni munosabatlar va identifikatsiya bilan bog‘liq murakkab axloqiy hodisa sifatida tahlil qilib, uning obyektlari va chegaralari masalasiga alohida e’tibor beradi [1]. Sadoqatning barqarorligi “har qanday sharoitda qolish” bilan emas, balki munosabatning axloqiy asoslarini saqlash bilan o‘lchanadi. A. Hirschmanning “exit, voice and loyalty” modeli tashkilot va institutlar bilan munosabatda sadoqatning faol xususiyatini tushunishda muhimdir [8]. Muallifga ko‘ra, tashkilot faoliyatidan norozilik paydo bo‘lganda shaxs chiqib ketishi yoki o‘z fikrini bildirib, uni yaxshilashga harakat qiladi. Sadoqat “voice” imkoniyatini kuchaytirib, muammolarni ichkaridan konstruktiv tuzatishga undaydi. Bundan sadoqat tanqidning aksi emasligi, aksincha, mas’uliyatli tanqidning motivatsion manbai bo‘lishi mumkinligi kelib chiqadi. E. Durkheim jamiyatning axloqiy yaxlitligini umumiy me’yorlar, kollektiv tasavvurlar va ijtimoiy birdamlik orqali tushuntiradi [9]. P. Berger va T. Luckmann esa ijtimoiy voqelikning kundalik interaksiyalar, institutlashuv va interiorizatsiya jarayonlari orqali shakllanishini ko‘rsatadi [10]. Ushbu nazariyalar sadoqatning shaxs ongida tayyor holda paydo bo‘lmasligini, balki ijtimoiy tajriba, takroriy amaliyot, ramzlar va normativ kutishlar vositasida o‘zlashtirilishini asoslash imkonini beradi. F. Fukuyama va R. Putnam tadqiqotlarida ishonch hamda ijtimoiy kapital jamiyatdagi hamkorlikning asosiy resurslari sifatida talqin qilinadi [3; 4]. Sadoqat ishonchdan farqli kategoriya bo‘lsa-da, ular o‘zaro chambarchas bog‘langan: ishonch sadoqatning shakllanishiga sharoit yaratadi, sadoqat esa barqaror hamkorlik orqali ishonchni qayta ishlab chiqaradi. Institutlar adolatli va prognoz qilinadigan tarzda ishlaganida shaxsning ularga nisbatan sadoqati kuchayadi; normativ va amaliy faoliyat o‘rtasidagi tafovut esa ishonch eroziyasiga olib keladi. A. Giddens va

M. Castellsning zamonaviy jamiyat haqidagi qarashlari identifikatsiya va ijtimoiy munosabatlarning refleksivlashuvi hamda tarmoqlashuvini ko‘rsatadi [11; 12]. Raqamli makonda shaxsning mansubliklari tez o‘zgaradi, turli jamoalar bilan aloqalar bir vaqtning o‘zida mavjud bo‘ladi. Bu sharoit sadoqatni meros qilib olinadigan yoki avtomatik qabul qilinadigan munosabatdan ko‘ra ongli ravishda qayta baholanadigan qadriyatga aylantiradi. Shu sababli zamonaviy sadoqatning refleksiv komponentini alohida ajratish nazariy jihatdan asosli hisoblanadi.

Tadqiqot metodologiyasi. Tadqiqotda dialektik, tizimli, aksiologik, germenevtik, qiyosiy va institutsional yondashuvlar o‘zaro integratsiyada qo‘llanildi. Dialektik yondashuv sadoqatdagi barqarorlik va o‘zgaruvchanlik, shaxsiy manfaat va ijtimoiy burch, erkinlik va mas’uliyat, tanqid va sodiqlik kabi qarama-qarshi jihatlarning o‘zaro birligini ochishga xizmat qildi. Tizimli yondashuv esa sadoqatni alohida fazilat emas, balki ishonch, identifikatsiya, mas’uliyat, qadriyat, xulq va institutsional tajriba o‘rtasidagi aloqalar tizimi sifatida ko‘rib chiqish imkonini berdi. Aksiologik tahlil orqali sadoqatning qadriyat sifatidagi maqomi, uning adolat, inson qadr-qimmati, erkinlik, burch va umumiy manfaat bilan nisbatlari baholandi. Germenevtik yondashuv klassik Sharq va G‘arb manbalaridagi vafo, burch va sadoqat mazmunlarini zamonaviy kontekstda talqin etishda qo‘llanildi. Qiyosiy tahlil sadoqatning an’anaviy va zamonaviy,

shaxslararo va institutsional, hissiy va refleksiv shakllari o‘rtasidagi umumiy va farqli jihatlarni aniqlashga yordam berdi. Institutsional yondashuv asosida oila, ta’lim, mahalla va fuqarolik jamiyati, davlat hamda axborot muhiti sadoqatni shakllantiruvchi ijtimoiy makonlar sifatida tahlil qilindi.

Tahlillar va natijalar. Barqaror qadriyat deganda shaxsning vaqtinchalik vaziyat yoki tashqi bosim ta’sirida emas, balki o‘z e’tiqodi va hayotiy pozitsiyasi asosida muntazam ravishda amal qiladigan axloqiy orientiri tushuniladi. Sadoqat shu maqomga erishishi uchun u uch shartni qanoatlantirishi lozim: birinchidan, shaxs tomonidan anglangan bo‘lishi; ikkinchidan, boshqa fundamental qadriyatlar bilan muvofiqlashgan bo‘lishi; uchinchidan, vaziyat o‘zgarganda ham xulqiy izchillikni ta’minlay olishi kerak. Demak, sadoqatning barqarorligi o‘zgarmaslik emas. Aksincha, u o‘z axloqiy yadrosini saqlagan holda yangi sharoitlarda oqilona ifoda topa olish qobiliyatidir. Sadoqatning ikkinchi mezoni erkin tanlovdir. Majburlash, qo‘rquv yoki manfaat evaziga namoyon bo‘lgan tashqi “sodiqlik” barqaror qadriyat darajasiga ko‘tarilmaydi. Axloqiy sadoqat shaxsning “nega men bu munosabatni davom ettiryapman?” degan savolga asosli javob bera olishi bilan bog‘liq. Bunda shaxs o‘zining aloqadorligi, burchi va mas’uliyatini tan oladi. Uchinchi mezon - davomiylik. Bir martalik yordam yoki hissiy ko‘tarinkilik sadoqatning to‘liq ifodasi emas. Sadoqat vaqt davomida sinovdan o‘tadi: manfaatlar o‘zgarganda, qiyinchilik paydo bo‘lganda yoki muqobil tanlovlar jozibador bo‘lganida shaxs o‘z axloqiy majburiyatiga qanday munosabat bildirishi uning sadoqat darajasini ko‘rsatadi. Biroq davomiylik ham mutlaq emas: obyekt o‘zining axloqiy legitimligini yo‘qotsa, sadoqatni qayta ko‘rib chiqish axloqiy jihatdan zarur [1].

Sadoqatning barqarorligi eng avvalo ishonch bilan bog‘liq. Ishonch - boshqa tomonning xatti-harakatini to‘liq nazorat qilmasdan turib, uning muayyan me’yorlarga rioya etishiga ijobiy kutish bildirishdir. Ishonch mavjud bo‘lmagan muhitda sadoqat ko‘proq nazorat, qo‘rquv yoki manfaatga tayanadi va shu sababli mo‘rt bo‘ladi. Fukuyama ishonchni hamkorlikni yengillashtiruvchi madaniy resurs sifatida ko‘rsatadi [3]; Putnam esa o‘zaro ishonch va tarmoqlarni ijtimoiy kapitalning asosiy elementlari qatoriga kiritadi [4]. Identifikatsiya sadoqatning ikkinchi tayanchidir. Shaxs “bu mening oilam”, “bu mening jamoam”, “bu mening jamiyatim” degan mansublik tuyg‘usiga ega bo‘lganida mazkur birlikning muvaffaqiyati va muammolarini o‘ziga aloqador deb qabul qiladi. Biroq identifikatsiya yopiq guruhiy egoizmga aylanmasligi kerak. Barqaror sadoqat ko‘p darajali identifikatsiyani tan oladi: inson oilasiga, mahallasiga, kasbiy jamoasiga va Vataniga bir vaqtning o‘zida sodiq bo‘ladi. Ularning o‘zaro muvofiqligi umumiy axloqiy mezonlar orqali ta’minlanadi. Mas’uliyat uchinchi tayanch sifatida sadoqatni amaliy xulqqa aylantiradi. Faqat “men sodiqman” degan hissiy e’tirof yetarli emas; sadoqat va’daga amal qilish, vazifani vijdonan bajarish, qiyin vaziyatda hamkorlikni tark etmaslik, umumiy mulk va obro‘ga ehtiyotkor munosabatda bo‘lish kabi harakatlarda namoyon bo‘ladi. Mas’uliyat sadoqatni tekshiriladigan axloqiy pozitsiyaga aylantiradi. Ishonch, identifikatsiya va mas’uliyat o‘zaro aylana hosil qiladi: ishonch identifikatsiyani chuqurlashtiradi, identifikatsiya mas’uliyatni kuchaytiradi, mas’uliyatli xulq esa yangi ishonch hosil qiladi. Aksincha, adolatsizlik ishonchni pasaytiradi, ishonchning pasayishi identifikatsiyani zaiflashtiradi, natijada mas’uliyat tashqi majburiyat sifatida qabul qilina boshlaydi. Shu bois sadoqatning barqarorligini alohida shaxs xususiyati bilan izohlash yetarli emas; u munosabatlar sifatining natijasidir.

Oila sadoqatning birlamchi maktabidir. Bola o‘zaro g‘amxo‘rlik, va’daga amal qilish, ishonch, kattalarga hurmat va kichiklarga mas’uliyat kabi tajribalarni avvalo oilada o‘zlashtiradi. Oilaviy sadoqatning sog‘lom shakli shaxsning individualligini bostirish emas, balki xavfsiz mansublik va o‘zaro yordam tuyg‘usini shakllantirishdir. Oiladagi so‘z va amal birligi bolada axloqiy izchillik modelini hosil qiladi; doimiy ikkiyuzlamachilik esa sadoqatning o‘rniga moslashuvchan konformizmni kuchaytiradi. Ta’lim instituti sadoqatni refleksiv darajaga olib chiqadi. Maktab va oliy ta’limda shaxs nafaqat qoidaga amal qilishni, balki uning ma’nosini tushunish, dalil bilan fikr yuritish, boshqa nuqtai nazarni hurmat qilish va umumiy faoliyat uchun javobgarlikni o‘rganadi. UNESCOning ijtimoiy-emotsional ta’lim bo‘yicha zamonaviy yondashuvlari ham munosabat qurish, mas’ul qaror qabul qilish va boshqalarga g‘amxo‘rlikni ta’limning muhim kompetensiyalari sifatida ko‘rsatadi [13]. Bu kompetensiyalar sadoqatning hissiy va kognitiv asoslarini birlashtiradi. Mahalla va fuqarolik jamiyati shaxsning “yaqin doira”dan kengroq ijtimoiy hamjamiyatga o‘tishini ta’minlaydi. Ko‘ngillilik, o‘zaro yordam, jamoat muammolarini muhokama qilish, qo‘shnichilik mas’uliyati va umumiy tashabbuslarda ishtirok etish orqali sadoqat ijtimoiy daxldorlikka aylanadi. Bunda shaxs jamiyatni mavhum tuzilma sifatida emas, o‘z harakati ta’sir qiladigan hamjamiyat sifatida his etadi.

Davlat va huquqiy institutlar sadoqatning fuqarolik o‘lchovini shakllantiradi. Fuqarolik sadoqati muayyan mansabdor yoki siyosiy vaziyatga shartsiz bog‘lanish emas, balki Konstitutsiya, qonun ustuvorligi, inson qadr-qimmati, Vatan ravnaqi va umumiy manfaat kabi barqaror tamoyillarga mas’uliyatli munosabatdir. O‘zbekiston Respublikasi Konstitutsiyasida insonning sha’ni va qadr-qimmati, huquq va erkinliklari hamda fuqarolarning jamiyat va davlat oldidagi burchlari normativ jihatdan mustahkamlangan [14]. Shu nuqtai nazardan, fuqarolik sadoqati huquq va burchning birligini anglashga tayanadi.

Raqamli kommunikatsiyalar sadoqatning shakllanish muhitini tubdan o‘zgartirdi. Ilgari shaxsning asosiy mansubliklari ko‘proq hududiy va institutsional bo‘lgan bo‘lsa, bugun virtual hamjamiyatlar, professional tarmoqlar, kontent yaratuvchilar atrofidagi auditoriyalar va transmilliy guruhlar ham identifikatsiya manbaiga aylanmoqda [12].

Bunday sharoitda sadoqat tez shakllanishi, tez almashishi va algoritmik axborot oqimlari ta’sirida kuchayadi. Raqamli muhitning ijobiy tomoni shundaki, u shaxsga turli nuqtai nazarlarni ko‘rish, o‘z mansubligini ongli tanlash va fuqarolik tashabbuslarida ishtirok etish imkonini kengaytiradi. Biroq fragmentlangan axborot makoni “echo chamber”, dezinformatsiya va guruhiy qutblashuv orqali ko‘r-ko‘rona sadoqatni ham kuchaytiradi. Shu sababli media va axborot savodxonligi sadoqat tarbiyasining yordamchi emas, balki tarkibiy elementi sifatida qaralishi lozim. Refleksiv sadoqat - shaxsning o‘z sadoqat obyektini, uning qadriyatlari va talablarini muntazam axloqiy baholay olgan holda munosabatni ongli ravishda davom ettirishidir. Refleksiv sadoqat shubhani sadoqatsizlik deb qabul qilmaydi. Aksincha, asosli savol berish, xatoni tan olish va munosabatni yaxshilashga intilish sadoqatning yetuk shaklidir. Bu jihat Hirschmanning “voice” konsepsiyasi bilan uyg‘unlashadi [8].

Refleksiv sadoqatning mezonlari sifatida quyidagilarni ajratadi: axborotni tekshirish; guruh fikridan mustaqil axloqiy baho bera olish; sadoqat obyektining xatosini oqlamaslik; tanqidni buzish emas, takomillashtirish maqsadida bildirish; inson qadr-qimmati va adolatni sadoqatdan yuqori meta-mezon sifatida tan olish. Ushbu mezonlar raqamli jamiyatda sadoqatning barqaror, lekin dogmatik bo‘lmagan shaklini ta’minlaydi.

Sadoqatni ko‘r-ko‘rona itoatkorlik bilan aynanlashtirish nazariy jihatdan xato. Konformizmda shaxs ko‘pincha guruh bosimi yoki qabul qilinish istagi tufayli o‘z fikrini moslashtiradi. Sadoqatda esa munosabatning qadri tan olinadi va uni saqlashga mas’uliyatli intilish mavjud. Konformist guruh xatosini takrorlaydi; sodiq shaxs esa aynan munosabat kelajagi uchun xatoni ko‘rsatishga majbur bo‘ladi. Konstruktiv tanqid sadoqatning faol shaklidir, agar u uch shartga javob bersa: fakt va dalilga tayanishi; shaxsni emas, muammo yoki qarorni nishonga olishi; takomillashtirishga qaratilgan muqobil yechim taklif qilishi. Bunday tanqid institutning legitimligini yemirmaydi, aksincha uning o‘z qadriyatlariga qaytishiga yordam beradi. Shuning uchun demokratik va ochiq institutlarda “tanqidga chidamlilik” sadoqatni mustahkamlovchi omillardan biri hisoblanadi. Bu nuqtada sadoqatning paradoksal xususiyati namoyon bo‘ladi: ba’zan tashqi jihatdan “qarshi chiqish” munosabatni buzish emas, uni axloqiy asosda saqlab qolishning yagona yo‘li bo‘ladi. Agar xodim tashkilotdagi jiddiy adolatsizlikni qonuniy tartibda ko‘tarib chiqsa yoki fuqaro jamoat muammosini asosli tanqid qilsa, bu holat avtomatik ravishda sadoqatsizlik sifatida talqin qilinmasligi kerak. Sadoqatning obyektini uning vaqtinchalik xatosidan farqlash refleksiv sadoqatning muhim belgisi hisoblanadi.

Barqaror sadoqatni darajalar bo‘yicha tahlil qilish uning shaxs va jamiyat uyg‘unligidagi o‘rnini aniqroq ko‘rsatadi. Mikrodarajada sadoqat shaxslararo munosabatlar - oila, do‘stlik, yaqin hamkorlik va kundalik va’dalarga amal qilishda namoyon bo‘ladi. Bu darajada ishonch va emotsional bog‘lanish yetakchi ahamiyatga ega. Mikrodarajadagi tajriba keyingi ijtimoiy munosabatlar uchun axloqiy “skript” vazifasini bajaradi. Makrodarajada sadoqat ta’lim muassasasi, kasbiy jamoa, mahalla, nodavlat tashkilot va boshqa institutlarga mansublikda namoyon bo‘ladi. Bu darajada shaxsning rol va majburiyatlari aniqroq normativ shaklga ega. Sadoqatning barqarorligi tashkilotning adolatli boshqaruvi, ishtirok imkoniyati, tan olinish va o‘zaro ishonchga bog‘liq. Hirschmanning “voice” mexanizmi ayniqsa mezodarajada muhim [8]. Megadarajada sadoqat fuqarolik mas’uliyati, Vatanga daxldorlik, konstitutsiyaviy qadriyatlarga hurmat va umumjamiyat manfaatlarini e’tirof etishda ifodalanadi. Makrodarajadagi sadoqat faqat ramziy his-tuyg‘u emas; qonunlarga ongli rioya qilish, jamoat mulkiga mas’uliyat, soliqlar va fuqarolik burchlariga munosabat, jamiyat ravnaqi uchun bilim va mehnat bilan hissa qo‘shish kabi amaliy shakllarda ko‘rinadi. Uch darajaning o‘zaro uzviyligi “barqaror sadoqatning institutsional-ma’naviy vertikali”ni hosil qiladi. Oilada ishonchni boshdan kechirgan, ta’limda adolatni ko‘rgan, jamoada ishtirok etish tajribasiga ega bo‘lgan shaxsning umumjamiyat qadriyatlariga sadoqati mazmunliroq bo‘lish ehtimoli yuqori. Aksincha, mikro va mezodarajadagi doimiy adolatsizlik makrodarajadagi deklarativ chaqiriqlarning ta’sirini susaytiradi.

Sadoqatni ilmiy tadqiq etishda uni faqat “bor” yoki “yo‘q” tarzida baholash yetarli emas. Barqarorlikni aniqlash uchun bir qator sifat mezonlari taklif etiladi: qadriyatni anglash darajasi; sadoqat obyektiga ishonch; mansublik va identifikatsiya; majburiyatni ixtiyoriy qabul qilish; qiyin vaziyatda xulqiy izchillik; konstruktiv tanqid qobiliyati; boshqa qadriyatlar bilan muvofiqlik; sadoqat obyektining axloqiy legitimligini baholay olish. Mazkur mezonlar asosida kelgusida Likert shkalalari, yarim strukturali intervyular va vaziyatli axloqiy dilemmalar yordamida empirik indikatorlar ishlab chiqsak bo‘ladi. Masalan, “institut xato qilganda uni tark etish yoki yaxshilashga urinish”, “guruh manfaati adolat tamoyiliga zid bo‘lganda tanlov”, “shaxsiy manfaat bilan umumiy burch to‘qnashganda qaror” kabi vaziyatlar refleksiv sadoqatni o‘lchashga yordam beradi. Bunda tadqiqot etikasi va respondentning erkin fikr bildirish huquqi qat’iy ta’minlanishi kerak.

Sadoqatni rivojlantirishning birinchi strategik yo‘nalishi - qadriyatlar ta’limini dialogik shaklga o‘tkazish. Tayyor shiorlarni takrorlash o‘rniga real axloqiy dilemmalarni muhokama qilish, tarixiy va zamonaviy misollarni qiyoslash, “nima uchun?” savoliga javob izlash sadoqatning kognitiv va refleksiv asoslarini kuchaytiradi. Ikkinchi yo‘nalish - institutlarda so‘z va amal birligini ta’minlash. Adolatli baholash, ochiq muloqot, hisobdorlik va va’daga amal qilish tarbiyaviy nutqdan ko‘ra kuchliroq ta’sir ko‘rsatadi. Uchinchi yo‘nalish - ijtimoiy ishtirokni kengaytirish. Yoshlar va fuqarolar umumiy muammolarni hal etish, ko‘ngillilik, mahalliy tashabbus va jamoaviy loyihalarda real mas’uliyat olganida sadoqat passiv hissiyotdan faol daxldorlikka o‘tadi. To‘rtinchi yo‘nalish - media savodxonlik va tanqidiy tafakkurni rivojlantirish. Bu

raqamli guruhiy bosim, dezinformatsiya va manipulyativ “sadoqat” chaqiriqlaridan himoyalanish uchun zarur. Beshinchi yo‘nalish - institutlararo aksiologik muvofiqlikni kuchaytirish. Oila, ta’lim, mahalla, davlat va media makonidagi asosiy axloqiy signallar bir-birini inkor etmasligi lozim. Bunda barcha institutlarning bir xil fikrni takrorlashi emas, balki inson qadr-qimmati, adolat, halollik, mas’uliyat va qonuniylik kabi fundamental mezonlarda uyg‘unligi nazarda tutiladi. Aynan shu muvofiqlik sadoqatni uzoq muddatli va barqaror qadriyatga aylantiradi.

Sadoqatning barqaror qadriyatga aylanishida tarixiy xotira muhim vositachilik vazifasini bajaradi. Shaxs o‘zini faqat hozirgi ijtimoiy vaziyatning ishtirokchisi sifatida emas, balki muayyan tarixiy-madaniy davomiylikning vakili sifatida anglaganida uning mansublik hissi chuqurlashadi. Tarixiy xotira ajdodlar tajribasini mutlaq ideallashtirish emas; u o‘tmishdagi axloqiy tanlovlar, muvaffaqiyat va xatolarni anglash orqali bugungi mas’uliyatni shakllantirishdir. Shu ma’noda sadoqat avlodlar o‘rtasidagi ma’naviy ko‘prik vazifasini bajaradi. Avlodlararo sadoqatning mazmuni merosni aynan takrorlashdan iborat emas. Har bir avlod mavjud qadriyatlarni yangi sharoitda qayta talqin qiladi. Agar sadoqat faqat o‘tmish shakllarini o‘zgartirmasdan saqlash talabi sifatida qo‘yilsa, u ijtimoiy yangilanishga to‘sqinlik qiladi. Aksincha, merosning axloqiy yadrosini - halollik, vafo, adolat, ilmga hurmat, jamoaga mas’uliyat kabi tamoyillarni zamonaviy institutlar va turmush shakllariga mos ifodalash sadoqatning ijodiy xususiyatini ko‘rsatadi. Tarixiy xotira bilan bog‘langan sadoqat shaxsning Vatanga munosabatida ham namoyon bo‘ladi. Vatanga sadoqat hududga nisbatan hissiy bog‘lanish bilangina cheklanmaydi; u tarixiy merosni bilish, jamiyatning bugungi muammolariga befarq bo‘lmaslik va kelajak avlodlar uchun ijtimoiy sharoitni yaxshilashga intilishni ham qamrab oladi. Bunday yondashuvda vatanparvarlik retrospektiv faxr va prospektiv mas’uliyat birligiga aylanadi. Avlodlararo davomiylikning yana bir jihati - axloqiy namuna mexanizmidir. Banduraning ijtimoiy-kognitiv nazariyasida xulqning kuzatish va model orqali o‘zlashtirilishi muhim o‘rin tutadi [18]. Shaxs sadoqat haqida eshitganidan ko‘ra, uni ota-ona, ustoz, rahbar va jamoat vakillarining amaliy xulqida ko‘rganida qadriyatning hayotiy mazmunini chuqurroq o‘zlashtiradi. Shu sababli sadoqat tarbiyasida namuna va institutsional amaliyot verbal targ‘ibotdan kam bo‘lmagan ahamiyatga ega.

Sadoqatning jamiyat miqyosidagi funksiyalaridan biri ijtimoiy munosabatlarda prognoz qilinuvchanlikni oshirishdir. Insonlar va institutlar o‘zaro majburiyatlarga ma’lum darajada sodiq bo‘lganda hamkorlik xarajatlari kamayadi: har bir harakatni doimiy nazorat qilish, barcha ehtimollarni shartnoma bilan qamrab olish yoki majburlash vositalariga tayanish zarurati pasayadi. Shu ma’noda sadoqat ishonch bilan birga ijtimoiy koordinatsiyaning ma’naviy resursidir [3; 4]. Ikkinchi funksiya - inqiroz sharoitida birdamlikni saqlash. Oddiy vaziyatda hamkorlik manfaatlar mosligi bilan ham davom etadi, biroq qiyinchilik paytida munosabatning qadriy asosi sinovdan o‘tadi. Oila, kasbiy jamoa yoki fuqarolik hamjamiyatida sadoqat mavjud bo‘lsa, ishtirokchilar qisqa muddatli noqulaylikka qaramay umumiy maqsadni qo‘llab-quvvatlashga moyil bo‘ladi. Bunda sadoqat ijtimoiy tizimning rezilyentlik qobiliyatini oshiradi. Uchinchi funksiya - axloqiy identitetni mustahkamlash. Inson o‘zini kim deb bilishi ko‘p jihatdan qaysi munosabat va qadriyatlarga sodiqligi bilan belgilanadi. Kasbiga sodiq shifokor, ilmga sodiq tadqiqotchi, oilasiga mas’ul ota-ona yoki fuqarolik burchiga sodiq shaxs o‘z identitetini muayyan axloqiy majburiyatlar orqali ifodalaydi. Sadoqat shu tariqa “men kimman?” savolini “men nimaga va kimga nisbatan mas’ulman?” savoli bilan bog‘laydi. To‘rtinchi funksiya - ijtimoiy kapitalni qayta ishlab chiqarish. Sodiq va mas’uliyatli hamkorlik tajribasi keyingi hamkorlik uchun ijobiy kutish hosil qiladi. Bu jarayon jamoada o‘zaro yordam, ko‘ngillilik va fuqarolik ishtirokini rag‘batlantiradi. Biroq yopiq guruh ichidagi kuchli sadoqat tashqi guruhlarga ishonchsizlik bilan birlashsa, “bog‘lovchi” kapital kuchayib, “ko‘prik” kapital zaiflashishi ehtimoli bor. Shuning uchun sadoqatni umumiy insoniy va fuqarolik qadriyatlari bilan muvozanatlash muhim [4]. Beshinchi funksiya - ma’naviy xavfsizlikni ta’minlash. Qadriy orientirlari beqaror, mansubliklari faqat vaziyatga qarab almashadigan shaxs manipulyativ axborot va guruhiy bosimga nisbatan zaifroq bo‘ladi. Biroq ma’naviy xavfsizlik dogmatik yopilish degani emas. Refleksiv sadoqat shaxsga barqaror axloqiy tayanch beradi, ayni vaqtda yangi axborotni baholash va zarur bo‘lsa o‘z pozitsiyasini asosli ravishda qayta ko‘rib chiqish imkonini saqlaydi.

Sadoqatning shakllanishida “qadriyat - ishonch - identifikatsiya - mas’uliyat - xulq - refleksiya” zanjiri konseptual ahamiyatga ega. Qadriyat sadoqatning nima uchun zarurligini tushuntiradi; ishonch munosabatning xavfsizligini ta’minlaydi; identifikatsiya obyektni “o‘ziniki” sifatida qabul qilishga yordam beradi; mas’uliyat sadoqatni majburiyatga aylantiradi; xulq uning amaliy tasdig‘i bo‘ladi; refleksiya esa butun zanjirning axloqiy yo‘nalishini tekshiradi. Ushbu elementlardan birining uzoq muddat zaiflashishi sadoqatning umumiy barqarorligiga ta’sir ko‘rsatadi. Shu nuqtai nazardan sadoqatni rivojlantirish strategiyasi faqat hissiy ta’sirga yoki faqat normativ talabga tayanmasligi kerak. Hissiy bog‘lanish tanqidiy anglashsiz fanatizmga, normativ talab ishonchsiz muhitda formalizmga, faqat bilim esa amaliy tajribasiz deklarativ munosabatga aylanadi. Barqaror sadoqat ushbu omillarning muvozanatini talab qiladi. Aynan shuning uchun sadoqatni shakllantirish masalasi falsafa, axloqshunoslik, sotsiologiya, pedagogika va ijtimoiy psixologiya kesishmasidagi kompleks tadqiqot obyektidir. Natijada shaxs va jamiyat uyg‘unligida sadoqatning eng maqbul shakli “ongli-barqaror sadoqat” sifatida tavsiflanadi. Uning mazmunida mansublik va mustaqillik, davomiylik va yangilanish, burch va erkinlik, ishonch va tanqid bir-birini inkor etmaydi. Bunday sadoqat shaxsni jamiyatga singdirib yubormaydi va

jamiyatni shaxsiy manfaatlarning oddiy yig‘indisiga aylantirmaydi; aksincha, ikki tomon o‘rtasida mas’uliyatli axloqiy hamkorlik maydonini yaratadi.

O‘zbekiston sharoitida mazkur yondashuvning amaliy ahamiyati oila, mahalla, ta’lim va fuqarolik institutlarining kuchli ijtimoiy roliga bog‘liq. Ushbu institutlar o‘rtasidagi hamkorlik sadoqatni shiori emas, kundalik tajribaga asoslangan qadriyat sifatida shakllantirish imkonini beradi. Ayniqsa, yoshlarning mustaqil fikrlashi bilan Vatanga daxldorligini qarama-qarshi qo‘ymaslik muhim: tanqidiy fikrlash va fuqarolik sadoqati bir-birini inkor etmaydi, aksincha, qonuniy va konstruktiv shaklda bir-birini mustahkamlaydi. Tadqiqotimizning nazariy cheklovi shundaki, taklif etilgan “institutlararo aksiologik rezonans” va besh komponentli model empirik sinovdan o‘tkazilmagan. Shu sababli keyingi izlanishlarda turli yosh, kasb va hududiy guruhlarda sadoqatning kognitiv, emotsional, normativ, xulqiy va refleksiv komponentlarini o‘lchash, institutlarga ishonch bilan ularning o‘zaro bog‘liqligini tekshirish maqsadga muvofiq. Bunday empirik verifikatsiya konseptual modelning tushuntirish imkoniyatlarini aniqlashtiradi.

Xulosa. Birinchidan, sadoqat shaxs va jamiyat o‘rtasidagi axloqiy aloqalarni barqarorlashtiruvchi, mansublikni mas’uliyat bilan birlashtiruvchi murakkab aksiologik hodisadir.

Ikkinchidan, sadoqatning axloqiy maqomi uning obyektiga va chegaralariga bog‘liq. Inson qadr-qimmati, adolat va qonuniylikka zid talablarni bajarish sadoqatning yetuk shakli sifatida baholanmaydi.

Uchinchidan, oila, ta’lim, mahalla, fuqarolik jamiyati, davlat va axborot muhiti sadoqatning turli komponentlarini shakllantiradi. Ularning e’lon qilgan qadriyatlari va real amaliyoti o‘rtasidagi muvofiqlik “institutlararo aksiologik rezonans”ni yuzaga keltirib, sadoqatning barqarorligini oshiradi.

To‘rtinchidan, raqamli jamiyat sharoitida refleksiv sadoqat alohida ahamiyat kasb etadi. U mustaqil fikrlash, media savodxonlik, konstruktiv tanqid va mas’ul fuqarolik bilan uyg‘unlashadi. Shuning uchun sadoqatni konformizm bilan emas, qadriyatga asoslangan ongli daxldorlik bilan bog‘lash maqsadga muvofiq.

Beshinchidan, maqolada barqaror sadoqatning aksiologik-kognitiv, emotsional-identifikatsion, normativ-mas’uliy, faoliyatli-xulqiy va refleksiv-kritik komponentlardan iborat konseptual modeli taklif etildi. Model sadoqatni mikro-, mezo- va makrodarajalarda o‘zaro bog‘langan holda o‘rganish hamda keyingi empirik tadqiqotlar uchun indikatorlar ishlab chiqishga metodologik asos bo‘la oladi.

Annotatsiya: *Maqolada Abu Rayhon Beruniy ilmiy merosida empirik bilimlarning shakllanishiga ta'sir ko'rsatgan tarixiy, siyosiy, madaniy va intellektual muhit tahlil qilinadi. Beruniy ilmiy tafakkuri alohida shaxsiy iste'dod mahsuli sifatida emas, balki Xorazm ilmiy muhiti, musulmon Sharqidagi tarjima va ilmiy meros an'analari, G'aznaviylar davri, Hindiston bilan bevosita tanishuv, astronomiya, geografiya, mineralogiya va tarixiy-etnografik tadqiqotlarga bo'lgan amaliy ehtiyojlar bilan bog'liq holda yoritiladi. Tadqiqot natijalari Beruniy merosida empirik bilim kuzatuv, tajriba, o'lchov, qiyosiy tahlil va manbalarni tekshirish tizimi sifatida shakllanganini ko'rsatadi.*

Kalit so'zlar: *Beruniy, empirik bilim, Xorazm, Ma'mun akademiyasi, G'aznaviylar, Hindiston, astronomiya, geografiya, mineralogiya, manbashunoslik*

ИСТОРИЧЕСКАЯ СРЕДА, ПОВЛИЯВШАЯ НА ФОРМИРОВАНИЕ ЭМПИРИЧЕСКОГО ЗНАНИЯ В НАУЧНОМ НАСЛЕДИИ БИРУНИ

Аннотация: *В статье анализируется историческая, политическая, культурная и интеллектуальная среда, повлиявшая на формирование эмпирического знания в научном наследии Абу Райхана Бируни. Научное мышление Бируни рассматривается не только как результат личного таланта, но и как явление, связанное с хорезмской научной средой, традициями перевода и научного наследия мусульманского Востока, эпохой Газневидов, непосредственным знакомством с Индией, а также практическими потребностями астрономии, географии, минералогии и историко-этнографических исследований. Результаты показывают, что эмпирическое знание у Бируни формировалось как система наблюдения, опыта, измерения, сравнительного анализа и проверки источников.*

Ключевые слова: *Бируни, эмпирическое знание, Хорезм, Академия Мамуна, Газневиды, Индия, астрономия, география, минералогия, источниковедение*

THE HISTORICAL ENVIRONMENT THAT INFLUENCED THE FORMATION OF EMPIRICAL KNOWLEDGE IN AL-BIRUNI'S SCIENTIFIC LEGACY

Abstract: *The article examines the historical, political, cultural, and intellectual environment that influenced the formation of empirical knowledge in the scientific legacy of Abu Rayhan al-Biruni. His scientific thought is interpreted not merely as the product of individual genius, but as a phenomenon shaped by the Khwarazmian scholarly milieu, the translation and intellectual traditions of the Muslim East, the Ghaznavid period, direct contact with India, and the practical needs of astronomy, geography, mineralogy, and historical-ethnographic inquiry. The study shows that empirical knowledge in al-Biruni's legacy developed as a system of observation, experience, measurement, comparative analysis, and source verification.*

Keywords: *al-Biruni, empirical knowledge, Khwarazm, Ma'mun Academy, Ghaznavids, India, astronomy, geography, mineralogy, source studies.*

KIRISH. Abu Rayhon Beruniy ilmiy merosida empirik bilimlarning shakllanishi o'rta asr Markaziy Osiyo ilm-fani tarixidagi muhim tadqiqot muammolaridan biridir. Beruniy asarlarida kuzatuv, tajriba, o'lchov, qiyoslash va dalilni tekshirish usullari tasodifiy tarzda paydo bo'lmagan. Ular Xorazm ilmiy muhiti, musulmon Sharqidagi tarjima harakati, qadimgi yunon, fors, hind va arab ilmiy an'analari, G'aznaviylar davridagi siyosiy jarayonlar hamda amaliy ehtiyojlar bilan bog'liq tarixiy sharoitda shakllangan. Shu sababli Beruniy empirizmini faqat individual daholik belgisi sifatida emas, balki aniq tarixiy-intellektual muhit mahsuli sifatida talqin qilish lozim.

Mavzu bo‘yicha jalb etilgan manba va adabiyotlarda Beruniy yashagan davr chuqur geosiyosiy va madaniy o‘zgarishlar bilan belgilangani ko‘rsatiladi. Arab xalifaligi istilosidan avval Movarounnahrda Sug‘d konfederatsiyasi Zarafshon va Qashqadaryo vohalarini siyosiy jihatdan birlashtirgan, G‘arbiy Turk xoqonligidagi ichki beqarorlik esa mintaqadagi siyosiy muvozanatga kuchli ta’sir ko‘rsatgan [Ungalov, 2020, p. 668]. Bu tarixiy fon keyinchalik arab tili, islom sivilizatsiyasi, tarjima an’analari va ilmiy markazlarning mintaqaga kirib kelishi uchun murakkab, lekin mahsuldor asos yaratdi.

Beruniy ilmiy merosidagi empirik bilim tushunchasi zamonaviy laboratoriya tajribasi bilan aynanlashtirilmasligi kerak. Uning davrida empirik bilim, avvalo, tabiat va jamiyat hodisalarini bevosita kuzatish, o‘lchash, turli manbalarni solishtirish, matematik hisob-kitob qilish va ma’lumotni mantiqiy tekshirish bilan bog‘liq edi. Beruniy qibla yo‘nalishini, geografik koordinatalarni, Yer radiusini, minerallar xossalarini, hind jamiyatining diniy-falsafiy qarashlarini va qadimgi xalqlar taqvimlarini o‘rganishda aynan shu yondashuvdan foydalangan. Maqolaning asosiy ilmiy savoli quyidagicha qo‘yiladi: Beruniy ilmiy merosida empirik bilimlarning shakllanishiga qanday tarixiy muhit, ilmiy maktablar, madaniyatlararo aloqalar va amaliy ehtiyojlar ta’sir ko‘rsatgan?

METODLAR. Tadqiqot tarixiy-tahliliy, qiyosiy, manbashunoslik, kontekstual va konseptual tahlil usullari asosida olib borildi. Tarixiy-tahliliy metod Beruniy empirik tafakkurining Xorazm, G‘azna, Hindiston va musulmon Sharqi ilmiy markazlari bilan aloqasini ochish uchun qo‘llandi. Qiyosiy metod orqali Beruniy merosida astronomik kuzatuv, geografik o‘lchov, mineralogik tajriba, etnografik kuzatuv, dinshunoslik tahlili va xronologik hisoblarning umumiy metodologik jihatlari solishtirildi.

Manbashunoslik yondashuvi Beruniy haqidagi zamonaviy tadqiqotlarda keltirilgan dalillarni sahifa aniqligi, bibliografik ishonchlilik va mavzuga aloqadorlik mezonlari asosida saralashga xizmat qildi. Maqolada “tarixiy muhit”, “empirik bilim”, “ilmiy kuzatuv”, “tajriba”, “o‘lchov”, “madaniyatlararo ilmiy almashinuv”, “manbashunoslik dalili”, “ilmiy maktab” va “amaliy ehtiyoj” tushunchalari tahliliy birlik sifatida belgilandi.

Beruniy ilmiy merosida empirik bilimlarning shakllanishiga ta’sir qilgan omillar quyidagicha tasniflandi: Xorazm ilmiy muhiti; Ma’muniylar davri ilmiy doiralari; qadimgi yunon, hind, fors va arab ilmiy merosi; G‘aznaviylar davri va Hindiston bilan bevosita aloqalar; astronomiya va geografiyadagi amaliy ehtiyojlar; mineralogiya, farmakologiya va tabiiy-ilmiy kuzatuvlar; tarixiy-etnografik ma’lumotlarni qiyoslash zarurati. Manba tanlashda sahifa aniqligi va bibliografik ehtiyotkorlik asosiy talab sifatida saqlandi.

NATIJALAR. Tadqiqotga jalb etilgan materiallar asosida aniqlanishicha, Beruniy empirik bilimlarining shakllanishida Xorazm ilmiy muhiti birlamchi ahamiyatga ega bo‘lgan. Kohar ma’lumotlariga ko‘ra, Beruniy shakllangan davrda Xorazmning ilmiy-madaniy tafakkuri uning tanqidiy fikrlashiga ta’sir ko‘rsatgan; u matematika, falsafa, geografiya va ayniqsa astronomiyaga alohida qiziqqan [Kohar, 2025, p. 258]. Xorazm, Kyat, Urganch, Samarqand va Buxoro kabi shaharlarda astronomlar uchun maktablar tashkil etilgani va rasadxonalar qurilgani Markaziy Osiyoda amaliy kuzatuvga asoslangan ilmiy infratuzilma mavjud bo‘lganini ko‘rsatadi [Kohar, 2025, p. 259].

Bu muhitda ilmiy bilim faqat kitobiy nazariya sifatida emas, amaliy kuzatuv va hisoblash madaniyati sifatida rivojlangan. Beruniy Abu Nasr Mansur orqali Yevklid geometriyasi va Ptolemey astronomiyasi elementlari bilan tanishgan, bu esa uning keyingi geodezik va astronomik izlanishlariga nazariy asos bergan [Kohar, 2025, p. 260]. Shu bilan birga, Beruniy antik avtoritetlarga ko‘r-ko‘rona ergashmagan. Kohar keltirgan misolda u Ray shahrida mashhur astronom bilan bahsga kirishib, nazariy da’voga “voqelik buni tasdiqlamaydi” mazmunida e’tiroz bildirgan [Kohar, 2025, p. 259]. Bu holat Beruniy tafakkurida empirik fakt nazariy avtoritetdan ustun qo‘yilganini ko‘rsatadi.

G‘aznaviylar davri Beruniy empirizmining shakllanishida murakkab, ikki tomonlama rol o‘ynagan. Bir tomondan, Mahmud G‘aznaviy yurishlari siyosiy zo‘ravonlik va majburiy ko‘chishlar bilan bog‘liq edi. Boshqa tomondan, aynan Hindistonga harbiy yurishlar Beruniyga Shimoliy Hindistonning ichki hududlariga kirish, hind madaniyati, dini, fani va urf-odatlarini bevosita kuzatish imkonini bergan. Xoldarov Beruniyning Hindistonda uzoq muddat bo‘lishi uning immersiv tadqiqotga sadoqatini ko‘rsatishini, bu davrda u hind urf-odatlari, an’analari va amaliyotlarini diqqat bilan kuzatib, ularni aniq qayd etganini ta’kidlaydi [Xoldarov, 2024, p. 237].

Hindiston bilan bevosita tanishuv Beruniy empirik metodini madaniyatlararo manbashunoslik darajasiga olib chiqdi. U hind matnlariga vositasiz kirish uchun sanskrit tilini o‘rgandi, bu esa boshqa madaniyatni o‘z tili va ichki nuqtayi nazari orqali tushunishga intilganini ko‘rsatadi [Xoldarov, 2024, p. 237]. Al Masud va Abdullah ham Beruniy hind ilohiyoti va falsafasini asl tildagi matnlar orqali tekshirganini, hind diniy qarashlarini ilmiy va empirik yondashuv bilan xolis taqdim etganini qayd etadi [Al Masud, Abdullah, 2021, p. 116]. Demak, Beruniyda empirik bilim faqat tabiiy hodisani ko‘rish emas, balki madaniy matn, til, guvohlik va amaliy hayotni solishtirish orqali ham shakllangan.

Beruniy empirik merosida qadimgi yunon, hind, fors va arab ilmiy an’analarining sintezi ham muhim omil bo‘lgan. “Qadimgi xalqlardan qolgan yodgorliklar” asari keng madaniy almashinuv va islom olamidagi intellektual yuksalish davrida yaratilgan bo‘lib, Beruniy yunon, fors va hind matnlariga murojaat qilish imkoniga ega edi [Beknazarov, 2025, p. 14]. Ushbu asarning asosiy maqsadi yunonlar, forslar, hindlar va arablar kabi turli sivilizatsiyalarning kalendar tizimlarini

hujjatlashtirish va qiyoslashdan iborat bo‘lgan [Beknazarov, 2025, p. 14]. Bu holat empirik bilimning tarixiy-xronologik shakli Beruniyda hisob-kitob va qiyosiy manbashunoslik bilan tutashganini ko‘rsatadi.

Astronomiya va geografiyadagi amaliy ehtiyojlar ham Beruniy empirik tafakkurini shakllantirgan muhim omillardan biridir. Islomiy amaliyotda qibla yo‘nalishini aniqlash, namoz vaqtlari, taqvimlar, safar masofalari va shaharlar koordinatalarini belgilash ehtiyoji matematik astronomiya va geodeziyaga kuchli turtki bergan. Kohar tadqiqotida Beruniy qibla yo‘nalishini aniqlashda astronomik va matematik hisoblarni birlashtirgani, “Al-Qonun al-Mas‘udiy”da bu masalani sferik trigonometriya orqali izohlashga intilgani ko‘rsatiladi [Kohar, 2025, p. 253–254]. Bu yerda diniy ehtiyoj ilmiy kuzatuv va matematik aniqlikni rivojlantiruvchi omilga aylangan.

Geografik o‘lchovlarda Beruniy empirik bilimni masofa, burchak va koordinata bilan bog‘ladi. Bakhromzod ma’lumotlariga ko‘ra, Bag‘dod va Xorazm orasidagi uzunlik farqini aniqlash uchun 997-yil 24-maydagi Oy tutilishidan foydalangan sinxron kuzatuv tajribasi Beruniy va Abu al-Vafo al-Buzjoniy nomi bilan bog‘lanadi [Bakhromzod, p. 7]. Shuningdek, Beruniy joylar koordinatalarini aniqlash va aholi punktlari orasidagi masofalarni tuzatishga bag‘ishlangan risolasida kenglik va uzunlikni hisoblash usullarini tizimlashtirgan [Bakhromzod, p. 2–3]. Bunday tajribalar empirik bilimlarning transhududiy hamkorlik, astronomik hodisa va matematik hisob asosida shakllanganini ko‘rsatadi.

Mineralogiya va tabiiy-ilmiy kuzatuvlar Beruniy empirizmining yana bir tayanch yo‘nalishidir. Ganiyev ma’lumotlariga ko‘ra, Beruniy mineralogiyada qattiq va suyuq jismlarning solishtirma og‘irligini o‘z asbobi yordamida o‘lchagan, minerallar tasnifini taklif qilgan [Ganiyev, 2023, p. 356]. Uning Amudaryo vodiysi geologik o‘tmishi va Orol dengizi shakllanishi haqidagi xulosalari o‘z davri uchun muvaffaqiyatli geologik tahlil sifatida baholanadi [Ganiyev, 2023, p. 356–357]. Bu dalillar Beruniy empirik bilimlarining faqat astronomiya va geografiyaga emas, balki geologiya, mineralogiya va tabiiy jarayonlarni uzoq muddatli kuzatishga ham tayanganini bildiradi.

Beruniy merosida farmakologik va tibbiy-amaliy ehtiyojlar ham ilmiy ixtisoslashuvga turtki bergan. Roohnavaz va hammualliflar Beruniy farmatsiyani tibbiyotdan ajratilgan mustaqil soha sifatida ko‘rsatgan ilk olimlardan biri bo‘lganini qayd etadi [Roohnavaz et al., 2022, p. 357]. Bu holat o‘rta asr ilmiy muhitida amaliy ehtiyojlar, xususan dori moddalari, ularning nomlari, xossalari va qo‘llanishini aniq tasniflash zarurati empirik bilimlarni sohaga ajratish va ixtisoslashtirishga olib kelganini ko‘rsatadi.

Muhokama

Beruniy empirik bilimlarini faqat individual daholik mahsuli sifatida talqin qilish yetarli emas. Albatta, uning shaxsiy qobiliyati, til bilimi, matematik tafakkuri va tanqidiy zakovati beqiyos edi. Biroq bu qobiliyatlar aniq tarixiy muhitda shakllandi: Xorazm ilmiy maktablari unga dastlabki nazariy va amaliy poydevor berdi; musulmon Sharqi tarjima an’analari antik va hind bilimlariga yo‘l ochdi; G‘aznaviylar davri uni Hindiston bilan bevosita yuzlashtirdi; amaliy diniy, geografik va davlat boshqaruvi ehtiyojlari esa kuzatuv va o‘lchovning ahamiyatini oshirdi.

Xorazm ilmiy muhiti Beruniy tafakkurida nazariya va amaliyotning uzviy birligini shakllantirdi. Astronomlar maktablari, rasadxonalar, ustoz-shogird an’analari, geometriya va astronomiya ta’limi uning keyingi asarlarida ko‘rinadigan o‘lchovga asoslangan yondashuvni tayyorladi [Kohar, 2025, p. 258–260]. Bu muhitda ilmiy savol ko‘pincha amaliy masala bilan bog‘liq edi: qibla qayerda, shaharlar orasidagi masofa qancha, vaqt qanday hisoblanadi, osmon hodisasi qachon yuz beradi? Shunday savollar empirik bilimni ijtimoiy ehtiyoj bilan bog‘ladi.

G‘azna va Hindiston tajribasi esa Beruniy metodologiyasini kengaytirdi. Hindistonni o‘rganishda u boshqa madaniyatni tashqi mezon bilan hukm qilishdan ko‘ra, uning matnlari, tili, marosimlari, urf-odatlari va ilmiy qarashlarini ichki mantiqi bilan tushunishga urindi. Xoldarov Beruniy metodologiyasida empirik kuzatuv, lingvistik mahorat va qiyosiy istiqbol birlashganini ko‘rsatadi [Xoldarov, 2024, p. 236]. Bu yondashuv Beruniy empirik bilimlarini tabiiy fanlardan tashqari etnografiya, dinshunoslik va qiyosiy madaniyatshunoslik maydoniga olib chiqdi.

Beruniy ilmiy uslubida kuzatuv, hisob-kitob va manbalarni solishtirish bir-biridan ajralmaydi. “Qadimgi xalqlardan qolgan yodgorliklar”da kalendarlar va bayramlar qiyoslanadi; qibla masalasida astronomiya va matematika ishlatiladi; mineralogiyada moddalarning fizik xossalari o‘lchanadi; Hindiston haqidagi tadqiqotlarda esa yozma matn, til, urf-odat va bevosita kuzatuv birlashtiriladi. Syukur va hammualliflar Beruniy spekulyatsiya va xurofotni rad etib, kuzatuv hamda tajribaga asoslangan ma’lumotlarni ilgari surganini qayd etadi [Syukur et al., 2025, p. 54]. Bu jihat Beruniy empirizmini o‘z davri uchun metodologik jihatdan kuchli qiladi.

Shu bilan birga, Beruniy empirizmini zamonaviy eksperimental fan bilan to‘liq aynanlashtirish ilmiy ehtiyotkorlikka zid bo‘ladi. Uning tajribasi hozirgi laboratoriya standarti, statistik protokol yoki zamonaviy ilmiy institut shakliga ega emas edi. U o‘z davrining qo‘lyozma madaniyati, diniy-falsafiy tili, saroy homiyligi va siyosiy beqarorligi ichida faoliyat yuritdi. Shu bois Beruniy merosini o‘rganishda qo‘lyozma nusxalari, tarjimalar, keyingi tahrirlar, terminologik tafovutlar va zamonaviy talqinlardagi ortiqcha modernizatsiya xavfi hisobga olinishi kerak.

Beruniy empirik bilimlari bugungi tarixchi uchun bir necha muhim imkoniyat yaratadi. Birinchidan, ular o‘rta asr Markaziy Osiyo ilmiy muhitining amaliy va ko‘p madaniyatli xarakterini o‘rganishga yordam beradi. Ikkinchidan, Xorazm va G‘aznaviylar davri ilmiy aloqalarini aniq tarixiy jarayonlar bilan bog‘lash imkonini beradi. Uchinchidan, Hindiston

haqidagi musulmon Sharqi tasavvurlarini manbashunoslik nuqtayi nazaridan tahlil qilish uchun muhim asos yaratadi. To‘rtinchidan, astronomiya, geografiya, mineralogiya va etnografiya tarixida kuzatuv, o‘lchov va qiyosiy tahlilning shakllanishini ko‘rsatadi. Atapour va hammualliflar Web of Science ma’lumotlariga tayangan holda Beruniy islom oltin asri olimlari orasida yuqori iqtibos ko‘rsatkichiga ega ekanini qayd etadi [Atapour et al., 2025, p. 110]. Bu holat uning merosi zamonaviy fan tarixi tadqiqotlarida ham faol muhokama qilinayotganini tasdiqlaydi.

XULOSA. Beruniy ilmiy merosida empirik bilimlarning shakllanishi Xorazm ilmiy muhiti, musulmon Sharqi tarjima an’analari, madaniyatlararo aloqalar, G‘aznaviylar davri va amaliy ilmiy ehtiyojlar bilan uzviy bog‘liq bo‘lgan; ayni shu sababli uning empirizmini faqat shaxsiy iste’dod mahsuli sifatida talqin qilish biryoqlama yondashuv bo‘lardi. Olim tafakkurida kuzatuv va matematik hisobning dastlabki poydevorini Xorazm ilmiy maktablari, astronomlar doiralari hamda geometriya va astronomiya ta’limi yaratgan bo‘lib, bu muhit nazariy bilimni amaliy o‘lchov va dalil bilan bog‘lashga xizmat qildi. G‘aznaviylar davri va Hindiston bilan bevosita tanishuv esa uning empirik metodini etnografik, dinshunoslik va qiyosiy manbashunoslik darajasiga ko‘tardi; sanskrit tilini o‘rganishi, hind matnlarini ularning ichki mantiqi bilan tushunishga intilishi va bevosita kuzatuvga tayanishi ilmiy xolisligini yanada kuchaytirdi. Bu empirik bilimlar Beruniy merosida astronomik kuzatuv, geografik o‘lchov, qibla va koordinatalarni aniqlash, Yer radiusi hamda masofalarni hisoblash, minerallar xossalarini o‘rganish, kalendarlarni qiyoslash va tarixiy-etnografik ma’lumotlarni tekshirish shakllarida namoyon bo‘ladi. Garchi Beruniy empirizmi zamonaviy laboratoriya fani bilan aynan bir xil bo‘lmasa-da, kuzatuv, tajriba, o‘lchov, qiyosiy tahlil va dalilni tekshirishga tayangan jihatlari bilan u keyingi ilmiy tafakkur tarixida muhim poydevor vazifasini bajargan; shu bois kelgusi tadqiqotlarda uning asarlarini qo‘lyozma an’anasi, tarjima tarixi va aniq ilmiy terminologiya bilan bog‘liq holda yanada chuqurroq o‘rganish maqsadga muvofiqdir.

РОЛЬ ЧТЕНИЯ ХУДОЖЕСТВЕННОЙ ЛИТЕРАТУРЫ В НАКОПЛЕНИИ ЧЕЛОВЕЧЕСКОГО КАПИТАЛА

А. Абдуллазизов
профессор НамГУ
E-mail: abdulazizov60@mail.ru

Аннотация: *В статье рассматривается роль чтения художественной литературы в процессе формирования и накопления человеческого капитала. Актуальность исследования обусловлена тем, что в современной экономике человеческий капитал рассматривается как один из ключевых факторов индивидуальной производительности, социальной мобильности и экономического развития. При этом традиционные подходы к его накоплению преимущественно связывают данный процесс с формальным образованием, профессиональной подготовкой и приобретением специальных навыков. Чтение художественной литературы представляет собой менее формализованный, но потенциально значимый механизм развития когнитивных, коммуникативных и социально-эмоциональных компетенций. Цель статьи заключается в систематизации теоретических и эмпирических аргументов относительно влияния художественного чтения на компоненты человеческого капитала. Методологическую основу исследования составили анализ и обобщение научной литературы, сравнительный анализ результатов эмпирических исследований и концептуальный синтез. Показано, что регулярное чтение художественных произведений связано с развитием читательской грамотности, словарного запаса, способности к интерпретации сложных текстов, воображения, рефлексии и социального понимания.*

Ключевые слова: *человеческий капитал, художественная литература, чтение, читательская грамотность, когнитивные навыки, социальные навыки, эмпатия, образование, человеческий потенциал.*

INSON KAPITALINI JAMG‘ARISHDA BADIIY ADABIYOTNI MUTOLAA QILISHNING ROLI

Annotatsiya: *Ushbu maqolada badiiy adabiyot o‘qishning inson kapitalini shakllantirish va to‘plashdagi roli o‘rganiladi. Tadqiqotning dolzarbligi shundaki, zamonaviy iqtisodiyotda inson kapitali individual unumdorlik, ijtimoiy harakatchanlik va iqtisodiy rivojlanishning asosiy omili hisoblanadi. Uni to‘plashga an’anaviy yondashuvlar asosan bu jarayonni rasmiy ta’lim, kasbiy tayyorgarlik va ixtisoslashgan ko‘nikmalarni egallash bilan bog‘laydi. Badiiy adabiyot o‘qish kognitiv, kommunikativ va ijtimoiy-emotsional kompetentsiyalarni rivojlantirishning kamroq rasmiylashtirilgan, ammo potentsial jihatdan ahamiyatli mexanizmini ifodalaydi. Ushbu maqolaning maqsadi badiiy adabiyot o‘qishning inson kapitalining tarkibiy qismlariga ta’siri haqidagi nazariy va empirik dalillarni tizimlashtirishdir. Tadqiqotning metodologik asosi ilmiy adabiyotlarni tahlil qilish va sintez qilish, empirik tadqiqot natijalarini qiyosiy tahlil qilish va kontseptual sintezdan iborat. Badiiy adabiyotni muntazam o‘qish o‘qish savodxonligi, so‘z boyligi, murakkab matnlarni talqin qilish qobiliyati, tasavvur, mulohaza va ijtimoiy tushunishni rivojlantirish bilan bog‘liqligi ko‘rsatilgan.*

Kalit so‘zlar: *inson kapitali, badiiy adabiyot, o‘qish, o‘qish savodxonligi, kognitiv ko‘nikmalar, ijtimoiy ko‘nikmalar, empatiya, ta’lim, inson salohiyati.*

THE ROLE OF READING FICTION IN ACCUMULATING HUMAN CAPITAL

Abstract: *This article examines the role of fiction reading in the formation and accumulation of human capital. The relevance of the study lies in the fact that in the modern economy, human capital is considered a key factor in individual productivity, social mobility, and economic development. Traditional approaches to its accumulation primarily associate this process with formal education, professional training, and the acquisition of specialized skills. Reading fiction represents a less formalized, yet potentially significant, mechanism for developing cognitive, communicative, and socio-emotional competencies. The purpose of this article is to systematize theoretical and empirical arguments regarding the influence of fiction reading on the components of human capital. The methodological basis of the study consists of an analysis and synthesis of scientific literature, a comparative analysis of empirical research results, and a conceptual synthesis. It is shown that regular reading of fiction is associated with the development of reading literacy, vocabulary, the ability to interpret complex texts, imagination, reflection, and social understanding.*

Keywords: *human capital, fiction, reading, reading literacy, cognitive skills, social skills, empathy, education, human potential.*

Введение. Концепция человеческого капитала занимает центральное место в современной экономической теории образования и развития. В классической экономической традиции человеческий капитал рассматривается как совокупность знаний, навыков и способностей, которые формируются в процессе инвестиций в человека и впоследствии повышают его производительность и экономические возможности. Г. Беккер показал, что инвестиции в образование и профессиональную подготовку могут рассматриваться как форма вложений в человеческий капитал, поскольку они способны увеличивать производительность труда и доходы человека [1]. В современной трактовке Всемирного банка человеческий капитал включает знания, навыки и здоровье, которые человек накапливает в течение жизни и которые позволяют ему реализовывать производительный потенциал [2].

В условиях перехода к экономике знаний значение человеческого капитала постоянно возрастает. Работник современного общества должен обладать не только профессиональными знаниями, но и широким комплексом универсальных компетенций: способностью анализировать информацию, критически мыслить, эффективно взаимодействовать с другими людьми, адаптироваться к изменениям, самостоятельно обучаться и принимать решения в условиях неопределённости. Следовательно, процесс накопления человеческого капитала не ограничивается периодом получения формального образования. Он продолжается на протяжении всей жизни посредством различных форм обучения и самообразования.

Одним из доступных механизмов такого самообразования является чтение. При этом особое место занимает художественная литература, поскольку она отличается от учебной и специализированной литературы характером когнитивного взаимодействия читателя с текстом.

Исследования в области образования подтверждают наличие связи между практиками чтения и образовательными результатами. OECD(Организация экономического сотрудничества и развития (сокр. ОЭСР; англ. Organisation for Economic Co-operation and Development,OECD;) указывает, что читательская грамотность включает способность понимать, использовать, оценивать и осмысливать тексты для достижения личных целей, развития знаний и участия в жизни общества [3]. Данные PISA также свидетельствуют о положительной связи между удовольствием от чтения и результатами по читательской грамотности после учёта социально-экономических характеристик учащихся и пола [4].Особый интерес представляет вопрос о том, какие именно компоненты человеческого капитала могут развиваться посредством художественного чтения. В данном случае можно выделить как минимум четыре взаимосвязанных направления. Во-первых, чтение способствует накоплению когнитивного капитала: расширяет словарный запас, тренирует понимание сложных текстов, развивает способность концентрировать внимание, анализировать информацию и строить смысловые связи. Во-вторых, художественная литература может способствовать формированию социально-коммуникативных компетенций. В процессе чтения человек знакомится с различными моделями поведения, социальными ролями и жизненными ситуациями, что потенциально расширяет его представления о других людях и социальных отношениях. В-третьих, чтение связано с развитием эмоционально-рефлексивных навыков. Переживание сюжетов и идентификация с персонажами могут стимулировать осмысление собственных эмоций и мотивов поведения других людей. В-четвёртых, художественная литература представляет собой элемент культурного капитала. Она знакомит человека с языком, историческими контекстами, культурными кодами и социальными нормами, что может повышать его способность ориентироваться в культурной и профессиональной среде. Таким образом, исследовательская проблема заключается в определении места художественного чтения в более широкой системе факторов накопления человеческого капитала.

Методы исследования и анализ литературы. Исследование носит теоретико-аналитический характер и основано на систематизации существующих научных представлений о человеческом капитале и результатах эмпирических исследований чтения.В качестве теоретической основы использована экономическая концепция человеческого капитала Г. Беккера, согласно которой образование, обучение и другие формы инвестиций в человека формируют продуктивные характеристики личности [1]. Дополнительно используется современный подход Всемирного банка, в соответствии с которым человеческий капитал представляет собой накопленные человеком знания, навыки и другие характеристики, определяющие его способность к продуктивной деятельности [2].

Методологически исследование опирается на следующие методы:

1.т**еоретический анализ.** Изучались основные положения теории человеческого капитала и современные подходы к определению образовательных и когнитивных компетенций.

2.Анализ научной литературы. Рассматривались результаты исследований, посвящённых связи между чтением, грамотностью, когнитивными способностями, эмпатией и социальным пониманием [5–9].

3. Сравнительный анализ. Сопоставлялись данные о чтении для удовольствия, чтении художественной литературы и результатах выполнения когнитивных и социальных тестов.**4. Концептуальный синтез.** На основе

рассмотренных источников была сформирована модель потенциального влияния художественного чтения на накопление человеческого капитала.

В рамках исследования под **чтением художественной литературы** понимается добровольное или образовательное обращение к романам, повестям, рассказам и другим литературным произведениям, в которых существенную роль играют повествование, персонажи, художественные образы и интерпретация человеческого опыта. Под **человеческим капиталом** понимается совокупность накопленных человеком знаний, навыков, когнитивных и социально-коммуникативных характеристик, которые могут повышать его способность к обучению, труду, взаимодействию с другими людьми и адаптации к социально-экономическим изменениям. Важно подчеркнуть, что в исследовании не предполагается наличие простой причинно-следственной зависимости вида «больше книг — выше человеческий капитал». Чтение является одним из элементов сложной системы факторов, включающей качество образования, семейную среду, социально-экономическое положение, индивидуальные способности, мотивацию и доступ к культурным ресурсам. Результаты исследования.Чтение как механизм накопления когнитивного капитала. **Первым и наиболее очевидным направлением** влияния художественной литературы является развитие когнитивных ресурсов личности. Чтение сложного текста требует активной интеллектуальной деятельности. В отличие от пассивного потребления коротких информационных сообщений, чтение романа предполагает удержание в памяти большого количества персонажей, событий, временных периодов и причинно-следственных связей. Читатель должен сопоставлять информацию, полученную в различных частях произведения, интерпретировать контекст и делать выводы на основании непосредственно не выраженных в тексте смыслов.Особое значение имеет развитие словарного запаса и языковой компетентности. Метаанализ S. Mol и A. Bus показал устойчивую связь между количеством контактов с печатными текстами и развитием языковых и читательских навыков в период от младенчества до ранней взрослости [5]. Это позволяет рассматривать регулярное чтение как накопительный процесс: каждая новая встреча с текстом расширяет языковой опыт человека, а накопленный опыт облегчает последующее восприятие более сложных текстов.

Следовательно, возникает механизм положительной обратной связи:

чтение → расширение словарного запаса → повышение качества понимания текста → снижение когнитивных затрат при чтении → возможность обращения к более сложным текстам → дальнейшее накопление знаний и навыков.

Именно этот механизм имеет непосредственное значение для человеческого капитала. Современный специалист практически в любой профессиональной сфере должен уметь работать с информацией: читать инструкции, научные публикации, нормативные документы, аналитические материалы, деловую переписку и цифровой контент. Поэтому высокий уровень читательской грамотности становится универсальным ресурсом, который переносится из образовательной сферы в профессиональную.

Данные OECD подтверждают важность данного положения. Читательская грамотность определяется как способность понимать, использовать, оценивать, осмысливать и взаимодействовать с текстами для достижения целей, развития знаний и участия в обществе [3]. Таким образом, чтение представляет собой не только культурную практику, но и базовую компетенцию человеческого капитала.

Художественная литература и способность к длительной концентрации.

Ещё одним потенциальным механизмом является развитие устойчивого внимания.Современная информационная среда характеризуется высокой скоростью смены сообщений и значительным объёмом кратких цифровых стимулов. В этих условиях способность длительное время работать с одним сложным объектом становится ценным когнитивным ресурсом.

Чтение художественного произведения требует продолжительного внимания. Для понимания сюжета недостаточно воспринимать отдельные предложения изолированно: необходимо удерживать общую структуру повествования. Особенно это характерно для романов с несколькими сюжетными линиями, ретроспективами, ненадёжным повествователем или сложной системой персонажей.В результате регулярное чтение может создавать условия для тренировки когнитивной выносливости. Хотя прямое отождествление чтения художественной литературы с тренировкой внимания было бы методологически некорректным, сама структура продолжительного чтения требует последовательного удержания цели и контроля понимания.С точки зрения человеческого капитала данный эффект важен потому, что способность концентрироваться связана с успешностью обучения. OECD отмечает, что учащиеся, активно вовлечённые в разнообразные формы чтения, с большей вероятностью являются эффективными обучающимися и демонстрируют более высокие образовательные результаты [6].Таким образом, художественное чтение может рассматриваться как один из элементов формирования привычки к самостоятельному и продолжительному интеллектуальному труду.

Чтение художественной литературы и социальное понимание

Особенность художественного текста заключается в том, что он предоставляет читателю доступ к внутреннему миру персонажей. В литературном произведении человек может наблюдать не только внешнее действие, но и мысли, эмоции, сомнения, намерения и противоречия героя.

Именно это обстоятельство стало основанием для гипотезы о влиянии художественной литературы на социальное познание.

D. Kidd и E. Castano в экспериментальном исследовании обнаружили, что чтение литературной художественной прозы было связано с более высокими результатами в заданиях, оценивающих способность понимать психические состояния других людей — так называемую Theory of Mind [7]. Авторы предположили, что сложная литературная проза может временно стимулировать процессы, связанные с пониманием перспективы другого человека.

Дополнительные исследования также обнаруживали связь между чтением художественных текстов, эмоциональным вовлечением и эмпатией. Например, P. M. Bal и M. Veltkamp показали в экспериментальных исследованиях, что влияние художественного текста на эмпатию зависело от степени эмоционального погружения читателя в историю [8].

Если рассматривать данные результаты через призму человеческого капитала, возникает следующий механизм: **литературный сюжет → моделирование чужого опыта → анализ мотивов и эмоций персонажей → развитие способности принимать альтернативную перспективу → улучшение социального взаимодействия.**

Однако данный вывод необходимо воспринимать с осторожностью.

Последующие попытки воспроизвести результаты Kidd и Castano дали смешанные результаты. В исследовании трёх предварительно зарегистрированных репликаций были получены неоднозначные результаты: две попытки не дали убедительного воспроизведения первоначального эффекта, тогда как одна репликация дала результат в ожидаемом направлении [9]. Следовательно, утверждение о том, что художественная литература автоматически повышает эмпатию или Theory of Mind, является чрезмерно сильным.Более корректным является вывод о потенциальном механизме: **определённые виды литературного чтения при определённых условиях могут создавать когнитивную среду для развития социального понимания**, однако величина и устойчивость такого эффекта зависят от типа текста, особенностей читателя и характера взаимодействия с произведением.

Чтение и культурный капитал. Художественная литература обладает также значением для формирования культурного капитала личности.

Человек, регулярно читающий литературу разных эпох и культур, получает возможность знакомиться с различными системами ценностей, социальными нормами, историческими обстоятельствами и способами интерпретации мира.

В данном контексте человеческий капитал пересекается с понятием культурного капитала. Литературная компетентность может облегчать коммуникацию в образовательной и профессиональной среде, поскольку человек приобретает более широкий набор культурных ориентиров и символических ресурсов.

Культурный капитал не сводится непосредственно к производительности труда. Однако он может косвенно воздействовать на неё посредством расширения социальных и коммуникативных возможностей личности.Например, человек, знакомый с различными культурными контекстами, может легче интерпретировать высказывания собеседника, понимать исторические и культурные отсылки, формулировать сложные мысли и адаптироваться к разнообразной социальной среде.Таким образом, художественная литература способствует накоплению не только «знаний о книгах», но и более широкого фонда культурных схем, которые могут использоваться в социальных взаимодействиях. Чтение для удовольствия как фактор образовательной траектории. Особое значение имеет мотивационная сторона чтения.

Исследования OECD показывают положительную связь между удовольствием от чтения и результатами читательской грамотности в странах и экономиках, участвовавших в PISA 2018 [4]. При этом характер взаимосвязи может быть двусторонним: хорошие читатели получают больше удовольствия от чтения, а удовольствие стимулирует дополнительную практику, которая, в свою очередь, способствует развитию навыков [4].

Возникает эффект накопления:интерес к чтению → увеличение объёма чтения → развитие навыков → повышение уверенности → ещё больший интерес к чтению.Данная закономерность имеет существенное значение для человеческого капитала, поскольку инвестиции в него являются не одноразовым событием, а продолжающимся процессом.

Если человек сохраняет привычку читать после завершения формального образования, он получает возможность самостоятельно приобретать новые знания и расширять интеллектуальный кругозор. В этом

отношении художественная литература может выполнять функцию «входной точки» в культуру постоянного самообразования.

Обсуждение. Полученные результаты позволяют предложить концептуальную модель роли художественного чтения в накоплении человеческого капитала.

Условно данную модель можно представить следующим образом:

а).Регулярное чтение художественной литературы

б).Языковое развитие и читательская грамотность

в).Когнитивные навыки: анализ, интерпретация, концентрация, формирование выводов.

Социально-эмоциональные процессы: перспектива другого, рефлексия, эмоциональное понимание

а).Культурная компетентность и коммуникативные возможности

б).Повышение способности к обучению и адаптации

в).Накопление человеческого капитала.

При этом необходимо разграничивать прямые и косвенные эффекты.

Наиболее убедительно подтверждается связь чтения с развитием грамотности и языковых навыков. Исследования показывают, что объём контакта с печатным текстом связан с развитием читательских и языковых компетенций [5], а OECD фиксирует положительную связь между удовольствием от чтения и результатами читательской грамотности [4].

Гораздо сложнее доказать непосредственное воздействие художественной литературы на экономические показатели человеческого капитала, например заработную плату или производительность труда. В отличие от формального образования, которое можно относительно легко сопоставить с годами обучения и экономическими результатами, эффект чтения трудно отделить от других факторов. Например, человек, который много читает, может одновременно иметь более высокий уровень образования, более обеспеченную семью, широкий доступ к культурным ресурсам и более высокую исходную мотивацию к обучению. Поэтому корреляция между чтением и успехом не означает автоматически, что именно чтение является единственной причиной наблюдаемого результата. Это особенно важно при анализе социально-эмоциональных эффектов. Первоначальное исследование Kidd и Castano получило заметный научный резонанс [7], однако последующие репликации показали смешанные результаты [9]. Поэтому научно обоснованной является не категоричная позиция о гарантированном развитии эмпатии посредством художественной литературы, а более осторожная гипотеза о том, что эмоционально и интеллектуально сложное чтение может создавать условия для тренировки перспективного мышления.С экономической точки зрения важен также вопрос об эффективности инвестиций. Чтение художественной литературы требует сравнительно небольших материальных ресурсов по сравнению с формальным образованием. При наличии библиотек, электронных каталогов и открытых образовательных ресурсов доступ к литературе может быть относительно дешёвым. При этом потенциальные эффекты чтения накапливаются во времени. Однако сама доступность книг ещё не гарантирует накопления человеческого капитала. Необходимо учитывать качество чтения. Поверхностное пролистывание текста, отсутствие понимания и низкая мотивация существенно отличаются от внимательного и рефлексивного чтения.

Следовательно, важным фактором является **читательская вовлечённость**. OECD подчёркивает значение не только способности читать, но и мотивации к чтению [6]. Поэтому образовательная политика должна стремиться не просто увеличивать количество обязательных литературных произведений, а формировать устойчивую внутреннюю мотивацию к чтению.

Особое значение это приобретает в детском и подростковом возрасте. Именно в этот период формируются привычки, которые могут сохраняться во взрослом возрасте. Если чтение воспринимается исключительно как обязательное школьное задание, его потенциал как самостоятельной формы обучения может снижаться. Напротив, сочетание обязательного знакомства с литературным каноном и возможности самостоятельного выбора произведений способно поддерживать читательскую мотивацию.С позиции накопления человеческого капитала целесообразно также расширять само понятие «результата чтения». Речь должна идти не только о количестве прочитанных книг. Более важными показателями могут выступать:

- способность понимать сложные тексты;
- способность аргументировать собственную позицию;
- богатство словарного запаса;
- способность интерпретировать неоднозначную информацию;
- умение рассматривать ситуацию с разных точек зрения;
- способность самостоятельно формулировать вопросы;
- интерес к дальнейшему обучению.

Таким образом, художественное чтение представляет собой не конечный продукт образования, а один из механизмов формирования способности к дальнейшему обучению.

Выводы. Проведённый анализ позволяет сделать вывод о том, что чтение художественной литературы может рассматриваться как значимый, хотя и косвенный, фактор накопления человеческого капитала.

Во-первых, регулярное чтение способствует развитию языковых и читательских компетенций. Расширение словарного запаса, совершенствование понимания текста и повышение способности работать со сложной информацией создают фундамент для последующего образования и профессиональной деятельности.

Во-вторых, художественная литература предоставляет возможности для развития когнитивных навыков. Работа с длительным и сложным повествованием требует концентрации внимания, удержания информации, установления причинно-следственных связей и интерпретации скрытых смыслов.

В-третьих, литературное чтение потенциально способствует развитию социального понимания. Погружение во внутренний мир персонажей может стимулировать способность рассматривать альтернативные точки зрения. Однако имеющиеся исследования социально-эмоциональных эффектов дают неоднозначные результаты, поэтому утверждать о гарантированном повышении эмпатии исключительно вследствие чтения художественной литературы преждевременно.

В-четвёртых, чтение способствует формированию культурной компетентности. Знакомство с различными историческими эпохами, социальными группами и культурными контекстами расширяет систему представлений человека о мире и может повышать качество его социальных коммуникаций.

В-пятых, художественная литература способна выполнять мотивационную функцию. Сформированная привычка читать для удовольствия может поддерживать непрерывное самообразование после завершения формального обучения. В условиях экономики знаний именно способность постоянно приобретать новые знания становится одним из важнейших элементов человеческого капитала.Таким образом, художественную литературу следует рассматривать не как альтернативу школьному или профессиональному образованию, а как его важное дополнение. Если формальное образование обеспечивает систематизированное приобретение знаний и профессиональных навыков, то художественное чтение создаёт пространство для развития языковой, когнитивной, культурной и социально-рефлексивной составляющих человеческого потенциала. Практическое значение данного вывода заключается в необходимости поддерживать культуру чтения в образовательных организациях, развивать библиотеки, обеспечивать широкий доступ к качественной литературе и создавать условия для самостоятельного выбора книг. При этом эффективность подобных мер следует оценивать не только по количеству прочитанных произведений, но и по изменениям в читательской грамотности, мотивации к обучению, способности работать с информацией и коммуникативных компетенциях. Перспективным направлением дальнейших исследований является проведение долгосрочных количественных исследований, позволяющих отделить эффект чтения от влияния семейного происхождения, уровня образования, социально-экономического статуса и индивидуальных способностей. Особенно важны лонгитюдные исследования, которые могли бы проследить, каким образом привычка к чтению художественной литературы в детстве и подростковом возрасте связана с образовательными и профессиональными результатами во взрослом возрасте.

В целом художественное чтение можно определить как форму относительно доступной инвестиции в человеческий капитал, эффект которой проявляется преимущественно через накопление когнитивных, языковых, культурных и социально-коммуникативных ресурсов личности.

KIRISH.

Qoraqalpoq xalqining badiiy merosi yoshlar tafakkurini shakllantirish va rivojlantirishda eng muhim ma'naviy manbalardan biri bo'lib xizmat qiladi. Bu meros yosh avlodda vatanparvarlik, mardlik, insonparvarlik va yuksak axloq tuyg'ularini uyg'otishda beqiyos kuchga ega.

Qoraqalpoq xalq og'zaki ijodiyotida inson-tabiat, inson-jamiyat munosabatlarining barcha qir-sirlari, ilm-fan, texnika taraqqiyotini belgilab bergan gipotezalar, xayol-orzulari, jamiyatda qabul qilingan axloqiy talablari yorqin aks ettirilgan. Maqol-matallar, xalq qo'shiqlari, ertaklar, tez aytishlar, dostonlar, qahramonlik dostonlari, aytishmoq, jumboqlar, termalar ajdoddan-avlodga o'tib kelgan. Har bir kelgusi avlod uning mazmuni na, turlariga o'z hissasini qo'shib, boyitib borgan. Shuning uchun ham biz xalq og'zaki ijodiyoti har bir xalqning mentalitetini, qadriyatlarini aks ettiradigan manba deb bilamiz.

Har bir xalqning badiiy merosi avvalo o'z milliy ildizlariga yani tili, urf-odat va an'analariga ega bo'ladi. Lekin u yuksalgani sari butun insoniyat uchun qadrli bo'lgan ezgulik, sevgi, adolat kabi mavzularni ifodalaydi.

Qoraqalpoq xalqi badiiy adabiyotining bugungi taraqqiyot darajasini belgilaydigan qator omillar mavjuddir. Bu omillardan biri qoraqalpoq xalqining adabiy merosidir. Ma'lumki, qoraqalpoq klassik adabiyoti vakillarining ijodida mehnatkash xalq orzu-istaklari, dardlari, hayot darajasi aks etdi.

XIX asrda dongi chiqqan shoir, yozuvchilari shu xildagi xalq ijodidan bahramand bo‘lganlar va ular traditsiyalari asosida ijodga birinchi qadam qo‘yganlar. Qoraqalpoq xalqi klassik adabiyotining vakillari Jiyen jirov, Kunxo‘ja, Berdaq va Ajiniyoz ijodining bir qirrasi bilan o‘tmish yozma adabiyoti traditsiyalari zamirida tursa, ikkinchi bir qirrasi bilan xalq og‘zaki ijodi an’analari zaminida turdi.

ADABIYOTLAR TAHLILI.

Taniqli rus yozuvchisi M.Gorkiy o‘z maqolalarining birida shunday deydi: «xalq faqatgina barcha moddiy boyliklarni yaratuvchi kuch bo‘lib qolmasdan, u – ma’naviy boyliklarning yagona va tuganmas manbai, vaqt bo‘yicha ham birinchi, ijodining go‘zalligi va donoligi bo‘yicha – faylasuf va shoir, barcha buyuk poemalarni, erning barcha tragediyalarini va ularning eng buyugi – butun dunyo madaniyati tarixini yaratgan ham o‘sha» [2, 48].

Qoraqalpoq xalqining buyuk shoiri Berdaq baxshi va shoir jo‘da ko‘p dostonlarni yod bilganlar va ularni katta to‘y-yig‘inlarda ijro qilganlar. Bu dostonlarning aksariyati qahramonlik, odamiylik ruhida yaratilgan bo‘lib, xalq ommasini vatanparvarlik, insonparvarlik, gumanistik ruhda tarbiyalashda katta ahamiyatga ega bo‘lgan.

Halq qo‘shiqlar, ertaklar, maqol-matallar, «Qirq qiz», «Qo‘blan», «Alpomish» kabi xalq dostonlari – bularning aksariyati asosan xalqning donoligini, istak orzularini ko‘rsatadigan xalq ijodining boy xazinasi. «Masalan, Berdaq o‘zining eng yaxshi poemalari: «Ahmoq podsho», «Aydos biy», «Shajara» va boshqalarini fol’klordan foydalanib yaratganlar» [1, 10].

Qoraqalpoq xalq dostoni «Qirq qiz» da qizlarning nafaqat go‘zal va oqila, balki yurt himoyasiga tayyor mard qahramonlar bo‘la olishini ko‘rsatadi. U yoshlarda milliy g‘urur va jasoratni shakllantiradi. Qoraqalpoq xalqi or-nomus tushunchasini juda yuksak baholaydi. Odamgarchilikning asosiy xususiyatlaridan biri – oriyatiga dog‘ tushirmaslik. Berdaq hech vaqt og‘ir turmush azobiga, qayg‘usiga berilib, mung‘aymaydi. «Shayır oylan hár sóz ushın, sárdar bolǵıl mártler ushın» (Shoir o‘yla har so‘z uchun, sardor bo‘lgil mardlar uchun), deb eli uchun joni fido mard yigitlarning ko‘p bo‘lishini orzu qiladi va buni yoshlarga maslahat beradi.

Shoirning «Aydos baba» dostonida ham mardlikni, va’daga vafodorlikni, to‘g‘ri so‘zli bo‘lishni qo‘llab, «Márt bolǵan wádede turar, Sózin buzǵandı ant urar» (Mard bo‘lgan va’dada turar, so‘zini buzganni ont urar), deya yaxshilarning o‘z so‘zida turishini, va’da bersa bajarishini, shundagina obro‘ga ega bo‘lishini ko‘rsatib, mardlikka chaqirganini ko‘ramiz» [3, 116].

Shoir asarlarida botirlarni xalqimizning og‘zaki ijodiyotidagi dostonlarda kuylagan mardlarga taqabbil ta’riflangan «Góruǵlı bektey er edi, Qatarda qosa nar edi, Tolı jurtqa dárkar edi» (Go‘ro‘g‘li bekdek er edi, qatorda qo‘sha nor edi, to‘la yurtga darkor edi), deb ko‘rsatib o‘tadi» [3, 126].

Maqol va matallar ajdodlarning ko‘p yillik hayotiy tajribasini qisqa va lo‘nda shaklda yetkazadi. Ular yoshlarning nutqini boyitadi va tezkor qaror qabul qilishda mantiqiy asos bo‘ladi.

Berdaq xalq orasida sevimli qo‘shiqlaridek tarqab ketgan Jirenshe chechan meroslarini asl marjondek qadrlab o‘rgangan, o‘zlashtirgan. Berdaq uchun notiqlik, gapdonlik, gapga chechanlik yuksak fazilat bo‘lib, u «jaqsını pám áyle sóylegen sózden» (yaxshini fahmla so‘zlagan so‘zidan), aqlni shakllantirishda hayot donoliklarini katta ahamiyatga molik deb hisoblanadi.

Shoir odamning aqlliligini uning bilimliligi bilan bog‘lab, «Oylı jigit jaqsı bilimpaz keler, aytqan gáplerińe túsimpaz keler» (Uyli yigit yaxshi bilimpoz kelar, aytgan gaplaringa tushunuchan kelar), deb ta’kidlaydi. Shoir to‘g‘ri dialektik tafakkurning rolini tegishli darajada yuqori qo‘yadi. «Jaqsıraq» degan qo‘shig‘ida aql va o‘yning ahamiyatini «Tereń aqıl kerek sózin dizbege, tınıq qıyal kerek bárin sezbege» (Teran aql kerak so‘zini tizmaga, tiniq xayol kerak barchasini sezmaga), deb tasdiqlaydi. [4, 53].

Berdaq poeziyasi ilm-ma’rifat, insoniylik va go‘zallikni kuylaydi. Uning she’rlari yoshlarni ilm olishga va ichki dunyosini boyitishga undaydi.

Shunday qilib, Berdaqning falsafiy, ijtimoiy, siyosiy, axloqiy va estetik qarashlarina e’tibor qaratsak, XIX asrdagi qoraqalpoq badiiy adabiyotini ilmiy va ijtimoiy-falsafiy tafakkurning cho‘qqisi bo‘lgan uning ijodi katta ahamiyatga molik ekanligini ko‘rsatadi.

Xalqning dini, e’tiqodi bilan qarashlari uning tarixiga, ma’naviy, madaniy, siyosiy hayotiga katta ta’sir qiladigan omildir. Din tarixini bilmaguncha muayyan hududning, xalqlarning hayotini, turmushini, madaniy borlig‘ining sirlarini chuqur anglab etish mumkin emas. Ya’ni, milliy madaniyatning, uning mentaliteti bilan dunyoqarashini bilish uchun diniy e’tiqodlarini chuqur tadqiq qilish zarur.

Xalqimiz tarixida uning dunyoqarashi va madaniy mentaliteti shakllanishida islom dinining roli juda yuqori bo‘ldi. O‘tmishdagi qaysi shoirni olmaylik uning ijodida diniy qarashlar hukmronlik qildi. Bu ularning bilimdonligini ko‘rsatdi va xalqning ongiga mos kelib, uning uzoq saqlanib qolishiga asos bo‘ldi. Bu masalada Ajiniyoz etuk ilohiyotchi - oxun sifatida xizmat etdi. Masalan, u odamning paydo bo‘lishi haqida:

Qudrat kuchlidir, nima qilsa Subxon?

Ko‘kdan so‘ng yaratdi tuproqdan inson.

deb ko‘rsatadi.

Insonning insonga ibrati, tarbiyadagi ta’sirini uning o‘zi baholay olmaydi, balki boshqa inson baholaydi. Demak, qadriyat sifatidagi inson ta’sirida uning qadri, ahamiyati namoyon bo‘ladi, boshqa kishi esa ana shu bevosita ta’sir natijasida uning ahamiyatini baholaydi. Qadriga baho beradi [5, 707].

Ajiniyoz o‘z asarlarida inson qadr-qimmatini yuqori cho‘qqiga ko‘targan. Ajiniyozning she’rlarida chuqur falsafiy fikrlar va ilmiy qarashlar ustuvorlik qiladi.

Vatan tuyg‘usini xalqning an’analaridan, ruhiy xususiyatlaridan kelib chiqqan mentalitetiga bog‘liq bo‘lib, bunga Ajiniyoz shoir: «Har kim o‘z yurtida tengi tusda, Yigit qadri bo‘lmas eldan ayrilsa», - degan oqilona xulosa chiqaradi.

Qoraqalpoq xalqi nodonlikni qoralab, o‘z-o‘zini bilishni, egallashni, ma’noli bo‘lishni, mazmunli gapirishni asosiy muhim masala sifatida ko‘tarib, nasihat berib, «haddingdan oshma», «haddinga boq», deb o‘rgatib, o‘zingni bil, «ko‘rpanga qarab oyoq uzat» degan talablarni kundalikli tarbiyada foydalanib o‘tirgan. «Ayoz holingni bil, qumursqa yo‘lingni bil» degan shundan kelib chiqqan.

Ajiniyoz shoir ham manmanlikni qoralaydi. Uni fikricha manmanlik -odamni qadrsizlantiradi. U qadr-qimmatni unuttiradi va kulfatga olib kelishini quydagicha tushuntiradi:

«Qasqaldaqqa bir aǵarı may pitse,
Ǵarqıldasıp qonar kólin tanımas.
Patshanıń dáwleti qaytayın dese,
Kózine may pitip elin tanımas» [6, 52].
(«Qashqaldoqqa bir og‘ari yog‘ bitsa,
G‘arqillashib qo‘nar ko‘lin tanimas.
Podshoning davlati qaytay desa,
Ko‘ziga yog‘ bitib elin tanimas»).

TAHLIL VA NATIJALAR. Demak, yuqorida keltirilgan ta’riflardan kelib chiqib fikr yuritadigan bo‘lsak, «Alpomish» va «Qo‘blan» dostonlari yosh yigitlarni el-yurtga sodiqlik, do‘stlikka vafodorlik va adolat uchun kurashish ruhida tarbiyalaydi. Natijada yoshlar bu qahramonlardan o‘rnak olib, hayotdagi qiyinchiliklardan qo‘rqmaslikni va mas’uliyatni o‘z zimmasiga olishni o‘rganadilar.

Qoraqalpoq xalq og‘zaki adabiyoti bilan o‘tmishdagi yozma yodgorliklaridan sug‘orilgan ilg‘or xalq an’analari va Sharq mutafakkirlarining tanlangan asarlaridan tasirlangan Ajiniyoz va Berdaqning asarlari nafaqat qoraqalpoq xalqi madaniyatida, balki butun Markaziy Osiyo xalqlari madaniyatida muhim bo‘lib, yoshlarning falsafiy dunyosini boyitishga katta hissa qo‘shadi.

XULOSA

Qoraqalpoq badiiy merosi shunchaki o‘tmish yodgorligi emas. U bugungi kunda yoshlarni yot g‘oyalar va «ommaviy madaniyat»ning salbiy ta’siridan himoya qiluvchi kuchli ma’naviy qalqondir. Bu merosni o‘rganish orqali yoshlar mustaqil fikrlaydigan, o‘zining o‘tmish tarixini qadrlaydigan va kelajakka sog‘lom dunyoqarash bilan qaraydigan shaxslar bo‘lib etishadi.

IJTIMOIY RIVOJLANISH KONSEPSIYALARINI TAHLIL QILISHDA XOLISTIK VA INTEGRATIV YONDASHUVLAR

Xojiyev Tunis Nurkosimoich
mustaqil tadqiqotchi
O‘zbekiston Milliy universiteti
E-mail: karfagen_87@mail.ru

Annotatsiya: *Mazkur maqolada ijtimoiy rivojlanish konsepsiyalarini tahlil qilishda xolistik, parsial va integrativ yondashuvlarning metodologik imkoniyatlari o‘rganiladi. Butun va qism munosabati, ijtimoiy tizimning ko‘p qatlamli tuzilishi, alohida sohalar dinamikasi hamda ularni yagona konseptual modelda sintezlash masalalari tahlil qilinadi. Postindustrial jamiyat va ma’naviy-ekologik sivilizatsiyaga oid qarashlar integrativ yondashuvning amaliy-nazariy ifodasi sifatida ko‘rib chiqiladi. Tahlillar asosida ijtimoiy rivojlanishni bir sohaning ustuvorligi orqali emas, iqtisodiy, texnologik, ijtimoiy, ma’naviy va ekologik omillarning o‘zaro ta’siri asosida anglash metodologik jihatdan samarali ekani asoslanadi.*

Kalit so‘zlar: *Ijtimoiy rivojlanish, xolizm, parsializm, integrativ yondashuv, butun va qism, postindustrial jamiyat, axborot jamiyati, ma’naviy-ekologik sivilizatsiya, ijtimoiy tizim, metodologiya.*

ХОЛИСТИЧЕСКИЙ И ИНТЕГРАТИВНЫЙ ПОДХОДЫ В АНАЛИЗЕ КОНЦЕПЦИЙ СОЦИАЛЬНОГО РАЗВИТИЯ

Аннотация: *В данной статье исследуются методологические возможности холистического, парциального и интегративного подходов в анализе концепций социального развития. Анализируются соотношение целого и части, многоуровневая структура социальной системы, динамика отдельных сфер, а также вопросы их синтеза в единой концептуальной модели. Представления о постиндустриальном обществе и духовно-экологической цивилизации рассматриваются как практико-теоретическое выражение интегративного подхода. На основе проведенного анализа обосновывается методологическая эффективность понимания социального развития не через приоритет одной сферы, а через взаимодействие экономических, технологических, социальных, духовных и экологических факторов.*

Ключевые слова: *социальное развитие, холизм, парциализм, интегративный подход, целое и часть, постиндустриальное общество, информационное общество, духовно-экологическая цивилизация, социальная система, методология.*

HOLISTIC AND INTEGRATIVE APPROACHES IN THE ANALYSIS OF SOCIAL DEVELOPMENT CONCEPTS

Abstract: *This article examines the methodological potential of holistic, partial and integrative approaches in the analysis of social development concepts. It considers the relationship between the whole and its parts, the multi-layered structure of the social system, the dynamics of particular spheres, and the problem of synthesising them within a single conceptual model. Views on post-industrial society and on spiritual-ecological civilisation are treated as a practical and theoretical expression of the integrative approach. On the basis of the analysis, it is argued that it is methodologically more effective to understand social development not through the primacy of a single sphere, but through the interaction of economic, technological, social, spiritual and ecological factors.*

Keywords: *social development, holism, partialism, integrative approach, whole and part, post-industrial society, information society, spiritual-ecological civilisation, social system, methodology.*

Kirish va mavzuning dolzarbligi. Ijtimoiy rivojlanish konsepsiyalarini baholashda jamiyatni qanday metodologik birlik sifatida tasavvur qilish masalasi hal qiluvchi ahamiyatga ega. Agar ijtimoiy voqelik faqat alohida sohalar yig‘indisi sifatida qaralsa, iqtisodiy, siyosiy, texnologik va ma’naviy o‘zgarishlar o‘rtasidagi murakkab bog‘lanishlar yetarlicha ochilmay qoladi. Rivojlanish kategoriyasining o‘zi ham dinamik jarayonlarni yo‘nalgan va qonuniyatli o‘zgarish sifatida ko‘rishni talab qiladi. Shu nuqtai nazardan, xolistik va integrativ yondashuvlar zamonaviy ijtimoiy rivojlanish konsepsiyalarining ichki mantig‘ini, ularning elementlari o‘rtasidagi munosabatni va konsepsiyaning umumiy

metodologik imkoniyatlarini aniqlash uchun alohida ahamiyat kasb etadi. Ayniqsa, postindustrial va ma'naviy-ekologik modellarda turli sohalarning o'zaro ta'siri kuchayishi integrativ tahlilning dolzarbligini yanada oshiradi[41].

Mavzuga oid adabiyotlarning tahlili. Xolizm va parsializm munosabati ijtimoiy-falsafiy metodologiyada butun va qism muammosi bilan uzviy bog'liq. 1973 yilda D. Bell postindustrial jamiyat nazariyasida bilim va axborotning ishlab chiqarish hamda ijtimoiy boshqaruvdagi rolini yangi bosqichda talqin qildi. 1991 yilgi «Sovremennaya zapadnaya filosofiya» nashrida yaxlitlik va differensiatsiya munosabati ijtimoiy tizimlarni tushuntirishning muhim metodologik sharti sifatida ko'rib chiqiladi. 1993 yilda L. P. Karsavin va 1995 yilda G. S. Pomerans rivojlanishni potensial mazmunning ochilishi, yangi shakllarning yuzaga kelishi va jarayonning ichki ko'p qatlamliligi bilan bog'laydilar. 1994 yilgi L. V. Fasenkova tadqiqoti hamda 1999 yilgi G. Spenser nashri ijtimoiy tizimlarda differensiatsiya va integratsiyaning o'zaro aloqasini tushunish uchun nazariy asos beradi. 1999 yilda O. S. Razumovskiy optimologiya doirasida xolizmning nisbiy, organizmik va agnostik ko'rinishlarini ajratib, butunlikni anglashda turli metodologik pozisiyalarni tavsiflaydi. 2001 yilda V. T. Pulyayev va N. V. Shelepin ijtimoiy qadriyatlarni jamiyatning g'oyaviy va ijtimoiy tuzilmalari bilan aloqadorlikda tahlil qildilar. Shu yilda A. Zinovyev axborot va mantiqiy-sosiologik munosabatlarni zamonaviy jamiyat dinamikasi bilan bog'ladi. A. V. Ivanov, I. V. Fotiyeva va M. Yu. Shishin esa ma'naviy-ekologik sivilizatsiya konsepsiyasi orqali ijtimoiy, ma'naviy va ekologik omillarni yaxlit modelda birlashtirishga intildilar. Mazkur manbalarning xronologik tahlili ijtimoiy rivojlanish konsepsiyalarini tadqiq qilishda alohida omillar ahamiyatini inkor etmagan holda, ularning umumiy tizimdagi o'rni va o'zaro ta'sirini birgalikda ko'rib chiqish zaruratini ko'rsatadi.

Tadqiqot metodologiyasi. Tadqiqotda tizimli va kompleks yondashuv, analiz va sintez, qiyosiy tahlil, tuzilmaviy-funksional yondashuv hamda konseptual umumlashtirish usullaridan foydalanildi. Xolistik va parsial yondashuvlar butun va qism munosabati, ijtimoiy sohalar mustaqilligi va o'zaro bog'liqligi, rivojlanish omillarining iyerarxiyasi hamda konsepsiya elementlarini integratsiyalash imkoniyati asosida qiyoslandi.

Tahlil va natijalar.

Ma'lumki, ijtimoiy rivojlanish masalasi kishilik sivilizatsiyasi taraqqiyotining dastlabki bosqichlaridanoq falsafiy mushohada markazida turgan. Mazkur masala dunyoqarashning turli tarixiy shakllarida ijtimoiy rivojlanish qonuniyatlarini aniqlash, taraqqiyotni davrlashtirish, kishilik jamiyatining istiqbol mo'ljallarini belgilash va kelajakni prognozlashga da'vo qiluvchi konsepsiyalar doirasida ko'rib chiqilgan. Bunday konsepsiyalar yaratishga urinishlarni mifologik dunyoqarashdan tortib bugungi ssiyentistik tafakkur paradigmasigacha bo'lgan uzoq tarixiy jarayonning deyarli har bir bosqichida kuzatish mumkin. Garchi mazkur konsepsiyalar nazariy-metodologik jihatdan universallik, yaxlitlik, ko'p yoqlamalik va tugallanganlikka da'vo qilsa-da, tarixiy tajriba ularning har biri muayyan davrdan so'ng o'z o'rnini muqobil yondashuvlarga bo'shatib berganini ko'rsatadi. Gesiodning «Siklik taraqqiyot» nazariyasi, Geraklit va Empedoklning siklik qarashlari, Ibn Xaldun qarashlari, Patrisiy va Polibiy nazariyalari, Gegel dialektikasi, Marksning formasion yondashuvi, F. Fukuyamaning tarix intihosi konsepsiyasi, Xantingtonning «Sivilizatsiyalar to'qnashuvi» konsepsiyasi, modernizatsiyaning turli nazariyalari, virtual jamiyat, postmodernizm va globalizm nazariyalari shular jumlasidandir. Ijtimoiy rivojlanish fenomenini tushuntirishga qaratilgan konsepsiyalar metodologik bazasining mustahkamligi, nazariy izchilligi va ta'limot sifatida yaxlit tuzilma hosil qilganiga qaramay, real voqelikda makon va zamon nuqtai nazaridan cheklanganlikni namoyon qilishi tabiiy hol. Nazariya va amaliyot o'rtasidagi bunday nomutanosiblikni turli sabablar bilan izohlash mumkin. Biroq muayyan tarixiy davr va sosio-madaniy muhit doirasida yaratilgan konsepsiyalarning makon va zamon nuqtai nazaridan universallikka da'vo qilishi mazkur nomutanosiblikni keltirib chiqaruvchi muhim omillardan biri hisoblanadi. Qolaversa, istiqbol taraqqiyot mo'ljallarini belgilashda faqat o'tmishning empirik faktlariga tayanish ham hal qiluvchi sabablardan biri sanaladi. Shundan kelib chiqqan holda, ijtimoiy rivojlanishning zamonaviy konsepsiyalarini nazariy jihatdan ishlab chiqish va joriy qilishda universalizm va differensializm tamoyillariga tayanish, shuningdek, xronologik va lokal xususiyatlarni hisobga olish zarur.

Yuqoridagi mulohazalar tahlilidan kelib chiqqan holda sosiogenezni yaxlit holda tushuntirishga qaratilgan ijtimoiy rivojlanish konsepsiyalari hamda bunday konsepsiyalarni ishlab chiqishda integrativ va differensial yondashuvni qo'llash borasidagi metodologik imkoniyatlarni ko'rib chiqish zarurati yuzaga chiqadi.

Ijtimoiy rivojlanish konsepsiyalarini tahlil qilishga qaratilgan tadqiqotlarda kategoriyaviy jihatdan yaxlitlik, ko'p yoqlamalik xususiyatlari xolizm tamoyili, bo'lak va biryoqlamalik xususiyatlari esa parsializm tamoyilining mazmuniga kiruvchi belgilar sifatida ko'rsatiladi. Shu ma'noda ular mos ravishda mazmunan ayniy tushunchalar sifatida qo'llaniladi.

Xolizm (yunoncha «holos» — yaxlit, butun) metodologik yondashuv sifatida olamni uning barcha aloqalari, sifatlari va tashkillanish dinamikasi, shuningdek, yuqori psixologik-kognitiv darajadan tortib quyi fizik-kimyoviy darajalargacha bo'lgan tuzilishi bilan birgalikda yagona, yaxlit tarzda ko'rib chiqishga urinishni anglatadi. Xolizm tamoyilining keng iste'molga kirib kelishi tabiiy ravishda nazariy bilish sohasida qism va butunning o'zaro munosabatini, butunni qismlarga ajratish hamda qismlarni butunga birlashtirishni tushuntiruvchi analiz va sintez singari metodologik konsepsiyalarning

[41] Абушенко В. Л. Развитие // Новейший философский словарь / Сост. А. А. Грицанов. - Мн.: Изд. В. М. Скакун, 1998. С. 562;

shakllanishiga olib keldi. Parsializm ana shunday metodologik konsepsiyalardan biri bo‘lib, unda qismning hal qiluvchi roliga alohida urg‘u beriladi. Vujudga kelishiga ko‘ra, parsializm atomizm va elyementarizm, shuningdek, olamning diskretligi g‘oyasi bilan uzviy aloqadorlik kasb etadi. Huquqshunoslik metodologiyasi nuqtai nazaridan esa parsializm tushunchasi o‘z mazmunida xususiy holatni bo‘rttirib ko‘rsatish, noto‘liqlik, masalani bir yoqlama ko‘rib chiqish kabi belgilarni aks ettiradi. Ijtimoiy rivojlanish konsepsiyalari tahlili nuqtai nazaridan parsializm xususiylikni bo‘rttirish, biryoqlamalik va noob’yektivlik, xolizm esa yaxlitlik, ko‘p yoqlamalik va ob’yektivlik ma’nolarida tavsiflanadi[42].

Qism va butun, mos ravishda, xolizm va parsializmning o‘zaro mutanosibligi masalasi V.S.Barulin, M.Ya.Bobrov, M.A.Kuznesova, I.I.Prigojin, O.S.Razumovskiy, V.N.Filippov singari olimlarning tadqiqotlarida alohida ko‘rib chiqilgan. Jumladan, O.S.Razumovskiy ijtimoiy rivojlanish konsepsiyalari tahlili nuqtai nazaridan birmuncha samarador bo‘lgan xolizmning uch turini ajratib ko‘rsatadi[43].

Parsializm bilan aloqador tarzda qaraluvchi nisbiy xolizm. Unga ko‘ra, butun qismlar yig‘indisi sifatida namoyon bo‘ladi.

Organizmik talqindagi mutlaq xolizm. Unga ko‘ra, butun qismlar yig‘indisidan kattaroq bo‘lib, qismlar yig‘indisi butun bilan aynanlashtirilmasligi lozim.

Agnostik, personalistik va mistik xolizm. Unga ko‘ra, yaxlitlikni bilish imkonsiz bo‘lib, inson shaxsiyati organik yaxlitlikning eng yuqori shakli hisoblanadi[44].

Ijtimoiy rivojlanish konsepsiyalari tahlilida xolizmning ikkinchi turini qo‘llash metodologik jihatdan birmuncha samarador hisoblanadi. Ammo mazkur tahlil jarayonida xolizmning nisbiy xarakteri hamda butun va qismning o‘zaro mutanosibligi masalalarini nazardan soqit qilish ham metodologik yanglishishlarni yuzaga keltirishi mumkin.

Organizmik talqindagi mutlaq xolizmni ijtimoiy rivojlanish konsepsiyalarini tushuntirish metodologiyasi sifatida baholash aslo olam yaxlitligini unga nisbatan zaifroq deb qaraluvchi qismlari, aloqalari, darajalari dinamikasiga nisbatan mutlaqlashtirish hisobiga amalga oshirilmasligi lozim. Organizmik xolizmga ko‘ra, metodologik soddalashtirish nuqtai nazaridangina, yaxlit olamga nisbatan uning qismlari, aloqalari darajalari va dinamikasi ikkilamchi xarakter kasb etadi deb qaraladi. Agar mazkur metodologik yondashuv mantig‘iga tayanilsa, inson olamning boshqa qismlariga nisbatan birmuncha murakkab va ko‘p qirrali tizim bo‘lishiga qaramay, u ham ayni yaxlitlikning qismi sifatida tushuntiriladi.

Ijtimoiy rivojlanish konsepsiyalariga tatbiqan integrativ yondashuvga ko‘ra, «ijtimoiy soha o‘zining ijtimoiy munosabatlar, ularning tuzilmasi va dinamikasi, ijtimoiy taraqqiyot hamda uning istiqbollari, insonning jamiyat hamda atrof-muhitga munosabati kabi ko‘plab aspektlari bilan birgalikda tahlil etilishi» lozim[45].

Integrativ yondashuv nuqtai nazaridan tahlil qilinganda, ijtimoiy rivojlanish konsepsiyalarining yaxlitlik va alohidalik xususiyatlari yaqqol namoyon bo‘lib, ularning elementlarini o‘zaro uyg‘un tarzda sinkretlash imkoniyati yuzaga keladi. Ana shunday konsepsiyalardan biri sifatida postindustrial nazariyani keltirib o‘tish mumkin.

Postindustrial jamiyat tushunchasi dastlab D.Bell tomonidan ilmiy iste’molga kiritilgan bo‘lsa-da, keyinchalik jahon va yurtimizning yetakchi tadqiqotchilari tomonidan ko‘plab marta tadqiq etilgan. Mazkur konsepsiya borasidagi tadqiqotlar natijalarini umumlashtirib, soddaroq qilib aytganda, postindustrial jamiyatning genezisi undan avval amal qilgan industrial jamiyatning sifatiy jihatdan transformatsiyasi oqibatida ro‘y bergan. Mazkur paradigma asosida ilgari surilgan nazariyalarda sanoatlashgan jamiyat fenomenining shakllanish jarayonlarini tushuntirishda ilmiy-texnik yutuqlarning keskin sakrashlar asosidagi taraqqiyoti, bunday yutuqlarning ijtimoiy hayot sohasiga implementatsiyasining lokal tamaddunlar sosio-madaniy muhitlariga transferlanishi kabi tushuntirish omillari determinantlar sifatida belgilab olinadi. Shuningdek, texnik inqilob natijasida saqlash va qayta ishlash vositalari tobora arzonlashib boradigan axborot mazkur jamiyatdagi eng qimmat tovarga aylanib borgani uchun ham u axborot jamiyati deb ham ataladi[46].

Industrial jamiyatda ishlab chiqarishning moddiy-texnik vositalari iqtisodiyotning asosini tashkil qilgan bo‘lsa, postindustrial jamiyatda ayni vazifani axborot va axborot texnologiyalari bajaradi.

Axborot jamiyatida bilim shaklidagi axborot nafaqat iqtisodiy va texnik innovatsiyalar uchun, balki siyosiy shakllanish uchun ham poydevor bo‘lib xizmat qiladi. Bu tendensiya iqtisodiy sohada sanoat ishlab chiqarishning asosiy iqtisodiy faoliyat turi sifatida hal qiluvchi ahamiyatini yo‘qotib borishida namoyon bo‘ladi. Zero, axborotlashgan jamiyat hayotida xizmat ko‘rsatish va axborot ishlab chiqarish sohalarining jadallik bilan taraqqiy etishi sanoat ishlab chiqarish sohasining ikkinchi darajali pozisiya kasb etishiga sabab bo‘ladi. Jamiyatda deindustrializatsiya tendensiyasining kuchayishi tabiiy ravishda ommaviy iste’molchilik jamiyati shakllanishiga olib keladi.

[46] Bell D. The Coming of Post-Industrial Society. - N.Y.:Doubleday, 1973. -344 p.

Ilmiy faoliyat bilan shug‘ullanish imkoniyatlarining ortishi texnik taraqqiyotni yanada kuchaytirib, yashash sharoitlarini qulaylashtirgan holda kishilarda bo‘sh vaqtning ko‘payishiga sabab bo‘ladi. Postindustrial jamiyatning industrial jamiyatga nisbatan yuqorida sanab o‘tilgan qulayliklariga qaramay u birmuncha shartli xarakter kasb etadi. Uning muammoli jihatlaridan biri shundaki, axborotlashgan jamiyat afzalliklaridan faqatgina uni boshdan kechirayotgan jamiyatlar a’zolarigina bahramand bo‘lishlari mumkin. Dunyodagi joriy geopolitik manzaradagi notekis taraqqiyot tendensiyalariga diqqat qaratilsa, axborotlashgan jamiyat umumsayyora miqyosida keng joriy etilmaganiga osongina guvoh bo‘lish mumkin. Qolaversa, rivojlangan mamlakatlar ekologik muammolar bilan kurashayotganini iddao qilganliklari holda o‘zlarining eskirgan zararli ishlab chiqarish vositalarini boshqa kam taraqqiy etgan mamlakatlarga ko‘chiradilar yoki ularga tayyor texnologiya va patentlarini eksport qiladilar. Yuqoridagilardan tashqari ekologizm tamoyiliga alohida diqqat qaratish ham postindustrial jamiyatning ustuvor tendensiyalaridan sanaladi. Shuningdek, industrial jamiyatda ekologik imperativga ma’naviy-axloqiy tus berilib, «o‘zingga qanday munosabatda bo‘lishlarini xohlasang, tabiatga shunday munosabatda bo‘l» ko‘rinishidagi g‘oyalar keng tarqaladi. Ekologiyaga munosabat hamda axborot texnologiyalariga egalik qilish nuqtai nazardan yer sayyorasidagi barcha aholi ob’yektiv teng imkoniyatlarga ega deb bo‘lmaydi. Zamonaviy muammolarga yaxlit integrativ yondashuvning mavjud emasligi, ularning tobora parsial noob’yektiv xususiyat kasb etib borishiga olib keladi. A. Zinovyevning «...axborot jamiyatining barcha ta’riflari gipertrofik ravishda ko‘tarilgan detallarga taalluqlidir. Sosiologik ahamiyatga ega hodisalar esa butunlay e’tibordan chetda qoladi yoki eng yaxshi holatda aprior tushunchalar foydasiga soxtalashtiriladi» degan fikriga qo‘shilmay bo‘lmaydi[47][48].

Ma’naviy-ekologik sivilizatsiya konsepsiyasi ham ijtimoiy rivojlanishning zamonaviy konsepsiyalaridan biri hisoblanadi. Ushbu konsepsiya A.V.Ivanov, I.V.Fotiyeva, M.Y.Shishinning «Ma’naviy-ekologik konsepsiya — asoslar va istiqbollar» asarida batafsil tahlil qilinadi. Mazkur konsepsiya noosfera sivilizatsiyasi g‘oyasini, insoniyatning tabiat bilan oqilona va mas’uliyatli birlashuvini, unga sezuvchi jonli organizm sifatida sog‘lom munosabatda bo‘lish g‘oyalarini qamrab oladi. G‘oyaviy ildizlari XIX–XX asr falsafasiga borib taqaluvchi ushbu konsepsiyaning asosida sog‘lom jamiyatning tayanchini tabiatga sog‘lom munosabat tashkil etadi degan qarash yotadi. Konsepsiya tarafdorlarining fikriga ko‘ra, sivilizasion taraqqiyotning yangi davriga kelib moddiy boyliklar va moliyaviy imkoniyatlar emas, balki shaxsning yuksak darajadagi ma’naviy-axloqiy fazilatlari, uning tabiat bilan o‘zaro uyg‘un munosabatlari asosiy qadriyatga aylanadi. Konsepsiya tarafdorlari tamaddunning ma’naviy-ekologik sivilizatsiyaga transformatsiyasi jarayonida insoniyat qadriyatlari va ongdagi g‘oyaviy ustanovkalarning almashinuvi hal qiluvchi omil vazifasini bajarishiga e’tibor qaratadilar. «Tabiat va insonning garmonik yaxlitligi», «qalb», «haqiqat», «oqilonalik», «tolerant hamkorlik» kategoriyalari ma’naviy-ekologik sivilizatsiya dunyoqarashining fundamental asoslarini tashkil qilishi lozim. Ma’naviy-ekologik sivilizatsiyaning fundamental qadriyatlarini keng yoyish, eng avvalo, butun boshli ijtimoiy munosabatlar tizimi va tasavvurlaridagi zo‘ravonlikka asoslanmagan tadrijiy tub o‘zgarishlarni taqozo qiladi. Mazkur konsepsiya mualliflari ma’naviy-ekologik sivilizatsiya dunyoqarashini shakllantirishda ustuvorlik kasb etishi lozim bo‘lgan ko‘plab g‘oyalarni ilgari suradilar. Unga ko‘ra, millatlararo munosabatlar va madaniyatlararo muloqot sohalarida irqiy, milliy va diniy toqatsizlik o‘rnini o‘zaro bag‘rikenglikka tayanuvchi konstruktiv hamkorlik egallashi lozim. Axboriy-mafkuraviy sohadagi dunyo mamlakatlari siyosatida axloqsizlik va tiyiqsiz ko‘ngilxushlik o‘rniga noosferaga asoslangan hayot tarzi targ‘ib qilinishi lozim. Ishlab chiqarish sohasida esa biosentrik va tabiatni qayta tiklovchi texnologiyalarni qo‘llagan holda resurslarni isrof qilishga chek qo‘yish talab qilinadi. Iqtisodiy-moliyaviy sohada esa iqtisodiyotni merkantilistik tushunishga tayanuvchi yondashuvdan chekingan holda tabiatni muhofaza qilish va madaniyat bilan bog‘liq faoliyatlarga nisbatan xarajatni oshirish g‘oyasi ilgari suriladi. Mazkur nazariy konsepsiyaning mualliflari tomonidan ilgari surilgan asosiy g‘oyalarni tahlil va umumlashtirish natijasida shunday xulosaga kelish mumkin. Iqtisodiy yoki siyosiy qarorlarni ishlab chiqish va hayotga tatbiq etish jarayoni davlatning madaniy-axboriy siyosatini belgilab beruvchi institutlar hamda huquqiy mexanizmlar bilan o‘zaro uyg‘unlikda amalga oshirilishi lozim. Shu bilan birga, bu institutlar faoliyati bevosita ma’naviy hamda ekologik imperativlarga tayanishi, ya’ni jamiyat taraqqiyotida axloqiy mas’uliyat va ekologik barqarorlikni muhim mezon sifatida qo‘llashi zarur. Bu yondashuv ijtimoiy barqarorlik va ongli taraqqiyotning asosiy sharti sifatida namoyon bo‘ladi[49][50].

Ma’naviy-ekologik sivilizatsiya nazariyasi ijtimoiy rivojlanish konsepsiyasi sifatida yaxlitlik xususiyatiga ega bo‘lib, unda jamiyat hayotining deyarli barcha sohalari uzviy aloqadorlik va kompleks birlikda tahlil qilinadi. Bunday yondashuv ijtimoiy-falsafiy nuqtai nazardan qaralganda, rivojlanishning asosiy omillarini alohida ko‘rinishda emas, balki ularning o‘zaro bog‘liqligi, madaniy, ma’naviy va ekologik mezonlar bilan uzviy uyg‘unligida ko‘rib chiqishga intiladi. Umumiy taraqqiyot konturlari, ongli munosabat tizimi elementlari va ularning evrilishlari, jamoaviy ong o‘zgarishlari singari

tarkibiy qismlardan tashkil topuvchi hosila sifatida namoyon bo‘ladi. Mazkur konsepsiyaning o‘ziga xos jihati shundaki, unda ijtimoiy rivojlanish jarayoni bugungi global dunyo sharoitida o‘ta dolzarb bo‘lgan ma’naviy-ekologik tendensiyalar bilan aloqador tarzda tushuntiriladi. Bundan tashqari ayni konsepsiya doirasida ijtimoiy rivojlanishning nafaqat nazariy jihatlari, balki ma’naviy-ekologik tendensiyalar bilan bog‘liq amaliy takliflarda ifodalanuvchi jihatlari ham muhokama qilinadi. Ijtimoiy rivojlanish jarayonini tushuntirish, uning istiqbol mo‘ljallarini prognozlashga qaratilgan konsepsiyalarga nisbatan integrasion va differensiasion yondashuvlarning qiyosiy tahlili natijalaridan ma’lum bo‘ladiki, sosiogenez va uning taraqqiyoti parsial tarzda olib qaralsa, metodologik jihatdan biryoqlamalik yuzaga keladi. Bu esa, o‘z navbatida, amaliy jihatdan inson-jamiyat va tabiat o‘rtasidagi muvozanatning buzilishiga va turli xil inqirozlarga olib kelishi mumkin. Rivojlanish konsepsiyalarini yaratishda integrasion yondashuvga tayanish lokal nuqtai nazaridan biror-bir hududdagi sosiumning barcha muammolarini qamrab olish, global nuqtai nazardan esa ularni umumjahon tendensiyalari bilan aloqador tarzda ko‘rib chiqish, shunga ko‘ra, yechimlar izlab topish imkonini beradi.

Yuqoridagi tahlillardan kelib chiqqan holda shuni aytish mumkinki, ijtimoiy rivojlanish konsepsiyalarini ishlab chiqishda parsial-differensiasion yondashuvdan ko‘ra, integrativ-yaxlit yondashuv metodologik jihatdan samarador hisoblanadi. Negaki, integrativ yondashuv ijtimoiy taraqqiyot istiqbollarini yaxlit holda olib qarash hamda shunga mos ravishda konseptual g‘oyalar ishlab chiqish zaruratini o‘zida namoyon qiladi. Albatta, integrativ yondashuvni qo‘llashda alohida jihatlarning o‘zaro uyg‘un aloqasini ham nazardan chetda qoldirib bo‘lmaydi. Mazkur metodologik mexanizm esa tabiiy ravishda optimologik yondashuvga bo‘lgan zaruratni yuzaga chiqaradi. Soddaroq qilib aytganda, rivojlanish jarayoni umumiy hodisa sifatida olib qaralib, dastlab u qismlarga ajratilishi, keyin esa eng birlamchi umumlashtiruvchi jihatlar yaxlit holda sintezlanishi lozim.

Keltirilgan tahlillar xolistik yondashuv ijtimoiy rivojlanish konsepsiyasining umumiy tuzilmasi va sohalararo bog‘lanishlarini ochishda, parsial yondashuv esa alohida sohalarda kechayotgan jarayonlarni chuqur o‘rganishda muhim ekanini ko‘rsatadi. Integrativ yondashuv ushbu ikki pozisiyaning samarali jihatlarini birlashtirib, ijtimoiy tizimni yaxlit holda ko‘rish bilan birga uning tarkibiy elementlari avtonomiyasini ham hisobga olish imkonini beradi. Postindustrial jamiyat va ma’naviy-ekologik sivilizatsiya konsepsiyalari aynan shu jihatdan ahamiyatli bo‘lib, ularda texnologiya, bilim, axborot, qadriyat va ekologik muvozanat ijtimoiy taraqqiyotning o‘zaro bog‘langan omillari sifatida namoyon bo‘ladi.

Xulosa va takliflar

1. Ijtimoiy rivojlanish konsepsiyalarini tahlil qilishda xolistik yondashuv jamiyatning sohalararo aloqalari va umumiy dinamikasini ochib berishga xizmat qiladi.

2. Parsial yondashuv alohida iqtisodiy, siyosiy, texnologik, ma’naviy yoki ekologik jarayonlarni chuqur tahlil qilish imkonini beradi, biroq uning natijalari umumiy ijtimoiy tizim bilan bog‘langanda to‘liqroq mazmun kasb etadi.

3. Integrativ yondashuv butun va qism o‘rtasidagi mutanosiblikni saqlagan holda ijtimoiy rivojlanish konsepsiyalarining tarkibiy elementlarini yagona metodologik maydonda tahlil qilish imkoniyatini yaratadi.

4. Postindustrial jamiyat konsepsiyasida bilim, axborot va texnologiya iqtisodiy hamda ijtimoiy munosabatlarni o‘zgartiruvchi kompleks omillar sifatida namoyon bo‘ladi.

5. Ma’naviy-ekologik sivilizatsiya konsepsiyasi ijtimoiy taraqqiyotni tabiiy muhit, ma’naviy qadriyatlar va ijtimoiy institutlar o‘rtasidagi o‘zaro muvofiqlik asosida tushuntirishi bilan integrativ metodologiyaning muhim namunasini tashkil qiladi.

6. Raqamli iqtisodiyot, ekologik siyosat va ijtimoiy himoya dasturlarini baholashda sohalararo ko‘rsatkichlarni yagona tahlil modelida uyg‘unlashtirish maqsadga muvofiq.

7. Hududiy rivojlanish rejalarini ishlab chiqishda iqtisodiy samara, ijtimoiy ehtiyoj va ekologik barqarorlikni o‘zaro bog‘liq mezonlar asosida baholash zarur.

8. Axborot texnologiyalarini joriy etishda inson kapitali, ma’naviy qadriyatlar va atrof-muhitga ta’sirni birgalikda hisobga olish lozim.

MANIPULYATIV HIYLALAR HAQIDAGI QARASHLARNING TARIXIY-RITORIK VA FALSAFIY SHAKLLANISH XUSUSIYATLARI

Toshov Xurshid Ilxomovich
O‘zMU “Falsafa” kafedrasi
dotsenti, falsafa fanlari doktori (DSc)
E-mail: sujdiniya@mail.ru

Annotatsiya: *Mazkur maqolada manipulyativ hiylalarning qadimgi ritorik an’analardan yangi davr falsafasigacha bo‘lgan shakllanish jarayoni, ularning mantiqiy, psixologik va lingvistik belgilarining bosqichma-bosqich namoyon bo‘lishi tahlil qilinadi. Antik eristika va sofistika, Aristotelning sofistik raddiyalar tasnifi, qadimgi Xitoy stratagemalari, F. Bekon va J. Lokning tildagi noaniqliklarga oid qarashlari hamda A. Shopengauerning eristik dialektika haqidagi mulohazalari o‘zaro aloqadorlikda ko‘rib chiqiladi. Tahlil natijasida manipulyativ hiylalarning asosiy tamoyillari mantiqiy qoidalarni ataylab buzish, psixologik ta’sir o‘tkazish va til imkoniyatlaridan maqsadli foydalanish bilan bog‘liq ekani asoslanadi.*

Kalit so‘zlar: *Manipulyativ hiylalar, ritorika, eristika, sofistika, sofistik raddiya, stratagema, mantiqiy xato, psixologik ta’sir, lingvistik noaniqlik, eristik dialektika.*

ИСТОРИКО-РИТОРИЧЕСКИЕ И ФИЛОСОФСКИЕ ОСОБЕННОСТИ ФОРМИРОВАНИЯ ПРЕДСТАВЛЕНИЙ О МАНИПУЛЯТИВНЫХ УЛОВКАХ

Аннотация: *В данной статье анализируется процесс формирования манипулятивных уловок — от античных риторических традиций до философии Нового времени, а также поэтапное проявление их логических, психологических и лингвистических признаков. Во взаимосвязи рассматриваются античная эристика и софистика, аристотелевская классификация софистических опровержений, древнекитайские стратагемы, взгляды Ф. Бэкона и Дж. Локка на неопределенность языка, а также рассуждения А. Шопенгауэра об эристической диалектике. В результате анализа обосновывается, что основные принципы манипулятивных уловок связаны с преднамеренным нарушением логических правил, оказанием психологического воздействия и целенаправленным использованием возможностей языка.*

Ключевые слова: *манипулятивные уловки, риторика, эристика, софистика, софистическое опровержение, стратагема, логическая ошибка, психологическое воздействие, лингвистическая неопределенность, эристическая диалектика.*

HISTORICAL-RHETORICAL AND PHILOSOPHICAL FEATURES OF THE FORMATION OF VIEWS ON MANIPULATIVE TRICKS

Abstract: *This article analyses the formation of manipulative tricks from the ancient rhetorical traditions to the philosophy of the modern era, together with the gradual manifestation of their logical, psychological and linguistic features. Ancient eristics and sophistry, Aristotle’s classification of sophistical refutations, the stratagems of ancient China, the views of F. Bacon and J. Locke on the ambiguity of language and A. Schopenhauer’s reflections on eristic dialectic are examined in their interrelation. The analysis substantiates that the basic principles of manipulative tricks are connected with the deliberate violation of logical rules, the exertion of psychological pressure and the purposeful exploitation of the resources of language.*

Keywords: *manipulative tricks, rhetoric, eristics, sophistry, sophistical refutation, stratagem, logical fallacy, psychological influence, linguistic ambiguity, eristic dialectic.*

Kirish va mavzuning dolzarbligi. G‘arb ritorik va argumentlash sohasidagi tadqiqotlar an’anasida hiylalar keng tadqiq etiladigan masala sanaladi. Argumentlash jarayonida qo‘llaniladigan hiylalar ilmiy, xususan, ingliz tilidagi adabiyotlarda keng o‘rganilganligiga qaramay, postsovet makoni, jumladan, O‘zbekistonda ayni yo‘nalishdagi izlanishlar birmuncha kam uchraydi. Ayniqsa, mantiq, ritorika, argumentlash nazariyasi va amaliyoti singari sohalarda bu masala tahliliga jiddiy e’tibor qaratiladi.

Ammo argumentlashda qo‘llaniladigan hiylalar qadimgi yunon ritorik an’analaridayoq tadqiqotchilar diqqat markazida turgan. Masalan, qadimgi yunon mutafakkiri Zenon ritorikani ochiq kaft va mushtdan iborat ikki turga ajratgan. Birinchi ritorika turida adresant adresatni argumentlash qoidalariga rioya qilib, mantiqiy asoslar va izchillikka asoslanib, savolni to‘g‘ri muhokama qilgan holda ishontirishga intiladi. Ikkinchi turda esa psixologik bosim, majburlash, qo‘pol va provokatsion bahs usullaridan foydalangan holda bahsda g‘alabaga erishishni nazarda tutadi.

“Hiylalar deganda kommunikativ vaziyatda ustunlikka erishish, o‘z manfaatlarini maksimal darajada qondirish, bahsda g‘alaba qozonish va qarama-qarshi tomonning pozitsiyasini zaiflashtirish uchun mo‘ljallangan noto‘g‘ri va ruxsat etilmagan usullar tushuniladi”[51].

“Mantiqiy hiylalar bu — o‘z pozitsiyasi ustunligini kuchaytirish va raqib pozitsiyasini zaiflashtirish maqsadida mantiq va argumentlash qoidalarini ataylab buzishni anglatadi”[52].

Yuqoridagi mulohazalar tahlillaridan ko‘rinib turibdiki, mantiqiy hiylalar mantiq va argumentlash qoidalarining buzilishi, aniqrog‘i, mantiqiy xatolar natijasida yuzaga keladi. Agar qoidalar anglanmagan tarzda (masalan, shoshqoloqlik yoki argumentlash borasidagi savodxonlikning pastligi natijasida) buzilsa, bunday holda ular mantiqiy xatolar yoki paralogizmlar, agar qasddan buzilsa sofizmlar yoki mantiqiy hiylalar deb ataladi. Argumentlash sohasiga oid ilmiy tadqiqotlarda keng tarqalgan yondashuvga ko‘ra mantiqiy xatolar odatda ularning argumentlash tuzilmasidagi muayyan element doirasida amal qilishiga qarab tasniflanadi. Soddaroq qilib aytganda, mantiqiy xatolar hamda ularga ataylab yo‘l qo‘yilganda yuzaga keladigan mantiqiy hiylalarni tezisga aloqador, argumentga aloqador hamda demonstratsiya, kelib chiqish sabab-oqibatga, mantiqiy izchillikka yoki xulosa chiqarishga aloqador hiylalar ko‘rinishida tasniflash mumkin.

Mavzuga oid adabiyotlarning tahlili. Manipulyativ hiylalarning nazariy talqini mantiq, ritorika va argumentlash sohalarida turli davrlarda shakllangan. Aristotel sofistik raddiyalarni nutqiy vositalarga aloqador va nutqiy vositalarga aloqador bo‘lmagan shakllarda ko‘rib chiqqan. F. Bekon asarlarida bilish jarayonida til imkoniyatlarining noto‘g‘ri qo‘llanilishi natijasida yuzaga keladigan chalkashliklarga e’tibor qaratilgan. R. Dekart esa kishilarni adashtirishga olib keluvchi noto‘g‘ri mushohada usullari va bilish jarayonidagi xatolar masalasini tahlil qilgan. A. Shopengauer bahsda haqiqatdan ko‘ra ustunlikka intilish motivlarini eristik dialektika doirasida ko‘rib chiqqan. Harro fon Zenger tahlillarida qadimgi Xitoy stratagemalarining psixologik ta’sir, yashirin maqsad va vaziyatdan ustunlikka erishish bilan bog‘liq jihatlari yoritilgan. Nikita Nepryaxin va V. P. Moskvin ishlarida hiyla hamda mantiqiy hiyla tushunchalarining kommunikativ va argumentatsion belgilari ajratib ko‘rsatilgan. Mazkur yondashuvlar hiylalarning mantiqiy, psixologik va lingvistik unsurlari tarixiy jihatdan uzviy shakllanganini ko‘rsatadi.

Tadqiqot metodologiyasi. Tadqiqot olib borish davomida tizimlilik, nazariy-deduktiv xulosa chiqarish, analiz va sintez, tarixiylik va mantiqiylik, qiyosiy tahlil hamda manbalardagi tasniflarni o‘zaro taqqoslash tamoyillaridan foydalanildi.

Tahlil va natijalar.

Manipulyativ hiylalarni tarixiy-ritorik nuqtai nazardan tahlil qilish ularning bir paytning o‘zida bir necha funksiyani bajarishini ko‘rsatadi. Bir tomondan, hiyla bahsning formal tuzilmasiga ta’sir qilib, tezis, dalil yoki xulosa o‘rtasidagi izchillikni buzadi. Ikkinchi tomondan, u adresatning psixologik holatiga ta’sir o‘tkazib, masalaning asl mohiyatidan chalg‘itish, shoshiltirish yoki muayyan pozitsiyani qabul qilishga moyillik hosil qiladi. Shu sababli tarixiy qarashlarda bir xil hodisaning mantiqiy xato, sofistik usul, eristik texnika yoki stratagema ko‘rinishida tavsiflanishi tabiiy holat sanaladi.

Ijtimoiy munosabatlarga kirishishda muayyan ustunlikka erishish bo‘yicha samarador mexanizmlar qadim sivilizatsiyalar davridan buyon amaliyotda faol qo‘llanilib kelingan. Shunga mos ravishda ularni tadqiq etish masalasi tarixi ham birmuncha qadim davrlarga borib taqaladi. Jumladan, turli xalqlar afsonalari, rivoyatlari hamda ertak va dostonlarida bunday mexanizmlarni samarador qo‘llash orqali o‘z maqsadiga erishadigan kishilar obrazlarini ko‘plab uchratish mumkin. Xususan, sharq xalqlari folklorida uchraydigan tulki, ilon kabi obrazlar buning yaqqol misoli bo‘la oladi. Qadimgi hind durdonalaridan sanaluvchi “Kalila va Dimna” asarida bunday obrazlarni ko‘plab uchratish mumkin.

Qadimgi g‘arb sivilizatsiyasi haqida gap ketganda esa Yunon mifologiyasidagi Germes ma’budi ana shunday obrazlardan biri sifatida namoyon bo‘ladi.

Ammo shaxslararo va ijtimoiy kommunikatsiya jarayonlarida taraflardan biriga ustunlik olib keluvchi hiylalardan foydalanish, bunday hiylalarni tasniflash, ularning axloqiy, mantiqiy, ritorik, psixologik, lingvistik jihatlarini ilmiy asosda tadqiq etish antik davrda boshlanganligi borasida tarixiy ma’lumotlar mavjud.

Antik davr tafakkurining eristik va sofistik falsafiy mushohadalash usullari shakllangan paytlarida ayni masalaga bo‘lgan qiziqish yanada ortdi. Eristika (yunoncha, eristikos — bahslashuvchi) degan ma’noni anglatib, raqibni yengishda

[51] Я манипулирую тобой — Методы противодействия скрытому влиянию / Никита Непряхин. — М. — Альпина Паблишер, 2018.

[52] Риторика и теория аргументации — учебник для вузов / В. П. Москвин. — 3-е изд., перераб. и доп. — Москва — Издательство Юрайт, 2022. — 725 с.

ko‘maklashuvchi istalgan usulni qo‘llash orqali bahslashish san’atini anglatadi.[53] Sofistika esa (yunoncha, sofisma — donolik, ayyorlik, hiyla) istalgan usulni qo‘llagan holda atrofdagilarni o‘z fikrlariga ishontirish, bunda yolg‘on ishlatish, mantiq qoidalarini ataylab buzish kabi usullardan keng foydalanish nazarda tutiladi.[54]

Qadimgi Yunonistonning siyosiy tizimida sudlar va xalq yig‘ilishida ustunlik qilgan tendensiya sanaluvchi raqibning fikrini rad etish va o‘z fikrining chinligiga ishontirish qobiliyati inson taqdirini belgilovchi omil sanalgan. Bu esa o‘z navbatida ishontirish san’atidan ta’lim beruvchi o‘qituvchilarga bo‘lgan ehtiyoj va ijtimoiy buyurtmaning oshishiga olib kelgan. Qadimgi Yunon falsafasining yorqin namunalaridan biri hisoblanuvchi sofistlar maktabi vakillari ayni ijtimoiy buyurtma talablarini bajarishda faollik ko‘rsatganlar. Ular o‘zlarining ta’limotlarida inson bilimlarining shartli va ishonchining beqaror ekanligi g‘oyasini ilgari surganlar. Sofistlar maktabi vakillari istalgan, hatto o‘zaro zidlik munosabatida bo‘lgan mulohazalarda aks etuvchi tezislarning ham bir paytning o‘zida chin bo‘la olishini isbotlashga intilgan holda, mazkur g‘oyani amalga oshirishni nazarda tutuvchi turli usullarni ham ishlab chiqqanlar. Sofistlar tomonidan ishlab chiqilgan turli ishontirish usullari, ularni amaliyotda qo‘llay olish qobiliyatini shakllantirishga qaratilgan metodikalar, tabiiyki, qadimgi Yunon falsafasida mantiq, argumentlash nazariyasi, ritorika singari sohalarga nisbatan qiziqishning kuchayishiga olib keldi. Jumladan, Platon dialoglarining bosh qahramoni sanaluvchi Suqrot tomonidan mayevtika usulining ishlab chiqilishi bu boradagi ilk urinishlardan biri sifatida baholanishi mumkin.

Ammo qadimgi Yunon mutafakkirlari orasida birinchilardan bo‘lib, Aristotel Mil. avv. (384–322 yillar) sofistik ishontirish usullarini ilmiy metodologiya asosida tadqiq etgan. U ilk bor eristika va sofistikani dialektikaga qarama-qarshi qo‘yadi. Uning ta’kidlashicha, “Sinov san’ati — bu dialektikaning bir turi bo‘lib, u biladigan odamga emas, balki bilmaydigan, lekin o‘zini biluvchi sifatida ko‘rsatadigan kishiga murojaat qiladi. Sofistika soxta donolik yordamida tirikchilik qilish san’ati sifatida talqin etiladi. Hamma narsaning asosini o‘rganadigan kishi dialektik, o‘zini ana shunday qilayotgandek ko‘rsatadigan odam esa sofist sifatida namoyon bo‘ladi. Sofistlar bahslashish va unda g‘alaba qozonish uchungina mushohada yuritadilar, soxta dalillarga intilgan holda, o‘z manfaatlarini haqiqiy donolikdan emas, aksincha, soxta donolikdan izlaydilar. Eristika bahsda nomaqbul usullar bilan kurashishni anglatib, eristlar esa bahslashishni yoqtiruvchi va janjalga moyil kishilar bo‘ladilar”[55].

Aristotelning fikriga ko‘ra, sofistlar va eristlar ayyorliklarining tabiatini eng avvalo, ularga qarshi tura olish zarurati tufayli ham bilish talab qilinadi. Bunday usullar ko‘pincha og‘zaki iboralarga asoslanadi. “Shuning uchun ular tufayli biror narsa haqida gapirilayotganda nechta ma’no nazarda tutilayotganligini hamda narsalar va ularning nomlari o‘rtasidagi umumiy, shuningdek, farqli jihatlarni yaxshi ajratish mumkin”[56].

Aristotel eristlar ham sofistlar ham bunday hiylalarni qo‘llashda bir xil dalillardan foydalanishlari, ammo ular tomonidan amalga oshiriladigan norelevant argumentlash aktlari intensional tarzda farq qilishiga diqqat qaratadi. Unga ko‘ra, eristlar soxta g‘alabani maqsad qilsalar, sofistlar soxta donishmandlik namoyon etishni ko‘zlaydilar. Ko‘pincha sofistlar rad etayotgandek taassurot uyg‘otib, suhbatdosh yolg‘on gapirgan holda, umume’tirof etilgan qoidalar bilan nomuvofiq pozitsiyada ekanligini ko‘rsatishga intiladilar. Ular raqibni nutqda xato qilishga undab, bir narsani qayta-qayta takrorlashga majbur qiladilar. Bunday manipulyativ maqsadlar turli usullar yordamida amalga oshirilishi mumkin. “Sofistlar tomonidan bahsda eng ko‘p rad etish maqsadida eng ko‘p qo‘llaniladigan usul nomlardan kelib chiqish hisoblanadi. Xuddi bilguvchilar hisoblash toshlarini ishlatishni bilmaydiganlarni aldaganlari singari so‘zlar ma’nosini tushunmaydiganlar ham argumentlar keltirishda ana shunday xatoga yo‘l qo‘yadilar”.[57] Aristotel ikkita soxta rad etish usulini keltirib o‘tadi.

1. Nutqiy vositalarga aloqador soxta rad etish usullari. A) bir xil nomlanish (omonimiya); B) gaplarning ikki ma’nolilik kasb etishi (amfiboliya); C) birikish (synthesis) — aniqrog‘i, sintaktik jihatdan to‘g‘ri, ammo semantik nuqtai nazardan noto‘g‘ri qurilgan so‘z birikmasi; D) ajratish (diaresis), aniqrog‘i, “va” biriktiruvchi bog‘lamasining ikki ma’noda qo‘llanilishi; E) urg‘u yoki talaffuz bilan aloqador hiyla (prosodia), aniqrog‘i, matnda yozilganlarni talaffuz yoki urg‘uning noto‘g‘ri qo‘yilishi natijasida buzib talqin etilishi.

2. Nutqiy vositalarga aloqador bo‘lmagan hiylalar. A) o‘tkinchilik paralogizmi (biror narsaga xos xususiyatlar unga nisbatan o‘tkinchi bo‘lgan narsalarda ham uchraydi); B) aytilganlar paralogizmi (aytilganlar umuman aytilganlar shaklida talqin etiladi); C) kelib chiqish (izchillikni) rad etish (teskari kelib chiqish yoki izchillik); D) sabab bo‘lmagan narsani sabab sifatida qabul qilishni rad etish; E) ikki savolni bittaga birlashtirish dalillari[58].

Aristotel nafaqat birinchilardan bo‘lib mantiq qoidalarini buzish va tilning o‘ziga xos xususiyatlarini suiiste’mol qilish sofistik xulosa chiqarishning asosiy tamoyillari ekanligini ta’kidladi, balki ularni fosh etishning bosh tamoyilini ham

ko‘rsatib berdi. “Ba’zan chin xulosadan ko‘ra haqiqatga o‘xshash xulosani afzal ko‘rishga to‘g‘ri kelgani kabi sofistik raddiyalarni fosh etish haqiqatga o‘xshab tuyulganda ham ularni haqiqat sifatida qabul qilishga to‘g‘ri keladi”[59].

Aristotelning bu boradagi qarashlari keyingi davr mantiqiy ta’limotlariga transformatsiyalangan bo‘lib, u tomonidan ishlab chiqilgan paralogizmlar tasnifi keyinchalik ham an’anaviy, xususan, formal mantiq paradigmasi doirasida amalga oshirilgan tadqiqotlarning mantiqiy xatolar tahlil etiladigan bo‘limlarida deyarli to‘liq qamralgan. Argumentlashning mohiyati haqidagi mulohazalar tahlillari shuni ko‘rsatadiki, og‘zaki ta’sir ko‘rsatish shakllarining o‘zgarganligi va vositalarining takomillashganligi omilini hisobga olmaganda bizning zamonimizda ham bundan 2000 yillar avvallar oldin foydalanilgan fikrlash usullari hamda adashtirish texnikalari qo‘llanilmoqda[60].

Ongni manipulyatsiyalashning argumentatsion mexanizmi vazifasini bajaruvchi hiylalarning g‘alaba qozonish va ustunlikka erishish usuli sifatida tadqiq etilishini qadimgi sivilizatsiyaning birgina antik dunyosi bilan cheklash to‘g‘ri emas. Jumladan, harbiy va siyosiy qarama-qarshilik vaziyatlarida raqibga nisbatan ustunlikka erishish usullari qadimgi xitoy falsafasida stratagemalar deb atalgan. Mazkur atama yunoncha stratagema so‘zidan olingan bo‘lib, “harb ishi, harbiy ayyorlik” degan ma’noni anglatadi. Xitoychada esa “chjimou” — “zukkolik, topqirlik” degan ma’nolarni anglatib, dushmanga qo‘yilgan tuzoqni qamrab oluvchi strategik reja tushunilgan[61].

Psixologik ta’sirga qarab yo‘nalganlik stratagemalarning asosiy tamoyili hisoblanadi.

Qadimgi Xitoy ritorik an’analarida ruhni boshqarish psixologik jang san’atining hal qiluvchi jihati sanaladi. “Ruh sust bo‘lganda zarba berish, uning tetik paytida qochish, qalbni boshqarish (tartibli bo‘lib, tartibsizlikni kutish, xotirjam bo‘lib, hayajonlanishni kutish), kuchni boshqarish (yaqin bo‘lib, uzoqdagini kutish, kuchga to‘la bo‘lib, charchaganlarni kutish, to‘q bo‘lib, ochlarni kutish) zarur”[62].

Dastlab stratagemalar harbiy va siyosiy qarama-qarshiliklar yuzaga kelgan vaziyatlarda qo‘llanilgan bo‘lsa, keyinchalik ularning tatbiq qilish sohalari ham kengayib bordi. Bu esa tabiiy ravishda ayni kategoriyaning mazmuni va hajmi ham kengayib, u istalgan ishni noan’anaviy usullar bilan hal qilishni anglatuvchi tushunchaga aylanib bordi.

Mazkur kategoriyaning mazmunida qamralgan belgilarni aniqroq tasavvur qilish uchun ularning eng keng tarqalgan turlarini ko‘rib chiqish talab qilinadi.

Stratagemalarning metaforik mazmuni ularning maqsadga erishishdagi manipulyativ hiyla sifatidagi tavsifiy belgilarini ajratib ko‘rsatishga imkon beradi. Ularda sahnalashtirish, aylanma yo‘l, yolg‘on manyovr, aldash kabi nomlarning qo‘llanishi stratagemalarning yashirin maqsadga egalik, kutish pozitsiyasi, zaif nuqtaga bosim o‘tkazish, ihotalash, provokatsiya kabilarning tatbiq etilishi esa xitoycha manipulyativ hiylalar psixologik ta’sir ko‘rsatish belgisini ham namoyon etishidan dalolat beradi.

Mantiqiy tadqiqotlar taraqqiyoti natijasida hiylalar tushunchasining tavsifiy belgilari ham transformatsiyaga uchrab bordi. Jumladan, u yangi davr falsafasi doirasida amalga oshirilgan tadqiqotlarda kishilarni adashtirish maqsadida argumentlash qoidalarini ataylab buzish ma’nosida talqin etila boshlandi[63]. Qolaversa, ayni davr falsafiy ta’limotlarining gnosiologik konsepsiyalarida insonning bilish jarayonida lingvistik omillar ta’sirida ham chalkashliklar ro‘y berishi mumkinligiga alohida diqqat qaratildi. Jumladan, F. Bekon tomonidan keltirilgan “bozor sanami” so‘zlar va narsalarni aynanlashtirish oqibatida namoyon bo‘ladi.[64] Qolaversa, J. Lok ham so‘zni suiiste’mol qilish oqibatida ro‘y beradigan xatolarga diqqat qaratib quyidagilarni sanab o‘tadi.

1. Muayyan (masalan, diniy yoki falsafiy) g‘oyalarga mos kelmaydigan yoki muhim g‘oyalarga mos kelsa ham, mazmuni noaniq, har kim o‘zicha tushunishi va talqin etishi mumkin bo‘lgan so‘zlardan foydalanish;

2. Noodatiy ma’nodagi so‘zlarni qo‘llash, ataylab ikki ma’nolilikni keltirib chiqarish, so‘zlarni nostandart shaklda birlashtirish orqali ataylab noaniqlikka yo‘l qo‘yish;

3. So‘zlarni ular ifoda eta olmaydigan ma’noda qo‘llash;

4. So‘zlarning ko‘p ma’nolilik va mazmunining chalkashligiga qaramay, ularga ishonish;

5. Nutqning me’yoridan ortiq majoziy xususiyat kasb etishi.

Shu tariqa hiylalarning maqsadga erishishda norelevant usullarni qo‘llash vositasi ekanligi g‘oyasi falsafiy tadqiqotlarda ham jiddiy tahlil etila boshladi. Manipulyativ hiylalarning yuqorida keltirib o‘tilgan izlanishlarda amalga oshirilgan dastlabki tipologiyasi va tasniflari tahlillari natijalari shuni ko‘rsatib turibdiki, mantiqiy mushohada qoidalarini ataylab buzish, psixologik ta’sir o‘tkazish hamda til imkoniyatlarini suiiste’mol qilish ularning asosiy tamoyillari hisoblanadi.

Garchi falsafiy fikr taraqqiyotining dastlabki bosqichlarida paralogizmlar va sofizmlar keng tadqiq etilgan bo‘lsada, aynan “hiyla” tushunchasi birinchi bo‘lib A. Shopengauer (1788 — 1860) ishlarida ilmiy iste’molga kiritiladi. Mutafakkir “Eristika yoki bahslashish san’ati”da bunday irrelevant argumentlash usullarini qo‘llash motivlari tahliliga alohida diqqat qaratadi. Jumladan, mutafakkirning fikriga ko‘ra, “o‘zaro birgalikda mushohada yuritish jarayonida har qanday insonga o‘zaro fikrlar almashinuvi orqali muayyan predmetga nisbatan o‘zi va sherigi qarashlari o‘rtasidagi farqni bilib olish xususiyati xos bo‘lib, u shaxsiy qarashlarini tekshirib ko‘rish o‘rniga boshqaning fikrlaridan xato izlashni afzal ko‘radi. Boshqacha qilib aytganda, har qanday odam tabiatan hamisha haq bo‘lib chiqishni istaydi”[65].

Agar inson tabiatida yovuzlik mavjud bo‘lmaganda kishilar kimning qarashlari adolatli ekanligi borasida bahslashmas va raqib pozitsiyasiga ham katta ma’no yuklamas edilar, deb hisoblaydi faylasuf. Ammo uning fikriga ko‘ra, bu birinchi darajali muhimlik kasb etadi. Chunki insoniy ruh “intellektual kuchlarga oid unsurlarga nisbatan ta’sirchan bo‘lgani holda, biz dastlab aytgan mulohazalarimizning (suhbat avvalidagi tezis va uni qo‘llab-quvvatlovchi argumentlar nazarda tutilmoqda) xato, aksincha, raqibning fikrlari adolatli bo‘lib chiqishini yoqtirmaydi”[66].

A. Shopengauer bahsning bosh maqsadi haqiqatga erishish ekanligini tan olgan holda, “chin mulohazalar degan tushuncha birmuncha shubhali narsa bo‘lib, ularning o‘zlaridan bunday mulohazalarning xatoligini tasdiqlovchi asoslarni keltirib chiqarish mumkin, dastlab tezisni qo‘yishga turtki vazifasini bajargan haqiqatga muhabbat tuyg‘usi o‘z o‘rnini shaxsiy fikrga muhabbat hissiga bo‘shatib berganligi bois, haqiqat yolg‘onga, aksincha, yolg‘onning haqiqatga aylanishiga zamin hozirlashini…, qolaversa, bahs yetakchisi haqiqatdan ko‘ra ko‘proq o‘z tezisi uchun kurashishini”[67], — ta’kidlaydi.

Mutafakkir o‘zining mantiqiy hiylalar genezisining motivlarini tahlil qilishga qaratilgan izlanishlarida ularni qo‘llashga turtki bo‘luvchi omillar sifatida yuqorida ta’kidlangan inson tabiatiga xos nomukammallik va chin mulohazalardan irrelevant foydalanish imkoniyatining mavjudligi kabilarni ko‘rsatadi. Shopengauer obyektiv haqiqatdan qat’iy nazar ustunlikka erishish va ko‘pchilik oldida haqdek taassurot uyg‘otishni o‘rgatuvchi fan sohasini eristik dialektika, bunday hiylalarning o‘zini esa eristik dialektika texnikalari deb ataydi. Mutafakkir eristik dialektikani qilichbozlik bilan analogiya qilgan holda, uni ham aqliy qilichbozlik ekanligini ta’kidlab, xuddi qilichbozlik muallimi kim haqligidan qat’iy nazar raqibga zarba berishni o‘rgatgani singari eristik dialektika ham sun’iy usullarni to‘g‘ri birlashtirib qo‘llash orqali adolatsiz hujumlardan himoyalanish hamda raqibni o‘z quroli bilan yengishni o‘rgatishini aytib o‘tadi.

Shu tariqa, A. Shopengauerning eristik dialektika haqidagi qarashlari manipulyativ hiylalarning mantiqiy tuzilishi, bahsdagi ustunlikka intilish va ularni qo‘llashga turtki bo‘luvchi psixologik motivlarni o‘zaro bog‘liq holda yoritadi.

Xulosa va takliflar

1. Manipulyativ hiylalarni ilmiy tahlil qilish an’anasi antik ritorika va sofistika doirasida shakllangan bo‘lib, bahsda ustunlikka erishish bilan mantiqiy qoidalarga rioya qilish o‘rtasidagi farq qadimgi qarashlardayoq ajratib ko‘rsatilgan.

2. Aristotelning sofistik rad etish usullariga oid tasnifi tilning ko‘p ma’noliligi, sintaktik qurilish va sabab-oqibat aloqalaridan noto‘g‘ri foydalanish mantiqiy hiylalarning muhim manbalari ekanini ko‘rsatadi.

3. Qadimgi Xitoy stratagemalari manipulyativ ta’sirning faqat mantiqiy emas, balki kutish, yashirin maqsad, zaif nuqtaga bosim o‘tkazish va psixologik holatni boshqarish kabi jihatlarini ham qamrab oladi.

4. Yangi davr falsafasida til va bilish o‘rtasidagi munosabatga qaratilgan tahlillar hamda A. Shopengauerning eristik dialektikaga oid qarashlari hiylalarning lingvistik va motivatsion asoslarini yanada kengroq tushuntirish imkonini beradi.

5. Tarixiy-qiyosiy tahlil mantiqiy qoidalarni ataylab buzish, psixologik bosim va til imkoniyatlaridan maqsadli foydalanish manipulyativ hiylalarning barqaror tamoyillari sifatida shakllanganini ko‘rsatadi.

6. Zamonaviy shaxslararo va kasbiy kommunikatsiyada manipulyativ hiylalarni aniqlash uchun tezis, dalil va xulosa o‘rtasidagi mantiqiy izchillikni tekshirishga qaratilgan qisqa tahlil algoritmlaridan foydalanish maqsadga muvofiq.

7. Raqamli kommunikatsiyada ijtimoiy tarmoqlar, messenjerlar va onlayn taqdimotlarda uchraydigan ko‘p ma’noli, hissiy bosimga asoslangan yoki chalg‘ituvchi ifodalarni belgilashga xizmat qiluvchi avtomatlashtirilgan matn tahlili vositalaridan foydalanish mumkin.

8. Ta’lim va korporativ muloqot amaliyotida tarixiy ritorik hiylalarni zamonaviy kommunikativ vaziyatlar bilan qiyoslashga asoslangan kazuslar, munozara mashqlari va tanqidiy fikrlash topshiriqlarini tizimli qo‘llash samarali natija beradi.

Annotatsiya*: Ushbu maqolada XIII asrdagi mo‘g‘ullar istilosi davrida Sulton Jaloliddin Manguberdi fenomenini tadqiq etishning germenevtik va retrospektiv metodologik xususiyatlari ijtimoiy-falsafiy jihatdan tahlil qilinadi. Tadqiqotda an’anaviy xronologik va bayoniy tarixchilik qoliplaridan chekingan holda, o‘rta asr birlamchi manbalari – Shihobiddin an-Nasaviy, Alouddin Juvayniy, Ibn al-Asir, Rashiduddin va Mirzo Ulug‘bek asarlaridagi matn qatlamlarini falsafiy dekonstruksiya qilish maqsad qilingan. V. Diltey, F. Shleyermaxer, X.-G. Gadamer va M. Blok nazariyalari vositasida tarixiy manbalardagi sub’yektlik, ekzistensial tanlov, institusional vakuum va transgressiya hodisalari o‘rtasidagi dialektik bog‘liqlik yoritilgan. Manbalarni germenevtik qayta o‘qish orqali Sulton Jaloliddin kurashining ichki ontologik va ma’naviy-axloqiy mohiyati aniqlanib, uning milliy o‘zlik va davlatchilik suverenitetini saqlashdagi o‘rni fundamental asoslangan.*

Kalit so‘zlar: *Jaloliddin Manguberdi, germenevtika, retrospeksiya, birlamchi manbalar, tarixiy dekonstruksiya, ekzistensial tanlov, institusional vakuum, transgressiya, milliy o‘zlik, narrativ tahlil.*

ГЕРМЕНЕВТИЧЕСКИЕ И РЕТРОСПЕКТИВНЫЕ ОСОБЕННОСТИ ИССЛЕДОВАНИЯ ФЕНОМЕНА ДЖАЛАЛ АД-ДИНА МАНКБУРНЫ (НА ПРИМЕРЕ АНАЛИЗА ПЕРВОИСТОЧНИКОВ)

Аннотация: *В данной статье с социально-философской точки зрения анализируются герменевтические и ретроспективные методологические особенности исследования феномена Султана Джалал ад-Дина Манкбурны в эпоху монгольского нашествия XIII века. Отходя от традиционных хронологических и описательных историографических рамок, исследование направлено на философскую деконструкцию текстовых слоев средневековых первоисточников – трудов Шихаб ад-Дина ан-Насави, Ала ад-Дина Джувейни, Ибн ал-Асира, Рашид ад-Дина и Мирзо Улугбека. Посредством теорий В. Дильтея, Ф. Шлейермахера, Х.-Г. Гадамера и М. Блока освещается диалектическая взаимосвязь между субъектностью, экзистенциальным выбором, институциональным вакуумом и явлениями трансгрессии в исторических текстах. Герменевтическое переосмысление источников позволило выявить внутреннюю онтологическую и духовно-нравственную сущность борьбы Султана Джалал ад-Дина и фундаментально обосновать его роль в сохранении национальной идентичности и государственного суверенитета.*

Ключевые слова: *Джалал ад-Дин Манкбурны, герменевтика, ретроспектива, первоисточники, историческая деконструкция, экзистенциальный выбор, институциональный вакуум, трансгрессия, национальная идентичность, нарративный анализ.*

HERMENEUTIC AND RETROSPECTIVE FEATURES OF STUDYING THE PHENOMENON OF JALAL AD-DIN MANGBURNI (ON THE EXAMPLE OF PRIMARY SOURCE ANALYSIS)

Abstract: *This article provides a socio-philosophical analysis of the hermeneutic and retrospective methodological features of studying the phenomenon of Sultan Jalal ad-Din Mangburni during the 13th-century Mongol invasion. Moving away from traditional chronological and descriptive historiographical frameworks, the study aims to philosophically deconstruct the textual layers of medieval primary sources—namely, the works of Shihab al-Din an-Nasawi, Ala al-Din Juwayni, Ibn al-Athir, Rashid al-Din, and Mirzo Ulugh Beg. Utilizing the theories of W. Dilthey, F. Schleiermacher, H.-G. Gadamer, and M. Bloch, the dialectical relationship between subjectivity, existential choice, institutional vacuum, and transgressive phenomena in historical texts is elucidated. Through a hermeneutic re-reading of the sources, the internal ontological and spiritual-ethical essence of Sultan Jalal ad-Din’s struggle is uncovered, and his foundational role in preserving national identity and state sovereignty is scientifically substantiated.*

Keywords: *Jalal ad-Din Mangburni, hermeneutics, retrospect, primary sources, historical deconstruction, existential choice, institutional vacuum, transgression, national identity, narrative analysis.*

Kirish (Introduction). Zamonaviy ijtimoiy-falsafiy fanlar va tarixiy metodologiya paradigmasida ulkan tarixiy shaxslar fenomenini tadqiq etish tub burilish bosqichini boshdan kechirmoqda. Uzoq yillar davomida ustuvorlik qilgan sof pozitivistik, bayoniy-xronologik va deskriptiv tarixchilik yondashuvlari chuqur ijtimoiy inqirozlar, sivilizasion to‘qnashuvlar hamda tizimli parchalanishlar davrida shaxs irodasi va jamiyat ongidagi ekzistensial transformatsiyalarni mukammal tushuntirib berishda o‘z cheklanganligini ko‘rsatdi. Shu sababli, tarixiy sub’yektning xarizmatik faoliyatini va uning ijtimoiy-siyosiy maydondagi qarorlarini falsafiy dekonstruksiya qilish hamda germenevtik-retrospektiv usullar vositasida qayta mushohada etish oliy akademik zaruratga aylandi.

Markaziy Osiyo davlatchiligi tarixida, xususan XIII asr boshlarida geosiyosiy va ijtimoiy-madaniy landshaftni tubdan o‘zgartirib yuborgan mo‘g‘ullar istilosi sharoitida Sulton Jaloliddin Manguberdi fenomeni alohida ontologik va madaniy-tarixiy maqomga egadir. Davlatning ma’muriy-institusional apparati yemirilgan, oliy boshqaruv tizimi falajlangan va jamiyat ommaviy anomiya (umidsizlik va me’yorsizlik) girdobiga tushgan lahzalarda, alohida shaxsning suveren irodasi va yagona qarshilik markaziga aylanish mexanizmini o‘rganish sof harbiy yilnomalar chegarasidan chiqadi. Bu o‘rinda tadqiqot ob’yekti shunchaki muayyan tarixiy voqealar tizmasi emas, balki tarixiy matnlarda, she’riy va nasriy yilnomalarda muhrlangan ma’no qatlamlaridir.

Ushbu metodologik vazifani amalga oshirishda germenevtika va retrospeksiya usullari bir-birini to‘ldiruvchi fundamental gnoseologik qurol sifatida maydonga chiqadi. Retrospektiv yondashuv bugungi ijtimoiy-falsafiy va metodologik bilimlar balandligidan turib o‘tmishga nazar solish, natijalardan sababga qarab mantiqiy zanjir tiklash imkonini bersa, germenevtik yondashuv birlamchi manbalar mualliflarining (Shihobiddin an-Nasaviy, Alouddin Juvayniy, Ibn al-Asir va boshqalar) ijtimoiy-psixologik holati, ongi va kontekstiga kirib borish orqali matnning yashirin substansional mazmunini anglashga xizmat qiladi. Tadqiqotning markaziy ilmiy muammosi – o‘rta asr birlamchi manbalarini germenevtik qayta o‘qish va retrospektiv tahlil qilish vositasida Jaloliddin Manguberdi fenomenining ijtimoiy-falsafiy, ontologik hamda axloqiy-siyosiy mohiyatini ochib berishdan iboratdir.

Adabiyotlar tahlili (Literature review). Tarixiy manbalarni va tarixiy shaxs fenomenini germenevtik hamda retrospektiv tahlil qilishning nazariy-metodologik poydevori G‘arb va Sharq falsafiy an’analarida turli bosqichlarda shakllanib kelgan. G‘arb falsafiy tafakkurida germenevtika dastlab muqaddas matnlarni sharhlash san’ati sifatida paydo bo‘lgan bo‘lsa, XIX-XX asrlarga kelib V. Diltey, F. Shleyermaxer, X.-G. Gadamer va P. Rikyor tadqiqotlari sharofati bilan umumbashariy va ijtimoiy-insonshiylik fanlarining markaziy metodologiyasiga aylandi [4; 5].

Xususan, Fridrix Shleyermaxer germenevtikani “tushunish san’ati” sifatida talqin etib, tadqiqotchi oldiga matn muallifining psixologik va intellektual dunyosiga qayta kirib borish (rekonstruksiya) va matnni muallifning o‘zidan ham yaxshiroq anglash vazifasini qo‘yadi [4]. Bu yondashuv XIII asr muarrixlari tomonidan yozilgan yilnomalarni o‘rganishda juda muhimdir, chunki Shihobiddin an-Nasaviy yoki Alouddin Juvayniy kabi mualliflarning matnlari ortida ular yashagan davrning psixologik bosimi, e’tiqodiy qarashlari va shaxsiy kechinmalari yashiringan [1; 6].

Vilgelm Diltey esa o‘zining “Ruhiy-ma’naviy fanlarga kirish” va “Germenevtika paydo bo‘lishi” asarlarida tabiiy fanlarga xos bo‘lgan “tushuntirish” metodologiyasiga qarama-qarshi o‘laroq, ijtimoiy va tarixiy fanlar uchun “tushunish” tamoyilini ilgari suradi [4]. Diltey konsepsiyasiga ko‘ra, tarixiy hodisa yoki shaxsni shunchaki tashqi sabab-oqibat zanjiri orqali tushuntirib bo‘lmaydi; tadqiqotchi o‘sha tarixiy sub’yektning ichki kechinmalarini o‘z ongida qayta boshdan kechirishi va uning ekzistensial holatiga sherik bo‘lishi lozim [4]. Jaloliddin Manguberdining Sind daryosi bo‘yidagi yoki Parvon jangidagi qarorlarini tahlil qilishda aynan shunday “ichki kechinmaga sherik bo‘lish va tushunish” metodologiyasi suv va havoday zarurdir.

Xans-Georg Gadamer o‘zining “Haqiqat va metod” fundamental asarida germenevtikani ontologik darajaga ko‘tardi [5]. Gadamer “ufqlar qo‘shilishi” konsepsiyasini ilgari suradi. Bunga ko‘ra, o‘tmish matnini tadqiq qilayotgan bugungi tadqiqotchining madaniy-metodologik ufqi bilan tarixiy matnda muhrlangan o‘tmish ufqi bir-biriga to‘qnashadi va sintezlashadi. Bu jarayonda tarixiy manba shunchaki o‘lik ob’yekt emas, balki tadqiqotchi bilan tirik muloqotga kirishuvchi sub’yektga aylanadi [5].

Tarixiy retrospeksiya usuli esa “Annallar maktabi” vakillari Mark Blok va Lyusyen Fevr tomonidan chuqur asoslangan [2]. M. Blok o‘zining “Tarixning hunarmandchiligi yoki tarixchi kasbi” asarida “hozirgi kunni o‘tmish orqali, o‘tmishni esa hozirgi kun orqali anglash” tamoyilini ko‘rsatib o‘tadi [2]. Retrospektiv metodologiya bugungi kundagi inqirozli ijtimoiy jarayonlar va yetakchilik fenomenining tayyor model va oqibatlaridan turib, XIII asrdagi Xorazmshohlar davlatining institusional parchalanishi va Manguberdi faoliyatini qayta tiklash imkonini beradi.

Sharq tarixnavisligi va falsafasida Jaloliddin Manguberdi davriga oid manbaviy baza V.V. Bartold [2], Z.M. Buniyotov [3], T.I. Sultanov [7], J. Rahimov va I. Sayfnazarov kabi yirik olimlar tomonidan manbashunoslik va tarixnavislik

nuqtai nazaridan atroflicha o‘rganilgan. Ammo ushbu manbalardagi ma’lumotlarni germenevtik dekonstruksiya qilish, ya’ni matn ichidagi ramzlar, psixologik kontekst, “ontologik mas’uliyat” va “transgressiya” konseptlarini falsafiy jihatdan umumlashtirish ijtimoiy falsafa oldida turgan muhim vazifaligicha qolmoqda.

Tadqiqot metodologiyasi (Research methodology). Jaloliddin Manguberdi faoliyatini va uning tarixiy-ma’naviy merosini tadqiq etishda sof faktlarni sanashdan iborat bo‘lgan pozitivistik yondashuvlardan farqli ravishda, voqelikning ichki ontologik va ijtimoiy-psixologik qatlamlarini ochib beruvchi integrasialashgan metodologik apparat qo‘llanildi. Tadqiqotning nazariy-metodologik asosini tizimlilik, tarixiylik, mantiqiylik, germenevtik qayta o‘qish va retrospektiv dekonstruksiya tamoyillari tashkil etadi.

Tadqiqot jarayonida quyidagi maxsus va fundamental ijtimoiy-falsafiy metodlar majmuasidan foydalanildi:

Germenevtik metod va narrativ tahlil: Birlamchi tarixiy manbalar - Shihobiddin an-Nasaviyning “Sirat as-sulton Jalal ad-Din Mankburni”, Alouddin Juvayniyning “Tarixi jahongushoy”, Ibn al-Asirning “Al-komil fi-t-tarix”, Rashiduddinning “Jome at-tavorix” hamda Mirzo Ulug‘bekning “To‘rt ulus tarixi” asarlari matni tahlil qilindi [1; 6; 8]. Matnlardagi til birliklari, ramzlar va mualliflarning ijtimoiy-psixologik kayfiyati qayta tahlil qilinib, manba ortidagi yashirin ma’nolar va ekzistensial holatlar yuzaga chiqarildi.

Retrospektiv metod: Bugungi davlatchilik suvereniteti, milliy o‘zlikni anglash va global tahdidlar sharoitidagi rahbarlik fenomeni haqidagi zamonaviy falsafiy konsepsiyalardan turib XIII asrdagi institusional vakuum hamda madaniy-ijtimoiy inqiroz jarayonlarining sabab-oqibat aloqadorligi qayta tiklandi [2].

Tizimli-strukturaviy tahlil: Xorazmshohlar imperiyasining so‘nggi davridagi boshqaruv tizimi, harbiy elita va ijtimoiy anomiya holati yagona destruktiv tizim sifatida, Jaloliddin Manguberdi faoliyati esa ushbu tizim ichida yuzaga kelgan avtonom va qayta tiklanuvchi sinergetik markaz sifatida tadqiq etildi.

Transgressiya va ekzistensial tanlov konsepsiyasi: J.-P. Sartr va M. Fuko falsafasidagi tushunchalar asosida Sultonning Sind (Hind) daryosi bo‘yidagi xatti-harakati tabiiy, siyosiy va harbiy chegaralardan chiqish, mutlaq suveren irodani namoyish etish hodisasi sifatida baholandi.

Natijalar va muhokama (Results and discussion). Tarixiy manbani germenevtik tahlil qilish eng avvalo muallifning ijtimoiy pozisiyasi va psixologik holatini aniqlashni talab etadi. Sulton Jaloliddin haqida axborot beruvchi asosiy o‘rta asr muarrixlari bir-biridan keskin farq qiluvchi ijtimoiy-madaniy va siyosiy muhitda ijod qilganlar. Bu esa ularning matnlarida manbaviy rang-baranglikni va turli darajadagi sub’yektivlikni keltirib chiqargan (1-jadval).

1-jadval.

Jaloliddin Manguberdi fenomeni aks etgan asosiy birlamchi manbalarning germenevtik va retrospektiv tahlili

Manba nomi va muallifi	Muallifning ijtimoiy-siyosiy pozisiyasi	Matndagi markaziy konsept va falsafiy mazmun	Germenevtik tahlil xulosasi
“Sirat as-sulton Jalal ad-Din Mankburni” (Shihobiddin an-Nasaviy) [1]	Sultonning shaxsiy kotibi, voqealarning bevosita ishtirokchisi va guvohi	Institusional vakuum va shaxsiy tragediya: Shaxsiy fidokorlik, yolg‘izlik va mas’uliyat	Guvohlik germenevtikasi: Matn Sultonning ichki psixologik kechinmalari va suveren irodasini xolis ochib beradi
“Tarixi jahongushoy” (Alouddin Atamalik Juvayniy) [6]	Mo‘g‘ullar saroyida xizmat qilgan olim va davlat arbobi	Dushman e’tirofi va xarizma: Chingizxon va mo‘g‘ul elitasining Sultonga bo‘lgan hayrati	Muqobil germenevtika: Dushman matnida qahramon obrazining tan olinishi orqali fenomenning universalligi asoslanadi
“Al-komil fi-t-tarix” (Ibn al-Asir) [9]	Mustaqil arab tarixchisi, inqirozni tashqaridan kuzatuvchi	Ijtimoiy anomiya va sivilizasion inqiroz: Ummatning mag‘lubiyati va umidsizlik muhiti	Retrospektiv tanqid: Voqealarga umum-islom sivilizatsiyasi inqirozi va fojiasi nuqtai nazaridan baho beriladi
“To‘rt ulus tarixi” (Mirzo Ulug‘bek) [8]	Temuriylar davri hukmdori va mutafakkiri, retrospektiv tadqiqotchi	Meta-tarixiy ko‘prik va milliy o‘zlik: Davlatchilik an’anasi va ozodlik ruhi	Tarixiy retrospeksiya: Jaloliddin kurashi kelajak avlodlar uchun davlatchilik va mardlik modeli sifatida mazmunlanadi

Shihobiddin an-Nasaviyning asari germenevtik jihatdan eng yuqori qimmatga ega, chunki muallif Sulton bilan birga barcha harbiy yurishlarda, fojiali chekinishlarda va ichki siyosiy ziddiyatlarda bevosita ishtirok etgan [1]. Nasaviy

matnlarida Jaloliddin shunchaki afsonaviy qahramon emas, balki atrofidagi xoinliklar, elitalarning tarqoqligi va resursning yo‘qligi sharoitida oliy ontologik mas’uliyatni bo‘yniga olgan real inson sifatida gavdalanadi [1]. Alouddin Juvayniy matnini germenevtik dekonstruksiya qilish esa o‘ziga xos metodologik paradoksni yuzaga chiqaradi: Mo‘g‘ul hukmdorlariga xizmat qilgan muarrix Jaloliddinning mardligini va Chingizxonning unga bo‘lgan cheksiz hayratini yashira olmaydi [6]. Chingizxonning Sind daryosi bo‘yidagi “Otaning mana shunday o‘g‘li bo‘lsin...” degan mashhur xitobi Juvayniy asarlari orqali bizgacha yetib kelgan [6]. Bu germenevtikada “dushman narrativida haqiqatning namoyon bo‘lishi” deb ataladi. Sultonning irodasi va jasorati hatto bosqinchilar va jahonni titratgan mo‘g‘ul xoni tomonidan ham mutlaq qadriyat sifatida tan olingan.

1221 yilning kuzida sodir bo‘lgan Sind (Hind) daryosi bo‘yidagi tarixiy voqelik Sulton Jaloliddin faoliyatining markaziy ontologik nuqtasidir. Nasaviy va Juvayniy guvohlik berishicha, mo‘g‘ul qo‘shinlari Sulton kuchlarini daryo qirg‘og‘iga qisib qo‘yadi va atrof to‘liq qurshovga olinadi [1; 6]. Mavjud geosiyosiy va harbiy sharoit nuqtai nazaridan mag‘lubiyat va asirlik muqarrar edi. Ushbu vaziyatni J.-P. Sartrning “ekzistensial tanlov” va M. Fuko hamda J. Batayning “transgressiya” konsepsiyalari orqali falsafiy dekonstruksiya qilish quyidagi xulosalarni beradi:

Asirga tushish yoki mo‘g‘ullarga taslim bo‘lish tirik qolish imkonini berar edi, ammo bu suveren maqomdan, shaxsiy va milliy sha’ndan voz kechish - ekzistensializm tilida “soxta borliq”ga rozi bo‘lishni anglatar edi.

Sulton Jaloliddin o‘z otini, qurol-aslahalari va sovuti bilan birga, 8-10 metrlik balandlikdan vahshirayotgan suv girdobiga otadi [1]. Bu shunchaki jismoniy jon saqlash harakati emas, balki inson ongi va irodasining mavjud tabiiy va geosiyosiy chegaralarni (limitlarni) yorib o‘tishi - chinakam transgressiya hodisasidir [6].

Sulton suvdan sog‘-omon chiqib, narigi qirg‘oqda mo‘g‘ullarga qarab qilich o‘qtaladi [1]. Bu harakat orqali u davlat apparati to‘liq vayron bo‘lgan sharoitda ham shaxsning avtonom irodasi va suvereniteti aslo yengilmasligini, tana va ruhning oxirgi qal’a sifatida saqlanib qolishini isbotladi.

Jaloliddin Manguberdi fenomenini faqat XIII asr matnlari doirasida o‘rganish to‘liq manzarani ko‘rish uchun yetarli emas. Bu o‘rinda tarixiy retrospeksiya usuli vositasida kelajak davr mutafakkirlarining ushbu fenomenga bergan bahosini tahlil qilish muhim metodologik ahamiyatga ega.

Temuriylar davrining yirik davlat arbobi va mutafakkiri Mirzo Ulug‘bek o‘zining “To‘rt ulus tarixi” asarida Sulton Jaloliddin faoliyatiga alohida to‘xtalib o‘tadi [8]. Mirzo Ulug‘bek retrospeksiyasining asosiy xususiyatlari quyidagilardan iborat:

Ulug‘bek Sulton Jaloliddin kurashini shunchaki bir sulolaning omon qalish harakati emas, balki Markaziy Osiyo davlatchiligi va harbiy san’atining uzilmas rishtasi sifatida talqin etadi [8].

Temuriylar retrospeksiyasida Jaloliddin siymosi Amir Temur va uning avlodlari uchun milliy ozodlik, mardlik va tizimli tahdidlarga qarshi turk-islom dunyosining integrasion ramzi sifatida gavdalanadi [8].

Retrospektiv yondashuv shuni ko‘rsatadiki, Sulton Jaloliddinning mo‘g‘ul bosqinchilariga qarshi 11 yillik beamon kurashi Markaziy Osiyo xalqlarining milliy-madaniy va davlatchilik ongi butunlay so‘nib ketmasligini ta’minlagan va kelajakda Temuriylar renessansi uchun ma’naviy poydevor xizmatini o‘tagan.

Xulosa (Conclusion). Sulton Jaloliddin Manguberdi fenomenini birlamchi manbalar asosida germenevtik va retrospektiv tadqiq etish quyidagi fundamental ijtimoiy-falsafiy xulosalarni chiqarish imkonini beradi:

XIII asr birlamchi manbalari (Nasaviy, Juvayniy, Ibn al-Asir va boshqalar) sof xronologik faktlar yig‘indisi emas, balki og‘ir ijtimoiy-madaniy inqiroz davrining ekzistensial va psixologik holatini aks ettiruvchi murakkab metaforik va semiotik tizimdir [1; 6.]. Germenevtik metod ushbu manbalar ortidagi “avtonom suveren iroda” va “institusional vakuum” konseptlarini yuzaga chiqaradi.

Sulton Jaloliddinning Sind daryosi bo‘yidagi xatti-harakati va keyingi kurashlari ijtimoiy falsafa nuqtai nazaridan inson irodasining mavjud cheklovlar (limitlar) va muqarrar mag‘lubiyat konsepsiyasidan chiqishi - transgressiv sakrashidir. Davlat apparati to‘liq vayron bo‘lgan sharoitda shaxsning o‘zi davlatchilik va suverenitetning yagona substansional manbaiga aylanadi.

Mirzo Ulug‘bek va undan keyingi davr tarixnavisligi retrospeksiyasi Jaloliddin Manguberdi fenomenining meta-tarixiy ahamiyatini tasdiqlaydi [8]. Sultonning kurashi Markaziy Osiyo davlatchilik an’anasining uzviyligini va xalqning ma’naviy immunitetini saqlab qolgan fundamental omil sifatida maydonga chiqadi.

Zamonaviy globallashuv va geopolitik beqarorlik sharoitida Jaloliddin Manguberdi fenomenini germenevtik tahlil qilish yoshlar ongida milliy o‘zlikni, vatanparvarlikni hamda tizimli inqirozlarga qarshi ichki ma’naviy-axloqiy bardoshlilikni shakllantirishda muhim nazariy-metodologik manba bo‘lib xizmat qiladi.

SOG‘LOM TURMUSH TARZI MADANIYATINI RIVOJLANTIRISHDA TIBBIY-EKOLOGIK VA IJTIMOIY LOYIHALAR

Xolnazarova Shoiraxon Numanovna
Farg‘ona jamoat salomatligi tibbiyot instituti malaka oshirish va qayta tayyorlash fakulteti o‘qituvchisi
E-mail: arzimatova1969@gmail.com

Annotatsiya: *Maqolada zamonaviy jamiyatda sog‘lom turmush tarzi madaniyatini rivojlantirishda tibbiy-ekologik va ijtimoiy loyihalarning o‘rni tahlil qilingan. Unda tibbiy profilaktika, ekologik xavfsiz muhitni shakllantirish, sog‘lom ovqatlanish, jismoniy faollik va psixo-emotsional salomatlikni ta’minlashga qaratilgan loyihalarning ahamiyati yoritilgan. Shuningdek, ijtimoiy loyihalar orqali yoshlarda sog‘lom turmush ko‘nikmalarini shakllantirish, ularning ijtimoiy faolligini oshirish va sog‘lom hayot tarziga mas’uliyatli munosabatini kuchaytirish masalalari ko‘rib chiqilgan.*

Kalit so‘zlar: *sog‘lom turmush tarzi, sog‘lom turmush madaniyati, tibbiy-ekologik loyihalar, ijtimoiy loyihalar, yoshlar salomatligi, jismoniy faollik, ekologik madaniyat, ijtimoiy sheriklik, raqamli texnologiyalar. ‘*

МЕДИКО-ЭКОЛОГИЧЕСКИЕ И СОЦИАЛЬНЫЕ ПРОЕКТЫ В РАЗВИТИИ КУЛЬТУРЫ ЗДОРОВОГО ОБРАЗА ЖИЗНИ

Аннотация: *В статье анализируется роль медико-экологических и социальных проектов в развитии культуры здорового образа жизни в современном обществе. Раскрывается значение проектов, направленных на медицинскую профилактику, формирование экологически безопасной среды, здоровое питание, физическую активность и обеспечение психоэмоционального здоровья. Особое внимание уделяется формированию у молодежи навыков здорового образа жизни посредством социальных проектов, повышению ее социальной активности и развитию ответственного отношения к собственному здоровью.*

Ключевые слова: *здоровый образ жизни, культура здорового образа жизни, медико-экологические проекты, социальные проекты, здоровье молодежи, физическая активность, экологическая культура, социальное партнерство, цифровые технологии.*

MEDICAL-ECOLOGICAL AND SOCIAL PROJECTS IN DEVELOPING A HEALTHY LIFESTYLE CULTURE

Abstract: *The article analyzes the role of medical-ecological and social projects in developing a healthy lifestyle culture in modern society. It highlights the importance of projects aimed at medical prevention, the formation of an environmentally safe environment, healthy nutrition, physical activity, and the promotion of psycho-emotional well-being. Particular attention is paid to developing healthy lifestyle skills among young people through social projects, increasing their social activity, and strengthening their responsible attitude toward personal health.*

Keywords: *healthy lifestyle, healthy lifestyle culture, medical-ecological projects, social projects, youth health, physical activity, ecological culture, social partnership, digital technologies.*

Zamonaviy jamiyatda sog‘lom turmush tarzi madaniyatini rivojlantirish nafaqat individual salomatlikni saqlash, balki ijtimoiy farovonlik va barqaror rivojlanishni ta’minlovchi murakkab jarayon sifatida namoyon bo‘lmoqda. Bugungi kunda globallashuv, shaharlashuv va ekologik tahdidlar inson salomatligiga turli yo‘nalishlarda ta’sir ko‘rsatmoqda, shuning uchun sog‘lom turmush tarziga yo‘naltirilgan tadbirlar va loyihalarning ahamiyati ortib bormoqda. Bu jarayonda tibbiy-ekologik va ijtimoiy loyihalar o‘zining nazariy va amaliy ahamiyati bilan ustunlik qiladi.

Tibbiy-ekologik loyihalar inson salomatligini muhofaza qilish va kasalliklarni profilaktika qilish sohasida markaziy ahamiyatga ega. Bunday loyihalarga ommaviy skrininglar, vaksinatsiya dasturlari, sog‘lom ovqatlanish va nutritsiologiya yo‘nalishlari, shahar va qishloq hududlarida ekologik toza muhitni saqlash va yanada yaxshilashga qaratilgan tadbirlar kiradi. Tibbiy-ekologik loyihalar nafaqat individual salomatlikni yaxshilash, balki barqaror sog‘lom muhitni tashkil etish orqali jamiyatning umumiy immuniteti va farovonligini oshirish imkonini beradi. Masalan, shaharlarda havo sifati monitoringi va qishloq hududlarida suv va mahsulotlarning ekologik nazorati sog‘lom turmush tarzini amaliyotda

rivojlantirishda muhim rol o‘ynaydi. Ikkinchidan, ijtimoiy loyihalar sog‘lom turmush tarzi madaniyatini shakllantirishda insonlarning hayotiy odatlarini o‘zgartirish va ularda mas’uliyatli munosabatni uyg‘unlashtirishga xizmat qiladi. Bu loyihalar orasida sog‘lom hayot tarzini targ‘ib qilish kompaniyalari, sport va jismoniy tarbiya dasturlari, psixo-emotsional sog‘liqni saqlashga yo‘naltirilgan treninglar, oilaviy va yoshlar tarbiyasiga bag‘ishlangan tadbirlar alohida ahamiyatga ega. Ijtimoiy loyihalar orqali sog‘lom hayot tarzi madaniyati nafaqat individual, balki jamoat miqyosida ham keng targ‘ib qilinadi, ijtimoiy barqarorlik va solidarlik hissini mustahkamlaydi.

Tibbiy-ekologik va ijtimoiy loyihalarning hamohangligi sog‘lom turmush tarzi madaniyatini rivojlantirishda eng samarali mexanizm hisoblanadi. Masalan, shaharlardagi sport maydonlari va fitnes-klublar, ekologik toza parklar, velosiped yo‘laklari va yurish trassalari faqat jismoniy faollik uchun sharoit yaratadi, balki ekologiya va ijtimoiy tarbiyani ham uyg‘unlashtiradi [1, 128]. Shu bois, loyihalarning integratsiyalangan amalga oshirilishi salomatlikni muhofaza qilish, ekologik madaniyatni yuksaltirish va sog‘lom ijtimoiy muhitni shakllantirishda hal qiluvchi ahamiyatga ega. Shuningdek, zamonaviy loyihalarda raqamlashuv va axborot texnologiyalaridan foydalanish imkoniyatlari ham katta ahamiyatga ega. Mobil ilovalar, onlayn platforma va elektron sog‘liqni saqlash tizimlari orqali aholi sog‘lom turmush tarzi haqida ma’lumot olish, individual faollik va ovqatlanishni nazorat qilish, psixologik maslahatlar va sport dasturlariga kirish imkoniyati paydo bo‘lmoqda. Bu holat tibbiy-ekologik va ijtimoiy loyihalarning samaradorligini oshirishga xizmat qiladi.

ADABIYOTLAR TAHLILI VA METODLAR

Sog‘lom turmush tarzi madaniyatini rivojlantirishda tibbiy-ekologik va ijtimoiy loyihalar bilan bog‘liq masalalarni o‘rganishda Аллаёров Ю.Н. [1], Георгиевский А.Ф. [2], Bunton R, Macdonald G. [3], http://en.wikipedia.org/wiki/Californian_Journal_of_Health_Promotion [4], Karimov I.A. [5], O‘zbekiston Respublikasining «Ijtimoiy sheriklik to‘g‘risida» gi Qonuni [6], Gaipnazarov R. [7], Davletshin M.G., Shoumarov G‘.B. [8], Дубачай А.Д. [9] kabi mualliflarning ilmiy va nazariy qarashlaridan foydalanildi.

Mazkur muammoni o‘rganish jarayonida umumiy aloqadorlik, tarixiylik va tizimlilik tamoyillari, shuningdek, umumlashtirish usulidan foydalanildi.

NATIJALAR VA MUHOKAMA

Bugungi kunga kelib rivojlangan tibbiyot fani sog‘liqni saqlash, mustahkamlash va yaxshilashning ishonchli metodlarini tavsiya qilmoqda. Bu metod har bir insonning sog‘lom turmush tarziga qattiq rioya qilishi va aholida sog‘lom turmush tarzini rivojlantirishdan iborat. Mazkur maqsadga esa faqat insonning sog‘lom turmush madaniyatini rivojlantirish va unga rioya etish orqaligina erishish mumkin bo‘ladi. Bu nafaqat inson sog‘ligini saqlashga olib keladi, balki ishchanlik faoliyatini oshiradi, turli kasalliklardan asraydi, shuningdek, erta qarilikning oldini oladi.

Millatimiz tarixiy-ijtimoiy qadriyatlari tizimida har vaqt sog‘lom yashash va uzoq umr ko‘rish aqidalari mavjud bo‘lgan va nasl sog‘lomligiga alohida e’tibor bilan qaralgan. Nasl sog‘lomligi tushunchasi esa, eng avvalo, yoshlar salomatligi masalalarida sa’y-harakat qilish zarurligini bildirgan. Shu bilan birga, o‘zbek millati qadriyatlari tizimiga sog‘lomlik tushunchasi doirasida nafaqat tibbiy yoki jismoniy salomatlik, balki ruxiy, ma’naviy sog‘lomlik asoslari kiritilgan. Ayniqsa, inson salomatligi asosida ma’naviy salomatlik alohida ta’kidlangan. Bugungi kunda ham sog‘lomlik tushunchasi tarkibiy jihatdan o‘zining murakkabligi va serqirraligini yorqin namoyon etadi. Uning murakkabligi tarkibidagi har bir bo‘lim, aslida yana bir necha o‘z mazmuniga ega bo‘lgan tarkibiy qismlarga bo‘linib ketishida ko‘rinadi [2, 143].

Xorijiy G‘arb davlatlarida sog‘lom turmush tarzi g‘oyalari asosida “Health promotion”, ya’ni salomatlikni mustahkamlash istilohi keng qo‘llaniladi. Salomatlikni mustahkamlash g‘oyasi asosida faoliyat olib borish majburiyati Butunjahon sog‘liqni saqlash tashkilotining Bangkok (2005) konferensiyasida qabul qilingan. Mazkur hujjatda qayd etilishicha, mamlakatlarda “insonlarga o‘z salomatliklarini muhofaza qilish, sog‘liqni mustahkamlash uchun barcha zarur chora va shart-sharoitlarni” yaratish lozim. Chunki sog‘likni mustahkamlash insonlar imon-e’tiqodi, ular xohish-istagidan tashqari mavjud hokimiyatlar siyosiy irodasiga ham bog‘liqdir. Mazkur hujjatda aytilishicha, ba’zi rivojlangan va liberal davlatlarda sog‘liqni saqlashga yo‘naltirilgan mablag‘lar hajmi kundan-kun qisqarib bormoqda. Bu esa istiqbolda fuqarolar salomatligiga salbiy ta’sir etuvchi omil hisoblanadi.

G‘arb davlatlari olimlaridan R.Banton, G.Makdonald, K.Tons, S.Tilfold, A.Skriven, S.Garmann kabilarning so‘nggi o‘n yilliklarda nashr etilgan tadqiqotlarini ta’kidlab o‘tish joiz [3]. Shu bilan birga, AQShda “Salomatlikni asrash bo‘yicha Amerika jurnali”, “Salomatlik qadriyatlarining Amerika jurnali” hamda “Salomatlik muhofazasi bo‘yicha Kaliforniya jurnali” [4] kabi maxsus ilmiy-nazariy va ommabop nashrlarda sog‘lom turmush tarzi va salomatlikni asrash texnologiyalari bo‘yicha yangi materiallar chop qilinadi. 1997 yilda AQShda Salomatlikni muhofaza qilish bo‘yicha Amerika Akademiyasi tuzilgan bo‘lib, uning bosh vazifasi sifatida salomatlikni muhofaza qilish pedagogikasini keng targ‘ib qilish, uning targ‘ibotini nazariy-amaliy xulosalar va bilimlar asosiga qurilishini ta’minlash, shuningdek, mavjud sog‘liqni saqlash tizimini rivojlantirish belgilangan.

Sog‘lom turmush madaniyatini rivojlantirish muammolarini ochib beruvchi va shu muammoga e’tibor qaratuvchi uslubiy va ilmiy adabiyotlarning tahlili shuni ko‘rsatadiki, sog‘lom hayot, turmush tarzi madaniyati komponentlari tarkibini va mohiyatini aniqlashda turli, bir-biridan farq qiluvchi yondashuvlar mavjud.

Fuqarolik institutlari, nodavlat notijorat tashkilotlar hozirgi kunda demokratik qadriyatlar, inson huquq va erkinliklari hamda qonuniy manfaatlarini himoya qilishning muhim omiliga aylanmoqda, fuqarolarning o‘z salohiyatlarini ro‘yobga chiqarishi, ularning ijtimoiy, sotsial-iqtisodiy faolligi va huquqiy madaniyatini oshirish uchun sharoit yaratmoqda, jamiyatda manfaatlar muvozanatini ta’minlashga ko‘maklashmoqda” [5, 42]. Darhaqiqat, mamlakatimizda Yoshlar ishlari agentligi yoshlarga oid davlat siyosatining bosh sub’ekti hisoblanib, yurtimiz aholisining 64 foizini tashkil qilgan yoshlarni birlashtirish, ularning huquq va manfaatlarini himoya qilish borasida faoliyat olib boradi.

Yoshlar sog‘lom turmush madaniyatini rivojlantirishda uzviylik va uzluksizlik tamoyillari amal qilishining pedagogik mexanizmlarini takomillashtirishda davlat organlarining nodavlat notijorat tashkilotlar va fuqarolik jamiyatining boshqa institutlari bilan ijtimoiy sherikligini ta’minlash borasida olib borgan tadqiqotlarimiz O‘zbekiston Respublikasining «Ijtimoiy sheriklik to‘g‘risida»gi Qonunida belgilangan vazifalarning ijrosini ta’minlashga xizmat qiladi. Zero, O‘zbekiston Respublikasining «Ijtimoiy sheriklik to‘g‘risida»gi Qonunida «...atrof-muhitni, aholining sog‘ligini muhofaza qilish va sog‘lom turmush tarzini qaror toptirish, har tomonlama barkamol va sog‘lom yosh avlodni shakllantirish, yoshlarga bilim berish, ularni ma’naviy-axloqiy jihatdan tarbiyalash va kasbga yo‘naltirish» sohalarida davlat organlarining nodavlat notijorat tashkilotlar va fuqarolik jamiyatining boshqa institutlari bilan ijtimoiy sherikligini amalga oshirishning huquqiy asoslari belgilab qo‘yilgan. Shuningdek, ijtimoiy sheriklik sub’ektlari tomonidan birgalikda tadbirlar, maslahatlashuvlar va muzokaralar o‘tkazish, bitimlar va shartnomalar tuzish, birgalikda loyihalar va rejalarni ishlab chiqish hamda amalga oshirish, ular o‘rtasida o‘zaro qo‘llab-quvvatlash va axborot almashishni tashkil etish mumkinligi belgilangan [6, № 9].

Tadqiqotlarimiz davomida yoshlar sog‘lom turmush madaniyatini rivojlantirishga yo‘naltirilgan ijtimoiy loyihalar mazmunini ishlab chiqish va samaradorligini baholashga asosiy e’tibor qaratildi va ijtimoiy loyihalarning yoshlar sog‘lom turmush madaniyatini rivojlantirishdagi o‘rni va roli ilk bor ilmiy-pedagogik nuqtai nazardan tadqiq etildi. Zero, ijtimoiy loyihalar bugungi kunda dunyoning barcha mamlakatlarida turli qatlam vakillari o‘rtasida, turli maqsad va yo‘nalishlarda tashkil etiladi. Jamiyatning turli sohalari taraqqiyotiga ta’sir ko‘rsatuvchi ijtimoiy, investitsion, innovatsion, biznes loyihalar keng qo‘llanilmoqda.

Loyiha (projekt) – tushunchasi kengroq ifodalanib, ma’lum natija (loyihaning beqiyos mahsuli)ga erishish uchun maqsadli tashkil etiladiganfaoliyat, loyihalashtirish esa - («loyiha» so‘zidan olingan bo‘lib) – real natijaga olib keluvchi, qat’iy tartibga solingan harakatlar izchilligini o‘z ichiga oluvchi muammoni hal etuvchi faoliyatni anglatadi.

Loyiha (design - dizayn) – ba’zi murakkab ishlanmalarni yaratish bo‘yicha hujjatlar yig‘indisi. G. Vereщaginning fikricha, ijtimoiy loyiha daromad olishni maqsad qilmagan, balki jamiyat uchun foydali ish (faoliyat) yoki ijtimoiy loyiha –jamiyatni tarbiyalashning eng samarli usuli demakdir. Ijtimoiy loyiha ijtimoiy natija olish uchun yaratiladi. Ijtimoiy loyihalar jamiyatning dolzarb muammolariga e’tibor qaratish, rivojlangan fuqarolik jamiyati barpo etishda ishtirok etish imkonini beradi. Ijtimoiy loyiha muammoning avval bo‘lmagan yechimini topishga qaratiladi. Shuni alohida ta’kidlash joizki, ijtimoiy loyihalarning jamiyat va inson hayotida tutgan o‘rni hali ilmiy-pedagogik jihatdan umuman o‘rganilmagan.

Tadqiqotlar davomida asosiy e’tibor respublikamizdagi davlat organlarining nodavlat notijorat tashkilotlar va fuqarolik jamiyatining boshqa institutlari bilan ijtimoiy sheriklik g‘oyalarini amalga oshirishda ularning kuchlarini birlashtirish orqali yoshlar sog‘lom turmush madaniyatini rivojlantirish bo‘yicha uzviylik va uzluksizlik tamoyillari amal qilishining pedagogik mexanizmlarini takomillashtirishga qaratildi.

O‘zbekiston Yoshlar ishlari agentligining “Yoshlarda sog‘lom turmush tarzini shakllantirish” bo‘limi faoliyati orqali yoshlar sog‘lom turmush tarzini rivojlantirishga yo‘naltirilgan “Baxtli bolalik”, “Yozni Kamalak bilan”, “Qadriyat, urf-odat, an’ana va yoshlar”, “Biz buyuk yurt farzandlarimiz”, “Biz yoshlar sog‘lom turmush tarafdorimiz”, “Yoshlar chekish, OIV/OITS va giyohvandlikka qarshi”, “Tarbiya va sog‘lomlashtirish oromgohi”, “Kamolot shaxmat taxtasi”, “Kamolot-tur”, “Yoshlar ijtimoiy xizmat markazlari” kabi ijtimoiy loyihalar tanlab olindi va ularning Nizomi, o‘tkazish algoritmi, amalga oshirish texnologiyasi aniqlanib, 2008-2012 yillarda respublikamiz yoshlari o‘rtasida tajriba-sinovdan o‘tkazildi [7, 62].

Ijtimoiy loyiha yoshlarning muammoni aniqlash va uni hal etish bo‘yicha faoliyatini rejalashtirish hamda tashkil etishdan to uni hal etish yo‘lini taqdim etishgacha mustaqil harakat qilishini ta’minlovchi maxsus tashkil etilgan maqsadli jarayondir. Loyihaviy faoliyat quyidagicha tuziladi: loyiha konsepsiyasini ishlab chiqish, loyihaviy faoliyatni rejalashtirish, loyihaviy vazifalarni hal etish, mahsulotni rasmiylashtirish, loyiha taqdimoti, himoyasi bilan faoliyatni tashkil etish, loyiha mazmunini ommaviy axborot vositalarida yoritish; hisobot va natijalar taqdimotini tayyorlash, loyihani baholash, o‘tgan yillardagi holati bilan solishtirma tahlil qilish va monitoring olib borish.

Ijtimoiy loyihalarni yoshlar hayotiga tatbiq etishda ta’lim-tarbiyaning ilmiylik, tizimlilik, izchillik; integratsiya; insonparvarlik; maqsadga yo‘naltirilganlik, yoshlarning shaxsiy va psixologik xususiyatlarini hisobga olish; faoliyatga

tarbiyalash; nazariyaning amaliyot bilan bog‘liqligi; shaxslararo munosabatlarning birligi; faoliyat va munosabat uzviyligi; jamoada o‘ziga xos shaxsiy sifatlarni namoyon etish vaboshqara olish, tarbiyada ijtimoiy sheriklik, natijani oldindan ko‘ra olish kabi pedagogik tamoyillariga asoslangan holda yoshlar ongiga sog‘lom turmush madaniyati singdirildi.

Yoshlar o‘rtasida sog‘lom turmush madaniyatini rivojlantirishga yo‘naltirilgan ijtimoiy loyihalarni amalga oshirishda konferensiya, festival, ko‘rik tanlov, davra suhbatlari, seminar-trening, sotsiologik so‘rovlar, turnirlar, aksiya, hashar kabi tarbiyaviy shakllardan foydalanish tadqiqotlarning samaradorligini ta’minlashga xizmat qildi. Turli toifadagi yoshlarning o‘ziga xos xususiyatlari, qiziqishlarini inobatga olgan holda yoshlar o‘rtasida ijtimoiy so‘rovlar o‘tkazish, bahs va munozaralar, seminarlar, uchrashuvlar, anjumanlar tashkil etish, ommaviy axborot vositalaridan, axborot-kommunikatsiya texnologiyalaridan keng foydalanishga asosiy e’tibor qaratildi [8, 62]. Shuningdek, ijtimoiy loyihalar davomida yoshlarning sog‘lom turmush madaniyati haqidagi bilimlardan xabardorlik darajasini oshirishda ta’limning yozma, elektron va og‘zaki shakllaridan foydalanildi.

Yoshlar o‘rtasida olib borilgan ma’ruza, suhbat, namoyish qilish, kuzatish, tajriba, adabiyotlarni o‘rganish, rolli o‘yinlar, o‘quv musobaqalari, didaktik masalalarni yechish, loyiha tayyorlash va himoya qilish, test nazorati, intervyu, pedagogik rag‘batlantirish, xulq-atvor va faoliyatni tashkil etish, nazorat va o‘z-o‘zini nazorat qilish kabi ta’lim-tarbiya metodlari ijtimoiy loyihalar davomida ularning sog‘lom turmush madaniyatiga oid nazariy bilim, ko‘nikma va malakalarini rivojlantirish imkonini berdi.

Tadqiqotlarimiz davomida yoshlarning sog‘lom turmush madaniyatini rivojlantirishga qaratilgan ijtimoiy loyihalarni quyidagicha guruhlashtirdik: sog‘lom hayot va sog‘lom turmush tarzi g‘oyalarini yoshlar ongiga singdirish; narkomaniya, giyohvandlik va ichkilikbozlikning oldini olish; yoshlarni ommaviy sportga jalb qilish; imkoniyati cheklangan, nogiron yoshlarning jamiyatga ijtimoiylashuvini ta’minlash; ijtimoiy-huquqiy xatarli guruhga mansub o‘smirlar bilan profilaktik ishlarni olib borish; ularning turli yo‘nalishdagi iste’dodini ro‘yobga chiqarish; yoshlarning reproduktiv salomatligi va sog‘lom oilani shakllantirish, ekologik muammolarning oldini olishga qaratilgan loyihalar [9, 20]. Shuningdek, yosh avlodni istiqlol g‘oyalariga cheksiz sadoqat ruhida tarbiyalash, ona yurtga muhabbat tuyg‘usini, jasorat va fidokorlik fazilatlarini tarbiyalash, milliy va umuminsoniy qadriyatlarga nisbatan hurmat, buyuk ajdodlarimiz merosini chuqur o‘rganishga qiziqish, ularning ongi va dunyoqarashini shakllantirish, turli hududlarning o‘ziga xos jihatlarini, turli qatlamdagi yoshlarning ehtiyoj va qiziqishlarini qo‘llab-quvvatlashga yo‘naltirilgan ijtimoiy loyihalar amaliyotga joriy etildi.

XULOSA

Ijtimoiy loyihalar yoshlarda sog‘lom turmush madaniyatining jismoniy salomatlik, tibbiy salomatlik, ma’naviy salomatlik, salomatlikka ta’sir etuvchi turli illatlarga nisbatan kurashuvchanlik, sog‘lom tafakkur, sog‘lom dunyoqarash, maishiy turmush odobi, ovqatlanish odobi, kiyinish tartib-qoidalari, shaxsiy gigiena qoidalariga amal qilish, atrof-muhit va ekologik qadriyatlarga hurmat kabi tarkibiy qismlarini rivojlantirishga asosiy e’tibor qaratildi va hududning geografik joylashuvi, demografik xususiyati, yoshlar masalalariga bog‘liq muammolar hisobga olindi hamda tabaqalashtirilgan yondashuv asosida amalga oshirildi. Tadqiqotda ko‘rib chiqilgan yondashuvlar asosida ijtimoiy loyihalarning samaradorligini ta’minlovchi muhim shartlar sifatida maqsadli yo‘naltirilganlik, tizimlilik, uzviylik va uzluksizlik, yoshlarning faol ishtirokini ta’minlash, hududiy va ijtimoiy xususiyatlarni hisobga olish, davlat va fuqarolik jamiyati institutlari o‘rtasidagi ijtimoiy sheriklikni kuchaytirish hamda zamonaviy axborot-kommunikatsiya texnologiyalaridan foydalanishni qayd etish mumkin.

Ayniqsa, yoshlar muhitida sog‘lom turmush tarzi madaniyatini shakllantirish uzoq muddatli ijtimoiy investitsiya sifatida baholanishi lozim. Chunki yoshlarda shakllangan sog‘lom hayot ko‘nikmalari nafaqat ularning shaxsiy salomatligi va hayot sifatini belgilaydi, balki kelgusida oila, mehnat jamoasi va jamiyatda sog‘lom ijtimoiy muhitni qaror toptirishga ta’sir ko‘rsatadi.

Shunday qilib, sog‘lom turmush tarzi madaniyatini rivojlantirishning eng samarali modeli tibbiy profilaktika, ekologik xavfsizlik, ijtimoiy sheriklik, ma’naviy-ma’rifiy tarbiya va faol fuqarolik ishtiroki elementlarini yagona tizimga birlashtirishga asoslanadi. Bunday integratsiyalashgan yondashuv inson salomatligini muhofaza qilish bilan cheklanib qolmay, sog‘lom, faol va ijtimoiy mas’uliyatli shaxsni shakllantirish hamda barqaror va sog‘lom jamiyatni rivojlantirish uchun zarur ijtimoiy shart-sharoitlarni yaratadi.

ORCID: 0009-0000-3167-9499

Annotatsiya: *Maqolada qoraqalpoq, turkman va ingliz bolalar qo‘shiqlarida alliteratsiya, reduplikatsiya, paronimiya va taqlidiy tovushlarning poetik vazifalari qiyosiy tahlil qilindi. Tovush takrorining harakat ovozini qayta yaratishi, talaffuz sur’atini belgilashi va bolaning diqqatini so‘zning ma’nosidan uning akustik shakliga yo‘naltirishi asoslandi. Uch xalq folklorida tovush, so‘z va harakat uyg‘unligi umumiy tipologik hodisa bo‘lsa-da, uning milliy ifodasi har bir tilning fonetik va morfologik imkoniyatlari bilan belgilanishi ko‘rsatildi.*

Kalit so‘zlar: *tovush uyg‘unligi, alliteratsiya, reduplikatsiya, fonosemantika, taqlidiy so‘z, paronimiya, bolalar folklori, harakat obrazi.*

ЗВУКОВАЯ ГАРМОНИЯ И ФОНОСЕМАНТИЧЕСКОЕ ВЫРАЖЕНИЕ ДЕЙСТВИЯ В КАРАКАЛПАКСКИХ, ТУРКМЕНСКИХ И АНГЛИЙСКИХ ДЕТСКИХ ПЕСНЯХ

Аннотация: *В статье проведен сравнительный анализ поэтических функций аллитерации, редупликации, паронимии и звукоподражаний в каракалпакских, туркменских и английских детских песнях. Обосновано, что повторение звуков воссоздает звук движения, определяет темп произношения и направляет внимание ребенка со значения слова на его акустическую форму. Показано, что хотя гармония звука, слова и движения является общим типологическим явлением в фольклоре трех народов, ее национальное выражение определяется фонетическими и морфологическими возможностями каждого языка.*

Ключевые слова: *гармония звуков, аллитерация, редупликация, фоно семантика, звукоподражательное слово, паронимия, детский фольклор, образ движения.*

SOUND HARMONY AND PHONOSEMANTICAL EXPRESSION OF ACTION IN KARAKALPAK, TURKMEN, AND ENGLISH CHILDREN’S SONGS

Abstract: *The article provides a comparative analysis of the poetic functions of alliteration, reduplication, paronyms, and onomatopoeia in Karakalpak, Turkmen, and English children’s songs. It is substantiated that sound repetition recreates the sound of movement, determines the pace of pronunciation, and directs the child’s attention from the meaning of the word to its acoustic form. It is shown that although the harmony of sound, word, and movement is a common typological phenomenon in the folklore of the three nations, its national expression is determined by the phonetic and morphological capabilities of each language.*

Keywords: *sound harmony, alliteration, reduplication, phonosemantics, onomatopoeia, paronyms, children’s folklore, image of movement.*

Kirish. Bolalar qo‘shiqlarida tovush shakli mazmunni ifodalovchi passiv vosita emas. Tovush takrori harakatning sur’ati va akustik xususiyatini qayta yaratadi, ijrochilarni bir xil talaffuz qolipiga moslashtiradi va matnni xotirada saqlashni osonlashtiradi. Ayrim namunalarda ma’no ikkinchi darajaga o‘tib, tovush uyini asosiy estetik va ijroviy vazifani bajaradi.

Olim S.M. Loyter bolalar she’riyatida tovush obrazlari, ritmik-intonatsion shakl va so‘z o‘yinining kattalar poeziyasiga nisbatan zichroq mujassamlashishini ta’kidlaydi [1, 45-46-b.]. Bu holat bolalarning so‘zni faqat ma’no tashuvchi birlik emas, talaffuz va eshitish ob’ekti sifatida ham qabul qilishi bilan bog‘liq.

Tovush bilan ma’no yoki harakat o‘rtasidagi munosabatni tahlil qilishda quyidagi hodisalar muhim: a) alliteratsiya - undosh tovushlarning takrori; b) assonans - unli tovushlarning uyg‘unligi; v) reduplikatsiya - so‘z yoki bo‘g‘inning

takrorlanishi; g) paronimiya - tovush jihatdan yaqin so‘zlarning yonma-yon kelishi; d) fonemik almashuv - bir tovush o‘zgarishi orqali yangi variant yaratish; e) tovushga taqlid - harakat yoki predmet ovozini nutqda qayta ifodalash.

«Qoraqalpoq folklori» kitobining «Uyinlar» qismida «Qamshılaq» o‘yinidagi:

Shırw-shırow, Shırmawıq, Shırıldawıq... [2, 517-b.] birliklarida sh-shır-shırw tovush majmuasi muntazam takrorlanadi. Sirg‘aluvchi sh va titroq r tovushlari qamchining havoda aylanishi, shildirashi va keskin harakatini akustik jihatdan gavdalantiradi.

Bu erda alliteratsiya uch vazifani bajaradi: a) misralarni yagona tovush qatoriga birlashtiradi; b) qamchi harakatining eshitiladigan obrazini yaratadi; v) talaffuzni o‘yin harakati sur’atiga moslashtiradi.

Tovush va harakat o‘rtasidagi bunday munosabatni fonoharakat uyg‘unligi, ya’ni harakatning tovush vositasida ifodalanishi deb atash mumkin. Bu atama fono-motor tushunchasining soddaroq ilmiy muqobili sifatida qo‘llanishi mumkin.

«Arpa-tyrpe» o‘yinida ma’nodan ko‘ra tovush variantlari ustuvor:

Arpa-túrpe, Gúrpe-gúrpe, Arqa-túrpe, Úrpe-úrpe... [2, 520-b.]

Túrpe - gúrpe - úrpe qatorlarida bir tovushning tushishi yoki almashishi orqali yangi akustik variantlar paydo bo‘ladi. So‘zlarning lug‘aviy ma’nosi barqaror bo‘lmasa ham, ularning tovush qurilishi matnni birlashtirib turadi.

Bunday minimal fonemik almashuv bolaning diqqatini so‘zning predmetiy ma’nosidan tovush qobig‘iga ko‘chiradi. Bola yaqin tovushlarni farqlash, tez talaffuz qilish va o‘z nutqini jamoa sur’atiga moslashtirishga o‘rganadi.

«Attım-battım» birikmasida ham paronimik yaqinlik mavjud:

Attım-battım... [2, 515-516-b.]

Ikki so‘z bir xil ritmik-morfologik qolipda keladi, ammo boshlang‘ich undosh bilan farqlanadi. Bu tovush almashuvi qo‘shiqqa o‘yinboplik bag‘ishlab, harakatning tez va qat’iy boshlanishini ta’minlaydi.

Turkman qo‘shiqlarida Çapak-çapak birligida tovush, ma’no va harakat birlashadi:

Çapak-çapak elleri, Agyrmasyn gollary... [3, 42-b.]

Çapak so‘zi chapak harakatini nomlaydi, uning ikki marta takrori esa ikki harakat zarbini belgilaydi. So‘z tarkibidagi ç-p-k jarangsiz undoshlari qisqa va keskin talaffuz qilinib, qo‘llarning to‘qnashuvidan hosil bo‘lgan zarbga akustik jihatdan yaqinlashadi.

Turkman folkloridagi ikkinchi variantida:

Çapak-çapak elleri, Agyrmasyn gollary, Daýysynyň toýunda Çelpek ýaýsyn elleri [3, 42-b.] çapak - çelpek so‘zlari paronimik munosabat hosil qiladi. Ikkala so‘zda ham ç-p-k undoshlari saqlangan, ammo ularning ma’nosi turlicha: birinchisi chapak harakatini, ikkinchisi to‘yda tayyorlanadigan taomni bildiradi.

Tovush yaqinligi bu ikki tushunchani poetik jihatdan bog‘laydi: bolaning hozirgi o‘yin harakati kelajakdagi oilaviy va marosimiy mehnat bilan uyg‘unlashadi. Demak, paronimiya faqat ovoz o‘yini emas, ma’noviy ko‘prik vazifasini ham bajaradi.

Barmoq sanamashida alliteratsiya barmoq nomi va unga yuklangan harakatni birlashtiradi:

Başam barmak - baş getir, Süýem barmak - süýt getir, Orta barmak - ot getir [3, 41-42-b.].

Başam - baş, süýem - süýt birikmalarida dastlabki tovushlar takrorlanadi. Bolaning barmoq nomini keyingi so‘z bilan bog‘lab eslab qolishida ana shu tovush yaqinligi muhim vazifa bajaradi. Alliteratsiya nom va harakat o‘rtasida mnemonik aloqa hosil qiladi.

Turkman erkalamasida tovush takrori sakratish harakatiga moslashadi:

Jigim-jigim jigirdek, Ýaga bişen gowurdak, Gowurdagy kim iýjek, Kim göterse, şol iýjek [4].

Birinchi misradagi jigim-jigim-jigirdek qatori ikki qisqa va bir uzunroq tovush birligidan iborat. Bu tuzilish bolani tizzada engil sakratish harakatining ikki mayda va bir kuchliroq bosqichiga mos kelishi mumkin.

Jigim - jigirdek birliklarida j-g tovushlari takrorlanadi; jigirdek - gowurdak so‘zlaridagi -dek/-dak yaqinligi ichki qofiyani shakllantiradi. Iýjek - iýjek epiforasi esa savol-javobning akustik yakunini ta’minlaydi.

Ingliz harakat qo‘shiqlarida ingliz tilidagi clap, tap, stamp fe’llari qisqa, bir bo‘g‘inli va harakatning akustik xususiyatiga yaqin birliklardir:

Clap your hands, clap your hands, Clap them just like me. Touch your shoulders, touch your shoulders, Touch them just like me. Tap your knees, tap your knees, Tap them just like me [5].

Clap so‘zidagi oxirgi [p] tovushi qo‘llarning keskin to‘qnashuvini, tapdagi [t] va [p] esa engil zarbning qisqa tugallanishini ifodalaydi. Fe’llarning takrori harakatning bir marta emas, bir necha marta bajarilishini belgilaydi.

Turkmancha çapak-çapak va inglizcha clap-clap o‘rtasida tipologik yaqinlik mavjud: a) ikkalasi ham chapak harakatini nomlaydi; b) takror harakat miqdorini ko‘rsatadi; v) portlovchi undoshlar zarbning akustik xususiyatini kuchaytiradi; g) so‘zning talaffuzi harakat bilan bir vaqtda amalga oshadi.

Farq shundaki, turkman çapak so‘zi ikki bo‘g‘inli bo‘lib, harakatga nisbatan kengroq ritmik oraliq beradi; inglizcha clap bir bo‘g‘inliligi sababli qisqa va keskin zarb hosil qiladi.

«I Have a Body» qo‘shig‘ida taqlidiy-harakat fe’llari ritmik o‘sish asosida takrorlanadi:

And I sniff, sniff here, sniff, sniff there, Sniff, sniff, sniff, sniff everywhere.

And I clap, clap here, Clap, clap there, Clap, clap, clap, clap everywhere.

And I stamp, stamp here, Stamp, stamp there, Stamp, stamp, stamp, stamp everywhere [6, 13-b.].

Sniff burun bilan hidlashni, clap qo‘l chapagini, stamp esa oyoqni erga do‘pillatishni ifodalaydi. Har bir fe’lning tovush tarkibi harakat xususiyatiga muvofiq: sniff - havoni qisqa tortish; clap - keskin qo‘l zarbi; stamp - og‘irroq oyoq zarbi.

Ikkilik takror harakatni boshlaydi, to‘rtlik takror esa uni kuchaytiradi: clap-clap - clap-clap-clap-clap; stamp-stamp - stamp-stamp-stamp-stamp.

Shu tariqa tovush takrori harakatning faqat mavjudligini emas, uning kuchayib borishini ham ifodalaydi.

Here - there - everywhere qatorida tovush va makon parallelligi mavjud. Harakat «bu er»dan «u er»ga, keyin «hamma joy»ga tarqaladi. Takroriy fe’llar bilan kengayib boruvchi makon birgalikda dinamik kompozitsiya hosil qiladi.

Qoraqalpoq, turkman va ingliz bolalar qo‘shiqlarida reduplikatsiya bir nechta umumiy vazifani bajaradi: a) harakat miqdorini belgilaydi; b) ijro sur’atini bir maromda saqlaydi; v) so‘zni eslab qolishni osonlashtiradi; g) talaffuz a’zolarini mashq qildiradi; d) jamoaviy ovozni muvofiqlashtiradi; e) harakat ovozini shartli ravishda qayta yaratadi.

Qoraqalpoqcha shıro’-shıroo’, turkmancha çapak-çapak va inglizcha clap-clap birliklari vazifaviy jihatdan yaqin. Biroq ularning akustik obrazi turlicha: birinchisi sirg‘alish va aylanishni, ikkinchi va uchinchisi esa zarbni ifodalaydi.

Shu asosda harakatli qo‘shiqlardagi tovush takrorlarini ikki guruhga ajratish mumkin: davomli harakatni ifodalovchi tovushlar: shırw-shırow; zarbli harakatni ifodalovchi tovushlar: çapak-çapak, clap-clap, stamp-stamp.

Davomli tovushlarda sirg‘aluvchi va titroq undoshlar, zarbli harakatlarda esa portlovchi undoshlar faollashadi.

«Arpa-túrpe»dagi túrpe-gúrpe-úrpe qatorlari bolaga so‘zning tovush tarkibi bilan erkin munosabatda bo‘lish imkonini beradi. Bunda bir fonemaning qo‘shilishi yoki tushirilishi natijasida yangi akustik shakl hosil bo‘ladi. So‘zning aniq lug‘aviy ma’nosidan ko‘ra uning talaffuzi va ritmi muhimlashadi.

Bunday matnlar bolada: yaqin fonemalarni farqlash; tovush almashuvini sezish; tez talaffuz qilish; ritmni saqlash; yangi tovush birikmalarini yaratish ko‘nikmalarini rivojlantiradi.

Turkman başam-baş, süýem-süýt hamda ingliz clap-tap-stamp qatorlarida ham tovush yaqinligi so‘zlarni xotirada guruhlash imkonini beradi. Demak, tovush uyg‘unligi estetik zavq bilan birga fonologik anglashning boshlang‘ich shaklini yuzaga keltiradi.

Uch an’anada tovush uyg‘unligining umumiy poetik qonuniyatlari quyidagilardan iborat: a) takroriy tovush harakatning davomiyligini belgilaydi; b) portlovchi undoshlar zarb harakatini kuchaytiradi; v) sirg‘aluvchi va titroq undoshlar aylanish yoki shovqinni ifodalaydi; g) paronimiya ma’nosi turlicha so‘zlarni bir kompozitsion qatorga birlashtiradi; d) fonemik almashuv bolaning diqqatini so‘zning tovush shakliga yo‘naltiradi; e) alliteratsiya matnni yodlashni engillashtiradi.

Milliy farqlar til tizimi va madaniy obrazlarda ko‘rinadi. Qoraqalpoq namunalarida qamchi va jamoaviy o‘yin harakatiga xos tovushlar, turkman qo‘shiqlarida chapak, barmoq, tayoq va to‘y mehnatiga oid birliklar, ingliz namunalarida esa tana harakatini bildiruvchi bir bo‘g‘inli buyruq fe’llari ustuvor.

Umuman olganda, qoraqalpoq, turkman va ingliz bolalar qo‘shiqlarida tovush uyg‘unligi harakat obrazini yaratish, ijro sur’atini belgilash va matnni eslab qolishga xizmat qiladi. Alliteratsiya, reduplikatsiya, paronimiya va tovushga taqlid harakatning akustik xususiyatlarini she’riy nutqda qayta ifodalaydi.

Qoraqalpoq shıro’-shıroo’ formulasi davomli aylanish va shildirashni, turkman çapak-çapak hamda ingliz clap-clap birliklari zarbli harakatni tovush vositasida gavdalantiradi. Shuning uchun bolalar qo‘shiqlarida fonika ma’nodan ajralgan bezak emas, balki so‘z, eshitish va harakatni birlashtiruvchi fonosemantik tizimdir.

A COMPARATIVE STUDY OF BRAVERY IN BEOWULF AND ALPOMISH

Rakhimova Nargiza Bakhshullayevna
Independent Researcher at Bukhara State University
E-mail: n.rakhimova@mail.ru

Abstract: *This article presents a comparative analysis of Beowulf, the central hero of the Old English epic Beowulf and Alpomish, the main hero of the Uzbek heroic epic Alpomish, with particular attention to the concept of bravery. Both heroes represent important ideals of courage, strength, loyalty, perseverance, and self-sacrifice. Beowulf demonstrates bravery by confronting supernatural enemies, including Grendel, Grendel's mother and the dragon. His courage is closely connected with warrior honor, personal reputation, responsibility, and the protection of his people. Alpomish demonstrates bravery through battles, difficult trials, captivity, and his struggle to protect his family, beloved Barchin, homeland, and social community.*

Keywords: *Beowulf, Alpomish, bravery, heroism, courage, epic literature, Uzbek folklore, Anglo-Saxon literature, comparative literature, warrior, loyalty, self-sacrifice.*

"BEOVULF" VA "ALPOMISH" DOSTONLARIDA JASORATNING QIYOSIY TAHLILI

Annotatsiya: *Ushbu maqolada qadimgi ingliz epik dostoni «Beowulf»ning bosh qahramoni Beovulf hamda o'zbek xalq qahramonlik dostoni «Alpomish»ning bosh qahramoni Alpomish jasorat tushunchasi nuqtayi nazaridan qiyosiy tahlil qilinadi. Har ikkala qahramon ham mardlik, kuch, sadoqat, matonat va fidoyilik kabi muhim fazilatlarni namoyon etadi. Beovulf Grendel, Grendelning onasi va ajdar kabi g'ayritabiiy kuchlarga qarshi kurashib, o'z jasoratini namoyish etadi. Uning jasorati jangovar sharaf, shaxsiy obro', burch va xalqini himoya qilish bilan bog'liq. Alpomish esa janglar, og'ir sinovlar va uzoq muddatli asirlik jarayonida o'z jasoratini namoyon qiladi. U oilasi, Barchin, vatani va xalqining manfaatlarini himoya qilishga intiladi.*

Kalit so'zlar: *Beovulf, Alpomish, jasorat, qahramonlik, mardlik, epik adabiyot, o'zbek folklori, qadimgi ingliz adabiyoti, qiyosiy adabiyotshunoslik, jangchi, sadoqat, fidoyilik.*

СРАВНИТЕЛЬНОЕ ИССЛЕДОВАНИЕ КОНЦЕПТА ХРАБРОСТИ В ЭПОСАХ «БЕОВУЛЬФ» И «АЛПОМИШ»

Аннотация: *В статье проводится сравнительный анализ Беовульфа, главного героя древнеанглийского эпоса «Беовульф», и Алпомиша, центрального героя узбекского героического эпоса «Алпомиш», с особым вниманием к понятию храбрости. Оба героя воплощают такие важные качества, как мужество, сила, верность, стойкость и самопожертвование. Беовульф проявляет храбрость в борьбе с такими сверхъестественными противниками, как Грендель, мать Гренделя и дракон. Его мужество связано с воинской честью, личной славой, чувством долга и защитой своего народа. Алпомиш проявляет храбрость в сражениях, испытаниях и длительном плену, стремясь защитить свою семью, возлюбленную Барчин, родную землю и общество*

Ключевые слова: *Беовульф, Алпомиш, храбрость, героизм, мужество, эпическая литература, узбекский фольклор, древнеанглийская литература, сравнительное литературоведение, воин, верность, самопожертвование.*

Introduction

Heroic epics occupy an important place in the literary and cultural heritage of different nations, reflecting their historical experience, moral values, social ideals, and concepts of heroism. Among the most significant examples of epic literature are *Beowulf*, one of the earliest and most influential works of Old English literature, and *Alpomish*, a major heroic epic of the Uzbek and broader Turkic oral tradition. Although these epics emerged in different geographical, historical, and cultural environments, both place bravery at the center of the heroic ideal. The protagonists, Beowulf and Alpomish, demonstrate courage not only through physical strength and military ability but also through loyalty, responsibility, perseverance, and readiness to protect their communities.

In *Beowulf*, bravery is closely connected with the Anglo-Saxon heroic code, which emphasizes loyalty to one's lord and people, personal honor, reputation, physical courage, and willingness to confront danger. Beowulf's battles against

Grendel, Grendel's mother, and the dragon demonstrate different dimensions of heroic courage. His bravery gradually develops from the youthful desire to prove his strength and gain fame into the mature responsibility of a ruler who is prepared to sacrifice his life for the safety of his people. Thus, bravery in the epic functions both as an individual virtue and as a social obligation.

In *Alpomish*, courage is similarly represented as a fundamental characteristic of the ideal hero. However, it is strongly associated with loyalty to family, love, homeland, community, and traditional values. Alpomish faces physical challenges, rivalry, separation, captivity, and various social obstacles. His heroic identity is revealed not merely through victory over opponents but also through his endurance, faithfulness to Barchin, devotion to his relatives, and determination to restore justice and social order. Therefore, the concept of bravery in *Alpomish* combines physical heroism with moral strength and social responsibility.

A comparative examination of these two epics provides an opportunity to identify both universal and culturally specific representations of bravery. In both works, the hero is expected to overcome fear, protect others, remain loyal to important moral principles, and prove himself through difficult trials. At the same time, the cultural meanings attached to these actions differ according to the social structures, traditions, and ethical systems represented in each epic.

Literature review and Methodology

Heroism is one of the most important concepts in world epic literature. Different peoples have created heroic characters who embody the moral and social ideals of their communities. Beowulf and Alpomish are particularly significant examples because they belong to different literary and cultural traditions but demonstrate several universal qualities of the epic hero. *Beowulf* is an Old English heroic poem centered on a warrior who confronts supernatural and mortal dangers. Alpomish is a major Uzbek heroic epic that celebrates manliness, unity, love, faithfulness, and the strength of family. The Uzbek version associated with Fozil Yo'ldosh o'g'li includes Alpomish's contests with Kalmak warriors, his struggle to win Barchin, seven years of captivity, his return, and his victory over the usurper Ulton.

Beowulf's Bravery

Beowulf's bravery is first demonstrated through his willingness to confront Grendel. He travels to Heorot knowing that Grendel is a powerful and deadly enemy. Rather than avoiding the monster, Beowulf deliberately accepts the challenge.

His bravery becomes particularly significant because he chooses to confront Grendel without relying on weapons. This action presents courage as confidence in one's own strength and willingness to face danger directly.

Alpomish's Bravery

Alpomish's bravery is expressed through physical strength, endurance, loyalty, and determination. His heroic identity is established through contests and struggles with powerful opponents. His courage is particularly evident in the difficulties he faces while trying to protect his relationships and social community.

Comparative Analysis of Bravery

Aspect	Beowulf	Alpomish
Main form of bravery	Fighting monsters and enemies	Fighting enemies and overcoming prolonged trials
Major motivation	Protection, duty, honor and reputation	Family, love, homeland, justice and social unity
Physical courage	Very strong	Very strong
Psychological endurance	Demonstrated through dangerous battles and old age	Especially demonstrated through captivity and suffering
Self-sacrifice	Central to his final battle	Present through risks taken for family and community
Cultural ideal	Warrior and king	Warrior, family protector and social leader
Final heroic meaning	Sacrifice and heroic legacy	Restoration, justice and unity

The study uses a comparative literary method. The analysis is based on close reading and comparison of the heroic actions, conflicts, motivations, and moral values associated with Beowulf and Alpomish.

The following approaches are used:

1.Comparative analysis – similarities and differences between the two heroes are identified.

2.Character analysis – the heroes' actions and decisions are examined as expressions of bravery.

3.Cultural-historical approach – the relationship between heroism and the social values of Anglo-Saxon and Uzbek epic traditions is considered.

4.Textual analysis – important episodes involving battles, danger, sacrifice, loyalty, and endurance are analyzed.

5.Interpretive approach – bravery is considered not only as physical courage but also as moral and psychological strength.

Results and Discussion

The comparative analysis produces the following results:

1.Both Beowulf and Alpomish are fearless heroes. They willingly confront powerful enemies and dangerous situations.

2.Physical courage is fundamental to both characters. Their heroic status is demonstrated through battles and difficult challenges.

3.Beowulf's bravery is strongly associated with honor, reputation, leadership, and sacrifice.

4.Alpomish's bravery is strongly associated with family, love, loyalty, justice, and the unity of the community.

5.Both heroes demonstrate perseverance, but Alpomish's prolonged captivity particularly emphasizes endurance.

6.Their bravery reflects their cultural traditions. Comparative scholarship likewise identifies courage, loyalty, and honor as shared heroic qualities while noting differences in their social roles.

7.The two epics demonstrate that bravery is a universal heroic value, although its meaning changes according to cultural and social context.

Beowulf and Alpomish are powerful examples of heroic bravery in world literature. Both heroes demonstrate courage by confronting danger, protecting others, enduring suffering, and accepting responsibility. Their bravery, however, has different emphases. Beowulf's courage is primarily represented through heroic combat, honor, leadership, and the willingness to sacrifice his life for his people. Alpomish's bravery combines physical courage with endurance, loyalty, love, family responsibility, and the restoration of justice.

The comparative analysis of *Beowulf* and *Alpomish* demonstrates that bravery is a central element in the construction of the heroic ideal in both epics. Despite their different historical and cultural backgrounds, the two works present courage as a multidimensional quality that combines physical strength, psychological endurance, loyalty, responsibility, and moral commitment. Both Beowulf and Alpomish prove their heroic status through trials that require them to overcome danger and place collective interests above personal comfort.

Conclusion

At the same time, the representation of bravery reflects the specific cultural values of each epic tradition. In *Beowulf*, courage is closely related to the Anglo-Saxon ideals of honor, reputation, loyalty, warrior ethics, and heroic sacrifice. Beowulf's willingness to confront powerful enemies establishes his reputation as a warrior, while his final struggle with the dragon transforms personal bravery into the self-sacrificing responsibility of a king. In this sense, the epic presents courage as both a means of achieving individual glory and a duty toward society.

In *Alpomish*, bravery is more strongly integrated with devotion to family, love, homeland, community, and the restoration of justice. Alpomish's heroism is demonstrated not only through physical confrontations but also through patience, endurance, loyalty, and his ability to remain faithful to his moral commitments despite prolonged hardship. His courage therefore represents a synthesis of physical power and spiritual steadfastness.

The comparison also reveals an important universal feature of epic heroism: true bravery is not simply the absence of fear or the possession of extraordinary physical strength; it is the ability to act responsibly in the face of danger for the protection of values greater than oneself. Both epics use the figure of the hero to preserve and transmit socially significant ideals from one generation to another.

Thus, *Beowulf* and *Alpomish* demonstrate how geographically distant literary traditions can develop comparable heroic concepts while preserving their distinctive cultural characteristics. Their similarities point to universal human ideals of courage, loyalty, perseverance, and responsibility, whereas their differences reveal the particular historical and ethical values of Anglo-Saxon and Uzbek-Turkic societies. A comparative study of these epics therefore contributes not only to literary analysis but also to a broader understanding of intercultural connections and the universal foundations of heroic thought.

ORCID: 0009-0006-8521-4009

Annotatsiya: *Mazkur maqolada qadimgi turkiy yozma yodgorliklarni zamonaviy tillarga tarjima qilishda ekvivalentlik va interpretativ rekonstruksiya muammolari tadqiq etilgan. “Qutadg‘u bilig” va “Devonu lug‘at-it turk” asarlaridagi tarixiy-semantik hamda lingvomadaniy xususiyatga ega birliklarni tarjimada qayta ifodalash masalalari tahlil qilingan. Tarixiy matn bilan zamonaviy o‘quvchi o‘rtasidagi temporal-semantik distansiya tarjimada mazmunning barcha qatlamlarini to‘liq saqlash imkoniyatini cheklashi asoslangan. “Qut”, “törü”, “el”, “alp” kabi birliklar misolida lug‘aviy muqobil tarixiy birlikning semantik va madaniy mazmunini har doim ham to‘liq qamrab olmasligi ko‘rsatilgan. Tadqiqotda ekvivalentlikning formal, semantik, pragmatik va lingvomadaniy qatlamlari o‘zaro bog‘liq holda ko‘rib chiqilgan. Tahlil natijasida qadimgi turkiy matn tarjimasida ushbu qatlamlarni muvozanatli qayta tiklashga asoslangan kompleks interpretativ ekvivalentlik tamoyilining metodologik ahamiyati yoritilgan. Tarjimon faoliyati tarixiy shakl, konseptual mazmun, kommunikativ vazifa va madaniy kodni zamonaviy idrok maydonida qayta tiklashga qaratilgan interpretativ-rekonstruktiv jarayon sifatida tavsiflangan.*

Kalit so‘zlar: *qadimgi turkiy yozma yodgorliklar, tarjima, ekvivalentlik, interpretativ rekonstruksiya, temporal-semantik distansiya, pragmatik ekvivalentlik, lingvomadaniy ekvivalentlik, kompleks interpretativ ekvivalentlik.*

ПРОБЛЕМА ЭКВИВАЛЕНТНОСТИ И ИНТЕРПРЕТАТИВНОЙ РЕКОНСТРУКЦИИ В ПЕРЕВОДЕ ДРЕВНЕТЮРКСКИХ ПИСЬМЕННЫХ ПАМЯТНИКОВ

Аннотация: *В статье исследуются проблемы эквивалентности и интерпретативной реконструкции при переводе древнетюркских письменных памятников на современные языки. Анализируются вопросы передачи в переводе единиц с историко-семантическими и лингвокультурными особенностями, представленных в произведениях «Кутадгу билиг» и «Дивану лугат ат-турк». Обосновывается положение о том, что темпорально-семантическая дистанция между историческим текстом и современным читателем ограничивает возможность полного сохранения всех содержательных слоёв оригинала в переводе. На примере таких единиц, как «qut», «törü», «el», «alp», показано, что лексический эквивалент не всегда способен в полной мере передать их историко-семантическое и культурное содержание. Формальный, семантический, прагматический и лингвокультурный уровни эквивалентности рассматриваются во взаимосвязи. В результате анализа раскрывается методологическое значение принципа комплексной интерпретативной эквивалентности, основанного на сбалансированной реконструкции данных уровней при переводе древнетюркских текстов. Деятельность переводчика характеризуется как интерпретативно-реконструктивный процесс, направленный на воссоздание исторической формы, концептуального содержания, коммуникативной функции и культурного кода в пространстве современного восприятия.*

Ключевые слова: *древнетюркские письменные памятники, перевод, эквивалентность, интерпретативная реконструкция, темпорально-семантическая дистанция, прагматическая эквивалентность, лингвокультурная эквивалентность, комплексная интерпретативная эквивалентность.*

THE PROBLEM OF EQUIVALENCE AND INTERPRETATIVE RECONSTRUCTION IN THE TRANSLATION OF OLD TURKIC WRITTEN MONUMENTS

Abstract: *This article examines the problems of equivalence and interpretative reconstruction in the translation of Old Turkic written monuments into modern languages. It analyzes the representation in translation of units characterized by historical-semantic and linguocultural features in Kutadgu Bilig and Dīwān Lughāt al-Turk. The study argues that the temporal-semantic distance between a historical text and the modern reader limits the possibility of fully preserving all layers of meaning in translation. Using such units*

as qut, törü, el, and alp as examples, it demonstrates that a lexical equivalent does not always fully convey their historical-semantic and cultural content. Formal, semantic, pragmatic, and linguocultural levels of equivalence are considered in their interrelation. The analysis reveals the methodological significance of the principle of complex interpretative equivalence, which is based on the balanced reconstruction of these levels in translating Old Turkic texts. The translator's activity is characterized as an interpretative-reconstructive process aimed at reconstructing historical form, conceptual content, communicative function, and cultural code within the framework of modern perception.

Keywords: *Old Turkic written monuments, translation, equivalence, interpretative reconstruction, temporal-semantic distance, pragmatic equivalence, linguocultural equivalence, complex interpretative equivalence.*

Kirish

Tarjimashunoslikda tarixiy matnlar tarjimasi murakkab ilmiy muammolardan biri hisoblanadi. Bunday matnlarni tarjima qilishda leksik va grammatik birliklarning muqobilini topish bilan birga, muayyan davrga xos tarixiy tafakkur, madaniy muhit, kommunikativ vaziyat va semantik mazmunni qayta tiklash zarurati yuzaga keladi. Shu jihatdan tarixiy matn tarjimasi oddiy lingvistik transfer emas, balki koʻp qatlamli interpretativ-rekonstruktiv jarayon sifatida namoyon boʻladi.

"Qutadgʻu bilig" va "Devonu lugʻat-it turk" kabi qadimgi turkiy yozma yodgorliklarda qoʻllangan "qut", "törü", "el", "alp", "bilig" singari birliklar oddiy lugʻaviy ma'no bilan chegaralanmay, tarixiy, siyosiy, falsafiy va lingvomadaniy mazmunni ham ifodalaydi. Tarixiy matn bilan zamonaviy oʻquvchi oʻrtasidagi temporal-semantik distansiya esa ushbu mazmun qatlamlarini tarjimada toʻliq qayta tiklashni murakkablashtiradi. Natijada qadimgi turkiy matnlar tarjimasida ekvivalentlik masalasi formal muqobillikdan tashqari semantik, pragmatik va lingvomadaniy omillarni ham hisobga olishni talab etadi.

Tarjima nazariyasida R. Yakobson, E. Nida, P. Newmark, V. Komissarov singari olimlarning ekvivalentlik va interpretatsiyaga oid qarashlari tarixiy matn tarjimasini oʻrganish uchun muhim nazariy asos yaratgan. Biroq qadimgi turkiy yozma yodgorliklarning arxaik semantikasi, tarixiy-madaniy kodi va kommunikativ muhiti ularning tarjimasida ekvivalentlikni koʻp qatlamli hodisa sifatida tadqiq etishni taqozo etadi.

Mazkur tadqiqotning maqsadi qadimgi turkiy yozma yodgorliklar tarjimasida formal, semantik, pragmatik va lingvomadaniy ekvivalentlik oʻrtasidagi munosabatni aniqlash hamda interpretativ rekonstruksiyaning metodologik ahamiyatini ochib berishdan iborat. Tadqiqotda qadimgi turkiy matnlar tarjimasida mutlaq ekvivalentlikdan koʻra, tarixiy matnning turli mazmuniy qatlamlarini muvozanatli qayta tiklashga asoslangan kompleks interpretativ ekvivalentlik tamoyili samarali metodologik yondashuv sifatida qaraladi.

Adabiyotlar tahlili

Tarjimashunoslikda ekvivalentlik va interpretatsiya masalalari turli nazariy yondashuvlar asosida tadqiq etilgan. E. Nida formal va dinamik ekvivalentlikni farqlab, tarjimada shakliy muvofiqlik hamda kommunikativ ta'sir masalasiga e'tibor qaratadi [1, 159–167]. R. Yakobson tarjimani bir tildagi verbal belgilarni boshqa til vositalari orqali interpretatsiya qilish jarayoni sifatida izohlaydi [2, 232–239]. P. Newmark esa semantik va kommunikativ tarjima tamoyillarini ajratib, asliyat mazmunini saqlash bilan qabul qiluvchi uchun tushunarlilik oʻrtasidagi munosabatni yoritadi [3, 45–48]. V.N. Komissarov ekvivalentlikni asliyat va tarjima oʻrtasidagi mazmuniy umumiylikning turli darajalarda namoyon boʻlishi bilan bogʻlaydi [4, 48–53].

Tarixiy matnlarni talqin qilishda H.-G. Gadamerning tarixiy masofa haqidagi qarashlari muhim boʻlib, matnni tushunish uning yaratilgan davri bilan zamonaviy talqin muhiti oʻrtasidagi farqni hisobga olishni talab etadi [7, 305–390]. Qadimgi turkiy yozma yodgorliklarni tarixiy-filologik oʻrganishda R.R. Arat va T. Tekin tadqiqotlari muhim oʻrin tutadi [8, VII; 9, 17–22]. G. Clauson qadimgi turkiy birliklarning tarixiy semantikasini yoritib, xususan, "qut" leksemasining "fortune", "divine favour", "majesty" kabi ma'nolarini qayd etadi [5, 594–595]. Q. Sodiqov esa turkiy yozma yodgorliklar tilini tarixiy taraqqiyot va yozma adabiy til bilan bogʻliq holda tadqiq etadi [10, 41–47].

Mazkur tadqiqotlarda ekvivalentlik, interpretatsiya va qadimgi turkiy birliklarning tarixiy-semantik xususiyatlari turli jihatlardan yoritilgan. Ushbu nazariy qarashlarga tayangan holda, mazkur maqolada qadimgi turkiy yozma yodgorliklar tarjimasidagi formal, semantik, pragmatik va lingvomadaniy ekvivalentlik oʻzaro bogʻliq tizim sifatida koʻrib chiqilib, ularni birlashtiruvchi kompleks interpretativ ekvivalentlik tamoyili asosida tahlil qilinadi.

Tadqiqot metodologiya

Tadqiqot materiali sifatida "Devonu lugʻat-it turk" va "Qutadgʻu bilig" asarlaridagi tarixiy-semantik hamda lingvomadaniy xususiyatga ega birliklar, shuningdek, ularning zamonaviy tillardagi tarjima talqinlari asos qilib olindi. Xususan, "qut", "törü", "el", "alp" kabi birliklarning asliyatdagi mazmuni va tarjimada qayta ifodalanish xususiyatlari ekvivalentlik muammosi nuqtai nazaridan koʻrib chiqildi.

Tadqiqotda tarixiy-filologik, qiyosiy, semantik, lingvopragmatik va lingvomadaniy tahlil usullaridan kompleks foydalanildi. Tarixiy-filologik yondashuv birliklarning qadimgi turkiy til tizimidagi shakli va tarixiy ma’nosini aniqlashga, semantik tahlil ularning mazmun qatlamlarini ochishga, qiyosiy tahlil esa asliyat va tarjima oʻrtasidagi muvofiqliklarni belgilashga xizmat qildi. Lingvopragmatik va lingvomadaniy tahlil orqali birliklarning kommunikativ vazifasi hamda tarixiy-madaniy mazmunining tarjimada saqlanish darajasi kuzatildi.

Tahlil jarayonida ekvivalentlik formal, semantik, pragmatik va lingvomadaniy qatlamlar asosida oʻrganildi. Ushbu qatlamlarning oʻzaro munosabati qadimgi turkiy matnni zamonaviy tilga koʻchirishda tarixiy shakl, konseptual mazmun, kommunikativ ta’sir va madaniy kodning qay darajada qayta tiklanishini aniqlash mezoni sifatida qoʻllanildi. Shu asosda tarjimada alohida ekvivalentlik turini ustuvorlashtirishdan koʻra, ularni oʻzaro bogʻliq holda talqin qilishga asoslangan kompleks interpretativ yondashuv qoʻllandi.

Natijalar va ularning tahlili

Tahlil natijalari qadimgi turkiy yozma yodgorliklar tarjimasida ekvivalentlik bir qatlamli hodisa emasligini koʻrsatdi. Tarixiy birlikning shakliy muqobilini saqlash uning semantik, pragmatik va lingvomadaniy mazmunini toʻliq qayta ifodalash uchun yetarli emas. Shu bois tadqiqotda ekvivalentlik formal, semantik, pragmatik va lingvomadaniy qatlamlarning oʻzaro aloqasi asosida namoyon boʻlishi aniqlandi.

Formal ekvivalentlik tarixiy birlikning shakliy xususiyatlarini imkon qadar saqlashga xizmat qilsa, semantik ekvivalentlik uning mazmuniy va konseptual qatlamlarini qayta tiklashni talab qiladi. Bu holat, ayniqsa, “qut” birligi misolida yaqqol koʻrinadi. Mazkur leksemaning semantik maydoni “baxt” yoki “saodat” ma’nolari bilan cheklanmay, ilohiy inoyat, hukmdorlik mavqei va siyosiy hokimiyat bilan bogʻliq tarixiy mazmunlarni ham qamrab oladi. Shu sababli uni bitta zamonaviy leksik muqobil orqali ifodalash asliyatdagi semantik koʻlamning torayishiga olib kelishi mumkin.

Lingvomadaniy ekvivalentlikda esa tarixiy birlik ortida turgan madaniy kodni saqlash muhimligi kuzatildi. Jumladan, “törü” birlik sifatida faqat “qonun” tushunchasini emas, balki urf-odat, ijtimoiy tartib va davlat boshqaruviga daxldor tarixiy-madaniy mazmunni ham ifodalaydi. “Alp”, “beg”, “er”, “el” kabi birliklarda ham lugʻaviy ma’no bilan tarixiy-madaniy mazmun oʻrtasidagi uzviy bogʻliqlik mavjud. Shuning uchun ularning tarjimasida faqat lugʻaviy muqobilga tayanish mazmunning ayrim qatlamlari yoʻqolishiga sabab boʻlishi mumkin.

Pragmatik ekvivalentlik nuqtai nazaridan “Qutadgʻu bilig”dagi pand-nasihat, murojaat va didaktik fikrlar hamda “Devonu lugʻat-it turk”dagi maqol va hikmatli birliklarning kommunikativ vazifasini saqlash muhim hisoblanadi. Bunda tarjimada birlikning lugʻaviy mazmuni bilan bir qatorda uning muayyan kommunikativ vaziyatdagi ta’siri ham hisobga olinadi.

Olingan natijalar asosida qadimgi turkiy matnlar tarjimasida kompleks interpretativ ekvivalentlik tamoyili asoslandi. Mazkur modelda formal ekvivalentlik tarixiy shaklni, semantik ekvivalentlik konseptual mazmunni, pragmatik ekvivalentlik kommunikativ ta’sirni, lingvomadaniy ekvivalentlik esa madaniy kod va tarixiy xotirani qayta tiklashga xizmat qiladi. Ushbu qatlamlar alohida emas, balki oʻzaro bogʻliq holda amal qilgandagina tarixiy matn mazmunini tarjimada nisbatan yaxlit rekonstruksiya qilish imkoniyati yuzaga keladi.

Shunday qilib, qadimgi turkiy yozma yodgorliklar tarjimasida mutlaq ekvivalentlikdan koʻra, matnning tarixiy-semantik, pragmatik va lingvomadaniy xususiyatlarini muvozanatli qayta tiklash ustuvor ahamiyat kasb etishi aniqlandi. Bu esa tarjimon faoliyatini tayyor lugʻaviy muqobillarni tanlash bilangina cheklamay, tarixiy matnning koʻp qatlamli mazmunini interpretatsiya va rekonstruksiya qilish jarayoni sifatida baholash zarurligini koʻrsatadi.

Olingan natijalar qadimgi turkiy yozma yodgorliklar tarjimasida ekvivalentlikni faqat shakliy yoki lugʻaviy muvofiqlik asosida belgilash yetarli emasligini koʻrsatadi. E. Nidaning formal va dinamik ekvivalentlik haqidagi qarashlarida tarjimada asliyat shaklini saqlash hamda qabul qiluvchi auditoriyaga koʻrsatiladigan kommunikativ ta’sir oʻrtasidagi farq alohida ajratiladi [1, 159–167]. Mazkur yondashuv tarixiy matnlar tarjimasida muhim boʻlsa-da, qadimgi turkiy yozma yodgorliklarda tarixiy-semantik va madaniy qatlamlarning mavjudligi ekvivalentlik masalasini yanada kengroq doirada koʻrib chiqishni talab qiladi.

R. Yakobson tarjimani bir til belgilarini boshqa til vositalari orqali interpretatsiya qilish jarayoni sifatida talqin qiladi [2, 232–239]. Ushbu qarash qadimgi turkiy matnlar tarjimasida tarjimonning interpretativ faoliyatini tushuntirish uchun muhimdir. Chunki “qut”, “törü”, “el”, “alp” singari birliklarni tarjima qilishda ularning zamonaviy lugʻaviy muqobilini aniqlashning oʻzi yetarli boʻlmay, birlikning tarixiy matndagi semantik va madaniy vazifasini ham qayta tiklash zarurati yuzaga keladi. Shu nuqtai nazardan tarjima asliyatdagi belgini boshqa til belgisi bilan almashtirishdan koʻra kengroq interpretativ jarayon sifatida namoyon boʻladi.

P. Newmark tomonidan ilgari surilgan semantik va kommunikativ tarjima tamoyillari ham tarixiy matn tarjimasida mazmun va kommunikativ ta’sir oʻrtasidagi muvozanat masalasini yoritishga imkon beradi [3, 45–48]. Qadimgi turkiy matnlarda esa ushbu muvozanat tarixiy mazmunni saqlash zarurati bilan yanada murakkablashadi. Tarjimon bir tomondan birlikning tarixiy semantikasini imkon qadar saqlashi, ikkinchi tomondan esa uning mazmunini zamonaviy oʻquvchi uchun anglashiladigan shaklda taqdim etishi lozim.

V.N. Komissarov ekvivalentlikni tarjimaning turli darajalarida namoyon boʻladigan hodisa sifatida izohlaydi va asliyat bilan tarjima oʻrtasidagi mazmuniy umumiylikka alohida e’tibor qaratadi [4, 48–53]. Qadimgi turkiy matnlar tahlili bu yondashuvni tarixiy va lingvomadaniy omillar bilan kengaytirish zarurligini koʻrsatadi. Chunki tarixiy birlikning mazmuni faqat lugʻaviy semantika orqali emas, balki uning muayyan tarixiy-madaniy tizimdagi vazifasi orqali ham shakllanadi.

Bu jihatdan “qut” leksemasi xarakterlidir. G. Clauson mazkur birlikning semantik maydonida “fortune”, “divine favour”, “majesty” kabi ma’nolar mavjudligini koʻrsatadi [5, 594–595]. Demak, “qut”ni zamonaviy tilda faqat bitta lugʻaviy muqobil bilan ifodalash uning tarixiy-semantik koʻlamini toʻliq aks ettirmaydi. R. Dankoff va W. Mayning “Qutadgʻu bilig” tarjimasida ham ushbu birlik kontekstga bogʻliq ravishda turlicha talqin qilinadi [6, 65–68]. Bu holat tarixiy birlik uchun doimiy va mutlaq leksik ekvivalent belgilash murakkabligini koʻrsatadi.

Tarixiy matnni tushunishda vaqt masalasi ham alohida ahamiyatga ega. H.-G. Gadamer matn va uni talqin qiluvchi subyekt oʻrtasidagi tarixiy masofani tushunish jarayonining muhim omili sifatida koʻrsatadi [7, 305–390]. Qadimgi turkiy yozma yodgorliklar tarjimasida bu masofa temporal-semantik distansiya koʻrinishida namoyon boʻladi. Tarjimon nafaqat til birliklarining qadimgi ma’nosini aniqlaydi, balki ularning dastlabki tarixiy va madaniy muhitdagi funksiyasini zamonaviy idrok maydonida qayta tiklaydi.

Turkiy yozma yodgorliklarni nashr va tarjima qilish tajribasi ham tarixiy-filologik aniqlikning muhimligini koʻrsatadi. R.R. Arat “Qutadgʻu bilig” matni ustida ishlashda tarixiy matnning filologik xususiyatlariga alohida e’tibor qaratgan [8, VII]. T. Tekin qadimgi turkiy yozma yodgorliklarni oʻrganishda matn shakli, fonetik va grammatik xususiyatlarni tarixiy til tizimi bilan bogʻliq holda talqin qiladi [9, 17–22]. Q. Sodiqov tadqiqotlarida esa turkiy yozma yodgorliklarning til xususiyatlarini tarixiy taraqqiyot va yozma adabiy til bilan bogʻliq holda oʻrganish tamoyili kuzatiladi [10, 41–47]. Ushbu qarashlar qadimgi turkiy matn tarjimasida tarixiy-filologik rekonstruksiyaning zarurligini tasdiqlaydi.

Shu asosda tadqiqot natijalari ekvivalentlikning formal, semantik, pragmatik va lingvomadaniy qatlamlarini bir-biridan ajratilgan holda emas, oʻzaro bogʻliq tizim sifatida koʻrib chiqish maqsadga muvofiqligini koʻrsatadi. Formal ekvivalentlik tarixiy shaklni, semantik ekvivalentlik konseptual mazmunni, pragmatik ekvivalentlik kommunikativ ta’sirni, lingvomadaniy ekvivalentlik esa tarixiy-madaniy kodni qayta tiklashga yoʻnaltiriladi. Ushbu qatlamlarning integratsiyasi kompleks interpretativ ekvivalentlik modelining asosini tashkil etadi.

Mazkur modelning asosiy xususiyati tarjimada bir ekvivalentlik turini mutlaqlashtirmaslik bilan belgilanadi. Tarixiy shaklning toʻliq saqlanishi matnning zamonaviy oʻquvchi uchun tushunarliligini cheklashi, haddan tashqari pragmatik moslashtirish esa tarixiy va madaniy mazmunning qisqarishiga olib kelishi mumkin. Shu sababli qadimgi turkiy yozma yodgorliklar tarjimasida ekvivalentlik tarixiy shakl, konseptual mazmun, kommunikativ vazifa va madaniy kod oʻrtasidagi muvozanatni ta’minlashga qaratilgan interpretativ rekonstruksiya sifatida namoyon boʻladi.

Xulosa

Tadqiqot natijalari qadimgi turkiy yozma yodgorliklar tarjimasida ekvivalentlikni faqat lugʻaviy yoki shakliy muvofiqlik doirasida belgilash yetarli emasligini koʻrsatdi. “Qutadgʻu bilig” va “Devonu lugʻat-it turk” singari tarixiy manbalarda til birliklari muayyan davrning semantik tizimi, kommunikativ muhiti va madaniy tafakkuri bilan uzviy bogʻlanganligi sababli ularni zamonaviy tillarda qayta ifodalash interpretativ rekonstruksiyani talab etadi.

Tahlillar asosida qadimgi turkiy matnlar tarjimasida ekvivalentlikning formal, semantik, pragmatik va lingvomadaniy qatlamlari oʻzaro bogʻliq holda amal qilishi aniqlandi. “Qut”, “törü”, “el”, “alp” kabi birliklar misolida bitta zamonaviy lugʻaviy muqobil tarixiy birlikning barcha mazmun qatlamlarini toʻliq qamrab olmasligi kuzatildi. Shu bois tarjimada tarixiy shaklni saqlash bilan birga, konseptual mazmun, kommunikativ vazifa va madaniy kodni imkon qadar qayta tiklash zarur.

Mazkur natijalar asosida qadimgi turkiy yozma yodgorliklar tarjimasida kompleks interpretativ ekvivalentlik tamoyilidan foydalanish maqsadga muvofiq deb hisoblanadi. Ushbu yondashuv ekvivalentlikning alohida turini mutlaqlashtirmasdan, tarixiy matnning formal, semantik, pragmatik va lingvomadaniy qatlamlarini muvozanatli rekonstruksiya qilishga asoslanadi. Natijada qadimgi turkiy matn tarjimasi oddiy til almashtirish jarayoni sifatida emas, balki tarixiy mazmun va madaniy kodni zamonaviy idrok maydonida qayta tiklashga qaratilgan koʻp qatlamli interpretativ faoliyat sifatida namoyon boʻladi.

O‘ZBEK XALQ DOSTONLARIDA PAREMIOLOGIK BIRLIKLARNING DIDAKTIK-PRAGMATIK VA KOMMUNIKATIV XOSLANISHLARI

Xolmuradova Jamila Irmetovna
Toshkent amaliy fanlar universiteti dotsenti
E-mail: jamilaxalmuratova66@gmail.com

Annotatsiya: *Mazkur maqolada o‘zbek xalq dostonlarida maqol va matallarning didaktik-pragmatik xususiyatlari tahlil qilinadi. Paremiologik birliklarning nutqiy vaziyatni boshqarish, axloqiy yo‘naltirish, ogohlantirish va murosaga chaqirishdagi roli yoritiladi. Ularning bilvosita ta’sir mexanizmi orqali tinglovchiga samarali yetkazilishi asoslab beriladi.*

Kalit so‘zlar: *paremiologik birliklar, maqol va matallar, doston nutqi, pragmatika, didaktika, nutqiy vaziyat, kommunikativ strategiya.*

ДИДАКТИКО-ПРАГМАТИЧЕСКИЕ И КОММУНИКАТИВНЫЕ ОСОБЕННОСТИ ПАРЕМИОЛОГИЧЕСКИХ ЕДИНИЦ В УЗБЕКСКИХ НАРОДНЫХ ДАСТАНАХ

Аннотация: *В статье анализируются дидактико-прагматические особенности пословиц и поговорок в узбекских народных дастанах. Рассматривается их роль в управлении речевой ситуацией, нравственном воздействии, предупреждении и достижении компромисса. Обосновывается эффективность косвенного прагматического воздействия на слушателя.*

Ключевые слова: *паремиологические единицы, пословицы и поговорки, дастан, прагматика, дидактика, речевая ситуация, коммуникативная стратегия.*

DIDACTIC-PRAGMATIC AND COMMUNICATIVE FEATURES OF PAREMIOLOGICAL UNITS IN UZBEK FOLK EPICS

Abstract: *This article examines the didactic and pragmatic features of proverbs and sayings in Uzbek folk epics. It highlights their role in managing speech situations, moral guidance, warning, and promoting compromise. The effectiveness of their indirect pragmatic influence on the audience is also substantiated.*

Keywords: *paremiological units, proverbs and sayings, epic discourse, pragmatics, didactics, speech situation, communicative strategy.*

Kirish

Maqol va matallarning asosiy pragmatik vazifalaridan biri – o‘git berishdir. Dostonlarda o‘git bevosita buyruq yoki nasihat shaklida emas, balki paremiologik birliklar orqali bilvosita yetkaziladi. Bu bilvositalik tinglovchi tomonidan qarshiliksiz qabul qilinishini ta’minlaydi. Tinglovchi maqol yoki matalni shunchaki matn elementi sifatida emas, balki xalq donoligi ifodasi sifatida qabul qiladi. Shu sababli o‘git majburlov sifatida emas, balki tabiiy haqiqat sifatida anglanadi.

Adabiyotlar tahlili

Maqol va matallar (paremiologik birliklar) tilini o‘rganishga bag‘ishlangan tadqiqotlarni bir necha guruhga bo‘lib tahlil qilish mumkin. Birinchidan, *leksik-semantik yo‘nalishdagi tadqiqotlar*da maqol va matallarning ma’no tuzilishi, ko‘p qatlamli semantikasi hamda umumlashtirish xususiyati tahlil qilinadi. Jumladan, X.S.Ro‘zimboyev, A.A.Halikov, I.Umarov, N.Hamdamova, M.Yaqubova, G.Egamberdiyeva, D.Xudayberganova, M.H.Jumaniyazova, A.S.Rahimovlarning ishlarda paremiologik birliklarning obrazli tafakkur mahsuli sifatidagi xususiyati, ularning ko‘chma ma’no hosil qilish mexanizmlari ochib beriladi.

Ikkinchidan, *lingvostilistik va lingvopoetik tadqiqotlar* maqol va matallarning badiiy ifoda vositasi sifatidagi imkoniyatlarini o‘rganishga qaratilgan. Jumladan. A.M.Eshmuratov, Sh.Mamadiyev, X.Q.Toshmatov, G.Jumanazarovalarning tadqiqotlarida ularning obrazlilik, ekspressivlik, ritmik tuzilish kabi xususiyatlari yoritilib, nutqdagi estetik ta’siri asoslab beriladi.

Uchinchidan, *pragmatik va kommunikativ yo‘nalishdagi izlanishlar*da maqol va matallarning nutqiy vaziyatni boshqarishdagi roli tahlil qilinadi. D.A.Ashurov, N.Sobirova, O.Sultanova, Y.N.Xodjiyevlarning tadqiqotlarida ularning

bilvosita ta’sir ko‘rsatish, o‘git berish, ogohlantirish, ishontirish hamda murosaga chaqirish funksiyalari asosiy tadqiq obyekti sifatida qaraladi.

Tadqiqot metodologiyasi

Tadqiqot zamonaviy lingvistikaning pragmatika, diskurs tahlili, lingvokulturologiya, paremiologiya va kognitiv tilshunoslik yo‘nalishlariga tayanadi. Kompleks metodologik yondashuv doston matnini ko‘p qatlamli kommunikativ tizim sifatida tahlil qilish imkonini berdi.

Natijalar va ularning tahlili

Doston kontekstida maqol va matallar ko‘pincha qahramonlarning nutqida ishlatiladi. Bu holat o‘gitning qahramon shaxsi orqali legitimlashtirilishiga xizmat qiladi. Agar maqol ijobiy qahramon nutqida qo‘llansa, uning didaktik ta’siri yanada kuchayadi. Tinglovchi bunday qahramonni axloqiy namuna sifatida qabul qiladi va uning nutqidagi paremiologik birliklar orqali berilgan o‘gitni ichki me’yor sifatida singdiradi. Masalan, *“Begunoh xalqni qonini bekorga to‘kmaklik gunoh bo‘lur”* kabi birliklar juda ko‘p uchraydi[1].

Maqol va matallarning didaktik vazifasi ko‘pincha xulosa chiqarish mexanizmi orqali amalga oshadi. Doston syujeti davomida voqealar rivojlanadi, konfliktlar yuzaga keladi va ma’lum bir nuqtada maqol yoki matal keltiriladi. Bu paremiologik birlik voqealarning mantiqiy yakuni sifatida xizmat qiladi. Tinglovchi voqeani baholashda aynan shu birlikka tayangan holda xulosa chiqaradi. Natijada xulosa muallif tomonidan ochiq aytilmagan bo‘lsa ham, tinglovchi ongida aniq shakllanadi.

Xulosa chiqarishga yo‘naltirilgan maqol va matallar individual hodisani umumlashtiradi va uni universal axloqiy qoida darajasiga ko‘taradi. Bu jarayonda paremiologik birliklar voqea va tinglovchi o‘rtasida vositachi vazifasini bajaradi. Tinglovchi doston voqealarini real hayot bilan qiyoslash imkoniga ega bo‘ladi.

Dostonlarda maqol va matallar ko‘pincha dramatik vaziyatlarda qo‘llanadi. Bunday vaziyatlarda paremiologik birliklar voqealarning hissiy fonini tartibga soladi. Ular tinglovchining hissiy reaksiyasini barqarorlashtiradi va voqeani axloqiy baholashga yo‘naltiradi. Natijada tinglovchi faqat hayajonlanib qolmaydi, balki voqeadan ma’no chiqaradi.

Didaktik-pragmatik jihatdan qaralganda, maqol va matallar doston nutqida vaqt va makon chegaralarini yo‘qotadi. Ular o‘tmish voqealarini hozirgi tinglovchi uchun dolzarb qiladi. Tinglovchi o‘z hayotiy tajribasini doston voqealari bilan qiyoslab, paremiologik birlik orqali o‘z xatti-harakatlarini baholaydi. Bu holat maqol va matallarning tarbiyaviy kuchini yanada oshiradi.

Maqol va matallar yordamida doston nutqida muallif pozitsiyasi bilvosita ifodalanadi. Muallif yoki ijrochi o‘z axloqiy qarashlarini ochiq bayon qilmasdan, paremiologik birliklar orqali tinglovchini ma’lum yo‘nalishga yetaklaydi. Bu esa doston nutqining pragmatik samaradorligini oshiradi va uni majburlovdan holi qiladi.

Paremiologik birliklarning didaktik vazifasi ularning qisqa, lo‘nda va obrazli shakli bilan ham izohlanadi. Qisqa shakl tinglovchi xotirasida oson saqlanadi, obrazlilik esa hissiy ta’sirni kuchaytiradi. Shu bois maqol va matallar doston nutqida uzoq muddatli axloqiy ta’sir ko‘rsatish imkoniyatiga ega. *“Do‘stlar yig‘lab, dushman kuldi”, “Do‘stlaring shod bo‘lib, dushman kulmasin”, “Qizil gulni do‘st bilib, bulbul ishi fig‘ondir”*maqollar xalq hayotining yorqin namunasidir[2].

Dostonlarda maqol va matallar orqali shakllangan axloqiy yo‘naltirish avloddan avlodga uzatiladi. Har bir yangi ijroda paremiologik birliklar yangicha kontekstda yangicha talqin qilinadi, ammo ularning asosiy didaktik yadrosi saqlanib qoladi. Bu holat doston paremiologiyasining barqarorligi va ta’sirchanligini ta’minlaydi.

Maqol va matallarning didaktik-pragmatik vazifalari doston nutqini oddiy badiiy hikoyadan farqlab, uni axloqiy-ijtimoiy ongni shakllantiruvchi kuchli kommunikativ tizimga aylantiradi. Aynan shu birliklar orqali dostonlar xalq hayotida nafaqat estetik, balki tarbiyaviy ahamiyat kasb etib kelmoqda.

O‘zbek xalq dostonlari tilida paremiologik birliklar nutqiy vaziyatni boshqaruvchi muhim pragmatik vositalar sifatida namoyon bo‘ladi. Maqol va matallar doston matnida shunchaki umumiy donolik ifodasi bo‘lib qolmay, balki muomala jarayonini yo‘naltiruvchi, nutq ishtirokchilari o‘rtasidagi munosabatlarni tartibga soluvchi va kommunikativ strategiyalarni belgilovchi birliklar sifatida faoliyat yuritadi. Shu bois paremiologik birliklarning pragmatik imkoniyatlarini nutqiy vaziyatni boshqarish nuqtayi nazaridan tahlil qilish doston tilining kommunikativ mexanizmlarini ochib berishda muhim ahamiyat kasb etadi.

Nutqiy vaziyatni boshqarishda paremiologik birliklarning eng asosiy vazifalaridan biri – muomala strategiyasini belgilashdir. Dostonlarda maqol va matallar ko‘pincha dialog yoki monologning muhim burilish nuqtalarida ishlatiladi. Bunday paytda paremiologik birlik suhbatning keyingi yo‘nalishini belgilab beradi: keskinlik kuchayadimi yoki yumshaydimi, qarama-qarshilik chuqurlashadimi yoki murosa sari yo‘naladimi – bularning barchasi paremiologik birlik orqali berilgan signalga bog‘liq bo‘ladi[3].

Muomala strategiyasi sifatida qo‘llangan paremiologik birliklar nutq ishtirokchilariga o‘zaro munosabatning maqbul shaklini ko‘rsatadi. Masalan, keskin vaziyatda keltirilgan maqol suhbatni to‘xtatish, ohangni pasaytirish yoki qarama-qarshilikni boshqa yo‘nalishga burish vazifasini bajaradi. Bu holatda paremiologik birlik bevosita buyruq

bermaydi, balki umumiy hayotiy tajribaga tayangan holda muomala me'yorini eslatadi.*"Sabr –vaqtixushlikning kalitidir"* maqoli har zamon uchun muhim va zaruratdir.

Doston matnida murosaga chaqirish paremiologik birliklarning muhim pragmatik vazifalaridan biri hisoblanadi. Konfliktli vaziyatlarda maqol va matallar orqali tomonlar keskin qarama-qarshilikdan qaytariladi, muvozanat va kelishuv g'oyasi ilgari suriladi. Bunday paremiologik birliklar tinglovchiga ham, qahramonlarga ham bir vaqtning o'zida ta'sir ko'rsatadi. Tinglovchi bunday vaziyatda mojaroni axloqiy mezonlar asosida baholashga undaladi[4].

Ogohlantirish paremiologik birliklarning yana bir muhim pragmatik vazifasi hisoblanadi. Dostonlarda maqol va matallar orqali qahramonlar ehtimoliy xatolardan, noto'g'ri qarorlardan yoki xavfli xatti-harakatlardan ogohlantiriladi. Bu ogohlantirish bevosita tahdid yoki buyruq shaklida emas, balki umumlashtirilgan hayotiy tajriba shaklida etkaziladi. Natijada tinglovchi ogohlantirishni rad etmaydi, balki uni jiddiy qabul qiladi. Masalan, dostonda *"Va'daga vafo"(*121-bet), *"Tuz egan joyingga xiyonat qilma"*(158-bet), kabi maqollar borki, u kishilarni xavfli xatti-harakatlardan ogohlantiriladi[1].

Nutqiy vaziyatni boshqarishda paremiologik birliklar dialogik jarayonda alohida rol o'ynaydi. Ular suhbat ishtirokchilari o'rtasidagi kuch muvozanatini tartibga soladi. Ba'zan maqol keltirgan qahramon ma'naviy ustunlikka erishadi, chunki u o'z fikrini shaxsiy mulohaza emas, balki umumiy donolik darajasiga ko'taradi. Bu esa boshqa ishtirokchilarni murosaga yoki sukutga majbur qiladi. Masalan, *"Aytuvchi ahmoq bo'lsa, tinglovchi dono bo'lishi kerak"* maqoli shu mavzuga mos keladi[2].Paremiologik birliklarning nutqiy vaziyatni boshqarishdagi roli ularning bilvosita ta'sir mexanizmi bilan chambarchas bog'liq. "Maqol va matallar ochiq bahsga kirishmaydi, balki bahsni chetlab o'tib, umumiy xulosaga yetaklaydi. Shu sababli ular konfliktni yumshatish va kommunikativ muvozanatni tiklashda samarali vosita bo'lib xizmat qiladi" [3].

Paremiologik birliklarning murosaga chaqirish va ogohlantirish funksiyalari dostonlarning tarbiyaviy ahamiyatini kuchaytiradi. Tinglovchi doston voqealarini kuzatar ekan, real hayotdagi muomala vaziyatlarida qanday yo'l tutish kerakligi haqida bilvosita bilim oladi. Bu bilim majburlov orqali emas, balki nutqiy vaziyatni boshqaruvchi paremiologik birliklar orqali singdiriladi.

Dostonlarda paremiologik birliklar yordamida boshqarilgan nutqiy vaziyatlar ko'pincha muvozanatli yakun topadi. Bu yakun ochiq xulosa sifatida emas, balki tinglovchi ongida shakllangan ichki xulosa tarzida namoyon bo'ladi. Paremiologik birliklar aynan shu ichki xulosani yuzaga chiqaruvchi pragmatik mexanizm vazifasini bajaradi. Dostonda *"Odam borki holi emas xatodan"*, *"Bu dunyoda har kim armonni chekar"*, *"Bulbulni maskani bog'."*[3].

Paremiologik birliklarning nutqiy vaziyatni boshqarishdagi roli ularning uzoq vaqt davomida faol qo'llanib kelishining asosiy sabablaridan biridir. Ular doston nutqini faqat estetik hodisa emas, balki murakkab kommunikativ tizimga aylantiradi. Tinglovchi bunday nutq orqali nafaqat voqealarni, balki muomala madaniyatini ham o'zlashtiradi.

Doston paremiologiyasida an'anaviy bilim markaziy o'rin egallaydi. Maqol va matallar orqali xalqning hayotiy tajribasi, ijtimoiy munosabatlar haqidagi qarashlari, axloqiy mezonlari va amaliy donoligi kodlangan bo'ladi. Ushbu bilimlar tizimi doston matnida tayyor xulosa shaklida namoyon bo'ladi va tinglovchidan murakkab tahlil talab qilmaydi. Bu holat paremiologik birliklarning pragmatik samaradorligini oshiradi, chunki ular tez va oson qabul qilinadi.

Xulosa

Doston paremiologiyasida kollektiv ong va pragmatik ta'sir bir-birini to'ldiruvchi tizimni tashkil etadi. An'anaviy bilim xalqona mantiq orqali ifodalanadi, xalqona mantiq esa auditoriyani ishontirishga xizmat qiladi. Ushbu mexanizm doston nutqini shunchaki badiiy matn emas, balki jamiyat ongini shakllantiruvchi kuchli kommunikativ vositaga aylantiradi.

CHARLZ DIKKENS ROMANLARI SYUJET ASOSI SIFATIDA YAXSHILIK VA YOMONLIK O‘RTASIDAGI BADIIY ZIDDIYAT

Jalalova Nodira Nosirjon qizi
tayanch doktorant
Is’hoqxon Ibrat nomidagi Namangan davlat chet tillari instituti
E-mail: jalalovanodira3@gmail.com
ORCID ID: 0003-0001-4946-2121

Annotatsiya: *Ushbu maqolada Charlz Dikkens romanlarida yaxshilik va yomonlik o‘rtasidagi badiiy ziddiyatning syujet hosil qiluvchi tamoyil sifatidagi o‘rni tahlil qilinadi. Tadqiqotda axloqiy konfliktning personajlar, syujet, badiiy makon hamda til va uslub darajalarida namoyon bo‘lishi ko‘rib chiqiladi. Yozuvchining “Oliver Tvist”, “Dombi va o‘g‘li”, “Devid Kopperfild”, “Sovuq uy”, “Og‘ir zamonlar”, “Kichkina Dorrit”, “Katta umidlar” va “Bizning umumiy do‘stimiz” asarlari misolida axloqiy konsepsiyaning evolyutsiyasi kuzatiladi. Tahlil natijasida Dikkens ijodida yomonlikning institutsionallashuvi hamda ezgulikning berilgan holatdan erishiladigan qadriyatga aylanib borish jarayoni aniqlanadi.*

Kalit so‘zlar: *Charlz Dikkens, axloqiy konflikt, ezgulik va yovuzlik, viktorian romani, badiiy makon, personajlar tipologiyasi, institutsional yovuzlik, syujet tuzilishi.*

ХУДОЖЕСТВЕННЫЙ КОНФЛИКТ МЕЖДУ ДОБРОМ И ЗЛОМ КАК ОСНОВА СЮЖЕТА РОМАНОВ ЧАРЛЬЗА ДИККЕНСА

Аннотация: *В статье анализируется роль художественного конфликта добра и зла как сюжетообразующего принципа в романах Чарльза Диккенса. Рассматривается, как нравственный конфликт проявляется на уровне персонажей, сюжета, художественного пространства, а также языка и стиля. На материале романов «Оливер Твист», «Домби и сын», «Дэвид Копперфилд», «Холодный дом», «Тяжёлые времена», «Крошка Доррит», «Большие надежды» и «Наш общий друг» прослеживается эволюция нравственной концепции писателя. В результате анализа выявляется процесс институционализации зла и превращения добра из данности в достигаемую ценность.*

Ключевые слова: *Чарльз Диккенс, нравственный конфликт, добро и зло, викторианский роман, художественное пространство, типология персонажей, институциональное зло, структура сюжета.*

THE ARTISTIC CONFLICT BETWEEN GOOD AND EVIL AS THE BASIS OF THE PLOT IN CHARLES DICKENS’S NOVELS

Abstract: *The article analyses the role of the artistic conflict between good and evil as a plot-forming principle in the novels of Charles Dickens. It examines how the moral conflict manifests itself at the levels of characters, plot, artistic space, as well as language and style. Drawing on the novels “Oliver Twist”, “Dombey and Son”, “David Copperfield”, “Bleak House”, “Hard Times”, “Little Dorrit”, “Great Expectations” and “Our Mutual Friend”, the study traces the evolution of the writer’s moral conception. The analysis reveals the process of the institutionalisation of evil and the transformation of goodness from a given state into an attainable value.*

Keywords: *Charles Dickens, moral conflict, good and evil, Victorian novel, artistic space, character typology, institutional evil, plot structure.*

KIRISH

Charlz Dikkens ijodi jahon adabiyoti tarixida ezgulik va yovuzlik tabiatini eng izchil hamda keng ko‘lamda badiiy tadqiq etgan hodisalardan biridir. Yozuvchining deyarli barcha yirik romanlari markaziy axloqiy konfliktsiz tasavvur etilmaydi: aynan shu konflikt syujetni tashkil qiladi, personajlar tizimini belgilaydi va bayonning g‘oyaviy yo‘nalishini shakllantiradi. Biroq Dikkens uchun mazkur konflikt hech qachon shunchaki badiiy usul yoki janriy shartlilik bo‘lib qolmaydi: u yozuvchining chuqur dunyoqarashiga, inson tabiati, jamiyat va tarix haqidagi qarashlariga asoslangan.

Tadqiqotchilar allaqachon Dikkens badiiy olamining ushbu xususiyatiga e'tibor qaratganlar. Dikkensning ilk biografi Jon Forster yozuvchining butun hayoti haqiqatni yolg'onga, adolatni adolatsizlikka, rahm-shafqatni esa bag'ritoshlikka qarshi izlashdan iborat bo'lganini va bu izlanish uning har bir romanida o'z ifodasini topganini ta'kidlagan. Keyingi tadqiqotchilar esa bu kuzatuvni yanada aniqlashtirib, Dikkens ijodida ezgulik va yovuzlik konflikti bir vaqtning o'zida ham shaxsiy, ham ijtimoiy, ham individual, ham tizimli xarakter kasb etishini, aynan shu ikkiyoqlama o'lchovda uning badiiy va g'oyaviy tuganmasligi mujassam ekanini qayd etganlar.

Tadqiqotning maqsadi mazkur ko'p qatlamli konfliktning Dikkens romanlari syujetini qay tarzda tashkil etishini, uning yozuvchi ijodiy yo'li davomida qanday o'zgarib borishini hamda viktorian madaniyati va jahon adabiy an'anasi kontekstidagi g'oyaviy mazmunini aniqlashdan iborat. Tadqiqotda qiyosiy-tipologik, struktur-semiotik va madaniy-tarixiy tahlil usullaridan foydalanildi.

Dikkens ijodidagi axloqiy konfliktning o'ziga xosligini tushunish uchun bir necha muhim kontekstlarni hisobga olish zarur. Avvalo, tarixiy kontekst: Dikkens shiddatli industrializatsiya, ijtimoiy tabaqalanish va an'anaviy qadriyatlar inqirozi davrida ijod qilgan; uning romanlari eski xristian jamiyati etikasi yangi burjua utilitarizmi axloqi bilan to'qnash kelgan lahzani aks ettiradi. Biografik kontekst ham muhim: bolalikdagi qashshoqlik va etik fabrikasidagi majburiy mehnat tajribasi yozuvchi shaxsiyati hamda ijodida o'chmas iz qoldirgan, unda ijtimoiy yovuzlik ko'rinishlariga nisbatan barqaror sezgirlikni shakllantirgan. Nihoyat, adabiy kontekst: Dikkens XVIII asr axloqiy romani an'anasini (Filding, Richardson) meros qilib olgan, biroq uni tubdan murakkablashtirib, narrativ tarkibiga tizimli ijtimoiy o'lchovni kiritgan.

Strukturaviy jihatdan ezgulik va yovuzlik konflikti Dikkens romanlarida bir vaqtning o'zida bir necha darajada namoyon bo'ladi: personajlar darajasida — ijobiy va salbiy qahramonlarning qarama-qarshi qo'yilishi hamda murakkab "oraliq" obrazlar orqali; syujet darajasida — ezgulikning sinovlarga duchor etilishi va finaldagi yechim orqali; ijtimoiy makon darajasida — ezgulik va yovuzlikni ifodalovchi joylarning zidlanishi orqali; til va uslub darajasida esa — muayyan axloqiy qutb bilan barqaror bog'lanadigan metaforalar va leytmotivlar tizimi orqali.

Adabiyotlar tahlili va metodologiya

"Oliver Tvist": axloqiy absolyutning shakllanishi

"Oliver Tvist" (1837–1839) axloqiy konflikt eng to'g'ridan to'g'ri va ayni paytda eng kuchli emotsional ta'sir bilan ifodalangan asardir. Roman bir-biriga mutlaqo mos kelmaydigan ikki olamning to'qnashuvi asosiga qurilgan: Oliver va uning himoyachilari timsolida gavdalangan ezgulik olami hamda Fedjin to'dasi va Bill Sayks obrazi orqali namoyon bo'lgan yovuzlik olami. Ana shu ikki qutb orasida butun syujet jamiyat tashlab qo'ygan bolaning ruhi va taqdiri uchun kurash sifatida yoyiladi.

Dikkens talqinida Oliver g'oyat muhim bir xususiyat bilan ta'minlangan: uning axloqiyligi orttirilgan emas, balki tug'ma. U eng noqulay tarbiya va eng vayronkor tajribaga qaramay saqlanib qoladi. Hech qanday tashqi sharoitga keltirib bo'lmaydigan ushbu "axloqiy absolyut" konsepsiyasi romanning butun arxitekturasini belgilaydi: yovuzlik hujum qiladi, qurshab oladi, sindirishga urinadi, biroq bolalikdagi begunohlikning mustahkamligi qarshisida muqarrar ravishda chekinadi:

"Bola qo'zg'alib, uyqusida jilmaydi — go'yo bu achinish va mehr belgilari unga hech qachon ko'rib bilmagan muhabbat va mehr haqida xush bir tush ko'rsatgandek..." (Dickens Ch. Oliver Twist. Ch. 30)

Bu parcha romanning markaziy metaforalaridan birini ochib beradi: ezgulik inson tabiatining qandaydir ibtidoiy, daxlsiz holati haqidagi "xotira"dir; yovuzlik esa bu tabiatga tashqaridan yopishadigan, uni deformatsiya qiladigan, biroq butunlay yo'q qilishga qodir bo'lmagan hodisadir. Dikkens insonning azaliy ezguligi haqidagi russochilik g'oyasiga murojaat qiladi, biroq Russodan farqli o'laroq, jamiyatni mutlaq yovuzlik manbai deb hisoblamaydi: uning tanqidi muayyan institutlar — kambag'allar uyi, sud, qamoqxona, jinoyat olamiga qaratilgan.

Yovuzlik timsoli sifatidagi Fedjin jahon adabiyotidagi eng murakkab salbiy qahramonlardan biridir. Funksional antagonist bo'la turib, u o'limga mahkumlik kamerasidagi so'nggi tunida yetuk Dikkensga xos ambivalentlikni namoyon etadi: yovuz qahramon eng oliy dahshat lahzasida yovuzlik funksiyasi bo'lishdan to'xtaydi va o'lim qarshisida turgan oddiy qo'rqqan insonga aylanadi. Bill Sayks esa qo'pol, bevosita zo'ravonlikning eng yalang'och timsolidir; Nensining o'ldirilishi roman axloqiy konfliktining kulminatsiyasi sifatida tasvirlanadi, oq ro'mol detali esa jinoyat tomonidan tahqirlangan poklikning axloqiy belgisiga aylanadi.

"Dombi va o'g'li" va "Devid Kopperfild": yovuzlikning burjua xonadoniga kirib borishi

Ushbu asarlarda yovuzlik endi faqat "quyi tabaqalar" va jinoyat olamining xususiyati bo'lib qolmaydi: u burjua xonadoniga ham kirib boradi va rasmiy axloq fazilat deb hisoblaydigan qadriyatlar tizimining o'zida namoyon bo'ladi. Janob Dombi an'anaviy ma'nodagi yovuz qahramon emas — u jinoyat sodir etmaydi, biroq uning yovuzligi pul va ijtimoiy mavqega sig'inishda, insoniy mehrga qodir emasligida, odamlarni, hatto o'z farzandlarini ham vositaga aylantirishida mujassam. Muhim jihat shundaki, finalda Dombi axloqiy o'zgarish yo'lini bosib o'tadi, bu esa Dikkensning hatto toshbag'ir qalbda ham insoniylik uyg'onishi mumkinligiga ishonchini ko'rsatadi.

“Devid Kopperfild”da axloqiy konflikt shaxsning shakllanishi reyestriga koʻchiriladi. Uriya Hipning takrorlanuvchi “kamtarligi” fazilat niqobi ostiga yashiringan yovuzlikni ifodalaydi; bu qaytarish talab qiladigan, alamlarni yigʻib boradigan va oxir-oqibat shafqatsiz shuhratparastlik sifatida namoyon boʻladigan soxta kamtarlikdir. Agnes Uikfild esa, aksincha, sokin, dabdabasiz ezgulikni ifodalaydi. Bu romanda Dikkens yovuzlikni protagonistning oʻz ichki dunyosiga ham joylashtiradi — “qalbning yetilmaganligi” qahramon yengib oʻtishi lozim boʻlgan nomukammallikdir; shu tariqa konflikt tashqi tusdan ichki tusga oʻtadi.

“Sovuq uy” va “Ogʻir zamonlar”: yovuzlikning institutsionallashuvi

“Sovuq uy” (Bleak House) yovuzlik konsepsiyasi mutlaqo yangi oʻlcham kasb etgan asardir: yovuzlik endi alohida shaxslarning xususiyati boʻlib qolmay, institutsionallashadi va jamiyatning oʻz tuzilishida mujassamlashadi. Oʻnlab yillarga choʻzilgan Kansleriya sudi odamlar yaratgan, biroq endilikda ularning irodasidan mustaqil yashayotgan mexanizmlarda yashovchi yovuzlikning metaforasidir. Romanning mashhur kirish qismi uning asosiy axloqiy nuqtai nazarini belgilaydi: yovuzlik istisno emas, balki me’yorning oʻzi, “tizim”dir. Harold Skimpol obrazi esa axloqiy buzilishning eng yuqori koʻrinishini namoyon etadi — bunda inson shunchaki yovuzlik qilmaydi, balki uni ezgulik deb qayta nomlaydi.

Bu olamga Ester Sammerson qarshi turadi — u Dikkens butun ijodi davomida eng izchil himoya qilgan ezgulik turining tashuvchisidir: faol, sokin, mavhum bayonotlarda emas, balki aniq insonlarga gʻamxoʻrlik qilishda namoyon boʻladigan ezgulik. “Ogʻir zamonlar”da esa yovuzlik utilitarizm falsafasi va “fakt” tamoyili bilan aynanlashtiriladi. Tasavvurni, tuygʻuni va oʻyinni inkor etuvchi pedagogik tizimi bilan Gradgrind qadriyatlar tizimi darajasidagi intellektual yovuzlikning timsolidir. Unga sirkchining qizi Sissi Jup — tirik, soʻnmagan tuygʻu timsoli qarshi qoʻyiladi. Roman muhim tezisni namoyon etadi: ezgulik tasavvur bilan, yovuzlik esa uning yoʻqligi bilan bogʻliqdir.

“Katta umidlar”: axloqiy ambivalentlikning choʻqqisi

“Katta umidlar” (1860–1861) ezgulik va yovuzlik konfliktini talqin etishda tub burilishni anglatadi: ezgulik va yovuzlik ilk asarlarga xos nisbiy aniqlikni yoʻqotadi hamda ham jamiyat tuzilishida, ham bosh qahramon qalbida chuqur chatishib ketadi. Pip ezgulikka chin dildan intiladigan, ayni paytda muntazam ravishda yomonlik qiladigan qahramondir; uning “katta umidlari” axloqiy tuzoqqa aylanadi. Miss Xevisham yovuzlik oʻz tashuvchisiga aylantirgan ayol boʻlib, Dikkens uning misolida yovuzlikning zanjir boʻylab tarqalishini — boshdan kechirilgan zoʻravonlik yangi zoʻravonlikni tugʻdirishini koʻrsatadi.

Magvich obrazi esa Dikkensning ilk romanlarida deyarli imkonsiz boʻlgan paradoksni mujassam etadi: jamiyat yovuzlar qatoriga kiritib qoʻygan inson chuqur sadoqat va fidoyilikka qodir boʻlib chiqadi. Shunday qilib, “Katta umidlar”da ezgulik yovuzlik manbaiga aylanishi, yovuzlik esa ezgulikning oʻzgargan shakli boʻlib chiqishi mumkin; aynan ana shu dialektik talqin asarning Dikkens ijodi choʻqqisi deb baholanishiga asos boʻladi.

Natija va muhokama

Badiiy makonning axloqiy semantikasi

Dikkens badiiy olamining eng barqaror tamoyillaridan biri makonni axloqiy ma’no bilan ta’minlashdir. Uning romanlarida joylar hech qachon neytral boʻlmaydi: yovuzlik qutbini London xarobalari, qamoqxonalar, idoralar va sanoat shaharlari (Marshalsi, Kansleriya, Kokstaun) tashkil etadi. Ezgulik qutbi esa, avvalo, shinam, iliq va jonli xonadon bilan bogʻlanadi. Muhim jihat shundaki, yetuk ijodda bu topografiya yemirila boshlaydi: “Bleak House” oʻz nomida mash’um kinoyani saqlaydi, Miss Xevishamning “Satis House” mulki esa toʻkinlik ramzi boʻlishi kerak boʻla turib, muzlab qolgan maqbaraga aylanadi. Makon endi ishonchli axloqiy moʻljal boʻlib qolmaydi.

Personajlar tipologiyasi

Dikkens yaratgan salbiy qahramonlar galereyasida bir necha barqaror tipni ajratish mumkin: toʻgʻridan toʻgʻri harakat qiluvchi yovuz qahramon (Bill Sayks); ezgulik niqobi ostiga yashiringan munofiq yovuz qahramon (Fedjin, Uriya Hip, Skimpol, Peksniff); hamda yovuz tizimga xizmat qiluvchi “tizimli” yovuz qahramon (Volokita vazirligi amaldorlari, Kansleriya sudyalari). Dikkensni ayniqsa munofiqlik qiziqtiradi, chunki uning nazarida bu yovuzlikning eng xavfli shaklidir.

Solih qahramonlar galereyasida ham barqaror tipologiya kuzatiladi: “xonadondagi farishta” (Agnes Uikfild, Ester Sammerson, kichik Dorrit); fazilati hisob-kitobdan xoli boʻlgan “sodda inson” (Jo Gargeri, Tom Pinch); hamda axloqiy qayta tugʻilish yoʻlini bosib oʻtuvchi “tuzalgan gunohkor” (Dombi, Skrudj, Pip). Dastlabki solih qahramonlar oʻz pokligida oʻzgarmas axloqiy absolyutlar boʻlsa, keyingi davr qahramonlari oʻz zaifliklarini yengib oʻtadigan insonlardir; bu esa ularning axloqiy gʻalabasini ancha ishonarli qiladi.

Axloqiy konsepsiyaning diniy-falsafiy asoslari

Dikkensning axloqiy konsepsiyasi xristian an’anasidan oziqlanadi, ammo uni oʻziga xos tarzda sekulyarlashtiradi. Uning dindorligi dogmatik emas, balki axloqiy xarakterga ega edi: u rasmiy cherkovga va diniy munofiqlikka skeptik munosabatda boʻlgan. Agar xristian an’anasi yovuzlikni avvalo gunohda koʻrsa, Dikkens uni eng avvalo ijtimoiy tuzilmalar va tizimda joylashtiradi. Bu muhim siljishni anglatadi: yovuzlikni faqat individual ma’naviy qayta tugʻilish orqali emas,

balki ijtimoiy islohot orqali ham tuzatish mumkin — aynan shu jihat Dikkens romanlarini axloqiy va'zdan ijtimoiy tashxis va islohotga chorlovga aylantiradi.

"Bizning umumiy do'stimiz": axloqiy konfliktlar ensiklopediyasi

"Bizning umumiy do'stimiz" (1864–1865) — Dikkensning yakunlangan so'nggi romani — axloqiy qarama-qarshiliklarning o'ziga xos ensiklopediyasidir. Romanning markaziy ramzi Temza daryosi qadriyatlar ag'darilib ketgan olam timsolidir: axlat boylikka, o'lim esa hayotga olib boradi. Bella Uilfer boylik haqidagi "katta umidlar"dan voz kechib, ezgulikni ongli ravishda tanlaydi — bu Oliverga xos instinktiv ezgulik emas, balki qo'lga kiritilgan, vasvasalarni yengishni talab qiladigan ezgulikdir. Bredli Xedston esa ezgulik va yovuzlik teng kuch bilan kurashadigan inson fojeasini mujassam etadi: uning yovuzligi o'z-o'zicha fazilat bo'lishi mumkin bo'lgan sifatlar — sadoqat, mehnatsevarlik negizidan o'sib chiqadi. Shu tariqa Dikkens yovuzlik insonning fazilatlari bag'ridan ham unib chiqishi mumkinligini ko'rsatadi.

Xulosa

O'tkazilgan tahlil Charlz Dikkens romanlarida ezgulik va yovuzlik konflikti tabiati hamda funksiyasiga doir bir qator xulosalarni shakllantirish imkonini beradi.

Birinchidan, mazkur konflikt shunchaki syujet unsurlaridan biri emas, balki Dikkens narrativining tizim hosil qiluvchi tamoyilidir: yozuvchining barcha asosiy asarlari bir vaqtning o'zida personajlar, syujet, makon va til darajasida namoyon bo'ladigan axloqiy qarama-qarshilik atrofida qurilgan.

Ikkinchidan, Dikkensning axloqiy konflikt haqidagi konsepsiyasi prinsipial evolyutsiyani boshdan kechiradi: dastlabki romanlarda ezgulik va yovuzlik nisbatan aniq chegaralangan va muayyan qahramonlarda personifikatsiya qilingan bo'lsa, yetuklik davri romanlarida yovuzlik institutsionallashadi va anonimlashadi, ezgulik esa berilgan holat emas, balki erishiladigan qadriyatga aylanadi.

Uchinchidan, Dikkensdagi axloqiy konflikt o'zida prinsipial ijtimoiy o'lchovni mujassam etadi: yovuzlik faqat shaxsiy ayb emas, balki adolatsiz qonunlarga, g'ayriinsoniy institutlarga va hukmron qadriyatlar tizimiga ildiz otgan tizimli muammodir.

To'rtinchidan, butun evolyutsiyaga qaramay, Dikkens ijodida barqaror yadro saqlanib qoladi: insonning ezgulikka qodirligiga, axloqiy tuyg'uning yo'q qilib bo'lmasligiga va axloqiy tanlovning pirovard ma'nodorligiga bo'lgan ishonch. Hatto eng qorong'i asarlarida ham Dikkens yovuzlikning mutlaq g'alabasiga yo'l qo'ymaydi.

Nihoyat, Dikkensdagi ezgulik va yovuzlik konflikti aniq tarixiy doira bilan cheklanib qolmay, universal ahamiyat kasb etadi: u inson tabiati, shaxsiy mas'uliyat bilan ijtimoiy sharoitlar o'rtasidagi nisbat hamda hisob-kitob qonunlari asosida qurilgan olamda fazilatning bahosi haqidagi savollarni o'rtaga tashlaydi. Aynan shu universallik Dikkens romanlariga ularning so'nmas badiiy va axloqiy qudratini baxsh etadi.

DIRK GERARTSNING "LEKSIK SEMANTIKA NAZARIYALARI" ASARIDA MA'NONING TA'RIFI VA TASNIFI

Mamatova Dilrabo Maxmudjanovna
dotsent v.b. Namangan davlat universiteti

Annotatsiya: *Mazkur maqolada Dirk Gerartsning "Leksik semantika nazariyalari" asarida leksik ma'noning ta'riflanishi va tasniflanishi masalalari tahlil qilinadi. Tadqiqotda leksik semantikaning rivojlanishi, ma'noni tushuntirishga qaratilgan strukturaviy, komponential va kognitiv yondashuvlar hamda ularning o'zaro farqli jihatlari ko'rib chiqiladi. Shuningdek, leksik ma'noning til tizimidagi semantik munosabatlar, insonning kognitiv tajribasi, kategoriyalash jarayoni va kontekst bilan bog'liqligi yoritiladi.*

Kalit so'zlar: *leksik semantika, leksik ma'no, semantik nazariya, strukturaviy semantika, komponential tahlil, kognitiv semantika, kategoriyalash.*

ОПРЕДЕЛЕНИЕ И КЛАССИФИКАЦИЯ ЗНАЧЕНИЯ В РАБОТЕ ДИРКА ГЕРАРТСА «ТЕОРИИ ЛЕКСИЧЕСКОЙ СЕМАНТИКИ»

Аннотация: *В статье анализируются вопросы определения и классификации лексического значения в работе Дирка Герартса «Теории лексической семантики». Рассматриваются развитие лексической семантики, структурный, компонентный и когнитивный подходы к объяснению значения, а также различия между ними. Освещается также связь лексического значения с семантическими отношениями в системе языка, когнитивным опытом человека, процессом категоризации и контекстом.*

Ключевые слова: *лексическая семантика, лексическое значение, семантическая теория, структурная семантика, компонентный анализ, когнитивная семантика, категоризация.*

THE DEFINITION AND CLASSIFICATION OF MEANING IN DIRK GEERAERTS'S "THEORIES OF LEXICAL SEMANTICS"

Abstract: *The article analyses the issues of defining and classifying lexical meaning in Dirk Geeraerts's "Theories of lexical semantics". It examines the development of lexical semantics, the structural, componential and cognitive approaches to the explanation of meaning, as well as the differences between them. It also discusses the relationship of lexical meaning to semantic relations within the language system, to human cognitive experience, to the process of categorisation and to context.*

Keywords: *lexical semantics, lexical meaning, semantic theory, structural semantics, componential analysis, cognitive semantics, categorisation.*

Kirish

Tilshunoslikda ma'no masalasi eng murakkab va muhim tadqiqot yo'nalishlaridan biri hisoblanadi. Insonning borliqni anglash, uni nomlash va nutq orqali ifodalash jarayonida ma'no asosiy vosita sifatida namoyon bo'ladi. Ayniqsa, so'z va boshqa leksik birliklarning qanday ma'no anglatishi, ma'noning qanday shakllanishi va turli leksik birliklar o'rtasida qanday munosabatlar mavjudligi leksik semantikaning asosiy masalalarini tashkil etadi. Shu sababli leksik ma'noni aniqlash va uni turli mezonlar asosida tasniflash masalasi uzoq yillardan buyon tilshunoslikning dolzarb muammolaridan biri bo'lib kelmoqda.

Zamonaviy leksik semantika taraqqiyotida belgiyalik tilshunos Dirk Gerartsning ilmiy qarashlari alohida ahamiyatga ega. Uning "Leksik semantika nazariyalari" asari leksik ma'no haqidagi turli nazariyalarni izchil ko'rib chiqish, ularning shakllanishi va rivojlanishini ko'rsatish hamda ma'noni tushuntirishga bo'lgan turli yondashuvlarni qiyoslashga qaratilgan muhim tadqiqotlardan biridir. Asarda leksik semantikaning rivojlanish bosqichlari, turli nazariy maktablarning ma'no haqidagi qarashlari, kognitiv semantikaning shakllanishi hamda prototip va polisemiya kabi hodisalarning nazariy talqiniga alohida e'tibor qaratiladi. Mazkur maqolaning maqsadi Dirk Gerartsning "Leksik semantika nazariyalari" asarida leksik ma'noning ta'riflanishi va tasniflanishini tahlil qilish, muallifning asosiy nazariy qarashlarini ochib berish hamda ushbu qarashlarning zamonaviy leksik semantika uchun ahamiyatini aniqlashdan iborat.

Dirk Gerarts konsepsiyasida leksik ma'noning ta'rifi

Leksik ma’noni aniqlash masalasi Dirk Gerartsning “Leksik semantika nazariyalari” asarida markaziy masalalardan biri hisoblanadi. Leksik birlik ma’nosini faqat uning lug‘aviy ta’rifi bilan izohlash ko‘pincha yetarli bo‘lmaydi, chunki so‘zlarning real qo‘llanishi ularning ma’nosi ancha murakkab tuzilishga ega ekanini ko‘rsatadi. Masalan, bir so‘z turli kontekstlarda turlicha ma’no qirralarini yuzaga chiqarishi, boshqa so‘zlar bilan turli munosabatlarga kirishishi va muayyan kategoriyada turlicha darajada markaziy o‘rin egallashi mumkin. Shuning uchun leksik ma’no statik va o‘zgarmas birlikdan ko‘ra, turli omillar ta’sirida namoyon bo‘ladigan murakkab semantik hodisa sifatida qaralishi mumkin.

Gerartsning yondashuvini tavsiflashda uning ma’noni til tizimidan butunlay ajratib qo‘ymasligi bilan birga, uni faqat tizim ichidagi munosabatlarga ham cheklamasligi muhimdir. Leksik ma’no til birliklari o‘rtasidagi munosabatlar bilan bir qatorda, insonning bilimlari, tajribasi va dunyoni kategoriyalash usuli bilan ham bog‘liq. Bu jihat kognitiv semantika uchun ayniqsa muhimdir. Inson ma’lum bir so‘zni ishlatganda, faqat lug‘atda qayd etilgan belgilarni emas, balki ushbu so‘z bilan bog‘liq bo‘lgan kengroq bilim va tasavvurlarni ham faollashtiradi. Shu sababli leksik ma’noni sof lingvistik ma’lumot bilan cheklash har doim ham yetarli natija bermaydi.

Bunday qarash ma’no va ensiklopedik bilim o‘rtasidagi munosabat masalasini ham yuzaga chiqaradi. An’anaviy semantik yondashuvlarda tilga oid bilim bilan dunyo haqidagi umumiy bilimni ajratish imkoniyati mavjud deb qaralishi mumkin. Kognitiv yondashuvlarda esa bu ikki soha o‘rtasidagi chegara ancha murakkab ko‘rinadi. So‘z ma’nosini tushunish ko‘pincha ushbu so‘z anglatadigan obyekt, hodisa yoki jarayon haqidagi umumiy bilimni ham talab qiladi. Shu sababli leksik ma’no insonning umumiy konseptual tizimidan butunlay ajratilgan mustaqil birlik sifatida qaralmasligi kerak.

Gerartsning ma’no haqidagi qarashlarida kategoriyalash masalasi ham muhim o‘rin tutadi. Inson borliqdagi obyekt va hodisalarni ma’lum kategoriyalarga ajratadi va til ushbu kategoriyalash jarayonini ifodalash vositalaridan biri hisoblanadi. Biroq real hayotdagi kategoriyalar har doim ham qat’iy chegaralarga ega emas. Kategoriyaning ayrim a’zolari uning eng tipik vakili sifatida qabul qilinsa, boshqa a’zolar kategoriyaga nisbatan kamroq tipik bo‘lishi mumkin. Masalan, qushlar kategoriyasida ayrim qushlar inson ongida “qush” tushunchasining odatiy namunasi sifatida tezroq namoyon bo‘lishi mumkin, boshqalari esa mazkur kategoriyaga mansub bo‘lsa-da, kamroq tipik hisoblanadi. Bu holat leksik ma’noni qat’iy zaruriy va yetarli belgilar asosida tasniflashning har doim ham samarali emasligini ko‘rsatadi.

Gerartsning qarashlari ayniqsa polisemiya hodisasini tushuntirishda mazkur masalalar bilan chambarchas bog‘lanadi. Bir leksik birlikning bir nechta ma’noga ega bo‘lishi doimo bir-biridan butunlay ajralgan ma’nolar mavjudligini anglatmaydi. Aksincha, turli ma’no variantlari o‘rtasida ma’lum darajadagi semantik bog‘liqlik mavjud bo‘lishi mumkin. Bir ma’no markaziyroq, boshqalari esa undan kelib chiqqan yoki u bilan bog‘langan periferik ma’no sifatida namoyon bo‘lishi mumkin. Bunday qarash polisemiya va monosemiya o‘rtasidagi chegarani yanada murakkablashtiradi, biroq ayni vaqtda real tildagi ma’no o‘zgarishlari va semantik kengayishlarni yaxshiroq tushuntirish imkonini beradi.

Leksik ma’noning tasnifi

An’anaviy semantik qarashlarda ma’noni tashkil etuvchi belgilarni aniqlash va ular asosida leksik birliklarni muayyan guruhlarga ajratish muhim hisoblangan. Bunday yondashuvda kategoriyaga mansub bo‘lgan birliklar umumiy va zaruriy xususiyatlarga ega bo‘lishi kerak. Masalan, ma’lum bir semantik kategoriyaga kiruvchi birliklarning barchasi uni boshqa kategoriyalardan ajratib turadigan umumiy belgilarga ega bo‘lishi kutiladi. Bu usul ma’noni tizimli ravishda tavsiflash uchun qulay bo‘lsa-da, tabiiy tildagi ko‘plab kategoriyalar bunday qat’iy chegaralarga ega emasligini ko‘rsatadigan holatlar mavjud. Ayrim birliklar ma’lum kategoriyaga juda yaqin bo‘lsa, boshqalari unga nisbatan faqat ayrim umumiy belgilar asosida mansub bo‘lishi mumkin.

Gerartsning kognitiv yo‘nalishga yaqin qarashlarida ma’no va kategoriyalarni markaz va periferiyaga ega tuzilma sifatida ko‘rish muhim ahamiyat kasb etadi. Bunda kategoriyaning barcha a’zolari teng maqomga ega emas. Kategoriyaning ayrim vakillari uning eng tipik namunalari sifatida qabul qilinadi, boshqalari esa periferik mavqega ega bo‘ladi. Natijada kategoriyaga mansublik faqat “mansub” yoki “mansub emas” shaklidagi qat’iy qarama-qarshilik orqali emas, balki tipiklik darajasi orqali ham tushuntiriladi. Bu holat leksik ma’noni tasniflashda an’anaviy yondashuvlardan sezilarli farqni yuzaga keltiradi.

Xulosa

Xulosa qilib aytganda, Dirk Gerartsning “Leksik semantika nazariyalari” asari leksik ma’noning tabiati, tuzilishi va tasnifi bilan bog‘liq nazariy masalalarni keng yoritadigan muhim tadqiqotlardan biridir. Asarni tahlil qilish shuni ko‘rsatadiki, leksik ma’noni yagona va qat’iy ta’rif bilan chegaralash qiyin. Ma’no til tizimidagi semantik munosabatlar, insonning kognitiv tajribasi, kategoriyalash jarayoni va real nutqdagi qo‘llanish bilan chambarchas bog‘liq bo‘lgan murakkab hodisa sifatida namoyon bo‘ladi.

Umuman, Dirk Gerartsning “Leksik semantika nazariyalari” asari leksik ma’noni tushunishda muhim nazariy manba bo‘lib, uning ahamiyati bugungi kunda ham saqlanib qolmoqda. Asar leksik ma’noni faqat lug‘aviy ta’riflar orqali emas, balki semantik munosabatlar, kognitiv tajriba, prototipiklik, polisemiya va kontekst bilan bog‘liq holda o‘rganish

zarurligini koʻrsatadi. Shu sababli Gerartsning qarashlari zamonaviy leksik semantika, kognitiv tilshunoslik, leksikografiya, tarjimashunoslik va korpus tadqiqotlari uchun samarali nazariy asos boʻlib xizmat qilishi mumkin.

ERKIN A’ZAM ASARLARIDA GENDER STEREOTIPLARINING IFODALANISHI (“PIYODA” HIKOYASI MISOLIDA)

Shamshiyeva Diyora Isroilovna
Namangan davlat universiteti tayanch doktoranti
E-mail: diyorashamshiyeva5@gmail.com
ORCID: 0009-0004-8440-4308

Annotatsiya: *Mazkur maqolada Erkin A’zamning “Piyoda” hikoyasi misolida madaniy gender stereotiplarining badiiy ifodalanishi tahlil qilinadi. Asarda erkak obrazlar va ayol obrazlar orqali jamiyatda hukm surib kelayotgan an’anaviy qarashlar, kundalik va oilaviy munosabatlar hamda o‘zbekona tasavvurlar bilan bog‘liq gender tasavvurlar ochib berilgan. Ayniqsa, Berdiboy obrazi orqali erkaklarga xos deb qaraladigan ijtimoiy mas’uliyat va xarakter yorqin tasvirlanadi. Tadqiqot davomida gender mazmunini yuzaga chiqaruvchi nutqiy birliklar orqali jamiyatdagi genderga oid qarashlar madaniy jihatdan tahlil qilinadi. Bu orqali qahramonlarning o‘zaro munosabati va muallif tasvir usullariga ham e’tibor qaratildi. Badiiy tahlillar natijasida gender stereotiplari bevosita ijtimoiy-madaniy qarashlar bilan bog‘liq holda aks ettirilganligi aniqlandi.*

Kalit so‘zlar: *gender stereotiplari, madaniy stereotiplar, genderga oid nutqiy birliklar, badiiy matn, qahramon xarakteri, badiiy tahlil, ijtimoiy qarashlar, stereotip va g‘urur ziddiyati.*

ВЫРАЖЕНИЕ ГЕНДЕРНЫХ СТЕРЕОТИПОВ В ПРОИЗВЕДЕНИЯХ ЭРКИНА АЪЗАМА (НА ПРИМЕРЕ РАССКАЗА «ПИЁДА»)

Аннотация: *В данной статье анализируется художественное выражение культурных гендерных стереотипов на примере рассказа Эркина Аъзама «Пиёда». Через мужские и женские образы в произведении раскрываются традиционные представления, бытовые и семейные отношения, а также гендерные взгляды, связанные с узбекским национальным мировоззрением. В частности, через образ Бердибоя ярко изображаются социальная ответственность и черты характера, традиционно приписываемые мужчине. В ходе исследования гендерные представления в обществе анализируются с культурной точки зрения посредством речевых единиц, выражающих гендерное содержание. Также особое внимание уделяется взаимоотношениям персонажей и авторским способам изображения. В результате художественного анализа установлено, что гендерные стереотипы в произведении непосредственно связаны с социально-культурными взглядами общества.*

Ключевые слова: *гендерные стереотипы, культурные стереотипы, гендерно маркированные речевые единицы, художественный текст, характер героя, художественный анализ, социальные взгляды, конфликт стереотипа и гордости.*

THE EXPRESSION OF GENDER STEREOTYPES IN ERKIN A’ZAM’S WORKS (BASED ON THE SHORT STORY “PIYODA”)

Abstract: *This article analyzes the artistic representation of cultural gender stereotypes in Erkin A’zam’s short story “Piyoda.” Through male and female characters, the work reveals traditional views prevailing in society, everyday and family relationships, as well as gender perceptions associated with Uzbek national mentality. In particular, the character of Berdiboy vividly reflects social responsibility and personality traits traditionally attributed to men. During the research, social attitudes toward gender are culturally analyzed through speech units that convey gender-related meanings. Special attention is also paid to the relationships between the characters and the author’s methods of depiction. The literary analysis demonstrates that gender stereotypes in the story are directly connected with socio-cultural perceptions of society.*

Keywords: *gender stereotypes, cultural stereotypes, gender-related speech units, literary text, character portrayal, literary analysis, social views, conflict between stereotype and pride.*

Kirish

Gender stereotiplari —barcha jamiyatlarda mavjud erkaklar va ayollarga xos bo'lgan xususiyatlar, xarakter va xulq andozalari yig'indisidir. Bu qarashlarga ijtimoiy hayotning barcha bosqichlarida duch kelishimiz tabiiy. Gender stereotiplari ham xuddi gender tushunchasidek barcha xalq, millat uchun xos hisoblanadi. Faqat gender individual hodisa, gender stereotiplari esa ijtimoiy tushuncha sanaladi. Ammo har ikkala termin ham "gender lingvistikasi"ning eng muhim tushunchalaridir.

Badiiy matn — xalq ko'zgusi. Ma'lum bir xalqning madaniyati, urf-odati, turmush tarzi, qarashlari va tasavvurlarini bevosita badiiy asarlar orqali bilib olish mumkin. Xususan, o'zbek adabiyotining zabardast vakili Erkin A'zam asarlari o'zbek xalqi hayotini haqqoniy va bezaklarsiz aks ettirishi bilan ajralib turadi. Ayniqsa, adibning "Piyoda" asarida o'zbek madaniyatiga xos bo'lgan gender stereotiplari yaqqol aks ettirilgan. Asarda bosh qahramon Berdiboy madaniy gender stereotiplarining himoyachisi sifatida maydonga chiqadi. Bu obraz orqali "o'zbek erkagi" haqida tasavvur hosil qilish mumkin.

Erkin A'zamning "Piyoda" hikoyasida an'anaviy stereotiplar bilan yangilanayotgan zamon o'rtasidagi tafovutli qarashlar bahsi aks etganiga guvoh bo'lishimiz mumkin. Asarda Berdiboyning ijtimoiy qarashlari, nutqiy vaziyatlar orqali o'zbek milliy madaniyati va ijtimoiy hayotida ayollarni cheklovchi stereotiplar naqadar ko'p ekanligini ko'rishimiz mumkin.

Adabiyotlar tahlili

Yangi asrda gender masalasi o'rganish anchayin jadallashayotgan mavzulardan biriga aylandi. Xususan, tilshunoslikda ham ushbu mavzuning keng o'rganilishi natijasida alohida soha — gender lingvistikasi yuzaga keldi. Gender tilshunosligi — bu jamiyatdagi til xususiyatlarini ijtimoiy jinsga bog'liq holda o'rganuvchi tilshunoslikning bir sohasi. Shuningdek, badiiy asarlarda erkak va ayol obrazlarining yaratilishi, ularning ijtimoiy holati va jamiyatda tutgan o'rni bevosita stereotiplar bilan bog'liq ekanligi mavzuni yanada chuqurroq o'rganish zaruratini yuzaga keltirmoqda. Ijtimoiy stereotiplar haqidagi dastlabki qarashlar XX asr birinchi yarmida U.Lippman tomonidan ilgari surilgan bo'lib, u stereotiplar haqidagi ilmiy qarashlarni insonning tashqi olamni idrok etish jarayoni bilan bog'laydi. Uning fikricha, inson voqelikni kuzatib, keyin ta'riflamaydi, aksincha, madaniyat tomonidan avvaldan shakllantirilgan tasavvurlar asosida idrok etadi[1]. A.V.Kirilina gender stereotiplarini umumiy stereotip hodisasining xususiy ko'rinishi sifatida baholaydi. Olimaning fikricha, "gender stereotiplari —har ikki jins vakillarining sifatlari, atributlari va xulq-atvor me'yorlari haqidagi madaniy hamda ijtimoiy jihatdan shartlangan fikrlar va presuppozitsiyalar hamda ularning tilda aks etishidir"[2]. Demak, stereotip individual qarash emas, balki shaxsning voqelikni baholashiga yo'nalish beruvchi ijtimoiy-madaniy tafakkur andozasidir. Mazkur yondashuv gender stereotiplarini tushuntirishda ham muhim bo'lib, jamiyat erkak va ayolga xos deb qaraladigan xususiyatlarni oldindan belgilab qo'yishini ko'rsatadi.

Hozirgi kunda Erkin A'zam asarlari ham, gender stereotiplari ham keng tadqiq etilayotgan mavzulardandir. Gender va til munosabatlariga oid tadqiqotlarda erkak va ayol nutqidagi farqlar, ijtimoiy rollar va stereotipik qiyofaning tilga ta'siri masalalari yoritilgan. Erkin A'zam ijodi yuzasidan olib borilgan ilmiy izlanishlarda yozuvchining badiiy mahorati O.Shofiyev tomonidan, asarlarining lingvopoetik tahlili Sh.Toshxo'jayeva tomonidan[3] va adib kinoqissalari tilining sotsiopragmatik xususiyatlari M.Xolmurodova tomonidan[4] keng yoritilgan. Ammo "Piyoda" asarida gender stereotiplarining aks etishi alohida tadqiqot obyekti sifatida o'rganilgan emas. Asar bir qarashda eski zamonda qolib ketgan odamning butun bir jamiyatga qarshi namoyishidek tuyuladi. Ammo asarning asl mohiyatini tadqiqotchi Safarali Qurbonov quyidagicha ta'bir qiladi: "… aslida, Berdiboyning asar davomidagi harakatlarini kuzatsak, milliy qadriyatlarning, ajdodlar merosining oyoqosti bo'layotganini ko'rib, nima qilishni bilmayotgan millatning jonkuyarlaridan biri edi"[5]. Genderga oid izlanishlar ham o'zbek tilshunosligida muayyan darajada olib borilayotgan bo'lsa-da, a gender stereotiplarining lisoniy ifodasi hali keng va tizimli o'rganilgan emas. Xususan, 2023-yili A.Ruziyev o'zining "Xususiy diskurslarda gender stereotiplarini farqlovchi nutq birliklari" PhD dissertatsiyasida gender stereotiplarini ifodalovchi nutq birliklarini tadqiq etgan[6]. M.Nazarovaning 2025-yilda tayyorlangan "Gender stereotiplarining lisoniy toifalanishidagi qiyosiy tahlil" nomli PhD dissertatsiyasida esa gender stereotiplarining qoraqalpoq va ingliz tillaridagi lisoniy xususiyatlari qiyosiy aspektda yoritilgan[7]. Mazkur tadqiqotlar sohada muayyan ilmiy natijalarga erishilganini ko'rsatsa-da, gender stereotiplarini o'zbek badiiy matnlari asosida tahlil qilish zarurati saqlanib qolmoqda. Shu nuqtayi nazardan, "Piyoda" hikoyasida gender stereotiplarining badiiy-lisoniy ifodalanishini tadqiq etish maqola mavzusining dolzarbligini belgilaydi.

Tadqiqot metodologiyasi

Ushbu maqolada Erkin A'zamning "Piyoda" asarida aks etgan madaniy gender stereotiplarini aniqlash va tahlil qilishda bir nechta ilmiy metodlardan foydalanildi. Tadqiqot metodologiyasining asosini gender tilshunosligi, lingvokulturologik va lingvopragmatik yondashuvlar tashkil etadi.

Dastlab mavzuni yoritishda kontekstual tahlil metodi orqali asardagi voqealar yoritilgan jamiyat muhiti va qarashlari o'rganib chiqildi. Chunki tadqiqotda umumiy gender stereotiplari emas, aynan madaniy gender stereotiplariga urg'u berilgan. Shuningdek, maqolada gender yondashuv asosida tahlil amalga oshirilgan bo'lib, bu metod yordamida genderga oid an'anaviy stereotiplar, erkaklar va ayollarga xos stereotipik tasavvurlar va madaniy gender me'yorlari hamda

ularning badiiy ifodasi aks ettirilgan. Bundan tashqari, tadqiqotda qiyosiy-tahliliy metod ham qo‘llanilib, asardagi gender stereotiplari o‘zbek xalqining an’anaviy stereotiplari bilan qiyoslab o‘rganildi. Qolaversa, gender stereotiplarining ayollarga va erkaklarga xos jihatlari qiyoslanib tahlilga tortildi. Bu orqali badiiy matn va jamiyatdagi real muhit o‘rtasidagi bog‘liqlik ochib berildi.

Tadqiqot jarayonida hikoyadagi gender mazmunini ifodalovchi tasvirlar qahramonlarning nutqi, xatti-harakati, tashqi ko‘rinishi va oiladagi mavqeyi asosida saralandi. Aniqlangan stereotiplar ayol va erkak obrazlariga yo‘nalganligiga hamda asardagi mazmuniy vazifasiga ko‘ra guruhlashtirildi. Bunda genderga oid qarashlarning faqat bevosita ifodasiga emas, balki qahramonlarning bahosi, munosabati va nutqiy vaziyat orqali anglashiladigan mazmuniga ham e’tibor qaratildi. Natijada tashqi ko‘rinish, xulq-atvor, ta’lim va ijtimoiy faollik, oilaviy-maishiy vazifa, oiladagi mavqe, hissiy-axloqiy me’yor hamda gender me’yoridan chekinish kabi yo‘nalishlar ajratildi.

Natijalar va ularning tahlili

Hikoya qahramonning o‘z singlisi Gulsanamning Toshkentga o‘qishga ketishiga salbiy munosabati bilan boshlangan. Dastlab onasi, so‘ng dadasi va oxiri singlisi bilan bo‘lgan suhbatlarning hech biri uning fikrini zarracha o‘zgartira olmaydi. Uning onasiga aytgan:

“Toshkent deganlari anoyi shahar emas, apa…”[8, 295] gapida ayollarning ojiza ekanligi va ularning doimo himoya ostida bo‘lishi haqidagi stereotip vazminlik bilan ochib berilgan. Onaning:

“Zamonasi ekan, nachora! Mana, men o‘qimay nima bo‘ldim? Kunim —kir yuvish-u non yopish!”[8, 295] gapida an’anaviy gender stereotiplari aks etgan bo‘lib, unda ayollarning asosiy yumushi kundalik maishiy ishlardan iborat ekanligi ochiq aks ettirilgan. Shuningdek, bu gapda ayolning o‘z imkoniyatlarini ro‘yobga chiqara olmaganligi ichki armon sifatida sezilib turadi. Bu orqali yozuvchi gender stereotiplarining ko‘proq ayol hayotiga ta’sir etishini ko‘rsatib bergan.

Otasi bilan bo‘lgan suhbatda ham singlisining ayrim xatti-harakatlariga qarshiligi haqiqiy o‘zbek erkaklariga xos milliy-madaniy gender stereotiplarining yorqin ifodasi hisoblanadi. Xususan,

— Ota, bu Gulsanam… — deb g‘udrandi Berdiboy.

— O‘qishga ketyapti u. Toshkandga, — dedi Parda Qurbon kitobidan ko‘z uzmay. Shoshma, g‘urur bilan aytdimi shu gapni?

— Maylimi? O‘zi boshyalang yurardi…

— Boshyalang? Qachon? Yo‘g‘-e, Berdiboy, unday demang![8, 296]

Ushbu fikrda ayollarning tashqi ko‘rinishi, kiyinishi va yurish-turishi ustidan ham erkaklar nazorati kuchli ekanligi madaniy stereotip sifatida bo‘y ko‘rsatadi. Bunday holatlar asarning boshqa o‘rinlarida ham aniq tasvirlab berilgan:

Mehmonlarni olib ketgani kelsa, hovlida qandaydir qiz yuribdi… Boshyalang, sochi qirqilgan. Egnida yupqagina, piyozning po‘stidan ham yupqa-ye, yengsiz bir ko‘ylak, lozimdan-ku darak yo‘q. Kelinlari shu emish!

O‘zbek madaniy gender stereotiplariga ko‘ra, kelin milliy libosda, atlas ko‘ylak-lozimda, boshida do‘ppi yoki ro‘molda tasavvur etiladi. Shuning uchun Berdiboy bu holatdan anchagina hayratga tushadi va bu hayrati hamda jahlini yashirishni istamaydi. Onasini chetga tortib:

“Apa, ayting, —dedi, —boboydi oldida buytib yurmasin!”

Onasining unga javobi ham yuqoridagi fikrlar qahramonning shaxsiy qarashi emas, balki jamiyatdagi ustuvor qarashlardan biri ekanini tasdiqlaydi:

“Uylama, ulim, boboy qaramaydi.”

O‘zbek madaniy gender stereotiplarida erkaklarning bunday maqomi chetdan qaraganda “gender zo‘ravonligi” sifatida baholanishi mumkin. Ammo o‘zbek madaniyatida bu qarashlarning katta qismi erkakning g‘ururi, oriyati va o‘z chegaralarini himoya qilishi sifatida talqin etiladi.

“Anovi arzanda Muzaffarlari-chi, Muzaffarlari? E Berdiboye, qip-qizil chudaksizda! deydi kulib turib. Xotinini uyga olib kirib och biqiniga solishning, “aka, to‘g‘ri aytasan”, deyishning o‘rniga.”[8, 298]

Ushbu fikrlar orqali o‘zbek oilalarida erkaklar mavqeyi va vakolatlari qanchalik yuqori ekanligini ko‘rishimiz mumkin. Hatto ayrim hollarda erlarning ayoliga qo‘l ko‘tarishi ham zo‘ravonlik emas, oila rahbari sifatida “tartibga, yo‘lga solish” deb baholanadi. Ta’kidlash joizki, bugungi kunda bu holatlar ancha kamayib, bu stereotip anchayin kuchsizlashib bormoqda. Bunga sabab ayollar huquqlari qonun bilan muhofaza etilayotganligidir.

Ayollarning yurish-turishi, xatti-harakatlari, ayniqsa, erkaklarga xos harakat deb baholanadigan velosiped minishi borasidagi stereotiplar Berdiboyning ishqiy tuyg‘ulariga-da salbiy ta’sir etadi. Qizning o‘zboshimcha qiliqlaridan qaytarishga uringan Berdiboy uni o‘z yo‘liga sola olmagach, bu muhabbatdan voz kechadi-qo‘yadi:

“...Qarasa mulla Shodining sochi taqimini o‘padigan, qushdek hurkak, qo‘ydek yuvosh qizi Gulchehra ko‘chaga velosiped minib chiqdi, keyin-eh!

Berdiboyning hayoti o‘shanda buzildi — yettinchi sinfdan beri Gulchehraga oshiq edi! (Qishloqda oyog‘idan chayon chaqib, shahar maktabiga o‘qishga o‘tganidan beri!)[8, 299]

Asarda Erkin A’zam uslubiga xos bo‘lgan kinoyaviylik hikoyaning ta’sirchanlik kuchini oshirgan. Aslida Berdiboy tilidagi piching, kinoyaviylik uning botinida jo‘sh urgan isyon, noroziligining fitratida namoyon bo‘lishidir[9]. U aslida

Gulchehrani jon dilidan sevsa ham, uning muhabbatidan g‘ururi ustun keldi. Chunki o‘zbek madaniyatida “ayol — erkakning g‘ururi” degan stereotip ustuvor sanaladi. Ya’ni o‘zbek erkaklari muhabbatdan kechsalar ham, g‘ururidan aslo voz kechishmaydi. Kechgan erkakka nisbatan jamiyatda salbiy munosabat bildiriladi. Buni quyidagi jumlalar orqali ko‘rishimiz mumkin:

“...Ay, Gulchehra, Gulchehra! Ay, esini yegan qiz! Nega o‘sha sabilni minding? Nega boshingni ochib yurding — tundek qora zulflaringni Berdiboydan o‘zgalar ham ko‘rsin debmi?.. O‘shanda boshginangga ro‘molginangni o‘rab, halimdekkina bo‘lib yursang, o‘sha erkakka chiqargan matahga oyoq oshirib minmasang — zaifalik o‘rningni bilsang, qiz bolaga nomunosib o‘sha makruh gapni og‘zingga olmasang… qo‘ling uzayib, oyoqlaring qisqarib qolarmidi, zolim qiz?! Mana, endi Berdiboydan hol so‘ra!..[8, 300]

Ushbu hikoyada gender stereotiplari mazmunan anglashilibgina qolmaydi, balki gender mazmunini ifodalovchi nutqiy birliklar orqali aniq aks etadi. Buni yuqoridagi fikrlardan ham anglash mumkin. Jamiyatda ayollardan Berdiboy tilidan aytilganidek, *“boshginasiga ro‘molginasini o‘rab, faqat ayollarga xos halimdekkina bo‘lish, erkaklar so‘zidan chiqmaslik, o‘z xohish-istaklarini ko‘ngil qa’riga ko‘mib qo‘yish”* kabilar kutiladi. Velosiped degan matoh ham faqat erkaklar uchun mo‘ljallangan. Shuningdek, “zaifalik o‘rningni bilsang” jumlasi erkaklarning ayollarga nisbatan past nazarda qarashidangina emas, balki ayollarni asrab-avaylashni hayotdagi eng muhim burchi deb qabul qilganligidan dalolat beradi.

Keltirilgan parchadagi gender mazmuni, avvalo, leksik-semantik birliklar orqali shakllangan. *“Ro‘mol”*, *“zaifa”*, *“qiz bola”* so‘zlari ayolning tashqi ko‘rinishi va ijtimoiy maqomiga doir an’anaviy tasavvurlarni faollashtiradi. “Matah” birligining velosipedga nisbatan qo‘llanishi esa predmetning oddiy nomini emas, Berdiboyning unga salbiy munosabatini ham ifodalaydi. Chunki qahramon velosipedni ayol uchun begona va nomunosib buyum sifatida baholaydi. Demak, mazkur birliklar matnda faqat nominativ vazifa bajarmay, ayol va erkakka xos deb belgilangan faoliyat chegaralarini ko‘rsatuvchi baholovchi gender markerlariga aylanadi.

“Boshginang”, *“ro‘molginang”*, *“halimdekkina”* shakllaridagi kichraytirish-erkalash qo‘shimchalari ham alohida pragmatik yuk tashiydi. Ushbu shakllar tashqi jihatdan mehr va yaqinlikni ifodalagandek ko‘rinsa-da, nutqiy vaziyatda ular qahramon istagan *“ideal ayol”* qiyofasini yumshoq ohangda talab qilish vositasi bo‘lib xizmat qiladi. Ayniqsa, *“halimdekkina”* so‘zida belgi darajasining kuchaytirilishi ayoldan muloyimlik, itoatkorlik va ko‘zga tashlanmaslik kutilishini anglatadi. Shunday qilib, subyektiv baho shakllari Berdiboyning hissiy holatini ifodalash bilan birga, gender me’yorini til orqali mustahkamlaydi.

Parchaning sintaktik qurilishi ham qahramonning genderga oid pozitsiyasini ochadi. *“Nega o‘sha sabilni minding?”*, *“Nega boshingni ochib yurding?”*[8, 300] kabi ketma-ket so‘roq gaplar javob olish uchun emas, qizning xatti-harakatini qoralash va unga baho berish uchun qo‘llangan ritorik so‘roqlardir. *“O‘rab yursang”*, *“minmasang”*, *“o‘rningni bilsang”* shakllari shart mayli vositasida ifodalangan bo‘lsa-da, mazmunan buyruq va talabga yaqinlashadi. Bu gaplar ayolning boshini yopishi, belgilangan o‘rnini bilishi va erkaklarga xos deb qaralgan mashg‘ulotdan tiyilishi kerakligi haqidagi presuppozitsiyani yuzaga chiqaradi. Binobarin, stereotip faqat alohida so‘zlarda emas, gapning modal va sintaktik tuzilishida ham voqelanadi.

Mana, endi Berdiboydan hol so‘ra!.. jumlasida Berdiboyning g‘ururi va hissiy kechinmalari o‘rtasida qattiq kurash ketayotganini anglash mumkin. Qahramon qanchalik qiynalmasin, qizning bu qilmishlariga ko‘z yumishni erkaklik sha’nidan ayrilish, o‘z-o‘ziga qarshi chiqish sifatida qabul qiladi.

Berdiboyning singlisini Toshkentda o‘qishini xohlamasligi va hatto:

“Er bo‘lsa shu yerdan ham topilar edi…”[8, 296] fikri orqali ayollarning jamiyatdagi o‘rni, qizlarning ta’lim olishiga munosabat va ularning oiladagi mavqeyi bilan bog‘liq stereotipik qarashlar yaqqol ko‘zga tashlanadi. Qolaversa, yuqoridagi fikrda qiz bolaning asosiy vazifasi ta’lim olish, kasb egallash orqali jamiyatda o‘z o‘rniga ega bo‘lish emas, balki oilaviy hayot hamda uy yumushlariga tayyor va ega bo‘lishdangina iboratligi uqtirilgan. Uning nazarida ideal qiz— itoatkor, uyatchan va an’anaviy me’yorlarga bo‘ysunuvchi qizdir. Shuning uchun Berdiboy qizlarning velosiped minishi, erkin yurishi, ro‘mol o‘ramasligi yoki shaharda o‘qishini “buzilish” sifatida qabul qiladi. Shunda ham qahramon bor aybni butunlay ayollarga ag‘darib qo‘ymaydi. Bu hodisalarning asl aybdori Rajab bodi deb biladi:

Toshkentdan shunday bir antiqa tomosha topib keldiki, kuy-qo‘shiqdan tashqari shappotdek joyidan kino ham ko‘rsatar ekan. Qo‘ni-qo‘shni, mahalla-ko‘y oqshomlari bodining ayvonini to‘ldirib tekin kino ko‘rgani to‘planardi. Keyin bunaqa matah ko‘paydi, rasmga kirdi.[8, 298] Ushbu jumlada jamiyat hayotida yangiliklarning o‘rni va bu jarayonga jamiyat taqlidi yaqqol ko‘rsatib berilgan. *Keyin… qiz-juvonlar hayo atalmish dahmazaga qo‘l siltab, ko‘chada ishvakorona qadam tashlaydigan bo‘lishdi* (bu qismda ayollar uchun asosiy me’yor sifatida hayo, andisha va kamtarlik kabi xususiyatlar belgilangan, jamiyat qatori muallif ham ayol-qizlarning bu chegaradan chiqishini salbiy baholaydi. O‘zbek madaniy gender stereotiplarida ham erkaklarning xulq-atvoridagi salbiylik odatiy qabul qilinadi, ammo ayollarning biroz salbiy xatti-harakati ham “buzuqlik” sifatida baholanadi). *Yigit-yalangning sochi yelkasiga tushdi, surnaypocha shim-u, zaifona guldor ko‘ylak kiymagani qolmadi* gapida ham erkaklarning tashqi ko‘rinishiga oid me’yoriy chegaralar aniq ko‘rsatib berilgan. Soch o‘stirish, guldor ko‘ylak kiyish kabi gender transformatsiyalari erkaklar uchun o‘ta salbiy holat sifatida tasvirlangan.. *Ashur novvoyning kelini uch go‘dagini chirqiratib “Sevaman! Sevsam nima qilay?” deya shahrisabzlik dorboz bolaga ergashib ketdi.*[8, 299] Muallif tashqi ko‘rinishdagi

o‘zgarishlarni batafsil bayon etib, bu jarayonlar faqatgina tashqi ko‘rinish emas, balki jamiyatdagi kundalik turmush-tarzi, insonlar hayoti, xatti-harakatiga ta’sirini ochib bergan.

Mazkur tasvirda *“qiz-juvonlar”* va *“yigit-yalang”* umumlashtiruvchi juft birliklari qarama-qarshi gender guruhlarini nomlaydi. Ular bilan birikkan *“ishvakorona”*, *“hayo”*, *“zaifona”* kabi baholovchi so‘zlar esa xatti-harakat va tashqi ko‘rinishni jinsga xos me’yor asosida tavsiflaydi. *“Zaifona guldor ko‘ylak”* birikmasida kiyimning rangi va shakli ayollik belgisi sifatida talqin qilinib, uning erkak qiyofasida paydo bo‘lishi salbiy baholanadi. “Hayo atalmish dahmaza” ifodasida esa *“atalmish”* va *“dahmaza”* birliklari avvalgi qadriyatga kinoyaviy munosabatni kuchaytiradi. Natijada muallif bayonida an’anaviy gender chegaralarining buzilishi bir necha baholovchi leksema va qarama-qarshi nominatsiyalar yordamida ko‘rsatiladi.

Ammo asarni faqat ayollarni me’yorlashtiruvchi stereotiplardangina iborat deyishimiz to‘g‘ri emas. Bosh obraz ayollarning yurish-turishi-yu vazifalarini nazorat qilgani holda, erkaklarning ham jamiyatda, oilada mas’uliyat, vazifalari mavjud va muhim ekanligini ilgari suradi:

“Nimadan so‘z boshlashni bilmay Berdiboy beixtiyor tomorqaga nazar tashladi. Qarovsiz! Olmalarning tagi yumshatilmagan, shoxlari sinib, mevalari yerga to‘kilib yotibdi —molga yem. Devor tagida o‘sgan ikki tup anor beboshbog’ gangib yurgan ikki qo‘tir echkiga tayyor ermak. Hovliga tutash keng sayhon suvsizlikdan tors-tors yorilib, ajriqzorga aylangan”. Ushbu fikrlarda ro‘zg‘or yumushlari to‘liq ayollar bo‘ynida emasligi, kuch talab etadigan ayrim yumushlar (tomorqa va uy hayvonlariga qarash kabilar) erkaklar zimmasida ekanligiga ishora mavjud. Shuning uchun ushbu qarovsizliklarni Berdiboy onasiga emas, balki otasiga ko‘rsatib o‘tishni xohlaydi:

— *Anovi yerni chopib, biron nima ekish kerak edi,— dedi Berdiboy azbaroyi gapni yurishtirib olish maqsadida.*

— *Ihm, chopish kerak, ekish kerak,— deya ma’qullab qo‘ydi ota.*[8, 296]

Yoki:

“...Endi apam bu yerni “uyim, mening uyim” deb gapiradi. Parda Qurbon bo‘lsa miq etmaydi, “ha, uying, sening uying” degandek quloq qoqmay o‘tiraveradi. Chunki ro‘zg‘orning tizgini, jami bordi-keldisi apamning qo‘lida! Bu ishlarni ko‘ring, e, dod-ey!”[8, 298] Ushbu jumlalar orqali oilada erkak o‘z mas’uliyatini o‘zi bajarishi lozimligi, ayollarga yuklab qo‘yish uning oiladagi mavqeyiga jiddiy zarar yetkazishi, ya’ni hukmronlik ayollarning qo‘liga o‘tib ketishi mumkinligiga ishora mavjud. Shuning uchun asar bosh qahramoni ayollardan vazifalarini talab etgani holda o‘zi ham oiladagi mas’uliyatini teran anglaydigan shaxs sifatida gavdalantirilgan:

Ushbu parchada *“ro‘zg‘orning tizgini”* metaforik birikmasi oiladagi boshqaruv va hokimlik ma’nosini ifodalaydi. “Tizgin” leksemasining lug‘aviy ma’nosi boshqarish vositasi bilan bog‘liq bo‘lsa, matnda u qaror qabul qilish vakolatining ayol qo‘liga o‘tganini anglatadi. *“Uyim, mening uyim”* shaklidagi egalik qo‘shimchasi va kishilik olmoshining yonma-yon kelishi egalik ma’nosini kuchaytirib, Berdiboy nazaridagi an’anaviy oilaviy rollarning o‘zgarganini ko‘rsatadi. *“Miq etmaydi”*, *“quloq qoqmay o‘tiraveradi”* frazeologik birliklari esa Parda Qurbonning passivligini salbiy baholaydi. Shu tariqa erkakning oiladagi mavqeyi bevosita *“kuchsiz”* yoki *“mas’uliyatsiz”* so‘zlari bilan nomlanmaydi; u metafora, egalik shakllari va baholovchi fe’llar orqali implitsit tarzda anglashiladi.

“... ikkita munchoqdek-munchoqdek qizalog‘i bor; birovdan kamdir, birovdan ziyod ro‘zg‘or qilsa, hech kimdan non-osh so‘ramasa…”[8, 294] Ya’ni Berdiboy ro‘zg‘orni otasiga o‘xshab ayoli zimmasiga yuklab qo‘ymagan. Qo‘lidan kelgancha oilasini moddiy va maishiy jihatdan ta’minlashni o‘z vazifasi deb biladi. Asarda insonlarning gender jihatdan stereotipik me’yorlarga mos kelmasligi yoki chetga chiqishi ularni qarshi jins vakillari orasida mavqeyi tushib borishidan dalolat beradi.

Tahlil qilingan misollarni umumlashtirish asosida “Piyoda” hikoyasidagi gender stereotiplarini ularning yo‘nalishi, ayol va erkak obrazlariga xos ko‘rinishlari hamda badiiy vazifasiga ko‘ra tasniflash mumkin.

1-jadval

“Piyoda” hikoyasida aniqlangan gender stereotiplarining tasnifi

Gender stereotipining yo‘nalishi	Ayol obrazlariga oid ko‘rinishlar	Erkak obrazlariga oid ko‘rinishlar	Asardagi asosiy vazifasi
Tashqi ko‘rinishga munosabat	Bosh kiyimi, soch va kiyinishning milliy mezonlar asosida baholanishi	Erkak ayol tashqi ko‘rinishini nazorat qiluvchi; erkak qiyofasining an’anaviy mezonlar asosida baholanishi	Berdiboy qarashlari va yangilanayotgan turmush tarzi o‘rtasidagi tafovutni aks ettirish
Xulq-atvor me’yorlari	Itoatkorlik, kamtarlik, muloyimlik va o‘zini cheklash	Qat’iyatlilik, talabchanlik va nazoratchilik	Qahramonlar xatti-harakatlariga gender

Gender stereotipining yo‘nalishi	Ayol obrazlariga oid ko‘rinishlar	Erkak obrazlariga oid ko‘rinishlar	Asardagi asosiy vazifasi
			me’yorlari asosida baho berish
Ta’lim va ijtimoiy faollik	Qiz bolaning ta’lim olishi va mustaqil faoliyatiga cheklov	Oila a’zolarining qarorlari uchun javobgarlik	Qizlarning ta’lim olishiga doir eski va yangicha qarashlar to‘qnashuvi
Oiladagi mavqe	Ayolning oila boshlig‘iga so‘zsiz bo‘ysunishining tabiiy holat sifatida qabul qilinishi	Erkak oila boshlig‘i, himoyachi va oilaga mas’ul shaxs	Asardagi an’anaviy oilaviy munosabatlarni yoritish
Oilaviy-maishiy vazifalar	Uy-ro‘zg‘or ishlari va oilaga g‘amxo‘rlik ayolning asosiy vazifasi sifatida belgilanishi	Oilani moddiy ta’minlash, tomorqa va xo‘jalik ishlarini bajarish erkak zimmasidagi vazifa	Oila yumushlarining erkak va ayol o‘rtasida an’anaviy taqsimlanishi
Hissiy-axloqiy me’yor	Ayol hayo, or-nomus va odob doirasidagi xulqi bilan baholanishi	Erkakdan g‘urur, oriyat va hissiyotlarni oshkor qilmaslik kutilishi	Berdiboyning muhabbat va erkaklik g‘ururi o‘rtasidagi ichki kurashining namoyon bo‘lishi
Gender me’yoriga qarshilik va undan chekinish	Gulsanamning o‘qishga intilishi, Gulchehraning velosiped minishi va belgilangan talablarga bo‘ysunmasligi	Yigitlarning tashqi ko‘rinishidagi o‘zgarishlar hamda Parda Qurbonning oiladagi mavqeyining sustlashuvi	Gender me’yorlarining o‘zgarishi hamda Berdiboy bilan zamonaviy muhit o‘rtasidagi ziddiyatni ochish

Tasnif natijalari asarda ayol va erkak obrazlariga qo‘yilgan talablar o‘zaro bog‘liq tizimni tashkil etishini ko‘rsatadi. Ayolga nisbatan belgilangan itoatkorlik, hayo va oilaparvarlik me’yorlari erkakka yuklangan himoyachilik, nazorat va moddiy mas’uliyat bilan uyg‘unlashadi. Shu bilan birga, mazkur me’yorlardan chekinuvchi obrazlar an’anaviy qarashlarning o‘zgarayotganini ko‘rsatadi. Demak, hikoyadagi gender stereotiplari erkak va ayolning oiladagi hamda jamiyatdagi mavqeyini o‘zaro belgilovchi madaniy model sifatida namoyon bo‘ladi.

Muhokama

Tadqiqot natijalari “Piyoda” hikoyasidagi gender stereotiplari faqat ayollar xatti-harakatini cheklovchi qarashlardan iborat emasligini ko‘rsatadi. Asarda ayoldan itoatkorlik, hayo va oilaga sadoqat kutilsa, erkakka ham oilani moddiy ta’minlash, yaqinlarini himoya qilish va ro‘zg‘or mas’uliyatini o‘z zimmasiga olish talabi qo‘yiladi. Shu sababli Berdiboyning qarashlarini faqat ayollarga nisbatan nazorat sifatida baholash asar mazmunini to‘liq ochib bermaydi. U ayollarning yurish-turishini an’anaviy mezonlar asosida baholashi bilan birga, erkakning oiladagi vazifalariga ham qat’iy munosabat bildiradi.

Lingvistik tahlil natijalari mazkur stereotiplarning uch asosiy sathda ifodalanganini ko‘rsatadi: leksik sathda genderga ishora qiluvchi nominatsiyalar va baholovchi birliklar, morfologik sathda kichraytirish-erkalash hamda egalik shakllari, sintaktik-pragmatik sathda esa ritorik so‘roq, shart mayli ko‘rinishidagi talab va presuppozitiv mazmun yetakchilik qiladi. Bu vositalar alohida holda emas, nutqiy vaziyat tarkibida o‘zaro birikib, qahramonning ayollik va erkaklik haqidagi me’yoriy tasavvurlarini yuzaga chiqaradi. Shuning uchun hikoyadagi gender stereotiplarini aniqlashda voqea va obraz tavsifi bilan cheklanmay, aynan til birliklarining tanlanishi hamda kontekstdagi baholash vazifasiga tayanish muhimdir.

Parda Qurbon va Berdiboy obrazlarining qiyosi bu jihatdan alohida ahamiyatga ega. Parda Qurbonning ro‘zg‘or ishlariga loqaydligi va oiladagi boshqaruvning ayol qo‘liga o‘tishi Berdiboy tomonidan erkaklik mavqeyining susayishi sifatida qabul qilinadi. Berdiboy esa o‘z oilasini ta’minlashni, farzandlari va ro‘zg‘ori uchun javobgar bo‘lishni erkaklikning muhim belgisi deb tushunadi. Demak, qahramonning genderga oid qarashlarida nazorat va cheklov bilan bir qatorda burch hamda mas’uliyat tushunchalari ham mavjud.

Gulsanam va Gulchehra obrazlari esa an’anaviy gender me’yorlarining o‘zgarmas emasligini ko‘rsatadi. Gulsanamning Toshkentda o‘qishni tanlashi, Gulchehraning velosiped minishi, boshyalang yurishi va o‘z istagiga ko‘ra harakat qilishi ayolning ijtimoiy faolligi hamda mustaqil qaror qabul qilishiga doir yangicha qarashlarni ifodalaydi.

Berdiboyning bu holatlarga qarshiligi uning shaxsiy fe'l-atvoridangina kelib chiqmaydi, aksincha bu munosabat qahramon voyaga yetgan ijtimoiy-madaniy muhit ta'siri bilan bog'liq.

Shuningdek, asardagi gender stereotiplari muallifning bevosita hukmi tarzida emas, asosan qahramonlarning nutqi, o'zaro munosabati va voqealarga bergan bahosi orqali namoyon bo'ladi. Erkin A'zam kinoyaviy tasvir vositasida Berdiboyning qarashlarini bir tomondan milliy qadriyatlarga sadoqat, ikkinchi tomondan esa o'zgarib borayotgan hayot tarziga moslasha olmaslik (qabul qilmaslik) sifatida gavdalantiradi. Shu bois hikoyadagi gender stereotiplari an'anaviylik va zamonaviylik o'rtasidagi ziddiyatni yuzaga chiqaruvchi muhim badiiy vosita vazifasini bajaradi.

Hikoyadagi genderga oid qarashlar qahramonlarning yosh xususiyatlari bilan ham bog'langan. Berdiboy an'anaviy turmush mezonlariga intilsa, Gulsanam va Gulchehra kundalik hayotga kirib kelayotgan yangiliklarni tabiiy qabul qiladi. Shu tariqa ularning qarama qarshiligi faqat erkak va ayol munosabati doirasida qolmay, turli avlodlarning hayot tarzi va qadriyatlarga munosabatidagi tafovutni ham ifodalaydi. Bu esa gender stereotiplarining davr ta'sirida yangilanib boradigan madaniy hodisa ekanini ko'rsatadi. Muallif mazkur o'zgarishlarga bir tomonlama hukm chiqarmaydi, balki ularni qahramonlar o'rtasidagi bahs va ziddiyatlar vositasida o'quvchi mulohazasiga havola qiladi.

Xulosa

Erkin A'zamning "Piyoda" hikoyasi tahlili shuni ko'rsatadiki, asarda gender stereotiplari o'zbek xalqining milliy-madaniy qarashlari, urf-odatlari va ijtimoiy me'yorlari bilan uzviy bog'liq holda badiiy aks ettirilgan. Hikoyadagi Berdiboy obrazi orqali erkaklik, g'urur, oilaviy mas'uliyat va ayollar xatti-harakatlarini nazorat qilish kabi an'anaviy gender tasavvurlari namoyon bo'lsa, ayol obrazlari orqali itoatkorlik, hayo, kamtarlik va oilaparvarlik kabi stereotipik me'yorlar yoritilgan.

Erkin A'zamning "Piyoda" asari badiiy tahlili shuni ko'rsatadiki, asarda madaniy gender stereotiplari nafaqat qahramonlar xarakteri, balki jamiyatning umumiy qarashlari orqali ham ochib berilgan. Yozuvchi erkak va ayollarga munosabatni kundalik maishiy tasvir bilan cheklamay, ularning ijtimoiy rollari, jamiyatdagi o'rni va mas'uliyati, tashqi ko'rinishi-yu xulq-atvoriga bog'liq holda yoritib beradi. Badiiy matn tahlili davomida gender stereotiplari individual emas, balki ijtimoiy hodisa ekanligi ochib berildi. Chunki asardagi stereotipik qarashlar qahramonlarning shaxsiy fikri emas, balki xalq tomonidan shakllantirilgan mezonlar va me'yorlar, qadriyatlar bilan chambarchas bog'liqdir. Demak, "Piyoda" hikoyasi madaniy gender stereotiplarini badiiy matn doirasida tahlil etish uchun muhim manbalardan biri bo'la oladi. Asarda genderga oid stereotiplarning lingvomadaniy va ijtimoiy jihatlari uyg'unlashtirilgani hikoyaning badiiy-estetik qiymatini yanada oshiradi.

Asarda gender stereotiplari nafaqat qahramonlar nutqi va xatti-harakatlarida, balki ularning dunyoqarashi, ijtimoiy munosabatlari hamda gender mazmunini yuzaga chiqaruvchi nutqiy birliklarda ham o'z ifodasini topgan. Shu bilan birga, yozuvchi an'anaviy qarashlar va zamonaviy hayot tarzi o'rtasidagi ziddiyatni Berdiboy obrazi misolida badiiy talqin etadi. Natijada gender stereotiplari individual qarash sifatida emas, balki jamiyat tomonidan shakllantirilgan madaniy hodisa sifatida namoyon bo'ladi.

Demak, "Piyoda" hikoyasi o'zbek jamiyatida genderga oid tasavvurlar, qadriyatlar va stereotiplarning badiiy ifodasini o'rganishda muhim manba bo'lib xizmat qiladi. Asarda gender stereotiplarining lingvomadaniy va ijtimoiy jihatlarda yoritilishi yozuvchining badiiy mahoratini namoyon etish bilan birga, gender masalalarini milliy mentalitet kontekstida tadqiq etish uchun ham muhim ilmiy asos yaratadi.

QO‘CHQOR NORQOBIL QISSALARIDA URUSH KISHILARI OBRAZLARINING BADIIY KONSEPSIYASI

Sharipov Dilshodbek Shodmonjon o‘g‘li
Namangan davlat universiteti tayanch doktoranti
E-mail: dilshodbeksharipov93@gmail.com
ORCID: https://orcid.org/0009-0000-1460-1606

Annotatsiya: *Mazkur maqolada badiiy obraz hamda obrazlilik haqida so‘z yuritilib, obraz tushunchasi va mohiyati ochib beriladi. Qo‘chqor Norqobilning nasriy asarlari, xususan, qissalaridagi obrazlar, urush ichidagi hamda urush tashqarisidagi insonlar, ularning ruhiyati hamda turmush tarziga urushning ta’siri ochib beriladi.*

Kalit so‘zlar: *badiiy obraz, obrazlilik, badiiy konsepsiya, Qo‘chqor Norqobil, qissa, urush mavzusi, urush, urush kishilari obrazlari, inson va urush, psixologizm, ruhiy olam, urush voqeligi.*

ХУДОЖЕСТВЕННАЯ КОНЦЕПЦИЯ ОБРАЗОВ ЛЮДЕЙ ВОЙНЫ В ПОВЕСТЯХ КУЧКОРА НОРКОБИЛА

Аннотация: *В данной статье рассматриваются художественный образ и образность, раскрываются понятие и сущность образа. Особое внимание уделяется образам в прозаических произведениях Кучкора Норкобила, в частности, в его повестях. Анализируются люди, находящиеся непосредственно в условиях войны, а также те, кто находится за пределами военных действий, их психологическое состояние и особенности быта. Раскрывается влияние войны на духовно-психологическое состояние человека, его мировосприятие и образ жизни.*

Ключевые слова: *художественный образ, образность, художественная концепция, Кучкор Норкобил, повесть, военная тема, война, образы людей войны, человек и война, психологизм, духовный мир, военная действительность.*

THE ARTISTIC CONCEPTION OF WAR-TIME CHARACTERS IN KUCHKOR NORKOBIL’S NOVELLAS

Abstract: *This article examines the literary image and imagery, revealing the concept and essence of the literary image. Particular attention is paid to the characters in Kuchkor Norkobil’s prose works, especially in his novellas. The article explores people directly involved in war as well as those living outside the battlefield, focusing on their psychological state and way of life. It also reveals the impact of war on the spiritual and psychological condition of individuals, their perception of the world, and their lifestyle.*

Keywords: *literary image, imagery, artistic conception, Kuchkor Norkobil, novella, war theme, war, images of wartime people, human and war, psychologism, spiritual world, wartime reality.*

Kirish

Badiiy adabiyotda inson obrazini yaratish, uning ichki olami, ruhiy kechinmalari va hayotiy taqdirini badiiy aks ettirish muhim estetik masalalardan biridir. Ayniqsa, urush mavzusidagi asarlarda inson va urush munosabati, urushning shaxs ruhiyati, dunyoqarashi va ma’naviy olamiga ta’siri alohida ahamiyat kasb etadi. O‘zbek adabiyotida urush mavzusi turli ijodkorlar tomonidan turlicha talqin qilingan bo‘lib, keyingi davr nasrida urushning tashqi manzaralaridan ko‘ra, uning inson taqdiri va ruhiyatida qoldirgan izlarini tasvirlashga e’tibor kuchaydi. Shu jihatdan Qo‘chqor Norqobil ijodida urush mavzusining badiiy talqini, xususan, urush kishilari obrazlarining yaratilishi o‘ziga xos xususiyatlarga ega.

Adabiyotlar tahlili

Obraz haqida yoki umuman olganda badiiy obraz haqidagi qarashlar antic dunyo davridan boshlangan. Aristoteldan tortib to hozirgi kungacha bo‘lgan adabiyotshunoslar badiiy obrazga ta’rif berib, o‘z fikrlarini bildirib o‘tganlar. Badiiylikning asosiy mezonlaridan biri bo‘lgan badiiy obrazga birinchi bo‘lib nemis faylasufi Gegel o‘zining estetikaga oid qarashlarida to‘xtalib, “san’at-obrazlar orqali fikrlash demakdir” [1, 343] deb aytib o‘tadi. “Obraz – to‘qima yordami bilan yaratilgan va estetik qiymat kasb etgan inson hayotining umumlashma va, ayni chog‘da, konkret manzarasidir”[2, 62] deya ta’rif beradi rus adabiyotshunosi L.I.Timofeev, Yana bir rus tanqidchisi V.G.Belinskiy “San’at tafakkuri obrazlar orqali fikrlaydi” deydi [3, 150]. Psixolog va estetik Lev Vygotskiy obrazning o‘quvchi hissiyotiga ta’siri masalasiga alohida e’tibor qaratib, san’atning asosiy ta’sir kuchi obrazda ligini ta’kidlaydi: “San’atning estetik ta’siri badiiy

obraz orqali amalga oshadi"[4, 60]. Oʻzbek adabiyotshunoslari esa obraz va obrazlilikni badiiylikning eng asosiy mezonlaridan biri sifatida e'tirof etishadi. Xussan, olim Izzat Sulton "Adabiyot nazariyasi" darsligida badiiy obrazga shunday ta'rif beradi: "Obraz – insonning ozmi-koʻpmi batafsil tasviri boʻlib, u hayotdagi odamning joʻn nusxasi emas, balki yozuvchining ma'lum davr va sharoitda yashovchi inson haqidagi tasavvurining ifodasidir" [5, 52]. Adabiyothunos olim Toʻxta Boboyev esa Aristotel, Gegel, Timofeev fikirlariga toʻxtalib, badiiy obraz xususiyatlarini sanab oʻtadi [6, 42]. "Adabiyotshunoslik lugʻati" da ham badiiy obrazga quyidagicha ta'rif berib oʻtiladi: "Badiiy obraz deganda borliq (undagi inson, narsa, hodisa va h.)ning san'atkor koʻzi bilan koʻrilgan va ideal asosida ijodiy qayta ishlangan aksi anglanadi" [7, 43]

Tadqiqot metodologiyasi

Tadqiqotda Qoʻchqor Norqobil qissalaridagi urush kishilari obrazlarining badiiy xususiyatlarini ochib berishda tizimli-strukturaviy, tipologik, qiyosiy, psixologik va konfliktologik tahlil metodlaridan foydalanildi. Tizimli-strukturaviy metod asosida obrazlarning asar kompozitsiyasi va obrazlar tizimidagi oʻrni, tipologik metod orqali qahramonlarning umumiy va individual xususiyatlari, qiyosiy metod vositasida turli qissalardagi obrazlarning oʻxshash va farqli jihatlari aniqlandi. Psixologik tahlil yordamida urush sharoitidagi insonlarning ruhiy kechinmalari, qoʻrquv, sogʻinch, iztirob va umid kabi holatlari, konfliktologik yondashuv asosida esa inson va urush, hayot va oʻlim, xotira va voqelik oʻrtasidagi ziddiyatlar tadqiq etildi.

Natijalar va ularning tahlili

Biz ham yuqoridagi fikrlarga yondashgan holda obraz, timsol tushunchalari badiiy asardaga ijodkor tomonidan olib kirilgan real voqelikdagi insonning badiiy asaardagi qayta ijodiy ishlangan varianti degan xulosaga kelamiz. Badiiy obraz bu badiiy asarning asosiy mezoni hisoblanib, asarni haqiqiy badiiy asar sifatida shakllantiruvchi asosiy omil hisoblanadi. Biz tahlilga tortgan yozuvchi, jurnalist Qoʻchqor Norqobilning qissalarini ham badiiyati oshishiga xizmat qilgan unsur bu – obrazlardir.

Ijodkor nasriy asarlariga nazar tashlar ekanmiz, uning ijodining asosiy qismi qissa va hikoyalardan iborat ekanligini koʻramiz. Bu nasriy asarlar turli mavzularda yozilgan boʻlib, ularning ichida eng salmoqlisi URUSH mavzusidir. Muallif qissalarining deyarli barchasi Urush mavzusida (Afgʻon urushi) yozilgan. Buning sababi esa, Qoʻchqor Norqobilning urushda bevosita qatnashgani hamda deyarli ikki yil davomida askarlar hayoti, daxshatli janglar, turli xil insonlarning iztirobiga guvoh boʻlganidadir. Ushbu mavzuda yozilgan qissalarning qahramonlaari ham, albatta, urush kishilaridir.

Qoʻchqor Norqobilning "Daryo ortidagi yigi", "Tongga qadar yashamoq kerak", "Quyoshni kim uygʻotadi", "Azizam, tabassum qil"[8, 15] kabi qissalarida Afgʻon urushi fojealari tasvirlangan boʻlib, muallif bu asarlarda bosh obraz sifatida urushni ichidan va tashqi tomonda, real hamda xotira yoki eslash shaklida bayon etadi. Ushbu qissalardagi obrazlarni esa quyidagicha guruhlash mumkin:

– harbiy obrazlar;
– ayollar obrazlari;
– tinch aholi;
– ota-ona obrazlari.

Qoʻchqor Norqobil qissalarida urush kishilari obrazlari tizimining markazida askar obrazi turadi. Biroq adib yaratgan askar an'anaviy harbiy nasrdagi faqat jasorat va qahramonlikni ifodalovchi jangchi qiyofasi bilan cheklanmaydi. U qoʻrqadigan, sogʻinadigan, iztirob chekadigan, safdoshini yoʻqotishdan ruhiy larzaga keladigan va oʻlim xavfi qarshisida hayotning qadrini anglaydigan oddiy inson sifatida tasvirlanadi. Shu jihatdan yozuvchi askar obrazini insoniylik va urush oʻrtasidagi ziddiyatni ifodalovchi markaziy timsol darajasiga koʻtaradi.

"Daryo ortidagi yigʻi" qissasida askar urushning bevosita ichida tasvirlanadi. Uning ruhiy holati doimiy xavf, oʻlim tahdidi, Vatan va yaqinlarini sogʻinish bilan belgilanadi. Qissada jang manzaralaridan koʻra askarning ichki kechinmalariga urgʻu berilishi urushning tashqi va ichki mohiyati oʻrtasidagi farqni yuzaga chiqaradi. Askar uchun Vatan, ota-ona, uy va yaqinlar haqidagi xotiralar oddiy esdalik emas, balki ogʻir vaziyatda uni yashashga undovchi ruhiy kuchga aylanadi:

Mazkur qissada qoʻrquv va jasorat tushunchalari ham oʻziga xos talqin qilinadi. Muallif qoʻrquvni ojizlik belgisi sifatida emas, tabiiy insoniy holat sifatida koʻrsatadi. Asl jasorat esa qoʻrquvning yoʻqligida emas, balki uni yenga olishda namoyon boʻladi. Shu tariqa askar obrazi orqali vatanparvarlik, mas'uliyat, yashash istagi va insoniylik kabi tushunchalar bir nuqtada birlashadi.

"Tongga qadar yashamoq kerak" qissasida esa askar obrazi yanada chuqur psixologik qatlamga ega boʻladi. Bu asarda jangchi avvalo inson sifatida namoyon boʻladi. Uning ruhiyatida qoʻrquv, muhabbat, sogʻinch va hayotga intilish bir-biri bilan kurashadi. Asar nomidagi "tong" tushunchasi ham ramziy mazmun kasb etib, jismoniy omon qolishdan tashqari, insoniylik, umid va ma'naviy bardoshlilikni saqlab qolish ma'nolarini anglatadi: "*Men agar inson qoʻliga qurol ushlasa, xuddi hayvonlar kabi biri birini gʻajishday munofiqlikdan ham hazar qilmasligini tushunib yetdim. Hayvonning insonga aylanuvi haqida bir narsa deyolmayman-u, insonlarning hayvoniy yovuzlikdan ham battarroq xislatni qanday qilib yashirib*

yurishlariga aqlim bovar qilmay qoldi. Inson qurol ushlasa, yovuzlik tan beradi. Ammo har qanday yuragi toza, ma'nan sog'lom kishilarning hayotini ham urush yakson qilib tashlaydi"[9, 137]

Qissada Liliya obrazi ham askar obrazining mohiyatini chuqurlashtiruvchi badiiy vosita sifatida namoyon bo'ladi. U hamshira bo'lishi bilan birga, urush dahshatlari orasidagi mehr, hayot va umid timsolidir. Uning insoniy munosabati askarlarning ruhiy bardoshini saqlashga xizmat qiladi. Shu tariqa ayol va askar obrazlari o'zaro aloqada tasvirlanib, urush va muhabbat, o'lim va hayot, qo'rquv va umid qarama-qarshiliklari asosida badiiy konsepsiya yuzaga keladi.

"Azizam, tabassum qil!" qissasida askar obrazi yangi bosqichga ko'tariladi. Bu yerda u jang maydonidagi ishtirokchi sifatida emas, balki urushdan qaytgan, ammo urush uning qalbini tark etmagan inson sifatida gavdalanadi. Shoir obrazi ana shu jihati bilan alohida e'tiborga loyiq.

Shoir jismonan urushdan qaytgan bo'lsa-da, ruhiy jihatdan jang maydonidan chiqib keta olmaydi. Uning xotirasida janglar, safdoshlar, o'lim va portlashlar qayta-qayta jonlanadi. Kasalxona muhiti ham ramziy ma'no kasb etib, urushning tugaganidan keyingi ruhiy jarohatlarni namoyon qiluvchi makonga aylanadi. Demak, qissada urushning davomiyligi jang maydonidan inson xotirasi va ongiga ko'chadi: "Ko'zini ochdi. Shift. Boshini qimirlatishga majoli yo'q. Yuqoriga bazo'r qarab ko'rdi. Qovog'idan allaqanday kuch bosayotganday bo'ldi. Boshi orqaga tortib ketayapti. Ixrab yubordi. Peshonasini kimdir paypasladi. Kipriklarini ocholmadi. Tag'in hushini yo'qotdi. Boshining ichiga kirib olib nimadir tarillar, borgan sayin miyasi tashqariga otilib chiqquday bo'lar, ko'z oldida oq harir bulutlar suzar, gohida bu oqlik zimistonlik ichra g'arq bo'lar, shunda orqa miyasini allaqanday temir qo'l jon-jahdi bilan sug'urib olishga urinardi. Joni bo'g'ziga tiqilib, og'riq zo'ridan talvasaga tushardi" [10, 168]

Shoir obrazining muhim jihatlaridan biri uning ijodkor va guvoh sifatidagi qiyofasidir. U boshdan kechirgan urush voqealarini yozishga, ularni kelajak avlodga yetkazishga ehtiyoj sezadi. Shu sababli qahramonning ichki konflikti nafaqat kasallik va xotira bilan, balki vijdon va ijodiy mas'uliyat bilan ham bog'lanadi. Askar bu yerda tarixiy haqiqatni saqlovchi ma'naviy guvohga aylanadi.

Asar nomidagi "tabassum" ham muhim ramziy detal sifatida namoyon bo'ladi. Tabassum ruhiy tushkunlik va urush xotirasiga qarshi qo'yilgan hayotiy kuchni anglatadi. Shunday qilib, qahramonning jasorati bu qissada jang maydonidagi harakatda emas, balki urushdan keyingi hayotga qaytish, sevish, ijod qilish va insoniyligini saqlab qolish uchun kurashida namoyon bo'ladi:

" "Quyoshni kim uyg'otadi?" qissasida askar obrazining badiiy evolyutsiyasi yanada yuqori bosqichga ko'tariladi. Agar "Daryo ortidagi yig'i"da askar jangchi sifatida, "Tongga qadar yashamoq kerak"da ruhiy sinovdagi inson sifatida, "Azizam, tabassum qil!"da urushdan keyingi ruhiy jarohat tashuvchisi sifatida namoyon bo'lsa, mazkur qissada u tarixiy xotira egasi, guvoh va mushohadakor inson sifatida gavdalanadi.

Qissada retrospektiv tasvir usuli muhim ahamiyatga ega. Urush vaqt jihatidan tugagan bo'lsa-da, u qahramon ongida yashashda davom etadi. Safdoshlar, jang maydoni, yo'qotishlar va o'lim bilan bog'liq xotiralar qahramonning bugungi hayoti bilan qorishib ketadi. Shu tariqa urush tarixiy voqea bo'lib qolmay, inson ongida davom etuvchi ruhiy hodisaga aylanadi.

Qahramonning mushohadakorligi uning urushni qayta baholashiga olib keladi. U urushning mohiyatini g'alaba yoki mag'lubiyat mezonlari bilan emas, inson umri, tinchlik, do'stlik va hayotning qadri bilan o'lchay boshlaydi. Qissa nomidagi "quyosh" esa hayot, umid va ma'naviy uyg'onish ramzi sifatida talqin qilinishi mumkin: *"Polaponlarday bo'lib ikki yuz chog'li askar yuk samolyoti ichida bir-birimizning pinjimizga tiqilib, qunishib turibmiz. Shu ikki yuz chog'li askar dini, millatidan qat'i nazar bitta so'z, bitta nom bilan bir-biriga bog'langan – askar! Bir-biriga birodar, bir-birini tushunadigan, qay birining ayni dam hayoti havoda uchayotgan mana shu samolyotning beshikast yerga qo'nishi bilan bog'liq – askar!"*[10, 274]

Demak, to'rt qissani qiyoslaganda askar obrazida muayyan evolyutsion jarayon kuzatiladi:

Qissa	**Askar obrazining asosiy qiyofasi**	**Badiiy mazmun**
"Daryo ortidagi yig'i"	Jangchi	Qo'rquv va matonat
"Tongga qadar yashamoq kerak"	Ruhiy sinovdagi inson	Yashash va insoniylik
"Azizam, tabassum qil!"	Urushdan qaytgan askar	Xotira va ruhiy jarohat
"Quyoshni kim uyg'otadi?"	Guvoh va mushohadakor inson	Tarixiy xotira va hayot falsafasi

Bu evolyutsiya Qo'chqor Norqobilning urushni tasvirlashdagi asosiy badiiy tamoyilini ko'rsatadi: urush markazdan chekinib, inson markazga chiqadi.

Qo‘chqor Norqobil qissalaridagi obrazlar tizimida ayol obrazlari ham muhim o‘rin tutadi. Ular urushning bevosita jangovar ishtirokchilari bo‘lmasalar-da, uning ma’naviy va ruhiy oqibatlarini o‘zida aks ettiradi.

“Daryo ortidagi yig‘i”da ona, yor va opa-singil obrazlari askarning xotiralarida yashaydi. Ular jang maydonidagi inson uchun tinch hayot, uy va sog‘inch timsolidir. Afg‘on ayollari esa urushning millat tanlamasligini ifodalovchi umumlashma obraz sifatida namoyon bo‘ladi.

“Tongga qadar yashamoq kerak”da Liliya obrazi alohida badiiy funksiyaga ega. U hayot va umid ramzi sifatida askarlarning ruhiy barqarorligini ta’minlaydi. Demak, Liliya obrazining mohiyati uning kasbiy faoliyatidan ko‘ra, urush sharoitida insoniy mehrni saqlab qoluvchi kuch sifatida namoyon bo‘lishidadir.

“Azizam, tabassum qil!” qissasida Barno obrazi urushdan qaytgan insonning ruhiy tiklanishida muhim ma’naviy tayanch sifatida tasvirlanadi. U urushda qatnashmagan bo‘lsa-da, uning oqibatlarini Shoir bilan birga boshdan kechiradi.

Shu jihatdan ayol obrazlarining qissalar bo‘yicha badiiy evolyutsiyasi quyidagicha umumlashadi:

“Daryo ortidagi yig‘i” — tinch hayot va sog‘inch;

“Tongga qadar yashamoq kerak” — mehr va umid;

“Azizam, tabassum qil!” — sadoqat va ruhiy tiklanish;

“Quyoshni kim uyg‘otadi?” — tarixiy xotira va ma’naviy davomiylik.

Ofitser va harbiy tizim vakillari obrazlari

Qo‘chqor Norqobil qissalaridagi ofitser va harbiy tizim vakillari obrazlari ham obrazlar tizimining muhim tarkibiy qismidir. Ular faqat harbiy tartibni ta’minlovchi yoki buyruq beruvchi shaxslar emas, balki buyruq va vijdon, harbiy burch va insoniylik o‘rtasidagi murakkab munosabatlarni ochib beruvchi obrazlar sifatida talqin qilinadi.

“Daryo ortidagi yig‘i”da ofitserning qarorlari askarlar taqdiriga bevosita ta’sir qiladi. Shu bois har bir buyruq ortida inson hayoti va taqdiri turishi muallif tomonidan badiiy jihatdan his qildiriladi. “Tongga qadar yashamoq kerak”da esa rahbarning qarorlari askarlarning nafaqat jismoniy, balki ruhiy holatiga ham ta’sir ko‘rsatadi. “Azizam, tabassum qil!”da harbiy tizim urushdan qaytgan askarning keyingi hayoti va ruhiy holati orqali bilvosita namoyon bo‘lsa, “Quyoshni kim uyg‘otadi?”da harbiy rahbarlar tarixiy xotira nuqtayi nazaridan qayta baholanadi.

Shunday qilib, ofitser obrazlari orqali yozuvchi urushning faqat tashkiliy yoki harbiy tomonini emas, uning axloqiy mas’uliyat masalasini ham o‘rtaga qo‘yadi.

Urush kishilari obrazlari tizimida tinch aholi alohida o‘rin tutadi. Qo‘chqor Norqobil urushni faqat askarlar hayoti orqali emas, balki bolalar, ayollar, qariyalar va afg‘on xalqi taqdiri orqali ham ochib beradi. Bu obrazlar urushning eng katta qurbonlari qurolsiz va begunoh insonlar ekanini ko‘rsatishga xizmat qiladi.

Bolalar obrazi urushning kelajak avlodga yetkazgan zarari ramzidir. Ularning qo‘rquv va xavotir ichida ulg‘ayishi urushning faqat bugungi kunni emas, kelajakni ham izdan chiqarishini ko‘rsatadi. Qariyalar esa yo‘qotilgan tinchlik, tarixiy xotira va xalq boshidan kechirgan fojeaning tashuvchilaridir: *“Rinat ikkisiga Xudodan o‘lim so‘rar, hozirgina qo‘rqib qochgan bolasini ular otib o‘ldirdilar, degan o‘y bilan zor qaqshar edi. Lekin bolakay qochgan tomondan boshqa mashinalar ham kelayotgani aniq, sho‘ro askarlari mislsiz g‘azabga mingan edi. Zum o‘tmay orqadan kelib to‘xtagan BMP-2 ustidagi askarlar ayolga o‘q uzdi. Ayol bir siltandi, qo‘li havolanib, ichkariga so‘nggi bora talpindi. Bashnya mili kulbani nishonga oldi”*. [10, 166]

Afg‘on xalqi obrazining talqinida esa muallifning insonparvarlik konsepsiyasi ayniqsa yaqqol ko‘rinadi. Yozuvchi afg‘on aholisini faqat “dushman” sifatida emas, urushning o‘zi bilan kurashayotgan oddiy insonlar sifatida tasvirlaydi. Bu esa urushning millat va hudud tanlamaydigan umuminsoniy fojea ekanini ta’kidlaydi.

Urush kishilari obrazlarining yagona badiiy tizimi

Yuqoridagi tahlil shuni ko‘rsatadiki, Qo‘chqor Norqobil qissalaridagi askar, ofitser, ayol va tinch aholi obrazlarini bir-biridan ajratib o‘rganish bilan birga, ularni yagona badiiy tizim sifatida tahlil qilish zarur. Chunki har bir obraz urushning boshqa bir qirrasini ochishga xizmat qiladi.

Askar — urushning bevosita guvohi va ruhiy qurboni;

ofitser — buyruq, burch va vijdon o‘rtasidagi ziddiyat tashuvchisi;

ayol — mehr, umid, sadoqat va ma’naviy tayanch;

bola — urushning begunoh qurboni va barbod bo‘layotgan kelajak timsoli;

qariya — tarixiy xotira va yo‘qotishlar tashuvchisi;

tinch aholi — urushning umuminsoniy fojeasini ifodalovchi umumlashma obraz.

Shu tariqa mazkur obrazlar birgalikda Qo‘chqor Norqobilning urush haqidagi yaxlit badiiy konsepsiyasini shakllantiradi.

Yozuvchi obrazlarni faqat tashqi harakatlari orqali emas, balki ichki monolog, xotira, ruhiy kechinma, psixologik konflikt va retrospektiv tasvir vositalari orqali ochadi. Shu sababli uning qissalarida urushning tashqi manzarasi bilan insonning ichki dunyosi o‘rtasida uzviy aloqa yuzaga keladi.

Ayniqsa, to‘rtta qissani qiyoslash natijasida askar obrazining rivojlanishi juda muhim badiiy hodisa sifatida ko‘zga tashlanadi. “Daryo ortidagi yig‘i”da jangchi, “Tongga qadar yashamoq kerak”da ruhiy sinovdagi inson, “Azizam, tabassum

qil!”da urushdan keyingi jarohatlardan azoblanayotgan urush qatnashchisi, “Quyoshni kim uyg‘otadi?”da esa tarixiy xotira egasi shaklida namoyon bo‘lishi adibning obraz yaratish mahoratini ko‘rsatadi.

Xulosa

Qo‘chqor Norqobilning “Daryo ortidagi yig‘i”, “Tongga qadar yashamoq kerak”, “Azizam, tabassum qil!” va “Quyoshni kim uyg‘otadi?” qissalarida urush kishilari obrazlari o‘zaro bog‘langan, yaxlit badiiy tizimni tashkil etadi. Mazkur tizimda askar, ofitser, ayol, bola, qariya va tinch aholi obrazlari urushning turli qirralarini ifodalab, yozuvchining inson va urush haqidagi konsepsiyasini shakllantiradi.

Tahlil natijalari shuni ko‘rsatadiki, adib yaratgan askar obrazi dinamik xarakterga ega. U dastlab jangchi sifatida namoyon bo‘lib, keyinchalik ruhiy sinovdan o‘tayotgan inson, urushdan keyingi jarohat tashuvchisi, nihoyat, tarixiy xotirani saqlovchi va urush mohiyatini mushohada qiluvchi shaxs darajasiga ko‘tariladi. Bu evolyutsiya yozuvchining urushni tashqi jangovar voqealardan ko‘ra inson qalbida kechadigan fojiaviy jarayon sifatida anglashini ko‘rsatadi.

Ayol obrazlari esa urushga qarshi qo‘yilgan hayot, mehr, sadoqat va umid kuchini ifodalaydi. Ofitser obrazlari orqali burch va vijdon muammosi ochilsa, tinch aholi obrazlari urushning begunoh insonlar taqdiridagi fojiaviy oqibatlarini namoyon etadi. Natijada barcha obrazlar yagona g‘oyaviy-estetik markaz — insonning urush sharoitida ham o‘z insoniyligini saqlab qolishi g‘oyasi atrofida birlashadi.

Demak, Qo‘chqor Norqobilning urush kishilari obrazlarini yaratishdagi badiiy konsepsiyasi urushni ulug‘lash yoki jangovar qahramonlikni birinchi o‘ringa qo‘yishga emas, balki urushning inson ruhiyati, ma’naviyati, xotirasi va taqdiriga yetkazgan fojiaviy ta’sirini ochib berishga asoslanadi. Adib uchun urushning eng katta fojiasi insonning halok bo‘lishidangina iborat emas; uning izlari inson xotirasida, oilasida, munosabatlarida va keyingi avlod taqdirida davom etishidadir. Shu jihatdan Qo‘chqor Norqobil qissalaridagi urush kishilari obrazlari zamonaviy o‘zbek nasrida insonparvarlik, psixologizm va tarixiy xotira tamoyillarining uyg‘unlashgan badiiy ifodasi sifatida namoyon bo‘ladi.

RAQAMLI MULOQOTDA PRAGMATIK MA'NONING SHAKLLANISHI (IJTIMOIY TARMOQ MATERIALLARI ASOSIDA)

Pulatova Dildora Dilmuradovna
Shahrisabz davlat pedagogika instituti dotsenti, f.f.f.d. (PhD)
E-mail: pulatovadildora0@gmail.com
ORCID: https://orcid.org/0009-0008-3637-8095

Annotatsiya: *Maqolada raqamli kommunikatsiya sharoitida pragmatik vositalarning o'zgarishi va rivojlanishi o'zbek tili materiallari asosida tahlil qilinadi. Ijtimoiy tarmoqlar va messenjerlarda emoji, hashtag, murojaat shakllari, baholovchi birliklar hamda tinish belgilarining kommunikativ ma'no hosil qilishdagi o'rni yoritiladi. Raqamli muloqotda pragmatik ma'noning matn, grafik belgi va kontekstning o'zaro ta'siri asosida shakllanishi o'rganiladi.*

Kalit so'zlar: *raqamli kommunikatsiya, pragmatika, pragmatik vosita, ijtimoiy tarmoq, emoji, hashtag, murojaat, kommunikativ niyat, kontekst.*

ФОРМИРОВАНИЕ ПРАГМАТИЧЕСКОГО ЗНАЧЕНИЯ В ЦИФРОВОЙ КОММУНИКАЦИИ (НА МАТЕРИАЛЕ СОЦИАЛЬНЫХ СЕТЕЙ)

Аннотация: *В статье на материале узбекского языка анализируются изменения и развитие прагматических средств в условиях цифровой коммуникации. Рассматривается роль эмодзи, хэштегов, форм обращения, оценочных единиц и знаков препинания в формировании коммуникативного смысла в социальных сетях и мессенджерах. Изучается формирование прагматического значения в цифровой коммуникации на основе взаимодействия текста, графических знаков и контекста.*

Ключевые слова: *цифровая коммуникация, прагматика, прагматическое средство, социальная сеть, эмодзи, хэштег, обращение, коммуникативное намерение, контекст.*

THE FORMATION OF PRAGMATIC MEANING IN DIGITAL COMMUNICATION (BASED ON SOCIAL MEDIA MATERIALS)

Abstract: *The article analyzes the transformation and development of pragmatic means in the context of digital communication, based on materials from the Uzbek language. It examines the role of emojis, hashtags, forms of address, evaluative units, and punctuation marks in generating communicative meaning on social networks and messengers. The formation of pragmatic meaning in digital communication through the interaction of text, graphic symbols, and context is studied.*

Keywords: *digital communication, pragmatics, pragmatic means, social network, emoji, hashtag, form of address, communicative intention, context.*

Kirish (Introduction).

Raqamli texnologiyalarning jadal rivojlanishi insonlar o'rtasidagi muloqotning shakli va mazmuniga sezilarli ta'sir ko'rsatmoqda. Bugungi kunda fikr almashishning katta qismi ijtimoiy tarmoqlar, messenjerlar va turli raqamli platformalar orqali amalga oshirilmoqda. Natijada yozma muloqotning an'anaviy ko'rinishi o'zgarib, unda og'zaki nutqqa xos qisqalik, tezkorlik va bevositalik xususiyatlari namoyon bo'lmoqda.

Internet pragmatikasiga bag'ishlangan tadqiqotlarda raqamli muloqotda nutq aktlari, kontekst, emoji va boshqa grafik vositalar an'anaviy pragmatik birliklar bilan birgalikda faol ishlatilishi qayd etilgan [1]. Yozma matnning o'zi ko'pincha kommunikativ niyatni to'liq ifodalash uchun yetarli bo'lmay, unga qo'shimcha ravishda emoji, hashtag, takroriy tinish belgisi kabi grafik vositalar keng qo'llanmoqda. Quyida o'zbek raqamli muloqotida pragmatik ma'noning so'z, tinish belgisi, emoji va kontekstning bir butun o'zaro ta'siri natijasida shakllanishi, xususan, tinish belgilari va qisqa birliklar, murojaat birliklari va "sen/siz" shakllari, emoji va grafik belgilar hamda hashtagning kommunikativ vazifalarini kompleks tarzda o'rganib, o'zbek raqamli muloqotining o'ziga xos xususiyatlari haqida to'xtalib o'tamiz.

Mavzuga oid adabiyotlar tahlili (Literature Review).

Raqamli kommunikatsiya pragmatikasi so‘nggi o‘n yillikda xorijiy va o‘zbek tilshunosligida faol o‘rganilayotgan yo‘nalishlardan biriga aylandi. Ingliz tilshunosligida Xie, Yus va Haberlandlarning tadqiqotlarida internet pragmatikasi mustaqil ilmiy yo‘nalish sifatida asoslab berilgan va unda nutq aktlari, kontekst, kommunikativ niyat kabi an’anaviy pragmatik kategoriyalarning raqamli muhitda qanday transformatsiyaga uchrashi turli tillar misolida ko‘rsatilgan [1]. Dainas va Herringning tadqiqoti esa bevosita emoji pragmatikasiga bag‘ishlangan bo‘lib, emojining ma’nosi mustaqil emas, balki kontekst bilan chambarchas bog‘liqligini, uning matnning ohangini o‘zgartirish, illokutiv kuchni kuchaytirish yoki yumshatish kabi funksiyalarini bajarishini asoslab bergan [3]. Li va Yangning tadqiqotida esa emojining internet muloqotidagi pragmatik funksiyalari, xususan, his-tuyg‘uni ifodalash, illokutiv aktni kuchaytirish va muloqot ohangini boshqarish vazifalari o‘rganilgan [7].

O‘zbek tilidagi raqamli muloqotni o‘rganishga qaratilgan ishlar nisbatan yosh, ammo jadal rivojlanayotgan yo‘nalishni tashkil etadi. Amirova va Abdinazarovning tadqiqotida ingliz va o‘zbek tillaridagi Instagram yozishmalari qiyosiy tahlil qilinib, murojaat shakllari, “siz/sen” birliklarining tanlanishi hamda hurmat-odob ifodalarining ikki tilda turlicha namoyon bo‘lishi ko‘rsatilgan [2]. Razikov emoji va hashtagni o‘zbek tili neologiyasi nuqtayi nazaridan tahlil qilib, ularning hissiy munosabatni ifodalash, matnni tartibga solish va mavzuni belgilash kabi funksional-pragmatik vazifalarini aniqlagan [4]. Abduganiyevaning tadqiqotida esa o‘zbek va ingliz Instagram/Facebook diskursidagi multimodal vositalar qiyoslanib, o‘zbekcha matnlarda hurmat, jamoaviylik va milliy o‘zlikni ifodalovchi unsurlarning ustunligi keltirib o‘tilgan [5].

Qiyomidinovaning tadqiqotida raqamli kommunikatsiyada yuzaga kelayotgan yangi janr shakllarining lingvopragmatik xususiyatlari umumiy tarzda ko‘rib chiqilgan [6], Temirova esa o‘zbek internet tilini an’ana va innovatsiya o‘rtasidagi murakkab munosabat sifatida tahlil qilib, raqamli muloqotda milliy til me’yorlarining qanday saqlanib qolishini yoritgan [8].

Tadqiqot metodologiyasi (Research Methodology). Maqolada tavsifiy-tahliliy metod, kontekstual tahlil hamda qiyosiy tahlil usullaridan foydalanildi. O‘zbek tilidagi ijtimoiy tarmoq (Instagram, Telegram) yozishmalaridan olingan misollar tahlil qilindi.

Tahlil va natijalar (Analysis and Results). Raqamli muloqotda vaqt va makonning cheklanganligi sababli foydalanuvchilar ko‘pincha fikrni imkon qadar ixcham shaklda ifodalaydi. Bunday sharoitda bitta so‘z yoki bitta grafik belgi katta kommunikativ mazmunni ifodalaydi. Masalan: “*Mayli.*” Bu birlikning pragmatik mazmuni kontekstga qarab “*roziman*”, “*boshqa ilojim yo‘q*”, “*xafa bo‘ldim, lekin qarshi emasman*”, “*suhbatni davom ettirmoqchi emasman*” kabi turlicha talqin qilinishi mumkin. “*Mayli* 😊” shaklida esa yumshoqlik va samimiylik kuchayadi. “*Mayli...*” shaklida esa norozilik yoki ikkilanish ehtimoli ortadi.

Shu sababli raqamli muloqotda pragmatik ma’no ko‘pincha alohida so‘zdan emas, so‘z + tinish belgisi + emoji + kontekst munosabatidan hosil bo‘ladi. Bu hodisa pragmatik tizimning rivojlanishida muhim o‘zgarishni ko‘rsatadi: avval nutqning yordamchi vositasi hisoblangan ayrim grafik belgilar raqamli muloqotda kommunikativ ma’noni shakllantirishning faol vositasiga aylanmoqda.

Raqamli muloqotning muhim xususiyatlaridan biri – qisqa shaklda katta kommunikativ mazmunni ifodalash imkoniyatidir. Kundalik yozishmalarda “*Rahmat*”, “*Mayli*”, “*Yaxshi*” kabi birliklarning o‘zi turli kommunikativ ma’nolarni anglatishi mumkin: bu ma’no vaziyat, suhbatdoshlar munosabati va yozuvga qo‘shilgan grafik belgilar orqali aniqlanadi. Masalan, “*Rahmat.*” va “*Rahmat* 😊” shakllarining lug‘aviy mazmuni bir xil bo‘lsa-da, ikkinchisida minnatdorlik bilan birga samimiylik ham ifodalanadi; “*Rahmat...*” shaklida esa ko‘p nuqta ikkilanish yoki yashirin norozilikni anglatishi mumkin.

Instagram yozishmalarini o‘rganishga bag‘ishlangan tadqiqotda qisqa matnlar, emoji va qisqartmalar kommunikativ maqsadni ifodalashning muhim vositasi sifatida ko‘rsatilgan, shuningdek murojaat shakllari va “sen”/“siz” birliklarining tanlanishi faol qo‘llanishi aniqlangan [2]. Masalan, “*Ustoz, maslahatiz kerak edi*” jumlasida “*ustoz*” murojaati adresatga hurmatni ifodalasa, “*maslahatiz kerak edi*” shakli (to‘g‘ri shakli: maslahatingiz) iltimosni yumshoqroq bildiradi. Rasmiy yoki yoshi katta suhbatdoshga “siz” bilan murojaat qilish hurmatni, yaqin munosabatdagi shaxsga “sen” shakli esa samimiylikni bildiradi; mavjud munosabatga zid ravishda tanlangan shakl esa kinoya yoki masofa saqlashni yuzaga chiqarishi mumkin.

Raqamli muloqotda faol qo‘llanilayotgan emoji va grafik belgilar ham ma’lum pragmatik vazifa bajarmoqda. Emoji dastlab hissiy holatni ifodalash vositasi sifatida tarqalgan bo‘lsa-da, bugungi muloqotda uning vazifasi kengaygan: u rozilik, minnatdorlik, kinoya, hayrat kabi munosabatlarni ham ifodalaydi. Dainas va Herring tadqiqotiga ko‘ra, emoji talqini bevosita kontekst bilan bog‘liq va uning muhim vazifalaridan biri matnning ohangini o‘zgartirishdir [3]. Masalan, “*Juda yaxshi qilibsiz* 👏” jumlasida emoji baholovchi birlikning pragmatik kuchini oshiradi, “*Zo‘r qilibsiz* 😒” jumlasida esa ijobiy bahoni shubha ostiga qo‘yib, kinoyaviy mazmunni yuzaga chiqaradi. Shu sababli emoji ma’nosini faqat lug‘aviy mazmunidan emas, matn va vaziyat bilan birgalikda talqin qilish lozim.

Shu oʻrinda yana bir pragmatik vositalardan biri raqamli xabarlarni yetkazishda keng qoʻllanilayotgan hashtagning kommunikativ vazifasiga ham toʻxtalib oʻtish joiz. Raqamli kommunikatsiyada hashtag ham oddiy texnik belgi boʻlib qolmay, kommunikativ vazifaga ega vositaga aylanmoqda. Oʻzbek tilidagi materiallarda #Kitobxonlik, #Ta'lim, #YashilMakon, #Mustaqillik_35_yil, #Xalqaro_hamkorlik kabi birliklar mavzuni koʻrsatish bilan bir qatorda muallifning muayyan masalaga munosabatini ham ifodalaydi. Razikovning tadqiqotida emoji va hashtaglarning hissiy munosabatni ifodalash, matnni tartibga solish va mavzuni belgilash funksiyalari qayd etiladi [4]. Shu jihatdan hashtag mavzuni belgilovchi va kommunikativ yoʻnalishni koʻrsatuvchi pragmatik vosita sifatida baholanishi mumkin.

Raqamli kommunikatsiya umumiy texnologik asosga ega boʻlsa-da, unda milliy-madaniy xususiyatlar saqlanib qoladi. Oʻzbek va ingliz tillaridagi Instagram/Facebook materiallari asosida olib borilgan tadqiqotda oʻzbekcha raqamli matnlarda hurmat, jamoaviylik va milliy oʻzlikni ifodalovchi multimodal vositalarning muhim oʻrin tutishi qayd etilgan [5]. Ijtimoiy tarmoqlardagi muloqotda *aka, opa, ustoz, domla* kabi murojaat soʻzlar hamda *hurmatli, aziz* va boshqa birliklarning faol qoʻllanishi kommunikativ hamkorlikni ta'minlash, suhbatdoshga nisbatan ijobiy munosabat bildirish va muloqotning xushmuomala tusini saqlashga xizmat qiladi. Bu birliklar nafaqat murojaat funksiyasini bajaradi, balki nutqning pragmatik yoʻnalishini belgilovchi vositalar sifatida ham namoyon boʻladi. Masalan, "*Assalomu alaykum, ustoz*", "*Rahmat, ustoz*" kabi murojaat shakllari raqamli yozishmada ham hurmat va ijtimoiy masofani ifodalashda davom etmoqda. Demak, kommunikatsiya shakli oʻzgargani bilan milliy pragmatik me'yorlarning asosiy qismi saqlanib qoladi, faqat ularning ifodalanish shakli oʻzgaradi. murojaat birliklarining tanlanishi foydalanuvchilarning yoshi, ijtimoiy mavqeyi hamda kommunikativ vaziyat bilan bevosita bogʻliq boʻlib, ular xushmuomalalikni ifodalashning muhim vositasi hisoblanadi. Kuzatishlar asosida aytish mumkinki, oʻzbek raqamli diskursida murojaat birliklari kommunikativ etikani ta'minlovchi va ijtimoiy masofani boshqaruvchi pragmatik mexanizm sifatida faoliyat koʻrsatadi.

Raqamli kommunikatsiyaning rivojlanishi pragmatik tadqiqotlar oldiga bir qator yangi vazifalarni qoʻyadi, jumladan, oʻzbek raqamli muloqotida murojaat birliklari, baholovchi soʻzlar, emoji, hashtag, takroriy tinish belgilari kabi pragmatik birliklarning ilmiy tasnifini yaratish, matn va grafik belgining oʻzaro munosabatini chuqur oʻrganish, raqamli muhitda hurmat va muomala me'yorlarining oʻzgarishini kuzatishni amalga oshirish lozim.

Xulosa va takliflar (Conclusion / Recommendations).

Raqamli kommunikatsiyaning rivojlanishi oʻzbek tilining pragmatik imkoniyatlarini yangi kommunikativ sharoitda namoyon qilmoqda. Ijtimoiy tarmoqlar va messenjerlarda soʻz, murojaat shakli, tinish belgisi, emoji va hashtag birgalikda kommunikativ ma'no hosil qilmoqda, natijada yozma muloqotning an'anaviy chegaralari kengayib, pragmatik ma'noni ifodalash vositalari koʻpaymoqda. Shu bilan birga, texnologik yangilanish milliy kommunikativ me'yorlarni butunlay yoʻqotmaydi, balki an'anaviy pragmatik vositalar yangi raqamli shakllar bilan birgalikda qoʻllanishda davom etmoqda. Bu esa mazkur jarayonning milliy-madaniy xususiyatlarini ilmiy asosda tavsiflash lozimligini koʻrsatadi.

POYEZD POREYONIMLARINING LEKSIK-SEMANTIK XUSUSIYATLARI

Muhammadaliyev Mirzohid Nosirjon o‘g‘li
Namangan davlat universiteti tayanch doktoranti
E-mail: bekhmirzokhid27@mail.ru
ORCID: https://orcid.org/0009-0009-6715-2467

Annotatsiya: *Mazkur maqolada poyezd poreyonimlarining leksik-semantik xususiyatlari hamda nominatsion asoslari onomastik nuqtai nazardan tahlil qilingan. Tadqiqotda poyezd nomlarining shakllanishiga ta’sir etuvchi tarixiy, madaniy va lingvistik omillar yoritilib, ular akronimik, eponimik, kommersial, metaforik, zoonimik, numeronimik, toponimik, gidronimik va oronimik guruhlarga tasniflangan. Tahlil natijalari poyezd poreyonimlari transport vositalarini identifikatsiya qilish bilan birga milliy-madaniy qadriyatlar, tarixiy xotira va hududiy identitetni aks ettiruvchi muhim onomastik birliklar ekanligini ko‘rsatadi. Tadqiqot natijalari transport onomastikasi doirasida poyezd poreyonimlarining leksik-semantik xususiyatlarini yoritishga xizmat qiladi.*

Kalit so‘zlar: *poyezd poreyonimlari, transport onomastikasi, poreyonim, leksik-semantik tahlil, nominatsiya, semantik motivatsiya, onomastik tasnif, eponim, akronim, metaforik nomlar.*

ЛЕКСИКО-СЕМАНТИЧЕСКИЕ ОСОБЕННОСТИ ПОРЕЙОНИМОВ ПОЕЗДОВ

Аннотация: *В данной статье с ономастической точки зрения исследуются лексико-семантические особенности и номинационные основы порейонимов поездов. Рассматриваются исторические, культурные и лингвистические факторы, влияющие на формирование названий поездов. Порейонимы классифицируются на акронимические, эпонимические, коммерческие, метафорические, зоонимические, нумеронимические, топонимические, гидронимические и оронимические группы. Результаты исследования показывают, что названия поездов являются важными ономастическими единицами, отражающими национально-культурные ценности, историческую память и территориальную идентичность. Полученные результаты способствуют дальнейшему изучению лексико-семантических особенностей порейонимов в рамках транспортной ономастики.*

Ключевые слова: *порейоним, порейонимы поездов, транспортная ономастика, лексико-семантический анализ, номинация, ономастика, эпоним, акроним, метафорические названия.*

LEXICAL AND SEMANTIC FEATURES OF TRAIN POREYONYMS

Abstract: *This article examines the lexical and semantic features and nominative principles of train poreyonyms from an onomastic perspective. The study analyzes the historical, cultural, and linguistic factors influencing the formation of train names and classifies them into acronymic, eponymic, commercial, metaphorical, zoonymic, numeronymic, toponymic, hydronymic, and oronymic groups. The findings demonstrate that train poreyonyms are important onomastic units that not only identify railway vehicles but also reflect national and cultural values, historical memory, and territorial identity. The results contribute to the study of the lexical and semantic characteristics of train poreyonyms within the framework of transport onomastics.*

Keywords: *train poreyonyms, poreyonym, transport onomastics, lexical-semantic analysis, nomination, onomastics, eponym, acronym, metaphorical names.*

Kirish. Transport onomastikasi zamonaviy onomastikaning jadal rivojlanayotgan yo‘nalishlaridan biri bo‘lib, transport vositalari nomlarining nominatsion va semantik xususiyatlarini o‘rganadi [4; 8]. Poyezd poreyonimlari tarixiy, madaniy va lingvistik omillar ta’sirida shakllangan hamda transport vositalarini identifikatsiyalash bajarish bilan bir qatorda muayyan semantik va pragmatik mazmunni ham ifodalaydi [5; 7]. Mazkur tadqiqotning maqsadi poyezd poreyonimlarining leksik-semantik xususiyatlari va nominatsion asoslarini aniqlash hamda ularni onomastik nuqtai nazardan tizimli tahlil qilishdan iborat.

Adabiyotlar tahlili. Onomastika sohasida nomlarning nominatsion tamoyillari va semantik xususiyatlari ko‘plab tadqiqotlarda yoritilgan [3-8]. Ernst Hansack, Willy Van Langendonck va Richard Coates onomastik birliklarning semantik

tabiati hamda nominatsion mexanizmlarini nazariy jihatdan asoslab bergan [4-8]. Biroq mazkur tadqiqotlarda poyezd poreyonimlarining leksik-semantik tasnifi mustaqil tadqiqot obyekti sifatida yetarlicha yoritilmagan. Ularning tadqiqotlari nomlarning shakllanishida tarixiy, madaniy va ekstralingvistik omillarning muhim o‘rin tutishini ko‘rsatadi.

Transport onomastikasiga oid ishlarda avtomobil va aviatsiya poreyonimlari keng tadqiq etilgan bo‘lsa-da, poyezd poreyonimlarining leksik-semantik xususiyatlari va nominatsion modellari yetarli darajada o‘rganilmagan [4; 8]. O‘zbek tilshunosligida ham transport onomastikasining mazkur yo‘nalishiga oid maxsus tadqiqotlar deyarli uchramaydi. Shu bois ushbu tadqiqot poyezd poreyonimlarini nominatsion asoslari va leksik-semantik xususiyatlari nuqtai nazaridan tizimli tahlil qilish orqali mavjud ilmiy bo‘shliqni to‘ldirishga xizmat qiladi.

Mazkur tadqiqotning ilmiy yangiligi shundan iboratki, unda poyezd poreyonimlari ilk bor nominatsion usuli va semantik motivatsiyasiga ko‘ra kompleks tasniflandi hamda ularning lingvomadaniy xususiyatlari tizimli tahlil qilindi.

Tadqiqot metodologiyasi. Tadqiqotda onomastik, leksik-semantik, tavsifiy hamda qiyosiy-tahliliy metodlar kompleks yondashuv asosida qo‘llanildi. Tahlil obyekti sifatida poyezd poreyonimlari tanlanib, ular nominatsion asoslari, semantik motivatsiyasi va funksional xususiyatlariga ko‘ra tizimli ravishda tasniflandi. Shuningdek, nominatsiya jarayoniga ta’sir etuvchi lingvistik va ekstralingvistik omillar aniqlanib, poyezd nomlarining semantik tuzilishi hamda onomastik xususiyatlari qiyosiy tahlil asosida yoritildi [4; 5; 8].

Natijalar va ularning tahlili. Zamonaviy dunyoda transport vositalarining jadal rivojlanishi natijasida temiryo‘l vositalariga berilgan nomlar lingvistik va ijtimoiy jihatdan muhim ahamiyat kasb etmoqda. Poyezd nomlari nafaqat identifikatsiya vositasi, balki madaniy va semantik yuklamaga ega bo‘lgan poreyonimik birlik sifatida qaraladi. Ushbu nomlarning shakllanishida tarixiy, ijtimoiy va madaniy omillar muhim rol o‘ynaydi. Shu nuqtai nazardan, poyezd nomlarini o‘rganish zamonaviy onomastikaning dolzarb masalalaridan biri hisoblanadi [4;7] .

Onomastika nomlash, nom qo‘yish san’atini o‘rganadigan tilshunoslik sohasi bo‘lib, uning tarkibiga poreyonimlar ham kiradi. Poreyonimlar transport vositalariga berilgan nomni bildiruvchi onomastik birlik hisoblanadi. Transport onomastikasi ana shu poreyonimlarning nominatsion, semantik va pragmatik xususiyatlarini o‘rganadi [3;4]. Poyezd nomlari transport poreyonimlarining muhimtarkibiy qismini tashkil etadi.

Poyezd – bir yoki bir necha vagon tirkalgan tarkib (sostav). Vagonlar bir-biriga maxsus tirkash moslamasi *(avtoulagich)* bilan ulanadi [12; 13].

Poyezd [r. поездить – *“transport vositasida rosa yurmoq, kezmoq”* fe’lidan yasalgan ot]. Bir-biriga ketma-ket tirkalgan va lokomotiv yordamida yuradigan temir yo‘l vagonlari qatori [13].

O‘zbek tiliga *poyezd* so‘zi rus tilidan o‘zlashgan. *Poyezd* – so‘zi aslida *ездить* (yurmoq, harakatlanmoq) fe’lidan hosil bo‘lgan. По-езд – bu yerda *“no-”* old qo‘shimchasi, *“езд”* esa *“borish, yurish”* ma’nosida. Poyezd *“biror yo‘nalishda harakat qilish”, “safarga chiqish”* ma’nosini anglatgan. Keyinchalik texnika rivojlanishi bilan temiryo‘l transporti (19-asrda) paydo bo‘lgach, bu so‘z temir yo‘lda harakatlanuvchi transport vositalariga nisbatan qo‘llanila boshlandi [11].

Train (poyezd) – bu so‘z ingliz tiliga dastlab *trainen* shaklida kirib kelgan, eski fransuz tilidagi *trianer* (ya’ni *sudralmoq, tortmoq*) fe’lidan olingan. Fransuz tiliga eski lotincha *trahere – tortmoq, sudralmoq* fe’lidan kirgan [10].

Poyezd nomlari poreyonimik birlik sifatida muayyan semantik va madaniy yuklamalarga ega bo‘lib, jamiyatning tarixiy, madaniy va ijtimoiy xususiyatlarini aks ettiradi. Har bir nom tasodifiy tanlanmaydi, ular ma’lum maqsad va mazmun asosida nomlanadi.

“Afrosiyob” – O‘zbekiston bo‘ylab eng yuqori tezlikda harakatlanuvchi, Ispaniyaning Patentes Talgo S.L.U kompaniyasi tomonidan ishlab chiqarilgan Talgo-250 rusumli elektropoyezdlari [14]. 2011-yil 22-iyulda birinchi “Afrosiyob” poyezdi Toshkentga keltirilgan [14]. Hozirgi Samarqandning shimoliy chekkasida joylashgan qadimiy Afrosiyob shahri shohi sharafiga nomlangan [1]. “Afrosiyob” poyezdi nomi tarixiy shaxs nomi bilan bog‘liq bo‘lib, u milliy tarix va madaniyatni aks ettiradi. Mazkur poreyonim milliy-madaniy identitetini ifodalovchi lingvomadaniy birlik sifatida namoyon bo‘ladi.

Poyezd poreyonimlari nominatsiya usuli va semantik motivatsiyasiga ko‘ra quyidagi guruhlarga tasniflanadi. I. Nominatsiya usuliga ko‘ra:

1. Akronim – bu bir nechta so‘zlarni qisqartirib, ya’ni bir nechta so‘zlarning bosh harflaridan tuzilgan yangi so‘z (nom) hosil qilish usuli. Akronim bilan nomlangan transportlar qisqalik, fonetik qulaylik, xalqaro tushunarlilik, brend qiymati, texnik va ma’muriy yengillik kabi ma’nolarni anglatadi. Akronimlar bilan hosil qilingan poyezd nomlari:

“TGV” – Train a Grande Vitesse (fransuzcha, ammo ingliz tilida ham ko‘p ishlatiladi) – “Yuqori tezlikdagi poyezd” degan ma’noni anglatadi [8].

“ICE” (InterCity Express) – shaharlararo tez yurar poyezdlar nomi.

“TALGO” (brend) – bu ispaniyalik muhandislar yaratgan poyezd tizimining brend, u quyidagi qisqartmadan tashkil topgan: *Tren Articulado Ligero Goicoechea Oriol*. *Tren*-poyezd, *Articulado*-bog‘langan, bog‘inli, *Ligero*-yengil, *Geocoechea*-poyezd loyihalagan muhandis familiyasi (Alenjadro Goiceochea), *Oriol*-homiy va tadbirkor (Jose Luis Oriol) familiyasi [14].

Birinchi Talgo-250 poyezdi Ispaniyadan O‘zbekistonga 2011-yil iyul oyida olib kelingan. 2011-yil 26-avgustda “Afrosiyob” rasmiy ravishda ishga tushirildi. 2012-2021-yillarda Talgo-250 poyezdlari xarid qilindi va boshqa yo‘nalishlarga qo‘shildi.

2. Eponim – bu biror shaxs nomi asosida yaratilgan nom. Eponim – transport markalari yoki modellari bo‘lib, ular asoschilarining va mashhur shaxslarning ism/familiyasidan olingan. Bular antroponimik eponimlar deb ataladi. Transport poreyonimlarida antroponimlardan foydalanish shaxsni e’zozlash, tarixiy xotirani saqlash va brend identitetini shakllantirishga xizmat qiladi. Antroponimik (shaxs nomlari) eponimlar bilan atalgan poyezd nomlari:

“Afrosiyob” – bu poreyonim o‘zbek madaniyatida muhim o‘rin tutuvchi Afrosiyob obrazi hamda qaimiy Samarqand (Afrosiyob) bilan bog‘liq tarixiy-madaniy konsept asosida nomlangan. [1]. Mazkur nom milliy o‘zlik, tarixiy meros va turistik jozibani ifodalovchi semantik motivatsiyaga ega.

“Sir Nigel Gresley” – 1937-yilda Donkaster zavodida ser Nigel Greslining dizayni asosida London va Shimoliy-sharqiy temir yo‘lida foydalanish uchun qurilgan bug’ lokomotivi [4]. Mazkur poreyonim britaniyalik muhandis Sir Nigel Gresley sharafiga nomlangan bo‘lib, paravozlar dizayneri va texnika rivojiga qo‘shgan hissasini qadrlash uchun uning nomi bilan atalgan.

“Churchill Pullman” – Winston Cherchill – Ikkinchi jahon urushining mashhur britan rahbari bo‘lib va uning nomini yodga olish maqsadida shunday atalgan.

“Isambard Kingdom Brunel” – 19-asr Britaniya injeneri va poyezd nomiga tarixiy-texnik obro’ va ishonchliligini ko‘rsatish maqsadida shunday atalgan.

3. Kommersial (savdo) nom – bu mahsulot yoki texnika bozorga chiqarishda marketing va brend strategiyasiga asoslanib qo‘yilgan nomlar. Marketing maqsadida nomlangan poyezd nomlari: “Orient Express”, “Royal Scotsman”, “The Caledonian Sleeper”, “Shinkansen Series “Nozami” ”.

4. Metaforik asosda nomlangan poyezd nomlari tezlik, kuch, nafislik yoki sarguzasht ruhini ko‘rsatadi. Bu nomlar oson esda qoladi va marketing kuchini orttirib, emotsional va madaniy kontekstni hosil qiladi. Metaforik (so‘z) asosidagi poyezd nomlari:

“Flying Scotsman” – *Scotland* (Scotsman – shotlandiyalik, xalq timsoli, *“flying”* uchish, uchayotgan). *Flying Scotsman* (uchayotgan shotlandiylik) – tezlik, erkinlik, yengillik kabi metaforik ma’noga urg‘u beradi.

“The Golden Arrow” – (“arrow”- o‘q) – poyezdning tez yurarligini bildiradi; (“golden”-oltin) – hashamat va nufuz belgisi. Mazkur metafora poyezdning yuqori tezlik va estetik obrazini kuchaytiradi.

“The Silver Streak” – (“silver”-kumush) zamonaviy, tez, metall obrazi; “streak”(chaqnash) – chaqnash, iz, ma’nolarini bildirib, poyezdning tezligi va uzluksiz harakatini metaforik tarzda ifodalaydi. *The Silver Streak (“kumush chaqnash”, “kumush iz”)* – mazkur metafora tezlik va zamonaviylik obrazini ifodalaydi.

“The Blue Comet” (moviy kometa) – (“comet”-kometa) metafora sifatida tezlik, kamyoblik ma’nosi; “blue” (ko‘k) - go‘zallik va romantik obraz ma’nolarini nazarda tutadi. Bu nom orqali poyezdni osmonda tez uchuvchi obyekt darajasiga olib chiqiladi.

“The Bullet Train” – (“bullet”-o‘q) shiddatli va to‘g‘ri harakatni bildiradi; *“train”* (poyezd). *The Bullet Train* (o‘q poyezdi) – eng yuqori tezlikdagi transport vositasi.

“Midnight Express” (Tungi ekspress) – sirli, sarguzashtli, kechki sayohat. “*Midnight*” – sirli vaqt, “*express*” – tezlik va uzoq yo‘l.

II. Semantik motivatsiyasiga ko‘ra:

5. Poyezdlar zoonim (hayvon nomlari) bilan atalganda tezlik va kuchni ifodalash, obrazli brend yaratish, milliy ramz sifatida, tasavvur va hissiyot uyg‘otish, badiiy-estetik va marketing qulayligi uchun shunday nomlanadi. Hayvon nomlari bilan atalgan poyezd nomlari (zooporeyonimlar):

“Mallard” – *“Mallard”* (bir turdagi yovvoyi o‘rdak) kuchli va suzuvchi qush bo‘lib, tezlik ramzi sifatida ishlatilgan.Ya’ni, qushning tezkorlik sifatiga asoslanib bu poyezd shunday nomlangan. Mazkur poyezd bug’ lokomotivlari orasida rekord tezlikka erishgan namunalar qaqtoriga kiradi.

“Lion” – *“lion”*(arslon) g‘arbda arslon jasorat, kuch va hukmronlik timsoli. 1838-yildagi eng qadimgi bug’ poyezdlaridan biri. Mazkur nom poyezdning kuchi va ishonchliligini semantik jihatdan ifodalaydi.

“Hawk” *(*lochin*)* – bu nom ba’zi zamonaviy yoki konseptual poyezdlarda ishlatilgan. “Hawk” chaqqonlik va ko‘rish qobiliyatining metaforasi. Tezlik va yirtqichlik timsoli.

“Puffing Billy” – “Billy” bu yerda odam ismi kabi ko‘rinadi, ammo avstrayaliyaliklar buni ko‘pincha hayvon (asosan echki) bilan bog‘lashadi. Dunyodagi eng qadimiy saqlanib qolgan poyezdlardan biri.

“Bulldog” – kuchli, og‘ir, bardoshli it zotining nomi. Og‘ir yuk tashishga mos, kuchli poyezd obrazini yaratadi.

6. Raqamlar bilan atalgan poyezd nomlari.Texnik xususiyatiga raqam orqali ishora qilinadi:

1.Denotativ funksiyasi (to‘g‘ridan-to‘g‘ri ko‘rsatuvchi): “Train NO.125”,”Class 66”, “ICE 3”. Bu nomlarda raqamlar poyezdning sinfi, turi yoki xizmat raqamini bildiradi.

2.Identifikatsion funksiyasi: “No.60163 Tornado”, “800201 Azuma”. Raqamlar bu yerda poyezdning zavod yoki texnik ishlab chiqarish raqami. Onomastik jihatdan bular individual identifikatorlar bo‘lib, brend yoki boshqa nomlar bilan birga ishlatiladi.

3.Simvolik funksiyasi*:* “InterCity 125”. Bu nomda “125” nafaqat xizmat raqami, balki tezlikni (125 mph) anglatadi. Bu raqam semantik yukka ega bo‘lib, poyezdning asosiy xususiyatini bildiradi.

7. Toponimik asosida nomlangan poyezd nomlari. Poyezdlar marshrut yoki yo‘nalishni ko‘rsatish, milliy yoki hududiy faxrni ifodalash, sayyohlik va reklama uchun qulaylik, tarixiy va madaniy merosni eslatish, brend yaratishda kuchli obraz berish uchun toponimlar bilan nomlanadi.

“Caledonian Sleeper” – *Caledonia* – qadimgi Shotlandiya nomi. London-Shotlandiya o‘rtasidagi tungi poyezd. Milliy o‘zlik va romantik tasvirni beradi.

“Cornish Riviera Express” – *Cornwall (Cornish)* – Angliyaning janubiy-g‘arbiy qismi. *Riviera* – dam olish joyi. Sayohatbop, estetik, diqqatga sazovar joyni ifodalaydi.

“Highland Chieftain” – *Highlands* – Shotlandiyaning tog‘li mintaqasi. Tog‘li hudud va milliy lider obrazini uyg‘unlashtirgan.

“Sharq” (yo‘lovchi poyezd) – sharq-g‘arbga qarama-qarshi mintaqaviy yo‘nalish (geokulturotik tushuncha).

Nasaf – qadimgi Nasaf (Qarshi) shahri sharafiga atalgan.

8. Suv obyekti va inshootlari nomlari bilan atalgan poyezd nomlari (gidroporeyonimlar). Poyezdlar gidronimlar (suv obyektlari va inshootlar nomlari) bilan ataladi.Marshrut suv obyektlari bilan bog‘liq bo‘lib, suv nomi milliy yoki hududiy identitetni bildiradi va bunday nomlar tasviriy, estetik va brend qiymatiga ega, tarixiy-xotira saqlanadi.

“The Thameslink” – bu London orqali oqib o‘tuvchi daryo. Daryo asosida geografik yo‘nalishni bildiradi.

“Merseyrail” – *River Mersey* – Liverpool daryosi.

9. Oroporeyonimlar bilan atalgan poyezd nomlari. Geografik-milliy identifikatsiya – tog’ nomlari mahalliy geografiyasini aks ettirib, poyezdni shu hudud bilan bog‘laydi.

“Rocky Mountaineer” *(Canada)* – Rocky Mountains (Shimoliy Amerikadagi yirik tog’ tizmasi). Bu poyezd Kanadaning tog‘li hududlari bo‘ylab harakat qiladi. Nom geografik joy nomidan olingan bo‘lib, sayohat tabiat go‘zalliklariga asoslangan turistik xizmatni bildiradi.

Tog’ – kuch, balandlik, barqarorlik va qudrat timsolidir. Bunday nominatsiya poyezdning tezligi va ishonchliligini semantik jihatda ta’kidlaydi. Masalan:*Himalayan Queen* – Himalaya (dunyodagi eng baland tog’ tizmasi). Hindistonda Dehli va Shimla o‘rtasida harakatlanadi.

Tabiiy go‘zallik va sayohat uchun mashhur joylar bilan nomlanadi.Turistlar e’tiborini jalb qilish uchun poyezdga tog’ nomi bilan nomlanadi.Misol: “Glacier Express” – Shvetsariyadagi eng mashhur tog‘li yo‘nalishlardan biri. Nomda “Glacier” (muzlik) so‘zi tog‘li va sovuq landshaftni bildiradi.

Xulosa. Tadqiqot natijalari poyezd poreyonimlari o‘ziga xos nominatsion tamoyillar va leksik-semantik xususiyatlarga ega bo‘lgan onomastik birliklar ekanligini tasdiqladi. Tahlil jarayonida poyezd nomlari akronimik, eponimik, kommersial, metaforik, zoonimik, numeronimik, toponimik, gidronimik va oronimik nominatsiya modellari asosida tizimlashtirildi hamda ularning semantik motivatsiyasi yoritildi. Aniqlanishicha, mazkur poreyonimlar transport vositalarini identifikatsiya qilish bilan bir qatorda tarixiy xotira, milliy-madaniy qadriyatlar, geografik identitet va brend kommunikatsiyasini ifodalovchi muhim lingvomadaniy vosita vazifasini bajaradi. Tadqiqot natijalari transport onomastikasida poyezd poreyonimlarining leksik-semantik tasnifini nazariy jihatdan takomillashtirishga xizmat qiladi hamda ushbu yo‘nalishda olib boriladigan keyingi qiyosiy va tipologik tadqiqotlar uchun ilmiy asos yaratadi.

TIL LUG‘AT TARKIBIDA GEOGRAFIK KO‘RSATKICHLARNING O‘RNI VA KOGNITIV XUSUSIYATLARI

Y. Askarova Mo‘minjonovna
Andijon davlat pedagogika instituti o‘zbek tili va adabiyoti kafedrasi stajyor-o‘qituvchisi

Annotatsiya: *maqolada til lug‘at tarkibini kundan-kunga boyitib borayotgan ikkilamchi leksik nominativ birliklar – geografik ko‘rsatkichlar haqida so‘z boradi. Geografik ko‘rsatkichlarning lingvistik tabiati, semantik tuzilishi va diskursdagi vazifasi kognitiv tahlil qilinadi. Sifat bilimini hosil qiluvchi kognitiv modellar aniqlanadi. Hamda geografik terminlarni nafaqat toponimik birlik, balki lingvomadaniy va kommunikativ - diskursiv xususiyatlarga ega dinamik birliklar sifatida tahlil qiladi. Geografik terminlar hududiy nomlarni ifodalash bilan birga, ijtimoiy madaniy va tarixiy axborotni tekshiruvchi diskursiv belgi sifatidagi tabiati yoritiladi.*

Kalit so‘zlar: *geografik terminlar, toponimika, lingvomadaniylik, kommunikativ-diskursiv xususiyat, diskurs, matn, ijtimoiy-madaniy axborot.*

МЕСТО ГЕОГРАФИЧЕСКИХ УКАЗАНИЙ В СЛОВАРНОМ СОСТАВЕ ЯЗЫКА И ИХ КОГНИТИВНЫЕ ОСОБЕННОСТИ

Аннотация: *В статье рассматриваются вторичные лексические номинативные единицы, обогащающие словарный состав языка, — географические указатели. Проводится когнитивный анализ лингвистической природы, семантической структуры и дискурсивных функций географических указателей. Определяются когнитивные модели, формирующие знания о качественных признаках. В данном исследовании географические термины анализируются не только как топонимические единицы, но и как динамические единицы, обладающие лингвокультурологическими и коммуникативно-дискурсивными свойствами. Наряду с выражением территориальных названий освещается природа географических терминов как дискурсивных знаков, исследующих социокультурную и историческую информацию.*

Ключевые слова: *Географические термины, топонимика, лингвокультурология, коммуникативно-дискурсивное свойство, дискурс, текст, социокультурная информация.*

THE PLACE OF GEOGRAPHICAL INDICATIONS IN THE VOCABULARY OF A LANGUAGE AND THEIR COGNITIVE CHARACTERISTICS

Abstract: *This article examines geographical indicators as secondary lexical nominative units that continuously enrich the vocabulary of a language. It provides a cognitive analysis of the linguistic nature, semantic structure, and discursive functions of geographical indicators. The study identifies cognitive models that contribute to the formation of qualitative knowledge. This research analyzes geographical terms not only as toponymic units but also as dynamic units with linguacultural and communicative-discursive features. Along with representing regional names, the nature of geographical terms as discursive signs examining socio-cultural and historical information is highlighted.*

Keywords: *Geographical terms, toponymy, linguacultural, communicative-discursive feature, discourse, text, socio-cultural information.*

Rivojlanib borayotgan bugungi kunda geografik terminlarga bo‘lgan munosabat ham tobora ijtimoiylik kasb etib bormoqda. Jumladan, tabiiy va ma’muriy obyektlarni nomlari muayyan hududning tarixiy, madaniy va iqtisodiy xususiyatlarini aks ettiruvchi lingvistik birlik sifatida qaralmoqda. Natijada, geografik nomlarning amaliy ahamiyati yanada ortib, ular yangi huquqiy maqom kasb etib bormoqda. Kunimizda ommaviy axborot vositalari, ijtimoiy tarmoqlar orqali tez-tez quloqqa chalinayotgan “geografik ko‘rsatkichlar” iborasiga batafsil to‘xtalmoqchimiz. Barcha tillarda mavjud bo‘lgani kabi, o‘zbek tili lug‘at boyligining leksik birliklari qatoridan yuzga yaqin geografik ko‘rsatkichlar o‘rin olib borayotganligining guvohi bo‘lyapmiz. Bu birliklar asrlar davomida xalqimizning milliy-madaniy hayot tarzini, ijtimoiy taraqqiyotini tarix zarvaraqlariga muhrlamoqda. Tadqiqotimiz jarayonida geografik ko‘rsatkichlarning bir qator xususiyatlarini alohida o‘rganishni lozim topdik. Chunki ular kundan-kunga lingvistik, semiotik nuqtayi nazardan muhim ahamiyat kasb etib bormoqda.

Geografik koʻrsatkichlar – bu biror-bir tovarni a'zo davlat hududidan yoki shu hududdagi mintaqa yo joydan kelib chiqqanligini koʻrsatuvchi belgi boʻlib, bunda tovarning muayyan sifati, shuhrati yoki boshqa xususiyatlari asosan uning geografik kelib chiqishiga bogʻliq boʻladi. Mahsulotning muayyan hudud bilan uzviy bogʻliqligini, uning sifati, obroʻsi yoki oʻziga xos xususiyatlari aynan shu geografik hudud omillari bilan belgilanishini anglatadi[1]. Mamlakatimizda ham geografik koʻrsatkichlar huquqiy jihatdan muhofaza qilinib, ulardan foydalanish sohasidagi munosabatlar tartibga solingan[2]. Mazkur tushuncha nafaqat intellektual mulk huquqining muhim obyektlaridan biri, balki milliy mahsulotlarni himoya qilish, ularning bozordagi raqobatbardoshligini oshirish hamda iste'molchilarga mahsulotning kelib chiqishi va sifati haqida ishonchli ma'lumot taqdim etishda muhim ahamiyat kasb etadi.

Dunyo ilmiy adabiyotlarida geografik koʻrsatkichlar koʻproq huquq va intellektual mulk nuqtayi nazaridan tadqiq etilgan[3]. Ularning sof lingvistik xususiyatlari, ayniqsa semantik, pragmatik va kognitiv jihatlari nisbatan kamroq oʻrganilgan. Bu esa mazkur mavzuning tilshunoslik uchun dolzarbligini koʻrsatadi. Ayniqsa, oʻzbek tilshunosligida geografik koʻrsatkichlarning lingvistik tabiati, semantik tuzilishi va diskursdagi funksiyalarini kompleks oʻrganish istiqbolli ilmiy yoʻnalishlardan biri hisoblanadi.

Xususan, hudud nomlari bilan bogʻliq mahsulotlarning geografik koʻrsatkich sifatida davlat tomonidan roʻyxatga olinishi geografik terminlarning funksional imkoniyatlari kengligini namoyon etadi. Bunga misol tariqasida "Andijon devzira oshi" nomining geografik koʻrsatkich sifatida davlat reyestriga kiritilganligini keltirish mumkin[4]. Mazkur nom tarkibidagi "Andijon" geografik termini mahsulotning hududiy mansubligini ifodalab, uning oʻziga xos sifat va xususiyatlari ma'lum geografik makon bilan uzviy bogʻliqligini koʻrsatadi. Bu esa geografik terminlarning nominativ vazifa bilan cheklanmay, lingvomadaniy, identifikatsion va pragmatik funksiyalarni ham bajarishini tasdiqlaydi. Yoki boʻlmasa *Samarqand noni*[5], *Qoʻqon pichogʻi*[6] *yoki Margʻilon atlasi*[7] kabilarni sanash mumkin. Yuqoridagi geografik termin bilan birga qoʻllangan mahsulotlarning oʻziga xosligi ularning ishlab chiqarilgan hududi bilan chambarchas bogʻliq.

Geografik koʻrsatkich sifatida roʻyxatdan oʻtkazilgan jahonga mashxur Gruziya Borjomi suvi, "Fransiya Shampani" *(Champagne),* (*Parmigiano Reggiano)* "Italiya Parmezan pishlogʻi"ni deyarli dunyo mamlakatlarining katta qismi taniydi.

Oʻzbek tilida "Samarqand noni", "Qoʻqon pichogʻi", "Margʻilon atlasi" va "Margʻilon adrasi" "Andijon devzira oshi" birliklari lingvistik jihatdan ikki komponentli otli birikmalardir. Ularning birinchi komponenti toponim boʻlib, mahsulotning geografik kelib chiqish hududini bildiradi, ikkinchi komponenti esa turdosh ot sifatida mahsulotning turini ifodalaydi.Shuning uchun termin mahsulotning kelib chiqish joyi uning qiymati va xususiyatlarini belgilovchi asosiy omil ekanligini ifodalaydi. Mazkur birliklarda toponim aniqlovchi, mahsulot nomi esa aniqlanmish vazifasida kelgan. Bunda toponim faqat joy nomini anglatish bilangina cheklanmay, mahsulotning sifati, tarixiy shakllanishi, an'anaviy ishlab chiqarish usuli va hudud bilan bogʻliq obroʻsini ham semantik jihatdan ifodalaydi. Shu bois bunday birliklarda geografik nom nominativ vazifadan tashqari identifikatsion va differensial funksiyani ham bajaradi, ya'ni mahsulotni boshqa hududlarda ishlab chiqarilgan oʻxshash mahsulotlardan ajratib turadi.

Morfologik jihatdan birikmalarning ikkinchi komponenti uchinchi shaxs egalik qoʻshimchasini (-i) olgan: non+i, osh+i pichoq+i, atlas+i, adras+i. Bu qoʻshimcha oʻzbek tilidagi izofa (qaratqich-qaralmish) munosabatining belgili boʻlmagan koʻrinishini yuzaga keltiradi. Birinchi komponent qaratqich kelishigi (-ning)ni qabul qilmaydi, ammo mazmunan qaratqich munosabati saqlanadi: ***Andijon(ning) devzira oshi, Samarqand(ning) noni, Qoʻqon(ning) pichogʻi, Margʻilon (ning) atlasi.***

V.N. Teliya ta'kidlaganidek, tilda mavjud nominativ vositaning yangi vazifani bajarishi ikkilamchi leksik nominatsiya hodisasini yuzaga keltiradi[8]. Har qanday leksemaning semantik tuzilishi uch elementni taqozo etishi e'tirof etiladi: a) obyektiv olam elementlari (D); b) uning ongdagi aksi (S); v) moddiy vositalar bilan ifodalanishi (B)[9]. Mazkur nazariyalarga tayangan holda "Samarqand noni", "Qoʻqon pichogʻi", "Margʻilon atlasi" va "Margʻilon adrasi", "Andijon devzira oshi" birliklarini tahlil qilganda ularning semantik va funksional taraqqiyoti yaqqol namoyon boʻladi. Dastlab

[9] Саидхонов М. Ўзбек тилида ишораларнинг вербаллашуви ва матний хусусиятлари. Филология фанлари доктори (DSc) диссертацияси автореферати. – Fargʻona, 2022. – B. 23.

mazkur birliklar erkin otli birikma sifatida muayyan hududda ishlab chiqarilgan mahsulotni nomlash vazifasini bajargan. Masalan, “Samarqand noni” birikmasi oddiy nutqda Samarqandda pishirilgan nonni, “Andijonning devzira oshi” Andijonda aynan devzira guruchidan tayyorlangan yegulikni, “Qo‘qon pichog‘i” esa Qo‘qonda tayyorlangan pichoqni anglatgan. Bunday holatda birliklarning denotati (D) real predmet – non, osh, pichoq, atlas yoki adras bo‘lsa, signifikati (S) esa ularning ma’lum geografik hududga mansubligi haqidagi tushuncha hisoblanadi. Belgisi (B) esa ushbu tushunchani ifodalovchi lisoniy shakl – "**Samarqand noni**", "**Qo‘qon pichog‘i**", "**Marg‘ilon atlasi**" kabi nominativ birliklardir.

Bizga qiziq bo‘lgan yana bir jihat shundaki, geografik ko‘rsatkich sifatida davlat ro‘yxatidan o‘tkazilgandan so‘ng ushbu birliklarning signifikativ mazmuni kengayishidir. Endilikda ular shunchaki muayyan hududda ishlab chiqarilgan mahsulotni anglatmaydi, ayni paytda sifati, obro‘si, tarixiy an’anasi va o‘ziga xos xususiyatlari aynan shu geografik hudud bilan bog‘liq bo‘lgan, huquqiy muhofaza ostidagi mahsulotni ifodalaydi. Demak, denotat o‘zgarishsiz qolgan bo‘lsa-da, signifikat yangi semalar bilan boyiydi. Natijada lisoniy belgi ham quyidagi yangi kommunikativ vazifani bajarishga o‘tadi:

Tahlilga olingan birliklarda semantik transformatsiya aynan signifikat sathida sodir bo‘lganini ko‘rsatmoqda. Lisoniy shakl deyarli o‘zgarmagan, lekin u ifodalayotgan tushuncha yangi mazmun bilan to‘ldirildi. Natijada oddiy erkin so‘z birikmasi terminlashgan nominativ birlikka aylandi. Bu esa V.N. Teliya tomonidan tavsiflangan ikkilamchi leksik nominatsiyaning amaliy ko‘rinishi hisoblanadi.

Tilshunos olim A.Nurmonovning ta’kidlashicha, “... borliqda har qanday lisoniy belgi kommunikatsiyada reallashadi, ya’ni kishilar o‘rtasidagi aloqa-aralashuvda muayyan axborot (tushuncha) berish uchun qo‘llanadi[10]”. Mazkur nazariy qarash geografik ko‘rsatkichlarni ifodalovchi nominativ birliklar misolida ham o‘z tasdig‘ini topadi. Ular kundalik nutqda mahsulot nomi sifatida, shu bilan birga, huquqiy, iqtisodiy va marketing diskurslarida ham maxsus termin sifatida faol qo‘llanilmoqda. Bir vaqtning o‘zida ko‘pqirrali kompleks lisoniy belgi maqomini egallagan deya olamiz. Ahamiyatli jihati shundaki, bu birliklarda toponim denotativ ma’nodan tashqari konnotativ ma’no ham kasb etib, sifat, an’ana va autentiklik (asl kelib chiqish va o‘ziga xoslik)[11] ramziga aylanadi. Pragmatik va marketing signali sifatida alohida ahamiyatga ega.

Quyidagi jadvalda o‘zbek tilida faol bo‘lgan milliy geografik ko‘rsatkichlar va ularning tasviri keltirilgan:

Hudud nomi	Mahsulot tasviri	Geografik ko‘rsatkich
Andijon		devzira osh

[10]Нурмонов А. Танланган асарлар. 3 жилдлик, 1-жилд, – Тошкент: Akademnashr. – 28-б.
[11] https://uz.wikipedia.org/wiki/Autentik. Murojaat sanasi: 2. 06. 2026.

Samarqand		non
G‘ijduvon		shashlik
Marg‘ilon		adras
Qo‘qon		pichoq
Parkent		uzum
Quva		anor

Ushbu tasvirda e’tibor beradigan bir jihat bor. Tahliliy kuzatishlar shuni ko‘rsatadiki, jadvalda keltirilgan leksik birliklar alohida lisoniy element sifatida qaralganda, faqatgina birlamchi nominativ (denotativ) vazifani bajaradi va neytral semantik maydonni shakllantiradi. Biroq mazkur leksikaga lisoniy va hududiy komponent (geografik ko‘rsatkich) integratsiya qilinganda, so‘zning semantik strukturasi sifat jihatidan transformatsiyaga uchraydi. Natijada uning konseptual hajmi shunchaki moddiy predmetni ifodalash (nominatsiya) doirasidan chiqib, muayyan etnomadaniy makon bilan bog‘liq bo‘lgan lingvomadaniy obraz va milliy-madaniy konnotatsiyani reallashtirishga xizmat qiladi. Zero, xalqaro kontekstda "osh", "anor" yoki "non" tushunchalari umumiy xarakterga ega universal denotatlar hisoblansa-da, ularning muayyan hududiy-geografik mikrotoponimlar bilan bog‘lanishi ushbu birliklarni oddiy tushunchadan milliy etnosning o‘ziga xos madaniy kodini tashuvchi lingvokulturemaga aylantiradi.

“Diskurs” atamasi ma’no jihatidan “matn”ga yaqin, ammo diskurs linvistik muloqotning dinamik, vaqt bo‘yicha yuzaga keladigan xarakterini namoyon qiladi[12]. Diskurs bajarayotgan kommunikativ vazifasi jihatdan tizimlashgan va

[12] Raupova L. R., Normurodova N. Z., Khursanov N. I. Discourse: Pragmatic Features in its Expression in Literary Works. In International Conference “Uzbek Language Development and International Cooperation, 2021. – No. 01. – P. 21-32.; Раупова Л.Р. Қўшма гап дискурснинг таркибий қисми сифатида. Монография. – Тошкент, 2021. – 192 б.

muloqot vaziyatiga moslashgan nutqiy qurilmadir. Shakl va vazifa jihatidan muvofiqlashuv diskursni boshqa birliklardan farqlash imkonini beradi[13].

Mashxur ingliz olimi T.A. van Deyk diskurs terminini ta'riflar ekan, uning keng ma'noda nutqiy jarayonda verbal va noverbal vositalar yordamida yuzaga chikuvchi suzlovchi xamda tinglovchi urtasidagi uzaro munozara ekanligini ta'kidlaydi. Tor ma'noda esa kommunikativ jarayonning tugallangan yoki davom etayotgan "xosila"si, ya'ni ogzaki yoki yozma shakldagi kontekst (nutk) ekanligini uqtiradi[14]. Ushbu yondashuv geografik koʻrsatkich tarkibidagi geografik terminlarga tatbiq etilganda, ular dastlab hudud nomini, soʻngra esa oʻsha hududning tabiiy-geografik sharoiti, tarixiy tajribasi, mahalliy ishlab chiqarish an'analari, madaniy merosi va mahsulot sifati haqidagi bilimlarni ham kommunikativ tarzda uzatadi. Shu sababli geografik termin diskurs doirasida oddiy toponimdan koʻra joyning oʻziga xosligini ifodalovchi lingvomadaniy belgi sifatida namoyon boʻladi.

Tilshunos olima G.Toirova talqinicha, diskurs murakkab sistema va u quyidagi tarkibiy kismlarga ajraladi: 1) diskurs jarayoni ishtirokchilari; 2) diskurs vositasi boʻlgan umumiy til, lisoniy verbal omillar; 3) diskurs uchun umumiy boʻlgan noverbal va fonatsion omillar; 4) diskursiv maqsad; 5) diskursiv holat[15]. G.Toirova tomonidan ajratilgan diskursning tarkibiy qismlari ham geografik koʻrsatkich tarkibidagi geografik terminning tabiatini izohlashga xizmat qiladi. Diskurs ishtirokchilari *(ishlab chiqaruvchi, iste'molchi, huquqiy institutlar va mutaxassislar)* geografik terminni turli kommunikativ maqsadlarda qoʻllaydilar. Verbal omillar geografik terminning *huquqiy hujjatlar, reklama matnlari va markirovkalarda* ifodalanishini ta'minlasa, noverbal omillar mahsulot *yorligʻi, ramzlar, logotiplar va hududga xos tasvirlar* orqali uning mazmunini toʻldiradi. Diskursiv maqsad esa geografik termin vositasida mahsulotning haqiqiy kelib chiqishini tasdiqlash, uning oʻziga xos sifat xususiyatlarini asoslash hamda iste'molchida ishonch hosil qilishdan iborat boʻladi.

Jumladan, Oʻzbekiston va MDH davlatlari segmentidagi ommaviy virtual kanallarda Gruziyaning "Borjomi" tabiiy-shifobaxsh suvi qatnashgan jami postlar soni 100 000 dan oshadi.

Masalan, ijtimoiy tarmoqdan olingan quyidagi misolga e'tibor qarataylik.

Borjomi" mineral suvi sizni gastronomik sayohatga taklif qiladi.

Gruziya mineral suvi "Borjomi" yangi kommunikatsiya kampaniyasini ishga tushirmoqda va bizni gastronomik sayohatga chorlaydi.

"Oching, rohatlaning, yengillikni his eting." – bu ***Borjomi*** *brendining yangi shiori boʻlib, asosiy kommunikatsiya yoʻnalishini rivojlantirdi va 135 yildan beri davom etayotgan an'anani eslatdi.*

Yangi kampaniya gruzin mineral suvi har qanday oshpazlik tajribaning ajralmas qismi ekanini ta'kidlaydi. Borjomi bilan har qanday taom yengil va yanada yoqimli boʻladi.

Mazkur matn geografik koʻrsatkich tarkibidagi "Borjomi" geografik terminining diskursiv imkoniyatlarini yaqqol namoyon etadi. Bir qarashda "Borjomi" mineral suv nomi sifatida qoʻllangandek anglashiladi. Yuqorida keltirganimiz kabi diskurs doirasida u endi oddiy geografik nom yoki tovar belgisi vazifasidan iste'molchida assotsiatsiyalarni uygʻotuvchi koʻp qatlamli kommunikativ-kognitiv bilimlar majmuasiga aylandi.

Avvalo, matn boshidagi "Gruziya mineral suvi 'Borjomi" birikmasi mahsulot kelib chiqishida muhim hisoblangan joyini koʻrsatmoqda. Biroq diskursning keyingi rivojida "Borjomi" geografik termini endi Gruziyaning tabiiy mineral manbalari, togʻli hududlari, mineral suv sifati, uzoq yillik ishlab chiqarish tajribasi va milliy an'analari bilan bogʻliq konseptual bilimlarni faollashtiradi. Geografik terminni inson ongida geografik hudud haqidagi ensiklopedik bilimlarni yuzaga chiqaruvchi diskursiv vosita deya oʻrganishimiz mukin ekan.

[14]

[15] Тоирова Г. Прагмалингвистика - Т., 2016, - 10.

Matnda *"Oching, rohatlaning, yengillikni his eting"* shiori hamda *"135 yildan beri davom etayotgan an'ana"* iborasi geografik terminning pragmatik salohiyatini kuchaytiradi. Bu yerda "Borjomi" termini tarixiy davomiylik, ishonchlilik va sifat ramzi sifatida talqin qilinishga zamin yaratmoqda

Shuningdek, "Borjomi bilan har qanday taom yengil va yanada yoqimli boʻladi" jumlasida geografik termin mahsulotning funksional xususiyatlarini ifodalovchi kommunikativ markaz vazifasini bajaradi. Bu yerda "Borjomi" nafaqat mineral suvni, balki sogʻlom turmush tarzi, gastronomik madaniyat va yuqori sifat bilan bogʻliq qadriyatlarni ham ifodalaydi. Shu tariqa geografik termin oʻzining toponimik ma'nosidan chiqib, ijobiy emotsional va madaniy konnotatsiyalarni oʻzida mujassamlashtirgan diskursiv belgiga aylanadi.

Diskurs nazariyasiga asoslanganimizda, ushbu matnda T.A. van Deyk ta'kidlagan kommunikativ jarayonning barcha elementlari kuzatiladi:

a) *ishlab chiqaruvchi reklama matni orqali iste'molchiga murojaat qiladi*;

b) *geografik termin esa verbal vosita sifatida mahsulotning geografik kelib chiqishi, sifati va madaniy qadriyatlari haqidagi axborotni uzatadi.*

G. Toirova qayd etgan diskursiv maqsad ham aynan shu misolda yaqqol namoyon boʻladi, ya'ni geografik termin iste'molchida mahsulotga nisbatan ishonch hosil qilish, uni boshqa mineral suvlardan ajratib koʻrsatish hamda xarid qilish motivatsiyasini kuchaytirishga xizmat qiladi.

Demak, mazkur reklama matnida "Borjomi" geografik koʻrsatkich tarkibidagi geografik termin sifatida hududni identifikatsiya qiladi shuningdek, Gruziyaning tabiiy resurslari, tarixiy an'analari, mahsulot sifati va gastronomik madaniyatini birlashtiruvchi diskursiv markaz vazifasini bajaradi. Uning semantik mazmuni matnning kommunikativ maqsadi va pragmatik yoʻnalishi bilan uygʻunlashgan holda shakllanib, geografik koʻrsatkichning iste'molchi ongidagi qiymatini yanada mustahkamlaydi.

Xulosa qilib aytganda, geografik koʻrsatkichlar tarkibidagi geografik terminlarda nominativ vazifa birinchi planga chiqmaydi aksincha, eng muhimi ular orqali ifodalanadigan ikkilamchi nominatsiyalar, terminning signifikativ tomoni orqali anglashiladigan madaniy oʻziga xosliklardir.

“ALPOMISH” DOSTONIDA PRETSEDENT NOMLARNING LINGVOPOETIK VA LINGVOKULTUROLOGIK XUSUSIYATLARI

Yunusova Barchinoy Mahmudxonovna
NamDU doktoranti, PhD, dotsent
E-mail: barchinoyyunusova21@gmail.com
ORCID: https://orcid.org/0000-0002-7373-9450

Annotatsiya: *Maqolada “Alpomish” dostonidagi pretsedent nomlarning kontekstual semantikasi va lingvopoetik vazifalari tahlil qilinadi. Material Rustam, Yusuf, Kuntug‘mish, Layli-Majnun, Ali va Ayub nomlari qatnashgan poetik kontekstlardan iborat. Kontekstual, semantik-komponent, lingvopoetik va lingvokulturologik tahlil nomlarning epik-qahramonlik, diniy-axloqiy va mumtoz adabiy xotira qatlamlarini faollashtirishini ko‘rsatdi. Rustam va Ayubda yadro sema nisbatan barqaror, Yusufda esa kontekstga ko‘ra jamol yoki zindon – sinov – najot semalari faollashadi. Qiyosiy va sifatlovchi konstruksiyalar nomning muayyan madaniy belgisini ajratib, baholashni kuchaytiradi.*

Kalit so‘zlar: *pretsedent nom, “Alpomish”, madaniy xotira, lingvopoetika, kontekstual semantika, intertekstuallik, aksiologik baholash.*

ЛИНГВОПОЭТИЧЕСКИЕ И ЛИНГВОКУЛЬТУРОЛОГИЧЕСКИЕ ОСОБЕННОСТИ ПРЕЦЕДЕНТНЫХ ИМЁН В ДАСТАНЕ «АЛПОМИШ»

Аннотация: *В статье анализируются контекстуальная семантика и лингвопоэтические функции прецедентных имён в эпосе «Алпомиш». Материал составили контексты с именами Рустам, Юсуф, Кунтугмиш, Лейли-Меджнун, Али и Аюб. Контекстуальный, семантико-компонентный, лингвопоэтический и лингвокультурологический анализ выявил их связь с эпико-героической, религиозно-нравственной и классической литературной памятью. В именах Рустам и Аюб основная оценочная сема относительно устойчива, тогда как Юсуф в разных контекстах актуализирует красоту либо заключение, испытание и ожидание освобождения. Сравнительные и атрибутивные конструкции усиливают конкретный культурный признак имени.*

Ключевые слова: *прецедентное имя, «Алпомиш», культурная память, лингвопоэтика, контекстуальная семантика, интертекстуальность, аксиологическая оценка.*

LINGUOPOETIC AND LINGUOCULTURAL FEATURES OF PRECEDENT NAMES IN THE EPIC “ALPOMISH”

Abstract: *The article examines the contextual semantics and linguopoetic functions of precedent names in the Uzbek epic Alpomish. The material comprises contexts containing Rustam, Yusuf, Kuntugmish, Layli-Majnun, Ali, and Ayub. Contextual, semantic-componential, linguopoetic, and linguocultural analyses show that these names activate epic-heroic, religious-ethical, and classical literary memory. Rustam and Ayub retain relatively stable evaluative meanings, whereas Yusuf activates beauty in one context and imprisonment, ordeal, and expected deliverance in another. Comparative and attributive constructions foreground particular cultural features and intensify evaluation.*

Keywords: *precedent name, Alpomish, cultural memory, linguopoetics, contextual semantics, intertextuality, axiological evaluation.*

KIRISH

Pretsedent nom badiiy matnda atoqli otning nominativ vazifasi bilan cheklanmaydi. Lingvomadaniy jamoa xotirasida muayyan shaxs, obraz, matn yoki vaziyat bilan barqaror bog‘langan nom konkret kontekstda shu nom ortidagi madaniy bilim va baholash belgilarini faollashtiradi [1, 2]. Shu sabab pretsedent nom qahramon yoki vaziyatni batafsil tavsiflamasdan, avvaldan tanish madaniy mezon bilan qiyoslash imkonini beradi.

Maqolada milliy pretsedent nom termini nomning o‘zbek lingvomadaniy xotirasida tanilishi va baholovchi etalon sifatida ishlashiga daxldor ma’noda qo‘llanadi. Shu nuqtayi nazardan “Alpomish” tarkibidagi epik, diniy va mumtoz

adabiy manbalarga mansub nomlar turli madaniy qatlamlardan kelgan boʻlsa-da, doston auditoriyasi uchun tanish semantik-assotsiativ fondga tayanadi.

Tadqiqotning markaziy muammosi pretsedent nomning madaniy xotirada saqlangan umumiy mazmuni bilan uning konkret epik kontekstdagi faolligi oʻrtasidagi munosabatni aniqlashdir. Maqsad Rustam / Rustami Doston, Yusuf, Kuntugʻmish, Layli-Majnun, Ali / Hazrat Ali va Ayub nomlarining madaniy manbasi, kontekstual semantikasi hamda lingvopoetik funksiyasini belgilashdan iborat.

ADABIYOTLAR TAHLILI

Pretsedent nomlarning lingvokulturologik va lingvopoetik imkoniyatlari oʻzbek tilshunosligida ham oʻrganilgan. D.Andaniyazova ularning allyuziv va metaforik qoʻllanishiga e'tibor qaratadi [3]. Keyingi tadqiqotlarda pretsedent nomlarning madaniy kodlar bilan aloqasi [4], shuningdek, ularni talqin qilishda verbal kontekst va lisoniy markerlarni hisobga olish zarurligi asoslangan [5]. Bu qarashlar nom semantikasini kontekstda muayyan belgisi oldingi planga chiqadigan madaniy-semantik tuzilma sifatida tekshirishga asos beradi.

H.Siuta va hammualliflar pretsedent nomda mazmun hosil qiluvchi asosiy semantik belgi saqlanishi, yangi verbal qurshov esa uning qoʻshimcha konnotativ imkoniyatlarini faollashtirishini koʻrsatadilar [7]. K. Yan pretsedent nomning milliy-madaniy mazmunini assotsiativ bilim, lugʻaviy ma'lumot va real diskurs kontekstlarini birlashtirgan holda oʻrganadi [9].

"Alpomish" bilan bogʻliq material pretsedentlikning yana bir muhim jihatini ochadi. Dostonning bosh qahramoni asar ichida konkret personaj nomi boʻlsa, keyingi nutqiy qoʻllanishlarda baholovchi etalon maqomini oladi. G.M. Ismailov oʻzbek tilida Alpomishday yigit, Alpomishday mard shakllarini pretsedent antroponim bilan bogʻliq qoʻllanishlar qatorida keltiradi. T.Qahhorning *"Alpomishday bir yigit gʻamgin boqib turar jim"* misrasi ham nomning konkret epik qahramondan boshqa shaxsni tavsiflovchi madaniy mezonga koʻchganini koʻrsatadi [10]. Ismailov manbasida bu misollar aynan Alpomish pretsedent antroponimi bilan bogʻlangan.

Qiyosiy jihatdan shu hodisa qozoq materialida ham kuzatiladi. A.Sh. Kappassova va hammualliflar Alpamys Batyr nomining pretsedent tuzilishini differensial yadro va periferik qatlam asosida tavsiflaydilar; uning asosiy belgilariga botirlik, qahramonlik va jasorat kiritilgan [8]. Maqoladagi sxemada ham Alpamys nomining yadrosi "batyr", "hero", "bold, courageous" belgilaridan tashkil topgani koʻrsatilgan. Zamonaviy qozoq diskursida bu nom jasorat va botirlik ramzi sifatida qoʻllanadi. Demak, Alpomish/Alpamys nomining pretsedentligi doston matni bilan chegaralanmaydi; u turkiy lingvomadaniy makonda qahramonlikni baholashga xizmat qiluvchi tanish etalon sifatida ham yashaydi.

Ushbu tadqiqotlarda pretsedent nomning madaniy xotira bilan bogʻliqligi turli metodologik nuqtayi nazardan asoslangan. "Alpomish" materiali esa masalani konkret verbal qurshov doirasida aniqlashtirishga imkon beradi. Nom bilan bogʻlangan semantik imkoniyatlardan ayni epizodda qaysi biri tanlanadi va bu tanlov qaysi lisoniy shakl orqali yuzaga chiqadi? Shu sabab maqolada pretsedent mazmunning mavjudligini qayta tavsiflashdan koʻra, uning epik kontekstda semantik tanlanishi va poetik baholashni qanday tashkil etishi markazga qoʻyildi.

MATERIAL VA METODLAR

Tadqiqot materiali Fozil Yoʻldosh oʻgʻli variantidagi "Alpomish" dostonida uchraydigan Rustam / Rustami Doston, Yusuf, Kuntugʻmish, Layli–Majnun, Ali / Hazrat Ali va Ayub nomlari qatnashgan poetik kontekstlardan tashkil topdi [6]. Material tanlashda nomning oldindan mavjud epik, diniy yoki adabiy obraz va baholash mezoniga murojaat qilishi asosiy mezon boʻldi [1, 2].

Tahlil birligi sifatida pretsedent semani aniqlash uchun yetarli boʻlgan minimal matniy kontekst olindi. Masalan, *Yusuf tal'atli* [6, B. 97] va *Qutulmadim Yusuf kabi zindondan* [6, B. 333] bir nom bilan bogʻliq turli semantik qirralarni yuzaga chiqaruvchi mustaqil kontekstlar sifatida tekshirildi.

Kontekstual tahlil nomning konkret vaziyatdagi faol semasini, komponent-semantik tahlil mazkur semani ajratib turuvchi belgilarni, lingvopoetik tahlil esa qiyos, sifatlash, gradatsiya va boshqa konstruksiyalarning baholashdagi rolini aniqlashga xizmat qildi. Lingvokulturologik tahlil nomlarning epik, diniy va adabiy xotira bilan aloqasini belgilashda qoʻllandi [1, 3, 4]. Birliklar madaniy manba - kontekstual faol sema – lisoniy shakl – lingvopoetik funksiya munosabati asosida tizimlashtirildi.

NATIJALAR

Tahlil pretsedent nomlarning madaniy manbasi, kontekstda faollashgan semasi va poetik vazifasi jihatidan farqlanishini koʻrsatdi. Materialda epik-qahramonlik, diniy-axloqiy, diniy-qahramonlik hamda Sharq mumtoz adabiy xotirasi bilan bogʻlangan nomlar ajralib turadi.

Rustam / Rustami Doston epik-qahramonlik xotirasining eng faol birliklaridan biridir. *"Alplarning boshligʻi Rustami Doston edi, oxiri bu – Alpomish alp boʻlsin"* parchasida Rustam alplik mezonini belgilaydi [6, B.15]. *"Yusuf tal'atli, Rustam sifatli"* hamda *"Jasading bor Rustamdan ham ziyoda"* shakllarida esa nom jismoniy qudrat va bahodirlik bilan bogʻliq etalon vazifasini oladi [6, B.97]. Kontekstlar oʻzgarsa-da, Rustam nomining qahramonlik yadrosi saqlanadi.

Kuntug‘mishlarga mengzadim [6, B.101] shaklida -lar ko‘plik ko‘rsatkichi nomning individual qahramonga daxldor ma’nosini kengaytirib, uni **epik bahodirlikning umumlashgan mezoni**ga yaqinlashtiradi. *Mengzamoq* fe’li bilan birikkan bu shakl Alpomish qiyofasini Kuntug‘mish bilan oddiy o‘xshatishdan ko‘ra kengroq intertekstual bahoga olib chiqadi.

Yusuf nomi bilan bog‘liq semantik belgilardan qaysi birining faollashishi bevosita verbal kontekstga bog‘liq.. *“Yusuf tal’atli”* birikmasidagi *tal’atli* komponent Yusuf haqidagi madaniy xotiraning husn va qiyofa bilan bog‘liq qirrasini faollashtiradi [6, B.97]. *“Qutulmadim Yusuf kabi zindondan”* misrasida esa nom Yusuf qissasidagi zindon voqeasi bilan bog‘lanadi [6, B.333]. Bu yerda *kabi* qiyos vositasiga *qutulmadim* inkor shaklining qo‘shilishi alohida ahamiyat kasb etadi, Yusufning zindondan xalos bo‘lishi ma’lum pretsedent vaziyat sifatida esga tushiriladi, Alpomishning esa hali qutulmagani shu modelga qarshi qo‘yiladi. Nom tutqunlik va sinovni eslatish bilangina cheklanmay, kutilayotgan najotning yashirin mezoniga ham aylanadi.

Ali / Hazrat Ali nomida diniy-qahramonlik mazmuni ustun. *“Aliday sher”* qiyosi mardlik va jangovar qudratni, *“Yo madad tilayman Hazrat Alidan”* murojaati esa homiylik va muqaddas madad semasini faollashtiradi [6, B.136]. Demak, nomning qahramonlik yadrosi saqlanadi, biroq konkret nutqiy qurilish uning boshqa funksional qirrasini oldingi planga chiqaradi. Ayub nomi esa *“Baloga sabr etgan hazrati Ayub”* shaklida sabr va bardoshning diniy-axloqiy etalonini belgilaydi [6, B.136].

Layli-Majnun qo‘shaloq nomi Sharq mumtoz adabiy xotirasini faollashtiradi. Barchinning *“Layli-Majnun edi jahonga ustod, / Falakning qavlidan dod bilan bedod”* misralarida pretsedent juftlik ishqning o‘zidan ko‘ra ayriliq, dard va falak zarbasi bilan bog‘liq fojiali fonni kuchaytiradi [6, B.293]. Qo‘shaloq nom ikki alohida personajga murojaat qilmay, mumtoz adabiy xotirada yaxlitlashgan ishqiy-fojiaviy syujetni ixcham holda matnga olib kiradi.

Pretsedent semaning lingvopoetik faolligi ayniqsa nomni qurshagan grammatik va leksik vositalarda ochiladi. *Yusuf tal’atli, Rustam sifatli* parallel konstruksiyasida ikki pretsedent nom bir xil sintaktik qolipda keladi, biroq ularning semantik yo‘nalishi bir xil emas. *Tal’atli* Yusufning tashqi qiyofaga daxldor belgisini bevosita tanlaydi. S*ifatli* esa semantik jihatdan umumiyroq bo‘lib, Rustam nomining pretsedent yadrosi va epik kontekst orqali bahodirlik fazilatiga to‘ldiriladi. Parallelizm shu tariqa Alpomish portretining estetik va qahramonlik qirralarini yonma-yon joylashtiradi.

“Jasading bor Rustamdan ham ziyoda” konstruksiyasida chiqish kelishigi, *ham* yuklamasi va *ziyoda* komponenti qiyosni gradatsion bahoga aylantiradi [6, B. 97]. Rustam bu yerda bahodirlikning tanilgan yuqori me’yori. Alpomishning undan ham “ziyoda” deb baholanishi pretsedent etalonni qahramon fazilatini o‘lchovchi **aksiologik mezon** vazifasini bajaradi.

“Aliday sher” shaklida -day qiyos ko‘rsatkichi Ali nomining diniy-qahramonlik semasini *sher* leksemasidagi jasorat va kuch konnotatsiyasi bilan birlashtiradi [6, B.136]. Bu yerda pretsedent qiyos va zoomorf poetik baho bir nuqtada tutashib, mardlik belgisini kuchaytiradi.

Kuntug‘mishlarga mengzadim konstruksiyasida esa ko‘plik shakli va *mengzamoq* fe’li muhim. -lar nomni to‘liq turdosh otga aylantirmaydi, biroq individual Kuntug‘mish obrazini tipik epik qahramonlik mezoniga yaqinlashtiradi. Shu sabab qiyos bir personaj bilan tashqi o‘xshashlikni qayd etishdan ko‘ra kengroq intertekstual baho hosil qiladi.

Asosiy pretsedent konstruksiyalarda lisoniy shakl, faol sema va lingvopoetik vazifa o‘rtasidagi munosabat 1-jadvalda umumlashtirildi.

Jadval 1

“Alpomish” dostonidagi pretsedent konstruksiyalarning lisoniy-semantik va lingvopoetik tavsifi

Pretsedent konstruksiya	Faollashtiruvchi lisoniy vosita	Faollashgan sema	Lingvopoetik vazifa	Manba
Yusuf tal’atli	tal’atli sifatlovchisi	jamol, qiyofa mukammalligi	portretning estetik bahosini aniqlashtirish	[6, B.97]
Rustam sifatli	sifatli + Rustamning pretsedent yadrosi	bahodirlik, jismoniy qudrat	qahramonlik tavsifini madaniy etalon bilan bog‘lash	[6, B.97]
Jasading bor Rustamdan ham ziyoda	-dan + ham + ziyoda	bahodirlik etalonidan yuqorilik	gradatsion-aksiologik baho yaratish	[6, B.97]
Qutulmadim Yusuf kabi zindondan	kabi + qutulmadim + zindon	tutqunlik, sinov, kutilayotgan najot	pretsedent vaziyatni qiyosiy-qarama-qarshi fonda faollashtirish	[6, B.333]
Aliday sher	-day + sher	mardlik, jangovar qudrat	pretsedent qiyos va zoomorf bahoni kuchaytirish	[6, B.136]

Kuntug‘mishlarga mengzadim	-lar + mengzamoq	tipik epik qahramonlik	individual nomni umumlashgan epik mezonga yaqinlashtirish	[6, B.101]

MUHOKAMA

Jadvaldan ko‘rinadiki, pretsedentlikni faqat nomning tanilganligi bilan izohlash yetarli emas. Uning konkret poetik vazifasi nomni qurshagan til vositalari bilan belgilanadi. Rustamda yadro sema turli konstruksiyalarda saqlanib qolsa, Yusufda lisoniy qurshov pretsedent xotiraning turli segmentlarini tanlaydi. Ali nomida esa yadro o‘zgarmagan holda jangovar bahodan diniy madadga funksional siljish yuz beradi.

Bu natija H.Siuta va hammualliflarning pretsedent nom asosiy arxisemasini saqlagan holda yangi kontekstda qo‘shimcha konnotativ qirralar bilan faollashishi haqidagi qarashi bilan tutashadi [7]. “Alpomish” materialida esa kontekstning roli ayrim hollarda yanada aniq ko‘rinadi: u faqat yadro semaga qo‘shimcha ma’no yuklamaydi, balki nom bilan bog‘liq keng madaniy xotiraning qaysi segmenti konkret epizodga kirishini ham belgilaydi.

Kappassova va hammualliflar “Alpamys” kabi folklor nomlarining keyingi media diskursida pretsedent nom maqomida ishlashini ko‘rsatadilar [8]. Mazkur maqoladagi material esa jarayonning boshqa yo‘nalishini ochadi: “Alpomish”ning o‘ziga undan oldin shakllangan epik, diniy va mumtoz adabiy xotira Rustam, Yusuf, Kuntug‘mish, Ali, Ayub va Layli–Majnun singari nomlar orqali kiradi. Shu sabab ushbu tadqiqotning bevosita natijasi folklor qahramonining keyingi pretsedentlashuvini emas, **tayyor pretsedent nomning epik matnda qayta semantik faollashuvini** tavsiflash bilan bog‘liq.

XULOSA

“Alpomish”dagi Rustam, Yusuf, Kuntug‘mish, Layli-Majnun, Ali va Ayub nomlari epik-qahramonlik, diniy-axloqiy va mumtoz adabiy xotira qatlamlarini matnga olib kirib, qahramon hamda vaziyatni tayyor madaniy mezonlar asosida baholaydi. Rustam va Ayubda yadro sema nisbatan barqaror, Yusufda esa kontekstual o‘zgarish kuzatiladi.

Qiyosiy va sifatlovchi konstruksiyalar nom bilan bog‘langan semalardan muayyan birini ajratib, baholash yo‘nalishini belgilaydi. Shu asosda pretsedent nomning epik matndagi faoliyati madaniy xotira – kontekst – lisoniy konstruksiya – baholash munosabati orqali izohlandi. Tadqiqot Fozil Yo‘ldosh o‘g‘li varianti bilan chegaralangan. Boshqa turkiy versiyalarni qiyoslash ushbu modelning variantlararo imkoniyatlarini aniqlashga yordam beradi.

Mazkur xulosa pretsedent nomlarni faqat intertekstual ishora yoki tayyor ramz doirasida emas, kontekstda semantik jihatdan tanlanadigan va baholashni tashkil etadigan dinamik lingvomadaniy birlik sifatida o‘rganish zarurligini ko‘rsatadi.

TILSHUNOSLIKDA SUN’IY INTELLEKT INTEGRATSIYASINING AFZALLIKLARI

Tadjibayev Muzaffar Turamirzayevich
Toshkent Kimyo xalqaro universiteti Namangan filiali v.b. dotsenti
E-mail: abdugaffor16@gmail.com

Annotatsiya: *Mazkur maqolada tilshunoslikda sun’iy intellekt integratsiyasi afzalliklari tahlil qilinadi. Tadqiqotda tilni qayta ishlash, korpus lingvistikasi, mashinaviy tarjima, nutq texnologiyalari va generativ sun’iy intellektning tilshunoslikdagi o‘rni yoritiladi. Sun’iy intellektning katta hajmdagi lingvistik ma’lumotlarni tezkor tahlil qilish, ilmiy tadqiqotlar samaradorligini oshirish, ko‘p tilli modellarni rivojlantirish hamda kam resursli tillarni raqamlashtirishdagi imkoniyatlari ilmiy manbalar asosida ko‘rib chiqiladi.*

Kalit so‘zlar: *sun’iy intellekt, tilshunoslik, tabiiy tilni qayta ishlash, korpus lingvistikasi, mashinaviy tarjima, generativ sun’iy intellekt, katta til modellari, nutq texnologiyalari, raqamli tilshunoslik.*

ПРЕИМУЩЕСТВА ИНТЕГРАЦИИ ИСКУССТВЕННОГО ИНТЕЛЛЕКТА В ЛИНГВИСТИКУ

Аннотация: *В данной статье анализируются преимущества интеграции искусственного интеллекта в лингвистику. В исследовании рассматривается роль обработки языка, корпусной лингвистики, машинного перевода, речевых технологий и генеративного искусственного интеллекта в лингвистических исследованиях.*

Ключевые слова: *искусственный интеллект, лингвистика, обработка естественного языка, корпусная лингвистика, машинный перевод, генеративный искусственный интеллект, большие языковые модели, речевые технологии, цифровая лингвистика.*

ADVANTAGES OF ARTIFICIAL INTELLIGENCE INTEGRATION IN LINGUISTICS

Abstract: *This article analyzes the theoretical and practical advantages of integrating artificial intelligence into linguistics. The study examines the role of natural language processing, corpus linguistics, machine translation, speech technologies, and generative artificial intelligence in linguistic research. Particular attention is paid to the ability of AI to process large-scale linguistic data rapidly, improve the efficiency of scientific research, develop multilingual models, and support the digitalization of low-resource languages.*

Keywords: *artificial intelligence, linguistics, natural language processing, corpus linguistics, machine translation, generative artificial intelligence, large language models, speech technologies, digital linguistics.*

Kirish

Raqamli texnologiyalarning jadal rivojlanishi va sun’iy intellekt (SI) texnologiyalarining turli fan sohalariga keng tatbiq etilishi tilshunoslik fanining rivojlanishida ham yangi bosqichni boshlab berdi. Tabiiy tilni qayta ishlash (Natural Language Processing – NLP), mashinaviy o‘rganish (Machine Learning – ML) hamda yirik til modellari (Large Language Models – LLM) asosida ishlab chiqilgan sun’iy intellekt tizimlari lingvistik tadqiqotlarni amalga oshirish, katta hajmdagi matnlar korpusini tahlil qilish, avtomatik tarjima, nutqni tanish va sintez qilish, matn yaratish hamda til o‘qitish jarayonlarini sezilarli darajada takomillashtirmoqda [3]. Natijada an’anaviy tilshunoslik metodlari raqamli texnologiyalar bilan uyg‘unlashib, tadqiqotlarning aniqligi, tezligi va ko‘lamini oshirishga xizmat qilmoqda.

Sun’iy intellektning tilshunoslikka integratsiyalashuvi nafaqat ilmiy izlanishlarning samaradorligini yuksaltirdi, balki til birliklarini avtomatik tahlil qilish, semantik va pragmatik munosabatlarni aniqlash, diskurs tahlili hamda ko‘p tilli ma’lumotlarni qayta ishlash imkoniyatlarini ham kengaytirdi. Ayniqsa, generativ sun’iy intellekt texnologiyalarining rivojlanishi ilmiy tadqiqotlar, tarjimashunoslik, korpus lingvistikasi va kompyuter lingvistikasida yangi metodologik yondashuvlarning shakllanishiga sabab bo‘lmoqda. Shu bilan birga, ushbu texnologiyalarni ilmiy faoliyatga joriy etish ma’lumotlar ishonchliligi, etik me’yorlarga rioya qilish va mualliflik masalalari kabi dolzarb muammolarni ham yuzaga keltirmoqda.

Mazkur maqolada tilshunoslikda sun’iy intellekt integratsiyasining asosiy afzalliklari, uning lingvistik tadqiqotlar samaradorligini oshirishdagi o‘rni hamda zamonaviy tilshunoslik rivojiga ko‘rsatayotgan ta’siri ilmiy manbalar asosida tahlil qilinadi.

Adabiyotlar tahlili

Tilshunoslikda sun’iy intellektni qo‘llash masalalari so‘nggi yillarda kompyuter lingvistikasi, tabiiy tilni qayta ishlash (Natural Language Processing – NLP) hamda hisoblash lingvistikasi yo‘nalishlarida keng tadqiq etilmoqda. Xususan, sun’iy intellektning tilni avtomatik tahlil qilish, semantik munosabatlarni aniqlash, matnlarni tasniflash va mashinali tarjima sifatini oshirishdagi o‘rni ko‘plab ilmiy ishlarda asoslab berilgan [2]. Tadqiqotchilar sun’iy intellektning katta hajmdagi lingvistik ma’lumotlarni qisqa vaqt ichida qayta ishlash imkoniyati tilshunoslik tadqiqotlarining samaradorligini sezilarli darajada oshirishini ta’kidlaydilar.

Sun’iy intellekt asosidagi yirik til modellari (Large Language Models) tilni tushunish va matn yaratish jarayonida yangi bosqichni boshlab berdi. Jumladan, Braun va uning jamoasi tomonidan 2020 yilda ishlab chiqilgan GPT modeli hamda OpenAI tomonidan taqdim etilgan yangi avlod modellarining ilmiy va amaliy imkoniyatlari matn yaratish, tarjima, referatlash va lingvistik tahlil kabi vazifalarda yuqori natijalarni namoyon etgani qayd etilgan [8]. Bunday modellar til birliklari o‘rtasidagi murakkab semantik va pragmatik bog‘lanishlarni aniqlash orqali tilshunoslik tadqiqotlarini yangi metodologik asos bilan boyitmoqda.

Tilshunoslikda sun’iy intellektning afzalliklari haqida Jeffri Xinton, Yoshua Benjio, Yan LeKun tomonidan ilgari surilgan chuqur o‘rganish (Deep Learning) konsepsiyasi ham muhim nazariy asoslardan biri hisoblanadi. Mazkur yondashuv tabiiy tilni qayta ishlash tizimlarining aniqligini sezilarli darajada oshirib, morfologik, sintaktik va semantik tahlillarni avtomatlashtirish imkoniyatini yaratdi [9]. Shuningdek, Bender va Ko‘llerlar (2020) sun’iy intellekt tizimlarining tilni qayta ishlashdagi yutuqlarini e’tirof etgan holda, ularning natijalarini lingvistik va semantik nuqtayi nazardan ehtiyotkorlik bilan baholash zarurligini ta’kidlaydilar [1]. Ushbu yondashuvlar sun’iy intellektni tilshunoslikka integratsiya qilish nafaqat tadqiqotlar samaradorligini oshirish, balki til hodisalarini chuqurroq tahlil qilish uchun ham keng imkoniyatlar yaratishini ko‘rsatadi.

Tadqiqot metodologiyasi

Mazkur maqolada tilshunoslikda sun’iy intellekt integratsiyasining afzalliklarini ilmiy jihatdan yoritish maqsadida deskriptiv-tahliliy metod qo‘llanildi. Ushbu metod asosida sun’iy intellektning tabiiy tilni qayta ishlash (Natural Language Processing), korpus tilshunosligi, mashinaviy tarjima, nutqni avtomatik tanish va matn generatsiyasi kabi yo‘nalishlardagi imkoniyatlari ilmiy manbalar asosida tavsiflandi va tahlil qilindi. Shuningdek, sun’iy intellektning lingvistik tadqiqotlar samaradorligini oshirishdagi o‘rni hamda uning amaliy ahamiyati zamonaviy ilmiy qarashlar asosida izohlandi.

Komparativ (qiyosiy) metod yordamida an’anaviy lingvistik tadqiqot usullari bilan sun’iy intellekt asosidagi yondashuvlarning imkoniyatlari o‘zaro taqqoslandi. Xususan, katta hajmdagi til korpuslarini qayta ishlash, semantik va sintaktik tahlilni avtomatlashtirish, mashinaviy tarjima hamda nutq texnologiyalarining samaradorligi qiyosiy jihatdan baholandi.

Bundan tashqari, ilmiy manbalarni tahlil qilish va tizimlashtirish metodi asosida sun’iy intellekt hamda tilshunoslik integratsiyasiga oid zamonaviy tadqiqotlar o‘rganildi. Xususan, Russell va Norvig, Jurafsky va Martin, Manning, Bender hamda boshqa olimlarning ilmiy ishlari umumlashtirilib, ularning nazariy qarashlari tadqiqotning metodologik asosini tashkil etdi.

Natijalar va ularning tahlili

Sun’iy intellekt (SI) texnologiyalarining jadal rivojlanishi XXI asrda deyarli barcha fan sohalariga, jumladan, tilshunoslikka ham sezilarli ta’sir ko‘rsatmoqda. Agar XX asrning ikkinchi yarmida kompyuter lingvistikasi asosan til birliklarini formal tavsiflash va avtomatik qayta ishlash masalalari bilan shug‘ullangan bo‘lsa, bugungi kunda generativ sun’iy intellekt, katta til modellari (Large Language Models – LLM), chuqur o‘rganish (Deep Learning) va neyron tarmoqlar til hodisalarini tahlil qilish, modellashtirish hamda yangi lingvistik bilimlarni yaratishda muhim vositaga aylandi. Zamonaviy tilshunoslikda sun’iy intellekt faqat texnik vosita emas, balki ilmiy tadqiqot metodologiyasini o‘zgartirayotgan innovatsion omil sifatida baholanmoqda.

Tilshunoslik va sun’iy intellekt o‘rtasidagi integratsiya tabiiy tilni qayta ishlash (Natural Language Processing – NLP) yo‘nalishining shakllanishiga asos bo‘ldi. NLP kompyuterlarga inson tilini tushunish, tahlil qilish, qayta ishlash va yaratish imkonini beruvchi fanlararo yo‘nalish bo‘lib, u lingvistika, matematika, informatika va sun’iy intellektning kesishgan nuqtasida rivojlanmoqda. Mazkur yo‘nalishning asosiy maqsadi inson va kompyuter o‘rtasidagi tabiiy tilda samarali muloqotni ta’minlashdan iborat. Bugungi kunda NLP mashinaviy tarjima, matnni avtomatik tahlil qilish, nutqni tanish, dialog tizimlari, avtomatik referatlash, hissiy tahlil va matn generatsiyasi kabi ko‘plab amaliy vazifalarni muvaffaqiyatli bajarishga xizmat qilmoqda.

So‘nggi yillarda generativ sun’iy intellektning rivojlanishi tilshunoslik tadqiqotlarida tub burilish yasadi. Xususan, Transformer arxitekturasi asosida yaratilgan GPT, Gemini, Claude, Llama kabi katta til modellari milliardlab matn birliklari

asosida oʻqitilib, grammatik jihatdan mukammal va mazmunan mantiqiy matnlarni yaratish imkoniyatiga ega boʻldi. Ushbu modellar sintaktik va semantik bogʻlanishlarni chuqur oʻzlashtirishi sababli ular nafaqat oddiy til vazifalarini, balki murakkab lingvistik tahlillarni ham bajarishga qodir ekanligi isbotlandi.

SI katta hajmdagi matnlarni avtomatik belgilash (annotation), morfologik tahlil qilish, sintaktik tizimlarni qurish hamda semantik munosabatlarni aniqlash kabi jarayonlarni sezilarli darajada tezlashtirmoqda. Kyurri, Makeneri va Bruksning ta'kidlashicha, generativ sun'iy intellekt lingvistikaning an'anaviy metodlarini inkor etmaydi, aksincha ularni yangi metodologik imkoniyatlar bilan boyitadi. Mualliflar SI va amaliy tilshunoslik oʻrtasida "moslashuv" (alignment) tamoyili muhim ekanini qayd etib, texnologik imkoniyatlar lingvistik nazariya bilan uygʻunlashgandagina yuqori natijalar berishini ta'kidlaydilar. Ayniqsa, korpus lingvistikasida avtomatik chastota tahlili, kollokatsiyalarni aniqlash, semantik tarmoqlarni qurish va diskurs tahlili kabi jarayonlarda SI vositalari tadqiqotchining imkoniyatlarini bir necha barobarga kengaytirmoqda.

Ikkinchi muhim afzallik lingvistik modellashtirish imkoniyatining kengayganligidir. An'anaviy statistik modellar koʻpincha cheklangan parametrlar asosida ishlagan boʻlsa, chuqur neyron tarmoqlar tilning murakkab va yashirin qonuniyatlarini ham aniqlay olmoqda. Bu esa semantik yaqinlik, kontekstual ma'no, koʻpma'nolilik va metaforik ifodalarni avtomatik aniqlash imkoniyatini yaratmoqda. Ayniqsa, Transformer arxitekturasi asosida ishlab chiqilgan modellar uzun sintaktik bogʻlanishlarni ham muvaffaqiyatli modellashtira olishi bilan oldingi avlod algoritmlaridan tubdan farq qiladi.

Sun'iy intellektning yana bir ustun jihati kam resursli tillar uchun yangi imkoniyatlar yaratishidir. Ilgari ingliz, xitoy yoki fransuz kabi katta korpuslarga ega tillar sun'iy intellekt tadqiqotlarida ustunlik qilgan boʻlsa, bugungi kunda tillararo oʻrganish, boshqa tillarga oʻkazish texnologiyalari oʻzbek, qozoq, qirgʻiz, uygʻur kabi kam resursli tillarni ham raqamli rivojlantirish imkonini bermoqda. Bu esa milliy tillarni saqlash, raqamlashtirish va ilmiy tadqiq qilishda muhim ahamiyat kasb etmoqda.

Soʻnggi ilmiy kuzatishlar shuni koʻrsatmoqdaki, sun'iy intellekt tilshunoslikni faqat avtomatlashtirish vositasi emas, balki yangi ilmiy bilimlarni yaratish platformasiga aylantirmoqda. Ilgari tadqiqotchi mavjud nazariyalarni tekshirgan boʻlsa, bugungi kunda SI millionlab matnlar asosida ilgari sezilmagan qonuniyatlarni aniqlab, yangi ilmiy gipotezalarni ilgari surishga yordam bermoqda. Shu sababli zamonaviy lingvistika sun'iy intellektni yordamchi texnologiya emas, balki ilmiy tadqiqotning strategik komponenti sifatida baholamoqda.

Sun'iy intellektning tilshunoslikdagi eng muhim qoʻllanilish sohalaridan biri tabiiy tilni qayta ishlash (Natural Language Processing – NLP) hisoblanadi. NLP inson tilining fonetik, morfologik, sintaktik, semantik va pragmatik xususiyatlarini kompyuter yordamida modellashtirishga xizmat qiladi. Soʻnggi yillarda chuqur oʻrganish (Deep Learning) va Transformer arxitekturasi asosidagi modellar NLP tizimlarining aniqligini sezilarli darajada oshirdi. Buning natijasida avtomatik matn tahlili, axborotni ajratib olish, savol-javob tizimlari, avtomatik referatlash, hissiy tahlil (sentiment analysis) va dialog tizimlari kabi vazifalarda inson mehnatini sezilarli darajada kamaytirishga erishildi [1].

Bugungi kunda generativ sun'iy intellekt vositalari lingvistik ma'lumotlarni tahlil qilish bilan bir qatorda yangi matnlarni yaratish, uslubiy xususiyatlarni saqlagan holda qayta yozish va turli kommunikativ vaziyatlarga moslashtirish imkoniyatiga ega. Bu esa amaliy tilshunoslik, diskurs tahlili, stilistika hamda media lingvistikasi kabi yoʻnalishlarda yangi tadqiqot metodlarini shakllantirmoqda. Katta til modellari matnning grammatik tuzilishi, uslubi va semantik yaxlitligini bir vaqtning oʻzida hisobga olishi sababli ular oldingi statistik modellar bilan taqqoslaganda ancha yuqori natijalarni namoyon etmoqda [2].

Sun'iy intellekt integratsiyasining muhim afzalliklaridan biri korpus lingvistikasida yaqqol namoyon boʻlmoqda. Korpus lingvistikasi millionlab matnlardan iborat elektron bazalarni tahlil qilishga asoslanadi. An'anaviy usullarda bunday hajmdagi ma'lumotlarni tahlil qilish katta vaqt va inson resurslarini talab qilgan. SI texnologiyalari esa korpuslarni avtomatik belgilash (annotation), lemmatizatsiya, morfologik tahlil, sintaktik tizimlarni qurish va semantik guruhlarga ajratish kabi vazifalarni yuqori aniqlik bilan bajaradi. Natijada tadqiqotchilar til birliklarining qoʻllanish chastotasi, kollokatsiya (soʻz birikma)lar, diskurs modellari va stilistik tendensiyalarni qisqa vaqt ichida aniqlash imkoniyatiga ega boʻlishdi [3].

Korpus lingvistikasida sun'iy intellekt asosidagi avtomatik klasterlash algoritmlarining qoʻllanilishi yangi ilmiy natijalarni yuzaga chiqardi. Ushbu algoritmlar ilgari tadqiqotchilar e'tiboridan chetda qolgan semantik bogʻlanishlar, mavzular va diskurs strukturalarini aniqlash imkonini berib, ilmiy matnlar, ommaviy axborot vositalari, ijtimoiy tarmoqlar va tarixiy manbalarni qiyosiy tahlil qilish imkoniyatlarini kengaytirdi. Bu esa til taraqqiyoti va ijtimoiy jarayonlar oʻrtasidagi bogʻliqlikni chuqurroq oʻrganilishiga xizmat qilmoqda [1].

Mashinaviy tarjima sun'iy intellekt integratsiyasining eng muvaffaqiyatli yoʻnalishlaridan biri hisoblanadi. Dastlab qoidalarga asoslangan (Rule-Based Machine Translation) tizimlar qoʻllanilgan boʻlsa, keyinchalik statistik mashinaviy tarjima (Statistical Machine Translation) va hozirgi davrda neyron mashinaviy tarjima (Neural Machine Translation) texnologiyalari shakllandi. Transformer arxitekturasi asosida ishlab chiqilgan tarjima tizimlari butun gapning kontekstini hisobga olishi sababli tarjima sifati sezilarli darajada yaxshilandi [2].

Bugungi kunda Google Translate, DeepL, Microsoft Translator va boshqa zamonaviy tarjima platformalari milliardlab parallel matnlar asosida oʻqitilgan neyron modellar yordamida ishlaydi. Mazkur tizimlar leksik moslik bilan cheklanib qolmay, grammatik munosabatlar, idiomatik birliklar va uslubiy xususiyatlarni ham hisobga oladi. Ayniqsa, ilmiy va texnik matnlarni tarjima qilishda neyron mashinaviy tarjima oldingi avlod tizimlariga nisbatan yuqori aniqlikni namoyish etadi [4].

Shunga qaramay, ilmiy tadqiqotlar mashinaviy tarjima inson tarjimonini toʻliq almashtira olmasligini ham koʻrsatmoqda. Badiiy asarlar, metaforalar, pragmatik ma'no, milliy-madaniy birliklar va kontekstga kuchli bogʻliq boʻlgan matnlarda inson ishtiroki hanuz muhim hisoblanadi. Shu sababli hozircha zamonaviy tarjimashunoslikda ushbu turdagi lingvistik materialar tarjimasi uchun "Human-in-the-loop" tamoyili, ya'ni sun'iy intellekt va professional tarjimonning hamkorlik modeli eng samarali yondashuv sifatida koʻrilmoqda [5].

Sun'iy intellekt fonetika va nutq texnologiyalarida ham sezilarli natijalarni bermoqda. Avtomatik nutqni aniqlash (Automatic Speech Recognition – ASR) tizimlari inson nutqini matnga aylantirish, ovozli yordamchilar, subtitr yaratish va real vaqt rejimidagi tarjima xizmatlarida keng qoʻllanilishidan tashqari neyron tarmoqlarga asoslangan ASR tizimlari turli aksentlar, shevalar, lahjalar, talaffuz farqlari va fonetik variantlarni oldingi modellar bilan taqqoslaganda ancha muvaffaqiyatli aniqlay oladi [2].

Nutq sintezi (Text-to-Speech) texnologiyalarining rivojlanishi esa lingvistik tadqiqotlarda yangi imkoniyatlarni yaratdi. Sun'iy intellekt matnni tabiiy intonatsiya, urgʻu va pauzalarni hisobga olgan holda ovozlashtira olmoqda. Bu koʻzi ojiz foydalanuvchilar, til oʻrganuvchilar hamda ovozli ta'lim platformalari uchun muhim amaliy ahamiyat kasb etadi [3].

Til oʻqitish metodikasida ham sun'iy intellektning afzalliklari yaqqol namoyon boʻlmoqda. Zamonaviy SI platformalari oʻquvchining bilim darajasini avtomatik baholash, individual oʻquv yoʻnalishini shakllantirish, grammatik xatolarni aniqlash va shaxsiy tavsiyalar berish imkoniyatiga ega. Adaptiv ta'lim tizimlari har bir foydalanuvchining oʻzlashtirish sur'atiga mos ravishda mashqlarni avtomatik tanlaydi. Natijada ta'lim samaradorligi ortib, oʻqituvchining nazorat yuklamasi kamaydi [5].

Generativ sun'iy intellektning til oʻqitishdagi yana bir afzalligi autentik oʻquv materiallarini tezkor yaratish imkoniyatidir. ChatGPT, Gemini va Claude kabi tizimlar grammatik mashqlar, dialoglar, testlar, esse namunalari va uslubiy topshiriqlarni bir necha soniya ichida tayyorlay oladi. Shu bilan birga, ular CEFR darajalari boʻyicha moslashtirilgan matnlarni yaratish imkonini ham beradi. Bu esa xorijiy tillarni oʻqitishda metodik resurslarni sezilarli darajada boyitdi [2].

Diskurs tahlili va pragmatika yoʻnalishlarida ham sun'iy intellektning imkoniyatlari kengaymoqda. SI millionlab matnlarni tahlil qilib, muallif pozitsiyasi, kommunikativ strategiyalar, manipulyativ vositalar va emotsional boʻyoqdorlikni aniqlash imkonini berdi. Ijtimoiy tarmoqlarda tarqalayotgan axborot oqimini monitoring qilish, dezinformatsiya (zararli axborotlar)ni tez aniqlash va jamoatchilik fikrini oʻrganishda ham sun'iy intellekt lingvistik tahlilning muhim vositasiga aylanib ulgurdi [1].

Soʻnggi yillardagi tadqiqotlar shuni koʻrsatmoqdaki, sun'iy intellekt tilshunoslikning deyarli barcha yoʻnalishlarini qamrab olmoqda. Morfologiyadan tortib diskurs tahliligacha, tarjimashunoslikdan tortib korpus lingvistikasigacha boʻlgan barcha yoʻnalishlarda SI ilmiy tadqiqotlarning tezligi, aniqligi va samaradorligini oshirmoqda. Shu sababli koʻplab xorijiy tadqiqotchilar XXI asrni "sun'iy intellekt yordamidagi lingvistika davri" deb e'tirof etmoqdalar.

Ilmiy izlanishlarda katta til modellari tadqiqotchiga dastlabki ma'lumotlarni yigʻish, korpuslarni tasniflash, terminologik birliklarni aniqlash, bibliografik tahlil oʻtkazish va ilmiy gipotezalarni shakllantirishda samarali yordam berishi tufayli ilmiy tadqiqotlarning davomiyligi qisqarib, ularning sifat koʻrsatkichlari ortdi. Ayniqsa, koʻp tilli tadqiqotlarda sun'iy intellekt turli tillardagi ilmiy adabiyotlarni birgalikda tahlil qilish imkonini yaratmoqda. Bu esa xalqaro ilmiy hamkorlikni rivojlanishiga sabab boʻladi.

Xulosa

Olib borilgan tahlillar shuni koʻrsatadiki, sun'iy intellektning tilshunoslikka integratsiyalashuvi ushbu fan rivojida yangi bosqichni boshlab berdi. SI texnologiyalari lingvistik ma'lumotlarni tezkor qayta ishlash, katta hajmdagi korpuslarni tahlil qilish, koʻp tilli modellarni yaratish, mashinaviy tarjimani takomillashtirish, ilmiy tadqiqotlarni avtomatlashtirish va ta'lim jarayonlarini modernizatsiya qilish orqali tilshunoslikning nazariy hamda amaliy imkoniyatlarini sezilarli darajada kengaytirmoqda. Shuning uchun sun'iy intellektni zamonaviy tilshunoslikning innovatsion rivojlanish omili sifatida baholash mumkin.

Abstract: *This research investigates the translation studies foundations of rendering national-cultural characteristics in literary translation, focusing on Utkir Hoshimov's celebrated novella "Dunyoning ishlari", that is "Such is life". The study examines the structural, semantic and pragmatic peculiarities of Uzbek national realia, ethnocultural units, terminology and ritualistic expressions. Through comparative-stylistic textual analysis of the source text and its English translation by Mark Reese and Abdulla Ruziyev, the paper evaluates translation strategies-including transliteration with contextual glossing, descriptive translation, cultural substitution and functional equivalence-employed to preserve authentic national color. The findings reveal that achieving dynamic equivalence requires balancing cultural fidelity with target-language readability.*

Keywords: *literary translation, national-cultural characteristics, realia, cultural equivalence, Utkir Hoshimov, "Such is life", translation strategies, transliteration, descriptive translation, ethnocultural units.*

ТЕОРЕТИЧЕСКИЕ ОСНОВЫ ПЕРЕВОДОВЕДЕНИЯ В ВОСПРОИЗВЕДЕНИИ НАЦИОНАЛЬНО-КУЛЬТУРНЫХ ОСОБЕННОСТЕЙ В ХУДОЖЕСТВЕННОМ ПЕРЕВОДЕ

Аннотация: *Настоящее исследование посвящено изучению переводоведческих основ передачи национально-культурных особенностей в художественном переводе на материале повести Уткира Хошимова Дела земные». В работе анализируются структурные, семантические и прагматические особенности узбекских национальных реалий, культурно-маркированных единиц, терминов родства и ритуальных выражений. На основе сопоставительно-стилистического анализа английского перевода, выполненного Марком Ризом и Абдуллой Рузиевым, оцениваются переводческие приемы, применяемые для сохранения национального колорита, включая транслитерацию с контекстуальным пояснением, описательный перевод, культурную замену и функциональную эквивалентность. Результаты исследования показывают, что достижение динамической эквивалентности требует научно обоснованного баланса между культурной адекватностью исходного текста и доступностью его содержания для читателей на языке перевода.*

Ключевые слова: *художественная литература, национально-культурные особенности, реалии, культурная эквивалентность, Уткир Хашимов, «Дела земные», методы перевода, транслитерация, описательный перевод, этнокультурные единицы.*

BADIIY TARJIMADA MILLIY-MADANIY XUSUSIYATLARNI QAYTA IFODALASHNING TARJIMASHUNOSLIK ASOSLARI

Annotatsiya: *Ushbu tadqiqot O'tkir Hoshimovning "Dunyoning ishlari" qissasi misolida badiiy tarjimada milliy-madaniy xususiyatlarni aks ettirishning tarjimashunoslik asoslarini o'rganadi. Ushbu ilmiy tadqiqotda o'zbek milliy realiyalari, madaniy birliklari, qarindoshlik atamalari va marosim iboralarining strukturaviy, semantik hamda pragmatik xususiyatlari tahlil qilinadi. Mark Reese hamda Abdulloh Ro'ziyev tomonidan bajarilgan inglizcha tarjimaning qiyosiy-uslubiy matn tahlili orqali milliy koloritni saqlashda qo'llaniladigan tarjima usullari - kontekstual izohli transliteratsiya, tavsifiy tarjima, madaniy almashtirish va funksional ekvivalentlik baholanadi. Tadqiqot natijalari shuni ko'rsatadiki, dinamik ekvivalentlikka erishish madaniy munosiblik va nishon tilidagi tushunarlilik o'rtasidagi ilmiy muvozanatni talab etadi.*

Kalit so'zlar: *badiiy tarjima, milliy-madaniy xususiyatlar, realiyalar, madaniy ekvivalentlik, O'tkir Hoshimov, "Dunyoning ishlari", tarjima usullari, transliteratsiya, tavsifiy tarjima, madaniy birliklar.*

Introduction.

Literary translation is an important means of intercultural communication through which national worldviews, social customs, moral values and aesthetic traditions are transferred across linguistic and cultural boundaries. However,

translating literary texts involves more than conveying their lexical meanings, as culture-specific elements such as realia, ethnocultural markers, ritual expressions, idioms, food names, architectural and kinship terms contain historical and pragmatic meanings that have no direct equivalents in the target language [1, p. 47; 3, p. 95]. Therefore, the translation of such units requires an appropriate balance between preserving the national color of the source text and ensuring comprehensibility for target readers. The theoretical approaches of Vlakhov and Florin, Newmark, Nida, and Baker provide a useful framework for examining realia, cultural non-equivalence and translation strategies such as transliteration, descriptive translation, cultural substitution and functional equivalence [1, p. 52; 2, p. 20; 3, p. 96; 4, p. 22].

This issue is particularly relevant to Utkir Hoshimov's "Dunyoning ishlari", a significant work of twentieth-century Uzbek literature that portrays Uzbek family life, moral values, traditions and everyday cultural practices. Centered on the author's memories of his mother, the novella contains numerous culturally specific elements related to the "mahalla", hospitality, traditional food, household life, architecture, kinship relations and social customs [5, p. 12; 11, p. 108]. These elements constitute an important part of the work's national identity and create particular challenges when the text is translated for an English-speaking audience. The English version, published under the title 'Such Is Life' and translated by Mark Reese and Abdulloh Ruziyev, provides a valuable corpus for examining how Uzbek cultural meanings and national color are represented in English.

Although Hoshimov's prose has been widely studied from literary, thematic and psychological perspectives, the systematic translation-oriented analysis of national-cultural units in "Dunyoning ishlari" remains insufficiently explored. Therefore, this study aims to identify and classify the culture-specific elements in the novella and examine how they are rendered in "Such Is Life". Particular attention is given to ethnographic, gastronomic, architectural, social, ritual, and kinship-related realia, as well as to the translation strategies used by Reese and Ruziyev, including transliteration, descriptive translation, cultural substitution and functional equivalence. The study also considers foreignization and domestication in order to determine whether particular translation choices result in cultural preservation, loss or adaptation.

Literature Review.

The theoretical foundation of realia translation was systematically formulated by Bulgarian linguists S. Vlakhov and S. Florin. They defined realia as "words and expressions naming objects, concepts or phenomena characteristic of a nation, its culture, history and daily life, which have no exact lexical equivalents in other languages and carry pronounced national or historical color" [1, p. 47]. They established that realia present a dual challenge: the lack of a direct target-language equivalent combined with the necessity of conveying the national atmosphere and cultural specificity of the source text.

In Western translation theory, Peter Newmark categorized culture-bound words into five major domains, including ecology, material culture, social culture, customs and concepts, and gestures [3, p. 95]. His classification demonstrates that culturally specific elements may occur in various aspects of everyday life and social interaction. Newmark emphasized that translators must continually navigate between foreignizing methods, such as transliteration and literal transfer, and domesticating methods, including cultural adaptation and descriptive translation. The choice between these approaches depends largely on the function of the culture-specific element and the intended target readership.

Mona Baker addressed the problem of non-equivalence at the word level and proposed several pragmatic strategies for dealing with culturally specific expressions. These include translation by a more general or superordinate term, cultural substitution, the use of loan words accompanied by explanations and contextual omission when a particular unit carries limited narrative significance [2, p. 26]. Eugene Nida, in turn, introduced the distinction between formal equivalence and dynamic equivalence, emphasizing that translation should consider both the linguistic form of the source text and its effect on the target audience [4, p. 22]. These approaches provide an important theoretical basis for examining how culture-bound expressions can be transferred while maintaining their semantic, pragmatic, and cultural functions.

In the context of Uzbek translation studies, pioneer scholar Gʻaybulla Salomov established an important theoretical foundation for understanding the role of national realia in literary translation. He demonstrated that national realia in Uzbek literature constitute essential components of artistic representation rather than merely decorative vocabulary [7, p. 84]. Salomov emphasized that mechanical word-for-word translation may result in semantic distortion, whereas excessive adaptation may lead to the erosion of the source culture. Qudrat Musayev further developed the theory of translation equivalence by identifying hierarchical levels of equivalence and emphasizing that the translation of Uzbek national realia into European languages requires not only linguistic competence but also ethnographic knowledge and functional-pragmatic transformation [8, p. 52].

The practical application of these theoretical principles can be observed in the English translation of Oʻtkir Hoshimov's Dunyoning ishlari by Mark Reese and Abdulloh Ruziyev, published as Such Is Life. Their translation provides a significant example of transferring Uzbek culture-specific elements into English while attempting to preserve their national and contextual significance. The work contains numerous expressions associated with family relationships, kinship, traditional customs, household life, food, forms of address and other aspects of Uzbek culture. The translation of such elements

requires the translators to balance cultural preservation with accessibility for English-speaking readers. In this respect, the work of Reese and Ruziyev provides a valuable practical context for examining the application of strategies such as cultural substitution, descriptive translation, retention of culturally specific terms and contextual explanation.

Research methodology.

This study aims to identify, classify and evaluate the strategies employed in rendering national and cultural characteristics represented in O‘tkir Hoshimov’s “Dunyoning ishlari” into English, with particular attention to the preservation of cultural meaning, national identity, pragmatic effect and literary-aesthetic value. The primary research materials consist of the original Uzbek version of ‘Such is Life’ and its English translation, published in 2024 by translator Mark Reese. The analysis focuses mainly on culture-specific lexical and phraseological units, ethnographic terms, forms of address, religious expressions, traditional objects, domestic practices and figurative descriptions that reflect Uzbek cultural identity.

The theoretical framework draws upon major approaches to the translation of realia, linguocultural equivalence, dynamic equivalence, translation strategies and the foreignization-domestication dichotomy. In particular, the theoretical perspectives of S. Vlakhov and S. Florin on realia provide the methodological basis for the study. The concept of realia is especially important because culturally marked words frequently convey meanings that extend beyond their dictionary definitions and embody the historical and social experience of a particular community.

The study investigated comparative-analytical, descriptive, linguocultural and contextual methods. First, culture-specific lexical and phraseological units were identified in the Uzbek source text. These units were then examined according to their semantic, pragmatic and cultural characteristics. Particular attention was given to the ways in which realia function within Hoshimov’s narrative. Since “Dunyoning ishlari” is closely connected with the author’s childhood, family relationships, rural life, Uzbek traditions and the social environment of the Soviet period, many apparently ordinary words acquire considerable cultural significance in context.

The identified units were subsequently compared with their English renderings in Mark Reese’s translation in order to determine the extent to which their denotative meanings, cultural connotations, emotional associations, national color and aesthetic functions were preserved. The analysis does not regard translation equivalence as simple word-for-word correspondence. Instead, each translation choice is evaluated according to whether it successfully reproduces the communicative intention and cultural effect of the source expression for the target readership.

From a thematic perspective, national-cultural realia may be associated with different areas of social and cultural life, including household objects, clothing, food and drinks, occupations, social customs, forms of address, religious practices and other elements of material and spiritual culture. Such a classification is useful for the analysis of Dunyoning ishlari because the realia found in the work represent several dimensions of Uzbek life. For example, sandal, obdasta, and kavshandoz are connected with traditional domestic life, Moshkhurda represents Uzbek culinary culture, sovchi and tugun reflect traditional marriage-related practices, while joynamoz, peshin, and Allohu Akbar represent religious-cultural vocabulary. The classification of realia according to their cultural function therefore provides a useful basis for examining the specific challenges involved in their English translation. The research which is conducted by Kendjayeva similarly distinguishes everyday realia according to categories such as dwelling and property, clothes and headwear, food and drinks, occupations, social life and forms of address [13, p. 168].

An important methodological principle derived from previous research is that no single translation procedure can be applied uniformly to all realia. Each culturally marked unit requires an individual translation decision based on its semantic content, cultural associations, historical background, stylistic function, and position within the context. The necessity of considering the cultural, historical, semantic, stylistic and grammatical characteristics of each individual realia when selecting an appropriate translation procedure. This principle is particularly applicable to “Dunyoning ishlari”, where different realia require different translation solutions. Some units are retained through transliteration, some are accompanied by contextual or paratextual explanations, while others are generalized, neutralized or replaced by culturally more familiar expressions. Therefore, the effectiveness of a translation strategy should be determined in relation to the function and cultural significance of the individual unit rather than merely according to its formal correspondence with the source-language expression.

A further distinction that is significant for the present research is the difference between semantic preservation and cultural preservation. A target-language expression may successfully communicate the basic referential meaning of a source-language word while failing to reproduce its historical, religious, social or ethnographic associations. Kendjayeva’s analysis of the realia hujra demonstrates this problem: the use of a general equivalent such as “room” communicates the basic physical meaning but does not fully reproduce the historical and religious associations of the Uzbek term [13, p. 169]. A comparable phenomenon can be observed in the translation of ‘Such is Life’. When a culturally specific religious object such as joynamoz is rendered through a general expression such as “a piece of fabric,” the physical action remains comprehensible, but the religious and cultural identity of the object is considerably weakened. Similarly, the rendering of

kavshandoz as “doorway” communicates the spatial context but removes the ethnographic specificity of the original domestic object.

For analytical purposes, the selected cultural units were classified into four interconnected groups. They are material and everyday realia, ethnocultural and social realia, ritual and religious realia and figurative and emotionally marked cultural expressions. The first category includes culturally specific objects and concepts associated with Uzbek domestic life, architecture and gastronomy, such as supa, beshik, joynamoz, qoravoy, peshin and dasturxon. The second includes kinship terms, forms of address and social concepts such as opa, aya, amma and mahalla. The third encompasses such ritual and religious expressions as fotiha, Subhanallah Ilohi omiin, Ollohu akbar and other culturally embedded practices. The fourth category includes figurative expressions and culturally marked descriptions of nature, family affection and human relationships.The analysis also focuses on the principal techniques used to transfer culture-specific elements into English, including transliteration, transcription, functional equivalence, descriptive translation, explicitation, modulation, substitution, contextual adaptation and stylistic adaptation. These techniques are evaluated according to their ability to maintain cultural specificity while ensuring accessibility and interpretability for English-speaking readers.

Particular attention is also paid to the problem of alternatives in translation. Cultural, lexical, syntactic, emotional and connotational alternatives frequently arise when Uzbek expressions are transferred into English. A culturally marked expression may have several possible English equivalents, but the most linguistically convenient equivalent is not necessarily the most culturally adequate one. Therefore, the translator must consider the author’s worldview, the historical context, the emotional atmosphere and the pragmatic function of the original expression.

The study consequently evaluates translation adequacy at several interconnected levels, such as lexical-semantic correspondence, cultural equivalence, emotional expressiveness and preservation of national identity. This multidimensional approach makes it possible to determine not only whether a particular word has been translated accurately, but also whether the cultural world represented by Hoshimov has remained recognizable in the English version.

Analysis and results.

A systematic comparative analysis of “Dunyoning ishlari” and Mark Reese’s English translation ‘Such Is Life’ demonstrates that national-cultural units are not peripheral lexical elements but constitute an essential part of the narrative and ethnocultural architecture of the work. The realia identified in the text reflect Uzbek domestic life, family relationships, hospitality, social organization, religious beliefs, traditional practices, rural landscapes and emotional attitudes. Consequently, the translation of these units directly influences the preservation of the semantic, pragmatic and cultural dimensions of O‘tkir Hoshimov’s prose.

The work is particularly significant because its artistic world is constructed from ordinary experiences and apparently simple details. O‘tkir Hoshimov presents childhood memories, humorous and tragic situations and scenes from everyday life in a simple but emotionally powerful manner. The folkloric character of his prose means that many expressions cannot be interpreted adequately without understanding the cultural environment in which they occur. Therefore, translation becomes not merely a linguistic operation but an intercultural and creative process.

The analysis of domestic and architectural realia demonstrates the importance of culturally specific objects in constructing the spatial atmosphere of the narrative. For instance, in Kobilova’s rendering, “Mother spread the bedding on the sori” [6, p. 28], employs transliteration to retain the culturally specific term. This strategy preserves the national identity of the object and allows the source-culture element to remain visible in the target text. However, a brief contextual explanation such as sori, a raised wooden courtyard platform could provide additional assistance to readers unfamiliar with Uzbek domestic architecture.

A similar strategy can be observed in the translation of beshik. For example, the sentence which is given in the book, “Beshikni quchoqlab yig‘ladi.” [5, p. 87], is translated into English in this form, “She wept embracing the cradle.” In Uzbek culture, beshik is more than an ordinary cradle. It is associated with traditional childcare, family customs and culturally significant practices surrounding the upbringing of children. Therefore, the use of transliteration together with descriptive explanation, such as beshik, that is traditional wooden cradle, can preserve both cultural authenticity and comprehensibility.

Another example concerns dasturxon. Although “tablecloth” may describe its physical function, the Uzbek dasturxon has a broader cultural meaning connected with hospitality, family unity, food-sharing and respect for guests. Consequently, its translation should take both its material and symbolic functions into consideration.

This principle applies to rayhon. In the passage describing the courtyard, “…hovlining kun bo‘yi oftobda qizigan tuproq hidi supa oldidagi rayhon hidi bilan qo‘shilib…”, translated into “…the smell of the land which had been heated during the whole day by the sun gave out a scent with basil…”

The translation successfully identifies the plant through the familiar English term “basil.” However, the Uzbek word rayhon may evoke additional cultural and sensory associations related to home gardens, freshness, beauty, hospitality and

traditional Uzbek domestic life. Thus, although the lexical equivalent is accessible to the target reader, some of the cultural connotations may be weakened.

Religious and ritual expressions present some of the most complex translation challenges. The "Ermon buvaning tilagi" episode provides the clearest evidence for foreignization. The researcher explains that, in the Reese and Ruziyev version, culturally marked religious forms such as Joinamoz, afternoon prayer, Ilohi omiin and Allohu Akbar are retained, while domestic forms such as qoravoy and popuk are also preserved. This is explicitly identified as foreignization.

Ethnocultural and social realia further confirm that culturally embedded meanings cannot be adequately represented through dictionary equivalence alone. Uzbek forms of address such as opa, aya, ammayim, and personal names followed by kinship terms encode age, respect, intimacy, social distance, and solidarity. For instance, "Oynisa opa…"is given like"Sister Oynisa". A literal translation such as "Sister Oynisa" may create unintended associations for English-speaking readers. Depending on the relationship established in the narrative, a functional equivalent such as "Aunt Oynisa" may communicate respectful familiarity more naturally. This illustrates the importance of functional equivalence in translating Uzbek forms of address.

This example demonstrates that even apparently minor lexical substitutions can modify the emotional atmosphere of a literary passage. The translator must therefore consider not only denotative meaning but also connotation, imagery, emotional tone, and narrative perspective.

Uzbek Source Unit	**English rendering**	**Applied English Strategy**	**Pragmatic & Aesthetic Justification**
Dasturxon	Tablecloth	Functional Equivalence: Dasturxon (Spread meal table)	Reflects the Uzbek meal ritual served on a floor cloth or table [3, p. 98].
"Qiyiqchani joynamoz qilib o'tustiga tashlaydi-da, pichirlab uzoq namoz o'qiydi." - joynamoz	"He spreads out the Joinamoz on the grass and recites his prayers in soft whispers for a long while."	Foreignization / transliteration	"Joinamoz" is retained rather than replaced by a generic "mat" or "cloth." The researcher's footnote identifies it as a Muslim prayer rug. Retention therefore preserves the Islamic and Uzbek cultural marker while the explanation makes it comprehensible.
"Peshin bo'p qoldi deng, qoravoy?" - peshin / qoravoy	"It is time for afternoon prayer, qoravoy, isn't it?"	Foreignization with selective explicitation	"Afternoon prayer" makes the religious function explicit, while "qoravoy" is retained as a culturally marked form of address. The strategy preserves more of the original cultural atmosphere than a fully generalized English rendering would. Qoravoy: the color black is a positive reference in Central Asia and seen as an act of praise. Black is often used to referred to Arabs, as in Zangi Ota.
"Ilohi omiin! Yurtimiz tinch bo'lsin, Ollohu akbar."	"Ilohi omiin! May our land be peaceful, may war never touch our world, Allohu Akbar."	Foreignization	The religious formulas remain visible in the English text. Replacing them completely with a neutral prayer formula would reduce the Islamic cultural identity of the utterance. The researcher explicitly identifies these forms as foreignized markers.
"Qani qoravoylar! Qani popuklar! Dasturxonga marhamat." - qoravoylar / popuklar	"My qoravoys, my popuks! Welcome to our little lunch."	Foreignization + footnote	"Popuk" is retained and explained as a term of endearment for a daughter or little girl. This preserves the affectionate cultural form rather than replacing it with an emotionally weaker generic address.

These examples demonstrate that foreignization is not simply a matter of leaving Uzbek words untranslated. Its value lies in preserving a culturally meaningful form that would otherwise disappear. In the case of Joinamoz, for instance, the English reader receives both the Uzbek cultural label and its explanation. This principle is also suitable for qoravoy and popuk, the culturally marked form remains visible while the footnote supplies the information necessary for interpretation.

Transliteration is particularly effective for preserving highly culture-specific concepts whose national identity would be weakened through substitution. Descriptive translation and explicitation are more appropriate for complex social and ritual concepts, while functional equivalence can be useful when the social or communicative function of a cultural item needs to be reproduced naturally in English.

The examples from Mark Reese's translation also reveal that direct translation may sometimes weaken the expressive or cultural force of the source text. For example, translating the act of suv sepmoq as "water the yard" reduces the sensory and cultural implications of the traditional practice. Similarly, translating o'ychan ko'zlar as "sad eyes" changes the emotional coloring of the original. These examples confirm that literary translation requires attention to connotation, contextual meaning, and cultural associations rather than lexical correspondence alone.

The findings highlight the central role of the foreignization-domestication dichotomy in the translation of national-cultural realia in "Dunyoning ishlari". Foreignization allows culturally specific Uzbek elements to remain visible in the target text and thereby preserves the national atmosphere and ethnographic authenticity of Hoshimov's prose. Terms such as supa, beshik, dasturxon, mahalla, fotiha, and Subhanallah introduce English-speaking readers to cultural concepts that may not have direct counterparts in their own cultural experience.

At the same time, excessive foreignization may make the text difficult for target readers who lack knowledge of Uzbek culture. For example, supa can be retained through transliteration, but without contextual support their cultural meanings may remain inaccessible. This demonstrates that preservation of the source term alone does not automatically guarantee cultural understanding.

Domestication represents the opposite tendency, as it attempts to render culture-specific concepts through expressions that are more familiar to the target audience. This strategy can improve readability and facilitate immediate comprehension. However, excessive domestication may result in substantial ethnocultural loss. Translating dasturxon simply as "tablecloth," mahalla as "neighborhood" or fotiha simply as "blessing" may communicate a general meaning while eliminating the wider social and cultural associations of the source terms.

The comparative analysis therefore supports the use of a hybrid translation strategy as the most effective approach for culturally dense literary prose. Under this approach, culturally significant terms are retained through transliteration or transcription, while their meanings are clarified through classifiers, descriptive modifiers, contextual explanation or functional equivalents. Examples such beshik as traditional wooden cradle and supa as raised courtyard platform illustrate how foreignization and domestication can operate simultaneously.

The findings also support E. Nida's concept of dynamic equivalence. Absolute one-to-one correspondence is rarely possible when culture-specific expressions move between languages. Instead, successful translation should recreate an equivalent communicative and aesthetic effect for the target reader. In Hoshimov's work, this is particularly important because the artistic identity of the narrative is inseparable from its representation of Uzbek family life, rural environment, social relations, traditions, religious beliefs, and emotional culture.

For instance, rendering of Subhanallah, demonstrates that translation involves more than lexical substitution. The translator must interpret the cultural and emotional function of the source expression. Similarly, the translation of o'ychan ko'zlar as "sad eyes" illustrates how a seemingly minor lexical decision can alter the emotional atmosphere of an artistic passage.

The problem of translation alternatives is therefore central to the study. Cultural alternatives arise when a source expression reflects a practice that has no direct target-language counterpart. Lexical alternatives emerge when several possible equivalents are available. Syntactic alternatives become necessary because Uzbek and English differ structurally, while emotional and connotational alternatives arise because the same lexical item may evoke different associations in different cultures.

Consequently, the translator's task is inherently creative. Literary translation requires the translator to understand what the author sees, feels, and intends to communicate. A formally correct translation may still fail if it does not reproduce the cultural reality and emotional perspective embedded in the source text. In this sense, the translator assumes significant creative responsibility for each word, phrase, and sentence in the target text.

The analysis further demonstrates that successful translation of realia requires linguistic, intercultural, ethnographic, and pragmatic competence. Terms such as opa, aya, mahalla, fotiha, supa and dasturxon cannot be adequately interpreted through dictionary definitions alone. Their meanings emerge from the social practices, interpersonal relationships, rituals, and historical experiences in which they function.

The "Sovchilar" episode provides a useful contrast because the two translation versions handle the cultural institution differently. The original paragraph begins with the culturally loaded word sovchi and later includes tugun:

"- Sovchi degan gap qayoqdan chiqqan?

Guli jahl bilan qo'l siltadi.

– Hali unisi keladi qiyshayib, hali bunisi keladi, tugunini osiltirib!"

In O. Mo‘minov’s version, sovchi is generalized as “matchmaker,” while tugun is omitted. In the Reese and Ruziyev version, the sentence is rendered as: “Who invented such an absurd idea of this ‘matchmaker’ thing? ... All the time one comes waddling along, the other comes dragging a tugun!” The word tugun is retained and explained by Abdulloh Ruziyev in a footnote as a bundle brought by sovchis, usually including some presents for the girl and her family members. This way, they think, they can win the girl’s heart.

The difference is culturally significant. “Matchmaker” communicates the general social function of sovchi, but it does not necessarily activate the Uzbek cultural practice of sovchilik, which involves family participation and marriage negotiations. The retention of tugun is stronger from the perspective of cultural preservation because the term is accompanied by an explanation of its social function. In other words, the target reader receives not only an understandable sentence but also access to an Uzbek cultural practice that has no exact one-word equivalent in English.

The same strategy is visible in the following sentence: “Bu safar sovchilar uzoqroq o‘tirishdi, oyim ularni moshxo‘rda bilan mehmon qildi.” The English version reads: “This time the matchmakers stayed for longer and my mother served them Moshkhurda.” The food name is retained, and the footnote explains Moshkhurda as “a dish made from mung beans.” This is transliteration supported by paratextual explanation, and it preserves the cultural specificity of the hospitality scene rather than reducing the dish to a generic English food term.

The shift from “boy” to “man” is not merely grammatical. It broadens the gendered cultural statement. The Uzbek original refers directly to the boy, while “A man doesn’t cry” presents the statement as a general masculine norm. Thus, although the English version communicates the intended encouragement, it also intensifies and generalizes the gender ideology encoded in the sentence.

Therefore, the translation of national-cultural realia should be viewed as an interpretive process involving semantic, pragmatic, aesthetic and linguocultural decision-making. The translator must identify which elements of meaning are essential in each context and select the strategy that best balances cultural authenticity with target-reader accessibility.

Conclusion.

The comparative analysis of O‘tkir Hoshimov’s “Dunyoning ishlari” and Mark Reese’s English translation “Such Is Life” demonstrates that national-cultural realia constitute an integral component of the work’s artistic structure and national identity. They function not as isolated vocabulary items but as an interconnected ethnocultural system through which the author represents Uzbek everyday life, family relationships, social etiquette, hospitality, communal solidarity, religious beliefs, rituals, traditional food, clothing, domestic spaces and national worldview. The findings demonstrate that transliteration combined with contextual explicitation is particularly effective in preserving national color while maintaining comprehensibility for English-speaking readers. The treatment of terms such as supa, beshik, mahalla and fotiha shows that retaining culturally specific terminology enables the target text to preserve its Uzbek identity, while explanatory classifiers and descriptive additions provide the target reader with sufficient contextual information. The treatment of obdasta, Joinamoz, peshin, qoravoy, popuk, sovchi, tugun, and Moshkhurda shows that each item requires a context-sensitive translation decision. Retention and transliteration are particularly valuable when the source term itself carries cultural identity, while contextual explanation enables English-speaking readers to understand the retained form.

The study also confirms that foreignization and domestication should not be regarded as mutually exclusive strategies. Their appropriate combination enables the translator to negotiate the tension between cultural authenticity and target-reader accessibility. Excessive domestication risks erasing the national identity of O‘tkir Hoshimov’s prose, whereas excessive foreignization may create semantic opacity. A flexible hybrid strategy is therefore more appropriate for culturally dense literary texts.

From a theoretical perspective, the findings support the relevance of dynamic equivalence, realia theory, and linguocultural approaches to literary translation. Equivalence in the translation of culturally embedded texts cannot be reduced to formal lexical correspondence. It should also involve the recreation of communicative intention, pragmatic meaning, cultural associations, emotional effect, and literary-aesthetic value.

The analysis additionally confirms that literary translation is a creative and interpretive activity. The translator must not only understand the source language but also perceive the cultural reality represented by the author. If the translator fails to recognize what the author sees and feels, even a linguistically accurate lexical choice may fail to communicate the intended meaning. Therefore, the translator bears significant responsibility for preserving the relationship between language, culture, emotion, and artistic representation.

From a practical perspective, the translation of Uzbek literature into English requires strong linguistic, intercultural, ethnographic, and pragmatic competence. Translators must recognize that kinship terms, honorific forms, domestic objects, social institutions, religious expressions, rituals, traditional foods, and figurative images frequently carry meanings that extend beyond their literal definitions.

Overall, the study confirms that the translation of national-cultural realia in “Such is Life” is a complex intercultural process requiring a careful balance between fidelity to the source culture and accessibility for the target readership. The

most effective approach is a flexible combination of transliteration, contextual explicitation, descriptive translation, functional equivalence and stylistic adaptation. Such a strategy enables English-speaking readers to access the cultural world of O‘tkir Hoshimov’s prose while preserving the distinctive national atmosphere, emotional depth, and literary identity of the original work. In this respect, literary translation functions not merely as linguistic transfer but as a means of strengthening intercultural communication and bringing culturally distant communities closer together.

NAMANGAN VILOYATI SHEVALARINING SHAKLLANISHI VA AREAL XUSUSIYATLARI

Usmonov Musurmon Mamirali o‘g‘li
Namangan davlat universiteti v.b. dotsenti
filologiya fanlari bo‘yicha falsafa doktori (PhD)
E-mail: usmonovmusulmon89@gmail.com

Annotatsiya: *Ushbu maqolada Namangan viloyati shevalarining shakllanish jarayoni va ularning areal xususiyatlari ilmiy-nazariy jihatdan yoritilgan. Til taraqqiyoti va evolyutsiyasida xalq shevalarining o‘rni, ularning milliy adabiy til shakllanishi hamda boyib borishidagi lisoniy ahamiyati, shuningdek, areal lingvistika va lingvistik geografiya metodlarining dialektologik tadqiqotlardagi o‘rni atroflicha tahlil qilingan. Maqolada asosiy muammo sifatida o‘zbek shevalarining, xususan, o‘ziga xos lisoniy qatlamga ega bo‘lgan Namangan viloyati shevalarining bugungi kunga qadar areal-lingvistik jihatdan tizimli va yetarli darajada tadqiq etilmagani ko‘rsatib o‘tilgan. Ishning maqsadi — Namangan viloyati shevalarining tarixiy taraqqiyoti, tarqalish hududi, fonetik, leksik-semantik va grammatik xususiyatlarini zamonaviy areal-lingvistik tamoyillar hamda tillararo konvergentsiya jarayonlari asosida ilmiy jihatdan ochib berishdan iborat. Maqolada qiyosiy-tarixiy, tavsifiy va lingvistik xaritalashtirish metodlaridan foydalanilgan. Tadqiqot natijasida sheva materiallarini areal usulda o‘rganish muayyan hudud lisoniy tizimini yaxlit va dinamik tarzda tahlil qilishga xizmat qilishi, shuningdek, o‘zbek adabiy tili tarixini tiklash hamda uning leksikografik bazasini boyitish uchun muhim manba ekanligi ilmiy asoslab berilgan.*

ФОРМИРОВАНИЕ И АРЕАЛЬНЫЕ ОСОБЕННОСТИ ГОВОРОВ НАМАНГАНСКОЙ ОБЛАСТИ

Аннотация: *В данной статье научно-теоретически освещены процесс формирования говоров Наманганской области и их ареальные особенности. Подробно проанализированы роль народных говоров в развитии и эволюции языка, их языковое значение в формировании и обогащении национального литературного языка, а также место методов ареальной лингвистики и lingvisticheskoj geografii v dialektologicheskih issledovaniyah. В качестве основной проблемы в статье указано то, что узбекские говоры, в частности говоры Наманганской области, обладающие специфическим языковым пластом, до сегодняшнего дня не были системно и достаточно исследованы в ареально-lingvisticheskom аспекте. Целью работы является научное раскрытие исторического развития, ареала распространения, фонетических, лексико-семантических и грамматических особенностей говоров Наманганской области на основе современных ареально-lingvisticheskih принципов и процессов межъязыковой конвергенции. В статье использованы сравнительно-исторический, описательный методы и метод lingvisticheskogo kartirovaniya. В результате исследования научно обосновано, что изучение диалектного материала ареальным методом служит целостному и динамичному анализу языковой системы определенного региона, а также является важным источником для восстановления истории узбекского литературного языка и обогащения его лексикографической базы.*

FORMATION AND AREAL FEATURES OF NAMANGAN REGION DIALECTS

Abstract: *This article highlights the scientific and theoretical foundations of the formation process and areal features of the dialects of the Namangan region. It thoroughly analyzes the role of folk dialects in language development and evolution, their linguistic significance in the formation and enrichment of the national literary language, as well as the role of areal linguistics and linguistic geography methods in dialectological research. As a main problem, the article points out that Uzbek dialects, particularly the dialects of the Namangan region possessing a unique linguistic layer, have not been systematically and sufficiently studied from an areal-linguistic perspective until today. The purpose of the study is to scientifically reveal the historical development, distribution area, phonetic, lexical-semantic, and grammatical features of the dialects of the Namangan region based on modern areal-linguistic principles and interlingual convergence processes. Comparative-historical, descriptive, and linguistic mapping methods were used in the research. As a result of*

the study, it is scientifically substantiated that studying dialect material through the areal method serves for a holistic and dynamic analysis of the linguistic system of a specific region, and also serves as an important source for restoring the history of the Uzbek literary language and enriching its lexicographical base.

Keywords: *isophoneme, linguistics, dialects, isogloss, areal linguistics, language area, literary language, linguistic geography, dialect characteristics.*

Kirish

Insoniyat yaratilibdiki, uning tili hamisha ijtimoiy-iqtisodiy, madaniy-ma'rifiy, ma'naviy-axloqiy tamoyillar bilan birga jamiyat taraqqiyoti bilan hamohang holda taraqqiy etadi, rivojlanadi. Bu ilm-fan uchun ma'lum hodisa. Dunyo tilshunoslik sohasida jahonning yirik tilshunoslik maktablarining tarixiy shakllanish davriga e'tibor berilsa, ularning ilk amalga oshirgan va tadqiqotlarining markazida xalq jonli tili – madaniylashgan xalq darajasiga koʻtarilgan millatlarning shevasi turadi. Aniqki, xalq shevalari adabiy tilining yozma yodgorliklariga nisbatan ham qadimiyroq tarixiy manbadir. Bizgacha yetib kelgan yozma yodgorliklarda uchramaydigan til faktlari shevalarda saqlanib qolgan. Shuning uchun sheva materiallarini tadqiq etish tilning ontologik tabiatini ochib berish imkonini beradi [12, 15 b.].

Dialektologiyaning taraqqiy va yakuniy holati hisoblanmish areal lingvistikaning yuzaga kelishining asosiy sababi uning shevashunoslik sohasida yechimi topilmagan, turgʻun boʻlib qolgan ayrim jihatlarni, dialekt va shevalar mohiyati, xususiyatlari, oʻzaro aloqalari, ularning tasnifi, tavsifi masalasidagi tushunchalarni yangicha baholashga, yangicha usullarda hal qilishga keng yoʻl ochishi boʻldi.

Shuning uchun ham dunyo ilm-fan tamaddunida areal tilshunoslik koʻp mundarijali soha boʻlib shakllandi, chunki arealogiya italyan neolingvistlari, jahon lingvogeograflari hamda tillar ittifoqi yoʻnalishi vakili boʻlgan tilshunoslarning amalga oshirgan tadqiqotlarini oʻzida mujassamlashtirdi. Tadqiqotlar negizida areal lingvistik konsepsiyalarning tadrijiy taraqqiyotini analiz va sintezlash natijasida dialektlarni umumiy tilshunoslikning bir aspekti sifatida oʻrganish maqsadga muvofiq ekanligi isbotlandi. Dialektlarni arealogik tamoyillar va lingvistik tadqiqot metodlari asosida oʻrganish muhim muammo sifatida qoʻyildi [5, 3-8 b.]. Binobarin, til sistemasini yaxlit oʻrganishda dialekt va sheva areallarini tadqiq etish muhim ahamiyat kasb etishi yaqqol yuzaga chiqdi.

Bilamizki, tilshunoslikning dialektolagiya va areal tilshunoslik sohasi ekspeditsiyalar, amaliyotlar, lisoniy-jugʻrofiy tahliliy usullar orqali ma'lum hududda tarqalgan til hodisalarini aniqlab, hududiy til xususiyatlarini oʻrganadi. Ularning oʻrni va tarqalish chegarasi va koʻlamini lingvistik xaritalar orqali namoyon etadi. Demak, muayyan xalqning jonli axborot va ma'lumot almashinuvi vositasi boʻlgan milliy shevalarining lingvistik xaritalarini yaratish dialektologiya va areologiya sohalarining taraqqiyotini ta'minlaydigan va koʻrsatib turuvchi eng muhim omillar hisoblanadi.

E'tibor qaratilsa, dunyoning rivojlangan mamlakatlarining tilshunoslik sohasi ham, lingvistik tadqiqotlarning koʻlami ham tizimli taraqqiy etganligiga guvoh boʻlamiz. Qaysiki mamlakatda oʻz xalqining jonli tili shevalari mukammal oʻrganilgan boʻlsa, shu millat tilshunosligi tarmoqlari havas qiladigan darajada mukammallikka ega ekanligini kuzatish mumkin.

Jahon shevashunoslik sohasida dialektal hodisalarning mukammal arealini yaratish, shevalarning batafsil va tizimli, oʻz ilmiy an'ana, tendensiyalari va tamoyillariga hamohang, uygʻun hamda tizimli tavsifi yaratilgan. Xususan, hind-yevropa tillari [21, 57 b.] slavyan tillari [7, 87 b.], german-roman va bolqon tillari [15, 43 b.] oʻrganilib, salmoqli yutuqlar qoʻlga kiritilgan va bu dialektologik va areologik an'analar ayni paytlarda ham yuqori darajada davom etmoqda.

Darhaqiqat, shevalar boʻyicha toʻplangan dialektal materiallar asosida xalqlarning hayoti va turmush tarzi bilan bogʻliq boʻlgan juda koʻplab soʻzlar, grammatik shakllar hamda konstruksion qurilmaga ega gaplar adabiy tilga olib kiriladi. Ma'lum xalqqa, millatga tegishli adabiy til imkoniyatlari kengayib, boyib boraveradi.

Yuqoridagilardan kelib chiqib, Namangan viloyati shevasining tarixiy genezisi, tarqalishi va amal qilish arealini belgilash, sheva tasnifi va tavsifi tovushlar tizimining oʻziga xos fonetik-fonologik xususiyatlari, leksik-semantik va grammatik shakl va qurilmalarning oʻziga xos xususiyatlari va qonuniyatlarning voqelanish jarayonlarini qiyosiy-tarixiy jihatdan yoritishga harakat qilamiz. Namangan viloyati arealidagi amaliyotlar natijasida aniqlangan misollar asosidagi oʻziga xos lingvistik xususiyatlar, jahon turkiy tillari va boshqa oʻzbek shevalari bilan lisoniy jihatlaridagi mushtarak belgilar va ular haqidagi xulosalarni bayon qilishga urinamiz.

Adabiyotlar tahlili

Maqolada N.A.Baskakovning "Turkiy tillarning rivojlanish areallari va chegara zonalari", N.I.Tolstoyning "Ареальные исследования в языкщзнании", E.V.Sevortyaning "Janubiy turkiy tillarda undosh tovushlar assimilyatsiyasi va dissimilyatsiyasi" hamda "Turkiy tillar grammatikasining qiyosiy tadqiqotlari", Sh.Shoabdurahmonovning "Oʻzbek tilining dialektologik atlasi", N.Z.Gadjievaning "Turkiy areal lingvistika muammolari", A.B.Joʻrayevning "Oʻzbek tili massivini areal tadqiq qilishning nazariy asoslari", I.Darveshovning "Areal tilshunoslik: janubi-gʻarbiy Namangan shevalarining fonetik-fonologik xususiyatlari" asarlari har tomonlama tahlil qilindi.

Tadqiqot metodologiyasi

Maqolaga yevropa, rus va o‘zbek dialektologik adabiyotlari asos qilib olindi. Mazkur tadqiqotda Namangan viloyatining hududiy-dialektologik xususiyatlarini o‘rganishda hududiy lingvistika (areal lingvistika) tamoyillariga tayanildi. Namangan viloyatining geografik joylashuvi, Farg‘ona vodiysining boshqa hududlari bilan chegaradoshligi va ichki shevalarning tarqalish arealini aniqlash maqsadida zamonaviy axborot tizimlari va raqamli xaritalash usullaridan foydalanildi. Namangan viloyati tumanlari kesimida so‘zlashuv nutqidagi fonetik, leksik va grammatik farqlarni qiyosiy-tarixiy hamda tahliliy metodlar yordamida o‘rganishga alohida e’tibor qaratildi. Hududdagi lahja va shevalarning o‘ziga xos xususiyatlarini yig‘ishda ekspeditsiya materiallari hamda mavjud ilmiy manbalar tahlil qilindi.

Natijalar va tahlil

Jahon tilshunosligidagi muhim masalalardan biri bu tilni areal-tipologik va areal-lingvistik metodlar orqali o‘rganishdir. O‘zbek tilshunosligida lingvistik nazariya va konsepsiyalarning ilk boshlang‘ich nuqtasi – shevalarni, ularning o‘ziga xos lisoniy belgi-xususiyatlarini tadqiq etish bugungi kunda qay darajada? Bu savollarga ham imkon qadar kichik bir arealni o‘rganish barobarida javob topishga harakat qilamiz.

O‘zbekistonda ilm-fan rivojlanishi uchun olib borilayotgan bugungi islohotlarda o‘zbek tilshunosligi oldiga qo‘yilayotgan vazifalarni bajarishga to‘liq imkoniyat va shart-sharoitlar mavjud. O‘zbek tilini har tomonlama mukammal tadqiq etishga bag‘ishlangan maqsadli ilmiy-tadqiqot ishlari keng ko‘lamda amalga oshirilmoqda. Yuzlab mavzularda tilimiz yuzasidan dissertatsion tadqiqot ishlari himoya qilinmoqda. Biroq aksariyat o‘zbek shevalari ochilmagan qo‘riq, inson oyog‘i tegmagan bir orol sifatida lingvistik jihatlari, boy so‘zliklari o‘rganilmay yotibdi. Adabiy tilimizning kelajagiga, taraqqiysiga bu holatlarning ta’siri qanday bo‘ladi? Adabiy til shevalardan oziqlanishi tabiiy-ku.

Ayni paytlarda o‘zbek shevalari va ularning o‘ziga xos xususiyatlarini areal lingvistik tadqiqotlar nazariy asoslariga tayanib, tarixiy-qiyosiy va etnolisoniy jihatdan tadqiq etish ustuvor yo‘nalishlardan biri sifatida belgilanishi shart. Sohaning nomukammal, oddiy tavsifiy va tasviriy jihatlardan iborat noaniq o‘rinlarni yangicha qarashlar asosida, mental nuqtayi nazaridan o‘rganish va to‘ldirishga zarurat sezilmoqda [5, 3-8, 130 b.]. Shundagina tilshunoslik sohalarini tubdan yangilashga qaratilgan innovatsion rivojlanish yo‘liga o‘tishimiz mumkin.

Aniqki, shevashunoslik bo‘yicha amalga oshiriladigan tadqiqotlarda sheva lingvistik birliklarini areal lingvistik konsepsiyalar orqali tadrijiy taraqqiyot asosida analiz va sintezlash zarur. Dialektlarni umumiy tilshunoslikning bir aspekti sifatidagina emas, alohida kengaygan tarmoq va alohidalik belgilariga ega fan sifatida o‘rganish maqsadga muvofiq bo‘ladi.

O‘zbek tilshunosligining dialektologiya va arealogiya sohasi vakillari ham o‘z ilmiy tadqiqot ishlaridagi qarashlarida ham millat tilini dialektologik manba-materiallarni nafaqat tasviriy jihatdan, balki lingvistik geografik, areal lingvistik, qiyosiy, qiyosiy-tarixiy lingvomadaniy, etnolingvistik, tamoyillar asosida yaxlit o‘rganish ko‘proq samara berishi shubhasizdir. Dialektologik ishlarda hududiy til hodisalarining tarqalish ko‘lami va zonasini izoglassa *(izofonema – fonetik belgi, izomorfema – morfologik belgi, izoglassa – leksik belgi; izoglossa chiziqlari esa dialekt kontinuumi tilining (shevaning) lingvistik xaritasidagi odatiy tutashtiruvchi chiziqlari.)* va uning chiziqlari orqali belgilansa, tasviriylikdan qutilib, “nima uchun shunday?” degan savolga aniq ilmiy javob topa olamiz.

Turkiy tilshunoslikda XX asrning 50-60-yillardan boshlab lingvistik geografiyaga, lingvistik xaritalar masalasiga bir oz e’tibor kuchaydi. Bu masala va muammolar N.A.Baskakov [9, 51 b.], M.M.Shiraliyev [32, 68 b.], N.I.Tolstoy [26, 286 b.] N.Z.Gadjiyeva [11, 115 b.], E.V.Sevortyan [24, 102 b.], Sh.Shoabdurahmonov [34, 35-38 b.], A.Shermatov [29, 245 b.], N.B.Burganov [8, 33 b.] kabi olimlar tomonidan yoritildi.

Rang-barang xususiyatlarni o‘zida ifoda etuvchi o‘zbek xalq shevalarining lingvistik xaritalardagi ko‘rinishi til o‘rganuvchilar uchun tilshunoslik va dialektologik qonuniyatlarni tushuntirishda, albatta, juda natijali va samarador bo‘ladi. Ularda ko‘rsatilgan dialektal xususiyatlar, tarqalish hudud – zonalari tilshunosga til hodisalarining tarixiy taraqqiyoti, o‘zbek milliy tilining shakllanish jarayonlari, adabiy til takomili kabi bir qancha masalalarni chuqur va mukammal o‘rganish sharoitini yaratadi.

Lingvistik hodisalarning ma’lum kenglikda tarqalishi va tillararo (shevalararo) munosabatlarni lingvistik geografiya metodlari asosida tadqiq qilish va o‘rganish tamoyillari til (sheva) xususiyatlarini areal bo‘linishini tavsiflash va ma’lum izoglassalarni tahlil qilish, shevalar, tillar jamoalarini (tillar ittifoqi) o‘rtasidagi o‘zaro ta’sir zonalarini (aniq areallarini) aniqlash uchun eng samarali usuldir.

O‘zbek tilshunosligida areal tilshunoslik asosida o‘rganishda A.Jo‘rayev [14, 178 b.], Q.Muhammadjonov [20, 58 b.] Y.Ibrohimov [16, 41 b.] kabi areolog – shevashunoslarning mehnatini alohida ta’kidlash lozim. Bu borada O‘zbekiston Respublikasida o‘zbek tilli massivlarning areal o‘rganilishining nazariy asoslarini yoritib bergan professor A.B.Jo‘rayev xizmatlarini alohida ko‘rsatib o‘tish maqsadga muvofiqdir.

Professor A.Nurmonov “O‘zbek dialektologiyasining shakllanishi va rivojlanishi” nomli maqolasida “o‘zbek mahalliy shevalarini o‘rganishda “Chig‘atoy gurungi” olg‘a surgan g‘oya katta xizmat qildi. Bunga ko‘ra “tilimizning adabiyligi arabiyligida emas, o‘zidadir, shuni tirguzmak”, “tilimiz qoidalarini tatarcha yoxud usmonlicha emas,

tilimizning oʻzidan olmoq" kerak edi. Shuning uchun "xalq ogʻzida yurgan soʻzlarni, xalq adabiyoti boʻlgʻon ertaklar, maqollar yigʻib tekshirmak lozim"ligini ta'kidlab, shundagina jonli xalq tilining oʻziga xos xususiyatlarini haqqoniy oʻrganishga bel bogʻlanishini aytib oʻtadi [22, 425-426 b.]. Olim fikrlari davomida oʻzbek shevashunosligi fanining rivoji uchun salmoqli ulush qoʻshgan fan fidoyilari – A.Shermatovning lingvogeografiyaga, A.B.Joʻrayevning areal lingvistikaga katta yoʻl ochganligini hamda oʻzbek dialektologiyasining keng front boʻylab ravnaq topishi oʻzbek tilini lingvistik xaritalashtirishga keng imkoniyatlar tugʻdirishini va lingvogeografik va areal tadqiqotlar olib borishga sharoit yaratishini, yangi tadqiqotlar dunyoga kelishi oʻzbek tilshunosligining katta yutugʻi boʻlishini ta'kidlagan edi [22, 425-426 b.].

A.B.Joʻrayevning natijali ilmiy izlanishlari oʻzbek areal tilshunosligi boʻyicha amalga oshirilgan yagona ish sifatida ahamiyatlidir.

Boy tilshunosligimizning tarixidan ma'lumki, oʻzbek dialektologiyasining va areal lingvistikasining nazariy asoslari Mahmud Koshgʻariyning "Devonu lugʻotit-turk", Alisher Navoiyning "Muhokamat ul-lugʻatayn" asarlari, keyinchalik Z.M.Bobur, Abulgʻozi Bahodirxon me'rosi bilan bir davrda yoki ulardan ham avvalroq shakillanib ulgurgan.

Biz oʻzbek shevalari oʻrganilishining ilmiy-nazariy asoslarini butun Oʻzbekiston shevalari miqyosida emas, balki Namangan viloyati shevalari arealining oʻrganilishi koʻlami doirasida belgilaymiz va bular asosida xulosa va toʻxtamlarimizni ifodalashga harakat qilamiz.

Hozirgi oʻzbek adabiy tilining poydevor va tayanch birliklarining aksariyati Fargʻona vodiysi shevalarining mahsulidir. Shuning uchun ham akademik A.K.Borovkov oʻz ilmiy izlanishlarini Fargʻona vodiysi shevalaridan materiallar toʻplashdan boshlangani bejiz emas. Biroq u davrlarda mamlakatimizda shevashunoslik faoliyatini birlashtiruvchi markazning yoʻqligi dialektal manba-materiallarni batafsil qayta koʻrib chiqish va xaritalarga koʻchirish imkoniyatiga yoʻl bermagan edi. Bir muddat avvalroq etnograf-tarixchi va dialektolog-tilshunos E.D.Polivanov hamda G'.O.Yunusov, I.K.Yudaxinlar ham oʻzbek shevalari va ularning lisoniy xususiyatlarini oʻrganish, sheva birliklarini xaritalashtirish ishlarini amalga oshirdilar. Oʻzbekistonda shevalarni oʻrganish kuchaydi va ularning areallarini belgilash ishi kun tartibiga qoʻyildi. V.V.Reshetov, Sh.Shoabdurahmonov kabi tilshunoslar oʻzbek areal tilshunosligi sohasini nazariy va ilmiy-amaliy asoslar bilan oʻzlarining ilmiy asarlari, asosli manba – materiallar bilan boyitishga, oʻzbek dialektologiya sohasining rivojlanishiga, takomillashishiga salmoqli ulush qoʻshdilar.

Oʻzbek dialektlari arealini xaritalashtirishda professor V.V.Reshetovning xizmatlari katta. U Toshkent viloyati boʻyicha dialektologik tadqiqotlar olib borib, Ohangaron vohasidagi shevalarda uchraydigan adabiy tildan fonetik, leksik va grammatik jihatdan keskin farq qiluvchi birliklarni aniqladi Ularni lingvistik xaritalarga koʻchirganligi haqida ma'lumotlar uchraydi. Dialektolog olim A.Shermatov V.V.Reshetovning hozirgi zamon oʻzbek tilshunoslik sohasi oʻzbek shevashunosligida birinchi boʻlib oʻzbek qurama shevalarning 49 ta lingvistik xaritasini tuzganligini, negadir hozirgacha bu xaritalar mavjud emasligini, nashr qilinmaganligini yozadi [30, 4 b.].

Tadrijiy – evolyutsion rivojlanish har qanday fanga xos, bu yangilik emas. Oʻrta Osiyodagi va boshqa yer yuzidagi turkiylar, turkiy lingvistikaga, shevashunoslikka XI asrdayoq Mahmud Koshgʻariy [19, 62 b.], keyinchalik, Alisher Navoiy [4, 106 b.] tomonidan haqiqiy asos solingan boʻlsa, ularning ilmiy-nazariy qarashlari hozirgacha turkiy va oʻzbek tilshunosligining bebaho xazinasi sifatida baholanib, oʻrganilib kelmoqda.

Turkiy tillarning ilmiy oʻrganilishi oʻzbek tilshunosligi, xususan, oʻzbek dialektologiyasi sohasining rivoj topishida muhim bosqich sanaladiki, bunda turkolog olim N.A.Baskakov [27, 121-135 b.] va boshqa koʻplab turkiyshunoslarning ilmiy-nazariy konsepsiyalari turkologiya va oʻzbek shevashunosligi taraqqiyotiga alohida hissa qoʻshgan.

Oʻzbek dialektlari arealini E.D.Polivanov salmoqli nazariy va amaliy ishlarni amalga oshirdi va oʻzbek shevalarini birinchilardan boʻlib tasniflab berdi [28, 45 b.].

K.K.Yudaxin oʻzbek shevalari genezisidagi interferentsiya – oʻzbek-uygʻur va qirgʻiz-oʻzbek-tojik tillari orasidagi oʻzaro munosabatlar masalasini oydinlashtirib berdi. Chigʻatoy tili tovush tizimini sinchiklab, chuqur oʻrgandi [35, 28-30 b.].

A.K.Borovkov esa, oʻz izlanishlari orqali oʻzbek-tojik tillarining oʻzaro munosabati, oʻzbek shevalarining tasnifi va tavsifi, oʻzbek dialektlari fonetikasiga katta urgʻu berdi [10, 58-74 b.].

V.V.Reshetov esa oʻzbek shevalarining fonetikasi, uning transkriptsiyasi, oʻzbek milliy tilining dialektal asoslari boʻlgan muhim masalalarni oydinlashtirishga harakat qildi. Toshkent, Ohangaron hududlari, Margʻilon, Namangan kabi yirik shaharlar shevalarini oʻrganib, hozirgi oʻzbek adabiy tiliga asos boʻlgan oʻzbek shevalarning adabiy tilga boʻlgan munosabati, ularning oʻziga xos xususiyatlarini ilmiy-nazariy tarzda koʻrsatib berdi. Qurama genezisining ilmiy-nazariy va amaliy asosini aniqlashga muvaffaq boʻldi va qurama shevalarining oʻziga xos xususiyatlarini, ayniqsa, fonetik sathini tasniflab berdi.

Bir talay oʻzbek millatining zabardast tilshunos – dialektologlari Sh.Shoabdurahmonov, F.Abdullayev, Y.Gʻulomov, Sh.Afzalov, X.Donyorov, A.Y.Aliyev, Q.Muhammadjonov, Y.Ibrohimov til fidoiylari oʻzbek shevalari fonetikasi, leksikasi va grammatikasi oʻrganilishi yoʻlida salmoqli ishlarni amalga oshirdilar.

Aytish kerakki, oʻzbek shevalari lisoniy xususiyatlarini oʻrganishda oʻzbek dialektologiyasining oʻz anʼanalari, oʻziga xos tamoyil va asoslari bor [31, 81 b.]. Katta avlod olimlari tomonidan boshlangan oʻzbek shevalarining ilmiy asosda oʻrganilishini Sh.Shoabdurahmonov, F.Abdullayev, X.Donyorov, S.Ibrohimov, A.Ishayev, A.Aliyev, N.Rajabov, Sh.Nosirov, S.Otamirzayeva, H.Uzoqov, S.Tulyakov va boshqa olimlar davom ettirdilar [13, 147 b.].

XX asrning uchinchi choragi, aniqrogʻi, 60-70-yillariga kelib, oʻzbek shevashunosligida ilmiy tadqiqot ishlari amalga oshirish kuchaydi. A.Ishayevning Mangʻit shevasiga bagʻishlangan izlanishlari [18, 52 b.], F.Abdullayevning dialektologik tadqiqotlari [6, 178 b.] salmogʻi, ilmiylik jihatlari bilan qimmatlidir.

Bu davrda Namangan viloyati shevalarini oʻrganish ham kuchaya bordi. Namangan shahar tip shevasining fonetik strukturasi eksperimental tahlillar asosida oʻrganilgan, uning boshqa oʻzbek shevalaridan tubdan farq qilishi, faqat Namangan shahar arealigagini xos lisoniy belgilari aniqlangan S.Otamirzayevaning Namangan shevasi fonetikasiga bagʻishlangan tadqiqotlari monografik tarzda [23, 187 b.] maydonga keldi.

A.Turgʻunovning oʻzbek tili Baliqchi guruh shevalari, H.Hamroyevning oʻzbek tili Qashqadaryo shevalari, D.Abdullayevaning oʻzbek tili Oshoba shevasi lisoniy xususiyatlari dialektal tahlil qilingan tadqiqotlari [25, 201 b.], yana boshqa koʻplab oʻzbek shevalarini oʻrganishga qaratilgan ilmiy tadqiqotlar amalga oshirildi.

Oʻzbek tilshunosligining mukammal tarmogʻi sifatida shakllangan boʻlishiga qaramay, deyarli yarim asrdan koʻproq yillar davomida oʻzbek shevashunosligi boʻyicha amalga oshirilishi lozim boʻlgan ilmiy izlanishlar, tadqiqotlar juda kam, talab darajasida amalga oshirilmayapti. Adabiy tilimizning boyish va oziqlanish manbayi oʻrganilmay, bu adabiy tilimizning taraqqiy etishi va rivojlanishiga salbiy taʼsir koʻrsatganday boʻlib koʻrinmoqda.

Bugungi kunga kelib ham oʻzbek shevalari boʻyicha amalga oshirilayotgan ishlarning koʻlami juda kengayib keta olmayapti. Lingvistik geografiya, areal tilshunoslik nuqtayi nazaridan hali oʻzbek shevalarini toʻla tahlilga tortilgan deb boʻlmaydi. Ayniqsa, Oʻzbekistonning markaziy va aholisi zich yirik shaharlaridan uzoq joylashgan aholi shevalarini areal oʻrganilishi hali oʻz yakunini topmagan. Dialektal faktlarni oʻrganish xalqimiz milliy vakillarning etnik, mental, maʼnaviy va madaniy xususiyatlarini aniqlash imkonini beradi. Zero, til millatning bebaho qadriyati, donishmandlar taʼkidlaganidek: “Tilda millat ruhi yashaydi” [12, 15-21 b.].

Jahonda areal lingvistik tadqiqotlar juda koʻp miqdorda amalga oshirilgani bois ularning barchasi haqida maʼlumot berish ancha murakkab.

Mamlakatimizda oʻzbek shevalari oʻrganilishining ilmiy-nazariy asoslarini ikki guruhga ajratish mumkin:

1. Hozirgi tilshunoslik sohasidagi sof dialektologik koʻlamdagi ilmiy tadqiqot ishlari. Ularda, asosan, shevaning oʻziga xos fonetik, leksik va grammatik xususiyatlari aholi yashash manzillarining nomi keltirilib, lingvistik xaritalash orqali oʻrganilgan. Bu jarayon XX asrning 90-yillariga qadar davom etdi, hozirda ham amalga oshirilmoqda. Xususan, oʻzbek shevalarini oʻrgangan oʻzbek tilshunoslaridan aksariyat tadqiqot ishlarini mazkur guruhga kiritish mumkin. Hozirgi oʻzbek tilidagi ilk tadqiqot ishlari sifatida E.D.Polivanovning asarlari [3, 90 b.]ni keltirish lozim.

XXI asrning boshlaridan to hozirgi kunlargacha Norbayeva Shukurjon Xayitbayevnaning “Xorazm shevalari kasbiy leksikasi shakllanishining onomasiologik tamoyillari” (2016), Allaberdiyev Alijon Avezberdiyevich tomonidan “Buxoro oʻgʻuz shevalari leksikasi” (2018), Xolova Muyassar Abdulxakimovnaning 2022-yilda “Oʻzbek milliy shevalari korpusi tadqiqi (Boysun tumani “j”lovchi shevalari misolida) dissertatsion tadqiqot ishi, “Oʻzbek milliy shevalari korpusi tadqiqi” (2022) monografiyasi hamda “Oʻzbek tili dialektal korpusini tuzish amaliyoti” (2023) darsligi, Xidiraliyeva Zoxira Risqulovnaning “Oʻzbek tilining Iqon shevasi” (2023) kabi oʻzbek shevalarini dialektologik aspektlarda oʻrganish ishlari maydonga keldi.

2. Mahmud Koshgʻariy ilmiy anʼanalirini davom ettirgan holda lingvogeografik metod asosida oʻzbek shevalari arealogik aspektlarda oʻrganilgan ilmiy faoliyatda quyidagilarni eʼtirof etish maqsadga muvofiq: Sh.Shoabdurahmonov, V.V.Reshetov, A.Joʻrayev, A.Shermatov, Q.Muhammadjonov, Y.Ibrohimov, N.Murodova [33, 371 b.], Z.Ibrohimova, I.Darvishov, N.Rahmonovlarning monografik izlanishlari [17, 143 b.], Sh.Norbayeva, G.Norova, A.Turdaliyev, M.Suvanova, Sh.Alimova, Z.Xidiraliyeva, O.Nurjanov, Z.Tillabayeva, A.Allaberdiyevlarning [1, 58 b.] dissertatsion tadqiqotlari oʻzbek shevalari oʻrganilishining nazariy asoslarining mustahkamlanisiga ilmiy jihatdan munosib ulush boʻlib qoʻshilgan, desak xato boʻlmaydi.

Xulosa

Shevalarni areal aspektlarda oʻrganish boʻyicha amalga oshirilgan tadqiqotlarda, asosan, Oʻzbekistonda dialektologik atlas yaratish ishlari, oʻz lingvistik qarashlarini dialektologik xaritalar tuzish orqali bayon qilganlar va oʻrganilgan areallarning lingvistik atlaslarini taqdim etganlar.

Shuni takidlash lozimki, hali mamlakatimizda oʻzbek milliy shevalari dialektologik atlasini yaratish ishiga hali toʻliq kirishilganicha yoʻq, lekin areal lingvistika masalalari oʻzbek tilshunosligida oʻtgan asrning 20-yillaridayoq tadqiq qilina boshlagan “...E.D.Polivanovning “Oʻzbek dialektologiyasi va oʻzbek adabiy tili” degan asari ahamiyatlidir. Asarda oʻzbek shevalarining tarqalishi, ularning yaqinlik darajasi, ularga xos fonetik, leksik, morfologik xususiyatlar belgilab berilgan.

Muhimi, o‘zbek tilining uch lahjasi turkiy tillar tarixi bilan bog‘lanadi, o‘zbek shevalarining chegaradosh tillar bilan munosabati ham e’tibordan chetda qolmagan [5, 3-8, 130 b.].

Aniqki, xalq shevalari adabiy tilining yozma yodgorliklariga nisbatan ham qadimiyroq tarixiy manbadir. Bizgacha yetib kelgan yozma yodgorliklarda uchramaydigan til faktlari shevalarda saqlanib qolgan. Shuning uchun sheva materiallarini tadqiq etish tilning ontologik tabiatini ochib berish imkonini beradi [12, 15-21 b.].

Darhaqiqat, o‘zbek shevalari o‘zbek milliy tilining tarkibiy qismi sifatida, o‘zining qadimiy lisoniy hodisa ekanligi, asrlar davomida rivojlanib, boyib hamda takomillashib borganligi uning rang-barang jiloga ega ekanligi, adabiy tilimiz boyishiga beminnat xizmat qilishi bilan tavsiflanadi. Xalq sheva va lahjalari o‘zida tilning qadimiy va ko‘hna holatini, fonetik, lug‘aviy, grammatik xususiyatlarini saqlab kelayotgan noyob manba – tirik tarixdir. Bu boylikni o‘rganish bo‘yicha anchagina ishlar amalga oshirilishi lozimligini bugungi adabiy tilimizdan foydalanayotgan xalqimiz lisoniy va nutqiy darajasidan ham bilsak bo‘ladi. Ayniqsa, zamonaviy yoshlarimizning milliy-mental ruhda tarbiyalanishlariga bir omil bo‘ladi.

Xususan, boshqa turkiy tillarda bo‘lgani kabi Namangan viloyati shevalarida ham o‘zbek xalqining uzoq davom etgan qadimiy asos – “Devoni lug‘otit-turk” davri fonetikasi, leksikasi va grammatikasidagi mushtarak xususiyatlar sheva areali tahlillari davomida ma’lum bo‘ldi.

Sheva leksikasi materiallarini to‘plash va ularni tasnif qilish mazkur sheva nihoyatda xilma-xil va ko‘p qirrali ekanligini ko‘rsatib berdi. Areal aholisi tilida iste’molda bo‘lgan hunarmandchilik, kasb-korga, qishloq xo‘jaligiga oid terminlar, kishilarning kundalik turmushi, falsafiy-diniy qarashlariga oid so‘zlar, qadimiy ma’rifiy madaniyati, mental jihatlarni o‘zida ifodalab berishi namoyon bo‘ldi.

Shevalar bo‘yicha dialektal fonetik-fonologik, leksik-semantik va morfogrammatik lisoniy xususiyatlar ta’lim tizimida o‘qituvchi va o‘quvchilar til kompetentligini boyitish va rivojlantirishga, ular ongiga adabiy til me’yorlarini singdirishga va nutq madaniyatini shakllantirishga salbiy ta’sir etmasligi uchun amaliy tilshunoslik masalalarini kun tartibiga qo‘yish bugungi tilshunosligimiz, fanimiz va milliy adabiy tilimizning rivojlantirish yo‘lidagi muhim va dolzarb vazifalardandir.

1991–2026-YILLARDA O‘ZBEKISTON TIL SIYOSATINING INGLIZ TILI MAQOMI VA UNING MAHALLIY VARIANTLASHUVIGA TA’SIRI

Raxmonova Zebunisso Anvarjon qizi
Namangan davlat chet tillari instituti doktoranti
E-mail: zebunisso.rakhmonova94@gmail.com
ORCID: 0009-0006-4260-5245

Annotatsiya: *Ushbu tadqiqot 1991–2026-yillarda O‘zbekistonda olib borilgan me’yoriy-huquqiy til siyosatining ingliz tili maqomiga ta’sirini diaxronik va institutsional yondashuvlar asosida tahlil qiladi. Ishning maqsadi — asosiy qonun hujjatlari (PQ-1875, PF-4947, VM-312, VM-3318, PQ-241) dinamikasini o‘rganish orqali tildan foydalanishning institutsionallashuv darajasini aniqlash hamda “Uzbek English” mahalliy varianti shakllanishi uchun asoslarni aniqlashdan iborat. Maqolada Bernard Spolski modeli va kontent-tahlilga tayangan holda, ingliz tili siyosati evolyutsiyasi uch bosqichni bosib o‘tgani ko‘rsatildi: davlat tili ustuvorligi davri (1991–2000); yashirin maqomni rejalashtirish va ommalashtirishning boshlanishi (2001–2016); tizimlashtirish hamda tilni strategik muloqot vositasiga aylantirish (2017–2026). Sertifikatlash va moddiy rag‘batlar ingliz tilini muhim lingvistik hamda iqtisodiy kapitalga aylantirgani va uning B. Kachru “Expanding Circle” doirasidan chiqib, mahalliy variantlanishiga sharoit yaratayotgani ko‘rsatib o‘tilgan.*

Kalit so‘zlar: *til siyosati, ingliz tilining maqomi, O‘zbekiston, Uzbek English, diaxronik tahlil, B. Spolsky modeli, lingvistik kapital, yashirin maqom rejalashtirish, institutsionallashuv, me’yoriy-huquqiy hujjatlar.*

ВЛИЯНИЕ ЯЗЫКОВОЙ ПОЛИТИКИ УЗБЕКИСТАНА В 1991–2026 ГОДАХ НА СТАТУС АНГЛИЙСКОГО ЯЗЫКА И ЕГО ЛОКАЛЬНУЮ ВАРИАТИВНОСТЬ

Аннотация: *Данное исследование анализирует влияние нормативно-правовой языковой политики, проводимой в Узбекистане в 1991–2026 годах, на статус английского языка на основе диахронического и институционального подходов. Цель работы — определить степень институционализации использования языка путем изучения динамики ключевых нормативно-правовых актов (ПП-1875, УП-4947, ПКМ-312, ПКМ-3318, ПП-241), а также выявить основы для формирования локального варианта «Uzbek English». Опираясь на модель Бернарда Спольского и контент-анализ, в статье показано, что эволюция политики в отношении английского языка прошла три этапа: период приоритета государственного языка (1991–2000); скрытое планирование статуса и начало популяризации (2001–2016); систематизация и превращение языка в стратегическое средство общения (2017–2026). Продемонстрировано, что сертификация и материальное стимулирование превратили английский язык в важный лингвистический и экономический капитал, создав условия для его локальной вариативности за пределами «Expanding Circle» Б. Качру.*

Ключевые слова: *языковая политика, статус английского языка, Узбекистан, Uzbek English, диахронический анализ, модель Б. Спольского, лингвистический капитал, скрытое планирование статуса, институционализация, нормативно-правовые акты.*

THE IMPACT OF UZBEKISTAN’S LANGUAGE POLICY IN 1991–2026 ON THE STATUS OF ENGLISH AND ITS LOCAL VARIATION

Abstract: *This study analyzes the impact of Uzbekistan’s regulatory language policy from 1991 to 2026 on the status of the English language using diachronic and institutional approaches. The objective of the paper is to determine the degree of institutionalization of language use by examining the dynamics of key legislative acts (PQ-1875, PF-4947, VM-312, VM-3318, PQ-241) and to identify the foundations for the emergence of the localized variety ”Uzbek English”. Drawing on Bernard Spolsky’s model and content analysis, the article demonstrates that the evolution of English language policy progressed through three stages: the era of state language priority (1991–2000); implicit status planning and the onset of popularization (2001–2016); and systematization alongside the transformation of the language into a strategic communication medium (2017–2026). The paper highlights that*

certification and financial incentives have converted English into vital linguistic and economic capital, establishing the prerequisites for its localized variation beyond B. Kachru's "Expanding Circle".

Keywords: *language policy, status of English, Uzbekistan, Uzbek English, diachronic analysis, Spolsky model, linguistic capital, implicit status planning, institutionalization, regulatory documents.*

Kirish

XXI asr globallashuv va axborot-kommunikatsiya texnologiyalari jadallik bilan rivojlanayotgan davrda, tillarning jamiyatdagi amaldagi maqomi hamda ularni qonun yo‘li bilan tartibga solish har qanday suveren davlatning ijtimoiy-siyosiy va iqtisodiy taraqqiyot strategiyasida muhim ahamiyat kasb etadi. B. Spolskining fikricha, til siyosati jamiyat yoki davlat tomonidan muayyan tillarga yoxud ularning variantlariga nisbatan ongli tarzda belgilangan me’yorlar, ijtimoiy ustuvorliklar va institutsional boshqaruv qarorlarining ko‘p qirrali majmuidir [15]. Til siyosati faqatgina ta’lim tizimining mazmuni va yo‘nalishini belgilabgina qolmasdan, balki fuqarolarning mehnat bozoridagi mavqeyi, ijtimoiy harakatchanligi va milliy o‘zlikni anglash darajasiga ham o‘z ta’sirini ko‘rsatadi [15; 13]. Zamonaviy globallashgan dunyoda ingliz tili endilikda nafaqat xalqaro muloqot va biznes vositasi, balki ilm-fan, texnologiyalar, akademik almashinuv va transmilliylashuv jarayonlarining asosiy harakatlantiruvchi kuchi sifatida namoyon bo‘lmoqda [2; 12]. Shu bois post-sovet hududidagi rivojlanayotgan davlatlar uchun milliy-madaniy o‘zlikni saqlab qolgan holda ingliz tilini davlat va jamiyat hayotiga faol integratsiya qilish murakkab va ko‘p qirrali sotsiolingvistik jarayon hisoblanadi [14; 11].

O‘zbekiston Respublikasi mustaqillikka erishish arafasida, til siyosati dastlabki bosqichining eng ustuvor vazifasi sifatida o‘zbek tilining davlat tili maqomini tiklash hamda sovet davrida chetlashtirilgan milliy til huquqlarini amalda ta’minlashni belgilab oldi. 1989-yil 21-oktyabrda “Davlat tili haqida”gi Qonunning qabul qilinishi va 1995-yilda uning yangilangan tahriri tasdiqlanishi bilan milliy til siyosatining mustahkam huquqiy poydevori yaratildi [7]. Ammo keyingi o‘n yilliklarda mamlakatning bozor iqtisodiyotiga o‘tishi, xalqaro hamjamiyatga bosqichma-bosqich kirib borishi hamda jahon mehnat bozorida raqobatbardosh bo‘lishga intilishi xorijiy tillarni, xususan ingliz tilini o‘rganish va amalda qo‘llashga bo‘lgan davlat yondashuvini tubdan o‘zgartirishni taqozo etardi [3; 4].

O‘zbekiston Respublikasi Prezidenti va Vazirlar Mahkamasi tomonidan 2012–2026-yillar oralig‘ida qabul qilingan bir qator davlat hujjatlari — “Chet tillarni o‘rganish tizimini yanada takomillashtirish chora-tadbirlari to‘g‘risida”gi PQ-1875-sonli qaror [5], “O‘zbekiston Respublikasini yanada rivojlantirish bo‘yicha Harakatlar strategiyasi to‘g‘risida”gi PF-4947-sonli Farmon [6], “Xorijiy tillarni o‘rganishni ommalashtirish faoliyatini samarali tashkil etish chora-tadbirlari to‘g‘risida”gi VM-312-sonli qaror [8], “Xalqaro va milliy sertifikatlar muvofiqlik jadvalini tasdiqlash to‘g‘risida”gi VM-3318-sonli qaror [9] hamda maktab ta’limini rivojlantirishga oid PQ-241-sonli qaror [4] — mamlakatda ingliz tilining ijtimoiy maqomini sifat jihatidan yangi bosqichga olib chiqdi. Mazkur normativ-huquqiy hujjatlar ingliz tilini ta’lim muassasalaridagi an’anaviy “o‘quv fani” darajasidan chiqarib, uni davlat xizmatchilari, ilmiy izlanuvchilar, tadbirkorlar va yoshlar uchun strategik ahamiyatga ega bo‘lgan majburiy hamda rag‘batlantiriluvchi vositaga aylantirdi [11; 13].

Til siyosatining bunday jadal me’yoriy-huquqiy institutsionallashuvi va ommalashuvi O‘zbekistonda o‘ziga xos sotsiolingvistik va interferensial jarayonlarni yuzaga keltirmoqda. Davlat darajasidagi moddiy va ma’naviy rag‘batlantirish mexanizmlari — oylik maoshlarga 15–50 foizgacha ustama belgilanishi, xalqaro va milliy sertifikatlarning (IELTS, TOEFL, CEFR) talab qilinishi, xususiy ta’lim sektoriga subsidiyalar ajratilishi — mamlakatda ingliz tilini faol qo‘llovchi keng ijtimoiy qatlamni shakllantirdi [1; 13]. Natijada ingliz tili an’anaviy ravishda amal qilib kelgan “Chet tili sifatida ingliz tili” (EFL) hamda B. Kachru ilgari surgan “Expanding Circle” chegaralaridan bosqichma-bosqich chiqib, mahalliy madaniy, sintaktik, leksik va pragmatik xususiyatlar bilan boyigan “Uzbek English” ko‘rinishida namoyon bo‘lish belgilarini va ijtimoiy-huquqiy shart-sharoitlarini namoyon eta boshladi [3; 4].

Shu bilan birga, mavjud sotsiolingvistik va filologik tadqiqotlar tahlili shuni ko‘rsatadiki, O‘zbekiston til siyosatini tartibga soluvchi rasmiy me’yoriy-huquqiy hujjatlar va davlat qarorlari diaxronik hamda institutsional nuqtai nazardan tizimli tadqiq etilmagan. Davlatning me’yoriy-huquqiy tashabbuslari ingliz tilining lokal variantlashuvi (“Uzbek English”) uchun qanday ijtimoiy-huquqiy va lingvistik zamin yaratganligi masalasi hamon ochiq qolmoqda. Shu sababli ushbu tadqiqot tatqiq etmoqchi bo‘lgan muammo bu davlat me’yoriy-huquqiy til siyosatining evolyutsiyasi ingliz tilining jamiyatda amaldagi maqomini qanday qayta shakllantirgani hamda ushbu bosqichma bosqich o‘zgarishlar “Uzbek English” variantining yuzaga kelishi uchun qanday sotsiolingvistik va huquqiy zamin yaratayotganini ilmiy asoslab berishdan iborat. Tadqiqotning asosiy maqsadi — 1991–2026-yillarda O‘zbekistonda qabul qilingan rasmiy me’yoriy-huquqiy hujjatlarni diaxronik va kontent-tahlil usullari orqali o‘rganish, ingliz tilining huquqiy-ijtimoiy maqomidagi bosqichli evolyutsiyani aniqlash hamda uning “Uzbek English” mahalliy varianti shakllanishidagi rolini nazariy va amaliy jihatdan asoslab berishdir.

Adabiyotlar tahlili

Til siyosati va uning jamiyatdagi institutsional mexanizmlarini tadqiq etishda B. Spolski ilgari surgan uch komponentli model — til amaliyoti, til e'tiqodi/ideologiyasi va til boshqaruvi — ushbu tadqiqot uchun birlamchi nazariy tayanch hisoblanadi [15]. Spolskining ta'kidlashicha, rasmiy til boshqaruvi, ya'ni qonun va qarorlar, jamiyatda mavjud boʻlgan haqiqiy til amaliyoti va ijtimoiy e'tiqodlar bilan mos kelgandagina kutilgan sotsiolingvistik samarani beradi [15]. Mazkur nazariy konsepsiyani E. Shohami oʻzining "yashirin til siyosati" va "siyosiy mexanizmlar" nazariyasi bilan yanada boyitgan [13]. Shohami koʻrsatib oʻtganidek, rasmiy hujjatlarda ochiq ta'kidlanmagan, ammo imtihon tizimlari, majburiy sertifikatlash, til talablari va iqtisodiy manbalarni taqsimlash kabi yashirin vositalar orqali amalga oshiriladigan til siyosati koʻpincha deklarativ e'lonlardan koʻra ancha kuchliroq sotsiolingvistik ta'sir kuchiga ega boʻladi [13].

Lingvistik va ijtimoiy kapital nazariyasi doirasida P. Burdyening qarashlari alohida oʻrin tutadi. P. Burdye tilni shunchaki neytral muloqot vositasi emas, balki ijtimoiy maydonda subyektning mavqeyini, iqtisodiy daromadini va nufuzini belgilaydigan ramziy va lingvistik kapital sifatida talqin qiladi [1]. Oʻzbekiston kontekstida ingliz tili bilimining mehnat bozorida yuqori iqtisodiy qiymatga ega boʻlishi, davlat xizmatida va ilmiy sohaga kirishda ustunlik berishi Burdyeu nazariyasining yorqin amaliy tasdigʻidir [1; 13].

Post-sovet davlatlaridagi til siyosati va koʻptillilik dinamikasini oʻrgangan A. Pavlenko post-sovet makonida davlatlar til siyosatida uchta asosiy jarayonni — milliy tilni tiklash, sovet davridan qolgan rus tili pozitsiyasining oʻzgarishi hamda yangi xalqaro tillarning joriy etilishini — boshdan kechirganini koʻrsatib oʻtgan [11]. J. Smagulova esa Qozogʻiston misolida "qozoqlashtirish" va uch tillilik siyosatining jamiyatdagi til munosabatlariga hamda til egalari stereotiplariga ta'sirini tahlil qilib, davlat me'yoriy hujjatlarining ijtimoiy amaliyot bilan toʻqnashuv nuqtalarini yoritgan [14]. Oʻzbekiston ushbu umumiy post-sovet tendensiyasiga mos kelgani holda, soʻnggi yillarda ingliz tiliga strategik va ommaviy ustuvorlik berilishi jihatidan mintaqada alohida ajralib turuvchi xususiyat namoyon etmoqda [11; 14].

World Englishes va ingliz tilining global tarqalishi nazariyasi sohasida B. Kachru yaratgan "uch doira" modeli metodologik invariant boʻlib xizmat qiladi [3]. Kachru ingliz tilining qoʻllanilish darajasi va tarixiy ildizlariga koʻra jamiyatlarni uchga ajratadi: Inner Circle (ingliz tili ona tili boʻlgan mamlakatlar), Outer Circle (ingliz tili ikkinchi rasmiy va institutsional til boʻlgan sobiq koloniyalar) va Expanding Circle (ingliz tili chet tili sifatida oʻrganiladigan mamlakatlar) [3]. Kachruning ta'kidlashicha, ingliz tili muayyan hududda faol va ommaviy qoʻllanila boshlagach, u mahalliy lingvo-madaniy xususiyatlarni qabul qiladi va muqarrar ravishda mustaqil mahalliy variant koʻrinishini oladi [3; 4]. Ushbu yoʻnalishni davom ettirgan J. Jenkins va B. Seidlhofer ingliz tilining xalqaro lingua-franka (ELF) sifatidagi funksiyasini tadqiq etib, muloqotda til egalari (native-speaker) me'yorlariga koʻr-koʻrona ergashish emas, balki mahalliy muloqotchilarning pragmatik va funksional ehtiyojlari ustuvor ahamiyat kasb etishini isbotlagan [2; 12].

Oʻzbekistonda ingliz tilining amalda qoʻllanishini tadqiq etgan ishlar ta'lim islohotlari va yoshlarning uni lingvistik kapital deb idrok etishini koʻrsatgan [1; 3; 11; 13]. Biroq mavjud nazariy yondashuvlarning hech biri til siyosatining huquqiy mexanizmlari hamda uning sotsiolingvistik oqibatlari oʻrtasidagi bogʻliqlikni alohida holda toʻliq izohlay olmaydi [1; 15]. Shu sababli ushbu tadqiqotda huquqiy hujjatlar tahlilini sotsiolingvistik nazariyalar (Spolsky, Shohami, Burdyeu, Kachru, Jenkins) bilan integratsiyalashgan holda qoʻllash metodologik jihatdan zarurdir [2; 3; 13; 15].

Tadqiqot metodologiyasi

Ushbu tadqiqotda me'oriy-huquqiy til siyosatining vaqt boʻyicha dinamikasini hamda uning sotsiolingvistik oqibatlarini tahlil qilish uchun kvalitativ diaxronik kontent-tahlil va institutsional-tizimli yondashuv usullaridan foydalandik. Tadqiqotning nazariy-metodologik asosi sifatida Bernard Spolskyning til siyosati triadasi [15] hamda Elana Shohamining "yashirin til siyosati" va "siyosiy mexanizmlar" konsepsiyasi [13] tanlab olindi. Mazkur nazariy tahlillar me'yoriy-huquqiy hujjatlarning nafaqat ochiq e'lon qilingan maqsadlarini, balki ularning jamiyatda yuzaga keltirgan bilvosita sotsiolingvistik va interferentsial oqibatlarini chuqur anglashimiz uchun imkon beradi.

Tadqiqotning empirik bazasini 1991–2026-yillarda Oʻzbekiston Respublikasining rasmiy qonunchilik platformasi — "Qonunchilik ma'lumotlari milliy bazasi" (lex.uz) — hamda Oʻzbekiston Respublikasi Qonun hujjatlari toʻplamida e'lon qilingan me'yoriy-huquqiy hujjatlar tashkil etadi [4; 5; 6; 8; 9]. Tahlil uchun quyidagi asosiy normativ-huquqiy hujjatlar saralab olindi: "Davlat tili haqida"gi Qonun (1989-yil 21-oktabr, 1995-yil 21-dekabrdagi yangi tahriri) [7]; Prezidentning 2012-yil 10-dekabrdagi PQ-1875-sonli qarori [5]; Prezidentning 2017-yil 7-fevraldagi PF-4947-sonli Farmoni [6]; Vazirlar Mahkamasining 2021-yil 19-maydagi 312-sonli qarori [8]; Vazirlar Mahkamasining 2021-yil 26-maydagi 3318-sonli qarori [9]; hamda Prezidentning 2024-yil 21-iyundagi PQ-241-sonli qarori [4].

Me'yoriy-huquqiy hujjatlarni diaxronik kontent-tahlil qilishni quyidagi toʻrtta asosiy mezon boʻyicha amalga oshirdik: birinchidan, ingliz tilining statusi va maqomini tekshirish — hujjatda ingliz tiliga berilgan ijtimoiy-huquqiy va institutsional maqom hamda uning davlat va jamiyat muloqotidagi oʻrni [13; 15]; ikkinchidan, institutsional mexanizmlar va ragʻbatlantirishlar — majburiy sertifikatlar (IELTS, CEFR), oylik maosh ustamalari (15–50 foiz), grantlar hamda davlat imtihonlaridagi imtiyozlar dinamikasi [1; 8; 9]; uchinchidan, "policy silence" va ingliz tilining bilvosita maqomi — hujjatlarda rasman ta'kidlanmagan, ammo amalda ingliz tilini boshqa tillardan ustun mavqega koʻtargan sotsiolingvistik

omillar [7; 11]; to‘rtinchidan, mahalliy variantlanish sharoiti — davlat me’yorlarining ingliz tilini ommalashtirish orqali “Uzbek English” shakllanishiga yaratgan zamini [3; 4].

Tanlangan hujjatlar korpusi xronologik tartibda joylashtirilib, har bir hujjat matni yuqorida sanab o‘tilgan 4 ta mezon asosida bizma bir tahlil qilindi. Tahlil jarayonida har bir hujjatdan ingliz tiliga oid me’yoriy ko‘rsatmalar, moddiy rag‘batlantirish choralari va institutsional vazifalar ajratib olindi hamda ular xronologik ketma-ketlikda taqqoslandi.

Natijalar va ularning tahlili

1991–2026-yillar oralig‘idagi normativ-huquqiy hujjatlar korpusini Spolsky [15] va Shohami [13] modellari asosida diaxronik va kontent-tahlil qilish O‘zbekistondagi ingliz tili siyosati evolyutsiyasini uchta aniq bosqichga ajratish imkonini berdi, bular davlat tilini tiklash davridan boshlab strategik lingvistik muhit shakklanishiga qadar davrlarni bosib o‘tganini ko‘rsatadi.

Mustaqillikning dastlabki yillarida (1991–2000) O‘zbekiston til siyosati asosan o‘zbek tilining davlat tili sifatidagi mavqeyini tiklashga qaratilib [7], ingliz tiliga nisbatan me’yoriy-huquqiy munosabat “policy silence” tamoyili bilan tavsiflandi [7; 13]. Ushbu davrda ingliz tili alohida institutsional rag‘batlantirish mexanizmlarisiz, o‘quv rejalaridagi an’anaviy chet tillaridan biri sifatida neytral va akademik shaklda o‘qitildi [3]. Natijada til “Expanding Circle” va klassik EFL doirasida qolib, asosan tashqi aloqalar kabi tor sohalar bilan cheklandi [3; 7] hamda maosh ustamalari yoki sertifikatlash talablarining yo‘qligi sababli ijtimoiy ehtiyoj past bo‘lib, mahalliylashuv jarayonlari uchun zaruriy ommaviylik shakllanmadi.

Vaziyat XXI asr boshlarida tubdan o‘zgara boshladi: mamlakatning xalqaro hamjamiyatga integratsiyalashuvi va iqtisodiy modernizatsiya ehtiyojlari chet tillarini, xususan ingliz tilini ta’lim tizimida o‘qitish yondashuvini qayta ko‘rib chiqishni taqozo etdi. 2001–2016-yillarni qamrab olgan ikkinchi bosqichdagi tub burilish Prezidentning 2012-yil 10-dekabrdagi PQ-1875-sonli qarori bilan belgilandi [5]. Ushbu qaror mamlakat til siyosatida “implicit status planning” mexanizmini ishga tushirdi [5; 13]: qarorda ingliz tiliga rasmiy-huquqiy darajada davlat tili yoki ikkinchi rasmiy til maqomi berilmagan bo‘lsa-da, u ta’lim tizimining barcha bosqichlarida, 1-sinfdan boshlab, majburiy o‘rganiladigan fan sifatida belgilandi [5]. Shuningdek, oliy ta’lim muassasalarida mutaxassislik fanlarini ingliz tilida o‘qitish, pedagog kadrlar uchun ingliz tilini bilish talabini kuchaytirish hamda sertifikatga ega o‘qituvchilarning oylik maoshlariga 15–30 foiz miqdorida ustama belgilash amaliyoti joriy etildi [5]. Bu bilan ingliz tili oddiy ta’lim fanidan jamiyat a’zolarining ijtimoiy hamda iqtisodiy mavqeyini belgilovchi lingvistik kapitalga aylanishning dastlabki institutsional poydevori qo‘yildi [1; 5]. Ushbu bosqichda, shuningdek, xususiy til o‘quv markazlarining soni keskin oshdi, ingliz tili bo‘yicha xalqaro sertifikatlarga bo‘lgan talab shakllana boshladi, oliy ta’lim muassasalarida grant asosida xorijga o‘qishga yuborish dasturlari kengaydi. Bu omillarning barchasi ingliz tilini nafaqat rasmiy ta’lim tizimida, balki norasmiy ijtimoiy muhitda ham mustahkam mavqega ega bo‘lishiga xizmat qildi, biroq bu davrda hali ingliz tilining maqomi to‘g‘ridan-to‘g‘ri qonun darajasida emas, balki asosan idoraviy buyruqlar va dasturlar darajasida tartibga solingani uchun uni yashirin xususiyatga ega deb baholash mumkin.

2017-yildan boshlab O‘zbekistonda amalga oshirilgan keng ko‘lamli islohotlar va “Harakatlar strategiyasi” (PF-4947) til siyosatini tubdan yangi, institutsional darajaga ko‘tardi [6]. 2021-yil 19-maydagi VM-312-sonli qaror hamda 2021-yil 26-maydagi VM-3318-sonli qaror orqali xorijiy tillarni ommalashtirish bo‘yicha yangi davlat agentligi tashkil etildi hamda milliy va xalqaro sertifikatlash — IELTS, TOEFL, CEFR — tizimi barcha sohalarga joriy qilindi [8; 9]. 2024-yildagi PQ-241-sonli qaror esa maktab bitiruvchilari hamda oliy ta’lim, magistratura va doktoranturaga kiruvchilar uchun sertifikat darajasini majburiy shart qilib belgiladi [10]. Shu tariqa uchinchi bosqichda ingliz tili davlat hamda jamiyat hayotining strategik muloqot vositasi darajasiga ko‘tarildi, uning maqomi endi nafaqat majburiy, balki yuqori darajada rag‘batlantiriluvchi va moliyaviy jihatdan qadrlanuvchi resursga aylandi.

1-jadvalda keltirilgan ma’lumotlar ushbu uch bosqichning asosiy me’yoriyhuquqiy hujjatlari, institutsional turi, ingliz tilining jamiyatdagi maqomi va rag‘batlantirish darajasi hamda lingvistik oqibatlari o‘rtasidagi bog‘liqlikni namoyish etadi.

Jadval 1

1991–2026-yillarda O‘zbekiston ingliz tili siyosatining bosqichli evolyutsiyasi

Bosqich va yillar	Asosiy me’yoriy-huquqiy hujjatlar	Til siyosatining institutsional turi (Spolsky / Shohami)	Ingliz tilining jamiyatdagi maqomi va rag‘batlantirish	Lingvistik oqibatlar va variantlanish darajasi
I bosqich (1991–2000)	“Davlat tili haqida”gi Qonun (1989, 1995) [7]	Policy silence (siyosiy sukunat) [7; 11]	Klassik chet tili (EFL), rag‘batlantirish	Inner Circle me’yorlariga ergashish, past ommaviylik, tor interferensiya [3]

Bosqich va yillar	Asosiy me'yoriy-huquqiy hujjatlar	Til siyosatining institutsional turi (Spolsky / Shohami)	Ingliz tilining jamiyatdagi maqomi va rag'batlantirish	Lingvistik oqibatlar va variantlanish darajasi
			mexanizmlari yo'q [3]	
II bosqich (2001–2016)	PQ-1875 (2012) [5]	Implicit status planning (yashirin maqom rejalashtirish) [5; 13]	Majburiy ta'lim fani (1-sinfdan), 15–30% maosh ustamalari [5]	Lingvistik kapitalga aylanishning boshlanishi, pedagogik interferensiya [1; 5]
III bosqich (2017–2026)	PF-4947 [6], VM-312 [8], VM-3318 [9], PQ-241 [10]	Institutionalized policy & incentive-driven management [8; 13; 15]	Strategik va majburiy kapital, 50% maosh ustamalari, imtihon xarajatlarini qoplash [1; 8; 9]	"Uzbek English" variantining shakllanishi uchun sotsiolingvistik zamin [3; 4]

E. Shohami ta'kidlaganidek, davlat tomonidan qo'llaniladigan imtihonlar, sertifikatlar va moliyaviy rag'batlar eng ta'sirchan siyosiy vosita hisoblanadi [13]. O'zbekistonda 2017–2026-yillarda joriy etilgan maoshga 50 foizgacha ustama berish (VM-312) [8], C1 sertifikatiga ega o'qituvchilarning imtihon xarajatlarini davlat tomonidan qoplab berish va talabalarga imtiyozlar ajratish mexanizmlari [8; 9] ingliz tilini keng xalq ommasi uchun eng jozibador va zarur iqtisodiy manba, ya'ni Burdyeu talqinidagi lingvistik kapitalga aylantirdi [1]. Ingliz tilidan foydalanuvchilar sonining bunday sun'iy va institutsional ravishda keskin ortishi Kachru tasvirlagan sotsiolingvistik transformatsiyani keltirib chiqardi [3; 4]. Ingliz tili endi faqat "native-speaker" me'yorlariga ko'r-ko'rona taqlid qilinadigan chet tili (EFL) bo'lishdan to'xtab, O'zbekistonning o'z ichki ijtimoiy-akademik, ma'muriy va madaniy ehtiyojlariga xizmat qiluvchi "Uzbek English" ko'rinishida namoyon bo'lish sohasini kengaytirmoqda [3; 4].

Me'yoriy-huquqiy hujjatlar va ularning sotsiolingvistik tahlili "Uzbek English" mahalliy varianti shakllanishi uchun uchta asosiy zamin yaratilganini ko'rsatadi. Birinchidan, leksik va pragmatik nativizatsiya kuzatilmoqda: davlat boshqaruvi, ta'lim va rasmiy hujjatlarda ingliz tilidan foydalanish jarayonida milliy-davlat realliklarini ifodalovchi leksik va semantik birliklar (masalan, mahalla, hokimiyat, khokim, tuy, sarpo, khashar, mahalla committee, testing center, presidential school) inglizcha matnlarga tizimli ravishda integratsiyalashmoqda [3; 4]. Ikkinchidan, sintaktik va stilistik interferensiya yuzaga kelmoqda: o'zbek va rus tillarining grammatik hamda stilistik qurilmalari, jumladan gap oxirida kesimning kelishi, ketma-ket ergashgan ergashtiruvchi bog'lovchilar va rasmiy-idoraviy uslubning inglizcha matnlarga ko'chishi mahalliy akademik va rasmiy inglizcha diskursda barqaror me'yorga aylanmoqda [3]. Uchinchidan, funksional diskurs sferasi kengaymoqda: ingliz tili endilikda faqat xorijliklar bilan muloqot qilish uchun emas, balki O'zbekiston fuqarolarining o'zaro akademik (konferensiyalar, ilmiy maqolalar), ta'limiy va biznes muloqoti vositasi, ya'ni lingua franka (ELF) sifatida qo'llanilmoqda [2; 10].

Shu tariqa, davlat me'yoriy-huquqiy siyosatining uch bosqichli evolyutsiyasi — siyosiy sukunatdan yashirin maqom rejalashtirishga, undan institutsionlashuv va strategik kapitalizatsiyaga o'tish — ingliz tilining O'zbekistondagi ijtimoiy vazifasini tubdan qayta shakllantirdi va uni "Expanding Circle" chegaralaridan chiqarib, mustaqil mahalliy variant sifatida rivojlanishi uchun zamin yaratmoqda.

Xulosalar

1991–2026-yillarda O'zbekistonda olib borilgan me'yoriy-huquqiy til siyosati tahlili ingliz tili evolyutsiyasi uchta asosiy bosqichni — "policy silence" davridan yashirin maqom rejalashtirish (PQ-1875) hamda faol institutsionalizatsiyagacha bo'lgan yo'lni bosib o'tganini ko'rsatadi [5; 7; 11; 13]. Rasmiy hujjatlarda ingliz tiliga ikkinchi davlat tili maqomi berilmagan bo'lsa-da, majburiy sertifikatlash (B2/C1), 50 foizgacha oylik maosh ustamalari va imtiyozlar mexanizmi (VM-312, VM-3318, PQ-241) uni jamiyatdagi eng yuqori iqtisodiy hamda ramziy lingvistik kapitalga aylantirdi [1; 4; 8; 9]. Davlat qarorlari va me'yoriy rag'batlar orqali ushbu tilning ommalashuvi ingliz tilini an'anaviy "Expanding Circle" va klassik EFL ramkalaridan olib chiqib, o'zbek milliy-davlat realliklari, sintaktik va pragmatik xususiyatlar bilan boyigan "Uzbek English" mahalliy varianti shakllanishi uchun poydevor yaratdi [3; 4].

Shu bilan birga, aytish joizki, tahlil asosan rasmiy me'yoriy-huquqiy hujjatlar korpusiga tayangan bo'lib, "Uzbek English" variantining haqiqiy leksik-grammatik xususiyatlarini aniqlash uchun keng ko'lamli empirik korpus tahlili ushbu

maqola doirasidan tashqarida qoldi. Shu sababli, kelgusi tadqiqotlarda me'yoriy-huquqiy tahlilni til foydalanuvchilaridan olingan sotsiolingvistik so'rovnomalar, natural nutq korpusi va akademik matnlar tahlili bilan uyg'unlashtirish "Uzbek English" variantining shakllanish darajasini yanada aniqroq baholash imkonini beradi.

Annotatsiya: *Maqolada turkigo‘y mumtoz adiblar merosini raqamlashtirish va ilmiy elektron korpusda jamlashning nazariy hamda amaliy asoslari tahlil qilinadi. Tadqiqotning maqsadi XIV-XV asrlarga oid turkiy yozma yodgorliklarni qamrab oluvchi manba-tanqidiy, ko‘p yozuvli va ko‘p qatlamli korpusni yaratish tamoyillari, tuzilishi va metodologiyasini asoslashdan iborat. Ish jahon (VATEC, Turk milliy korpusi) hamda milliy (o‘zbek tili milliy korpusi, Alisher Navoiy korpusi) tajribasining qiyosiy tahliliga tayanadi. Natijada korpusning besh qatlamli arxitekturasi, annotatsiyaning token, lemma, morfologik teg, aruz va janr darajalari, shuningdek arab yozuvidagi manbalarni transliteratsiya va transkripsiya bilan parallellashtirish modeli taklif etiladi. Ilmiy yangilik sifatida mumtoz she’riy matnlar uchun aruz-vazn annotatsiyasi qatlamining kiritilishi hamda manba ishonchliligini ta’minlovchi metama’lumot tizimi ilgari suriladi. Korpusning tekstologik tadqiqot, tarixiy leksikografiya, mualliflik uslubini lingvostatistik aniqlash va lingvodidaktika uchun amaliy ahamiyati ko‘rsatiladi.*

Kalit so‘zlar: *lingvistik korpus, turkiygo‘y adiblar, korpus lingvistikasi, transliteratsiya, morfologik annotatsiya, aruz, TEI, tarixiy leksikografiya.*

СОЗДАНИЕ НАУЧНОГО ЭЛЕКТРОННОГО КОРПУСА ТЮРКОЯЗЫЧНЫХ КЛАССИЧЕСКИХ ПИСАТЕЛЕЙ: ПРИНЦИПЫ, СТРУКТУРА И МЕТОДОЛОГИЯ

Аннотация: *В статье анализируются теоретические и практические основы цифровизации наследия тюркоязычных классиков и его объединения в научном электронном корпусе. Цель исследования — обосновать принципы, структуру и методологию создания источниковедчески выверенного, многописьменного и многоуровневого корпуса, охватывающего тюркские памятники XIV-XV вв. Работа опирается на сравнительный анализ мирового (VATEC, TNC) и национального опыта. Предложена пятиуровневая архитектура корпуса с уровнями токенизации, лемматизации, морфологической разметки, аруза и жанра.*

Ключевые слова: *лингвистический корпус, тюркоязычная классика, корпусная лингвистика, транслитерация, морфологическая аннотация, аруз, TEI, историческая лексикография.*

CREATING A SCHOLARLY ELECTRONIC CORPUS OF TURKIC CLASSICAL WRITERS: PRINCIPLES, STRUCTURE AND METHODOLOGY

Abstract: *The article analyses the theoretical and practical foundations of digitising the heritage of Turkic classical writers and consolidating it in a scholarly electronic corpus. The aim of the study is to substantiate the principles, structure and methodology for building a source-critical, multi-script and multi-layered corpus covering Turkic written monuments of the XIVth–XVth centuries. The study relies on a comparative analysis of international (VATEC, the Turkish National Corpus) and national (the Uzbek National Corpus, the Alisher Navoi corpus) experience. As a result, a five-layer corpus architecture is proposed, together with annotation levels for tokens, lemmas, morphological tags, aruz and genre, and a model that aligns Arabic-script sources with their transliteration and transcription. The scientific novelty lies in introducing an aruz annotation layer for classical poetic texts and a metadata system ensuring source reliability. The corpus’s applied value for textual studies, historical lexicography, stylometric authorship analysis and language teaching is demonstrated.*

Keywords: *linguistic corpus, Turkic classical literature, corpus linguistics, transliteration, morphological annotation, aruz, TEI, historical lexicography.*

Kirish

Zamonaviy filologiya raqamli texnologiyalar bilan uzviy bog‘langan sohaga aylanib bormoqda. Katta hajmdagi yozma manbalarni jamlash, saqlash va tahlil qilishda lingvistik korpus eng samarali vositalardan biri sifatida e’tirof etilmoqda. Korpus lingvistikasi ta’limotiga ko‘ra, tabiiy tilning tanlab olingan, muvozanatlashtirilgan va lingvistik jihatdan izohlangan matnlar to‘plami tadqiqotchiga til birliklarining amaldagi qo‘llanishini ilmiy asosda kuzatish imkonini beradi [1]. Ayni shu yondashuv jahon tilshunosligida so‘nggi o‘n yilliklarda til hodisalarini o‘rganishning yetakchi metodologiyasiga aylandi [2]. Bu metadologiya adabiyotshunoslik, xususan, mumtoz adabiyot namunalari uchun ham birdek o‘rinlidir.

Turkiy xalqlarning yozma merosi nihoyatda boy va qadimiy. O‘rxun-Enasoy bitiklaridan boshlanib, Yusuf Xos Hojibning “Qutadg‘u bilig”, Ahmad Yugnakiyning “Hibat ul-haqoyiq”, Ahmad Yassaviy hikmatlari, Rabg‘uziy qissalari, Xorazmiy “Muhabbatnoma”i, Sayfi Saroyi, Lutfiy, Alisher Navoiy, Zahiriddin Muhammad Bobur, Boborahim Mashrab va Muhammad Rizo Ogahiy ijodigacha bo‘lgan ulkan adabiy xazina turkiygo‘y mumtoz adabiyotning tarixiy taraqqiyotini aks ettiradi. Ushbu meros nafaqat badiiy qadriyat, balki eski turkiy va chig‘atoy tilining tarixiy holatini o‘rganish uchun ham, shu davrdagi adabiyiy jarayonlarni tahlil qilish uchun ham beqiyos manba hisoblanadi.

Biroq bu merosning aksariyati arab yozuvidagi qo‘lyozma va toshbosmalarda saqlangan bo‘lib, ular turli fondlarga tarqoq holda joylashgan. An’anaviy filologik tadqiqot usullari bilan bunday manbalarni qiyosiy o‘rganish, muayyan so‘z yoki grammatik shaklning ko‘p asrlik matnlar bo‘ylab qo‘llanishini kuzatish mashaqqatli va sekin kechadi. Elektron korpus esa qidiruv, konkordans, chastota va lingvostatistik tahlil imkoniyatlarini beruvchi vosita sifatida ushbu muammoni hal etishga xizmat qiladi.

O‘zbekistonda so‘nggi yillarda milliy-madaniy merosni raqamlashtirish, qo‘lyozma xazinani ilmiy muomalaga jalb etish va ma’naviy qadriyatlarni asrash davlat siyosatining ustuvor yo‘nalishlaridan biriga aylandi. Mumtoz adabiyot merosini raqamli korpus shaklida tashkil etish ushbu vazifaning eng samarali yechimlaridan hisoblanadi, chunki korpus bir vaqtning o‘zida ham saqlash, ham qidiruv, ham ilmiy tahlil funksiyalarini birlashtiradi. Shu ma’noda turkiygo‘y mumtoz adiblar korpusi milliy g‘oyaning raqamli infratuzilmasi sifatida ham ahamiyat kasb etadi.

Jahon tajribasida raqamli filologiya (digital humanities) yo‘nalishi milliy yozma merosni saqlash, ilmiy muomalaga jalb etish va xalqaro miqyosda targ‘ib qilishning zamonaviy shakliga aylandi. Ko‘plab davlatlar o‘z klassik adabiyotini raqamli korpuslar va tanqidiy elektron nashrlar orqali umumbashariy ilm-fan xizmatiga qo‘ymoqda. Turkiy mumtoz meros ham xuddi shunday raqamli infratuzilmaga muhtoj: aks holda, u ilmiy jamoatchilik uchun qidiriladigan, tahlil qilinadigan va qiyoslanadigan manba bo‘lmasdan qolaveradi. Aynan shu ehtiyoj turkiygo‘y mumtoz adiblar korpusini yaratishni hayotiy zaruriy vazifaga aylantiradi.

O‘zbekistonda va turkiy dunyoda so‘nggi yillarda milliy hamda mualliflik korpuslari yaratildi. Shunga qaramay, turkiygo‘y mumtoz adiblar merosini yagona, manba-tanqidiy asosda, ko‘p yozuvli va ko‘p qatlamli tarzda qamrab oluvchi maxsus ilmiy korpus hanuz to‘liq shakllangani yo‘q. Mavjud resurslar yo zamonaviy til bilan, yo faqat bitta muallif ijodi bilan cheklanadi. Mazkur maqolaning maqsadi turkiygo‘y mumtoz adiblar ilmiy elektron korpusini yaratishning nazariy tamoyillari, tarkibiy tuzilishi va metodologik asoslarini ishlab chiqishdan iborat. Bunda korpusning ilmiy ishonchliligi, reprezentativligi va tarixiy matnlarga xos filologik talablarga muvofiqligiga alohida e’tibor qaratiladi.

Tadqiqotning obyekti turkiygo‘y mumtoz adiblar yozma merosini raqamlashtirish va korpus shaklida tashkil etish jarayoni; predmeti esa korpusni yaratishning tamoyillari, tarkibiy tuzilishi va annotatsiya metodologiyasidir. Maqsaddan kelib chiqib quyidagi vazifalar belgilandi: mavjud milliy va xalqaro korpuslar tajribasini qiyosiy o‘rganish; matn tanlashning manba-tanqidiy mezonlarini asoslash; korpusning ko‘p qatlamli arxitekturasini modellashtirish; annotatsiya darajalarini, jumladan mumtoz she’riyat uchun aruz-vazn qatlamini ishlab chiqish; hamda korpusning ilmiy va lingvodidaktik ahamiyatini ochib berish.

Adabiyotlar tahlili

Korpus lingvistikasining nazariy asoslari J. Sinclair, T. McEnery, A. Wilson kabi olimlar ishlarida ishlab chiqilgan. Sinclair konkordans va kollokatsiya tahlilining metodologik tamoyillarini asoslab bergan [1], McEnery va Wilson esa korpusning til tadqiqotidagi o‘rni hamda annotatsiya darajalarini tizimlashtirgan [2]. D. Biber korpus dizaynining markaziy masalasi sifatida reprezentativlik va muvozanat muammosini ko‘tarib, matn tanlashning nazariy mezonlarini belgilagan [3]. P. Baker, A. Hardie va T. McEnery esa soha atamashunosligini bir tizimga solib, korpus lingvistikasining tushunchaviy apparatini shakllantirgan [4]. Ushbu tadqiqotlar korpusning umumiy nazariy poydevorini tashkil etadi.

Korpus lingvistikasi nazariyasida korpuslar bir necha turga ajratiladi: milliy (umumiy) korpus tilning butun tizimini vakillik qiladi; mualliflik korpusi bir ijodkor tilini qamraydi; diaxronik korpus tilning tarixiy o‘zgarishini kuzatishga

mo‘ljallangan; ixtisoslashgan korpus esa muayyan soha yoki janr matnlarini birlashtiradi. Turkiygo‘y mumtoz adiblar korpusi o‘z mohiyatiga ko‘ra diaxronik va ko‘p muallifli ixtisoslashgan korpus turlarini uyg‘unlashtiradi hamda matnshunoslik talablari tufayli tanqidiy (manba-variantli) korpus xususiyatlarini ham o‘zida mujassam etadi. Ushbu murakkab tabiat uni mavjud korpus turlaridan ajratib turadi va maxsus metodologik yechimlarni taqozo qiladi.

Turkiy tillar korpuslari orasida eng dastlabki va tarixiy jihatdan ahamiyatli loyiha — islomgacha bo‘lgan eski turkiy matnlarning elektron korpusi VATEC (Vorislamische Alttürkische Texte). U 1999–2003-yillarda M. Erdal, J. Gippert, K. Röhrborn va P. Zieme rahbarligida yaratilgan bo‘lib, buddaviy va moniy mazmundagi yodgorliklarni transliteratsiya, transkripsiya, tarjima va glossalash bilan qamrab oladi [9]. Eski turkiy tilning grammatik tavsifi M. Erdalning fundamental asarida mukammal bayon etilgan [5]. Zamonaviy turkiy til uchun esa Y. Aksan va hamkasblari tomonidan Turk milliy korpusi (TNC) ishlab chiqilib, u Britaniya milliy korpusi (BNC) modeliga asoslangan, 50 million so‘zdan iborat muvozanatli korpus sifatida shakllantirilgan [6].

O‘zbek tilshunosligida korpus masalasi 2010-yillardan jadal o‘rganila boshlandi. N. Abdurahmonova o‘zbek tili elektron korpusini yaratish g‘oyasini ilgari surib, uning konseptual asoslarini ishlab chiqdi va uzbekcorpora.uz milliy korpusining shakllanishiga asos soldi. B. Elov va uning hamkasblari korpusni dasturiy jihatdan hayotga tatbiq etishda, Sh. Hamroyeva esa o‘zbek tilida mualliflik korpusini tuzish mezonlarini belgilashda muhim hissa qo‘shdi. Milliy korpusni loyihalash tamoyillari A. Qarshiyev, M. Tursunov va S. Maxmudov ishlarida bayon etilgan [7]. Mumtoz adabiyotga oid alohida tajriba sifatida Alisher Navoiy mualliflik korpusini keltirish mumkin: unda XV asr til uslubi, iste’moldan chiqqan tarixiy va arxaik so‘zlar lingvostatistik tahlil asosida o‘rganilgan [10].

Metodologik yondashuv nuqtai nazaridan Rus milliy korpusi (RNC) hamda Leipzig Corpora Collection (LCC) tajribasi ham diqqatga sazovor. RNC tarkibida she’riy matnlar subkorpusi, sintaktik razmetka va parallel korpuslar mavjudligi ko‘p komponentli korpus qurishning namunasi bo‘la oladi; LCC esa ikki yuzdan ortiq til uchun bir xillashtirilgan statistik korpuslar tuzish tajribasini beradi. Bu tajribalar turkiy mumtoz korpusda parallel (masalan, chig‘atoy–zamonaviy o‘zbek) subkorpuslar hamda she’riy matnlar uchun alohida qatlamini loyihalashda yo‘l ko‘rsatadi. Shu bilan birga, tarixiy matnlar korpusi diaxronik korpus sifatida alohida yondashuvni davriylashtirish, orfografik variantlilik va morfologik ko‘p ma’nolilikni hisobga olishni — talab etadi.

Matnlarni elektron kodlash va almashish sohasida xalqaro TEI (Text Encoding Initiative) standarti keng qo‘llaniladi; u matn tarkibi va metama’lumotini XML asosida bir xillashtirilgan tarzda ifodalash imkonini beradi [8]. Yuqoridagi manbalar tahlili shuni ko‘rsatadiki, mavjud korpuslar yo faqat eski turkiy davr (VATEC), yo zamonaviy til (TNC, o‘zbek milliy korpusi), yoxud yakka muallif ijodi (Navoiy korpusi) doirasi bilan cheklangan. Turkiygo‘y mumtoz adiblarni ko‘p muallifli, ko‘p asrli, manba-tanqidiy va ko‘p yozuvli asosda birlashtiruvchi yaxlit ilmiy korpus modeli hozircha ishlab chiqilmagan. Aynan shu bo‘shliq ushbu tadqiqotning dolzarbligini belgilaydi.

Tadqiqot metodologiyasi

Tadqiqot korpus lingvistikasi, tarixiy leksikografiya va raqamli filologiya usullariga tayanadi. Metodologik jihatdan quyidagi yondashuvlar qo‘llanildi: mavjud milliy va xalqaro korpuslarni qiyosiy tahlil qilish; korpusning tarkibiy tuzilishini modellashtirish; matn tanlashning manba-tanqidiy mezonlarini ishlab chiqish; hamda annotatsiya bosqichlarini tizimli tavsiflash.

Korpus dizayni Biber ko‘rsatgan reprezentativlik va muvozanat tamoyiliga [3] hamda BNC/TNC amaliyotiga [6] asoslanadi, ammo tarixiy turkiy matnlarga xos xususiyatlar hisobga olingan holda moslashtiriladi. Matn tanlashda muallif, janr, davr va manba turi bo‘yicha muvozanat ta’minlanadi. Har bir matn birlamchi manbaga (qo‘lyozma, toshbosma yoki tanqidiy nashr) bog‘lanib, uning ilmiy ishonchliligi hujjatlashtiriladi.

Korpus tuzish jarayoni ketma-ket bosqichlardan iborat qilib loyihalandi: loyihalash va mezonlarni belgilash; birlamchi manbalarni yig‘ish va tavsiflash; matnlarni raqamlashtirish; TEI/XML asosida kodlash; ko‘p bosqichli annotatsiya; qidiruv tizimini o‘rnatish; va sifat nazorati. Har bir bosqichda natijalar hujjatlashtirilib, jarayonning takrorlanuvchanligi va tekshiriluvchanligi ta’minlanadi. Bunday bosqichli ish oqimi korpusning ilmiy standartlarga muvofiqligini kafolatlaydi.

Matnni raqamli qayta ishlash bosqichi arab yozuvidagi manbalar uchun optik belgi tanish (OCR), so‘ng qo‘lda tekshirish va transliteratsiyani o‘z ichiga oladi. Kodlashda Unicode standarti va TEI/XML sxemasi qo‘llaniladi [8]. Lingvistik ishlov token ajratish, lemmatizatsiya va morfologik teglashdan iborat bo‘lib, tarixiy so‘z shakllarini asos (lemma)ga keltirishda “Abushqa”, “Sanglox” singari tarixiy lug‘atlar va Navoiy asarlari tilining izohli lug‘atlari leksikografik tayanch vazifasini bajaradi. Qidiruv va tahlil bosqichida konkordans, N-grammlar, chastota ro‘yxatlari va kollokatsiya ko‘rsatkichlaridan foydalaniladi. Ishonchlilikni ta’minlash uchun avtomatik teglash natijalari mutaxassis tomonidan qo‘lda tekshiriladi va me’yoriylashtiriladi.

Natijalar va ularning tahlili

Tadqiqot natijasida turkiygoʻy mumtoz adiblar ilmiy elektron korpusining konseptual modeli ishlab chiqildi. Ushbu korpus XIV-XV asrlarga oid turkiy yozma yodgorliklarni manba-tanqidiy asosda jamlagan, koʻp yozuvli va koʻp qatlamli izohga ega raqamli tizim sifatida taʼriflanadi. Model quyidagi asosiy tamoyillarga tayanadi.

Birinchidan, ilmiylik va manba ishonchliligi. Mumtoz matnlarning turli qoʻlyozma nusxalari orasidagi tafovutlar tufayli har bir matn birligi aniq manbaga bogʻlanadi; metamaʼlumotda qoʻlyozma yoki nashr, uning saqlanish joyi va sanasi qayd etiladi. Bu tekstologik ishonchlilikni taʼminlaydi.

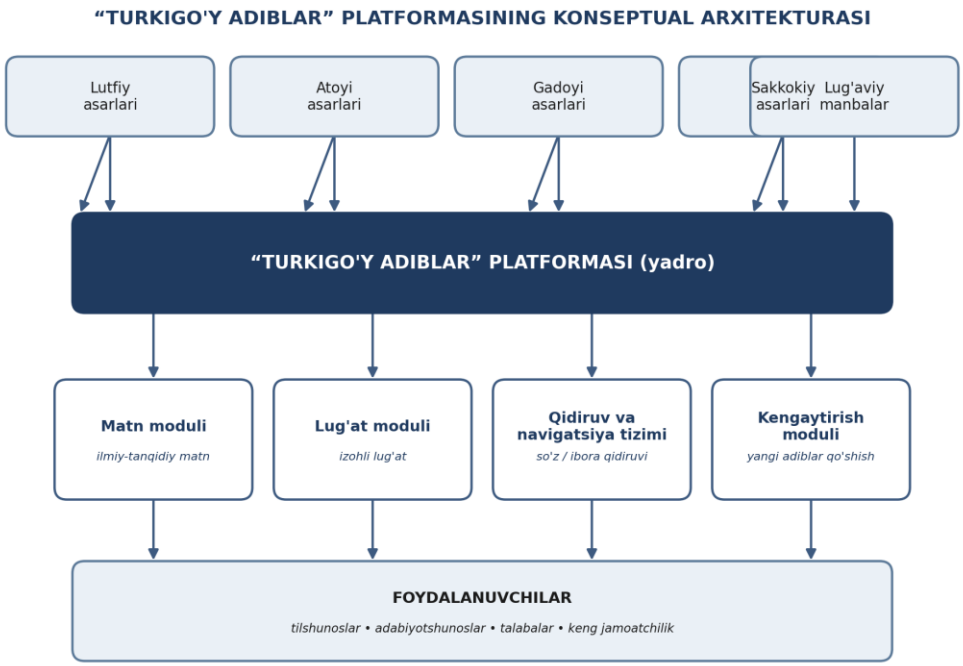
Ikkinchidan, reprezentativlik va muvozanat. Korpus tarkibi muallif, davr va janr boʻyicha muvozanatlashtiriladi; nazm va nasr, diniy va dunyoviy matnlar mutanosib ravishda qamrab olinadi [3].

Uchinchidan, koʻp yozuvlilik. Arab yozuvidagi asl matn (faksimile), uning ilmiy transliteratsiyasi va fonetik transkripsiyasi oʻzaro parallellashtiriladi. Bu yondashuv VATEC amaliyotidan oʻzlashtirilgan boʻlib [9], foydalanuvchiga bir vaqtning oʻzida asl yozuv va zamonaviy oʻqilishni qiyoslash imkonini beradi.

Toʻrtinchidan, koʻp qatlamlilik va standartlashtirish. Annotatsiya token, lemma, morfologik teg, aruz-vazn va janr darajalarida amalga oshirilib, butun tizim TEI/XML va Unicode standartlariga muvofiqlashtiriladi [8].

Mavjud korpuslar bilan qiyosiy tahlil taklif etilayotgan modelning oʻziga xos oʻrnini aniq koʻrsatadi (1-jadval).

1-jadval



Turkiy tillarga oid mavjud korpuslarning qiyosiy tavsifi

Korpus	Qamrov (til/davr)	Hajm/xususiyat	Annotatsiya darajasi
VATEC	islomgacha eski turkiy (VIII–XIII asr)	buddaviy va moniy matnlar	transliteratsiya, transkripsiya, tarjima, glossa
Turk milliy korpusi (TNC)	zamonaviy turk tili	~50 mln soʻz, muvozanatli	morfologik teglash, lemmatizatsiya
Oʻzbek tili milliy korpusi	zamonaviy oʻzbek tili	Koʻp uslubli, milliy qamrov	token, lemma, morfologik razmetka
Alisher Navoiy korpusi	XV asr, bir muallif	mualliflik korpusi	leksik-statistik, izohli
Taklif etilayotgan korpus	XIV-XV asr, koʻp muallif	manba-tanqidiy, koʻp yozuvli	token–lemma–morfologiya–aruz–janr

Jadvaldan koʻrinadiki, mavjud resurslar yo faqat qadimiy davrni, yo zamonaviy tilni, yoxud yakka ijodkorni qamraydi. Taklif etilayotgan model esa koʻp asrli va koʻp muallifli qamrovni manba ishonchliligi hamda aruz annotatsiyasi bilan birlashtirishi bilan farqlanadi. Dastlab korpusga XIV-XV asarda Alisher Navoiy davrigacha ijod qilgan turkigoʻy adiblar merosi jamlanadi. Keyinchlik korpus tarkibini shakllantirishda matn tanlash mezonlari alohida ahamiyat kasb etadi. Tanlov turkiy yozma merosning butun tarixiy davomiyligini qamrab olishi koʻzda tutiladi: eng qadimgi qatlamda Oʻrxun-Enasoy bitiklari va islomgacha boʻlgan yodgorliklar; qoraxoniylar davri obidalari sifatida Yusuf Xos Hojibning “Qutadgʻu bilig” va Ahmad Yugnakiyning “Hibat ul-haqoyiq” asarlari; tasavvufiy adabiyot namunasi sifatida Ahmad Yassaviy hikmatlari va Rabgʻuziy qissalari; oltin Oʻrda va Xorazm adabiy muhitidan Xorazmiy “Muhabbatnoma”i hamda Sayfi Saroyi merosi; chigʻatoy adabiyotining klassik bosqichidan Lutfiy va Alisher Navoiy ijodi; keyingi davrlardan Zahiriddin Muhammad Bobur, Boborahim Mashrab va Muhammad Rizo Ogahiy asarlari kiritiladi. Bunday tanlov korpusga tarixiy va janriy vakillik baxsh etadi.

Matnlar davriylashtirilib joylashtirilishi korpusning diaxronik qimmatini oshiradi. Til holatining tarixiy oʻzgarishini kuzatish maqsadida matnlar eski turkiy, ilk chigʻatoy, klassik chigʻatoy ilk zamonaviy oʻzbek bosqichlariga ajratiladi. Bu tabaqalash foydalanuvchiga muayyan soʻz, grammatik shakl yoki uslubiy hodisaning asrlar davomida qanday evrilganini aniq davr kesimida kuzatish imkonini beradi. Shu tarzda korpus nafaqat qidiruv vositasi, balki tarixiy tilshunoslik uchun empirik laboratoriya vazifasini oʻtaydi.

Korpusning ichki tuzilishi besh qatlamli arxitektura ko ʻrinishida loyihalandi (1-rasm). Quyi qatlam manbalar bazasidan, undan yuqorisi matnni qayta ishlash bosqichidan iborat; markaziy qatlamda matn variantlari va metamaʼlumot joylashadi; ular ustidan koʻp bosqichli annotatsiya qatlami quriladi; eng yuqori qatlam esa foydalanuvchi interfeysi va qidiruv tizimini oʻz ichiga oladi.

1-rasm. Turkiygoʻy mumtoz adiblar ilmiy elektron korpusining koʻp qatlamli arxitekturasi

Korpusning ilmiy qiymati k’p jihatdan uning annotatsiya qatlamlariga bogʻliq. Har bir qatlam ma’lum bir tadqiqot vazifasini bajaradi (2-jadval). Tokenlash va lemmatizatsiya qidiruvni tarixiy soʻz shakllari boʻylab birlashtirib beradi; morfologik teglash grammatik tahlilni osonlashtiradi; aruz-vazn qatlami esa mumtoz she’riyatni poetik jihatdan oʻrganishga xizmat qiladi.

2-jadval

Korpusning annotatsiya qatlamlari

Qatlam	Mazmuni	Vazifasi
Tokenlash	matnni soʻz/birlikka ajratish	qidiruv birligini shakllantirish
Lemmatizatsiya	Soʻz shaklini asos (lemma)ga keltirish	tarixiy shakllarni birlashtirib qidirish
Morfologik teglash	Soʻz turkumi va grammatik shakl	grammatik va statistik tahlil
Aruz-vazn qatlami	she’riy oʻlchov va taqte’	poetik va uslubiy tadqiqot
Janr va uslub izohi	asar janri, izohtalab soʻzlar	textologik va lingvodidaktik tahlil
Metama’lumot	muallif, asar, manba, sana	ishonchlilik va filtrlash

Annotatsiya qatlamlarining oʻzaro bogʻliqligini yagona bayt misolida koʻrsatish mumkin. Mumtoz she’rdan olingan bir misra avval soʻz va turgʻun birliklarga ajratiladi (tokenlash); har bir soʻz shakli oʻz asosiga keltiriladi (lemmatizatsiya), bunda chigʻatoy tiliga xos qadimiy shakl zamonaviy lemma bilan bogʻlanadi; soʻngra soʻz turkumi va grammatik shakl belgilanadi (morfologik teg); nihoyat, misraning aruz vazni va taqte’i qayd etiladi (aruz qatlami). Natijada bir misra boʻyicha foydalanuvchi ham leksik, ham grammatik, ham poetik ma’lumotni yagona soʻrov orqali oladi. Ana shu koʻp qatlamli bogʻlanish korpusning oddiy matn omboridan tubdan farqli, tahliliy vositaga aylanishini ta’minlaydi.

Modelni amalga oshirishda bir qator ilmiy-texnik muammolar aniqlandi va ularning yechimlari taklif etildi. Arab yozuvidagi matnlarni OCR orqali oʻqish hozircha yuqori aniqlik bermaydi; shuning uchun avtomatik tanish natijalari mutaxassis tomonidan qoʻlda tekshiriladi va asl faksimile bilan solishtiriladi.

Orfografik variantlilik tarixiy matnlar korpusining oʻziga xos qiyinchiligidir. Arab yozuvi unlilarni toʻliq ifodalamagani va turli kotiblar bir soʻzni turlicha yozgani sababli, bir leksema matnlarda bir necha yozuv variantida uchraydi. Agar bunday variantlar birlashtirilmasa, qidiruv natijalari toʻkis chiqmaydi. Buning yechimi lemmatizatsiya bosqichida barcha variantlarni yagona asos ostiga jamlash, ayni paytda asl yozilishni saqlab qolishdan iborat. Shu tarzda foydalanuvchi ham me’yoriy lemma boʻyicha, ham aniq matn variantiga koʻra qidiruv oʻtkazishi mumkin boʻladi.

Foydalanuvchi interfeysi va qidiruv tizimi korpusning eng yuqori qatlamini tashkil etadi. Korpus menejeri konkordans qidiruvi, so‘z shakli va lemma bo‘yicha izlash, muallif, asar, davr hamda janr bo‘yicha filtrlash imkoniyatlarini beradi. Qidiruv natijalarini chastota jadvali, kontekst ko‘rinishi (KWIC) va statistik ko‘rsatkichlar shaklida taqdim etish, shuningdek natijalarni tashqi tahlil uchun eksport qilish nazarda tutiladi. Faksimile, transliteratsiya va transkripsiyani yonma-yon ko‘rsatuvchi parallel oyna esa foydalanuvchiga asl manba bilan zamonaviy o‘qishni bevosita qiyoslash imkonini beradi. Interfeysning qulayligi korpusni nafaqat tor doiradagi mutaxassislar, balki keng o‘quv auditoriyasi uchun ham foydalanishga yaroqli qiladi.

Korpusning uzoq muddatli barqarorligi va ochiqligi alohida e’tibor talab qiladigan masaladir. Xalqaro tajriba shuni ko‘rsatadiki, til resurslarining amaliy qiymati ularning uzluksiz saqlanishi, yangilanishi va boshqa tizimlar bilan o‘zaro moslashuviga (interoperability) bevosita bog‘liq. Shu bois korpus ochiq va bir xillashtirilgan formatlarda (Unicode, TEI/XML) qurilib, uning ma’lumotlar bazasi modulli tarzda kengaytiriladigan qilib loyihalanadi. Bu yangi matn, muallif yoki annotatsiya qatlamini tizimning umumiy tuzilishini buzmasdan qo‘shish imkonini beradi va korpusning kelgusi tadqiqotlar bilan birga o‘sib borishini ta’minlaydi.

Modelning yana bir muhim jihati – uning matnshunoslik (tekstologiya) an’anasi bilan uzviy bog‘liqligidir. Mumtoz asarlarning turli qo‘lyozma nusxalari o‘rtasidagi tafovutlar korpusda variant sifatida qayd etilishi mumkin, bu esa raqamli tanqidiy nashr yaratish uchun zamin hozirlaydi. An’anaviy matnshunoslikda mashaqqatli va sekin kechadigan nusxalararo qiyoslash korpus vositalari yordamida tezlashadi va aniqlashadi. Shu tariqa korpus filologik tadqiqotning raqamli davomiga aylanib, klassik matnshunoslik usullarini zamonaviy hisoblash imkoniyatlari bilan uyg‘unlashtiradi.

Alohida ilmiy yangilik sifatida she’riy matnlar uchun aruz-vazn annotatsiyasi qatlamining kiritilishini ta’kidlash lozim. Mumtoz turkiy nazm aruz vaznida yaratilgani bois har bir baytning vazni va taqte’i korpusda qayd etilsa, bu poetika va uslubshunoslik uchun mutlaqo yangi tadqiqot imkoniyatlarini ochadi. Bunday qatlam mavjud turkiy korpuslarning hech birida uchramaydi.

Bundan tashqari, korpus turkiy xalqlarning umumiy adabiy merosini qamragani bois turkiy davlatlararo ilmiy hamkorlik uchun ham qulay maydon ochadi. Umumiy yozuv, umumiy klassik matnlar va o‘zaro yaqin til qatlami turli mamlakat tadqiqotchilariga yagona metodologik asosda ish olib borish, ma’lumot almashish va qiyosiy turkiyshunoslik tadqiqotlarini birgalikda amalga oshirish imkonini beradi. Bu jihat korpusning ilmiy-integratsion salohiyatini yanada oshiradi.

Korpusning amaliy ahamiyati keng qamrovli. U tekstologik tadqiqotda nusxalararo tafovutlarni qiyoslash, tarixiy leksikografiyada so‘zlarning davriy qo‘llanishini kuzatish, mualliflik uslubini lingvostatistik usulda aniqlash hamda qiyosiy turkiyshunoslik uchun ishonchli empirik baza yaratadi. Lingvodidaktik jihatdan esa korpus XV–XIX asr til uslubini zamonaviy til bilan qiyoslab o‘rgatish, mumtoz adabiyot darslarida izohtalab so‘zlar ustida ishlash uchun boy o‘quv materiali beradi. Shu tariqa korpus turkiy mumtoz merosni ham saqlash, ham ilmiy muomalaga to‘liq jalb etish vositasiga aylanadi.

Xulosa

Tadqiqot natijalari turkiygo‘y mumtoz adiblar ilmiy elektron korpusini yaratish real va ilmiy jihatdan asoslangan vazifa ekanini ko‘rsatadi. Ishda korpusning nazariy tamoyillari (ilmiylik va manba ishonchliligi, reprezentativlik va muvozanat, ko‘p yozuvlilik, ko‘p qatlamlilik hamda standartlashtirish), besh qatlamli tarkibiy tuzilishi va bosqichma-bosqich metodologiyasi asoslab berildi.

Tadqiqotning ilmiy yangiligi shundan iboratki, birinchi marta turkiygo‘y mumtoz adiblar merosini keng qamrovda, manba-tanqidiy asosda hamda arab yozuvi–transliteratsiya–transkripsiya parallelligida birlashtiruvchi yaxlit korpus modeli taklif etildi. Ayniqsa, mumtoz she’riyat uchun aruz-vazn annotatsiyasi qatlamining kiritilishi va manba ishonchliligini ta’minlovchi metama’lumot tizimining ishlab chiqilishi modelni mavjud korpuslardan tubdan farqlaydi.

Amaliy jihatdan bunday korpus textologiya, tarixiy leksikografiya, lingvostatistik uslubshunoslik va lingvodidaktika sohalari uchun ishonchli empirik zamin bo‘ladi. Kelgusi tadqiqotlarda korpusning pilot versiyasini yaratish, annotatsiya vositalarini avtomatlashtirish va uni turkiy tillararo parallel korpuslar bilan bog‘lash istiqbolli yo‘nalish sifatida belgilanadi.

Mualliflar bayonotlari

Mualliflar hissasi: tadqiqot konsepsiyasi, tahlil va matnni tayyorlash muallif tomonidan bajarilgan. Jadvallar, konseptual xarita sun’iy intellekt yordamida tayyorlangan. Manfaatlar to‘qnashuvi: muallif manfaatlar to‘qnashuvi yo‘qligini bildiradi. Moliyalashtirish: tadqiqot nazariy xulosalarni jamlagani bois tashqi moliyaviy yordamsiz amalga oshirilgan. Amaliyotga bog‘lash uchun moliyaviy ko‘mak kerak bo‘ladi.

O‘ZBEK XALQ MAQOLLARIDA ESKIRGAN SO‘ZLARNING LINGVOPOETIK IMKONIYATLARI: OBRAZLILIK, EKSPRESSIVLIK VA TARIXIY KOLORIT

Siddiqova Naima Abdurasulovna
Toshkent davlat o‘zbek tili va adabiyoti universiteti tadqiqotchisi
E-mail: naimasiddiqova 034@gmail.com
ORCID: 009-0008-7078-5962

Annotatsiya: *Maqolada o‘zbek xalq maqollari tarkibida saqlanib qolgan eskirgan so‘zlar — arxaizm va istorizmlarning lingvopoetik imkoniyatlari tadqiq etiladi. Tadqiqotning maqsadi maqol matnida faol qo‘llanishdan chiqqan leksemaning obraz yaratish, ekspressivlik hosil qilish va tarixiy kolorit berish funksiyalarini aniqlash hamda bu funksiyalarning semantik mexanizmini ochib berishdan iborat. Manba sifatida Sh.Shomaqsudov va Sh.Shorahmedovning “Ma’nolar mahzani” izohli lug‘ati hamda T.Mirzayev va B.Sarimsoqov mas’ul muharrirligida chop etilgan “O‘zbek xalq maqollari”ning ikkinchi tomi tanlandi. Ulardan tarkibida izohtalab eskirgan leksema qatnashgan 52 ta maqol saralab olinib, tavsifiy, komponent, kontekstual-semantik va lingvopoetik tahlil usullari asosida o‘rganildi. Tahlil natijasida eskirgan leksika yettita tematik-semantik guruhga ajratildi hamda maqol matnidagi eskirgan so‘zning uch xil lingvopoetik vazifasi asoslandi: denotati yo‘qolgan so‘zning metaforik asosga aylanishi, notanish shaklning diqqatni o‘ziga tortishi hisobiga yuzaga keluvchi ekspressivlik va leksemaning muayyan ijtimoiy-iqtisodiy davrni belgilovchi xronologik indeksga aylanishi. Shuningdek, maqol semantikasining tiniqlik darajasiga ko‘ra uch bosqichli shkala taklif etildi. Maqolning ritmik-qofiyaviy qolipi eskirgan leksemani asrlar davomida saqlab turuvchi lingvistik omil ekanligi ko‘rsatildi.*

Kalit so‘zlar: *lingvopoetika, arxaizm, istorizm, maqol, paremiologiya, obrazlilik, ekspressivlik, tarixiy kolorit.*

ЛИНГВОПОЭТИЧЕСКИЕ ВОЗМОЖНОСТИ УСТАРЕВШИХ СЛОВ: ОБРАЗНОСТЬ, ЭКСПРЕССИВНОСТЬ И ИСТОРИЧЕСКИЙ КОЛОРИТ

Аннотация: *В статье исследуются лингвопоэтические возможности устаревших слов — архаизмов и историзмов, сохранившихся в составе узбекских народных пословиц. Цель исследования — выявить функции вышедшей из активного употребления лексемы в тексте пословицы (создание образа, формирование экспрессивности и передача исторического колорита) и раскрыть семантический механизм этих функций. Источниками послужили толковый словарь “Маънолар махзани” Ш.Шомаксудова и Ш.Шорахмедова, а также второй том свода “Ўзбек халқ мақоллари” под редакцией Т.Мирзаева и Б.Саримсокова. Отобраны 52 пословицы, содержащие устаревшие лексемы, снабжённые толкованием в источнике; они изучены с помощью описательного, компонентного, контекстно-семантического и лингвопоэтического анализа. Устаревшая лексика распределена по семи тематико-семантическим группам; обоснованы три лингвопоэтические функции устаревшего слова и предложена трёхступенчатая шкала семантической прозрачности пословицы. Показано, что ритмико-рифмическая структура пословицы выступает языковым механизмом сохранения архаичной лексемы.*

Ключевые слова: *лингвопоэтика, архаизм, историзм, пословица, паремиология, образность, экспрессивность, исторический колорит.*

LINGUOPOETIC POTENTIAL OF OBSOLETE WORDS: IMAGERY, EXPRESSIVENESS AND HISTORICAL COLOURING

Abstract: *The article examines the linguopoetic potential of obsolete words — archaisms and historicisms — preserved within Uzbek folk proverbs. The aim of the study is to identify the functions performed by a lexeme that has left active usage but survives in a proverb text (image formation, generation of expressiveness, and the conveyance of historical colouring), and to reveal the semantic mechanism behind these functions. The material was drawn from the explanatory dictionary “Ma’nolar mahzani” by Sh.Shomaqsudov and Sh.Shorahmedov and from the second volume of “O‘zbek xalq maqollari” edited by T.Mirzayev and B.Sarimsoqov. Fifty-two proverbs containing obsolete lexemes supplied with a lexicographic gloss were selected and analysed by descriptive, componential, contextual-semantic and linguopoetic methods. The obsolete lexis was distributed into seven thematic-semantic groups; three linguopoetic functions of the obsolete word were substantiated, and a three-level scale of the semantic transparency of proverbs was*

proposed. It is shown that the rhythmic and rhyming pattern of the proverb acts as the linguistic mechanism preserving the archaic lexeme.

Keywords: *linguopoetics, archaism, historicism, proverb, paremiology, imagery, expressiveness, historical colouring.*

Kirish

Tilning leksik sathi jamiyat hayotidagi oʻzgarishlarga eng tez javob beruvchi sath hisoblanadi. Ijtimoiy tuzum, xoʻjalik yuritish usuli, moddiy madaniyat va e'tiqod tizimi almashishi bilan ayrim soʻzlar kundalik muomaladan chiqib, tilning passiv qatlamiga oʻtadi. An'anaviy leksikologiyada bunday birliklar ikki turga ajratiladi: arxaizmlar — atalmish narsa yoki tushuncha bugun ham mavjud boʻlib, uning nomi yangi leksema bilan almashgan hollar; istorizmlar — atalmish narsaning oʻzi tarixga aylangan, shu sababli sinonimi ham qolmagan hollar. Bu farqlanish nazariy jihatdan aniq boʻlsa-da, amaliy tahlilda koʻpincha oraliq holatlar uchraydi: bir leksema muayyan ma'nosida istorizm, boshqa ma'nosida esa arxaizm sifatida baholanishi mumkin.

Passiv qatlamga oʻtish soʻzning butunlay yoʻqolishi degani emas. Til birligi faol qoʻllanishdan chiqqach ham turgʻun birikmalar, frazeologizmlar va, ayniqsa, maqollar tarkibida yashashda davom etadi. Buning sababi maqolning matn sifatidagi tabiati bilan bogʻliq: maqol — ritmik-sintaktik jihatdan qat'iy qoliplangan, qofiya, saj va parallelizm bilan mustahkamlangan, xotirada butun holda saqlanadigan tayyor birlik. Uning tarkibidagi bironta soʻzni erkin almashtirib boʻlmaydi, chunki har qanday almashtirish ritmni va ohangdoshlikni buzadi. Natijada maqol fondi til tarixi uchun oʻziga xos leksik qoʻriqxonaga aylanadi: bu yerda tilning yuz, hatto ming yillar avvalgi holatiga oid birliklar oʻzgarmagan shaklda saqlanib qoladi.

Ayni shu holat lingvopoetika uchun oʻta qiziqarli vaziyat yaratadi. Maqol tarkibidagi eskirgan soʻz zamonaviy soʻzlovchi uchun "yarim shaffof" birlikdir: u soʻzning tovush qiyofasini biladi, maqolning umumiy ma'nosini tushunadi, biroq leksemaning aniq denotativ mazmunini tasavvur qila olmaydi. Ana shu tushunish va tushunmaslik oraligʻi maqolga alohida uslubiy tovlanish, sirlilik va salmoq baxsh etadi. Boshqacha aytganda, soʻzning eskirganligi maqolning badiiy-estetik qiymatini kamaytirmaydi, aksincha, uni oshiradi.

Muammoning ilmiy dolzarbligi shundaki, oʻzbek tilshunosligida eskirgan qatlam asosan tarixiy leksikologiya, leksikografiya va funksional uslubiyat nuqtayi nazaridan tavsiflab kelinmoqda. Eskirgan soʻzning badiiy asar tilidagi vazifasi haqidagi kuzatishlar esa koʻpincha yozma adabiyot — Navoiy, Ogahiy, Qodiriy asarlari materialida olib borilgan. Xalq paremiologiyasi doirasida, ya'ni muallifsiz, jamoaviy sayqal koʻrgan matnlarda eskirgan leksemaning obraz yaratish va ekspressivlik hosil qilish imkoniyatlari tizimli tarzda oʻrganilmagan. Holbuki maqol matni ushbu masalani tekshirish uchun ideal materialdir: unda leksema alohida holda emas, balki qat'iy qolip ichida, ritm va qofiya bosimi ostida yashaydi.

Tadqiqotning maqsadi — oʻzbek xalq maqollari tarkibidagi eskirgan leksemalarning lingvopoetik funksiyalarini aniqlash va bu funksiyalarni yuzaga chiqaruvchi semantik mexanizmni tavsiflashdan iborat. Shu maqsaddan kelib chiqib quyidagi vazifalar belgilandi: izohli manbalar asosida eskirgan leksema qatnashgan maqollar tanlanmasini tuzish; leksemalarni tematik-semantik guruhlarga ajratish; obrazlilik, ekspressivlik va tarixiy kolorit funksiyalarini alohida-alohida asoslash; maqol semantikasining tiniqlik darajalarini belgilash; maqolning ritmik qolipi bilan leksemaning saqlanishi oʻrtasidagi bogʻlanishni koʻrsatish.

Tadqiqotning ilmiy yangiligi eskirgan soʻz maqol matnida shaklan saqlanib, mazmunan xiralashuvi hodisasi asosida uch bosqichli semantik tiniqlik shkalasining taklif etilishi hamda maqolning ritmik-qofiyaviy qolipi leksemani konservatsiya qiluvchi lingvistik omil sifatida asoslanishi bilan belgilanadi.

Adabiyotlar tahlili

Eskirgan leksikani tasniflashning nazariy asoslari umumiy tilshunoslikda XX asrning oʻrtalarida shakllandi. N.M.Shanskiy passiv qatlamni arxaizm va istorizmga ajratish tamoyilini ishlab chiqdi hamda arxaizmlarning ichki turlarini — leksik, leksik-soʻz yasovchi, leksik-fonetik va semantik arxaizmlarni farqladi [14]. Bu tasnif keyingi tadqiqotlar uchun uslubiy poydevor boʻlib xizmat qilmoqda. O.S.Axmanovaning terminologik lugʻatida esa arxaizm tushunchasining uslubiy jihati, ya'ni uning nutqqa tantanavorlik yoki kinoya ohangini beruvchi vosita sifatidagi tabiati aniq izohlangan [15].

Eskirgan soʻzning badiiy nutqdagi vazifasi masalasi V.V.Vinogradov tadqiqotlarida nazariy jihatdan asoslandi. Olim badiiy matnda soʻzning umumtil ma'nosidan tashqari "estetik ma'no" yuzaga kelishini, bu ma'no esa soʻzning matndagi oʻrni va uslubiy tovlanishi bilan belgilanishini koʻrsatib berdi [13]. Ushbu qarash eskirgan leksemaga nisbatan qoʻllanganda ayniqsa samarali natija beradi: passiv qatlam birligi badiiy matnga tushganda uning eskirganlik belgisining oʻzi qoʻshimcha ma'no komponentiga aylanadi.

Gʻarb lingvopoetikasida bu hodisa aktualizatsiya (foregrounding) nazariyasi doirasida talqin qilinadi. Ya.Mukarjovskiy shoirona nutqning asosiy belgisi til birligining avtomatlashgan qoʻllanishidan chetlashuvi ekanligini koʻrsatgan edi [22]. J.Lich esa badiiy matndagi chetlashuv turlarini tasniflab, ularning orasida "vaqtga oid chetlashuv", ya'ni oʻz davrining til me'yoriga nisbatan eskirgan shakllarni qoʻllashni alohida ajratdi [21]. Maqol matnidagi eskirgan soʻz

aynan shu turdagi chetlashuvni yuzaga keltiradi, biroq u yerda chetlashuv muallif tomonidan ataylab yaratilmaydi, balki tilning tabiiy taraqqiyoti natijasida o‘z-o‘zidan hosil bo‘ladi. Bu maqol materialining o‘ziga xosligini belgilaydi.

Paremiologiyaning nazariy masalalari G.L.Permyakov ishlarida tizimlashtirildi: olim maqolni klishe, ya’ni tayyor holda takrorlanuvchi belgi sifatida talqin qilib, uning shakl barqarorligini asosiy tipologik belgi deb baholadi [16]. Bu qarash tadqiqotimiz uchun muhim, chunki aynan shakl barqarorligi eskirgan leksemani saqlab qoluvchi omil hisoblanadi. N.Norrik maqol semantikasini o‘rganar ekan, maqolning so‘zma-so‘z ma’nosi bilan ko‘chma ma’nosi o‘rtasidagi munosabatning turli ko‘rinishlarini tasnifladi va so‘zma-so‘z ma’no xiralashgan hollarda ham maqolning kommunikativ vazifasi saqlanishini ko‘rsatdi [20]. V.Miderning paremiologiyaga bag‘ishlangan qo‘llanmasida maqolning madaniy xotira vositasi sifatidagi tabiati yoritilgan [19]. J.Lakoff va M.Jonsonning kontseptual metafora nazariyasi esa maqoldagi obrazning qanday qilib mavhum tushunchani konkret sohaga ko‘chirish orqali shakllanishini tushuntirishga imkon beradi [23].

Frazeologik va paremiologik birliklarning madaniy mazmuni V.N.Teliya va V.A.Maslova ishlarida lingvomadaniyatshunoslik nuqtayi nazaridan tahlil qilingan; bu tadqiqotlarda til belgisining madaniy kod bilan bog‘lanish mexanizmi ko‘rsatilgan [17; 18]. Ushbu yondashuv eskirgan leksemani nafaqat til birligi, balki yo‘qolgan madaniy voqelikning belgisi sifatida talqin qilishga asos beradi.

O‘zbek tilshunosligida passiv qatlam masalasi E.Begmatovning leksik qatlamlar tasnifiga oid ishlarida, A.Hojiyevning leksikologiyaga bag‘ishlangan tadqiqotlarida hamda H.Ne’matov va R.Rasulovning sistem leksikologiya asoslariga doir monografiyasida nazariy jihatdan yoritilgan [3; 4; 5]. Sh.Rahmatullayevning etimologik lug‘ati eskirgan leksemalarning kelib chiqishini aniqlashda tayanch manba bo‘lib xizmat qiladi [7]. Badiiy matn lingvopoetikasining nazariy masalalari M.Yo‘ldoshev tadqiqotlarida tizimli tarzda ishlab chiqilgan bo‘lib, unda til birligining estetik qimmat kasb etish shartlari aniqlangan [8].

O‘zbek paremiologiyasining manbaviy asosi T.Mirzayev va B.Sarimsoqov mas’ul muharrirligida nashr etilgan ikki jildlik “O‘zbek xalq maqollari” to‘plami bilan belgilanadi [2]. Sh.Shomaqsudov va Sh.Shorahmedovning “Ma’nolar mahzani” izohli lug‘ati esa har bir maqolning ma’nosini, kelib chiqishini va tarkibidagi tushunilishi qiyin so‘zlarning izohini beruvchi noyob manbadir [1]. Aynan shu ikki manbaning qiyosiy imkoniyati mazkur tadqiqot uchun asos bo‘ldi. Shu bilan birga, mavjud adabiyotlar tahlili shuni ko‘rsatadiki, ushbu manbalarda qayd etilgan eskirgan leksika maxsus lingvopoetik tahlil obyekti sifatida hozirgacha o‘rganilmagan; mavjud ishlarda u ko‘proq leksikografik izoh doirasida qolib ketgan. Mazkur maqola ana shu bo‘shliqni to‘ldirishga qaratilgan.

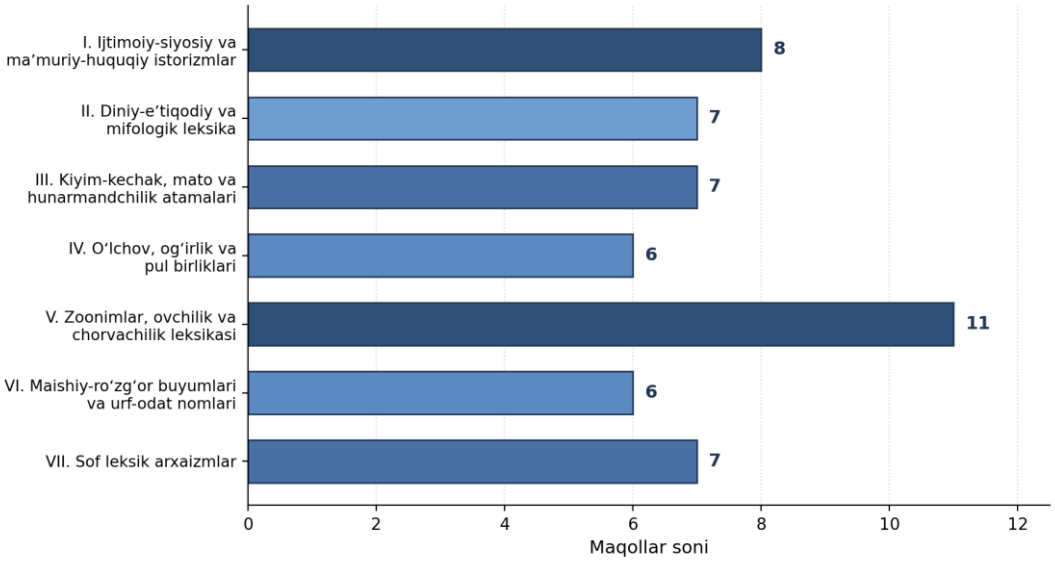
Tadqiqot metodologiyasi

Tadqiqotning empirik asosini ikki manba tashkil etdi. Birinchisi — Sh.Shomaqsudov va Sh.Shorahmedovning “Ma’nolar mahzani” izohli lug‘ati [1]; bu manbaning qimmati shundaki, unda har bir maqol izohlanibgina qolmay, tarkibidagi bugungi kitobxon uchun notanish leksemaga alohida lug‘aviy izoh beriladi. Ikkinchisi — “O‘zbek xalq maqollari”ning ikkinchi tomi [2]; nashrning yakunida keltirilgan “Tushunilishi qiyin so‘zlar lug‘ati” eskirgan leksemalarni aniqlash va ularning ma’nosini tekshirish imkonini berdi.

Tanlanma quyidagi uchta mezon asosida shakllantirildi. Birinchidan, tarkibidagi leksema hozirgi o‘zbek adabiy tilida faol qo‘llanmasligi lozim. Ikkinchidan, leksemaning ma’nosi manbada lug‘aviy izoh bilan ta’minlangan bo‘lishi shart; bu talab tadqiqotni taxminiy talqinlardan himoya qiladi va har bir tahlilni hujjatlashtirilgan izohga bog‘laydi. Uchinchidan, maqolning umumiy ma’nosi aynan shu leksemaga tayanishi, ya’ni leksema o‘rniga zamonaviy sinonim qo‘yilganda maqolning obrazi yoki ohangdoshligi buzilishi kerak. Ushbu mezonlar asosida 52 ta maqol saralab olindi. Manba matnlari kirill yozuvidan lotin yozuviga o‘girilganda maqolning orfoepik qiyofasi imkon qadar saqlandi.

Material quyidagi usullar yordamida o‘rganildi. Tavsifiy usul har bir leksemaning manbadagi izohini qayd etish va tizimlashtirishda qo‘llanildi. Komponent tahlil leksemaning ma’no tarkibidagi denotativ va konnotativ semalarni ajratish, xususan, eskirganlik belgisining alohida uslubiy sema sifatida namoyon bo‘lishini ko‘rsatishda ishlatildi. Kontekstual-semantik tahlil leksemaning maqol matnidagi sintagmatik muhitini, uning qo‘shni so‘zlar bilan hosil qilgan ma’no munosabatini aniqlashga xizmat qildi. Lingvopoetik tahlil orqali leksemaning obraz yaratishdagi, baho va emotsiya ifodalashdagi ulushi belgilandi. Qiyosiy usul esa maqolning variantlarini o‘zaro solishtirish, ya’ni eskirgan leksema o‘rniga zamonaviy muqobil qo‘yilgan variantlarni tekshirish uchun qo‘llanildi; bu usul leksik yangilanish jarayonini kuzatish imkonini berdi.

Tadqiqotning uslubiy cheklovini alohida qayd etish lozim. Tanlanma birinchi manbaning izohli qismidan olingan bo‘lib, u alifbo tartibidagi ma’lum bir qismni qamrab oladi; shu bois olingan miqdoriy nisbatlar butun o‘zbek paremiologik fondi uchun statistik vakillik da’vo qilmaydi. Tadqiqotning maqsadi miqdoriy emas, sifat tahliliga qaratilgani sababli bu cheklov xulosalarning ishonchliligiga ta’sir qilmaydi: har bir holat alohida, izohga tayangan holda talqin etilgan.



Natijalar va ularning tahlili

Eskirgan leksikaning tematik-semantik tasnifi. Tanlanmadagi 52 ta maqol tarkibidan aniqlangan eskirgan leksemalar denotativ mazmuniga koʻra yettita tematik-semantik guruhga birlashdi (1-jadval). Guruhlarning miqdoriy taqsimoti 1-rasmda aks ettirilgan.

1-jadval

Oʻzbek xalq maqollarida eskirgan leksikaning tematik-semantik guruhlari

T/r	Tematik-semantik guruh	Namunaviy leksemalar	Maqollar soni
I	Ijtimoiy-siyosiy va ma’muriy-huquqiy istorizmlar	amir, bakovul, yasovul, raiyat, zakot, diyat, barimta, bunak, jallob	8
II	Diniy-e’tiqodiy va mifologik leksika	arsh, padar, pir, murid, qurbonliq, isiriq, ayamajuz, anqo, pirtak	7
III	Kiyim-kechak, mato va hunarmandchilik atamalari	boʻrk, yargʻoq, alak, yopinchiq, pushton, bordon, moʻndi	7
IV	Oʻlchov, ogʻirlik va pul birliklari	qari, dahsar, sisar, miri, tuman, duvaja	6
V	Zoonimlar, ovchilik va chorvachilik leksikasi	itolgʻi, qarchigʻay, shunqor, turumtoy, balapon, zagʻizgʻon, jiblajibon, ingan, boʻta, bedov, xirs, yapaloq, poyganak	11
VI	Maishiy-roʻzgʻor buyumlari va urf-odat nomlari	chora, yaloq, tavan, oshboshi, jangal, bulduriq, oʻtarchi	6
VII	Sof leksik va semantik arxaizmlar	yozuq, iris, iskart, yovon, ipor, buromad, yolchi	7
	Jami		**52**

1-rasm. Eskirgan leksemalarning tematik-semantik guruhlar boʻyicha taqsimoti

Tasnif natijalari muhim bir qonuniyatni koʻrsatadi: eng koʻp eskirgan leksema chorvachilik, ovchilik va zoonimika sohasiga (V guruh), shuningdek, eski ma’muriy-huquqiy tuzumga (I guruh) tegishli. Bu tasodifiy emas. Xalq maqollari asosan koʻchmanchi-chorvador va dehqonchilik turmush tarzi sharoitida shakllangan; turmush tarzi oʻzgargach, unga xizmat qilgan atamalar denotatini yoʻqotgan, lekin maqol qolipi ichida qolib ketgan. Demak, eskirgan leksikaning tematik taqsimoti maqollarning yaratilish davridagi ijtimoiy-iqtisodiy voqelikning bevosita in’ikosidir.

Obrazlilik: denotatning yoʻqolishi va metaforik asosning kuchayishi. Maqoldagi eskirgan soʻzning birinchi lingvopoetik vazifasi obraz yaratishdir. Bu vazifa oʻziga xos semantik mexanizmga ega: leksemaning real denotati kundalik tajribadan chiqib ketgach, uning ma’no tarkibida denotativ komponent zaiflashadi, koʻchma-obrazli komponent esa aksincha kuchayadi. Boshqacha aytganda, soʻz predmetni atash vazifasidan ozod boʻlib, sof obrazga aylanadi.

“Ingan ingarsa, bo‘ta bo‘zlaydi” maqolini kuzataylik. Manbada *ingan* urg‘ochi tuya, bo‘ta esa uning bolasi ekanligi izohlanadi. Hozirgi shahar sharoitidagi so‘zlovchi tuyachilik amaliyotidan yiroq bo‘lishiga qaramay, maqolning ma’nosini — ota-onaning iztirobi bolaga, bolaning iztirobi ota-onaga o‘tishini — bexato tushunadi. Bunga sabab shuki, matnda ingarmoq va bo‘zlamoq fe’llari tovushga oid yaqqol tasavvur uyg‘otadi hamda ikkala leksema ohangdoshlik hosil qiladi. Denotat noaniqlashgani obrazni buzmaydi, aksincha, uni umumlashtiradi: “ingan” endi muayyan hayvon emas, balki ona timsolining sof shakli sifatida idrok etiladi. Maqolning zamonaviy variantlari — “Bo‘laning barmog‘i og‘risa, onaning yuragi achiydi” yoki “Otasi achchiq olma yesa, o‘g‘lining tishi qamashadi” — mazmunan bir xil bo‘lsa-da, obrazlilik darajasi bilan farqlanadi: ularda tasvir maishiy va aniq, eskirgan leksemali variantda esa yuksak va umumlashgan.

Xuddi shunday mexanizm *“Itolg‘i — qarchig‘ayning sherigi”* maqolida ham kuzatiladi. *Itolg‘i* ham, qarchig‘ay ham ov qushlarining nomi bo‘lib, bugungi til egasi ularni bir-biridan farqlay olmaydi. Ammo maqolning ma’nosi — ochko‘z va olg‘ir kuchlarning o‘zaro hamkorligi — aynan shu farqlanmaslik hisobiga yanada keskinlashadi: ikki qush bir-biriga shu qadar o‘xshaydiki, ular yagona salbiy obrazga qo‘shilib ketadi. Bu yerda leksik noaniqlik badiiy vositaga aylangan.

“Balapon boshiga, turumtoy to‘shiga” maqolida obraz ikki eskirgan zoonim — hali uchishni o‘rganmagan qush bolasi va ov qushlarining eng kichigi zimmasiga yuklangan. Har ikkalasi ham o‘z kuchidan ortiq ishga urinib, o‘zini halok qiladi. Obrazning teranligi shundaki, halokat sababi tashqi dushman emas, balki subyektning o‘z imkoniyatini noto‘g‘ri baholashidir; bu ma’noni zamonaviy leksika bilan berish uchun bir necha gap talab qilinadi. Ayni shu tejamkorlik — ikki eskirgan zoonim orqali murakkab axloqiy qoidani ifodalash — maqolning poetik quvvatini belgilaydi.

“Zag‘izg‘on bir qo‘nib, sakkiz sakraydi” hamda *“Jiblajibonning es-hushi — pashsha tutishda”* maqollarida esa obraz qushning kuzatilgan real xulq-atvoriga asoslanadi: birinchisida ehtiyotkorlik va hushyorlik, ikkinchisida beqarorlik va yengiltaklik ramziy ma’no kasb etadi. Zoonimning eskirganligi bu yerda ramzning umumlashuv darajasini oshiradi, chunki so‘z aniq biologik turdan uzilib, sof xarakter belgisiga aylanadi.

Ekspressivlik: notanish shakl va baho ifodasi. Ikkinchi lingvopoetik vazifa ekspressivlik hosil qilish bilan bog‘liq. Bu yerda mexanizm boshqacha: eskirgan leksemaning notanishligi tinglovchi diqqatini o‘ziga tortadi, natijada maqolning shu qismi ritmik va semantik jihatdan kuchaytirilgan pozitsiyaga chiqadi. Mukarjovskiy aktualizatsiya deb atagan hodisa aynan shu tarzda yuzaga keladi [22].

“Zolimning uyqusi — raiyatning rohati” maqolida raiyat leksemasi hukmdorga tobe bo‘lgan oddiy fuqarolarni bildiradi. Uni zamonaviy “xalq” yoki “aholi” so‘zi bilan almashtirsak, jumla ma’nosini yo‘qotmaydi, biroq butun ta’sir kuchidan mahrum bo‘ladi. Sabab shundaki, raiyat so‘zi ma’nosining o‘zida tobelik, huquqsizlik va bo‘ysunish semalari mujassam; bu semalar zolim leksemasi bilan zidlanib, maqolning ijtimoiy keskinligini yaratadi. Bunda ekspressivlik antonimik juftlik (zolim — raiyat) va parallel sintaktik qurilma bilan yanada kuchaytiriladi.

“Amir bo‘lsa tamagir, na tovuq qolur, na kulonkir” maqolida ekspressivlikning yana bir manbai — qofiya. Bu yerda uchta so‘z — amir, tamagir, kulonkir — bir xil ohangdoshlik hosil qiladi. Manbada kulonkir yirik jussali xo‘roz turi ekanligi izohlangan. Diqqatga sazovori shuki, aynan qofiya talabi bu nodir leksemani maqol tarkibida ushlab turgan: uning o‘rniga umumiste’moldagi “xo‘roz” so‘zini qo‘ysak, qofiya ham, kinoya ohangi ham darhol yo‘qoladi. Demak, ekspressivlik va leksemaning saqlanishi bir-biriga bog‘liq: qofiya so‘zni saqlaydi, saqlangan so‘z esa qofiya orqali ekspressivlikni kuchaytiradi.

“Bo‘zchi belboqqa yolchimas, kulol — mo‘ndiga” maqolida ekspressivlik achchiq kinoya shaklida namoyon bo‘ladi. Mo‘ndi — kulol yasaydigan sopol idish turi; hunarmand o‘zi yasagan idishdan foydalana olmasligi ijtimoiy adolatsizlikning eng ixcham ifodasidir. Maqolning variantlarida mo‘ndi o‘rniga to‘qa (kamar to‘qasi) qo‘llanadi va bunda temirchi obrazi yuzaga chiqadi. Variantlar qiyosi ko‘rsatadiki, maqolning qolipi barqaror, unga tushuvchi kasb-hunar atamasi esa o‘zgaruvchan; ammo har ikki holatda ham aynan eskirgan hunarmandchilik atamasi ekspressivlikning tashuvchisi bo‘lib qoladi.

“Dahsar tariq, sisar hayqiriq” maqolida ekspressivlik o‘lchov birliklarining zidlanishi orqali hosil qilingan: dahsar — nisbatan kichik og‘irlik o‘lchovi, sisar esa undan uch barobar ko‘p miqdor. Ozgina hosil uchun butun bozorni boshiga ko‘taradigan odam ustidan kulish shu ikki atamaning miqdoriy nomutanosibligiga qurilgan. Zamonaviy o‘lchovlar (kilogramm, tonna) bilan almashtirilganda kinoya butunlay yo‘qoladi, chunki eskirgan atamalarning ohangdoshligi (dahsar — sisar) va qofiyaviy juftlashuvi (tariq — hayqiriq) shu bilan birga yo‘qoladi. Xuddi shu hodisa *“Dunyoniki — miri kam ikki”* maqolida ham kuzatiladi: miri — besh tiyinlik mayda pul birligi; maqol dunyoning hech qachon to‘liq bo‘lmasligi haqidagi falsafiy fikrni arzimas pul birligi orqali ifodalaydi va bu nomutanosiblik uning ekspressiv quvvatini belgilaydi.

Ekspressivlikning yana bir ko‘rinishi *“Ziqna birga unamay, duvajaga tushadi”* maqolida namoyon bo‘ladi. Duvaja — ikki barobar, ikki hissa ma’nosidagi arxaik miqdor bildiruvchi so‘z. Xasis odamning arzonini izlab, oxir-oqibat ikki barobar sarf qilishi haqidagi umumbashariy kuzatish shu bitta so‘z bilan ifodalangan; leksemaning notanishligi maqolga hikmatli, deyarli aforistik ohang beradi.

Tarixiy kolorit: leksema xronologik indeks sifatida. Uchinchi vazifa istorizmlarga koʻproq xos boʻlib, ularning muayyan ijtimoiy-iqtisodiy davrni belgilash qobiliyati bilan bogʻliq. Bunday leksema maqol matniga xronologik marker olib kiradi va tinglovchining ongida butun bir tarixiy manzarani jonlantiradi.

"Borga — bakovul, yoʻqqa — yasovul" maqoli bunga yorqin misol. Manbada bakovul xon dasturxonchisi, yasovul esa amaldorlarning yugurdagi, qoʻriqchisi ekanligi izohlanadi. Ikkala mansab ham xonlik davri boshqaruv tizimiga tegishli boʻlib, bugun mavjud emas. Maqol boyga xushomad qilib, kambagʻalni mensimaydigan odamni fosh etadi; ammo bu axloqiy baho aniq tarixiy sahnaga — saroy, dasturxon, amaldor va uning yugurdagi manzarasiga joylashtirilgan. Ikki mansab nomining qofiyalanishi (bakovul — yasovul) esa maqolning esda qolarli boʻlishini taʼminlaydi.

"Zakotli mol oʻtda kuymas, suvda choʻkmas" maqolida zakot leksemasi shariat soligʻi tizimini, *"Dushmaning ojiz boʻlsa, diyat soʻrama"* maqolidagi diyat esa qon bahosi, yaʼni xun puli institutini eslatadi. *"Barimtadan qoʻrqqan mol yigʻmas, chigirtkadan qoʻrqqan ekin ekmas"* maqolidagi barimta koʻchmanchi chorvadorlik davridagi qasos yurishi odatini bildiradi. Bu uch maqolning har biri huquqiy-iqtisodiy voqelikning maʼlum bosqichini muhrlab qoʻygan boʻlib, ularni birgalikda kuzatish oʻtmish jamiyatining mulkiy munosabatlari haqida tasavvur beradi. Muhimi shuki, bunday maqollarda tarixiy kolorit tashqi bezak emas, balki maʼnoning tashuvchisi: barimta tushunchasini bilmagan tinglovchi maqolning nima uchun aynan "mol yigʻmaslik" bilan bogʻlanishini anglay olmaydi.

"Bunak olgan boʻlinar, yoli-pari yulinar" maqolida bunak — yollangan kosiblarning ish haqi hisobidan oldindan oladigan puli. Maqol xoʻjayinga qarz orqali qaram boʻlib qolish holatini tasvirlaydi va bu bilan hunarmandchilik ustaxonalaridagi mehnat munosabatlarining aniq shaklini saqlab qolgan. Xuddi shunday, *"Jallob — turgan-bitgani qallob"* maqolidagi jallob mol savdogari, uning variantidagi allop esa don-un sotuvchisi boʻlib, bozor tuzilishining eskirgan kasbiy taqsimotini aks ettiradi.

Alohida eʼtiborga molik guruhni oʻlchov birliklari tashkil etadi. *"Ishtonsizning tushiga uch qari boʻz kiribdi"* va *"Boʻydoqqa ellik qari boʻz ham yetmaydi"* maqollaridagi qari uzunlik oʻlchovi boʻlib, manbada uning turli hududlarda va turli davrlarda turlicha qiymatga ega boʻlgani qayd etilgan — masalan, XIX asrda Xorazmdagi qari bilan Toshkent bozor qarisi oʻrtasida jiddiy farq mavjud edi. Bu maʼlumot maqolning tahlili uchun ikki jihatdan qimmatli: birinchidan, u matnning yaratilish davrini taxminan belgilash imkonini beradi; ikkinchidan, oʻlchov birligining hududiy tarqoqligi maqolning ham mahalliy variantlarga ega boʻlishini izohlaydi.

Diniy-eʼtiqodiy qatlam ham tarixiy kolorit yaratishda faol ishtirok etadi. *"Amri padar — arshdan aʼlo"* maqolida arsh — koinotning eng yuqori qismidagi ilohiy taxt tasavvurini bildiradi; ota amrining shu darajadan ham yuqori qoʻyilishi mubolagʻaning eng yuqori nuqtasidir. *"Goh pirdan, goh muriddan"* maqolidagi pir va murid juftligi taʼlimotdagi ustoz-shogird munosabatining ijtimoiy amaliyotini, *"Isiriqdan jin qochar, yudurukdan — jinni"* maqolidagi isiriq va jin tushunchalari xalq tibbiyoti va demonologik tasavvurlarni saqlagan. *"Ayamajuz — olti kun, qahr aylasa qattiq kun"* maqolida esa qishning oxiridagi olti kunlik sovuq davrini bildiruvchi ayamajuz atamasi orqali xalq taqvimi tizimi inʼikos etgan.

Semantik tiniqlik darajalari. Tahlil koʻrsatdiki, eskirgan leksema qatnashgan maqollar bugungi til egasi uchun bir xil darajada tushunarli emas. Maqolning shakli toʻliq saqlangani holda, uning mazmuni turli darajada xiralashishi mumkin. Shu asosda uch bosqichli semantik tiniqlik shkalasini ajratish mumkin (2-jadval).

2-jadval

Eskirgan leksemali maqollarning semantik tiniqlik darajalari

Daraja	Tavsifi	Namunalar	Idrok natijasi
I. Tiniq	Eskirgan leksemaning maʼnosi kontekstdan yoki oʻzak-negiz orqali tiklanadi	"Yozugʻlikka yoʻl bormi?" (yozuq — gunoh, ayb); "Inisi bornning irisi bor" (iris — baxt, ulush)	Maqol izohsiz tushuniladi
II. Yarim tiniq	Leksema notanish, ammo maqol qurilishi va qoʻshni soʻzlar umumiy maʼnoni tiklashga yetarli	"Ingan ingarsa, boʻta boʻzlaydi"; "Balapon boshiga, turumtoy toʻshiga"; "Borida chora-chora, yoʻgʻida banda bechora"	Umumiy maʼno tushuniladi, tafsilot yoʻqoladi
III. Xira	Leksemaning maʼnosi lugʻaviy izohsiz tiklanmaydi; maqol shaklan saqlangan, mazmunan yopiq	"Dahsar tariq, sisar hayqiriq"; "Yozda qoʻygan poyganakka qishda kelib qush ilindi"; "Jinnining jirtakka tobi yoʻq, shogirdning — pirtakka"	Izohli lugʻat zarur

Shkala amaliy ahamiyatga ega: u izohli lugʻat va oʻquv qoʻllanmalarida qaysi maqollar albatta sharhga muhtojligini belgilash imkonini beradi. Nazariy jihatdan esa u muhim qonuniyatni ochadi — maqolning shakl barqarorligi bilan

mazmun barqarorligi bir xil tezlikda emas, turli tezlikda o‘zgaradi. Shakl deyarli o‘zgarmaydi, mazmun esa asta-sekin xiralashadi. Ana shu tafovut natijasida “shaklan tirik, mazmunan yopiq” maqollar qatlami vujudga keladi.

Ma’no xiralashuvining tabiiy oqibati — qayta talqin, ya’ni xalq etimologiyasi. Leksemaning asl ma’nosi unutilgach, so‘zlovchi uni tovush jihatdan yaqin bo‘lgan tanish so‘zga yaqinlashtiradi va maqolga yangi mazmun yuklaydi. Bunday holatlar maqol matnining tirik, o‘zgaruvchan tabiatini ko‘rsatadi va ularni buzilish emas, balki tilning o‘zini-o‘zi tiklash mexanizmi sifatida baholash lozim.

Maqol qolipi leksik qo‘riqxona sifatida. Tahlilning umumlashtiruvchi natijasi shundan iborat: eskirgan leksemaning maqol tarkibida saqlanishi tasodifiy emas, balki maqolning ritmik-qofiyaviy tuzilishi bilan bevosita bog‘liq. Materialdagi maqollarning aksariyatida eskirgan leksema qofiya yoki alliteratsiya pozitsiyasini egallaydi: amir — tamagir — kulonkir; bakovul — yasovul; dahsar — sisar; ingan — ingarsa; bo‘z — pushton; bo‘rk ichida — yeng ichida. Bu pozitsiya so‘zni almashtirishga imkon bermaydi, chunki almashtirish butun ohangdoshlik tizimini buzadi. Shu tarzda maqolning poetik shakli leksemani konservatsiya qiladi (2-rasm).

2-rasm. Maqol matnidagi eskirgan so‘zning lingvopoetik funksiyalari

Aynan shu mexanizm o‘zbek maqol fondini tarixiy leksikologiya uchun birlamchi manbaga aylantiradi. Yozma yodgorliklarda saqlanmagan yoki kam uchraydigan ayrim leksemalar — masalan, poyganak (qushlarga qo‘yiladigan tuzoq turi), bulduriq (qalin qirov), tavan (mehmon ayollar keltiradigan tugundagi noz-ne’mat), o‘tarchi (mol tabibi), iskart (kosiblarning haftalik ish me’yori) — bugungi kunda asosan maqol matnlari orqaligina qayd etilgan. Bu leksemalarning har biri o‘z sohasidagi yo‘qolgan amaliyotni ham birga saqlab qolgan: iskart so‘zi hunarmandchilikdagi mehnat me’yorlash tizimini, tavan esa to‘y-marosim odob-tartiblarining ixtisoslashgan tuzilmasini ko‘rsatadi.

Uch funksiya o‘zaro istisno qilmaydi, balki bir matnda birga namoyon bo‘lishi mumkin. Masalan, “Bo‘zchi belboqqa yolchimas, kulol — mo‘ndiga” maqolida mo‘ndi bir vaqtning o‘zida obraz yaratadi (hunarmandning ojizligi timsoli), ekspressivlik hosil qiladi (kinoyaviy ohang) va tarixiy kolorit beradi (kulolchilik amaliyotining aniq detali). Shunga ko‘ra, eskirgan so‘zning lingvopoetik imkoniyatlarini bir-biridan ajratilgan uch funksiya emas, balki yagona hodisaning uch qirrasi sifatida talqin qilish maqsadga muvofiq. Ular o‘rtasidagi nisbat leksemaning turiga bog‘liq: sof leksik arxaizmlarda obrazlilik va ekspressivlik ustunlik qilsa, istorizmlarda tarixiy kolorit birinchi o‘ringa chiqadi.

Xulosalar

O‘zbek xalq maqollari tarkibidagi eskirgan leksemalarning tahlili quyidagi xulosalarga olib keladi. Birinchidan, maqol matni tilning passiv qatlamiga o‘tgan birliklarni saqlovchi o‘ziga xos lingvistik qo‘riqxona vazifasini bajaradi; bu vazifa maqolning ritmik-qofiyaviy qolipi bilan ta’minlanadi, chunki qofiya yoki alliteratsiya pozitsiyasidagi so‘zni almashtirib bo‘lmaydi.

Ikkinchidan, tanlanmadagi 52 ta maqol tarkibidagi eskirgan leksika yettita tematik-semantik guruhga ajraladi, ular orasida zoonimlar hamda ijtimoiy-ma’muriy istorizmlar salmoqli o‘rin tutadi. Bu taqsimot maqollar shakllangan davrdagi chorvachilik-dehqonchilik turmush tarzi va xonlik davri boshqaruv tizimining bevosita in’ikosidir.

Uchinchidan, eskirgan so‘z maqol matnida uch xil lingvopoetik vazifani bajaradi. Obrazlilik denotativ komponentning zaiflashuvi hisobiga ko‘chma ma’noning umumlashuvi orqali yuzaga keladi. Ekspressivlik notanish shaklning diqqatni o‘ziga tortishi, qofiyaviy kuchayish va baholovchi semalarning faollashuvi natijasida hosil bo‘ladi.

Tarixiy kolorit esa istorizmning muayyan ijtimoiy-iqtisodiy davrni belgilovchi xronologik indeksga aylanishi bilan izohlanadi. Bu vazifalar bir matnda birga namoyon boʻlishi mumkin.

Toʻrtinchidan, maqollarning semantik tiniqligiga koʻra uch bosqichli shkala — tiniq, yarim tiniq va xira maqollar — ajratildi. Shakl barqarorligi bilan mazmun barqarorligining turli tezlikda oʻzgarishi natijasida "shaklan tirik, mazmunan yopiq" maqollar qatlami vujudga keladi; bu qatlam izohli lugʻat va oʻquv adabiyotlarida albatta sharhlanishi lozim.

Tadqiqot natijalari oʻzbek tili tarixiy leksikologiyasi, paremiologiya va lingvopoetika sohalarida, shuningdek, izohli lugʻatlar tuzishda hamda oliy ta'lim muassasalarida "Oʻzbek tili leksikologiyasi" va "Badiiy matn lingvopoetikasi" fanlarini oʻqitishda qoʻllanishi mumkin. Keyingi tadqiqotlarda tanlanmani butun paremiologik fond hisobiga kengaytirish, eskirgan leksemalarning qardosh turkiy tillar maqollaridagi muqobillari bilan qiyoslash hamda ularning zamonaviy nutqdagi qayta faollashuvi masalasini oʻrganish istiqbolli yoʻnalish boʻlib qoladi.

Mualliflar hissasi, manfaatlar toʻqnashuvi va moliyalashtirish

Mualliflar hissasi: tadqiqot konsepsiyasi, material tanlash, lingvistik tahlil va maqola matnini tayyorlash muallif tomonidan mustaqil amalga oshirilgan. Manfaatlar toʻqnashuvi: muallif manfaatlar toʻqnashuvi yoʻqligini bildiradi. Moliyalashtirish: tadqiqot tashqi moliyaviy yordamsiz amalga oshirilgan.

Аннотация: *В статье рассматриваются психолингвистические особенности языковой репрезентации гендера в узбекском и русском языках с учетом современных тенденций развития гендерной лингвистики. Актуальность исследования обусловлена возрастающим интересом к изучению взаимосвязи языка, мышления и социальной идентичности в условиях билингвального пространства Республики Узбекистан. Цель исследования заключается в выявлении общих и специфических особенностей формирования гендерно маркированного речевого поведения носителей узбекского и русского языков, а также в определении влияния национально-культурных факторов на процессы речевой коммуникации. Практическая значимость исследования заключается в возможности использования полученных результатов при преподавании русского и узбекского языков, психолингвистики, гендерной лингвистики, межкультурной коммуникации и разработке современных образовательных технологий.*

Ключевые слова: *гендерная лингвистика, психолингвистика, узбекский язык, русский язык, языковая личность, билингвизм, речевое поведение.*

O'ZBEK VA RUS TILLARINING GENDER LINGVISTIKA ASPEKTIDAGI XUSUSIYATLARI: PSIXOLINGVISTIK TAHLIL

Annotatsiya: *Maqolada zamonaviy gender lingvistikasining rivojlanish tendensiyalarini hisobga olgan holda o'zbek va rus tillarida genderning lingvistik ifodalanishining psixolingvistik xususiyatlari ko'rib chiqiladi. Tadqiqotning dolzarbligi O'zbekiston Respublikasining ikki tilli muhitida til, tafakkur va ijtimoiy identifikatsiya o'rtasidagi o'zaro bog'liqlikni o'rganishga bo'lgan qiziqishning ortib borayotgani bilan belgilanadi. Tadqiqotning maqsadi o'zbek va rus tili so'zlashuvchilarida gender bilan bog'liq nutqiy xulq-atvorning umumiy va o'ziga xos jihatlarini aniqlash hamda milliy-madaniy omillarning nutqiy muloqot jarayonlariga ta'sirini belgilashdan iborat. Tadqiqot natijalaridan o'zbek va rus tillarini, psixolingvistika, gender lingvistikasi va madaniyatlararo kommunikatsiyani o'qitishda, shuningdek zamonaviy ta'lim texnologiyalarini ishlab chiqishda foydalanish mumkin.*

Kalit so'zlar: *gender lingvistikasi, psixolingvistika, o'zbek tili, rus tili, lingvistik shaxs, bilingvizm, nutqiy xulq-atvor.*

FEATURES OF THE UZBEK AND RUSSIAN LANGUAGES IN THE ASPECT OF GENDER LINGUISTICS: A PSYCHOLINGUISTIC ANALYSIS

Abstract: *The article examines the psycholinguistic features of gender representation in the Uzbek and Russian languages within the framework of contemporary gender linguistics. The relevance of the study is determined by the growing interest in the interaction between language, cognition and social identity in the bilingual environment of the Republic of Uzbekistan. The purpose of the research is to identify common and specific characteristics of gender-marked speech behaviour in Uzbek and Russian speakers and to determine the influence of national and cultural factors on communication processes. The findings may be applied in teaching Uzbek and Russian, psycholinguistics, gender linguistics and intercultural communication, as well as in the development of modern educational technologies.*

Keywords: *gender linguistics, psycholinguistics, Uzbek language, Russian language, language personality, bilingualism, speech behaviour.*

Введение

Гендерная лингвистика является одним из наиболее динамично развивающихся направлений современной гуманитарной науки, объединяющим достижения языкознания, психолингвистики, когнитивной лингвистики, социолингвистики и культурологии. Основное внимание исследователей сосредоточено на изучении механизмов отражения гендерных отношений в языке, особенностей формирования языковой личности и влияния социальных факторов на речевое поведение человека [Кирилина, 1999; 21].

В последние десятилетия интерес к гендерным исследованиям значительно возрос, что связано с развитием междисциплинарных подходов к анализу языка как средства формирования социальной идентичности. Современная психолингвистика рассматривает речевую деятельность не только как процесс передачи информации, но и как сложный когнитивный механизм, в котором языковые средства отражают особенности мышления, национальной культуры и коммуникативного опыта личности [Леонтьев, 2005; 47]. В этом контексте гендер выступает не только как биологическая характеристика человека, но и как социокультурная категория, определяющая выбор речевых стратегий, коммуникативных тактик и способов языкового взаимодействия [Лакофф, 1975; 15].

Особую актуальность проблема приобретает в условиях Республики Узбекистан, где исторически сформировалось билингвальное пространство, характеризующееся активным функционированием узбекского и русского языков. Их взаимодействие способствует формированию особой языковой личности, свободно переключающейся между различными коммуникативными кодами и культурными моделями общения. Подобная языковая ситуация обусловливает необходимость комплексного психолингвистического исследования гендерной специфики речевого поведения, учитывающего структурные особенности обоих языков и влияние национальных традиций [Маслова, 2018; 63].

Обзор литературы

Теоретическую основу исследования составили работы по психолингвистике, гендерной лингвистике, лингвокультурологии и теории языковой личности. Важное значение имеют положения Л. С. Выготского, А. А. Леонтьева и А. Р. Лурии о речевой деятельности как сложном когнитивном процессе, а также концепция Ю. Н. Караулова о языковой личности. В области гендерной лингвистики значимыми являются исследования А. В. Кирилиной, Р. Лакофф, Д. Таннен, Дж. Батлер, Д. Кэмерон, Дж. Коутс, П. Эккерт и С. МакКоннелл-Гинет. Их труды отражают переход от описания различий мужской и женской речи к изучению гендера как социально и дискурсивно конструируемой категории. Для анализа цифровой коммуникации существенны исследования Д. Кристала и Дж. П. Ги, позволяющие учитывать влияние интернет-дискурса и мультимодальных средств на современные коммуникативные практики. Сопоставление указанных подходов показывает необходимость дальнейшего изучения гендерной коммуникации в условиях узбекско-русского билингвизма, где структурные особенности языков взаимодействуют с национально-культурными нормами.

Методология исследования

Методологическую основу настоящего исследования составляет комплексный междисциплинарный подход, объединяющий достижения психолингвистики, гендерной лингвистики, когнитивной лингвистики, социолингвистики и теории межкультурной коммуникации. Такой подход позволяет рассматривать гендерную специфику речевого поведения как результат взаимодействия языковых, психологических, когнитивных и социокультурных факторов, определяющих процессы порождения и восприятия речи [Леонтьев, 2005; 38; Маслова, 2018; 72].

Теоретической базой исследования послужили положения психолингвистической теории речевой деятельности, разработанной Л. С. Выготским, А. А. Леонтьевым и А. Р. Лурией. Согласно данной концепции, речевая деятельность представляет собой сложный когнитивный процесс, включающий этапы формирования замысла, внутреннего программирования, языкового оформления и реализации высказывания [Выготский, 1999; 117; Леонтьев, 2005; 54; Лурия, 1979; 28]. Использование данного подхода позволило рассмотреть особенности гендерной репрезентации как отражение специфики языкового сознания личности.

При анализе языковой личности использованы положения концепции Ю. Н. Караулова, согласно которым языковая личность представляет собой совокупность языковых знаний, коммуникативных навыков и культурных ценностей, проявляющихся в процессе речевого взаимодействия [Караулов, 2010; 35]. Данная концепция особенно значима для исследования билингвальной личности, функционирующей в условиях узбекско-русского языкового пространства.

Теоретические положения гендерной лингвистики основываются на работах А. В. Кирилиной, Р. Лакофф, Д. Таннен, Дж. Батлер и других исследователей, рассматривающих гендер как социально конструируемую категорию, находящую отражение в языковой системе и коммуникативном поведении личности [Кирилина, 1999; 24; Lakoff,

1975; 16; Tannen, 1990; 42; Butler, 1990; 33]. В отличие от традиционного понимания пола как исключительно биологической характеристики, современная гендерная лингвистика исследует особенности языкового выражения социальных ролей мужчин и женщин, коммуникативных стратегий и речевых моделей.

Особое внимание в исследовании уделено сопоставительному анализу узбекского и русского языков. Выбор данных языков обусловлен их активным функционированием в современной языковой ситуации Республики Узбекистан. Узбекский язык, являясь агглютинативным, практически не обладает средствами грамматической маркировки рода, тогда как русский язык характеризуется развитой системой грамматического рода, оказывающей существенное влияние на организацию речевого высказывания [Бегматов, 2008; 56; Рахматуллаев, 2010; 84]. Сравнение данных языковых систем позволяет выявить универсальные и национально-специфические механизмы языковой репрезентации гендера.

Эмпирическую основу исследования составили научные труды отечественных и зарубежных авторов по психолингвистике, гендерной лингвистике, когнитивной лингвистике и социолингвистике, а также примеры языкового материала, отражающие особенности современного узбекского и русского речевого общения. Для анализа были использованы материалы художественных произведений, средств массовой информации, интернет-дискурса, образовательной коммуникации и разговорной речи. Такой корпус языковых данных позволил рассмотреть функционирование гендерно маркированных единиц в различных коммуникативных сферах и определить влияние социальных условий на выбор речевых стратегий.

В работе применялись взаимодополняющие методы исследования. Описательный метод использовался для характеристики языковых явлений и определения особенностей функционирования гендерно маркированных единиц [Маслова, 2018; 94]. Сравнительно-сопоставительный метод позволил выявить сходства и различия между узбекским и русским языками на лексическом, грамматическом и прагматическом уровнях [Бегматов, 2008; 61]. Метод дискурсивного анализа был направлен на изучение особенностей реализации гендерных стратегий в различных типах коммуникации, включая институциональный, бытовой и цифровой дискурс [Tannen, 1990; 88]. Кроме того, применялся метод интерпретационного анализа, обеспечивший выявление национально-культурной специфики языковых единиц и особенностей их функционирования в различных коммуникативных ситуациях.

Научная новизна исследования заключается в комплексном психолингвистическом анализе гендерной репрезентации в узбекском и русском языках в условиях современного билингвизма. В отличие от большинства существующих работ, посвященных описанию отдельных языковых особенностей, настоящее исследование рассматривает гендерную коммуникацию как интегративный когнитивный процесс, обусловленный взаимодействием языковой структуры, национальной культуры, социальных норм и индивидуального коммуникативного опыта. Особое внимание уделено влиянию цифровой коммуникации и интернет-дискурса на трансформацию традиционных моделей речевого поведения, что отражает современные тенденции развития языковой личности в условиях цифровизации общества.

Таким образом, выбранная методология обеспечивает всесторонний анализ исследуемой проблемы и позволяет получить достоверные результаты, раскрывающие особенности языковой репрезентации гендера в узбекском и русском языках с учетом их структурных различий, культурной обусловленности и психолингвистических механизмов речевой деятельности.

Результаты исследования

Проведенный сравнительно-сопоставительный анализ показал, что языковая репрезентация гендера в узбекском и русском языках обусловлена совокупностью лингвистических, психолингвистических и социокультурных факторов. Несмотря на принадлежность данных языков к различным типологическим системам, в обоих случаях язык выступает важнейшим средством формирования гендерной идентичности, отражая национальные культурные нормы, ценностные установки и особенности коммуникативного поведения.

Гендерная маркированность грамматической системы русского и узбекского языков

Одним из наиболее существенных различий исследуемых языков является специфика выражения категории рода. Русский язык характеризуется наличием грамматической категории рода, которая охватывает существительные, местоимения, прилагательные, причастия и формы прошедшего времени глагола. Благодаря этому гендерная информация кодируется уже на морфологическом уровне языковой системы [Караулов, 2010; 43].

Например:

«Студент подготовил научный доклад.»

«Студентка подготовила научный доклад.»

Даже при отсутствии имени говорящего получатель сообщения получает информацию о половой принадлежности субъекта речи.

В узбекском языке подобная категория отсутствует. Личное местоимение u используется как в отношении мужчины, так и женщины, а формы глагола остаются неизменными независимо от пола субъекта действия:

Talaba ilmiy ma'ruza tayyorladi.

В данном предложении невозможно определить пол говорящего без дополнительного контекста [Бегматов, 2008; 74].

С психолингвистической точки зрения подобная особенность свидетельствует о различных механизмах обработки языковой информации. В русском языке идентификация гендера осуществляется одновременно с восприятием грамматической структуры предложения, тогда как в узбекском языке данный процесс требует привлечения дополнительных когнитивных ресурсов, основанных на анализе контекста, коммуникативной ситуации и фоновых знаний адресата [Лурия, 1979; 65].

Исследование показало, что отсутствие грамматической категории рода в узбекском языке компенсируется более активным использованием лексических средств. Гендерная принадлежность чаще всего выражается словами:

erkak — мужчина; ayol — женщина; ota — отец; ona — мать; o'g'il — сын; qiz — дочь.

В русском языке аналогичные лексемы существуют, однако основную функцию идентификации пола выполняют грамматические показатели [Кирилина, 1999; 38].

Кроме того, в узбекской языковой картине мира значительно чаще используются уважительные обращения: aka, opa, ota, ona, ustoz которые отражают не столько гендерные различия, сколько возрастную и социальную иерархию собеседников.

В русском языке аналогичную функцию выполняют обращения по имени-отчеству или официальные формы речевого этикета:

уважаемый коллега; господин профессор; уважаемая комиссия.

Это свидетельствует о том, что в узбекской культуре социальный статус нередко оказывается более значимым фактором речевого поведения, чем пол коммуниканта.

Анализ научной литературы и коммуникативных практик показал, что женская и мужская речь различаются прежде всего на прагматическом уровне.

Женская речь характеризуется:

большей эмоциональной экспрессивностью;

использованием слов поддержки;

частым употреблением форм благодарности;

высокой частотностью вежливых конструкций;

стремлением к поддержанию гармонии общения.

Например: Большое спасибо за помощь. Мне было очень приятно работать с вами.

Мужская коммуникация чаще ориентирована на достижение конкретного результата общения и отличается лаконичностью.

Например: Доклад готов. Материалы отправлены.

Полученные результаты согласуются с выводами Д. Таннен, рассматривающей женскую речь как средство установления социальных отношений, тогда как мужская коммуникация преимущественно ориентирована на передачу информации [Tannen, 1990; 82].

Вместе с тем проведенный анализ показывает, что подобные различия постепенно становятся менее выраженными среди представителей молодого поколения, активно использующих цифровые технологии и социальные сети.

Современный Узбекистан представляет собой пространство активного функционирования двух языков — узбекского и русского. Это способствует формированию билингвальной языковой личности, обладающей способностью изменять коммуникативную стратегию в зависимости от используемого языка.

В ходе исследования установлено, что при переходе на узбекский язык коммуниканты значительно чаще используют:

этикетные формулы;

косвенные просьбы;

уважительные обращения;

речевые стратегии сохранения гармонии общения.

При использовании русского языка возрастает частотность:

прямых вопросов;

оценочных конструкций;

экспрессивной лексики;

аргументированной дискуссии.

Таким образом, смена языка сопровождается изменением не только языковых средств, но и коммуникативного поведения личности. Данный факт свидетельствует о высокой степени когнитивной адаптации билингвальной личности и подтверждает положение психолингвистики о тесной взаимосвязи языка, мышления и социальной среды [Леонтьев, 2005; 73].

Отдельного внимания заслуживает влияние цифровой коммуникации на трансформацию традиционных моделей речевого поведения. Анализ интернет-дискурса показывает, что современные пользователи активно используют:

эмодзи;

графические символы;

англоязычные заимствования;

интернет-сленг;

мультимодальные средства общения.

Женщины чаще используют эмоционально окрашенные сообщения, эмодзи, слова поддержки и благодарности, тогда как мужчины предпочитают краткие информационные сообщения, профессиональную лексику и нейтральные коммуникативные конструкции. Однако эти различия постепенно сглаживаются под влиянием социальных сетей, где возраст, образование, профессиональная принадлежность и цифровая культура оказывают не меньшее влияние на речевое поведение, чем гендер.

Полученные результаты позволяют утверждать, что цифровая среда способствует формированию новых моделей языкового поведения, в которых традиционные гендерные различия трансформируются в соответствии с современными тенденциями глобализации и цифровизации общества [Musaeva, 2022; 10241].

Обсуждение результатов

Полученные результаты подтверждают, что гендерная специфика речевого поведения не может быть объяснена исключительно структурными особенностями языковой системы. Проведенное исследование свидетельствует о том, что формирование гендерно маркированной коммуникации представляет собой многофакторный процесс, в котором взаимодействуют лингвистические, когнитивные, психологические и социокультурные компоненты. Данный вывод соответствует современным представлениям психолингвистики о языке как инструменте не только передачи информации, но и конструирования социальной реальности [Леонтьев, 2005; 61].

Результаты исследования согласуются с положениями А. В. Кирилиной, согласно которым гендерная лингвистика рассматривает язык как средство репрезентации социальных ролей мужчин и женщин, отражающих культурные нормы конкретного общества [Кирилина, 1999; 52]. Вместе с тем проведенный сравнительный анализ позволяет уточнить данную концепцию применительно к билингвальной языковой ситуации Республики Узбекистан. Если в большинстве исследований основное внимание уделяется языкам с развитой категорией грамматического рода, то результаты настоящей работы показывают, что отсутствие данной категории в узбекском языке не препятствует эффективной репрезентации гендерной принадлежности. Ее функции реализуются посредством лексических единиц, коммуникативного контекста, прагматических средств и национально обусловленных норм речевого поведения.

Полученные данные также подтверждают выводы Р. Лакофф о том, что особенности мужской и женской речи определяются не столько биологическими различиями, сколько социальными ожиданиями, закрепленными в языковой практике общества [Lakoff, 1975; 45]. Вместе с тем анализ речевого материала показывает, что в современной узбекской языковой среде наблюдается постепенное изменение традиционных моделей коммуникации. Расширение образовательных возможностей, активное участие женщин в профессиональной и общественной деятельности, а также интенсивное развитие цифровых технологий способствуют трансформации привычных коммуникативных ролей. Вследствие этого многие ранее устойчивые гендерные различия становятся менее выраженными, особенно в речи представителей молодого поколения.

Существенный интерес представляет сопоставление полученных результатов с концепцией Д. Таннен, согласно которой мужская и женская коммуникация строится на различных принципах: мужчины преимущественно ориентированы на передачу информации и достижение коммуникативной цели, тогда как женщины стремятся к поддержанию межличностных отношений и эмоционального взаимодействия [Tannen, 1990; 91]. Проведенное исследование в целом подтверждает данную закономерность, однако позволяет отметить, что в условиях узбекско-русского билингвизма данные особенности приобретают дополнительные национально-культурные характеристики. Так, в узбекской коммуникативной традиции независимо от пола говорящего значительно возрастает роль речевого этикета, уважительных обращений и косвенных форм выражения просьбы

или несогласия. Следовательно, национальная культура в ряде случаев оказывает более сильное влияние на выбор коммуникативной стратегии, чем гендерная принадлежность.

Особого внимания заслуживают результаты, связанные с исследованием билингвальной языковой личности. Анализ показал, что переключение между узбекским и русским языками сопровождается изменением не только языковых средств, но и коммуникативных моделей поведения. При использовании узбекского языка говорящие чаще демонстрируют ориентацию на сохранение социальной гармонии, уважительное отношение к собеседнику и соблюдение традиционных норм общения. При переходе на русский язык увеличивается частотность прямых речевых актов, аргументированных высказываний и оценочной лексики. Данный факт подтверждает положение современной психолингвистики о том, что билингвизм влияет не только на языковую компетенцию, но и на организацию когнитивных процессов, лежащих в основе речевой деятельности [Караулов, 2010; 58].

Следует отметить, что проведенное исследование имеет ряд ограничений. Основное внимание было сосредоточено на сравнительном анализе узбекского и русского языков в условиях современного билингвизма, тогда как возрастные, региональные и профессиональные особенности речевого поведения требуют отдельного изучения. Кроме того, анализ преимущественно основывался на качественной интерпретации языкового материала. Перспективным направлением дальнейших исследований представляется проведение психолингвистических экспериментов с использованием методов анкетирования, ассоциативного эксперимента, корпусной лингвистики и компьютерного анализа речевых данных. Это позволит получить статистически подтвержденные результаты и расширить представления о механизмах формирования гендерной коммуникации в современных условиях.

Таким образом, обсуждение результатов позволяет сделать вывод, что гендерная специфика узбекского и русского языков представляет собой динамичную систему, формирующуюся под влиянием языковой структуры, национальной культуры, билингвизма и цифровизации общества. Полученные результаты расширяют существующие представления о психолингвистических механизмах гендерной коммуникации и могут служить теоретической основой для дальнейших исследований в области гендерной лингвистики, психолингвистики, межкультурной коммуникации и методики преподавания языков. Данные выводы обладают не только теоретической, но и практической значимостью, поскольку могут быть использованы при разработке учебных программ, совершенствовании технологий обучения русскому и узбекскому языкам, а также при подготовке специалистов, работающих в условиях многоязычной и поликультурной среды.

Заключение

Проведенное исследование позволило комплексно проанализировать особенности языковой репрезентации гендера в узбекском и русском языках с позиций современной психолингвистики и гендерной лингвистики. Полученные результаты свидетельствуют о том, что процессы формирования гендерно обусловленного речевого поведения определяются не только структурой языка, но и национально-культурными традициями, особенностями языкового сознания, социальными нормами и условиями функционирования билингвальной личности.

В ходе исследования установлено, что русский язык, обладая развитой системой грамматического рода, обеспечивает эксплицитное выражение гендерной принадлежности на морфологическом уровне. В отличие от него узбекский язык не содержит категории грамматического рода, однако успешно компенсирует ее отсутствие за счет использования лексических, прагматических и контекстуальных средств. Это подтверждает положение о том, что способы языковой репрезентации гендера определяются не только грамматической организацией языка, но и национальными особенностями коммуникативной культуры.

Сравнительный анализ показал, что традиционные модели речевого поведения мужчин и женщин в узбекской и русской лингвокультурах обладают как универсальными, так и национально обусловленными характеристиками. Для узбекской коммуникативной культуры наиболее значимыми являются уважительное отношение к собеседнику, развитая система речевого этикета, ориентация на сохранение социальной гармонии и коллективистские ценности. Русская коммуникативная традиция характеризуется большей степенью эксплицитности, эмоциональной выразительности и вариативности языковых средств. Вместе с тем современные процессы глобализации и цифровизации способствуют постепенному сближению коммуникативных моделей представителей различных социальных групп.

Особое значение имеют результаты исследования билингвальной языковой личности. Установлено, что переключение между узбекским и русским языками сопровождается изменением коммуникативных стратегий, способов выражения вежливости, эмоциональной оценки и социальной дистанции. Данное явление подтверждает взаимосвязь языка, мышления и культурной среды, являющуюся одной из ключевых идей современной психолингвистики.

Исследование также показало, что развитие цифровых технологий оказывает существенное влияние на трансформацию гендерной коммуникации. Распространение социальных сетей, мессенджеров и цифровых образовательных платформ способствует формированию новых моделей речевого поведения, характеризующихся высокой динамичностью, мультимодальностью и универсализацией коммуникативных средств. При этом национально-культурные особенности не исчезают, а приобретают новые формы языкового выражения в цифровом дискурсе.

Перспективы дальнейших исследований связаны с проведением экспериментальных психолингвистических исследований гендерной коммуникации, созданием электронных корпусов узбекской и русской речи, изучением особенностей речевого поведения представителей различных возрастных и профессиональных групп, а также исследованием влияния искусственного интеллекта и цифровых технологий на развитие современных коммуникативных практик.

Таблица 1

Сопоставительная характеристика гендерной репрезентации в узбекском и русском языках

Критерий сравнения	Узбекский язык	Русский язык
Грамматическая категория рода	Отсутствует	Развита система мужского, женского и среднего рода
Выражение гендерной принадлежности	Лексические, контекстуальные и прагматические средства	Грамматические и лексические средства
Личные местоимения	u («он/она») не различает пол	«он», «она» разграничивают пол
Речевой этикет	Доминируют уважительные обращения (aka, opa, ota, ona)	Преобладают имя-отчество и официальные обращения
Коммуникативные стратегии	Косвенность, вежливость, сохранение гармонии общения	Более высокая степень прямоты и экспрессивности
Влияние цифровой среды	Усиление универсальных моделей общения при сохранении национальных традиций	Рост нейтральных и унифицированных моделей коммуникации

XITOY TILIDAGI TURG‘UN BIRIKMALARNING SEMANTIK TUZILISHI: YUZAKI VA HAQIQIY MA’NO QATLAMLARI TAHLILI

Badalbaev Dilshod Farxod o‘g‘li
Toshkent davlat sharqshunoslik universiteti tayanch doktoranti
E-mail: dilixiade@gmail.com
ORCID: https://orcid.org/0000-0002-8120-2960

Annotatsiya: *Mazkur maqolada xitoy tilidagi turg‘un birikmalar (xiguanyongyu 习惯用语)ning semantik tuzilishi ikki asosiy qatlam — yuzaki ma’no va haqiqiy ma’no — nuqtai nazaridan tahlil qilinadi. Xitoy tilshunosligidagi turli ilmiy yondashuvlar (Sun Weizhang, Wen Duanzheng, Fu Huaiqing, Liu Shuxin, Jia Yande) qiyosiy tarzda ko‘rib chiqilib, ularning umumiy nazariy negizga ega ekanligi asoslanadi. Tadqiqot natijasida turg‘un birikmalarning haqiqiy ma’nosi ikki komponentdan — asosiy ma’no va qo‘shimcha ma’no (semantik tus)dan — tashkil topishi aniqlanadi hamda semantik tusning olti turi (emotsional, munosabat, baholovchi, obrazli, uslubiy, registr) zamonaviy audiovizual korpus misollari asosida yoritiladi. Tadqiqot xitoy-o‘zbek qiyosiy frazeologiyasi va tarjimashunosligi uchun amaliy ahamiyatga ega.*

Kalit so‘zlar: *xiguanyongyu, turg‘un birikma, yuzaki ma’no, haqiqiy ma’no, semantik tus, asosiy ma’no, qo‘shimcha ma’no, chengyu, guanyongyu, kognitiv semantika.*

СЕМАНТИЧЕСКАЯ СТРУКТУРА УСТОЙЧИВЫХ СОЧЕТАНИЙ КИТАЙСКОГО ЯЗЫКА: АНАЛИЗ СЛОЁВ ПОВЕРХНОСТНОГО И ДЕЙСТВИТЕЛЬНОГО ЗНАЧЕНИЯ

Аннотация: *В статье анализируется семантическая структура устойчивых сочетаний китайского языка (xiguanyongyu) с точки зрения двух основных слоёв — поверхностного и действительного значения. Рассматриваются подходы ведущих китайских лингвистов и устанавливается, что действительное значение состоит из основного значения и дополнительного значения (семантической окраски), выделяются шесть типов семантической окраски на материале современного аудиовизуального корпуса.*

Ключевые слова: *xiguanyongyu, устойчивое сочетание, поверхностное значение, действительное значение, семантическая окраска, когнитивная семантика.*

THE SEMANTIC STRUCTURE OF CHINESE FIXED EXPRESSIONS: AN ANALYSIS OF THE SURFACE AND REAL MEANING LAYERS

Abstract: *This article analyzes the semantic structure of Chinese habitual expressions (xiguanyongyu) through two fundamental layers — surface meaning and real meaning. Comparative approaches by leading Chinese linguists (Sun Weizhang, Wen Duanzheng, Fu Huaiqing, Liu Shuxin, Jia Yande) are examined, demonstrating their shared theoretical foundation. The study establishes that the real meaning of these units consists of a rational (core) meaning and an additional semantic tint, and identifies six types of semantic tint (emotional, attitudinal, evaluative, imagistic, stylistic, and register) illustrated with examples from a modern audiovisual corpus. The findings hold practical value for Chinese–Uzbek comparative phraseology and translation studies.*

Keywords: *xiguanyongyu, fixed expression, surface meaning, real meaning, semantic tint, rational meaning, additional meaning, chengyu, guanyongyu, cognitive semantics.*

Kirish

Til boyligining muhim qismini tashkil etuvchi turg‘un birikmalar nafaqat lisoniy, balki madaniy-kognitiv hodisa sifatida ham tilshunoslar e’tiborini tortadi. Xitoy tilida bunday birliklarning alohida, keng tarqalgan turkumini xiguanyongyu (习惯用语) tashkil etadi — bu birliklar chengyu, guanyongyu kabi an’anaviy frazeologik toifalarga qaraganda kamroq o‘rganilgan bo‘lib, ularning semantik tuzilishini tizimli tahlil qilish dolzarb ilmiy vazifa hisoblanadi.

Xitoy tilshunosligida turg‘un birikmalarning semantik tuzilishi an’anaviy ravishda ikki qatlamli model asosida tavsiflanadi, biroq turli olimlar bu qatlamlarni turlicha atash va tasniflashga harakat qilishgan. Ushbu maqolaning maqsadi — mazkur yondashuvlarni qiyosiy tahlil qilish, ularning umumiy nazariy negizini aniqlash hamda turg‘un birikmalarning

haqiqiy ma’nosi ichidagi qo‘shimcha semantik komponentlar (semantik tus)ning tipologiyasini zamonaviy korpus materiali asosida yoritishdir.

Tadqiqot metodologiyasi

Tadqiqotda tavsiflash, qiyosiy-tipologik va komponent tahlili metodlaridan foydalanildi. Amaliy misollar sifatida 2023-yilda suratga olingan **去有**风的地方 (“Meet Yourself”) nomli zamonaviy xitoy teleserialining dialoglaridan iqtibos keltirildi — bu esa xiguanyongyularning haqiqiy og‘zaki nutqdagi qo‘llanilishini ko‘rsatish imkonini beradi.

1. Yuzaki ma’no va haqiqiy ma’no qatlamlari

Xitoy tilidagi turg‘un birliklarning semantik tuzilishini o‘rganishda ma’noning ikki qatlamli tizimi alohida ilmiy ahamiyat kasb etadi. Xitoy tilshunosligining yetakchi vakillaridan biri 孙维张 Sun Weizhang o‘zining 《汉语熟语学》 (Hanyu shuyuxue) asarida turg‘un birikmalarning semantik tabiatini izohlash uchun “语表意义” (yubiao yiyi — tashqi, komponentlar yig‘indisiga asoslangan ma’no) va “语位意义” (yuwei yiyi — til tizimida shakllangan, idiomatik haqiqiy ma’no) tushunchalarini ilgari suradi [1].

Ushbu ikki qatlamli modelni quyidagi chengyu misolida kuzatish mumkin: **猫鼠同眠** (mao shu tong mian) — so‘zma-so‘z “mushuk va sichqon birga uxlaydi”. Yuzaki ma’no darajasida bu ibora hayvonlarning birga uxlashini bildirsa, haqiqiy ma’no darajasida u huquqni muhofaza qiluvchi shaxslarning jinoyatchilar bilan til biriktirishini ifodalovchi majoziy mazmun kasb etadi.

E’tiborlisi shundaki, ushbu ikki qatlamli tuzilma faqat nazariy konstruksiya bo‘lib qolmay, psixolingvistik eksperimental tadqiqotlar orqali ham tasdiqlangan. 张积家 Zhang Jijia va **石**艳彩 Shi Yancai o‘tkazgan tadqiqotda guanyongyularning ongda saqlanishi uch model — yaxlit, komponentli va aralash — asosida tekshirilib, natijalar bu birliklarning aralash (gibrid) reprezentatsiyaga ega ekanligini ko‘rsatgan [2].

2. Haqiqiy ma’noning ichki tuzilishi: asosiy ma’no va semantik tus

Turg‘un birliklarning haqiqiy ma’nosini yanada chuqurroq tahlil qilishda uning ichki tarkibini aniqlash muhim ahamiyat kasb etadi. **温端政** Wen Duanzheng 《汉语语汇学教程》 asarida haqiqiy ma’noni asosiy ma’no (**理性**义, lixingyi) va semantik tus (**附加**义, fujiayi)ga ajratadi: birinchisi birlikning markaziy, obyektiv mazmuni bo‘lsa, ikkinchisi nutqiy vaziyat va subyektiv hissiyotlar orqali yuklanadigan qo‘shimcha qatlamdir [3].

Mazkur ikki komponentli yondashuv boshqa yetakchi xitoy tilshunoslari tomonidan ham qo‘llab-quvvatlanadi. **符淮青** Fu Huaiqing 《现代汉语词汇》 asarida so‘z ma’nosini konseptual ma’no (**概念**义) va qo‘shimcha ma’no (**附属**义)ga ajratadi [4]; **刘叔新** Liu Shuxin 《汉语描写词汇学》 asarida ratsional ma’no va emotsional ma’no farqini ilgari suradi [5]; 贾彦德 Jia Yande esa 《汉语语义学》 asarida ma’no birliklarining bir yoki ko‘p qatlamli bo‘lishi mumkinligini asoslaydi [6].

Ushbu to‘rt yondashuvni qiyosiy tahlil qilganda, terminologik farqlarga qaramay, ularning barchasi mazmunan bir xil ikki komponentli modelga — obyektiv-markaziy ma’no va unga qo‘shiladigan subyektiv-qo‘shimcha qatlam — borib taqalishi kuzatiladi (1-jadvalga qarang).

1-jadval. Turg‘un birliklarning haqiqiy ma’nosi tuzilishiga oid ilmiy yondashuvlar qiyosi

Muallif	Asosiy (obyektiv) ma’no	Qo‘shimcha (subyektiv) ma’no	Manba
Wen Duanzheng	**理性**义 (lixingyi)	**附加**义 (fujiayi)	[3]
Fu Huaiqing	**概念**义 (gainianyi)	**附属**义 (fushuyi)	[4]
Liu Shuxin	ratsional ma’no	emotsional ma’no	[5]
Jia Yande	asosiy (yagona qatlam)	qo‘shimcha komponent	[6]

Jadvaldan ko‘rinib turibdiki, tilshunoslar tomonidan qo‘llanilgan atamalar shakl jihatidan har xil bo‘lsa-da, ularning barchasi bir xil kognitiv-semantik ikkilik — obyektiv borliqni aks ettiruvchi markaziy ma’no va unga subyektiv omillar orqali yuklanadigan ikkilamchi qatlam — asosida quriladi. Bu esa xitoy tilshunosligida mazkur nazariy model naqadar barqaror va keng tan olinganligidan dalolat beradi.

3. Semantik tusning tipologiyasi

刘叔新 Liu Shuxinning tasnifiga asoslanib, **常玉**钟 Chang Yuzhong registr tusini ham qo‘shgan holda turg‘un birikmalarning qo‘shimcha ma’nolarini olti turga ajratadi [7]. Quyida ushbu tiplarning har biri qisqacha izohlanib, zamonaviy audiovizual korpusdan olingan amaliy misol bilan dalillanadi.

Emotsional tus — birlik ifodalagan vaziyatga nisbatan insonning ichki hissiy reaksiyasini bildiradi. Masalan: **心浮气躁** (xin fu qi zao) — “beqaror, tez tashvishlanadigan kayfiyat” [8].

Munosabat tusi — muayyan shaxs yoki hodisaga nisbatan subyektiv munosabatni ifodalaydi. Masalan: **她偏心** (ta pianxin) — “bir tomonga moyillik, adolatsiz munosabat” [9].

Baholovchi tus — ijobiy yoki salbiy subyektiv bahoni bildiradi. Masalan: **你**简直一无是处 (ni jianzhi yiwushichu) — salbiy baho; 帅气逼人，风度翻翻 — ijobiy baho [10].

Obrazli tus — vaziyatni metaforik tarzda tasvirlaydi. Masalan: 这就好比蚊子飞进蜜蛛网里 (zhe jiu haobi wenzi feijin zhizhuwang li) — “chivin oʻrgimchak toʻriga tushib qolgandek” [11].

Uslubiy tus — birlikning ogʻzaki yoki yozma nutqqa xosligini belgilaydi.

Registr tusi — nutqning rasmiylik darajasi va kommunikativ muhitini ifodalaydi.

Yuqoridagi tasnif shuni koʻrsatadiki, xiguanyongyularning asosiy ma’nosi nisbatan barqaror boʻlsa-da, ularga qoʻshiladigan semantik tus xilma-xil boʻlib, aynan shu xilma-xillik ushbu birliklarning yuqori ekspressivligi va ogʻzaki nutqdagi mahsuldorligini ta’minlaydi.

Xulosa

Oʻtkazilgan tahlil shuni koʻrsatdiki, xitoy tilidagi turgʻun birikmalarning semantik tuzilishi ikki bosqichli iyerarxiyaga ega: birinchi bosqichda yuzaki ma’no va haqiqiy ma’no farqlanadi, ikkinchi bosqichda esa haqiqiy ma’noning oʻzi asosiy ma’no va semantik tusga boʻlinadi. Turli xitoy tilshunoslari tomonidan taklif etilgan terminologik farqlarga qaramay (yubiao/yuwei, lixingyi/fujiayi, ratsional/emotsional), ularning barchasi mohiyatan bir xil kognitiv-semantik modelni tasvirlaydi. Semantik tusning olti turga (emotsional, munosabat, baholovchi, obrazli, uslubiy, registr) boʻlinishi esa xiguanyongyularning nutqiy funksiyalarini tizimli tavsiflash imkonini beradi. Ushbu natijalar xitoy-oʻzbek qiyosiy frazeologiyasi, xususan tarjima amaliyotida turgʻun birikmalarning pragmatik nozikliklarini toʻgʻri yetkazishda amaliy ahamiyat kasb etadi.

FRAZEOLOGIK BIRLIKLARNING O‘ZBEK VA INGLIZ TILLARIDAGI LAKUNARLIK HOLATI

Baxtiyorova Gulhayo Shavkatjon qizi
Is’hoqxon Ibrat nomidagi Namangan davlat chet tillari instituti tayanch doktoranti
E-mail: gulhayo120bb@gmail.com

Annotatsiya: *Mazkur maqolada o‘zbek va ingliz tillaridagi frazeologik birliklarning lakunarlik holati qiyosiy-semantik yondashuv asosida tadqiq etiladi. Frazeologik birliklarning to‘liq ekvivalent, qisman ekvivalent, funksional analog va lakunar ko‘rinishlari o‘zaro farqlanib, ularning semantik, obrazli, pragmatik hamda lingvomadaniy xususiyatlari tahlil qilinadi. Tadqiqotda ingliz va o‘zbek tillaridagi aniq frazeologik birliklar misolida bir xil yoki yaqin ma’noning turli obrazlar vositasida ifodalanishi, ayrim hollarda esa bir tildagi barqaror birikmaning ikkinchi tilda to‘liq frazeologik muqobilga ega emasligi yoritiladi. Lakunarlikning yuzaga kelishida milliy turmush tarzi, tarixiy-madaniy tajriba, urf-odatlar, ijtimoiy munosabatlar va konseptual metaforalarning o‘rni ko‘rsatib beriladi. Shuningdek, lakunar frazeologik birliklarni tarjima qilishda funksional analog, tavsifiy tarjima, kontekstual almashtirish va kompensatsiya kabi usullarning ahamiyati asoslanadi. Tadqiqot natijalari frazeologik lakunarlikni oddiy ekvivalentsizlik emas, balki tillarning milliy-madaniy va obrazli tafakkuridagi farqlarni namoyon etuvchi murakkab lingvistik hodisa sifatida baholash zarurligini ko‘rsatadi.*

Kalit so‘zlar: *frazeologik birlik, lakunarlik, frazeologik lakuna, ekvivalentlik, qisman ekvivalentlik, funksional analog, qiyosiy-semantik tahlil, lingvomadaniyat, tarjima, obrazlilik.*

ЛАКУНАРНОСТЬ ФРАЗЕОЛОГИЧЕСКИХ ЕДИНИЦ В УЗБЕКСКОМ И АНГЛИЙСКОМ ЯЗЫКАХ

Аннотация: *В статье исследуется явление лакунарности фразеологических единиц в узбекском и английском языках на основе сравнительно-семантического подхода. Разграничиваются полные эквиваленты, частичные эквиваленты, функциональные аналоги и лакунарные фразеологические единицы, анализируются их семантические, образные, прагматические и лингвокультурные особенности. На конкретных примерах английской и узбекской фразеологии показано, что одинаковое или близкое значение может выражаться посредством различных национально обусловленных образов, а в отдельных случаях устойчивая единица одного языка не имеет полноценного фразеологического соответствия в другом языке. Особое внимание уделяется роли национального образа жизни, историко-культурного опыта, традиций, социальных отношений и концептуальных метафор в формировании фразеологической лакунарности. Рассматриваются также функциональная аналогия, описательный перевод, контекстуальная замена и компенсация как способы передачи лакунарных единиц. Полученные результаты позволяют рассматривать фразеологическую лакунарность не как простое отсутствие эквивалента, а как сложное лингвистическое явление, отражающее различия в национально-культурной и образной концептуализации действительности.*

Ключевые слова: *фразеологическая единица, лакунарность, фразеологическая лакуна, эквивалентность, частичная эквивалентность, функциональный аналог, сравнительно-семантический анализ, лингвокультура, перевод, образность.*

LACUNARITY OF PHRASEOLOGICAL UNITS IN UZBEK AND ENGLISH

Abstract: *This article investigates the lacunarity of phraseological units in Uzbek and English through a comparative-semantic approach. Full equivalents, partial equivalents, functional analogues, and lacunar phraseological units are distinguished, while their semantic, figurative, pragmatic, and linguocultural characteristics are examined. Using specific examples from English and Uzbek phraseology, the study demonstrates that identical or closely related meanings may be expressed through different culturally conditioned images, whereas in some cases a fixed expression in one language has no complete phraseological equivalent in the other. Particular attention is paid to the role of national lifestyles, historical and cultural experience, traditions, social relations, and conceptual metaphors in the emergence of phraseological lacunarity. The study also considers functional analogy, descriptive translation, contextual substitution, and compensation as major strategies for rendering lacunar phraseological units. The findings indicate that phraseological lacunarity should be interpreted not merely as the absence of an equivalent, but as a complex linguistic phenomenon reflecting differences in national-cultural and figurative conceptualization.*

Keywords: *phraseological unit, lacunarity, phraseological lacuna, equivalence, partial equivalence, functional analogue, comparative-semantic analysis, linguoculture, translation, figurativeness.*

KIRISH

Til xalqning tarixiy tajribasi, dunyoqarashi, milliy tafakkuri va madaniy qadriyatlarini oʻzida mujassam etuvchi murakkab ijtimoiy hodisadir. Til tizimida frazeologik birliklar alohida oʻrin egallaydi, chunki ular oddiy nominativ birliklardan farqli ravishda muayyan xalqning hayot tarzi, urf-odatlari, stereotiplari, baholash mezonlari va obrazli tafakkurini yorqin aks ettiradi. Shu jihatdan ingliz va oʻzbek tillaridagi frazeologik birliklarni qiyosiy oʻrganish nafaqat lingvistik, balki lingvomadaniy va tarjimashunoslik nuqtayi nazaridan ham muhim ahamiyat kasb etadi.

Turli tillarga mansub frazeologik tizimlar oʻrtasidagi munosabatni tadqiq etishda ekvivalentlik bilan bir qatorda lakunarlik hodisasi ham muhim ilmiy muammo sifatida namoyon boʻladi. Lakunarlik muayyan til yoki madaniyatda mavjud boʻlgan tushuncha, obraz, vaziyat yoxud baholash modelining boshqa tilda aynan mos til birligi bilan ifodalanmasligi holatini anglatadi. Frazeologik birliklar doirasida esa ushbu hodisa yanada murakkab tus oladi, chunki frazeologizmlarning semantik mazmuni koʻpincha ularning tarkibidagi alohida soʻzlar ma’nosi bilan cheklanmaydi, balki tarixiy-madaniy tajriba, milliy assotsiatsiya, metaforik model hamda pragmatik vaziyat bilan bogʻliq holda shakllanadi.

Oʻzbek va ingliz tillari turli til oilalariga mansubligi, tarixiy taraqqiyot yoʻllari hamda madaniy muhitining oʻziga xosligi sababli ularning frazeologik fondida sezilarli farqlar mavjud. Masalan, oʻzbek frazeologiyasida qarindoshlik munosabatlari, mehmondoʻstlik, mahalla muhiti, milliy turmush tarzi, sharqona odob-axloq hamda jamoaviylikni aks ettiruvchi birliklar faol uchrasa, ingliz frazeologiyasida individual faoliyat, dengizchilik, savdo-sotiq, sport, tarixiy institutlar va Gʻarb madaniyatiga xos obrazlar bilan bogʻliq iboralar keng qoʻllanadi. Natijada bir tilda mavjud boʻlgan ayrim frazeologik birlik uchun ikkinchi tilda toʻliq semantik va obrazli ekvivalent topilmasligi mumkin. Bunday holat frazeologik lakuna sifatida namoyon boʻlib, tarjima jarayonida tavsifiy tarjima, funksional analog, kontekstual almashtirish yoki izohlash kabi strategiyalardan foydalanishni talab etadi.

Frazeologik lakunarlik faqat til birliklarining formal jihatdan mos kelmasligi bilan belgilanmaydi. U semantik, obrazli, pragmatik va lingvomadaniy tafovutlar bilan ham bogʻliqdir. Ayrim hollarda ikki tilda bir xil yoki yaqin mazmun mavjud boʻlsa-da, uni ifodalovchi metaforik asos turlicha boʻladi. Boshqa vaziyatlarda esa muayyan frazeologizm orqali ifodalangan tushuncha ikkinchi til vakillari uchun madaniy jihatdan begona boʻlishi yoki maxsus izoh talab qilishi mumkin. Demak, frazeologik lakunalarni aniqlashda faqat lugʻaviy ma’noni qiyoslash yetarli emas; birlikning konnotativ semantikasi, obrazli motivatsiyasi, pragmatik vazifasi va madaniy komponentini ham hisobga olish lozim.

Bugungi globallashuv, madaniyatlararo muloqot va tarjima faoliyati kengayib borayotgan sharoitda frazeologik lakunalarni oʻrganish yanada dolzarb ahamiyat kasb etmoqda. Chunki frazeologik birlikni soʻzma-soʻz tarjima qilish koʻpincha uning asl mazmunini buzadi, obrazlilik darajasini pasaytiradi yoki qabul qiluvchi til vakilida notoʻgʻri assotsiatsiya yuzaga keltiradi. Ayniqsa, badiiy matn, publitsistik diskurs, ommaviy axborot vositalari va kundalik muloqotdagi frazeologizmlarni tarjima qilishda milliy-madaniy xususiyatlarni e’tiborga olish tarjimaning semantik aniqligi va kommunikativ samaradorligini ta’minlovchi muhim omillardan biridir.

Shu nuqtayi nazardan, ingliz va oʻzbek tillaridagi frazeologik birliklarning lakunarlik holatini qiyosiy tahlil qilish, ularning semantik hamda lingvomadaniy xususiyatlarini aniqlash, toʻliq ekvivalentga ega boʻlmagan birliklarning yuzaga kelish sabablarini tavsiflash va ularni tarjimada qayta ifodalash usullarini belgilash muhim ilmiy vazifalardan hisoblanadi. Mazkur tadqiqotning maqsadi ingliz va oʻzbek tillaridagi frazeologik birliklar misolida lakunarlik hodisasining namoyon boʻlish xususiyatlarini aniqlash, ularni semantik, obrazli va lingvomadaniy mezonlar asosida tasniflash hamda ikki til oʻrtasidagi frazeologik nomuvofiqliklarning asosiy sabablarini ochib berishdan iborat.

Tadqiqot davomida frazeologik birliklarning toʻliq ekvivalentligi, qisman ekvivalentligi, funksional analogligi va lakunar holatlari oʻzaro farqlanib, ayniqsa, milliy-madaniy komponenti kuchli birliklarning qiyosiy tavsifiga alohida e’tibor qaratiladi. Bunday yondashuv ingliz va oʻzbek frazeologik tizimlarining umumiy hamda milliy xususiyatlarini chuqurroq yoritish bilan birga, tarjimashunoslik, qiyosiy tilshunoslik va lingvomadaniyatshunoslik yoʻnalishlarida olib borilayotgan tadqiqotlar uchun ham nazariy va amaliy ahamiyatga ega boʻlishi mumkin.

MAVZUGA OID ADABIYOTLAR TAHLILI

Frazeologik birliklarning milliy-madaniy xususiyatlari, ularning tillararo ekvivalentligi va tarjimada yuzaga keladigan semantik nomuvofiqliklar zamonaviy qiyosiy tilshunoslik hamda tarjimashunoslikning dolzarb yoʻnalishlaridan biri hisoblanadi. Frazeologizmlarning semantik jihatdan yaxlitligi, komponentlar ma’nosining koʻpincha umumiy frazeologik mazmun bilan bevosita mos kelmasligi hamda ularning muayyan madaniyatga bogʻlanganligi bir tildagi frazeologik birlikni boshqa tilda aynan qayta ifodalashni murakkablashtiradi. Shu sababli frazeologik ekvivalentlik bilan bir qatorda frazeologik lakunarlik masalasini oʻrganish qiyosiy tadqiqotlarda alohida ahamiyat kasb etmoqda.

C. Fernando idiomatik birliklarni semantik jihatdan tarkibiy qismlarining oddiy yigʻindisiga tenglashtirib boʻlmaydigan turgʻun birliklar sifatida tavsiflab, idiomatiklikning turli darajalarda namoyon boʻlishini koʻrsatadi [1]. Mazkur qarash frazeologik lakunalarni aniqlash uchun ham muhimdir, chunki ikki tilda alohida komponentlar leksik ekvivalentlarga ega boʻlsa-da, yaxlit iboraning obrazli va pragmatik ma'nosi mos kelmasligi mumkin.

M. Baker frazeologik birliklarni tarjima qilishdagi asosiy muammolar qatorida tarjima tilida mos ekvivalentning mavjud emasligi, shaklan oʻxshash birliklarning boshqa ma'no anglatishi hamda manba tilidagi idioma bilan tarjima tilidagi birlikning qoʻllanish sharoiti farqlanishini koʻrsatadi [2]. Ushbu yondashuv lakunarlikni faqat "tarjima ekvivalenti yoʻqligi" sifatida emas, balki semantik, uslubiy va pragmatik mos kelmasliklarning murakkab majmui sifatida baholash zarurligini koʻrsatadi.

Frazeologik birliklarni tarjima qilish masalasiga bagʻishlangan xalqaro tadqiqotlarda ham ekvivalentni aniqlash tarjimaning muhim bosqichi sifatida e'tirof etilgan. V. Subbotina frazeologik birlikning umumiy ma'nosi uning alohida komponentlari ma'nosidan kelib chiqmasligi sababli bunday birliklarni tarjima qilish murakkabligini koʻrsatadi [3]. Muallif kontekst, frazeologik lugʻatlar va madaniy bilimning tarjimon uchun alohida ahamiyatini ta'kidlaydi.

Soʻnggi tadqiqotlarda lakuna tushunchasi leksik birlik doirasidan kengroq — semantik va lingvomadaniy hodisa sifatida talqin qilinmoqda. J. E. Usarov va hammualliflar oʻzbek tilidagi lakunalarni oʻrganar ekan, ularni bir tilda mavjud birlik yoki tushunchaning boshqa tilda bevosita ekvivalentga ega boʻlmasligi bilan bogʻlaydi [4]. Tadqiqotda bunday nomuvofiqliklar xalqning madaniy tajribasi, ijtimoiy munosabatlari va konseptual kategoriyalash tizimi bilan izohlanadi.

Frazeologik birliklarning madaniyat bilan bogʻliqligini tasdiqlovchi tadqiqotlar boshqa til juftliklarida ham mavjud. Nemis va oʻzbek idiomalarini qiyosiy oʻrganishga bagʻishlangan tadqiqotda frazeologik birliklar lingvomadaniy hamda konseptual metafora nuqtayi nazaridan tahlil qilinib, bir xil yoki yaqin tushunchalarning turli obrazlar orqali konseptuallashishi koʻrsatiladi [5]. Bu holat frazeologik lakunarlikning shakllanishida konseptual metaforalarning milliy xususiyati muhim omil ekanini tasdiqlaydi.

Oʻzbek tilshunosligida frazeologik birliklarni tizimli oʻrganishda Sh. Rahmatullayevning tadqiqotlari alohida oʻrin tutadi. Olim oʻzbek frazeologiyasidagi koʻp ma'nolilik, sinonimiya, antonimiya, omonimiya va variantlilik hodisalarini keng faktik material asosida tahlil qilgan [6]. Uning frazeologik birliklarning variantlashuvi va semantik yaxlitligiga oid qarashlari oʻzbek frazemalarini ingliz tilidagi muqobillari bilan qiyoslashda muhim nazariy asosdir.

A. E. Mamatov ham oʻzbek frazeologiyasining struktur-semantik xususiyatlari, frazeologik ma'no hamda iboralarning milliy tabiati masalalarini keng yoritgan [7]. Oʻzbek frazeologik fondining milliy-madaniy mazmuni ayniqsa urf-odat, kundalik turmush, insonlararo munosabat, qarindoshlik va axloqiy baholash bilan bogʻliq frazemalarda yaqqol namoyon boʻladi.

Ingliz va oʻzbek frazeologik birliklarini bevosita qiyoslashga bagʻishlangan tadqiqotlarda ham struktur hamda semantik nomuvofiqliklar qayd etilgan. M. Usarova ingliz va oʻzbek tillaridagi substantiv frazeologik birliklarni qiyoslab, ularning tarkibiy modellari, ekspressiv boʻyoqdorligi hamda grammatik tashkil topishida oʻxshash va farqli jihatlar mavjudligini koʻrsatadi [8].

S. Xudoyorova ingliz va oʻzbek frazeologik birliklarining tarjima strategiyalarini tahlil qilib, toʻliq ekvivalent, qisman ekvivalent, funksional almashtirish, parafraza va kompensatsiya kabi usullarni farqlaydi [9]. Bu tasnif lakunar birliklarni aniqlashda ham qoʻllanishi mumkin: agar manba tilidagi frazeologizm uchun tarjima tilida na obraz, na struktur, na toʻliq semantik jihatdan mos ibora mavjud boʻlsa, tarjimon funksional analog yoki tavsifiy ifodaga murojaat qiladi.

Mavjud tadqiqotlarni umumlashtirish shuni koʻrsatadiki, ingliz va oʻzbek frazeologiyasi struktur-semantik, lingvomadaniy hamda tarjimashunoslik jihatlaridan oʻrganilgan boʻlsa-da, aynan frazeologik lakunalarni maxsus qiyosiy birlik sifatida aniqlash, ularni lakunarlik darajasiga koʻra tasniflash va yuzaga kelish omillarini tizimli ravishda tavsiflash masalasi hali ham chuqur tadqiq etishni talab qiladi. Shu sababli mazkur tadqiqotda ingliz va oʻzbek frazeologik birliklari toʻliq ekvivalent, qisman ekvivalent, funksional analog va lakunar birliklar sifatida ajratilib, lakunar birliklar semantik, obrazli, lingvomadaniy va pragmatik koʻrsatkichlar asosida tahlil qilinadi.

TADQIQOT METODOLOGIYASI

Mazkur tadqiqotda qiyosiy-semantik tahlil metodi asosiy metod sifatida qoʻllanildi. Ushbu metod ingliz va oʻzbek tillaridagi frazeologik birliklarni ularning semantik mazmuni, obrazli asosi, milliy-madaniy komponenti va tarjimadagi muqobilligi nuqtayi nazaridan oʻzaro qiyoslash imkonini beradi. Tadqiqot materiallari ingliz va oʻzbek tillarining izohli hamda frazeologik lugʻatlari, badiiy matnlar va zamonaviy nutqiy manbalardan tanlab olindi.

Tahlil jarayonida frazeologik birliklar, avvalo, ifodalagan umumiy ma'nosi boʻyicha qiyoslandi. Shundan soʻng ularning ikkinchi tilda mavjud muqobili semantik va obrazli jihatdan tekshirildi. Qiyoslash natijasida birliklar toʻliq ekvivalent, qisman ekvivalent, funksional analog va lakunar frazeologik birlik guruhlariga ajratildi. Bunda toʻliq ekvivalent birliklarda umumiy ma'no, pragmatik vazifa va obrazli asosning yuqori darajada mosligi; qisman ekvivalentlarda esa ma'no yaqin boʻlsa-da, obraz yoki strukturadagi farqlar asosiy mezon sifatida olindi. Funksional analoglarda bir xil kommunikativ maqsad turli lingvistik vositalar orqali ifodalangan holatlar hisobga olindi.

Frazeologik birlik uchun ikkinchi tilda uning semantik, obrazli va pragmatik xususiyatlarini bir vaqtning o‘zida aks ettiruvchi barqaror muqobil mavjud bo‘lmagan holatlar frazeologik lakunarlik sifatida belgilandi. Lakunar birliklarni tahlil qilishda ularning paydo bo‘lishiga sabab bo‘luvchi milliy urf-odat, tarixiy tajriba, turmush tarzi, ijtimoiy munosabat va madaniy assotsiatsiyalar ham e’tiborga olindi.

Qiyosiy-semantik tahlil davomida har bir frazeologik birlik uchun denotativ ma’no, konnotativ ma’no, obrazli komponent, pragmatik vazifa va milliy-madaniy belgi kabi mezonlar asosida tavsif berildi. Shu tariqa ingliz va o‘zbek tillaridagi frazeologik lakunarlik faqat lug‘aviy muqobilning yo‘qligi sifatida emas, balki ikki til vakillarining olamni obrazli konseptuallashtirishidagi farqlarni aks ettiruvchi lingvomadaniy hodisa sifatida tahlil qilindi.

Mazkur metod tadqiqotda frazeologik birliklar o‘rtasidagi umumiylik va farqlarni tizimli ravishda aniqlash, lakunar holatlarning yuzaga kelish sabablarini izohlash hamda ularning tarjimada qanday kompensatsiya qilinishini belgilash imkonini berdi.

TAHLIL VA NATIJALAR

Ingliz va o‘zbek tillaridagi frazeologik birliklarni qiyosiy-semantik jihatdan tahlil qilish shuni ko‘rsatadiki, ikki tilda bir xil kommunikativ vazifani bajaruvchi iboralar mavjud bo‘lsa-da, ularning semantik tuzilishi, obrazli asosi va milliy-madaniy motivatsiyasi ko‘p hollarda o‘zaro farqlanadi. Shu sababli frazeologik birliklarni faqat lug‘aviy tarjima asosida qiyoslash yetarli emas. Ularning denotativ mazmuni, konnotativ bo‘yoqdorligi, pragmatik funksiyasi va obraz yaratish mexanizmi ham hisobga olinishi lozim.

Tadqiqot doirasida tanlangan frazeologik birliklar to‘rt asosiy guruh bo‘yicha ko‘rib chiqildi: to‘liq ekvivalent birliklar, qisman ekvivalent birliklar, funksional analoglar va lakunar frazeologik birliklar.

1-jadval. Ingliz va o‘zbek tillaridagi frazeologik birliklarning qiyosiy-semantik tavsifi

№	Inglizcha frazeologik birlik	O‘zbekcha muqobil	Ma’nosi	Moslik turi	Izoh
1	to add fuel to the fire	olovga moy sepmoq	Ziddiyat yoki muammoni yanada kuchaytirmoq	To‘liq ekvivalent	Semantika va obraz deyarli bir xil
2	to play with fire	olov bilan o‘ynashmoq	Xavfli ishga qo‘l urmoq	To‘liq ekvivalent	Obraz ham, pragmatik ma’no ham mos
3	to shed crocodile tears	timsoh ko‘z yoshlarini to‘kmoq	Soxta achinish ko‘rsatmoq	To‘liq ekvivalent	Bir xil obrazli asos saqlangan
4	to make a mountain out of a molehill	pashshadan fil yasamoq	Kichik muammoni haddan tashqari kattalashtirmoq	Qisman ekvivalent	Ma’no bir xil, obrazlar turlicha
5	when pigs fly	tuyaning dumi yerga tekkanda	Hech qachon sodir bo‘lmaydigan holat	Funksional analog	Milliy obrazlar mutlaqo farqli
6	to kill two birds with one stone	bir o‘q bilan ikki quyonni urmoq	Bir harakat bilan ikki natijaga erishmoq	Qisman ekvivalent	Struktur va ma’no yaqin, hayvon obrazi farqli
7	the apple of one’s eye	ko‘zining oq-u qorasi	Juda aziz, qadrli inson	Funksional analog	Pragmatik vazifa mos, obraz boshqa
8	to have a skeleton in the closet	yashirin siri bo‘lmoq	Boshqalardan yashiriladigan noxush sirga ega bo‘lmoq	Lakunar / tavsifiy muqobil	O‘zbek tilida ayni obrazli model faol emas
9	to spill the beans	sirni oshkor qilmoq	Sirni fosh etmoq	Lakunar / tavsifiy muqobil	Ingliz tilidagi beans obrazi saqlanmaydi
10	to have a chip on one’s shoulder	alamzada bo‘lmoq / ichida gina saqlamoq	Oldingi ranjish sabab xafa yoki tajovuzkor kayfiyatda yurmoq	Lakunar	Ma’no tavsifiy tarzda beriladi
11	el og‘ziga elak tutib bo‘lmaydi	you cannot stop people from talking	Odamlarning gap-so‘zini butunlay to‘xtatib bo‘lmasligi	Lakunar	O‘zbekcha milliy obraz ingliz tilida tavsifiy beriladi
12	bir yostiqqa bosh qo‘ymoq	to live as husband and wife / to marry	Nikohda birga hayot kechirmoq	Lakunar	O‘zbek madaniyatiga xos obrazli birlik

№	Inglizcha frazeologik birlik	O‘zbekcha muqobil	Ma’nosi	Moslik turi	Izoh
13	ko‘rpasiga qarab oyoq uzatmoq	to live within one’s means	Imkoniyatiga qarab yashamoq	Funksional analog	Semantika bir xil, obraz turlicha
14	do‘ppisini osmonga otmoq	to be overjoyed / to jump for joy	Juda xursand bo‘lmoq	Lakunar / funksional analog	Do‘ppi milliy-madaniy komponent hisoblanadi
15	og‘ziga talqon solmoq	to keep silent / to hold one’s tongue	Gapirmay jim turmoq	Funksional analog	Obraz va komponentlar farqli

Jadvaldagi dastlabki misollar ikki til frazeologik tizimida ayrim umumiy obrazli modellar mavjudligini ko‘rsatadi. Masalan, ingliz tilidagi to add fuel to the fire va o‘zbek tilidagi olovga moy sepmoq birliklari mazmun, metaforik model hamda pragmatik vazifa jihatidan juda yaqin. Har ikkala birlikda ham mavjud ziddiyatni yanada kuchaytirish “olov” va uni kuchaytiruvchi modda orqali ifodalangan. Bunday holatda frazeologik birliklar o‘rtasida yuqori darajadagi ekvivalentlik kuzatiladi.

Xuddi shuningdek, to play with fire – olov bilan o‘ynashmoq juftligida ham xavf bilan bog‘liq universal obraz namoyon bo‘ladi. Olov ko‘plab madaniyatlarda xavf, tahdid va ehtiyotsizlik ramzi sifatida qo‘llanadi. Shu sababli ushbu frazeologik birliklarda nafaqat semantik, balki obrazli moslik ham shakllangan.

Biroq frazeologik birliklarning katta qismida ma’no o‘xshash bo‘lsa-da, uni ifodalash uchun tanlangan obrazlar bir-biridan farq qiladi. Ingliz tilidagi to make a mountain out of a molehill iborasi kichik muammoni keragidan ortiq darajada kattalashtirish ma’nosini bildiradi. O‘zbek tilida ayni mazmun pashshadan fil yasamoq birligi orqali ifodalanadi. Inglizcha birlikda “kichik tepalik – tog‘”, o‘zbekcha birlikda esa “pashsha – fil” qarama-qarshiligi qo‘llangan. Demak, semantik natija bir xil bo‘lsa-da, obrazli mexanizm turlicha.

Yana bir xarakterli holat to kill two birds with one stone va bir o‘q bilan ikki quyonni urmoq birliklarida ko‘zga tashlanadi. Har ikki frazeologizm bitta harakat orqali ikkita maqsadga erishishni anglatadi. Biroq ingliz tilida “two birds”, o‘zbek tilida esa “ikki quyon” obrazi ishlatiladi. Bunday frazeologizmlarni qisman ekvivalent deb baholash mumkin, chunki ularning umumiy semantik yadrosi va sintaktik modeli yaqin, ammo konkret obraz komponentlari aynan mos kelmaydi.

Til va madaniyat o‘rtasidagi munosabat yanada yaqqol when pigs fly – tuyaning dumi yerga tekkanda misolida namoyon bo‘ladi. Har ikkala birlik amalga oshishi mumkin bo‘lmagan yoki nihoyatda ehtimoldan uzoq voqeani bildiradi. Inglizcha frazeologizmda uchayotgan cho‘chqa tasviri absurd vaziyatni yaratadi, o‘zbek tilida esa tuyaning anatomik xususiyatiga asoslangan obrazdan foydalaniladi. Ushbu holatda semantik va pragmatik funksiya bir xil bo‘lsa-da, obrazli asos milliy xususiyat kasb etadi. Shuning uchun mazkur birliklarni funksional analoglar sifatida baholash maqsadga muvofiq.

Frazeologik lakunarlik ayniqsa ingliz tilidagi to have a skeleton in the closet, to spill the beans va to have a chip on one’s shoulder kabi birliklarda yaqqol namoyon bo‘ladi. Masalan, to spill the beans “sirni oshkor qilish” ma’nosini anglatadi, biroq o‘zbek tilida aynan loviya yoki donning to‘kilishi orqali sirning fosh etilishini ifodalovchi shu darajada barqaror frazeologik model mavjud emas. Shu sababli mazkur birlik tarjimada ko‘pincha sirni ochib qo‘ymoq, sirni oshkor qilmoq kabi vositalar bilan ifodalanadi. Bunda asosiy ma’no saqlanadi, ammo manba tilidagi metaforik obraz yo‘qoladi.

To have a skeleton in the closet birligi ham shunga o‘xshash xususiyatga ega. U shaxs yoki oilaning boshqalardan yashiradigan noqulay sirini anglatadi. O‘zbek tilida ushbu ma’noni “yashirin siri bor”, “sir saqlamoq” singari ifodalar bilan yetkazish mumkin, biroq “shkafdagi skelet” obrazi o‘zbek frazeologik tizimi uchun odatiy emas. Demak, bu yerda frazeologik lakunarlik nafaqat leksik muqobilning yo‘qligida, balki madaniy metaforaning ikkinchi tilda kodlanmaganligida ham namoyon bo‘ladi.

Lakunarlik o‘zbek tilidan ingliz tiliga tarjimada ham kuzatiladi. Masalan, bir yostiqqa bosh qo‘ymoq iborasi o‘zbek tilida er-xotin bo‘lib hayot kechirish, taqdirni birlashtirish ma’nolarini anglatadi. Ushbu frazeologizmda “yostiq” oilaviy hayot va yaqinlikni anglatuvchi madaniy obraz vazifasini bajaradi. Ingliz tilida mazkur ma’noni to marry, to live as husband and wife kabi birliklar bilan ifodalash mumkin, lekin “bir yostiqqa bosh qo‘yish” obraziga to‘liq mos keluvchi barqaror idioma mavjud emas. Shuning uchun bu birlik lingvomadaniy lakuna sifatida qaraladi.

O‘zbek frazeologiyasidagi do‘ppisini osmonga otmoq birligi ham milliy-madaniy komponentning kuchliligi bilan ajralib turadi. “Do‘ppi” o‘zbek madaniyatida muayyan etnomadaniy belgi hisoblanadi. Frazeologizm juda katta quvonch va hayajonni ifodalaydi. Ingliz tilida unga funksional jihatdan to jump for joy yoki to be over the moon kabi birliklarni yaqinlashtirish mumkin, ammo ularda do‘ppi obrazi va u bilan bog‘liq madaniy assotsiatsiya mavjud emas. Natijada tarjimada umumiy emotsional mazmun saqlansa-da, milliy koloritning bir qismi yo‘qoladi.

Xuddi shunday, koʻrpasiga qarab oyoq uzatmoq frazeologizmi shaxsning moddiy yoki real imkoniyatini hisobga olib ish tutishini anglatadi. Ingliz tilidagi to live within one’s means ushbu birlikka semantik jihatdan yaqin, ammo unda “koʻrpa” va “oyoq uzatish” metaforik modeli mavjud emas. Bu holatda tarjima kommunikativ ma’noni saqlaydi, biroq oʻzbek tiliga xos maishiy obraz boshqa til vositasi bilan almashtiriladi.

Oʻtkazilgan qiyosiy tahlil asosida frazeologik lakunarlikning bir nechta asosiy koʻrinishlarini ajratish mumkin. Birinchidan, semantik lakunarlik kuzatiladi. Bunda bir tilda frazeologik shaklda ifodalangan ma’no ikkinchi tilda, asosan, erkin soʻz birikmasi yoki tavsifiy konstruksiya orqali beriladi. To have a chip on one’s shoulder – ichida gina saqlamoq / alamzada boʻlmoq bunga misol boʻla oladi.

Ikkinchidan, obrazli lakunarlik mavjud boʻlib, bunda ikki tilda ma’no muvofiq boʻlsa-da, frazeologizm asosidagi metaforik obraz bir-biridan keskin farq qiladi. When pigs fly – tuyaning dumi yerga tekkanda ana shunday birliklardandir.

Uchinchidan, lingvomadaniy lakunarlik milliy predmet, urf-odat, tarixiy tajriba yoki turmush tarziga asoslangan iboralarda koʻzga tashlanadi. Doʻppisini osmonga otmoq, bir yostiqqa bosh qoʻymoq kabi frazeologizmlar aynan shu xususiyatga ega.

Toʻrtinchidan, pragmatik lakunarlik holatida birliklarning lugʻaviy mazmuni yaqin boʻlishi mumkin, biroq ular nutqda qoʻllanish chastotasi, emotsional boʻyoqdorligi, uslubiy qiymati yoki kommunikativ vaziyatiga koʻra bir-biriga toʻliq mos kelmaydi. Bunday vaziyatda tarjimon birlikning shakliy ekvivalentidan koʻra uning konkret kontekstdagi kommunikativ funksiyasiga ustuvor ahamiyat berishi kerak.

Tahlil natijalari shuni koʻrsatadiki, frazeologik lakunarlikni oddiy “ekvivalenti yoʻq birlik” sifatida tavsiflash yetarli emas. Ingliz va oʻzbek tillari oʻrtasidagi frazeologik nomuvofiqlik kamida uch darajada — ma’no, obraz va madaniy kod darajasida namoyon boʻladi. Ba’zi hollarda mazmun toʻliq saqlangan holda obraz oʻzgaradi, boshqa holatda esa mazkur ma’noni ifodalovchi frazeologik birlikning oʻzi tarjima tilida mavjud boʻlmaydi.

Shuningdek, tahlil frazeologik birliklarning oʻzaro munosabatini qat’iy “ekvivalent yoki ekvivalentsiz” dichotomiyasi asosida emas, balki ekvivalentlik–lakunarlik kontinuumi sifatida baholash maqsadga muvofiqligini koʻrsatadi. Bu kontinuumning bir tomonida semantik, obrazli va pragmatik jihatdan toʻliq mos keladigan birliklar, ikkinchi tomonida esa faqat tavsifiy yoʻl bilan tarjima qilinadigan mutlaq yoki yuqori darajadagi lakunar birliklar joylashadi. Ular orasida qisman ekvivalent va funksional analoglar mavjud boʻladi.

Shunday qilib, ingliz va oʻzbek frazeologik tizimlaridagi lakunarlik xalqning tarixiy tajribasi, turmush tarzi, milliy predmetlar tizimi, obrazli tafakkuri hamda kommunikativ an’analari bilan bevosita bogʻlangan. Mazkur jihat frazeologik lakunalarni oʻrganishni nafaqat qiyosiy tilshunoslik, balki lingvomadaniyatshunoslik va tarjimashunoslik uchun ham muhim tadqiqot yoʻnalishiga aylantiradi.

XULOSA

Ingliz va oʻzbek tillaridagi frazeologik birliklarning qiyosiy-semantik tahlili ularning mazmuniy, obrazli va lingvomadaniy xususiyatlari oʻrtasida ham umumiylik, ham sezilarli tafovutlar mavjudligini koʻrsatdi. Frazeologik birliklar xalqning tarixiy tajribasi, turmush tarzi, qadriyatlari va obrazli tafakkurini aks ettirgani sababli, bir tilda shakllangan iboraning boshqa tilda aynan shu semantik va obrazli model asosida ifodalanishi har doim ham mumkin emas. Ana shunday nomuvofiqliklar frazeologik lakunarlik hodisasining yuzaga kelishiga asos boʻladi.

Tadqiqot natijasida ingliz va oʻzbek tillaridagi frazeologik birliklarni toʻliq ekvivalent, qisman ekvivalent, funksional analog va lakunar birliklar koʻrinishida tasniflash maqsadga muvofiqligi aniqlandi. Toʻliq ekvivalentlarda ma’no va obrazning yaqinligi kuzatilsa, qisman ekvivalentlarda semantik umumiylik saqlangan holda obraz yoki tarkibiy komponentlarda farqlanish mavjud. Funksional analoglar esa bir xil kommunikativ vazifani turli milliy obrazlar orqali ifodalaydi. Lakunar frazeologik birliklarda esa ikkinchi tilda mazkur iboraning semantik, obrazli va pragmatik xususiyatlarini toʻliq aks ettiruvchi barqaror muqobil mavjud boʻlmaydi.

Tahlil shuningdek, frazeologik lakunarlikning semantik, obrazli, lingvomadaniy va pragmatik koʻrinishlarda namoyon boʻlishini koʻrsatdi. Ayniqsa, milliy predmetlar, urf-odatlar, maishiy tajriba va tarixiy-madaniy assotsiatsiyalar asosida shakllangan frazeologizmlarda lingvomadaniy lakunarlik yaqqol koʻzga tashlanadi. Bunday birliklarni tarjima qilishda soʻzma-soʻz yondashuv koʻpincha yetarli boʻlmay, funksional analog, tavsifiy tarjima, kontekstual almashtirish yoki kompensatsiya usullaridan foydalanishni talab qiladi.

Shu jihatdan frazeologik lakunarlikni faqat ekvivalentning mavjud emasligi sifatida emas, balki turli til jamoalarining olamni obrazli va madaniy jihatdan turlicha konseptuallashtirishi natijasida yuzaga keladigan murakkab lingvistik hodisa sifatida baholash lozim. Frazeologik birliklarning aynan shu xususiyati ularni qiyosiy tilshunoslik, lingvomadaniyatshunoslik va tarjimashunoslik uchun muhim tadqiqot obyekti sifatida belgilaydi.

Kelgusidagi tadqiqotlarda ingliz va oʻzbek tillaridagi frazeologik lakunalarni kengroq korpus materiallari asosida oʻrganish, ularning nutqiy chastotasi, kontekstual faolligi va tarjima strategiyalarini empirik jihatdan tekshirish maqsadga muvofiqdir. Bunday yondashuv ikki til frazeologik tizimining milliy va universal xususiyatlarini yanada chuqurroq ochib berishga xizmat qiladi.

Annotatsiya: *Mazkur maqolada ingliz va qoraqalpoq tillaridagi numerativ birliklarning struktur-semantik xususiyatlari qiyosiy-tipologik nuqtayi nazardan tahlil qilinadi. Tadqiqotda ikki til numerativ tizimining morfologik qurilishi (sodda, yasama, qo‘shma va murakkab sonlar), semantik guruhlari (sanoq, tartib, jamlovchi, taqsimlovchi, taxminiy sonlar) hamda sintaktik xususiyatlari qiyoslanadi. Tadqiqot natijalari ingliz tilining Maqolada qiyosiy-tipologik, komponent tahlili va distributiv tahlil metodlaridan foydalanilgan. fleksiyaviy-analitik xususiyati va qoraqalpoq tilining agglyutinativ tabiati numerativ birliklarning yasalish modellariga bevosita ta’sir ko‘rsatishini ko‘rsatadi. Maqolada qiyosiy-tipologik, komponent tahlili va distributiv tahlil metodlaridan foydalanilgan.*

Kalit so‘zlar: *numerativ birlik, son so‘z turkumi, struktur-semantik tahlil, agglyutinatsiya, sanoq son, tartib son, jamlovchi son, qiyosiy tipologiya.*

СТРУКТУРНО-СЕМАНТИЧЕСКИЕ ОСОБЕННОСТИ ЧИСЛИТЕЛЬНЫХ ЕДИНИЦ

Аннотация: *В данной статье анализируются структурно-семантические особенности числительных единиц английского и каракалпакского языков в сравнительно-типологическом аспекте. В исследовании сопоставляются морфологическая структура (простые, производные, сложные числительные), семантические группы (количественные, порядковые, собирательные, разделительные и приблизительные числительные), а также синтаксические особенности числительных обоих языков. Результаты показывают, что флективно-аналитический характер английского языка и агглютинативная природа каракалпакского языка непосредственно влияют на модели образования числительных единиц. В работе использованы методы сравнительно-типологического, компонентного и дистрибутивного анализа.*

Ключевые слова: *числительная единица, имя числительное, структурно-семантический анализ, агглютинация, количественное числительное, порядковое числительное, собирательное числительное, сравнительная типология.*

STRUCTURAL-SEMANTIC FEATURES OF NUMERATIVE UNITS

Abstract: *This article analyzes the structural-semantic features of numerative units in English and Karakalpak from a comparative-typological perspective. The study compares the morphological structure (simple, derivative, compound and complex numerals), semantic groups (cardinal, ordinal, collective, distributive and approximate numerals), and syntactic characteristics of the numeral system in both languages. The results demonstrate that the inflectional-analytical nature of English and the agglutinative nature of Karakalpak directly influence the word-formation models of numerative units. Comparative-typological, componential and distributional analysis methods were used in the research.*

Keywords: *numerative unit, numeral, structural-semantic analysis, agglutination, cardinal numeral, ordinal numeral, collective numeral, comparative typology.*

KIRISH

Tilshunoslikda son so‘z turkumi va u bilan bog‘liq numerativ birliklar doimo tadqiqotchilar diqqatini o‘ziga tortib kelgan, chunki bu leksik-grammatik guruh miqdor, tartib va sanoq tushunchalarini ifodalashda universal, ammo shu bilan birga har bir tilning o‘ziga xos tipologik xususiyatlarini yaqqol namoyon etadigan soha hisoblanadi.

Numerativ birliklar — bu son ma’nosini ifodalovchi so‘zlar, so‘z birikmalari va affiksal vositalar majmuasi bo‘lib, ular tilning grammatik tizimida alohida o‘rin tutadi.[16]

16Кононов А.Н. Грамматика современного узбекского литературного языка. – М.-Л.1960. – 446 с.

Ingliz va qoraqalpoq tillari genetik jihatdan bir-biridan uzoq boʻlgan ikki xil til oilasiga mansub: ingliz tili hind-yevropa tillari oilasining german guruhiga, qoraqalpoq tili esa turkiy tillar oilasining qipchoq guruhiga kiradi. Shu sababli ushbu ikki tilning numerativ tizimini qiyosiy oʻrganish nafaqat nazariy tilshunoslik, balki tarjimashunoslik va chogʻishtirma grammatika nuqtayi nazaridan ham dolzarb ahamiyatga ega.

Soʻnggi yillarda Oʻzbekistonda va Qoraqalpogʻiston Respublikasida qiyosiy-chogʻishtirma tilshunoslik sohasida son soʻz turkumini turli tillar misolida oʻrganishga bagʻishlangan bir qator ishlar amalga oshirilgan boʻlsa-da,[17] ingliz va qoraqalpoq tillari numerativ birliklarining struktur-semantik jihatlari alohida qiyosiy tadqiqot obʼekti sifatida yetarlicha chuqur oʻrganilmagan. Ayniqsa, ikki tilning sanoq, tartib, jamlovchi va taxminiy son shakllarining yasalish modellari, ularning semantik valentligi va sintaktik distributsiyasi masalalari maxsus tadqiqotni talab etadi.

METODOLOGIYA VA ADABIYOTLAR TAHLILI

Tadqiqot uchun material sifatida ingliz va qoraqalpoq tillarining izohli va grammatik lugʻatlari, ikki tilning akademik grammatikalari, badiiy va publitsistik matnlardan yigʻilgan 500 dan ortiq numerativ birlik qoʻllanilgan misollar bazasi xizmat qildi.

Qoraqalpoq tili materiallari A.Bekbergenovning “Qaraqalpaq tilindegi sanlıqlar” (Nókis: Qaraqalpaqstan, 1976), D.Nasirovning “Hazirgi qaraqalpaq tili. Morfologiya” (Nókis, 1981) hamda A.Dawletov, M.Dawletov, M.Qudaybergenovlarning “Házirgi qaraqalpaq ádebiy tili” (Nókis, 2010) nomli fundamental ishlaridan olindi.

Ingliz tili materiallari uchun R.Quirk, S.Greenbaum, G.Leech, J.Svartvikning “A Comprehensive Grammar of the English Language” (London: Longman, 1985) hamda R.Huddleston va G.Pullumning “The Cambridge Grammar of the English Language” (Cambridge: CUP, 2002) asarlari tayanch manba sifatida foydalanildi.

Tadqiqotda quyidagi metodlardan foydalanildi: qiyosiy-tipologik metod – ikki tilning numerativ tizimlarini oʻzaro solishtirish uchun; komponent tahlili metodi – numerativ birliklarning semantik strukturasini semalarga ajratib oʻrganish uchun; distributiv tahlil metodi — numerativ birliklarning gap ichidagi sintaktik pozitsiyasini aniqlash uchun; hamda statistik tahlil elementlari — yasalish modellarining produktivligini aniqlashtirish uchun qoʻllanildi.

TADQIQOT VA NATIJALAR

1. Numerativ birliklarning morfologik struktur turlari

Ingliz va qoraqalpoq tillarida son soʻz turkumi tarkibiy tuzilishiga koʻra toʻrt asosiy guruhga ajratiladi: sodda (simple), yasama (derivative), qoʻshma (compound) va murakkab/tartibli (complex/composite) sonlar. Biroq bu tasnif ikki tilda turlicha morfologik mexanizmlar asosida amalga oshadi.

Ingliz tilida sodda sonlar (one, two, ten, hundred) tub morfemalardan iborat boʻlib, ular boshqa morfemalarga boʻlinmaydi. Yasama sonlar -teen (thirteen, fourteen) va -ty (twenty, thirty) affikslari yordamida hosil boʻladi, bu affikslar tarixan “ten” soʻzining fonetik oʻzgargan shakllaridir.[18]

Qoraqalpoq tilida esa sodda sonlar (bir, eki, on, júz, mıń) tub soʻzlar boʻlib, ular agglyutinativ tilga xos holda oʻzgarmas oʻzak sifatida namoyon boʻladi. Yasama sonlar mavjud emas - buning oʻrniga qoʻshma son yasalish modeli (on bir, jigirma bes, bir júz eliw) produktiv hisoblanadi, bu inglizcha “twenty-five” tipidagi qoʻshma sonlarga funksional jihatdan mos keladi, biroq yozilish tamoyili (ochiq yozuv, chiziqcha yoʻq) bilan farqlanadi.

Quyidagi jadvalda ikki tildagi sanoq sonlarning tarkibiy modeli qiyoslangan:

Model	Ingliz tili misoli	Qoraqalpoq tili misoli	Izoh
Sodda	one, six, ten	bir, altı, on	tub morfema
Yasama	thirteen, twenty	-(mavjud emas)	faqat inglizda affiksal
Qoʻshma	twenty-five, ninety-nine	jigirma bes, toqsan toǵız	ikki komponentli
Murakkab	two hundred and thirty-four	eki júz otız tórt	koʻp komponentli

2. Semantik guruhlar boʻyicha tahlil

Sanoq sonlar (cardinal numerals) ikki tilda ham miqdorni bildiruvchi asosiy semantik guruh hisoblanadi. Ingliz tilida sanoq sonlar deyarli oʻzgarmas shaklda qoʻllanadi (grammatik jihatdan neytral), qoraqalpoq tilida esa ular kelishik va egalik affikslarini qabul qilib, otlashish xususiyatiga ega boʻladi: úshewimiz (uchovimiz), bestiń (beshning) kabi.

Tartib sonlar (ordinal numerals) ingliz tilida -th affiksi (fourth, fifth) va uchta istisno shakl (first, second, third) orqali yasaladi.[19]

Qoraqalpoq tilida tartib son -ınshı/-inshi, -nshı/-nshi affiksi bilan yasaladi: birinshi, ekinshi, úshinshi, tórtinshi. Bu affiks barcha sanoq son oʻzaklariga birxil qonuniyat bilan qoʻshiladi, bu esa qoraqalpoq tilining agglyutinativ tabiatidan kelib chiqadi - istisno shakllar deyarli uchramaydi.

17Xudayarova M., Usanova Q.M. Oʻzbek, rus va qoraqalpoq tillarida feʻl so'z turkumi. – Eurasian Journal of Social Sciences, Philosophy and Culture, 2024.

18Jespersen O. A Modern English Grammar on Historical Principles. Part II: Syntax. – Heidelberg: Carl Winter, 1914. – P. 15–22.

19 Huddleston R., Pullum G.K. The Cambridge Grammar of the English Language. – Cambridge: CUP, 2002. – P. 323–327.

Jamlovchi sonlar (collective numerals) qoraqalpoq tilida -aw/-ew affiksi orqali faol yasaladi: ekewi, úshewi, tórtewi, besewi (ikkovi, uchovi, to‘rtovi, beshovi).

Ingliz tilida bu ma’no leksik-analitik yo‘l bilan, ya’ni “both”, “all three”, “the four of them” kabi so‘z birikmalari orqali ifodalanadi, alohida grammatik shakl mavjud emas.

Taqsimlovchi sonlar (distributive numerals) qoraqalpoq tilida son takrori (eki-ekiden, bes-besten - ikki-ikkidan, besh-beshdan) yoki -aw/-ew affiksi (ekewden, úshewden) orqali yasaladi. Ingliz tilida bu ma’no «two by two», «in twos», «five each» kabi analitik konstruksiyalar bilan beriladi

Taxminiy sonlar (approximate numerals) ingliz tilida “about”, “around”, “some”, “-ish” (thirty-ish) vositalari bilan, qoraqalpoq tilida esa sonlarni juftlab qo‘llash (on-on bes - o‘n-o‘n besh) yoki -lap/lep affiksi (onlap, júzlep) orqali ifodalanadi. Bu ikki tilda ham taxminiylik sxemasi asosan sintaktik-leksik vositalar orqali yuzaga chiqishini ko‘rsatadi, biroq qoraqalpoq tilida bu jarayon ko‘proq morfologik xarakterga ega.

3. Sintaktik distributsiya

Ingliz va qoraqalpoq tillarida son so‘z turkumining gapdagi vazifasi ham qiyosiy jihatdan farqlanadi. Ingliz tilida sanoq son deyarli har doim otdan oldin, aniqlovchi vazifasida keladi (three books), otlashganda esa ko‘plik affiksini oladi (in twos, by threes). Qoraqalpoq tilida son so‘z, aksincha, otdan oldin kelib, ot ko‘plik affiksini olmaydi - ya’ni son o‘zi miqdorni bildirganligi sababli otga ko‘plik qo‘shimchasi qo‘shilmaydi: bes kitap (besh kitob), emas «bes kitaplar».

Bu qonuniyat turkiy tillar uchun umumiy hodisa bo‘lib, “sanoq son + ot birlik shaklida” qo‘llanish qoidasi deb ataladi.[20]

Shuningdek, qoraqalpoq tilida son so‘z otlashib, gapda ega, to‘ldiruvchi yoki kesim vazifasida kela oladi va bu holatda kelishik hamda egalik affikslarini to‘liq qabul qiladi: Úshewi keldi (Uchovi keldi). Ingliz tilida bunday morfologik otlashish cheklangan bo‘lib, asosan artikl va predlog yordamida amalga oshadi: the three of them.

4. Ikki tildagi numerativ tizimning umumiy va farqli jihatlari

Olib borilgan qiyosiy tahlil natijasida quyidagi umumiy va farqli xususiyatlar aniqlandi:

ikki tilda ham numerativ tizim o‘nlik sanoq asosiga (decimal system) qurilgan, bu universal tipologik xususiyat hisoblanadi;

ingliz tilida yasama sonlar mavjud bo‘lib, ular tarixiy affiksatsiya natijasi hisoblanadi, qoraqalpoq tilida esa bu bo‘shliqni qo‘shma son modeli to‘ldiradi;

qoraqalpoq tilida jamlovchi va taqsimlovchi sonlar alohida grammatik (affiksal) shaklga ega, ingliz tilida esa bu ma’nolar analitik-leksik vositalar bilan beriladi;

qoraqalpoq tilida son otdan oldin kelib, otning ko‘plik shaklini bloklaydi, ingliz tilida bunday qat’iy qoida yo‘q;

tartib son yasalishida ingliz tilida uchta supletiv istisno (first, second, third) mavjud, qoraqalpoq tilida bunday istisnolar deyarli kuzatilmaydi, bu til tipologiyasining izchilligi bilan izohlanadi.

Bu farqlar, birinchi navbatda, ikki tilning tipologik tabiati - ingliz tilining analitik-fleksiyaviy va qoraqalpoq tilining agglyutinativ xususiyati bilan bog‘liq. Agglyutinativ tilda har bir grammatik ma’no alohida, aniq chegaralangan affiks orqali ifodalansa, analitik tilda bu vazifani ko‘pincha mustaqil so‘zlar (predlog, yordamchi so‘zlar) bajaradi.

5. Kasr sonlar va o‘lchov-sanoq birikmalarining struktur-semantik xususiyatlari

Kasr sonlar (fractional numerals) ikki tilda ham ikki komponentli struktura - surat va maxraj asosida yasaladi, biroq ularning grammatik rasmiylashuvi farqlanadi. Ingliz tilida kasr sonlar sanoq va tartib sonlarning birikuvi orqali hosil bo‘ladi: one third, two fifths, three quarters - bunda surat sanoq son, maxraj esa tartib son shaklida (ko‘plikda -s bilan) qo‘llanadi.[21]

Qoraqalpoq tilida kasr sonlar maxraj + surat tartibida, jónelis kelisigi (-dan/-nan) affiksi yordamida yasaladi: úshten biri (uchdan biri), besten ekewi (beshdan ikkitasi). Bu model turkiy tillar uchun umumiy hodisa bo‘lib, kelishik affiksining kasr semantikasini shakllantirishdagi faol ishtirokini ko‘rsatadi - bu esa ingliz tilidagi leksik-birikma usulidan tubdan farq qiladi.

O‘lchov-sanoq birikmalari (numerative classifiers) nuqtayi nazaridan ham ikki til orasida farq kuzatiladi. Qoraqalpoq tilida son bilan ot orasida maxsus sanoq so‘zlar (nomerativ klassifikatorlar) qo‘llanilishi mumkin: on bas mal (o‘n bosh mol), bes túp aǵash (besh tup daraxt) - bunda «bas», “túp” kabi so‘zlar predmetning turiga qarab tanlanadigan klassifikator vazifasini bajaradi. Ingliz tilida bunday klassifikatorlar tizimi rivojlanmagan, buning o‘rniga «a piece of», «a head of» kabi ayrim birikmalar cheklangan holatlarda qo‘llaniladi (masalan, «a head of cattle»), biroq bu hodisa qoraqalpoq tilidagidek tizimli va produktiv emas.

Shunday qilib, kasr sonlar va o‘lchov-sanoq birikmalari darajasida ham ikki tilning tipologik xususiyati - qoraqalpoq tilining morfologik-affiksal, ingliz tilining esa leksik-analitik strategiyasi - yaqqol namoyon bo‘ladi.

MUHOKAMA

Numerativ tizimning bazaviy birligi sifatida “one” va “bir” leksemasi alohida oʻrin egallaydi, chunki u nafaqat mustaqil sanoq son ("1"), balki butun numerativ tizimning morfologik bazasi – boshqa sonlarni yasovchi tayanch komponent hamdir. Ingliz tilida "one" tarixan "eleven" (“ān”+“lif” — oʻnlikdan bitta ortiq) va “eighty-one” kabi murakkab sonlar tarkibida qatnashadi; shuningdek “once”, “alone” (“all+one”), “only” (“one+ly”) kabi hosila soʻzlarning etimologik negizini tashkil etadi.

Bir soni barcha turkiy tillarda, biz foydalangan yodgorliklarda va tilimizning dialektlarida bir xil shaklga ega...22 Qoraqalpoq tilida ham “bir” xuddi shunday bazaviy vazifani bajaradi: u on bir (oʻn bir), jigirma bir (yigirma bir), bir mıń (bir ming) kabi barcha qoʻshma va murakkab sonlar tarkibida ishtirok etadi, shuningdek birew (birov), birden (birdan), birinshi (birinchi), birge (birga) kabi koʻplab hosila soʻzlarning yasovchi negizi hisoblanadi. Bu holat “one/bir” leksemasining ikki tilda ham nafaqat semantik, balki morfologik jihatdan ham markaziy, tizim hosil qiluvchi maqomga ega ekanligini koʻrsatadi – bu esa uning kognitiv-diskursiv xususiyatlarini alohida chuqur tadqiq etishni struktur-semantik nuqtayi nazardan toʻla asoslaydi.

XULOSA

Oʻtkazilgan tadqiqot natijalari shuni koʻrsatadiki, ingliz va qoraqalpoq tillaridagi numerativ birliklar umuminsoniy miqdoriy tushunchalarni ifodalashda oʻxshash semantik vazifalarni bajarsa-da, ularning struktur yasalish mexanizmlari til tipologiyasiga qat’iy bogʻliq holda farqlanadi. Qoraqalpoq tilining agglyutinativ xususiyati numerativ birliklarning affiksal yoʻl bilan boy va tizimli yasalishini ta’minlasa, ingliz tilining analitik-fleksiyaviy tabiati bu ma’nolarning koʻproq leksik-sintaktik vositalar orqali ifodalanishiga olib keladi.

Tadqiqot natijalari qiyosiy tilshunoslik, tarjimashunoslik va ikki tilni chet til sifatida oʻqitish metodikasi uchun amaliy ahamiyatga ega boʻlib, xususan, ingliz tilidan qoraqalpoq tiliga (va aksincha) tarjima jarayonida numerativ birliklarning ekvivalentligini ta’minlashda foydalanilishi mumkin.

Xulosa qilib aytganda, ingliz va qoraqalpoq tillari numerativ tizimlarining qiyosiy tahlili quyidagi asosiy natijalarni berdi: birinchidan, ikki tilda ham oʻnlik sanoq tizimi universal asos boʻlib xizmat qiladi; ikkinchidan, numerativ birliklarning struktur yasalishi til tipologiyasi bilan bevosita bogʻliq - qoraqalpoq tilida affiksatsiya, ingliz tilida esa kompozitsiya va leksik-analitik usullar ustuvorlik qiladi; uchinchidan, semantik guruhlar (jamlovchi, taqsimlovchi, taxminiy, kasr sonlar) darajasida qoraqalpoq tili grammatik jihatdan ancha rivojlangan va tizimli affiksal vositalarga ega, ingliz tilida esa bu ma’nolar koʻproq sintaktik konstruksiyalar orqali ifodalanadi; toʻrtinchidan, sintaktik distributsiya nuqtayi nazaridan qoraqalpoq tilida son soʻzning otdan oldin kelishi va otning koʻplik shaklini bloklashi barqaror qoida hisoblanadi, ingliz tilida esa bunday qat’iy cheklov mavjud emas.

Kelgusi tadqiqotlarda numerativ birliklarning frazeologik va lingvokulturologik jihatlari, shuningdek boshqa turkiy va german tillari materialida numerativ tizimlarning korpus lingvistikasi metodlari yordamida kengroq qiyosiy tahlil qilinishi alohida ilmiy va amaliy ahamiyatga ega boʻladi. Bunday tadqiqotlar, ayniqsa, mashina tarjimasi tizimlarida numerativ birliklarning avtomatik aniqlanishi va ekvivalent tanlanishi masalalarini hal etishda muhim nazariy asos boʻlib xizmat qilishi mumkin.

INGLIZ VA O‘ZBEK BADIIY MATNLARIDA ONOMASTIK BIRLIKLARNING PRESUPPOZITIV MAZMUN HOSIL QILISH XUSUSIYATLARI

Baxtiyorova Maftuna Baxtiyorovna
Xorijiy tillar kafedrasi dotsenti, PhD
Iqtisodiyot va Pedagogika Universiteti
E-mail: maftunabakhtiyorovna.phd@gmail.com

Annotatsiya: *Maqolada ingliz va o‘zbek badiiy matnlarida qo‘llanadigan onomastik birliklarning presuppozitiv mazmun hosil qilish xususiyatlari qiyosiy-pragmatik jihatdan o‘rganiladi. Tadqiqotda atoqli otning badiiy diskursdagi vazifasi shaxs, makon yoki boshqa referentni identifikatsiyalash bilan chegaralanmasligi, uning talqini tarixiy-madaniy bilim, ijtimoiy tajriba, kommunikativ vaziyat va matnning oldingi qismlarida shakllangan axborot bilan uzviy bog‘liq ekanligi asoslanadi. Ingliz adabiyotidan Jane Austinning Pride and Prejudice, Charles Dickensning Great Expectations, o‘zbek adabiyotidan Abdulla Qodiriyning O‘tkan kunlar hamda Cho‘lponning Kecha va kunduz asarlaridagi antroponimik va toponimik birliklar tadqiqot materiali sifatida olindi. Kontekstual, pragmatik, lingvokognitiv va qiyosiy tahlil natijasida onomastik birliklarning tarixiy-madaniy, ijtimoiy-status, etnomadaniy, assotsiativ-baholovchi hamda diskurs-oldingi axborot bilan bog‘liq presuppozitiv xususiyatlari aniqlandi. Tadqiqot shuni ko‘rsatadiki, badiiy onimning presuppozitiv mazmuni uning lug‘aviy yoki etimologik ma’nosidan bevosita kelib chiqmaydi; mazkur mazmun nom, kontekst va o‘quvchining relevant bilimlari o‘rtasidagi munosabatda yuzaga keladi. Ingliz va o‘zbek badiiy matnlarida bu hodisaning umumiy pragmatik asoslari mavjud bo‘lsa-da, uni yuzaga chiqaruvchi tarixiy-madaniy va ijtimoiy omillar muayyan farqlarga ega.*

Kalit so‘zlar: *onomastika, atoqli ot, presuppozitsiya, badiiy diskurs, antroponim, toponim, pragmatika, fon bilim, madaniy kontekst, interpretatsiya.*

ОСОБЕННОСТИ ФОРМИРОВАНИЯ ПРЕСУППОЗИТИВНОГО СОДЕРЖАНИЯ ОНОМАСТИЧЕСКИХ ЕДИНИЦ В АНГЛИЙСКИХ И УЗБЕКСКИХ ХУДОЖЕСТВЕННЫХ ТЕКСТАХ

Аннотация: *В статье в сравнительно-прагматическом аспекте рассматриваются особенности формирования пресуппозитивного содержания ономастических единиц в английских и узбекских художественных текстах. Обосновывается, что функция имени собственного в художественном дискурсе не ограничивается идентификацией лица, места или иного референта: его интерпретация тесно связана с историко-культурными знаниями, социальным опытом, коммуникативной ситуацией и информацией, сформированной в предшествующих частях текста. Материалом исследования послужили антропонимы и топонимы из романов «Гордость и предубеждение» Джейн Остин, «Большие надежды» Чарльза Диккенса, «Минувшие дни» Абдуллы Кадыри и «Ночь и день» Чулпана. В результате контекстуального, прагматического, лингвокогнитивного и сравнительного анализа выявлены историко-культурные, социально-статусные, этнокультурные, ассоциативно-оценочные, а также связанные с предшествующим дискурсом пресуппозитивные свойства онимов. Исследование показывает, что пресуппозитивное содержание художественного онима не выводится непосредственно из его лексического или этимологического значения; оно возникает в отношении между именем, контекстом и релевантными знаниями читателя. Несмотря на общность прагматических оснований этого явления в английских и узбекских художественных текстах, историко-культурные и социальные факторы, обусловливающие его, имеют определённые различия.*

Ключевые слова: *ономастика, имя собственное, пресуппозиция, художественный дискурс, антропоним, топоним, прагматика, фоновые знания, культурный контекст, интерпретация.*

PRESUPPOSITION-FORMING FEATURES OF ONOMASTIC UNITS IN ENGLISH AND UZBEK LITERARY TEXTS

Abstract: *The article examines the presuppositional potential of onomastic units in English and Uzbek literary texts from a comparative pragmatic perspective. It argues that the function of a proper name in literary discourse is not limited to the identification of a person, place or other referent. Its interpretation is closely connected with historical and cultural knowledge, social experience, communicative context and information introduced in the preceding discourse. The study is based on anthroponyms and toponyms*

selected from Jane Austen's Pride and Prejudice, Charles Dickens's Great Expectations, Abdulla Qodiriy's O'tkan kunlar and Cho'lpon's Kecha va kunduz. Contextual, pragmatic, cognitive and comparative methods reveal several presuppositional dimensions of literary names, including historical-cultural, social-status, ethnocultural, associative-evaluative and discourse-based meanings. The findings demonstrate that the presuppositional content of a literary proper name cannot be derived solely from its lexical or etymological meaning; rather, it emerges through the interaction between the name, its textual context and the reader's relevant background knowledge. Although English and Uzbek literary texts share common pragmatic mechanisms, the cultural and social sources of presuppositional meaning display significant differences.

Keywords: *onomastics, proper name, presupposition, literary discourse, anthroponym, toponym, pragmatics, background knowledge, cultural context, interpretation.*

Kirish: Badiiy matndagi atoqli otlar tilning boshqa nominativ birliklariga nisbatan alohida funksional imkoniyatga ega. Ular, avvalo, personaj, makon yoki boshqa individual obyektni identifikatsiyalaydi. Biroq badiiy diskurs sharoitida nomning vazifasi shu bilan tugamaydi. Atoqli ot muayyan tarixiy davrni, ijtimoiy munosabatni, milliy-madaniy muhitni yoki matnning oldingi qismlarida berilgan axborotni o'quvchi ongida qayta faollashtirish imkoniyatiga ham ega.

Shu sababli badiiy onomastik birliklarni faqat ularning kelib chiqishi, yasalishi yoki nominativ funksiyasi doirasida o'rganish ularning matndagi real semantik-pragmatik salohiyatini to'liq ochib bermaydi. Atoqli otning badiiy qiymati ko'pincha uning qaysi kontekstda qo'llanishi, qanday referentga tegishli bo'lishi, personajlar va muallif nutqida qanday munosabat bilan berilishi hamda o'quvchidan qanday bilim talab etishi orqali belgilanadi.

Badiiy onomastika tadqiqotlarida nomning referensial, xarakterologik, ijtimoiy, ekspressiv va poetik funksiyalari turli nuqtayi nazardan o'rganilgan. Ž. Dvořáková badiiy nomni faqat personajni ajratib ko'rsatuvchi vosita sifatida emas, balki matnning boshqa komponentlari bilan o'zaro bog'liq holda ishlaydigan funksional birlik sifatida talqin qiladi. Bunday yondashuv nomning mazmunini personaj, muallif, o'quvchi va madaniy kontekst o'rtasidagi munosabat doirasida ko'rib chiqishni taqozo etadi.

Atoqli ot semantikasi bo'yicha tadqiqotlarda referensiya markaziy masalalardan biri bo'lib qolsa-da, real kommunikatsiyada nomning anglanishi faqat referentning aniqlanishiga bog'liq emas. D. J. Allerton proper name ma'nosining individual referent bilan aloqasi bilan bir qatorda, so'zlovchining mazkur referentga oid bilim va assotsiatsiyalarini ham e'tibordan chetda qoldirmaslik zarurligini ko'rsatadi. Mazkur mulohaza badiiy diskurs uchun yanada dolzarb, chunki badiiy personaj yoki joy nomiga doir bilimlar matn rivojlangan sari kengayib boradi.

Ushbu masalani presuppozitsiya nuqtayi nazaridan o'rganish atoqli otning matnda bevosita ifodalanmagan axborotni qanday aktual holga keltirishini tushuntirish imkonini beradi. Pragmatik nazariyada presuppozitsiya muloqotning muvaffaqiyatli kechishi uchun oldindan mavjud yoki kommunikantlar tomonidan ma'lum deb qabul qilinadigan axborot bilan bog'lanadi. R. Stalnaker presuppozitsiyani kommunikativ kontekst va umumiy bilim bilan uzviy munosabatda tushuntiradi. Badiiy matnda esa mazkur holat o'ziga xos ko'rinishga ega: muallif va o'quvchi yuzma-yuz kommunikatsiyada qatnashmaydi, ammo matn o'quvchining qaysi bilimlarni ishga solishini nazarda tutgan holda tashkil qilinadi.

Masalan, Samarqand toponimi muayyan geografik obyektga ishora qilishi bilan birga tarixiy yoki badiiy kontekstga qarab qadimiylik, davlatlilik, ilmiy-madaniy meros kabi tushunchalarni ham aktual holga keltirishi mumkin. Biroq bunday mazmunni nomning o'ziga doimiy ravishda biriktirilgan lug'aviy ma'no deb tushunish noto'g'ri. U muayyan kontekst bilan o'quvchining tarixiy-madaniy bilimlari o'rtasidagi munosabatda yuzaga chiqadi.

Antroponimlarda ham shu holat kuzatiladi. Abdulla Qodiriyning O'tkan kunlar romanida Otabek dastlab konkret personajni identifikatsiyalovchi ism bo'lsa, asar davomida u haqidagi ijtimoiy, oilaviy va shaxsiy ma'lumotlar o'quvchining diskursiv bilimiga kirib boradi. Keyingi voqealarda "Otabek" nomining qo'llanishi ushbu personaj bilan bog'liq avvalgi axborotni har safar qaytadan bayon etishni talab qilmaydi.

Xuddi shunday, Jane Austinning Pride and Prejudice romanidagi Mr Darcy nominatsiyasi personajni individuallashtirish bilan birga ijtimoiy maqom, kommunikativ masofa va muayyan tarixiy jamiyatdagi etiketik munosabatlarni tushunishga ehtiyoj tug'diradi. Personaj haqidagi dastlabki baho syujet davomida o'zgarishi esa ism bilan bog'langan matniy bilimning ham dinamik xususiyatga ega ekanini ko'rsatadi.

Shu jihatdan ingliz va o'zbek badiiy matnlarini qiyosiy o'rganish muhim. Har ikki adabiy an'anada nomning identifikatsion vazifasi universal bo'lsa-da, nom orqali faollashadigan ijtimoiy va madaniy bilimning mazmuni bir xil emas.

Mazkur tadqiqotning maqsadi ingliz va o'zbek badiiy matnlarida onomastik birliklarning presuppozitiv mazmun hosil qilish xususiyatlarini aniqlash, mazkur hodisaning asosiy ko'rinishlarini tavsiflash hamda ikki til materialida kuzatiladigan umumiy va o'ziga xos jihatlarni qiyosiy yoritishdan iborat.

Tadqiqot materiallari va metodlari: Tadqiqot materiali sifatida ingliz va o'zbek klassik nasrida qo'llangan antroponimik hamda toponimik birliklar tanlandi. Ingliz adabiyotidan Jane Austinning Pride and Prejudice va Charles

Dickensning Great Expectations, o‘zbek adabiyotidan Abdulla Qodiriyning O‘tkan kunlar hamda Cho‘lponning Kecha va kunduz asarlaridagi nomlash birliklari tahlil qilindi.

Mazkur asarlarni tanlash ularning ijtimoiy munosabatlar, personajlararo aloqa va tarixiy-madaniy muhitni ifodalashda onomastik vositalardan faol foydalanishi bilan izohlanadi. Tadqiqotda alohida ism emas, balki ismning badiiy kontekst bilan munosabati tahlil markaziga qo‘yildi.

Kontekstual tahlil nomning konkret epizod yoki narrativ vaziyatdagi semantik-pragmatik qiymatini aniqlash uchun qo‘llandi. Chunki ayni bir onomastik birlik turli matniy vaziyatlarda turlicha mazmunni aktual holga keltirishi mumkin.

Pragmatik tahlil orqali onim qo‘llangan vaziyatda matnda ochiq ifodalanmagan, lekin uning to‘liq anglanishi uchun zarur bo‘lgan bilimlar aniqlandi. Bunda presuppozitsiya subyektiv assotsiatsiyadan farqlandi. O‘quvchining shaxsiy tasavvuri emas, balki kontekst, tarixiy-madaniy muhit yoki oldingi diskurs bilan asoslangan bilimlargina tahlil uchun relevant deb qabul qilindi.

Lingvokognitiv yondashuv atoqli otning o‘quvchi ongida mavjud bo‘lgan tarixiy, ijtimoiy va madaniy bilimlar bilan bog‘lanishini tushuntirish uchun xizmat qildi. Qiyosiy metod esa ingliz va o‘zbek materiallarida mazkur hodisaning umumiy xususiyatlari hamda uning milliy-madaniy shakllarini aniqlash imkonini berdi.

Tadqiqotda miqdoriy ko‘rsatkichlardan ko‘ra sifat tahliliga ustuvor ahamiyat berildi. Chunki maqolaning asosiy vazifasi onomastik birliklarning statistik chastotasini aniqlash emas, balki ularning presuppozitiv imkoniyatini semantik-pragmatik nuqtayi nazardan tavsiflashdir.

Natijalar: Tahlil shuni ko‘rsatdiki, badiiy onomastik birliklarning presuppozitiv mazmuni bir xil bilim manbasiga tayanmaydi. Ayrim nomlar tarixiy-madaniy bilimni, ayrimlari ijtimoiy maqom va kommunikativ munosabatni, boshqalari esa aynan asarning oldingi qismlarida shakllangan axborotni o‘quvchi ongida aktual holga keltiradi.

Toponim va tarixiy antroponimlarning badiiy matndagi talqini ko‘pincha kollektiv xotira bilan bog‘liq. Bunda nom muayyan shaxs yoki makonni ko‘rsatadi, biroq uning badiiy mazmuni referensiya bilan tugamaydi.

O‘zbek badiiy diskursida Samarqand, Buxoro, Toshkent kabi nomlar kontekstga qarab tarixiy davr, madaniy markaz, ijtimoiy muhit yoki milliy xotira bilan bog‘lanishi mumkin. Ushbu ma’lumotlarning barchasi nomning lug‘aviy semantikasiga kirmaydi. Ularning qaysi biri aktual bo‘lishi matn tomonidan belgilanadi.

Masalan, tarixiy voqealar fonida qo‘llangan “Samarqand” toponimi bilan zamonaviy shahar hayotini tasvirlovchi asarda qo‘llangan ayni nomning pragmatik qiymati bir xil bo‘lmaydi. Demak, tarixiy-madaniy presuppozitsiyani nomning o‘zgarmas semantik xususiyati deb emas, kontekst orqali faollashadigan madaniy bilim sifatida tushunish zarur.

Ingliz adabiyotida London toponimi ham shunday ko‘p qatlamli imkoniyatga ega. Dickens ijodida London faqat voqea kechadigan geografik makon emas; u ko‘plab holatlarda jamiyatning ijtimoiy tabaqalanishi, shahar hayotining murakkabligi va personajlar taqdirini belgilovchi muhit bilan bog‘liq. Biroq konkret ma’no har bir asarning kontekstida aniqlanadi.

Antroponimning presuppozitiv qiymati ko‘pincha uning atrofidagi titul, unvon yoki murojaat shakllari orqali kuchayadi. Ingliz va o‘zbek materialining qiyosiy tahlili ushbu hodisaning har ikki tilda mavjudligini, biroq lisoniy ko‘rinishlari tarixiy-madaniy jihatdan farqlanishini ko‘rsatadi.Jane Austinning Pride and Prejudice romanidagi Mr Darcy, Miss Bennet, Lady Catherine kabi birliklar personajlarning nomini ifodalash bilangina cheklanmaydi. Titullarning tanlanishi jamiyatdagi status, rasmiylik darajasi va kommunikativ masofani anglashga yordam beradi. Ayniqsa “Lady Catherine” nominatsiyasini to‘liq talqin qilish uchun mazkur tarixiy davrdagi ijtimoiy tabaqalanish va etiketik tizim haqidagi bilim muhim.

O‘zbek badiiy matnida esa Yusufbek hoji kabi nominatsiyaning pragmatik qiymati “hoji” komponentisiz to‘liq ochilmaydi. Mazkur birlik personajning diniy-amaliy tajribasini ifodalash bilan birga konkret tarixiy-iijtimoiy muhitda unga berilgan hurmat va jamoa ichidagi maqomini ham anglatishi mumkin.

Shuningdek, aka, opa, domla, bek, hoji kabi birliklarning ism bilan birga qo‘llanishi shaxslararo munosabatni tavsiflashga xizmat qiladi. Biroq mazkur komponentlarning ma’nosini barcha o‘zbek badiiy matnlariga bir xil tatbiq qilish mumkin emas. Ularning pragmatik vazifasi davr, personajlar o‘rtasidagi munosabat va konkret nutqiy vaziyat bilan belgilanadi.

Shuning uchun ikki tilni qiyoslashda “ingliz tilida titul, o‘zbek tilida qarindoshlik shakllari asosiy” kabi qat’iy qarama-qarshilikdan qochish kerak. Ilmiy jihatdan muhim farq ayrim nominativ vositalarning muayyan tarixiy va madaniy diskursda qay darajada funksional yuk olishi bilan bog‘liq.

Ismning fonetik va morfologik shakli ham o‘quvchi uchun muayyan madaniy signal bo‘lishi mumkin. Otabek, Kumush, Zaynab, Miryoqub kabi antroponimlar o‘zbek onomastik tizimiga mansubligi bilan personaj haqida dastlabki etnomadaniy tasavvur hosil qiladi.

Ammo ism asosida personajning xarakteri yoki qadriyatlarini oldindan belgilash ilmiy jihatdan asosli emas. Onomastik shakl madaniy mansublik haqida ma’lum taxmin tug‘dirishi mumkin, lekin personajning individual xususiyatlari faqat badiiy kontekst orqali ochiladi.

Shu sababli etnomadaniy presuppozitsiyani qat'iy semantik belgi sifatida emas, o'quvchining mavjud onomastik tajribasiga tayangan interpretativ asos sifatida tushunish to'g'riroq bo'ladi.

Ingliz badiiy matnlarida ham ism va familiya kombinatsiyalari personajning ijtimoiy yoki etnomadaniy kelib chiqishiga doir ma'lum kutishlarni shakllantirishi mumkin. Biroq bunday xulosalar konkret matn bilan tasdiqlanmaguncha faqat dastlabki interpretativ ehtimol sifatida qaralishi lozim.

Badiiy personaj nomining baholovchi xususiyati ko'pincha nomning lug'aviy yoki etimologik ma'nosidan emas, syujet davomida personaj haqida beriladigan axborotdan kelib chiqadi.

Charles Dickensning Great Expectations romanidagi Miss Havisham nomi asarning boshida konkret personajni individuallashtiradi. Syujet rivojlangan sari uning hayoti, ruhiy holati, Satis House muhiti va Estella bilan munosabatlari haqidagi ma'lumotlar o'quvchining mazkur personaj haqidagi bilimini boyitadi. Keyingi epizodlarda ism qo'llanganda ushbu oldingi diskurs yana tushuntirib berilmaydi.

O'tkan kunlar romanidagi Kumush nomining talqini ham faqat "kumush" leksemasining lug'aviy ma'nosiga keltirib chiqarilishi mumkin emas. Qahramonning badiiy qiyofasi, uning Otabek bilan munosabati, boshqa personajlar bilan ziddiyatlari hamda syujetdagi taqdiri nomning o'quvchi ongidagi badiiy qiymatini shakllantiradi.

Bu holatda muhim jihat shundaki, badiiy nomning baholovchi mazmuni alohida ismning "tayyor" xususiyati sifatida emas, personaj haqidagi matniy bilimning davomiy ravishda shakllanishi natijasi sifatida namoyon bo'ladi.

Badiiy matn rivoji davomida o'quvchi personajlar, voqealar va munosabatlar haqidagi ma'lumotni bosqichma-bosqich o'zlashtiradi. Keyingi epizodlarda ushbu ma'lumotning bir qismi qayta bayon qilinmaydi, chunki matn o'quvchining oldingi diskursni xotirada saqlaganini nazarda tutadi.

Masalan, roman boshida Otabek haqidagi ma'lumotlar asta-sekin ochib boriladi. Keyingi boblarda uning ismi qayta ishlatilganda o'quvchi personajni avval shakllangan diskurs modeli asosida taniydi. Shu bois atoqli ot matnning oldingi qismlari bilan keyingi qismlari o'rtasidagi referensial izchillikni ta'minlashda muhim rol o'ynaydi.

Diskurs tadqiqotlarida atoqli otlar referentning kognitiv faolligini ta'minlovchi vosita sifatida ham ko'rilgan. A. J. Sanford, K. Moar va S. C. Garrodning tadqiqotlari shaxsning atoqli ot orqali nomlanishi uning diskursdagi referensial kirishimliligiga ta'sir qilishi mumkinligini ko'rsatgan. Bu holat badiiy matnda personaj nomining takroriy qo'llanishi oldingi axborot bilan bog'lanishni osonlashtirishini tushuntirish uchun muhim nazariy asos beradi.

Bunday vaziyatni "matn yangi presuppozitsiya yaratadi" tarzida talqin qilishdan ko'ra, oldingi diskurs natijasida shakllangan bilimning keyingi talqin uchun mavjud bo'lishi sifatida izohlash aniqroqdir. Dinamik semantika nuqtayi nazaridan ham kontekst yangi axborot bilan boyib boradi va keyingi ifodalarning talqini ana shu yangilangan kontekstga tayanadi.

Muhokama: Olingan natijalar badiiy onomastik birlikning semantik-pragmatik tabiatini faqat referensiya doirasida izohlash yetarli emasligini ko'rsatadi. Atoqli ot, shubhasiz, muayyan referentni identifikatsiyalashning asosiy vositalaridan biridir. Biroq badiiy matnda uning to'liq talqini o'quvchining kontekstual va madaniy bilimlari bilan bog'liq.

Presuppozitiv tahlilda eng muhim masala — nom bilan bog'liq har qanday assotsiatsiyani ilmiy dalil sifatida qabul qilmaslikdir. O'quvchi bir nomni turli shaxsiy tajribalar bilan bog'lashi mumkin. Bunday individual assotsiatsiyalar matn tomonidan qo'llab-quvvatlanmasa, ular onomastik presuppozitsiyani belgilash uchun yetarli asos bo'la olmaydi.

Shu sababli badiiy nomning presuppozitiv xususiyatini aniqlashda uchta manba alohida ahamiyat kasb etadi: matnning konkret konteksti, tarixiy-madaniy jihatdan barqaror bilim va asarning oldingi qismlarida berilgan axborot. Ushbu manbalardan biri bilan tasdiqlanmagan talqin ilmiy xulosadan ko'ra erkin interpretatsiyaga yaqinlashadi.

Badiiy diskursning yana bir o'ziga xos tomoni shundaki, personajlarning bilim holati bilan o'quvchining bilim holati doimo bir xil bo'lmaydi. Bir personaj boshqa shaxsni ism bilan tilga olganda suhbatdosh mazkur referentni yaxshi bilishi mumkin, o'quvchi esa u haqida hali hech qanday ma'lumotga ega bo'lmasligi ehtimol.

Bunday holatda muallif o'quvchiga barcha axborotni darhol bermaydi. Referentning kimligi va uning syujetdagi o'rni keyingi kontekst orqali bosqichma-bosqich aniqlashtiriladi. Presuppozitsiya nazariyasidagi accommodation tushunchasi ana shunday vaziyatlarni tushuntirishda muhim: adresatda dastlab mavjud bo'lmagan ayrim axborot keyingi kommunikativ kontekst asosida qabul qilinadi va mavjud bilim tizimiga qo'shiladi.

Bu kuzatish badiiy matnda onomastik birlikning talqini faqat personajlararo kommunikatsiya bilan chegaralanmasligini ko'rsatadi. Nom bir vaqtning o'zida syujet ichidagi shaxslar munosabatida ham, muallifning o'quvchiga axborot berish strategiyasida ham ishtirok etadi.

Ingliz va o'zbek materialining qiyosiy tahlili esa onomastik presuppozitsiyaning umumiy tamoyillari ikki adabiy tizimda o'xshash ekanini ko'rsatadi. Har ikki holatda nom referentni aniqlash, avvalgi diskurs bilan bog'lanish va madaniy bilimni faollashtirish imkoniyatiga ega.

Asosiy farq mazkur bilimning tarixiy va ijtimoiy tarkibida namoyon bo'ladi. Jane Austen asarlaridagi titul va familiya tizimini uning davridagi ingliz ijtimoiy munosabatlaridan ajratib tushunib bo'lmaganidek, Qodiriy romanidagi

“hoji”, “bek” kabi nominativ komponentlarning qiymatini ham o‘zbek jamiyatining tasvirlangan tarixiy sharoitidan tashqarida to‘liq anglash mumkin emas.

Demak, qiyosiy onomastik tadqiqotda shakliy o‘xshashlik yoki farqning o‘zi yetarli emas. Har bir nominativ vositaning badiiy matnda qanday ijtimoiy, tarixiy va pragmatik bilim bilan munosabatga kirishishi aniqlanishi kerak.

Shuningdek, olib borilgan tahlil presuppozitiv mazmunni nomning etimologiyasi bilan aralashtirmaslik zarurligini ko‘rsatadi. Ismning etimologik ma’nosi badiiy talqinga ta’sir ko‘rsatishi mumkin, lekin u personajning diskursdagi umumiy mazmunini avtomatik ravishda belgilamaydi. Badiiy nomning pragmatik qiymati etimologiya, kontekst, narrativ rivojlanish va madaniy bilimning o‘zaro munosabati asosida shakllanadi.

Xulosa: Ingliz va o‘zbek badiiy matnlari asosida olib borilgan tadqiqot atoqli otning presuppozitiv imkoniyati uning referensial funksiyasi bilan uzviy bog‘liq bo‘lsa-da, unga teng emasligini ko‘rsatdi. Badiiy nom personaj yoki makonni identifikatsiyalash bilan bir qatorda matn talqini uchun zarur bo‘lgan tarixiy, madaniy, ijtimoiy va oldingi diskursga oid bilimlarni faollashtirishi mumkin.

Tadqiqot natijalariga ko‘ra, onomastik presuppozitiv mazmunni uch asosiy omil belgilaydi: nomning qo‘llanish konteksti, o‘quvchining relevant tarixiy-madaniy bilimi va matnning avvalgi qismlarida shakllangan diskursiv axborot. Mazkur omillar o‘zaro bog‘langan holda onimning konkret badiiy vaziyatdagi pragmatik qiymatini yuzaga chiqaradi.

Tahlil jarayonida tarixiy-madaniy, ijtimoiy-status, etnomadaniy, baholovchi va diskurs-oldingi bilim bilan bog‘liq presuppozitiv xususiyatlar kuzatildi. Ushbu ko‘rinishlar bir-biridan mutlaq ajralgan hodisalar emas. Konkret onomastik birlik bir vaqtning o‘zida bir necha turdagi bilimni aktual holga keltirishi mumkin. Shu sababli ularni qat’iy tasnifdan ko‘ra tahliliy jihatdan farqlanuvchi presuppozitiv manbalar sifatida ko‘rish maqsadga muvofiq.

Ingliz va o‘zbek badiiy matnlarini qiyoslash presuppozitiv mexanizmning umumiyligini, ammo uni shakllantiruvchi madaniy vositalarning o‘ziga xosligini ko‘rsatdi. Ingliz tarixiy-ijtimoiy romanlarida titul, familiya va rasmiy murojaatlarning pragmatik salmog‘i yuqori bo‘lishi mumkin. O‘zbek badiiy matnida esa diniy-ijtimoiy unvon, hurmat va qarindoshlik bilan bog‘liq nominativ vositalar ayrim tarixiy kontekstlarda alohida ahamiyat kasb etadi. Biroq bu farqlar mutlaq til xususiyati emas, balki tadqiq qilinayotgan davr, janr va ijtimoiy muhit bilan bog‘liq hodisa sifatida talqin qilinishi lozim.

Tadqiqotning asosiy ilmiy natijasi shundan iboratki, badiiy onomastik birlikning presuppozitiv xususiyatini nomning o‘ziga xos “yashirin ma’nosi” sifatida emas, balki atoqli ot, diskursiv kontekst va relevant bilim o‘rtasidagi pragmatik munosabat sifatida tushunish taklif etiladi. Bunday yondashuv onomastik birliklarni subyektiv assotsiatsiyalar asosida talqin qilishdan saqlaydi va ularning badiiy matndagi semantik-pragmatik imkoniyatlarini ilmiy jihatdan aniqroq tavsiflashga xizmat qiladi.

LEKSIK KOMPETENSIYA TUSHUNCHASI VA UNING MAKTABGACHA TA’LIM KONTEKSTIDAGI TARKIBIY TUZILISHI

Ergasheva Xilola Yunusxanovna
Namangan davlat pedagogika instituti mustaqil izlanuvchisi, Namangan, O‘zbekiston
E-mail: ergasevahilola81@gmail.com
ORCID: https://orcid.org/0009-0002-4168-3461

Annotatsiya: *Maqolada leksik kompetensiya tushunchasining ilmiy-nazariy mohiyati hamda uning maktabgacha ta’lim kontekstidagi tarkibiy tuzilishi qiyosiy-tahliliy va modellashtirish yondashuvi doirasida yoritilgan. Tadqiqot nazariy-metodologik xarakterga ega bo‘lib, uning materialini leksik kompetensiya va nutq o‘stirishga oid ilmiy-metodik adabiyot hamda maktabgacha ta’lim dasturi mazmuni tashkil etdi. Tahlil natijasida leksik kompetensiyaning beshta tarkibiy komponenti ajratildi va ularning nazariy adabiyotdagi ulushi aniqlandi: semantik (28%), pragmatik-kommunikativ (26%), lingvistik (22%), sotsiolingvistik (14%) va refleksiv-strategik (10%). Maktabgacha yosh xususiyatlaridan kelib chiqib, leksik kompetensiyaning maxsus tarkibiy elementlari (passiv va aktiv lug‘at, ma’noni tushunish, nutqda qo‘llash, emotsional-baho leksika) tavsiflandi hamda uni shakllantirishning besh bosqichli didaktik modeli taklif etildi. Tadqiqot leksik kompetensiyani yaxlit, ko‘p komponentli tuzilma sifatida talqin qilish maktabgacha nutq o‘stirish samaradorligini oshirishini asoslaydi.*

Kalit so‘zlar: *leksik kompetensiya, so‘z boyligi, maktabgacha ta’lim, nutq o‘stirish, aktiv va passiv lug‘at, semantik komponent, kommunikativ kompetensiya, tarkibiy tuzilish, didaktik model.*

ПОНЯТИЕ ЛЕКСИЧЕСКОЙ КОМПЕТЕНЦИИ И ЕЁ СТРУКТУРНОЕ СТРОЕНИЕ В КОНТЕКСТЕ ДОШКОЛЬНОГО ОБРАЗОВАНИЯ

Аннотация: *В статье в рамках сравнительно-аналитического подхода и моделирования раскрыты научно-теоретическая сущность понятия лексической компетенции и её структурное строение в контексте дошкольного образования. Исследование носит теоретико-методологический характер; его материалом послужили научно-методическая литература по лексической компетенции и развитию речи, а также содержание программы дошкольного образования. В результате анализа выделены пять структурных компонентов лексической компетенции и определена их доля в научной литературе: семантический (28%), прагматико-коммуникативный (26%), лингвистический (22%), социолингвистический (14%) и рефлексивно-стратегический (10%). С учётом возрастных особенностей дошкольников описаны специфические структурные элементы лексической компетенции (пассивный и активный словарь, понимание значения, использование в речи, эмоционально-оценочная лексика) и предложена пятиэтапная дидактическая модель её формирования. Исследование обосновывает, что трактовка лексической компетенции как целостной многокомпонентной структуры повышает эффективность развития речи дошкольников.*

Ключевые слова: *лексическая компетенция, словарный запас, дошкольное образование, развитие речи, активный и пассивный словарь, семантический компонент, коммуникативная компетенция, структурное строение, дидактическая модель.*

THE CONCEPT OF LEXICAL COMPETENCE AND ITS STRUCTURAL COMPOSITION IN THE CONTEXT OF PRESCHOOL EDUCATION

Abstract: *The article reveals, within a comparative-analytical and modelling framework, the scientific-theoretical essence of the concept of lexical competence and its structural composition in the context of preschool education. The study is theoretical-methodological in nature; its material comprised scholarly-methodological literature on lexical competence and speech development, as well as the content of the preschool education programme. The analysis identified five structural components of lexical competence and determined their share in the scholarly literature: semantic (28%), pragmatic-communicative (26%), linguistic (22%), sociolinguistic (14%) and reflexive-strategic (10%). Taking into account the age characteristics of preschoolers, the specific structural elements of lexical competence (passive and active vocabulary, understanding of meaning, use in speech, emotional-evaluative vocabulary) were*

described, and a five-stage didactic model of its formation was proposed. The study substantiates that interpreting lexical competence as an integral multi-component structure enhances the effectiveness of preschoolers' speech development.

Keywords: *lexical competence, vocabulary, preschool education, speech development, active and passive vocabulary, semantic component, communicative competence, structural composition, didactic model.*

1. KIRISH

Til ta'limining zamonaviy paradigmasi bilim, koʻnikma va malakalarni kompetensiya tushunchasi doirasida birlashtiradi. Chet tili va ona tilini oʻzlashtirishning markaziy tarkibiy qismlaridan biri leksik kompetensiya boʻlib, u shaxsning soʻz boyligini va bu boylikni nutqda maqsadga muvofiq qoʻllash qobiliyatini qamrab oladi. Leksik kompetensiya kommunikativ kompetensiyaning negizi hisoblanadi: soʻzni bilmasdan, uning ma'nosini anglamasdan va nutqda oʻrinli qoʻllamasdan turib samarali muloqot amalga oshmaydi.

Aynan maktabgacha yosh davri bola nutqi va soʻz boyligining jadal rivojlanish bosqichi hisoblanadi. Bu davrda leksik kompetensiya asoslari shakllanadi: bola soʻzlarni tushunishdan ularni faol nutqda qoʻllashga, alohida nomlashdan umumlashtirish va tasniflashga oʻtadi. Shu bois leksik kompetensiya tushunchasini nazariy jihatdan aniqlash va uning maktabgacha ta'lim kontekstidagi tarkibiy tuzilishini ochib berish alohida ahamiyat kasb etadi.

Mavzuning dolzarbligi shundaki, birinchidan, maktabgacha ta'lim davlat dasturlarida bolaning nutqiy rivojlanishi va soʻz boyligini oshirish ustuvor vazifa sifatida belgilangan. Ikkinchidan, amaliyotda leksik ish koʻpincha soʻzlar sonini oshirishga qaratilib, kompetensiyaning ma'noviy, pragmatik va refleksiv jihatlari e'tibordan chetda qoladi. Uchinchidan, leksik kompetensiyaning maktabgacha ta'limga xos yaxlit tarkibiy modeli yetarlicha ishlab chiqilmagan.

Tadqiqotning maqsadi — leksik kompetensiya tushunchasini nazariy asoslash, uning tarkibiy komponentlarini aniqlash va maktabgacha ta'lim kontekstidagi tuzilishini modellashtirishdan iborat.

Tadqiqot obyekti — maktabgacha yoshdagi bolalarda leksik kompetensiyani shakllantirish jarayoni; predmeti esa leksik kompetensiyaning mohiyati, tarkibiy komponentlari va maktabgacha ta'limga xos tuzilishidir.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda leksik kompetensiya tushunchasiga oid yondashuvlar tizimlashtiriladi, uning beshta tarkibiy komponenti va ularning ulushi aniqlanadi, maktabgacha ta'limga xos maxsus tarkibiy elementlar tavsiflanadi hamda uni shakllantirishning besh bosqichli didaktik modeli taklif etiladi.

Maqola quyidagicha tuzilgan: ikkinchi boʻlimda mavzuga oid adabiyot tahlil qilinadi va tadqiqot boʻshligʻi aniqlanadi; uchinchi boʻlimda material va metodlar tavsiflanadi; toʻrtinchi boʻlimda natijalar jadval va diagrammalarda keltirilib izohlanadi; beshinchi boʻlimda xulosa va tavsiyalar beriladi.

2. MAVZUGA OID ADABIYOTLAR TAHLILI

Kompetensiya tushunchasining lingvodidaktik asoslari kommunikativ kompetensiya nazariyasida ishlab chiqilgan. M. Canale va M. Swain kommunikativ kompetensiyani lingvistik, sotsiolingvistik, diskursiv va strategik komponentlarga ajratib, leksik bilimni lingvistik komponentning oʻzagi sifatida koʻrsatadi [1]. L.F. Bachman kommunikativ til qobiliyati modelida leksik bilimni tashkiliy kompetensiyaning muhim qismi sifatida asoslaydi [2]. Soʻz boyligini oʻzlashtirish mexanizmlari va leksik bilimning koʻp qirraliligi I.S.P. Nation tomonidan batafsil tavsiflangan: u soʻz bilimini shakl, ma'no va qoʻllash oʻlchovlariga ajratadi [3].

Bola nutqi va soʻz boyligining rivojlanish qonuniyatlari psixolingvistikada L.S. Vigotskiy va uning izdoshlari tomonidan oʻrganilgan: soʻz ma'nosining rivojlanishi tafakkur taraqqiyoti bilan uzviy bogʻliqligi asoslangan [4]. Maktabgacha yoshda nutq oʻstirish metodikasining umumiy masalalari pedagogik adabiyotda yoritilgan [5; 6], Oʻzbekistonda esa maktabgacha ta'lim mazmuni davlat oʻquv dasturida belgilangan [7]. Ona tili leksikasini oʻzlashtirish va soʻz boyligini oshirish masalalari oʻzbek tilshunosligi va metodikasida ham koʻrib chiqilgan [8].

Mavjud adabiyot tahlili muhim boʻshliqni koʻrsatadi. Birinchidan, koʻpchilik tadqiqotlar leksik kompetensiyani chet tili ta'limi kontekstida koʻrib chiqadi, uning maktabgacha ona tili ta'limidagi xususiyatlari yetarlicha ochilmagan. Ikkinchidan, leksik kompetensiyaning tarkibiy komponentlari va ularning ulushi tizimli aniqlanmagan. Uchinchidan, maktabgacha ta'limga xos yaxlit tarkibiy va didaktik model taklif etilmagan. Ushbu maqola shu boʻshliqni toʻldirishga qaratilgan.

3. TADQIQOT METODOLOGIYASI

Tadqiqot nazariy-metodologik xarakterga ega boʻlib, kompetensiyaviy, tizimli va yosh-psixologik yondashuvlarga tayanadi. Ishning empirik-eksperimental (tajriba va nazorat guruhlari asosidagi) qismi koʻzda tutilmagan; asosiy e'tibor leksik kompetensiya tushunchasining ilmiy-nazariy mohiyatini ochib berish, uning tarkibiy komponentlarini tizimlashtirish va maktabgacha kontekstda modellashtirishga qaratildi.

Tadqiqot materialini ikki manba tashkil etdi: leksik va kommunikativ kompetensiya hamda nutq oʻstirishga oid ilmiy-metodik adabiyot va maktabgacha ta'lim davlat oʻquv dasturi mazmuni. Tahlil birligi sifatida leksik kompetensiyaning tarkibiy komponenti va uning belgisi olindi. Material tarkibi 1-jadvalda keltirilgan.

1-jadval. Tadqiqot materialining tarkibi

Material turi	Manba	Tahlil birliklari
Ilmiy-metodik adabiyot	leksik/kommunikativ kompetensiya va nutq o‘stirishga oid ishlar	10
Maktabgacha ta’lim mazmuni	davlat o‘quv dasturi va uslubiy tavsiyalar	≈80 birlik
Jami	—	≈90

Tadqiqotda quyidagi nazariy metodlardan foydalanildi: ilmiy-metodik adabiyotni nazariy tahlil qilish — leksik kompetensiyaning mohiyati va komponentlarini aniqlash uchun; kontent-tahlil — komponentlarni ajratish va sanoq bo‘yicha guruhlash uchun; qiyosiy tahlil — turli yondashuvlarni solishtirish uchun; umumlashtirish va tasniflash — komponentlarni tizimlashtirish uchun; modellashtirish — leksik kompetensiyani shakllantirishning didaktik modelini ishlab chiqish uchun.

Leksik kompetensiya deganda so‘z boyligini bilish va uni nutqda o‘rinli qo‘llash qobiliyati tushunildi. Komponentlar operatsional tarzda beshga — lingvistik, semantik, pragmatik-kommunikativ, sotsiolingvistik va refleksiv-strategik guruhga ajratildi. Foizlar bir kasr belgigacha yaxlitlangani sababli yig‘indi 100 foizdan ±1 ga farq qilishi mumkin. Tadqiqotning cheklovi shundan iboratki, kontent-tahlil muayyan darajada ekspert talqiniga tayanadi.

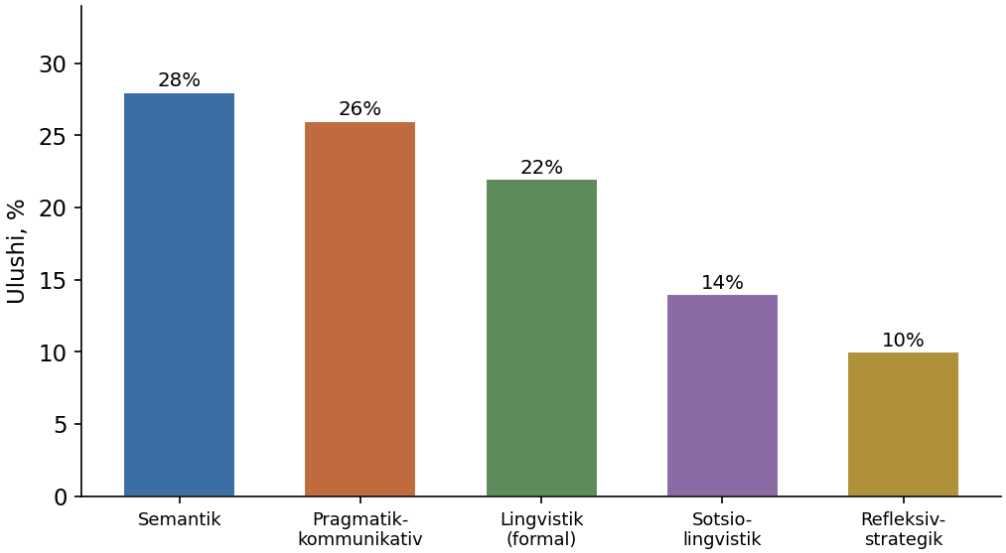
4. NATIJALAR VA TAHLIL

4.1. Leksik kompetensiya tushunchasi

Nazariy tahlil leksik kompetensiyani so‘z boyligini bilish (so‘zning shakli va ma’nosi haqidagi bilim) hamda uni nutqda faol va o‘rinli qo‘llash qobiliyatining birligi sifatida talqin qilish imkonini berdi. Turli yondashuvlarning qiyosiy tavsifi 2-jadvalda keltirilgan.

2-jadval. Leksik kompetensiyaga oid yondashuvlarning qiyosiy tavsifi

Yondashuv / muallif	Leksik kompetensiya talqini
Kommunikativ (Canale, Swain)	lingvistik kompetensiyaning o‘zagi, so‘z bilimini qamrovchi qism
Til qobiliyati (Bachman)	tashkiliy kompetensiyaning tarkibiy elementi
Leksikologik (Nation)	so‘z bilimining shakl, ma’no va qo‘llash o‘lchovlari birligi
Psixolingvistik (Vigotskiy)	so‘z ma’nosining tafakkur bilan bog‘liq rivojlanishi



4.2. Leksik kompetensiyaning tarkibiy komponentlari

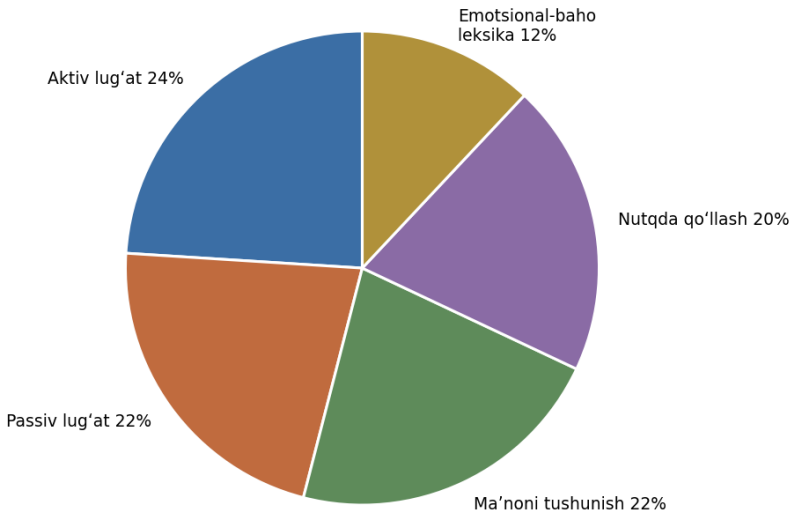
Tahlil leksik kompetensiyani beshta tarkibiy komponentga ajratish imkonini berdi. Ularning mohiyati 3-jadvalda, nazariy adabiyotdagi nisbiy ulushi esa 2-diagrammada keltirilgan.

3-jadval. Leksik kompetensiyaning tarkibiy komponentlari

Komponent	Ulushi, %	Mohiyati
Semantik	28	so‘z ma’nosini tushunish, ma’no bog‘lanishlari va umumlashtirish
Pragmatik-kommunikativ	26	so‘zni nutqiy vaziyatga mos, o‘rinli qo‘llash
Lingvistik (formal)	22	so‘z shakli, tovush-harf tarkibi, so‘z yasalishi
Sotsiolingvistik	14	madaniy-milliy va etiket leksikasini bilish
Refleksiv-strategik	10	o‘z lug‘atini nazorat qilish, noma’lum so‘z strategiyasi
Jami	100	—

2-diagramma. Leksik kompetensiya komponentlarining nisbiy ulushi (%)

Tahlil koʻrsatadiki, leksik kompetensiya tuzilishida semantik (28%) va pragmatik-kommunikativ (26%) komponentlar yetakchi oʻrin egallaydi: aynan ular soʻzni bilishdan uni maʼnoli va oʻrinli qoʻllashga oʻtishni taʼminlaydi. Lingvistik (22%) komponent soʻzning formal tomonini, sotsiolingvistik (14%) komponent madaniy-etiket leksikasini, refleksiv-strategik (10%) komponent esa oʻz lugʻatini boshqarishni qamrab oladi. Komponentlar oʻzaro bogʻliq boʻlib, leksik kompetensiyani rivojlantirish ularning barchasini nazarda tutishi lozim.



4.3. Leksik kompetensiyaning maktabgacha taʼlim kontekstidagi tuzilishi

Maktabgacha yosh xususiyatlaridan kelib chiqib, leksik kompetensiyaning umumiy komponentlari sohaga xos maxsus tarkibiy elementlarda namoyon boʻladi. Ushbu elementlar 4-jadvalda, ularning nisbiy ulushi esa 3-diagrammada keltirilgan.

4-jadval. Leksik kompetensiyaning maktabgacha taʼlimdagi tarkibiy elementlari

Element	Mohiyati	Namoyon boʻlishi
Passiv lugʻat	tushuniladigan, ammo faol qoʻllanmaydigan soʻzlar	rasm yoki buyumni nom boʻyicha tanish
Aktiv lugʻat	bola nutqida faol qoʻllaydigan soʻzlar	soʻzni mustaqil aytish va gapda ishlatish
Maʼnoni tushunish	soʻz maʼnosini anglash va farqlash	umumlashtirish, tasniflash, antonim/sinonim
Nutqda qoʻllash	soʻzni jumla va matnda ishlatish	gap tuzish, hikoya qilish, savolga javob
Emotsional-baho leksika	his-tuygʻu va munosabat soʻzlari	yoqtirish, baho va kayfiyatni ifodalash

3-diagramma. Maktabgacha leksik kompetensiya elementlarining nisbiy ulushi (%)

Maktabgacha kontekstda passiv va aktiv lug‘at (jami 46%) leksik kompetensiyaning asosini tashkil etadi: bola avval so‘zni tushunadi, so‘ngra uni faol nutqqa o‘tkazadi. Ma’noni tushunish (22%) va nutqda qo‘llash (20%) leksik bilimni kommunikativ malakaga aylantiradi, emotsional-baho leksika (12%) esa bolaning his-tuyg‘u va munosabatlarini ifodalashga xizmat qiladi. Bu elementlar bosqichma-bosqich rivojlanadi.

4.4. Leksik kompetensiyani shakllantirishning didaktik modeli

Nazariy tahlil natijasida maktabgacha yoshda leksik kompetensiyani shakllantirishning besh bosqichli didaktik modeli ishlab chiqildi. Model so‘zni idrok etishdan uni mustaqil nutqda qo‘llashgacha bo‘lgan yaxlit jarayonni qamrab oladi (5-jadval).

5-jadval. Leksik kompetensiyani shakllantirishning didaktik modeli

Bosqich	Didaktik maqsad	Faoliyat turi
Idrok (pertseptiv)	so‘zni eshitish va idrok etish	eshitish, ko‘rsatish, takrorlash
Semantizatsiya	so‘z ma’nosini ochib berish	rasm, buyum, harakat orqali izohlash
Mustahkamlash	so‘zni passiv lug‘atga kiritish	didaktik o‘yin, mashq, takror
Faollashtirish	so‘zni aktiv nutqqa o‘tkazish	gap tuzish, dialog, hikoya
Ijodiy qo‘llash	so‘zni erkin nutqda ishlatish	rolli o‘yin, hikoya to‘qish, baholash

4.5. Natijalarning muhokamasi

Nazariy tahlil leksik kompetensiyani yaxlit, ko‘p komponentli tuzilma sifatida talqin qilish zarurligini asoslaydi. Semantik va pragmatik-kommunikativ komponentlarning yetakchiligi (jami 54%) leksik ishni so‘zlar sonini oshirishdan ma’no va qo‘llashga yo‘naltirish lozimligini ko‘rsatadi. Bu I.S.P. Nation [3] va L.S. Vigotskiy [4] ta’kidlagan qoidaga mos keladi: so‘zni o‘zlashtirish uning shakli, ma’nosi va qo‘llanishi birligida kechadi.

Taklif etilgan model passiv lug‘atni aktiv lug‘atga bosqichma-bosqich o‘tkazish mantiqini aks ettiradi va maktabgacha nutq o‘stirishni tizimlashtiradi. Shu bilan birga, modelni joriy etish tarbiyachidan metodik tayyorgarlik, boy til muhiti va bolaning individual xususiyatlarini hisobga olishni talab qiladi — bu asosiy amaliy cheklovdir.

5. XULOSA

O‘tkazilgan nazariy-metodologik tahlil quyidagi xulosalarga olib keladi.

Birinchidan, leksik kompetensiya — so‘z boyligini bilish va uni nutqda o‘rinli qo‘llash qobiliyatining birligi bo‘lib, kommunikativ kompetensiyaning negizini tashkil etadi.

Ikkinchidan, leksik kompetensiya beshta tarkibiy komponentdan iborat bo‘lib, ularning ulushi quyidagicha aniqlandi: semantik (28%), pragmatik-kommunikativ (26%), lingvistik (22%), sotsiolingvistik (14%) va refleksiv-strategik (10%).

Uchinchidan, maktabgacha ta’lim kontekstida leksik kompetensiya maxsus tarkibiy elementlarda — passiv va aktiv lug‘at, ma’noni tushunish, nutqda qo‘llash va emotsional-baho leksikada — namoyon bo‘ladi.

To‘rtinchidan, taklif etilgan besh bosqichli didaktik model (idrok, semantizatsiya, mustahkamlash, faollashtirish, ijodiy qo‘llash) leksik kompetensiyani izchil shakllantirishning nazariy asosini beradi.

Amaliy tavsiyalar: (a) leksik ishni so‘z ma’nosi va nutqda qo‘llashga yo‘naltirish; (b) passiv lug‘atni aktiv lug‘atga o‘tkazuvchi didaktik o‘yin va mashqlardan foydalanish; (c) boy va rivojlantiruvchi til muhitini yaratish; (d) leksik kompetensiya darajasini baholash mezonlarini ishlab chiqish.

Tadqiqot istiqbollari taklif etilgan modelning amaliy samaradorligini baholovchi mezonlar tizimini yaratish, uni turli yosh guruhlari uchun aprobatsiya qilish hamda ikki tilli (ona tili va chet tili) leksik kompetensiyani qiyosiy o‘rganish bilan bog‘liq.

MUALLIFLAR BAYONOTLARI

Mualliflar hissasi. Maqola yakka muallif tomonidan tayyorlangan. Muallif tadqiqot konsepsiyasini ishlab chiqish, material to‘plash va tahlil qilish, natijalarni talqin etish hamda matnni yozish bosqichlarini mustaqil bajardi.

Manfaatlar to‘qnashuvi. Muallif manfaatlar to‘qnashuvi mavjud emasligini ma’lum qiladi.

Moliyalashtirish. Tadqiqot hech qanday tashqi moliyalashtirish manbaisiz, muallifning shaxsiy tashabbusi asosida amalga oshirilgan.

INGLIZ VA O‘ZBEK KOMPYUTER LINGVISTIKASI TERMINOLOGIYASIDA SEMANTIK MUNOSABATLARNING QIYOSIY TAHLILI

Begjanova Aysiliw
E-mail: aysiliubegjanova@gmail.com

Annotatsiya: *Maqolada ingliz va o‘zbek kompyuter lingvistikasi terminologiyasidagi giperonim-giponim hamda meronim-xolonim semantik munosabatlari tahlil qilinadi. Tadqiqotda kompyuter lingvistikasi terminlarining umumiy va xususiy tushunchalar o‘rtasidagi ierarxik aloqalari, shuningdek, qism va butun munosabatini ifodalovchi birliklar qiyosiy jihatdan ko‘rib chiqilgan. Tahlil natijasida language model – neural language model, corpus – parallel corpus, annotation – morphological annotation kabi birliklarda giperonim-giponim munosabati, corpus – document – sentence – token, frame element – semantic frame, tag – tagset kabi birliklarda esa meronimik munosabat namoyon bo‘lishi aniqlandi. Ingliz va o‘zbek tillarida konseptual munosabatlar ko‘p hollarda izomorf bo‘lsa-da, ularning nominativ ifodasi tilning struktur xususiyatlariga ko‘ra farqlanadi.*

Kalit so‘zlar: *kompyuter lingvistikasi, terminologiya, giperonim, giponim, meronim, xolonim, semantik munosabat, terminologik tizim.*

СОПОСТАВИТЕЛЬНЫЙ АНАЛИЗ СЕМАНТИЧЕСКИХ ОТНОШЕНИЙ В ТЕРМИНОЛОГИИ АНГЛИЙСКОЙ И УЗБЕКСКОЙ КОМПЬЮТЕРНОЙ ЛИНГВИСТИКИ

Аннотация: *В статье анализируются семантические отношения гиперонимии-гипонимии и меронимии-холонимии в терминологии английской и узбекской компьютерной лингвистики. В работе проводится сравнительный анализ иерархических связей между общими и частными понятиями в терминологии данной области, а также единиц, выражающих отношения «часть — целое». Анализ выявляет отношения гиперонимии-гипонимии в таких парах, как *language model* – *neural language model* (языковая модель – нейронная языковая модель), *corpus* – *parallel corpus* (корпус – параллельный корпус) и *annotation* – *morphological annotation* (аннотация – морфологическая аннотация), тогда как меронимические отношения наблюдаются в таких единицах, как *corpus* – *document* – *sentence* – *token* (корпус – документ – предложение – токен), *frame element* – *semantic frame* (элемент фрейма – семантический фрейм) и *tag* – *tagset* (тег – набор тегов). Несмотря на то, что концептуальные связи в английском и узбекском языках зачастую изоморфны, способы их номинации различаются в зависимости от структурных особенностей соответствующих языков.*

Ключевые слова: *компьютерная лингвистика, терминология, гипероним, гипоним, мероним, холоним, семантическое отношение, терминосистема.*

A COMPARATIVE ANALYSIS OF SEMANTIC RELATIONS IN ENGLISH AND UZBEK COMPUTATIONAL LINGUISTICS TERMINOLOGY

Abstract: *This article analyzes the semantic relationships of hypernymy-hyponymy and meronymy-holonymy within the terminology of English and Uzbek computational linguistics. The study comparatively examines the hierarchical connections between general and specific concepts in computational linguistics terminology, as well as units expressing part-whole relationships. The analysis reveals hypernym-hyponym relationships in units such as *language model* – *neural language model*, *corpus* – *parallel corpus*, and *annotation* – *morphological annotation*, while meronymic relationships are observed in units such as *corpus* – *document* – *sentence* – *token*, *frame element* – *semantic frame*, and *tag* – *tagset*. Although conceptual relationships in English and Uzbek are often isomorphic, their nominative expressions differ according to the structural characteristics of the respective languages.*

Keywords: *computational linguistics, terminology, hypernym, hyponym, meronym, holonym, semantic relationship, terminological system.*

KIRISH

Kompyuter lingvistikasi terminologiyasi oddiy terminlar yig‘indisi emas, balki o‘zaro semantik, mantiqiy va ierarxik aloqalar asosida tashkil topgan terminologik tizimdir. Shu sababli soha terminlarini faqat alohida definitsiyalar orqali

tavsiflash yetarli emas. Har bir terminning terminologik tizimdagi o‘rni, unga nisbatan yuqori va quyi darajadagi tushunchalar hamda boshqa birliklar bilan munosabati ham aniqlanishi zarur. O‘zbek terminologiyasida terminning tizimdagi o‘rni, uni tanlash va tartibga solish masalalari alohida ilmiy yo‘nalish sifatida o‘rganilgan [1–3].

Tadqiqot materialida aynan shu nuqtayi nazardan “termin → konsept → konseptlararo munosabat → terminologik tizim” modeli taklif etiladi. Bunday yondashuv terminni alohida nominativ birlik sifatida emas, balki muayyan bilim sohasi ichidagi konseptual tizimning tarkibiy elementi sifatida ko‘rib chiqish imkonini beradi.

O‘zbek tilshunosligida semantik munosabatlar Ne’matov, Rasulov, Safarova, Mirtodjiev, Dadaboev, Hojiyev, Madvaliyev, Axmedov, Paluanova va boshqa olimlar tomonidan o‘rganilgan. Mazkur tadqiqotlarda leksik-semantik, sistem-struktur, paradigmatik hamda sohaviy terminologik munosabatlarning turli jihatlari yoritilgan [1–5]. Ayniqsa, terminologik birliklarning taksonomik va meronimik aloqalarini lingvistik bazalarda modellashtirish masalalari zamonaviy tadqiqotlarda yanada rivojlantirilgan [5].

Maqolaning maqsadi ingliz va o‘zbek kompyuter lingvistikasi terminologiyasida giperonim-giponim hamda meronim-xolonim munosabatlarining mazmunini aniqlash, ularning o‘zaro farqini ko‘rsatish va terminologik tizimdagi funksiyasini ochib berishdan iborat.

METODOLOGIYA

Tadqiqotda qiyosiy-semantik, komponent va konseptual tahlil usullaridan foydalanildi. Tahlil materiali sifatida ingliz va o‘zbek tillaridagi kompyuter lingvistikasi terminlari, xususan, til modeli, korpus, annotatsiya, parsing, klassifikatsiya, elektron lug‘at, mashina tarjimasi va semantik qidiruv bilan bog‘liq birliklar olindi.

Tadqiqotning dastlabki mezoni giperonim-giponim munosabatini aniqlash uchun “X – Yning bir turi” formulasidan foydalanishdan iborat. Ikkinchi mezon esa meronim-xolonim munosabatini aniqlashda “X – Yning bir qismi” formulasi bilan belgilanadi. Terminologik birliklarning tasnifida ularning faqat shakliy yaqinligiga emas, balki ifodalagan tushunchalarining mantiqiy hajmi, mazmuni va konseptual bo‘ysunishiga tayanish zarur.

Mazkur ikki mezonning ajratilishi terminologik tasnifdagi konseptual xatolarning oldini olish uchun muhimdir. Chunki bir xil grammatik yoki leksik model asosida shakllangan terminlar har doim bir xil semantik munosabatni ifodalamaydi. Shu sababli terminlar o‘rtasidagi munosabatni aniqlashda ularning konseptual xususiyatlari asosiy mezon sifatida olinadi.

NATIJALAR

Giperonim-giponim munosabati kompyuter lingvistikasi terminologiyasining ichki ierarxiyasini tashkil etuvchi asosiy semantik munosabatlardan biridir. Giperonim kengroq tushunchani, giponim esa shu tushunchaning muayyan turini ifodalaydi. Terminologik tizimda bunday munosabat umumiydan xususiyga yo‘nalgan konseptual tartibni ta’minlaydi [4].

Masalan, language model giperonim bo‘lsa, statistical language model, neural language model va large language model uning giponimlari hisoblanadi. Xuddi shunday, corpus giperonim, monolingual corpus, parallel corpus, comparable corpus, annotated corpus esa unga nisbatan giponimik birliklardir. Annotation → morphological annotation / syntactic annotation / semantic annotation qatori ham xuddi shu munosabatni ko‘rsatadi.

Giponim giperonim tarkibidagi asosiy integral semani saqlab qoladi va unga qo‘shimcha differensial sema qo‘shadi. Masalan, *corpus* terminida elektron shaklda tashkil etilgan til ma’lumotlari majmui haqidagi umumiy tushuncha mavjud bo‘lsa, *parallel corpus* ushbu umumiy tushunchaga ikki yoki undan ortiq tillardagi o‘zaro muvofiq matnlar belgisini qo‘shadi. Natijada umumiy tushunchadan xususiy tushunchaga tomon yo‘nalgan semantik ierarxiya yuzaga keladi [4].

Bu jarayon termin tanlash va terminologik tizimni tartibga solish masalalari bilan ham bog‘liq. Terminologik birlikning aniq konseptni ifodalashi, uning boshqa birliklardan farqlanishi va tizimdagi maqomining belgilanishi terminologik me’yorlashning muhim shartlaridan biridir [2].

Qiziqarli jihati shundaki, terminning semantik maqomi doim ham bir xil emas. Masalan, morphological analyzer umumiyroq *language processing tool* tushunchasiga nisbatan giponim bo‘lishi mumkin, biroq *rule-based morphological analyzer* yoki *neural morphological analyzer*ga nisbatan giperonim vazifasini bajaradi. Demak, terminning maqomi uning tizimdagi konkret darajasiga bog‘liq [5].

Meronim-xolonim munosabati

Meronimiya giperonim-giponim munosabatidan semantik tabiati bilan farq qiladi. Bu yerda asosiy formula “X – Yning bir qismi” tarzida namoyon bo‘ladi. Terminologik tadqiqotlarda bunday munosabatni taksonomik aloqa bilan aralashtirmaslik muhimdir [5].

Masalan, corpus – document – sentence – token ketma-ketligini bir xil giponimik qator sifatida baholash mumkin emas. *Sentence corpus*ning bir turi emas, balki uning tarkibidagi til birligi sifatida qaraladi. Xuddi shunday *token* ham *corpus*ning turi emas, balki matnni kompyuter qayta ishlashi uchun ajratiladigan diskret birliklardan biridir.

Kompyuter lingvistikasi terminologiyasida meronimiya faqat moddiy “qism-butun” munosabati bilan cheklanmaydi. U komponent–tizim, element–struktura, a’zo–to‘plam, modul–arxitektura va boshqa abstrakt

munosabatlarni ham qamrab oladi. Masalan, *lemmatizer module — NLP pipeline*, *tag — tagset*, *frame element — semantic frame* birliklari bunga misol boʻla oladi [5].

Meronimik munosabatlarni aniqlashda terminlarning qanday konseptual tizim tarkibiga kirishini koʻrsatish muhim. Bu jihat elektron terminologik bazalarni yaratishda ham alohida ahamiyat kasb etadi, chunki terminni faqat ta'riflash emas, uning tizimdagi tarkibiy maqomini koʻrsatish ham zarur [3; 5].

Shunday qilib, giponimiya "tur-jins" munosabatini, meronimiya esa "qism-butun" munosabatini ifodalaydi. Ushbu farqni nazardan chetda qoldirish terminologik tizimni notoʻgʻri modellashtirishga olib kelishi mumkin.

Ingliz va oʻzbek tillarining qiyosiy xususiyatlari

Tadqiqot natijalari konseptual munosabatlarning ingliz va oʻzbek tillarida asosan oʻxshash ekanini koʻrsatadi. Buning sababi ushbu terminologiya ortida turgan ilmiy tushunchalarning umumiyligi bilan bogʻliq. Masalan, *neural language model* va *neyron til modeli*, *parallel corpus* va *parallel korpus*, *semantic annotation* va *semantik annotatsiya* kabi birliklarda asosiy konseptual munosabat saqlanib qoladi.

Biroq nominativ ifoda tilning struktur xususiyatiga bogʻliq. Ingliz tilida *neural language model*, *annotated corpus*, *dependency parser* kabi birliklarda aniqlovchi komponent odatda asosiy termin oldidan keladi. Oʻzbek tilida ham *neyron til modeli*, *annotatsiyalangan korpus* singari modellar mavjud, biroq ayrim terminlar izohlovchi komponentlar yoki oʻzbek tilining affiksal imkoniyatlari hisobiga nisbatan kengroq shakllanishi mumkin. Shu sababli semantik munosabat izomorf boʻlsa, uning nominativ ifodasi qisman allomorf xususiyatga ega boʻladi [1; 2].

Bunga *tokenization* terminining oʻzbek tilidagi tokenizatsiya, tokenlash, tokenlarga ajratish, matnni tokenlarga ajratish kabi variantlari misol boʻla oladi. Ushbu shakllar tashqi koʻrinish jihatidan farq qilsa-da, ularning asosiy yadroviy konsepti matnni keyingi kompyuter qayta ishlashi uchun shartli birliklarga ajratish jarayonini ifodalaydi. Biroq barcha variantlarni mutlaq sinonim deb baholash toʻgʻri emas, chunki terminologik birliklar ayrim holatlarda konseptning turli darajalarini ifodalashi mumkin [2; 4].

MUHOKAMA

Kompyuter lingvistikasi terminologiyasida semantik munosabatlarni toʻgʻri aniqlash nafaqat nazariy, balki amaliy ahamiyatga ham ega. Terminologik lugʻat yoki elektron ma'lumotlar bazasida atamaning faqat ta'rifi berilsa, uning konseptual maqomi toʻliq ochilmaydi. Terminning giperonimi, giponimlari, meronimlari va xolonimlarini ham koʻrsatish uning terminologik tizimdagi oʻrnini aniq belgilashga imkon beradi. Bunday yondashuv zamonaviy terminologiya va leksikografiyada terminlarning tizimiy aloqalarini ochib berish bilan bogʻliq.

Masalan, machine translation system giperonim boʻlib, rule-based machine translation system, statistical machine translation system, neural machine translation system va hybrid machine translation system giponimik qatorni hosil qiladi. Bunda har bir giponim umumiy kategoriyaning muayyan texnologik turini ifodalaydi [4].

Boshqa tomondan, semantic frame – frame element, NLP pipeline – lemmatizer module, tagset – tag kabi birliklar qism-butun aloqasini ifodalaydi. Ularni giponimik qatorga kiritish semantik jihatdan notoʻgʻri boʻladi. Meronimik munosabatning aynan shu jihati uni terminologik tasnifning mustaqil modeli sifatida ajratishni talab qiladi.

Shu asosda kompyuter lingvistikasi terminologiyasini semantik tasniflashda ikki diagnostik savoldan foydalanish maqsadga muvofiq:

"X — Yning turimi?" — giperonim-giponim munosabatini aniqlash uchun;

"X — Yning tarkibiy qismimi?" — meronim-xolonim munosabatini aniqlash uchun.

Ushbu mezonlar terminlarni konseptual jihatdan toʻgʻri guruhlash, ularning oʻzaro munosabatlarini belgilash va terminologik ma'lumotlar bazalarini shakllantirishda metodik asos boʻlib xizmat qilishi mumkin.

Mazkur yondashuv terminologik lugʻat tuzishda ham amaliy ahamiyat kasb etadi. Xususan, inglizcha-oʻzbekcha kompyuter lingvistikasi terminologik lugʻatida termin – ta'rif – giperonim – giponim – meronim – xolonim – ekvivalent – kontekst modeli terminning konseptual maqomini batafsil koʻrsatish imkonini beradi. Bu model terminologik va leksikografik ma'lumotlarni tizimlashtirishga xizmat qilishi mumkin.

XULOSA

Ingliz va oʻzbek kompyuter lingvistikasi terminologiyasidagi semantik munosabatlar terminologik tizimning ichki tuzilishini belgilovchi muhim omillardan biridir. Giperonim-giponim munosabatida umumiydan xususiyga yoʻnalgan ierarxiya yuzaga keladi. Meronim-xolonim munosabatida esa butun tushuncha va uning tarkibiy qismlari oʻrtasidagi aloqa ifodalanadi.

Tahlil natijalari ingliz va oʻzbek tillarida konseptual munosabatlarning katta qismi bir xil mantiqiy asosga ega ekanini, biroq ularning lingvistik ifodalanish shakllari tilning struktur xususiyatlariga koʻra farqlanishini koʻrsatdi. Ayniqsa, oʻzbek tilida terminlarning oʻzlashma asoslar, milliy affikslar va izohlovchi komponentlar yordamida kengayishi kuzatiladi.

Giperonimiya va meronimiyani bir-biridan aniq farqlash terminologik tasnifning ilmiy aniqligini ta’minlaydi. Bu farq elektron lug‘atlar, terminologik ma’lumotlar bazalari, semantik teglash, ontologiyalar va avtomatik tilni qayta ishlash tizimlarini yaratishda muhim ahamiyatga ega.

ERKIN A'ZAMNING "OTOYINING TUG'ILGAN YILI" QISSASIDA QAHRAMON PSIXOLOGIYASINING BADIIY TALQINI

Hasanova Shahrinoz G'olibjonovna
O'zbekiston davlat jahon tillari universiteti
Xorijiy tillar yo'nalishi, ingliz tili 3-fakulteti talabasi

Annotatsiya: *Mazkur maqolada Erkin A'zamning "Otoyining tug'ilgan yili" qissasida qahramon psixologiyasining badiiy talqini tadqiq etiladi. Tadqiqotning asosiy maqsadi yozuvchining qahramon ruhiyatini yoritishdagi badiiy mahoratini hamda psixologik tasvir vositalaridan foydalanish xususiyatlarini tahlil qilishdan iborat. Maqolada qissaning bosh qahramoni Asqar Shodibekov obrazi misolida insonning ichki kechinmalari, axloqiy tanlovi, ruhiy ziddiyatlari va ma'naviy qarashlarining badiiy ifodasi yoritiladi. Shuningdek, qahramon xarakterini shakllantirishda ichki monolog, dialog, psixologik detal, portret va ramziy tasvirlarning o'rni tahlil qilinadi. Maqola natijalari Erkin A'zam ijodida psixologizmning badiiy funksiyasini chuqurroq anglashga xizmat qiladi hamda zamonaviy o'zbek nasrida qahramon ruhiyatini tasvirlash tamoyillarini o'rganishga ilmiy hissa qo'shadi.*

Kalit so'zlar: *Erkin A'zam, qissa, badiiy obraz, xarakter, ichki monolog, ruhiy kechinma, badiiy detal, o'zbek adabiyoti.*

ХУДОЖЕСТВЕННАЯ ИНТЕРПРЕТАЦИЯ ПСИХОЛОГИИ ГЕРОЯ В ПОВЕСТИ ЭРКИНА АЪЗАМА «OTOYINING TUG'ILGAN YILI»

Аннотация: *В данной статье исследуется художественная интерпретация психологии героя в повести Эркина Аъзама «Otoyining tug'ilgan yili». Основная цель исследования заключается в анализе художественного мастерства писателя в раскрытии внутреннего мира персонажа, а также особенностей использования средств психологического изображения. В статье на примере образа главного героя повести Аскара Шодибекова рассматриваются художественное выражение внутренних переживаний человека, его нравственного выбора, душевных противоречий и духовных взглядов. Кроме того, анализируется роль внутреннего монолога, диалога, психологической детали, портрета и символических образов в формировании характера героя. Результаты исследования способствуют более глубокому пониманию художественной функции психологизма в творчестве Эркина Аъзама и вносят научный вклад в изучение принципов изображения внутреннего мира героя в современной узбекской прозе.*

Ключевые слова: *Эркин Азам, повесть, художественный образ, характер, внутренний монолог, душевное переживание, художественная деталь, узбекская литература.*

THE ARTISTIC INTERPRETATION OF CHARACTER PSYCHOLOGY IN ERKIN A'ZAM'S NOVELLA "OTOYINING TUG'ILGAN YILI"

Abstract: *This article examines the artistic interpretation of character psychology in Erkin A'zam's novella "Otoyining tug'ilgan yili". The main purpose of the study is to analyze the writer's artistic skill in revealing the inner world of the character and the specific features of using psychological representation techniques. The article explores the artistic expression of human inner experiences, moral choices, psychological conflicts, and spiritual views through the image of the main character, Asqar Shodibekov. It also analyzes the role of internal monologue, dialogue, psychological details, portrait descriptions, and symbolic images in shaping the character's personality. The findings of the study contribute to a deeper understanding of the artistic function of psychologism in Erkin A'zam's works and provide a scholarly contribution to the study of character portrayal principles in modern Uzbek prose.*

Keywords: *Erkin A'zam, novella, literary image, character, internal monologue, psychological experience, artistic detail, Uzbek literature.*

O'zbek adabiyoti XX asrning so'nggi choragida yangi badiiy tafakkur egalari hisoblangan iste'dodli ijodkorlar avlodi kirib kelishi bilan boyidi. Ular o'zbek nasrini yangi mavzular, yangicha badiiy tafakkur hamda inson ruhiyatini chuqur tasvirlash usullari bilan rivojlantirdilar. Shunday iste'dodli ijodkorlardan biri Erkin A'zam bo'lib, u o'ziga xos uslubi, hayotiy voqelikni nozik kuzatishi va inson ichki dunyosini tabiiy ifodalashi bilan zamonaviy o'zbek adabiyotida o'ziga xos o'ringa ega. Qissa va hikoya janrida samarali ijod qilib, kichik hajmli asarlar orqali ham keng hayotiy muammolarni

yoritishga muvaffaq bo‘lganligi Erkin A’zam ijodining muhim xususiyatlaridan biridir. Uning asarlarida badiiy mazmun va psixologik qatlam nihoyatda chuqurdir. Adib qahramonlarining ruhiy olamini, ichki kechinmalarini va hayotiy qarashlarini dialoglar, ichki monologlar hamda badiiy detallar vositasida yoritadi. Jumladan, **“Otoyining tug‘ilgan yili”** qissasi yozuvchining badiiy mahoratini yaqqol namoyon etuvchi asarlardan biridir. Qissada talabalik muhiti, yoshlar dunyoqarashi, insonning o‘z-o‘zi bilan ichki kurashi hamda jamiyatdagi axloqiy-me’yoriy qarashlar badiiy talqin etiladi. Yozuvchi asarning bosh qahramoni orqali shaxsning ijtimoiy muhit bilan munosabati, ichki ziddiyatlari va ruhiy izlanishlarini badiiy psixologik tasvir vositasida ochib beradi. Shuning uchun qissa faqatgina voqealar rivoji bilan emas, balki inson ruhiyatidagi murakkab kechinmalarini aks ettirishi bilan ham alohida e’tiborga loyiqdir.

Adabiyotning badiiy qiymati unda ko‘tarilgan mavzu yoki muammolar qanday badiiy mahorat bilan ifodalanganligi bilan belgilanadi. Xususan, Erkin A’zam oddiy hayotiy voqealarni chuqur falsafiy mazmun bilan boyitib, qahramon ruhiyatidagi eng nozik o‘zgarishlarni tabiiy va ishonarli tarzda tasvirlay olgan ijodkor sifatida e’tirof etiladi. Ayniqsa, “Otoyining tug‘ilgan yili” qissasida psixologik tasvirning badiiy imkoniyatlaridan samarali foydalanilgani asarning estetik qiymatini yanada oshiradi.

Badiiy adabiyotda insonning ruhiyati, ichki kechinmalari, his-tuyg‘ulari va xarakter evolyutsiyasini asosiy o‘ringa qo‘yib tasvirlash adabiyotshunoslikda ***psixologizm*** tushunchasi bilan izohlanadi. Ushbu yondashuvdan foydalangan ijodkor voqealar rivojini emas, balki voqealarning inson ruhiyatiga ko‘rsatgan ta’sirini ochib berishga e’tibor qaratadi. Shu jihatdan *psixologizm* badiiy obrazning hayotiyligi va ishonarliligini ta’minlovchi muhim omillardan biri hisoblanadi [Quronov, 2018]. Adabiyotshunos D. Quronov psixologizmni badiiy obrazning ichki mohiyatini ochish vositasi sifatida baholab, yozuvchi qahramon xarakterini faqat tashqi harakatlar orqali emas, balki uning tafakkuri, his-tuyg‘ulari va ruhiy kechinmalari orqali ham namoyon etishini ta’kidlaydi [Quronov, 2018]. Shunday qilib, zamonaviy adabiyotda inson ruhiyatini chuqur tahlil qilish badiiy haqiqatni yaratishning asosiy shartlaridan biridir.

O‘zbek adabiyotshunosligida psixologik tasvir masalasiga bag‘ishlangan tadqiqotlarda U.Normatov va N.Karimov ham badiiy xarakter yaratishda ruhiy tahlilning ahamiyatini alohida qayd etadilar. Ularning fikricha, yozuvchi qahramonning ma’naviy olamini ochishda tashqi voqealardan ko‘ra ichki kechinmalar tasviriga ko‘proq e’tibor qaratadi. Ayniqsa, o‘zbek nasrida XX asrning ikkinchi yarmida vujudga kelgan psixologik tasvir tushunchasi yetakchi poetik tamoyillardan biriga aylandi [Karimov, 2008; Normatov, 2007].

Rus adabiyotshunosi Lidiya Ginzburg psixologik nasrni inson ongining badiiy tadqiqi sifatida baholab, qahramonning ichki dunyosini ochishda muallif turli tasvir vositalaridan kompleks tarzda foydalanishini ta’kidlaydi [Ginzburg, 1977]. Uning fikricha, psixologizm faqat ichki monolog bilan chegaralanmaydi; portret, dialog, badiiy detal va hatto makon ham qahramon ruhiyatini yoritishda muhim vazifa bajaradi. M. Baxtin badiiy asardagi dialogiklik nazariyasini ishlab chiqib, qahramon shaxsiyatini anglashda uning boshqa obrazlar bilan muloqoti va ichki ovozining o‘zaro uyg‘unligini muhim omil sifatida izohlaydi [Bakhtin, 1981]. Mazkur qarash zamonaviy nasrda qahramon ruhiyatini ifodalash usullarini chuqurroq tahlil qilishga yordam beradi. Psixologik tasvirning eng samarali vositalaridan biri ichki monologdir. Ichki monolog orqali qahramonning aytilmagan fikrlari, shubhalari, xotiralari va ruhiy iztiroblari bevosita o‘quvchiga yetkaziladi. Yuqorida ta’kidlanganidek, portret tasviri, dialoglar, psixologik detallar va peyzaj ham qahramonning hissiy holatini ifodalashda muhim estetik vazifani bajaradi. Tabiat manzarasi ko‘pincha qahramonning ruhiy holati bilan uyg‘unlashib, uning kayfiyati va ichki ziddiyatlarini ramziy tarzda aks ettiradi. Erkin A’zam ijodida ham psixologizm ana shu badiiy vositalarning uzviy uyg‘unligi orqali namoyon bo‘ladi. Yozuvchi qahramonlarning ichki olamini keskin voqealar emas, balki oddiy hayotiy vaziyatlar, esdaliklar, sukut, nigoh va mayda badiiy detallar vositasida ochib beradi. Ayniqsa, “Otoyining tug‘ilgan yili” qissasida qahramon ruhiyatining bosqichma-bosqich ochilishi psixologik tasvirning yetakchi poetik tamoyilga aylanganini ko‘rsatadi. Shu sababli mazkur qissani psixologizm nuqtayi nazaridan tahlil qilish yozuvchining badiiy mahoratini chuqurroq anglash imkonini beradi.

“Otoyining tug‘ilgan yili” qissasining badiiy tuzilishida qahramonning ichki olami yetakchi o‘rinni egallaydi. Muallif voqealarni shunchaki bayon qilish bilan cheklanmay, Asqar Shodibekovning ruhiy izlanishlari, axloqiy tanlovlari va ma’naviy kechinmalarini asarning asosiy mazmuniy o‘qiga aylantiradi. Muallif Asqar Shodibekov obrazini tashqi harakatlar orqali emas, balki uning fikrlash tarzi, voqelikka munosabati va ichki ziddiyatlari orqali shakllantiradi. Shu jihatdan qissa o‘zbek nasrida psixologik realizm an’analarini davom ettirgan asarlardan biri sifatida e’tiborga loyiq. Asqar Shodibekovning xarakteri ilk sahifalardanoq boshqa qahramonlardan ajralib turadi. Muallif uni “mag‘zi to‘q yong‘oq” sifatida tavsiflaydi. Bu o‘xshatish qahramonning tashqi ko‘rinishini emas, balki uning ichki mohiyatini ifodalaydi. Asqar yuzaki taassurotlar bilan kifoyalanmaydi, har qanday hodisaning tub mohiyatini anglashga intiladi. Boshqa talabalar savolga javob izlash bilan band bo‘lgan bir paytda, Asqar uning tuzilishi va mazmunini tahlil qiladi. Uning e’tibori javobni yoddan aytishga emas, masalaning mohiyatini anglashga qaratilgani qahramon xarakterining muhim belgilaridan biridir. Aynan shu epizod qahramonning mustaqil tafakkuri, tanqidiy fikrlashi va tayyor qarashlarni so‘zsiz qabul qilmaydigan tabiatini ochib beradi. Quronov ta’kidlaganidek, psixologizm qahramonning ichki tafakkur jarayonini badiiy vositalar

orqali ochishga xizmat qiladi [Quronov, 2018]. Mazkur epizodda ham Asqarning xarakteri tashqi harakatdan ko‘ra uning fikrlash usuli orqali namoyon bo‘ladi.

Qissada qahramonning ruhiy olami uning atrofidagi insonlarga bo‘lgan munosabatida ham yaqqol ko‘rinadi. Asqar tashqi jozibaga emas, ma’naviy yaqinlik va samimiyatga ustuvor ahamiyat beradi. Shu sababli u ko‘pchilik talabalar bilan fikriy mushtaraklik topa olmaydi, ammo akasi, Ubaydullaev domla va Dilora Jo‘raeva kabi insonlarga chuqur hurmat bilan qaraydi. Raxshona obraziga munosabati ham aynan ruhiy yaqinlik asosida shakllanadi. Muallif qahramonning muhabbatini tashqi go‘zallik emas, balki insonning ichki dunyosini qadrlash orqali asoslaydi. Bu holat Asqarning ma’naviy mezonlari jamiyatdagi yuzakilikdan farq qilishini ko‘rsatadi. Asar psixologizmining eng muhim belgilaridan biri qahramonning ichki monologlaridir. Asqarning: *“rostini aytmasam... ichimda yana bir odam paydo bo‘lib, men bilan bahslashadi”* degan e’tirofi uning ruhiy olamini ochuvchi muhim badiiy detal hisoblanadi. Ushbu jumlada vijdon tashqi hukm chiqaruvchi kuch emas, balki qahramonning o‘z ichida yashayotgan ma’naviy mezon sifatida gavdalanadi. Ginzburg [1977] psixologik nasrning asosiy belgisi sifatida inson ongidagi ichki dialogni ko‘rsatadi. Asqarning ichki monologlari ham ana shu nazariy qarashni tasdiqlaydi: u har qanday qarorni avvalo o‘z vijdoni bilan “muhokama qiladi”. Muallif shu yo‘l bilan qahramonning axloqiy butunligini namoyon etadi.

Qissada ichki ziddiyat tashqi mojaro bilan emas, balki shaxs va vijdon o‘rtasidagi qarama-qarshilik orqali ifodalanadi. Asqar haqiqatni aytish oqibatida aziyat chekishini biladi, biroq sukut saqlashni ham o‘ziga nisbatan xiyonat deb hisoblaydi. Uning “aytmasam...” degan iztiroblari qahramonning ruhiy kurashini kuchaytiradi. Bu kurash uni sindirmaydi, aksincha, ma’naviy jihatdan chiniqtiradi. Shunday qilib, muallif jasoratni jismoniy kuch bilan emas, balki insonning o‘z e’tiqodiga sodiq qolishi bilan bog‘laydi.

Asqarning ruhiy kechinmalarida muhabbat alohida o‘rin tutadi. Matluba bilan bog‘liq muvaffaqiyatsizlik qahramon qalbida chuqur bo‘shliq hosil qiladi. U o‘zining ichki holatini bo‘m-bo‘sh yurak timsoli orqali ifodalaydi. Bu yerda muallif hissiy holatni balandparvoz tasvirlar bilan emas, balki sodda, ammo ta’sirchan badiiy vositalar orqali ochadi. Keyinchalik Raxshonaning hayotiga kirib kelishi Asqarning ruhiyatida yangi umid uyg‘otadi. Muhabbat bu qissada romantik hissiyotdan ko‘ra insonning ma’naviy tiklanishiga xizmat qiluvchi psixologik omil sifatida talqin etiladi.

Erkin A’zam qahramon psixologiyasini ochishda psixologik detallardan ham mohirona foydalanadi. Sukut, nigoh, oddiy buyumlar, kundalik uchrashuvlar va mayda voqealar qahramonning ichki kechinmalarini ifodalash vositasiga aylanadi. Baxtin [1981] ta’kidlaganidek, badiiy asardagi ma’no faqat dialoglarda emas, balki qahramonning boshqa obrazlar bilan munosabati va ichki ovozida ham shakllanadi. Qissada ham aynan shu usul kuzatiladi: Asqarning atrofidagi insonlarga munosabati uning xarakterini ochuvchi muhim psixologik mezon vazifasini bajaradi. Asqar obrazi o‘jar va qaysar ko‘rinsa-da, uning bu xususiyatlari oddiy fe’l-atvor belgisi emas, balki ma’naviy pozitsiyasining ifodasidir. U jamiyatdagi loqaydlik, xushomadgo‘ylik va soxtalikni qabul qilmaydi. Shu bilan birga, u jamiyatni o‘zgartirish da’vosi bilan chiqmaydi; aksincha, avvalo o‘zining ichki erkinligini saqlab qolishga intiladi. Qahramonning kuchi ham aynan shundadir. U tashqi muhit bilan murosa qilmaydi, biroq bu murosasizlik shaxsiy manfaat emas, axloqiy e’tiqodga asoslanadi. Qissaning yakuniga yaqin Asqarning “Mumkin ekan!” degan xulosaga kelishi uning ruhiy evolyutsiyasining yakuniy nuqtasini bildiradi. Bu jumla oddiy quvonch ifodasi emas, balki uzoq davom etgan ichki kurashning ma’naviy g‘alabasidir. Muallif qahramonni mutlaq g‘olib yoki mutlaq mag‘lub sifatida emas, balki hayot sinovlari orqali o‘zligini anglagan shaxs sifatida tasvirlaydi. Shu jihatdan “Otoyining tug‘ilgan yili” qissasi inson ruhiyatining nozik qatlamlarini ochib beruvchi, psixologik tasvir vositalaridan samarali foydalangan o‘zbek nasrining muhim namunalaridan biri hisoblanadi.

Erkin A’zamning **“Otoyining tug‘ilgan yili”** qissasi zamonaviy o‘zbek nasrida psixologik tasvirning badiiy imkoniyatlarini yorqin namoyon etgan asarlardan biridir. Mazkur tadqiqot natijalari shuni ko‘rsatdiki, yozuvchi qahramon ruhiyatini ochishda voqealar ketma-ketligidan ko‘ra insonning ichki kechinmalari, axloqiy tanlovi va ma’naviy izlanishlariga ko‘proq e’tibor qaratadi. Asarda psixologizm qahramonning fikrlash tarzi, ichki monologi, ruhiy ziddiyatlari hamda badiiy detallar orqali izchil ifodalanadi.

Tahlil jarayonida Asqar Shodibekov obrazi o‘z davrining ijtimoiy muhitiga tanqidiy nigoh bilan qaraydigan, mustaqil fikrlovchi va o‘z e’tiqodiga sodiq qoladigan shaxs sifatida namoyon bo‘lishi aniqlandi. Uning xarakteri tashqi harakatlar yoki keskin voqealar orqali emas, balki vijdon bilan kechadigan ichki kurash, haqiqatni izlashga bo‘lgan intilish, muhabbat, mehr, mas’uliyat va ruhiy iztiroblar vositasida shakllanadi. Shu jihatdan Asqar obrazi an’anaviy qahramonlardan farq qilib, zamonaviy o‘zbek nasrida psixologik xarakter yaratishning muvaffaqiyatli namunalaridan biri sifatida e’tirof etilishi mumkin. Shuningdek, qissada ichki monolog, dialog, portret, psixologik detal hamda ramziy tasvirlar qahramonning ruhiy holatini ochishda muhim badiiy vosita vazifasini bajarishi kuzatildi. Muallif oddiy hayotiy vaziyatlar orqali inson qalbida kechadigan murakkab ruhiy jarayonlarni tabiiy va ishonarli tarzda tasvirlay olgan. Ayniqsa, sukut, nigoh, kundalik muloqot va xotiralar qahramonning ichki dunyosini yorituvchi estetik vositalarga aylangan. Nazariy manbalar hamda qissa tahlili o‘zaro qiyoslanganda, Erkin A’zam ijodida psixologizm faqat badiiy usul emas, balki inson shaxsini anglashga xizmat qiluvchi poetik tamoyil ekani namoyon bo‘ladi. Yozuvchi qahramonning ma’naviy

olamini tasvirlash orqali jamiyatdagi loqaydlik, soxtalik va xushomadgo‘ylik kabi illatlarga munosabat bildiradi hamda insonning ruhiy erkinligi va axloqiy sobitligini yuksak qadriyat sifatida ilgari suradi.

Xulosa qilib aytganda, **“Otoyining tug‘ilgan yili”** qissasi psixologik realizm tamoyillarini o‘zida mujassamlashtirgan, inson ruhiyatining murakkab qatlamlarini badiiy mahorat bilan yoritgan asar hisoblanadi. Qissadagi Asqar Shodibekov obrazi orqali Erkin A’zam shaxsning ichki olami, e’tiqodi va ma’naviy tanlovini chuqur tahlil etishga erishgan. Shu bois mazkur asar nafaqat yozuvchi ijodini, balki zamonaviy o‘zbek nasrida psixologizm masalasini o‘rganishda ham muhim ilmiy manba sifatida alohida ahamiyat kasb etadi.

KALIDASA MEROSI: “SHAKUNTALA” DRAMASI, UNDAGI ASOSIY MAVZU VA G‘OYA

Kanalimova Asel Qudabek
Toshkent davlat Sharqshunoslik universiteti 4-kurs talabasi
E-mail: kanalimovaa@gmail.com

Annotatsiya: *Mazkur maqola qadimgi hind adabiyotining yirik vakili Kalidasaning ijodiy merosi va “Shakuntala” asari tahliliga bag‘ishlanadi. Maqolada Kalidasa merosining jahon va o‘zbek sharqshunosligida o‘rganilishi hamda tarjima tarixi, asarlaridagi o‘ziga xos uslubi va ularning ahamiyati tadqiq etiladi. Tadqiqot badiiy-adabiy va matn tahlili metodlariga tayanadi hamda “Shakuntala” dramasi, undagi asosiy mavzu va g‘oyani yaxshiroq tushunishga xizmat qiladi.*

Kalit so‘zlar: *Kalidasa, ”Shakuntala”,”Mahabharata”,“Vikramorvashiyam” Malavikagnimitram”, “Kumarasambhava”, “Meghaduta”, “Ritusamhara”, Rasa, Alankara, Dhvani, Rasa, Vakrokti, Auchitya.*

НАСЛЕДИЕ КАЛИДАСЫ: ДРАМА «ШАКУНТАЛА», ЕЁ ОСНОВНАЯ ТЕМА И ИДЕЯ

Аннотация: *Данная статья посвящена творческому наследию выдающегося представителя древнеиндийской литературы Калидасы и анализу его произведения «Шакунтала». В статье исследуются история изучения и перевода наследия Калидасы в мировом и узбекском востоковедении, уникальный стиль его произведений и их значение. Исследование опирается на методы художественно-литературного и текстологического анализа и способствует более глубокому пониманию драмы «Шакунтала», её основной темы и идеи.*

Ключевые слова: *Калидаса, ”Шакунтала”, ”Махабхарата”, ”Викраморвашиям”, ”Малавикагнимитрам”, ”Кумарасамбхава”, ”Мегхадута”, ”Ритусамхара”, Раса, Аланкара, Дхвани, Раса, Вакрокти, Аучитья.*

THE HERITAGE OF KALIDASA: THE DRAMA “SHAKUNTALA”, ITS MAIN THEME AND IDEA

Abstract: *This article is dedicated to the creative heritage of Kalidasa, a prominent figure in ancient Indian literature, and the analysis of his work ”Shakuntala”. The article explores the history of the study and translation of Kalidasa’s heritage in world and Uzbek Oriental studies, the unique style of his works, and their significance. The research relies on literary and textual analysis methods and serves to better understand the drama ”Shakuntala”, its main theme, and its core idea.*

Keywords: *Kalidasa, ”Shakuntala”, ”Mahabharata”, ”Vikramorvashiyam”, ”Malavikagnimitram”, ”Kumarasambhava”, ”Meghaduta”, ”Ritusamhara”, Rasa, Alankara, Dhvani, Rasa, Vakrokti, Auchitya.*

KIRISH

Jahon adabiyoti tarixida hind adabiyoti o‘zining qadimiyligi, boyligi va betakror badiiy xususiyatlari bilan alohida o‘rin tutadi. Insoniyat sivilizatsiyasining ilk bosqichlaridan boshlab shakllana boshlagan hind madaniyati o‘zining ko‘p qirrali merosi bilan dunyo xalqlarining ma’naviy boyligiga ulkan hissa qo‘shgan. Bunda Kalidasa betakror badiiy uslubi, falsafiy qarashlari bilan ajralib turuvchi shoir va dramaturgdir. U yashagan davrdan to bugunga qadar asrlar o‘tgan bo‘lsa-da, adib asarlarining ma’naviy-estetik qiymati eskirmagan, aksincha, bugungi kun zamonaviy adabiyotshunoslik va dramaturgiya uchun ham muhim manba bo‘lib xizmat qilmoqda. O‘z adabiyotiga bo‘lgan sadoqat nuqtai nazaridan hech bir Yevropa davlati Hindiston bilan tenglasha olmaydi. Hindi milliy shoh asarlarni asrlar davomida emas, balki ming yillar davomida saqlab qolish va ularni talqin qilishga bag‘ishlangan silsila bugungi kunda ham davom etib kelmoqda. Asarlari asosan X asrlardayoq muomaladan chiqib ketgan sanskrit tilida yaratilgan bo‘lishiga qaramasdan, uning turli nusxa va tarjimalari nafaqat hind va dravid tillarida, balki jahonning ko‘pgina tillarida ham mavjuddir.

Buyuk dramaturg adib Kalidasa haqida aniq biografik ma’lumotlar mavjud bo‘lmasa-da, uning asarlaridan hamda rivoyatlarga tayanib unung Guptalar imperiyasi davrida ya’ni Hindistonda har bir soha o‘zining rivojlanish cho‘qqisiga «Oltin davr»da yashab o‘tgan deya taxmin qilinadi. Buyuk grammatist Patanjali, matematik Aryabhatta, astronom Brahmaguptalar aynan shu davrda yashab ijod etganlar. Kalidasa ijodi ham aynan mana shu davrga to‘g‘ri kelib, bu davrda hind dramaturgiyasi ham o‘zining taraqqiyot cho‘qqisiga erishgan. Kalidasa ijodida hind adabiyotida birinchi bor gumanistik g‘oyalar shakllandi. Diniy dunyoqarash hukm surgan, kastachilik tizimi kuchli bo‘lgan bir davrda hind

jamiyatida gumanistik g‘oyalarning adabiyotga kirib kelishi o‘z navbatida adabiyotning va umuman hind jamiyati ongining taraqqiyotidan darak beradi.Kalidasaning Hindistonning qaysi yerida tug‘ilib o‘sgani haqqida aniq malumotlar mavjut emas. Adib asarlarida bu haqda hech narsa yozmagan, lekin uning asarlaridan Kalidasaning Hindistonning har bir burchagini qanchalik yaxshi bilganligi xayratlanarli.

Kalidasaning "Shakuntala" asarning syujet asosi qadimgi "Mahabharata" eposidan olingan bo‘lib, buyuk Bharata shohi va uning sulolasi tarixi bilan bog‘liq. Dastlab sanskrit tilida yaratilgan pyesa keyinchalik mahalliy hind tillariga o‘girilgan, natijada asl sanskritcha varianti deyarli unutilgan. Asar markazida shoh Dushyanta va avliyo qizi Shakuntala o‘rtasidagi pokiza sevgi tarixi yotadi. Ularning munosabatlari hijron, e’tiborsizlik oqibatida yuzaga kelgan duoibad, sabr-matonat va nihoyat haqiqatning tantana qilishi kabi bosqichlardan iborat murakkab yo‘lni bosib o‘tadi. Ushbu tahlilda asarning mazmun-mohiyati, unda ilgari surilgan diniy-axloqiy g‘oyalar va badiiy-falsafiy yakun ilmiy nuqtai nazardan yoritib beriladi.

Mavzuning dolzarbligi. Kalidasa merosini o‘rganish qadimgi hind klassik adabiyoti uslubini va insoniy tuyg‘ularning badiiy talqinini anglashda ahamiyatga ega. Sof muhabbat, inson munosabatlari tabiat va lanshaft shoir asarlarida bugungi globallashuv davrida ham o‘z dolzarbligini yo‘qotgan emas, Aksincha jahon miqiyosida o‘tkazilayotgan tadqiqotlarda Adabiyot va dramaturgiya bilan bir qatorda Janubiy osiyo hududining qadimgi VI-V asrdan to bugungacha bioxilma-xillik va ekosistema hamda tibbiyot , geografiya va topografiya kabi sohalarning rivojiga hissa qoshib bir qancha izlanishlarga asos bo‘lib xizmat qilmoqda. Kalidasaning "Shakuntala" asarida adolat va haqiqat g‘oyasi sifatida — asar insonlarga qanchalik og‘ir sinovlar bo‘lmasin, haqiqat va adolat oxir-oqibat tantana qilishiga bo‘lgan ishonchni mustahkamlaydi, bu esa har qanday davr va jamiyat uchun ruhiy tayanch bo‘lib xizmat qiladi. Madaniyatlararo muloqot nuqtai nazaridan asar Sharq falsafasi, xususan hind dharma tizimidagi burch, karma va poklanish tush

Tadqiqotning maqsadi va vazifalari. Ushbu maqolaning asosiy maqsadi — Kalidasaning shaxsiyati, boy adabiy merosi o‘rganish. Unining asarlaridagi o‘ziga xos uslubi va asarlarining ahamiyatini ko‘rsatib berish. Shakuntala asarini teranroq o‘rganish, undagi mavzu va g‘oyani tahlil qilish.

Mavzuning o‘rganilganligi. 1789-yili ingliz sudyasi Vilyam Jons Ost-Indiya kompaniyasida xizmat qilayotganida sanskrit tilini ham o‘rganadi va Kalidasaning «Shakuntala» nomli asarini ingliz tiliga tarjima qiladi. Ushbu ingliz tilidagi asarni 1791-yili nemis sayyohi, olimi va inqilobchisi Georg Forster nemis tiliga o‘giradi. O‘z tarjimasining bir nusxasini u Gyotega yuboradi va Gyote bu asarga yuqori baho beradi.

1860-yillarda yirik sanskritshunos Doktor Bhau Daji Kalidasaning yashagan davrini aniqladi va Kalidasa qaysi asrda yashaganligi birinchi bo‘lib Sanskrit matinlarni o‘qib qadimgi sanskrit raqamlarini to‘liq shifrlab ilmiy asoslab berdi va uning hayotini taxminan VI asrning o‘rtalariga bog‘ladi. Bu kashfiyot keyingi barcha adabiyotshunoslar uchun Kalidasa asarlarini tarixiy kontekstda to‘g‘ri tahlil qilishga asos bo‘lib xizmat qildi.

Asqad Muxtor (O‘zbekiston xalq yozuvchisi) 1973-1975-yillarda — Kalidasaning dunyoga mashhur sevgining lirik madhi hisoblangan "Meghaduta" ("Xabarchi bulut") dostonini hamda "Ritusamhara" ("Yil fasllari") turkum she’rlarini o‘zbek tiliga she’riy yo‘l bilan juda nafis tarzda tarjima qilgan.

Bugungi kunda Kalidasa merosi jahon miqyosda ham an’anaviy sharqshunoslik, ham zamonaviy fanlararo mantiq asosida o‘rganilib kelinmoqda. Hindistonning o‘zida shoir ijodi milliy klassikaning cho‘qqisi sifatida davlat darajasida tadqiq etiladi. Ujayn shahridagi "Kalidasa Akademiya"si bu boradagi eng yirik ilmiy markaz bo‘lib, u yerda har yili xalqaro konferensiyalar o‘tkaziladi va shoir asarlarining yangi tanqidiy matnlari chop etiladi. So‘nggi yillarda hind olimlari uning matnlarining adabiyot va tabiat aloqasi yo‘nalishida tahlil qilib, dostonlardagi geografik, biologik va iqlimiy ma’lumotlarning aniqligini ilmiy asoslab berishilmoqda. Xalqaro miqyosda esa Kalidasa Kolumbiya, Oksford va Garvard kabi nufuzli universitetlarning qiyosiy adabiyotshunoslik dasturlariga kiritilgan. Clay Sanskrit Library va Penguin Classics kabi yirik loyihalar doirasida shoir asarlarining sharhlangan yangi inglizcha tarjimalari taqdim etilmoqda. Kalidasa ijodi alohida o‘ringa ega bo‘lib, uning asarlari va hind klassik poetikasida Sharq uyg‘onish davri namunalari bilan qiyosiy-kognitiv yo‘nalishda muntazam tadqiq qilinmoqda.

ADIB MEROSI

Kalidasa hind dramaturgiyasini rivojlantirishga ulkan hissa qo‘shgan. Kalidasada aktyorlik qobiliyati ham yuksak darajada rivojlangan bo‘lgan, chunki u barcha dramalarini o‘zi sahnalashtirganligi ko‘lab hindshunos olimlari tomonidan manbalarda takidlab o‘tilgan. Hind mutaxassislari Kalidasa ijodini o‘rganish jarayonida uning nomi bilan bog‘liq juda ko‘p asarlar topganlar, lekin bugungi kunda aynan Kalidasa qalamiga mansub jami yettita asar tan olingan. Ular asosan liro-epik pyesalardir. Ularning nomlanishi quyidagichadir:

Kalidasaning adabiy merosi (asosiy asarlari)

1-jadval

Asar	Janri	Hajmi	Asosiy mavzusi
"Abhijnanashakuntalam" ("Shakuntala")	drama (nataka)	7 parda	Shakuntala va podshoh Dushyanta muhabbati
"Vikramorvashiyam"	drama	5 parda	Pururavas va Urvashi afsonasi
"Malavikagnimitram"	drama	5 parda	Malavika va podshoh Agnimitra
"Raghuvamsha"	mahakavya (doston)	19 sarga, ~1570 bayt	Raghu (Quyosh) sulolasi shohlari
"Kumarasambhava"	mahakavya	8 sarga	Xudo Kumara (Kartikeya)ning tugʻilishi
"Meghaduta"	lirik doston	~111 bayt	Xabarchi- bulut
"Ritusamhara"	lirik doston	6 sarga (6 fasl)	Yil fasllari

Kalidasa oʻz ijodida barcha hind shoir va yozuvchilari qatori qadimgi hind adabiyotiga tayangan holda ijod qilgan. U avval ularni chuqur oʻrganib chiqqan va ulardan taʼsirlanib oʻzining shoh asarlarini yaratgan. Koʻpgina hind yozuvchilariga qadimgi hind adabiy yodgorliklari boʻlmish "Mahabharata" va "Ramayana" eposlari syujet va mavzu manbai boʻlib xizmat qilib kelgan. Mana shu eposlarda hind xalqining asl dunyoqarashi, ularni qaygʻuga solgan muammolar, hind xalqining maʼnaviyati, qarindosh-urugʻchilik, ularning bir-biriga boʻlgan yuqori saviyadagi munosabati, taxt va vorislik masalalari, bu muammolarni toʻgʻri hal qilish yoʻl-yoʻriqlari, inson va Yaratgan oʻrtasidagi munosabat, dunyo va uning mohiyati, ezgulik va yovuzlik oʻrtasidagi kurash va ezgulikning doim gʻolib chiqishi va shunga oʻxshash hayot uchun, yashash uchun zarur boʻlgan barcha hayotiy muammolar oʻz yechimini topgan. Shu sabab bu eposlarga kitobxonlar va yozuvchilar qayta-qayta murojaat qilganlar va bugungi kunda ham mana shu anʼana hind adabiyotida davom etib kelmoqda. Kalidasa ham oʻz navbatida mana shu asarlardan taʼsirlanib, oʻziga ulardan mavzu tanlab, personajlar tanlab, oʻtkir gʻoyali asarlarni yaratgan. Uning shunday asarlaridan biri bu "Shakuntala" dramasidir.

KALIDASA ASARLARINING USLUBI VA AHAMIYATI

Asarlaridagi uslubi. Adabiyot — bu soʻzlar yigʻindisi emas, balki soʻz bilan maʼnoning uygʻunligidir. Ularning bir-biriga mos tushishi oʻquvchiga chinakam zavq bagʻishlaydi. Mana shu goʻzallik qonuniyatlarini oʻrganadigan fan adabiyotshunoslik deyiladi. Hind sheʼriyati oʻzining teran mantiqi va inson hissiyotlarini nozik tahlil qila olishi bilan mashhur. Hind olimlari qadimdan "Sheʼr qanday qilib odamni yigʻlatishi yoki quvontirishi mumkin?" degan savol ustida uslublar yaratishgan. Qadimgi hind adabiyotshunosligida oltita yirik maktab (oqim) mavjud boʻlib, ularning har biri sheʼrning goʻzalligini har xil narsada (kimdir tuygʻuda, kimdir uslubda, kimdir mantiqda) deb bilgan.

2-jadval

Qadimgi hind (sanskrit) poetikasining oltita asosiy maktabi

Maktab	Asoschisi	Asosiy asari	Bosh gʻoyasi
Rasa	Bharata	*"Natyashastra"*	Estetik tuygʻu (rasa) — sheʼr qalbi
Alankara	Bhamaha	*"Kavyalankara"*	Badiiy bezaklar sheʼr goʻzalligini belgilaydi
Riti	Vamana	*"Kavyalankara-sutravritti"*	Uslub (riti) — sheʼr ruhi
Dhvani	Anandavardhana	*"Dhvanyaloka"*	Yashirin maʼno (dhvani) — sheʼr qalbi
Vakrokti	Kuntaka	*"Vakroktijivita"*	Koʻchma, oʻziga xos ifoda
Auchitya	Kshemendra	*"Auchityavicharacharcha"*	Mutanosiblik, badiiy vositalarning mosligi

Kalidasa naturalistik shoir edi va uning asarlari qadimiy Dharmik Vedalar, Falsafa, Astrologiya va Upanishadlarga asoslangan boʻlib, bular uning intellektual kuchini namoyish etadi. Shu bilan birga Natya-shastraning oʻrni ham beqiyqiyos, ular pyesalarning butun poydevorini tashkil etadi. Gumboldt shunday yozadi: "Tuygʻularning ifodalanishidagi

noziklik va ijodiy xayolotning boyligi Kalidasaga jahon adiblari orasida yuksak o‘rin berdi". Kalidasa adabiy kompozitsiyaning turli xususiyatlarini ifodalash uchun Riti, Rasa, Metrdan foydalangan.

Kalidasa o‘zining uslubi bilan mashhur, O‘zining dunyoqarashi va estetik mahorati bilan Kalidasa so‘zlarga hayot bag‘ishlagan. U "Vaidribhi" uslubini qabul qilgan. "Prasad guna" — Vaidribhi uslubining asosiy xususiyati hisoblanadi. Vaidribhi uslu bi Acharya Dandinni juda ilhomlantirgan. Dandinning so‘zlariga ko‘ra, Kalidasa Vaidribhi uslubini birinchi bo‘lib asoslagan kishi edi. Riti maktabiga Vamana asos solgan. She’riyatning ruhi — bu Riti (uslub). "Guna"lar ikki toifaga bo‘linadi tovush bilan bog‘liq bo‘lganlar va ma’no bilan bog‘liq bo‘lgan.

Kalidasa o‘z asarlarida asosan "Rasa"dan foydalangan. Uning asosiy qiziqishi drama san’atiga qaratilgan bo‘lsa-da, rasa nazariyasi adabiyotning barcha janrlariga tatbiq etilgan. Bu tushuncha matnning hissiy jihatini va o‘quvchi qabul qiluvchining unga qanday munosabatda bo‘lishini ta’kidlaydi.

Kalidasa asarlari klassik Sanskrit va prakrit tillarida yozilgan , madura va prasad gunalarga boy. U uzun va murakkab jumlalarni emas, balki qisqa va sodda jumlalarni ishlatgan. Ahamiytlisi, Kalidasa she’riyatida so‘zlarni vaziyat yoki kontekstga moslashtirgan.

पातुं न प्रथमं व्यवस्यति जलं युष्मास्वपीतेषु या
नादत्ते प्रियमण्डनापि भवतां स्नेहेन या पल्लवम् ।
आद्ये वः कुसुमप्रसूतिसमये यस्या भवत्युत्सवः
सेयं याति शकुन्तला पतिगृहं सर्वैरनुज्ञायताम् ॥

Bu to‘rtlik asarning 4-pardasidan olingan bo‘lib, Shakuntala o‘z sevgilisi podshoh Dushyanta huzuriga — saroyga yo‘l olganda, uni o‘stirgan tabiat va daraxtlar bilan xayrlashayotgan ta’sirli lahzani tasvirlaydi. Unda inson va tabiat o‘rtasidagi chuqur mehr-muhabbat, uzviy bog‘liqlik va ayriliq iztirobi yuksak mahorat bilan ochib berilgan. Vaydharbi uslubining yorqin namunasi, ortiqcha murakkab so‘z o‘yinlari yo‘q. Lirik kechinma va ohangdorlik birinchi planga chiqadi. Asarda qadimgi hind falsafasining Ahimsa yani hech bir tirik mavjudotga zarar keltirmaslik tamoyili ham ochib beriladi.

Kalidasa asarlarining ahamiyati. Kalidasa ijodijahon madaniyati va adabiyoti xazinasidan juda muhim o‘rin egallaydi. Adib o‘z asarlari orqali nafaqat klassik sanskrit adabiyotini eng yuqori cho‘qqiga olib chiqdi, balki butun dunyo dramaturgiyasi rivojiga ham ulkan ta’sir ko‘rsatdi. Kalidasagacha bo‘lgan davrda sanskrit tili asosan diniy matnlar, falsafiy risolalar va qat’iy qonun-qoidalar yozilgan. Kalidasa esa bu tilni tirik hissiyotlar, go‘zal she’riyat va xalqona dramaturgiya tiliga aylantirdi. U sanskrit tilining poetik imkoniyatlarini ochib berdi. Uning dramalari va dostonlari dunyo miqyosida hamon o‘zining ilmiy, badiiy va amaliy qimmatini yo‘qotmasdan, jahon adabiyotshunosligining eng muhim tadqiqot manbalaridan biri bo‘lib kelmoqda. Asarlari tufayli qadimgi Hindistonda teatr san’ati va yozma adabiyot saroy devorlaridan chiqib, xalq madaniyatining ajralmas qismiga aylandi.Kalidasa inson ichki dunyosini, ayniqsa, ayol qalbi kechinmalarini tasvirlashda tengsiz mahorat ko‘rsatgan. Qadimgi hind estetikasida Rasa nazariyasi mavjud bo‘lib, Kalidasa o‘z asarlarida sevgining ikki holatini — visol va ayriliqni juda teran yoritgan. "Shakuntala" dramasida sof muhabbatning faqatgina hissiyot emas, balki hayotiy sinovlar orqali chiniqadigan buyuk kuch ekanligi ko‘rsatiladi. Bu esa asarning umuminsoniy va ma’rifiy ahamiyatini oshiradi.

”SHAKUNTALA” DRAMASI, UNDAGI ASOSIY MAVZU VA G‘OYA

"Shakuntala" Kalidasaning shoh asaridir. Bu asar Hindiston hududidan chiqib, jahon miqyosida dong taratgan asardir. Ushbu asar darhaqiqat ko‘pgina chet tillariga tarjima qilingan va ko‘pchilik unga juda yuqori baho bergan. Asarning syujetini yuqorida aytganimizdek, Kalidasa "Mahabharata" eposidan olgan. "Mahabharata" eposi ma’lumki, buyuk Bharata shohi va uning sulolasi tarixi bilan bog‘liq asardir. Shoh Bharata esa aslida shoh Dushyantaning avliyo Vishvamitraning qizi Shakuntalaga bo‘lgan muhabbati natijasida dunyoga kelgan farzanddir. Shoh Dushyanta ham, uning o‘g‘li Bharata ham juda odil va xalqparvar shoh sifatida elga tanilgan shohlardir. Kalidasa esa Shakuntala va shoh Dushyanta sevgisi tarixini o‘z asariga syujet qilib olib, bir pyesa yaratgan. Asarning asosiy mavzusi — pokiza va sadoqatli sevgi, hijron azoblari hamda taqdir va ilohiy kuchlar sinovidan o‘tgan haqiqatning tantanasidir.

Shoh Dushyanta o‘z xizmatkorlari bilan ovga chiqadi va o‘rmonda ov qilib yurganida bir go‘zal qizni uchratib qoladi. U qiz bilan tanishib, ancha vaqt u bilan suhbatlashadi. Suhbat davomida Dushyanta qizning husni-jamoli va odobiga mahliyo bo‘lib, qattiq sevib qoladi. Bu qiz avliyo Kanvaning asrab olgan qizi Shakuntala edi. Ular bir necha kun birga bo‘ladilar va shoh Dushyanta Shakuntalaga sevgi izhor etadi hamda uni izzat-ikrom bilan o‘z yurtiga olib ketishi, uni o‘z malikasi deb e’lon qilishi haqida va’da beradi va o‘z yurtiga qaytib ketadi. Shakuntala uni kutib, otasi bilan qoladi. Kunlar o‘tadi, kunlar ketidan oylar o‘tib, Shakuntala bir o‘g‘il ko‘radi va unga Bharata deb ism qo‘yadi. Shakuntala o‘z sevgilisi Dushyantani kutishda davom etadi. Lekin undan ko‘p vaqtgacha darak bo‘lmaydi.

Kunlardan bir kun Shakuntala hijron azobida Dushyanta haqida o‘ylab o‘tirganida, ularning uyiga bir avliyo uning otasi Kanvani so‘rab keladi. Dushyanta haqida o‘yga berilib ketgan Shakuntala avliyoning kirganini ham sezmay qoladi va unga izzat-ikrom ko‘rsata olmaydi. Bundan g‘azablangan avliyo uni: "Kim haqida o‘ylab, uyga kelgan mehmonga e’tibor bermagan bo‘lsang, u ham seni shunday unutib yuborsin!" deb duoibad qiladi. Duoibadga uchragan Shakuntala

Dushyantani olti yil kutadi. Darhaqiqat, avliyoning qarg‘ishi ta’sirida Dushyanta ham uni unutib yuborgan edi. O‘g‘li olti yoshga to‘lganida, Shakuntala otasidan oq fotiha olib, o‘z sevgilisining yurtiga ravona bo‘ladi. U shaharga yetib boradi va darhol saroyga yo‘l oladi. Saroy qo‘riqchilariga o‘zini shohning ayoli deb tanishtiradi. Bundan g‘azablangan soqchilar bu xabarni shohga yetkazadilar. Shoh esa hayron bo‘ladi va: "Qaysi bir ayol bunday botirlik bilan o‘zini mening ayolim deb ayta olibdi?" deb o‘ylab, ayolni ko‘rishga qaror qiladi. Shakuntala shoh meni va o‘g‘lini ko‘rib juda quvonsa kerak, degan xayol bilan saroyga kiradi, lekin shoh na ayolni va na o‘z o‘g‘lini taniy oladi. Shoh o‘zicha: "Ularni ochlik yolg‘on gapirishga majbur qilgan bo‘lsa kerak" degan xayolga borib, saroy xizmatchilariga ularga xayr-ehson berib jo‘natib yuborishlarini aytadi. Tushkunlikka tushgan Shakuntala nima qilishini, qayerga borib kimdan yordam so‘rashini bilmay, shaharda darbadar kezib yuradi.

Shakuntala shohning va’dasiga ishonib, uni olti yil davomida yolg‘iz va sabr bilan kutadi.Vaqt va masofa uzoqlashtirsa ham o‘z sevgisiga va pokligiga sodiq qoladi. Bu ayol kishining matonati va sadoqati oxir-oqibat o‘z mevasini berishini anglatuvchi g‘oyadir. Hind dharma tizimida "mehmon xudodir" — tamoyili muqaddas burch hisoblanadi, uni buzish esa jiddiy oqibat keltiradi. Durvasa g‘azablanib, Shakuntalani Dushyanta uni unutishi bilan la’natlaydi. Bu voqea diniy-axloqiy nuqtai nazardan hushyorlik va mas’uliyatning ahamiyatini, shuningdek, dharmani buzgan har bir amalning muqarrar oqibati (karma qonuni) borligini ko‘rsatadi.

Dushyanta o‘rmonda Shakuntalaga o‘z sevgisining timsoli sifatida shoh muhri tushirilgan bir uzuk sovg‘a qilgan bo‘ladi, lekin Shakuntala uni ham Gang suvida ibodat qilayotganida Tushirib yo‘qotib qo‘yadi. Uni esa baliqlar yutib yuborgan bo‘ladi. Baliqchilar baliq ovlab, tutgan baliqlaridan birining qornini yorganlarida, uning qornidan shoh muhri qo‘yilgan uzuk chiqadi. Bundan hayratda qolgan baliqchilar muhrni tanib, darhol uzukni saroyga olib boradilar va bo‘lgan voqeadan shohni xabardor qiladilar. Uzuk esa shohga bundan olti yil avval bo‘lib o‘tgan tarixni eslashiga yordam beradi.Uzuk orqali Dushyanta kelgan ayol Shakuntala, u bilan birga kelgan bola esa ular o‘rtasidagi muqaddas sevgining mevasi ekanini darhol tushunib yetadi va tezlik bilan soqchilar orqali Shakuntalani topdiradi. Soqchilar ularni suv bo‘yidan topib keladilar. Dushyanta Shakuntaladan kechirim so‘raydi va katta to‘y-tomosha qilib unga uylanadi. Shakuntalani saroy malikasi va o‘g‘li Bharatani esa taxt vorisi deb e’lon qiladi. Sadoqat ila adolatning tantana qilishi karma qonunining ikki tomonlama ishlashini ifodalaydi: dastlab e’tiborsizlik oqibatida jazolangan qahramon, o‘z sabr-toqati va poklik yo‘lidan chekinmagani uchun oxir-oqibat mukofotlanadi.Umuman olganda, asar orqali ilgari surilgan bosh g‘oya shundan iboratki, yolg‘on va zulmat vaqtinchalik ustunlik qilishi mumkin, biroq haqiqat, sabr va poklik yakunda albatta g‘alaba qozonadi — bu hind adabiyotiga xos optimistik dunyoqarashning ifodasidir.

XULOSA

Ushbu tadqiqot doirasida Kalidasa hayoti, uning betakror ijodiy uslubi hamda asarlarining tahlili asosida quyidagi yakuniy ilmiy xulosalarga kelindi. Shoir o‘z davrining bilimdonlaridan biri sifatida sanskrit poetikasining qonuniyatlarini yangi janriy bosqichga olib chiqdiUning gumanistik konsepsiyalari asrlar dunyo xalqlari, xususan, o‘zbek adabiy-madaniy muhiti olimlari va tarjimonlari tomonidan ham o‘rganilgan.

Kalidasaning "Shakuntala" asarini tahlil qilish shuni ko‘rsatadiki, uning asosiy mavzusi — pokiza va sadoqatli sevgi, hijron azoblari hamda taqdir va ilohiy kuchlar sinovidan o‘tgan haqiqatning tantanasidir. Butun asar mana shu markaziy mavzu atrofida quriladi, Shakuntalaning sevgisi hech qanday sinov — olti yillik kutish, tan olinmaslik, haqorat — oldida ham so‘nmaydi. Ayol kishining matonati va sadoqati oxir-oqibat o‘z mevasini beradi. Shakuntala o‘z pokligiga va sevgisiga sodiq qolgani uchun, boshiga tushgan barcha adolatsizliklarga qaramay, haqiqat tantana qiladi.

LAKUNALAR NAZARIYASINING KELIB CHIQISHI VA SHAKLLANISH BOSQICHLARI

Ko‘charova Feruza Alisher qizi
Qarshi davlat universiteti mustaqil tadqiqotchisi
E-mail: feruzakocharova97@gmail.com
ORCID: https://orcid.org/0009-0008-2983-5462

Annotatsiya: *Maqolada lakunalar nazariyasining kelib chiqish manbalari va shakllanish bosqichlari tarixiy-qiyosiy hamda davriylashtirish usullari asosida tadqiq etilgan. XX asrning 50-yillaridan bugungi kungacha bo‘lgan davrni qamrab oluvchi ilmiy adabiyot korpusi tahlili asosida nazariya taraqqiyotining olti bosqichi ajratildi: lingvistik zamin bosqichi (1950-yillar), tarjimashunoslik-kontrastiv bosqich (1960-1970-yillar), etnopsixolingvistik bosqich (1977-1989), Yevropa lakunologiya maktabi bosqichi (1990-2006), sistem-leksikologik va kognitiv bosqich (1998-2010) hamda zamonaviy interdisiplinar bosqich (2010-yillardan). Har bir bosqich tadqiqot obyektining kengayishi, metatil apparatining boyishi va metodologik yangilanish mezonlari asosida tavsiflangan. Shuningdek, nazariyaga xos terminologik xilma-xillik (nomutanosib leksika, realiya, etnoeydema, «oq dog‘lar», gap, blank spot) tizimlashtirilgan, lakunalarni bartaraf etishning to‘ldirish va kompensatsiya usullari qiyosiy jihatdan yoritilgan. Tadqiqot natijalari lakunalar nazariyasining bir tarmoqli emas, balki uch mustaqil an’ana — struktur tilshunoslik, tarjimashunoslik va etnopsixolingvistika — kesishuvida shakllanganini ko‘rsatdi. Xulosada o‘zbek tilshunosligida lakunologik tadqiqotlarni rivojlantirishning istiqbolli yo‘nalishlari belgilangan.*

Kalit so‘zlar: *lakuna, lakunarlik, lakunologiya, etnopsixolingvistika, nomutanosib leksika, realiya, lingvokulturologiya, lakunalarni bartaraf etish, to‘ldirish, kompensatsiya, madaniyatlararo muloqot, davriylashtirish.*

ИСТОКИ И ЭТАПЫ СТАНОВЛЕНИЯ ТЕОРИИ ЛАКУН

Аннотация: *В статье на основе историко-сравнительного метода и метода периодизации исследуются источники возникновения и этапы становления теории лакун. На материале корпуса научной литературы, охватывающего период с 50-х годов XX века до настоящего времени, выделены шесть этапов развития теории: лингвистический (1950-е гг.), переводоведческо-контрастивный (1960-1970-е гг.), этнопсихолингвистический (1977-1989), этап европейской школы лакунологии (1990-2006), системно-лексикологический и когнитивный (1998-2010), современный междисциплинарный (с 2010-х гг.). Каждый этап охарактеризован по критериям расширения объекта исследования, обогащения метаязыка и методологического обновления. Систематизирована терминологическая вариативность и сопоставлены способы элиминирования лакун — заполнение и компенсация. В заключении определены перспективные направления лакунологических исследований в узбекском языкознании.*

Ключевые слова: *лакуна, лакунарность, лакунология, этнопсихолингвистика, безэквивалентная лексика, реалия, лингвокультурология, элиминирование лакун, заполнение, компенсация, межкультурная коммуникация, периодизация.*

THE ORIGINS AND STAGES IN THE DEVELOPMENT OF LACUNA THEORY

Abstract: *The article examines the origins and the stages in the development of lacuna theory using historical-comparative analysis and the method of periodisation. Drawing on a corpus of scholarly literature covering the period from the 1950s to the present, the study distinguishes six stages in the evolution of the theory: the linguistic-foundation stage (1950s), the translation-studies and contrastive stage (1960s-1970s), the ethnopsycholinguistic stage (1977-1989), the stage of the European school of lacunology (1990-2006), the systemic-lexicological and cognitive stage (1998-2010), and the contemporary interdisciplinary stage (from the 2010s). Each stage is characterised according to three criteria: the expansion of the research object, the enrichment of the metalanguage, and methodological renewal. The paper systematises the terminological variation surrounding the notion of lacuna (non-equivalent vocabulary, realia, ethno-eidema, “blank spots”, gap) and compares the two principal techniques of eliminating lacunae — filling and compensation. The findings demonstrate that lacuna theory emerged not from a single source but at the intersection of three independent traditions: structural linguistics, translation studies, and ethnopsycholinguistics. The conclusion outlines promising directions for lacunological research in Uzbek linguistics.*

Keywords: *lacuna, lacunarity, lacunology, ethnopsycholinguistics, non-equivalent vocabulary, realia, cultural linguistics, elimination of lacunae, filling, compensation, intercultural communication, periodisation.*

KIRISH

Zamonaviy tilshunoslikda antroposentrik paradigmaning yetakchi o‘ringa chiqishi til birliklarini nafaqat sof lisoniy tizim doirasida, balki milliy madaniyat, dunyoqarash va o‘ziga xos tafakkur tarzi bilan uzviy bog‘liqlikda tadqiq etishni taqozo etmoqda. Ana shu yondashuv natijasida XX asrning ikkinchi yarmida bir qator o‘zaro yaqin ilmiy yo‘nalishlar — lingvokulturologiya, etnopsixolingvistika, madaniyatlararo kommunikatsiya nazariyasi va kontrastiv leksikologiya shakllandi. Ushbu yo‘nalishlarning barchasi uchun umumiy bo‘lgan markaziy tushunchalardan biri lakuna hodisasidir.

«Lakuna» atamasi lotincha lacuna — «chuqurlik», «bo‘shliq», «tushib qolgan joy» so‘zidan olingan bo‘lib, dastlab qo‘lyozmashunoslikda matnning yo‘qolgan qismini ifodalash uchun qo‘llangan. Tilshunoslikka ko‘chgach, atama bir til (yoki madaniyat)da mavjud tushuncha, ma’no yoxud xulq-atvor namunasining boshqa til (madaniyat)da muqobil ifodaga ega emasligini bildiruvchi metatil belgisiga aylandi. Lakuna, mohiyatan, «yo‘qlik» kategoriyasi bo‘lib, u faqat ikki yoki undan ortiq lisoniy-madaniy tizim qiyoslangan nuqtada namoyon bo‘ladi: uni bevosita kuzatib bo‘lmaydi, u faqat qiyosiy fon orqali «ko‘rinadigan» hodisadir.

Lakunalar nazariyasi bugungi kunda mustaqil ilmiy yo‘nalish — lakunologiya maqomini olgan bo‘lsa-da, uning genezisi va taraqqiyot bosqichlari masalasi ilmiy adabiyotda yetarli darajada tizimlashtirilmagan. Mavjud tadqiqotlarning aksariyati yo alohida bir maktab doirasidagi qarashlarni yoritishga, yo lakunalarning muayyan til materialidagi tasnifiga bag‘ishlangan; nazariyaning butun tarixiy yo‘lini yagona mezonlar asosida davriylashtiruvchi umumlashtiruvchi ishlar esa juda kam. Bundan tashqari, sohaning metatili benihoya xilma-xil: bir xil yoki juda yaqin hodisalar turli maktablarda «lakuna», «nomutanosib leksika», «realiya», «etnoeydema», «oq dog‘lar», gap, blank spot kabi atamalar bilan nomlanadi. Bu holat tadqiqot natijalarining o‘zaro qiyoslanuvchanligini pasaytiradi va mavzuning dolzarbligini belgilaydi.

Tadqiqotning maqsadi — lakunalar nazariyasining kelib chiqish manbalarini aniqlash va uning shakllanish bosqichlarini yagona mezonlar tizimi asosida davriylashtirishdan iborat. Ushbu maqsadga erishish uchun quyidagi vazifalar belgilandi: 1) lakuna tushunchasining tilshunoslikka kirib kelish yo‘llarini va dastlabki ilmiy manbalarini aniqlash; 2) nazariya taraqqiyotining har bir bosqichini ajratish mezonlarini asoslash; 3) bosqichlarni tavsiflash va ularning o‘zaro aloqadorligini ko‘rsatish; 4) sohaning terminologik apparatidagi xilma-xillikni tizimlashtirish; 5) o‘zbek tilshunosligida lakunologik tadqiqotlarning holati va istiqbollarini belgilash.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda lakunalar nazariyasining taraqqiyoti uchta mustaqil ilmiy an’ana — struktur tilshunoslik, tarjimashunoslik va etnopsixolingvistikaning kesishuvi natijasi sifatida talqin qilinadi hamda nazariyaning olti bosqichli davriylashtirilishi taklif etiladi.

MATERIALLAR VA METODLAR

Tadqiqot materiali sifatida 1953-2023-yillar oralig‘ida chop etilgan, lakuna va lakunarlik muammosiga bevosita bag‘ishlangan ilmiy manbalar — monografiyalar, dissertatsiyalar, ilmiy maqolalar va lug‘atlar korpusi olindi. Korpus tarkibiga rus, nemis, ingliz, fransuz va o‘zbek tillaridagi manbalar kiritildi. Manbalarni tanlashda uchta mezonga tayanildi: a) manbada «lakuna» atamasi yoki uning to‘g‘ridan-to‘g‘ri sinonimi metatil belgisi sifatida qo‘llanganligi; b) manbaning keyingi tadqiqotlarda iqtibos keltirilish darajasi; v) manbaning nazariy-metodologik ahamiyati, ya’ni unda yangi atama, tasnif yoki tahlil usuli taklif etilganligi.

Tadqiqotda tarixiy-qiyosiy usul (turli davrlarda shakllangan qarashlarning genetik aloqadorligini aniqlash), davriylashtirish usuli (sifat jihatidan farqlanuvchi bosqichlarni ajratish), tavsifiy usul, definitsion tahlil (turli mualliflar bergan ta’riflarning umumiy va farqli belgilarini ajratish), konseptual tahlil hamda kontrastiv usuldan foydalanildi.

Davriylashtirish uchun uchta asosiy mezon qabul qilindi: 1) tadqiqot obyektining hajmi va tabiati (leksik birlik → matn → madaniy xulq → kognitiv struktura); 2) nazariyaning metatil apparati (yangi atamalarning paydo bo‘lishi va tizimlashuvi); 3) metodologik asos (introspektiv tahlil → kontrastiv tahlil → empirik-eksperimental tadqiqot). Ushbu mezonlarning uchalasi bir vaqtda sezilarli o‘zgarishga uchragan nuqtalar bosqichlar chegarasi sifatida belgilandi. Qo‘shimcha mezon — institutsional omil, ya’ni ilmiy maktablar va ixtisoslashgan nashrlarning paydo bo‘lishi.

NATIJALAR

Tahlil natijasida lakunalar nazariyasi taraqqiyotining olti bosqichi ajratildi. Quyida har bir bosqichning mazmuniy tavsifi keltiriladi.

1. Lingvistik zamin bosqichi (XX asrning 50-yillari)

Lakunalar nazariyasining ilmiy ildizlari XX asrning 50-yillarida, bir-biridan mustaqil ravishda rivojlangan ikki an’anada shakllandi. Birinchi an’ana amerikacha struktur-tipologik tilshunoslik bilan bog‘liq. Ch. Hokket 1954-yilda e’lon qilingan «Xitoy tili ingliz tiliga qarshi: Uorf tezislarini o‘rganish tajribasi» nomli ishida til tizimidagi «naqshlardagi tasodifiy bo‘shliqlar» (random holes in patterns) hodisasiga e’tibor qaratdi. Olim tilning grammatik qoidalari nuqtai

nazaridan mumkin boʻlgan, ammo real nutqda qoʻllanmaydigan birliklarning mavjudligini koʻrsatdi. Bu qarash keyinchalik gʻarb tilshunosligida accidental gap (tasodifiy boʻshliq) tushunchasi sifatida rivojlandi va fonologik, morfologik hamda semantik boʻshliqlarni farqlashga olib keldi.

Ikkinchi an'ana — tarjimashunoslik an'anasi. 1958-yilda J.-P. Vine va J. Darbelne oʻzlarining «Fransuz va ingliz tillarining qiyosiy stilistikasi» nomli klassik asarida lacune atamasini fanga kiritdilar. Mualliflar lakunani «bir tildagi soʻz boshqa tilda muqobilini topa olmaydigan hodisa» sifatida ta'rifladilar. Aynan shu ta'rif keyingi oʻn yilliklarda tarjimashunoslik va kontrastiv leksikologiyada asos boʻlib xizmat qildi. Shu bilan birga, A. V. Fedorov 1953-yilda nashr etilgan «Tarjima nazariyasiga kirish» asarida muqobili yoʻq leksikani tarjima qilishning dastlabki usullarini — transliteratsiya, transkripsiya, kalka va tavsifiy tarjimani tizimlashtirdi.

Mazkur bosqichning asosiy xususiyati shundaki, lakuna hali mustaqil tadqiqot obyekti emas, balki boshqa masalalarni yoritish jarayonida qayd etilgan yondosh hodisa maqomida edi. Shunga qaramay, aynan shu bosqichda nazariyaning ikkita tayanch gʻoyasi shakllandi: «yoʻqlik» ham lisoniy fakt sifatida tadqiq etilishi mumkinligi va bu yoʻqlik faqat qiyoslash sharoitida aniqlanishi.

2. Tarjimashunoslik-kontrastiv bosqich (1960-1970-yillar)

Ikkinchi bosqichda lakuna muammosi qiyosiy tilshunoslik va tarjima nazariyasining markaziy masalalaridan biriga aylandi. Yu. S. Stepanov 1965-yilda nashr etilgan «Fransuz stilistikasi» asarida lakunalarni obrazli tarzda «tilning semantik xaritasidagi oq dogʻlar» deb atadi. Bu metafora keyinchalik sohaning eng koʻp iqtibos keltiriladigan ta'riflaridan biriga aylandi. V. G. Gak lakunalarni «tilning leksik tizimidagi boʻshliqlar», ya'ni mantiqan mavjud boʻlishi kerakdek tuyulgan, ammo amalda mavjud boʻlmagan soʻzlar sifatida izohladi.

Bu bosqichning eng muhim yutugʻi V. L. Muravyovning 1975-yilda chop etilgan «Leksik lakunalar (fransuz va rus tillari leksikasi materialida)» monografiyasidir. Unda birinchi marta lakunalarning batafsil tasnifi taklif etildi: tillararo va til ichidagi lakunalar; mutlaq va nisbiy lakunalar; vektorli, stilistik hamda assotsiativ lakunalar. Muravyov shuningdek lakunalarni aniqlashning qiyosiy protsedurasini ishlab chiqdi, bu esa nazariyani empirik tadqiqot uchun ochdi.

Ayni davrda Ye. M. Vereshchagin va V. G. Kostomarovning «Til va madaniyat» (1973) kitobi lingvomamlakatshunoslik yoʻnalishiga asos soldi va «nomutanosib leksika» (безэквивалентная лексика) hamda «fon leksikasi» tushunchalarini ilmiy muomalaga kiritdi. S. Vlaxov va S. Florinning «Tarjimada tarjima qilib boʻlmaydigan narsalar» (1980) asarida esa realiyalar tasnifi va ularni tarjima qilishning oltita usuli — transkripsiya, kalka, neologizm yaratish, taqribiy tarjima, kontekstual tarjima va tushirib qoldirish batafsil yoritildi.

Bosqichning umumiy xususiyati: tadqiqot obyekti leksik birlik doirasi bilan chegaralangan, lakuna asosan «soʻz darajasidagi boʻshliq» sifatida tushunilgan; metodologiyada kontrastiv tahlil yetakchi oʻrinni egallagan. Muhim cheklov — lakunaning madaniy va psixologik jihatlari deyarli tadqiq etilmaganligi.

3. Etnopsixolingvistik bosqich (1977-1989)

Uchinchi bosqich lakunalar nazariyasi tarixidagi eng keskin sifat sakrashi hisoblanadi. Yu. A. Sorokinning 1977-yilda «Nutqiy xulq-atvorning milliy-madaniy oʻziga xosligi» toʻplamida bosilgan «Lakunalarni aniqlash usuli — lokal madaniyatlar oʻziga xosligini ochishning yoʻllaridan biri sifatida» nomli maqolasi tadqiqot obyektini tubdan kengaytirdi: lakuna endi faqat lisoniy emas, balki madaniy hodisa sifatida ham talqin qilina boshladi. Olim tarjima matnlari va ularning asl nusxalarini qiyoslash orqali madaniyatlar oʻrtasidagi farqlarni aniqlash metodikasini taklif etdi.

Bosqichning choʻqqisi Yu. A. Sorokin tahriri ostida 1988-yilda nashr etilgan «Etnopsixolingvistika» jamoaviy monografiyasidir. Bu asarda lakunalar nazariyasi birinchi marta yaxlit nazariy tizim sifatida taqdim etildi. Unda lakunalarning quyidagi turlari ajratildi: subyektiv (milliy-psixologik) lakunalar; faoliyat-kommunikativ lakunalar; madaniy makon lakunalari; matn lakunalari. Shuningdek, «etnoeydema», «anti-soʻz» kabi yangi metatil birliklari kiritildi.

Aynan shu bosqichda lakunalarni bartaraf etishning ikki asosiy usuli — toʻldirish (заполнение) va kompensatsiya (компенсация) nazariy jihatdan asoslandi. Toʻldirish lakuna mazmunini reseptor uchun izohlashni (izoh, sharh, tavsifiy tarjima) nazarda tutadi va madaniy oʻziga xoslikni saqlaydi; kompensatsiya esa lakunar birlikni qabul qiluvchi madaniyatga xos, funksional jihatdan yaqin birlik bilan almashtirishdan iborat boʻlib, matnni tushunarli qiladi, ammo milliy kolorit qisman yoʻqoladi.

Metodologik jihatdan bosqich empirik yondashuvning kuchayishi — matn qiyosi, reseptorlar bilan suhbat va soʻrovnoma usullarining qoʻllanishi hamda Moskva etnopsixolingvistika maktabining shakllanishi bilan ajralib turadi.

4. Yevropa lakunologiya maktabi bosqichi (1990-2006)

Toʻrtinchi bosqichda lakunalar nazariyasi milliy chegaralardan chiqib, xalqaro ilmiy muomalaga kirdi. Nemis tadqiqotchisi A. Ertelt-Fit 1990-yilda nashr etilgan «Moskva kundalik turmushidagi xulq-atvor, til va ma'nolarning madaniyatlararo qiyosiy tahlili» monografiyasida lakunalar nazariyasini empirik tadqiqot vositasiga aylantirdi. Muallif 1983-1984-yillarda Moskvada boʻlgan gʻarbiy germaniyalik talabalar bilan intervyular oʻtkazib, ularning kundalik turmushda duch kelgan tushunmovchiliklarini lakunalar tizimi orqali tahlil qildi. Bu ish nazariyaga kuzatuv, intervyu va kundalik yozuvlari kabi sifat tadqiqoti usullarini olib kirdi.

A. Ertelt-Fit 2005-yilgi tadqiqotida lakunalarning ikki o‘lchovli tasnifini taklif etdi. Birinchi o‘lchov uchta guruhni qamrab oladi: mental lakunalar (kognitiv va affektiv holatlardagi farqlar); faoliyat lakunalari (axborotni qayta ishlash, nutq va harakat tarzidagi farqlar); predmet lakunalari (buyumlar, inson tanasi va atrof-muhitga oid farqlar). Ikkinchi o‘lchov — aksiologik lakunalar bo‘lib, ular madaniyatga asoslangan ma’no va baholash farqlarini ifodalaydi. Har bir lakuna, muallif fikricha, konfrontativ yoki kontrastiv, oshkora yoki yashirin, nisbiy yoki mutlaq bo‘lishi mumkin.

H. Shryoder rahbarligidagi Frankfurt (Oder) Yevropa universiteti tadqiqotchilari guruhi lakunalar nazariyasini madaniyatlararo kommunikatsiya, reklama diskursi va ish yuritish muloqoti sohalariga tatbiq etdi: E. Grodzki reklama matnlarida, I. Panasyuk esa tarjima jarayonida lakunalarning namoyon bo‘lishini tadqiq etdi. I. Panasyuk va H. Shryoder tahriri ostida 2006-yilda «Madaniyat semiotikasi» turkumining 5-jildi sifatida chop etilgan «Lakunalar nazariyasi: til va madaniyatni o‘rganishning etnopsixolingvistik jihatlari» to‘plami mazkur bosqichning yakunlovchi hujjati hisoblanadi.

Bosqichning asosiy yutug‘i — nazariyaning empirik-eksperimental metodologiya bilan boyishi va amaliy sohalarga tatbiq etilishi. Tadqiqot obyekti endi til birligi emas, balki madaniyatlararo o‘zaro ta’sirning butun makonidir.

5. Sistem-leksikologik va kognitiv bosqich (1998-2010)

Beshinchi bosqichda lakunalar nazariyasi ikki yo‘nalishda chuqurlashdi. Birinchi yo‘nalish G. V. Bikovaning nomi bilan bog‘liq. Uning «Rus tilining leksik lakunarligi fenomenologiyasi» (1998) va «Lakunarlik leksik sistemologiya kategoriyasi sifatida» (2003) tadqiqotlarida lakunarlik til tizimining ichki kategoriyasi sifatida asoslandi. Muallif til ichidagi lakunalar muammosini birinchi o‘ringa qo‘ydi va shu tariqa nazariyaning an’anaviy «tillararo» doirasini kengaytirdi. Bikova lakunalarni aniqlashning «nol lekseema» (virtual leksik birlik) tushunchasi orqali modellashtirish usulini taklif etdi.

Ikkinchi yo‘nalish — Voronej kontrastiv leksikologiya maktabi. I. A. Sternin, Z. D. Popova va M. A. Sternina tomonidan 2003-yilda nashr etilgan «Tilda va nutqda lakunalar» to‘plamida lakuna va konsept tushunchalarining nisbati aniqlandi. Mualliflar lakuna til tizimidagi bo‘shliqni, konseptual bo‘shliq («konseptual lakuna») esa ong tizimidagi bo‘shliqni ifodalashini asosladilar. Bu farqlash muhim metodologik ahamiyatga ega: agar tilda nom bo‘lmasa-yu, tushuncha mavjud bo‘lsa, bu nominativ lakuna; agar tushunchaning o‘zi ham bo‘lmasa, bu kognitiv lakunadir. Voronej maktabi shuningdek lakunalarni aniqlashning kontrastiv metodikasini — qiyosiy juftliklar tuzish va semema tahlili orqali — batafsil ishlab chiqdi.

Bosqichning yakunlovchi hodisasi I. Yu. Markovina va Yu. A. Sorokinning 2010-yilda nashr etilgan «Madaniyat va matn. Lakunologiyaga kirish» kitobi bo‘lib, unda «lakunologiya» atamasi mustaqil ilmiy yo‘nalish nomi sifatida rasmiylashtirildi. Bosqich metodologiyasida esa kognitiv tahlil, konseptual modellashtirish va psixolingvistik eksperiment usullari yetakchi o‘rinni egalladi.

6. Zamonaviy interdisiplinar bosqich (2010-yillardan hozirgacha)

Oltinchi bosqichda lakunologiya aniq ifodalangan fanlararo maqomga ega bo‘ldi. Nazariya tarjimashunoslik doirasidan chiqib, kinoshunoslik, korporativ va transmadaniy kommunikatsiya, tibbiy diskurs tahlili, huquqiy terminologiya, media-tadqiqotlar hamda kompyuter lingvistikasi sohalarida qo‘llanmoqda. Xususan, E. Denisova-Shmidt va uning hammualliflari lakunalar tahlilini xalqaro biznes muhitidagi tushunmovchiliklarni aniqlash vositasi sifatida sinovdan o‘tkazdilar.

Zamonaviy bosqichning yana bir muhim yo‘nalishi — grammatik va diskursiv lakunarlik muammosi. Agar avvalgi bosqichlarda lakuna asosan leksik daraja bilan bog‘langan bo‘lsa, hozirgi tadqiqotlarda morfologik kategoriyalar tizimidagi bo‘shliqlar (masalan, o‘zbek tilida grammatik jins kategoriyasining yo‘qligi), sintaktik konstruksiyalar va nutqiy etiket formulalaridagi lakunalar ham tadqiq etilmoqda. Sukut (silentsial effekt), ellipsis va implikatura hodisalari lakunar hodisalar doirasiga kiritilmoqda.

Alohida e’tiborga loyiq yo‘nalish — nazariyaning mashina tarjimasi va tabiiy tilni qayta ishlash texnologiyalari bilan bog‘lanishi: madaniy jihatdan lakunar birliklar avtomatik tarjima tizimlarining eng zaif nuqtalaridan biri bo‘lib qolmoqda.

O‘zbek tilshunosligida lakuna muammosi asosan lingvokulturologik va tarjimashunoslik yo‘nalishlarida o‘rganilmoqda. Tadqiqotlarning katta qismi badiiy matn tarjimasidagi milliy-madaniy o‘ziga xoslikni yetkazish masalasiga bag‘ishlangan. Masalan, Sh. B. Baxodirova Abdulla Qodiriy romanlari materialida o‘zbek madaniyatiga xos etnografik va maishiy leksikaning ingliz hamda rus tillariga o‘girilishida yuzaga keladigan lakunalarni tahlil qilgan. Shu bilan birga, o‘zbek tilshunosligida lakunologiya bo‘yicha maxsus monografik tadqiqotlar hali yetarli emas, milliy lakunar lug‘at yaratilmagan va lakunalarni aniqlashning o‘zbek tili materialiga moslashtirilgan metodikasi ishlab chiqilmagan. Bu esa mazkur yo‘nalishning istiqbolli ilmiy maydon ekanligidan dalolat beradi.

1-jadval. Lakunalar nazariyasi shakllanishining bosqichlari

Bosqich va davr	Yetakchi vakillar	Tadqiqot obyekti	Metodologik asos
1. Lingvistik zamin (1950-yillar)	Ch. Hokket, J.-P. Vine, J. Darbelne, A. V. Fedorov	Til tizimidagi tasodifiy bo‘shliqlar; muqobilsiz so‘z	Introspektiv-tahliliy yondashuv

Bosqich va davr	Yetakchi vakillar	Tadqiqot obyekti	Metodologik asos
2. Tarjimashunoslik-kontrastiv (1960-1970-yillar)	Yu. S. Stepanov, V. G. Gak, V. L. Muravyov, Ye. M. Vereshchagin, V. G. Kostomarov, S. Vlaxov, S. Florin	Leksik birlik, nomutanosib leksika, realiya	Kontrastiv tahlil, tarjima qiyosi
3. Etnopsixolingvistik (1977-1989)	Yu. A. Sorokin, I. Yu. Markovina, A. N. Kryukov	Matn va madaniyat; nutqiy xulq-atvor	Matn qiyosi, so‘rovnoma, reseptor tahlili
4. Yevropa lakunologiya maktabi (1990-2006)	A. Ertelt-Fit, H. Shryoder, I. Panasyuk, E. Grodzki	Madaniyatlararo o‘zaro ta’sir makoni	Empirik-eksperimental, sifat tadqiqoti
5. Sistem-leksikologik va kognitiv (1998-2010)	G. V. Bikova, I. A. Sternin, Z. D. Popova, M. A. Sternina	Til tizimi va konseptosfera bo‘shliqlari	Kognitiv tahlil, psixolingvistik tajriba
6. Zamonaviy interdisiplinar (2010-yillardan)	E. Denisova-Shmidt, I. Panasyuk va boshq.; o‘zbek tadqiqotchilari	Diskurs, grammatik kategoriyalar, raqamli muhit	Korpus tahlili, fanlararo modellashtirish

MUHOKAMA

Tadqiqot natijalari lakunalar nazariyasining monogenetik emas, balki poligenetik tabiatga ega ekanligini ko‘rsatadi. Nazariya yagona manbadan emas, uchta mustaqil ilmiy an’ananing kesishuvidan o‘sib chiqqan: struktur tilshunoslikning «tizimdagi bo‘shliq» g‘oyasi, tarjimashunoslikning «muqobilsizlik» muammosi va etnopsixolingvistikaning «madaniy o‘ziga xoslik» konsepsiyasi. Ushbu uch an’ananing har biri nazariyaga o‘ziga xos hissa qo‘shgan: birinchisi — metodologik qat’iylik, ikkinchisi — amaliy yo‘naltirilganlik, uchinchisi — madaniy chuqurlik. Ayni paytda ular to‘liq birlashib ketmagan: g‘arb tilshunosligidagi accidental gap an’anasi bilan rus-nemis lakunologiyasi hanuz nisbatan avtonom rivojlanmoqda, o‘zaro iqtibos darajasi esa past.

Tahlil sohaning terminologik apparatida sezilarli xilma-xillik mavjudligini tasdiqladi. Bir yoki juda yaqin hodisalarni ifodalash uchun quyidagi atamalar qo‘llanadi: lakuna, lakunar birlik, nomutanosib leksika, realiya, fon leksikasi, etnoeydema, anti-so‘z, «oq dog’», gap, blank spot, nol lekseema. Bu atamalar to‘liq sinonim emas: ular hodisaning turli qirralarini ta’kidlaydi. «Realiya» obyektiv borliqdagi predmetning boshqa madaniyatda yo‘qligini, «nomutanosib leksika» tarjima muvofiqligining yo‘qligini, «lakuna» esa qiyoslanayotgan tizimdagi bo‘shliqning o‘zini nomlaydi. Shu bois ularni bir-birining o‘rnida qo‘llash metodologik jihatdan noto‘g‘ridir. Maqolada taklif etilayotgan yondashuvga ko‘ra, «lakuna» umumiy (giperonimik) atama sifatida, qolganlari esa uning muayyan ko‘rinishlarini bildiruvchi turdosh atamalar sifatida qaralishi maqsadga muvofiq.

Tasniflar masalasida ham yagona tizim shakllanmagan: bugungi kunda kamida oltita mustaqil tasnif asosi qo‘llanmoqda — qiyoslash doirasi (tillararo va til ichidagi), mutlaqlik darajasi (mutlaq va nisbiy), sabab (motivlashgan va motivlashmagan), til darajasi (fonetik, leksik, grammatik, sintaktik, matn lakunalari), mazmun sohasi (predmet, faoliyat, mental) hamda qayd etilganlik darajasi (uzual va okkazional). Ushbu tasniflar bir-birini inkor etmaydi, aksincha, ko‘p o‘lchovli matritsa hosil qiladi; shu sababli zamonaviy tadqiqotlarda bir o‘lchovli tasniflardan ko‘p o‘lchovli modellarga o‘tish tendensiyasi kuzatilmoqda.

Lakunalarni bartaraf etish usullarini qiyoslash shuni ko‘rsatadiki, to‘ldirish va kompensatsiya o‘rtasidagi tanlov universal qoidaga bo‘ysunmaydi. To‘ldirish madaniy axborotni maksimal saqlaydi, lekin matn hajmini oshiradi, shu bois ilmiy, o‘quv va publitsistik matnlar uchun maqbulroq; kompensatsiya kommunikativ ta’sirchanlikni saqlaydi, ammo milliy koloritni yo‘qotish xavfini tug‘diradi va ko‘proq badiiy nasr, drama hamda reklama matnlarida qo‘llanadi. Amaliyotda esa ko‘pincha aralash strategiya — matn ichida kompensatsiya, izohlarda to‘ldirish afzal ko‘riladi.

Tadqiqotning cheklovlarini ham qayd etish lozim: korpusga asosan ochiq manbalarda mavjud ishlar kiritilgan, ayrim milliy an’analar qamrab olinmagan; davriylashtirish chegaralari esa shartli xarakterga ega, chunki bosqichlar bir-biriga qisman qoplashadi. Shunga qaramay, taklif etilgan davriylashtirish «Lingvokulturologiya», «Tarjima nazariyasi va amaliyoti», «Madaniyatlararo kommunikatsiya» fanlarini o‘qitishda nazariy asos bo‘lib xizmat qilishi mumkin, terminologik apparatning tizimlashtirilishi esa o‘zbek tilida lakunologiya metatilini shakllantirishga ko‘maklashadi.

XULOSA

O‘tkazilgan tadqiqot quyidagi xulosalarni chiqarishga imkon berdi.

Birinchidan, lakunalar nazariyasi XX asrning 50-yillarida bir-biridan mustaqil ravishda shakllangan uchta ilmiy an’ana — struktur tilshunoslik, tarjimashunoslik va etnopsixolingvistikaning kesishuvida vujudga kelgan. «Lakuna» atamasini tilshunoslik muomalasiga J.-P. Vine va J. Darbelne (1958) kiritgan bo‘lsa-da, hodisaning o‘zi Ch. Hokket (1954) tomonidan «naqshlardagi tasodifiy bo‘shliqlar» sifatida undan avvalroq qayd etilgan.

Ikkinchidan, nazariya taraqqiyotining olti bosqichi ajratildi: lingvistik zamin bosqichi (1950-yillar), tarjimashunoslik-kontrastiv bosqich (1960-1970-yillar), etnopsixolingvistik bosqich (1977-1989), Yevropa lakunologiya maktabi bosqichi (1990-2006), sistem-leksikologik va kognitiv bosqich (1998-2010) hamda zamonaviy interdisiplinar bosqich (2010-yillardan). Bosqichlar tadqiqot obyektining hajmi, metatil apparatining boyligi va metodologik asosning tabiati bo‘yicha farqlanadi.

Uchinchidan, nazariya taraqqiyotining umumiy yo‘nalishi tadqiqot obyektining izchil kengayishi bilan tavsiflanadi: so‘z → matn → madaniy xulq-atvor → kognitiv struktura → diskursiv va raqamli muhit; metodologiya esa introspektiv tahlildan kontrastiv, so‘ngra empirik-eksperimental va korpus usullariga qarab rivojlangan.

To‘rtinchidan, sohaning terminologik xilma-xilligi tizimlashtirilishi va «lakuna» atamasi giperonim maqomida qat’iylashtirilishi zarur.

Beshinchidan, o‘zbek tilshunosligida lakunologik tadqiqotlar dastlabki bosqichda turibdi. Istiqbolli yo‘nalishlar sifatida quyidagilarni ko‘rsatish mumkin: o‘zbek-ingliz va o‘zbek-rus lakunar lug‘atlarini tuzish; o‘zbek milliy korpusi materialida lakunalarni aniqlashning avtomatlashtirilgan metodikasini ishlab chiqish; o‘zbek tilining grammatik lakunarligini tizimli tavsiflash; o‘zbek badiiy adabiyoti tarjimalarida lakunalarni bartaraf etish strategiyalarining samaradorligini baholash; lakunologiya metatilini o‘zbek tilida shakllantirish.

LINGVISTIK VA MADANIY ADEKVATLIKNING BADIIY TARJIMADAGI NAZARIY YONDASHUVLARI

Mamasodiqova Maxzuna Jalol qizi
Is'hoqxon Ibrat nomidagi Namangan davlat chet tillari instituti

Annotatsiya: *Mazkur maqolada lingvistik va madaniy adekvatlik tushunchalarining zamonaviy tilshunoslik, tarjimashunoslik va lingvokulturologiya doirasidagi nazariy-metodologik asoslari yoritiladi. Tadqiqotda lingvistik adekvatlik til birliklarining semantik, grammatik, uslubiy va pragmatik xususiyatlarini asl matn mazmuniga muvofiq tarzda qayta yaratish nuqtayi nazaridan tahlil qilinadi. Shu bilan birga, madaniy adekvatlik tarjima jarayonida milliy-madaniy xususiyatlar, realiyalar, frazeologik birliklar, milliy konseptlar, urf-odatlar, an'analar hamda muayyan xalqning tarixiy va ijtimoiy tajribasini to'g'ri aks ettirishni nazarda tutishi asoslanadi. Maqolada lingvistik va madaniy adekvatlikni ta'minlashning semantik, funksional-pragmatik, kommunikativ va lingvomadaniy yondashuvlari umumlashtiriladi hamda ushbu nazariy qoidalar "O'tkan kunlar" romanining rus tiliga tarjimalari misolida amaliy jihatdan tahlil qilinadi. Tadqiqot natijalari tarjima jarayonida til va madaniyatning o'zaro munosabatini kompleks o'rganish, milliy-madaniy mazmunni saqlab qolish hamda tarjima matnining o'quvchi uchun tabiiy va tushunarli bo'lishini ta'minlash muhimligini ko'rsatadi.*

Kalit so'zlar: *adekvatlik tushunchasi, lingvistik adekvatlik, madaniy adekvatlik, ekvivalentlik, milliy kolorit, lingvistik xususiyatlar, realiya.*

ТЕОРЕТИЧЕСКИЕ ПОДХОДЫ К ЛИНГВИСТИЧЕСКОЙ И КУЛЬТУРНОЙ АДЕКВАТНОСТИ В ХУДОЖЕСТВЕННОМ ПЕРЕВОДЕ

Аннотация: *В данной статье раскрываются теоретико-методологические основы понятий лингвистической и культурной адекватности в рамках современной лингвистики, переводоведения и лингвокультурологии. Лингвистическая адекватность анализируется с точки зрения воссоздания семантических, грамматических, стилистических и прагматических свойств языковых единиц в соответствии с содержанием исходного текста. Вместе с тем обосновывается, что культурная адекватность предполагает точную передачу в процессе перевода национально-культурных особенностей, реалий, фразеологических единиц, национальных концептов, обычаев, традиций, а также исторического и социального опыта конкретного народа. В статье обобщаются семантический, функционально-прагматический, коммуникативный и лингвокультурный подходы к обеспечению лингвистической и культурной адекватности, и эти теоретические положения анализируются практически на примере русских переводов романа «Минувшие дни». Результаты исследования показывают важность комплексного изучения взаимодействия языка и культуры в процессе перевода, сохранения национально-культурного содержания и обеспечения естественности и понятности переводного текста для читателя.*

Ключевые слова: *понятие адекватности, лингвистическая адекватность, культурная адекватность, эквивалентность, национальный колорит, лингвистические особенности, реалия.*

THEORETICAL APPROACHES TO LINGUISTIC AND CULTURAL ADEQUACY IN LITERARY TRANSLATION

Abstract: *This article examines the theoretical and methodological foundations of the concepts of linguistic and cultural adequacy within the framework of modern linguistics, translation studies, and linguoculturology. The study analyzes linguistic adequacy from the standpoint of recreating the semantic, grammatical, stylistic, and pragmatic features of linguistic units in accordance with the content of the source text. At the same time, cultural adequacy is substantiated as the accurate representation of national and cultural characteristics, realia, phraseological units, national concepts, customs, traditions, and the historical and social experience of a particular people in the translation process. The article summarizes semantic, functional-pragmatic, communicative, and linguocultural approaches to ensuring linguistic and cultural adequacy, and applies these theoretical principles to a practical analysis of the Russian translations of the novel "O'tkan kunlar" The findings demonstrate the importance of a comprehensive study of the interaction between language and culture in the translation process, the preservation of national and cultural content, and ensuring that the translated text is natural, comprehensible, and accessible to the target reader.*

Keywords: *concept of adequacy, linguistic adequacy, cultural adequacy, equivalence, national coloring, linguistic features, realia.*

Tarjimashunoslikda “adekvatlik” tushunchasi XX asrning ikkinchi yarmidan boshlab ilmiy tadqiqotlarning asosiy masalalaridan biri sifatida shakllandi. Adekvat tarjima deganda manba matnining mazmuni, vazifasi, uslubi va pragmatik ta’sirining qabul qiluvchi til va madaniyat sharoitida mumkin qadar to‘liq qayta yaratilishi tushuniladi. Bu masala ayniqsa badiiy matn tarjimasida dolzarblik kasb etadi, chunki badiiy asar tilning faqat axboriy emas, balki estetik va madaniy salohiyatini ham namoyon qiladi. Shuningdek, adekvatlik muammosi tillararo ekvivalentlik masalasidan ancha keng tushunchadir, u tarjimaning mazmun, shakl, vazifa va pragmatik ta’sir jihatlarini qamrab oladi. Zamonaviy ilmiy adabiyotlarda adekvat tarjima manba matnning semantik-stilistik xususiyatlarini saqlagan holda, qabul qiluvchi madaniyatda funksional jihatdan to‘liq ishlay oladigan matn sifatida talqin qilinadi.

Lingvistik adekvatlik, an’anaviy ravishda, til tizimlari o‘rtasidagi moslik bilan bog‘liq bo‘lib, leksik, morfologik va sintaktik birliklarning ma’no jihatdan muvofiq kelishiga asoslanadi. Biroq badiiy matnda til birliklari ko‘pincha qo‘shimcha semantik va ekspressiv yuklamalarga ega bo‘lgani uchun, lingvistik adekvatlikni formal moslik bilan cheklash mumkin emas.

Madaniy adekvatlik esa tarjimaning madaniyatlararo tabiatini aks ettirib, manba matnda ifodalangan milliy-madaniy axborotning qabul qiluvchi til jamoasi tomonidan to‘g‘ri anglanishini ta’minlashni nazarda tutadi. Bu tushuncha realiyalar, milliy urf-odatlar, diniy qarashlar, ijtimoiy munosabatlar va qadriyatlar bilan bevosita bog‘liq.

Yevropa tarjimashunosligida bu masala funksional va kommunikativ yondashuvlar asosida izohlanadi. Masalan, E. Nida tarjimada formal va dinamik ekvivalentlikni farqlab, badiiy asarlarda dinamik ekvivalentlik, ya’ni o‘quvchida asl matndagiga yaqin estetik va emotsional ta’sir uyg‘otishni ustuvor deb hisoblaydi23.

Rus tarjimashunosligida V.N. Komissarov adekvatlikni ekvivalentlikning amaliy ifodasi sifatida talqin qilib, uning bir necha darajalarini ajratadi: semantik, pragmatik va stilistik darajalar24. Uning ta’kidlashicha, badiiy tarjimada to‘liq formal moslik emas, balki mazmun, uslub va funksiyaning uyg‘unligi muhim hisoblanadi.

O‘zbek tarjimashunos olimlarining ishlarida ham adekvatlik muammosi markaziy o‘rinni egallaydi. Jumladan, G’. Salomov tarjimani “milliy tafakkurni boshqa tilda qayta yaratish jarayoni” sifatida talqin qiladi va tarjimada mazmun bilan bir qatorda milliy ruhni saqlash zarurligini ta’kidlaydi. G’. Salomov tarjimani «ikki til va ikki madaniyat o‘rtasidagi badiiy-ma’naviy ko‘prik» sifatida ta’riflab, adekvatlikni faqat til vositalari darajasida emas, balki milliy-madaniy realiyalar darajasida ham ta’minlash zarurligini uqtiradi25.

N. Komilov o‘z tadqiqotlarida tarjimada milliy kolorit muammosiga alohida e’tibor qaratib, milliy realiyalarning neytrallashuvi asarning madaniy qiymatini kamaytiradi, deb hisoblaydi. U badiiy tarjimada milliy ruhni saqlashni tarjimonning asosiy vazifasi sifatida belgilab, madaniy adekvatlikka erishish uchun tarixiy va etnografik bilimlar muhimligini uqtiradi. Uning ta’kidlashicha, tarjimada mazmun saqlanib qolgan taqdirda ham, agar shakl orqali berilgan milliy-estetik axborot yo‘qolsa, tarjima adekvat hisoblanmaydi26.

Tarjima jarayonida “adekvatlik” ko‘pincha “ekvivalentlik” atamasi bilan yonma-yon qo‘llanadi, ammo u faqat semantik moslik emas, balki funksional-kommunikativ qiymatning imkon qadar to‘liq qayta qurilishini ham anglatadi . Nida dinamik ekvivalentlikni “retseptor reaksiyasi”ga bog‘lar ekan, asliyatning o‘quvchi ongidagi ta’sirini tarjima o‘quvchisida ham uyg‘otishni mezon sifatida ko‘rsatadi27. Demak, adekvat tarjima - bu nafaqat nima deyilgani, balki qanday va nega aynan shunday deyilgani masalalarining uzviy yechimidir. Shuning uchun ham mazmun va shakl uyg‘unligi lingvistik qatlam (leksika, grammatika, sintaksis, uslub) bilan madaniy qatlam (realiyalar, udum, ijtimoiy norma, ma’naviy-axloqiy kod) o‘rtasidagi muvozanatdir.

Badiiy tarjima nazariyasida *lingvistik adekvatlik* markaziy kategoriyalardan biri hisoblanadi. U asl matndagi leksik, grammatik va stilistik birliklarning tarjima tilida funksional, semantik va uslubiy jihatdan maqsadga muvofiq qayta yaratilishini anglatadi. Lingvistik adekvatlik tarjimaning formal mosligidan ko‘ra kengroq tushuncha bo‘lib, u matnning umumiy estetik ta’siri, milliy-madaniy xususiyatlari va muallif uslubini saqlab qolishga qaratilgan.

Tarjimashunoslikda lingvistik adekvatlik asliy matnning semantik, sintaktik va uslubiy parametrlarini tarjima tilida funksional va kommunikativ jihatdan mos darajada qayta tiklashni nazarda tutadi. Ushbu tushuncha tarjimada faqat ma’noni uzatish bilan cheklanmasdan, asl matndagi til qurilishi, grammatik munosabatlar hamda uslubiy belgilarning saqlanishini ham qamrab oladi.

27 Nida E. A. Toward a Science of Translating; Language, Culture and Translating. Brill. 2000, - p. 172.

Bu masalaga ilmiy asos solgan tadqiqotchilardan biri - J. C. Catford boʻlib, u tarjimani til tizimlari oʻrtasidagi munosabat sifatida talqin qiladi. Catford tarjimada adekvatlikni til sathlari - fonologik, leksik va ayniqsa grammatik-sintaktik strukturalar oʻrtasidagi moslik bilan bogʻlaydi. Uning fikricha, adekvat tarjima asl matn maʼnosini saqlagan holda, tarjima tili imkoniyatlari doirasida unga funksional jihatdan teng boʻlgan til birliklarini tanlash orqali amalga oshiriladi28. Shu maʼnoda, lingvistik adekvatlik asl matndagi semantik munosabatlarning sintaktik shakllar orqali qanday ifodalanganini hisobga olishni taqozo etadi.

Zamonaviy tarjimashunoslikda mazkur masala yanada kengroq talqin etiladi. Xususan, Mona Baker lingvistik adekvatlikni tarjimada koʻp darajali moslik sifatida koʻradi. Uning taʼlimotiga koʻra, tarjimon asl matn va tarjima matni oʻrtasida quyidagi sathlarda muvozanatni saqlashi lozim:

- leksik-semantik moslik,
- grammatik va sintaktik munosabatlar,
- matn ichidagi koxeziya va koxerentlik,
- uslubiy va pragmatik taʼsir29.

Baker taʼkidlashicha, lingvistik adekvatlik mutlaq shakliy moslikni emas, balki funksional ekvivalentlikni nazarda tutadi. Yaʼni asl matnda muayyan sintaktik yoki uslubiy vosita qanday vazifa bajargan boʻlsa, tarjima matnida ham shu vazifani bajara oladigan vosita tanlanishi lozim. Bu esa tarjimondan chuqur lingvistik tahlil va ongli tanlovni talab qiladi. Shu tariqa, Catford va Baker nazariyalarini umumlashtirgan holda aytish mumkinki, lingvistik adekvatlik - bu asliy matnning semantik mazmunini saqlash bilan birga, uning sintaktik tuzilishi va uslubiy xususiyatlarini nishon tilida funksional jihatdan qayta yaratish jarayonidir. Ushbu adekvatlik turi badiiy tarjimada ayniqsa muhim boʻlib, u tarjimaning tabiiyligi, taʼsirchanligi va estetik qiymatini belgilab beradi.

Bizga maʼlumki, badiiy tarjimada lingvistik adekvatlik tarjimondan nafaqat til bilimlarini, balki chuqur madaniy, tarixiy va uslubiy tafakkurni ham talab qiladi.

Rus tarjimashunosligida ushbu masalaga alohida eʼtibor qaratgan olimalardan biri - I. S. Alekseyeva boʻlib, u badiiy tarjimada adekvatlikni taʼminlashning asosiy sharti sifatida matnning *uslubiy moslikni* aniqlash zarurligini taʼkidlaydi. Olimaning fikricha, aynan uslubiy moslik - muallif nutqining yetakchi xususiyati - tarjimon qarorlarini belgilab beradi va tarjimada barqaror estetik taʼsirni taʼminlaydi30.

Misol tariqasida olganimizda oʻzbek mumtoz nasrining yuksak namunalaridan biri hisoblangan “Oʻtkan kunlar” romani XIX asr oxiri - XX asr boshlaridagi oʻzbek jamiyatining ijtimoiy, madaniy va maʼnaviy manzarasini realistik ruhda aks ettiradi. Asar tili oʻta murakkab va koʻp qatlamli boʻlib, unda quyidagi lingvistik xususiyatlar ustuvor oʻrin tutadi:

- tarixiy va maishiy arxaizmlar;
- islomiy-diniy atamalar;
- forscha va arabcha leksik qatlam;
- xalq ogʻzaki nutqiga xos frazeologizmlar va maqollar;
- muallif nutqi bilan qahramonlar nutqi oʻrtasidagi uslubiy tafovut.

Aynan shu xususiyatlar romanni rus tiliga tarjima qilish jarayonida lingvistik adekvatlik masalasini dolzarbligini oshiradi. Chunki rus tilida XIX asr oxiridagi oʻzbek jamiyatiga xos realiyalar, ijtimoiy munosabatlar va diniy-maʼnaviy tushunchalarni toʻliq ifodalay oladigan tayyor leksik ekvivalentlar mavjud emas.

«Oʻtkan kunlar» romanining rus tiliga qilingan tarjimalarida tarjimonlar lingvistik adekvatlikni taʼminlash uchun turli strategiya va usullarga murojaat qilganlar. Ularni shartli ravishda quyidagi guruhlarga ajratish mumkin:

1. Transliteratsiya va izohlash. Islomiy atamalar va milliy realiyalar (masalan, diniy lavozimlar, maishiy buyumlar) koʻpincha asl shaklda qoldirilib, izohlar orqali tushuntirilgan. Bu usul milliy koloritni saqlashga xizmat qiladi, biroq matnning badiiy yaxlitligiga maʼlum darajada taʼsir koʻrsatishi mumkin.

2. Funksional ekvivalent qidirish. Xalqona iboralar va maqollarni tarjima qilishda rus tilida maʼno va funksiya jihatdan yaqin boʻlgan frazeologizmlar tanlangan. Bu holatda semantik toʻliqlik emas, balki taʼsirchanlik ustuvor ahamiyat kasb etadi.

3. Stilistik neytrallashtirish. Ayrim arxaik yoki juda milliy xarakterga ega birliklar zamonaviy, neytral rus tili vositalari bilan almashtirilgan. Bu yechim oʻquvchi uchun matnni tushunarli qiladi, ammo muayyan darajada milliy-tarixiy koloritning yoʻqolishiga olib keladi.

I. S. Alekseyeva taʼkidlaganidek, badiiy asar tarjimasida eng muhim vazifalardan biri - uslubiy ustunlikni aniqlashdir. «Oʻtkan kunlar» romanida bunday uslubiy oʻziga xosliklar sifatida tarixiy realizm, milliy kolorit va muallifning publitsistik-tanqidiy ruhini koʻrsatish mumkin.

28 Catford J. C. *A* Linguistic Theory of Translation. - Oxford: Oxford University Press, 1965, - p. 114.

29 Baker M. In Other Words: A Coursebook on Translation. Second ed. London: Routledge, 2011.

30 Алексеева И.С. Введение в переводоведение. - СПБ.: Филологический факулτет СПБГУ, 2004, - с. 114.

Rus tiliga qilingan tarjimalarda ushbu moslikni saqlab qolish darajasi turlicha. Ayrim hollarda leksik aniqlik hisobiga uslubiy ta'sir susaygan bo'lsa, boshqa hollarda, aksincha, badiiy ta'sirni kuchaytirish maqsadida asl matndan ma'lum chekinishlarga yo'l qo'yilgan. Bu esa lingvistik adekvatlikni dinamik, ya'ni har doim mutlaq emas, balki maqsadga yo'naltirilgan kategoriya sifatida qarash zarurligini ko'rsatadi.

Bizningcha, o'zbek asarlarining rus tiliga tarjimalarida lingvistik adekvatlik masalasi ko'p qirrali va murakkab muammo sifatida namoyon bo'ladi. Asarning tarixiy, milliy va uslubiy xususiyatlari tarjimondan chuqur tahlil, ongli tanlov va ijodiy yondashuvni talab qiladi. Lingvistik adekvatlik bu yerda til birliklarining mexanik mosligi emas, balki matnning umumiy estetik va ma'naviy ta'sirini saqlab qolish orqali namoyon bo'ladi. Shu jihatdan, ushbu roman tarjimalari badiiy tarjima nazariyasi uchun muhim ilmiy material vazifasini o'taydi. Asar - o'zbek romanchiligi klassikasi - milliy qadriyatlar, ijtimoiy munosabatlar, sheva va arxaizm qatlamlari, sharqona nutq odobi, to'y-marosimlar, savdo hayoti tasvirlari bilan boy. Shu bois u madaniy adekvatlik masalalarini tadqiqi etish uchun qulay manbaa bo'lib xizmat qiladi.

Badiiy tarjima jarayonida *madaniy adekvatlik* masalasi lingvistik adekvatlik bilan uzviy bog'liq bo'lib, u asl matnda aks etgan milliy qadriyatlar, urf-odatlar, ijtimoiy munosabatlar, tarixiy realiyalar va madaniy konnotatsiyalarni tarjima matnida saqlab qolishni nazarda tutadi. Madaniy adekvatlikka erishish tarjimondan nafaqat ikki tilni, balki ikki madaniy tizimni chuqur anglashni ham talab qiladi.

Tarjimashunoslikda madaniy adekvatlik, avvalo, milliy kolorit tushunchasi bilan bog'lanadi. Milliy kolorit - bu asarda muayyan xalqqa xos hayot tarzi, tafakkur, dunyoqarash va madaniy tajribani ifodalovchi belgilar majmuidir. U, odatda, realiyalar, milliy atamalar, marosimlar, diniy tushunchalar, xalqona iboralar orqali namoyon bo'ladi. Shu bois badiiy tarjimada milliy koloritni saqlash masalasi eng murakkab va bahsli muammolardan biri hisoblanadi.

Zamonaviy tarjimashunoslikda madaniy adekvatlikka turli nazariy yondashuvlar mavjud. Ayrim olimlar uni asl matn madaniy kodlarining maksimal darajada saqlanishi sifatida talqin qilsa, boshqalar tarjima qabul qiluvchi madaniyatda matnning anglanish darajasini ustuvor deb hisoblaydilar. Shu nuqtayi nazardan, madaniy adekvatlik mutlaq kategoriya emas, balki tarjimonning strategiyasi va maqsadiga bog'liq bo'lgan nisbiy tushunchadir.

Yevropa tarjimashunosligida ushbu muammoni tizimli ravishda tahlil qilgan olimlardan biri - Lawrence Venuti bo'lib, u tarjimada madaniy adekvatlikni ta'minlashga qaratilgan ikki asosiy strategiyani ilgari suradi: begonalashtirish (foreignization) va o'zlashtirish (domestication).31

L. Venuti ta'limotiga ko'ra, o'zlashtirish strategiyasi tarjima matnini qabul qiluvchi madaniyat me'yorlariga moslashtirishni nazarda tutadi. Bunda milliy realiyalar, madaniy xususiyatlar ko'pincha neytral yoki umumiy tushunchalar bilan almashtiriladi. Natijada matn o'quvchi uchun oson qabul qilinadi, biroq asl asarga xos milliy kolorit ma'lum darajada yo'qoladi.

Aksincha, begonalashtirish strategiyasi asl matnning madaniy o'ziga xosligini saqlab qolishga qaratilgan bo'lib, tarjima matnida begona madaniy elementlarni ongli ravishda qoldirishni ko'zda tutadi. Venutining ta'kidlashicha, badiiy asar tarjimasida aynan begonalashtirish usuli milliy koloritni saqlashga xizmat qiladi, chunki u o'quvchini "begona madaniyat" bilan yuzma-yuz qiladi va asl matnning madaniy muhitini his qilish imkonini beradi32. Shu bilan birga, Venuti begonalashtirishni mutlaq yechim sifatida emas, balki tarjimonning ongli estetik va madaniy tanlovi sifatida baholaydi. Uning fikricha, har bir badiiy asarda qaysi strategiya ustuvor bo'lishi matnning janri, uslubiy dominantasi va madaniy yuklamasiga bog'liq.

Madaniy adekvatlikni ta'minlashda realiyalar alohida ahamiyatga ega. Realiyalar muayyan xalq yoki madaniyatga xos bo'lgan, boshqa tillarda to'g'ridan-to'g'ri ekvivalenti mavjud bo'lmagan tushunchalarni ifodalaydi. Ular tarjimada quyidagi usullar orqali berilshi mumkin:

- transliteratsiya va qisqacha izoh berish;
- kalkalash;
- funksional yoki tavsifiy ekvivalent qo'llash;
- kam hollarda - madaniy almashtirish.

Begonalashtirish strategiyasi qo'llanilganda, realiyalar, odatda, asl shaklda saqlanadi yoki minimal izoh bilan beriladi. Bu usul matnning milliy ruhini saqlashga xizmat qiladi, ammo tarjimani qabul qilish jarayonini murakkablashtirishi mumkin. Shu bois tarjimon har bir holatda madaniy adekvatlik va kommunikativ tushunarlilik o'rtasida muvozanatni topishi lozim.

Madaniy adekvatlik asliy matnda ifodalangan milliy-madaniy mazmunni - realiyalar, nutq etiketi, tarixiy-madaniy kontekst hamda intertekstual ishoralarni nishon (tarjima) tilida ma'noli va funksional jihatdan qayta qurish jarayoni sifatida talqin etiladi. Madaniy adekvatlik tarjimada faqat leksik yoki grammatik moslik bilan cheklanib qolmay, balki matn

31 Venuti L. The Translator's Invisibility: A History of Translation. - London: Routledge, 1995, - p. 78.

32 Venuti L. Strategies of Translation. *In:* Routledge Encyclopedia of Translation Studies. - London: Routledge, 2001, - p. 128.

orqali uzatilayotgan madaniy axborotning saqlanishi va qabul qiluvchi oʻquvchi tomonidan toʻgʻri anglanishini ham nazarda tutadi.

Ushbu masalaga ilmiy yondashuvni shakllantirgan olimlardan biri - L. K. Latishev hisoblanadi. U tarjimada madaniy adekvatlikni tarixiy va milliy realiyalarning ma'noli qayta ifodalanishi bilan bogʻlaydi. Latishevga koʻra, asliy matnda muayyan madaniy muhitga xos boʻlgan realiyalar tarjima jarayonida yo yoʻqolib ketmasligi, yoki mazmunan buzilmasligi lozim, aks holda tarjima matnining kommunikativ qiymati pasayadi33. Olim ayniqsa nutq etiketini - murojaat shakllari, ijtimoiy maqomni ifodalovchi birliklar, odob-axloqqa doir formulalarni madaniy adekvatlikning muhim komponenti sifatida koʻrsatadi.

Tarjimashunos olimlar Latishev va Venuti nazariyalarini umumlashtirgan holda aytish mumkinki, madaniy adekvatlik - bu asliy matndagi madaniy axborotni mexanik tarzda koʻchirish emas, balki uni tarjima tili va madaniyati imkoniyatlari doirasida ma'noli, funksional va pragmatik jihatdan qayta qurishdir. Bunda tarjimon nafaqat tillararo, balki madaniyatlararo vositachi sifatida faoliyat yuritadi.

Yuqoridagilardan tashqari, madaniy adekvatlik tarjimondan faqat texnik bilim emas, balki ijodiy mas'uliyat ham talab qiladi. Chunki milliy koloritni saqlash yoki yumshatish masalasi koʻpincha tarjimonning shaxsiy dunyoqarashi, estetik pozitsiyasi va ilmiy tayyorgarligi bilan bogʻliq boʻladi. Shu ma'noda, tarjimon badiiy matnni nafaqat tillararo, balki madaniyatlararo muloqot vositasi sifatida qabul qilishi zarur.

Bizning fikrimizga koʻra, madaniy adekvatlik badiiy tarjimaning eng muhim mezonlaridan biri boʻlib, u milliy koloritni saqlash masalasi bilan bevosita bogʻliq. L. Venuti taklif etgan begonalashtirish va oʻzlashtirish strategiyalari ushbu muammoni nazariy jihatdan anglashda muhim metodologik asos boʻlib xizmat qiladi. Ayniqsa, milliy-ma'naviy yuklamasi kuchli boʻlgan badiiy asarlar tarjimasida begonalashtirish strategiyasi madaniy adekvatlikni ta'minlashning samarali vositalaridan biri hisoblanadi. Biroq har qanday holatda ham tarjimon madaniy oʻziga xoslik va oʻquvchi uchun tushunarlilik oʻrtasida ongli va ilmiy asoslangan muvozanatni saqlashi lozim.

MUMTOZ ADABIYOTDA “YOLG‘IZLIK” TUSHUNCHASINING NAZARIY TAHLILI

Kamolova Majnuniso Ulug‘bek qizi
QarDU 2-kurs doktorant
E-mail: majnunisok@gmail.com
ORCID: https://orcid.org/0009-0004-4798-4139

Annotatsiya: *Ushbu maqolada Yolg‘izlik tushunchasining avvalo umumiy ma’no-mazmuni sharhlanib, psixologik va ijtimoiy nuqtai nazardan qanday qarashlar mavjud ekanligiga alohida to‘xtalingan. Shuningdek, asosan, adabiy muhitda Yolg‘izlikning motiv sifatidagi o‘rnini ochib berishga harakat qilingan. Shu bilan birga, Yolg‘izlik adabiy motiv sifatida ko‘plab asarlarda insonning ichki kechinmalari, jamiyatdan ajralganligi, ruhiy iztiroblari yoki o‘zini anglash jarayoni bilan bog‘liq holda tasvirlanadi. Bu motiv orqali adiblar inson tabiatining chuqur qatlamlarini ochib berishga uringanlar. Yolg‘izlik aslida nafaqat ijtimoiy hodisa, balki inson ruhiyatining murakkab holatlarini ifodalovchi badiiy vosita bo‘lib, u orqali yozuvchilar o‘z davrining muammolarini, insoniy qadiyatlarni, hayot mazmunini yoritib beradilar. Tadqiqotda esa Yolg‘izlik motivi xususida alohida qarashlar bilan yoritilgan.*

Kalit so‘zlar: *Yolg‘izlik. motiv, iztirob, ruhiyat, inson.*

ТЕОРЕТИЧЕСКИЙ АНАЛИЗ ПОНЯТИЯ «ОДИНОЧЕСТВО» В КЛАССИЧЕСКОЙ ЛИТЕРАТУРЕ

Аннотация: *В данной статье прежде всего рассматривается общее значение понятия одиночества, при этом особое внимание уделяется существующим психологическим и социальным подходам к нему. Кроме того, предпринята попытка раскрыть место одиночества как мотива преимущественно в литературной среде. Вместе с тем одиночество как литературный мотив изображается во многих произведениях в связи с внутренними переживаниями человека, его отчуждённостью от общества, душевными страданиями или процессом самопознания. Посредством этого мотива писатели стремились раскрыть глубинные пласты человеческой природы. Одиночество в действительности является не только социальным явлением, но и художественным средством, выражающим сложные состояния человеческой психики, через которое писатели освещают проблемы своего времени, человеческие ценности и смысл жизни. В исследовании мотив одиночества раскрывается на основе отдельных научных подходов.*

Ключевые слова: *одиночество, мотив, страдание, психика, человек.*

A THEORETICAL ANALYSIS OF THE CONCEPT OF “LONELINESS” IN CLASSICAL LITERATURE

Abstract: *This article first of all comments on the general meaning of the concept of Loneliness, and specifically focuses on what views there are from a psychological and social point of view. Also, an attempt is made to reveal the place of Loneliness as a motif in the literary environment. At the same time, Loneliness as a literary motif is described in many works in connection with a person’s inner experiences, separation from society, mental suffering or the process of self-awareness. Through this motif, writers have tried to reveal the deep layers of human nature. Loneliness is actually not only a social phenomenon, but also an artistic means expressing complex states of the human psyche, through which writers illuminate the problems of their time, human ideals, and the meaning of life. The study sheds light on the Loneliness motif with special views.*

Keywords: *Loneliness. motif, suffering, psyche, person.*

KIRISH. Yolg‘izlik muammosi insoniyatning eng jiddiy muammolaridan biri bo‘lib, bunda inson u yoki bu sabablarga ko‘ra na do‘stlik, na muhabbat, na dushmanlik munosabatlarini o‘rnata oladi. Inson o‘z munosabatlarining to‘laqonli va ahamiyatli emasligini his qilganida muloqot ehtiyojlari qondirilmaganda yanada o‘zini yolg‘izroq his qila boshlaydi. Yolg‘izlik nazariyalarini falsafiy va psixologik tahlil qilish natijasida uning obyektiv va subyektiv, ijobiy va salbiy jihatlarini farqlash mumkin. Yolg‘izlikning obyektiv tomoni ijtimoiy munosabat va faktlar bilan bog‘liq. Sub’yektiv tomoni esa shaxsning xususiyatlari bilan bog‘liq holda namoyon bo‘lishidir. Yolg‘izlikning ijobiy (pozitiv) jihati uning shaxs ijtimoiylashuvi va individualligi shakllanishining ajralmas qismi ekanligidadir. Yolg‘izlikning ijobiy imkoniyati: o‘zini-o‘zi bilish, o‘zini-o‘zi boshqarish, ijod qilish, o‘zini-o‘zi takomillashtirish, psixofizik holatlarini barqarorlashtirish, tashqi

ta’sirlardan o‘z “Men”ini muhofaza qilish kabi vazifalarda namoyon bo‘ladi. Yolg‘izlikning salbiy (negativ) tabiati- u o‘ziga barcha psixik jarayonlarni bo‘ysundiradi, shaxsning ichki yaxlitligini buzadi, psixologik himoya mexanizmi sifatida namoyon bo‘ladi.

Xilvat so‘zining lug‘aviy ma’nosiga e’tibor qaratadian bo‘lsak, u avvalo *xoli, xoli joy, kimsasiz joy, tanholik, hech nimaga bog‘lanmaslik va dunyoning xilma-xil g‘avg‘olaridan forig‘lik* kabi bir qator ma’nolarda keladi. Xilvatning tasavvufiy ma’nosi quyidagicha: dunyoviy bog‘lanishlardan hosil bo‘ladigan ma’naviy to‘siqlardan o‘tish va ko‘ngilni ilohiy ma’rifat yo‘lida sobitqadam etmoq uchun yolg‘izlikni ixtiyor etib, pirning rahnamoligida ibodat va riyozat bilan shug‘ullanish. Xilvat quyidagi tushunchalar bilan bevosita ma’no-mazmunan bog‘liq: *uzlat, tafrid, tajrid, inzivo, e’tikof, xalq bilan ixtilot(aralashish)nit ark etish, tarki dunyo, tavhid, Vahdat.*

Atrofdagilardan ko‘p narsani kutishga, shaxs sifatida shakllanishidagi boshqalarning rolini oshirib baholashiga olib keladi. Yolg‘izlikning negativ va pozitiv jihatlari o‘rtasidagi dialektik munosabatni e’tiborga olgan holda ta’kidlash joizki, muayyan sharoitlarda (yolg‘izlikni anglaganda, unga munosabatning faol uslubi shakllanganda, qiyinchiliklar bilan kurashish tajribasi tarkib topganda, yolg‘izlik motivatsiyalanganda) negativ yolg‘izlik pozitiv ahamiyat kasb etishi ham mumkin.34

Yolg‘izlik tushunchasi haqida hanuzgacha bizda noto‘g‘ri va biryoqlama fikr davom etib keladi. Din va tasavvuf zinhor hayotni batamom xilvatda o‘tkazishni targ‘ib etmagan. Uzlat – hayotdan qochish, turmushdan ajralish, odamlardan bezish ehtiyoji emas, balki ma’lum muddat “kasbi kamol va sayri jamol” aylagandan so‘ng ruhiy kamolot ila yana faoliyatda bo‘lmoqdir.35

ADABIYOTLAR TAHLILI VA METODOLOGIYA. Mazkur maqolada nazariy va tahliliy metodlar asosida yolg‘izlik holatining psixologik asoslari o‘rganildi. Shuningdek, amaliy kuzatishlar va turli yoshdagi shaxslarning tajribalari asosida, ijtimoiy izolyatsiyaning ruhiy sog‘liqqa ta’siri baholandi.

Shuningdek, O‘zbek tilining izohli lug‘ati, psixologik tushunchalar lug‘atlari hamda tadqiqotchi Odiljon Avaznazarovning “Navoiy timsollari so‘zligi” nomli lug‘atidan unumli foydalanildi. Shu bilan birga, psixologik yondashuv jihatidan Klementyeva, Sadler, Djons, Tixonov, Mateyev kabi bir qator olimlarning ilmiy tadqiqotlari va dissertatsiyalaridan foydalanildi.

NATIJALAR. Avvalo, Yolg‘izlik tushunchasining umumiy psixologiyada qanday ma’no-mazmun kasb etishiga e’tibor qaratsak. O‘zbek tilining izohli lug‘atida qisqa ifodalangan ta’rif berilgan: “ yolg‘izlik – birorta ham sherigi yo‘q, bir o‘zi, yakka, tanho”.36

“Yakkalanish” so‘zi fransuz tilidagi “isolation”, “isoler” fe’lidan, yakkalash, italyan tilidan “isolato” “alohida, yakka”, isola “orol”, lotin tilidan insula orol ma’nolarini beradi. Bundan yaqqol ko‘rinib turibdiki, yakkalanish mazmunan kelib chiqish jihatidan yolg‘izlik va tanholik so‘zlari bilan aynan mos keladi.37

Zamonaviy tadqiqotchilardan G. M. Tixonov “yolg‘izlik-tanholik” juft tushunchalarini fenomenologik tarzda, qutbiy mazmunda tahlil qilgan. “Yolg‘izlik” atamasi tahqirlangan, tashlab ketilgan, bir-biridan ajralgan, kommunikativ ojizlikni bildiradi, ya’ni jamiyatdan istisno qilingan sharoitda subyektiv kechinmalar belgisidir. Tanholik atamasini subyektiv his-tuyg‘u sifatida insonning obyektiv tarzdagi o‘zgalardan jismonan uzoqlashishi deb urg‘u beradi, olim.38

Tanholik tushunchasiga ko‘plab tadqiqotchilar yolg‘izlik tushunchasiga ham taalluqli bo‘lgan tavsiflarni kiritishadi. Ixtiyoriy yoki majburiy yolg‘izlik mavqelari mutlaqo ijtimoiy yo‘nalishga ega va tuzilish jihatidan antinomik. Ixtiyoriy yolg‘izlik ijobiy yo‘nalishga ega bo‘lgan holda tanholik atamasini ifodalaydi. Tanholik tushunchasi tuzilishining tipologiyasini Golman39 1) ijtimoiy ahamiyatli insonlar toifasining majburiy jismoniy yoki ijtimoiy yakkalanishi; 2) tashqi aloqalarning ma’naviy takomillashuv maqsadidagi ongli chegarasi; 3) g‘am-g‘ussa muloqotdagi ehtiyojning qoniqmasligi, tushunilmasligi, ruhiy va ma’naviy yakkalanishning mashaqqatli kechinmasining his qilinishi, deb ataydi.

Mana shu kabi jamiki psixologik holatlar jam bo‘lib, Yolg‘izlik hissiga ehtiyojni, bu ehtiyoj esa ma’lum bir holni taqoqoz etadi. Shu kabi holatlar, maqomlar natijasi Tavhid, Vahdat ul-vujudga qarab boradi.

Tavhid Haq taolo nuriga g‘arq bo‘lish va yo‘qolishdir. Demak, banda haqqa orif bo‘lsa, Haqning mohiyatini, haqiqatini haqiqatan anglab yetsa, uning vahdoniyatiga hukm qila oladi. Bundan ma’lum bo‘ladiki, Tavhid faqat yagonalikni tan olishgina emas, balki shu yagonalik ichra yo‘q bo‘lib ketishlikdir. Ya’ni tavhid insonning Mutlaq ruh tomon

intilishini aytadigan jarayondir. Bu aniq tushuntirish uchun dengiz va tomchi tushunchalari olinadi. Dengiz va tomchi, bu-bir vujuddek gap. Aynan mana shu haqiqatni tan olish vahdatni tasdiqlashdir. Tomchining dengizga qarab intilishida tozalanib, musaffolanib boradi. Bu esa tajriddir. Mansur Halloj esa tavhidni shunday deb tushuntirgan: "Tavhid sari birinchi qadam tafridning fanosidir".

MUHOKAMA. Yolg'izlikning adabiy motiv sifatidagi ko'rinishini xoh Navoiydan oling, xoh boshqa adiblardan, baribir uni tasavvufiy ma'nolarsiz sharhlab bo'lmaydi. Tasavvuf deganda esa yaqqol Najmiddin Komilovning "Tasavvuf" asari ko'z oldimizga kelaveradi. Najmiddin Komilovning yozishicha: "Mutlaq tarki dunyo hayotga zid–u insonni amaldan, kasb-u kordan mahrum etadi. Shu kabi dunyoparastlik ham kishini ilohiylikdan, ma'naviyatdan chetlashtiradi, mol-dunyo quliga aylantiradi. Oraliq yo'l esa har jihatdan maqbul va to'g'ridir, zero fikr hirs va nafsni qanoat qamchisi bilan savalab, insonning insonligini himoya qiladi va har qanday sharoitda insonni Tangri bilan bog'lab turadi. Hazrati Naqshband buyuradilar: "O'z nafslaringizni yomonlab, tahqir etib turing, chunki kimki Haq subhonahu inoyati birla o'z nafsini yomon deb tanigan bo'lsa, bu amal uning uchun osondur", ya'ni faqirlik martabasini egallashning birinchi sharti nafsni badnom etish va har lahzada "tabiiiy vujudni kafolatlab turish", Haqning isbotiga intilib, iymonni mustahkamlab boorish. Chunki Haq subhonahuning nomi xotiradan ko'tarilgan zahoti shaytoni lain va shaytoniy nafs qutqusi uning o'rnini egallaydi.40

Shunday ekan, "yor aksin mayda ko'r" degan nido (tovush)ning ma'nosi oydinlashadi, ya'ni Alloh taoloning o'zi emas, balki uning barcha zotiy va sifotiy fazilatlari ilohiy nurlar tajalliysida namoyon bo'ladi. Buning mohiyatini esa hamma ham emas, balki undan ogohlargina, ya'ni komil insonlargina anglaydilar va bahramand bo'ladilar. Bunday darajaga erishishning sharti ikkinchi baytda bayon qilingan:

G'ayr naqshidin ko'ngul jomida bo'lsa zangi g'am,
Yo'qtur, ey soqiy, mayi vahdat masallik g'amzudo.

Baytning ma'nosi: agar kishining ko'nglida Alloh taolo zikridan boshqa narsalar fikru xayoli, ya'ni mol-dunyoga hirs qo'ymoqlik, amalparastlik va hokazolar g'amining zangi-gardi, g'ubori to'plangan bo'lsa, ko'ngulni bunday zang-g'uborlardan tozalaguvchi asosiy omil bu – **vahdat** mayidir.

Ya'ni Alloh taoloni doimo zikr qilish va uning zotiy sifatlari nurlari bilan zanglarni ketkizishdir. Demak, insonning komilikka erishuvining asosiy omili **Alloh taoloning yakka-yagonaligi (vahdati)** va buyukligini (akbar) e'tirof etish bilan o'zligini tanishi, barcha olijanob fazilatlarni o'zida mujassam eta olishidadir41.

Shuningdek, keling xilvat bilan birga Uzlatga ham alohida to'xtalamiz. Imom G'azzoliyning nazariyasiga asoslanadigan bo'lsak, uning fikriga ko'ra, Uzlatning foydalari quyidagilardan iborat: Avvalo foyda ulki, Uzlat sababidan bisyor gunohlardan xalos bo'lur va to'rt gunohdurki, xalqg'a aralashsa undan xalos bo'lolmas. Zero eng ulug' ibodat "fikr va zikr ibodati"dur. Bunda kishi nainki dunyodan, balki o'zidan ham bexabar bo'lib, Haq taolo yodiga beriladi. Chunki Haq taolodan boshqa har qanday narsa Haq taolodan boshqa bilan mashg'uldir.

Ikkinchi foyda ulki, kishi Uzlat tufayli "ko'p iztiroblardan qutuladi. amri ma'ruf va nahiy munkarki, agar xalqni gunohdan man' qilmasa, osiy va fosiq bo'lur. Agar man' qilsa, xusumat paydo bo'lur. Riyo va nifoq odamlarg'a aralashgandan bo'lur. Agar odamlarg'a madoro va muloyimatlik qilmasa, ko'ngli og'rir va agar qilsa riyodan xoli qolish mushkuldur. Agar ikki dushman orasida har birini xohishiga qarab so'zlasa, yolg'onchilik bo'lur. Agar birining so'zini rost desa, ikkinchisining dushmanligidan xalos bo'lmas.

Uchinchi foyda ulki, hech bir shaqar fitna va xusumatdan xoli bo'lmas. Kishi go'shanishin bo'lsa fitna va xusumatdan xoli bo'lur.

To'rtinchi foyda ulki, xalqning sharridan (yomonligidan) emin bo'lur va xalq orasida bo'lsa, g'iybat va badgumonlikdan va shubhali taomdan xoli bo'lmas.

Beshinchi foyda ulki, odamlarning tama'sidan va ham odamlar buning ta'masidan xoli bo'lurlar. Bas, ta'madin nechand ranj va ma'siyat paydo bo'lur. Chunonchi kishi axli dunyoni ko'rsa, bunda ham boylik-dunyo hirsi paydo bo'larki, tama' hirsning tobe'idur. Xorlik esa ta'madan paydo bo'lg'usidur.

Oltinchi foyda ulki, ahmoq va johillarni ko'rmakdan, tabiatingizga og'irlik va malollik yetadurg'on toifalarning diydoridan xalos bo'lursizlar.42

Ammo Uzlatning ofatlari ham bor, chunonchi, xalq bilan muomala qilinmasa, dunyo va din ishlari amalga oshmaydi. Uzlat esa muomala va aloqani yo'q qiladi. Shu qatorda Imom G'azzoliy Uzlatning olti zararini ham sanaydi.

XULOSA. Yolg'izlik – bu zamonaviy jamiyatda keng tarqalgan va inson ruhiy salomatligiga bevosita ta'sir qiluvchi muhim psixologik holatdir. Uning sabablarini aniqlash, ijobiy tomonlarini rivojlantirish va salbiy oqibatlarining oldini olish bugungi psixologiyaning dolzarb vazifasidir. Har bir insonning individual ehtiyojlarini hisobga olgan holda, yolg'izlik bilan kurashishda tizimli va psixologik yondashuv muhim ahamiyatga ega.

40 Najmiddin Komilov. Tasavvuf. 1-kitob. –Toshkent: "Yozuvchi" nashriyoti,1996. –97 b.
41 B. Valixo`jayev, "Alisher Navoiy she'riyati", Toshkent.
42 Imom G'azzoliy. Kimyoi saodat. –Toshkent: Adolat, 2005. –190 b

Psixologik nuqtai nazar bilan yondashadigan bo‘lsak, Yolg‘izlik – har bir inson hayotining ma’lum bosqichida uchraydigan holatdir. Bu holatni tushunish va to‘g‘ri boshqarish psixologik salomatlikni ta’minlashda muhim omil hisoblanadi. Shaxsiy tajribalar va ilmiy yondashuvlar asosida aytish mumkinki, ixtiyoriy yolg‘izlik ba’zan ruhiy tiklanish vositasi bo‘lsa-da, ijtimoiy yolg‘izlikning surunkali tus olishi xavfli oqibatlarga olib kelishi mumkin. Shu sababli, har bir inson o‘z holatini tahlil qilishni, ehtiyojlarini aniqlashni va kerakli paytda yordam so‘rashni o‘rganishi zarur.

FOYDALANILGAN ADABIYOTLAR RO‘YXATI

O‘ZBEK BADIIY MATNIDA GENDER KONSEPTOSFERASINING ASSOTSIATIV MAYDONI

Shukurova Matluba Xoshimovna
Toshkent davlat o‘zbek tili va adabiyoti universiteti mustaqil tadqiqotchisi

Annotatsiya: *Maqolada o‘zbek badiiy matnida gender konseptosferasining assotsiativ maydoni lingvokognitiv va lingvomadaniy yondashuv asosida tahlil qilinadi. Assotsiativ maydonning semantik maydondan farqi, uning yadro va periferik qatlamlari, milliy-madaniy xotira hamda individual badiiy tajriba bilan aloqasi yoritiladi. Tahlilda “alla”, “beshik”, “chimildiq”, “belbog‘”, “chopon”, “surma” kabi birliklarning ayol va erkak konseptlari bilan bilvosita bog‘lanishi ko‘rib chiqiladi. Badiiy matnda tayyor milliy assotsiatsiyalarning saqlanishi bilan birga, ularning kontekst ta’sirida yangi estetik mazmun kasb etishi ko‘rsatiladi. Shuningdek, assotsiativ reaksiya ijtimoiy me’yor yoki stereotipni o‘z-o‘zidan tasdiqlamasligi, balki muayyan xotira va tajribadagi bog‘lanishni qayd etishi asoslanadi. Natijada gender ma’nosining ko‘pincha predmetning denotativ mazmunidan emas, balki predmet, personaj, makon, emotsiya va baho o‘rtasidagi kontekstual munosabatdan yuzaga kelishi aniqlanadi.*

Kalit so‘zlar: *gender konseptosferasi, assotsiativ maydon, badiiy matn, lingvokulturologiya, kognitiv tilshunoslik, milliy-madaniy birlik, yadro, periferiya.*

АССОЦИАТИВНОЕ ПОЛЕ ГЕНДЕРНОЙ КОНЦЕПТОСФЕРЫ В УЗБЕКСКОМ ХУДОЖЕСТВЕННОМ ТЕКСТЕ

Аннотация: *В статье анализируется ассоциативное поле гендерной концептосферы в узбекском художественном тексте с позиций лингвокогнитивного и лингвокультурологического подходов. Рассматриваются отличие ассоциативного поля от семантического, его ядерно-периферийная организация, связь с национально-культурной памятью и индивидуальным художественным опытом. На материале единиц «алла», «бешик», «чимилдик», «белбог’», «чопон», «сурма» показывается, каким образом гендерные значения актуализируются опосредованно — через предметы, обряды, родственные отношения, эмоции и оценки. Особое внимание уделяется преобразованию общих ассоциаций в художественном контексте. Делается вывод, что ассоциативная реакция фиксирует существующую связь в памяти носителя языка и не должна автоматически интерпретироваться как социальная норма или стереотип.*

Ключевые слова: *гендерная концептосфера, ассоциативное поле, художественный текст, лингвокультурология, когнитивная лингвистика, национально-культурная единица, ядро, периферия.*

THE ASSOCIATIVE FIELD OF THE GENDER CONCEPTUAL SPHERE IN UZBEK LITERARY TEXTS

Abstract: *The article examines the associative field of the gender conceptual sphere in Uzbek literary texts from linguocognitive and linguocultural perspectives. It discusses the distinction between associative and semantic fields, their core-periphery structure, and their relation to national-cultural memory and individual literary experience. The analysis focuses on units such as “alla”, “beshik”, “chimildiq”, “belbog’”, “chopon”, and “surma”, showing how gender meanings may be activated indirectly through objects, rituals, kinship terms, emotions, and evaluative contexts. Particular attention is paid to the transformation of culturally shared associations within literary discourse. The study argues that an associative response records a connection present in the memory of language users and should not automatically be treated as a social norm or stereotype. Gender meaning in literary discourse is often produced through contextual relations among objects, characters, spaces, emotions, and evaluations.*

Keywords: *gender conceptual sphere, associative field, literary text, linguoculturology, cognitive linguistics, national-cultural unit, core, periphery.*

Zamonaviy tilshunoslikda insonning tilni idrok etishi, xotirada saqlashi va badiiy matnni tushunish jarayonlarini faqat lug‘aviy ma’no doirasida izohlash yetarli emas. Muayyan til birligi faollashganda unga semantik jihatdan yaqin bo‘lmagan, biroq tajriba, xotira, madaniyat yoki hissiy kechinma orqali bog‘langan boshqa birliklar ham ongda tiklanishi mumkin. Shu jihatdan assotsiativ yondashuv konseptlarning ichki tuzilishini va badiiy matndagi yashirin aloqalarni ochishda muhim metodologik vosita hisoblanadi.

O‘zbek assotsiativ tilshunosligida assotsiatsiya va assotsiativ maydon masalalari D. Lutfullayeva, B. Tojiboyev, R. Davlatova hamda badiiy matn tadqiqida H. Ortiqova ishlari bilan bog‘liq holda rivojlangan. Assotsiativ lug‘at materiallari milliy-madaniy birliklarning til egasi xotirasida qanday bog‘lanishini kuzatish imkonini beradi. Biroq lug‘atdagi reaksiya badiiy matndagi ma’noni tayyor holda belgilamaydi: ijodkor mavjud assotsiatsiyani tasdiqlashi, o‘zgartirishi yoki qarama-qarshi baholashi mumkin.

O‘zbek badiiy matnida gender konseptosferasini tashkil etuvchi assotsiativ aloqalarning tuzilishi va badiiy transformatsiyasini aniqlashdan iborat. Shu maqsadga erishish uchun assotsiativ va semantik maydon o‘rtasidagi farqni belgilash, genderga daxldor milliy-madaniy birliklarni guruhlash, yadro va periferik assotsiatsiyalarni ajratish, badiiy kontekstning umumiy assotsiatsiyani o‘zgartirish mexanizmini ko‘rsatish hamda individual assotsiatsiyaning rolini tavsiflash vazifalari qo‘yildi.

Semantik maydonda birliklar ma’no yaqinligi, sinonimiya, antonimiya, tur-jins munosabati kabi tizimli aloqalar orqali birlashadi. Assotsiativ maydon esa ancha keng bo‘lib, unda xotira, hayotiy tajriba, vizual obraz, marosim, hissiy holat va intertekstual tajriba ham ishtirok etadi. Shu sababli gender konseptosferasini bevosita “ayol” va “erkak” nominatsiyalari bilangina chegaralash to‘g‘ri emas. “Alla”, “beshik”, “chimildiq”, “belbog‘”, “chopon” singari birliklar gender ma’nosini bilvosita faollashtiruvchi signallar sifatida namoyon bo‘lishi mumkin.

Gender assotsiativ maydonining tarkibiy qatlamlari

Assotsiativ lug‘at va badiiy matn materiallarini qiyoslash gender konseptosferasining ko‘p qatlamli tuzilishga ega ekanini ko‘rsatadi. Uni shartli ravishda qarindoshlik, faoliyat, marosim, predmet, hissiy-aksiologik va intertekstual assotsiatsiyalar guruhlariga ajratish mumkin. Qarindoshlik qatlamiga ona, ota, buvi, bobo, qiz, yigit, kelin, kuyov kabi birliklar kiradi. Faoliyat qatlamida parvarish, mehnat, kurash, duo singari tushunchalar faollashadi. Marosim qatlamida to‘y, nikoh, beshik to‘yi, kelinsalom, aza kabi birliklar, predmet qatlamida esa beshik, belbog’, chopon, angishvona, surma kabi milliy-madaniy realiyalar namoyon bo‘ladi.

Hissiy-aksiologik qatlam mehr, hayo, g‘urur, mardlik, or-nomus singari baholovchi tushunchalarni birlashtiradi. Intertekstual qatlam esa ma’lum badiiy asar, film, spektakl yoki personaj haqidagi xotiraning yangi stimulga javob sifatida faollashishi bilan yuzaga keladi. Ushbu qatlamlar bir-biridan qat’iy ajralmaydi; aksincha, bitta birlik bir vaqtning o‘zida bir necha qatlamni faollashtirishi mumkin.

“Alla” va “beshik” birliklarining assotsiativ modeli

“Alla” leksemasi dastlab qo‘shiq turini anglatadi, biroq assotsiativ maydonda ona, beshik, chaqaloq, tun, bedorlik, tilak va oila kabi birliklarni faollashtiradi. Demak, gender belgisi lug‘aviy ta’rifning majburiy qismi bo‘lmagan holda, ona-farzand munosabati va parvarish tajribasi orqali yuzaga keladi. Badiiy matnda esa bu maydon yanada kengayishi mumkin. Masalan, Muhammad Yusufning “Alpomishga alla aytgan momolarim” satrida alla ona-bola doirasidan chiqib, momo, avlod, milliy qahramon va tarixiy xotira bilan bog‘lanadi. Bu yerda mavjud assotsiatsiya yangi konseptual sathga ko‘chiriladi.

“Beshik” birligi ham shunga yaqin mexanizmga ega. Uning assotsiativ yadrosida chaqaloq, bola, alla va ona kabi birliklar mavjud bo‘lsa-da, badiiy kontekstda beshik “boshlanish”, “bolalik”, “olam” yoki “Vatan” kabi ma’nolarni faollashtirishi mumkin. Muhammad Yusufning “Ko‘hna tol beshikdan boshlangan olam” satrlarida beshik konkret predmet sifatida emas, hayot va borliqning boshlanish nuqtasi sifatida konseptuallashadi. “Onam” va “singlim” nominatsiyalarining Vatan obrazi bilan tutashishi esa qarindoshlik assotsiatsiyasini milliy mansublik darajasiga olib chiqadi.

Yadro va periferiya

Assotsiativ maydon yadrosi ko‘proq takrorlanuvchi va tez faollashuvchi aloqalardan tarkib topadi. Periferiyada esa kamroq uchraydigan, individual yoki kontekstga xos bog‘lanishlar joylashadi. Badiiy ijodning o‘ziga xosligi ko‘pincha periferik aloqani markazga olib chiqishda namoyon bo‘ladi. Shu sababli lug‘atdagi dominant assotsiatsiya badiiy ma’noni oldindan belgilamaydi; u faqat interpretatsiya uchun dastlabki kognitiv fon vazifasini bajaradi.

Marosim va kiyim-kechak birliklarida gender assotsiatsiyasi

“Chimildiq” stimulining assotsiativ maydoni gender konseptosferasining marosimiy qatlamini yaqqol ko‘rsatadi. Manbada ushbu stimulga “kelin-kuyov” reaksiyasi 59 ta, “to‘y” 31 ta, “kelinchak” 12 ta, “go‘shanga” 10 ta, “hayot ostonasi”, “marosim” va “visol” 7 tadan berilgani qayd etiladi. Shuningdek, “baxt”, “kuyov”, “oila”, “kelin”, “nikoh”, “er-xotin” kabi reaksiyalar ham uchraydi. Bu ma’lumotlar chimildiqning milliy xotirada nikoh, yangi oila va juftlik bilan kuchli bog‘langanini ko‘rsatadi.

Biroq badiiy matnda ushbu yadroning baholovchi qutbi o‘zgarishi mumkin. E. Siddiqovaning “Yor-yor” she’rida chimildiq to‘y va visolning quvonchli belgisi sifatida emas, rashk, sog‘inch va iztirob bilan bog‘langan poetik detal sifatida qo‘llanadi. “Titrar jonim”, “rashk o‘ti”, “sog‘inch”, “iztiroblar” kabi birliklar odatiy assotsiativ yadroni saqlagan holda, uning emosional yo‘nalishini o‘zgartiradi. Shundan kelib chiqib, badiiy tahlilda stimulning faqat lug‘atdagi birlamchi reaksiyasiga emas, konkret kontekstga tayanish zarur.

“Belbog’” va “chopon”: erkak konseptining predmet orqali ifodalanishi

“Belbog’” stimulining assotsiativ maydonida kamar, chopon, qiyiq kabi predmet nomlari bilan bir qatorda yigit, to‘y, aza, kurash, kuyov, mardlik, polvon, g‘urur kabi birliklar qayd etiladi. Bu qatlam erkak konseptini faqat jismoniy kuch bilan emas, marosim, ijtimoiy maqom, milliy kiyinish va baholash bilan ham bog‘laydi. Shu bilan birga, belbog‘ning qiz tomonidan yigitga berilishi yoki onaning o‘g‘liga safar oldidan beliga belbog’ bog‘lashi haqidagi assotsiatsiyalar predmetning gender mazmuni “kimga tegishli” ekanidan ko‘ra “qanday munosabatda va qanday maqsadda” ishlatilishiga bog‘liqligini ko‘rsatadi.

O‘tkir Hoshimovning “Ikki eshik orasi” asaridagi “Belida belbog‘i bor yigit” ifodasida belbog’ yigitlik maqomi, e’tirof va avlodlar davomiyligi bilan bog‘lanadi. Biroq ushbu baho umumiy qoida sifatida emas, ayni vaziyatdagi personaj nutqi sifatida talqin qilinishi kerak. Demak, assotsiativ birlikni muallif pozitsiyasi, personaj nutqi va kommunikativ vaziyatdan ajratib bo‘lmaydi.

“Chopon” stimulida ham erkak kiyimi, bobo, ota, kuyov kabi yosh va oilaviy maqomlar birlashadi. Muhammad Yusufning Cho‘lpon xotirasiga bag‘ishlangan satrlarida “beqasam chopon” erkaklik belgisidan tashqari, tarixiy shaxs va milliy xotira bilan tutashadi. Shu tariqa predmetning dastlabki gender assotsiatsiyasi kengayib, tarixiy-madaniy identifikatsiya vositasiga aylanadi.

Baholash, metafora va individual assotsiatsiya

Gender konseptosferasining assotsiativ maydonida baholovchi qarama-qarshiliklar alohida o‘rin tutadi. Bir xil ayol obrazi turli personajlar nutqida “farishta” yoki “ajina” kabi qarama-qarshi obrazlar bilan ifodalanishi mumkin. Bunda mazkur birliklar ayolning o‘zgarmas “mohiyati”ni emas, baholovchi subyektning ayni vaziyatdagi idrokini ifodalaydi. “Farishta” odatda poklik va ezgulik bilan, “ajina” esa qo‘rquv va yoqimsizlik bilan bog‘liq assotsiativ qatlamni faollashtiradi. Badiiy matn ushbu qarama-qarshi qutblarni bir personaj atrofida to‘qnash keltirib, obrazning polifonik idrokini yaratishi mumkin.

Erkak obrazini ifodalashda hayvon nomlari bilan bog‘liq metafora va o‘xshatishlar ham assotsiativ mexanizmga tayanadi. “Safar aka ayiqdek lapanglab...” kabi ifodada “ayiq” birligi yiriklik, kuch va salobat haqidagi madaniy tasavvurlarni faollashtiradi, “lapanglab” fe’li esa bu tasavvurni aniq kinestetik manzaraga aylantiradi. Demak, gender qiyofasi bitta hayvon nomining lug‘aviy ma’nosidan emas, badiiy signal, xotiradagi tarmoq va kontekstga mos belgining tanlanishidan hosil bo‘ladi.

Assotsiativ mexanizmning shartli modeli

Badiiy gender signalining ishlashini quyidagi ketma-ketlik orqali ifodalash mumkin: badiiy signal → xotiradagi assotsiativ tarmoq → kontekstga mos belgini tanlash → personaj yoki obrazning gender qiyofasi. Mazkur modelda birinchi bosqichda predmet, marosim, hayvon, tovush yoki harakat kabi signal beriladi. Ikkinchi bosqichda til egasining milliy-madaniy va individual tajribasida mavjud bo‘lgan bog‘lanishlar faollashadi. Uchinchi bosqichda kontekst ushbu imkoniyatlardan muayyan qismini tanlaydi. Yakunda genderga daxldor obraz yoki baho yuzaga keladi.

Individual assotsiatsiya ushbu jarayonni yanada murakkablashtiradi. Bir xil “beshik” turli qahramonlar uchun ona mehri, bolalik, ayriliq yoki farzand yo‘qotish bilan bog‘lanishi mumkin. Shuning uchun milliy assotsiatsiya va individual assotsiatsiyani qarama-qarshi hodisalar sifatida emas, o‘zaro kesishuvchi qatlamlar sifatida ko‘rish maqsadga muvofiq. Muallifning shaxsiy xotirasi umumiy madaniy repertuardan oziqlanadi, lekin uni yangi badiiy maqsadga mos ravishda qayta tartiblaydi.

Makon, tovush va kinestetik belgilar

Gender ma’nosi faqat predmet va nominatsiyalar orqali emas, makon, tovush va harakat orqali ham faollashadi. O‘choq, ayvon, ostona, hovli va chimildiq kabi makon birliklari o‘z-o‘zidan gender belgisiga ega emas. Ular qaysi personaj, faoliyat yoki voqea bilan birikishiga qarab gender manzarasini yaratadi. Xuddi shuningdek, alla ohangi, beshikning g‘ichirlashi, qadam, tebranish yoki “lapanglash” kabi kinestetik belgilar o‘quvchining eshitish va harakat xotirasini ishga tushiradi. Bu holat badiiy konseptosferaning ko‘p kanalli idrok qilinishini ko‘rsatadi.

Gender ma’nosining bilvosita va implitsit ifodasi

Badiiy matnda “ayol”, “erkak”, “ona” yoki “ota” kabi bevosita nominativ birliklar ishlatilmasdan ham genderga daxldor mazmun yuzaga kelishi mumkin. Beshik, alla, belbog’, chopon, surma, angishvona kabi birliklar kontekst bilan birlashganda tegishli madaniy xotirani faollashtiradi. “Surma” stimuliga doir reaksiyalarda qiz bola, qizlar, ayollar, yosh qizlar, o‘zbek ayollari, qosh-ko‘z va chiroy kabi birliklarning uchrashi pardoz va ayollik o‘rtasidagi tarixiy-madaniy bog‘lanishni ko‘rsatadi.

Bunday holatda gender ma’nosi birlikning denotativ mazmunidan emas, assotsiativ tarmoq va kontekstual munosabatdan kelib chiqadi. Shu sababli implitsit gender ma’nosini aniqlashda faqat lug‘at ma’lumotiga suyanish yetarli emas. Badiiy parchada birlikning qaysi personajga, voqeaga, harakatga va bahoga birikayotganini ham tekshirish zarur. Shartli model quyidagicha berilishi mumkin: stimul yoki badiiy signal → qayd etilgan assotsiativ ma’no → kontekstual bog‘lanish → gender ma’no.

Assotsiativ maydonni stereotiplar roʻyxati sifatida talqin qilish muammosi

Assotsiativ javobni stereotipning bevosita isboti sifatida qabul qilish metodologik jihatdan ehtiyotkorlikni talab etadi. Javob reaksiyasi xotirada mavjud boʻlgan aloqani qayd etadi; uning mavjudligi oʻsha aloqaning ijtimoiy jihatdan maʼqullanishini anglatmaydi. Masalan, "mardlik"ning belbogʻ bilan yoki "ona"ning alla bilan tez-tez bogʻlanishi milliy-madaniy assotsiatsiyaning barqarorligini koʻrsatishi mumkin, ammo badiiy matn mazkur aloqani tasdiqlashi, muammolashtirishi yoki inkor qilishi ham mumkin.

Shu nuqtayi nazardan gender assotsiativ maydonini uch darajada koʻrish mumkin: birinchisi, umumiy-madaniy qatlam boʻlib, koʻpchilik til egalari uchun tanish aloqalarni qamrab oladi; ikkinchisi, ijtimoiy tajriba, avlod, hudud yoki boshqa omillar taʼsirida farqlanishi mumkin boʻlgan umumiy qatlam; uchinchisi esa individual-badiiy qatlam boʻlib, muallif yoki personajning xotirasi va estetik tajribasi bilan belgilanadi. Badiiy matn aynan shu uch darajaning kesishishida oʻziga xos maʼno hosil qiladi.

Natijalar muhokamasi

Tahlil shuni koʻrsatadiki, gender konseptosferasining assotsiativ maydoni bir tekis va turgʻun tizim emas. Unda yadro va periferiya, ijobiy va salbiy qutblar, umumiy va individual aloqalar bir vaqtning oʻzida mavjud boʻladi. "Alla–ona", "beshik–chaqaloq", "belbogʻ–yigit" kabi aloqalar tez anglanadigan umumiy-madaniy fonni tashkil qilishi mumkin. Biroq badiiy ijod periferik yoki individual bogʻlanishni markazlashtirib, ushbu fonni oʻzgartiradi. Natijada bir xil predmet turli matnlarda turli konseptual vazifani bajaradi.

Mazkur natija badiiy matnning assotsiativ tabiatini dinamik jarayon sifatida koʻrishga imkon beradi. Matn mavjud assotsiatsiyalardan foydalanadi, lekin ularni oʻquvchi xotirasida qayta mustahkamlashi ham mumkin. Shu maʼnoda ayrim badiiy obrazlar keyingi idrok jarayonida yangi pretsedent birlikka aylanishi ehtimoli mavjud. Demak, assotsiativ maydon nafaqat matnni talqin qilish vositasi, balki badiiy matn taʼsirida oʻzgarib boruvchi kognitiv tizim sifatida ham namoyon boʻladi.

Xulosa

Oʻzbek badiiy matnida gender konseptosferasining assotsiativ maydoni ayol va erkak nominatsiyalarining oddiy yigʻindisi emas. U predmetlar, marosimlar, qarindoshlik munosabatlari, faoliyat, hissiyot, baho, makon, tovush, kinestetik belgilar va intertekstual xotiradan tarkib topgan murakkab tarmoq sifatida shakllanadi. "Alla", "beshik", "chimildiq", "belbogʻ", "chopon" va "surma" kabi birliklar gender maʼnosini koʻpincha bevosita emas, balki madaniy tajriba va kontekstual munosabat orqali faollashtiradi.

Assotsiativ maydonning yadro va periferiyaga boʻlinishi badiiy transformatsiyani tushuntirishda muhimdir. Umumiy-madaniy xotirada nisbatan barqaror boʻlgan aloqa badiiy matnda yangi personaj, voqea yoki baho bilan birikib, boshqa semantik qutbga oʻtishi mumkin. "Chimildiq"ning visol bilan birga sogʻinch va iztirobni ifodalashi yoki "beshik"ning oilaviy xotiradan Vatan konseptiga koʻchishi bunga misol boʻladi.

Tahlil natijalariga koʻra, assotsiativ reaksiya biologik yoki ontologik mohiyatni emas, muayyan til egalari guruhining xotirasida mavjud bogʻlanishni koʻrsatadi. Shu bois gender assotsiatsiyalarini stereotiplar bilan aynanlashtirmaslik, ularni kontekst, personaj pozitsiyasi va badiiy vazifa bilan birgalikda tahlil qilish lozim. Ayniqsa, bir stimulning turli personajlar ongida turlicha baho va tasavvurlarni faollashtirishi badiiy matnning polifonik xususiyatini koʻrsatadi.

Umuman, assotsiativ yondashuv oʻzbek badiiy matnidagi implitsit gender semantikasini aniqlash, milliy-madaniy xotira bilan badiiy obraz oʻrtasidagi munosabatni tushuntirish va muallifning umumiy assotsiatsiyani qanday transformatsiya qilganini koʻrsatish imkonini beradi. Ushbu yondashuv gender konseptining psixolingvistik talqiniga oʻtish uchun ham nazariy asos yaratadi, chunki assotsiatsiyaning faollashuvi til tizimi bilan bir qatorda xotira, hissiy baholash, individual tajriba va matn idrokiga bogʻliq.

Annotatsiya: *Maqolada ingliz tilidan qoraqalpoq tiliga badiiy tarjimada pragmatik potensialning saqlanishi va transformatsiyalanishi Mark Tvenning "The Adventures of Tom Sawyer" asari hamda uning E. Berdimuratov tomonidan qoraqalpoq tiliga tarjimasi misolida tadqiq etiladi. Pragmatik potensial kommunikativ-intensional, nutqiy-aktual, lingvomadaniy, emotsional-baholovchi, implikativ-kontekstual, stilistik va adresatga yo'naltirilgan komponentlardan tashkil topuvchi ko'p sathli tizim sifatida talqin qilinadi. Tadqiqotda qiyosiy-chog'ishtirma, kontekstual, pragmalingvistik, funksional-semantik va tarjimaviy tahlil metodlaridan foydalanildi. Asliyat va tarjimada kommunikativ intensiya, nutq aktlari, implikatura, yumor va kinoya, emotsional-ekspressiv birliklar, individual nutqiy registr hamda lingvomadaniy birliklarning qayta yaratilish xususiyatlari tahlil qilindi. Tahlil pragmatik ekvivalentlik formal-semantik ekvivalentlik bilan aynan bir hodisa emasligini va badiiy tarjimada funksional hamda pragmatik kompensatsiya alohida ahamiyat kasb etishini ko'rsatdi.*

Kalit so'zlar: *pragmatik potensial, pragmatik ekvivalentlik, pragmatik adaptatsiya, badiiy tarjima, ingliz tili, qoraqalpoq tili, kommunikativ intensiya, nutq akti, implikatura, lingvomadaniy komponent, stilistik kompensatsiya.*

ТРАНСФОРМАЦИЯ ПРАГМАТИЧЕСКОГО ПОТЕНЦИАЛА В ХУДОЖЕСТВЕННОМ ПЕРЕВОДЕ (НА ПРИМЕРЕ ПЕРЕВОДА С АНГЛИЙСКОГО ЯЗЫКА НА КАРАКАЛПАКСКИЙ)

Аннотация: *В статье исследуются сохранение и трансформация прагматического потенциала в художественном переводе с английского языка на каракалпакский на примере произведения Марка Твена «The Adventures of Tom Sawyer» и его каракалпакского перевода, выполненного Е. Бердимуратовым. Прагматический потенциал трактуется как многоуровневая система, состоящая из коммуникативно-интенционального, речеактового, лингвокультурного, эмоционально-оценочного, импликативно-контекстуального, стилистического и адресатно-ориентированного компонентов. В исследовании использованы сравнительно-сопоставительный, контекстуальный, прагмалингвистический, функционально-семантический и переводческий методы анализа. Проанализированы особенности воссоздания в оригинале и переводе коммуникативной интенции, речевых актов, импликатуры, юмора и иронии, эмоционально-экспрессивных единиц, индивидуального речевого регистра, а также лингвокультурных единиц. Анализ показал, что прагматическая эквивалентность не тождественна формально-семантической эквивалентности и что в художественном переводе особое значение приобретают функциональная и прагматическая компенсация.*

Ключевые слова: *прагматический потенциал, прагматическая эквивалентность, прагматическая адаптация, художественный перевод, английский язык, каракалпакский язык, коммуникативная интенция, речевой акт, импликатура, лингвокультурный компонент, стилистическая компенсация.*

TRANSFORMATION OF PRAGMATIC POTENTIAL IN LITERARY TRANSLATION (ON THE EXAMPLE OF TRANSLATION FROM ENGLISH TO KARAKALPAK)

Abstract: *The article examines the preservation and transformation of pragmatic potential in literary translation from English into Karakalpak based on Mark Twain's The Adventures of Tom Sawyer and its Karakalpak translation by E. Berdimuratov. Pragmatic potential is conceptualized as a multidimensional system comprising communicative-intentional, speech-act, linguocultural, emotional-evaluative, implicit-contextual, stylistic and recipient-oriented components. Comparative, contextual, pragmatic, functional-semantic and translation analysis methods are employed. Attention is paid to communicative intention, speech acts, implicature, humour and irony, emotional-expressive elements, individual speech registers and culture-specific meanings. The findings demonstrate that*

pragmatic equivalence cannot be reduced to formal-semantic equivalence and that functional and stylistic compensation plays a significant role in English-Karakalpak literary translation.

Keywords: *pragmatic potential, pragmatic equivalence, pragmatic adaptation, literary translation, English, Karakalpak, communicative intention, speech act, implicature, stylistic compensation.*

KIRISH

Zamonaviy tarjimashunoslik taraqqiyoti tarjimani bir til birliklarini ikkinchi til birliklari bilan almashtirish jarayoni sifatida tushunishdan matnning kommunikativ, kognitiv, lingvomadaniy va pragmatik xususiyatlarini yangi til va madaniyat muhitida qayta yaratish jarayoni sifatida talqin qilishga olib keldi. Ayniqsa, badiiy tarjimada asliyatning denotativ mazmunini saqlashning oʻzi yetarli emas. Tarjimon muallif va personajlarning kommunikativ niyati, emotsional-baholovchi munosabati, implikatura, presuppozitsiya, yumor, kinoya, individual nutqiy registr va adresatga yoʻnaltirilgan estetik ta'sirni ham qayta yaratishi lozim.

Shu nuqtai nazardan, **pragmatik potensial** badiiy tarjimaning adekvatligini belgilovchi muhim kategoriyalardan biri sifatida namoyon boʻladi. Matn yoki til birligining pragmatik potensiali uning muayyan kommunikativ sharoitda soʻzlovchi niyatini amalga oshirish, adresatning interpretatsiyasini yoʻnaltirish, emotsional va baholovchi munosabat hosil qilish hamda ma'lum kommunikativ reaksiyani yuzaga chiqarish imkoniyatlari bilan bogʻliq.

Tarjima jarayonida ushbu imkoniyatlarning barchasi avtomatik ravishda maqsad tiliga koʻchmaydi. Asliyatdagi bir nutq aktining propositsional mazmuni tarjimada toʻliq saqlangan holda uning illokutiv kuchi pasayishi mumkin; aksincha, formal jihatdan sezilarli transformatsiyaga uchragan birlik maqsad tilida asliyatga yaqin pragmatik ta'sirni yuzaga chiqarishi mumkin. Demak, **semantik ekvivalentlik va pragmatik ekvivalentlik oʻzaro bogʻliq boʻlsa-da, aynan bir hodisa emas**. Bu muammo ingliz tilidan qoraqalpoq tiliga badiiy tarjimada alohida ahamiyat kasb etadi. Ingliz va qoraqalpoq tillarining genetik va tipologik jihatdan turli tizimlarga mansubligi, shuningdek, kommunikativ an'ana, murojaat shakllari, ijtimoiy munosabatlarning verbal ifodasi va lingvomadaniy fonidagi tafovutlar pragmatik potensialni qayta yaratishda tarjimondan turli funksional, adaptiv va kompensator strategiyalarni qoʻllashni talab etadi.

Tadqiqot materiali sifatida Mark Tvenning "*The Adventures of Tom Sawyer"* romani hamda uning E. Berdimuratov tomonidan qoraqalpoq tiliga tarjima qilingan "*Том Сойердин басынан кеширгенлери"* asari tanlandi. Qoraqalpoqcha nashrning bibliografik ma'lumotlarida E. Berdimuratov tarjimon, T. Najibov muharrir sifatida koʻrsatilgan; asar 1960-yilda Qoraqalpoq davlat nashriyotida chop etilgan.

Mark Tven asarining tanlanishi uning pragmatik jihatdan nihoyatda boyligi bilan izohlanadi. Roman personajlar nutqidagi nostandart grammatik shakllar, bolalar soʻzlashuv nutqi, yumor va kinoya, manipulyativ kommunikatsiya, madaniy realiyalar, diniy diskurs, qoʻrquv, tahdid, ijtimoiy baholash va individual nutqiy registr kabi hodisalarning keng qoʻllanishi bilan ajralib turadi.

Tadqiqotning maqsadi ingliz tilidan qoraqalpoq tiliga badiiy tarjimada pragmatik potensialning saqlanish va transformatsiyalanish mexanizmlarini aniqlash hamda ushbu jarayonni kompleks baholash imkonini beruvchi integrativ modelni ishlab chiqishdan iborat.

Pragmatik potensial va tarjima: nazariy yondashuvlar. Pragmatikaning shakllanishi til belgilarining ma'nosini ulardan foydalanuvchi subyekt va kommunikativ vaziyat bilan bogʻliq holda oʻrganish zarurati bilan chambarchas bogʻliq. C. Morris semiotikani sintaktika, semantika va pragmatika yoʻnalishlariga ajratar ekan, pragmatikani belgi va undan foydalanuvchi oʻrtasidagi munosabatlarni oʻrganuvchi soha sifatida belgiladi [1]. Ushbu yondashuv keyinchalik kommunikativ ma'no, nutq aktlari va implikatura nazariyalarining rivojlanishiga zamin yaratdi.

J. L. Ostin til orqali nafaqat ma'lumot berish, balki muayyan harakatni amalga oshirish mumkinligini asoslab berdi. Olim lokutiv, illokutiv va perlokutiv aktlarni farqlaydi [2]. Tarjima pragmatikasi uchun ayniqsa illokutiv va perlokutiv darajalar muhimdir. Chunki tarjimon gapning "nima deyayotgani" bilangina emas, "bu gap orqali qanday kommunikativ harakat bajarilayotgani" va "adresatga qanday ta'sir koʻrsatish koʻzda tutilgani" bilan ham ishlaydi.

J. R. Syorl nutq aktlari nazariyasini yanada tizimlashtirib, *assertion, directive, commissive, expressive* va *declaration* kabi kommunikativ aktlarning funksional xususiyatlarini ochib beradi [3]. Badiiy tarjimada personajning iltimosi, buyrugʻi, tahdidi, va'dasi yoki e'tirozi boshqa nutq aktiga aylanib qolsa, uning leksik mazmuni saqlangan taqdirda ham personajlararo munosabat va pragmatik ta'sir oʻzgarishi mumkin.

H. P. Graysning kommunikativ implikatura konsepsiyasi pragmatik tarjima tahlili uchun alohida ahamiyatga ega [4]. Soʻzlovchi nazarda tutgan mazmun har doim uning bevosita aytgan gapiga teng emas. Adresat koʻpincha kontekst, umumiy bilim va kommunikativ tamoyillar asosida qoʻshimcha ma'noni inferensiya qiladi. Badiiy matndagi yumor, kinoya va manipulyatsiyaning katta qismi aynan shu mexanizm orqali yuzaga keladi.

D. Sperber va D. Uilsonning 'relevans' nazariyasida kommunikatsiya kodlash-dekodlash jarayonidan kengroq, inferensial hodisa sifatida tushuntiriladi [5]. E.-A. Gatt mazkur nazariyani tarjimaga tatbiq etib, tarjima jarayonida adresat

uchun yetarli kontekstual effekt yaratish va ortiqcha interpretativ kuch talab qilmaslik muhimligini ta’kidlaydi [6]. Bunday yondashuv madaniy presuppozitsiyalar, yumor va yashirin ma’nolarni tarjima qilishda ayniqsa ahamiyatlidir.

E. Nayda tomonidan ishlab chiqilgan formal va dinamik ekvivalentlik konsepsiyasida tarjima adresatining reaksiyasiga alohida o‘rin beriladi [7]. Dinamik ekvivalentlik nuqtai nazaridan tarjimaning vazifasi til shakllarini mexanik ko‘chirish emas, balki asliyat va tarjima adresatlari reaksiyasi o‘rtasida imkon qadar funksional yaqinlik yaratishdir. Mazkur konsepsiya pragmatik ekvivalentlikning keyingi nazariy talqinlariga muhim zamin yaratdi.

P. Nyumark kommunikativ va semantik tarjimani farqlab, kommunikativ tarjimada maqsad til adresatiga ta’sir masalasini muhim deb hisoblaydi [8]. Badiiy matn pragmatikasida bu farq ayniqsa muhim: ayrim vaziyatlarda formal-semantik aniqlikni mutlaq saqlash kommunikativ ta’sirning zaiflashishiga olib kelishi mumkin.

M. Beyker tarjima ekvivalentligini bir necha darajada o‘rganib, pragmatik ekvivalentlik doirasida ‘coherence’ va ‘implicature’ masalalariga alohida e’tibor qaratadi [9]. Pragmatik ekvivalentlik tarjimonning nafaqat matndagi eksplisit ma’noni, balki kontekst orqali yuzaga keladigan inferensial ma’nolarni ham hisobga olishini talab qiladi.

J. Hauz tarjima sifatini baholashni matn, kontekst, register va kommunikativ funksiya munosabatlari bilan bog‘laydi [10; 11]. Uning funksional-pragmatik yondashuvi tarjimani yangi lingvomadaniy kontekstda kommunikativ funksiyani qayta yaratish sifatida tushunish imkonini beradi.

C. Nordning funksionalistik qarashlarida tarjima maqsadi va tarjimonning asliyat muallifi, buyurtmachi hamda adresat oldidagi kommunikativ mas’uliyati markaziy o‘rin egallaydi [12]. Badiiy tarjimada bu tamoyil tarjima auditoriyasining lingvomadaniy imkoniyatlarini hisobga olish bilan birga asliyatning kommunikativ yaxlitligiga sodiqlikni ham nazarda tutadi.

B. Hatim va I. Meyson tarjimonni kommunikator sifatida talqin qilib, tarjimani diskurs, kontekst va ijtimoiy kommunikatsiyadan ajratib o‘rganish mumkin emasligini ko‘rsatadi [13]. Bu yondashuv badiiy asardagi personaj nutqining ijtimoiy va pragmatik markerlarini tahlil qilishda muhimdir.

Shunday qilib, yuqoridagi nazariyalarni birlashtiruvchi asosiy tamoyil shundan iboratki, tarjima adekvatligi faqat semantik mazmunning saqlanishi bilan emas, **kommunikativ niyat + funksional muvofiqlik + kontekstual ma’no + adresatga ta’sir** munosabatlari bilan ham belgilanadi.

O‘zbek tarjimashunosligida pragmatik yondashuvning nazariy zamini. O‘zbek tarjimashunosligida “pragmatik potensial” termini G‘arb pragmalingvistikasidagi zamonaviy terminologik ma’noda barcha klassik ishlarda birdek qo‘llanmagan. Shu sababli o‘zbek olimlarining fikrlarini zamonaviy termin bilan sun’iy ravishda aynanlashtirish emas, balki ularning **adekvatlik, milliy kolorit, uslub, funksional muvofiqlik va badiiy ta’sirni qayta yaratish** haqidagi qarashlarini pragmatik yondashuvning nazariy zamini sifatida talqin qilish maqsadga muvofiqdir.

G’. Salomov o‘zbek tarjimashunosligi maktabining shakllanishida badiiy tarjimaning uslubiy, milliy va estetik xususiyatlarini o‘rganishga katta hissa qo‘shgan. Olimning *“Tarjima nazariyasi asoslari”* asarida adekvat tarjima masalasi uslub, milliy xoslik, janr xususiyati, davr koloriti hamda shakl va mazmun birligini saqlash bilan bog‘liq holda yoritiladi [19]. Mazkur qarashlarni pragmatik nuqtai nazardan talqin qilganda, tarjimonning vazifasi asliyat til birliklarini formal ravishda almashtirish emas, balki ularning badiiy-kommunikativ funksiyasini maqsad tilida qayta yaratish ekanligi ko‘rinadi.

Q. Musayevning *“Tarjima nazariyasi asoslari”* asarida tarjima nazariyasi va amaliyotining muhim masalalari, tarjima muvofiqligi, transformatsiyalar va muqobilsiz birliklarni tarjima qilish usullari keng yoritilgan [20]. Madaniy xususiyatga ega birliklarning transliteratsiya, kalkalash, tasviriy ifoda yoki boshqa funksional vositalar bilan berilishi pragmatik nuqtai nazardan ham ahamiyatlidir. Buning asosiy sababi, bunday birliklar predmetni nomlash bilan birga muayyan madaniy assotsiatsiya va adresat reaksiyasini yuzaga keltiradi.

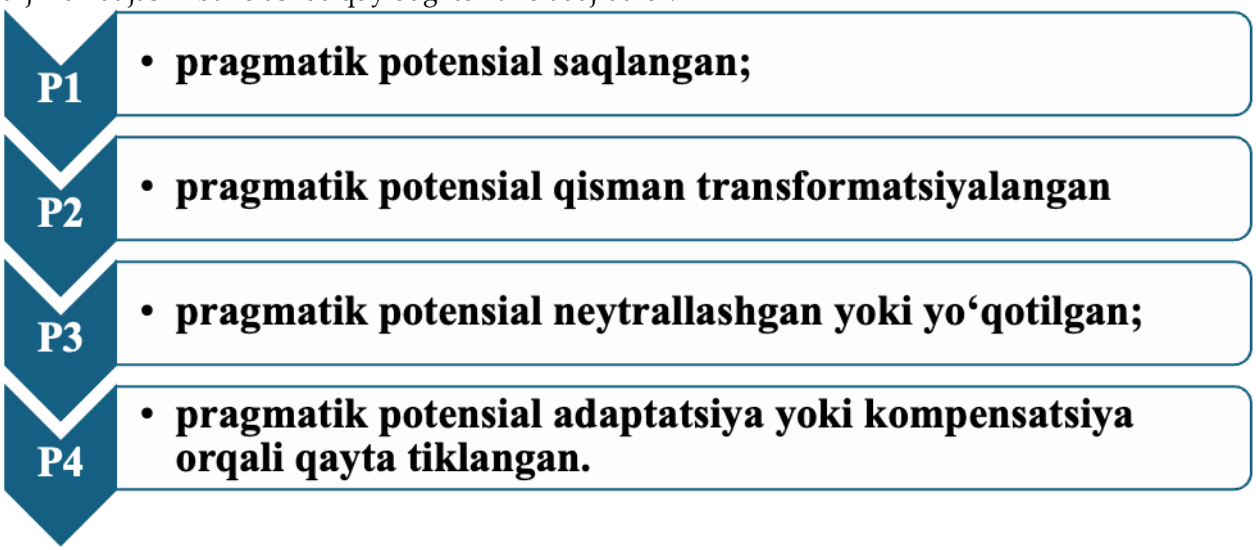
O‘zbek tarjimashunosligi an’analaridagi ushbu yondashuvlarni zamonaviy pragmatik tarjima nazariyalari bilan birlashtirganda quyidagi o‘zaro bog‘liqlikni ko‘rish mumkin:

va

Mazkur ikki yo‘nalishning integratsiyasi badiiy tarjimada pragmatik potensialni kompleks tahlil qilish uchun nazariy asos yaratadi.

TADQIQOT METODOLOGIYASI. Tadqiqotda qiyosiy-chog‘ishtirma, kontekstual, pragmalingvistik, funksional-semantik va tarjimaviy transformatsiyalar tahlili metodlaridan kompleks foydalanildi. Asliyat va tarjimadan tanlangan mikrokontekstlar quyidagi ketma-ketlik asosida o‘rganildi:

Pragmatik potensialni kompleks tahlil qilish uchun quyidagi integrativ model taklif etildi:



PP = CI + SA + LC + EE + IM + ST + AR

bunda:

CI – Communicative Intention – kommunikativ intensiya/maqsad;
SA – Speech Act – nutqiy akt komponenti;
LC – Linguocultural Component – lingvomadaniy komponent;
EE – Emotional-Evaluative Component – emotsional-baholovchi komponent;
IM – Implicit-Contextual Meaning – implikativ-kontekstual ma’no;
ST – Stylistic Component – stilistik komponent;
AR – Addressee Response – adresatga yo‘naltirilgan ta’sir.

Mazkur formula matematik hisoblash vositasi emas, balki pragmatik potensialning ko‘p komponentli tabiatini tavsiflovchi konseptual modeldir.

Tarjima natijasini baholashda quyidagi to‘rt holat ajratildi:

Muhim metodologik jihat shundan iboratki, P1–P4 butun tarjima birligiga mexanik ravishda tatbiq etilmaydi. Bitta mikrokontekstning CI komponenti P1 darajasida saqlanishi, ayni paytda ST komponenti P2 yoki P4 holatida boʻlishi mumkin. Bu pragmatik potensialning differensial tabiatini hisobga olish imkonini beradi.

TAHLIL VA NATIJALAR.

1. Oq devor epizodida kommunikativ manipulyatsiya. Mark Tven romanidagi eng mashhur epizodlardan biri Tomning devorni oqlash majburiyatini boshqa bolalar uchun jozibali faoliyat sifatida koʻrsatib, ularni ishni bajarishga undashidir.

ST:

"What do you call work?"

"Why, ain't THAT work?"

"Well, maybe it is, and maybe it ain't. All I know, is, it suits Tom Sawyer."

TT:

"- Сен жумыс деп нени айтып турсаң?

- Бул сениң-ше жумыс емес-пе?

- Ал не, мүмкин жумыс шығар, ал мүмкин жумыс емес шығар. Бирақ мен соны билемен, бул Том Сойер үшын жақсы нәрсе.

- Унайма дейсең-бе? ... Хәр күни шарбақ ақлаў тийсе бермейди."

Keyinchalik Tom devor oqlash har kuni nasib qiladigan imkoniyat emasligini ta'kidlaydi. Ushbu dialogda Tomning kommunikativ maqsadi Benga obyektiv ma'lumot berish emas. U Benning "*work/ жумыс*" konseptiga boʻlgan munosabatini oʻzgartirishga harakat qiladi. Avval Ben uchun:

whitewashing = compulsory work. – devorni oqlash – шарбақ ақлаў =majburiy ish

Tom esa kommunikativ qayta ramkalash natijasida:

Ingliz tilida – whitewashing = rare opportunity / privilege – "*it suits Tom Sawyer*" bilan berlsa;

Qoraqalpoq tilida – devorni oqlash – шарбақ ақлаў = kamdan-kam boʻladigan beriladigan imkoniyat/afzallik – "*бул Том Сойер үшын жақсы нәрсе*" orqali interpretatsiyasini yuzaga keltiradi.

Bu yerda Tom Benning "work/жумыс" haqidagi dastlabki presuppozitsiyasini oʻzgartiradi. Asliyatdagi '*Does a boy get a chance to whitewash a fence every day?*' ritorik savoli qoraqalpoqchada "*Хәр күни шарбақ ақлаў тийсе бермейди*" shaklidagi tasdiq gap bilan berilgan. Formal shakl oʻzgargan boʻlsa-da, "bu kam uchraydigan imkoniyat" implikaturasi saqlangan. Shuning uchun CI + IM + AR komponentlari boʻyicha pragmatik potensial saqlangan va natija P1 sifatida baholanadi.

Shunday qilib, uch bosqichli pragmatik mexanizm shakllanadi:

reframing → implicature → behavioural response.

Ben oxir-oqibat devorni oqlashni oʻzi xohlay boshlaydi. Demak, Tomning kommunikativ strategiyasining muvaffaqiyati gaplarning denotativ mazmunida emas, adresatda yuzaga keltirilgan inferensiya va keyingi xatti-harakatda namoyon boʻladi.

Bu holatda **CI + IM + AR** komponentlari yetakchilik qiladi.

Strategiya: implikaturani funksional saqlash va pragmatik qayta ramkalash.

Natija: P1 — asosiy pragmatik potensial saqlangan.

2. Work/Play oppozitsiyasi va muallif pragmatikasi

Oq devor epizodining yakunida muallif Tomning tajribasidan umumiy xulosa chiqarib, majburiy faoliyat bilan ixtiyoriy faoliyat oʻrtasidagi farqni "work" va "play" oppozitsiyasi orqali konseptuallashtiradi. Bu yerda kommunikatsiya personajlararo sathdan muallif va oʻquvchi oʻrtasidagi sathga oʻtadi.

personaj ↔ personaj

↓

muallif ↔ oʻquvchi

Shunday qilib, "*work/play*" qarama-qarshiligi faqat leksik antonimiya emas, insonning faoliyatga munosabati haqidagi ironik-pragmatik umumlashtirishga aylanadi. Qoraqalpoqcha tarjimada ham ishning majburiyligi va oʻyinning ixtiyoriyligi oʻrtasidagi konseptual qarama-qarshilik saqlanadi.

Yetakchi komponentlar — **IM + AR + CI**.

Strategiya: konseptual-pragmatik ekvivalentlik.

Natija: P1.

3. 'Sunday school" epizodida yumor va pragmatik nomuvofiqlik. 'Sunday school' epizodida Tom turli rangdagi chiptalarni yigʻib, mukofot olish imkoniyatiga ega boʻladi. Tashqi vaziyat Tomni diniy bilimga ega namunali oʻquvchi sifatida koʻrsatadi. Biroq unga Injilga oid savol berilganda notoʻgʻri javob berishi tashqi koʻrinish va real bilim oʻrtasidagi nomuvofiqlikni fosh qiladi.

ST:

"Now, Thomas, tell me the names of the first two disciples that were appointed."

"David and Goliath!"

TT:

"- Томас, қорқма, жуўап бер ҳүрметли сыйлы адамға. ...

- Биринши еки апостолды...

- Давид ҳәм Голиаф!"

Bu yerda pragmatik effekt David and Goliafning leksik ma'nosida emas, kutilgan diniy bilim bilan Tomning mutlaqo noto'g'ri javobi o'rtasidagi nomuvofiqlikda yuzaga keladi. Tarjimada "Давид ҳәм Голиаф" saqlanishi komik nomuvofiqlikni ham qayta yaratadi. Yetakchi komponentlar IM + LC + ST, natija P1/P2

Bu yerda yumorning pragmatik mexanizmi:

kutish → kutilmagan javob → nomuvofiqlik → hazil ta'siri

shaklida namoyon bo'ladi.

Pragmatik potensial diniy nomlarning o'zida emas, o'quvchi va vaziyat ishtirokchilarining kutgan javobi bilan Tomning javobi o'rtasidagi nomuvofiqlikda yuzaga keladi.

Yetakchi komponentlar: **IM + LC + ST**.

Strategiya: kontekstual-funksional ekvivalentlik.

Natija: P1/P2, chunki asosiy komik mexanizm saqlansa-da, uning lingvomadaniy assotsiativ foni tarjima auditoriyasida asliyat auditoriyasi bilan mutlaq bir xil bo'lishi shart emas.

4. Tom va Polli xola munosabatida ishonch/ishonchsizlik pragmatikasi. Tom va Polli xola dialoglarining muhim pragmatik xususiyatlaridan biri – Tomning gaplariga nisbatan oldindan shakllangan ishonchsizlikdir. Bu munosabatda da'vo, ishonchsizlik va ogohlantirish nutqiy aktlari muntazam o'zaro ta'sir qiladi. Tom biror fikrni tasdiqlaganda, Polli xola uning propositsional mazmuninigina emas, Tomning oldingi xatti-harakatlari asosida so'zlovchining ishonchliligini ham baholaydi.

Devor oqlash ishini boshqa bolalarga bajartirib bo'lgach, Tom Polli xolaning oldiga kelib, vazifa bajarilganini aytadi.

ST:

"Well, now, Tom, how much have you done?"

"It's all done, aunt."

"Tom, don't lie to me—I can't bear it."

"I ain't, aunt; it is all done."

TT:

- Қалай, жумысыңды ислеп питкергениң-бе? Қаншасын питкердиң?

- Барлығын, апа.

- Том, өтирик айтпа - мен ондайды жақсы көрмеймен.

- Өтирик айтып турғаным жоқ, апа, ҳәммеси ислеп болынды.

Mazkur dialog E. Berdimuratov tarjimasida aynan devor oqlash epizodidan keyin keltiriladi. Shundan so'ng muallif Polli xola Tomning gaplariga ishonmasligi odatiy hol ekanligini izohlaydi: Tom aytgan gapning yigirma besh foizi rost chiqsa ham, u qanoatlanishi mumkinligi ta'kidlanadi.

Ushbu mikrokontekstda kommunikativ munosabat quyidagi pragmatik zanjir asosida rivojlanadi:

Tom → da'vo

↓

Polli xola → ishonchsizlik + ogohlantirish

↓

Tom → mustahkamlangan da'vo

Tomning "*It's all done, aunt*" gapi yuzaki jihatdan oddiy assertiv nutq aktidir. Biroq Polli xola uning gapini faqat propositsional mazmun asosida baholamaydi. Uning interpretatsiyasiga Tomning avvalgi xatti-harakatlari va yolg'on gapirishga moyilligi haqidagi oldindan mavjud bilim ta'sir qiladi. Shu sababli Tomning xabari Polli xola tomonidan darhol shubha ostiga olinadi.

Bu holatni quyidagi formula orqali ifodalash mumkin:

ifoda + oldingi kommunikativ tajriba → amaliy talqin.

Demak, Polli xolaning "*Tom, don't lie to me*" replikasi oddiy taqiq yoki nasihat emas. Unda bir vaqtning o'zida ishonchsizlik, tanbeh va axloqiy baholash komponentlari mujassam. Qoraqalpoqcha tarjimada "*Том, өтирик айтпа*" shakli inglizcha '*don't lie to me*' ning asosiy illokutiv kuchini aniq qayta yaratgan. Direktiva va tanbeh funksiyasi saqlangan.

Biroq keyingi komponentda muayyan pragmatik transformatsiya kuzatiladi:

ST: *"I can't bear it."*

TT: "*мен ондайды жақсы көрмеймен*."

Inglizcha '*I can't bear it*' birligi oddiy "*yoqtirmaslik*"dan kuchliroq emotsional ma'noni ifodalaydi. Unda "*bunga chiday olmayman*", "*buni koʻtara olmayman*" kabi intensiv salbiy munosabat mavjud. Qoraqalpoqchadagi "*мен ондайды жақсы көрмеймен*" esa mazmunan "*bunday narsani yoqtirmayman*" darajasiga yaqinlashadi.

Shu sababli bu oʻrinda ikki pragmatik komponentni farqlash zarur:

SA (Speech Act): tanbeh va yolgʻon gapirmaslikka undash – saqlangan (P1);

EE (Emotional-Evaluative Component): emotsional intensivlik – qisman pasaygan (P2). Tomning javobida esa ingliz tilidagi nostandart "*I ain't*" shakli qoraqalpoqchada: "*Өтирик айтып турганым жоқ*" tarzida mazmunan va kommunikativ jihatdan qayta yaratilgan. Asliyatdagi nostandart grammatik marker formal jihatdan saqlanmagan, biroq Tomning oʻzini oqlash va avvalgi da'voni kuchaytirish funksiyasi toʻliq ifodalangan.

Bundan tashqari, muallifning keyingi izohi mazkur ishonchsizlikni situativ emas, Tom va Polli xola munosabatlariga xos barqaror shaxslararo pragmatik model ekanligini koʻrsatadi. Polli xola devorning haqiqatan ham oqlanganini koʻrganidan keyingina Tomning gapiga ishonadi.

Shunday qilib, mazkur misolda pragmatik potensialning komponentlari differensial tarzda saqlangan:

CI – kommunikativ intensiya: P1;

SA – da'vo / ogohlantirish: P1;

EE – emotsional-baholovchi intensivlik: P2;

IM – oldindan mavjud ishonchsizlik presuppozitsiyasi: P1;

ST – Tom nutqidagi nostandart grammatik marker: P2/P4.

Asosiy tarjima strategiyasi: ***funksional-pragmatik ekvivalentlik + qisman stilistik transformatsiya.***

Umumiy natija: P1/P2 – asosiy kommunikativ-pragmatik potensial saqlangan, biroq emotsional va ayrim stilistik komponentlar qisman transformatsiyalangan. Natijada: **nutq + oldingi bilimlar → pragmatik talqin** mexanizmi yuzaga keladi. Bu presuppozitsiya tarjimada ham personajlararo munosabatning muhim qismi sifatida saqlanadi. Yetakchi komponentlar: **SA + EE + IM**. **Strategiya:** funksional-pragmatik ekvivalentlik. **Natija: P1/P2.** Nutq aktining asosiy funksiyasi saqlanadi, biroq ayrim emotsional markerlarning intensivligi tarjimada oʻzgarishi mumkin.

5. Qonli qasamyod: ritual va pragmatik kuch. Tom va Geklberri qabristondagi jinoyatga guvoh boʻlgach, voqeani hech kimga aytmaslik haqida qasamyod qilishadi. Oddiy ogʻzaki va'da bolalar uchun yetarli hisoblanmaydi; sir saqlash ritualistik shaklda mustahkamlanadi.

ST:

"Now, Tom, let's tie ourselves to each other with an oath, and then we can never tell."

"No, that wouldn't do for this. That's good enough for little rubbishy common things... but there orter be writing 'bout a big thing like this. And blood."

TT:

"- Енди, Том, бизлер бир-биримизге айтпаслығымызға ант берейик – болмаса мүмкин емес.

- Мейли, мен қайылман. Ең жақсысы усы. Қәне, онда қол қысып... ант етейик.

- Жоқ, бул болмайды. Бул қандай-да бир әйтеўир ислер ушын... Ал бул мәселе болса, жүдә әҳмийетли... жазба түрде ант етиў керек."

Bu misolda oddiy va'da '***marosimiy majburiyat***' (ritualized commitment) darajasiga koʻtariladi. Qasamyodning pragmatik kuchi qoʻrquv, sir saqlash va ritual bilan birgalikda yuzaga keladi.

Bu yerda bir vaqtning oʻzida:

qoʻrquv + sir + qasam + ishonch + sadoqat komponentlari faollashadi.

Qasamyodning pragmatik vazifasi oddiy va'dadan kuchliroq boʻlib, ritual elementlar commissive nutq aktining illokutiv kuchini oshiradi. Mazkur mikrokontekstda **SA + LC + EE + IM** komponentlari oʻzaro bogʻlangan.

Strategiya: lingvomadaniy-funksional transfer.

Natija: P1/P2. Va'da va qoʻrquvning kommunikativ funksiyasi saqlanadi, ritual bilan bogʻliq ayrim madaniy assotsiatsiyalar esa maqsad auditoriyasida qisman oʻzgarishi mumkin.

6. Qabriston epizodida qoʻrquv va yashirin tahdid. Qabristondagi qotillikdan keyin Tom va Gekning kommunikativ xatti-harakatlarini Injun Joedan qoʻrquv boshqaradi. Ushbu epizodning pragmatik jihatdan muhim xususiyati shundaki, tahdid dastlab Injun Joe tomonidan Tom va Gekka bevosita aytilmaydi. Bolalar sodir boʻlgan jinoyatga guvoh boʻlganliklari va Injun Joening shafqatsizligini koʻrganliklari asosida oʻzlari xavf haqida inferensiya

qiladilar. Shu sababli qo‘rquvning pragmatik manbai eksplisit tahdid nutq aktidan ko‘ra “kontekstual implikatura”da namoyon bo‘ladi.

Qotillik sodir bo‘lganidan keyin Tom va Gek yashiringan joylariga yetib kelib, voqeaning qanday oqibatlarga olib kelishini muhokama qiladilar.

ST:

“Hucky, do you believe the dead people like it for us to be here?”

[...]

“Huck, I’ll tell you one thing that’s mighty curious. Muff Potter don’t know it. How can he tell?”

[...]

“Huck, if Injun Joe’s evidence don’t hang Potter, he’ll kill us some time or other, just as dead sure as we’re a laying here.”

Ushbu kontekstda bolalarning asosiy xavotiri jinoyatning o‘zi bilan cheklanmaydi. Ular voqeani oshkor qilish Injun Joe tomonidan qasos olishga sabab bo‘lishi mumkinligini anglaydilar. Bu xavf ularning keyingi kommunikativ xatti-harakatini – sukut saqlashni – belgilaydi.

Qoraqalpoqcha tarjimada mazkur qo‘rquv quyidagicha ifodalangan:

TT:

- Ал ким айтып барар екен? Бизлер-ме?

- Не айтып отырсаң? Ойлап бола-ма. Ал қапелимде Индей Джоны дарға аспаса не қыламыз? Ол бизлерди ҳәзир болмағанымменен, кейин өлтиреди-ғой, онда қутыла алмаймыз.

- Мен өзим-де солай ойлаған едим, Гек.

Mazkur dialogda Gekning “кейин өлтиреди-ғой” mazmunidagi fikri Injun Joening bolalarga shu paytda bevosita tahdid qilmaganiga qaramay, ular vaziyatni o‘z hayotlari uchun real xavf sifatida interpretatsiya qilayotganini ko‘rsatadi. Qoraqalpoqcha tarjimada ushbu sabab-oqibat munosabati aniq qayta yaratilgan.

Ushbu mikrokontekstning pragmatik tuzilishini quyidagicha ifodalash mumkin:

witnessing the murder

↓

knowledge of Injun Joe’s violence

↓

inference of possible revenge

↓

fear

↓

decision to remain silent.

Demak, bu epizodda pragmatik ma’no faqat eksplisit aytilgan gaplardan tashkil topmaydi. Tom va Gekning xatti-harakatlari ular mavjud kontekst asosida chiqargan xulosaga bog‘liq.

Ayniqsa, *“Ал ким айтып барар екен? Бизлер-ме?”* savoli yuzaki jihatdan axborot so‘rashga o‘xshasa-da, pragmatik jihatdan haqiqiy interrogativ nutq akti emas. Tom aslida “biz bu haqda aytmasligimiz kerak” degan xavotirni ifodalamoqda. Gekning bunga: *“Не айтып отырсаң? Ойлап бола-ма.”* mazmunidagi javobi ham savolga axborot berishdan ko‘ra bunday harakatning mumkin emasligini ta’kidlaydi.

Shu tariqa savol-javob shaklidagi dialog ortida quyidagi implikatura yuzaga keladi:

If we tell the truth → Injun Joe may escape punishment → he will take revenge → our lives will be in danger.

Shuning uchun:

telling the truth = danger;

remaining silent = self-preservation.

Bu holat Grays nazariyasi nuqtai nazaridan kontekstual implikatura bilan bog‘liq bo‘lsa, relevans yondashuvi nuqtai nazaridan personajlarning mavjud kontekstual bilimlardan foydalanib yangi inferensial xulosaga kelishi sifatida talqin qilinishi mumkin.

Mazkur pragmatik mexanizm keyingi epizodda yanada yaqqol namoyon bo‘ladi. Tom Gekdan ehtiyotsizlik bilan sirni aytib qo‘ymasligini yana so‘raydi:

TT:

Гек, сен абайсызда айтып қоймайсаң-ба?

Shundan keyin muallif ikki bolaning qo‘rquv holatini tasvirlaydi: ular shaharga qaytishda qorong‘ilikdagi har bir daraxtni ularni quvib kelayotgan dushman deb tasavvur qiladilar va qo‘rquvdan holdan toyadilar.

Bu muallif tasviri dialogda shakllangan xavf inferensiyasining **perlokutiv natijasini** ko‘rsatadi. Qo‘rquv faqat verbal-emotsional holat bo‘lib qolmay, personajlarning atrof-muhitni idrok etish usulini ham o‘zgartiradi. Shu sababli mazkur mikrokontekstda quyidagi pragmatik komponentlar yetakchilik qiladi:

CI – kommunikativ intensiya: sirni oshkor qilmaslik va o‘zini himoya qilish;

IM – implikativ-kontekstual ma’no: “agar gapirsak, Injun Joe bizdan qasos oladi”;

EE – emotsional-baholovchi komponent: “kuchli qo‘rquv va xavotir”;

SA – nutq akti: “savol shaklida ifodalangan ogohlantirish va sukut saqlashga undash”;

AR – adresatga ta’sir: “suhbatdoshni sirni saqlashga ishontirish”.

Ayniqsa, **IM komponenti** mazkur misolda markaziy o‘rin egallaydi. Chunki bolalarning qo‘rquvi Injun Joening ularga bevosita “*sizlarni o‘ldiraman*” degan tahdididan emas, uning oldingi xatti-harakati va mavjud kommunikativ vaziyat asosida chiqarilgan inferensial xulosadan kelib chiqadi.

Qoraqalpoqcha tarjimada ham ushbu inferensial zanjir saqlangan: voqeani aytish ehtimoli, Injun Joening jazodan qutulishi va keyinchalik bolalarni o‘ldirishi o‘rtasidagi sababiy aloqa aniq ifodalangan. Shuning uchun tarjima adresati ham personajlarning nima sababdan sukut saqlashga qaror qilganini anglay oladi.

Pragmatik model: **context → inference → anticipated threat → fear → silence**

Yetakchi komponentlar: **IM + EE + CI + AR.**

Asosiy tarjima strategiyasi: **kontekstual-pragmatik ekvivalentlik va implikaturani saqlash.**

Natija: P1 – asliyatdagi asosiy pragmatik potensial, xususan, yashirin tahdid, undan kelib chiqadigan qo‘rquv va sukut saqlashga undovchi kommunikativ motivatsiya qoraqalpoqcha tarjimada funksional jihatdan saqlangan.

Pragmatik ta’sir: **context → inference → fear → silence** mexanizmi asosida yuzaga keladi. Demak, qo‘rquvning pragmatik manbai alohida “*tahdid*” gapida emas, qahramonlarning voqea, jinoyatchi va ehtimoliy oqibat haqidagi bilimlari asosida hosil qilgan inferensiyasidadir. Bu holat implikativ-kontekstual komponentning pragmatik potensialdagi mustaqil ahamiyatini ko‘rsatadi.

Yetakchi komponentlar: **EE + IM + CI**.

Strategiya: kontekstual-pragmatik ekvivalentlik.

Natija: P1.

MUHOKAMA

Ingliz tilidan qoraqalpoq tiliga badiiy tarjimada pragmatik potensialning saqlanishini aniqlash maqsadida Mark Tvenning “*The Adventures of Tom Sawyer*” asari va uning qoraqalpoqcha tarjimasidan tanlangan oltita pragmatik vaziyatning qiyosiy tahlili shuni ko‘rsatdiki, pragmatik ekvivalentlik alohida leksik birlik yoki grammatik konstruksiyaning formal mosligiga emas, balki kommunikativ intensiya, nutq akti, implikatura, emotsional-ekspressiv ta’sir, lingvomadaniy komponent va personaj nutqining stilistik xususiyatlari majmuasining qayta yaratilishiga bog‘liq.

O‘tkazilgan tahlillar asosida pragmatik potensialni yaxlit hodisa sifatida emas, balki o‘zaro aloqador komponentlardan tashkil topgan ko‘p qatlamli tizim sifatida baholash zarurligi aniqlandi. Tadqiqotda qo‘llanilgan integrativ model doirasida **CI (communicative intention), SA (speech act), IM (implicature), EE (emotional-evaluative effect), LC (linguocultural component), ST (stylistic component) va AR (addressee response/orientation)** kabi parametrlar tarjimaning pragmatik samaradorligini aniqlash imkonini berdi.

Tom va Ben o‘rtasidagi kommunikativ munosabatlar misolida personajlararo muloqotning pragmatik qiymati faqat aytilayotgan fikrning denotativ mazmuni bilan belgilanmasligi ko‘rsatildi. Replikalarning illokutiv kuchi, emotsional munosabat va suhbatdoshga yo‘naltirilgan kommunikativ ta’sir tarjimada muhim ahamiyat kasb etadi. Qoraqalpoqcha tarjimada dialogning asosiy kommunikativ vazifasi funksional vositalar orqali qayta yaratilishi pragmatik potensialni saqlashda **funksional ekvivalentlik**ning ustuvorligini ko‘rsatadi.

Sunday school epizodi – yumor tarjimasida pragmatik effektning leksik birliklarning o‘zidan ko‘ra kontekstual nomuvofiqlik bilan chambarchas bog‘liqligini ko‘rsatdi. Tomdan diniy bilim talab qilinayotgan kommunikativ vaziyatda kutilgan javob o‘rniga “*David and Goliath*” mazmunidagi noto‘g‘ri javobning berilishi komik effektni yuzaga keltiradi. Qoraqalpoqcha tarjimada ushbu nomlarning saqlanishi va kommunikativ vaziyatning qayta yaratilishi yumorning asosiy pragmatik mexanizmini tarjima adresatiga yetkazishga xizmat qiladi. Demak, yumor tarjimasida formal moslikdan ko‘ra **kontekstual-pragmatik ekvivalentlik** muhimroq hisoblanadi.

Tom va Polli xola munosabatidagi ishonch/ishonchsizlik pragmatikasi – pragmatik interpretatsiyada oldingi kommunikativ tajriba va presuppozitsiyaning ahamiyatini ko‘rsatdi. Tomning *“It’s all done, aunt”* mazmunidagi assertiv nutq akti Polli xola tomonidan neytral xabar sifatida emas, balki Tomning avvalgi xatti-harakatlari asosida shubha bilan qabul qilinadi. Qoraqalpoqcha tarjimada *“Том, өтирик айтпа”* shaklidagi replika ishonchsizlik va tanbehning asosiy illokutiv kuchini saqlaydi. Shu bilan birga, asliyatdagi “*I can’t bear it*”ning “*мен ондайды жақсы көрмеймен*” tarzida ifodalanishi emotsional intensivlikning ma’lum darajada pasayganini ko‘rsatadi. Demak, ushbu misolda nutq akti va kommunikativ intensiya yuqori darajada saqlangan bo‘lsa-da, emotsional-baholovchi komponentda qisman pragmatik siljish kuzatiladi.

Tadqiqot va tahlillar jarayonida pragmatik potensialning implikativ qatlami alohida ahamiyat kasb etishi aniqlandi. Tomning kommunikativ strategiyasida aytilgan fikr bilan nazarda tutilgan ma’no o‘rtasidagi munosabat adresatning

interpretatsiyasini boshqaradi. Bunday holatda tarjimonning vazifasi faqat eksplisit axborotni yetkazish emas, balki asliyat adresati chiqarishi mumkin bo‘lgan inferensial xulosani tarjima adresati uchun ham imkon qadar qayta yaratishdan iborat. Tahlil natijalari implikaturaning saqlanishi badiiy personajning kommunikativ strategiyasi va muallif yaratgan pragmatik effektni qayta hosil qilishning asosiy shartlaridan biri ekanligini ko‘rsatdi.

Qabristondagi qotillikdan keyingi epizod tahlili esa pragmatik potensialning eksplisit mazmundan tashqarida shakllanishini yanada yaqqol namoyon etdi. Tom va Gekning xatti-harakatlari Injun Joening ularga bevosita verbal tahdid qilishidan emas, balki uning qotillikka qodir ekanligi haqidagi kontekstual bilim va bundan kelib chiqadigan inferensiya orqali boshqariladi. Qoraqalpoqcha tarjimada bolalarning “agar Injun Joe jazodan qutulsa, keyinchalik bizni o‘ldiradi” mazmunidagi xavotiri aniq ifodalangan. Keyingi kontekstda esa ushbu qo‘rquv ularning idrokiga va xatti-harakatlariga bevosita ta’sir ko‘rsatishi tasvirlanadi: ular qorong‘ilikdagi obyektlarni o‘zlarini ta’qib qilayotgan xavf sifatida qabul qiladilar. Shu jihatdan oltinchi misolda quyidagi pragmatik zanjir kuzatiladi:

kontekst → inferensiya → kutilayotgan tahdid → qo‘rquv → sukut.

Mazkur zanjirning tarjimada saqlanishi alohida ahamiyatga ega, chunki personajlarning sukut saqlashi faqat syujet hodisasi emas, balki kontekstual implikaturadan kelib chiqadigan kommunikativ strategiyadir. Shuning uchun ushbu misolda **IM + EE + CI + AR** komponentlarining o‘zaro aloqasi pragmatik potensialni yuzaga keltiradi.

Yuqoridagi ingliz matnining qoraqalpoqcha tarjimasidan olingan parchalar qiyosiy tahlili yana bir muhim qonuniyatni aniqlash imkonini berdi: **pragmatik potensialning saqlanish darajasi barcha komponentlarda bir xil bo‘lishi shart emas**. Bir komponent P1 — to‘liq yoki yuqori darajada saqlanish holatini namoyon qilgan vaziyatda, boshqa komponent P2 — qisman transformatsiyaga uchrashi mumkin. Masalan, nutq aktining illokutiv kuchi saqlanib, emotsional intensivlik pasayishi yoki stilistik marker formal jihatdan yo‘qolib, uning kommunikativ funksiyasi boshqa vosita orqali kompensatsiya qilinishi mumkin. Bu esa pragmatik ekvivalentlikni “saqlangan/saqlanmagan” kabi binar mezon asosida baholash yetarli emasligini ko‘rsatadi.

Tahlillar asosida pragmatik potensialni saqlashning quyidagi umumiy mexanizmini taklif qilish mumkin:

Asliyat pragmatik potensiali → pragmatik komponentlarni aniqlash → dominant komponentni belgilash → tarjima strategiyasini tanlash → tarjima matnida funksional qayta yaratish → tarjima adresatiga pragmatik ta’sir.

Mazkur mexanizmda tarjimon asliyatning barcha formal belgilarini aynan takrorlashga emas, balki muayyan mikrokontekstda ustuvor bo‘lgan pragmatik komponentni aniqlashga intiladi. Masalan, yumorda **IM/LC**, interpersonal konfliktda **EE/SA**, ishonch/ishonchsizlik munosabatida **SA/IM/EE**, yashirin tahdid vaziyatida esa **IM/EE/CI/AR** dominantlik qilishi mumkin.

Shunday qilib, tahlil natijalari tarjimada pragmatik potensialning saqlanishini **ko‘p komponentli, dinamik va kontekstga bog‘liq jarayon** sifatida baholash zarurligini ko‘rsatadi. Tarjima birligining formal transformatsiyaga uchrashi har doim pragmatik yo‘qotishni anglatmaydi. Aksincha, ayrim hollarda formal transformatsiya yoki kompensatsiya asliyatdagi kommunikativ funksiyani tarjima matnida qayta yaratishning zarur sharti bo‘lishi mumkin.

XULOSA

Mark Tvenning *The Adventures of Tom Sawyer* asari va uning qoraqalpoqcha tarjimasidan tanlangan bir nechta parcha pragmatik vaziyatning qiyosiy tahlili ingliz tilidan qoraqalpoq tiliga badiiy tarjimada pragmatik potensialni saqlash masalasiga integrativ yondashish zarurligini ko‘rsatdi.

Tadqiqot natijalari asosida quyidagi xulosalarga kelindi:

Pragmatik potensial ko‘p komponentli hodisadir. Uni faqat leksik-semantik ekvivalentlik yoki alohida nutq aktlari bilan chegaralash mumkin emas. Kommunikativ intensiya (CI), nutq akti (SA), implikatura (IM), emotsional-baholovchi ta’sir (EE), lingvomadaniy komponent (LC), stilistik xususiyat (ST) va adresatga yo‘naltirilgan ta’sir (AR) birgalikda matnning pragmatik potensialini shakllantiradi.

Pragmatik ekvivalentlik formal ekvivalentlik bilan aynan bir hodisa emas. Tahlil qilingan ST-TT juftliklarida leksik yoki grammatik shakl o‘zgargan holatlarda ham kommunikativ maqsad va adresatga ko‘rsatiladigan ta’sir funksional vositalar orqali saqlanishi mumkinligi kuzatildi.

Nutq aktining illokutiv kuchini saqlash personajlararo munosabatlarni qayta yaratishda muhim omildir. Tomning Beki va Polli xola bilan dialoglari assertiv, direktiv, tanbeh, o‘zini oqlash va boshqa kommunikativ funksiyalarning tarjimada to‘g‘ri interpretatsiya qilinishi personajlar munosabatining pragmatik tabiatini saqlashga xizmat qilishini ko‘rsatdi.

Implikatura pragmatik potensialning eng muhim komponentlaridan biridir. Ayniqsa, yumor, manipulyativ kommunikatsiya va yashirin tahdid bilan bog‘liq vaziyatlarda haqiqiy kommunikativ ma’no eksplisit gap mazmunidan tashqarida shakllanadi. Shu sababli tarjimon STdagi inferensial mexanizmni aniqlashi va TT adresati uchun ham tegishli xulosani chiqarish imkoniyatini yaratishi lozim.

Emotsional-ekspressiv potensialni saqlash differensial xarakterga ega. Ayrim misollarda kommunikativ intensiya va nutq akti to‘liq saqlangan bo‘lsa-da, emotsional intensivlikning qisman pasayishi kuzatildi. Bu holat pragmatik potensialni komponentlar kesimida alohida baholash zarurligini tasdiqlaydi.

Qabriston epizodi yashirin tahdidning pragmatik tabiatini yaqqol ko‘rsatadi. Injun Joe tomonidan Tom va Gekka dastlab to‘g‘ridan-to‘g‘ri tahdid verbalizatsiya qilinmagan bo‘lsa ham, qotillikni ko‘rgan bolalar uning ehtimoliy qasosini inferensial ravishda anglaydilar. Natijada “xavfni anglash → qo‘rquv → sukut” pragmatik zanjiri yuzaga keladi. Ushbu zanjirning qoraqalpoqcha tarjimada saqlanishi kontekstual-pragmatik ekvivalentlikning muvaffaqiyatli namunasini tashkil etadi.

Umuman, amalga oshirilgan tahlillar asosida **tarjimada pragmatik potensialni saqlashning integrativ modeli**ni quyidagicha ifodalash mumkin:

Pragmatik potensial = CI + SA + IM + EE + LC + ST + AR

va tarjima jarayonining pragmatik mexanizmi:

ST → pragmatik diagnostika → dominant komponent(lar) → tarjima strategiyasi → TT → pragmatik ta’sirning saqlanish darajasi (P1/P2/P4).

Taklif etilayotgan modelning asosiy afzalligi pragmatik ekvivalentlikni faqat tarjima birligining formal yoki semantik mosligi asosida emas, balki **asliyatdagi kommunikativ maqsad, inferensial ma’no, emotsional ta’sir, lingvomadaniy va stilistik xususiyatlarning tarjima adresati uchun qay darajada qayta yaratilgani** asosida baholash imkonini berishidadir.

Shu nuqtai nazardan, ingliz tilidan qoraqalpoq tiliga badiiy tarjimada pragmatik potensialni saqlash tarjimonning alohida so‘z va konstruksiyalarga ekvivalent topish faoliyatidan kengroq jarayon bo‘lib, u asliyatdagi **kommunikativ hodisani boshqa lingvomadaniy muhitda funksional jihatdan qayta yaratish** sifatida talqin qilinishi lozim.

ESHQOBIL SHUKUR POETIKASIDA INDIVIDUAL OLAM MANZARASINING LISONIY-KOGNITIV IFODASI

Ismailova Odina Rasuljonovna
Namangan davlat universiteti tayanch doktoranti
E-mail: odinaismailova84@gmail.com

Annotatsiya: *Maqolada Eshqobil Shukur poetikasida individual olam manzarasining lisoniy-kognitiv ifodalanishi tahlil qilinadi. Muallif "meni", shaxsiy va tarixiy xotira, milliy-madaniy kod, folklor, metaforik tafakkur, rang semantikasining kengayishi hamda vaqt-makonning subyektiv tashkil etilishi shoir poetik olamini shakllantiruvchi omillar sifatida ko'rib chiqiladi. "Asorat", "Ozodlik", "Mengim momoning yo'qlovi", "Potini", "Chanqovuz", "Laylatul qadr" kabi matnlardagi lisoniy hodisalar asosida tarixiy-madaniy tajribaning shaxsiy ruhiy kechinmaga ko'chishi yoritiladi. Tahlil shoir individual olam manzarasi shaxsiy tajriba, kollektiv xotira va lisoniy ijodkorlik tutashuvida shakllanuvchi kognitiv-estetik tizim ekanini ko'rsatadi.*

Kalit so'zlar: *individual olam manzarasi, kognitiv poetika, lisoniy shaxs, poetik tafakkur, tarixiy xotira, muallif "meni", milliy-madaniy kod, metafora, verbalizatsiya.*

ЛИНГВОКОГНИТИВНОЕ ВЫРАЖЕНИЕ ИНДИВИДУАЛЬНОЙ КАРТИНЫ МИРА В ПОЭТИКЕ ЭШКОБИЛА ШУКУРА

Аннотация: *В статье рассматривается лингвокогнитивное выражение индивидуальной картины мира в поэтике Эшкобила Шукура. Авторское «я», личная и историческая память, национально-культурный код, фольклор, метафорическое мышление, цветовая семантика и субъективная организация времени и пространства анализируются как факторы формирования поэтического мира. На материале произведений «Asorat», «Ozodlik», «Mengim momoning yo'qlovi», «Potini», «Chanqovuz», «Laylatul qadr» раскрывается переход историко-культурного опыта в личное духовное переживание. Индивидуальная картина мира поэта определяется как когнитивно-эстетическая система, возникающая во взаимодействии личного опыта, коллективной памяти и языкового творчества.*

Ключевые слова: *индивидуальная картина мира, когнитивная поэтика, языковая личность, поэтическое мышление, историческая память, авторское «я», национально-культурный код, метафора, вербализация.*

LINGUO-COGNITIVE EXPRESSION OF THE INDIVIDUAL WORLDVIEW IN ESHQOBIL SHUKUR'S POETICS

Abstract: *The article examines the linguo-cognitive expression of the individual worldview in Eshqobil Shukur's poetics. The authorial "I", personal and historical memory, national-cultural codes, folklore, metaphorical thinking, colour semantics, and the subjective organization of time and space are treated as factors shaping the poet's world. Works such as Asorat, Ozodlik, Mengim momoning yo'qlovi, Potini, Chanqovuz and Laylatul qadr show how historical-cultural experience is transformed into personal spiritual experience. The poet's individual worldview is interpreted as a cognitive-aesthetic system formed through the interaction of personal experience, collective memory and linguistic creativity.*

Keywords: *individual worldview, cognitive poetics, linguistic personality, poetic thinking, historical memory, authorial "I", national-cultural code, metaphor, verbalization.*

Kirish

Olamning individual manzarasi badiiy matnda borliqning oddiy nusxasi emas, balki muallifning shaxsiy tajribasi, xotirasi, qadriyatlari va estetik tanlovi orqali qayta tashkil etilgan subyektiv-kognitiv modeldir. Shu bois ijodkor poetikasini o'rganishda uning nimani tasvirlashidan tashqari, voqelikni qanday ko'rishi va umumiy madaniy tajribani qanday individuallashtirishi ham muhim. J.N.Maslova poetik olam manzarasini muallif subyektivligi, estetik tajriba va poetik til aloqasida shakllanuvchi kognitiv obyekt sifatida izohlaydi [3].

Eshqobil Shukurda tashqi voqelik ko'pincha ko'ngil, xotira va ruhiy tajriba orqali ichki olamga ko'chadi. Tarix, urush, vatan, diniy hodisa yoki xalqona marosim lirik subyekt bilan tutashganda yangi semantik mazmun kasb etadi. I.Ibragimova individual lisoniy manzaraning kognitiv va lingvistik imkoniyatlar bilan bog'liqligini, shoir konseptual

olamining individual til tanlovlarida namoyon boʻlishini qayd etadi [11]. Maqolaning maqsadi Eshqobil Shukur poetikasida individual olam manzarasining lisoniy-kognitiv shakllanishini muallif “meni”, xotira, milliy-madaniy kod va metaforik tafakkur misolida yoritishdir.

Adabiyotlar tahlili

Eshqobil Shukur ijodiga oid tadqiqotlarda shoir individual olamining turli qirralari yoritilgan. Qurdosh Qahramonov uning poetikasini “botiniy olam manzaralari”, koʻngilga evrilish va oʻzlikni izlash bilan bogʻlaydi [4]. N.Erkinova muallif ismi, pretsedent birliklar va individual assotsiatsiyalarning lingvopoetik faolligiga e’tibor qaratadi [9]. I.Ernazarova shoirning soʻz ijodkorligi, “singil” va “yashil” singari birliklarning individual semantik yukini tahlil qiladi [5].

S.Ergashova yoʻqlov, folkloriy stilizatsiya va qush ramzlarining vazifasini [6; 10], U.Abdurahmonova diniy-ma’naviy obrazlar hamda oy bilan bogʻliq individual nominatsiyalarni oʻrganadi [8; 14]. D.Muxammadiyev esa Eshqobil Shukurda metaforik holat butun matn kompozitsiyasini qamrab olishi mumkinligini “she’r-metafora” hodisasi bilan izohlaydi [12]. Ushbu qarashlar maqolada individual olam manzarasini bir butun kognitiv-lisoniy tizim sifatida tahlil qilish uchun asos boʻladi.

Tadqiqot metodologiyasi

Tahlilda tavsifiy, lingvopoetik, kognitiv-semantik, kontekstual va konseptual yondashuvlardan foydalanildi. Kontekstual tahlil birlikning poetik matndagi qoʻshimcha semasini, kognitiv-semantik tahlil borliqning qanday konseptuallashtirilishini, lingvopoetik yondashuv esa til birligining individual-estetik vazifasini aniqlashga xizmat qildi.

Natijalar va ularning tahlili

Eshqobil Shukur individual olam manzarasining asosiy markazlaridan biri muallif “meni”dir. “Asorat” she’rida Muhammad paygʻambar, Suvorov, Che Gevara, Robin Gud kabi nomlardan soʻng “Eshqobil qaytmadi hamon urushdan” [15, B. 335] mazmunidagi burilish yuzaga keladi. N.Erkinova shoir ismining bunday faolligini alohida lingvopoetik xususiyat sifatida qayd etadi [9]. “Eshqobil” bu oʻrinda biografik ism boʻlishdan chiqib, tarixiy hodisaning hozirgi ruhiyatda davom etishini ifodalaydi.

“Qaytmaslik” fazoviy harakatning inkori bilangina cheklanmaydi: urush tarixiy vaqt nuqtayi nazaridan tugagan, biroq uning asorati lirik subyekt ongida davom etadi. Qurdosh Qahramonov ham Eshqobil obrazining vaqt, yoʻqlik va xotira bilan bogʻliq semantik yukiga e’tibor qaratadi [4]. “Eshqobil emasman endi men” [15, B. 353] takrorida esa “men” oʻzgarmas avtoportret emas, oʻzini qayta anglaydigan refleksiv ong sifatida namoyon boʻladi.

Tarixiy va shaxsiy xotiraning tutashuvi “Ozodlik”da ham koʻrinadi. Usmon, Choʻlpon va Qodiriy nomlari qatagʻon xotirasini, Tohir va Zuhra esa an’anaviy sevgi mazmunini faollashtiradi [7; 9].

Tohir Zuhrosini suygani kabi,
Men suymak istadim seni, Ozodlik. [9, B. 48]

Bu yerda mavhum “ozodlik” tushunchasi hissiy tajribaga koʻchadi. Tohir va Zuhra nomlari sevgi hamda sadoqat haqidagi madaniy bilimni uygʻotsa, “seni” olmoshi Ozodlikni murojaat qilinadigan va seviladigan qadriyatga aylantiradi. Tarixiy-siyosiy mazmun shaxsiy kechinma bilan birlashadi.

Shaxsiy xotiraning poetik umumlashuvi “singil” birligida ham faol. I.Ernazarova bu birlik shoirning “ruhiy xotira”si bilan bogʻliq holda armon, gʻam va noziklik singari qoʻshimcha semalarni orttirishini koʻrsatadi [5]. Biografik yoʻqotish shu tariqa oʻquvchi uchun umumiy ayriliq tajribasini faollashtiruvchi belgiga aylanadi.

“Mengim momoning yoʻqlovi”da shaxsiy fojia folklor shakli orqali milliy tarixiy xotira bilan tutashadi. S.Ergashova she’rda yoʻqlov va yigʻi janri stilizatsiya qilinganini, surgun tufayli vatandan uzoqda jon berayotgan momo obrazi orqali ayriliq ifodalanganini koʻrsatadi [6].

Goʻrim oʻz yuragimda,
Yurakda bordir Vatan. [15, B. 406]

“Qabr – yurak – Vatan” birliklari bir mikromatnda tutashib, makonning odatiy semantikasini oʻzgartiradi. Qabr yakunni, yurak hayot va hissiyotni, vatan esa geografik makonni anglatadi; ularning yaqinlashuvi natijasida vatan ichki ruhiy makonga koʻchadi. Surgun jismoniy ajralishni bildiradi, ammo vatan bilan kognitiv aloqa yurakda davom etadi.

Folklor Eshqobil Shukurda tayyor bezak emas, tarixiy va ruhiy voqelikni anglash vositasidir. “Potini” bolalar oʻyinidagi jim turish qoidasi turgʻunlik davridagi ijtimoiy “gunglik” bilan yaqinlashtiriladi. Bandlar oxiridagi “Jim. Jim.” takrori oʻyin qoidasidan chiqib, tarixiy-ijtimoiy sukutning belgisi boʻlib qoladi [10; 15, B. 338–339].

“Chanqovuz”dagi “poʻlat til” va “havo soʻz” birikmalari [15, B. 360–361] ham predmetning individual qayta konseptuallashtirilishiga misoldir. N.Erkinova ularni chanqovuzning metall “tili” va ovoz hosil qilishda havoning ishtiroki bilan bogʻliq individual assotsiatsiyalar sifatida tahlil qiladi [9]. Xalq musiqa asbobi shu tariqa til va nutq hodisasi orqali yangidan anglanadi.

Shoir so‘z ijodkorligi “yashil” rang leksemasining semantik kengayishida ham namoyon bo‘ladi. I.Ernazarova “yashil”ning ohang, so‘z, tuyg‘u, havo, qush va yalov kabi birliklar bilan birikishini ko‘rsatadi [5]. Rang ko‘rish belgisidan chiqib, tovush, nutq va ruhiy holatga ko‘chadi.

“Yashil o‘lim” birikmasida bu semantik qayta qurish yanada keskin. N.Erkinova yashil qushlar, yashil bayroq va “ko‘karayotgan” tobut tasvirini abadiyat hamda ruhiy tirilish mazmuni bilan bog‘laydi [9]. “Yashil” ko‘karish va hayot, “o‘lim” esa yakun bilan aloqador; ularning birikishi o‘limning odatiy konseptual modelini qayta tashkil etadi.

Z.Kövecses metaforik modelning madaniy va individual omillar ta’sirida variantlanishini ta’kidlaydi [2]. Eshqobil Shukurda “vatan – yurak”, “umr – uy”, “ruhiy holat – qush”, “o‘lim – ko‘karish” munosabatlari individual poetik tajriba bilan uyg‘unlashadi.

D.Muxammadiyev Eshqobil Shukurda metaforik holat butun matn kompozitsiyasini qamrab olishini qayd etadi [12]. “Xaroba uy” obrazi odatda barqarorlikni bildiradigan uyga uchish va ko‘chish harakatini yuklab, “barqaror joy” semantikasini o‘tkinchi umr modeliga aylantiradi [1, B. 63; 12]. Predmetning odatiy xususiyati buzilishi orqali yangi ma’no ochiladi.

Diniy-ma’naviy qatlam ham shoir individual olamida ichki tajriba bilan bog‘liq. X.Nishonova shoir mansub ijodiy avlodda diniy qarashlarning poetik obrazlar tizimiga faol kirib kelishini ko‘rsatadi [13]. U.Abdurahmonova “Anjuman” va “Laylatul qadr”da Qadr kechasi, qaldirg‘och, banda va Yaratgan munosabatlari orqali ruhiy yangilanish mazmunining badiiy sintezini tahlil qiladi [8]. Bu matnlarda vaqt kalendar o‘lchovidan ko‘ra ruhiy holat bilan belgilanadi.

Vaqt va makonning subyektivlashuvi shoir poetikasining muhim xususiyatidir. “Asorat”da urush hozirgi ruhiy holatga ko‘chadi, “Mengim momoning yo‘qlovi”da geografik vatan yurak ichidagi makonga aylanadi, “Laylatul qadr”da esa tunning qimmati uning davomiyligi bilan emas, unda kechayotgan ruhiy o‘zgarish bilan o‘lchanadi. Natijada kalendar-xronologik vaqt bilan ruhiy-semantik vaqt farqlanadi.

Pretsedent birliklar ham katta fon bilimini ixcham shaklda faollashtiradi. N.Erkinova shoir she’riyatida Qur’on suralari, hadislar, maqollar, mashhur ibora va nomlarning poetik imkoniyatini ko‘rsatadi [7]. “Asorat”dagi tarixiy shaxslar qatorining Eshqobil ismi bilan yakunlanishi va “Ozodlik”da qatag‘on qurbonlari nomlarining Tohir-Zuhra obrazlari bilan bir matnga kirishi kollektiv xotira bilan individual hissiyot o‘rtasida dialog hosil qiladi.

Shu bois shoir poetikasidagi “men”, tarixiy ism, folklor shakli, vatan, rang, qush, uy yoki diniy birliklar alohida stilistik detallar emas. Ular tarixiy-madaniy tajribani shaxsiy kechinmaga aylantirish va borliqni yangi semantik munosabatlarda ko‘rish jarayonining tarkibiy qismlaridir.

Xulosa

Eshqobil Shukur poetikasidagi individual olam manzarasi shaxsiy ruhiy tajriba, kollektiv tarixiy-madaniy xotira va lisoniy ijodkorlikning o‘zaro aloqasida shakllanadigan kognitiv-estetik tizimdir. Muallif “meni” tarix, vatan, xotira va diniy tajriba bilan munosabat o‘rnatadigan semantik markaz sifatida namoyon bo‘ladi.

Tarix shoir matnida ruhiy asorat, ism, sukut, yurak yoki uy kabi konkret birliklarga ko‘chadi. Folkloriy shakllar zamonaviy tarixiy va ruhiy vaziyatni anglash vositasiga, rang va metaforik birliklar esa borliqni qayta kategoriyalash usuliga aylanadi. Vaqt va makon ham obyektiv koordinata bo‘lib qolmay, xotira, e’tiqod va kechinma ta’sirida psixologik-semantik mazmun kasb etadi.

Shu jihatlar Eshqobil Shukur individual olam manzarasining antropotsentrik, tarixiy-madaniy va metaforik tabiatini belgilaydi. Shoir umumxalq tilidagi birliklarni shaxsiy xotira, qadriyat va metaforik qayta ko‘rish orqali yangidan tashkil etadi.

ORCID: https://orcid.org/0009-0002-7574-7208

Annotatsiya: *Maqolada Abulqosim Firdavsiyning “Shohnoma” dostoni xorijiy tillarga tarjima qilinishining tarixiy bosqichlari va uslubiy o‘ziga xosligi qiyosiy-tarixiy hamda lingvo-stilistik yondashuv doirasida tadqiq etiladi. Tadqiqot materialini asarning arab, usmoniy turk, gruzin, ozarbayjon, qozoq, turkman, rus, ukrain hamda g‘arbiy Yevropa tillaridagi o‘n ikkita tarjima an’anasi va Jeyms Atkinson amalga oshirgan inglizcha tarjimalar (1814, 1832) tashkil etdi. Qiyosiy-tarixiy, lingvo-stilistik, komponent va kontekstual tahlil natijasida tarjima an’analari to‘rt tipologik guruhga — asliyatga sodiq, kompozitsion moslashtiruvchi, milliy-adaptiv va poetik-kodni almashtiruvchi guruhlarga — ajratildi. Atkinson tarjimasi misolida forsiy poetik figurlar, giperbolalar va zardushtiy-eron mifologik qatlamini ifodalovchi realiyalarning “Heroic Couplet” hamda yambik pentametr qolipiga o‘tkazilishi asoslab berildi. Matndagi “piltan” (fil tanli) kabi an’anaviy epik sifatlovning ingliz tilida salbiy konnotatsiya kasb etmasligi uchun “lion’s heart” metaforasi bilan kompensatsiyalanishi aniqlandi. Xulosa sifatida milliy-mifik dostonlarni o‘girishda lingvistik aniqlik emas, madaniyatlararo poetik va konseptual kodni o‘tkazish hal qiluvchi ahamiyatga ega ekanligi ko‘rsatildi.*

Kalit so‘zlar: *“Shohnoma”, Firdavsiy, tarjimashunoslik, Jeyms Atkinson, Rustam dostoni, neoklassitsizm, yambik pentametr, semantik transformatsiya, madaniyatlararo adaptatsiya, realiya, ichkilashtirish, begonalashtirish.*

ИНОСТРАННЫЕ ПЕРЕВОДЫ «ШАХНАМЕ» И СПЕЦИФИКА АНГЛИЙСКИХ ПЕРЕВОДОВ

Аннотация: *В статье в рамках сравнительно-исторического и лингвостилистического подхода исследуются исторические этапы и стилистическое своеобразие переводов эпоса Абулькасима Фирдоуси «Шахнаме» на иностранные языки. Материалом исследования послужили двенадцать переводческих традиций — арабская, османско-турецкая, грузинская, азербайджанская, казахская, туркменская, русская, украинская и западноевропейские, — а также английские переводы Джеймса Аткинсона (1814, 1832). В результате сравнительно-исторического, лингвостилистического, компонентного и контекстуального анализа переводческие традиции распределены по четырём типологическим группам: близкие к оригиналу, композиционно адаптирующие, национально-адаптивные и заменяющие поэтический код. На примере перевода Аткинсона обоснован процесс адаптации персидских поэтических фигур, гипербол и реалий зороастрийско-иранского мифологического пласта к канонам «Heroic Couplet» и ямбического пентаметра. Установлено, что традиционный эпический эпитет «пильтан» (обладающий телом слона) компенсируется метафорой «lion’s heart» во избежание негативных коннотаций в английском языке. Сделан вывод о том, что при переводе национально-мифологических эпосов решающее значение имеет передача не языковой точности, а межкультурного поэтического и концептуального кода.*

Ключевые слова: *«Шахнаме», Фирдоуси, переводоведение, Джеймс Аткинсон, дастан о Рустаме, неоклассицизм, ямбический пентаметр, семантическая трансформация, межкультурная адаптация, реалия, доместикация, форенизация.*

FOREIGN TRANSLATIONS OF THE “SHAHNAMEH” AND THE SPECIFICS OF ENGLISH TRANSLATIONS

Abstract: *The article examines, within a comparative-historical and linguostylistic framework, the historical stages and stylistic specificity of translating Abulqasim Ferdowsi’s epic “Shahnameh” into foreign languages. The research material comprises twelve translation traditions — Arabic, Ottoman Turkish, Georgian, Azerbaijani, Kazakh, Turkmen, Russian, Ukrainian and Western European — together with the English translations produced by James Atkinson (1814, 1832). Comparative-historical, linguostylistic, componential and contextual analysis allowed the translation traditions to be grouped into four types: source-faithful, compositionally adaptive, nationally adaptive, and poetic-code substituting. Drawing on Atkinson’s text, the study substantiates how Persian poetic*

figures, hyperboles and realia representing the Zoroastrian and ancient Iranian mythological layer were transposed into the frameworks of the "Heroic Couplet" and iambic pentameter. It is established that the traditional epic epithet "piltan" (elephant-bodied) is compensated by the metaphor "lion's heart" in order to prevent negative connotations in English. The study concludes that translating national-mythological epics depends less on linguistic accuracy than on the transfer of an intercultural poetic and conceptual code.

Keywords: *"Shahnameh", Ferdowsi, translation studies, James Atkinson, epic of Rustam, Neoclassicism, iambic pentameter, semantic transformation, intercultural adaptation, realia, domestication, foreignisation.*

1. KIRISH

Sharq uyg‘onish davri badiiy tafakkurining beqiyos cho‘qqisi va umumbashariy madaniy merosning ajralmas qismi bo‘lmish Abulqosim Firdavsiyning "Shohnoma" epopeyasi asrlar davomida dunyo xalqlari adabiyoti, fani hamda ma’naviyatiga kuchli ta’sir ko‘rsatib kelmoqda. Asardagi vatanparvarlik, erksevarlik, adolat, ezgulik va yovuzlik o‘rtasidagi abadiy kurash hamda yuksak gumanistik g‘oyalar turli sivilizatsiyalar madaniy hayotida o‘chmas iz qoldirgan. Shu bois "Shohnoma" kabi milliy-mifik va umuminsoniy dostonlarni xorijiy tillarga o‘girish, ularni boshqa adabiy-madaniy muhitlarga moslashtirish (adaptatsiya) hamda g‘arb dunyosiga taqdim etish jarayonlarini o‘rganish bugungi qiyosiy adabiyotshunoslik, matnshunoslik va tarjimashunoslikning dolzarb vazifalaridan biridir.

Sharq adabiyoti durdonalarining Yevropa tillariga tarjima qilinishi va bu yo‘nalishdagi ilk tadqiqotlarning yuzaga kelishi g‘arbliklarda Osiyo xalqlarini boshqarishga intilish kuchaygan davrga to‘g‘ri keladi. Ammo Sharq madaniyati, ayniqsa, adabiyotining go‘zal va nafis jozibasi, undagi teran tafakkur va nozik his-tuyg‘ular Yevropa ziyolilarini, xususan, adabiyotshunos hamda tarjimonlarni o‘ziga maftun etdi. Zero, yevropalik kitobxonlar tarjima vositasida Sharq xalqlari ijodiyoti bilan tanishar ekanlar, ming yillar muqaddam Osiyo qa’rida yetuk madaniyat barpo etilganligi, teran va nozik insoniy tuyg‘ular, ulug’ gumanistik g‘oyalar baralla kuylangan yuksak adabiyot yaratilganligining guvohi bo‘ldilar. Bu esa, o‘z navbatida, yevropalik shoir va yozuvchilarning ijodiy kamolotiga sezilarli ta’sir ko‘rsatdi.

Mavzuning dolzarbligi ikki jihat bilan izohlanadi. Birinchidan, "Shohnoma"ning turli tillardagi tarjimalari firdavsiyshunoslikda, asosan, alohida-alohida — har bir milliy adabiyot doirasida — o‘rganilgan bo‘lib, ularni yagona qiyosiy-tipologik tizimga soluvchi tadqiqotlar deyarli yo‘q. Ikkinchidan, dostonning ingliz tilidagi tarjimalari, xususan, J. Atkinson matni o‘zbek tarjimashunosligida metrik-ritmik va leksik-semantik jihatdan maxsus tahlil qilinmagan. Holbuki, aynan shu tarjima orqali "Shohnoma" ingliz tilli o‘quvchining ilmiy va estetik tafakkuriga kirib borgan.

Tadqiqotning maqsadi — "Shohnoma"ning xorijiy tillarga o‘girilish tarixini bosqichlarga ajratish, tarjima an’analarining tipologiyasini aniqlash hamda J. Atkinson tarjimasi misolida forsiy poetik kodning ingliz she’riy tizimiga o‘tkazilish mexanizmini ochib berishdan iborat.

Tadqiqotning obyekti — "Shohnoma" dostonining xorijiy tillardagi tarjimalari; predmeti esa ushbu tarjimalarda qo‘llangan uslubiy yondashuvlar, metrik-ritmik yechimlar va leksik-semantik transformatsiyalardir.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda birinchi marta "Shohnoma" tarjimalarining o‘n ikki tilni qamrab olgan qiyosiy-tipologik tavsifi beriladi, tarjima an’analari to‘rt guruhli tipologiyada tizimlashtiriladi hamda J. Atkinson matnidagi transformatsiyalar obrazlilik, milliy kolorit va metrik muvofiqlik mezonlari bo‘yicha uch pog‘onali shkalada baholanadi.

Maqola quyidagicha tuzilgan: ikkinchi bo‘limda mavzuga oid nazariy adabiyot tahlil qilinadi va tadqiqot bo‘shlig‘i aniqlanadi; uchinchi bo‘limda material, tahlil birligi va metodlar tavsiflanadi; to‘rtinchi bo‘limda natijalar jadvallarda umumlashtirilib izohlanadi; beshinchi bo‘limda xulosa va tadqiqot istiqbollari beriladi.

2. MAVZUGA OID ADABIYOTLAR TAHLILI

"Shohnoma" tarjimalarini ilmiy o‘rganish an’anasi XIX asrning birinchi yarmida shakllangan. Rus firdavsiyshunosligining boshlanishi adabiyotshunos V. Grigoryevning 1839 yili "Одесский альманах"да e’lon qilingan maqolasi bilan bog‘lanadi. Muallif turli tarixiy manbalar va tazkiralar asosida Firdavsiyning hayoti hamda ijodi haqida fikr yuritadi, "Shohnoma"ning yaratilishi, shoir va Sulton Mahmud haqidagi rivoyatlarni keltiradi. Grigoryevning xizmati shundaki, u birinchi marta rus kitobxonini Firdavsiy hayoti va "Shohnoma"ning mohiyati bilan tanishtiradi, asarning qahramonlik, vatanparvarlik va xalqsevarlik g‘oyasini alohida ta’kidlab, uning badiiy qimmatini qadimgi Rim, yunon va hind poeziyasi bilan bir qatorga qo‘yadi.

Firdavsiyshunoslikning keyingi bosqichi 1934 yilgi ming yillik yubiley bilan bog‘liq. Shu munosabat bilan "Shohnoma"ni tarjima qilish va targ‘ib etish jonlanib, shoirning hayoti va ijodiga bag‘ishlangan ilmiy-tadqiqotlar vujudga keldi; ularning bir qismi "Фердовси (934–1934)" to‘plamida e’lon qilindi. Ye. E. Bertelsning fors-tojik adabiyoti tarixiga oid asari hamda uning tahriri ostida tayyorlangan "Shohnoma"ning tanqidiy matni tadqiqotchilar uchun asosiy manbaviy poydevorni yaratdi.

Milliy adabiyotlardagi tarjima an’analari ham alohida o‘rganilgan. A. Zaychkovskiy "Shohnoma"ning turkcha versiyasini tadqiq etgan; M. Sultonov "Rustam va Suhrob" dostonining ozarbayjon adabiyotidagi talqinlarini yoritgan; M.

Qarataev va I. Ismoilovning ishlarida qozoq tarjima maktabi, xususan, T. Iztileuov faoliyati tahlil qilingan; A. Edelman tojik nazmining ukrain tiliga o‘girilishi tarixiga murojaat etgan. I. Orbeli va K. Treverning “Shatrang” tadqiqoti esa dostondagi realiyalarni tarixiy-madaniy kontekstda talqin qilish namunasi sifatida qimmatlidir.

Mavjud adabiyot tahlili ikki muhim bo‘shliqni ko‘rsatadi. Birinchidan, tarjimalar, asosan, ayrim milliy adabiyot doirasida — qabul qiluvchi madaniyatning ichki manfaatlari nuqtai nazaridan — o‘rganilgan; ularni yagona qiyosiy-tipologik tizimga soluvchi, tarjima tamoyillarini o‘zaro chog‘ishtiruvchi tadqiqotlar juda kam. Ikkinchidan, inglizcha tarjimalar, jumladan, J. Atkinson matni ko‘proq tarjima tarixi faktlari sifatida qayd etilgan, ammo undagi metrik-ritmik qolip almashinuvi va leksik-semantik transformatsiyalar mexanizmi tahlil qilinmagan. Ushbu maqola aynan shu bo‘shliqni to‘ldirishga qaratilgan.

3. TADQIQOT METODOLOGIYASI

Tadqiqot sifatiy-qiyosiy dizayn asosida amalga oshirildi. Qiyosiy-tarixiy yondashuv tarjima an’analarini xronologik va hududiy jihatdan guruhlashtirish uchun, lingvo-stilistik yondashuv esa muayyan matn parchalari darajasidagi poetik yechimlarni baholash uchun qo‘llanildi.

Tadqiqot materialini “Shohnoma”ning o‘n ikki tildagi tarjima an’anasi tashkil etdi. Materialning tarkibi 1-jadvalda umumlashtirilgan.

1-jadval. Tadqiqot materiali: “Shohnoma” tarjimalarining hududiy-xronologik tavsifi

Til	Tarjimon(lar)	Davri	Shakli	Tarjima manbai
Arab	al-Fath ibn Ali al-Bundariy al-Isfahoniy	1218–1227 (nashri 1937)	nasr	asliyat
Usmoniy turk	Sharif Amidiy	XV asr oxiri – XVI asr boshi	nazm (vazn almashtirilgan)	asliyat
Gruzin	“Rustamiani”; S. Sabashvili; M. Tavakkalashvili; X. Turmanidze	XV–XVIII asrlar	nasr va nazm	asliyat
Ozarbayjon	R. Afandizoda; Abbos og‘a G‘oyibov Nazir	1906; 1908	nazm va nasr; nazm	asliyat
Qozoq	O‘roz Molda; M. Seralin; T. Iztileuov	XIX asr o‘rtasi – 1937	nazm (“qora o‘lan”)	asliyat va ruscha tarjima
Turkman	Q. Tangriqulov, M. Sayidov, Ya. Pirquliyev	1962	nazm	asliyat
Rus	V. Jukovskiy; D. Sertelev; S. Sokolov; M. Lozinskiy, I. Selvinskiy, M. Dyakonov; Ts. Banu, V. Derjavin, S. Lipkin	XIX–XX asrlar	nazm va nasr	nemischa tarjima; asliyat
Ukrain	A. Krimskiy	1895	nasr va nazm	fransuzcha tarjima (Ya. Mohol)
Ingliz	J. Chempion; J. Atkinson	XVIII asr oxiri; 1814, 1832	erkin nazm; nazm-nasr aralash	asliyat
Fransuz	Y. Vallenburg; Ya. Mohol	XIX asr	nazm va nasr	asliyat
Nemis	Ya. Torres; A. Shak; Fr. Ryukkert	XIX asr	nazm	asliyat
Italyan	I. Pizi	XIX asr	nazm	T. Makan nashri

Tahlil birligi sifatida asliyatdagi matn parchasi (bayt yoki baytlar guruhi) va uning tarjimadagi muqobilidan iborat juftlik olindi. Batafsil lingvo-stilistik tahlil uchun Rustam obrazining ta’rifiga bag‘ishlangan parcha tanlandi: bu parcha epik giperbola, hayvon obrazlariga asoslangan sifatlovlar va shohona-pahlavonlik konseptini bir vaqtda qamrab olgani bois transformatsiya turlarini yaxlit kuzatish imkonini beradi.

Tadqiqotda quyidagi metodlardan foydalanildi: qiyosiy-tarixiy metod — tarjimalarning yuzaga kelish shart-sharoiti va bosqichlarini aniqlash uchun; lingvo-stilistik metod — metrik qolip, ritm va uslubiy bo‘yoqning qayta yaratilishini baholash uchun; komponent tahlil — frazeologik va sifatlovchi birliklarning ichki shakli hamda semantik ulushini ochib berish uchun; kontekstual tahlil — birlikning matndagi vazifasi va qabul qiluvchi madaniyatdagi konnotatsiyasini hisobga olish uchun; tavsifiy metod — natijalarni tizimlashtirish uchun.

Baholash mezonlari operatsional tarzda quyidagicha belgilandi. Obrazlilikning saqlanishi uch pog‘onali shkalada baholandi: “to‘liq saqlangan” — asliyatdagi obraz ham shakl, ham vazifa jihatidan qayta yaratilgan; “qisman saqlangan” — obraz almashtirilgan yoki kengaytirilgan, ammo ekspressiv-baholovchi komponent yo‘qolmagan; “neytrallashgan” — obraz uslubiy jihatdan betaraf ifoda bilan almashtirilgan. Milliy kolorit va metrik-ritmik muvofiqlik ham shu shkala bo‘yicha baholandi.

Tadqiqotning cheklovlari. Birinchidan, batafsil matniy tahlil ingliz tilidagi tarjima misolida olib borilgan bo‘lib, boshqa tillardagi tarjimalar an’ana darajasida tavsiflangan. Ikkinchidan, gruzin, ozarbayjon va turkman tarjimalari bo‘yicha xulosalar mavjud ilmiy adabiyot ma’lumotlariga tayanadi. Uchinchidan, XX asr oxiri va XXI asr boshidagi yangi inglizcha tarjimalar alohida tadqiqot predmeti hisoblanadi. Bu cheklovlar natijalarni umumlashtirishda hisobga olinishi lozim.

4. NATIJALAR VA TAHLIL

4.1. Arab va usmoniy turk tillaridagi ilk tarjimalar

“Shohnoma”ning bizgacha yetib kelgan eng qadimgi tarjimasi mashhur tarixchi al-Fath ibn Ali al-Bundariy al-Isfahoniy tomonidan 1218–1227 yillarda arab tiliga qilingan tarjimadir (u 1937 yili Qohirada nashr etilgan). Bundariy tarjimasi asliyatga juda yaqinligi va matnni deyarli to‘la saqlab qolganligi bilan qimmatlidir. Aynan shu xususiyat uni “Shohnoma”ning tanqidiy matnini tayyorlashda va ilmiy tadqiqot ishlarida eng ishonchli manbalardan biriga aylantirgan.

Dostonning to‘la va mukammal tarjimalaridan yana biri usmoniy turk tiliga qilingan tarjimadir. U XV asrning oxiri – XVI asrning boshlarida Sharif Amidiy (vaf. 1510) tomonidan Misrda bajarilgan va mamluklar sultoni Qonsux G‘uriyga tortiq etilgan. Tarjimonning o‘zi muqaddimada “...al-G‘uriy avval saltanat yilinda ibtido o‘lindi, o‘n yilda tugandi”, deb qayd etgan. Tarjima nazmda bo‘lsa-da, vazn o‘zgartirilgan. Amidiy asliyatning asosiy kompozitsion tuzilishi, syujet chizig‘i, shohlar silsilasi va dostonlar tartibiga qat’iy rioya etgan, sarlavhalarni fors tilida qoldirgan. Ayni paytda dostonning kirish qismi ancha cho‘zilgan: shoir xudo, payg‘ambar, me’roj va chahoryorlarga alohida-alohida na’t bag‘ishlagan, tarjimaning sababi hamda Qonsux G‘uriy va uning otasi madhi haqida mustaqil bo‘limlar kiritgan. Asosiy matn “Sababi ta’lifin bayon edur” qismidan keyin boshlanadi, ayrim dostonlar esa “Rivoyat ayladi Firdavsiy oni” iborasi bilan ochiladi; tarjima oxiriga “Boysung‘ur so‘z boshisi” ilova qilingan. Bu tarjimani asliyat bilan chog‘ishtirib o‘rganish firdavsiyshunoslikning galdagi vazifalaridan biri bo‘lib qolmoqda.

4.2. Gruzin va ozarbayjon tarjima an’analari

XV–XVI asrlarda “Shohnoma”ning anchagina qismi “Rustamiani” nomi bilan gruzin tiliga nasriy tarjima qilinadi; keyinroq uni shoir Serapion Sabashvili nazmga aylantiradi. XVIII asrning ikkinchi choragida asarning Zahhok sarguzashti bilan bog‘liq qismini Mamuk Tavakkalashvili gruzin tiliga o‘giradi. Gruzincha tarjimalar orasida Xosro Turmanidze tomonidan bevosita asliyatdan qilingan “Rostamiana” she’riy tarjimasi (XVII asr) keng shuhrat qozongan. Tarjimon asosiy e’tiborni dostonning xalqparvarlik, vatanparvarlik va qahramonlik qismlariga qaratib, shohlar sarguzashtini qisqartirgan; shu bois tarjima asarning bosh qahramoni — chin inson, mamlakat va xalq tayanchi — Rustam nomi bilan atalgan. 1916 yili professor Yu. Abuladze gruzincha tarjimalarning bir qismini nashr ettirgan.

“Shohnoma”ning ayrim dostonlari ozarbayjon tiliga bir necha marta tarjima qilingan. 1906 yili “Rustam va Suhrob” dostonini mashhur muallim va yozuvchi Rashid Afandizoda xalq dostonlari yo‘lida — nazm va nasrda o‘giradi, biroq bu tarjima keng shuhrat topmaydi. 1908 yili Jalil Mamadqulizodaning maslahati bilan shoir Abbos og‘a G‘oyibov Nazir shu dostonni asliyatdan to‘la nazm bilan tarjima qiladi; u Tiflisdagi “G‘ayrat” matbaasida bosilib chiqadi. Bu tarjima asliyatni to‘la saqlab qolishi, ravonligi, ona tili boyliklaridan mohirona foydalanishi va badiiy yuksakligi bilan ajralib turadi.

“Shohnoma” ozarbayjon dramaturglari va bastakorlarining ham diqqatini tortgan. 1906 yili Shamsiddin Somibey Kova dostoni asosida drama yozdi; u “Kova” yoxud “Kovai ohangar” nomi bilan sahnalashtirildi. Mashhur bastakor Uzayr Hojibekov esa 1908 yili to‘rt pardali “Rustam va Suhrob” dramatik operasini yaratdi. Operada Firdavsiy dostonining mazmuni aynan berilgan, asosiy qahramonlar saqlangan; u 1910 yilning 12 yanvarida ilk bor namoyish etilib, xalqning sevimli spektakliga aylandi. Bu holat tarjimaning adabiyotdan tashqari — sahna va musiqa san’ati orqali ham retseptsiya qilinishini ko‘rsatadi.

4.3. Qozoq va turkman adabiyotlaridagi milliy adaptatsiya

Firdavsiy asari o‘tgan asrdayoq qozoq tiliga tarjima qilina boshlagan. Atoqli qozoq shoiri va tarjimoni O‘roz Molda XIX asrning o‘rtalarida Firdavsiy, Navoiy, Fuzuliy asarlarini o‘girish bilan shug‘ullanadi; u tarjima qilgan “Shohnoma”ning ayrim qismlari qo‘lyozma shaklida saqlanib qolgan. XX asr boshlarida shoir va publitsist, “Ayqap” jurnalining muharriri Muhammadjon Seralin dostonning bir qismini ruscha tarjimadan o‘giradi; matn jurnalning 1914 yil 22–24 va 1915 yil 2–5-sonlarida bosilgan.

Qozoq xalqini “Shohnoma” bilan to‘laroq tanishtirgan ijodkor esa Sharq adabiyotining muxlisi va sermahsul tarjimoni Turmag‘ambet Iztileuovdir. U Buxoro madrasalarida o‘qib yurgan yillaridayoq (1891–1905) arab va fors-tojik tillarini puxta o‘rganib, Sharq klassiklarini mutolaa qilgan; asarning asliyatini ham, 1906–1908 yillarda Toshkentda bosilgan Xomushiyning o‘zbekcha tarjimalarini ham qayta-qayta o‘qib chiqqan. “Shohnoma” asosida u “Semurg‘” va “Dorobnoma”

dostonlarini yaratadi. 1937 yilning boshida tarjimaga kirishib, o‘n oy davomida qirq ming misradan iborat qozoqcha “Shohnoma”ni xalqqa taqdim etadi; tarjimaning bir qismi 1965 yili “Rustam Dastan” nomi bilan nashr etilgan.

Iztileuov dostonni qozoq xalq she’riyatining keng tarqalgan o‘n bir bo‘g‘inli “qora o‘lan” shaklida tarjima qiladi; qahramonlarning ruhiy kechinmalarini esa xalq og‘zaki ijodidagi “aytisuv” qolipida beradi. Tarjimon asarni baytma-bayt emas, umumiy syujet asosida o‘girgani bois bir qancha chekinish va qisqartirishlarga yo‘l qo‘ygan, ba’zan voqealarni o‘zicha davom ettirgan yoki yangi qo‘shimchalar kiritgan. Qahramon portreti, peyzaj, ov va marosim tasvirlariga qozoq xalqiga xos milliy kolorit singdirilgan: to‘y va bazmlar “qulon so‘yib, uloq chopish” bilan tugaydi, qahramonlar ovga “bilaklariga qush qo‘ndirib, it ergashtirib” chiqadilar. Ashkbusning tarjimadagi portreti qozoq xalq dostonlaridagi bahodirlarni eslatadi:

Кулаги – киіз үйге үзі болар,
Туктері – болатұған тартса желі.
Шинардын саусақтары авашиндай,
Тырнағы – тулпарлардын тағасындай.
Аузы – үнгіріндей Асқар таудын,
Мурыны – үлкен үнген шоқат шамасындай.

Tarjimon qozoq xalq maqol, matal va iboralaridan ham ustalik bilan foydalangan. Shunchalik ulkan asar qisqa muddatda o‘girilganiga qaramay, Iztileuov asliyatning asosiy mohiyatini saqlab qola olgan. Qozoq tiliga “Bijon va Manija”, “Rustamning Chin xoqoni bilan jangi” kabi dostonlar ham rus tilidan tarjima qilingan bo‘lib, ular alohida o‘rganishni talab etadi.

Turkman xalq og‘zaki ijodi va yozma adabiyotida ham “Shohnoma” hamda uning motivlari ko‘zga tashlanadi. Shaydoyi, Maxtumquli, Mullanafas, Sayyodiy kabi shoirlar ijodida Firdavsiy ta’siri seziladi: ular Firdavsiyni hurmat bilan tilga oladilar, doston qahramonlaridan turli maqsadlarda foydalanadilar. Turkman shoirlari orasida Firdavsiyga taqlid qilish, dostonchilikda unga ergashish hollari ham uchraydi. Chunonchi, XIX asr turkman shoiri Abdusattor Qozi “Jangnoma” dostonini “Shohnoma”dan ilhomlanib yozgan: u jang tasviri va qahramonlar xatti-harakatini ifodalashda Firdavsiyga ergashadi, o‘z qahramonlarini Suhrob, Rustam, Bahrom Go‘rga o‘xshatadi, adolatli shoh haqida so‘z yuritganda Anushiravonni eslaydi:

Совеш эйлэп булар Бэхрам Гуртек,
Гыран эйлэдилер Сухрабы шуртек.

1934 yili butun dunyo jamoatchiligi qatori mintaqa xalqlari ham Firdavsiy tavalludining 1000 yilligini keng nishonladi; Turkmanistonda bu sana umumxalq bayramiga aylandi, adabiy kechalar o‘tkazildi, Turkmaniston Davlat nashriyoti “Shohnoma”dan ayrim dostonlarning asliyatini bosib chiqardi. 1962 yili esa o‘sha nashriyot Zahhok, Faridun, Rudoba, Bahromi Cho‘bin dostonlarini Q. Tangriqulov, M. Sayidov va Ya. Pirquliyev tarjimasida chop etdi. Bu tarjimaning sifati yuqori emas: tarjimonlar asliyatni ko‘p o‘rinda qisqartirib yuborgan, asarning g‘oyaviy-badiiy qimmatiga putur yetkazgan, vazn ham saqlanmagan.

4.4. Slavyan tillariga tarjimalar

Rus va ukrain xalqlari Firdavsiy ijodi bilan qadimdan tanish. “Shohnoma”ning ayrim dostonlari XIX asrning boshlaridayoq rus tiliga o‘giriladi: 1815–1818 yillarda “Вестник Европы” jurnalida dostondan ayrim parchalar va “Bijon va Manija” tarjimasi e’lon qilinadi. Bu parchalar “Shohnoma”ning rus tiliga vositachi til — fransuz tili orqali qilingan ilk tarjimalari bo‘lib, ularda asliyatning faqat mazmuni bayon etilgan. 1818 yili “Пантеон иностранной словесности” jurnalida ham bir necha parcha bosilib chiqadi.

Mashhur shoir va tarjimon V. Jukovskiy 1847 yili “Rustam va Suhrob” dostonini Fr. Ryukkertning nemischa tarjimasidan erkin o‘giradi. Jukovskiy tarjimasida asliyatning vazni va ohangdorligiga e’tibor berilmagan, qahramonlar nomlari ham buzib berilgan. Shunga qaramay, rus kitobxoni aynan shu tarjima orqali Firdavsiy dostoni bilan kengroq tanishishga muyassar bo‘ldi va undagi qahramonlik, bahodirlik hamda vatanparvarlik motivlari kitobxonni maftun etdi. 1835 yili D. Sertelev Eraj lavhasini qisqartirgan holda tarjima qilgan edi.

1905 yili S. I. Sokolov “Shohnoma”ning boshidan “Rustam va Suhrob” dostonigacha bo‘lgan 500 baytini bevosita asliyatdan she’r bilan rus tiliga o‘giradi; 1914 yili V. S. Sokolova bir necha parchani tarjima qilib, “Вестник Ленинградского университета”да bostiradi. Bu tarjimalarda, asosan, mazmun saqlangan bo‘lsa-da, badiiy jo‘shqinlik sezilmaydi. Ukrain xalqini esa Firdavsiy asari bilan ilk marta sharqshunos A. Krimskiy tanishtirdi: u 1895 yili Ya. Moholning fransuzcha tarjimasi asosida dostonning boshidan Manuchehrning tug‘ilishigacha bo‘lgan qismini ukrain tiliga o‘girib, “Житє і слово” jurnalida e’lon qildi; tarjima nasr va nazmda bo‘lib, asosiy e’tibor asliyat mazmunini to‘la berishga qaratilgan.

Yubiley yillaridan keyin “Gev va Talxand”, “Mazdak”, “Bijon va Manija” dostonlarining nasriy va she’riy tarjimalari vujudga keldi. Bu tarjimalarning eng muhim fazilati shundaki, ular bevosita asliyatdan rus tiliga o‘girilgan va

“Shohnoma”ning g‘oyaviy-badiiy qimmatini birmuncha yaxshi saqlab qolgan. XX asrning 30–40-yillarida poemaning ayrim dostonlari I. Selvinskiy, M. Lozinskiy, M. Dyakonov tomonidan tarjima qilingan bo‘lsa, keyinchalik Ts. Banu, V. Derjavin va S. Lipkin “Shohnoma”ni to‘la o‘girish yo‘lida katta muvaffaqiyatlarga erishdilar.

4.5. G‘arbiy Yevropa tillariga tarjimalar

Hozirgacha “Shohnoma” to‘liq yoki qisman fransuz, ingliz, lotin, italyan, golland va boshqa tillarga tarjima qilingan. Ingliz tiliga dostonni birinchi bo‘lib Jozif Chempion Zol va Rudobaning to‘yigacha bo‘lgan qismini, Boysung‘ur so‘zboshisining katta qismini ilova qilgan holda, erkin o‘girgan; biroq bu tarjima asliyatdan ancha uzoq ekanligi bilan ajralib turadi. Fransuz mutarjimlaridan Y. Vallenburg dostonni fransuz tiliga o‘girishga kirishgan bo‘lsa-da, tarjimani tugallamagan. Doston Ya. Torres, A. Shak va Fr. Ryukkert tomonidan nemis tiliga, T. Makan matnidan I. Pizi tomonidan italyan tiliga ham o‘girilgan. Bular orasida Fr. Ryukkertning nemischa va Ya. Moholning fransuzcha tarjimalari ancha shuhrat qozongan; Ts. Banuning ruscha tarjimasi esa nisbatan tugalroqdir.

Tarjima jarayonida realiyalar va onomastik birliklar transkripsiyasi, zardushtiylik hamda qadimiy Eron mifologik qatlamlarining g‘arb dunyosiga adaptatsiyasi va shu asosda yuzaga keladigan semantik transformatsiyalar tadqiqotning bosh ilmiy gipotezasini tashkil etadi.

2-jadval. “Shohnoma” tarjima an’analarining tipologik tavsifi

Tipologik guruh	Tarjima an’anasi	Ustuvor tamoyil	Shakl-uslubiy yechim
I. Asliyatga sodiq	arab (al-Bundariy)	matnni maksimal to‘liq saqlash	nasriy to‘la bayon; qisqartirishsiz
I. Asliyatga sodiq	rus (Ts. Banu, V. Derjavin, S. Lipkin)	asliyatdan to‘la tarjima	nazm; ohang va hajm tiklangan
II. Kompozitsion moslashtiruvchi	usmoniy turk (Amidiy)	syujet tuzilishiga sadoqat + saroy adabiyoti odobi	nazm, vazn almashtirilgan, kirish kengaytirilgan
II. Kompozitsion moslashtiruvchi	gruzin (X. Turmanidze)	g‘oyaviy tanlov: qahramonlik qatlamini ajratish	nazm; shohlar sarguzashti qisqartirilgan
III. Milliy-adaptiv	qozoq (T. Iztileuov)	syujet asosida erkin bayon; ichkilashtirish	“qora o‘lan” (11 bo‘g‘in), “aytisuv” qolipi
III. Milliy-adaptiv	turkman (1962)	qisqartirilgan bayon	vazn saqlanmagan; hajm kamaytirilgan
III. Milliy-adaptiv	rus (V. Jukovskiy)	bilvosita (nemischadan) erkin tarjima	vazn va ohang saqlanmagan; onomastika buzilgan
IV. Poetik kodni almashtiruvchi	ingliz (J. Atkinson)	madaniy moslashtirish (domestication)	“Heroic Couplet”, yambik pentametr; nazm-nasr aralash

4.6. J. Atkinson tarjimasi: metrik va poetik kodning almashinuvi

Jeyms Atkinsonning 1814 yilda e’lon qilingan “Soohrab: A Poem” hamda 1832 yilda nashr etilgan “The Shah Nameh of the Persian Poet Firdausi” asarlari ingliz tilidagi birinchi jiddiy va ommabop tarjimalardandir. Atkinson forsiy matnni neoklassitsizm va Viktoriya davri ingliz she’riyatiga moslashtirgan holda, erkin she’riy metrika hamda nazm-nasr aralash shaklni tanlagan; uning tarjima uslubi madaniy moslashtirish tamoyiliga asoslanadi. Rustamning fillarga teng kuchi, sarvdek qaddi-qomati va tog‘dek salobati ifodalangan parcha quyidagicha:

بالای او چون سرو آزاد و بلند
کوهی‌ست گویی به روی سمند
با زور فیل و با دلِ شیر جری
سزاوارِ شاهی و پهلوانی

Bālā-ye ū chūn sarv-e āzād-o boland,
Kūhī-st gūyī be rūy-e samand.
Bā zūr-e fīl-o bā del-e shīr-e jarī,
Sazāvār-e shāhī-yo pahlavānī.

Mazmuni: “Uning qomati ozod va baland sarvdek; samand ot uzra go‘yo bir tog’ turibdi. Fil kuchi va jasur sher yuragi bilan u shohlikka ham, pahlavonlikka ham loyiqdir.”

Atkinson ushbu parcha tarjimasida XIX asr boshidagi Britaniyada keng tarqalgan neoklassitsizm va romantik sharqshunoslik simbioziga tayanadi. Asliyatdagi “sarv” va “pil” o‘xshatishlarini u ingliz poetik an’anasidagi “Heroic Couplet” — “qahramonona qofiya”, ya’ni AABBCC qofiyalanish tizimidagi yambik pentametr qolipiga soladi. Qahramonona qofiya ingliz klassik she’riyatining eng muhim o‘lchov va qofiyalanish shakllaridan biri bo‘lib, XVII–XVIII asrlar ingliz adabiyotida peshqadamlik qilgan. Yambik pentametr esa jahon, xususan, ingliz va yevropa she’riyatida eng keng qo‘llaniladigan o‘lchovlardandir: yamb — birinchisi urg‘usiz, ikkinchisi urg‘uli bo‘lgan ikki bo‘g‘inli ritmik birlik; yunoncha “penta” besh ma’nosini bildirgani bois pentametr bir misrada beshta yamb takrorlanishini, ya’ni jami o‘n bo‘g‘inni anglatadi. Ushbu shaklning “qahramonona” deb atalishiga sabab shundaki, u, asosan, dostonlar, qahramonlik asarlari, “Iliada” va “Odisseya” singari antik matnlarni ingliz tiliga o‘girishda qo‘llanilgan.

Asliyatda Rustamning surati va siyratidagi sharqona giperbolizm atayin tabiiy hamda fojiaviy kuch darajasiga ko‘tariladi. Atkinson esa quyidagi yechimga qo‘l uradi:

In stature like the cypress, tall and grand,
Moving a mountain over the subject land,
With elephantine strength and lion’s heart,
Formed to command and play the hero‘s part.

“Moving a mountain over the subject land” misrasida mutarjim Rustamni shunchaki tog‘ga o‘xshatmaydi, balki uning harakatini butun bir hudud ustidan siljiyotgan tog’ shaklida tasvirlaydi. Bu — erkin tarjima va ma’noni orttirish (amplifikatsiya) usulining yaqqol namunasidir: asliyatdagi statik qiyoslash tarjimada dinamik, kengaygan obrazga aylanadi.

4.7. Leksik-semantik transformatsiyalar va kompensatsiya mexanizmi

Tarjimashunoslik nuqtai nazaridan parchadagi “elephantine strength” birikmasi alohida tahlilni talab qiladi. Forsiy manbada “piltan” — “fil tanli”, “fil kuchiga ega” sifatlanishi stilistik neologizm emas, balki “Shohnoma” epik kodi uchun an’anaviy va ijobiy sifatlovchidir. Biroq ingliz tilining semantik maydonida “elephantine” so‘zi XIX asr ritorikasida ko‘pincha salbiy yoki “og‘ir, qo‘pol” ma’nodagi konnotatsiyaga ega bo‘lish xavfini tug‘diradi. J. Atkinson ushbu leksik xavf va semantik siljishni neytrallash uchun uni “lion’s heart” (sheryurak) birikmasi bilan parallel qo‘llaydi. Sher timsoli g‘arb poetikasida — “Qirol Richard Lionheart” obrazi orqali — jasorat va sharafning mutlaq belgisi bo‘lgani bois, tarjimon ingliz o‘quvchisida ijobiy va ulug‘vor assotsiatsiya shakllantiradi. Demak, bu yerda kompensatsiya mexanizmi ishlaydi: kalka yo‘li bilan berilgan va konnotativ xavf tug‘diruvchi birlik qo‘shni obrazning ijobiy assotsiatsiyasi hisobiga muvozanatlashtiriladi.

Dostonning ritorik va sintaktik qurilishida, emotsional-ekstatik ohang o‘rniga, Viktoriya poeziyasiga xos “Formed to command and play the hero‘s part” kabi iboraning kiritilishi tarjimonning ideologik va estetik aralashuvidan dalolat beradi. Atkinson Firdavsiyning mifologik realizmini ingliz o‘quvchisi uchun tanish bo‘lgan qadimgi yunon va Rim epik qahramonlari — Axill va Gektor obrazlari stilistikasiga yaqinlashtiradi. Bu usul matnning sharqona ekzotizmi va lokal-kolorit doirasini biroz pasaytirgan bo‘lsa-da, uni XIX asr Angliyasining adabiy muhitiga va intellektual auditoriyasiga muvaffaqiyatli integratsiya qilishga xizmat qilgan. Ritmik barqarorlik va sintaktik simmetriya shu parchada Atkinson tarjima konsepsiyasining ustuvor ustuni bo‘lib namoyon bo‘ladi.

3-jadval. J. Atkinson tarjimasidagi leksik-semantik transformatsiyalar

Asliyatdagi birlik	So‘zma-so‘z ma’nosi	Atkinson yechimi	Transformatsiya turi
bālā-ye ū chūn sarv-e āzād	qomati ozod sarvdek	In stature like the cypress, tall and grand	to‘liq obrazli muvofiqlik
kūhī-st gūyī be rūy-e samand	samand ot uzra go‘yo bir tog’	Moving a mountain over the subject land	amplifikatsiya (obrazni kengaytirish)
bā zūr-e fīl / piltan	fil kuchi bilan; fil tanli	With elephantine strength	kalka + konnotativ xavf
bā del-e shīr-e jarī	jasur sher yuragi bilan	and lion’s heart	kompensatsiya (ijobiy assotsiatsiya)
sazāvār-e shāhī-yo pahlavānī	shohlik va pahlavonlikka loyiq	Formed to command and play the hero‘s part	funksional-stilistik moslashtirish

4-jadval. J. Atkinson tarjimasida obrazlilik, milliy kolorit va metrik muvofiqlikning saqlanish darajasi

Tarjima yechimi	Obrazlilik	Milliy kolorit	Metrik-ritmik muvofiqlik
toʻliq obrazli muvofiqlik (sarv)	toʻliq saqlangan	qisman saqlangan	qisman saqlangan
amplifikatsiya (tog’ obrazi)	toʻliq saqlangan (kuchaytirilgan)	qisman saqlangan	toʻliq saqlangan
kalka (elephantine strength)	qisman saqlangan	toʻliq saqlangan	toʻliq saqlangan
kompensatsiya (lion’s heart)	toʻliq saqlangan	neytrallashgan	toʻliq saqlangan
funksional-stilistik moslashtirish	qisman saqlangan	neytrallashgan	toʻliq saqlangan

4.8. Natijalarning muhokamasi

Olingan natijalar “Shohnoma” tarjimalarining tipologik rang-barangligi tasodifiy emas, balki qabul qiluvchi madaniyatning adabiy ehtiyoji va poetik tizimi bilan shartlangan qonuniyat ekanligini koʻrsatadi. Asliyatga sodiq tarjimalar (al-Bundariy; XX asr rus maktabi) matnshunoslik va manbashunoslik ehtiyojidan; milliy-adaptiv tarjimalar (T. Iztileuov) dostonchilik an’anasi jonli boʻlgan muhitning ichki talabidan; poetik kodni almashtiruvchi tarjimalar (J. Atkinson) esa qabul qiluvchi adabiyotning muayyan davrdagi estetik normasidan kelib chiqadi.

Tarjimon, mohiyatan, ikki qutb oʻrtasida tanlov qiladi. Ichkilashtirish (domestication) strategiyasida forsiy obraz oʻquvchiga tanish muqobil bilan almashtiriladi — Iztileuovdagi “qulon soʻyib, uloq chopish” yoki Atkinsondagi “lion’s heart” buning yorqin misolidir; bu yondashuv matnni tabiiy va ravon qiladi, ammo manba madaniyatining oʻziga xosligini xiralashtiradi. Begonalashtirish (foreignization) strategiyasida esa forsiy obraz kalka yoki izoh orqali saqlanadi — “elephantine strength” shunday yechim boʻlib, u milliy koloritni yetkazadi, lekin konnotativ siljish xavfini tugʻdiradi. Atkinson matni bu ikki qutbning kombinatsiyasi ustiga qurilgan: begonalashtirish natijasida yuzaga kelgan xavf darhol ichkilashtirish yoʻli bilan kompensatsiyalanadi.

Shu tariqa tarjima yechimi tarjimonning sub’ektiv qarori emas, balki qabul qiluvchi adabiyotning janr-uslubiy dominantasi bilan shartlangan qonuniyat sifatida namoyon boʻladi. Vositachi til orqali qilingan tarjimalar (Jukovskiy — nemischadan, Krimskiy — fransuzchadan, Seralin — ruschadan) esa ma’no va obrazning qoʻshimcha buzilishiga — “ikki bosqichli yoʻqotish” hodisasiga — olib keladi; bu tarjimalarda onomastik birliklarning buzilishi va vazn tizimining yoʻqolishi ayni shu bilan izohlanadi.

Natijalarning amaliy ahamiyati ikki yoʻnalishda namoyon boʻladi. Tarjima amaliyoti uchun ular “xavf zonalari” xaritasini beradi: zardushtiy-eron mifologik qatlamiga oid realiyalar, hayvon obrazlariga asoslangan epik sifatlovlar va onomastik birliklar eng katta yoʻqotish manbai hisoblanadi. Tarjimonlar tayyorlash amaliyoti uchun esa natijalar qiyosiy poetika va lingvomadaniyatshunoslik kurslarini integratsiyalash zaruratini koʻrsatadi.

5. XULOSA

Oʻtkazilgan qiyosiy-tarixiy va lingvo-stilistik tahlil quyidagi xulosalarga olib keladi.

Birinchidan, “Shohnoma”ning xorijiy tillarga tarjima qilinishi turli tarixiy bosqichlarda va oʻziga xos uslubiy yondashuvlar asosida amalga oshirilgan. Arab tiliga al-Bundariy tomonidan qilingan ilk tarjima asliyatga oʻta yaqinligi bilan ajralib tursa, usmoniy turkcha va qozoqcha (T. Iztileuov) tarjimalarda milliy kolorit, moslashtirish hamda erkin bayon tamoyillari ustuvorlik qilgan.

Ikkinchidan, tarjima an’analari toʻrt tipologik guruhga ajratiladi: asliyatga sodiq, kompozitsion moslashtiruvchi, milliy-adaptiv va poetik kodni almashtiruvchi guruhlar. Guruh tanlovi tarjimonning shaxsiy mahoratidan koʻra qabul qiluvchi adabiyotning poetik tizimi va ehtiyojlari bilan belgilanadi.

Uchinchidan, XIX asr boshlarida amalga oshirilgan J. Atkinsonning inglizcha tarjimasi Viktoriya davri poetik an’analari va neoklassitsizm ta’sirida shakllangan boʻlib, unda forsiy aruz oʻrnini “Heroic Couplet” va yambik pentametr egallaydi. Atkinson Firdavsiyning sharqona giperbolizmini gʻarb oʻquvchisiga tanish boʻlgan antik (yunon va Rim) eposi stilistikasiga yaqinlashtirgan.

Toʻrtinchidan, tarjimada “piltan” (fil tanli) kabi epik kodlar ingliz tilining semantik maydonidagi salbiy yoki “ogʻir” konnotatsiyani neytrallash maqsadida “lion’s heart” (sheryurak) singari gʻarb poetikasiga xos ijobiy metaforalar bilan parallel qoʻllangan. Bu holat kompensatsiya mexanizmining amal qilishidan hamda madaniyatlararo poetik moslashuv zaruratidan dalolat beradi.

Beshinchidan, milliy-mifik va umuminsoniy dostonlarni oʻgirishda lingvistik aniqlikning oʻzi yetarli emas: boshqa til va madaniyat vakillariga asar ruhiyatini yetkazishda madaniyatlararo poetik va konseptual tafakkurni toʻgʻri koʻchirish, matnni zamon va makon talablariga moslashtirish hal qiluvchi ahamiyatga ega.

Tadqiqot istiqbollari “Shohnoma”ning bir dostoni bo‘yicha bir necha muqobil inglizcha tarjimani (J. Chempion, J. Atkinson, aka-uka Uornerlar) qiyoslash, tarjimalarning parallel korpusini shakllantirish hamda forsiy va ingliz poetik tizimlarining konseptual metaforalar darajasidagi qiyosiy tahlili bilan bog‘liq.

INGLIZ VA O‘ZBEK INTERNET-MEDIASIDA EVFEMIZMLARNING LEKSIK-GRAMMATIK VA STRUKTUR-TIPOLOGIK XUSUSIYATLARI

Muminova Irodaxon Ergashevna
Guliston davlat universiteti mustaqil tadqiqotchisi
E-mail: irodamuminova685@gmail.com

Annotatsiya: *Mazkur maqolada ingliz va o‘zbek zamonaviy internet-media diskursida evfemik birliklarning shakllanish mexanizmlari qiyosiy-tipologik jihatdan tadqiq etiladi. Evfemalashuvning leksik, grammatik-sintaktik va diskursiv sathlarda voqelanish xususiyatlari aniqlandi hamda ikki til o‘rtasidagi umumiy va milliy-lisoniy qonuniyatlar tavsiflandi. Tahlil uchun shakllantirilgan ingliz va o‘zbek internet-media korpusi materiallari asosida 512 ta evfemik birlik o‘rganildi. Tahlil natijasida evfemalashuvni leksik, grammatik-sintaktik va diskursiv sathlarning o‘zaro integratsiyasi asosida izohlovchi struktur-tipologik model taklif etildi.*

Kalit so‘zlar: *evfemizm, evfemalashuv, internet-media diskursi, qiyosiy-tipologik tahlil, metaforalashuv, perifraz, passiv konstruksiya, pragmatika, korpus lingvistikasi.*

ЛЕКСИКО-ГРАММАТИЧЕСКИЕ И СТРУКТУРНО-ТИПОЛОГИЧЕСКИЕ ХАРАКТЕРИСТИКИ ЭВФЕМИЗМОВ В АНГЛОЯЗЫЧНЫХ И УЗБЕКСКОЯЗЫЧНЫХ ИНТЕРНЕТ-СМИ

Аннотация: *В статье с сравнительно-типологической точки зрения исследуются механизмы формирования эвфемистических единиц в дискурсе современных англоязычных и узбекскоязычных интернет-СМИ. Выявляются характеристики эвфемизации на лексическом, грамматико-синтаксическом и дискурсивном уровнях, а также описываются общие и специфические для каждого языка закономерности. На основе специально сформированного корпуса материалов англоязычных и узбекскоязычных интернет-СМИ было проанализировано 512 эвфемистических единиц. В заключение предлагается структурно-типологическая модель, объясняющая процесс эвфемизации через интеграцию лексического, грамматико-синтаксического и дискурсивного уровней.*

Ключевые слова: *эвфемизм, эвфемизация, дискурс интернет-СМИ, сравнительно-типологический анализ, метафоризация, перифраза, пассивная конструкция, прагматика, корпусная лингвистика.*

LEXICO-GRAMMATICAL AND STRUCTURAL-TYPOLOGICAL CHARACTERISTICS OF EUPHEMISMS IN ENGLISH AND UZBEK INTERNET MEDIA

Abstract: *This article presents a comparative-typological analysis of euphemistic units in contemporary English and Uzbek internet-media discourse. The study aims to identify lexical, grammatical-syntactic and discourse-level mechanisms of euphemization and to describe common and language-specific patterns. A corpus of English and Uzbek internet-media materials was analyzed, with 512 euphemistic units examined for lexical formation patterns. The qualitative analysis also identified passive constructions, impersonal constructions, nominalizations and modal devices as important grammatical-syntactic mechanisms. The comparison indicates that analytical constructions, passive forms and terminologization are relatively active in English, whereas descriptive syntagms, impersonal constructions and analytical combinations are more prominent in Uzbek. Based on the findings, a structural-typological model integrating lexical, grammatical-syntactic and discourse levels is proposed.*

Keywords: *euphemism, euphemization, internet-media discourse, comparative typology, metaphorization, periphrasis, passive construction, pragmatics, corpus linguistics.*

Kirish. Evfemizm tilning nominativ va kommunikativ imkoniyatlarini namoyon etuvchi muhim lisoniy hodisalardan biri bo‘lib, kommunikativ jihatdan noqulay, salbiy baholanishi mumkin bo‘lgan yoki bevosita nomlanishi ma’lum ijtimoiy-pragmatik sabablarga ko‘ra maqbul bo‘lmagan hodisa, predmet va harakatlarni nisbatan yumshoq, neytral yoki bilvosita shaklda ifodalashga xizmat qiladi. Evfemalashuv jarayonida so‘zlovchi yoki muallif voqelikni shunchaki boshqa nom bilan atab qolmay, balki uning adresat tomonidan qanday qabul qilinishini ham hisobga oladi. Shu

jihatdan evfemizm leksik birlik darajasidagi hodisa boʻlish bilan birga, kommunikativ vaziyat, diskursiv maqsad va pragmatik ehtiyoj bilan bogʻliq murakkab nominativ jarayon sifatida namoyon boʻladi.

Zamonaviy kommunikativ makonda internet-media diskursining jadal rivojlanishi evfemalashuv hodisasining funksional imkoniyatlarini yanada kengaytirmoqda. Internet-nashrlar, yangiliklar portallari va boshqa media platformalarida axborotni tezkor yetkazish bilan bir qatorda, uning ijtimoiy jihatdan maqbul, neytral va auditoriya uchun qabul qilinadigan shaklda ifodalanishi ham muhim ahamiyat kasb etadi. Ayniqsa, siyosiy, iqtisodiy, ijtimoiy, harbiy va boshqa baholovchan mavzularga oid axborotlarni yoritishda bevosita nomlash oʻrniga bilvosita, yumshatilgan yoki mavhumlashtirilgan ifodalardan foydalanish kuzatiladi. Natijada evfemik birliklar internet-media matnining nafaqat leksik tarkibini, balki uning kommunikativ va pragmatik tashkil etilishini ham shakllantiruvchi vositalardan biriga aylanadi.

Evfemik birliklarning shakllanish mexanizmlarini aniqlash evfemalashuv hodisasining ichki lisoniy tabiatini ochishda muhim nazariy va amaliy ahamiyatga ega. Evfemizm tayyor lugʻaviy birlik sifatida emas, balki muayyan kommunikativ vaziyat, diskursiv maqsad va pragmatik ehtiyoj taʼsirida shakllanadigan nominativ vosita hisoblanadi. Shu sababli uning yuzaga kelishida ishtirok etuvchi leksik, grammatik va sintaktik mexanizmlarni aniqlash ingliz hamda oʻzbek internet-media diskursini qiyosiy-tipologik jihatdan tadqiq etishning muhim yoʻnalishlaridan biridir.

Evfemalashuvning lisoniy mexanizmlari turli sathlarda namoyon boʻladi. Leksik sathda metaforalashuv, metonimik koʻchish, perifrazlash, maʼnoni umumlashtirish, terminlashuv va neytral lugʻaviy birliklarni tanlash kabi vositalar evfemik maʼnoning shakllanishiga xizmat qiladi. Grammatik va sintaktik sathlarda esa passiv konstruksiyalar, shaxsi noma'lum gaplar, otlashgan qurilmalar, modal vositalar hamda agentni ikkinchi planga suruvchi sintaktik transformatsiyalar muhim rol oʻynaydi. Bunda evfemik maʼno faqat alohida birlikning lugʻaviy mazmuni orqali emas, balki uning gap tarkibidagi vazifasi, axborotning tashkil etilishi va kommunikativ kontekst bilan oʻzaro aloqasi orqali yuzaga keladi.

Zamonaviy tilshunoslikda evfemik birliklarning hosil boʻlish usullari turlicha mezonlar asosida tasniflangan. Ayrim tadqiqotchilar ularni semantik koʻchish turlariga tayangan holda izohlasa, boshqalari grammatik transformatsiyalar yoki pragmatik strategiyalar asosida tavsiflaydi [1]. Evfemalashuvning semantik va konseptual asoslarini oʻrganishda metaforalashuvning roli, pragmatik tadqiqotlarda esa xushmuomalalik, ijtimoiy maqbullik va kommunikativ strategiya kabi omillar alohida eʼtiborga olinadi. Biroq internet-media diskursining dinamik tabiati evfemalashuvni faqat bitta lisoniy sath doirasida izohlash imkonini bermaydi. Chunki media matnlarida evfemik maʼno koʻpincha leksik tanlov, grammatik shakl, sintaktik tuzilma va matnning umumiy kommunikativ tashkil etilishi natijasida yuzaga keladi. Shu nuqtayi nazardan, ingliz va oʻzbek internet-media diskursida evfemalashuvning umumiy hamda milliy-lisoniy xususiyatlarini qiyosiy oʻrganish alohida ilmiy ahamiyatga ega. Ingliz va oʻzbek tillari struktur-tipologik jihatdan farqli tizimlarga mansub boʻlib, ularning grammatik va sintaktik imkoniyatlari evfemik maʼnoni ifodalash jarayonida turlicha namoyon boʻlishi mumkin. Bir xil kommunikativ maqsad turli tillarda turli nominativ, grammatik yoki sintaktik vositalar orqali amalga oshirilishi ehtimoli mavjud. Shu bois evfemalashuvning universal kommunikativ mexanizmlari bilan bir qatorda, uning konkret til tizimida voqelanish xususiyatlarini aniqlash qiyosiy-tipologik tadqiqot uchun muhim metodologik masala hisoblanadi.

Internet-media matnlarining oʻziga xosligi shundaki, unda evfemik birlikning funksional qiymati faqat uning lugʻaviy maʼnosi bilan belgilanmaydi. Sarlavha, matn janri, axborot manbasi, muallifning kommunikativ pozitsiyasi, adresatning kutilayotgan reaksiyasi va matnning umumiy diskursiv muhiti ham evfemik ifodaning mazmunini shakllantirishda ishtirok etadi. Demak, internet-media diskursida evfemalashuvni tadqiq etishda lisoniy birlikning shakli bilan bir qatorda uning kommunikativ vazifasi va kontekstual xususiyatlarini ham hisobga olish zarur.

Mazkur maqolaning dolzarbligi shundan iboratki, ingliz va oʻzbek internet-media diskursida evfemik birliklarning leksik, grammatik-sintaktik va diskursiv sathlarda shakllanish xususiyatlarini yagona qiyosiy-tipologik yondashuv asosida tavsiflash imkonini beruvchi tadqiqot modeli zarur. Bunday yondashuv evfemalashuvning ikki tildagi umumiy qonuniyatlarini aniqlash bilan birga, ularning struktur-tipologik farqlarini ham ochib berishga xizmat qiladi.

Mazkur maqolaning maqsadi ingliz va oʻzbek internet-media diskursida evfemik birliklarning shakllanish mexanizmlarini aniqlash, ularning leksik, grammatik-sintaktik va diskursiv xususiyatlarini qiyosiy-tipologik jihatdan tavsiflash hamda evfemalashuvning struktur-tipologik modelini ishlab chiqishdan iborat. Mazkur maqsadga erishish uchun quyidagi vazifalar belgilandi: ingliz va oʻzbek internet-media matnlarida evfemik birliklarning asosiy shakllanish usullarini aniqlash; leksik evfemalashuvning yetakchi mexanizmlarini tavsiflash; grammatik va sintaktik vositalarning evfemik maʼno shakllanishidagi rolini aniqlash; ikki tilda evfemalashuv vositalarining qoʻllanish xususiyatlarini qiyoslash; aniqlangan umumiy va milliy-lisoniy xususiyatlar asosida evfemik birliklarning struktur-tipologik modelini ishlab chiqish.

Adabiyotlar tahlili. Evfemalizm hodisasining nazariy talqini va uning shakllanish mexanizmlari zamonaviy tilshunoslikda turli yondashuvlar asosida o‘rganilgan. Mavjud tadqiqotlarni shartli ravishda struktur-lisoniy, leksik-semantik, kognitiv va pragmatik-diskursiv yo‘nalishlarga ajratish mumkin. Bu yondashuvlar bir-birini to‘ldirib, evfemalashuvning faqat alohida leksik birlik emas, balki turli lisoniy sathlar va kommunikativ omillar o‘zaro ta’sirida shakllanadigan murakkab hodisa ekanini ko‘rsatadi.

Evfemik ma’noning grammatik va struktur shakllanishi masalasi O.Zubkova va S.Logvina tadqiqotida maxsus o‘rganilgan. Mualliflar evfemik ma’noning amalga oshishida grammatik mexanizmlarning ahamiyatini ko‘rsatib, evfemalashuvni faqat leksik almashuv bilan cheklab bo‘lmasligini ta’kidlaydilar [1]. Bu yondashuv internet-media matnlarida evfemik ma’noning grammatik shakl, sintaktik qurilish va axborotni taqdim etish usuli bilan bog‘liq holda yuzaga kelishini tahlil qilish uchun muhim nazariy asos bo‘lib xizmat qiladi. T.Golubeva tadqiqotida esa evfemistik va evfemistik bo‘lmagan siyosiy jihatdan maqbul ifodalar o‘rtasidagi farq relevanlik nazariyasi nuqtayi nazaridan ko‘rib chiqiladi. Muallif evfemik ifodaning kommunikativ interpretatsiyasi va adresat tomonidan qabul qilinishiga alohida e’tibor qaratadi [1]. Bu yondashuv evfemalashuvning shakli bilan bir qatorda uning pragmatik ta’sirini ham hisobga olish zarurligini ko‘rsatadi.

Evfemizmlarning leksik va semantik shakllanish mexanizmlari V.Allan va K.Burridge ishlarida keng yoritilgan. Mualliflar evfemik birliklarning hosil bo‘lishini metafora, metonimiya, perifraz, qisqartirish, fonetik modifikatsiya, o‘zlashma birliklardan foydalanish va grammatik almashtirish kabi vositalar bilan bog‘laydilar [2]. Ularning yondashuvida mazkur vositalarning umumiy kommunikativ vazifasi bevosita nomlash natijasida yuzaga kelishi mumkin bo‘lgan salbiy yoki noqulay kommunikativ ta’sirni yumshatishdan iborat. Mazkur tasnif ingliz va o‘zbek internet-media materiallarida uchraydigan evfemik birliklarning leksik shakllanish usullarini tizimlashtirish uchun muhim manba hisoblanadi.

R.Holder hamda H.Ravson ishlarida evfemizmlar leksik innovatsiya va semantik qayta talqin nuqtayi nazaridan qaraladi [3]. Bu tadqiqotlarda yangi nominativ birliklarning shakllanishi ijtimoiy muhit va tildagi nomlash ehtiyojlari bilan bog‘liq holda talqin etiladi. Mazkur yondashuv evfemizmni tayyor lug‘aviy birlik sifatidagina emas, balki muayyan ijtimoiy va kommunikativ ehtiyoj ta’sirida yuzaga keladigan dinamik nominatsiya vositasi sifatida qarash imkonini beradi. Shu nuqtayi nazardan internet-media diskursida yangi evfemik birliklarning paydo bo‘lishi va ularning tez ommalashuvi ham leksik innovatsiya jarayoni bilan bog‘liq holda izohlanishi mumkin.

Evfemalashuvning kognitiv asoslarini tushuntirishda G.Lakoff va M.Johnsonning konseptual metafora nazariyasi muhim o‘rin tutadi. Mualliflar metaforani inson tafakkurining universal mexanizmi sifatida talqin qilib, bir konseptual sohaning boshqa konseptual soha orqali anglanishini asoslaydilar [4]. Bu nuqtayi nazardan metaforik evfemizm voqelikni shunchaki yashirish vositasi emas, balki uni boshqa konseptual belgi asosida qayta idrok etish va ifodalash usuli sifatida namoyon bo‘ladi. Demak, evfemik metaforada nomlanayotgan hodisaning salbiy xususiyati butunlay yo‘qolmaydi, balki adresat ongida boshqa konseptual obraz orqali qayta shakllantiriladi.

Z.Kövecses mazkur yondashuvni rivojlantirib, metaforalarning shakllanishida madaniy omillarning muhimligini ta’kidlaydi [5]. Uning yondashuvi bir xil kommunikativ vazifaning turli til va madaniyatlarda turlicha konseptual modellar orqali ifodalanishi mumkinligini ko‘rsatadi. Bu holat ingliz va o‘zbek internet-media diskursida evfemik birliklarni qiyosiy-tipologik o‘rganish uchun ayniqsa muhimdir. Chunki ikki tilda umumiy kommunikativ maqsad mavjud bo‘lsa-da, uni ifodalashda tanlanadigan konseptual modellar va leksik vositalar milliy-madaniy hamda tilning struktur xususiyatlari bilan farqlanishi mumkin.

Evfemalashuvning pragmatik tabiatini tushuntirishda P.Brown va S.Levinsonning xushmuomalalik nazariyasi muhim nazariy asoslardan birini tashkil etadi [6]. Ularning yondashuvi til vositalarini tanlashda adresatning ijtimoiy maqomi, muloqot ishtirokchilari o‘rtasidagi munosabatlar va muloqotda yuzaga kelishi mumkin bo‘lgan salbiy ta’sirni kamaytirish ehtiyoji muhim ahamiyatga ega ekanini ko‘rsatadi. Shu nuqtayi nazardan evfemik ifoda kommunikativ vaziyatda to‘g‘ridan-to‘g‘ri nomlashdan qochish va adresat uchun nisbatan maqbul shaklni tanlash strategiyasi sifatida namoyon bo‘lishi mumkin.

G.Leechning pragmatik tamoyillari ham evfemik ifodalarning kommunikativ vazifasini tushunish uchun muhimdir [7]. Uning yondashuvida til birliklarining tanlanishi nafaqat semantik mazmun, balki muloqotdagi ijtimoiy maqbullik va kommunikativ samaradorlik bilan ham bog‘liq. Shu jihatdan evfemik birlik muayyan axborotni saqlab qolgan holda uning ifodalanish shaklini yumshatish yoki adresatga ta’sirini o‘zgartirish imkonini beruvchi pragmatik vosita sifatida baholanishi mumkin.

Van Djikning diskurs va hokimiyatga oid qarashlari evfemalashuvni kengroq ijtimoiy-diskursiv kontekstda ko‘rib chiqish imkonini beradi [8]. Ayniqsa, institutsional va media diskursda axborotni tanlash, nomlash va taqdim etish usuli muayyan ijtimoiy munosabatlar hamda diskursiv strategiyalar bilan bog‘liq bo‘lishi mumkin. M.Rohmatullah va A.Degafning media materiallarida evfemizm va disfemizm orqali konfliktni freymlashga bag‘ishlangan tadqiqoti ham evfemik tanlovning media diskursda voqeani muayyan kommunikativ nuqtayi nazardan taqdim etish bilan bog‘liqligini

koʻrsatadi [8]. Bu yondashuv evfemizmlarni internet-media matnidan ajratib olingan alohida leksik birlik sifatida emas, balki matnning umumiy diskursiv tashkil etilishi doirasida tahlil qilish zarurligini asoslaydi.

Shunday qilib, koʻrib chiqilgan tadqiqotlar evfemalashuvni turli nuqtayi nazarlardan yoritgan boʻlsa-da, ularni birlashtiruvchi jihat – evfemik maʼnoning faqat leksik almashuv natijasi emasligi haqidagi yondashuvdir. Struktur tadqiqotlar grammatik va sintaktik mexanizmlarni [1], leksik-semantik tadqiqotlar nominatsiya va semantik qayta talqinni [2; 3], kognitiv yondashuv metaforik va konseptual qayta qurishni [4; 5], pragmatik va diskursiv tadqiqotlar esa kommunikativ vaziyat, adresat, ijtimoiy maqbullik va media kontekstining rolini [6; 7; 8] asosiy omillar sifatida koʻrsatadi.

Biroq ushbu yondashuvlarning aksariyati evfemalashuvning muayyan bir mexanizmi yoki alohida nazariy jihatiga ustuvor eʼtibor qaratadi. Ingliz va oʻzbek internet-media diskursida esa leksik, grammatik-sintaktik va diskursiv mexanizmlarni bir vaqtning oʻzida qiyosiy-tipologik nuqtayi nazardan tahlil qilish zarurati mavjud. Shuning uchun mazkur tadqiqotda evfemik birliklarning shakllanish mexanizmlari kompleks yondashuv asosida oʻrganilib, ularning leksik, grammatik-sintaktik va diskursiv sathlardagi umumiy hamda tilga xos xususiyatlarini aniqlash maqsad qilinadi.

Tahlil va muhokama. Ingliz va oʻzbek internet-media matnlari materiallari shuni koʻrsatadiki, evfemik birliklar hosil boʻlishida ikkala tilda umumiy kognitiv mexanizmlar saqlanib qolgan boʻlsa-da, ularning lisoniy ifodalanish usullari sezilarli darajada farqlanadi. Ingliz tilining analitik tuzilishi otlashgan konstruksiyalar, passiv shakllar hamda koʻp komponentli ot birikmalaridan keng foydalanish imkonini bersa, oʻzbek tilining agglutinativ tabiati affiksatsiya, analitik birikmalar va izohlovchi sintaktik qurilmalar orqali evfemik maʼnoni ifodalash imkoniyatini kengaytiradi. Ikkala tilda evfemalashuvning konseptual mexanizmi umumiy boʻlsa-da, uning lisoniy voqelanish shakllari struktur-tipologik xususiyatlarga muvofiq ravishda farqlanadi.

Shu bois mazkur boʻlimda ingliz va oʻzbek internet-media materiallari asosida evfemik birliklarning hosil boʻlish usullari leksik, grammatik va struktur sathlarda qiyosiy-tipologik jihatdan tahlil qilinadi. Tahlilda nafaqat alohida lisoniy vositalarning qoʻllanish chastotasi, balki ularning kommunikativ vazifasi, diskursiv sharoiti va konseptual asoslari ham hisobga olinadi. Bunday yondashuv ikki tilning evfemalashuv tizimidagi umumiy qonuniyatlar hamda milliy-lisoniy xususiyatlarni kompleks ravishda aniqlash imkonini beradi.

Leksik vositalar orqali evfemik birliklarning shakllanishi

Internet-media diskursida evfemik birliklarning eng faol shakllanish sathi leksik sathdir. Bu jarayonda mavjud lugʻaviy birliklarning maʼnosi qayta talqin qilinadi, yangi nominativ vositalar tanlanadi yoki hodisaning salbiy jihatini toʻliq ifodalamaydigan birliklardan foydalaniladi. Natijada, voqelikning oʻzi emas, balki uning auditoriya ongida qabul qilinishi oʻzgaradi. Shu sababli leksik vositalar evfemalashuvning asosiy amalga oshirish mexanizmlaridan biri sifatida namoyon boʻladi.

Ingliz va oʻzbek internet-media materiallarining qiyosiy tahlili shuni koʻrsatadiki, leksik evfemalashuv har ikki tilda umumiy kognitiv tamoyillar asosida shakllansa-da, ularning amalga oshish usullari milliy til tizimi va media anʼanalari bilan belgilanadi. Ingliz tilida siyosiy, iqtisodiy va ijtimoiy mavzularga oid axborotlarda mavhum hamda neytral maʼnoli birliklardan foydalanish ustunlik qilsa, oʻzbek internet-mediasida izohlovchi va tavsiflovchi birliklar koʻproq uchraydi.

Tahlil qilingan materiallar asosida leksik evfemalashuvning quyidagi asosiy usullari ajratildi:

1) metaforalashuv;
2) metonimik koʻchish;
3) perifrazlash;
4) maʼnoni umumlashtirish;
5) terminlashuv;
6) neytral lugʻaviy birlikni tanlash.

Korpus materiallari asosida oʻtkazilgan miqdoriy tahlil leksik evfemalashuvda metaforalashuv eng mahsuldor usul ekanligini koʻrsatdi. Tahlil qilingan 512 ta evfemik birlikning 184 tasi (35,9 %) metaforalashuv, 96 tasi (18,8 %) perifraz, 71 tasi (13,9 %) metonimik koʻchish, 63 tasi (12,3 %) terminlashuv, 54 tasi (10,5 %) maʼnoni umumlashtirish va 44 tasi (8,6 %) neytral lugʻaviy birliklarni tanlash orqali hosil qilingan. Mazkur natijalar internet-media diskursida salbiy mazmunni bilvosita ifodalashda konseptual qayta talqin va tavsiflovchi nom yetakchi oʻrin tutishini koʻrsatadi (Qarang: 1-jadval).

Mazkur vositalar turli shaklda namoyon boʻlsa-da, ularni birlashtirib turuvchi umumiy xususiyat mavjud. Ularning barchasi salbiy baholanishi mumkin boʻlgan hodisani bevosita nomlashdan voz kechib, auditoriya uchun nisbatan maqbul boʻlgan lisoniy vositani tanlashga xizmat qiladi.

Eng faol usullardan biri metaforalashuv ekanligi maʼlum boʻldi. Metaforik evfemizmlar hodisani boshqa konseptual soha orqali ifodalaydi. Bunda salbiy mazmun yashirilmaydi, balki boshqa belgi asosida talqin qilinadi. Masalan, ingliz internet-mediasida iqtisodiy inqirozni *economic headwinds* (Financial Times, 2023), harbiy muvaffaqiyatsizlikni *strategic setback*, ish oʻrinlarining qisqarishini *workforce optimization* (Reuters, 2024) kabi birliklar orqali ifodalash kuzatiladi. Mazkur birliklarda salbiy hodisa bevosita nomlanmaydi, balki nisbatan neytral yoki ijobiy assotsiatsiya uygʻotuvchi konseptlar orqali taqdim etiladi.

O‘zbek internet-mediasida ham metaforalashuv faol qo‘llanadi. Masalan, narxlarning oshishi *narxlar o‘sishi*, iqtisodiy qiyinchiliklar *murakkab iqtisodiy vaziyat*, davlat xarajatlarini qisqartirish *maqbullashtirish*, ayrim cheklovlar esa *tartibga solish choralari* kabi birliklar bilan ifodalanadi. Bu holatda metaforik yoki mavhumroq ifoda hodisaning salbiy ta’sirini kamaytirishga xizmat qiladi.

Metonimik ko‘chish ham evfemalashuvning keng tarqalgan vositalaridan biridir. Bunda hodisaning o‘zi emas, balki unga aloqador belgi, jarayon yoki natija nomlanadi. Ingliz internet-mediasida *collateral damage*, *correction*, *incident*, *security operation* kabi birliklar, o‘zbek internet-mediasida esa *holat*, *vaziyat*, *jarayon*, *choralar*, *tadbirlar* kabi mavhum ma’noli birliklar ko‘pincha bevosita salbiy hodisani nomlash o‘rnida qo‘llanadi. Natijada, hodisa haqidagi baholash darajasi sezilarli darajada pasayadi.

Leksik evfemalashuvning yana bir muhim ko‘rinishi perifrazdir. Bunda qisqa va keskin nom o‘rniga izohlovchi yoki tavsiflovchi birikma qo‘llanadi. Masalan, ingliz tilidagi *people with disabilities*, *people experiencing homelessness*, *economically disadvantaged households* (Reuters, 2024) kabi birliklarda shaxs muayyan salbiy belgi orqali emas, balki uning holati yoki ijtimoiy vaziyati orqali tavsiflanadi. O‘zbek internet-mediasida ham *ehtiyojmand oilalar*, *ijtimoiy himoyaga muhtoj qatlam*, *alohida e’tiborga muhtoj shaxslar* kabi perifrazlar ayni kommunikativ vazifani bajaradi.

Tahlillar shuni ko‘rsatadiki, leksik evfemalashuvning barcha ko‘rinishlari yagona maqsadga xizmat qiladi. Biroq ingliz tilida qisqa va ixcham nominativ birliklar ustunlik qilsa, o‘zbek internet-mediasida tavsiflovchi sintagmalar va izohlovchi birikmalar ko‘proq qo‘llanadi. Mazkur farq ikki tilning struktur-tipologik xususiyatlari hamda media uslubidagi an’analar bilan izohlanadi.

Grammatik va sintaktik vositalar orqali evfemik birliklarning shakllanishi

Internet-media diskursida evfemalashuv faqat leksik birliklarni tanlash orqali emas, balki grammatik shakllar va sintaktik qurilmalar vositasida ham amalga oshiriladi. Bunday hollarda evfemik ta’sir alohida so‘zning lug‘aviy ma’nosi bilan emas, balki gapning grammatik tashkil etilishi, axborotning taqdim etilish usuli hamda voqea ishtirokchilarining sintaktik joylashuvi bilan yuzaga keladi: bir xil voqelik turli grammatik vositalar orqali ifodalanganda adresat tomonidan turlicha qabul qilinadi.

Ingliz va o‘zbek internet-media materiallari tahlili grammatik evfemalashuvning bir necha tipik ko‘rinishlarini aniqlash imkonini berdi. Ular orasida passiv konstruksiyalar, shaxsi noma’lum gaplar, otlashgan konstruksiyalar, modal vositalar hamda agentni ifodalashdan voz kechishga asoslangan sintaktik transformatsiyalar alohida faolligi bilan ajralib turadi.

Eng mahsuldor vositalardan biri passiv konstruksiyalar hisoblanadi. Passiv shakl voqea bajaruvchisini ikkinchi planga surib, diqqatni harakatning natijasiga qaratadi. Shu sababli salbiy hodisalar haqidagi axborotlarda javobgarlikni bevosita muayyan shaxs yoki tashkilot bilan bog‘lamaslik imkoniyati yuzaga keladi. Masalan, ingliz internet-mediasida: *Mistakes were made. Several facilities were affected. Civilian casualties were reported. The decision was implemented* (Reuters, 2025) kabi konstruksiyalar keng uchraydi. Ushbu gaplarda voqea sodir bo‘lgani ta’kidlanadi, biroq uni amalga oshirgan subyekt ochiq ko‘rsatilmaydi: kommunikativ urg‘u hodisaning o‘ziga emas, uning natijasiga ko‘chadi.

O‘zbek internet-media matnlarida ham shunga o‘xshash hodisa kuzatiladi: *Kamchiliklarga yo‘l qo‘yildi. Tegishli choralar ko‘rildi. Qaror qabul qilindi. Tekshiruv ishlari olib borildi* (Kun.uz, 2024).

Bu misollarda ham harakat bajaruvchisi tilga olinmaydi. Bunday sintaktik qurilish hodisani shaxsdan ajratgan holda taqdim etishga xizmat qiladi hamda salbiy baholashning kuchini kamaytiradi.

Grammatik evfemalashuvning yana bir muhim ko‘rinishi otlashgan konstruksiyalar hisoblanadi. Fe’l bilan ifodalangan faol harakat o‘rniga otlashgan birliklardan foydalanish voqelikni nisbatan mavhumroq va rasmiyroq shaklda ifodalaydi. Masalan, ingliz internet-mediasida *implementation of reforms*; *restructuring process*; *staff optimization*; *workforce adjustment* (Reuters, 2024) kabi birliklar faol harakatni emas, jarayonni ifodalaydi.

O‘zbek internet-mediasida evfemalashuv ko‘pincha otlashuv asosidagi qurilmalar orqali ifodalanadi. Jumladan, *islohotlarni amalga oshirish*, *maqbullashtirish jarayoni*, *tarkibiy o‘zgarishlar* va *qayta tashkil etish ishlari* kabi birliklar keng qo‘llanadi. Ushbu birliklarda harakatning ijrochisi emas, uning rasmiy tavsifi oldingi planga chiqadi.

Internet-media diskursida shaxsi noma’lum gaplar ham evfemik vazifani faol bajaradi. O‘zbek tilining grammatik imkoniyatlari bunday qurilmalarni hosil qilish uchun qulay sharoit yaratadi. Masalan: *aniqlanishicha, ma’lum qilinishicha, qayd etilishicha, bildirilishicha* va h.

Mazkur qurilmalarda axborot manbayi ikkinchi planga suriladi. Natijada, ma’lumot obyektiv fakt sifatida qabul qilinishi osonlashadi.

Ingliz tilida xuddi shu kommunikativ vazifa quyidagi birliklar orqali ifodalanadi: *It is reported that...; It is believed that...; It has been confirmed that...; Sources indicate that...* (Reuters, 2025)

Har ikki tilda ushbu qurilmalar axborotning manbasini mavhumlashtirish orqali xabarni nisbatan neytral ko‘rinishda taqdim etishga xizmat qiladi.

Mazkur tadqiqot natijalari shuni koʻrsatdiki, ushbu birliklarning barchasi iqtisodiy yoʻqotish yoki qisqartirish kabi salbiy mazmunni bevosita emas, balki neytral yoki texnik terminologiya orqali ifodalashga xizmat qiladi. Natijada, auditoriya tomonidan voqelikning salbiy qabul qilinish darajasi pasayadi.

Grammatik evfemalashuvning yana bir muhim vositasi modal konstruktsiyalardir. Bunday birliklar qat'iy hukmni yumshatadi yoki salbiy mazmunni ehtimollik shaklida ifodalaydi. Masalan: *may affect*; *could result in*; *is expected to reduce* (Reuters, 2024). Yoki *ta'sir koʻrsatishi mumkin; kutilmoqda; ehtimoldan xoli emas; kuzatilishi mumkin.*

Modal vositalar orqali hodisaning keskinligi pasayadi: adresat salbiy axborotni nisbatan yumshoqroq qabul qiladi.

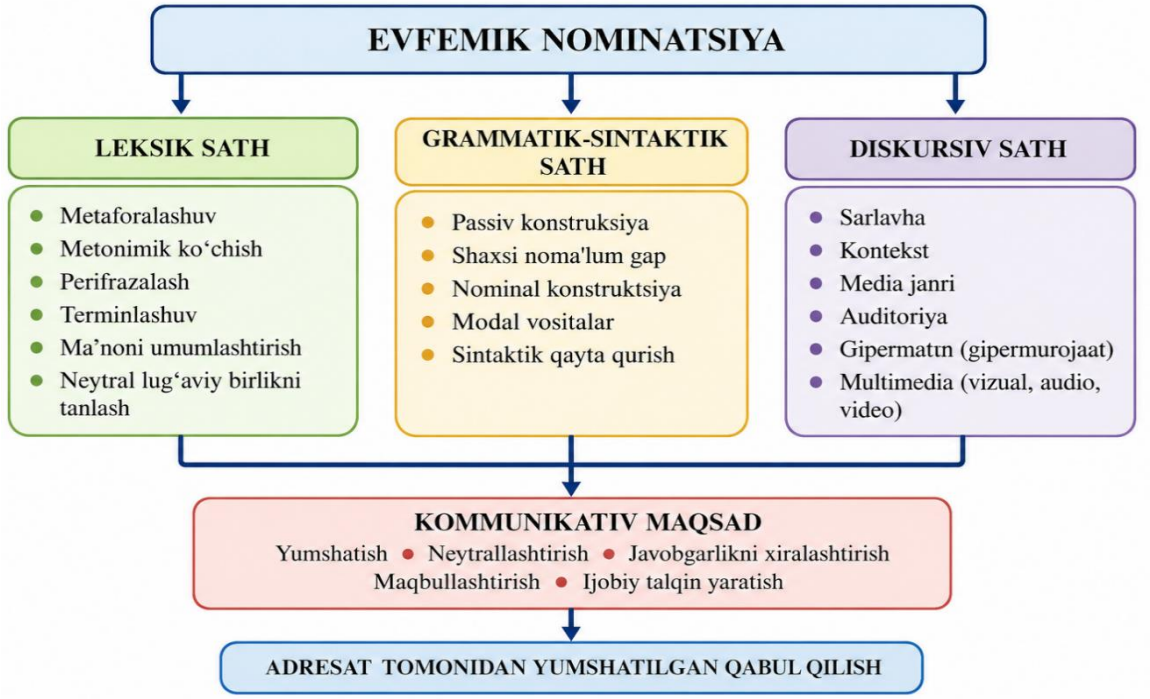
Tahlillar shuni koʻrsatadiki, grammatik va sintaktik vositalar internet-media diskursida evfemalashuvning mustaqil mexanizmini tashkil etadi. Agar leksik evfemalashuvda kommunikativ ta'sir alohida nominativ birlikni tanlash orqali yuzaga kelsa, grammatik evfemalashuvda bu ta'sir gapning tuzilishi, axborotning tashkil etilishi va voqea ishtirokchilarining sintaktik joylashuvi orqali hosil boʻladi.

Qiyosiy-tipologik tahlil ingliz va oʻzbek tillarida mazkur mexanizmlarning umumiy kommunikativ vazifasi bir xil ekanligini koʻrsatadi. Har ikki tilda grammatik transformatsiyalar javobgarlikni bevosita muayyan shaxsga bogʻlamaslik, salbiy bahoni yumshatish hamda axborotni neytral tarzda ifodalashga xizmat qiladi. Biroq ularning lisoniy voqelanishi til tizimlarining struktur xususiyatlari bilan belgilanadi. Qiyosiy tahlil shuni koʻrsatdiki, ingliz tilida passiv va otlashgan konstruksiyalar nisbatan faol qoʻllansa, oʻzbek tilida shaxsi noma'lum gaplar, majhul nisbat shakllari hamda analitik qurilmalar ustunlik qiladi. Mazkur farq ingliz tilining analitik, oʻzbek tilining esa agglutinativ xususiyatlari bilan izohlanadi. Bu holat evfemalashuvning funksional umumiyligini saqlagan holda, uning lisoniy ifodalanishida tipologik variantlilik mavjudligini yana bir bor tasdiqlaydi.

Ingliz va oʻzbek internet-media matnlarida evfemik birliklarning struktur-tipologik modeli

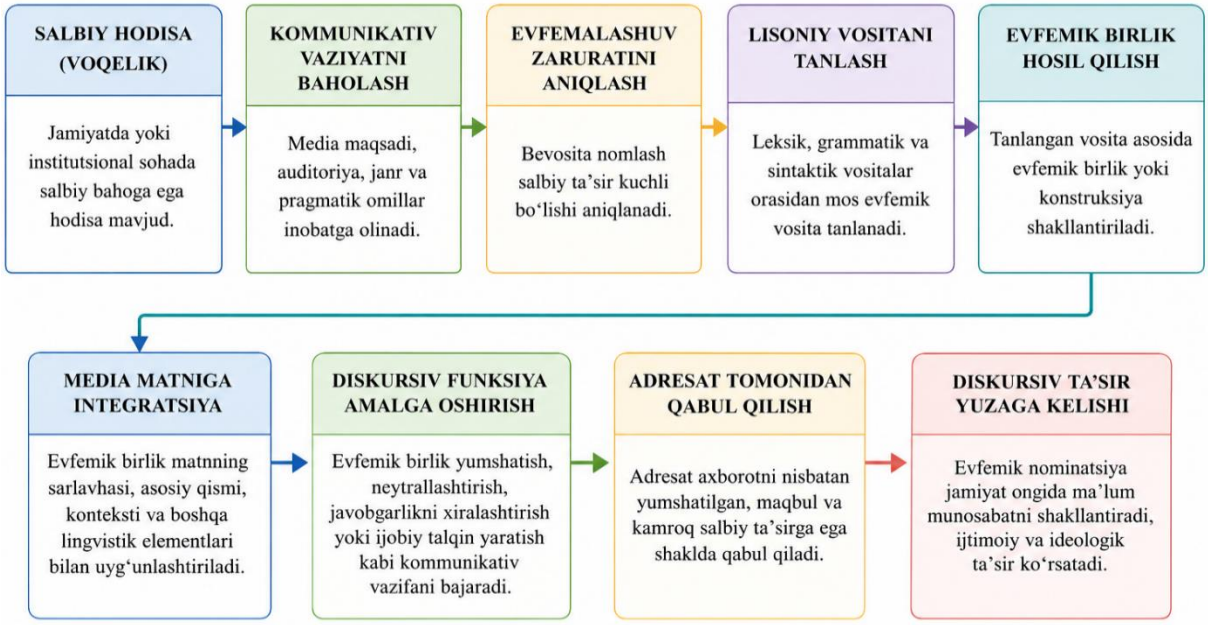
Yuqorida tahlil qilingan materiallar shuni koʻrsatadiki, internet-media diskursida evfemik birliklarning shakllanishi alohida lisoniy vositalarning qoʻllanishi bilan chegaralanmaydi. Evfemik nom turli sathdagi birliklarning oʻzaro uygʻunlashuvi natijasida yuzaga keladigan koʻp bosqichli lisoniy jarayon hisoblanadi. Shu sababli evfemalashuvni faqat leksik yoki grammatik hodisa sifatida tavsiflash uning real kommunikativ tabiatini toʻliq aks ettirmaydi. Mazkur jarayonni izchil tahlil qilish uchun evfemik birliklarning struktur tashkil etilishi va ularning oʻzaro bogʻliqligini yagona tipologik model asosida tavsiflash zarur.

Tahlil natijalari ingliz va oʻzbek internet-media matnlarida evfemik birliklarning shakllanishida uch asosiy struktur sath ishtirok etishini koʻrsatdi. Birinchi sath leksik transformatsiyalarni, ikkinchi sath grammatik-sintaktik qayta qurishlarni, uchinchi sath esa diskursiv tashkil etish vositalarini qamrab oladi. Mazkur sathlar mustaqil holda ham, oʻzaro uygʻunlashgan holda ham evfemik ma'noning shakllanishiga xizmat qiladi.



Leksik sathda evfemik ma'no asosan metaforalashuv, metonimik koʻchish, perifraz, terminlashuv, umumlashtirish hamda neytral lugʻaviy birliklarni tanlash orqali hosil boʻladi. Ushbu vositalar bevosita nomlashning oʻrnini bosib, voqelikning salbiy jihatini kommunikativ nuqtayi nazardan maqbul shaklda ifodalaydi. Ayniqsa, siyosiy va iqtisodiy mazmundagi media matnlarida terminlashuv hamda mavhum ma'noli birliklardan foydalanish yuqori faollik bilan kuzatiladi.

Grammatik-sintaktik sathda esa evfemik effekt gapning tuzilishi orqali yuzaga keladi. Passiv konstruksiyalar, shaxsi noma'lum gaplar, nominal qurilmalar, modal vositalar hamda sintaktik transformatsiyalar harakat bajaruvchisini yoki salbiy hodisaning manbasini ikkinchi planga suradi. Natijada, adresatning diqqat markazi voqeaning sababiga emas, uning natijasi yoki umumiy tavsifiga yoʻnaltiriladi.



Diskursiv sath evfemalashuvning yakuniy bosqichini tashkil etadi. Bu bosqichda alohida lisoniy birliklarning ma'nosi matnning umumiy mazmuni, sarlavha, axborot manbasi, vizual vositalar va media janri bilan uygʻunlashib, muayyan kommunikativ ta'sirni yuzaga keltiradi. Demak, internet-media diskursida evfemik birliklarning funksional qiymati faqat ularning lugʻaviy ma'nosi bilan emas, balki butun diskursning tashkil etilishi bilan belgilanadi.

Ingliz va oʻzbek internet-media materiallarini qiyosiy tahlil qilish mazkur uch sathning har ikki tilda mavjud ekanligini koʻrsatdi. Biroq ularning faollik darajasi va lisoniy voqelanishi til tizimlarining struktur-tipologik xususiyatlari bilan belgilanadi. Ingliz tilida analitik konstruksiyalar, passiv shakllar va terminlashuv faolroq qoʻllansa, oʻzbek tilida izohlovchi sintagmalar, shaxsi noma'lum gaplar hamda analitik birikmalar koʻproq uchraydi. Shunga qaramay, har ikki tilda evfemalashuvning umumiy kommunikativ vazifasi oʻzgarmaydi.

Olingan natijalar. Mazkur kuzatishlar asosida ingliz va oʻzbek internet-media diskursida evfemik birliklarning struktur-tipologik modeli ishlab chiqildi (1-chizma). Model evfemik nomning shakllanishini lisoniy sathlar oʻrtasidagi uzviy bogʻliqlik asosida tavsiflaydi hamda keyingi boʻlimlarda tahlil qilinadigan mavzuviy va funksional tipologiyani izohlash uchun metodologik asos vazifasini bajaradi. Evfemik birlikning internet-media matnida hosil boʻlish bosqichlari, kommunikativ vaziyatni baholashdan boshlab diskursiv ta'sir yuzaga kelguniga qadar boʻlgan jarayon 2-chizmada ketma-ketlik asosida aks ettirilgan.

1-chizma. Ingliz va o‘zbek internet-media matnlarida evfemik birliklarning struktur-tipologik modeli

2-chizma. Internet-media matnlarida evfemik birliklarning shakllanish algoritmi

Qiyosiy tahlil natijasida aniqlandiki, ingliz va o‘zbek internet-media matnlarida evfemik birliklarning hosil bo‘lish usullari faolligi jihatidan o‘zaro farqlanadi. Mazkur usullarning qiyosiy tavsifi 1-jadvalda keltirilgan.

Hosil bo‘lish usuli	Soni (n)	Ulushi (%)	Ingliz	O‘zbek
Metaforalashuv	184	35,9	Juda faol	Faol
Perifrazlash	96	18,8	Faol	Juda faol
Metonimik ko‘chish	71	13,9	Faol	Faol
Terminlashuv	63	12,3	Juda faol	O‘rtacha
Ma’noni umumlashtirish	54	10,5	Faol	Faol
Neytral lug‘aviy birlik tanlash	44	8,6	Juda faol	Faol

1-jadval. Ingliz va o‘zbek internet-media matnlarida evfemik birliklarning hosil bo‘lish usullarining qiyosiy tavsifi

Struktur sathlarning qiyosiy faolligi tahlili shuni ko‘rsatdiki, har ikki tilda evfemalashuvning asosiy mexanizmlari umumiy bo‘lsa-da, ularning qo‘llanish darajasi til tizimlarining tipologik xususiyatlariga bog‘liq. Ushbu natijalar 2-jadvalda umumlashtirilgan.

Struktur sath	Ingliz tili	O‘zbek tili	Tipologik farq

Leksik	Asosiy	Asosiy	Har ikki tilda yetakchi sath
Grammatik	Juda faol	Faol	Ingliz tilida analitik konstruksiyalar ustun
Sintaktik	Faol	Juda faol	O‘zbek tilida shaxsi noma’lum gaplar faol
Diskursiv	Juda faol	Juda faol	Har ikki tilda media konteksti muhim

2-jadval. Ingliz va o‘zbek internet-mediasida evfemik birliklarning struktur sathlar bo‘yicha taqsimlanishi

Olib borilgan qiyosiy tahlil ingliz va o‘zbek internet-media matnlarida evfemik birliklarning shakllanishi ko‘p sathli lisoniy jarayon ekanligini ko‘rsatdi. Leksik, grammatik-sintaktik va diskursiv vositalar har ikki tilda umumiy kommunikativ vazifaga xizmat qilsa-da, ularning lisoniy voqelanishi til tizimlarining struktur xususiyatlariga muvofiq farqlanadi. Ingliz tilida analitik qurilmalar va terminlashuv ustunlik qilsa, o‘zbek tilida tavsiflovchi birliklar, shaxsi noma’lum gaplar va analitik sintagmalar faolroq qo‘llanadi. Shu bilan birga, har ikki til uchun umumiy bo‘lgan qonuniyat shundan iboratki, evfemalashuv alohida lisoniy birlik emas, balki turli sathdagi vositalarning o‘zaro uyg‘unlashuvi natijasida yuzaga keladigan kommunikativ strategiya sifatida namoyon bo‘ladi. Mazkur xulosalar keyingi bo‘limda evfemik birliklarning mavzuviy va funksional tipologiyasini tahlil qilish uchun nazariy hamda metodologik asos yaratadi.

Mazkur bo‘limda ishlab chiqilgan struktur-tipologik model keyingi boblarda evfemik birliklarning mavzuviy va funksional tasnifini amalga oshirish uchun metodologik asos bo‘lib xizmat qiladi hamda ingliz va o‘zbek internet-media diskursida evfemalashuvning universal va milliy xususiyatlarini qiyosiy-tipologik jihatdan izohlash imkonini beradi.

Xulosa. Taklif etilgan struktur-tipologik model evfemalashuvni alohida leksik hodisa sifatida emas, balki leksik, grammatik-sintaktik va diskursiv sathlarning o‘zaro integratsiyasi natijasida yuzaga keladigan kompleks kommunikativ jarayon sifatida talqin qilishga asos bo‘ladi. Mazkur yondashuv ingliz va o‘zbek internet-media diskursida evfemik birliklarning hosil bo‘lish mexanizmlarini yagona nazariy asosda tavsiflashga xizmat qiladi. Modelning amaliy ahamiyati shundaki, undan internet-media matnlarini korpus asosida annotatsiyalash, evfemik birliklarni avtomatik aniqlash algoritmlarini ishlab chiqish hamda kompyuter lingvistikasi va tabiiy tilni qayta ishlash tizimlarida evfemalashuvni modellashtirishda foydalanish mumkin. Bundan tashqari, model media matnlarini qiyosiy-tipologik tahlil qilish uchun metodik asos vazifasini ham bajaradi.

Demak, ishlab chiqilgan struktur-tipologik model keyingi bo‘limlarda evfemik birliklarni mavzuviy va funksional jihatdan tasniflash uchun konseptual asos yaratadi. Aynan shu model asosida evfemalashuvning qaysi kommunikativ sohalarda namoyon bo‘lishi va qanday pragmatik vazifalarni bajarishi keyingi maqolalarda batafsil tahlil qilinadi.

O‘ZBEK SHEVALARI UNLILAR TIZIMI G‘OZI OLIM YUNUSOV TALQINIDA

Ergashova Gulnoza Shukurovna
Toshkent davlat o‘zbek tili va adabiyoti universiteti mustaqil tadqiqotchisi
filologiya fanlari bo‘yicha falsafa doktori (PhD)
E-mail: gulnoza86ergashova@gmail.com

Annotatsiya: *Maqolada ma’rifatparvar jadid adibi G‘ozi Olim Yunusovning o‘zbek shevalaridagi unlilar sistemasi haqidagi fikrlari o‘rganilgan. Uning o‘zbek shevalari vokalizmi, unlilar tizimi haqidagi qarashlariga tanqidiy, tahliliy baho berilgan.*

Kalit so‘zlar: *fonetik-fonologik tizim, vokalizm, variatsiya, diftong, grafema, bosit unli, faxish unli, indefferent unli, singarmonizm.*

СИСТЕМА ГЛАСНЫХ УЗБЕКСКИХ ДИАЛЕКТОВ В ТРАКТОВКЕ ГОЗИ ОЛИМА ЮНУСОВА

Аннотация: *В статье рассматриваются взгляды просветителя-джадида Гози Олима Юнусова на систему гласных узбекских диалектов. Дается критико-аналитическая оценка его представлений о вокализме и системах гласных этих диалектов.*

Ключевые слова: *фонетико-фонологическая система, вокализм, вариативность, дифтонг, графема, простой гласный, гласный открытого (широкого) ряда, нейтральный гласный, гармония гласных.*

THE VOWEL SYSTEM OF UZBEK DIALECTS IN THE INTERPRETATION OF G‘OZI OLIM YUNUSOV

Abstract: *This article examines the views of the enlightened Jadid writer G‘ozi Olim Yunusov regarding the vowel system of Uzbek dialects. A critical and analytical assessment is provided of his perspectives on the vocalism and vowel systems of these dialects.*

Keywords: *phonetic-phonological system, vocalism, variation, diphthong, grapheme, simple vowel, faxish (harsh/tense) vowel, indifferent vowel, vowel harmony.*

Kirish. O‘zbek shevalarining fonetik-fonologik tizimi masalasi G‘ozi Olimning ikki asarida tadqiqot obyekti bo‘lgan. Adib “Maorif va o‘qitg‘uchi” jurnalining 1927-yil 12-sonida “O‘zbek tilining tovushlari” degan maqolani e’lon qiladi va unda o‘zbek tilidagi, aniqrog‘i, o‘zbek shevalaridagi unli va undosh fonemalarning miqdor va sifat xususiyatlarini yoritishga harakat qiladi. Unda isloh qilingan arab yozuvi va lotin alifbosiga asoslangan transkripsiyani qo‘llaydi. Bu manba N.Yangiboevaning “XX asrning 20-yillarida o‘zbek tilshunosligi jarayoni (“Maorif va o‘qitg‘uchi” jurnali materiallari asosida)” mavzusidagi dissertatsion ishida tahlil qilingan [1].

Adabiyotlar tahlili. “O‘zbek shevalari tasnifida bir tajriba” asarida esa “O‘rnaklarning imlosi” degan sarlavha ostida shevalardan matnlarni “baynalmilal ilmiy fonetik alifbe (unda qavs ichida M.F.A.)” bilan yozganligini qayd qiladi. Lekin o‘zi e’tirof etadiki, bu alifboga qat’iy amal qila olmagan. Buni bosmaxona qiyinchiliklari bilan bog‘laydi. Chunki, “*bosmaxonalarda ilmiy imloga tegishli harflar yo‘qligi*” [4;5]. Bu holatni tushunish mumkin, chunki ushbu asar nashr qilingan davr texnikasining ahvoli to‘g‘risida tasavvurlarimiz bor. G‘ozi Olim shevalardagi fonemalarning variatsiyalarini ko‘rsata olmagan yoki uni ko‘rsatish ilojisini topa olmaganligini “Biroq bu ko‘rina olmagan fonetik xususiyatlarning ma’noga ta’sir jihatidan semantik rollari yo‘qdir, ularning faqat talaffuz jihatlardangina ahamiyatli bo‘la oladi [4;5]” tarzida izohlaydi. Aslida shevashunoslik uchun har bir tovush ahamiyatli ekanligi G‘ozi Olimga ravshan bo‘lgan.

Tahlillar va natijalar. Bu ikki manba materiallari asosida o‘zbek tilidagi unlilar to‘g‘risida G‘ozi Olimning qarashlarini quyidagi tahlil qilish mumkin.

U unlilarni *juda tor, tor, o‘rta va keng darajasi* to‘g‘risida fikr yuritadi. G‘ozi Olim unlilardagi uch daraja deganda hozirgi adabiyotlarimizda qayd qilib kelinayotgan unlilar tasnifidagi og‘izning ochilish darajasi tamoyilini eslatadigan izohlar beradi, lekin ularni tavsiflashda fikr unlilarning cho‘ziqligi to‘g‘risida borayotganligini sezish mumkin, jumladan, “*i*” unlisini quyidagicha izohlaydi:

- yopiq bo‘g‘inlarda undan oldin va so‘ng ochiq bo‘g‘in bo‘lmasa, u “juda tor” (til uchi) tovushini ifoda qiladi. Unga misol keltirmaydi, balki “o‘rnaklarni yig‘ishda” qo‘llaganini aytadi, xolos. Buni shunday tushunish mumkin: *oldim, birdek* kabi so‘zlardagi *-dim, bir-* bo‘g‘inlarida juda tor daraja i unlisi qo‘llanadi;

- ochiq bo‘g‘inda va undan oldin va so‘ng yopiq bo‘g‘in kelsa, u kengroq daraja bo‘ladi, ya’ni, go‘yo, bu qoidasi *kichik, keldi* kabi so‘zlardagi *ki-, -di* bo‘g‘inlaridagi *i* unlisi “kengrak” darajadir. Uni o‘rta daraja deb tushunish mumkin;

- agar ochiq bo‘g‘in so‘zning oxirida bo‘lsa, uch daraja ochiqlik (ya’ni keng) bo‘ladi. Bu izohni davom ettirib, bunda *“i”* unlisining *“e”*ga moyil talaffuz qilinishini aytadi va *“ye”*ga yaqin tovush deb biladi. Ehtimol, u *eski, yangi* so‘zlaridagi *-ki, -ngi* kabi bo‘g‘inlarni ko‘zda tutgan bo‘lsa kerak. Ko‘rinadiki, bu o‘rinlarda og‘izning ochilish darajasi emas, balki unlilarning qisqa va cho‘ziq talaffuzi to‘g‘risida gap bormoqda. Shunda ham bu aytilganlar misollar bilan mustahkamlanishi lozim edi. Haqiqatan ham, o‘zbek shevalarida *“i”* unlisining cho‘ziq talaffuz etiladigan o‘rinlari bor. Professor K.Yudaxin Qorabuloq shevasida tushum kelishigi va o‘tgan zamon aniq fe’lidagi *“i”* unlisining cho‘ziq talaffuz qilinganligini e’tiborga olib, matn transkripsiyasini bergan [2;21], lekin G‘ozi Olim bu haqda emas, balki unlilarning uch daraja ochiqligi to‘g‘risida fikr yuritmoqda. Bunday fikr yuritish fonetik nazariyalarga mos kelmaydi, boshqacha ayiganda, barcha unlilarda ham og‘izning ochilishiga qarab uch darajani belgilash mumkin emas, balki unlilar og‘izning ochilish darajasiga ko‘ra tasnif qilinadi. U tor unlilardagi uch darajaga amal qilishning ahamiyatiga ham to‘xtalgan va bu borada shunday deydi: “O‘zbek tor unlilarning bunday uch daraja ochiqlik bilan ochilish qonunini bilmagan kishilar, ya’ni o‘zbek tilini o‘rganuvchilar talaffuzda juda *faxish* xatolar qilib, eshituvchi o‘zbekning lisoniy zavqini buzib, o‘z gapining ta’siriga zarba berishga yo‘l ochadi [4;6]”. Shu o‘rinda G‘ozi Olim izohlarida bir ishora haqida to‘xtalishni lozim topamiz. Bu ham bo‘lsa, ochiqlik darajasini belgilashda 9˚, 9>, <9, <9˚raqamlaridan foydalanganki, uni qanday maqsadlarda qo‘llaganliklarini bilish imkoni bo‘lmadi. Demak, bu uch darajaning faqat tor unlilarda mavjud bo‘lgan deb biladi.

G‘ozi Olim o‘zbek shevalarini tasnif qilishdan oldin keltirilgan misollar (o‘rnaklar) uchun transkripsiya belgilaridan foydalanish imkoniyatlarini yoritish chog‘ida o‘zbek shevalaridagi unli va undosh tovushlarning (ularni *fonem* deb ham yuritadi) artikulyatsiya va akustik xususiyatlari (talaffuz va eshitilish) to‘g‘risida ma’lumot beradi. Shuningdek, G‘ozi Olim *harf* va *tovush* terminlarini sinonim sifatida ishlatadi, bunday fikr yuritish ham davr an’anasi bilan bog‘liqdir, 1919 yilda “Chig‘atoy gurungi” tomonidan e’lon qilingan “Bitim yo‘llari” asarida *harf* termini ayni o‘rinda *tovush* ma’nosida qo‘llangan edi [6;13]. Demak, G‘ozi Olim an’ana doirasida bu terminni qo‘llagan.

Unlilar tavsifi. G‘ozi Olim davr an’anasiga tayangan holda unlilarni *bosit va murakkab unli*ga ajratadi. Bu terminlarning tabiati to‘g‘risida fikr bildirmaydi, balki o‘sha davr an’anasi sifatida qo‘llay beradi. Aslida *bosit* (*bəsit* tarzida berilgan) termini sodda unlilarni bildirgan, *murakkab* termini esa diftongni va *uv, iy* harfiy birikmalarni anglatgan. Bu unlilar tavsifini “O‘zbek shevalari tasnifida bir tajriba” va 1927-yilda e’lon qilgan “O‘zbek tilining tovushlari” maqolasidagi dastlabki fikrlari bilan qiyosan o‘rganamiz [3; 49-55]. To‘g‘ri, G‘ozi Olim “Tasnif”da 1927-yil “Maorif va o‘qitg‘uvchi” jurnalida e’lon qilingan tasnifidan voz kechadi, bundan shu maqoladagi unlilar to‘g‘risidagi fikridan ham voz kechgan, degan xulosa chiqmaydi.

Bosit unlilar tavsifi. **“i”** – bu harfni tor, til oldidan chiqadigan, g‘oyat qisqa aytiladigan tovush uchun oldim, deydi [4;5]. Avvalgi maqolasida uning “qisqa va ingichka kasra ekanligi eslatiladi, xolos. G‘ozi Olim bu tovushning barcha shevalarda uch daraja ochilishga ega ekanligini ham ta’kidlaydi.

“u” unlisi. Bu grafema bilan lablangan *i* unlisini ifoda qilamiz, deydi [4;6]. Bu yanglish fikr yuritish bo‘lib, *i* unlisi hech qachon lablangan bo‘la olmaydi, qolaversa**,** *i* unlisi uchun nima sababdan *u* unlisini olishi kerak, degan savolga javob bera olmaydi. Bu harfdan maqolada old qator, hozirgi lotin alifbosiga asoslangan transkripsiyada *ü* grafemasi bilan berilayotgan tovushni ifoda qilgan edi [1;15]. Uningcha, birinchi darajali ochiq bo‘lsa, eng tor lablangan til uchi unlisini, ikkinchi darajali (o‘rtada kelgan) unlini, uchinchi darajali ochiqlikda oxirgi bo‘g‘inda kelsa, lablangan *e* unlisiga yaqin 9 daraja tovushni ifoda qiladi. Bizningcha, bunday fikr yuritish hozirgi zamon fonetikachilarida uchramaydi. Bu o‘rinda uning old qator (*u – ü* oppozitsiyasidagi) unli ekanligi e’tirof etishi kifoya edi, balki lozim topilsa, nutq jarayonidagi tovush mosligi nuqtai nazardan ta’riflashi lozim edi. Aftidan, tovush mosligi qonunining u davrda hali e’tirof etilmaganligi boshqa unlilarga (*i* va *e*) yaqin degan tushunchani qo‘llashiga asos bo‘lgan.

“u” tovushi. Uni til orqa, tor, lablangan deb ta’riflaydi va barcha shevalarda qo‘llanishini e’tirof etadi. Bu jihatdan to‘g‘ri yo‘l tutadi, lekin bu unlini tor unli deb atagani holda uch daraja ochiqlik (keng) haqida fikr yuritishi mantiqqa zid ekanligini anglash qiyin emas.

- unlisini tavsiflashda “uch turli talaffuzni o‘z ustiga oladi” iborasini ishlatadi va uning quyidagi xususiyatlarini ko‘rsatadi:

bu unli, uningcha, yopiq bo‘g‘inda kelsa va bu yopiq bo‘g‘indan ilgari va so‘ng ochiq bo‘g‘in bo‘lmasa, bu tovush eng tor, qisqa, lablanmagan til orqasi *ы* unlisini ifoda qiladi [4;5]. Bu tavsifni shunday tasavvur qilish mumkin, ya’ni, go‘yo bu unli *aqtim* (yopiq bo‘g‘indan oldin ochiq bo‘g‘in kelmagan), *qilg‘an* (yopiq bo‘g‘indan keyin ochiq bo‘g‘in kelmagan) so‘zlarida qo‘llangan. Albatta, yopiq bo‘g‘indan oldin va keyin ochiq bo‘g‘inning kelmasligi *ї* unlisining tabiatini ochib bera olmas edi, balki til orqa qisqa *ї* unlisining qo‘llanishi singarmonizmli shevalarning fonetik xususiyati hisoblanadi;

- unlisini “so‘z boshida yoki so‘z o‘rtasida ochiq bo‘g‘inda kelsa, ikkinchi daraja ochiqliq bilan ’ tovushini bildiradi” [4;6] deb izohlaydi. unlisining ’ unlisiga o‘tishi, uning ikkinchi daraja ochiqligi to‘g‘risidagi fikr asossiz edi;

bu unli so‘zning oxiridagi ochiq bo‘g‘inda kelsa, uchinchi darajada kengayib (<9) tovushini ifoa qiladi [4;6], deb tushuntiradiki, fikr nima haqda borayotganligini anglash qiyin bo‘ldi, chunki (<9) belgisi nimani anglatishi bizga ma’lum emas edi.

maqolada unlisini “butun o‘zbek shevalarida mushtarak bo‘lub, faqat qalin so‘zlardagina kelaturg‘on qisqa va qalin kasradur” deydi va unga *qïlïq, qïr* so‘zlarini misol qilib keltiradi. Bu o‘rinda G‘ozi Olim *i* unlisining barcha shevalarda qo‘llanishi to‘g‘risida fikr yuritmoqdaki, uni ikki xil talqin qilish mumkin: 1) 1929-yildagi Til va imlo konferensiyasidan keyin o‘zbek adabiy tili uchun singarmonizmli shevalar asos qilib olinishi bilan shahar shevalari vakillari ham o‘z nutqlarida bu unlini qo‘llashga harakat qilganlar. Bu esa uning “butun o‘zbek shevalarida” degan iborani ishlatishga asos bo‘lgan; 2) G‘ozi Olim shahar shevalarida indifferent *i* unlisi (*i+ï = i*) mavjud bo‘lganligini bilmagan. G‘ozi Olimning: “O‘zbekcha so‘zlashguchi tojiklar forsiy tilida () qisqa, qalin kasra bo‘lmag‘anlig‘idan qalin so‘zlarda ham bu qisqa va ingichka kasrani ishlatadilar” [6;51] degan gapida G‘ozi Olim garchi o‘zi bu haqda fikr yuritmasa-da, N.Yangiboeva bu o‘rinda indifferent tovush haqida so‘z borishi lozimligini to‘g‘ri ilg‘ay olgan [1;25]. Ma’lumki, shahar shevalarida rus grafikasi asosidagi o‘zbekcha transkripsiyada ’ lotindagi *i* harfi bilan ifoda qilinadigan indifferent tovush bo‘lgan.

“e” harfi (tovushi). Bu unliga hozirgi tushunchalar darajasida ta’rif bera olgan, ya’ni uning o‘rta keng, old qator ekanligi aytiladi, lekin uni lablangan deb yuritadi [4;7]. Maqolada bu unlining lablanganligi to‘g‘risida fikr yuritilmagan. N.Yangiboeva G‘ozi Olimning yuqorida aytganimizdek, tovush mosligi qonunini tushunib yetmaganlikda ayblashi o‘rinlidir. Avvalgi maqolasidan farq qilgan holda bu ishida Farg‘ona qipchoqlari Qo‘rg‘ontepa va Oyimda yashovchi qipchoqlar nutqida birinchi bo‘g‘indan keyingi bo‘g‘inlarda *e* o‘qimasdan Σ o‘qish kerakligini uqtiradi. Bunda Σ belgisining qanday tovushni ifoda qilishini tavsiflamaydi, faqat bu belgining *ye* unlisidan kengroq ekanligini eslatib o‘tadi.

“ɵ” harfi (tovushi). Bu belgidan lablangan tovush uchun emas, balki Σ belgisining lablangani uchun ishlatganini aytadi. Maqolada bu unliga to‘g‘ri baho bergan edi. U mazkur ishida bu unli shevalarda so‘z boshida tor *u* (trans. *u*) tovushidan boshlab, so‘ngra birdan kengayib, ko‘p shevalarimizda holiga keladi, degan fikrni aytadi. Uning bu fikridan belgisi diftong(murakkab)ni ifoda qiladi. Bu belgi haqida ham ma’lumot bermaydi va u qatnashgan o‘rinlardan ham misollar keltirilmaydi. Uningcha, bu unlini Farg‘ona qipchoq shevalarida birinchi bo‘g‘inda diftong, keyingi bo‘g‘inlarda bosit qilib o‘qish kerak. Bu fikrda muayyan darajada haqiqat bor, faqat birinchi bo‘g‘in tushunchasini so‘z boshida deb tushunish lozim. *ɵ* unlisi singarmonizmli shevalarda so‘z boshida diftonglashishi adabiyotlarda aytilib kelinmoqda [5;41]. Yana bir masala. G‘ozi Olim labial singarmonizm to‘g‘risida fikr yuritmaydi, balki undan chekingan holatni boshqacha yo‘l bilan tushuntiradi: “...so‘nggi bo‘g‘inda (avvalgi bo‘g‘inda *ɵ* kelganda), (*i*) o‘qilishi lozimligini ko‘rsatadi. Shuningdek, *ɵ* () unlisini yana so‘z oxirida kelsa, *e* o‘qilishi kerakligini uqtiradi va “yoki” variantini ham beradi: *æ//ə* yoki *e***.** Bunday izohlashni o‘z davri xususiyati deb ham qarash mumkin, lekin o‘z davrining til bilimi shaxslari uning qanchalik ilmiy fikr ekanligini tasavvur qilishlari bizga qorong‘i bo‘lib qoladi.

“ə” unlisi. Uning old qator, keng, lablanmagan ekanligini aytadi va uni *æ* tovushi uchun ishlatganini aytadi. Aslida G‘ozi Olim *æ* va *ə* unlilarini farqlagan. Uningcha, qipchoq shevalarida *ə* unlisi birinchi bo‘g‘indan keyin kelgan bo‘g‘inlarda *æ* tovushidan torroq, *e* tovushidan kengroq, biroq *e* tovushiga moyil o‘qiladi. Bunday talqin hozirgi qarashlarga to‘liq mos keladi. *æ* unlisi to‘g‘risida Ye.D.Polivanov dastlabki maqolalarida yoritgan edi [7]. Bu tovush uchun hozirgi adabiyotlarda transkripsiyada *ϵ* grafemasi olingan va bu unli Namangan shevasida qo‘llanib kelayotir. O‘g‘uz shevalarida (uningcha, Xiva-Urganch) *ə* unlisi *e* unlisidan keng, “ə”dan tor bo‘lgan Σ tovushi barcha bo‘g‘inlarda kelib, æ tovushiga moyil aytilishini ta’kidlagan [4;7].

Qarluq shevalarida (uningcha, turk-barlos) *ə* harfi so‘z boshida æ tovushini ifoda qiladi va ikkinchi bo‘g‘inlarda undan torroq Σ tovushini ifoda qiladi, deb tushuntiradi [4;7].

Qipchoq, o‘g‘uz, qarluq shevlarida bu unlilarning qo‘llanishi bo‘yicha misollar keltirilmagan.

“**o” unlisi (harfi).** Uni til orqa, o‘rta kenglikda bo‘lgan, lablangan tovush ekanligi to‘g‘ri ko‘rsatilgan. Toshkent shevasida bu unlining indifferent ekanligi, ya’ni *o* va *ɵ* o‘rtasida talaffuz qilinishi to‘g‘risida fikr yuritadiki, bu hozirgi tushunchalarga mos keladi. Yana uni Toshkent shevasida *maxraj* jihatdan tovush o‘rta (mixed) vaziyatda bo‘lishi haqida fikr yuritadi. Bu fikrning shu o‘rindagi ahamiyatiga to‘xtalish lozim deb hisoblaymiz, ya’ni til o‘rta deb yuritishi takrorni bildiradi, lekin mixed (aralash) deb ko‘rsatishi qaysi masalani hal qilish uchun zarur bo‘lganligini anglash qiyin bo‘ldi.

Bu unlining qipchoq lahjasi shevalarida qo‘llanishi to‘g‘risida bildirgan fikrlarida imiylikdan yiroqlashadigan o‘rinlar ham bor. Dastlab so‘z boshida diftonglashishi to‘g‘risida fikr yuritadi, bu hozirgi adabiyotlarda ham qayd qilinadi. Lekin uning birinchi bo‘g‘indan keyingi bo‘g‘inlarda *ɔ* unlisiga aylanadi va uning (ɔ) ko‘p shevalarda *u* unlisiga aylanishi asossiz qolgan va uni munozara uchun ham qabul qilish qiyin.

“a” unlisi (uning faqat yozma variantini qo‘llaydi). Til orqa, keng, lablanmagan tovushligi aytilgan. Bu harf bilan bizning tushunchamizdagi *ā (ɔ)* unlisini ifoda qilgan. Afsuski, unga Toshkent va Xiva shevalaridan (matnda *tillari*) *alma* so‘zini misol sifatida keltirishi munozaraga sabab bo‘ladi, chunki Toshken shevasida bu so‘z *ālmä*, Xiva shevasida *alma*

tarzida talaffuz qilinadi. Demak, bu borada nazariy xatoga yo‘l qo‘ygan. Bu unlining Toshkent shevasida mustaqil fonema bo‘lganligini ta’kidlaydi-da, yana barcha shevalarda mavjud deb hisoblaydi. Albatta, bu o‘rinda fikr uyg‘unligi buzilgan. Bu unli uchun maqolada *ɔ* grafemasi tanlangan edi.

“a” unlisi. Uni bosma harf deb yuritadi. Bunday atalishi yuqorida *a* unlisidan alohida tovush uchun foydalanganligi sabab bo‘lgan. Bu unlining umumturkiy *a* unlisi deb tushungani to‘g‘ri, lekin bu unlini hech bir shevada mustaqil fonema emas, deyishi haqiqatdan yiroq, balki bu unli barcha singarmonizmli shevalarimizda qo‘llanayotganligi adabiyotlarda aks etib kelmoqda. G‘ozi Olim bu unli masalasida ayrim real va noreal ma’lumotlarni ham beradi. Bu unlining Toshkent shevasida *qanaqa, sadaqa* co‘zlarining hamma bo‘g‘inlarida qo‘llanishini payqay olgan. Bu to‘g‘ri, lekin uni faqat Toshkent shevasi bilangina bog‘lab qo‘yishi durust emas, chunki bu unli singarmonizmni yo‘qotgan shevalarimizda ham *q, g‘* ba’zan *x* undoshli so‘zlarda fonetik variatsiya sifatida qo‘llanishda bor. Bu unli bo‘yicha yana bir masala borki, unda *a* unlisi undoshlar (unda *unsiz*) orasida kelsa, u lablanib, teskari *ɒ* holiga keladi va barcha shevalarda qo‘llanadi, degan ma’lumotni beradi. Bu fikr faktik misollar orqali isbotlanmagan va keyingi dialektologik tadqiqotlarda ham bunday fikrlar uchramaydi. G‘ozi Olim bu asarida murakkab unlilar deb atalgan *–uv, uv (-üv), -iu, u* tovush birikmalariga to‘xtalmaydi, ular to‘g‘risida maqolada batafsil to‘xtalgan.

Xulosa qilib aytadigan bo‘lsak, o‘zbek shevalari vokalizmi xususida berilgan tavsiflarda chalkashliklar, noaniqliklar bo‘lishiga qaramay, XX asr boshlaridagi o‘zbek shevalarining fonetik-fonologik tizimini o‘rganish, tavsiflash va tasniflash masalalarini yoritishda G‘ozi Olim yaratgan yuqoridagi kabi tadqiqotlarning o‘z o‘rni bor. Adibning bu qarashlari yana maxsus o‘rganilishi lozim bo‘ladi.

PODCASTLARNING VODCASTLASHUV FENOMENI: TIPOLOGIK QIYOSIY TAHLIL

Nesibeli Mambetirzayeva
QQDU Mass-media va ommaviy kommunikatsiyalar kafedrasi assistenti
ORCID: https://orcid.org/0009-0001-5122-6929

Annotatsiya: *Ushbu maqolada O‘zbekiston va Qoraqalpog‘iston raqamli media makonida audio podcastlarning videoformatga transformatsiyalashuvi (vodcastlashuvi) omillari va bu jarayonning zamonaviy jurnalistik mahsulot sifatiga ko‘rsatayotgan ta’siri tizimli ravishda tahlil qilingan. Tadqiqotda “audiopodcast” va “videopodcast” tushunchalarining nazariy-konseptual farqlari ochib berilib, vizual effektlarning audiokontent mazmuniga hamda auditoriyaning qabul qilishiga ta’siri baholangan. Podcastlarning tematik tasnifi asosida vodcastlashuv fenomeni milliy va xorijiy media tajribasi misolida, qiyosiy-tahliliy metodlar yordamida har tomonlama o‘rganilgan.*

Kalit so‘zlar: *Podcast, Vodcastlashuv fenomeni (Vodcasting), media transformatsiya, vizuallashtirish, podcast tematikasi.*

ФЕНОМЕН ВОДКАСТИНГА В ПОДКАСТАХ: ТИПОЛОГИЧЕСКИЙ СРАВНИТЕЛЬНЫЙ АНАЛИЗ

Аннотация: *В данной статье систематически анализируются факторы трансформации аудиоподкастов в видеоформат (водкастинга) в цифровом медиапространстве Узбекистана и Каракалпакстана и влияние этого процесса на качество современного журналистского продукта. В исследовании раскрываются теоретико-концептуальные различия понятий "аудиоподкаст" и "видеоподкаст," а также оценивается влияние визуальных эффектов на содержание аудиоконтента и его восприятие аудиторией. На основе тематической классификации подкастов феномен водкастинга всесторонне изучается на примере опыта отечественных и зарубежных медиа с использованием сравнительно-аналитических методов.*

Ключевые слова: *Подкаст, феномен водкастинга (Vodcasting), медиатрансформация, визуализация, тематика подкастов.*

THE PHENOMENON OF VODCASTING IN PODCASTS: A TYPOLOGICAL COMPARATIVE ANALYSIS

Abstract: *This article systematically analyzes the factors driving the transformation of audio podcasts into a video format (vodcasting) within Uzbekistan’s digital media space, as well as the impact of this process on the quality of contemporary journalistic products. The study explores the theoretical and conceptual distinctions between "audio podcasts" and "video podcasts" and assesses the influence of visual elements on audio content and its perception by the audience. Based on a thematic classification of podcasts, the vodcasting phenomenon is comprehensively examined through the experience of domestic and foreign media, utilizing comparative and analytical methods.*

Keywords: *Podcast, vodcasting phenomenon, media transformation, visualization, podcast topics.*

Kirish. Jahon tajribasida podcastlar mobil va markazlashmagan (RSS-feed asosidagi) audio format sifatida qaraladi. G‘arbda podcast ko‘proq “audio-first” (avvalo audio) madaniyati bo‘lsa, Markaziy Osiyo, shu jumladan, O‘zbekiston va Qoraqalpog‘istonda podcast YouTube platformasi ta’sirida “vodcast” (Video On Demand Podcast), ya’ni video-podcast shaklida rivojlanmoqda. Bu tendensiya audio kontentning asosiy funksiyasi – “fonda tinglash” imkoniyatini ikkinchi planga surib qo‘ymoqda hamda YouTube-shoular, video-intervyular va bloglar bilan sinonim tarzli kontentni yuzaga keltirdi. Bu esa audio kontentning mustaqil media mahsuloti sifatida shakllanmayotganini, auditoriyaning vizual effektlarga bog‘lanib qolganini, texnik va platformaviy cheklanganlik mavjudligini (masalan, Spotify yoki Apple Podcasts o‘rniga faqat YouTube’ga qaramlik) ko‘rsatadi. Aslida, podcastning ko‘proq audio format sifatida o‘z o‘rniga ega bo‘lishi muhim. Sababi, katta hajmli ma’lumotlar va doimiy vizual agressiya asrida “ko‘zdan yiroq bo‘lish” va “ko‘p vazifalilik” (multitasking) imkoniyatlariga ega bo‘lgan audio-kontent inson diqqatini jamlash hamda axborotni qabul qilishning eng “ekologik” usuli sanaladi. Shunga qaramay, O‘zbekiston va Qoraqalpog‘iston media muhitida podcastning rivojlanishi klassik g‘arb modelidan (audio-only) o‘zgacha tarzda shakllanmoqda va podcastlarning video formatda ishlab chiqilishi –

bu auditoriyaning matn va audioga nisbatan vizual obrazlarni qabul qilishga moyilligi hamda ijodkorlarning monetizatsiya maqsadida YouTube'ga bog'lanib qolganligi natijasidir.

Metodologiya: O'zbek va qoraqalpoq jurnalistikasida podcast hali to'liq ilmiy tadqiq etilmagan, maxsus tasniflanmagan. Mavjud tadqiqotlarda podcast onlayn-jurnalistikaning bir qismi sifatida qaraladi, biroq audio va video dixotomiyasi (ajralishi) maxsus o'rganilmagan. Shu sababli, eng avvalo, O'zbekiston va Qoraqalpog'istondagi podcastlarning video-formatga transformatsiyalashuvi qonuniyatlarini aniqlash hamda buning natijasida yuzaga kelayotgan jurnalistik mahsulot sifatiga ta'sirini baholash muhim. "Audio podcast" va "Video podcast" tushunchalarining chegaralarini ilmiy asoslash, mahalliy podcastlarning auditoriyaga ta'sir mexanizmlarini qiyosiy o'rganish, vizual effektlarning audio-kontent mazmuniga ta'sirini ochib berish zarur. Biz podcast kontentining tematik tasnifi asosida vodcastlashuv fenomenini ko'rib chiqamiz.

Podcastlarning mavzu doirasi an'anaviy OAVga qaraganda ancha keng va tarmoqlangan xarakterga ega bo'lib, "umumiylikdan xususiylikka" tamoyili asosida rivojlanmoqda. Shu bois jahon media maydonidagi eng asosiy mavzularni tanlab olib, mahalliy podcastlar bilan qiyosiy tahlil qilamiz.

Natijalar: Ijtimoiy-siyosiy va tahliliy yo'nalishdagi podcastlar:

Zamonaviy jurnalistikada "Daily News" (Kundalik yangiliklar) podcastlari tez ommalashmoqda. Bu yerda asosiy farq shundaki, jurnalist nafaqat yangilikni yetkazadi, balki voqeaning "parda orti"dagi jihatlarini ham ochib ko'rsatadi. Masalan, The New York Times nashrining "The Daily" podcasti kunning dolzarb bir mavzusini tanlab olib, uni 20-30 daqiqa davomida ekspertlar ishtirokida muhokama qiladi.

Tahlil qilib ko'rsak, bu podcast turi sharhlov jurnalistikasiga yaqin keladi. Yuz bergan voqea-hodisani tushuntirish, anglatish, nimalar sabab bo'lganini, oqibatini, nimalarga ahamiyat berish kerakligini ko'rsatib beradi. Podcast texnik jihatdan audio va video formatda taqdim etilsa-da, uning turlari an'anaviy jurnalistikada mavjud bo'lgan ko'plab janrlarning transformatsiyalashuvi natijasida yuzaga kelganligi ko'rinadi.

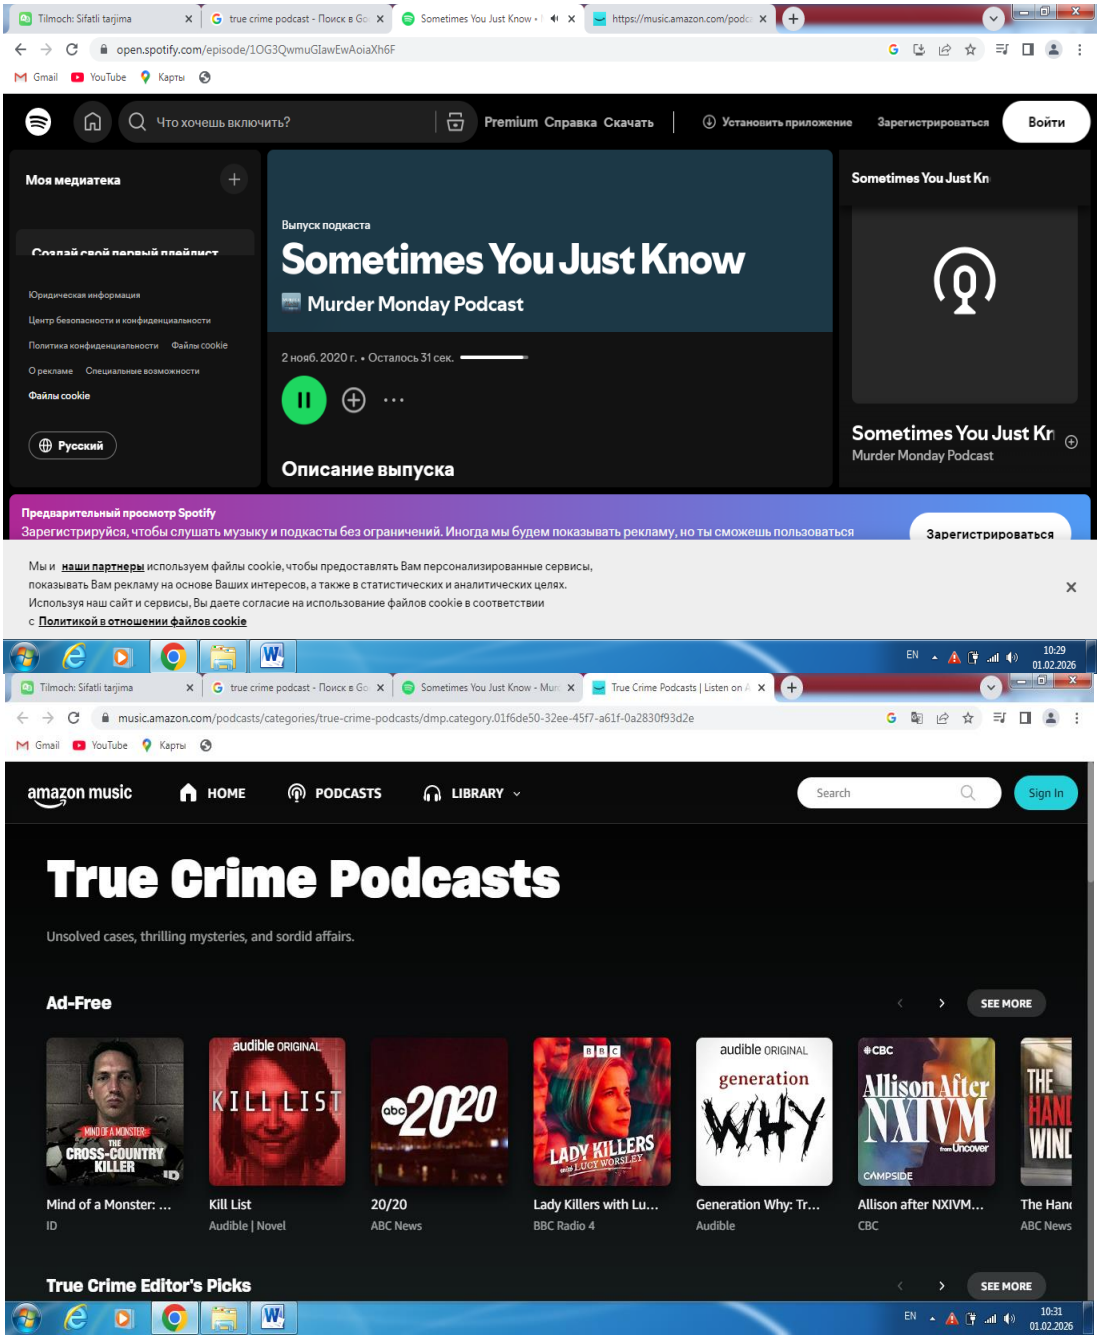
Ilmiy tadqiqot ishlarida ham The Daily podcastlari «Times» jurnalistlari bilan bo'lgan suhbatlarga asoslangani aytilgan.[1] Suhbatlarda jurnalistlar o'zlari yoritgan voqeani umumlashtiradi va sharhlaydi. Shu bilan birga, podcast mavzuga oid audioyozuvlar yoki voqea ishtirokchilari bilan o'tkazilgan intervyular kabi original reportajlar bilan to'ldiriladi va ularga o'z fikrini bo'linmasdan aytish imkoniyati yaratiladi.

O'zbekistonda Kun.uz sayti ushbu tajribadan samarali foydalanib kelmoqda. Mamlakatimizda va jahonda yuz bergan muhim voqealar bo'yicha intervyular, kengaytirilgan ekspertlar bilan suhbatlar tashkillashtiriladi. Bu podcast formatiga juda yaqin. Sababi, Telegram kanaliga reklama sifatida qisqa video qo'yiladi, asosiy suhbatni esa YouTube'dan ko'rish imkoniyati yaratilgan. Biroq kontent video formatda bo'lib, podcast deb nomlanmagan. Agar u podcast deb ko'rsatilsa, ayrim materiallar formatga to'g'ri kelmay qolishi mumkin. Masalan, YouTube platformasi va Telegram kanaliga 2026 yil 7 yanvar kuni joylashtirilgan, boshlovchi Baxtiyor Muhammadov olib borgan «Infobiznesning ildizi – ilmsizlikda» nomli videoni olib ko'raylik. Unda jurnalist mehmon sifatida servis va savdo bo'yicha mutaxassis Alisher Rustamov bilan biznesda konsalting va trening xizmatlari to'g'risida fikrlashadi. Bu suhbat Telegram kanalida ikki formatda taqdim etilgan: xohlasangiz, matn orqali maqolani o'qishingiz, xohlasangiz, video bilan tanishishingiz mumkin. Suhbat 25 daqiqa davom etadi. Bu kontentning formati konvergent: matn, video va audio aralash. E'tiborlisi, videoni tomosha qilmay, shunchaki eshitib ham kerakli ma'lumotni to'liq olish mumkin. Shu bois, bu materialni video ko'rinishidagi podcast - vodcast deb qarash mumkin.

2026 yil 5 yanvar kuni esa siyosatshunos Farhod Tolipov, jamiyatshunos Mahmud Yo‘ldoshev, migratsiya masalalari bo‘yicha ekspert Botir Shermuhammad bilan jurnalist Shohrux Majidzoda o‘sha kunning dolzarb mavzusi - «Vaziyat yaxshilanishiga ishonish – fantastika»: faollar Xabarovskda o‘lgan migrant voqeasi haqida» mavzusida suhbatlashadi. Bu yerda videoni tomosha qilish zarurati bor. Voqea qanday yuz berganini ko‘rsatuvchi kadrlar qo‘yib berilgani uchun bu podcast ham, vodcast ham emas, balki videokontentdir. Shuning uchun ham kun.uz o‘z materiallariga podcast deb nom qo‘ymaydi.

Shuningdek, siyosatshunos Kamoliddin Rabbimov olib boradigan «Rabbimov fikri» ruknida doimiy ravishda siyosiy voqealarga sharh beriladi, ular chuqur tahlil qilinadi. Yoki saytning «Kun tafsiloti», «Jahon yangiliklari» kabi kundalik axborotnomalari ham podcast formatiga yaqin. Biroq, bularga aynan podcast deb nom qo‘yilmaganining sababi, birinchidan, o‘zbek va qoraqalpoq jurnalistikasida hanuzgacha podcastga norasmiy kontent sifatida qaraladi. Ikkinchidan, aniq mezonlarni bilmaslik sababli umumiy tarzda videokontent deb qo‘yishni ma’qul ko‘rishadi. Uchinchidan, yuqorida eslatib o‘tganimizdek, podcast deb nom berilsa, ayrim imkoniyatlar cheklanadi: kontentlar faqat fon rejimida eshitishga mo‘ljallanmagan, tinglovchi tomosha qilishga ham majbur bo‘ladigan o‘rinlar ko‘plab uchraydi.

Siyosiy-ijtimoiy tahlil yo‘nalishida katta auditoriya to‘plagan «Lolazor» va «Gazeta.uz» podcastlari ham bor. «Lolazor» podcasti turli soha vakillari bilan davlat boshqaruvi, qonunchilikdagi o‘zgarishlar, korrupsiyaga qarshi kurash va so‘z erkinligi kabi dolzarb rasmiy mavzulardagi suhbatlarni o‘zida jamlagan. Podcastni bir necha boshlovchi olib boradi. Bu ikki podcast an’anaviy OAVdagi «rasmiychilik»dan qochib, voqealarni tizimli va tanqidiy nuqtayi nazardan tahlil qilish orqali jamoatchilik nazorati funksiyasini bajarmoqda. Ayniqsa, «Lolazor» podcastida jurnalistlar va ekspertlar guruhi voqealarni shunchaki bayon qilibgina qolmay, ularning sabab va oqibatlarini ham batafsil yoritadi. Bu o‘rinda «agenda-setting» (kun tartibini belgilash) jurnalistlardan podcast mualliflariga o‘tayotgani seziladi. Podcastda muhokama qilingan mavzuning bir necha soat ichida boshqa elektron OAV va ijtimoiy tarmoqlar uchun asosiy mavzuga aylanishi uning jamiyatdagi ta’sir kuchini ko‘rsatadi.



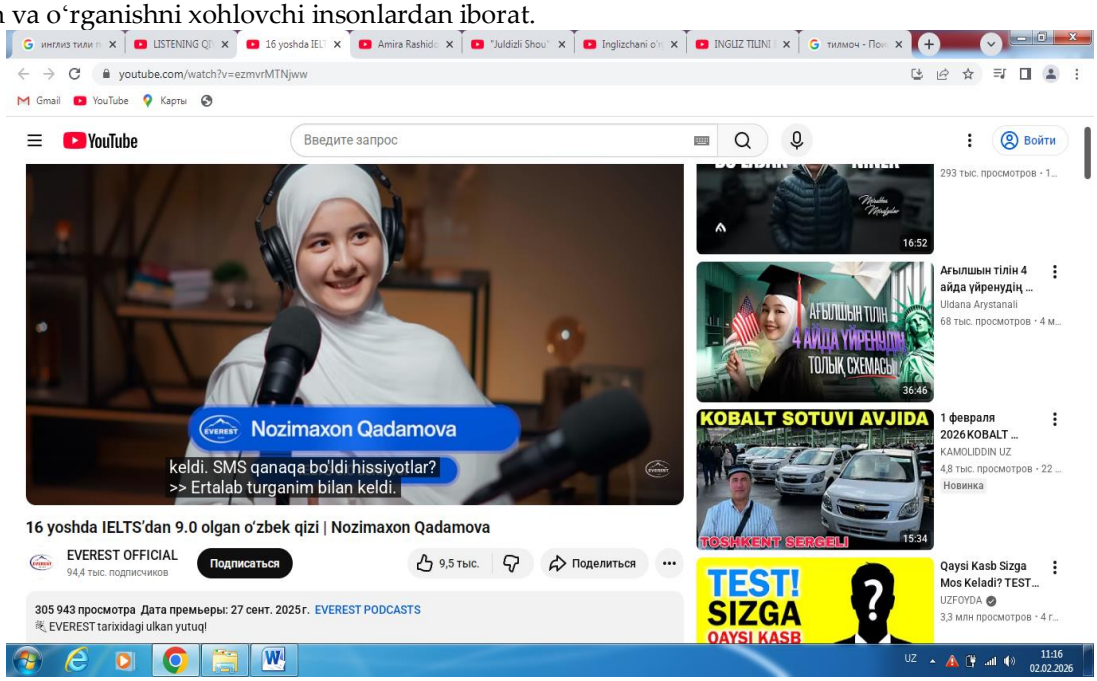
Internetning o‘zbek segmenti kunning dolzarb yangiliklarini, ijtimoiy-siyosiy mavzularni xorijiy tajriba asosida tahlil qilib berishni rasmiy saytlar yoki maxsus loyihalar doirasida podcastlar kontentlari orqali amaliyotga joriy etgan bo‘lsa-da, Qoraqalpog‘istonda bu tajriba hali kuzatilmayapti. Bizda ijtimoiy-siyosiy podcastlar yo‘q. The New York Times, The Guardian, BBC kabi yirik mediaxoldinglar ishlab chiqaradigan kundalik dolzarb yangiliklarni tahlil qiluvchi podkastlarga o‘xshash dasturlarni Qoraqalpog‘istonda ham ommalashtirish muhim. Buning uchun siyosiy savodxonlik darajasi yuqori sharhlovchi, publitsist, turli sohalardan malakali ekspertlar va yetuk podkasterlarga ehtiyoj bor.

Ikkinchi tematik yo‘nalish – surishtiruv jurnalistikasi (True Crime) podcastlaridir. Bu mavzudagi podcast inqilobi 2014-yillardan boshlandi. Jurnalist Sara Kyonigning “Serial” podcasti janrning zamonaviy ko‘rinishini yaratdi. Ushbu podcast chiqqanidan so‘ng, “True Crime” audio-industriyaning asosiy segmentiga aylandi[3].

Jinoyat haqidagi podcastlar nafaqat tinglovchilarni jalb qildi, balki jurnalistikada “interaktiv tergov” va “empatik hikoya qilish” kabi yangi tushunchalarni yuzaga keltirdi. Bunda jurnalist dalillarni bosqichma-bosqich taqdim etish orqali auditoriyani tergov jarayoniga jalb qiladi.

Global statistika va platformalar tahliliga qaraydigan bo‘lsak, Edison Research (2025) ma’lumotlariga ko‘ra, “True Crime” xotin-qizlar auditoriyasi orasida eng ko‘p tinglanadigan birinchi toifadagi janr bo‘lib qolmoqda[4].

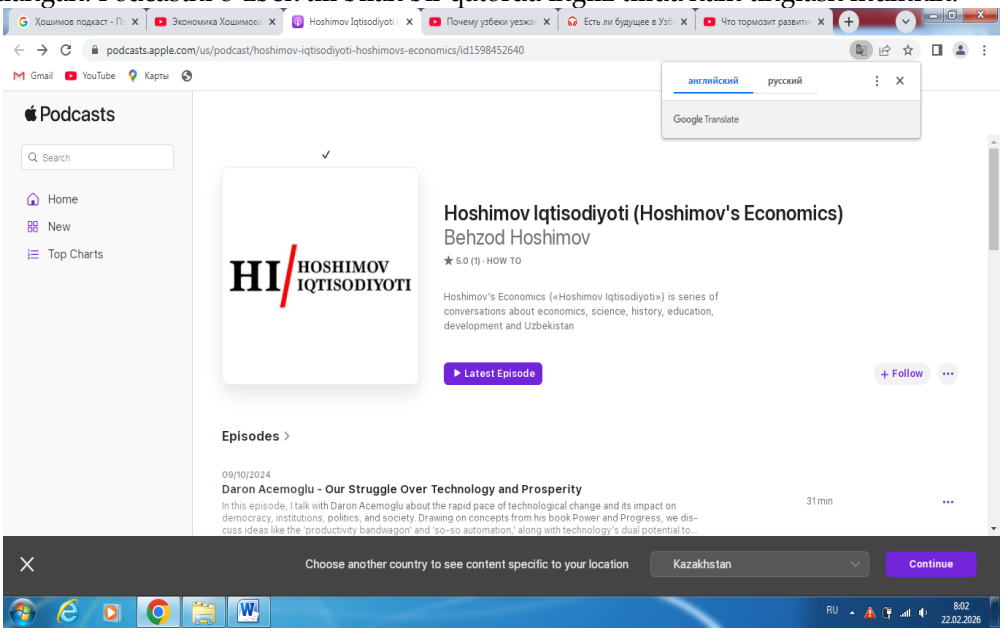
O‘zbekiston va Qoraqalpog‘istonda aynan jinoyat ishlari va uning tafsilotlari to‘g‘risida jurnalistlar boshchiligida o‘tkazilgan surishtiruv natijalariga asoslangan maxsus podcastlar yo‘q, lekin “Milliy TV”da efirga uzatiladigan hamda YouTube platformasiga joylashtiriladigan “O‘tkir tergov” ko‘rsatuvi aktyorlar va tegishli organlar – Ichki ishlar xodimlari, prokurorlar, sudyalar hamda boshlovchi yordamida jinoyat ishlarini keng yoritadi. O‘zbekistonda ko‘proq video formatga murojaat qilinadi. Xorijda esa ko‘proq audio format tanlanadi va bu yaxshi usul. Video ko‘rinish yaratish bosqichida, ya’ni sahnalashtirishda obyektivlik tamoyili buzilishi mumkin. Shuningdek, yuz bergan holatni qayta sahnalashtirish, obyekt tanlash, mehmonlar uchun maxsus studiya, fon kabi qo‘shimcha masalalarga ortiqcha mablag’ va ko‘proq vaqt sarflanadi. Undan ko‘ra, jurnalist surishtiruvi kabi hujjatlarni o‘rganib, tegishli shaxslardan intervyu olib yoki suhbatlashish usullari orqali audio formatda taqdim etgan ma’qul. Jinoyat mavzusida haddan tashqari hissiyotga berilmaslik lozim va detallar qanday ishlatilganini video orqali aniq ko‘rsatish ham shart emas. Quyida xorijiy podcastlarning Spotify, Amazon platformalariga yuklangan ko‘rinishi bilan tanishishingiz mumkin.



2025-yilning haqiqiy jinoyat podcastlari deb tan olingan xorijiy podcastlarni tahlil qilib koʻrganimizda, jinoyat podcastlarining oʻzi bir necha yoʻnalish va mavzuga boʻlinganligini kuzatdik. Jumladan, tergovga oid va hikoya shaklida tayyorlangan "In The Dark", "Serial", "Bear Brook", "Cold" hamda "Your Own Backyard" podcastlari yuqori koʻrsatkichga erishgan. Suhbat koʻrinishidagi "Crime Junkie", "Morbid", "My Favorite Murder", "Last Podcast On The Left" hamda "MrBallen Podcast" kabi podcastlar juda koʻp tinglangan. Hujjatli va yangiliklar koʻrinishidagi podcastlar ("Dateline NBC", "48 Hours", "20/20" va "Scamanda"), ixtisoslashgan yoxud parklardagi jinoyatlarni fosh etuvchi podcastlar ("Criminal", "Sistas Who Kill"), kichik shaharlardagi ochilmagan jinoyatlar ("Small Town Murder", "The Deck"), raqamli firibgarlik yoʻnalishidagi podcastlar ("The Missing Cryptoqueen", "Scamanda") kabi mayda mavzularga boʻlingan. Demak, podcast yirik yoʻnalish sifatida ichki boʻlinishga ega.

Raqamli media fenomeni boʻlgan podcastlarning yana bir muhim jihati shundaki, ular murakkab sohalarni sodda tarzda tushuntira oladi. Podcastlar ixtisoslashgan jurnalistika kabi tor doiradagi yoʻnalishlar, masalan, texnologiya, ta'lim, tarix yoki shaxsiy moliya, psixologiya boʻyicha ham millionlab auditoriya toʻplay oladi. Yangilik yoki muammoli boʻlmagan mavzular ham raqamli makonda oʻz xaridorini aynan podcastlar orqali topmoqda. Shu jihatlarni inobatga olsak, podcast onlayn muhitda ixtisoslashgan jurnalistika vazifasini bajarmoqda. Buni podcastning nishe (tor doiradagi) turlari isbotlaydi. Nishe podcastlar keng jamoatchilik uchun emas, balki ma'lum bir sohaga qiziqadigan ekspertlar va ishqibozlar uchun moʻljallangan kontent boʻlib, oʻsha sohaga yoʻnaltirilgan, tabiati murakkab ilmiy va iqtisodiy tushunchalarni "demokratlashtirish"ga imkoniyat yaratadi. Nishe podcastlar "hamma haqida hamma narsa" emas, balki "muayyan soha

haqida yetuk bilim" tamoyiliga asoslanadi. Bunday podcastning afzalligi monetizatsiya qilish imkoniyatidir: reklama beruvchi uchun 1 million "umumiy" tinglovchidan ko‘ra, 1000 ta aniq "xaridor" afzal.



K. A. Pakulina va L. E. Petrovalarning "Podcast kreativ loyihalarni ilgari surish usuli sifatida: yaratish texnologiyasi" nomli ilmiy maqolasida ta’kidlanganidek, tor yo‘nalishdagi podcastlar ma’lum bir auditoriya uchun tor ixtisoslashgan ma’lumotlarni yetkazishda katta o‘rin tutadi. Ular tinglovchilarga o‘z sohasidagi so‘nggi yangiliklar va tendensiyalardan xabardor bo‘lishga yordam beradi, shuningdek, turli mavzularda suhbatlashish va muhokama qilish uchun imkoniyat yaratadi.

O‘zbekistonda til o‘rganishga oid podcastlar bisyor. Jumladan, “Cambridge podcast”, “Everest podcast” kabi loyihalar til o‘rganish va o‘rgatish bo‘yicha turli yuqori natijalarga erishgan insonlar bilan suhbatlar o‘tkazishga, tajriba almashishga asoslanadi. Formati – video, janri – suhbat. IELTS imtihonidan 8, 8.5, 9 natija ko‘rsatgan bir yoki bir necha instruktorlar bilan yoxud til o‘rganib, katta natijalarga erishgan yoshlar bilan suhbatlar o‘tkaziladi. Auditoriyasi ingliz tilini o‘rganayotgan va o‘rganishni xohlovchi insonlardan iborat.

IT sohasida ham O‘zbekistonda podcastlar yaxshi yuritilmoqda. RealSoft podcasti IT texnologiyalari, ushbu sohadagi ekspertlar, kompaniya egalari, dasturchilar bilan suhbat shaklida olib boriladi.

Biznes sohasida ham yoshlarning iqtisodiy savodxonligini oshirishga qaratilgan podcastlar ishlab chiqarilmoqda. "Hoshimov iqtisodiyoti" podcasti video formatda YouTube’da berib borilishi bilan bir qatorda Apple podcastiga audio formatda ham yuklangan. Podcastni o‘zbek tili bilan bir qatorda ingliz tilida ham tinglash mumkin.

“Hoshimov iqtisodiyoti» podcasti – asosan global iqtisodiy jarayonlar, bozor islohotlari, ta’lim sifati va institutsional o‘zgarishlar haqidagi ma’rifiy suhbatlar to‘plamidan iborat.

Din boʻyicha ulamolar, ustozlarning podcastlari muntazam ravishda turli ijtimoiy tarmoqlar qatorida YouTube'ga ham joylashtirib boriladi. Ular orasida Muhammad Sodiq Muhammad Yusuf, Abdulla domla audio toʻplamlari podcastga yaqin, video epizod deyarli yoʻq, faqat ekranga qandaydir rasm qoʻyiladi. Lekin ularni maxsus audio platformalarga emas, YouTube'ga joylashtirib qoʻyishgan. Chunki bizda YouTube orqali daromad topish, katta auditoriya yigʻish imkoniyati bor. Bu texnik jihatdan cheklanganlik belgisi boʻlsa, ikkinchidan, odamlar hali audio mahsulotni qabul qilish uchun vizual kontentdan zerikmaganini koʻrsatadi.

Vodcast koʻrinishidagi nishaviy podcastlar qatoriga kiruvchi psixologik suhbatlar ham koʻpaymoqda. Lekin YouTube'da koʻpchilik materiallar na podcast, na blog, na video kontent deb atalgan. Bu tasniflash muammosi borligini koʻrsatadi. Biz ularning ayrimlarini podcast degan qarorga keldik. Masalan, Abdulla domla bayonotlari sof podcast formatiga mos. Chunki ularni eshitishning oʻzi kifoya, koʻrish shart emas. Bu yoʻnalishdagi podcastlar "Long-form journalism" (uzun formatli jurnalistika) tamoyiliga asoslanadi. 40-60 daqiqalik suhbatlar tinglovchiga mavzuni toʻliq tushuntirib beradi. «Millat umidi», «Bu podcast», «Gurung» kabi suhbat asosiga qurilgan podcastlar ham sof audiopodcast talablariga javob bersa-da, video formatda tayyorlangan.

Bizda Sangzor.uz sayti alohida podcast boʻlimini yaratgan. Saytdan 50 ga yaqin turli mavzu va janrdagi audio formatli podcastlar oʻrin olgan. Ularning davomiyligi oʻrtacha 20-30 daqiqa atrofida. Maxsus audio platformalarga joylashtirilmaganligi sababli tinglovchilar sonini kam. Agar kelajakda har bir ommaviy axborot vositasi oʻz podcast platformasi yoki boʻlimini yaratadigan boʻlsa, bu masalani koʻrib chiqish zarurligi bor.

Shuningdek, soʻnggi yillarda milliy podcasting tizimida inson huquqlari, gender tengligi, psixologik salomatlik va shaxsiy hayotiy tajriba kabi mavzular alohida oʻrin egallamoqda. Bu yoʻnalishdagi podcastlarning asosiy oʻziga xosligi – "Empatiya effekti" hisoblanadi. Tinglovchi qahramonning hikoyasini tinglash orqali voqeani ichki his-tuygʻulari bilan his qiladi. Bu esa podcastning nafaqat axborot berish, balki ijtimoiy ongni oʻzgartirish funksiyasini ham kuchaytiradi.

Podcastlar hali yaxlit tasnifga ega emas: ayrim tadqiqotchilar podcastlarni mavzusiga koʻra ajratsa, boshqalari shaklini (dialog, monolog, polilog) asos qilib oladi, uchinchilari esa turlarga ajratishda bir necha mezonni aralashtirib yuboradi.

Qoraqalpogʻiston misolida olib qarasak, podcast hali tipologik jihatdan tasniflanadigan darajada rivojlanmadi. Qoraqalpoqcha podcast intervyu formatida rivojlanmoqda va aniq bir yoʻnalishga ega emas. Faqat "Kino podcast"ni nishaviy podcast sifatida olib qarash mumkin. Boshqa podcastlar intervyu formatida boʻlib, mehmon sifatida turli soha mutaxassislari, koʻproq shou-biznes vakillari taklif etiladi va ular bilan shaxsiy hayot, ijod hamda ish faoliyati, toʻplagan tajribalari yuzasidan suhbat oʻtkaziladi. "GÓJE podcast", "Orta Podcast", "Erkin podcast", "Sawbet podcast" "Kúnde Like", "Jolshi Juldiz", "Otaw ishinde" podcastlarining barchasi suhbat shaklida. Ulardan "Kúnde Like", "Jolshi Juldiz", "Erkin podcast", "Sawbet podcast", "Otaw ishinde" podcastlari uslubi an'anaviy ommaviy axborot vositalari koʻrsatuvlari formatiga mos. Boshlovchilar faqat savol berish bilan cheklanadi. Mavzuni birgalikda muhokama qilish, fikrlar toʻqnashuvi uchramaydi. Shuning uchun, kelajakda Qoraqalpogʻiston jurnalistikasi ham xorij jurnalistikasi singari ijtimoiy-siyosiy yoʻnalishdagi muhim yangiliklarni keng tahlil qilishga qaratilgan "The Daily" kabi hamda muayyan auditoriyaga (keksalar, ayollar, yoshlar, bolalar) moʻljallangan, aniq yoʻnalishdagi (IT, diniy, ekologiya, iqtisodiyot, til, psixologiya kabi) yoki hikoya formatidagi podkastlarni ishlab chiqarish kerak. Ikkinchidan, podkast audio yoki video formatda tayyorlanishidan qat'i nazar, uni har qanday ish bilan band holda ham tinglashga moʻljallangan boʻlishi maqsadga muvofiq.

Xulosa o‘rnida aytish mumkinki, milliy podcastlarning mavzu doirasini tahlil qilish O‘zbekiston va Qoraqalpog‘istonda podcastning "muqobil mediamaydon" vazifasini bajarayotganini ko‘rsatadi. U an’anaviy televideniye yoki radioda ko‘tarilishi qiyin bo‘lgan yoki yetarlicha muhokama qilinmaydigan mavzularni diqqat markaziga olib chiqmoqda. Bu esa podcastni axborot yetkazishning oddiy bir shakli emas, balki raqamli demokratiyaning muhim vositasi (fenomeni) sifatida tushunilishiga asos yaratadi.

Maqolada olib borilgan tadqiqotlar shuni ko‘rsatadiki, raqamli mediamuhitda podcastlar axborotdan foydalanish madaniyatini yangi sifat bosqichiga olib chiqdi. An’anaviy OAVga xos bo‘lgan umumiy kontent ishlab chiqarish modeli bugungi kunda auditoriyaning bo‘linishi (fragmentatsiyasi) va raqamli-personallashtirish fenomeni bilan almashmoqda. "Pastdan yuqoriga" (bottom-up) tamoyili asosida rivojlanayotgan ushbu tizim mediamahsulotning formati va kontent tuzilishini tubdan o‘zgartirdi. Iste’molchining erkin tanlov imkoniyati va raqamli bozor qonuniyatlari podcastlar tipologiyasi va tasnifiy xususiyatlarining doimiy ravishda evolyutsion rivojlanib borishini ta’minlaydi.

"NUTQIY HUSHYORLIK" O'ZBEK TILIDA O'RGANILISHI VA TALQINI

Mamatkulov Abdulxapiz Latipovich
Qo'qon universiteti Andijon filiali professori, filologiya fanlar nomzodi
ORCID: https://orcid.org/0009-0000-3629-1020

Annotatsiya: *Ushbu maqola ozbek tilida og'zaki muloqotdagi "nutqiy xushyorlik" masalasiga bag'ishlangan. Bunda asosan nutq odobiga alohida etibor beriladi. "Nutqoy xushyorlik" nutq faoliyatida har qanday kamsitilishlarga yol qoymaslikni, nomaqbul iboralarni qollamaslikni anglatadi*

Kalit so'zlar: *Til, nutq, og'zali muloqot, nutq odobi, nutqiy xushyorlik, muloqot madaniyati, maqollar, hikmatli sozlar.*

«ПОЛИТКОРРЕКТНОСТЬ» И ЕЁ ИЗУЧЕНИЕ И ИНТЕРПРЕТАЦИЯ В УЗБЕКСКОМ ЯЗЫКЕ

Аннотация: *Данная статья посвящена вопросу «политкорректности» в устном общении на узбекском языке. В статье особое внимание уделяется речевому этикету. «Политкорректность» означает недопущение любых форм дискриминации в речевой деятельности и отказ от употребления неуместных и нежелательных выражений.*

Ключевые слова: *язык, речь, устное общение, речевой этикет, речевая бдительность, культура общения, пословицы, мудрые изречения.*

"THE POLITICAL CORRECTNESS": ITS STUDY AND INTERPRETATION IN THE UZBEK LANGUAGE

Abstract: *This article is devoted to the issue of "the political correctness" in oral communication in the Uzbek language. Particular attention is paid to speech etiquette. "The political correctness" refers to the prevention of any form of discrimination in speech activity and the avoidance of inappropriate or undesirable expressions.*

Keywords: *language, speech, oral communication, speech etiquette, speech awareness, communication culture, proverbs, wise sayings.*

Kirish

Til millat ruhi va milliy tafakkur qurolidir. Til-millat-ruhiyat-tafakkur mexanizmi o'ta murakkab va chuqur ilmiy mushohadaga chorlovchi, har bir millat tilida alohida muammo sifatida antik davrlardan to hozirgi kungacha ko'plab tadqiqotlar manbayi sifatida o'rganilib kelinayotgan muhim masalalardan biri sanaladi. Til bu insonning butun borlig'i - moddiy turmushi, madaniy, ma'naviy hayoti, etnik va ruhiy holati, aqlu tafakkuri, estetik olami, o'tmishi, buguni va istiqbolini gavdalantiradi. Darhaqiqat, til millat belgisi sifatida muhim ahamiyatga ega.

O'zbek tilshunosligida ham nutqiy muloqot va uning amalga oshishi bilan bog'liq muammolar yuzasidan bir qator ilmiy tadqiqot ishlari amalga oshirilganligini alohida e'tirof etish mumkin. Jumladan, A. Nurmonov, A. E Mamatov, Sh. Safarov, N. Mahmudov, Sh.Iskandarova , S. Mo'minov, D. Xudoyberganova M.Hakimov, M. Saidxonov, F. Karimova, M.Qurbonova, A. L.Mamatqulov, G.Toirova, X. Yo'ldosheva, Q. Kaxarov, B. Ahmedov, M. Burxonova, G. Hasanova kabi olimlarning ilmiy tadqiqotlari shular jumlasidandir.

Dunyo tilshunosligining ustuvor paradigmasi sanalgan tilga antropotsentrik yondashuvning tatbiq etilishi til sohasida yangidan yangi tadqiqot yo'nalishlarining maydonga kelishiga keng yo'l ochdi. Natijada, til ilmi uning yaratuvchisi bo'lgan shaxs omiliga bog'liq holda tadqiq etish bosqichiga ko'tarildi, desak, mubolag'a qilmagan bo'lamiz. Xususan, bugungi o'zbek tilshunosligida ham mazkur paradigma ustuvorlik kasb etmoqda va bu yo'nalishda o'zbek tilshunos olimlari tomonidan muhim ilmiy-nazariyalar ilgari surilmoqda va e'tiborga molik ilmiy tadqiqotlar amalga oshirilayotganligini alohida qayd etish mumkin. Bu davrda tilshunosligimizda antroposentrik paradigmaga ko'ra til sohibining lisoniy tizimdagi o'rni, til va kognitiv faoliyat, til va madaniyat tushunchalari ushbu jarayonda yetakchilik qilishi ta'kidlanadi. Mustaqillik davrida davlat tili hisoblangan ona tilimizning jamiyatdagi roli, uning ijtimoiy vazifalari, tilning shaxs hayotida tutgan o'rni tobora oshib bormoqda. Shunga ko'ra insonlar hayotida muhim o'rinni egallovchi nutqiy jarayonlar, nutqiy muloqot mezonlari va nutq odobi masalasi xanuzgacha o'z dolzarbligini saqlab kelmoqda.

Chunki har qanday jamiyat va unda istiqomat qilayotgan insonlatning yeb-ichishdan-da ustun boʻlgan, eng muhim ehtiyoji - nutqiy muloqot masalasidir.

Globallashuv, fan-texnika taraqqiyoti, ijtimoiy munosabatlar tizimida yuz berayotgan oʻzgarishlar va ijtimoiy omillarning osib borayotganligi, albatta, insonlar hayotida, va eng muhimi, ularning ruhiyatida, muomala madaniyatida, maqsadlarida va oʻzaro aloqa aralashuvida oʻz ifodasini topmoqda. Natijada, muloqot tizimida ham oʻziga xos murakkabliklar, oʻzgarishlar maydonga kelmoqda. “Odamning kimligini bilmoqchi boʻlsang, soʻziga boq”,- deganlaridek, bu ehtiyoj abadul-abad jamiyat hayotida oʻz ustuvorligini yoʻqotmay kelmoqda. Shu sababdan “globallashuv jarayonida til va jamiyatning oʻzaro aloqasi, tilning rivojlanishiga ta’sir qiluvchi ijtimoiy omillar, jamiyatning turli sohalarida til funksiyalari ta’sirining oshishi va buning natijasida tilning ichki va tashqi tomondan rivojlanishiga doir izlanishlarga alohida e’tibor qaratilmoqda”[10].

Ilmiy manbalarda “til turli lisoniy va nolisoniy omillar ta’sirida oʻz-oʻzini tashkil etishi, funksional imkoniyatlari jihatidan turli gavdalanishi va qayta gavdalanishlarni yuzaga chiqarishi ta’kidlangani holda, tilda oʻz-oʻzini tashkillashtirishda quyidagi uch parametrni e’tiborga olish zarurligi uqtirib oʻtiladi:

1) geografik omil – makon omili;

2) xronologik omil – zamon, vaqt oʻqi:

3) sotsiologik omil – ijtimoiy muhit, madaniyat, din, millat, yosh kabi sotsial belgilar”.[6] Bu holat nutqiy muloqot mohiyatini ochib berish bilan bogʻliq muhim omillar hisoblanadi.

Xususan, prof. A.Nurmonov tildagi dinamika va oʻz-oʻzini tashkillashtirish jarayoni mana shu uch omilga asoslanishi va bu holat tilda qay holda namoyon boʻlishi yuzasidan quyidagilarni yozadi. “Til ham tabiat hodisalari kabi oʻz-oʻzini tashkil qiluvchi, tadrijiy tarzda yangi strukturalarni oʻzida namoyon etuvchi, sinergetik paradigma asosida rivojlanuvchi murakkab tizim hisoblanadi. Buni muayyan tillarning morfologik qurilishidagi oʻzgarishlar, bir holatdan boshqa sifat bosqichiga oʻtishga tomon siljishlar, ma’lum tillarda ichki va tashqi ta’sirlar natijasida turli xil belgilarning yuzaga kelayotgani kabi dalillar tasdiqlaydi”. Til kontaktining zamon va makon umumiyligiga koʻra farqlanuvchi ikki turi mavjud: bevosita til kontakti va bilvosita til kontakti. Bevosita til kontakti har xil til jamoasiga mansub shaxslarning yuzma-yuz muloqotiga asoslanadi. Bilvosita til kontaktida har xil til jamoasiga mansub ikki shaxsning muloqoti yo telefon, yo internetga ulangan kompyuter vositasida amalga oshadi.

Muloqot jarayonini shakllantirishda bosh omil sifatida lisoniy shaxs ishtiroki va uning maqomi asosiy masala sifatida markaziy oʻrinni egallaydi. Inson madaniy tajriba, lisoniy bilimlarga ega boʻlib borishi bilan oʻz shaxsiyatini shakllantiradi, shaxsiyatlar birlashib esa millat zehniyatini yuzaga keltiradi. Jamiyat – til – madaniyat tarzidagi muntazam ta’sirlashuvda lisoniy va madaniy malakalarning oʻzgarib turishi qanchalik tabiiy boʻlsa, jamiyat a’zolarining oʻz lisoniy va madaniy koʻnikmalarini barqaror saqlashga intilish ham shunchalik tabiiy holatdir.

XX asrning ikkinchi yarmidan boshlab nutqiy faoliyat masalasi tilshunoslikning alohida oʻrganish obyektiga aylandi. Shuning uchun dialog, harakatdagi nutqiy aktlar, diskurs bilan bogʻliq nazariy qarashlarga alohida e’tibor qaratilmoqda. Muloqot – maqsadli faoliyat va bu faoliyat doirasida bajariladigan har bir harakat ham oʻz maqsadi, intensiyasiga ega. Muloqot maqsadini oʻrganishda asosiy e’tibor muloqotning kognitiv jarayon ekanligiga qaratiladi. Muloqotga kirishayotgan shaxsning asosiy maqsadi axborotni uzatish emas, balki tinglovchini ushbu maqsadni anglashga undashdir. Nutqiy jarayonni oʻz ichiga olgan nutqiy vaziyatda turli fikr-mulohazalar (muloqot doirasidan chetga chiqmagan holda) bildiriladi.

Shuni ta’kidlash lozimki, muloqot jarayonidagi ishtirokchilarning ijtimoiy mavqe va maqomlari ham ularning suhbat jarayoniga ta’sir etadi va bu holat, ayniqsa, oʻzbek madaniyatidagi ayol va erkak, ota-ona va farzand, professor-talaba, boshliq-xodim kabi juftliklar muloqoti timsolida oʻziga xos milliy mentallik ifodalaydi. Nutqiy muloqot murakkab ijtimoiy munosabat boʻlib, u lingvistik va ekstralingvistik omillar ta’sirida yuzaga chiqadi. M.N.Krayevskaya bunday vaziyatda ma’lum bir predmetning mavjud/mavjud emasligi, zamonning qisqa/davomiyligi, muloqotchilarning umumiy, moddiy va ma’naviy, ijtimoiy va ruhiy holati, saviyasi, fahm-farosati, soni, faolligi/passivligi, oʻzaro joylashuvi, tanishganlik darajasi, munosabatlar, ijtimoiy kelib chiqishi ham muhim vazifa bajarishinini alohida qayd etadi. [3]

Professor A. L .Mamatqulov keyingi paytlarda koʻproq ingliz tilida soʻzlashuvchi mamlakatlarda “Political Correctness”(fransuz tilida – “le politiquement correct, rus tilida – politikorrektnost, oʻzbek tilida – “nutq odobi”, “siyosiy nutqiy hushyorlik”, “nutqiy hushyorlik”, “nutqiy andishalilik”, ”nutqiy xushmuomalalilik”) deb atalgan tushunchani ifodalovchi madaniy va lisoniy hodisa paydo boʻlganligi va koʻproq “nutqiy hushyorlik” istilohining masala mohiyatiga mos kelishini hamda buni istiloh sifatida qabul qilish maqsadga muvofiq deb hisoblaydi. Shuningdek, “nutqiy hushyorlik” tilshunoslikda yangi tushuncha boʻlib, nutq faoliyatida har qanday kamsitishlarga yoʻl qoʻymaslikni, nomaqbul iboralarni qoʻllamaslikni anglatadi. Ya’ni uning asl mohiyati nutq jarayonida u yoki bu mayda guruh (etnik, irqiy, jinsiy, ijtimoiy) vakillarining izzat-nafsi, nafsoniyatiga, hamiyatiga tegib ketmaslik, hayotdagi noxush voqea-hodisalarni yashirish yoki niqoblash, soʻzlovchining maqomi va gapning nima haqida borayotganligini aniq koʻrsatishdan iborat. Shunga mos

ravishda tilda yangi-yangi tushunchalar paydo boʻla boshlaydi, ular nutq obyektini toʻgʻridan toʻgʻri, dangal, oshkora ifodalamay, uni yumshoqroq, qochirimlar yoʻli bilan tavsiflashga xizmat qilishini alohida uqtirib oʻtadi. [4]

Darhaqiqat, nutqiy muloqot oʻnlab-minglab etnografik, ijtimoiy, falsafiy-madaniy, axloqiy-estetik, tarixiy, maishiy va ruhiy omillarning lisoniy birliklar bilan qorishuvidan iborat harakatli sistemadir. [2]

Oʻzbek muloqot madaniyati, odatda, salomlashishdan boshlanadi. Lekin ana shu salomlashishning oʻzidayoq bir qancha pragmatik mazmun yashiringan boladi. Bu holat bilan bogʻliq maʼnolar turli vositalar, yaʼni maqollar, hikmatli soʻzlar kesatiqlar va boshqalar yordamida salom berishdan koʻzda tutilgan maqsad va munosabatni yoritishga xizmat qilgan. Masalan, yosh bolalarga ertaklar orqali salom berish odobi uqtiriladi.”Gar slaloming boʻlmasa, ikki yamlab bir yutardim”,yoki “Boʻri bilan qoʻzichoq masalida”, maʼnfaatli boʻlsa ”quyuq salom berib qolibdi”, yoqtirmasa ”Salomingni pishirib ye”, “salomingni boshimga uramanmi” kabi pragmatik mazmun ifodalanadi.

Salom birovning ustunligini, oʻzining esa pastligini koʻrsatish uchun emas, balki bu odat madaniyat belgisidir. *Salomning ham salmoqlisi boʻladi,Kinoyali ilmoqlisi boʻladi*.[8] Darhaqiqat, Yozuvchi T.Malik toʻgʻri taʼkidlaganidak, insonlar maʼnfaatlari toʻqnashgan bugungi globallashuv sharoitida yuqorida taʼkidlaganimizdek, salom berish bilan bogʻliq pragmatik mazmun nihoyatda boyib bormoqda deyish mumkin.

Muloqotning samarali kechishi maʼlum qoidalar, muomala tamoyillariga amal qilishi bilan bogʻliq. Dunyo xalqlari muloqot odobi, muomala masʼuliyatiga oid minglab maqol-matallar yaratganlar, bu borada behisob nodir asarlar yaratilgan. Jumladan, Zardushtiylik dining muqaddas manbasi sanalgan “Avesto” da ham yetakchi uchta тушунчаning bittasi *ezgu soʻz [1]* ekanligi alohida taʼkidlangan. Shuningdek, sharq milliy madaniyati durdonalari boʻlmish ”Qutadgʻu bulig”, ”Qobusnoma”, “Hibatul haqoyiq” kabi madaniy yodgorliklar, buyuk mutafakkirlar Kaykovus,Yusuf Xos Hojib, Ahmad Yassaviy, Ahmad Yugnakiy, Alisher Navoiy, Soʻfi Olloyor kabi allomalarning asarlari bunga misoldir. Kaykovusning “Qobusnomada” keltirgan quyidagi pandlarini eslaylik: “Gar soʻzni va hunarni yaxshi bilsang ham hech bir soʻzni sindirmagil, toʻgʻri taʼrif qilgʻil va uni bir rangda aytgil: xosga xos soʻz, omiyga omiy soʻz degil, toki u hikmatga muvofiq boʻlsin va eshitgon kishiga ogʻir kelmasin, yoʻqsa soʻzingni dalil va hujjat bila ham eshitmagaylar. [7]

Til bu- moʻjizaviy, sirli xilqat, oʻziga xos bir dunyo. Uning moʻjizaviy tomoni shundaki, u bizga bir qator tovushlar yigʻindisi orqali butun olamning manzarasini, hayvonot, nabotot dunyosini, insonlarning his-tuygʻularini, ular orasidagi muloqot- munosabatlarni idroq etish, hazm qilish imkoniyatini beradi. Har bir tilning muayyan davrdagi holati uni yaratgan va unga ishlov bergan xalqning dunyoqarashi, tafakkuridan kelib chiqadi. Sharqda, xususan, oʻzbek lingvomadaniyatida aynan “Nutqiy hushrorlik” atamasi qoʻllanilgan boʻlmasa-da, qadimdan ota-bobolarimiz nutq odobi masalalariga yuqori darajada ahamiyat qaratganlar. Bunga tarixdan koʻplab dalillar keltirish mumkin. Masalan, X asrda yashab oʻtgan bobokalonimiz Y.X.Hojib oʻzining “Qutadgʻu bilig” asarida nutq odobi va soʻz qoʻllash, soʻzning mohiyati va undan keladigan foyda va zarar haqida quyidagilarni yozadi:

Soʻzni koʻp soʻzlama bir oz ozroq soʻzla
Tuman ming soʻz tugunini, [yaʼni jumbogʻini] shu bir soʻzda yech.
Kishi soʻz tufayli koʻtariladi, malik boʻladi,
Koʻp soʻz boshni yerga egadi.

Shuningdek, adib Ahmad Yugnakiyning “Hibatul haqoyiq” asarida ham nutq odobi yuzasidan quyidagilar bayon etilgan.

Soʻzni uqub soʻzla, shoshib (behuda) gapirma,
Soʻzingni yashir, keyin boshingni yashirib yurma.
Odoblar boshi tildir, uni tiymoq zarur.
Til yaralasa tuzalmaydi, oʻq jarohati esa bitib ketadi.

Shuningdek, xalq donishmandligi boʻlgan maqollarda ham nutq odobi bilan bogʻliq fikrlar ilgari surilgan [5]. Masalan :

Soʻz kishining oʻzagi,
Odob kishining bezagi
Taom lazzati - oʻzida
Odam lazzati - soʻzida
Til – aql tarozusi

Yuqoridagi maqollarga hamohang ravishda “Qobusnoma” da keltirilgan fikrlar ham tilni aql tarozusi ekanligini dalillaydi. Har kishining ahvoli oʻz soʻzi ostida yashiringan boʻladi. Bir soʻzni bir iborat bilan aytsa boʻladi, eshitgan kishining esa koʻngli parishon boʻladi, eshitgan kishining koʻngli bahra oladi.

Hikoyat. Horunar Rashid bir tush koʻradi, yaʼni ogʻzidagi hamma tishlari toʻkilib tushgan emish. Ertalab turib bir taʼbirchini chaqirib soʻradiki, bu tush taʼbiri nimadir. Taʼbirchi dedi:” Ey amiralmuʼmininin, sening huzuringda barcha qarindosh- urugʻlaring oʻladi, sendan boshqa hech kishi qolmaydi”

Horunar Rashid dedi:" Mening yuzimga shunday dard-anduh bilan to'lgan so'zni aytasanmi? Agar mening hamma qarindoshlarim o'lsalar, men nima ish qilaman va qanday qilib kun kechiraman?"- deb ta'birchini yuz tayoq urishga buyurdi. So'ngra boshqa bir ta'birchini chaqirdi va tushining ta'birini so'radi. Ta'birchi dedi:" Ey amrulmu'mininin, sening umring barcha qarindoshlaringning umridan uzun bo'ladi". Horunar Rashid dedi:" Barcha aqlning yo'li birdir va ikkovining ta'biri bir yerdan chiqadi. Ammo yuqoridagi ta'birchining iborasi bilan keying ta'birchining iborasining orasida farqi kattadir" va keyingi ta'birchiga yuz tilla berishni buyurdi.

Ey farzand, so'zning yuz va orqa tomonini bilgil, ularga rioya qilgil, so'zlaganingda ma'noli gapir, bu notiqlikning alomatidir. Agar gapirgan vaqtingda so'zning qanday ma'noga ega ekanini bilmasang, qushga o'xshaysan, bunday qushni to'ti deydilar.(To'ti) ham so'zlaydi, ammo so'zning ma'nosini bilmaydi. So'zni juda ham qimmatli deb bilgil, chunki xor narsa emasdir. Bilgan so'zingni o'z joyida ishlatgil, vaqtni bekorga o'tkazmagil. Agar vaqtni zoye qilsang, donishmandlikka putur yetkazgan bo'lasan.[9] A.Navoiy bobomiz esa "So'zdadur har yaxshiliqni imkoni bor, munda debturlarki, nafsning joni bor, -deya ta'kidlaydi. Demak, so'zda har qanday yaxshilikning imkoni bor ekan, u orqali suhbatdoshga kayfiyat bag'ishlash yoki ko'nglini cho'ktirish mumkin. Imkon boricha yaxshi so'zni so'zlash lozim. Xalqimizda "Odamning kimligini bilmoqchi bo'lsang, so'ziga boq"- degan maqol bor. Bu bejizga emas, chunki tildan chiqayotgan har bir so'z so'zlovchining butun borlig'i haqida ma'lumot berib turadi.

Xulosa:

Nutqiy xushyorlik- muloqot jarayonida nimani qanday gapirish yoki gapirmaslik mahorati bo'lib, bu jarayonda nutqiy xushyorlikni ta'minlashga xizmat qiladigan bir qancha terminlarning ahamiyati va ayni jarayonni ta'minlashdagi o'rni masalasiga ham e'tiborni qaratish maqsadga muvofiqdir.

КОГНИТИВНО-ДИСКУРСИВНЫЕ МЕХАНИЗМЫ СОВПАДЕНИЯ ЗНАЧЕНИЯ РЕЧИ И КОММУНИКАТИВНЫХ ФУНКЦИЙ В АНГЛИЙСКОМ И УЗБЕКСКОМ ЯЗЫКАХ

Аннотация: *В данной статье на сравнительной основе анализируются когнитивные и дискурсивные механизмы феномена совпадения смысловых значений дискурса и коммуникативных функций в английском и узбекском языках. Научно обоснована взаимная интеграция концептуальных знаний, коммуникативного опыта, дискурсивного контекста и процессов интерпретации при возникновении феномена совпадения. В ходе исследования разработана когнитивно-дискурсивная модель совпадения на основе сравнительного анализа дискурсивных образцов на английском и узбекском языках. В результате предложена когнитивно-дискурсивная модель совпадения (КДЗ) и освещены ее теоретические и методологические возможности в объяснении феномена совпадения.*

Ключевые слова: *совпадение, смысловое значение дискурса, коммуникативная функция, когнитивный процесс, дискурс, концептуализация, интерпретация, сравнительная лингвистика, КДЗ.*

COGNITIVE-DISCURSIVE MECHANISMS OF THE OVERLAP OF SPEECH MEANING AND COMMUNICATIVE FUNCTIONS IN ENGLISH AND UZBEKISTAN

Abstract: *This article analyzes the cognitive and discursive mechanisms of the overlap phenomenon of discourse meaning and communicative functions in English and Uzbek on a comparative basis. The mutual integration of conceptual knowledge, communicative experience, discursive context and interpretation processes in the occurrence of the overlap phenomenon is scientifically substantiated. During the study, a cognitive-discursive model of overlap is developed based on a comparative analysis of discourse samples in English and Uzbek. As a result, the Cognitive-Discursive Overlap Model (CDOM) is proposed and its theoretical and methodological possibilities in explaining the overlap phenomenon are highlighted.*

Keywords: *overlap, discourse meaning, communicative function, cognitive process, discourse, conceptualization, interpretation, comparative linguistics, CDOM.*

KIRISH

Til birliklarining kommunikativ faoliyatdagi samaradorligi nafaqat grammatik yoki semantik xususiyatlarga, balki inson tafakkuri va diskursni tashkil etuvchi kognitiv jarayonlarga ham bog‘liq. Nutqiy ma’no hamda kommunikativ funksiyalar overlap hodisasi aynan ana shu murakkab integratsiya mahsuli sifatida namoyon bo‘ladi. Bir xil sintaktik yoki leksik birlik turli kommunikativ vaziyatlarda turlicha interpretatsiya qilinishi mumkin. Bunday holat overlapning faqat lingvistik hodisa emas, balki kognitiv va diskursiv mexanizmlar bilan chambarchas bog‘liq ekanligini ko‘rsatadi.

So‘nggi yillarda kognitiv tilshunoslik va diskurs tahlili yo‘nalishlarida til birliklarining konseptual asoslari keng tadqiq etilgan bo‘lsa-da, ingliz va o‘zbek tillarida nutqiy ma’no hamda kommunikativ funksiyalar overlap hodisasining kognitiv-diskursiv mexanizmlari kompleks qiyosiy asosda alohida tadqiq etilmagan. Ayniqsa, kommunikativ interpretatsiya jarayonida konseptual bilimlar, diskursiv kontekst va pragmatik omillarning o‘zaro ta’siri yetarli darajada yoritilmagan.

Mazkur maqolaning maqsadi ingliz va o‘zbek tillarida overlap hodisasining kognitiv-diskursiv mexanizmlarini qiyosiy-chog‘ishtirma asosda tahlil qilish, uning konseptual bosqichlarini aniqlash hamda Cognitive-Discursive Overlap Model (CDOM)ni ishlab chiqishdan iborat.

TADQIQOT MATERIALLARI VA METODLARI

Mazkur tadqiqot ingliz va o‘zbek tillarida nutqiy ma’no hamda kommunikativ funksiyalar overlap hodisasining kognitiv-diskursiv mexanizmlarini aniqlashga qaratildi. Tadqiqot materiali sifatida ingliz va o‘zbek tillaridagi badiiy, publitsistik hamda dialogik diskurs namunalari tanlandi. Tahlil jarayonida overlap hodisasining yuzaga kelishida konseptual bilimlar, diskursiv kontekst, kommunikativ maqsad va interpretatsiya jarayonlarining o‘zaro bog‘liqligi o‘rganildi.

Tadqiqotda qiyosiy-chog‘ishtirma metod, kognitiv tahlil, diskurs tahlili, pragmalingvistik tahlil, kontekstual kuzatish hamda konseptual modellashtirish metodlaridan foydalanildi. Har bir diskurs namunasi nutqiy vaziyat, konseptual faollashuv, kommunikativ strategiya va adresat interpretatsiyasi nuqtai nazaridan baholandi. Olingan natijalar ingliz va o‘zbek tillaridagi overlap hodisasining umumiy va farqli jihatlarini aniqlash imkonini berdi.

Tadqiqot davomida overlap hodisasining shakllanishida konseptual bilimlar, diskursiv rivojlanish va kommunikativ interpretatsiya bosqichlari yagona tizim sifatida qaralib, ular asosida Cognitive-Discursive Overlap Model (CDOM) ishlab chiqildi. Mazkur model overlapning kognitiv va diskursiv rivojlanish mexanizmlarini izchil bosqichlarda tavsiflaydi hamda ingliz va o‘zbek tillarida mazkur hodisaning kommunikativ tabiatini qiyosiy asosda izohlash imkonini beradi.

NATIJALAR VA TAHLIL

2.1. Overlap hodisasining kognitiv-diskursiv mohiyati

Nutqiy ma’no hamda kommunikativ funksiyalar overlap hodisasi faqat grammatik yoki semantik hodisa sifatida emas, balki inson tafakkuri va diskursni tashkil etuvchi murakkab kognitiv jarayonlarning mahsuli sifatida namoyon bo‘ladi. Har qanday kommunikativ birlik avvalo inson ongida konseptual model sifatida shakllanadi, keyinchalik esa diskurs jarayonida turli pragmatik omillar ta’sirida yangi kommunikativ funksiyalarni o‘zlashtiradi. Shu sababli overlap hodisasining mohiyatini anglash uchun til birliklarining kognitiv tashkil topishi hamda diskursiv rivojlanishini kompleks ravishda tahlil qilish zarur.

Kognitiv tilshunoslik nuqtai nazaridan nutqiy ma’no insonning konseptual bilimlari, tajribasi va mental modellari bilan uzviy bog‘liq. Diskurs esa ana shu konseptual bilimlarning real kommunikativ vaziyatda namoyon bo‘lish shaklidir. Overlap hodisasi aynan konseptual bilimlar bilan diskursiv rivojlanishning o‘zaro integratsiyasi natijasida yuzaga keladi. Natijada bitta til birligi turli kommunikativ vazifalarni bajaruvchi ko‘p funksiyali birlikka aylanadi.

Ingliz tilida overlapning kognitiv-diskursiv rivojlanishi ko‘proq eksplicit sintaktik vositalar, modal konstruksiyalar va diskurs markerlari orqali amalga oshadi. O‘zbek tilida esa kommunikativ vaziyat, milliy nutq odobi, implitsit ma’no hamda kontekstning roli kuchliroq namoyon bo‘ladi. Shuning uchun ingliz tilida overlap ko‘proq formal diskursiv vositalar orqali, o‘zbek tilida esa kontekst va pragmatik tajriba orqali yuzaga chiqadi.

Qiyosiy kuzatishlar shuni ko‘rsatdiki, overlap hodisasining shakllanishida uchta asosiy komponent ishtirok etadi: konseptual faollashuv, diskursiv rivojlanish va kommunikativ interpretatsiya. Aynan ushbu komponentlarning uzviy integratsiyasi overlap hodisasining kognitiv-diskursiv asosini tashkil etadi.

2.2. Ingliz va o‘zbek tillarida overlap hodisasining kognitiv-diskursiv modeli

Ingliz va o‘zbek tillarida nutqiy ma’no hamda kommunikativ funksiyalar overlap hodisasining qiyosiy tahlili mazkur hodisaning shakllanishi inson tafakkuri, konseptual bilimlar, diskursning rivojlanishi va kommunikativ interpretatsiyaning uzviy integratsiyasi asosida amalga oshishini ko‘rsatdi. Overlap hodisasi alohida lingvistik birliklarning yig‘indisi emas, balki bir necha kognitiv va diskursiv jarayonlarning ketma-ket hamda o‘zaro bog‘liq faoliyati natijasidir. Shu sababli uni izohlashda faqat sintaktik yoki pragmatik omillar bilan cheklanib bo‘lmaydi.

Tahlillar shuni ko‘rsatdiki, overlap hodisasining yuzaga kelishida konseptual bilimlar diskursni shakllantirishning boshlang‘ich nuqtasi hisoblanadi. Inson ongida mavjud bo‘lgan bilimlar, tajribalar va mental modellar kommunikativ maqsad bilan uyg‘unlashib, diskursni qurish strategiyasini belgilaydi. Mazkur strategiya nutqiy ma’noning shakllanishi va kommunikativ funksiyalarning tanlanishiga bevosita ta’sir ko‘rsatadi.

Ingliz tilida kognitiv-diskursiv jarayon ko‘proq grammatik va leksik markerlar orqali ochiq ifodalansa, o‘zbek tilida implitsit ma’nolar, milliy nutq odobi va kontekstual bilimlarning ulushi yuqoriroq ekanligi kuzatildi. Natijada har ikki tilda overlap hodisasi umumiy kognitiv tamoyillar asosida rivojlansa-da, uning diskursiv realizatsiyasi til tizimining tipologik va madaniy xususiyatlariga mos ravishda farqlanadi.

Tadqiqot davomida overlap hodisasining shakllanishida konseptual faollashuv, diskursiv konstruktsiyalash, kommunikativ kodlash, overlap integratsiyasi hamda interpretatsiya bosqichlari izchil ravishda namoyon boʻlishi aniqlandi. Mazkur bosqichlarning oʻzaro uygʻunligi natijasida bitta nutqiy birlik bir vaqtning oʻzida bir nechta kommunikativ funksiyani bajaruvchi koʻp qatlamli kommunikativ tuzilmaga aylanadi.

Olingan natijalar asosida overlap hodisasining kognitiv va diskursiv rivojlanish bosqichlarini umumlashtiruvchi Cognitive-Discursive Overlap Model (CDOM) ishlab chiqildi. Mazkur model overlap hodisasining konseptual asosdan boshlab yakuniy kommunikativ interpretatsiyagacha boʻlgan barcha jarayonlarini yagona tizim sifatida izohlash imkonini beradi.

1-jadval. Ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv xususiyatlari (muallif ishlanmasi)

Tahlil mezoni	Ingliz tili	Oʻzbek tili
Konseptual asos	Individual konseptual faollashuv ustuvor	Jamoaviy va madaniy konseptlar ustuvor
Diskursni shakllantirish	Grammatik va leksik markerlar orqali	Kontekst va nutq odobi orqali
Axborotni kodlash	Eksplicit ifoda	Koʻproq implitsit ifoda
Kommunikativ strategiya	Aniqlik va mantiqiy ketma-ketlik	Vaziyatga moslashuvchanlik
Overlapning kognitiv manbai	Konseptual integratsiya	Konseptual va madaniy integratsiya
Interpretatsiya	Lingvistik markerlarga tayanadi	Kontekst va madaniy bilimlarga tayanadi
Kommunikativ natija	Funksional aniqlik	Pragmatik moslashuvchanlik

Jadval maʼlumotlari ingliz va oʻzbek tillarida overlap hodisasi umumiy kognitiv tamoyillar asosida shakllanishini, biroq uning diskursiv rivojlanishi va kommunikativ interpretatsiyasi har bir tilning tipologik hamda lingvomadaniy xususiyatlari bilan belgilanishini koʻrsatadi. Ingliz tilida lingvistik markerlarning roli ustun boʻlsa, oʻzbek tilida kontekst, madaniy bilim va pragmatik tajriba asosiy omil sifatida namoyon boʻladi. Shu jihatdan overlap hodisasi kognitiv va diskursiv omillarning integratsiyasi natijasida yuzaga keluvchi koʻp qatlamli kommunikativ tizim sifatida tavsiflanadi.

2.3. Ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv modeli (CDOM) (muallif ishlanmasi)

Tadqiqot natijalari ingliz va oʻzbek tillarida nutqiy maʼno hamda kommunikativ funksiyalar overlap hodisasi inson tafakkuri, konseptual bilimlar va diskursiv rivojlanish jarayonlarining uzviy integratsiyasi asosida shakllanishini koʻrsatdi. Overlap hodisasi til tizimining alohida sathlariga xos hodisa boʻlmay, balki kognitiv jarayonlar va kommunikativ faoliyatning oʻzaro taʼsiri natijasida yuzaga keladigan murakkab tizimdir. Shu bois mazkur hodisani izohlash uchun konseptual faollashuvdan boshlab yakuniy kommunikativ interpretatsiyagacha boʻlgan bosqichlarni yagona modelda ifodalash zarurati yuzaga keldi.

Tahlillar asosida Cognitive-Discursive Overlap Model (CDOM) ishlab chiqildi. Mazkur model overlap hodisasining shakllanishini yettita oʻzaro bogʻliq bosqich orqali izohlaydi.

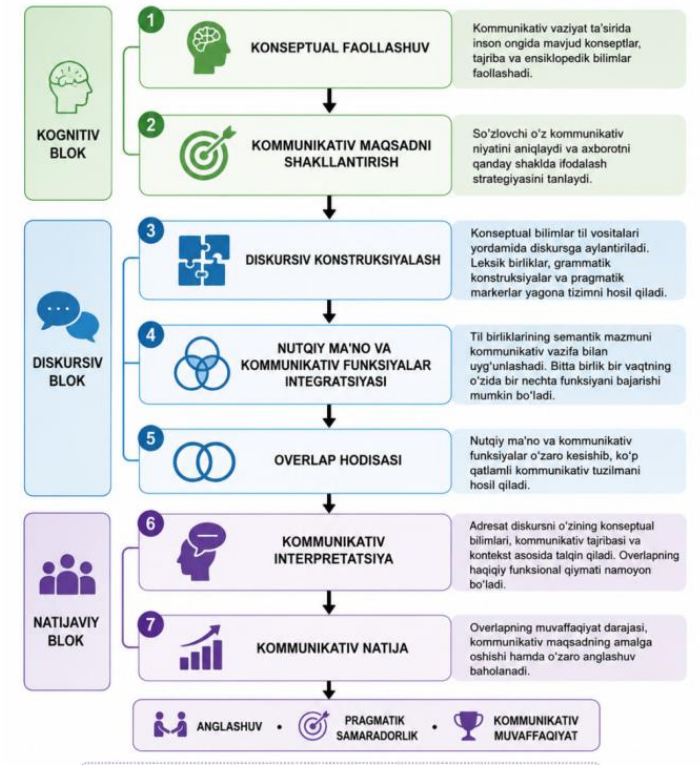
Modelning birinchi bosqichi – konseptual faollashuv hisoblanadi. Bu bosqichda kommunikativ vaziyat taʼsirida inson ongida mavjud konseptlar, tajriba va ensiklopedik bilimlar faollashadi. Aynan shu bilimlar keyingi nutqiy faoliyatning mazmuniy asosini tashkil etadi.

Ikkinchi bosqich – kommunikativ maqsadni shakllantirishdir. Soʻzlovchi oʻz kommunikativ niyatini aniqlaydi va axborotni qanday shaklda ifodalash strategiyasini tanlaydi. Mazkur bosqichda diskursning umumiy yoʻnalishi belgilanadi.

Uchinchi bosqich – diskursiv konstruksiyalash bosqichidir. Bu yerda konseptual bilimlar til vositalari yordamida diskursga aylantiriladi. Leksik birliklar, grammatik konstruksiyalar va pragmatik markerlar yagona kommunikativ tizimni hosil qiladi.

Toʻrtinchi bosqich – nutqiy maʼno va kommunikativ funksiyalar integratsiyasi hisoblanadi. Ushbu bosqichda til birliklarining semantik mazmuni kommunikativ vazifa bilan uygʻunlashadi. Natijada bitta birlik bir vaqtning oʻzida axborot berish, baholash, taʼsir koʻrsatish yoki munosabat bildirish kabi bir nechta funksiyalarni bajarish imkoniyatiga ega boʻladi.

Beshinchi bosqich – overlap hodisasining yuzaga kelishidir. Aynan shu bosqichda nutqiy maʼno va kommunikativ funksiyalar oʻzaro kesishib, koʻp qatlamli kommunikativ tuzilmani hosil qiladi. Overlap hodisasi kommunikativ samaradorlikni oshirishga xizmat qiladi.



Oltinchi bosqich – kommunikativ interpretatsiya bosqichida adresat diskursni oʻzining konseptual bilimlari, kommunikativ tajribasi va kontekst asosida talqin qiladi. Interpretatsiya jarayonida overlapning haqiqiy funksional qiymati namoyon boʻladi.

Yettinchi bosqich – kommunikativ natija hisoblanadi. Ushbu bosqichda overlapning muvaffaqiyat darajasi, kommunikativ maqsadning amalga oshishi hamda soʻzlovchi va tinglovchi oʻrtasidagi oʻzaro anglashuv baholanadi.

Taklif etilgan **Cognitive-Discursive Overlap Model (CDOM)**ning ilmiy yangiligi shundaki, unda overlap hodisasi ilk bor kognitiv va diskursiv mexanizmlarning uzviy integratsiyasi sifatida bosqichma-bosqich modellashtirildi.

Model konseptual faollashuv, kommunikativ rejalashtirish, diskursiv konstruksiyalash, semantik-funksional integratsiya, overlap, interpretatsiya va kommunikativ natija oʻrtasidagi sabab-oqibat munosabatlarini yagona nazariy tizimga birlashtiradi. Shu jihatdan CDOM ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv tabiatini qiyosiy oʻrganishda yangi metodologik yondashuv sifatida tavsiya etiladi.

2-rasm. Ingliz va oʻzbek tillarida nutqiy maʼno va kommunikativ funksiyalar overlap hodisasining kognitiv-diskursiv modeli (CDOM) (muallif ishlanmasi)

2-rasm. Overlap hodisasining kognitiv-diskursiv modeli (CDOM) (muallif ishlanmasi)

2.4. Ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv xususiyatlarining qiyosiy tahlili

Ingliz va oʻzbek tillarida nutqiy maʼno hamda kommunikativ funksiyalar overlap hodisasining kognitiv-diskursiv tahlili mazkur hodisaning har ikkala tilda umumiy kognitiv qonuniyatlarga asoslangan holda shakllanishini, biroq uning diskursiv realizatsiyasi va kommunikativ interpretatsiyasida muayyan tipologik farqlar mavjudligini koʻrsatdi. Har ikki tilda ham overlap hodisasi konseptual bilimlarning faollashuvi, kommunikativ maqsadning shakllanishi va diskursning rivojlanishi natijasida yuzaga keladi. Biroq ushbu bosqichlarning amalga oshish usullari tilning strukturaviy va lingvomadaniy xususiyatlariga bogʻliq ravishda farqlanadi.

Tahlillar shuni koʻrsatdiki, ingliz tilida kognitiv-diskursiv jarayonlarning asosiy xususiyati kommunikativ maqsadning grammatik va leksik vositalar orqali aniq kodlanishidir. Diskursni tashkil etishda modal feʼllar, bogʻlovchilar, diskurs markerlari va sintaktik vositalar muhim rol oʻynaydi. Shu sababli overlap hodisasi koʻpincha eksplicit ifodalanadi va adresat tomonidan lingvistik markerlar asosida interpretatsiya qilinadi.

Oʻzbek tilida esa overlap hodisasining kognitiv-diskursiv tabiati milliy nutq odobi, implitsit maʼno, vaziyatga moslashuvchanlik hamda kontekstual bilimlarning ustuvorligi bilan tavsiflanadi. Kommunikativ maqsad koʻpincha grammatik shakldan tashqari pragmatik omillar orqali ham anglashiladi. Natijada bir xil sintaktik yoki leksik birlik turli kommunikativ vaziyatlarda turlicha pragmatik yuklama kasb etishi mumkin.

Qiyosiy kuzatishlar overlap hodisasining shakllanishida konseptual faollashuv, diskursiv rivojlanish, kommunikativ integratsiya va interpretatsiya bosqichlari har ikki tilda ham mavjudligini koʻrsatdi. Biroq ingliz tilida mazkur bosqichlarning oʻzaro bogʻliqligi koʻproq lingvistik vositalar orqali namoyon boʻlsa, oʻzbek tilida ekstralingvistik omillar, kommunikativ tajriba va madaniy bilimlar bilan mustahkamlanadi.

Olingan natijalar asosida overlap hodisasining kognitiv-diskursiv rivojlanishi konseptual bilimlardan boshlanib, diskursiv konstruksiyalash, semantik-funksional integratsiya va kommunikativ interpretatsiya orqali yakunlanadigan uzluksiz jarayon ekanligi ilmiy jihatdan asoslandi. Aynan mazkur ketma-ketlik Cognitive-Discursive Overlap Model (CDOM)ning nazariy asosini tashkil etadi.

2-jadval. Ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv xususiyatlarining qiyosiy tavsifi (muallif ishlanmasi)

Tahlil mezoni	Ingliz tili	O‘zbek tili
Konseptual faollashuv	Individual bilim va tajribaga tayanadi	Individual va jamoaviy-madaniy bilimlarga tayanadi
Kommunikativ maqsad	Oldindan aniq rejalashtiriladi	Vaziyatga mos ravishda shakllanadi
Diskursni qurish	Grammatik va diskurs markerlari ustuvor	Kontekst va nutq odobi ustuvor
Nutqiy ma’noni kodlash	Asosan eksplicit	Ko‘proq implitsit
Overlapning yuzaga kelishi	Lingvistik vositalar integratsiyasi orqali	Lingvistik va ekstralingvistik omillar integratsiyasi orqali
Interpretatsiya	Til birliklari va diskurs markerlariga tayanadi	Kontekst, madaniy bilim va kommunikativ tajribaga tayanadi
Kommunikativ natija	Mazmunning aniq va izchil anglashilishi	Pragmatik moslashuv va kommunikativ uyg‘unlik

Jadval natijalari ingliz va o‘zbek tillarida overlap hodisasining kognitiv-diskursiv rivojlanishi umumiy konseptual qonuniyatlarga asoslanishini, biroq uning kommunikativ realizatsiyasi tilning tipologik va lingvomadaniy xususiyatlari ta’sirida o‘ziga xos shakllanishini ko‘rsatadi. Shu jihatdan CDOM modeli overlap hodisasining nafaqat kognitiv yoki diskursiv, balki ularning integratsiyasi asosida yuzaga keladigan ko‘p bosqichli kommunikativ tizim ekanligini nazariy va amaliy jihatdan asoslaydi.

MUHOKAMA

Mazkur tadqiqot natijalari ingliz va o‘zbek tillarida nutqiy ma’no hamda kommunikativ funksiyalar overlap hodisasining kognitiv va diskursiv mexanizmlari o‘zaro uzviy bog‘langan ko‘p bosqichli kommunikativ tizim ekanligini ko‘rsatdi. Olingan natijalar zamonaviy kognitiv tilshunoslik, diskurs nazariyasi va kommunikativ lingvistika doirasida ilgari surilgan ayrim nazariy qarashlarni tasdiqlash bilan birga, overlap hodisasining shakllanish jarayoniga oid yangi ilmiy yondashuvni ham taklif etadi.

Tadqiqot davomida overlap hodisasining shakllanishi konseptual faollashuv, kommunikativ maqsadni belgilash, diskursiv konstruksiyalash, semantik-funksional integratsiya va kommunikativ interpretatsiya bosqichlarining izchil ketma-ketligi asosida amalga oshishi aniqlandi. Mazkur natijalar T. A. van Dijkning diskursni insonning kognitiv bilimlari va kommunikativ vaziyati bilan bog‘liq dinamik tizim sifatida talqin qiluvchi nazariy qarashlari bilan uyg‘unlashadi [1]. Biroq mazkur tadqiqotda diskurs faqat axborot uzatish vositasi sifatida emas, balki overlap hodisasini yuzaga keltiruvchi asosiy mexanizm sifatida izohlandi.

Natijalar Ch. Fillmorning freym semantikasi nazariyasi bilan ham mos keladi [2]. Fillmor til birliklarining ma’nosi ularni tushunish uchun zarur bo‘lgan konseptual freymlar orqali shakllanishini ta’kidlaydi. Tadqiqot natijalari esa freymlarning faollashuvi kommunikativ vaziyatga bog‘liq holda overlap hodisasining yuzaga kelishiga xizmat qilishini ko‘rsatdi. Demak, overlapning mazmuniy asosini alohida til birliklari emas, balki ularni birlashtiruvchi konseptual tuzilmalar tashkil etadi.

Shuningdek, G. Fauconnier va M. Turner tomonidan ishlab chiqilgan konseptual integratsiya nazariyasi (Conceptual Blending Theory) mazkur tadqiqot natijalarini izohlashda muhim metodologik asos bo‘ldi [3]. Mazkur nazariyaga ko‘ra, inson tafakkuri turli konseptual maydonlarni integratsiyalash orqali yangi ma’nolarni hosil qiladi. Olingan natijalar overlap hodisasi ham aynan semantik va kommunikativ maydonlarning integratsiyasi natijasida yuzaga kelishini ko‘rsatdi. Shu bilan birga, tadqiqotda ushbu integratsiyaning diskursiv rivojlanish bosqichlari ham tizimli ravishda tavsiflandi.

Tadqiqot natijalari R. Langackerning kognitiv grammatika nazariyasi bilan ham uyg‘unlashadi [4]. R.Langacker grammatik birliklarni konseptual jarayonlarning til tizimidagi ifodasi sifatida talqin qiladi. Ushbu tadqiqotda esa grammatik vositalar overlap hodisasining asosiy manbai emasligi, balki konseptual va diskursiv jarayonlarni yuzaga chiqaruvchi vosita ekanligi ilmiy jihatdan asoslandi. Bu overlap hodisasini faqat grammatik yoki semantik doirada emas, balki kommunikativ-kognitiv tizim sifatida ko‘rib chiqish zarurligini ko‘rsatadi.

Natijalar R. Schank va R. Abelsonning ssenariy (script) nazariyasi bilan ham muvofiqlashadi [5]. Ularning fikricha, nutqni tushunish avvaldan shakllangan bilim ssenariylari asosida amalga oshadi. Mazkur tadqiqot esa overlap hodisasining muvaffaqiyatli interpretatsiyasi adresatning konseptual bilimlari, kommunikativ tajribasi va diskursiv kompetensiyasiga bevosita bog‘liq ekanligini ko‘rsatdi.

Mazkur tadqiqotning asosiy ilmiy yangiligi **Cognitive-Discursive Overlap Model (CDOM)**ning ishlab chiqilganligidir. Taklif etilgan model overlap hodisasining shakllanishini konseptual faollashuv → kommunikativ maqsadni shakllantirish → diskursiv konstruksiyalash → nutqiy ma’no va kommunikativ funksiyalar integratsiyasi → overlap hodisasi → kommunikativ interpretatsiya → kommunikativ natija ketma-ketligi asosida izohlaydi. Avvalgi

tadqiqotlarda mazkur bosqichlar alohida-alohida tahlil qilingan boʻlsa, CDOM ularni yagona nazariy va metodologik tizimga birlashtiradi.

Shunday qilib, tadqiqot natijalari overlap hodisasining kognitiv-diskursiv tabiatini chuqurroq anglash imkonini beradi hamda qiyosiy tilshunoslik, kognitiv lingvistika, diskurs tahlili, pragmalingvistika va sun'iy intellekt asosidagi tabiiy tilni qayta ishlash yoʻnalishlarida olib boriladigan keyingi tadqiqotlar uchun yangi nazariy-metodologik asos yaratadi.

XULOSA

1. Ingliz va oʻzbek tillarida nutqiy ma'no hamda kommunikativ funksiyalar overlap hodisasi kognitiv va diskursiv jarayonlarning oʻzaro integratsiyasi natijasida shakllanuvchi murakkab kommunikativ tizim ekanligi ilmiy jihatdan asoslandi. Mazkur hodisaning yuzaga kelishi konseptual bilimlar, kommunikativ maqsad va diskursning uzviy bogʻliqligi bilan belgilanishi aniqlandi.

2. Qiyosiy tahlillar overlap hodisasining shakllanish bosqichlari har ikki tilda umumiy kognitiv qonuniyatlarga asoslanishini, biroq uning diskursiv realizatsiyasi va kommunikativ interpretatsiyasi ingliz va oʻzbek tillarining tipologik hamda lingvomadaniy xususiyatlariga koʻra farqlanishini koʻrsatdi.

3. Ingliz tilida overlap hodisasining kognitiv-diskursiv rivojlanishida grammatik va leksik markerlar, modal konstruksiyalar hamda diskurs bogʻlovchilarining roli ustuvorligi, oʻzbek tilida esa kontekst, implitsit ma'no, milliy nutq odobi va ekstralingvistik omillar yetakchi ahamiyat kasb etishi aniqlandi.

4. Overlap hodisasining kognitiv-diskursiv mexanizmi konseptual faollashuv, kommunikativ maqsadni shakllantirish, diskursiv konstruksiyalash, nutqiy ma'no va kommunikativ funksiyalar integratsiyasi, overlap hodisasi, kommunikativ interpretatsiya hamda kommunikativ natija bosqichlarining izchil ketma-ketligi asosida amalga oshishi ilmiy jihatdan asoslab berildi.

5. Tadqiqot natijasida ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv rivojlanish mexanizmlarini tizimli ravishda tavsiflovchi Cognitive-Discursive Overlap Model (CDOM) ishlab chiqildi. Mazkur model konseptual bilimlar, diskursiv rivojlanish va kommunikativ interpretatsiya oʻrtasidagi sabab-oqibat munosabatlarini yagona nazariy tizim sifatida birlashtiradi.

6. Taklif etilgan CDOM modeli overlap hodisasining kognitiv va diskursiv tabiatini izohlash bilan bir qatorda, qiyosiy tilshunoslik, kognitiv lingvistika, diskurs tahlili hamda pragmalingvistika yoʻnalishlarida olib boriladigan tadqiqotlar uchun yangi metodologik yondashuv sifatida tavsiya etildi. Model turli kommunikativ vaziyatlarda nutqiy ma'no va kommunikativ funksiyalar oʻrtasidagi integratsiyani tizimli ravishda tahlil qilish imkonini beradi.

7. Tadqiqot natijalari ingliz va oʻzbek tillarida overlap hodisasining kognitiv-diskursiv xususiyatlarini chuqurroq anglash, qiyosiy va chogʻishtirma tilshunoslikni rivojlantirish, shuningdek, diskursni avtomatik tahlil qilish, tabiiy tilni qayta ishlash (Natural Language Processing) va generativ sun'iy intellekt tizimlarida kommunikativ ma'noni modellashtirish boʻyicha ilmiy-amaliy tadqiqotlarni takomillashtirish uchun muhim nazariy va amaliy ahamiyat kasb etadi.

ЛИНГВОПОЭТИЧЕСКИЙ АНАЛИЗ ПАРЕМИЙ В ПОЭЗИИ Н. ТОРЕШОВОЙ

Аннотация: *данной статье анализируются художественно-поэтические особенности пословиц и поговорок, использованных в творчестве поэта Н. Торешовой, а также их роль в раскрытии содержания поэтического текста, выразительной и содержательно глубокой передаче мысли и усилении образности. Особое внимание уделяется индивидуально-творческой переработке образцов устного народного творчества в произведениях поэта, их контекстуально-художественным функциям и значению в формировании поэтического содержания. В исследовании также рассматриваются афористические единицы, возникшие на основе индивидуального творческого стиля Н. Торешовой, и раскрываются их специфические особенности в выражении художественного мышления, эстетических взглядов и индивидуального поэтического стиля поэта.*

Ключевые слова: *паремия, паремиология, пословица и поговорка, афоризм, экспрессивное значение.*

A LINGUOPOETIC ANALYSIS OF PAREMIAS IN THE POETRY OF N. TORESHOVA

Abstract: *This article analyzes the artistic and poetic features of proverbs and sayings used in the works of the poet N. Toreshova, as well as their role in revealing the content of poetic texts, expressing ideas in an emotionally impactful and semantically profound manner, and enhancing imagery. Particular attention is also paid to the individual creative transformation of folklore elements in the poet's works, their contextual and artistic functions, and their significance in shaping poetic meaning. The study further examines aphoristic units arising from N. Toreshova's individual creative style, revealing their distinctive features in expressing the poet's artistic thinking, aesthetic views, and individual poetic style.*

Keywords: *paremia, paremiology, proverb and saying, aphorism, expressive meaning.*

KIRISH (INTRODUCTION / ВВЕДЕНИЕ). Qoraqalpoq folklori asrlar davomida avloddan-avlodga og'zaki ravishda yetib kelgan, xalqning badiiy tafakkuri, milliy qadriyatlari, urf-odatlari va dunyoqarashini o'zida mujassam etgan o'ziga xos ma'naviy-madaniy meros namunasidir. Folklor janrlari xalqning tarixiy xotirasi va milliy o'zligini aks ettirishi bilan bir qatorda, uning axloqiy-estetik qarashlarini ham ifodalashda muhim ahamiyat kasb etadi.

Mazkur folklor janrlari orasida maqol va matallar o'zining qisqa, lo'nda va mazmunan teran ifodasi, xalqona obrazliligi hamda fikrni ta'sirchan yetkazish imkoniyati bilan alohida ajralib turadi. Ularda xalqning ko'p asrlik hayotiy tajribasi, kuzatuvlari, axloqiy qarashlari va ijtimoiy munosabatlari mujassamlashgan. Shu sababli maqol-matallarni nafaqat folklorshunoslik, balki tilshunoslik va adabiyotshunoslik nuqtayi nazaridan o'rganish ham muhim ilmiy ahamiyatga ega.

Ayniqsa, maqol-matallarning badiiy adabiyot, xususan, she'riy matn tarkibida qo'llanishi ularning semantik, stilistik va ekspressiv imkoniyatlarini yanada namoyon etadi. Shoir ijodida xalq og'zaki ijodiga xos paremiologik birliklarning qo'llanishi poetik mazmunni boyitish, fikrning ta'sirchanligini oshirish, obrazlilikni kuchaytirish hamda milliy-madaniy koloritni ifodalashga xizmat qiladi. Shu jihatdan N. To'reshova she'riyatida qo'llanilgan maqol-matallar va shoirning individual ijodiy uslubi asosida yuzaga kelgan aforistik birliklarni o'rganish dolzarb ilmiy masalalardan biridir.

ADABIYOTLAR VA METOD (LITERATURA I METOD / MATERIALS AND METHODS). Maqol-matallar xalqning umumiy milliy tafakkurin, turmush tajribalarin va tarixiy xotirasin aks ettruvchi muhim lingvomadaniy vosita hisoblanadi. A. Pirniyazova maqolning mazmun-mohiyatiga to‘xtalib, uni “qisqa, obrazli, grammatik va mantiqiy jihatdan tugallangan fikr-mulohazani ifodalovchi, xalq tomonidan yaratilgan poetik-badiiy so‘z san’ati” sifatida izohlaydi. Tadqiqotchining fikricha, maqollarda xalqning uzoq davrlar davomida shakllangan aql-zakovati, hayotiy tajribasi va donishmandlik qarashlari o‘z ifodasini topadi [2.18].

Maqol va matallar qadimdan insoniyatning ma’naviy va madaniy hayotida muhim o‘rin egallab kelgan. Turkiy xalqlar og‘zaki ijodining qadimiy yozma manbalaridan biri bo‘lgan Mahmud Qoshg‘ariyning “Devonu lug‘otit turk” asarida ham xalq orasida keng qo‘llangan ko‘plab maqol-matallar, hikmatli so‘zlar, aforizmlar va sajlar qayd etilgan. Mazkur asarda keltirilgan ayrim paremiologik birliklar shakliy va mazmuniy jihatdan takomillashgan holda hozirgi kungacha saqlanib, turkiy xalqlarning umumiy madaniy merosi sifatida yashab kelmoqda.

Tilshunoslikda maqol va matallar **paremiya**, ularni ilmiy jihatdan o‘rganuvchi soha esa **paremiologiya** deb yuritiladi. Qoraqalpoq tilshunosligida maqol-matallar dastlab frazeologik birliklar doirasida tadqiq etilgan. Jumladan, taniqli olim E. Berdimuratov maqol-matallarning frazeologik birliklarga yaqin xususiyatlarini hisobga olib, ularni frazeologizmlarning bir turi sifatida talqin qilgan va frazeologik birliklar tarkibida o‘rgangan [1.146].

B. Yusupova esa maqol-matallarni mustaqil tadqiqot obyekti sifatida qarab, ularni **paremiya** termini bilan ifodalashni ma’qul deb hisoblaydi. Tadqiqotchi paremiologiya tushunchasiga ikki xil yondashuv mavjudligini ta’kidlaydi. Birinchi yondashuvga ko‘ra, paremiologiya — maqol-matallarni, ya’ni turli xalqlarga xos paremiologik birliklarning til xususiyatlarini o‘rganuvchi tilshunoslik sohasi. Ikkinchi yondashuvga ko‘ra esa, paremiologiya muayyan tilga xos paremiologik birliklar, maqol va matallarning majmuini anglatadi. Shuningdek, parema, paremiya va paremiologiya tushunchalarini izohlash hamda chegaralash masalasida turli tillar doirasida turlicha ilmiy yondashuvlar, yo‘nalishlar va metodlar mavjudligi qayd etiladi [3.12].

Mazkur nazariy qarashlar asosida tadqiqotning asosiy obyekti sifatida N. To‘reshova she’riyatida qo‘llanilgan maqol-matallar va shoirning individual ijodiy uslubi asosida shakllangan aforistik birliklar belgilandi. Tadqiqotda ushbu birliklarning semantik, stilistik, lingvopoetik va funksional xususiyatlarini aniqlashga alohida e’tibor qaratildi.

Tadqiqot jarayonida **tavsifiy, kontekstual, semantik-stilistik va lingvopoetik tahlil metodlari**dan foydalanildi. Mazkur metodlar yordamida paremiologik birliklarning she’riy matn tarkibidagi o‘rni, ularning poetik mazmunni shakllantirish, fikrning ta’sirchanligini oshirish, obrazlilik va ekspressivlikni kuchaytirish hamda shoirning individual uslubini namoyon etishdagi funksional imkoniyatlari tahlil qilindi.

NATIJA (РЕЗУЛЬТАТЫ/RESULTS) Maqol va matallar, ayniqsa, poetik asarlar tarkibida qo‘llanganda, she’r misralariga o‘ziga xos poetik-estetik ta’sirchanlik baxsh etadi. Ular badiiy matnning mazmuniy qatlamini boyitish, fikrni ixcham va ta’sirchan ifodalash hamda poetik obrazlilikni kuchaytirishga xizmat qiladi. Shu nuqtayi nazardan, avvalo, shoir N. To‘reshova ijodida qo‘llanilgan naqıl-maqallarning tarkibiy va mazmuniy xususiyatlariga e’tibor qaratish lozim.

Maqol va matallarning tarkibiga ko‘ra o‘ziga xosligi: Maqol va matallar og‘zaki xalq donishmandligida o‘zgarmagan holda berilishi ham, shuningdek, muallif tomonidan turli o‘zgarishlar bilan qo‘llanilishi ham mumkin.

1. Maqol va matallarning o‘zgarmagan holda berilishi

Maqol va matallar tarkibiga ko‘ra og‘zaki xalq donishmandligida shakllangan holatda, ya’ni o‘zgarmagan holda qo‘llanilishi mumkin. Bunday holatda muallif xalq orasida keng tarqalgan maqolning leksik va grammatik tarkibiga o‘zgartirish kiritmay, uni poetik kontekstga olib kiradi.

Yaxshi so‘z – Jon ozig‘i,
Ko‘ngilingning yozig‘i. [4.37].

Bu parchada xalq orasida keng tarqalgan “Yaxshi so‘z — jon oziği” maqoli o‘zgarmagan holda qo‘llangan. Maqolning semantik mazmuni inson ruhiyati uchun yaxshi so‘zning ahamiyatini, uning inson ko‘ngliga ijobiy ta’sirini ifodalaydi. Shoira maqolni poetik kontekstda qo‘llash orqali yaxshi so‘zning insonning psixologik va ruhiy holatiga ta’sirini badiiy tasvirlagan. “Ko‘ngilning yozig‘i” degan poetik qator maqolning ekspressiv ma’nosini kuchaytirib, yaxshi so‘z inson ko‘nglini yengillashtiruvchi, ruhiy davo vositasi sifatida berilganini ko‘rsatadi. Demak, maqol bu o‘rinda shunchaki tayyor til birligi emas, balki obraz yaratishga xizmat qiluvchi lingvopoetik vosita vazifasini bajarmoqda.

“Taslar túsken jerge awır”,
Esiginde ólgen maqul” **[4.57].**
“ Bir qatın hiylesi qırıq eshekke júk”,
Degen naqıl bardı qádim zamannan,
“Er”diń júz esheklik hiylesin kórip,
Jaǵamdı usladım, shoshıp jamannan **[4.112].**

“Bir qatınnıń hiylesi qırq eshekke júk ” degan maqol ayollarning topqirligi va hiylakorligini ifodalaydi. Shoira ushbu maqolni **ironik kontekstda** qo‘llab, keyingi misralarda:

“Er”diń júz esheklik hiylesin kórip,

Jaǵamdı usladım, shoshıp jamannan,— deb, hozirgi insonlarning xatti-harakatlarini tanqidiy nuqtayi nazardan tasvirlaydi. Bunda maqolning an’anaviy mazmuni kengaytirilib, mualliflik bahosi bilan to‘ldirilgan. Shoira erkaklarning hiylasini haddan tashqari bo‘rttirib tasvirlash orqali jamiyatdagi ma’naviy-axloqiy hodisalarni fosh etadi. Ushbu poetik usul orqali **satirik-ekspressiv ma’no** yuzaga keladi.

2. Muallif tomonidan maqollarning turli o‘zgarishlar bilan berilishi: N. To‘reshova ijodida maqol va matallarning transformatsiyalangan, ya’ni poetik maqsadga muvofiq ravishda o‘zgarishga uchragan turlari ham tez-tez uchraydi. Shoira xalq donishmandligini tayyor shaklda emas, balki o‘zining individual uslubiga, she’r ritmi va qofiyasiga moslashtirib qo‘llaydi. Bunday poetik qayta ishlash usuli lingvopoetikada **paremiyalarning mualliflik transformatsiyasi** deb ataladi. Bunday holatda maqolning asosiy semantik mazmuni saqlanib qoladi, biroq shakl jihatidan muayyan o‘zgarishlar yuz beradi.

“Danalar der: Baylıǵıńdur sawlıǵıń”

Sońǵı baylıq úyińdegi jawlıǵıń,

Bunnan artıq ǵáziyneni tawdı kim,

“Óli dúnya qoldı juwsań ketedi” – [4.23].

Ushbu she’r misralarida berilgan maqolning asosiy shakli **“**Birinshi baylıq – densawlıq, ekinshi baylıq – aq jawlıq, úshinshi baylıq – jup sawlıq” tarzida bo‘lib, shoira mazkur paremiyani poetik matnga moslashtirish uchun uning tuzilishiga o‘zgartirish kiritgan. Maqolning birinchi va ikkinchi misralari she’rning qofiyasiga mos ravishda qayta ishlangan bo‘lsa, uchinchi misrasi tushirib qoldirilgan. Bundan tashqari, she’rning to‘rtinchi misrasidagi **“O‘li dunyo qo‘lni yuvsang ketadi”** hikmatli so‘zi shoiraning g‘oyaviy fikrini yanada chuqurlashtirishga xizmat qiladi. Ushbu misrada dunyo boyliklarining o‘tkinchiligi, moddiy narsalarning vaqtinchalik ekanligi falsafiy mazmunda ifodalangan.

“Mıń jerinen isense de kúshine,

“Jamannan qash, qutıl”’, – xalıq desedi” [4.100]. She’rda berilgan maqol **“Jamannan qash, jaqsıǵa jantas”** maqolining qisqartirilgan shakli hisoblanadi.

Erte turǵannıń der ırısqısı artıq,

Durıs keleǵoyǵay bul hikmetli gáp [4.107].

“Erte turǵan jigittiń ırısı artıq, erte turǵan qatınnıń bir isi artıq**”** maqoli o‘zgartirilgan holda qo‘llangan. Buni ham muallifning so‘z tanlash mahoratining bir ko‘rinishi, deb aytish mumkin.

Shoira ijodida maqollarning **birinchi qatorining qisqartirib qo‘llanish holati** ko‘p uchraydi. Masalan:

“Jer ókpeler taslamasań tuqımdı,

“...tapta qalsın...” degen sóz bar burıńǵı” [4.147].

Bunda **“Qapta qalǵansha, tapta qalsın”** maqolining birinchi qatori qisqartirilgan.

Maqol va matallar tarkibida **qarama-qarshi ma’nodagi antonim so‘zlar** tez-tez uchraydi. Bu, asosan, she’rning ta’sirchanligini oshirishda katta xizmat qiladi. Masalan:

“Durıs eken dana xalqım tolǵaydı,

“Jaqsılar hesh birin-biri qıymaydı”,

“Jaman bolsa tuwısqanıń jat bolar”,

Sarsıǵannan súyekleriń sap bolar”[4.145].

N. To‘reshova ijodining yana bir o‘ziga xos xususiyati shundaki, u nafaqat xalq tilida qo‘llanib kelayotgan **frazeologizmlar va maqol-matallardan** foydalanadi, balki o‘zi ham ularga o‘xshash, didaktik mazmunga ega bo‘lgan misralarni yaratadi. Ular shoiraning individual fikrlari va qarashlarini ifodalagani sababli, **aforizmlar** sifatidagi vazifasini ham baholashimiz mumkin. Masalan:

“Doslıqtı ne bilsin kewili soqır,

Birin alsam, mennen ekini kúter,

Húrmetti ne bilsin kewili soqır,

Jaqsı tilegińdi jún etip túter” (“Tórtlikler” 107).

“Jaqsı menen ótken bir demlik gúrrińń,

Bir jaqsı kitapdur, hikmetli sabaq” [4.113].

XULOSA. Xulosa qilib aytganda, N. To‘reshova ijodida maqol va matallar badiiy matnning **g‘oyaviy-estetik vositasi** sifatida xizmat qiladi. Ular orqali shoira xalq donishmandligini yangilabgina qolmay, o‘zining **mualliflik pozitsiyasini** ham aniq ifodalagan. Maqol va matallarning o‘zgarmagan holda qo‘llanilishi poetik matnga tabiiylik, milliy kolorit va ekspressivlik bag‘ishlaydi. Shu sababli bunday birliklar shoiraning individual uslubiga xos xususiyatlarni aniqlashda **muhim lingvopoetik vosita** hisoblanadi.

TERMINOLOGIYANING NAZARIY ASOSLARI VA UNING MEHMONDO‘STLIK HAMDA GASTRONOMIK TURIZM SOHASIDA AMAL QILISH XUSUSIYATI

Yuldashev Mansurjon Alijanovich
Namangan Davlat texnika universiteti, Xorijiy tillar kafedrasi ilmiy tadqiqotchisi, Namangan, O‘zbekiston
E-mail: ymansur201@gmail.com
ORCID: https://orcid.org/0009-0006-2296-0688

Annotatsiya: *Maqolada terminologiyaning nazariy asoslari hamda ularning mehmondo‘stlik va gastronomik turizm sohasi terminologiyasida amal qilish xususiyatlari qiyosiy-tipologik va konseptual tahlil asosida o‘rganiladi. Tadqiqot materialini terminshunoslikka oid ilmiy adabiyotdan ajratib olingan «termin» tushunchasiga oid 40 ta ilmiy ta’rif hamda mehmondo‘stlik va gastronomik turizmga oid 300 ta terminologik birlik tashkil etdi. Tahlil natijasida termin tushunchasiga oid yondashuvlar to‘rt guruhga - struktur-semantik (37,5%), funksional-tizimli (30,0%), kognitiv (20,0%) va diskursiv (12,5%) - ajratildi. Terminlarning tushunchaviy tavsifida uch nazariy paradigma - klassik (E.Wüster), sotsiokognitiv (R.Temmerman) va diskursiv (F.Gaudin) yondashuvlarning qo‘llanilish ulushi mos ravishda 34,0%, 41,0% va 25,0% ni tashkil etdi. Aniqlandiki, mehmondo‘stlik va gastronomik turizm terminologiyasi ikki qutbli tabiatga ega: birliklarning 44,0 foizi operatsion-iqtisodiy (standartlashuvchi) qatlamga, 56,0 foizi milliy-madaniy konnotativ qatlamga mansub. Tadqiqot ushbu terminosistemani «ochiq» (dinamik, uzluksiz yangilanuvchi) tizim sifatida tavsiflash maqsadga muvofiqligini asoslaydi.*

Kalit so‘zlar: *termin, terminologiya, terminshunoslik, mehmondo‘stlik turizmi, gastronomik turizm, struktur-semantik yondashuv, funksional-tizimli yondashuv, kognitiv terminologiya, sotsiokognitiv nazariya, diskursiv yondashuv, terminlashuv, lingvomadaniy qatlam.*

ТЕОРЕТИЧЕСКИЕ ОСНОВЫ ТЕРМИНОЛОГИИ И ОСОБЕННОСТИ ИХ ФУНКЦИОНИРОВАНИЯ В СФЕРЕ ГОСТЕПРИИМСТВА И ГАСТРОНОМИЧЕСКОГО ТУРИЗМА

Аннотация: *В статье на основе сравнительно-типологического и концептуального анализа рассматриваются теоретические основы терминологии и особенности их функционирования в терминологии сферы гостеприимства и гастрономического туризма. Материалом исследования послужили 40 научных определений понятия «термин», извлечённых из терминоведческой литературы, а также 300 терминологических единиц сферы гостеприимства и гастрономического туризма. В результате анализа подходы к понятию «термин» разделены на четыре группы - структурно-семантический (37,5%), функционально-системный (30,0%), когнитивный (20,0%) и дискурсивный (12,5%). Доля применения трёх теоретических парадигм - классической (Э.Вюстер), социокогнитивной (Р.Теммерман) и дискурсивной (Ф.Годен) - составила соответственно 34,0%, 41,0% и 25,0%. Установлено, что терминология гостеприимства и гастрономического туризма имеет двухполюсную природу: 44,0% единиц относятся к операционно-экономическому (стандартизируемому) слою, 56,0% - к национально-культурному коннотативному слою. Исследование обосновывает целесообразность описания данной терминосистемы как «открытой» (динамической, непрерывно обновляющейся) системы.*

Ключевые слова: *термин, терминология, терминоведение, гостиничный туризм, гастрономический туризм, структурно-семантический подход, функционально-системный подход, когнитивная терминология, социокогнитивная теория, дискурсивный подход, терминологизация, лингвокультурный слой.*

THEORETICAL FOUNDATIONS OF TERMINOLOGY AND THE FEATURES OF THEIR FUNCTIONING IN THE FIELD OF HOSPITALITY AND GASTRONOMIC TOURISM

Abstract: *The article examines, through comparative-typological and conceptual analysis, the theoretical foundations of terminology and the features of their functioning in the terminology of hospitality and gastronomic tourism. The research material comprises 40 scholarly definitions of the concept “term” extracted from terminological literature, as well as 300 terminological units of hospitality and gastronomic tourism. The analysis grouped approaches to the concept “term” into four types - structural-semantic*

(37.5%), functional-systemic (30.0%), cognitive (20.0%) and discursive (12.5%). The application share of three theoretical paradigms - classical (E.Wüster), sociocognitive (R.Temmerman) and discursive (F.Gaudin) - amounted to 34.0%, 41.0% and 25.0% respectively. It was found that the terminology of hospitality and gastronomic tourism has a two-pole nature: 44.0% of the units belong to the operational-economic (standardisable) layer and 56.0% to the national-cultural connotative layer. The study substantiates the appropriateness of describing this terminological system as an "open" (dynamic, continuously updated) system.

Keywords: *term, terminology, terminology science, hospitality tourism, gastronomic tourism, structural-semantic approach, functional-systemic approach, cognitive terminology, sociocognitive theory, discursive approach, terminologisation, linguocultural layer.*

1. KIRISH

Jamiyat rivojlangani sari kasb va faoliyat sohalari kengayib boradi; bu esa yangi tushunchalarni aniq va bir ma'noli nomlash ehtiyojini keltirib chiqaradi. Tilshunoslikning terminshunoslik yo'nalishi ana shu ehtiyojga xizmat qilib, ma'lum sohaga oid terminlarni o'rganadi va ularning mohiyatini jamiyat a'zolariga tushuntiradi. H.Boltaboyev V.Danilenkoning ta'rifini keltirar ekan, terminologiyani «umumadabiy tilning mustaqil funksional turi, ya'ni an'anaviy fan tili» sifatida izohlaydi. Demak, terminologiya - ma'lum ilmiy yoki ishlab chiqarish sohasi doirasida shakllangan maxsus terminlar tizimi hamda ularning yasalish mexanizmlari, semantik xususiyatlari va kommunikativ-kognitiv faoliyati haqidagi mustaqil ilmiy ta'limotdir.

Mavzuning dolzarbligi bir necha jihat bilan izohlanadi. Birinchidan, so'nggi yillarda mehmondo'stlik va gastronomik turizm mustaqil iqtisodiy tarmoq sifatida jadal rivojlanmoqda va o'z terminologik apparatini shakllantirmoqda. Ikkinchidan, ushbu terminosistema texnik yoki tibbiy terminologiyadan farqli o'laroq ikki qutbli - bir tomondan xalqaro standartlashuvga intiladigan, ikkinchi tomondan yuqori darajada milliy-madaniy markirovkalangan - tabiatga ega. Uchinchidan, sohaning nazariy asoslari milliy tilshunoslikda yaxlit tarzda hali yetarlicha tavsiflanmagan. Bu esa terminologiyaning nazariy negizini aynan mehmondo'stlik va gastronomik turizm materialida o'rganishni dolzarb vazifaga aylantiradi.

Tadqiqotning maqsadi - «termin» va «terminologiya» tushunchalariga oid mavjud nazariy yondashuvlarni qiyosiy tahlil qilish, ularni tizimlashtirish hamda mehmondo'stlik va gastronomik turizm terminologiyasining tipologik xususiyatlarini shu nazariy negiz asosida aniqlashdan iborat.

Tadqiqot obyekti - terminologiyaning nazariy asoslari va mehmondo'stlik hamda gastronomik turizm terminlari; predmeti esa termin tushunchasiga oid yondashuvlar, ularning tasnifi va mazkur terminologiyaning tushunchaviy-tipologik xususiyatlaridir.

Tadqiqotning ilmiy yangiligi shundan iboratki, unda «termin» tushunchasiga oid yondashuvlar to'rt guruhli tipologiyada tizimlashtiriladi, uch nazariy paradigmaning (klassik, sotsiokognitiv, diskursiv) mehmondo'stlik va gastronomik turizm terminologiyasiga qo'llanilish darajasi aniqlanadi hamda ushbu terminosistemaning ikki qutbli, ochiq tabiati asoslanadi.

Maqola quyidagicha tuzilgan: ikkinchi bo'limda termin tushunchasiga oid nazariy adabiyot tahlil qilinadi va tadqiqot bo'shlig'i aniqlanadi; uchinchi bo'limda material va metodlar tavsiflanadi; to'rtinchi bo'limda natijalar jadval va diagrammalarda keltirilib izohlanadi; beshinchi bo'limda xulosa va istiqbollar beriladi.

2. MAVZUGA OID ADABIYOTLAR TAHLILI

Terminshunoslik XX asrning 30-yillaridan e'tiboran umumiy tilshunoslikdan ajralib, o'ziga xos predmet va metodologiyaga ega mustaqil fanga aylandi. Uning nazariy negizini shakllantirishda Wüster maktabi alohida o'rin tutadi: avstriyalik tilshunos E.Wüster ishlab chiqqan klassik terminologiya nazariyasiga ko'ra, terminlar tushunchalarning qat'iy tasnifiga asoslanib, oldindan belgilangan kategoriyalar hamda tushunchalararo iyerarxik bog'liqlik asosida tizimlashtiriladi [1].

«Termin» tushunchasining ta'rifi borasida olimlarning qarashlari asosan mushtarak. Termin atamasi lotincha terminus («chegara, tugash») so'zidan olingan. A.Reformatskiy terminni maxsus sohalarda qo'llaniluvchi, ekspressivlikdan holi, qat'iy ma'noga ega leksik birlik sifatida ta'riflaydi [2]. B.Golovin uni ayni soha doirasidagi kasbiy tushunchani ifodalovchi birlik deb izohlaydi [3]. V.Shevchuk terminni tarixiy-semantik nuqtai nazardan yoritsa, V.Leychik uni maxsus fan yoki amaliy faoliyat doirasida qo'llaniladigan, aniq semantik chegaraga ega leksik birlik sifatida baholaydi [4]. O'zbek tilshunosi P.Nishonov ham terminni «maxsus soha tushunchasini bildiruvchi, semantikasi shu soha bilan cheklangan leksik birlik» sifatida ta'riflaydi [5].

Ushbu ta'riflarning qiyosiy tahlili ikki asosiy uslubiy yo'nalishni ko'rsatadi. A.Reformatskiy va B.Golovin ta'riflari terminni struktur-semantik jihatdan, mustaqil belgi sifatida ko'radi; V.Shevchuk va V.Leychik yondashuvi esa terminning diaxron va funksional-tizimli tabiatini birinchi o'ringa qo'yadi. Terminning tizim ichidagi hokim va tobe elementlari

munosabatini A.N.Kojin batafsil tahlil qilgan [6]; terminning kognitiv-kommunikativ tabiatiga V.M.Leychik va R.G.Piotrovskiy [4; 7], terminlashuv jarayoniga esa V.P.Danilenko va uning izdoshlari e'tibor qaratgan [8].

Zamonaviy terminshunoslikda Wüster maktabining klassik yondashuviga muqobil sifatida ikki yangi paradigma shakllandi. R.Temmermanning sotsiokognitiv nazariyasi tushunchaning bir ma'noliligi va qat'iy chegaralanganligi haqidagi klassik tamoyillarni tanqid qilib, koʻplab sohalar terminologiyasi markazi (prototipik yadro) va periferiyasi mavjud, kontekstga qarab kengayadigan kategoriyalarga asoslanishini koʻrsatadi [9]. F.Gaudin ishlab chiqqan diskursiv (sotsioterminologik) yondashuv esa terminni matndan tashqaridagi mavhum birlik emas, balki muayyan diskursda real qoʻllanishda shakllanadigan oʻzgaruvchan birlik sifatida tadqiq qiladi [10].

Mavjud adabiyot tahlili muhim boʻshliqni koʻrsatadi: termin tushunchasiga oid koʻplab ta'riflar mavjud boʻlsa-da, ular mehmondoʻstlik va gastronomik turizm terminologiyasi materialida yaxlit tizimlashtirilmagan, zamonaviy paradigmalarning (sotsiokognitiv, diskursiv) mazkur sohaga qoʻllanilish darajasi esa miqdoriy jihatdan baholanmagan. Ushbu maqola aynan shu boʻshliqni toʻldirishga qaratilgan.

3. TADQIQOT METODOLOGIYASI

Tadqiqot aralash (sifatiy-miqdoriy) dizayn asosida amalga oshirildi. Sifatiy tahlil termin tushunchasiga oid yondashuvlarni va nazariy paradigmalarni izohlash uchun, miqdoriy tahlil esa yondashuvlar va terminlarning taqsimotini chastota koʻrsatkichlarida ifodalash uchun qoʻllanildi.

Tadqiqot materialini ikki qismli tanlanma tashkil etdi: birinchidan, terminshunoslikka oid ilmiy adabiyotdan ajratib olingan «termin» tushunchasiga oid ta'riflar; ikkinchidan, izohli va tarmoq lugʻatlari, restoran menyulari hamda turistik matnlardan olingan mehmondoʻstlik va gastronomik turizm terminlari. Material tarkibi 1-jadvalda keltirilgan.

1-jadval. Tadqiqot materialining tarkibi

Material turi	Manba	Birliklar soni
«Termin» tushunchasiga oid ilmiy ta'riflar	terminshunoslik ilmiy adabiyoti	40
Mehmondoʻstlik va gastronomik turizm terminlari	izohli/tarmoq lugʻatlari, menyu, turistik matnlar	300
Jami tahlil birliklari	-	340

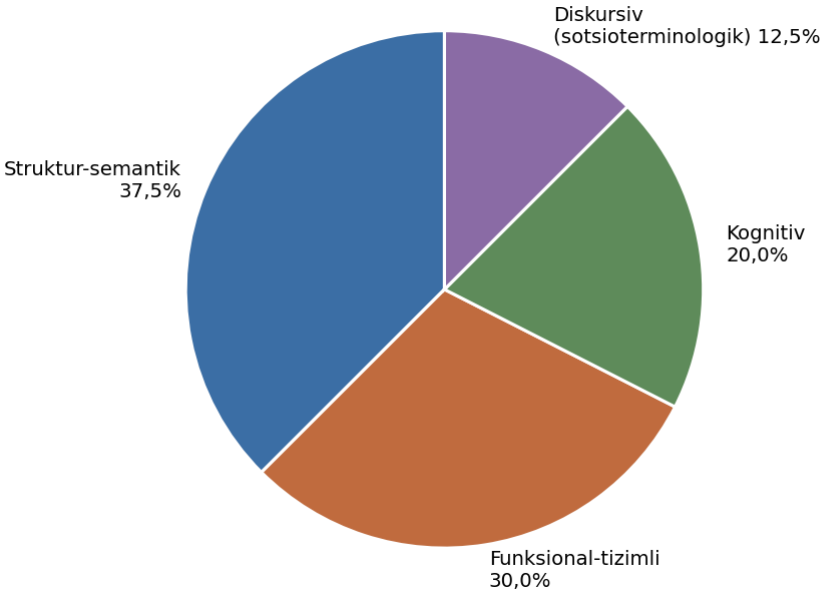
Tahlil birligi sifatida, birinchi qismda - «termin» tushunchasiga oid alohida ilmiy ta'rif yoki qarash, ikkinchi qismda esa mehmondoʻstlik yoki gastronomik turizmga oid terminologik birlik olindi. Terminshunoslik ta'riflari ular ilgari surgan asosiy uslubiy yoʻnalishga koʻra kodlandi; terminlar esa ularning ajratuvchi belgilari, nazariy paradigmaga mosligi va soha qatlamiga mansubligi boʻyicha tavsiflandi.

Tadqiqotda quyidagi metodlardan foydalanildi: qiyosiy-tipologik metod - ta'riflar va paradigmalarni oʻzaro qiyoslash uchun; konseptual-ta'rifiy tahlil - termin tushunchasining mazmuniy belgilarini ochib berish uchun; komponent va kontekstual tahlil - terminlarning semantik va lingvomadaniy yuklamasini aniqlash uchun; miqdoriy (statistik) tahlil - yondashuvlar va terminlarning taqsimotini hisoblash uchun; tavsifiy metod - natijalarni tizimlashtirish uchun.

Terminning ajratuvchi belgilari operatsional tarzda beshta mezon boʻyicha belgilandi: aniqlik, bir ma'nolilik, normativlik, uslubiy neytrallik va sistemalilik. Nazariy paradigmalar esa klassik (strukturaviy-tushunchaviy), sotsiokognitiv va diskursiv yondashuvlar sifatida ajratildi. Baholash ikki bosqichda - mustaqil kodlash va kelishmovchiliklarni muhokama yoʻli bilan bartaraf etish - orqali amalga oshirildi.

Tadqiqotning cheklovlari. Birinchidan, ta'riflar tanlanmasi eng koʻp iqtiboslanadigan mualliflar bilan chegaralangan. Ikkinchidan, terminni muayyan paradigmaga yoki belgiga kiritish qisman ekspert talqiniga tayanadi. Uchinchidan, ogʻzaki xizmat nutqi materiali tahlilga kiritilmagan. Jadvallardagi foizlar bir kasr belgigacha yaxlitlangani sababli ayrim ustunlarda yigʻindi 100 foizdan ±0,1 ga farq qilishi mumkin. Bu cheklovlar natijalarni umumlashtirishda hisobga olinishi lozim.

4. NATIJALAR VA TAHLIL



4.1. Termin tushunchasiga oid yondashuvlarning taqsimoti

«Termin» tushunchasiga oid 40 ta ilmiy ta'rifning tahlili ularni toʻrt asosiy uslubiy yondashuvga ajratish imkonini berdi. Ularning taqsimoti 2-jadval va 1-diagrammada berilgan.

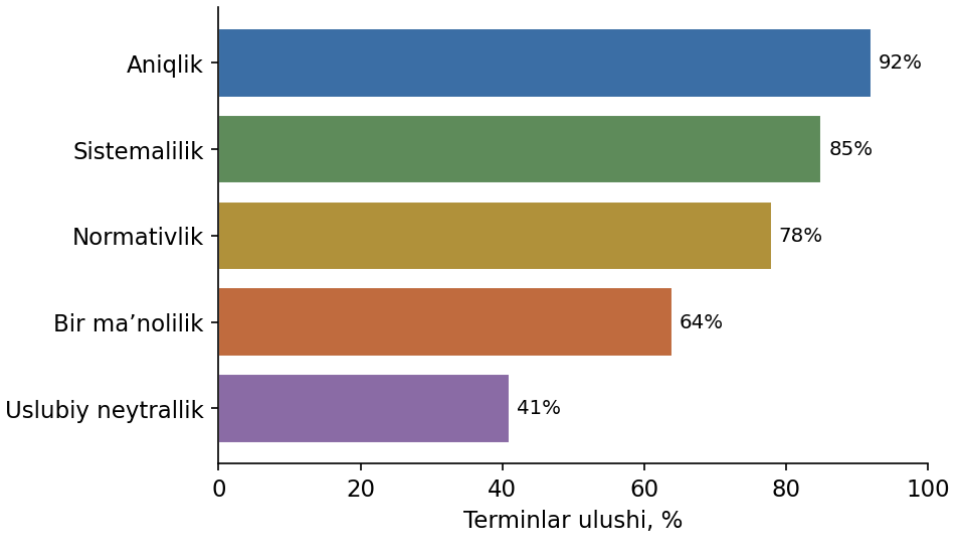
2-jadval. Termin tushunchasiga oid yondashuvlarning taqsimoti (n = 40)

Yondashuv	Soni	Ulushi, %
Struktur-semantik	15	37,5
Funksional-tizimli	12	30,0
Kognitiv	8	20,0
Diskursiv (sotsioterminologik)	5	12,5
Jami	40	100,0

1-diagramma. Termin tushunchasiga oid yondashuvlarning taqsimoti (n = 40)

Ma’lumotlardan ko‘rinadiki, eng katta ulush struktur-semantik yondashuvga to‘g‘ri keladi (37,5%): A.Reformatskiy va B.Golovin ta’riflari terminni mustaqil, aniq ma’noli belgi sifatida ko‘radi. Funksional-tizimli yondashuv (30,0%) terminning terminosistema ichidagi o‘rni va diaxron tabiatini birinchi o‘ringa qo‘yadi (V.Shevchuk, V.Leychik). Kognitiv (20,0%) va diskursiv (12,5%) yondashuvlar nisbatan yangi bo‘lib, terminni bilim strukturasi hamda diskurs mahsuli sifatida talqin qiladi. Yondashuvlar orasidagi bu tafovutlar terminning yagona universal ta’rifi mavjud emasligini ko‘rsatadi.

4.2. Terminning ajratuvchi belgilari



Ilmiy adabiyotda termin bir qator asosiy belgilar bilan tavsiflanadi. Ushbu belgilar va ularning mohiyati 3-jadvalda umumlashtirilgan.

3-jadval. Terminning ajratuvchi belgilari

Belgi	Mohiyati
Aniqlik	tushunchani noaniqlik va umumiylikdan xoli, aniq ifodalash
Bir ma’nolilik	polisemiyadan xoli, kontekstdan mustaqil semantik barqarorlik
Normativlik	adabiy til me’yorlariga va terminologik standartlarga muvofiqlik
Uslubiy neytrallik	ekspressiv-emotsional bo‘yoqdan holi bo‘lish
Sistemalilik	muayyan terminosistema ichida o‘rin egallash va bog‘lanish

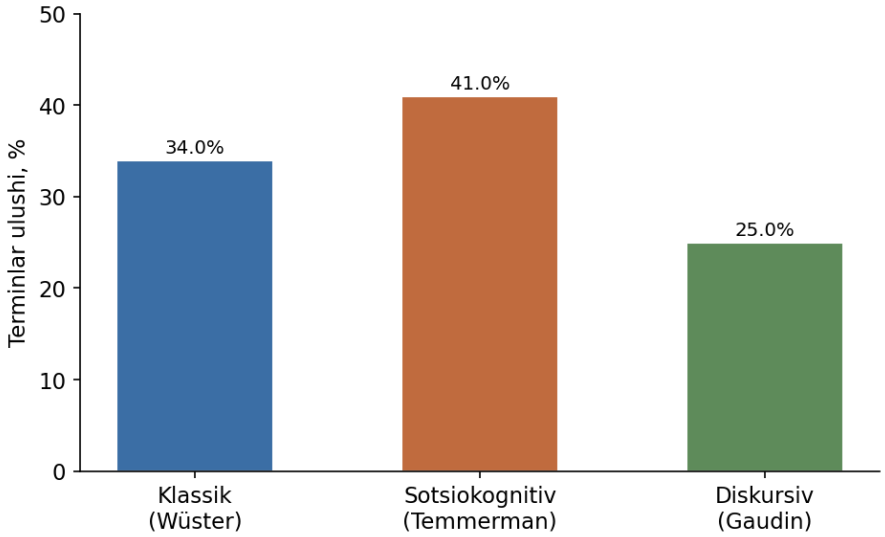
Mehmondo‘stlik va gastronomik turizmga oid 300 ta terminda ushbu belgilarning namoyon bo‘lish darajasi 2-diagrammada ko‘rsatilgan.

2-diagramma. Terminlarda ajratuvchi belgilarning namoyon bo‘lish darajasi (n = 300)

Tahlil shuni ko‘rsatadiki, aniqlik (92%) va sistemalilik (85%) eng barqaror belgilar hisoblanadi, normativlik (78%) va bir ma’nolilik (64%) esa nisbatan pastroq. Eng past ko‘rsatkich uslubiy neytrallikda qayd etildi (41%): bu mehmondo‘stlik va gastronomik turizm terminologiyasining o‘ziga xos belgisi bo‘lib, undagi ko‘plab birliklar (dasturxon, choyxona, palov)

milliy-madaniy konnotatsiyaga ega va uslubiy jihatdan betaraf emas. Demak, klassik terminshunoslik talab qiladigan uslubiy neytrallik bu sohada har doim ham amal qilmaydi.

4.3. Termin mohiyatini talqin qiluvchi nazariy paradigmalar



Zamonaviy terminshunoslikda termin mohiyati uch nazariy paradigma orqali talqin qilinadi. Ularning qiyosiy tavsifi 4-jadvalda umumlashtirilgan.

4-jadval. Termin mohiyatini talqin qiluvchi nazariy paradigmalarning qiyosiy tavsifi

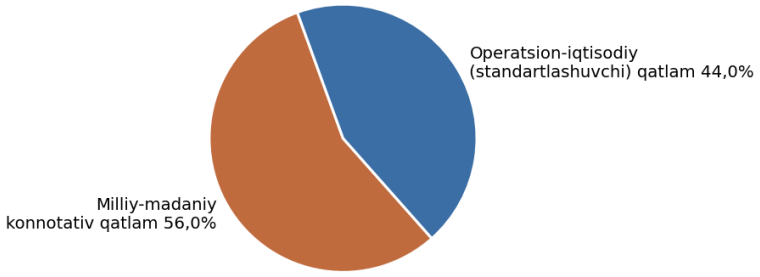
Paradigma	Vakili	Asosiy tezisi	Termin talqini
Klassik (strukturaviy-tushunchaviy)	E.Wüster	tushuncha bir ma’noli va qat’iy chegaralangan	oldindan belgilangan kategoriya
Sotsiokognitiv	R.Temmerman	markaz (prototipik yadro) va periferiya mavjud	kontekstda kengayuvchi bilim kategoriyasi
Diskursiv (sotsioterminologik)	F.Gaudin	ma’no lug‘atda emas, diskursda yuzaga keladi	janr registriga bog‘liq o‘zgaruvchan birlik

Mehmondo‘stlik va gastronomik turizmga oid 300 ta terminni ushbu paradigmalar kesimida baholash quyidagi taqsimotni berdi (3-diagramma).

3-diagramma. Terminlarning nazariy paradigmalar bo‘yicha taqsimoti (n = 300)

Natijalar ko‘rsatadiki, mehmondo‘stlik va gastronomik turizm terminlarining eng katta qismi sotsiokognitiv paradigma bilan izohlanadi (41,0%): hospitality, cuisine kabi asosiy terminlar qat’iy bir ma’noli emas, balki markazi va periferiyasi mavjud prototipik kategoriyalardir. Diskursiv paradigma (25,0%) esa gastronomik terminlarning turli janrlarda (turistik qo‘llanma, restoran menyusi, reklama matni) turlicha semantik yuklama olishini izohlaydi. Klassik paradigma (34,0%) asosan operatsion-iqtisodiy terminlarga (ADR, RevPAR) mos keladi.

4.4. Mehmondo‘stlik va gastronomik turizm terminologiyasining tipologik xususiyati



Mehmondo‘stlik va gastronomik turizm terminologiyasini alohida terminosistema sifatida ajratish uchun uning boshqa sohaviy terminosistemalardan farqini aniqlash zarur. Qiyosiy tavsif 5-jadvalda keltirilgan.

5-jadval. Mehmondo‘stlik/gastronomik va texnik/tibbiy terminologiyaning qiyosiy tavsifi

Parametr	Texnik/tibbiy terminologiya	Mehmondo‘stlik/gastronomik turizm terminologiyasi
Standartlashuv	yuqori, xalqaro (ISO, IUPAC, ICD)	qisman (ADR, RevPAR); milliy qatlam standartlashmagan
Konnotatsiya	denotativ-neytral	konnotativ jihatdan boy (dasturxon, choyxona, palov)
Yangilanish manbai	ilmiy-texnik kashfiyot	ijtimoiy amaliyot, iste’molchi didi, raqamli kommunikatsiya
Tizim tabiati	yopiq (statik, me’yorlashgan)	ochiq (dinamik, uzluksiz yangilanuvchi)

Jadvaldan ko‘rinadiki, mehmondo‘stlik va gastronomik turizm terminologiyasi ikki qutbli tabiatga ega: bir tomondan xalqaro standartlashuvga intiladigan operatsion-iqtisodiy qatlam, ikkinchi tomondan yuqori darajada milliy-madaniy markirovkalangan konnotativ qatlam. Bu ikki qatlamning korpusdagi nisbati 4-diagrammada ko‘rsatilgan.

4-diagramma. Terminologiyaning ikki qutbli tarkibi (n = 300)

Koʻrinib turibdiki, milliy-madaniy konnotativ qatlam ustunlik qiladi (56,0%), operatsion-iqtisodiy qatlam esa 44,0 foizni tashkil etadi. Aynan shu ikki qutblilik - standartlashuvga moyillik va madaniy-konnotativ boylik oʻrtasidagi muvozanat - mazkur terminologiyaning oʻziga xos tipologik belgisini tashkil etadi. Milliy-madaniy qatlamning ustunligi terminologiyani «yopiq» emas, «ochiq» (dinamik) terminosistema sifatida tavsiflashni asoslaydi.

4.5. Lingvomadaniy markirovkalangan terminlar

Mehmondoʻstlik va gastronomik turizm terminlarining muhim qismi lingvomadaniy qatlamga mansub boʻlib, ular shunchaki taom yoki xizmat nomlari emas, balki marosim va ijtimoiy munosabatlarni ham ifodalaydi (6-jadval).

6-jadval. Milliy-madaniy markirovkalangan terminlar va ularning lingvomadaniy mazmuni

Termin	Lingvomadaniy mazmuni
dasturxon yozmoq	taomga bogʻliq marosim va ijtimoiy munosabatni ifodalovchi birlik
nahorgi osh	jamoaviy marosim taomi konsepti
palov (pilaf)	tarixiy, mintaqaviy va madaniy kontekstni oʻzida jamlagan termin
choyxona	ijtimoiy makon va mehmondoʻstlik ramzi
tuxumbarak	milliy taom nomi, marosim va anʼana bilan bogʻliq
kulinar meros	ijtimoiy-maʼnaviy jarayonning lingvistik ifodasi

Bunday terminlarni oʻrganish faqat lingvistik emas, antropologik va madaniyatshunoslik nuqtai nazaridan ham qimmatlidir: ular orqali turizm sohasi va mahalliy jamoalarning ijtimoiy-madaniy xususiyatlari ifodalanadi.

4.6. Natijalarning muhokamasi

Olingan natijalar termin tushunchasiga oid yondashuvlarning rang-barangligini va yagona universal taʼrif mavjud emasligini tasdiqlaydi. Struktur-semantik hamda funksional-tizimli yondashuvlarning birgalikdagi ustunligi (67,5%) terminni ham tuzilish, ham tizim jihatidan koʻrib chiqish zarurligini koʻrsatadi. Shu bois mazkur tadqiqotda struktur-semantik va funksional-tizimli yondashuvlar sintezi tanlab olindi: termin bir tomondan aniq leksik birlik, ikkinchi tomondan tarixiy va ijtimoiy-madaniy kontekstda shakllangan funksional-dinamik birlik sifatida talqin qilinadi.

Sotsiokognitiv paradigmaning yuqori ulushi (41,0%) va uslubiy neytrallik koʻrsatkichining pastligi (41%) bir-birini tasdiqlaydi: mehmondoʻstlik va gastronomik turizm terminlari qatʼiy bir maʼnoli tushunchalar emas, balki kontekstga qarab kengayadigan, madaniy konnotatsiyaga boy prototipik kategoriyalardir. Bu R.Temmerman [9] va F.Gaudin [10] ilgari surgan qoidalarni empirik tasdiqlaydi.

Natijalarning amaliy ahamiyati shundaki, ular mazkur terminologiyani standartlashtirishda ikki qatlamga alohida yondashish zarurligini koʻrsatadi: operatsion-iqtisodiy qatlam xalqaro standartlarga moslashtirilishi, milliy-madaniy qatlam esa izohli-lingvomadaniy tavsif bilan qamrab olinishi lozim.

5. XULOSA

Oʻtkazilgan qiyosiy-tipologik va konseptual tahlil quyidagi xulosalarga olib keladi.

Birinchidan, «termin» tushunchasiga oid yondashuvlar toʻrt guruhga - struktur-semantik (37,5%), funksional-tizimli (30,0%), kognitiv (20,0%) va diskursiv (12,5%) - ajratiladi. Terminning yagona universal taʼrifi mavjud emas, shu bois mazkur tadqiqotda struktur-semantik va funksional-tizimli yondashuvlar sintezi qoʻllanildi.

Ikkinchidan, terminning asosiy ajratuvchi belgilari - aniqlik, bir maʼnolilik, normativlik, uslubiy neytrallik va sistemalilik boʻlib, mehmondoʻstlik va gastronomik turizm terminlarida ular turlicha darajada namoyon boʻladi; uslubiy neytrallikning pastligi (41%) esa sohaning oʻziga xos belgisidir.

Uchinchidan, termin mohiyatini talqin qiluvchi uch paradigma - klassik, sotsiokognitiv va diskursiv - mazkur sohaga mos ravishda 34,0%, 41,0% va 25,0% ulushda qoʻllaniladi; sotsiokognitiv paradigmaning ustunligi terminlarning prototipik-kategorial tabiatini tasdiqlaydi.

To‘rtinchidan, mehmondo‘stlik va gastronomik turizm terminologiyasi ikki qutbli tabiatga ega: birliklarning 44,0 foizi operatsion-iqtisodiy (standartlashuvchi), 56,0 foizi milliy-madaniy konnotativ qatlamga mansub. Bu ikki qutblilik uni texnik va tibbiy terminologiyadan farqlovchi asosiy tipologik belgidir.

Beshinchidan, milliy-madaniy qatlamning ustunligi va terminologiyaning uzluksiz yangilanib borishi mazkur terminosistemani «ochiq» (dinamik) tizim sifatida tavsiflashni asoslaydi.

Amaliy tavsiyalar: (a) mehmondo‘stlik va gastronomik turizm terminologiyasining izohli-lingvomadaniy lug‘atini yaratish; (b) operatsion-iqtisodiy qatlamni xalqaro standartlarga moslashtirish; (c) milliy-madaniy terminlarni madaniyatshunoslik izohi bilan qamrab olish; (d) terminlarni tahlil qilishda struktur-semantik va funksional-tizimli yondashuvlar sintezidan foydalanish.

Tadqiqot istiqbollari tanlanma hajmini kengaytirish, gastronomik terminlarning turli janriy registrlardagi semantik o‘zgaruvchanligini korpus asosida tahlil qilish hamda ingliz va o‘zbek mehmondo‘stlik terminologiyasini qiyosiy o‘rganish bilan bog‘liq.

MUALLIFLAR BAYONOTLARI

Mualliflar hissasi. Maqola yakka muallif tomonidan tayyorlangan. Muallif tadqiqot konsepsiyasini ishlab chiqish, material to‘plash va tahlil qilish, natijalarni talqin etish hamda matnni yozish bosqichlarini mustaqil bajardi.

Manfaatlar to‘qnashuvi. Muallif manfaatlar to‘qnashuvi mavjud emasligini ma’lum qiladi.

Moliyalashtirish. Tadqiqot hech qanday tashqi moliyalashtirish manbaisiz, muallifning shaxsiy tashabbusi asosida amalga oshirilgan.

Otaxanova Shoxista Shuxratjon qizi
Namangan davlat universiteti doktoranti

Annotatsiya: *Maqolada raqamli ta’lim muhitida talabalarning kollaborativ loyiha faoliyatini rivojlantirish muammosining ilmiy-pedagogik adabiyotlarda o‘ rganilganlik darajasi PRISMA metodologiyasi asosida baholanadi. Beshta ma’lumotlar bazasidan aniqlangan 1220 ta yozuv bosqichma-bosqich saralanib, tizimli sharhga 87 ta manba kiritildi. Manbalar oltita tematik klasterga ajratilib, ularning yillar kesimidagi dinamikasi va metodologik sifati tahlil qilindi. Tahlil natijasida sohada beshta tadqiqot bo‘ shlig‘ i aniqlandi, ulardan eng jiddiysi — kollaborativ loyiha faoliyatini rivojlantirishning yaxlit pedagogik konsepsiyasi ishlab chiqilmaganligi hamda diagnostik instrumentariyning psixometrik validligi tekshirilmaganligidir. Milliy manbalarning atigi 6,9 foizi muammoni O‘ zbekiston oliy ta’limi konteksti bilan bog‘ lab o‘ rganadi, bu esa tadqiqot mavzusining dolzarbligini tasdiqlaydi.*

Kalit so‘ zlar: *tizimli sharh, PRISMA, kollaborativ loyiha faoliyati, raqamli ta’lim muhiti, tematik klasterlash, tadqiqot bo‘ shlig‘ i, bibliometrik tahlil, oliy ta’lim.*

SYSTEMATIC REVIEW OF THE BASICS OF USING COACHING SKILLS IN THE DEVELOPMENT OF STUDENTS’ COLLABORATIVE PROJECT ACTIVITIES

Abstract: *The article evaluates the extent to which the problem of developing students’ collaborative project activity in a digital learning environment has been studied in the pedagogical literature, applying the PRISMA methodology. Of 1220 records identified across five databases, 87 sources were included in the systematic review after a stepwise screening procedure. The included sources were grouped into six thematic clusters, and their distribution over time and methodological quality were analysed. The review revealed five research gaps, the most significant being the absence of an integral pedagogical concept for developing collaborative project activity and the lack of psychometric validation of diagnostic instruments. Only 6.9 per cent of the sources address the problem in the context of Uzbek higher education, which confirms the relevance of the present research.*

Keywords: *systematic review, PRISMA, collaborative project activity, digital learning environment, thematic clustering, research gap, bibliometric analysis, higher education.*

СИСТЕМАТИЧЕСКИЙ ОБЗОР ОСНОВ ИСПОЛЬЗОВАНИЯ КОУЧИНГОВЫХ НАВЫКОВ ПРИ РАЗРАБОТКЕ СОВМЕСТНЫХ ПРОЕКТНЫХ ДЕЯТЕЛЬНОСТИ УЧАЩИХСЯ

Аннотация: *В статье на основе методологии PRISMA оценена степень изученности проблемы развития коллаборативной проектной деятельности студентов в цифровой образовательной среде. Из 1220 записей, выявленных в пяти базах данных, в систематический обзор включены 87 источников. Источники распределены по шести тематическим кластерам, проанализированы их динамика по годам и методологическое качество. Выявлены пять исследовательских лакун, наиболее существенными из которых являются отсутствие целостной педагогической концепции и непроверенность психометрической валидности диагностического инструментария.*

Ключевые слова: *систематический обзор, PRISMA, коллаборативная проектная деятельность, цифровая образовательная среда, тематическая кластеризация, исследовательская лакуна.*

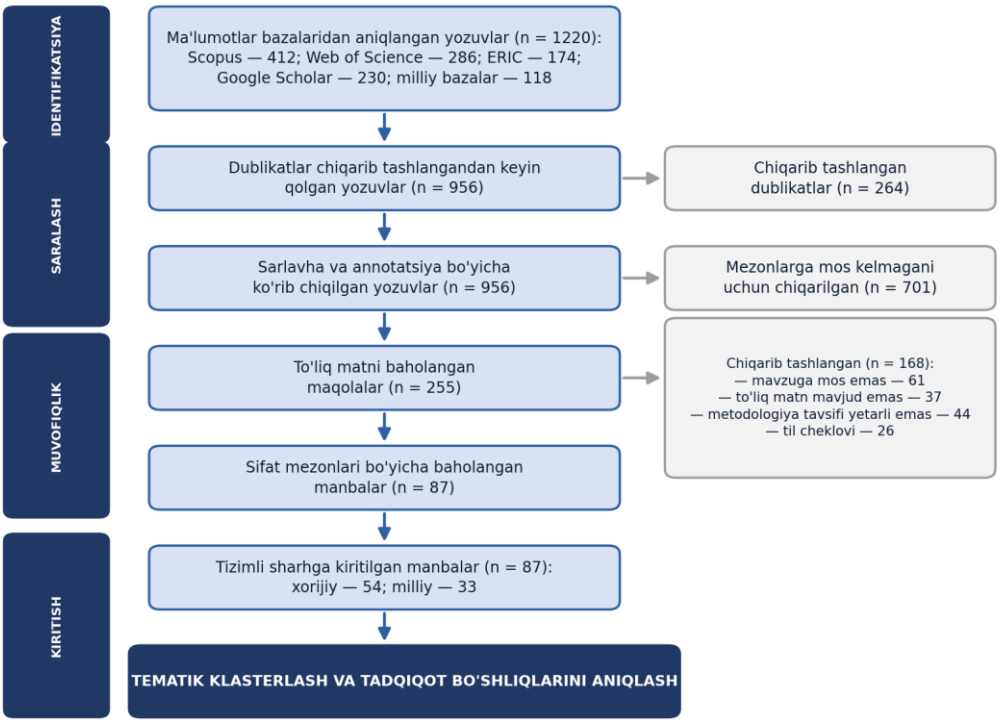
KIRISH

An’anaviy tavsifiy sharhlar (narrative review) muallifning subyektiv tanloviga tayanadi va shu sababli tanlanma noaniqligi (selection bias) riskiga ega. Zamonaviy pedagogika fanida bu cheklovni bartaraf etish uchun tizimli sharh (systematic review) metodologiyasi qo‘ llanilmoqda. Uning asosiy afzalligi — manbalarni tanlash jarayonining oldindan e’lon qilingan mezonlarga tayanishi va to‘ liq takrorlanuvchanligidir. Tibbiyot fanida ishlab chiqilgan va keyinchalik

ijtimoiy-gumanitar sohalarga moslashtirilgan PRISMA (Preferred Reporting Items for Systematic Reviews and Meta-Analyses) protokoli bugungi kunda bu yo‘ nalishdagi eng keng tarqalgan standart hisoblanadi.

TADQIQOT METODOLOGIYASI

Tizimli sharh PRISMA 2020 protokoli tavsiyalariga muvofiq to‘ rt bosqichda — identifikatsiya, saralash, muvofiqlikni baholash va kiritish bosqichlarida amalga oshirildi. Qidiruv 2025-2026 yil davomida quyidagi bazalarda o‘ tkazildi, Scopus, Web of Science, ERIC, Google Scholar hamda milliy bazalar (O‘ zbekiston OAK ro‘ yxatidagi jurnallar, ZiyoNET, dissertatsiyalar fondi).



Qidiruv strategiyasi quyidagi kalit so‘ zlar kombinatsiyasiga asoslandi, («collaborative learning» OR «collaborative project» OR «CSCL») AND («higher education» OR «university students») AND («digital environment» OR «online» OR «e-learning»); o‘ zbek va rus tillarida — «kollaborativ o‘ qitish», «loyiha faoliyati», «raqamli ta’lim muhiti» va ularning morfologik variantlari. Manbalarni kiritish va chiqarish mezonlari 1-jadvalda keltirilgan.

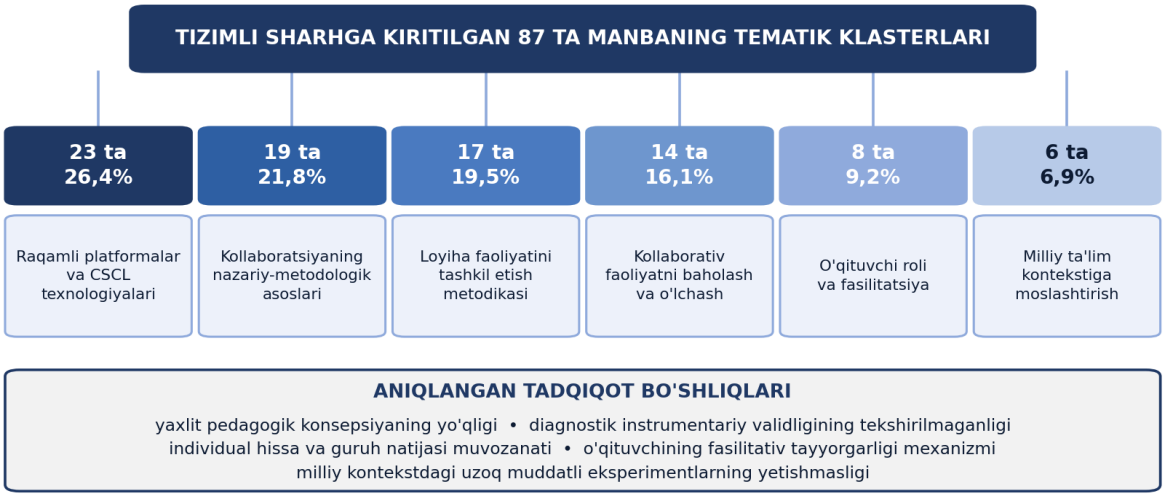
1-jadval. Manbalarni tizimli sharhga kiritish va chiqarish mezonlari

Parametr	Kiritish mezoni	Chiqarish mezoni
Nashr yili	2015–2026-yillar	2015-yilgacha bo‘ lgan nashrlar
Ta’lim bosqichi	Oliy ta’lim (bakalavriat, magistratura)	Maktab va maktabgacha ta’lim
Tadqiqot turi	Empirik tadqiqot, nazariy model, sharh	Tezis, blog, reklama xarakteridagi matn
Muhit	Raqamli yoki aralash (blended) muhit	Faqat an’anaviy auditoriya sharoiti
Til	Ingliz, o‘ zbek, rus tillari	Boshqa tillardagi nashrlar
Matn mavjudligi	To‘ liq matn ochiq yoki institutsional kirish orqali	Faqat annotatsiya mavjud

Saralash jarayoni ikki mustaqil ekspert tomonidan parallel ravishda bajarildi; kelishmovchiliklar uchinchi ekspert ishtirokida muhokama yo‘ li bilan hal etildi. Ekspertlararo kelishuv darajasi Koen kappa koeffitsienti orqali baholandi (κ = 0,83), bu esa yuqori muvofiqlikdan dalolat beradi. Manbalarning metodologik sifati to‘ rt mezon bo‘ yicha — tadqiqot savolining aniqligi, tanlanmaning asoslanganligi, ma’lumot yig‘ ish metodlarining tavsifi va statistik tahlilning adekvatligi bo‘ yicha uch balli shkalada baholandi. Kiritilgan manbalarni tematik klasterlash induktiv kodlash usulida amalga oshirildi. Saralash jarayonining bosqichma-bosqich natijalari 1-rasmda aks ettirilgan.

TADQIQOT NATIJALARI

1-rasm. Manbalarni tanlashning PRISMA oqim diagrammasi



Nashrlarning vaqt bo‘ yicha taqsimoti. Kiritilgan 87 ta manbaning yillar kesimidagi taqsimoti mavzuga bo‘ lgan qiziqishning keskin o‘ sganini ko‘ rsatadi (2-jadval). Nashrlarning 65,5 foizi 2021-yildan keyin chop etilgan, bu esa, bir tomondan, pandemiya davridagi majburiy masofaviy ta’lim tajribasi bilan, ikkinchi tomondan, birgalikda ishlash uchun mo‘ ljallangan raqamli xizmatlarning ommalashuvi bilan izohlanadi.

2-jadval. Kiritilgan manbalarning nashr yillari va metodologik sifati bo‘ yicha taqsimoti (n = 87)

Davr	Manbalar soni	Ulushi	Empirik tadqiqotlar	O‘ rtacha sifat bahosi (3 balli)
2015–2017	11	12,6%	5	1,9
2018–2020	19	21,8%	9	2,1
2021–2023	34	39,1%	21	2,3
2024–2026	23	26,4%	16	2,4
Jami	**87**	**100%**	**51**	**2,2**

Metodologik sifat bahosining yillar davomida o‘ sib borishi (1,9 dan 2,4 gacha) ijobiy tendensiya hisoblanadi. Shu bilan birga, empirik tadqiqotlar ulushi 58,6 foizni tashkil etadi, ya’ni har ikkinchi manba nazariy xarakterga ega; bu esa sohada amaliy tekshirilgan yechimlar tanqisligini ko‘ rsatadi.

Tematik klasterlar. Induktiv kodlash natijasida kiritilgan manbalar oltita tematik klasterga taqsimlandi (2-rasm).

2-rasm. Manbalarning tematik klasterlari va aniqlangan tadqiqot bo‘ shliqlari

Eng yirik klaster — raqamli platformalar va CSCL texnologiyalariga bag‘ ishlangan ishlar (26,4%). Ular asosan muayyan vositalarning (LMS, umumiy hujjatlar, virtual doskalar) qo‘ llanish imkoniyatlarini tavsiflaydi. Bu klasterning zaif tomoni shundaki, tadqiqotlarning aksariyati texnologiya-markazli yondashuvga tayanadi, vosita samaradorligi uni qo‘ llash pedagogik shartlaridan ajratilgan holda baholanadi.

Nazariy-metodologik asoslar klasteri (21,8%) ijtimoiy o‘ zaro bog‘ liqlik nazariyasi, faoliyat yondashuvi va konstruktivizm g‘ oyalariga tayanadi. Loyiha faoliyatini tashkil etish metodikasi klasteri (19,5%) amaliy tavsiyalarga boy, ammo ulardagi tavsiyalar ko‘ pincha empirik dalillarsiz taqdim etiladi.

Ayniqsa e’tiborga loyiq holat — eng kichik ikkita klaster aynan eng muammoli masalalarni qamrab olishidir. O‘ qituvchi roli va fasilitatsiya klasteri atigi 9,2 foizni tashkil etadi, holbuki tahlil qilingan empirik ishlarning o‘ zida kollaboratsiya samaradorligining asosiy to‘ sig‘ i sifatida ko‘ pincha o‘ qituvchining direktiv pozitsiyasi ko‘ rsatiladi. Milliy ta’lim kontekstiga moslashtirish klasteri esa 6,9 foizni (6 ta manba) tashkil qiladi va ularning hech birida to‘ liq tsiklli shakllantiruvchi eksperiment bayon etilmagan.

Aniqlangan tadqiqot bo‘ shliqlari. Klasterlararo tahlil beshta bo‘ shliqni ajratish imkonini berdi. **Birinchi bo‘ shliq** — konseptual, mavjud ishlar alohida elementlarni (vosita, metod, baholash shakli) tavsiflaydi, ammo ularni yaxlit pedagogik konsepsiyaga birlashtirmaydi. **Ikkinchi bo‘ shliq** — diagnostik, 87 ta manbaning faqat 9 tasida baholash instrumentariyining ishonchliligi (Kronbax alfa yoki shunga o‘ xshash ko‘ rsatkich) keltirilgan. **Uchinchi bo‘ shliq** — baholash adolati, individual hissa va guruh natijasini muvozanatlashtirish masalasi 14 ta ishda qo‘ yilgan, lekin ishlaydigan yechim taklif qilinmagan. **To‘ rtinchi bo‘ shliq** — kadrlar, o‘ qituvchini fasilitator roliga tayyorlash mexanizmi deyarli

o‘ rganilmagan. **Beshinchi bo‘ shliq** — kontekstual, O‘ zbekiston oliy ta’limi sharoitida uzoq muddatli pedagogik eksperimentlar o‘ tkazilmagan.

MUHOKAMA

Olingan natijalar sohaning rivojlanish mantiqini yaqqol ko‘ rsatadi, tadqiqotchilar diqqati avval texnologik imkoniyatlarga, so‘ ngra metodik yechimlarga qaratilgan, pedagogik shartlar va o‘ qituvchi tayyorgarligi masalalari esa hozirgacha ikkinchi darajali bo‘ lib qolmoqda. Bu tendensiya ta’limga oid innovatsiyalar tarixida takrorlanib keluvchi qonuniyatdir, yangi vosita paydo bo‘ lganda avval uning texnik salohiyati o‘ rganiladi, pedagogik shartlari esa ancha keyin tadqiq etiladi.

Milliy manbalarda kontekstual moslashtirish ishlarining kamligi turkumning birinchi maqolasida aniqlangan natija bilan bevosita bog‘ liq, kollaboratsiya milliy adabiyotda ko‘ proq tashkiliy shakl sifatida talqin etilar ekan, uni moslashtirishga oid maxsus tadqiqotlarga ehtiyoj ham sezilmaydi. Shu ma’noda tushunchaviy noaniqlik va kontekstual tadqiqotlar tanqisligi yagona muammoning ikki tomonidir. U.Sh.Begimqulov va G‘ .I.Muhamedov ishlarida asoslangan ta’lim jarayonlarini axborotlashtirishning tizimli xarakteri haqidagi qoida bu bo‘ shliqni to‘ ldirish uchun metodologik tayanch vazifasini bajarishi mumkin.

Aniqlangan bo‘ shliqlar tasodifiy emas, balki ierarxik bog‘ langan, konseptual bo‘ shliq diagnostik bo‘ shliqni keltirib chiqaradi, chunki nima o‘ lchanishi kerakligi nazariy jihatdan aniqlanmagan bo‘ lsa, valid instrumentariy yaratib bo‘ lmaydi; diagnostik bo‘ shliq esa o‘ z navbatida baholash adolati muammosini hal etishga to‘ sqinlik qiladi. Shu sababli tadqiqotni aynan konsepsiyani ishlab chiqishdan boshlash metodologik jihatdan asoslidir.

Tadqiqot cheklovlari. Birinchidan, til cheklovi tufayli xitoy, ispan va boshqa tillardagi 26 ta manba tahlildan chetda qoldi. Ikkinchidan, Google Scholar bazasida qidiruv natijalarining takrorlanuvchanligi boshqa bazalarga nisbatan past. Uchinchidan, kulrang adabiyot (grey literature) — ichki hisobotlar va nashr etilmagan materiallar qamrab olinmagan, bu esa nashr noaniqligi (publication bias) riskini butunlay bartaraf etmaydi.

XULOSA

1. PRISMA metodologiyasi asosida o‘ tkazilgan tizimli sharh muammo bo‘ yicha 87 ta sifatli manbani aniqlash imkonini berdi; nashrlarning 65,5 foizi so‘ nggi besh yilga to‘ g‘ ri keladi, bu mavzuning yuqori dolzarbligini tasdiqlaydi.

2. Manbalar oltita tematik klasterga taqsimlanadi; ularning taqsimoti nomutanosib — texnologik masalalar ustunlik qiladi, pedagogik shartlar va o‘ qituvchi tayyorgarligi masalalari esa yetarlicha yoritilmagan.

3. Empirik tadqiqotlar ulushi 58,6 foizni tashkil etadi, ammo ularning faqat 12 tasida nazorat guruhi qo‘ llanilgan; bu sohada qat’iy eksperimental dizaynlarning tanqisligini ko‘ rsatadi.

4. Beshta tadqiqot bo‘ shlig‘ i aniqlandi, konseptual, diagnostik, baholash adolati, kadrlar tayyorgarligi va kontekstual bo‘ shliqlar; ular ierarxik bog‘ langan bo‘ lib, konseptual bo‘ shliqni bartaraf etish boshlang‘ ich qadam hisoblanadi.

5. Milliy ta’lim kontekstiga moslashtirish masalasi manbalarning atigi 6,9 foizida ko‘ rib chiqilgan, bu esa O‘ zbekiston oliy ta’limi sharoitida maxsus tadqiqot o‘ tkazish zaruriyatini asoslaydi.

INGLIZ TILIDA KREATIV FIKRLASH KO‘ NIKMALARINI RIVOJLANTIRISHDA TA’LIM TEXNOLOGIYALARIDAN FOYDALANISH

Abdulaxatova Shohsanam Adhamjon qizi
Namangan davlat chet tillari insituti mustaqil tadqiqotchisi

Annotatsiya: *Mazkur maqolada ingliz tili darslarida talabalarning kreativ fikrlash ko‘ nikmalarini rivojlantirishda zamonaviy ta’lim texnologiyalarining o‘ rni va ahamiyati ularning bugungi kunda qay darajada amaliy qo‘ llay olish imkoniyatlari tahlil qilinadi. Tahlil natijlari shuni ko‘ rsatadiki, ingliz tili darslarida zamonaviy ta’lim texnologiyalaridan foydalanish orqali talabalarning dars jarayonidagi faolligini oshiradi, ularning muammoli vaziyatlarga kreativ yondashish qobiliyatini rivojlantiradi hamda mustaqil ta’lim olish ko‘ nikmalarini shakllantiradi.*

Kalit so‘ zlar: *kreativ fikrlash, ta’lim texnologiyalari, interfaol metodlar, raqamli ta’lim, innovatsion pedagogika.*

USING EDUCATIONAL TECHNOLOGIES TO DEVELOP CREATIVE THINKING SKILLS IN ENGLISH LANGUAGE LESSONS

Abstract: *This article analyzes the role and importance of modern educational technologies in the development of students’ creative thinking skills in English lessons and the extent to which they can be applied in practice today. The results of the analysis show that the use of modern educational technologies in English lessons increases students’ activity in the learning process, develops their ability to creatively approach problem situations, and forms independent learning skills.*

Keywords: *creative thinking, educational technologies, interactive methods, digital education, innovative pedagogy.*

ИСПОЛЬЗОВАНИЕ ОБРАЗОВАТЕЛЬНЫХ ТЕХНОЛОГИЙ ДЛЯ РАЗВИТИЯ НАВЫКОВ ТВОРЧЕСКОГО МЫШЛЕНИЯ НА УРОКАХ АНГЛИЙСКОГО ЯЗЫКА.

Аннотация: *В данной статье анализируется роль и значение современных образовательных технологий в развитии навыков креативного мышления студентов на уроках английского языка и их практическое применение на сегодняшний день. Результаты анализа показывают, что использование современных образовательных технологий на уроках английского языка повышает активность студентов в учебном процессе, развивает их способность к креативному подходу к проблемным ситуациям и формирует навыки самостоятельного обучения.*

Ключевые слова: *креативное мышление, образовательные технологии, интерактивные методы, цифровое образование, инновационная педагогика.*

KIRISH.

Hozirgi globallashuv sharoitida ta’lim tizimi oldida turgan muhim vazifalardan biri talabalarda nafaqat nazariy bilimlarni shakllantirish, balki ularning mustaqil, kreativ fikrlash ko‘ nikmalarini rivojlantirishdan iboratdir. Shu sababli ta’lim tizimida o‘ quvchilarning ijodiy salohiyatini rivojlantirish, ularni muammoli vaziyatlarni mustaqil tahlil qila oladigan va samarali yechim topa oladigan shaxs sifatida shakllantirish muhim ahamiyat kasb etmoqda.

Bugungi kunda chet tillarini o‘ qitish, xususan ingliz tilini o‘ rgatish ta’lim tizimining ustuvor yo‘ nalishlaridan biri hisoblanadi. Ingliz tili xalqaro muloqot vositasi sifatida ilm-fan, texnologiya, iqtisodiyot va madaniyat sohalarida keng qo‘ llanilmoqda. Shu sababli ingliz tilini samarali o‘ qitish va ta’lim oluvchilarda til ko‘ nikmalarini rivojlantirish zamonaviy pedagogikaning dolzarb masalalaridan biri hisoblanadi. Ingliz tilini o‘ rganish jarayonida ta’lim oluvchilarning nutq faoliyatini rivojlantirish, ularning kommunikativ kompetensiyasini shakllantirish hamda mustaqil fikrlash qobiliyatini rivojlantirish muhim vazifalardan biri hisoblanadi.

An’anaviy o‘ qitish tizimida ko‘ pincha o‘ qituvchi markazli yondashuv ustun bo‘ lib, ta’lim oluvchilar dars jarayonida passiv tinglovchi sifatida qatnashadi. Bunday yondashuv ta’lim oluvchilarning ijodiy fikrlash qobiliyatini to‘ liq rivojlantirish imkonini bermaydi. Zamonaviy pedagogik yondashuvlar esa o‘ quvchi markazli ta’lim konsepsiyasiga asoslanadi. Ushbu yondashuvga ko‘ ra, ta’lim jarayonining faol ishtirokchisi sifatida bilimlarni mustaqil ravishda o‘ zlashtirishi, muammolarni tahlil qilishi va yangi g‘ oyalar ishlab chiqishi zarur.

Kreativ fikrlash – bu shaxsning muammoli vaziyatlarga yangicha yondashish, noodatiy yechimlar topish va yangi g‘oyalar yaratish qobiliyatidir. Pedagogika va psixologiya fanlarida kreativlik shaxsning muhim intellektual xususiyatlaridan biri sifatida qaraladi. Kreativ fikrlashni rivojlantirish ta’lim jarayonining samaradorligini oshirishga, o‘quvchilarning bilimlarni chuqurroq o‘zlashtirishiga hamda ularni real hayotiy vaziyatlarda qo‘llashiga yordam beradi.

Ingliz tilini o‘rganish jarayonida kreativ fikrlash alohida ahamiyatga ega. Chunki tilni o‘rganish nafaqat grammatik qoidalarni yodlashni, balki ularni turli kommunikativ vaziyatlarda erkin qo‘llashni ham talab qiladi. Talabalarning kreativ fikrlashi rivojlangan bo‘lsa, ular yangi so‘z va iboralarni turli kontekstlarda qo‘llashga, o‘z fikrlarini erkin ifoda etishga hamda muloqot jarayonida faol ishtirok etishga intiladilar. So‘nggi yillarda ta’lim tizimida zamonaviy pedagogik texnologiyalardan foydalanishga katta e’tibor qaratilmoqda. Ta’lim texnologiyalari o‘quv jarayonini samarali tashkil etish, o‘quvchilarning bilim olish jarayonini faollashtirish hamda ularning ijodiy salohiyatini rivojlantirishga xizmat qiladi. Ayniqsa, axborot-kommunikatsiya texnologiyalarining ta’lim tizimiga kirib kelishi o‘quv jarayonini yangi bosqichga olib chiqdi. Multimedia vositalari, raqamli ta’lim platformalari, interfaol taqdimotlar hamda onlayn ta’lim resurslari ingliz tili darslarini yanada qiziqarli va samarali tashkil etishga yordam beradi. Bunday texnologiyalar o‘quvchilarning dars jarayonidagi faolligini oshiradi, ularning mustaqil o‘rganish ko‘nikmalarini rivojlantiradi hamda kreativ fikrlashini rag‘batlantiradi.

Interfaol metodlar – aqliy hujum, rolli o‘yinlar, munozara, loyiha asosida o‘qitish kabi usullar o‘quvchilarning ta’lim jarayonidagi faol ishtirokini ta’minlaydi. Ushbu metodlar orqali o‘quvchilar o‘z fikrlarini erkin ifoda etish, muammolarni tahlil qilish va yangi g‘oyalar yaratish imkoniyatiga ega bo‘ladilar.

Shu nuqtai nazardan ingliz tili darslarida zamonaviy ta’lim texnologiyalaridan foydalanish o‘quvchilarning kreativ fikrlash ko‘nikmalarini rivojlantirishda muhim pedagogik omil hisoblanadi. Zamonaviy ta’lim texnologiyalari o‘quv jarayonini innovatsion asosda tashkil etish imkonini beradi hamda o‘quvchilarning ta’lim jarayoniga bo‘lgan qiziqishini oshiradi.

Mazkur tadqiqotning asosiy maqsadi ingliz tili darslarida zamonaviy ta’lim texnologiyalaridan foydalanish orqali ta’lim oluvchilarning kreativ fikrlash ko‘nikmalarini rivojlantirish imkoniyatlarini ilmiy jihatdan tahlil qilishdan iboratdir. Tadqiqot doirasida zamonaviy pedagogik texnologiyalarning o‘quv jarayonidagi o‘rni, ularning ta’lim samaradorligiga ta’siri hamda o‘quvchilarning ijodiy fikrlash qobiliyatini rivojlantirishdagi ahamiyati o‘rganiladi.

Adabiyotlar sharhi. Ta’lim jarayonida kreativ fikrlash ko‘nikmalarini rivojlantirish masalasi pedagogika va psixologiya fanlarida keng o‘rganilgan ilmiy yo‘nalishlardan biri hisoblanadi. Ayniqsa chet tillarini o‘qitish jarayonida kreativ fikrlash ko‘nikmalarini rivojlantirish o‘quvchilarning kommunikativ kompetensiyasini shakllantirishda muhim omil sifatida qaraladi.

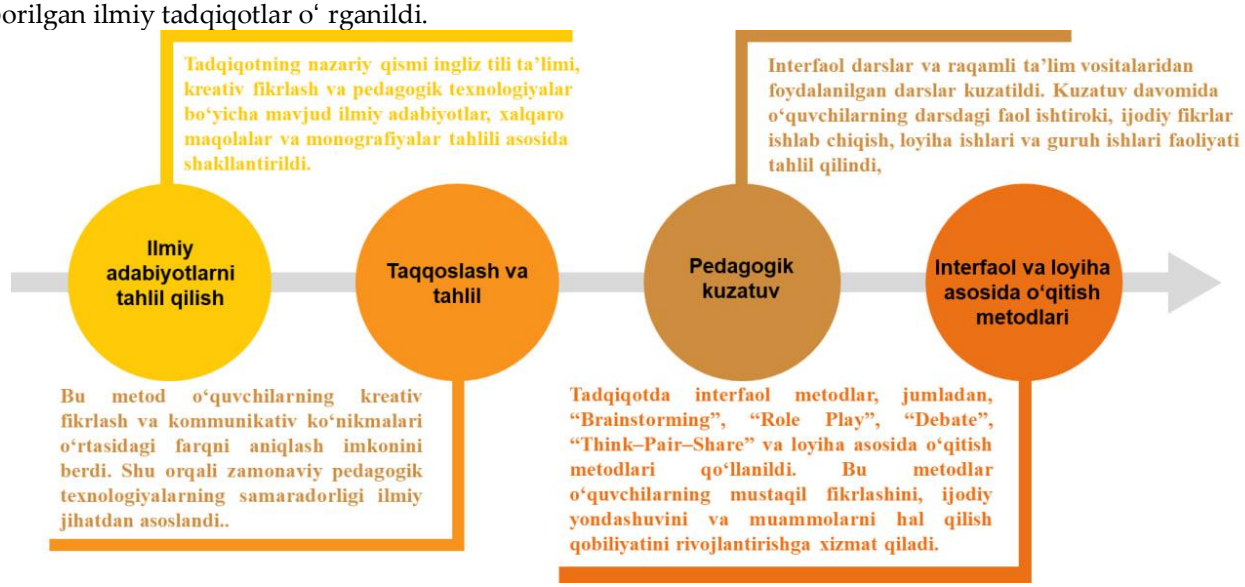
Kreativ fikrlash tushunchasi ko‘plab tadqiqotchilar tomonidan turli jihatlardan izohlangan. H. D. Brown o‘z tadqiqotlarida til o‘rganish jarayonida kreativ fikrlash o‘quvchilarning kommunikativ faoliyatini rivojlantirishga xizmat qilishini ta’kidlaydi. Uning fikriga ko‘ra, tilni o‘rganish jarayoni faqat grammatik qoidalarni o‘zlashtirish bilan cheklanib qolmasligi, balki o‘quvchilarning ijodiy fikrlashini rivojlantirishga qaratilgan bo‘lishi lozim. Til o‘rganish jarayonida o‘quvchilar yangi so‘z va iboralarni turli kontekstlarda qo‘llash orqali o‘z fikrlarini erkin ifoda etishga o‘rganadilar.

J. Harmer esa zamonaviy til o‘qitish metodikasida o‘quvchilarning faolligini oshirish muhim ahamiyatga ega ekanligini ta’kidlaydi. Uning fikricha, interfaol metodlar, muhokama va rolli o‘yinlar o‘quvchilarning ijodiy fikrlashini rivojlantirishda samarali vosita hisoblanadi. Harmer o‘z tadqiqotlarida ingliz tilini o‘qitishda o‘quvchilarni faol muloqotga jalb qilish orqali ularning kommunikativ kompetensiyasini rivojlantirish mumkinligini qayd etadi.

Til o‘qitish metodikasiga oid tadqiqotlarda kommunikativ yondashuv alohida o‘rin egallaydi. J. Richards va T. Rodgers tomonidan olib borilgan ilmiy tadqiqotlarda kommunikativ yondashuv chet tilini o‘qitishning eng samarali metodlaridan biri sifatida e’tirof etiladi. Ushbu yondashuv o‘quvchilarning real hayotiy vaziyatlarda tilni qo‘llashiga asoslanadi. Kommunikativ yondashuv orqali o‘quvchilar tilni faqat nazariy jihatdan o‘rganibgina qolmay, balki uni amaliy muloqot jarayonida qo‘llash imkoniyatiga ega bo‘ladilar.

D. Nunan o‘z ilmiy ishlarida o‘quvchi markazli ta’lim konsepsiyasini asoslab beradi. Uning ta’kidlashicha, zamonaviy ta’lim jarayonida o‘quvchilar bilimlarni tayyor holatda qabul qiluvchi emas, balki ularni mustaqil ravishda o‘zlashtiruvchi faol subyekt sifatida qatnashishi kerak. Bunday yondashuv o‘quvchilarning ijodiy fikrlashini rivojlantirishga hamda ularning mustaqil ta’lim olish ko‘nikmalarini shakllantirishga yordam beradi.

O‘zbekistonlik olimlar ham chet tilini o‘qitish metodikasiga oid ko‘plab ilmiy tadqiqotlar olib borganlar. Jumladan, J. Jalolov chet tilini o‘qitish metodikasiga bag‘ishlangan ilmiy ishlarida kommunikativ yondashuv va zamonaviy pedagogik texnologiyalarning ahamiyatini alohida ta’kidlaydi. Uning fikricha, chet tilini samarali o‘qitish uchun o‘quv jarayonida interfaol metodlardan keng foydalanish zarur.



Yuqoridagi ilmiy tadqiqotlar tahlili shuni ko‘rsatadiki, ingliz tili darslarida zamonaviy ta’lim texnologiyalaridan foydalanish o‘quvchilarning kreativ fikrlash ko‘nikmalarini rivojlantirishda muhim ahamiyatga ega. Shu sababli

zamonaviy pedagogik yondashuvlar asosida tashkil etilgan darslar o‘ quvchilarning ta’lim jarayonidagi faolligini oshiradi hamda ularning kommunikativ kompetensiyasini rivojlantirishga xizmat qiladi.

Metodologiya. Mazkur tadqiqotning asosiy maqsadi ingliz tili darslarida ta’lim oluvchilarning kreativ fikrlash ko‘ nikmalarini rivojlantirishda ta’lim texnologiyalarining samaradorligini aniqlashdan iborat. Tadqiqot jarayoni zamonaviy pedagogik yondashuvlar, interfaol metodlar va raqamli ta’lim vositalarining o‘ quv jarayonidagi o‘ rni va ta’sirini o‘ rganishga qaratilgan.

Tadqiqot sifatli va sifatni tahlil qiluvchi metodlardan foydalangan holda olib borildi. Sifatli metodlar o‘ quvchilarning ijodiy va muloqot faoliyatini chuqur tahlil qilish, pedagogik jarayonni kuzatish va uning samaradorligini aniqlashga yordam beradi. Tadqiqotning asosiy metodlari quyidagilardan iborat (1-rasmga qarang):

Tadqiqotning nazariy asosini pedagogika va chet tilini o‘ qitish metodikasi sohasidagi ilmiy manbalar tashkil etdi. Xususan, kommunikativ yondashuv, interfaol metodlar va axborot texnologiyalaridan foydalanish masalalari bo‘ yicha olib borilgan ilmiy tadqiqotlar o‘ rganildi.

1-rasm.Tadqiqotning asosiy metodlari.

Yuqoridagi rasmda ko‘ rsatilgan ilmiy tadqiqot metodlari orqali ingliz tili darslarida ta’lim oluvchilarning kreativ fiklash ko‘ nikmalarini rivojlantirishni yanda kengroq imkoniyatni yaratadi.

Natijalar.Tadqiqot natijalari shuni ko‘ rsatdiki, ingliz tili darslarida interfaol metodlar va zamonaviy ta’lim texnologiyalaridan foydalanish o‘ quvchilarning kreativ fikrlash ko‘ nikmalarini va kommunikativ kompetensiyasini sezilarli darajada rivojlantiradi. Kuzatuvlar va interfaol mashg‘ ulotlar natijalariga ko‘ ra, o‘ quvchilarning darsdagi faol ishtiroki, mustaqil fikrlash qobiliyati va yangi g‘ oyalar ishlab chiqish darajasi an’anaviy metodlar bilan o‘ qitilgan sinflarga nisbatan yuqori bo‘ lganligi aniqlangan.

Interfaol mashg‘ ulotlarda o‘ quvchilar “Brainstorming”, “Role Play” va “Debate” kabi usullarda faol qatnashdilar. Natijalar shuni ko‘ rsatdiki, o‘ quvchilarning ijodiy fikrlash qobiliyati o‘ rtacha 30–35% ga oshgan. Shuningdek, ular dars davomida yangi so‘ z va iboralarni erkin qo‘ llashga intildilar hamda o‘ z fikrlarini bayon etishda ishonch hosil qildilar.

Loyiha metodlari o‘ quvchilarga mustaqil izlanish olib borish, ma’lumotlarni tahlil qilish va natijalarni ingliz tilida taqdim etish imkonini berdi. Tadqiqot natijalariga ko‘ ra, loyiha asosida ishlagan o‘ quvchilarning ijodiy fikrlash qobiliyati an’anaviy metodga nisbatan 40% ga oshgan. Shu bilan birga, ular o‘ zaro muloqot va guruh ishlari orqali fikr almashish ko‘ nikmalarini rivojlantirdilar.

Raqamli ta’lim vositalaridan foydalangan holda darslar o‘ quvchilarning bilimlarni o‘ zlashtirish tezligi va darsga qiziqishini oshirdi. Onlayn platformalar, interfaol testlar va video materiallar o‘ quvchilarga mavzularni mustaqil o‘ rganish va ijodiy yondashuv bilan qo‘ llash imkonini berdi. Kuzatuv natijalariga ko‘ ra, o‘ quvchilarning mustaqil fikrlash va kreativ fikrlash darajasi o‘ rtacha 25–30% ga oshgan.

Natijalar shuni ko‘ rsatadiki, ingliz tili darslarida zamonaviy pedagogik texnologiyalardan foydalanish o‘ quvchilarning kreativ fikrlash, mustaqil fikrlash va kommunikativ kompetensiyasini rivojlantirishda an’anaviy metodlarga nisbatan samaraliroq ekan. Shu bilan birga, interfaol metodlar va raqamli ta’lim vositalari o‘ quvchilarning darsga qiziqishini oshirib, ta’lim jarayonini interaktiv va motivatsion qiladi.

Muhokama.Tadqiqot natijalari shuni ko‘ rsatdiki, ingliz tili darslarida zamonaviy pedagogik texnologiyalar, interfaol metodlar va loyiha asosida o‘ qitish o‘ quvchilarning kreativ fikrlash ko‘ nikmalarini sezilarli darajada rivojlantiradi. Natijalarni muhokama qilish jarayonida quyidagi jihatlar alohida e’tibor talab qiladi.

Interfaol metodlar o‘ quvchilarning darsga bo‘ lgan qiziqishini oshiradi va ularni faol muloqotga jalb qiladi. Kuzatuv natijalari shuni ko‘ rsatdiki, “Brainstorming”, “Role Play” va “Debate” metodlarida o‘ quvchilarning ijodiy fikrlash darajasi an’anaviy metodlarga nisbatan sezilarli darajada yuqori bo‘ lgan.

Interfaol metodlar orqali o‘ quvchilar turli muammoli vaziyatlarni mustaqil tahlil qilish va noodatiy yechimlar topish imkoniyatiga ega bo‘ ladi. Shu sababli bu metodlar kreativ fikrlashni rivojlantirishda nafaqat samarali, balki zarur hisoblanadi.

Loyiha asosida o‘ qitish o‘ quvchilarning mustaqil izlanish, ma’lumotlarni tahlil qilish va natijalarni ingliz tilida taqdim etish ko‘ nikmalarini rivojlantiradi. Tadqiqot natijalari shuni ko‘ rsatdiki, loyiha ishlari o‘ quvchilarning ijodiy fikrlash darajasini 40% ga oshirdi. Loyihalar o‘ quvchilarga o‘ zaro muloqot, guruhda ishlash va ijodiy g‘ oyalarni amalga oshirish imkonini beradi. Shu bilan birga, loyiha metodlari o‘ quvchilarning mustaqil fikrlashini rag‘ batlantiradi va ularni faol o‘ rganishga undaydi.

Raqamli ta’lim texnologiyalari (multimedia taqdimotlar, interfaol testlar, onlayn platformalar) o‘ quvchilarning darsga qiziqishini oshiradi va bilimlarni interaktiv ravishda o‘ zlashtirish imkonini beradi. Tadqiqot natijalari shuni ko‘ rsatdiki, raqamli texnologiyalardan foydalanish o‘ quvchilarning mustaqil o‘ rganish va kreativ fikrlash darajasini 25–30% ga oshirdi.

Natijalar shuni ko‘ rsatadiki, ingliz tili darslarida zamonaviy pedagogik texnologiyalarni qo‘ llash o‘ quvchilarning kreativ fikrlash, mustaqil fikrlash va kommunikativ kompetensiyasini rivojlantirishda an’anaviy metodlarga nisbatan samaraliroqdir. Shu bilan birga, interfaol metodlar va raqamli texnologiyalar o‘ quvchilarning darsga bo‘ lgan motivatsiyasini oshiradi va ularni faol o‘ rganishga undaydi.

Muhokama natijalari shuni ko‘ rsatadiki, ingliz tili darslarida ta’lim texnologiyalaridan foydalanish nafaqat o‘ quvchilarning bilim darajasini oshirishga, balki ularning ijodiy salohiyatini, mustaqil fikrlashini va guruhdagi muloqot ko‘ nikmalarini rivojlantirishga xizmat qiladi. Shu sababli zamonaviy pedagogik yondashuvlar asosida tashkil etilgan darslar pedagogik amaliyotda keng qo‘ llanishi lozim.

XULOSA

Ingliz tili darslarida zamonaviy pedagogik texnologiyalarni qo‘ llash o‘ quvchilarning kreativ fikrlash ko‘ nikmalarini samarali rivojlantirishga xizmat qiladi. Interfaol metodlar, loyiha asosida o‘ qitish va raqamli ta’lim vositalari o‘ quvchilarning darsga bo‘ lgan motivatsiyasini oshiradi, ularni faol o‘ rganishga undaydi va mustaqil fikrlash qobiliyatini shakllantiradi.

Tadqiqot natijalari shuni ko‘ rsatdiki, interfaol mashg‘ ulotlar va loyiha ishlari o‘ quvchilarning ijodiy fikrlash darajasini an’anaviy metodlarga nisbatan 30–40% ga oshiradi. Shu bilan birga, raqamli ta’lim texnologiyalari o‘ quvchilarning bilimlarni interaktiv ravishda o‘ zlashtirishini ta’minlaydi va ularning mustaqil izlanish ko‘ nikmalarini rivojlantiradi.

Umuman olganda, tadqiqot natijalari shuni ko‘ rsatadiki, ingliz tili ta’limida zamonaviy pedagogik yondashuvlar va texnologiyalarni qo‘ llash ta’lim jarayonining samaradorligini oshiradi, o‘ quvchilarning ijodiy va kommunikativ kompetensiyasini rivojlantiradi hamda ularni mustaqil, kreativ fikrlaydigan shaxslar sifatida shakllantirishga xizmat qiladi.

UMUMTA'LIM TIZIMIDA FONETIK MASHQLARNING TASNIFLANISHI

Ganiyeva Dildora Sagdullayevna,
Pedagogika fanlari bo' yicha falsafa doktori (PhD), dotsent, Kattaqo' rg' on davlat pedagogika instituti
Kattaqo' rg' on, O' zbekiston, E-mail: dganiyeva084@gmail.uz

Annotatsiya: *Ushbu maqolada "Pedagogika ensiklopediyasi"dagi mashq ta'rifi, uning ta'limdagi o' rni va turlari ilmiy-metodik tahlil qilinadi. Mashq ko' nikma va malakalarni shakllantirishning asosiy vositasi sifatida tasniflanadi: tayyorgarlik, tasviriy, asosiy, takrorlovchi-umumlashtiruvchi, ijodiy; analitik, sintetik, analitik-sintetik; og' zaki, yozma, aralash shakllar. Fonetik mashqlar talaffuz, intonatsiya, urg' u va nutq madaniyatini rivojlantirishda markaziy o' rin tutishi, ular ko' nikma va malaka hosil qiluvchi bosqichlarga bo' linishi ko' rsatiladi. Mashq tarkibi ko' rsatma, o' quv materiali, nazorat va o' z-o' zini nazorat komponentlaridan iborat. Ona tili ta'limida muloqotga o' rgatuvchi, vaziyatli, savol-javob, parafrazlash, matn ustida ishlash mashqlaridan foydalanish zarurligi asoslanadi. Maqol, tez aytish, audio-video, rolli o' yinlar orqali talaffuzni o' rgatish samarali ekani, xalq og' zaki ijodi namunalari, jumladan "Devonu lug' otit turk" maqollaridan foydalanish tavsiya etiladi. Shuningdek, 50-yillar darsliklaridagi ijobiy tajriba, notiqlar nutqi, ifodali o' qish, yodlash, imlo va talaffuz birligi, interfaol usullar, individual yondashuv muhimligi qayd etiladi. Darsliklarda mashq va topshiriqlar tizimini takomillashtirish, nutqiy kompetensiyani uzluksiz shakllantirish, o' qituvchi malakasini oshirish zarurati ta'kidlanadi.*

Kalit so' zlar: *mashq, pedagogika ensiklopediyasi, ona tili ta'limi, fonetik mashqlar, talaffuz, intonatsiya, urg' u, nutq madaniyati, ko' nikma va malaka, mashq turlari, ijodiy mashqlar, savol va topshiriq, interfaol usullar, xalq maqollari, audio-video materiallar*

CLASSIFICATION OF PHONETIC EXERCISES IN THE GENERAL EDUCATION SYSTEM

Abstract: *This article presents a scientific and methodological analysis of the definition of "exercise" found in the "Pedagogical Encyclopedia", as well as its role and types in education. Exercises are classified as the primary means of developing skills and proficiencies, categorized into types such as preparatory, illustrative, core, review-consolidating, and creative; analytical, synthetic, and analytical-synthetic; and oral, written, and mixed forms. The article highlights the central role of phonetic exercises in developing pronunciation, intonation, stress, and speech culture, noting their division into stages that foster skill and proficiency acquisition. The structure of an exercise comprises components such as instructions, learning material, and mechanisms for monitoring and self-assessment. The necessity of employing exercises that foster communication—such as situational tasks, question-and-answer sessions, paraphrasing, and text analysis—in native language education is substantiated. The article recommends teaching pronunciation through proverbs, tongue twisters, audio-visual aids, and role-playing games, specifically advocating for the use of examples from oral folklore, including proverbs from "Diwan Lughat at-Turk". Furthermore, it emphasizes the importance of positive practices from 1950s textbooks, the study of oratorical speech, expressive reading, memorization, the integration of spelling and pronunciation, interactive methods, and an individualized approach. The need to improve the system of exercises and tasks in textbooks, continuously develop speech competence, and enhance teacher qualifications is emphasized.*

Keywords: *exercise, pedagogical encyclopedia, mother tongue education, phonetic exercises, pronunciation, intonation, stress, speech culture, skills and proficiency, types of exercises, creative exercises, questions and tasks, interactive methods, folk proverbs, audio-visual materials.*

КЛАССИФИКАЦИЯ ФОНЕТИЧЕСКИХ УПРАЖНЕНИЙ В СИСТЕМЕ ОБЩЕГО ОБРАЗОВАНИЯ

Аннотация: *В данной статье научно-методически анализируется определение упражнения в «Педагогической энциклопедии», его роль в обучении и виды. Упражнение классифицируется как основное средство формирования умений и навыков: подготовительные, иллюстративные, основные, повторительно-обобщающие, творческие; аналитические, синтетические, аналитико-синтетические; устные, письменные, смешанные формы. Показывается, что фонетические упражнения занимают центральное место в развитии произношения, интонации, ударения и культуры речи, а также подразделяются на этапы формирования умений и навыков. Структура упражнения состоит из инструкции, учебного материала, компонентов контроля и самоконтроля. Обосновывается необходимость использования в обучении родному*

языку коммуникативных, ситуативных упражнений, упражнений типа «вопрос-ответ», парафразирования и работы с текстом. Отмечается эффективность обучения произношению с помощью пословиц, скороговорок, аудио- и видеоматериалов, ролевых игр, рекомендуется использование образцов устного народного творчества, в том числе пословиц из «Дивану лугат ат-тюрк». Также подчеркивается важность положительного опыта учебников 50-х годов, речи ораторов, выразительного чтения, заучивания наизусть, единства правописания и произношения, интерактивных методов и индивидуального подхода. Подчеркивается необходимость совершенствования системы упражнений и заданий в учебниках, непрерывного формирования речевой компетенции и повышения квалификации учителей.

Ключевые слова: упражнение, педагогическая энциклопедия, обучение родному языку, фонетические упражнения, произношение, интонация, ударение, культура речи, умения и навыки, виды упражнений, творческие упражнения, вопросы и задания, интерактивные методы, народные пословицы, аудио- и видеоматериалы.

"Pedagogika ensiklopediyasi"da mashqqa berilgan ta'rifning ancha takomillashgan va ta'lim sohasiga moslashtirilgan shakli quyidagicha: Mashq (arabcha – husnixat, rasm chizish uchun namunalar) – biror faoliyatni puxta o‘ zlashtirish yoki uning sifatini yaxshilash maqsadida ko‘ p marta takrorlash. Masalan, o‘ qish, yozish. Mashq ta'lim jarayonida ko‘ nikma va malakalarni hosil qilishda muhim o‘ rin tutadi.[1]

Ona tili ta'limida muloqotga o‘ rgatuvchi mashqlar bajarilmaydi. Dunyo tajribasida suhbat, muloqot jarayonlariga tayyorlash mashqlariga tez-tez murojaat qilinadi. Masalan, quyidagi mazmundagi mashq namunalarini kuzatish mumkin:

1**. Matnni o‘ qing va uni nomlang.** Tanlangan so‘ zlarning ma'nosini aniqlang, antonimlarni toping va ularning uslubiy rangini belgilang.

Qanday so‘ zlar borligini bilasizmi? So‘ zlar boshqacha: kulgili va qayg‘ uli, kichik va katta. Muloyim so‘ zlar ham bor: rahmat, marhamat, Salom. Ona, aziz so‘ zlar bor: ona, Vatan, tinchlik, baxt (S. Prokofev).

(She'riy matndan foydalanishingiz mumkin).

Quyosh mayin kuladi,

Yorqinroq, issiqroq porlaydi,

Tepalikdan esa baland ovozda yog‘ iladi (Ya. Kolas).

2. **O‘ qing va takliflarni solishtiring.** Tanlangan fe'llarning qaysi birida "biror harakatning zarurligi haqida bir xulosaga kelish", va qaysi "qo‘ rquvni yengish", "tortinish, biror harakatni boshlash" ma'nolariga ega ekanligini belgilang.

A. Biz kinoga borishga qaror qildik.

B. Hyech kim unga qarshi chiqishga jur'at qilmadi.

Shartli nutq yoki oldindan tayyorlanadigan nutq. Mashqning bu turiga mashqlar qo‘ shish, gaplar qo‘ shish, parafrazlash, savol-javob topshiriqlari va boshqalar kiradi.

Yoki

1. Mazkur gaplarni ma'no jihatdan o‘ xshashlari bilan almashtiring, ibora va tasviriy ifodalarni ishlating. Siz bu matnni mukammal tushunasiz – u bu maqolani boshqacha tushunadi.

2. Ularning har biri uchun tegishli kontekstida bu fikrlarni joylashtiring. Bu muhitda ishlay olmayman. – Bu sharoitda ishlay olmayman. Nutq (muloqot) mashqlari. Bularga vaziyatli mashqlar ham kiradi.[2]

Mashqning yana quyidagi turlari mavjud. Bajarilish ketma-ketligiga ko‘ ra mashq turlari – propedevtik, tasviriy, fiksasion, takrorlanuvchi, umumlashtiruvchi, ijodiy; aqliy faoliyat xarakteriga ko‘ ra mashq turlari – analitik, sintetik, analitik-sintetik mashqlar va yetakchi ijro usuli – og‘ zaki, yozma, aralash mashqlar.

Mashqlar o‘ quvchilarning ko‘ nikma va malakalarini rivojlantirishning asosiy vositasi hisoblanadi. Ular tasodifiy elementlar to‘ plami emas, balki tizim bo‘ lishi kerak. Avvalo, mashqning maqsadini aniqlash va uni o‘ quvchilarga yetkazish kerak. Buning turli yo‘ llari bor. Masalan: matnda nofaol ishtirokchilarni topishni o‘ rganish; so‘ zlarni to‘ g‘ ri talaffuz qilishni o‘ rganish; yangi imlo qoidasini qo‘ llashni o‘ rganish; mashq uchun topshiriqni o‘ qish, uni bajarish namunasi bilan tanishish va nima uchun bajarishtkerakligini aytib berish; matndagi yangi qoida uchun so‘ zlardan foydalanishni o‘ rganish va boshqalar.

O‘ rganilayotgan materialning xususiyatlarini hisobga olgan holda: mashqlarning qaysi turlari ustun bo‘ lishini aniqlash kerak: og‘ zakimi yoki yozma. Agar imlo qoidasi o‘ rganilsa, ko‘ proq yozuv mashqlari ko‘ zda tutiladi. Tasdiqlanmagan spellinglar bilan ishlashda syujetli talaffuz, yetimologik tahlil va so‘ z hosil qilish mashqlaridan

[1] Педагогика Энциклопедияси. 2-жилд. –Т.: Ж – М., 2012. – 223-б.

[2]https://search.rsl.ru/ru/view/01002976158?redirect=http%3A%2F%2Fdlib.rsl.ru%2Frsl01002000000%2Frsl01002976000%2Frsl01002976158%2Frsl01002976158.pdf

foydalanamiz. Nutq madaniyati ustida ishlash uchun og‘ zaki mashqlar va xor talaffuzi foydalidir, chunki nutq organlarini tarbiyalash kerak. Fonetikani o‘ rganishda og‘ zaki topshiriqlarga ustunlik beriladi.

Professor G. A. Prystupa tomonidan taklif quyidagi mashqlar taqdim etilgan:

1. tayyorlov mashqlar

2. tasviriy mashqlar;

3. takrorlovchi-umumlashtiruvchi mashqlar;

4. ijodiy mashqlar.

1. Propayedevtik yoki tayyorgarlik mashqlari. Bu mashqlarning maqsadi o‘ quvchilarga materialni birlamchi idrok etish, masalan, so‘ zning semantik ta’rifini berish, uni lisoniy bo‘ lmagan voqyelik bilan bog‘ lash; orfoyepiya va imlo xususiyatlarini tushuntirish.

2. Tasviriy mashqlar. Mashqlarning maqsadi o‘ rganilayotgan hodisaning nutqda qanday faoliyat ko‘ rsatishi va uni qanday aniqlash mumkinligini ko‘ rsatib berishdan iborat.

3. Asosiy mashqlar. Bu mashqlar natijasida bolalar paradigmatik bog‘ lanishlarni o‘ zlashtiradilar: o‘ rgangan narsalarini amalda qo‘ llay olish ko‘ nikmasini rivojlantiradilar.

4. Takrorlanuvchi va umumlashtiruvchi mashqlar. Mashqlarning maqsadi materialning boshqa material bilan munosabatlarida o‘ zlashtirilishini ta’minlashdan iborat. Bu turdagi mashqlar o‘ z ichiga og‘ zaki va yozma shakllarni oladi, bir mavzu bo‘ yicha so‘ zlarni tanlashga qaratiladi.

5. Ijodiy mashqlar. Ushbu mashqlarning maqsadi o‘ rganilayotgan til materialini bog‘ lanishli nutqda qo‘ llashni o‘ rgatish, o‘ quvchiga taklif etilgan mavzuda (og‘ zaki va yozma ravishda) gapirish, o‘ z nutqida tanish so‘ z birikmalaridan foydalanish va uning leksik va grammatik xususiyatlarini o‘ rganishni namoyish etishdan iborat. Asosiy ijodiy faoliyat-taqdimot va insho. Aqliy faoliyatning xususiyatiga qarab analitik, sintetik va analitik-sintetik mashqlar mavjud. Analitik-grammatik va morfografik tahlil, analitik yozish, tanlab yozish, o‘ quv diktant, tanlanma diktant. Sintetik-matn tayyorlash va nazorat nusxa ko‘ chirish, xotiradan nusxa ko‘ chirish, erkin nusxa ko‘ chirish, nazorat diktanti, savollarga javob berish, deformasiyalangan matnni tiklash, tegishli so‘ zlarni tanlash, ma’lumotnoma so‘ zlar bilan yozish (ijodiy diktant), so‘ z tuzish va lug‘ at-imlo ishi, gaplar, bayon va insholar tuzish. Analitik va sintetik – grammatik va imlo tahlillari, izoh yozish, tegishli so‘ zlarni tanlash, jumlalar, bayonotlar, grammatik va imlo topshiriqlari bilan insholar yozish, yetishmayotgan harflarni kiritish, matndagi so‘ zlarning shakllarini o‘ zgartirish, taqqoslash va tasniflar yordamida mashq qilish. Mashqlarni bajarish usuliga ko‘ ra ular turlarga bo‘ linadi: og‘ zaki (o‘ qituvchi savollariga javob berish, xartalar bilan ishlash, qoidalar chiqarish va boshqalar.), aralash (izohlangan xat, ogohlantiruvchi diktant va boshqalar.) va yozma (diktant, nusxa ko‘ chirish va boshqalar.)

Mashq-nutq ko‘ nikmalarini hosil qilish yoki takomillashtirish va malakalarini rivojlantirish maqsadida til (nutq) mashqlari yoki harakatlarni maxsus tashkil etilgan holda takroran bajarish mumkin.

Mashq o‘ quv vositalari toifasiga mos ravishda, ya’ni ularning iyerarxiyasidagi eng past qadam sifatida ko‘ rib chiqilsa, o‘ qituvchi va o‘ quvchilar faoliyatini boshqarish vazifasini va ularning o‘ zaro munosabatlarini bajarishga muayyan sharoit yaratadi.

Mashq o‘ quvchilarning faolligini ta’minlaydi, uni amalda modellashtiradi. Ularning ehtiyojlari va motivasion sohasiga, bilim, ko‘ nikma va malakalariga murojaat qilishi, ularning aniq bajarilishini ta’minlashi lozim.

Mashqlar odatda ikki asosiy xususiyat – maqsad va unga erishish vositasi bilan tavsiflanadi.

Bu maqsadlar quyidagilarni o‘ z ichiga olishi mumkin: o‘ quvchilarga til bilimlarini yetkazish, til va nutq malakalarini shakllantirish yoki takomillashtirish hamda nutq malakalarini rivojlantirish.

Bevosita maqsadga (vazifaga) erishishning asosiy vositasi o‘ quv faoliyati bo‘ lib, ularga quyidagilar kiradi: taqlid qilish, farqlash, almashtirish, o‘ zgartirish.

Mashqlarning tarkibiy modeli uchta asosiy komponentga ega: a) ko‘ rsatmalar, b) materialni o‘ rganish mashqlari va V) nazorat va o‘ z-o‘ zini nazorat qilish usullari. Har bir mashqni 2 tarkibiy qismga bo‘ lish mumkin: maqsadli va ijro etuvchi – nazorat va o‘ z-o‘ zini nazorat qilish bilan qo‘ shib olib boriladigan.

Mashqlarning maqsadli jihati ko‘ rsatmalar, topshiriq va boshqalar shaklida taqdim etiladi. Topshiriq muayyan talablarga javob berishi kerak:

a) o‘ quvchilar harakatlarini rag‘ batlantirish va ular uchun aniq vazifa qo‘ yish tarzida shakllantiriladi,

b) nutqoldi yo‘ nalganlik omillarini – vaziyatni aks ettiradi (kim? kim bilan? nima haqida? nima uchun?;

V) muayyan nutq mahsuli va natijasini maqsad qilib olish.

Ko‘ rsatmalarning asosiy xususiyati – ularning kommunikativ yoki nokommunikativ yo‘ nalganligidir.

Sinfda o‘ quv jarayonida yetakchi o‘ rinni kommunikativ topshiriqlar, uyda esa, ayniqsa, o‘ quvchilarning yozma ishlari – o‘ qitish, ya’ni til strukturasi elementlarini tushunishga qaratilgan topshiriqlar beriladi.

Ko‘ rsatmalar mashq bajarish uchun namunalar (modellar) va/yoki qoidalar bilan birga bo‘ lishi kerak.

Fonetik mashqlar umumta'lim maktablarida o‘ quvchilarning talaffuz, intonatsiya, urg‘ u va nutq madaniyatini rivojlantirishda markaziy o‘ rin tutadi. Ushbu mashqlar o‘ quvchilarda ikki asosiy jihat – **ko‘ nikma** va **malaka** – shakllanishiga xizmat qiladi. Shu sababli fonetik mashqlarni tasniflashda ularning bu ikki jihatga ta'siri hisobga olinadi.

1. Ko‘ nikma hosil qiluvchi mashqlar

Ko‘ nikma – o‘ quvchining talaffuz va nutq jarayonidagi qobiliyati bo‘ lib, u bosqichma-bosqich shakllanadi. Bu tur mashqlari odatda:

- **Tovushlarni ajratish mashqlari:** undosh va unli tovushlarni alohida talaffuz qilish. Masalan, [x] va [h] tovushlarini ajratib talaffuz qilish.
- **So‘ z va so‘ z birikmalarida mashq:** o‘ quvchilar so‘ zlarni to‘ g‘ ri talaffuz qiladi va undosh, unli tovushlar o‘ rtasidagi farqni sezadi.
- **Tinglab takrorlash mashqlari:** o‘ quvchilar o‘ qituvchi nutqini tinglab, talaffuzni imitasiya qiladi.

Mazkur mashqlar o‘ quvchilarda talaffuzni tushunish va eshitish ko‘ nikmalarini shakllantiradi, nutqiy reflekslarni rivojlantiradi.

2. Malaka hosil qiluvchi mashqlar

Malaka – o‘ quvchining mustaqil nutq faoliyatida talaffuzni mukammal qo‘ llay olish qobiliyati. Bu tur mashqlari quyidagi jihatlarni o‘ z ichiga oladi:

- **Gap va matn darajasida mashq:** talaffuz, urg‘ u va intonatsiyani so‘ zlardan gaplargacha qo‘ llash.
- **Intonatsion va urg‘ u mashqlari:** nutq ohangini va urg‘ uni to‘ g‘ ri qo‘ llash.
- **Ijodiy mashqlar:** o‘ quvchilar mustaqil gaplar yoki she'rlarni talaffuz qiladi, intonatsiya va urg‘ uni amalda qo‘ llaydi.

Malaka hosil qiluvchi mashqlar o‘ quvchilarda talaffuzni mustaqil ishlatish, nutqni tushunarli va tabiiy qilish, shuningdek, nutq madaniyatini rivojlantirishga yordam beradi.

3. Umumiy tasniflash tamoyillari

Fonetik mashqlarni tasniflashda quyidagi tamoyillar hisobga olinadi:

- Mashqning **maqsadi** (ko‘ nikma yoki malaka shakllantirish).
- Mashqning **murakkabligi** (tovush, so‘ z, gap yoki matn darajasi).
- Mashqning **interaktivligi** (audio, video, auditor mashqlari, ijodiy ishlash).

Shu tarzda fonetik mashqlar tizimli va bosqichma-bosqich qo‘ llanilganda o‘ quvchilarda talaffuz ko‘ nikmasi va malakasi samarali ravishda shakllanadi.

Mashqlar tarkibidagi ikkinchi komponent – ona til hodisalarini o‘ zlashtirish yoki ularni amalga oshirish natijasini nazorat qilish (o‘ z-o‘ zini nazorat qilish) uchun topshiriqlarni amalga oshirish bo‘ yicha qator harakatlarni o‘ z ichiga oladi.

Jumladan, mashqlar til sathlarini o‘ qitish nuqtai nazaridan ham turlarga bo‘ linadi:

1. Fonetik va grafik mashqlar

Ular bolalar uchun tovush va harflarni ajratish uchun ishlatiladi. Buning uchun quyidagi mashqlardan foydalaniladi:

- tovushlarni (og‘ zaki so‘ zdagi) harflar bilan belgilang;
- tanlangan so‘ zlarning tovush qiymatini aniqlash;
- so‘ zlarni alifbo tartibida qo‘ yish;
- tovushlarga mos kelmaydigan harflarni ta'kidlang.

Bunday mashqlar o‘ quvchilarda farqlash, ajratish, umumlashtirish, qisman izohlash ko‘ nikmalarini shakllantirishga yordam beradi.

2. Leksik va frazeologik mashqlar

O‘ quvchilarning so‘ z boyligini oshirishga tayyorlaydi, shuning uchun so‘ z va iborani o‘ rganishda so‘ zlar bilan ishlash kerak va bu muammolarni hal qilish uchun quyidagi mashqlardan foydalaniladi:

- belgilash (nomlash), (shevaga oid so‘ zlar, frazeologik birliklar);
-ushbu so‘ z uchun sinonimlar (antonimlar, frazeologik birliklar) ni tanlang;
- o‘ quv izohli lug‘ atdan shevaga oid so‘ zlarini, kasb-hunar so‘ zlarini toping;
- tanlangan so‘ zlarning ifodalayotgan ma'nosini lug‘ at asosida aniqlang;
- so‘ zning lug‘ aviy va ko‘ chma ma'nolarini aniqlang (gap tarkibida);
- so‘ zning o‘ z va ko‘ chma ma'nosi ishtirokida gap tuzing;
- ushbu gapdagi leksik xatoni toping;
- iboralarni so‘ z bilan ifodalang;
- tasviriy ifodalarni so‘ z bilan ifoda qiling.

3. Morfologik mashqlar

Ular bolalarning morfologiya bo‘ yicha olgan bilimlarini mustahkamlab, ham imlo, ham tinish belgilarining shakllanishiga asos bo‘ lib xizmat qiladi. Buning uchun quyidagi mashqlardan foydalaniladi:

- nutqning bir qismini aniqlash; nutqning u yoki bu qismini turkumlash;
- nutqning muayyan qismi, muayyan so‘ z turkumi so‘ zlarini tanlash;
- belgilagan so‘ zlarnin imlosi va talaffuzini izohlang;
- qo‘ shib yoziladigan so‘ zlarni alohida yozing;
- chiziqcha bilan ajratib yoziladigan so‘ zlarga misollar yozing;
- berilgan fe’llarning talaffuzi va imlosi o‘ rtasidagi farqni izohlang;
- jadvallar yaratish va tayyor jadvallarni ko‘ shib, ajratib, chiziqcha bilan yoziladigan so‘ zlarga to‘ ldirish;
- matndan xato yozilgan, talaffuzi va yozilishi mos kelmaydigan so‘ zlarni ajrating.

4. Sintaktik mashqlar

Sintaktik hodisalarni tahlil qilish va ulardan o‘ quvchilar nutqida foydalanish bo‘ yicha quyidagi mashqlardan foydalaniladi:

- gapni so‘ roq, darak, buyruq va istak ohangida o‘ qing;
- sodda gapni qo‘ shma gapga aylantiring;
- qo‘ shma gaplarni sodda gaplar bilan ifodalang;
- ko‘ chirma gapni o‘ zlashtirma gapga aylantiring;
- nuqtalar o‘ rniga kerakli tinish belgisini qo‘ ying;
- matnda qo‘ yilgan tinish belgilaring qo‘ llanilish sabablarini izohlang.
- matnni mazmunga putur yetkizmay qisqartiring;
- hikmatni matnga aylantiring;
- turli mavzudagi maqol va hikmatlarni bir umumiy mazmunga birlashtiring;
- tarjimai hol matnini tavsifnomaga aylantiring;
- berilgan mavzuni 10ta jumla bilan so‘ zlar takrorisiz, bexato va yorqin ifoda qiling.

Shu o‘ rinda ta’kidlash lozimki, mashq va topshiriqlar ta’lim mazmuni hisoblangan darsliklar tarqibiy qismi bo‘ lishidan tashqari, alohida tizim sifatida ham qo‘ llanilishi maqsadga muvofiq. Fizika, matematika fanlaridan masalalar to‘ plami, tizimi mavjud. Biroq ona tili o‘ qitishga doir maxsus mashq va topshiriqlar tizimi amaliyotda faol qo‘ llanilmaydi. Shu ma’noda ishimizda tilning tarbiyaviy ahamiyatga ega ifoda vositalaridan foydalanildi. Ayniqsa, fonetika o‘ qitishda o‘ quvchining ma’naviy olamiga chiroq yoqa oladigan xalq maqollaridan o‘ rinli va samarali foydalanish muhim ahamiyat kasb etadi. Aksariyat xalq maqollarining tarkibi qofiyadosh so‘ zlardan iborat bo‘ lib, ular o‘ quvchiga muayyan unli va undosh tovushlarning nozik talaffuz xususiyatlarini ko‘ rsatib berishda juda qo‘ l keladi. Oddiy jumlada ishtirok etgan so‘ z tarkibidagi tovushdan ko‘ ra she’riy misra tarkibidagi tovush talaffuzi o‘ quvchi tafakkuriga tezroq ta’sir ko‘ rsatadi.

Darsliklarimizda *«Kuz keldi», «Anvar maktabga kelmadi»* kabi o‘ quvchiga faqat grammatikaga doir ma’lumotlar yetkazishga xizmat qiladigan, o‘ quvchi tasavvuri va ruhiy olamini, dunyoqarashini boyitmaydigan, mustaqil fikrlashga ko‘ maklashmaydigan misollarni ko‘ plab uchratish mumkin. Maqollar asosida esa ham nazariy ma’lumotlarni, ham o‘ quvchiga kelajak hayotida asqotadigan muhim o‘ gitlarni anglatish imkoni bo‘ ladi. Keltirilgan maqollarning mavzu doirasi to‘ g‘ riso‘ zlik, mehnatsevarlik, do‘ stlik, kamtarlik va ilm xosiyatlari to‘ g‘ risida bo‘ lishi maqsadga muvofiqdir. Bu borada, masalan, Mahmud Koshg‘ ariyning «Devonu lug‘ otit turk» asarida keltirilgan maqol namunalaridan foydalanish ham mumkin. *Tirishqoqning labi yog‘ liq – erinchoqning boshi qonlik. Yoshlikda tirishib harakat qilgan odam katta bo‘ lgach sevinadi. Baxt belgisi ilmdir. Odobning boshi – til*[3].

Bugungi darsliklarimizda kam uchrasa-da, o‘ tgan asrning 50-yillari “Ona tili” darsliklarida xalq maqollaridan unumli foydalanilganligiga guvoh bo‘ lamiz. Deyarli har bir mavzuni tushuntirishda xalq maqollari va dostonlaridan namunalar keltirilgan. Masalan, nutq tovushlari mavzusini mustahkamlash uchun berilgan 2-mashqda nazariy jihatdan o‘ quvchilar berilgan maqollardan tor, o‘ rta keng va keng unlilarni aniqlasalar, ikkinchi tomondan, ishchanlik va yalqovlik; bilimdonlik va nodonlik; botirlik va qo‘ rqoqlik; bir so‘ zlilik; hunarli bo‘ lishning foydalari; ahillik hamda to‘ g‘ riso‘ zlik kabilarni o‘ zida aks ettirgan ko‘ plab maqollar keltirilganki, bu tajribadan hozirda ham foydalanish juda zarur. Oddiy matnga qaraganda ko‘ proq yodda qoladigan va o‘ quvchining so‘ z boyligini oshiradigan maqol tarkibli bunday mashqlar darslik so‘ ngigacha o‘ rni bilan davom etgan.

Xalq og‘ zaki ijodi namunalaridan foydalangan holda ona tilidan noan’anaviy darslar tashkil etish ham mumkin. Xususan, tezaytishlar musobaqasi asosida tashkil etilgan mashg‘ ulotlar o‘ quvchining og‘ zaki nutqini ravonlashtirishda muhim o‘ rin tutadi, ya’ni o‘ zbek tilida nutq tovushlari va ularning o‘ ziga xos akustik xususiyatlarini o‘ rgatish samaradorligini oshiradi.

[3]Кошғарий Маҳмуд. *Девону луғатит турк.* 3 томлик. Т.I. – Т.: Ўзбекистон ФА, 1976. ; Кошғарий Маҳмуд. *Девону луғатит турк.* 3 томлик. Т.II. – Т.: Ўзбекистон ФА, 1976.– 47-83-б.

Masalan, “Urg‘ u” mavzusini o‘ tayotganda umumiy ma’lumotga ega bo‘ lingandan so‘ ng, aytaylik, Afzal Rafiqov, Sanjar Sa’dullayev yoki Zulxumor Mo‘ minovalar tomonidan ifodali o‘ qilgan bir she’r, bir nasriy matnning audio yoki video varianti qo‘ yib eshittirilsa, maqsadga muvofiq bo‘ ladi. Shuni ham ta’kidlash kerakki, notiqlarning ham ayol, ham erkak kishilardan iboratligi e’tiborga olinishi kerak. Nutqda to‘ g‘ ri talaffuzdan tashqari ohang masalasi ham mavjud bo‘ lib, u ayol va erkak (o‘ g‘ il va qiz) kishilarda ma’lum ma’noda farqlanadi. Shuning uchun darsda ikkala jinsdagi notiqlar nutqidan ham baravar foydalanish o‘ rinidir.

O‘ quvchilarni matn ustida ishlashga yo‘ naltirish ham yetarlicha samara beradi[4]. Ularga ibratli hikoyatlar, she’riy va dramatik matnlarni yodlab, ifodali aytib berish topshirilishi mumkin. Nasriy matnlarni yodlashga avval unchalik ehtiyoj bo‘ lmagani bois uni yod olish va aynan so‘ zlab berishda dastlab o‘ quvchilar qiynaldi. Darsni har tomonlama samarali tashkil qilishni ko‘ zda tutib, o‘ quvchilar matnlarni, hikmatli so‘ zlarni yoddan aytayotganda ularning og‘ zaki nutqidagi tovushlar talaffuzi, urg‘ u va ohang bilan bog‘ liq xato-kamchiliklar aniqlndi, ularni bartaraf qilish uchun maxsus mashqlar tavsiya qilinadi. O‘ quvchining nutqi ta’sirchan, jozibali bo‘ lishi uchun unda ulkan so‘ z boyligi ham bo‘ lishi kerak. Mashg‘ ulotlar davomida yuzga yaqin ibratli hikoya, she’r va hikmatli so‘ zlar yodlanadi. Dars jarayonida o‘ qituvchi o‘ quvchiga zaruriy nutqiy malakalarning shakllanish sharoitini yaratib berishi lozim. Bola o‘ z tilida ham og‘ zaki, ham yozma shaklda mantiqan izchil, nutq sharoitiga mos ravishda fikr ifodalay olishga erishishi uchun zarur so‘ z boyligiga, adabiy talaffuz ko‘ nikmasiga ega bo‘ lishi; imloviy savodxon va ijodiy tafakkur sohibi bo‘ lishi talab etiladi. Bu borada o‘ quvchilarda nutqiy malakani kompleks tarzda hosil qilish usuli yaxshi samara beradi.

Ona tili darslarida nutqiy malakalarni shakllantiruvchi asosiy o‘ quv materiali bu mashq va topshiriqlar tizimidir. Tadqiqotchi T.G‘ aniyevning ona tili bo‘ yicha mashqlar bajarish jarayonida o‘ quvchilarning bilim faoliyatini faollashtirishga bag‘ ishlangan tadqiqoti[5] ham bu borada muhim ahamiyatga ega. Shunga qaramay, ona tili o‘ qitishda, ayniqsa, adabiy talaffuz bilan bog‘ liq muammolar hali o‘ z yechimini topgan emas. Bu borada ijobiy natijalarga erishish mashq yoki topshiriqning sifati, berilishiga bog‘ liq. Agar topshiriq maqsadli, puxta o‘ ylangan holda tuzilsa, ya’ni birvarakayiga uch yoki to‘ rt nutqiy ko‘ nikmani shakllantirishga imkoniyat yarata olsa, nihoyatda foydali bo‘ ladi.

Fonetik mashqni tushuntirish uchun boshqa o‘ quv topshiriqlari bilan yonma-yon keltirib taqqoslagan ma’qul quyidagi jadvalda mashqni savol va topshiriqdan farqlovchi namunalar keltirildi :

2.2-jadval

Mashq turi	**Tavsifi**	**Namuna**
Fonetik mashq	Nutq tovushlarini, unli va undoshlarni talaffuz qilishni, urg‘ u va intonatsiyani amalda rivojlantirish	“X” undoshini talaffuz qilib, so‘ z ichida joylashishini mashq qilish: xabar, xarita, xush
Savol	O‘ quvchiga bilimini tekshirish, tushunganini aniqlash	“X harfi qaysi so‘ zlarda ishlatilgan?”
Topshiriq	O‘ quvchiga mustaqil ijodiy yoki amaliy ish berish, ko‘ nikmalarni qo‘ llash	“X harfi bilan boshlanuvchi 5 so‘ z yozing va talaffuzini mashq qiling”

Ta’lim muassasalarida faoliyat ko‘ rsatayotgan ona tili o‘ qituvchilarining hammasini ham tajribali, malakali, saviyasi bir xilda yuqori deb bo‘ lmaydi. Belgilangan dastur bo‘ yicha faoliyat olib borilayotgan va zamonaviy interfaol usullar dars jarayoniga tatbiq qilinayotgan bo‘ lsa-da, o‘ quvchilarda nutqiy kompetensiya kutilgandek rivojlanmayotgani tajriba-sinov jarayonida, qolaversa, oddiy kuzatuvlarda ham ma’lum bo‘ lyapti.

Agar darsni qanday tashkil etish, xususan, ona tili darslarida, fonetika, orfoepiya, orfografiya mavzularini o‘ qitish o‘ qituvchining ixtiyoriga to‘ liq topshirib qo‘ yilsa, o‘ quvchilarning adabiy talaffuz hamda imloga oid ko‘ nikma va malakalari bir xil bo‘ lmasligi muqarrar. Talaffuz va imlo qoidalari esa bir xillikni taqozo etadi. Shu ma’noda o‘ quvchilarda nutqiy kompetensiyani rivojlantirishni avtomatlashtirish masalasi juda dolzarb bo‘ lib qoladi.

Tadqiqotlar natijasida ma’lum bo‘ ldiki, o‘ quvchi uchun o‘ ta zarur bo‘ lgan *to‘ g‘ ri talaffuz, imloviy savodxonlik, mantiqiy fikrlash* ko‘ nikmalari, *so‘ z boyligining muntazam oshishi* uzuq-yuluq mashg‘ ulotlar bilan emas, balki tizimli ravishda, maxsus mashq va topshiriqlar tizimi asosida uzluksiz, amaliy ishlash orqali hosil qilinadi. Bu – tizimli takrorlanishga olib keladi, natijada ko‘ nikma va malaka shakllana boshlaydi.

Annotatsiya: *Mazkur maqolada bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligi tushunchasining mazmun-mohiyati, uning tarkibiy komponentlari va funksional xususiyatlari ilmiy-nazariy jihatdan tahlil qilingan. Tadqiqot davomida kompetentlik tushunchasiga doir turli ilmiy-pedagogik yondashuvlar tizimlashtirilib, kasbiy-kommunikativ kompetentlikning lingvistik, nutqiy (diskursiv), ijtimoiy-madaniy, strategik va kasbiy-pedagogik komponentlari ajratib ko‘ rsatilgan hamda ularning o‘ zaro uzviy bog‘ liqligi asoslab berilgan.*

Kalit so‘ zlar: *kasbiy-kommunikativ kompetentlik, bo‘ lajak pedagog, kommunikativ ko‘ nikma, tarkibiy komponent, funksional xususiyat, pedagogik muloqot, kompetentlik yondashuvi.*

СОДЕРЖАНИЕ, СУЩНОСТЬ И СТРУКТУРНО-ФУНКЦИОНАЛЬНЫЙ АНАЛИЗ ФОРМИРОВАНИЯ ПРОФЕССИОНАЛЬНО-КОММУНИКАТИВНОЙ КОМПЕТЕНТНОСТИ БУДУЩИХ ПЕДАГОГОВ

Аннотация: *В статье с научно-теоретической точки зрения анализируются содержание и сущность понятия профессионально-коммуникативной компетентности будущих педагогов, её структурные компоненты и функциональные особенности. В ходе исследования систематизированы различные научно-педагогические подходы к понятию компетентности, выделены лингвистический, речевой (дискурсивный), социокультурный, стратегический и профессионально-педагогический компоненты профессионально-коммуникативной компетентности, а также обоснована их тесная взаимосвязь.*

Ключевые слова*: профессионально-коммуникативная компетентность, будущий педагог, коммуникативные навыки, структурный компонент, функциональная особенность, педагогическое общение, компетентностный подход.*

CONTENT, ESSENCE, AND STRUCTURAL-FUNCTIONAL ANALYSIS OF THE FORMATION OF PROFESSIONAL COMMUNICATIVE COMPETENCE OF FUTURE TEACHERS

Abstract: *This article provides a scientific and theoretical analysis of the content and essence of professional communicative competence of future teachers, its structural components, and functional characteristics. The study systematizes various scientific and pedagogical approaches to the concept of competence and identifies the linguistic, speech (discursive), sociocultural, strategic, and professional-pedagogical components of professional communicative competence. The close interrelationship and interdependence of these components are also substantiated.*

Keywords: professional communicative competence, future teacher, communication skills, structural component, functional characteristic, pedagogical communication, competence-based approach.

KIRISH

Zamonaviy ta’lim tizimida amalga oshirilayotgan innovatsion o‘ zgarishlar pedagog shaxsiga qo‘ yiladigan kasbiy talablarning mazmunini sezilarli darajada kengaytirmoqda. Bugungi pedagog nafaqat muayyan fan bo‘ yicha chuqur bilimga ega mutaxassis, balki ta’lim jarayoni ishtirokchilari bilan samarali muloqot o‘ rnata oladigan, o‘ z fikrini aniq va asosli ifodalaydigan, pedagogik vaziyatlarni kommunikativ jihatdan boshqara oladigan hamda hamkorlikka asoslangan ta’lim muhitini shakllantira oladigan professional shaxs bo‘ lishi talab etiladi. Shu sababli bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirish oliy pedagogik ta’limning ustuvor vazifalaridan biri hisoblanadi.

Kasbiy-kommunikativ kompetentlik pedagogning kasbiy bilimlari, nutqiy va kommunikativ ko‘ nikmalari, ijtimoiy-psixologik xususiyatlari, pedagogik muloqot madaniyati hamda muayyan vaziyatga mos kommunikativ strategiyani tanlash qobiliyatini birlashtiruvchi integrativ sifatdir. Mazkur kompetentlik pedagogga o‘ quvchilar bilan konstruktiv

munosabat o‘ rnatish, ta’lim mazmunini tushunarli yetkazish, qayta aloqa mexanizmlaridan samarali foydalanish, nizoli vaziyatlarni bartaraf etish va pedagogik hamkorlikni tashkil qilish imkonini beradi.

Bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirish jarayoni faqat nutqiy ko‘ nikmalarni rivojlantirish bilan chegaralanmaydi. U motivatsion-qadriyatli, kognitiv, kommunikativ-faoliyatli, emotsional-irodaviy va refleksiv komponentlarning o‘ zaro bog‘ liqligini nazarda tutadi. Motivatsion-qadriyatli komponent pedagogik muloqotga ijobiy munosabat va kasbiy qadriyatlarni ifodalasa, kognitiv komponent kommunikatsiya qonuniyatlari va pedagogik muloqotga oid bilimlarni qamrab oladi. Kommunikativ-faoliyatli komponent esa ushbu bilimlarni real pedagogik vaziyatlarda qo‘ llash, suhbatni tashkil etish, tinglash, savol berish, fikrni dalillash va qayta aloqa o‘ rnatish ko‘ nikmalarida namoyon bo‘ ladi. Refleksiv komponent pedagogning o‘ z kommunikativ faoliyatini tahlil qilishi, mavjud kamchiliklarni aniqlashi va kasbiy muloqot usullarini takomillashtirib borishini ta’minlaydi.

ADABIYOTLAR TAHLILI VA METODOLOGIYA

Raqamli ta’lim muhitining kengayishi ushbu kompetentlikning mazmuniga yangi talablarni ham kiritmoqda. Zamonaviy pedagog auditoriyadagi bevosita muloqot bilan bir qatorda elektron ta’lim platformalari, videokonferensiyalar, ijtimoiy tarmoqlar va boshqa raqamli kommunikatsiya vositalari orqali ham professional munosabatlarni samarali tashkil eta olishi zarur. Bu esa bo‘ lajak pedagoglarda an’anaviy kommunikativ ko‘ nikmalar bilan bir qatorda raqamli kommunikatsiya madaniyati, mediaetiket va turli axborot muhitlariga moslashuvchan kommunikativ strategiyalarni rivojlantirishni talab etadi.

Bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirishda oliy ta’lim jarayonining amaliy yo‘ naltirilganligi alohida ahamiyatga ega. Muammoli vaziyatlar, pedagogik keyslar, rolli va ishbilarmonlik o‘ yinlari, munozaralar, mikroo‘ qitish, treninglar, pedagogik amaliyot hamda refleksiv topshiriqlardan foydalanish talabalarning nazariy bilimlarini real kommunikativ faoliyat bilan uyg‘ unlashtirish imkonini beradi. Bunday metodlar orqali bo‘ lajak pedagoglar turli pedagogik vaziyatlarda kommunikativ strategiyalarni mustaqil tanlash, o‘ z xatti-harakatlarini baholash va muloqot natijalarini tahlil qilish tajribasiga ega bo‘ ladilar.

Bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirish masalasi zamonaviy pedagogika, psixologiya, lingvodidaktika va kasbiy ta’lim nazariyasining muhim tadqiqot yo‘ nalishlaridan biri hisoblanadi. Pedagog faoliyatining kommunikativ tabiati shuni ko‘ rsatadiki, o‘ qituvchining kasbiy muvaffaqiyati faqat fan bo‘ yicha bilimlarning mukammalligi bilan emas, balki ushbu bilimlarni ta’lim oluvchilarga yetkazish, ular bilan pedagogik hamkorlik o‘ rnatish, kommunikativ vaziyatni boshqarish va o‘ zaro tushunishni ta’minlash qobiliyati bilan ham belgilanadi.

Kommunikativ kompetentlik tushunchasining nazariy ildizlari D. Hymes tadqiqotlari bilan chambarchas bog‘ liq. Olim N. Chomsky tomonidan ilgari surilgan lingvistik kompetensiya konsepsiyasini kengaytirib, tilni bilish faqat grammatik jihatdan to‘ g‘ ri gap tuzish qobiliyatidan iborat emasligini ta’kidlaydi. D. Hymesning fikricha, shaxs muayyan nutqiy ifodani qachon, qayerda, kim bilan va qanday ijtimoiy vaziyatda qo‘ llash mumkinligini ham bilishi kerak. Shu ma’noda kommunikativ kompetentlik lingvistik bilim bilan bir qatorda ijtimoiy vaziyatga mos ravishda muloqot qilish qobiliyatini ham qamrab oladi [1]. Mazkur yondashuv pedagogning kasbiy kommunikatsiyasini tahlil qilishda alohida ahamiyatga ega, chunki o‘ qituvchi turli yosh, bilim darajasi va individual-psixologik xususiyatlarga ega ta’lim oluvchilar bilan muloqot qiladi.

M. Canale va M. Swain kommunikativ kompetentlikning tarkibiy tuzilishini yanada rivojlantirib, uni bir nechta o‘ zaro bog‘ liq komponentlardan tashkil topgan tizim sifatida talqin qilgan. Ularning modelida grammatik kompetensiya, sotsiolingvistik kompetensiya va strategik kompetensiya muhim o‘ rin egallaydi [2]. Keyinchalik M. Canale ushbu modelni rivojlantirib, diskursiv kompetensiyani ham alohida komponent sifatida ajratadi [3]. Ushbu nazariy yondashuvni bo‘ lajak pedagoglarning kasbiy tayyorgarligiga tatbiq etganda, pedagog grammatik va nutqiy jihatdan to‘ g‘ ri muloqot qilish bilan cheklanmasdan, yaxlit pedagogik diskursni tashkil etishi, auditoriyaning xususiyatlarini hisobga olishi hamda kommunikativ qiyinchiliklarni strategik usullar orqali bartaraf eta olishi lozimligi namoyon bo‘ ladi.

L. Bachman kommunikativ kompetensiyani til bilimlari va ulardan real kommunikativ vaziyatlarda foydalanish qobiliyatining o‘ zaro integratsiyasi asosida izohlaydi. Uning konsepsiyasida tashkiliy va pragmatik bilimlar kommunikativ faoliyat samaradorligini belgilovchi muhim omillar sifatida ko‘ rsatiladi [4]. Pedagogik faoliyat nuqtai nazaridan mazkur fikr o‘ qituvchining nutqni grammatik jihatdan to‘ g‘ ri tashkil etishi bilan bir qatorda, uning kommunikativ maqsadini aniq belgilashi, ta’lim oluvchining holatini hisobga olishi va pedagogik vaziyatga muvofiq nutq strategiyasini tanlashi zarurligini anglatadi.

M. Byram kommunikativ kompetentlikni madaniyatlararo muloqot bilan bog‘ liq holda tahlil qilib, samarali kommunikatsiya uchun faqat tilni bilishning o‘ zi yetarli emasligini asoslaydi. Olimning fikricha, kommunikativ shaxs boshqa ijtimoiy va madaniy qarashlarni tushunish, ularga nisbatan ochiq munosabatda bo‘ lish, turli madaniy hodisalarni talqin qilish va o‘ zaro muloqotda vositachilik qilish qobiliyatiga ega bo‘ lishi zarur [5]. Mazkur qarash bo‘ lajak pedagoglarning ijtimoiy-madaniy kompetentligini shakllantirish zaruratini ko‘ rsatadi. Ayniqsa, globallashuv va

madaniyatlararo aloqalar kuchaygan zamonaviy ta’lim muhitida pedagog turli ijtimoiy va madaniy tajribaga ega ta’lim oluvchilar bilan samarali munosabat o‘ rnata olishi kerak.

Kasbiy-kommunikativ kompetentlikni pedagogik faoliyat bilan bevosita bog‘ lashda A.A. Leontyevning pedagogik muloqotga oid qarashlari muhim nazariy asos bo‘ lib xizmat qiladi. A.A. Leontyev pedagogik muloqotni o‘ qituvchi va o‘ quvchi o‘ rtasidagi oddiy axborot almashinuvi emas, balki ta’lim-tarbiya maqsadlarini amalga oshirishga yo‘ naltirilgan professional kommunikativ faoliyat sifatida ko‘ radi [6]. Ushbu nuqtai nazardan pedagogning kommunikativ kompetentligi o‘ quv materialini yetkazish, ta’lim oluvchilarning bilish faoliyatini faollashtirish, psixologik jihatdan qulay muhit yaratish va pedagogik hamkorlikni boshqarish kabi bir qator funksiyalarni bajaradi.

I.A. Zimnyaya kompetensiya va kompetentlik tushunchalarini ta’lim natijalari bilan bog‘ liq holda tadqiq etib, kompetentlikni shaxsning bilimlari, tajribasi, qadriyatlari va faoliyatga tayyorligini birlashtiruvchi murakkab xususiyat sifatida tavsiflaydi [7]. Ushbu konsepsiyadan kelib chiqib, bo‘ lajak pedagogning kasbiy-kommunikativ kompetentligini faqat kommunikativ bilim va ko‘ nikmalar yig‘ indisi sifatida emas, balki kasbiy motivatsiya, pedagogik qadriyatlar, muloqot tajribasi, refleksiya va kommunikativ faoliyatga tayyorlikning integrativ birligi sifatida baholash maqsadga muvofiqdir.

A.V. Xutorskoy kompetensiyaviy yondashuvni ta’lim natijalarini amaliy faoliyat bilan bog‘ lash imkonini beradigan muhim metodologik yo‘ nalish sifatida ko‘ rsatadi. Uning yondashuvida kompetensiyalar o‘ quvchining bilimlarni muayyan hayotiy va faoliyat vaziyatlarida qo‘ llay olish qobiliyati bilan bog‘ lanadi [8]. Mazkur nazariy pozitsiya bo‘ lajak pedagoglarni tayyorlashda ham muhimdir. Chunki talaba kommunikatsiyaga oid nazariy bilimlarni egallashi bilan birga, ularni real dars, pedagogik muammo, nizoli vaziyat, ota-onalar bilan muloqot va hamkasblar bilan professional hamkorlik jarayonida qo‘ llay olishi kerak.

V.A. Kan-Kalik pedagogik muloqot muammosini o‘ rganib, o‘ qituvchining kommunikativ faoliyatini kasbiy mahoratning muhim tarkibiy qismi sifatida baholaydi. Uning yondashuviga ko‘ ra, pedagogik muloqotni samarali tashkil etish o‘ qituvchidan auditoriya bilan psixologik aloqa o‘ rnatish, muloqotni boshqarish, ta’lim oluvchilarning reaksiyasini anglash hamda o‘ z kommunikativ xatti-harakatlarini pedagogik vazifalarga muvofiqlashtirishni talab etadi [9]. Demak, kasbiy-kommunikativ kompetentlikning perseptiv va boshqaruv funksiyalari pedagogik faoliyat samaradorligini ta’minlovchi muhim omillardandir.

Yuqoridagi ilmiy qarashlarni umumlashtirish asosida bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini lingvistik, nutqiy-diskursiv, ijtimoiy-madaniy, strategik va kasbiy-pedagogik komponentlardan tashkil topgan integrativ tizim sifatida tavsiflash mumkin. Lingvistik komponent til birliklaridan me’yoriy foydalanish bilan bog‘ liq bo‘ lsa, nutqiy-diskursiv komponent fikrni izchil, mantiqiy va pedagogik maqsadga muvofiq ifodalashni ta’minlaydi. Ijtimoiy-madaniy komponent kommunikatsiya ishtirokchilarining ijtimoiy va madaniy xususiyatlarini hisobga olishni, strategik komponent kommunikativ muammolarni samarali hal qilish usullarini tanlashni, kasbiy-pedagogik komponent esa barcha kommunikativ imkoniyatlarni ta’lim-tarbiya vazifalarini bajarishga yo‘ naltirishni nazarda tutadi.

Tarkibiy-funksional nuqtai nazardan ushbu komponentlar bir-biridan ajralgan holda emas, balki yagona kasbiy faoliyat tizimida namoyon bo‘ ladi. Masalan, pedagogning o‘ quv materialini tushuntirish jarayonida lingvistik bilimlari nutqiy-diskursiv ko‘ nikmalar bilan uyg‘ unlashadi, ta’lim oluvchilarning individual va ijtimoiy xususiyatlarini hisobga olish ijtimoiy-madaniy kompetentlikni talab qiladi, tushunmovchilik yoki kommunikativ to‘ siqlar paydo bo‘ lganda esa strategik kompetentlik ishga tushadi. Ushbu jarayonlarning barchasi kasbiy-pedagogik maqsad bilan birlashtiriladi.

Tadqiqot jarayonida ilmiy-pedagogik va lingvodidaktik adabiyotlarni nazariy tahlil qilish, sintez, umumlashtirish, tizimli-strukturaviy yondashuv hamda qiyosiy tahlil metodlaridan foydalanildi. Kasbiy-kommunikativ kompetentlik tushunchasiga doir mahalliy va xorijiy manbalar mazmuniy jihatdan qiyoslandi, ularning umumiy va farqli jihatlari aniqlanib, tizimlashtirilgan yagona tarkibiy model shaklida taqdim etildi.

NATIJALAR VA MUHOKAMA

“Kompetentlik” tushunchasi pedagogika fanida shaxsning muayyan faoliyat sohasida bilim, ko‘ nikma, malaka va shaxsiy sifatlarni amaliyotda samarali qo‘ llay olish qobiliyati sifatida talqin etiladi. Kommunikativ kompetentlik esa nutqiy vositalar yordamida muloqot maqsadiga muvofiq o‘ zaro ta’sir o‘ rnata olish qobiliyati sifatida belgilanadi. Ushbu tushunchaning ilmiy negizi lingvistika va sotsiolingvistika sohasidagi tadqiqotlarga borib taqaladi, xususan, nutqiy kompetentlikni faqat grammatik to‘ g‘ rilik bilan emas, balki nutqning ijtimoiy vaziyatga mosligi bilan ham bog‘ liq holda tushunish g‘ oyasi ilgari surilgan.

Kasbiy-kommunikativ kompetentlik esa yuqoridagi umumiy kommunikativ kompetentlikning kasbiy faoliyat kontekstidagi ko‘ rinishi bo‘ lib, bo‘ lajak pedagogning o‘ quv-tarbiyaviy jarayonda ta’lim oluvchilar, ularning ota-onalari va kasbdoshlari bilan pedagogik maqsadga muvofiq, samarali va natijaviy muloqot qura olish qobiliyati, ko‘ nikmasi va shaxsiy sifatlari majmuasi sifatida ta’riflanadi. Bu kompetentlik nafaqat nutq madaniyati, balki pedagogik mahorat, empatiya, tinglash qobiliyati va vaziyatni tahlil qilish ko‘ nikmalarini ham o‘ z ichiga oladi.

O‘ tkazilgan nazariy tahlil asosida bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligi tarkibida quyidagi besh asosiy komponentni ajratish maqsadga muvofiq deb topildi (1-jadval):

1-jadval. Bo‘ lajak pedagogning kasbiy-kommunikativ kompetentligi tarkibiy komponentlari

Komponent	Mazmuni	Namoyon bo‘ lish shakli
Lingvistik komponent	Ona tili va xorijiy til grammatikasi, leksikasi, uslubiyatini bilish, nutqiy vositalardan me’yoriy foydalanish	Savodli, me’yoriy nutq
Nutqiy (diskursiv) komponent	Fikrni izchil, mantiqiy va vaziyatga mos tarzda bayon eta olish, matn va dialog qura bilish	Ma’ruza, tushuntirish, dialog
Ijtimoiy-madaniy komponent	Muloqot me’yorlari, pedagogik odob, madaniyatlararo muloqot qoidalarini bilish	Auditoriya bilan ishlash odobi
Strategik komponent	Muloqotdagi to‘ siqlarni bartaraf etish, muqobil usullardan foydalanish qobiliyati	Nizoli vaziyatni hal qilish
Kasbiy-pedagogik komponent	O‘ quv-tarbiyaviy jarayonda kommunikativ vositalarni metodik maqsadga muvofiq qo‘ llash	Interfaol dars, fikr-mulohaza

Keltirilgan komponentlar bir-biridan alohida emas, balki o‘ zaro uzviy bog‘ liq holda namoyon bo‘ ladi: lingvistik komponent nutqning to‘ g‘ riligini, nutqiy komponent uning izchilligini, ijtimoiy-madaniy komponent muloqot odobini, strategik komponent moslashuvchanlikni, kasbiy-pedagogik komponent esa barcha bu ko‘ nikmalarning o‘ quv-tarbiyaviy maqsadga xizmat qilishini ta’minlaydi.

Bo‘ lajak pedagogning kasbiy faoliyatida kasbiy-kommunikativ kompetentlik quyidagi asosiy funksiyalarni bajaradi: axborot-kommunikativ funksiya — o‘ quv materialini aniq, tushunarli va izchil yetkazish; tarbiyaviy-ta’sir etuvchi funksiya — muloqot orqali ta’lim oluvchi shaxsiga ijobiy pedagogik ta’sir ko‘ rsatish; tashkiliy-boshqaruv funksiya — sinf yoki guruh faoliyatini muloqot vositasida muvofiqlashtirish va yo‘ naltirish; reflektiv-baholash funksiyasi — o‘ z nutqiy faoliyatini va uning natijalarini tahlil qilib, kommunikativ strategiyani takomillashtirib borish.

Ushbu funksiyalarning barchasi zamonaviy ta’lim muhitida, jumladan raqamli va sun’iy intellekt vositalari qo‘ llanilayotgan sharoitda yangi mazmun kasb etmoqda: pedagog nafaqat an’anaviy og‘ zaki-yozma muloqot, balki intellektual tizimlar bilan samarali interaktsiya (so‘ rov shakllantirish, natijalarni tanqidiy baholash, ta’lim oluvchilarga moslashtirish) ko‘ nikmalariga ham ega bo‘ lishi lozim bo‘ lmoqda. Bu jihat kasbiy-kommunikativ kompetentlik tarkibiga raqamli-kommunikativ subkomponentni kiritish zaruratini keltirib chiqarmoqda.

Tahlil natijalari shuni ko‘ rsatadiki, kasbiy-kommunikativ kompetentlikka doir mavjud yondashuvlar asosan an’anaviy og‘ zaki va yozma muloqot shakllariga qaratilgan bo‘ lib, zamonaviy raqamli ta’lim muhiti, xususan sun’iy intellekt vositalarining bo‘ lajak pedagog kommunikativ faoliyatiga ta’siri yetarlicha tadqiq etilmagan. Ushbu holat kasbiy-kommunikativ kompetentlikning tarkibiy-funksional modelini yangi didaktik sharoitlarga moslashtirish, uni rivojlantirish metodikasini sun’iy intellekt vositalari asosida takomillashtirish zaruratini asoslaydi. Shu bilan birga, tarkibiy komponentlarning o‘ zaro bog‘ liqligi va funksional xususiyatlarning kasbiy faoliyat bilan uzviyligi ushbu kompetentlikni yaxlit, bosqichma-bosqich rivojlantirish lozim bo‘ lgan tizim sifatida qarash zarurligini ko‘ rsatadi.

O‘ tkazilgan nazariy tahlil asosida quyidagi xulosalarga kelindi: birinchidan, bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligi umumiy kommunikativ kompetentlikning kasbiy faoliyat kontekstidagi maxsus ko‘ rinishi bo‘ lib, u nutqiy, ijtimoiy-madaniy va kasbiy-pedagogik jihatlarning uyg‘ unligidan iborat; ikkinchidan, uning tarkibiy tuzilmasi lingvistik, nutqiy, ijtimoiy-madaniy, strategik va kasbiy-pedagogik komponentlarni o‘ z ichiga oladi va bu komponentlar o‘ zaro uzviy bog‘ liq holda faoliyat yuritadi; uchinchidan, mazkur kompetentlik axborot-kommunikativ, tarbiyaviy-ta’sir etuvchi, tashkiliy-boshqaruv va reflektiv-baholash funksiyalarini bajaradi. Aniqlangan nazariy-tarkibiy model bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini sun’iy intellekt vositalari asosida rivojlantirish metodikasini ishlab chiqish uchun ilmiy-nazariy asos bo‘ lib xizmat qiladi.

XULOSA

Bo‘ lajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirish zamonaviy pedagogik ta’limning muhim tarkibiy yo‘ nalishlaridan biri bo‘ lib, u pedagogning kelajakdagi kasbiy faoliyati samaradorligini belgilovchi asosiy

omillardan hisoblanadi. Kasbiy-kommunikativ kompetentlikni faqat nutq madaniyati yoki muloqot koʻnikmalari doirasida talqin qilish yetarli emas. U kasbiy bilimlar, kommunikativ qobiliyatlar, pedagogik qadriyatlar, ijtimoiy-psixologik tayyorgarlik va refleksiv faoliyatni birlashtiruvchi yaxlit integrativ tuzilma sifatida namoyon boʻladi.

Tarkibiy-funksional tahlil mazkur kompetentlikning motivatsion-qadriyatli, kognitiv, kommunikativ-faoliyatli, emotsional-irodaviy va refleksiv komponentlari oʻzaro uzviy bogʻlanganligini koʻrsatadi. Ushbu komponentlardan birining yetarli darajada shakllanmasligi pedagogning umumiy kommunikativ samaradorligiga ta’sir qilishi mumkin. Shu sababli kasbiy-kommunikativ kompetentlikni shakllantirishda uning barcha tarkibiy qismlarini kompleks va tizimli rivojlantirish zarur.

Kasbiy-kommunikativ kompetentlikning axborot-kommunikativ, interaktiv, perseptiv, muvofiqlashtiruvchi, motivatsion va refleksiv funksiyalari pedagogning ta’lim jarayonidagi koʻp qirrali faoliyatini ta’minlaydi. Mazkur funksiyalarning uygʻun amalga oshirilishi pedagogga oʻquvchilar bilan samarali muloqot oʻrnatish, ularning individual xususiyatlarini hisobga olish, pedagogik hamkorlikni tashkil etish, nizoli vaziyatlarni konstruktiv hal qilish va ta’lim jarayonida samarali qayta aloqani yoʻlga qoʻyish imkonini beradi.

Boʻlajak pedagoglarda mazkur kompetentlikni rivojlantirish uchun ta’lim jarayonida interfaol va amaliy metodlardan keng foydalanish maqsadga muvofiqdir. Pedagogik vaziyatlarni modellashtirish, keys-stadi, trening, debat, rolli oʻyin, mikrooʻqitish, loyiha faoliyati va refleksiv topshiriqlar talabalarning kasbiy kommunikatsiyaga oid nazariy bilimlarini amaliy tajribaga aylantirishga yordam beradi. Shu bilan birga, pedagogik amaliyotning kommunikativ yoʻnaltirilganligini kuchaytirish boʻlajak oʻqituvchilarning real kasbiy muhitga moslashishini ta’minlaydi.

Umuman olganda, boʻlajak pedagoglarning kasbiy-kommunikativ kompetentligini shakllantirish uzluksiz, tizimli va amaliy faoliyatga yoʻnaltirilgan pedagogik jarayon sifatida tashkil etilishi lozim. Uning mazmuniy va funksional komponentlarini oʻzaro uygʻun rivojlantirish natijasida mustaqil fikrlaydigan, pedagogik muloqotni samarali boshqaradigan, turli kommunikativ vaziyatlarga moslasha oladigan, hamkorlikka tayyor va kasbiy jihatdan raqobatbardosh pedagoglarni tayyorlash imkoniyati oshadi.

Abstract: *This article analyzes the pedagogical potential of crowdsourcing technology in developing active citizenship competence among university students. In the context of the modern digital learning environment, crowdsourcing technology is presented as an important factor in fostering young people's social engagement, collaborative working skills, ability to solve problems collectively, and civic responsibility.*

Keywords: *active citizenship competence, crowdsourcing technology, digital pedagogy, university students, innovative education, social engagement, collaboration, educational technologies.*

ЗНАЧЕНИЕ ТЕХНОЛОГИИ КРАУДСОРСИНГА В ФОРМИРОВАНИИ КОМПЕТЕНЦИИ АКТИВНОЙ ГРАЖДАНСТВЕННОСТИ У СТУДЕНТОВ ВЫСШИХ УЧЕБНЫХ ЗАВЕДЕНИЙ

Аннотация: *В данной статье анализируется педагогический потенциал технологии краудсорсинга в формировании компетенции активной гражданственности у студентов высших учебных заведений. В условиях современной цифровой образовательной среды технология краудсорсинга рассматривается как важный фактор развития социальной активности молодежи, навыков совместной деятельности, способности к коллективному решению проблем и гражданской ответственности.*

Ключевые слова: *компетенция активной гражданственности, технология краудсорсинга, цифровая педагогика, студенты высших учебных заведений, инновационное образование, социальная активность, сотрудничество, образовательные технологии.*

OLIY TA'LIM TALABALARIDA FAOL FUQAROLIK KOMPETENSIYASINI RIVOJLANTIRISHDA KRAUDSORSING TEXNOLOGIYASINING AHAMIYATI

Annotatsiya: *Mazkur maqolada oliy ta'lim talabalarida faol fuqarolik kompetensiyasini rivojlantirishda kraudsorsing texnologiyasining pedagogik imkoniyatlari tahlil qilingan. Zamonaviy raqamli ta'lim muhiti sharoitida kraudsorsing texnologiyasi yoshlarning ijtimoiy faolligini oshirish, hamkorlikda ishlash ko' nikmalarini rivojlantirish, muammolarni jamoaviy ravishda hal qilish qobiliyatini shakllantirish hamda fuqarolik mas'uliyatini kuchaytirishning muhim omili sifatida yoritilgan.*

Kalit so' zlar: *faol fuqarolik kompetensiyasi, kraudsorsing texnologiyasi, raqamli pedagogika, oliy ta'lim talabalari, innovatsion ta'lim, ijtimoiy faollik, hamkorlik, ta'lim texnologiyalari.*

INTRODUCTION.

The rapid development of digital technologies and the transformation of contemporary society have significantly changed the requirements placed on higher education. Universities are increasingly expected not only to provide students with professional knowledge and skills but also to prepare socially responsible, initiative-driven, critically thinking, and civically engaged individuals. In this context, the development of active citizenship competence among university students has become an important component of modern higher education. Such competence enables young people to understand social processes, participate consciously in community life, express and justify their positions, cooperate with others, and contribute to solving socially significant problems.

Active citizenship competence can be regarded as an integrated combination of civic knowledge, social responsibility, critical thinking, communication and collaboration skills, initiative, participation, and readiness to contribute to public life. Its development requires educational approaches that move beyond the traditional transmission of theoretical knowledge and create opportunities for students to participate directly in decision-making, problem-solving,

discussion, project activities, and socially oriented initiatives. Therefore, the introduction of interactive and digitally supported educational technologies is becoming increasingly important in contemporary university education.

One of the promising approaches in this regard is crowdsourcing technology. Crowdsourcing generally involves engaging a large group of people in generating ideas, collecting information, evaluating proposals, solving problems, or jointly creating socially valuable outcomes through open and collaborative participation. In an educational environment, crowdsourcing can be transformed into an effective pedagogical mechanism through which students participate in identifying problems, proposing solutions, discussing alternative viewpoints, evaluating initiatives, and collectively developing projects.

The pedagogical value of crowdsourcing lies in its participatory nature. Unlike educational models in which students mainly act as recipients of information, crowdsourcing creates conditions for them to become active contributors to the learning process. Students are encouraged to express their opinions, present arguments, respond to the ideas of others, make collective decisions, and take responsibility for the outcomes of collaborative activities. These processes are directly related to the cognitive, communicative, social, and value-oriented components of active citizenship competence.

Crowdsourcing technology also contributes to the development of critical and analytical thinking. When students are exposed to multiple ideas and different interpretations of the same social problem, they need to compare information, assess the reliability and relevance of arguments, distinguish well-grounded proposals from weak ones, and formulate their own positions. Consequently, crowdsourcing-based activities can create an educational environment in which civic participation is closely connected with evidence-based reasoning and responsible decision-making.

LITERATURE REVIEW AND METHODOLOGY

The processes of globalization and digital transformation are creating new challenges for the education system. In particular, developing active citizenship competence among university students is one of the pressing pedagogical issues of our time. Active citizenship competence refers to an individual's ability to participate consciously in social life, demonstrate social responsibility, respect democratic values, and engage effectively in collective activities.

The development of information and communication technologies has led to the widespread use of innovative approaches in education. One such approach is crowdsourcing technology, which enables problems to be solved through collective thinking and broad-based collaboration. In the pedagogical process, crowdsourcing is emerging as an effective means of developing students' independent thinking, initiative, and civic responsibility.

Today, higher education institutions increasingly need to employ interactive methods in order to develop university students into socially active and responsible individuals. From this perspective, examining the role and potential of crowdsourcing technology in education is of both scientific and practical significance.

The term crowdsourcing (from the English words "crowd" and "sourcing," meaning the use of resources) refers to solving problems and creating new brands by drawing on the creativity, experience, and knowledge of ordinary people. Crowdsourcing technology makes it possible to use human resources to find solutions to business, social, and political problems. In 2003, Luis von Ahn and his team first put into practice, through the concept of crowdsourcing, the idea of "human computation," demonstrating that tasks that computers cannot perform can be completed collectively, easily, and quickly [1, p. 115]. However, the term was introduced into academic discourse by Jeff Howe in 2006. Jeff Howe, a contributor to Wired magazine, defines the concept in his work "The Rise of Crowdsourcing" as follows: "...smart companies ... the latent talents of the crowd. The labor is not always free, but it costs a lot less than paying traditional employees. It's not outsourcing; it's crowdsourcing" [2, p. 133]. The phenomenon was initially introduced as a corporate concept. Another Western scholar, Brabham, explains crowdsourcing as follows: "A company presents a problem. A large audience then begins proposing solutions to that problem. The company is able to select the solutions it considers most appropriate. This method is called crowdsourcing" [3, p. 394]. Based on the definitions above, crowdsourcing can be divided into two categories. It can be applied in real-life domains (business, social life, and politics) and in education as a problem-solving process (understanding a problem, putting it to a community vote, searching for solutions, collecting information and opinions, and providing support services).

Based on the definitions of crowdsourcing presented above, it is appropriate to clarify the meaning and essence of the term "crowdsourcing pedagogical technology."

RESULTS AND DISCUSSION

Crowdsourcing pedagogical technology is a modern teaching method based on using the knowledge, ideas, and experience of a broad community (students, teachers, specialists, or internet users) in the educational process [4, p. 82]. Crowdsourcing pedagogical technology is also an important direction in modern education, promoting collaboration, openness, and innovative thinking. It is particularly effective in digital learning environments. The essence of this

pedagogical technology is that the opinions and knowledge of a large number of participants are engaged in solving problems, developing projects, or generating new ideas during the learning process.

In the education system, crowdsourcing pedagogical technology provides the following opportunities:

1.Develops students' collective thinking skills;

2.Develops the ability to solve problems collaboratively;

3.Supports students' social initiatives;

4.Creates an environment for democratic dialogue;

5.Encourages students to participate actively in social projects.

In learning activities organized on the basis of crowdsourcing technology, students develop proposals concerning specific social problems, engage in discussion, and make collective decisions. This strengthens their active civic position. The application of crowdsourcing pedagogical technology in higher education contributes to the development of students' independent thinking, creative approaches, teamwork, competence in solving problem situations, and digital skills.

The following table presents a methodology for applying crowdsourcing pedagogical technology to develop active citizenship competence among university students:

Components	Content
Purpose of the methodology	To increase students' engagement in the learning process, create knowledge collaboratively, develop innovative thinking, and build digital competencies;
Key objectives	1. Develop students' teamwork skills; 2. Teach students to find creative solutions to problem situations; 3. Organize collaboration through digital platforms; 4. Strengthen independent learning activities;
Principles	Scientific validity, systematicity, interactivity, collaboration, openness, innovation, student-centeredness, continuity;
Participants	Professors and teachers, students, academic groups, research teams;
Pedagogical conditions	Availability of a digital learning environment, access to and ability to work with internet platforms, a motivating environment, and collaborative learning;
Methods	Brainstorming, project method, case study, problem-based learning, debate, group discussion, peer learning, gamification;
Tools	Moodle, Google Classroom, Padlet, Trello, Mentimeter, Zoom, Telegram groups, Google Docs;
Forms of learning	Individual work, group work, online collaboration, blended learning, seminars and training sessions;
Expected outcomes	Students' creative thinking is developed, communicative competence is formed, digital literacy is enhanced, and the ability to solve problems collaboratively is strengthened;

Crowdsourcing pedagogical technology for developing active citizenship competence among university students can be implemented through the following stages:

Stages	Content	Teacher's activity	Student's activity
Stage 1: Diagnostic preparation	Identify students' needs and competencies	Conducts diagnostics and identifies problems	Assesses their own capabilities
Stage 2: Planning	Design crowdsourcing activities	Selects the platform and tasks	Accepts the assigned tasks

Stage 3: Collaboration process	Organize group and collective activities	Acts as a moderator	Develops ideas and solutions
Stage 4: Analysis and synthesis	Select and discuss the results	Identifies the most effective proposals	Presents the results
Stage 5: Evaluation	Determine the effectiveness of the activities	Conducts monitoring and evaluation	Conducts self-assessment
Stage 6: Reflection	Analyze the experience gained	Provides a final conclusion	Provides feedback

Crowdsourcing pedagogical technology is one of the effective pedagogical tools for developing active citizenship competence among university students. This technology enhances students' social engagement, teamwork, and civic initiative, while a learning process organized on the basis of crowdsourcing helps create an environment of democratic dialogue and collaboration. Students' digital competencies are also developed, increasing their adaptability to contemporary society. The use of crowdsourcing technology in higher education contributes to the development of civil society. In the future, it would also be advisable to develop new pedagogical mechanisms by integrating crowdsourcing pedagogical technology with artificial intelligence and adaptive learning platforms.

The analysis of crowdsourcing technology in the context of higher education demonstrates that it can serve as an effective pedagogical mechanism for developing active citizenship competence among university students. Its significance lies primarily in transforming students from passive recipients of educational information into active participants who generate ideas, discuss socially relevant issues, evaluate alternative solutions, collaborate with others, and take part in collective decision-making.

Active citizenship competence is multidimensional and includes civic knowledge, social responsibility, critical thinking, communication, collaboration, initiative, digital literacy, and readiness for participation in community life. Crowdsourcing creates favorable conditions for the integrated development of these components because students encounter real or simulated social problems and are required to contribute to their solution through individual and collective intellectual activity.

A particularly important advantage of crowdsourcing is its ability to connect theoretical learning with practical civic experience. Participation in crowdsourcing-based projects enables students to identify problems, gather and analyze information, formulate proposals, defend their viewpoints, assess the ideas of peers, and participate in selecting appropriate solutions. As a result, civic competence develops not merely as theoretical knowledge about citizenship but as a practical ability to participate responsibly and constructively in social processes.

Crowdsourcing technology also strengthens the communicative and collaborative dimensions of citizenship. Through collective discussion and problem-solving, students learn to listen to others, respect different perspectives, provide evidence-based arguments, negotiate, resolve disagreements constructively, and achieve shared objectives. These abilities are essential for meaningful participation in democratic and socially responsible environments.

CONCLUSION.

In addition, crowdsourcing is particularly relevant to the development of digital citizenship. As civic interaction increasingly occurs through online platforms and digital communication channels, students need experience in responsible digital participation. Crowdsourcing activities can help develop skills related to online collaboration, information verification, digital ethics, constructive communication, and responsible engagement with public issues.

However, the pedagogical effectiveness of crowdsourcing depends on purposeful instructional design. Teachers should establish clear objectives and participation criteria, ensure equal opportunities for involvement, encourage evidence-based discussion, provide constructive feedback, and organize reflection on both the process and outcomes of collaborative activities. Attention should also be paid to possible challenges such as unequal participation, superficial contributions, misinformation, digital exclusion, and the dominance of more active participants.

Therefore, crowdsourcing should not be understood simply as a technological instrument. In higher education, it should be viewed as a pedagogically structured model of participatory learning that combines digital technology, collaboration, problem-solving, and civic engagement. When integrated systematically into educational practice, it can contribute to creating a learning environment in which students develop both professional competencies and the capacity to act as responsible members of society.

In conclusion, the integration of crowdsourcing technology into university education has significant potential for strengthening active citizenship competence. By promoting initiative, critical reflection, collective intelligence, social responsibility, and meaningful participation, crowdsourcing can support the preparation of university graduates who are capable not only of adapting to social change but also of contributing actively and responsibly to the development of their communities and society.

ИННОВАЦИОННАЯ МОДЕЛЬ ФОРМИРОВАНИЯ ЦИФРОВОЙ КОММУНИКАЦИОННОЙ КУЛЬТУРЫ БУДУЩИХ УЧИТЕЛЕЙ

Аннотация: *В данной статье систематически исследуется историческое развитие концепции педагогической этики и ее трансформация в современном информационном обществе. Актуальность исследования обусловлена растущим разрывом между традиционными нормами педагогического общения и правилами поведения в виртуальном пространстве в результате цифровизации образовательной среды.*
С использованием метода ретроспективного анализа в статье раскрываются этапы развития педагогической этики от классического периода до современной концепции “Нетикета” (сетевой этики). Анализируя роль педагогического наследия (взгляды Коменского, Сухомлинского) в цифровой коммуникации, автор демонстрирует механизмы адаптации этических норм к технологической среде. В ходе исследования проведен сравнительный анализ теоретических концепций цифровой гражданственности и киберэтики зарубежных ученых, таких как В. Ши, М. Риббл и Л. Флориди. Основная новизна статьи заключается в том, что этика цифрового общения трактуется не просто как набор правил, а как неотъемлемая часть “виртуальной ответственности” и “цифровой культуры” субъектов педагогического процесса. В заключении представлены педагогические рекомендации по преодолению проблем этики цифровой коммуникации и определены направления будущих исследований.

Ключевые слова: *Ретроспективный анализ, педагогическая этика, Нетикет, цифровое общение, киберэтика, педагогическое наследие, цифровая гражданственность, академическая честность.*

AN INNOVATIVE MODEL OF FORMING A FUTURE TEACHER’S DIGITAL COMMUNICATION CULTURE

Abstract: *This article provides a systematic study of the historical development of the concept of pedagogical ethics and its transformation in the modern information society. The relevance of the study is driven by the increasing gap between traditional norms of pedagogical communication and rules of conduct in virtual spaces, resulting from the digitalization of the educational environment. Using the method of retrospective analysis, the article reveals the developmental stages of pedagogical ethics from the classical period to the modern concept of "Netiquette" (network ethics). By analyzing the role of pedagogical heritage (the views of Comenius and Sukhomlinsky) in digital communication, the author demonstrates the mechanisms through which ethical norms adapt to the technological environment. The research includes a comparative analysis of theoretical concepts regarding digital citizenship and cyber-ethics by foreign scholars such as V. Shea, M. Ribble, and L. Floridi. The primary novelty of the article lies in interpreting digital communication ethics not merely as a set of rules, but as an integral part of the "virtual responsibility" and "digital culture" of the subjects involved in the pedagogical process. The conclusion offers pedagogical recommendations for addressing ethical challenges in digital communication and outlines directions for future research.*

Keywords: *Retrospective analysis, pedagogical ethics, Netiquette, digital communication, cyber-ethics, pedagogical heritage, digital citizenship, academic integrity.*

KIRISH

Raqamli texnologiyalarning jadal rivojlanishi ta'lim tizimidagi muloqot shakllari, o‘ qitish usullari va pedagogik munosabatlarni tubdan o‘ zgartirmoqda. Natijada, raqamli muloqot madaniyati, axborotdan mas'uliyatli foydalanish, shaxsiy ma'lumotlarni himoya qilish va onlayn muhitda axloqiy me'yorlarga rioya qilish masalalari pedagogik tadqiqotlarning muhim sohalariga aylandi. Pedagogikaning rivojlanishi davomida raqamli muloqot va etika masalalari dastlab texnologiyalardan foydalanish madaniyati doirasida o‘ rganilgan bo‘ lsa, bugungi kunda ular raqamli kompetensiya, media savodxonligi, sun'iy intellekt etikasi kabi zamonaviy tushunchalar bilan uzviy bog‘ liq holda o‘ rganilmoqda.

Bugungi kunda ta'limning raqamlashishi nafaqat texnologik jarayon, balki axloqiy-pedagogik hodisa sifatida ham namoyon bo‘ lmoqda. An'anaviy "ustoz-shogird" munosabatlarining virtual olamga ko‘ chishi muloqot madaniyatining yangi qirralarini, xususan, Netiket tushunchasini ilmiy iste'molga olib kirdi. Ushbu evolyutsiyani o‘ rganish kelajak pedagoglari uchun raqamli gigiyena va etik normalarni shakllantirishda muhim ahamiyat kasb etadi. Pedagogik etikadan raqamli etikaga o‘ tish shunchaki format o‘ zgarishi emas, balki pedagogik muloqot paradigmasining yangilanishidir. Quyida ushbu jarayonning eng muhim jihatlarini kengaytirilgan holda tahlil qilamiz. XXI asrning birinchi choragiga kelib, ta'lim tizimi misli ko‘ rilmagan global transformatsiyani boshidan kechirmoqda. Raqamli texnologiyalarning ta'lim jarayoniga shiddat bilan kirib kelishi nafaqat o‘ qitish metodikasini, balki pedagogik muloqotning fundamental axloqiy asoslarini ham tubdan o‘ zgartirdi. An'anaviy sinf xonalaridagi "yuzma-yuz" muloqot o‘ rnini virtual makon, ijtimoiy tarmoqlar va messenjerlar egallashi natijasida pedagogik etika muammosi yangi, yanada murakkab bosqichga ko‘ tarildi. Bugungi kunda pedagogik hamjamiyat oldida turgan eng dolzarb masalalardan biri – ko‘ p asrlik pedagogik qadriyatlarni saqlab qolgan holda, raqamli muhit uchun xos bo‘ lgan yangi xulq-atvor kodeksi – "Netiket" (tarmoq etikasi) madaniyatini shakllantirishdir. Raqamli muloqotda emotsional aloqalarning zaiflashishi, anonimlik hissi va masofaviylik pedagogik muloqotda "axloqiy vakuum" paydo bo‘ lishi xavfini tug‘ dirmoqda.

ADABIYOTLAR TAHLILI

Pedagogik etika muammosi klassik pedagogikada Yan Amos Komenskiy[5], I.G. Pestalotsi, keyinchalik esa V.A. Suxomlinskiy[14] va A.S. Makarenko kabi yirik namoyandalar tomonidan fundamental darajada o‘ rganilgan. Biroq, raqamli muloqot etikasi nisbatan yangi soha bo‘ lib, u xorijiy tadqiqotlarda V. Shi[11], M. Ribble[10], L. Floridi[3] kabi olimlar tomonidan "Raqamli fuqarolik" va "Axborot etikasi" kontekstida tahlil qilingan. O‘ zbekiston pedagogika fanida ham ushbu sohani retrospektiv va evolyutsion nuqtayi nazardan tadqiq etishga ehtiyoj yuqori.

Mahalliy tadqiqotchilar orasida N.A. Muslimov pedagog kasbiy kompetentligini shakllantirish muammolarini tadqiq etib, zamonaviy o‘ qituvchi innovatsion texnologiyalar va axborot madaniyatini puxta egallashi lozimligini ta'kidlaydi. Olimning fikricha, axborot muhitida samarali faoliyat yuritish pedagogning kasbiy muvaffaqiyatini belgilovchi asosiy omillardan biridir.

M. Usmonboyeva va O‘ . Tolipov pedagogik texnologiyalarni qo‘ llashning samaradorligi ko‘ p jihatdan o‘ qituvchining kommunikativ kompetentligiga bog‘ liq ekanligini qayd etadilar. Ularning fikricha, hamkorlikka asoslangan ta'lim muhitini yaratishda zamonaviy kommunikatsiya vositalaridan foydalanish muhim ahamiyatga ega. Shuningdek, Sh. Sharipov innovatsion ta'lim texnologiyalarini qo‘ llash bo‘ lajak pedagoglarning mustaqil fikrlash, axborotni tahlil qilish va kommunikativ faoliyatini rivojlantirishga xizmat qilishini ta'kidlaydi.

Mazkur maqolaning maqsadi – pedagogik etika tushunchasining shakllanish tarixini tahlil qilish orqali uning raqamli transformatsiya davridagi evolyutsiyasini aniqlash hamda zamonaviy "Netiket" normalarining pedagogik mazmunini ochib berishdan iborat. Ushbu maqsaddan kelib chiqib, quyidagi vazifalar belgilandi:

Pedagogik etika tushunchasining tarixiy-pedagogik bosqichlarini retrospektiv tahlil qilish.

An'anaviy axloqiy normalarning raqamli muhitga ko' chishidagi transformatsion jarayonlarni o' rganish.

Xorijiy olimlarning tarmoq etikasi borasidagi nazariy konsepsiyalarini umumlashtirish.

Zamonaviy pedagog uchun raqamli muloqot madaniyatining ustuvor yo' nalishlarini belgilash.

TADQIQOT METODOLOGIYASI

Maqolada tarixiy-mantiqiy tahlil, qiyosiy-pedagogik yondashuv hamda retrospektiv tahlil metodlaridan foydalanildi. Tadqiqot obyekti sifatida pedagogik muloqotning axloqiy normalari, predmeti sifatida esa ushbu normalarning raqamli muhitdagi evolyutsion o' zgarishlari olindi.

Raqamli muloqot etikasining shakllanishini tushunish uchun avvalo klassik pedagogik merosga nazar tashlash lozim. Sokrat va Platon davridan boshlab muloqotning dialektik shakli va o' zaro hurmat tamoyillari pedagogik etikaning poydevori bo' lib xizmat qilgan. Yan Amos Komenskiy asarlarida o' qituvchining axloqiy qiyofasi dars berishning texnik usullaridan ustun turishi ta'kidlangan. Ushbu davrda etika asosan "yuzma-yuz" muloqotga asoslangan bo' lib, u vafodorlik, andisha va nutq madaniyati kabi tushunchalar bilan cheklangan edi. An'anaviy pedagogikada o' qituvchi va o' quvchi o' rtasidagi muloqot sinxron (bir vaqtda va bir joyda) va verbal (so' z orqali) xarakterga ega edi. Raqamli muhitda esa muloqot quyidagi xususiyatlarni kasb etdi:

Asinxron muloqot: Xabarlar darhol o' qilmasligi yoki javob berilmasligi mumkin. Bu o' qituvchidan "kutish etikasi" va vaqtni boshqarish (taym-menejment) madaniyatini talab qiladi.

Vizual va matnli dominantlik: Yuzma-yuz muloqotdagi intonatsiya va tana tili o' rnini "emoji"lar, stikerlar va punktuatsiya egalladi. Bu esa o' qituvchi nutqining yozma madaniyatiga (Digital Literacy) yangicha talablar qo' ydi.

Tadqiqot davomida foydalanilgan ilmiy manbalar sifatida falsafa, axloqshunoslik va pedagogikaga oid darsliklar, monografiyalar hamda so' nggi yillarda chop etilgan ilmiy maqolalar tanlab olindi. Bu manbalar tadqiqot xulosalarining ilmiy asoslanganligini va metodologik ishonchliligini ta'minladi.

NATIJALAR VA ULARNING TAHLILI

Pedagogik tadqiqotlarda muloqot etikasining rivojlanishini shartli ravishda uch bosqichga bo' lish mumkin:

I bosqich: Klassik pedagogik etika (XX asr o' rtalarigacha) Ushbu bosqichda asosiy e'tibor o' qituvchining shaxsiy fazilatlari va sinfdagi xulq-atvoriga qaratilgan. V.Suxomlinskiy pedagogik etikaning markaziga "bola qalbini tushunish" va "so' z mas'uliyati"ni qo' ygan[14].

II bosqich: Kommunikativ yondashuv (XX asr oxiri)

Axborot almashinuvi tezlashishi bilan pedagogik muloqotning psixologik aspektlari o' rganila boshlandi. Muloqotning demokratik uslubi va hamkorlik pedagogikasi tushunchalari shakllandi.

III bosqich: Raqamli transformatsiya va "Netiket" (XXI asr boshi) Internetning ommalashishi bilan muloqot makoni o' zgardi. Tadqiqotchi V.Shi (Virginia Shea) 1994-yilda "Netiquette" asari orqali tarmoq muloqotining 10 ta asosiy qoidasini fanga kiritdi[11].

Xorijiy olimlarning tadqiqotlarida raqamli etika muammosi quyidagi fundamental nazariyalar asosida tahlil qilinadi: A. Margaret Roks va M. Ribble raqamli etikani "Raqamli fuqarolik" (Digital Citizenship)ning 9 ta elementidan biri sifatida ko' rsatadi. Uning fikricha, o' quvchilarga texnologiyadan foydalanishni o' rgatishdan oldin, ularga tarmoqdagi mas'uliyatni o' rgatish lozim[10].

B. N. Baym va "Ijtimoiy muloqot" nazariyasi Nensi Baym raqamli muloqotda "shaxsiyatning namoyon bo' lishi" (Self-presentation) masalasini o' rgangan. Uning tahlilicha, tarmoqdagi pedagogik etika o' qituvchining shaxsiy va professional chegaralarini (boundary management) saqlash san'atidir[2].

Raqamli etika muammosi xorijiy pedagogikada turli rakurslarda o' rganilgan:

1-jadval.

Raqamli etika muammosini o' rgangan olimlarning qarashlari

Olim	Asosiy nazariyasi / Qarashi
Virginia Shea	Tarmoq etikasining universal qoidalari (odam ekanligingizni unutmang, haqiqiy hayotdagi qoidalarga amal qiling).
L.Floridi	"Informatsion etika" (Information Ethics) - axborotni yaratish va tarqatishning ontologik mas'uliyati.
H.Rheingold	Virtual jamoalarda o' zaro ishonch va ijtimoiy kapitalni shakllantirish etikasi.

Xorijiy tadqiqotlar shuni ko' rsatadiki, raqamli muloqotda "anonimlik" va "masofa" insonlarda mas'uliyat hisining pasayishiga olib kelishi mumkin. Shu sababli, pedagogikada kiberetika tushunchasi tobora kengroq o' rganilmoqda. Pedagogik tadqiqotlarda muloqot muammosining evolyutsiyasini quyidagi jadval orqali ko' rishimiz mumkin:

2-jadval.

Pedagogik tadqiqotlarda muloqot muammosining evolyutsiyasi

Davr	Muloqot markazi	Asosiy qadriyat	Pedagogik tadqiqot yo‘ nalishi
1970-1980 yy.	O‘ qituvchi (Avtoritar/Demokratik)	Shaxsiy namuna	O‘ qituvchining nutq madaniyati va pedagogik takt.
1990-2000 yy.	Hamkorlik (Dialogik)	O‘ zaro hurmat	Shaxsga yo‘ naltirilgan ta’limda muloqot psixologiyasi.
2010-2026 yy.	Tarmoq (Gibrid muloqot)	Raqamli mas’uliyat	Netiket, kiberetika va sun’iy intellekt etikasi.

Pedagogik tadqiqotlar evolyutsiyasi shuni ko‘ rsatadiki, etika tushunchasi statik emas. Agar avvalari pedagogik etika faqat “nima demoqlik” va “qanday ko‘ rinish” bilan bog‘ liq bo‘ lsa, bugun u:

Raqamli iz (Digital footprint) mas’uliyati;

Kiberbulling (tarmoqdagi tazyiq)ga qarshi kurash;

Intellektual mulk va ma’lumotlar daxlsizligini o‘ z ichiga oladi.

Bugungi tadqiqotlarda “Netiket” muammosi quyidagi yo‘ nalishlarda dolzarb bo‘ lib qolmoqda:

Emotsional intellekt va raqamli empatiya: Ekran ortidagi insonning his-tuyg‘ ularini anglash va unga nisbatan axloqiy munosabatda bo‘ lish. Akademik halollik (Integrity): Plagiatga qarshi kurash va manbalardan foydalanish etikasi[4].

Media-gigiyena: Axborot oqimidagi “fake” (yolg‘ on) ma’lumotlarni saralash va ularni tarqatmaslik mas’uliyati.

An’anaviy pedagogik merosdan zamonaviy “Netiket”ga o‘ tish – bu axloqiy normalarning inqirozi emas, balki ularning yangi texnologik muhitga moslashishidir. Pedagog olimlar uchun asosiy vazifa – klassik etika tamoyillarini saqlab qolgan holda, raqamli avlodga tarmoq madaniyatini o‘ rgatishning pedagogik modellarini ishlab chiqishdan iborat. Raqamli muloqot etikasining evolyutsiyasi shuni ko‘ rsatadiki, bugungi pedagog nafaqat bilim beruvchi, balki raqamli dunyo mediatori (vositachisi) hamdir. Retrospektiv tahlil asosida aytish mumkinki, an’anaviy pedagogik etika prinsiplari yo‘ qolgani yo‘ q, aksincha, ular yangi – virtual makonda yanada murakkabroq va mas’uliyatliroq shaklga kirdi. Kelajak pedagogikasida “Netiket” fani o‘ quv dasturlarining ajralmas qismiga aylanishi zarur. Raqamli muloqot va etika muammosining pedagogik tadqiqotlardagi evolyutsiyasini o‘ rganish natijasida quyidagi fundamental xulosalarga kelindi: Etik normalarning transformatsiyasi: Pedagogik etika o‘ z mohiyatini yo‘ qotgani yo‘ q, balki u “yuzma-yuz” muloqot tizimidan “ekranlararo” muloqot tizimiga moslashdi. Bu jarayonda Netiket shunchaki tartib-qoidalar majmui emas, balki raqamli dunyoda shaxsning axloqiy o‘ zligini namoyon qilish vositasiga aylandi. Pedagogik mas’uliyatning kengayishi: Zamonaviy o‘ qituvchi nafaqat o‘ z fanining mutaxassisi, balki o‘ quvchilar uchun raqamli madaniyat namunasi (role model) bo‘ lishi lozim. Retrospektiv tahlil shuni ko‘ rsatdiki, klassik pedagogikadagi “ustoz odobi” bugungi kunda “raqamli iz” (digital footprint) va axborot gigiyenasi tushunchalari bilan to‘ ldirilishi shart[5].

Tadqiqotlar shuni ko‘ rsatadiki, raqamli etikani shakllantirishda faqat taqiqlarga tayanib bo‘ lmaydi. Bu jarayon o‘ quvchida raqamli empatiya va kiber-mas’uliyat tuyg‘ ularini tarbiyalash orqali amalga oshirilishi lozim. Istiqboldagi vazifalar: Pedagogik tadqiqotlarning keyingi bosqichi sun’iy intellekt (AI) bilan muloqot etikasi va virtual borliqdagi axloqiy chegaralarni belgilashga qaratilishi zarur. Bu esa o‘ z navbatida ta’lim standartlariga “Raqamli etika” modullarini kiritishni taqozo etadi[6].

XULOSA

Bugungi kunda pedagogik oliy ta’lim muassasalarining vazifasi nafaqat o‘ z fani bo‘ yicha chuqur bilimga ega mutaxassis tayyorlash, balki raqamli dunyoda muloqot qila oladigan madaniyatli shaxsni shakllantirishdan iboratdir. Raqamli muloqot madaniyati – bu shunchaki texnik ko‘ nikma emas, balki pedagogik mahoratning zamonaviy ko‘ rinishidir. POTMlarda ushbu madaniyatni shakllantirish uchun yetarli resurslar va texnologik imkoniyatlar mavjud bo‘ lib, ularni tizimli ravishda ta’lim jarayoniga integratsiya qilish dolzarb masaladir. Zamonaviy oliy pedagogik ta’limning fundamental vazifasi faqatgina kompetentli mutaxassis tayyorlash bilan cheklanib qolmasdan, balki shiddat bilan o‘ zgarib borayotgan raqamli voqelikda kasbiy faoliyatni madaniyatli tashkil eta oladigan shaxsni shakllantirishga yo‘ naltirilgan. Global axborotlashuv jarayonlari ta’lim muhitining aralash (hybrid) va masofaviy shakllarga o‘ tishini ta’minladi.

Bu holat pedagogik oliy ta’lim muassasalari (POTM) oldiga yangi talabni qo‘ ydi: bo‘ lajak o‘ qituvchi virtual makonda nafaqat bilim uzatuvchi, balki yuksak muloqot madaniyati va etik normalar tashuvchisi bo‘ lishi lozim. Raqamli muloqot madaniyati – bu texnik savodxonlik, kiberetika va pedagogik mahoratning sintezi bo‘ lib, u bo‘ lajak pedagogning professional imidjini belgilovchi asosiy omildir. Bugungi kunda POTMlarda ushbu madaniyatni shakllantirish uchun keng ko‘ lamli tashkiliy, texnologik va metodik imkoniyatlar mavjud. Biroq, ushbu imkoniyatlardan foydalanish darajasi

ko‘ pincha texnik vositalar bilan cheklanib qolmoqda, muloqotning etik va tarbiyaviy jihatlari esa kurikulumdan tashqarida qolmoqda. Ushbu maqolaning dolzarbligi POTM o‘ quv jarayoniga raqamli etika modullarini tizimli integratsiya qilish zarurati bilan belgilanadi.
